# ***Worldwide Tax Summaries***

## Corporate Taxes 2011/12

All information in this book, unless otherwise stated, is up to date as of 1 June 2011.

# Foreword

Welcome to *Worldwide Tax Summaries – Corporate Taxes 2011/12*, which gives you quick access to information on corporate tax rates and rules in 146 countries worldwide.

The country summaries – written by our local PwC tax specialists – include information about changes in legislation, residency, gross income, deductions, tax credits and incentives, tax administration, other taxes, and tax rates. All information in this book, unless otherwise stated, is up to date as of 1 June 2011. An online version of these summaries, plus additional information on individual taxes, is also available to you at www.pwc.com/taxsummaries. Our online tax summaries are updated regularly, to make sure you always have the latest information.

If you have any queries, or need more detailed advice on any aspect of tax, please get in touch with us. The PwC tax network has member firms throughout the world who can offer you high quality advice and support, whenever and wherever you need it, and our specialist networks can provide both a domestic and cross-border perspective to the tax challenges you are facing. We've also included, for reference, a list of some of our key network and industry specialists at the back of this book, to help you locate the right person to help you.

I hope you will find these summaries useful.

## Significant developments

As of 30 January 2011, the supply of drugs and health services provided by private or public institutions are subject to a reduced valued-added tax (VAT) rate of 10%.

As of 1 February 2011, taxpayers who, in the course of their business activities, provide services in certain listed professions are required to register for VAT purposes in Albania, regardless of their annual turnover. *See Value-added tax in the Other taxes section for the listed professions.*

The Albanian Parliament approved a fiscal amnesty presented by the government for entities and individuals. The fiscal amnesty covers (i) non-declared capital and (ii) tax and customs liabilities.

Please note that a possible change in the corporate income tax (CIT) rate might be approved by the Albanian Parliament. Based on a Draft Law issued recently, the CIT rate will become progressive based on the profit margin (taxable profit/taxable income) of the taxpayer. The Draft Law provides the following tax rates:

- 10% for taxpayers with a profit margin which does not exceed 10%.
- 20% for taxpayers with a profit margin between 20% and 30%.
- 30% for taxpayers with a profit margin greater than 30%.

## Taxes on corporate income

Albanian law applies the principle of worldwide taxation. Resident entities are taxed on all sources of income in and outside the territory of Albania, while non-resident entities are taxed on income generated only in the territory of Albania.

The corporate income tax (CIT) rate in Albania is 10%. CIT is assessed on the taxable profits calculated as taxable income less deductible expenses.

## Corporate residence

Based on Albanian legislation, a legal entity is deemed to be resident in Albania if it has its head office or its place of effective management in Albania.

### Permanent establishment (PE)

PE in Albania means a fixed place of business where an entity carries out its business activities, including but not limited to an administration office, a branch, a factory, a workshop, and a construction or installation site.

The determination of a PE, where applicable, is based on the provisions of a double tax treaty (DTT) which Albania has entered into with a number of countries. In addition, when dealing with DTT provisions, the Albanian tax authorities refer to the Organisation for Economic Co-operation and Development (OECD) commentaries.

## *Other taxes*

### *Value-added tax (VAT)*

The standard VAT rate is 20%, and the standard VAT period is the calendar month.

Taxable transactions include goods and services supplied domestically as well as the import of goods into Albania by a taxable person. The following transactions are also taxable:

- Transactions performed for no consideration or for a consideration less than the market value.
- Barter transactions.
- The private use of taxable goods by a taxable person (self-supply).

The VAT on machinery and equipment imported by Albanian registered entities for own use in their business activity (i.e. not for resale) is subject to the VAT deferral scheme under which the payment of the VAT is postponed up to 12 months with a possibility of extension for an additional 12 months period.

#### Determination of VAT taxpayers

Taxable persons are all individuals and legal entities registered, or required to be registered, for VAT purposes.

The VAT registration threshold in Albania is annual turnover over of 5 million Albanian leke (ALL) (EUR 37,000). Any person providing taxable supplies and whose annual turnover does not exceed ALL 5 million (EUR 37,000) is not required to register, although voluntary registration is possible.

As of 1 February 2011, taxpayers who, in the course of their business activities, provide services in any of the following listed professions are required to register for VAT purposes in Albania, regardless of their annual turnover:

- Lawyer
- Engineer
- Attorney (notary)
- Laboratory technician
- Specialist doctor
- Designer
- Dentist
- Economist
- Specialist dentist
- Agronomist
- Pharmacist
- Certified Public Accountant
- Nurse
- Approved Accountant
- Midwife
- Property evaluator
- Veterinarian
- Hotelier business
- Architect

#### VAT obligations for non-resident entities

Non-resident entities which carry out business activities in Albania are subject to 20% VAT in Albania when services rendered are related to immovable property located in Albania or services are rendered in Albania. In both cases, total turnover must exceed ALL 5 million (EUR 37,000) per annum.

If the above conditions are met, the non-resident entity (i.e. not registered with the Albanian tax authorities) is obliged to register and pay VAT in Albania by nominating a tax representative.

In case of a non-resident entity's non-compliance, the tax liabilities and respective penalties derived from such non-compliance is paid by the local beneficiary of these services.

**Reduced-rate goods and services**
As of 30 January 2011, the supply of drugs and health services provided by private or public institutions are subject to a reduced VAT rate of 10%.

**Zero-rated goods and services**
The following goods and services are subject to 0% VAT in Albania:

- Export of goods.
- The provision of services relevant to the processing of semi-finished goods intended for export.
- The supply of goods and services related to the international transport of goods or passengers.
- The supply of goods and services in relation to trading and industrial activities at sea.

**VAT-exempt goods and services**
The following goods and services are exempt from VAT in Albania:

- The lease of land (unless the rental period does not exceed two months).
- The lease of buildings, except the cases where there is a contract between parties in which the supply is deemed as taxable.
- Financial services.
- Postal services (only if there are no imports or other postal service and the annual turnover doesn't exceed ALL 5 million).
- Gambling, casino, and totalisator services.
- Written media and books.
- Advertising in electronic media.
- Interest payments on leasing transactions.
- Export of services.
- The sale of land and buildings, although the construction process itself is subjected to VAT.
- The supply made by religious or philosophical organisations for the purpose of spiritual welfare against a reduced payment.
- The supplies of packages and materials used for the manufacture and confection of drugs.

**VAT reimbursement**
Taxable entities have the right to claim VAT reimbursement if the period in which VAT credits are carried forward exceeds three months and the total amount of VAT credits is equal to or above ALL 400,000 (EUR 2,965).

VAT registered taxpayers who are in a VAT credit position have the right to request (if all legal conditions are met) the reimbursement of the credit VAT within 30 days after the request is submitted to the relevant tax authority.

### VAT returns
The submission of VAT returns and sales and purchase books must be done electronically by all taxpayers.

Depending on the category of taxpayers, the electronic filing comes into force on the following dates:

- The deadline for the electronic filing of the VAT books is the fifth day of the following month.
- The deadline for the electronic filing of VAT returns and the payment of the related VAT liability is the 14th day of the following month.

### *Customs duties*
Albania uses the Harmonized Code System for tariff classification.

The custom duty rates range from 0% to 15%, depending on the type of goods.

Import of machineries and equipment for use in the taxpayer's business activity, are generally subject to custom duties at the zero rate.

Custom duties on imports of vehicles are 0%.

### *Excise duties*
Albania levies excise tax on the following products:

- Beer: ALL 30/litre for amounts less than or equal to 200,000 hectolitre/year; ALL 40/litre for amounts greater than 200,000 hectolitre/year.
- Wine: ALL 20 to 35/litre, depending on the amount in hectolitre/year.
- Other alcoholic drinks: ALL 100 to 400/litre.
- Tobacco: ALL 1,500 to 2,500/litre.
- Petroleum: ALL 20 to 50/litre.
- Fireworks: ALL 200/kg.
- Pneumatic tyres: ALL 20 to 40/kg for new purchased tyres and ALL 100/kg for used tyres.
- Reflector lamps: ALL 100/unit.
- Plastic, glass, and mixed packaging: ALL 100/litre, ALL 10/litre, and ALL 20/litre respectively.

The excise tax paid on fuel used in green houses as well as in production of industrial and agricultural products is reimbursable.

Plastic, glass, and mixed packaging used as input in the local recycling industries of these materials are reimbursed 50% of the excise paid for the packaging as per amount, terms, and procedures determined with the Decision of the Council of Ministers.

### *Stamp duties and notary taxes*
There are no stamp duties on the sale contract of land or other properties. There are, however, notary taxes which are, in nature, similar to stamp duties. The notary tax on sales contracts that relate to change in ownership of immovable properties is ALL 1,000. The notary tax on sales contracts that relate to change in ownership of movable properties is ALL 700.

Depending on the agreement reached between the seller and the buyer, the notary tax can be paid either by the seller, or by the buyer, or shared between both of them.

### *Property tax*
Property taxes are calculated based on the type of activity the business entity carries out.

| Type of activity | Tax rate (ALL/m2/year) |
|---|---|
| Commercial and services | |
| Health, craft, social, cultural, educational, and scientific services | 140 |
| Production activities | 140 |
| Commercial, administrative activities | 200 |
| Other commercial and services | 200 |
| Other (e.g. buildings owned by non-governmental organisation (NGOs) or foundations; damaged, amortized, non-functional buildings which are state-owned properties or privatised ex-state-owned properties in which no activity is performed) | 50 |

### *Registration taxes*
The fee for the registration of a business entity is ALL 100.

### *Tax on dividends*
The tax rate on dividends is 10% on the gross amount.

Companies have the obligation to pay the tax on dividends to the tax authorities by the 20th day of the month following the payment of the dividend but not later than 30 July of the year the financial results are approved, regardless of the fact of whether the dividend has been distributed or not to the shareholders.

## *Branch income*

Branch offices in Albania are subject to the same taxes as all other forms of legal entities.

## *Income determination*

### *Inventory valuation*
Inventory is valued at the end of each tax period using the methods stipulated in the Accounting Law, which should be applied systematically. The methods stipulated in the National Accountings Standards for the valuation of inventory at year end are the average cost and first in first out (FIFO) methods.

### *Capital gains/losses*
Capital gains/losses derived from the sale of a company's fixed assets are taxed at the same rate as the company's ordinary business income.

### *Dividend income*
Dividends and profit share paid by a resident, non-resident company, or partnership to a resident taxpayer is not subject to CIT for the resident taxpayer. This applies, despite the participation quote, in amounts or number of shares, in shareholder capital of the voting rights or participation in initial capital of the beneficiary.

*See Tax on dividends in the Other taxes section for more information on the taxation of dividend income.*

### Foreign income

Albanian resident corporations are taxed on their worldwide income. If a DTT is in force, double taxation is avoided either through an exemption or by granting tax credit up to the amount of the applicable Albanian income tax rate.

## Deductions

### Depreciation and amortisation

The reducing balance method of depreciation is used for buildings and machinery and other fixed structures installed in the building. They are depreciated at an annual rate of 5%. Computers, software products, and information systems are depreciated at a maximum rate of 25%. All other assets are depreciated at a maximum rate of 20%. Land, fine art, antiques, and jewellery are non-depreciable assets.

The amortisation of intangible assets is calculated separately for each asset using the straight–line method at the rate of 15%.

### Interest expense

Interest paid in excess of the average 12-month credit interest rate applied in the banking system, as determined by the Bank of Albania, is not deductible. Interest may also be limited by thin capitalisation rules *(see Thin capitalisation in the Group taxation section)*.

### Bad debts

Bad debts are only deductible if all of the following conditions are met:

- An amount corresponding with the bad debt was included earlier in income.
- The bad debt is removed from the taxpayer's accounting books.
- All possible legal action to recover the debt has been taken.

### Other deductions

Representation and reception expenses exceeding 0.3% of annual turnover are not deductible.

Sponsorship expenses exceeding 3% of profit before tax and sponsorships of press and publications exceeding 5% of profit before tax are also not deductible.

The costs of in-kind benefits not taxed via payroll, dividends, fines and other tax-related sanctions, expenses for gifts, and any expense which the taxpayer does not support with a fiscal invoice are not deductible.

The amounts allocated to special reserve accounts in banks and insurance companies are deductible, provided that they do not exceed the limits stated in the Bank of Albania regulations.

Employers' contributions towards the life and health insurance of employees are deductible.

### *Net operating losses*
Fiscal losses may be carried forward up to three years. Losses may not be carried forward if more than 25% of direct or indirect ownership of the share capital or voting rights of the company is transferred during the tax year.

Albanian legislation does not allow losses to be carried back.

## *Group taxation*

There is no group taxation in Albania.

### *Transfer pricing*
Transfer pricing adjustments may be made if the conditions set in a transaction between related parties differ from those that would have been set if the parties were independent. In particular, the following are regarded as related parties:

- A legal entity and any person who owns, directly or indirectly, at least 50% of the shares or voting rights in that entity.
- Two or more legal entities if a third person owns, directly or indirectly, at least 50% of the shares or voting rights in each entity.

### *Thin capitalisation*
The interest paid on outstanding loans and prepayments exceeding four times the amount of net assets is not deductible. This rule does not apply to banks and insurance companies.

### *Controlled foreign company (CFC) regime*
There is no CFC regime in Albania.

## *Tax credits and incentives*

The following entities are exempt from CIT:

- Foundations or non-banking financial institutions established to support development policies of the government through credit activities.
- Film studios and cinematographic productions (among other types of entity/ activity) that are licensed and funded by the National Cinematographic Centre.

### *Foreign tax credit*
Albania does not apply foreign tax credits except in the case of DTTs *(see Foreign income in the Income determination section)*.

## *Withholding taxes*

The gross amount of interest, royalties, dividends, and shares of partnerships' profits paid to non-resident companies is subject to a 10% withholding tax (WHT), unless a DTT provides for a lower rate.

The 10% WHT is levied on the gross amount of payments for technical, management, installation, assembly, or supervisory work, as well as payments to management and board members.

If a non-resident company does not create a PE in Albania, and a DTT exists between Albania and the home country of the non-resident company, the payment of WHT can be avoided.

### *Double tax treaties (DTTs)*

Albania has signed 35 DTTs, of which 30 are in force.

Withholding tax rates envisaged by applicable DTTs are provided in the following table:

| Recipient | Dividends (%) | Interest (%) | Royalties (%) | Applicable from |
|---|---|---|---|---|
| Austria | 5/15 | 5 | 5 | 1/1/2009 |
| Belgium | 5/15 | 5 | 5 | 1/1/2005 |
| Bosnia and Herzegovina | 5/10 | 10 | 10 | N/A |
| Bulgaria | 5/15 | 10 | 10 | 1/1/2000 |
| China | 10 | 10 | 10 | 1/1/2006 |
| Croatia | 10 | 10 | 10 | 1/1/1999 |
| Czech Republic | 5/15 | 5 | 10 | 1/1/1997 |
| Korea | 5/10 | 10 | 10 | 1/1/2009 |
| Kosovo | 10 | 10 | 10 | 1/1/2006 |
| Kuwait | 0/5/10 (3) | 10 | 10 | N/A |
| Egypt | 10 | 10 | 10 | 1/1/2006 |
| Estonia | 5/10 | 5 | 5 | N/A |
| France | 5/15 | 10 | 5 | 1/1/2006 |
| Germany | 5/15 | 5 | 10 | N/A |
| Greece | 5 | 5 | 5 | 1/1/2001 |
| Hungary | 5/10 | N/A | 5 | 1/1/1996 |
| Italy | 10 | 5 | 5 | 1/1/2000 |
| Ireland | 5/10 (5) | 7 | 7 | N/A |
| Latvia | 5/10 | 5/10 (2) | 5 | 1/1/2009 |
| Luxemburg | 5/10 | 5 | 5 | N/A |
| Macedonia | 10 | 10 | 10 | 1/1/1999 |
| Malaysia | 5/15 (6) | 10 | 10 | 1/1/1995 |
| Malta | 5/15 | 5 | 5 | 1/1/2001 |
| Moldova | 5/10 | 5 | 10 | 1/1/2004 |
| Netherlands | 0/5/15 (1) | 5/10 (2) | 10 | 1/1/2006 |
| Norway | 5/15 | 10 | 10 | 1/1/2000 |
| Poland | 5/10 | 10 | 5 | 1/1/1995 |
| Romania | 10/15 | 10 | 15 | 1/1/1995 |
| Russia | 10 | 10 | 10 | 1/1/1998 |
| Slovenia | 5/10 | 7 | 7 | 1/1/2010 |
| Serbia and Montenegro | 5/15 | 10 | 10 | 1/1/2006 |
| Sweden | 5/15 | 5 | 5 | 1/1/2000 |
| Switzerland | 5/15 | 5 | 5 | 1/1/2001 |
| Spain | 0/5/10 (4) | 6 | 10 (7) | 4/5/2011 |
| Turkey | 5/15 | 10 | 10 | 1/1/1997 |

Notes

1. If the recipient company owns directly or indirectly 50% of the capital of the paying company, 0% rate of the gross amount of the dividends applies. If the recipient company owns directly or indirectly 25% of the capital of the paying company, 5% rate of the gross amount of the dividends applies. A tax rate of 15% of the gross amount of the dividends applies in all other cases.
2. A tax rate of 5% of the gross amount of the interests applies in case of interests in a contracting state, which are paid to a loan granted by a bank or any other financial institution of the other contracting state, including investment banks and savings banks and insurance. A tax rate of 10% of the gross amount of the interests applies in all other cases.
3. If the recipient company or any other governmental body is resident of other contracting state, 0% rate of the gross amount of the dividend applies. If the recipient company (other than a partnership) owns directly or indirectly at least 10% of the capital of the paying company, 5% rate of the gross amount of the dividends applies. A tax rate of 10% of the gross amount of the dividends applies in all other cases.
4. If the recipient company (other than a partnership) owns directly or indirectly at least 75% of the capital of the paying company, 0% rate of the gross amount of the dividends applies. If the recipient company (other than a partnership) owns directly or indirectly at least 10% of the capital of the paying company, 5% rate of the gross amount of the dividends applies. A tax rate of 10% of the gross amount of the dividends applies in all other cases.
5. If the recipient company (other than a partnership) owns directly or indirectly at least 25% of the capital of the paying company, 5% rate of the gross amount of the dividends applies. A tax rate of 10% of the gross amount of the dividends applies in all other cases.
6. If the recipient company (other than a partnership) owns directly or indirectly at least 25% of the capital of the paying company, 5% rate of the gross amount of the dividends applies. A tax rate of 15% of the gross amount of the dividends applies in all other cases.
7. A tax rate of 10% of the gross amount of the royalties applies, unless it can be avoided.

## *Tax administration*

### *Returns*

The tax year is the calendar year. The final CIT return is due by 31 March of the year immediately following that tax year.

### *Payment of tax*

Predetermined advance payments of CIT are due by the 15th day of each month. Advance payments of CIT payable by the small business category are payable on a quarterly basis.

According to the tax laws, CIT is paid during the year on a prepayment basis. The amount of monthly CIT prepayments is determined as follows:

| Years of activities | Period from January to April | Period from May to December |
|---|---|---|
| Year 1 | Taxpayer's estimation | Taxpayer's estimation |
| Year 2 | Taxpayer's estimation | CIT of Year 1 divided by months of activity in Year 1 |
| Year 3 | CIT of Year 1 divided by months of activity in Year 1 | CIT of Year 2 less CIT prepaid during January to April in Year 2 divided by 8 months |

Companies should decide on the use of their prior fiscal year after-tax profit within six months of the subsequent year and submit the decision to the tax authorities no later than 31 July. The decision should state the amount allocated as statutory reserves, the amount to be used for investments and/or for increase in share capital, and the amount to be distributed as dividends.

Companies have the obligation to pay the tax on dividends to the tax authorities no later than 30 July of the year the financial results are approved, regardless of the fact of whether the dividend has been distributed or not to the shareholders.

### *Statute of limitation*

With regard to Albania's tax administration practices, the audit cycle's limitation period is five years.

## Significant developments

In April 2011, several changes to some tax codes were published which have significantly changed taxation in the real estate sector. The main changes, which are described in more detail throughout the rest of this summary, are the following:

- The real estate income tax rate on rental income has been reduced to an effective rate of 15%.
- Non-rented property is now rented at a 0.5% real estate income tax rate applied on the property value.
- The real estate transfer tax rate has been reduced to 2%.

## Taxes on corporate income

The standard corporate income tax (CIT) rate of 35% is levied on the taxable income of the following corporate income taxpayer groups (although, in practice, the last two are not applicable in actual Angolan economic reality):

- Group A – Tax is levied on actual profits as shown in taxpayers' accounting records (e.g. public and private companies, permanent establishments (PE) of foreign entities), adjusted accordingly with the provisions of the CIT Code.
- Group B – Tax is levied on taxpayers' presumable profit (taxpayers not included in groups A or C).
- Group C – Taxation is based on profits that taxpayers could normally earn/obtain (e.g. small family companies).

Resident entities are subject to CIT on worldwide income. Non-resident entities deemed to have a PE in Angola are subject to CIT on Angola-source income.

Special regimes, rules, and tax rates are provided for the oil and gas industry and the mining industry.

Exemptions from CIT are provided for:

- Agricultural companies (for up to ten years).
- Cooperatives.
- Culture associations.
- Non-resident shipping operators (as long as reciprocity exists).

### *Investment income tax (IAC)*
Investment income tax (Imposto sobre a Aplicação de Capitais or IAC) is due on interests, dividends, royalties, and other income of a similar nature. In Angola, the IAC code divides such income into two taxable sections as follows:

#### Section A
Section A investment income includes the following:

- Interest on credit facilities.
- Interest on loans.
- Income derived from deferred payments.

Tax is due at the moment that the interest or income is earned or at the moment when it is presumed to have been earned.

Note that a minimum annual interest rate of 6% is deemed on loan agreements and credit facilities.

#### Section B
Section B investment income includes the following:

- Dividends.
- Capital remunerations of members of 'cooperatives'.
- Bond interest.
- Interest on shareholders' loans.
- Income derived from profits of non-public interest entities not collected until the end of the year.
- Royalties.

For the purposes of this group of income, note that:

- The concept of royalties includes the remuneration of any kind attributed to the use of or consent to use copyrighted literature; arts or science works, including movies and films or recordings for radio or television transmissions; patents; brands; drawings or models of a plan; formulas; or secret processes. The concept of royalties also applies to the use of or the consent to use industrial, commercial, or scientific equipment and information related to an experience acquired on the industrial, commercial, or scientific sector.
- A minimum annual interest rate equal to the rate used by commercial banks on credit operations is deemed interest for shareholders' loans, except if proven that these loans do not earn any interest.

Tax is due at the moment the effective attribution of income (dividends) is earned (interest) or paid (other income).

#### Exemptions
The following income is exempt from IAC:

- Banks deposits interest, if paid by banks liable to Angolan CIT.
- Bank loans interest, if earned by banks liable to Angolan CIT.
- Interest on deferred payment of commercial transactions.
- Re-distribution of dividends already taxed.

**IAC rate**
The IAC rate is 15%, except for the following income for which the rate is 10%:

- Dividends.
- Capital remuneration of members of 'cooperatives'.
- Bond interest.
- Royalties.

Tax is withheld by the payer on Section B income.

For Section A income, tax is assessed by the competent local tax office. When the payment of that income is made to a non-resident entity, Angolan law provides that the tax payment obligation shifts to the Angolan resident entity paying the income.

Any IAC paid is regarded as a tax deductible cost and, in addition, 65% of that tax paid is deducted up to the CIT liability. The only exception will be any investment income tax paid on dividends exempted.

## *Corporate residence*

Business entities with a head office or effective management in Angola are considered resident entities and are taxed on worldwide income.

### *Permanent establishment (PE)*
Angola has not signed any double tax treaties, therefore its domestic tax provisions apply with regards to PE.

The Angolan concept of tax PE is inspired in the United Nations (UN) Double Tax Treaty Model. A foreign entity is deemed to create a PE in Angola if it:

- has a branch, an office, or place of management in Angola
- has a construction or installation site, or provides supervision over such site, only when such site or activities exceed a period of 90 days in any given 12 months period, or
- carries out services in Angola, including consulting, acting through employees or other personnel contracted for that end, when such services are provided for a period of at least 90 days in any given period of 12 months.

## *Other taxes*

### *Consumption tax*
There is no value-added tax (VAT) or sales tax in Angola. However, a consumption tax exists, which is similar to that of an excise duty. Local production, importation of goods, and a few services (e.g. hotels, restaurants, electricity, water supply, and telecommunications) are subject to this tax.

The rates vary from 2% to 30%, depending on the service or goods imported or produced locally.

### *Customs duties*
Duties are levied on imports at ad valorem rates varying from 2% up to 30%. The range of taxation for both consumption tax and import duties varies according to the type of goods. The rates are set out in the tariff book.

Listed equipment may be imported temporarily, if a bank guarantee is provided.

A 0.1% statistical fee and a 0.5% stamp duty is also due on importation plus custom fees (from 1% to 3%).

A special exemption regime applies for the oil industry for some listed equipment.

### *Stamp tax*
Stamp tax is payable on a wide variety of transactions and documents, at specific amounts or at a percentage based on value.

Important examples include:

- Receipts: 1%.
- Companies' incorporation: 0.20%.
- Share capital increase: 0.50%.

### *Real estate income tax (IPU)*
IPU is levied on rental income earned by individuals or companies owning real estate assets. It is based on actual rental income when the assets are leased and on the assets' registered value when the assets are not leased.

#### Leased assets
IPU is levied on rental income at a 25% rate.

The rental income is automatically reduced by 40% of its value, as it is presumed to finance all real estate related expenses.

Therefore, in practice, IPU applies at an effective 15% rate on rental income (i.e. 25% multiplied by 60% of rental income), with a minimum amount of 1% of the asset registered value.

A real estate asset is registered at the higher of (i) its valuation (based on criteria and tables to be published which will take into account the area (square metres) and the characteristics of the property) or (ii) the value of its latest transfer.

#### Assets that are not leased
IPU is levied as follows for assets that are not leased:

| Patrimonial value (AOA*) | IPU rate (%) |
|---|---|
| Up to 5 million | 0 |
| Over 5 million (on the excess) (1) | 0.5 |

Notes

* Angolan kwanza

1. An asset registered at AOA 35 million will pay IPU only on AOA 30 million, resulting in an IPU payable of AOA 150,000.

#### Exemptions
The only accepted exemptions of IPU will be the following:

- State public institutions and associations that are granted with the public utility statute.
- Property of Embassies or Consulates of foreign countries, provided there is reciprocity.
- Religious temples.

#### Payment
Rents paid by Angolan entities (individuals or companies) that carry out commercial activity must withhold the 15% IPU from rents paid. The IPU so withheld must be paid over to the tax authorities by the end of the following month.

For any other cases, owners of real estate assets must pay the IPU in January and July of the following year. At the request (by July each year) of the IPU taxpayer, if approved, the IPU is payable over four instalments in January, April, July, and October of the following year.

#### Filing requirements
IPU Model 1 must be filed by IPU taxpayers each January, disclosing the rents effectively received in the preceding year, distinguishing the leases agreed and received.

### *Real estate transfer tax (SISA)*
SISA is levied at a 2% rate for all acts that involve onerous permanent or temporary transmission of real estate. The value liable to tax is the higher of (i) the sale value or (ii) the registered value.

Exemptions of SISA are only applicable to the following entities:

- State public institutions and associations that are granted with the public utility statute.
- Property of Embassies or Consulates of foreign countries, provided there is reciprocity.
- Religious temples.
- Real estate transferred for less than UCF 78,000 (currently UCF 1 = AOA 88) only when (i) at the first sale and (ii) for residential purposes.

## *Branch income*

Branch taxable income is taxed on the same basis as separate legal entities. Income remitted by a branch to the head office is not subject to IAC.

## *Income determination*

### *Inventory valuation*
Inventory is valued at the historic acquisition cost. Any other method of valuation needs to be approved by the Tax Authorities.

### *Capital gains*
Capital gains arising from the disposal of fixed assets are taxed as part of normal income.

Capital gains are determined by the difference between the sales proceeds and the acquisition value, deducted from tax deductible depreciation, adjusted by a devaluation coefficient.

### *Dividend income*

Dividends received are exempt from CIT, provided that the share participation is owned for two consecutive years (or since the incorporation of the entity where the participation is held) and the share participation is not less than 25%.

Dividends from Angolan participations owned by insurance companies to fund their technical reserves are also exempt from CIT.

### *Interest income*

Interest from public bonds is exempt from CIT.

### *Rental income*

Rental income, as being liable to real estate income tax, is not liable to CIT.

### *Royalty income*

Royalty income is taxed as normal income. Any IAC paid is regarded as a tax deductible cost and, in addition, 65% of that tax paid is deducted, up to the CIT liability.

### *Foreign income*

An Angolan resident corporate income taxpayer is taxed on all its foreign income. Any income tax proved to be paid outside the country for activity carried on out outside the country will be credited against the CIT liability.

## *Deductions*

### *Depreciation*

Depreciation should be computed using the straight-line method; any other method must be approved by the tax authorities.

The tax depreciation rates should respect the limits imposed by Government Ruling 755/72, and, in absence in this Ruling, the tax authorities' interpretation, as follows:

| Type of asset | Rate (%) |
|---|---|
| Office building | 2 |
| Industrial building | 4 |
| Computers | 33.33 |
| Office equipment | 10 |
| Furniture | 10 |
| Software | 33.33 |
| Light passenger vehicles | 33.33 |

Depreciation not accounted for at cost is not permitted as a deduction in the following years.

30% of the increase on depreciation resulting from a legal revaluation of fixed assets is not accepted for tax purposes, as well as the total increase in depreciation resulting from free revaluation of the fixed assets.

### Bad debts
Write-off of debts is considered as deductible only if the write-off resulted from a bankruptcy court process.

### Provisions
The only provisions accepted as deductible for tax purposes are:

- Doubtful debts within an annual limit of 2% of the client's current total account value and provided that a 6% accumulated provision limit is not exceeded.
- Inventory depreciation within limits that vary from 1% and 8% (annual and accumulated) depending on the nature of the company's activity.
- Those respecting the limits and rules imposed by the Insurance Supervision Institute for insurance companies, as well as the Central Bank for Financial Institutions.
- Provisions for possible losses resulting from a court process.

### Charitable contributions
Donations are accepted as deductible up to a limit of 2% of the taxable income if the donations are granted to Angolan education, science, charity, and cultural institutes. If granted to Angolan government, central and local administration bodies, the donations are fully deductible.

### Net operating losses
Tax losses are deductible from the taxable income of the following three years. Carryback of losses is not allowed.

## Group taxation

There are no special rules for group taxation in Angola.

### Transfer pricing
Despite the existence of the arm's-length principle in Angolan corporate tax law, there are no detailed regulations on transfer pricing. Taxpayers should be aware that, in light of existing generic rules included in the corporate tax code, the tax authorities do have means to adjust inter-company charges.

### Thin capitalisation
There are no thin capitalisation rules in Angola.

## Tax credits and incentives

### Investment incentives
Profits retained and then reinvested by the company in new installations or equipment during the following three financial years may be deductible from taxable income during the following three years after the investment is finalised. Note that this benefit is not yet regulated.

Special regulations also provide tax and customs incentives for investment projects in strategic economic development areas and sectors. One such incentive can provide up to 15 years of CIT exemption.

### Foreign tax credit

Any income tax proved to be paid outside the country for activity carried out outside the country will be credit against the CIT liability.

## Withholding taxes

Withholding tax (WHT) is applicable on payments for services provided to Angolan entities. For Angolan taxpayers, this is regarded as an advance payment of the CIT due at the year-end. For non-resident companies, this is a final tax.

The payments subject to this WHT are those related to:

- Construction, improvement, repair, or conservation of immovable property withheld at a rate of 3.5% on the gross payments (CIT rate of 35% applicable on a 10% deemed margin).
- Other services, namely technical assistance and management fees, withheld at a rate of 5.25% on the gross payments (CIT rate of 35% applicable on a 15% deemed margin).

Due to the IAC, Angola does not have a separate WHT for dividends, interest, and royalties *(see the Taxes on corporate income section for more information)*.

## Tax administration

### Tax returns

The tax year follows the calendar year, and the annual CIT return must be submitted by the last business day of May of the year following the year to which the income relates.

### Tax payment

Tax is paid in four instalments. The first three correspond to advance payments based on the expected tax to be paid or, if unknown at that date, 75% of the taxable income computed on the previous year multiplied by the tax rate (35%). The instalments are paid in January, February, and March, and the final instalment is paid with the submission of the annual tax return on the last business day of May.

## Significant developments

There have been no significant corporate tax developments in Antigua and Barbuda during the past year.

## Taxes on corporate income

Companies incorporated in Antigua and Barbuda pay corporate income tax (CIT) on their worldwide income, with relief available under existing double taxation agreements (DTAs). Non-resident companies deriving income from Antigua and Barbuda are liable for CIT and should be registered if they have a physical presence in Antigua and Barbuda.

Antigua and Barbuda imposes a flat CIT rate of 25%.

Taxable income or chargeable income is ascertained by deducting from income all expenses that are wholly and exclusively incurred during the year in the production of the income. Chargeable income is normally arrived at by adjusting the net profit per the financial statements for non-taxable income, non-deductible expenses, and prior period losses up to 50% of chargeable income.

Where a person resident in Antigua and Barbuda makes to another person not resident in Antigua and Barbuda a payment which the payor is entitled to deduct in arriving at chargeable income, then a withholding tax (WHT) must be deducted. In addition, if the income received by the non-resident person would have been subject to tax under the Income Tax Act, then WHT must be deducted by the payor.

### Reduced CIT rate for certain financial institutions

Financial institutions licensed under the Banking Act that maintain, throughout the tax year, residential mortgage rates at or below 7% are subject to a reduced CIT rate of 22.5%.

## Corporate residence

A corporation is deemed to be a resident if it is incorporated in Antigua, if it is registered as an external company doing business in Antigua or if the central management and control of its business are exercised in Antigua.

### Permanent establishment (PE)

A permanent establishment (PE) is not defined in the Income Tax Act; however, any company which would meet the general definition of a PE must be registered.

## *Other taxes*

### *Value-added tax (VAT)*
Antigua and Barbuda Sales Tax (ABST) is a VAT applicable to a wide range of goods and services. The standard rate is 15%, and hotel accommodation carries a transitional rate of 10.5%.

A number of services, including financial services, local transportation, sale of residential land, education, long-term accommodation (greater than 45 days), and medical and veterinary services, are exempt from ABST. Certain supplies are zero-rated, including exports, basic food items, water, electricity for residential use, sale of new residential property, construction of new residential premises, and fuel. Intergroup transactions are taxable.

A period in the ABST Act represent one month. The threshold for registration is 300,000 East Caribbean dollars (XCD) in taxable activity per 12 month period.

### *Customs duties/import tariffs*
All imports are subject to import duties, ABST, Antigua and Barbuda Revenue Recovery Charge, and an environmental levy. In all instances, certain exemptions will apply.

Import duty is levied on a wide range of imported goods at rates from 0% to 70% as specified in the Custom Duties Act. Customs Duty is levied on goods based on the cost, insurance, and freight (CIF) values and rates determined by the Caribbean Community (CARICOM) Common External Tariff.

### *Antigua and Barbuda Revenue Recovery Charge*
Antigua and Barbuda Revenue Recovery Charge is applied at a flat rate of 10% on the CIF value on all goods imported into or produced in Antigua and Barbuda. Exemptions will include entities with which the Government has International Assistance Agreements, certain Government entities, and most supplies or imports of fuel.

### *Environmental levy*
Environmental levy is calculated based on dollar value rates from XCD 0.25 - XCD 2,000 and is used to finance the cost of protecting and preserving the environment.

### *Property taxes*
Property tax is levied at graduated rates on the basis of the market value of real property (as assessed by the Property Valuation Department) and its use (residential or commercial).

Property tax rates are as follows:

- Agricultural land: 0.10%.
- Residential land: 0.20%.
- Residential building: 0.30%.
- Buildings classified as other property: 0.50%.
- Land classified as other property: 0.40%.

Allowances and tax rebates are available as follows:

- Dwelling house allowance of XCD 150,000 from the taxable value.
- Rebates to pensioners of between 10% and 50% depending on the annual income of the pensioner.

- 5% rebate for payment of tax on or before the due date.
- New dwelling house will be exempt from tax for the first two years of being habitable.
- Between 25% and 100% tax rebate available for special development property and property for public use; 25% for hotels.

### *Non-citizens undeveloped land tax*
Undeveloped land tax is levied on the basis of the value of land owned by non-citizens which have not been developed.

Rates of tax are as follows:

- Second year of ownership: 5%.
- Third year of ownership: 15%.
- Fourth and subsequent years of ownership: 20%.

### *Stamp tax*
Stamp tax applies to a very wide range of transactions (e.g. bill of sale, leases, mortgages, contract, bill of lading). Stamp tax on transfer of real property and shares are specifically covered below.

#### Transfer of real property
Stamp tax is imposed on both the buyer and the seller and is levied on the consideration for the sale or the value of property as assessed by the Chief Valuation Officer, whichever is higher. The stamp tax for vendors is 7.5%, and the stamp tax for purchasers is 2.5%.

Non-citizens vendors are required to pay a land value appreciation tax at the rate of 5%, which is assessed on the difference between the value of property when purchased, plus improvements, and the value of property at the time of sale.

Non-citizens purchasers are also required to pay 5% of the value of property with reference to a non-citizens licence required to hold property in Antigua and Barbuda.

#### Transfer of shares
Stamp tax is imposed on both the buyer and the seller and is levied on the market value of the shares or book value of the shares, whichever is higher. The stamp tax for vendors is 5%, and the stamp tax for purchasers is 2.5%.

A non-citizen must obtain a license (at a cost of XCD 400) to hold shares or be a director in a company that owns land or has a lease on land in excess of five acres for a period greater than five years.

### *Life insurance premium tax*
A premium tax of 3% is levied on the premium income (net of agent's commission) of all life insurance companies, whether resident or non-resident.

### *General insurance premium tax*
A premium tax of 3% is levied on the premium income, excluding motor business (net of agent's commission), of all general insurance companies, whether resident or non-resident.

## Branch income

Branch income is taxed on the same basis and at the same rate as that of corporations. A resident branch of a foreign company shall be regarded as a separate company and shall be taxed on the same basis as that of a locally registered corporation.

Recharges of expenses from head office to the branch are subject to WHT at a rate of 25%. The recharges have to be justifiable, consistent, and cannot just be based on a percentage allocation.

## Income determination

### Inventory valuation

Inventories are generally stated at the lower of cost or net realisable value. First in first out (FIFO) and average cost methods of valuation are generally used for book and tax purposes. However, the Commissioner of Inland Revenue will normally accept a method of valuation that conforms to standard accounting practice in the trade concerned. Last in first out (LIFO) is not permitted for tax or book purposes.

### Capital gains

Capital gains are not subject to tax in Antigua and Barbuda.

### Dividend income

Dividends received by a company resident in Antigua from another company resident in Antigua are taxed at the CIT rate of 25%. Credit is given to the recipient for the tax already paid on the dividend in computing the tax liability.

### Stock dividends

An Antiguan corporation may distribute a tax-free stock dividend proportionately to all shareholders.

### Foreign income

An Antiguan corporation is taxed on foreign branch income as earned and on foreign dividends as received. Double taxation is avoided by means of foreign tax credits where active tax treaties exist and through deduction of foreign income taxes in other cases (the United Kingdom (UK) and CARICOM). There is also relief from Commonwealth taxes. *See Foreign tax credit in the Tax credits and incentives section for more information.*

## Deductions

### Depreciation

Depreciation allowed for tax purposes is computed by the diminishing-balance method at prescribed rates. Initial allowances are granted on industrial buildings and on capital expenditures incurred on plant and machinery by a person carrying on a trade or undertaking, as defined. In addition, an annual allowance of 2% is granted on all buildings. Conformity between book and tax depreciation is not required.

Any gain on the sale of depreciated assets is taxable as ordinary income up to the amount of tax depreciation recaptured.

### *Interest*
No deduction is allowed for interest on loans owing to shareholders, directors, their spouses, children or relatives, or to any related parties. Only interest paid to banks and financial institutions licensed under the Financial Institutions (Non-Banking) Act on loans borrowed at commercial rates and terms is deductible.

### *Restriction on rents paid*
Rents paid by a company to shareholders, directors, their spouses, children or relatives, or to any related parties in excess of 5% of the otherwise chargeable profits of the company may not be deducted.

### *Restriction on compensation*
Salaries, wages, directors' fees and other payments made for services rendered by the shareholders, directors, their spouses, children, or relatives in excess of 25% of otherwise chargeable profits may not be deducted.

### *Cultural and social contributions*
A deduction of 50% of all substantial contributions made by any person with respect to sport, education, or culture in Antigua and Barbuda is allowed against a person's assessable income from trade, business, or profession. Contributions must be in excess of XCD 10,000 in any assessment year, and deductions during any assessment year will be limited to XCD 250,000.

### *Net operating and capital losses*
Income tax losses may be carried forward for six years following the year in which the loss was incurred. However, the chargeable income of a company in any one income year may not be reduced by more than one half by losses brought forward. No carryback of losses is permitted.

### *Payments to foreign affiliates*
An Antiguan corporation may claim a deduction for royalties, management fees, and interest charges paid to foreign affiliates, provided the payments are equal to or less than what the corporation would pay to an unrelated entity. The deductibility of any payments to a foreign affiliate will be subject to an arm's-length test.

## *Group taxation*

Group taxation is not permitted in Antigua and Barbuda.

### *Transfer pricing*
There are no provisions for transfer pricing in the tax laws of Antigua and Barbuda.

### *Thin capitalisation*
There are no provisions for thin capitalisation in the tax laws of Antigua and Barbuda.

## *Tax credits and incentives*

Tax incentives are currently available under the following legislation.

### *Fiscal Incentives Ordinance (1975)*
The Fiscal Incentive Ordinance provides manufacturers of an 'approved product' with an exemption from taxes for varying periods, up to a maximum of 15 years. After the

period of exemption, relief by way of tax credits of up to 50% of CIT paid on profits derived from certain export sales may be obtained. The net losses arising during the tax holiday period (i.e. the excess of accumulated tax losses over total profits) may be carried forward and relieved against profits following the expiration of the tax holiday in accordance with the normal rules for set-off of losses.

***International Business Corporations (IBC) Act (1982)***

An IBC is an entity incorporated under the IBC Act for the purpose of carrying on international trade or business. The IBC structure allows for a comprehensive range of business opportunities including international banking, trust business, insurance, manufacturing, and other international trade activities to persons outside of Antigua and Barbuda within a tax-free environment. An IBC is exempt from the payment of CIT, ABST, and WHT.

***The Investment Authority Act (2006)***

The Investment Authority Act provides the framework for the promotion of investment opportunities in Antigua and Barbuda by introducing a system of registration of businesses, an investment code, and a range of incentives that are available to both resident and non-resident investors. The available incentives and concessions to which an investor may be entitled for consideration are as follows:

- Exemption from the payment of customs duty.
- Reduction of property tax.
- Exemption from CIT
- Reduction of stamp duty.
- Exemption from WHT.

The amount of the incentives and concessions depend on the amount of the investment and the number of employees in the proposed business.

The investment categories are as follows:

- Capital investment of up to XCD 1 million or employs up to 26 persons: This investor may qualify for exemption from the payment of customs duty on certain imports, reduction in property tax by up to 10%, exemption from the payment of CIT and WHT for up to three years, and a reduction of stamp duty by up to 10% on the sale of land and buildings used in the business operation.
- Capital investment of over XCD 1 million, employs over 26 persons, and has at least one director or owner who is a resident of Antigua and Barbuda: This investor could qualify for exemption from the payment of customs duty on certain imports, reduction in property tax by up to 20%, exemption from the payment of CIT and WHT for up to five years, and a reduction of stamp duty by up to 20% on the sale of land and buildings used in the business operation.
- Capital investment of over XCD 10 million, employs over 51 persons, and has at least one director or owner who is a resident of Antigua and Barbuda: This investor could qualify for exemption from the payment of customs duty on certain imports, reduction in property tax by up to 30%, exemption from the payment of CIT and WHT for up to ten years, and a reduction of stamp duty by up to 30% on the sale of land and buildings used in the business operation.
- Capital investment of over XCD 25 million, employs over 75 persons, and has at least one director or owner who is a resident of Antigua and Barbuda: This investor could qualify for exemption from the payment of customs duty on certain imports, reduction in property tax by up to 40%, exemption from the payment of CIT and

WHT for up to 12 years, and a reduction of stamp duty by up to 40% on the sale of land and buildings used in the business operation.
- Capital investment of over XCD 75 million, employs over 100 persons, and has at least one director or owner who is a resident of Antigua and Barbuda: This investor could qualify for exemption from the payment of customs duty on certain imports, reduction in property tax by up to 50%, exemption from the payment of CIT and WHT for up to 15 years, and a reduction of stamp duty by up to 50% on the sale of land and buildings used in the business operation.
- Capital investment of over XCD 100 million, employs over 150 persons, and has at least one director or owner who is a resident of Antigua and Barbuda: This investor could qualify for exemption from the payment of customs duty on certain imports, reduction in property tax by up to 75%, exemption from the payment of CIT and WHT for up to 20 years, and a reduction of stamp duty by up to 75% on the sale of land and buildings used in the business operation.

### *The Small Business Development Act (2007)*

The Small Business Development Act provides the framework for the growth of the small business sector in Antigua and Barbuda by introducing a system of registration of small businesses and a range of concessions which are available to the business. The available concessions to any small business that would be entitled for consideration are as follows:

- Concession on customs duty of up to 100% (includes raw material, building material, equipment, vehicles, furniture, furnishings, appliances, fixtures and fittings, tools, spare parts, machinery and equipment used in the construction and operation of the business).
- Property tax reduction of up to 75%.
- CIT exemption for a period not exceeding five years.
- CIT exemption after the initial five year period of up to 10%.
- WHT exemption for a period of up to three years.
- Stamp duty exemption on the registration of a mortgage.
- Stamp duty exemption on the transfer of property and any applicable non-citizen land holding licence.

A small business to which this Act applies must meet all of the following criteria:

- No more than 25 employees.
- Not a wholly owned or majority owned business or subsidiary of a larger company.
- Capital investment not exceeding XCD 3 million.
- Annual sales that do not exceed XCD 2 million.
- Majority owned by citizens of Antigua and Barbuda, or majority owned by non-citizens with all of the following restrictions:
  - Over 50% of the products must be exported.
  - Minimum investment of XCD 500,000.
  - At least 50% of the employees must be citizens of Antigua and Barbuda.
  - At least 40% of the goods and services used in production must be acquired from businesses in Antigua.

### *Foreign tax credit*

Double taxation is avoided by means of foreign tax credits where active tax treaties exist and through deduction of foreign income taxes in other cases (the United Kingdom and

CARICOM). A foreign tax credit is also available to persons in Antigua and Barbuda who have paid or are liable to pay Commonwealth income tax.

**Residents**
The relief available from tax in Antigua and Barbuda for a person resident in Antigua from tax paid in Antigua and Barbuda is the Commonwealth income tax rate if that rate does not exceed one-half the tax rate in Antigua and Barbuda. If the Commonwealth income tax rate exceeds the Antigua and Barbuda tax rate, then the relief will be limited to one-half the tax rate in Antigua and Barbuda.

**Non-residents**
The relief available from tax in Antigua and Barbuda for a person not resident in Antigua from tax paid in Antigua and Barbuda is one-half the Commonwealth income tax rate if that rate does not exceed one-half the tax rate in Antigua and Barbuda. If the Commonwealth income tax rate exceeds the Antigua and Barbuda tax rate, then the relief will be limited to the amount by which it exceeded one-half the rate of Commonwealth income tax.

No relief is available unless similar provisions exist in the laws of the relevant Commonwealth country.

## *Withholding taxes*

Tax is currently withheld from income as follows:

| Recipient | Dividend (%) | Dividend preferred shares (%) | Interest and rentals (%) | Management fees, royalties, and other payments to a non-resident (%) | Interest on bank deposits (%) |
|---|---|---|---|---|---|
| Resident corporations and individuals | 0 | 0 | 0 | 0 | 0 |
| Non-resident corporations | 25 | 25 | 25 | 25 | 25 |
| Non-resident individuals | 25 | 25 | 20 | 25 | 0 |
| **Residents of a CARICOM member state:** | | | | | |
| Corporations | 0 | 15 | 15 | 15 | 15 |
| Individuals | 0 | 15 | 15 | 15 | 0 |

Note that interest payments on bank deposits made to non-resident individuals are not subject to WHT. Interest payments on bank deposits made to non-resident corporations are taxed at the rate of 25%.

Where a non-resident lends money at arm's length for the purpose of promoting industrial, commercial, scientific, housing, or other development, the rate of WHT is 10%. Prior approval must be sought from the Commissioner of Inland Revenue, and it is recommended that Cabinet approval also be obtained.

WHT becomes due at the time of payment or accrual and must be paid within seven days thereof.

### *Tax treaties*
There is a tax treaty with the United Kingdom and a DTA between member states of CARICOM.

The UK tax treaty provides that persons in either the United Kingdom or Antigua and Barbuda are entitled to relief from CIT and WHT. The treaty allows for the following relief:

- Where a UK resident is liable to pay income tax in the United Kingdom in respect of the same income which is taxable in Antigua and Barbuda, one will be entitled to relief at a rate that is equal to the amount by which the tax rate in Antigua and Barbuda exceeds one half the UK rate.
- If the tax rate in Antigua exceeds the UK tax rate, then one will be entitled only to relief at a rate equal to the half the UK tax rate.

## *Tax administration*

### *Returns*

Taxes are assessed on a fiscal-year basis. The taxpayer must file a CIT return, which includes audited financial statements, within three months of the fiscal-year end. The authorities will subsequently raise an assessment.

If a return is not filed on a timely basis, the authorities have the power to issue estimated assessments. There is a 5% penalty for late filing (minimum of XCD 500). The taxpayer can object to assessments raised within 30 days and ask the Commissioner of Inland Revenue to review and revise. In the event that the objection is unsuccessful, the taxpayer may appeal to the Tax Appeal Board. The Commissioner of Inland Revenue has the power to enforce the collection of tax prior to the determination of any objection or appeal. The Commissioner also has the discretion to order a stay on the collection and payment of all or part of any assessed tax until such time as the objection or appeal is finalised if it would be unjust not to do so.

### *Payment of tax*

Advance tax is payable in monthly instalments and is ordinarily based on the tax chargeable and assessed in the previous fiscal-year. The standard amount of each instalment is determined as one-twelfth of the tax chargeable in the previous fiscal-year. If the assessment for the prior year has not been finalised, the Commissioner of Inland Revenue can raise an assessment based on best judgment.

The balance of tax due after deduction of advance tax, as notified in the assessment, is payable at the time of submitting the annual corporate tax return, which must not be later than three months after the financial year-end or one-month after service of the final assessment.

Tax is deemed to be in default if not paid within 30 days of the date on which it becomes due and payable. A penalty of 20% and interest of 1% per month is charged on unpaid taxes in default.

### *Statute of limitations*

The Inland Revenue Department can reassess CIT returns within a six year period. In addition, the Department can make additional assessments of tax, interest, or penalties.

## Significant developments

The 'Electronic Invoice' regime is expected to become mandatory for certain specific businesses such as software development, consulting, accounting and audit services, exporters, advertising, mobile telecommunications, rendering of services to government, etc. During 2011, the rest of the taxpayers may opt to apply for this regime as well.

On 1 January 2011, the 'tax on gift, inheritance, and charitable donations' ruled by Law 14,044 entered into force in the Province of Buenos Aires.

From a Tax Treaty network perspective, the Tax Information Exchange Agreement (TIEAs) signed with Monaco in October 2009 entered into force in August 2010 and in January 2011 for criminal and tax issues respectively.

## Taxes on corporate income

### Profits tax

The rate of profits tax on net taxable business profits is 35%. Legal entities resident in Argentina are subject to tax on Argentine and foreign-source income. Resident legal entities are able to claim any similar taxes actually paid abroad on foreign-source income as a tax credit. The tax rate applies on net income determined on a worldwide basis.

Corporations, limited liability partnerships, and branches, as well as other entities, are required to make a flat and final income tax withholding of 35% from dividend payments to resident or non-residents beneficiaries, to the extent that the amount of such dividends exceeds the net taxable income determined at a corporate level in accordance with the general tax rules.

Argentine-source income (e.g. royalties, interests) received by foreign entities is subject to withholding tax (WHT) in full and final settlement at source *(please refer to the Withholding taxes section)*.

### Tax on minimum notional income

In addition to the profits tax, there is a tax on minimum notional income. The rate is 1% on the value of fixed and current assets. The presumed tax, imposed annually, is applied only in excess of the profits tax of the same fiscal year. In addition, payment of this presumed tax, not offset by the profits tax, will be treated as payment on account of profits tax chargeable during a maximum period of ten years.

Banking and insurance entities are only subject to this tax on 20% of the corresponding taxable assets.

## *Corporate residence*

Corporate residence is determined on the basis of centres of activity, which may be the location of a company's economic activity or management activity. Centres of activity in Argentina of non-Argentine corporations are treated as permanent establishments (PE).

## *Other taxes*

### *Value-added tax (VAT)*

VAT is assessable on the sales value of products (e.g. raw materials, produce, finished, or partly finished merchandise) with few exemptions, most services (e.g. construction, utilities, professional and personal services not derived from employment, rental), and on import of goods and services. The VAT rate is 21%, although certain specific items are subject to a 10.5% and 27% rate. It is payable by filing monthly tax returns.

The increased rate of 27% applies to 'utilities services' (e.g. telecommunications, household gas, running water, sewerage, and energy) not rendered to dwelling-purposes real estate.

A reduced rate of 10.5% applies to certain transactions, including (but not limited to) the following:

- Construction of housing.
- Interest and other costs on personal loans granted to final consumers by financial institutions.
- Sales and imports of living bovine animals, supply of publicity and advertising in some specific cases.
- Any passenger transportation operating inside the country when the distance does not exceed 100 km.
- Medical assistance in some specific cases.
- Certain capital goods depending on the Custom Duty Code.

VAT paid on purchases, final imports, and rental of automobiles not considered as inventory, cannot be computed by the purchaser as a VAT credit. The same tax treatment applies to other services, such as those provided by restaurants, hotels, and garages.

#### VAT exemptions

Among others, the following transactions are exempt from VAT:

- Sales of books, ordinary natural water, common bread, milk, medicine, postage stamps, aircraft used in commercial activities and for defence or internal safety, and ships or boats acquired by the National Government.
- Supply of services such as: services rendered by the Government (National, Provincial, or Local) or by public institutions, school or university education provided by private institutions subject to public educational programmes; cultural services supplied by religious institutions; hospital and medical care and related activities, transportation services for sick or injured persons in vehicles specially designed for the purpose; tickets for theatre, cinema, musical shows, and sport

events, the production and distribution of motion picture films; local transport of passengers (e.g. taxis, buses) up to 100 km, international transportation.
- Rental of real estate for housing purposes.

### VAT exemption on importation
The following transactions shall be exempted from VAT:

- Final importation of goods qualifying for exemption from customs duties under special regimes for tourists, scientists and technicians, diplomatic agents, etc.
- Final importation of samples and parcels exempted from customs duties.

### VAT export reimbursement regime
Exports of goods and services are treated as a zero-rated transaction. Nevertheless, input VAT related to these transactions can either be used as a credit against output VAT or refunded pursuant to a special procedure.

Services rendered within the country shall be deemed to be exports if they are effectively applied or economically utilised outside the country.

Exporters must file an export return with the tax authorities, reporting the VAT receivables related to their exports to be reimbursed on VAT paid in relation to the export operations. This return has to be filed within the following tax period in which the export took place. A report certified by a public accountant with respect to the value, registrations, and other characteristics related to the refund must be attached to the export return.

The tax credit related to exports and other taxable activities can only be refunded in proportion to the exports, and can be fully refunded to a cap of 21% of the FOB value of the exported products.

There is no specific method stated in the legislation for allocating the tax credit related to exports, but taxpayers are able to use any methods of calculation that would be suitable to their business model. This calculation has to be approved by the tax authorities.

Finally, it is important to highlight that the tax authorities have to approve the tax credit to be refunded.

## *Turnover tax (gross income tax)*
Each of the 24 jurisdictions into which Argentina is divided imposes a tax on gross revenues from the sale of goods and services. Exports of goods are exempt, and certain industries are subject to a reduced tax rate. Rates, rules, and assessment procedures are determined locally.

Information on tax rates of the economically largest jurisdictions is provided as follows:

| Jurisdiction | General rate (%) | Commerce (%) | Services (%) | Industry (%) |
|---|---|---|---|---|
| Province of Buenos Aires | 3.5 | 3 to 4.5 | 3.5 to 4.5 | 1 to 3 |
| City of Buenos Aires | 3.75 to 4 | 3.75 to 4 | 3.75 to 4 | 1 to 3 |
| Córdoba | 4 | 2 to 7.5 | 4 | 0.5 to 1 |
| Mendoza | 3 | 3 | 3 | 1.5 |
| Santa Cruz | 2.5 | 2.5 | 2.5 | 1.5 |
| Santa Fe | 3.5 | 1 to 4.5 | 1 to 4.5 | 0 |

### *Excise taxes*
Excise tax is assessable on a wide variety of items sold in Argentina (not on exports), principally on tobacco, wines, soft drinks, spirits, gasoline, lubricants, insurance premiums, automobile tires, mobiles services, perfumes, jewellery, and precious stones. The bases of the assessment and tax rate of some items are as follows:

| | Rates (%) | |
|---|---|---|
| **Products** | **Nominal** | **Effective** |
| Tobacco | 16 / 20 / 60 | 19.05 to 25 |
| Alcoholic drinks | 20 | 25 |
| Beers | 8 | 8.70 |
| Soft drinks | 4 to 8 | 4.17 to 8.70 |
| Jewellery and precious stones | 20 | 25 |

### *Import and export duties*
The levels of import duty currently range between 0% and 35%, except in cases where a specific minimum duty is applied or which involves merchandise with a specific treatment. These percentages were established considering the individual competitive conditions prevailing in different production sectors and the relative advantages of contributing to the introduction of equipment and technology for local industry. In general, merchandise originating from LAIA (Latin America Integration Association – ALADI) countries is entitled to preferential duty.

In the case of export transactions, goods are valued based on the FOB clause, and the approach is based on their theoretical value, rather than a positive basis as in the case of imports.

Since March 2002, definitive exports of all goods are subject to export duties. The rates vary from 5% to 45%, depending on the tariff code of the merchandise (while 5% is typical, higher rates are considered for exports of agricultural products or hydrocarbons).

### *Stamp tax*
Stamp tax is levied by each of the 24 jurisdictions, and applies principally to contracts and agreements, deeds, mortgages, and other obligations, agreements and discharges of a civil, financial, or commercial nature of which there is written evidence or, in certain instances, that are the subject of entries in books of account. The average tax rate is 1% applicable on the economic value of the contract.

In the city of Buenos Aires, the standard tax rate is 0.8% of the aggregate amount of the transactions, contracts, and deeds that are subject to the stamp tax. Special rates of 0.5%, 1%, and 2.5% are also established; and, in the case of transactions involving uncertain consideration, a fixed tax of 1,000 Argentine pesos (ARS) is applicable (on the fulfilment of certain conditions).

### *Tax on financial transactions – on credits and debits on bank accounts*
Bank account movements (deposits and withdrawals) are subject to this national tax at the following rates:

- 0.6% of deposits and withdrawals in bank accounts opened in local financial entities.
- 1.2% of any transactions made in a bank without using a bank account.

The 34% or 17% of the tax on financial transactions effectively paid on bank account deposit transactions (0.6%) and movement of funds (1.2%), respectively, is creditable against income tax and minimum notional income tax and/or respective tax advances.

### *Wealth tax*

An annual wealth tax is levied on the shares or holding in the capital of local companies owned by individuals or undivided estates domiciled in Argentina or abroad, and/or companies and/or any other type of legal person domiciled abroad. It shall be assessed and paid directly by the local company, as a full and final payment on behalf of the shareholders (the issuing company has the right to recover from the shareholder the tax paid).

The applicable tax rate is 0.5% on the value of the participation, which is generally calculated on the difference between assets and liabilities arising from the financial statements closed at 31 December or during the respective fiscal year.

### *Payroll taxes*

Foreign and local nationals working for a local company must be included on the local payroll and will be considered as local employees for local labour, tax, and social security purposes. Both the local company and the employees will be subject to the corresponding regulations.

All the compensation paid in Argentina or abroad for work performed for the local company will be considered as local compensation and should be reported to the tax and social security authorities, as the case may be, and included in the salary slips and recorded in the local labour books.

The local employer must withhold income tax on an actual and monthly basis and make the corresponding payments to the tax authorities through monthly WHT returns. Individual tax rates range from 9% to 35%, and personal deductions are available.

The local entity must issue salary slips every month for each employee included on its payroll, considering the total compensation mentioned above.

Employer social security contributions add between 23% and 27% to payroll costs. There is a compulsory 13th-month salary. There is no restriction regarding the employment of foreigners, provided they hold working visas.

Workers' (Employees') Compensation: Argentine labour regulations determine different forms of compensation for employees. These include, but are not limited to, the following:

- Vacation compensation.
- Compensation in a case of termination of employment contract with employee (prior notice of dismissal and to a severance payment, both based on seniority).

Main social taxes and contributions assessable on salaries are as follows:

| | Percentage of gross monthly earnings (%) (including 13th month salary) | |
|---|---|---|
| | **Employer (2, 3)** | **Employee (1)** |
| Pension fund | 17/21 | 11 |
| National unemployment fund | – | – |

| | Percentage of gross monthly earnings (%) (including 13th month salary) | |
|---|---|---|
| | Employer (2, 3) | Employee (1) |
| Family allowances fund | – | – |
| Social services institute for pensioner | – | 3 |
| Social health care plan | 6 | 3 |
| Total | 23/27 | 17 |

Notes

1. Social security charges borne by employees are applicable up to a monthly salary cap which currently amounts to ARS 13,879 (updated as of May 2011).
2. Contributions made by employers are applicable to total compensation without application of any cap.
3. Employers' contributions to the national unemployment fund, family allowances fund, and social services institute for pensioners is paid at a unified rate of 17%. The rate is increased to 21% for companies whose main activity consists of rendering services or commerce, provided the amount of their average total annual sales for the last three years exceeds USD 11.56 million (at the current exchange rate of USD 1.00 = ARS 4.15 equivalent to ARS 48 million).

## *Branch income*

The rate of profits tax on net taxable profits from Argentine sources and from activities performed abroad by the branch is 35%. Branches are also subject to Minimum Notional Income Tax.

## *Income determination*

### *Inventory valuation*

Inventory valuation is based on the latest purchase. Thus, the last in first out (LIFO) method may not be elected for tax purposes. Conformity between book and tax reporting is not required.

### *Capital gains/losses*

Capital gains and losses attract normal profits tax treatment, except that losses from the sale of shares and other equity interests may be offset only against the same type of income.

### *Dividend income*

Dividends, including stock dividends, are not included in the tax base by the recipient if distributed by an Argentine company *(see the Withholding taxes section for additional information).* However, tax is levied if the dividends are distributed by a foreign company.

### *Foreign exchange gains/losses*

The general rule is that the foreign exchange results (gain or losses) have to be recognised on an accrual basis. However, in some cases, cash basis is applicable.

Foreign exchange losses can only be offset against foreign source taxable income.

### *Foreign income*

Foreign income received or held undistributed abroad (in case of investments in non-stock companies) by resident corporations is subject to tax. Argentina does not have a controlled foreign company (CFC) regime. Tax losses from a foreign source can only be offset against income from a foreign source.

## Deductions

Expenses necessary to generate, maintain, and preserve taxable income, and related to the company activity, are usually tax deductible, with a few exceptions, to the extent they are fair and reasonable.

### Depreciation and depletion

Depreciation is generally computed on a straight-line basis over the technically estimated useful life of the assets or, alternatively, over the standard useful life (e.g. machinery and equipment: 10 years; furniture: 10 years). Depreciation of buildings and other construction of real estate is 2% per annum on cost (on a straight-line basis), unless it can be proved that useful life is less than 50 years.

Depreciation of automobiles whose original cost exceeds ARS 20,000 is not deductible. Related expenses (gasoline vouchers, insurance, rentals, repairs and maintenance, etc.) are deductible up to an amount of ARS 7,200 per car per year.

Conformity between book and tax depreciation is not required.

Profit or loss on the sale of depreciated property is determined with reference to cost less depreciation, restated for inflation as at March 1992, and is included in ordinary taxable income.

Percentage depletion is available for natural resources (mines, quarries, woods).

### Charitable contributions

When made to societies and associations expressly exempt from assessment to profits tax, donations are admissible deductions up to a maximum of 5% of the donor's net taxable profits, provided certain requirements are fulfilled.

### Representation expenses

If adequately documented, representation expenses are permissible deductions up to 1.5% of the amount of salaries accrued during the fiscal year. According to the Regulatory Decree, representation expenses are payments made in order to represent the company in the market, to improve and maintain its relationship with suppliers and clients, etc.

### Directors' fees

Amounts up to the greater of 25% of after-tax profit or ARS 12,500 per individual are deductible in the financial year to which they apply, provided they are approved and available for the director before the due date of the tax return, or in a later year of payment.

### Taxes

Except for profits tax and the tax on minimum notional income, all taxes are deductible.

### Net operating losses (NOLs)

NOLs may be carried forward five years. Loss carrybacks are not permitted. Furthermore, foreign source losses must be offset by income from similar sources.

Losses on derivatives and hedging transactions can only be offset against income from the same transaction.

### *Payments to foreign affiliates*

Transactions between related parties should be at arm's *length (see Transfer pricing in the Group taxation section for more information)*. This principle is extended to transactions with companies located in low or no tax jurisdictions. Payments to foreign affiliates or related parties and companies located in low or no tax jurisdictions that represent income of Argentine source are tax deductible, provided they are paid before the due date for filing the tax return and the corresponding withholding is paid to the tax authorities. Otherwise they would be deducted in the fiscal year in which they are paid.

Technical assistance and services that involve transfer of technology should be covered by agreements duly registered with the National Institute of Intellectual Property for information purposes. These transactions are governed by the Transfer of Technology Law (Law No. 22,426).

### *Convertibility Law*

Although the Convertibility Law (which by Argentina's currency board established a fixed pegging of one-to-one parity between the peso and the US dollar during the 1990's and up to 2002 and inflation adjustment was not allowed) is no longer in place, the adjustment of inflation for tax purposes is not yet in force. There is a strong debate regarding the reinforcement of this procedure for fiscal years ended up to December 2002. However, a final decision has not yet been reached. The wholesale price index from 2004 to 2010 fluctuated in the range of 8% to 12% (reaching a peak of 15% in 2007) according to government statistics that seem to differ from those estimated by private consultants (2 or 2.5 times higher).

## *Group taxation*

Group taxation is not permitted in Argentina.

### *Transfer pricing*

The transfer pricing regulations governing inter-company transactions, adopt principles similar to those of the Organisation for Economic Co-operation and Development (OECD) pursuant to which companies must comply with the arm's-length principle in order to determine the value of goods and services in their transactions with foreign related companies.

The following taxpayers, among others, must generally file, together with their annual income tax return, a supplementary return (transactions encompassed by regulations governing transfer prices) and transfer pricing study:

- Taxpayers carrying out transactions with related individuals or legal entities set up, domiciled, or located abroad. Two or more persons are considered to be related parties when one of them takes part, either directly or indirectly, in the administration, control, or capital of the other, or when a person or group of persons takes part, either directly or indirectly, in the administration, control, or capital of those persons.
- Taxpayers carrying out transactions with related individuals or legal entities set up, domiciled, or located in countries with low or no taxation, whether related or not.

- Argentine residents carrying out transactions with PEs located abroad and owned by them.
- Argentine residents, owners of PEs located abroad, for transactions carried out by the latter with persons or other type of related entities domiciled, set up, or located abroad.

The Regulatory Decree provides specific rules to determine the fairness of the transfer pricing methodology. These rules are similar to those set by the OECD and contemplate six methods, including the following:

- Comparable Uncontrolled Price (CUP).
- Resale Price Method (RPM).
- Cost Plus.
- Profit Split Method (PSM).
- Transactional Net Margin Method (TNMM).
- Special Method for Export of goods with prices quoted in transparent markets.

There is no specific hierarchy, as each particular transaction must be analysed based on the assets, functions, and risks involved and on information available. Regulations establish that the most appropriate method is that which reflects the economic reality of the transactions.

### *Thin capitalisation*
Thin capitalisation rules apply as a restriction on the deductibility of interest arising from debts of a financial nature, contracted by taxpayers with controlling non-resident entities and can be summarised as follows:

- For interest subject to a 15.05% withholding (i.e. paid on loans granted by certain banking institutions), the portion of interest stemming from financial liabilities exceeding two times the shareholders' equity is not deductible for tax purposes and is treated as dividends.
- Interest subject to a 35% WHT is fully deductible.

According to the Regulatory Decree of the Income Tax Law, the thin capitalisation rules are also applicable to any case where a lower withholding rate of 35% is applicable (for instance, interest payments to a controlling company resident of certain tax treaty countries).

### *Controlled foreign company (CFC) regime*
Argentina does not have a CFC regime.

## *Tax credits and incentives*

### *Foreign tax credit*
National taxpayers are entitled to recognize a tax credit for any taxes actually paid in the countries where they have obtained foreign-source income, in respect of similar national taxes, up to a cap which is the increase in their Argentine tax liability due to the inclusion of the foreign income. Any excess not offset in a given fiscal year may be carried forward to the next five fiscal years.

### *Province of Tierra del Fuego Regime*
Companies set up in the province of Tierra del Fuego enjoy a general tax exemption and important benefits in customs matters, based on a system established by Law No.

19,640 and supplementary regulations. Tax exemption includes income tax, tax on minimum notional income, tax on personal wealth, and excise tax. The VAT benefit consists of the release from payment of the technical balance of the tax (VAT debits less VAT credits). Also, a reduction of the prevailing rate for tax on financial transactions and the exemption from taxation on the transfer of fuels is contemplated.

### *Mining activity*
Law No. 24,196/93 created an investment regime for mining activity and is applicable to natural and legal persons. Mining ventures included within this regime enjoy fiscal stability (i.e. tax rates will remain basically the same) for a term of 30 years, except for VAT, which will adjust to the general regime. Furthermore, the regime grants incentives for profits tax, tax on assets, import duties, and any other tax for introduction of certain assets. Additionally, the possibility to obtain a VAT reimbursement during the exploration stage set forth by Law No. 24,196/93 has been regulated by General Resolution 1641 (Official Gazette 27 February 2004).

### *Forestry*
Law No. 25,080 established an investment regime for plantation, protection, and maintenance of forests. It contains rules similar to those for mining activity tax incentives:

- Fiscal stability for a period of 30 years. The period may be extended to 50 years.
- Refund of VAT resulting from the purchase or final importation of goods, leases, or services effectively for forestry investment project in a period of less than 365 days.

### *Export incentives*
Exports of goods and services are exempt from VAT and excise taxes. The temporary importation of raw materials and intermediate and packaging goods for the manufacture of products for export is free from duties with the obligation of offering sufficient guarantees for the import. A reimbursement regime is in place for VAT credits paid to suppliers in relation to the export activity.

### *Oil and gas industry*
Argentine government has enacted Law No. 26,154 which grants attractive benefits to the oil and gas sector to encourage the exploration of the nation's hydrocarbons reserves.

This legislation grants special incentives to investments in underdeveloped regions, speeding reimbursement of VAT (after a three-month period, inputs will be credited against other federal taxes or returned to the taxpayer), exemption from import duties, and offering an accelerated depreciation – three years – for income tax purposes.

In addition, a three-year relief from minimum notional income tax, which is levied at 1% rate on the company assets, is provided by the law.

The incentive package will be in effect for 15, 12, or 10 years, depending on whether the activities are performed in areas identified as (i) continental platform, (ii) within the country other than continental platform, and (iii) currently in production, respectively.

The benefits noted above will apply to the exploration permits granted as of the enactment of the Law (1 November 2006) and up to five years, for the cases mentioned in (i), four years, for those described in (ii), and three years in the latter cases.

There also exists a Promotion Regime established by the Law No. 26,190, which grants similar benefits for the exploration of alternative sources of energy (e.g. wind energy).

### *Biotechnology industry*
A promotional tax regime for development and production of modern biotechnology was introduced by Law No. 26,270. Pursuant to this law, the beneficiaries of the projects that qualify for this regime will be entitled to the following benefits:

- Income tax: accelerated depreciation of capital goods, special equipment, parts, or components of newly acquired goods destined for the promoted project.
- VAT: Early refund of the tax applicable to the assets acquired for the project.
- Social security contributions: the amount representing 50% of social security contributions actually paid on the payroll salaries involved in the project shall be converted into a tax credit bond that may be applied to payment of national taxes.

### *Software industry*
A Software Promotion Regime was established through the enactment of Law No. 25,922. Taxpayers carrying out software related activities as their main purpose may qualify for the benefits granted by the legislation. The main tax incentives contemplated by the Regime are as follows:

- Fiscal stability for a ten-year period covering national taxes.
- Reduction of social security charges (70% of these charges may be credited against certain national taxes).
- Income tax relief (up to 60% of the applicable tax).

While most of the software related activities qualify for the fiscal stability benefit, the remaining incentives only apply to software research and development (R&D), quality control procedures, and software exports.

### *Province incentives on local taxes*
Most of the provinces have legislation establishing incentives for the development of industries within their boundaries, especially industries that utilise or develop their natural resources and provide work for their residents. The incentives, in general, consist of exemptions from provincial and municipal taxes.

Various provinces have investment promotion regimes. Even when there are certain differences among these regimes, generally they include the following incentives:

- Exemption from provincial taxes such as turnover tax, stamp duty, real estate tax.
- Reduced public utility rates.
- Support for infrastructure and equipment projects.
- Facilities for purchase, rental, or lease without charge of public property.

These regimes are not automatically applied, and a special procedure should be followed to be entitled to the respective benefits.

### *Free trade zones*
The free trade zones offer exporters the possibility to import free from customs duties, statistics rate, and VAT all the necessary equipment for construction of a ‘turnkey plant’ within the zones. Furthermore, exporters manufacturing within the zones enjoy the benefit of buying supplies and raw materials from third countries, without having to pay duties or taxes that lead to increased prices.

Customs authority regulating these goods considers them as stored in a third country; therefore, incoming products are subject to inspection with the sole purpose of classifying quantity and type. In other words, goods enjoy a duty-free status until they enter the Argentine customs territory. Goods may remain in the free zone for a maximum period of five years.

## Withholding taxes

### Equalisation corporate tax

Corporations, limited liability partnerships, and certain other entities are required to make a flat and final income tax withholding of 35% from dividend payments or profit distributions to resident or non-resident payees, to the extent that the amount of such dividends or profit distributions exceeds the taxable income of the distributing company, determined by applying the general tax rules (i.e. without considering any exemptions, abatements, and other adjustments arising from special promotional laws) included in their retained earnings at the end of the fiscal year, immediately preceding the date of payment or distribution.

### Other payments

Other payments to residents and to non-residents are subject to WHT rates as follows:

| Recipient | Interest (%) (1) | Royalties (%) (1, 2) |
|---|---|---|
| Resident corporations | 6/28 (3) | 6 (4) |
| Resident individuals | 6/28 (3) | 6 (4) |
| Non-resident corporations and individuals: | | |
| Non-treaty: | 15.05/35 | 21/28 |
| Treaty: | | |
| Australia | 12 | 10/15 |
| Belgium | 0/12 (5) | 3/5/10/15 |
| Bolivia | 15.05/35 | 21/28 |
| Brazil | 15.05/35 | 21/28 |
| Canada | 12.5 | 3/5/10/15 |
| Chile | 15.05/35 | 21/28 |
| Denmark | 12 (5) | 3/5/10/15 |
| Finland | 15 | 3/5/10/15 |
| France | 15.05/20 (6) | 18 |
| Germany | 10/15 (7) | 15 |
| Italy | 15.05/20 (5) | 10/18 |
| Netherlands | 12 | 3/5/10/15 |
| Norway | 12.5 (8) | 3/5/10/15 |
| Spain | 12.5 | 3/5/10/15 |
| Sweden | 12.5 | 3/5/10/15 |
| Switzerland | 12 | 3/5/10/15 |
| United Kingdom | 12 (5) | 3/5/10/15 |

Notes

1. Withholding from payments of interest and royalties to non-residents is based on a flat rate of 35% applied to an assumed percentage gross profit margin. This margin is not contestable, but the resultant rate may be limited by bilateral treaty. Under the 1998 tax reform, the general margin for interest paid for credits obtained abroad is 100%. However, a margin of 43% is applicable (i)

if the debtor is a local bank, (ii) if the creditor is a foreign financial institution located in a country not considered as a low or no tax jurisdiction, or in countries that have signed an agreement with Argentina for exchange of information and have no bank secrecy laws, which are under the supervision of the respective central bank, (iii) if the interest is paid on a loan dedicated to the purchase of tangible assets other than cars, (iv) if the interest is paid on debt certificates (private bonds) issued by local companies and registered in certain countries that have signed an agreement with Argentina for the protection of investments, and (v) on interest paid on time deposits with local banks. 'Royalties' covers a variety of concepts. The rates given in this column relate specifically to services derived from agreements ruled by the Foreign Technology Law, as follows:

a. Technical assistance, technology, and engineering not obtainable in Argentina: 21% (35% on assumed profit of 60%).
b. Cessation of rights or licenses for invention patents exploitation and technical assistance obtainable in Argentina: 28% (35% on assumed profit of 80%). On non-registered agreements the rate is 31.5% (profit of 90% is assumed) or 35% (profit of 100% is assumed), depending on the case.

Several other concepts of 'royalties' are subject to rates that, in turn, may be limited by treaty. A broad sample of these concepts and the non-treaty effective rates are set forth in *Note 2*.

2. Payments to non-residents (only) for 'royalties', rentals, fees, commissions, and so on, in respect of the following are subject to withholding at the rates given below on the basis of assumed gross profit margins *(Note 1)* unless limited by treaty. The treaty concerned should be consulted to determine any limitation in each case.

| Payment | WHT (%) |
|---|---|
| Freight and passenger bookings (other than those covered by special treaties), news and feature services, insurance underwriting | 3.5 |
| Containers | 7.0 |
| Copyright | 12.25 |
| Rental of movable assets | 14.0 |
| Motion picture, video, and sound tape rentals and royalties; radio, television, telex and telefax transmissions; any other means for projection, reproduction, transmission, or diffusion of image or sound; sale of assets located in Argentina (9, 10) | 17.5 |
| Rental of real estate (9) | 21.0 |
| Any other Argentine-source income (unless the non-resident is or was temporarily resident) | 31.5 |

3. The higher tax rate is applicable on non-registered taxpayers. On interest paid to corporations by financial entities or stock exchange/open market brokers, income tax must be withheld at 3% (10% if not registered); individuals are tax exempt.
4. Resident corporations and individuals who are registered for tax purposes are subject to 6% withholding (28% if not registered).
5. Interest is exempt if paid on credit sales of machinery or other equipment, specific bank loans at preferential rate or loans by public entities.
6. The treaty limits taxation of interest to 20% (registered).
7. The 10% rate is applicable to interest on credit sales of capital equipment, any bank loan, or any financing of public works; otherwise 15%.
8. Interest paid on loans with guarantee of the Norwegian Institute for Credit Guarantees or paid in relation to imports of industrial equipment is tax exempt.
9. Deduction of actual costs and expenses may be optionally exercised.
10. Gains on the sale of shares are exempt, except for companies, PEs, or other entities residing abroad whose main activity based on their statutes consists of investments to be made outside of their country of formation. These entities are subject to income tax withholding at the definite flat rate of 17.5%.

## *Tax administration*

### *Returns*

Tax is assessed on a fiscal-year, self-assessment basis. The due date for filing the profits and the notional income tax return is during the second week of the fifth month after the fiscal year end. Tax returns are filed electronically.

### *Payment of tax*

Instalment payments on account of both profits tax and minimum notional income tax must be made in the course of the tax year. The instalment payments must be made on a monthly basis beginning in the first month after the due date of filing of the tax returns.

### *Penalties*

Penalties derived from tax infractions may be applied by tax authorities, as follows:

- Failing to file the tax return: fines range between ARS 200 and ARS 400 (approximately USD 50 and USD 100).
- Tax omission or incorrect tax determination: The fines range from 50% to 100% of unpaid taxes or incorrect tax calculation.
- Tax avoidance: fines range between two and ten times the avoided tax.
- Certain tax infractions may be penalised by closing the business premises for three to ten days. In addition, fines ranging between ARS 300 and ARS 30,000 (approximately USD 73 and USD 7,300) may be imposed.
- Simple evasion: Entities or individuals evading payment of social security contributions or withholdings, or both, payable to the Tax Authorities under the social security regime, through deceitful declarations, malicious concealment, or any fraudulent or deceitful procedure, either through action or omission, in excess of ARS 20,000 per fiscal period, shall be punished with two to six years' imprisonment. Such amount will be ARS 100,000 in the case of taxes, it being applied by tax and by fiscal year.
- If the infringement qualifies as aggravated evasion: Imprisonment could be extended from three years and six months to nine years in certain situations.

### *Interest on late payments*

Late payment of taxes is subject to a monthly 3% interest rate. Interest will start accruing on the day after the filing due date.

## *Other issues*

### *Exchange control regime*

As a result of the devaluation of the Argentine peso at the beginning of 2002, several regulations were issued to limit the transfer of money abroad. They have been made more flexible up to date.

Regulations referring to the entrance of funds to the country, the obligation of liquidation of foreign currency in the Exchange Market of payments of exports of goods and services, remain in force. The terms to comply with the liquidation obligation vary between 60 and 360 days.

There are no restrictions for the payment abroad of interest, dividends, profits, royalties, and other commercial payments duly supported by the corresponding documentation. Payment abroad for other concepts may be subject to further filing requirements.

In addition, it should be particularly highlighted that a rule issued by the central bank in mid-2005 requires a compulsory one-year temporary deposit equivalent to 30% of funds brought by non-residents to Argentina, which must be kept in a reserve (encaje) for the term of one year. This deposit is made in foreign currency and does not earn interest.

There are some exceptions, for instance, direct investments such as interest in Argentine companies (minimum 10%) or real estate are not subject to this rule, or if the funds were borrowed for the acquisition of fixed assets and the re-payment term is longer than two years.

### *Legal entities*

Foreign companies in Argentina, carrying out their business or activity in Argentina, must have a local legal vehicle, of which the most common legal entity types are the following:

- Branch.
- Corporation (Sociedad Anónima or SA).
- Local Limited Liability Company (Sociedad de Responsabilidad Limitada or SRL).

Argentine Corporations and Limited Liability Partnerships, as Argentine residents, are subject to the Argentine tax system. Branches of foreign companies, whatever the nature of their activities, are taxed under the same rules as those applicable to Corporations and Limited Liability Partnerships.

Several documents are required to register an entity with the relevant authorities. Some of said documentation must be filed in the original language, duly translated and certified with the Apostille issued pursuant to The Hague Convention or legalized by the Argentine Consulate of the company's place of origin.

At present, the minimum capital requirement to incorporate an SA is ARS 12,000 (approximately USD 2,800). There are no special requirements regarding the minimum amount of capital for SRLs.

A Branch does not require capital contributions unless it is engaged in certain specific activities (e.g. banking and financing). The Branch must carry its financial statements separately from those of the foreign company.

The three legal types are subject to the same legal, tax, and accounting regulations.

## Significant developments

As of 1 April 2011, organisations and individual entrepreneurs will be considered registered at tax authorities from the moment of their state registration in the State Registrar.

As of 1 January 2011, value-added tax (VAT) payers must issue tax invoices either electronically using approved software or by obtaining numbered paper tax invoices from tax authorities.

Beginning with the 2010 financial year, corporate income tax (CIT) payers are no longer required to submit their balance sheet and income statement to the tax authorities.

As of 1 January 2011, returns on excise tax and mandatory social security payments should be submitted on a quarterly (previously monthly) basis.

As of 1 January 2011, tax agents should report withholding taxes (WHT) on payments to non-residents annually by 20 February following the reporting year (previously, this was a quarterly obligation).

Tax treaties with Croatia and Luxembourg became effective on 1 January 2011.

## Taxes on corporate income

Armenian resident entities, and non-resident entities doing business in Armenia through a branch or a representative office, are liable for CIT. Armenia taxes residents on their worldwide income; non-residents are subject to CIT only on their Armenian-source income.

The standard CIT rate is 20%.

Taxable income is defined to be the difference between a taxpayer's gross income and deductible expenses:

- Gross income encompasses all revenues received by a taxpayer from all economic activities, unless the revenues are expressly exempted under the law.
- Deductible expenses encompass all necessary and documented expenses that are directly related to conducting business or earning profit, unless a specific provision in the law restricts the deduction.

Taxpayers engaged in agricultural production are exempt from CIT on that income.

Note that resident entities, branches and representative offices of foreign entities, and individual entrepreneurs are required to withhold income tax at source on payments to non-residents not having a permanent establishment (PE) in Armenia (*see the Withholding taxes section*).

### *Presumptive tax system*

Taxpayers engaged in certain activities must use the presumptive tax system. Under this system, the taxpayer pays a fixed tax based on the location and area occupied by the business and will not be required to pay CIT or VAT. The rate of tax depends on the activity undertaken, as follows:

| Type of business | Base data | Adjustment ratio | Monthly presumptive payment (AMD) |
|---|---|---|---|
| Public catering | Area of the space in square meters | For open catering sites: 0.7 for November to March and 2.2 for April to October | 2,000 times the product of the base data and the adjustment ratio |
| | | For places (units) with limited number of consumers: 0.5 | |
| | | For providing public catering services: between 0.75 and 1.9, depending on the area used | |
| | | For (objects) places conducting public catering service in certain regions of Armenia, an additional 0.7 adjustment ratio is used. | |
| Public bathhouses and washhouses | Area of the buildings in square meters | Bathhouses and washhouses: 1.0 | 2,000 times the product of the base data and the adjustment ratio(s) |
| | | Baths or washhouses not located in saunas or steam baths: 0.5 | |
| Activity related to vehicles | Transportation of passengers by cars: 1.0 | In Yerevan: 3.4<br>Depends on region: 3.1 or 2.8 | 2,000 times the product of the base data and the adjustment ratio(s) |
| | For activities carried out by trucks: the lading in terms of tons | Depends on region: 1.1 to 1.9 | |
| | For activities carried out by buses: the number of seats | Depends on region: 0.5 to 1.2 | |
| Barber's shops | Number of working staff multiplied by calendar workdays within the month | In Yerevan: 1.0<br>Depends on region: 0.6 or 0.8 | Product of base data and adjustment ratio multiplied by 500 |
| Auto repair shops | Number of work sites of technical maintenance of vehicles | In Yerevan: 1.0<br>Other locations: 0.8 | Product of base data and adjustment ratio multiplied by 15,000 |

| Type of business | Base data | Adjustment ratio | Monthly presumptive payment (AMD) |
|---|---|---|---|
| Retail sale of petrol and diesel fuel | Number of filling pipes installed in retail sale sites of petrol and diesel fuel | In Yerevan: 1.2<br>Depends on region: 0.8 or 1.0 | Product of base data and adjustment ratio multiplied by 30,000 |
| Gas filling activities for vehicles | | | 20 per cubic metre of gas sold, but not less than 1,500,000 in Yerevan and 900,000 in other regions |
| Parking lots | Total area (in square metres) separated for temporary parking of vehicles multiplied by calendar workdays within the month | In Yerevan: 1.0 to 8.0<br>Other locations: 0.8 | Product of base data and adjustment ratio multiplied by 5 |

## *Corporate residence*

Resident entities are legal and business entities whose existence is established under Armenian law. Non-resident entities are those whose existence is established under foreign law.

### *Permanent establishment*

The domestic definition for a permanent establishment essentially adopts the definition for permanent establishment found in the OECD Model Tax Convention.

## *Other taxes*

### *Value-added tax (VAT)*

Armenia's current VAT law was enacted in 1997 and is based loosely on the principles of the European Union (EU) VAT Directive. Armenia operates the input-output model of VAT. VAT-registered persons may deduct the VAT paid on their inputs from the VAT charged on their sales and account for the difference to the tax authorities.

The standard rate of VAT on domestic sales of goods and services and the importation of goods is 20%. Exported goods and related services are zero-rated. Advertising, consulting, engineering, legal, accounting, translation, data processing, banking, financial, and insurance services provided to non-residents are zero-rated if the non-resident's place of business is outside Armenia. Various supplies, including most financial and education services, are VAT-exempt.

Services supplied in Armenia by non-residents that are not registered in Armenia are subject to application of a VAT reverse charge.

The liability to account for VAT is based on taxable turnover for transactions implemented in the previous calendar year. If those revenues exceed 58.35 million Armenian drams (AMD), the taxpayer must account for VAT on all sales. If the previous year's revenues were less than AMD 58.35 million (e.g. the taxpayer is in the first year of operations), the taxpayer is obliged to account for VAT only on sales in the current year that exceed AMD 58.35 million. Taxpayers whose revenues are below the AMD 58.35 million threshold may voluntarily elect to account for VAT.

Businesses that require a license costing more than AMD 100,000 to operate and businesses producing/importing excisable goods are required to account for VAT on their sales.

Generally, VAT taxpayers should file VAT returns on a quarterly basis. However, taxpayers with sales (excluding VAT) in the previous calendar year exceeding AMD 100 million are required to file VAT returns monthly. VAT payments must be made and VAT returns filed within 20 days following the end of the reporting period.

### *Customs duties*

The Customs Code of Armenia regulates customs procedures in Armenia. The most frequently used customs regimes are import for free circulation, temporary import, temporary export, and export for free circulation.

Customs levies are payable by persons whose goods cross the customs border of Armenia. Customs levies consist of customs duties, taxes, duties, and other mandatory charges.

Generally, customs duty is imposed as an *ad valorem* duty, which means that the tax is calculated as a percentage of the customs value of the goods. Armenia uses only two *ad valorem* rates: 0% and 10%.

Customs duty is collected on the customs value of the imported goods. Importers must take into account specific rules (based on WTO rules) to determine the customs value on which the import tax will be applied. The general rule is that the customs value will be the price actually paid or payable for the goods when sold for export to Armenia.

Customs fees are payable within three days from the provision of customs services, but not later than the release of goods from customs.

### *Excise tax*

Excise tax is payable on alcoholic beverages and tobacco products, whether imported or produced domestically, as follows:

| | | Tax rate (AMD) | |
|---|---|---|---|
| **Goods** | **Unit of measure** | **Goods produced in Armenia** | **Goods imported into Armenia** |
| Beer | 1 litre | 70 | 105 |
| Grape and other wines, wine ingredients | 1 litre | 10% of factory price, but not less than AMD 100 | 10% of customs value, but not less than AMD 150 |
| Vermouth and other types of wine that contain vegetarian and other aromatic extracts | 1 litre | 500 | 600 |

| Goods | Unit of measure | Tax rate (AMD) Goods produced in Armenia | Goods imported into Armenia |
|---|---|---|---|
| Other brewed drinks (apple cider, pear cider, honey-drinks) | 1 litre | 180 | 200 |
| Ethyl spirit | 1 litre (by recalculation of 100% spirit) | 600 | 700 |
| Alcoholic drinks | 1 litre | 30% of factory price, but not less than AMD 380 | 30% of customs value, but not less than AMD 600 |
| Tobacco substitutes | 1 kilogram | 1,500 | 1,500 |
| Raw oil and oil materials | 1 ton | 27,000 | 27,000 |
| Gases produced from oil and other hydro-carbons (except natural gas) | 1 ton | 1,000 | 1,000 |

### *Land tax*
Land tax is assessed and collected at the municipal level and is paid by landowners and the permanent users of state-owned land. Tax on rented land is levied on the lessor. The land cadastre (valuation system) is used to determine the value of the land. Land tax for agricultural land is calculated at 15% of the net income determined by the cadastral evaluation. For non-agricultural land, the rate is 0.5% to 1.0% of the cadastral value of the land.

### *Property tax*
Property tax is assessed and collected at the municipal level on buildings, motor vehicles, and means of water transport. The tax rate on buildings is 0.3%, which is paid annually on the cadastral value.

Property tax for motor vehicles with up to ten seats is calculated as follows:

| Capacity (horsepower) | Tax rate (per horsepower) |
|---|---|
| Up to 120 | AMD 200 |
| 121 to 150 | AMD 300 |
| 151 to 250 | AMD 300 + AMD 1,000 per horsepower in excess of 150 |
| 251 and over | AMD 500 + AMD 1,000 per horsepower in excess of 150 |

Property tax for motor vehicles with more than 10 seats is calculated as follows:

| Capacity (horsepower) | Tax rate (per horsepower) |
|---|---|
| Up to 200 | AMD 100 |
| 201 and over | AMD 200 |

The annual property tax on motorcycles is calculated at the rate of AMD 40 for each horsepower of tax base. The annual rate of property tax on watercraft is calculated at AMD 150 for each horsepower of tax base.

Beginning from the fourth year after the year of production, the tax base for motor vehicles and means of water transport is reduced by 10% per year, up to a maximum reduction of 50%.

## *Branch income*

When a non-resident company conducts business in Armenia through a subdivision (i.e. a branch or a representative office) and maintains separate accounting records for that subdivision, taxable income generally should be determined on the same basis as for resident entities. Note that a subdivision is taxable on dividends received from Armenian companies and may not carry forward losses, which differs from the treatment of resident entities (*see the Deductions section for more information*). However, the subdivision may be able to overcome these restrictions under a relevant tax treaty.

If it is not possible to determine taxable profit based on the direct method (i.e. taxable income less deductible expenses) for the subdivision of the foreign entity in Armenia, income is determined based on a method agreed upon between the taxpayer and the tax authorities. The law explicitly recognises the allocation method (the taxpayer allocates a portion of its worldwide income and expenses to Armenia) as a possible approach.

Armenia has no special tax rules for non-commercial representative offices established to engage in liaison-type activities. Such offices are subject to the normal CIT, but an exemption from CIT may be available under a relevant tax treaty if the activities of the representative office are not sufficient to constitute a PE for the foreign entity.

*See the Withholding taxes section for a list of countries with which Armenia has a tax treaty.*

## *Income determination*

Taxable profits are defined as the difference between a taxpayer's gross income and deductible expenses. Gross income encompasses all revenues received by a taxpayer from all economic activities, unless the revenues are expressly exempt from inclusion under the law. Deductible expenses encompass all necessary and documented expenses that are directly related to conducting business or earning profit, unless a specific provision in the law restricts the deduction.

### *Inventory valuation*
Inventories are generally stated at the lower of cost and net realisable value. First in first out (FIFO) and average cost methods of valuation are generally used for tax purposes.

### *Capital gains*
Capital gains are included in taxable income. Non-residents are taxable on the realised capital gains from the increase of the value of the assets (including shares) located in Armenia.

### *Dividend income*
Dividends derived by an Armenian entity from another Armenian entity are exempt from tax. Dividends derived by non-residents from Armenian entities are subject to 10% WHT, unless relief is available under a relevant tax treaty (*see the Withholding taxes section*).

### *Interest income*
Interest income attracts normal CIT treatment.

### *Foreign income*
Resident entities are liable to Armenian tax on their worldwide income. Foreign taxes should be available for credit against Armenian tax liabilities, up to the amount of Armenian tax payable on the foreign income.

## *Deductions*

Expenses incurred in the furtherance of a taxpayer's business activities generally are deductible, unless a specific provision in the law provides otherwise. Expenses that are not supported by relevant documentation are not deductible.

The deductibility of following common items is limited for CIT purposes:

- Expenses incurred for advertising outside Armenia are limited to the greater of 3% of gross income or 20% of the value of services or goods exported from Armenia.
- Expenses for training of staff outside Armenia is limited to the lesser of 4% of the gross income of the reporting year or AMD 3 million per employee.
- Expenses for foreign trips are limited to 5% of the gross income of the reporting year.
- Representative expenses are limited to the lesser of 0.5% of the gross income of the reporting year or AMD 5 million.

### *Depreciation*
Fixed assets are required to be depreciated using the straight-line method.

The maximum rates per annum for depreciating fixed assets are:

| Asset | Maximum depreciation rate per annum (%) |
|---|---|
| Other industrial and commercial buildings, constructions and transmission devices | 5 |
| Hotels, resorts, rest houses, educational institutions | 10 |
| Robot equipment and assembly lines | 33.3 |
| Calculating devices and computers | 100 |
| Fixed assets with the value up to AMD 50,000 | 100 |
| Industrial and commercial buildings, constructions and transmission devices located in a designated disaster area (currently Gyumri) | 100 |
| Other fixed assets | 20 |

Land may not be depreciated.

### *Amortisation*
Intangible assets may be amortised using the straight-line method over the lesser of the asset's useful economic life or ten years.

### *Goodwill*
Payments with respect to goodwill and amortisation of goodwill are not deductible in Armenia.

### *Interest expenses*
As a general rule, interest is deductible if the related debt is used to fund business activities of the taxpayer and the interest rate is not more than double the Central Bank of Armenia rate (currently, the deductible interest rate is capped at 24%).

### *Bad debt*
A taxpayer is entitled to deduct bad debts if the taxpayer creates a reserve and allocates the amount of bad debt in the following proportions:

- Up to 90 days from the due date: 0%.
- From 91 to 180 days from the due date: 25%.
- From 181 to 270 days from the due date: 50%.
- From 271 to 365 days from the due date: 75%.

Beyond 365 days, bad debts of less than AMD 100,000 may be deducted. For larger debts, the company would need to have pursued the debt through the courts before a deduction may be taken.

### *Charitable contributions*
Charitable donations and contributions to non-profit organisations are deductible in amounts of up to 0.25% of gross income.

### *Fines and penalties*
Commercial fines and penalty expenses are deductible for CIT purposes. Fines and penalties paid to the state or municipal budgets are not deductible.

### *Lease payments*
Lease payments on operating leases are deductible. The lessor claims a deduction for depreciation of the leased assets. Financial leasing is treated for tax purposes as if a sale had been made. The lessee includes the value of the property in the relevant group of fixed assets and claims depreciation charges. The lessee also deducts the interest and commission elements of the lease payments in the period in which they are payable. Similarly, the lessor recognises taxable income for the total principal amount of the lease at the time when the asset is transferred and recognises the interest and commission element of the payments over the term of the lease.

### *Net operating losses*
Companies are entitled to carry forward losses to the five subsequent income years. Armenian law does not allow the carryback of losses.

### *Payments to foreign affiliates*
Payments to foreign affiliates are deductible, if they meet the normal tests for deductibility.

## *Group taxation*

There are no group taxation provisions available in Armenia.

### *Transfer pricing*
Armenia does not have formal transfer pricing rules. The tax authorities may apply market prices in limited cases, but this does not happen very often.

### *Thin capitalisation*
Armenia does not have thin capitalisation rules.

## *Tax credits and incentives*

Taxpayers engaged in agricultural production are exempt from tax on that income.

Resident companies listed on the Armenian Stock Exchange, as well as companies that list on the Exchange by 31 December 2012, with at least 20% of their shares publicly held by 100 or more shareholders, are entitled to a reduction in CIT.

Provided such companies prepare and publish their financial statements under International Financial Reporting Standards (IFRS), they are entitled to a 50% reduction in their CIT (up to a maximum of AMD 300 million per year). The incentive applies to the 2009 to 2012 income years. The incentive will be repayable (plus penalties) if the company delists, liquidates (other than for bankruptcy), or reduces the public issue below 20% before 31 December 2015.

### *Foreign tax credit*
Tax residents are allowed to credit foreign taxes paid on income received abroad against their Armenian tax liabilities. The amount of foreign tax credit is limited to the amount of Armenian tax that would arise from the equivalent income in Armenia.

## *Withholding taxes*

Payments to non-residents are subject to the following WHT rates:

- Payments for insurance, reinsurance, and transportation are subject to WHT at the rate of 5%.
- Other income received from Armenian sources is subject to WHT at the rate of 10%.

WHT is required to be transferred to the budget not later than the 20th day of the month following the payment of income. A WHT return should be submitted by 20 February following the reporting year.

WHT rates for non-residents may be reduced under a relevant tax treaty.

| Ukraine | 5 (7) | 10 | 10 | 0 |
| United Arab Emirates | 3 | 3 | 0 | 5 |

Notes

1. Several treaties contain a 0% rate on interest paid to or guaranteed by a government or one of its agencies. The table does not analyse such provisions.
2. The ownership threshold for the non-portfolio rate is 10%.
3. The 0% rate applies to the sale on credit of industrial, commercial, or scientific equipment, and capital goods, and interest on loans granted by banking enterprises. The 10% rate applies in other cases.
4. The ownership threshold for the non-portfolio rate is 30%.
5. The ownership threshold for the non-portfolio rate is direct investment of USD 40,000.
6. The ownership threshold for the non-portfolio rate is 25%, and the direct investment must exceed USD 100,000.
7. The ownership threshold for the non-portfolio rate is 25%.
8. The 0% rate applies if the dividends are paid to a foreign company that has owned more than 25% of the Armenian company for at least two calendar years preceding the distribution and the dividends are not subject to profit tax in the foreign company's country of residence.
9. The 0% rate applies to government debt and government-assisted debt; the 5% rate applies to interest on loans or credit granted by banks; and the 10% rate applies in other cases.
10. The 5% rate applies to literary, artistic, or scientific work copyright royalties and to film and broadcasting royalties. The 10% rate applies in other cases.
11. The lower rate applies to consideration for the use of, or the right to use, any computer software, patent, trade mark, design or model or plan, secret formula or process, or information concerning industrial, commercial, or scientific experience (know-how).
12. The 0% rate applies to the credit sale of industrial, commercial, or scientific equipment, to the credit sale of merchandise or services, and to loans granted by a bank. Higher rate applies in other cases.
13. The 5% rate applies to copyright royalties, and the 10% rate applies in other cases.
14. The ownership threshold for the non-portfolio rate is 10%, and the direct investment must exceed USD 100,000.
15. The 0% rate applies to interest on a loan granted by a banking enterprise. The 10% rate applies in other cases.
16. The ownership threshold for the 5% non-portfolio rate is 10%. The 0% rate applies if the dividends out of which the profits are paid have been effectively taxed at the normal rate for CIT and the dividends are exempt income to the Dutch recipient.

17. The ownership threshold for the non-portfolio rate is direct investment of USD 100,000.
18. The ownership threshold for the non-portfolio rate is 25%, and the direct investment must exceed CHF 200,000.

## *Tax administration*

### *Returns*

The annual CIT return for resident entities must be filed by 15 April. The corresponding tax is payable by 25 April.

A separate report with information on sales and purchase invoices exceeding AMD 100,000 must be filed within 20 days following the end of the reporting period. Under new rules, taxpayers will generally no longer have to submit information on tax invoices they issue and receive electronically.

Presumptive returns should be filed and payments should be made within 25 days after the end of the month for importation and production of tobacco products and within 15 days after the end of the month for other activities.

### *Payment of taxes*

Taxpayers are required to make advance CIT payments by the 15th day of the last month of each quarter. Each advance payment is equal to 1/6 of the CIT paid for the previous year. For payments before the previous year's tax is calculated (e.g. January to March), tax is paid based on the last filed tax return, and an adjustment is made in the first advance tax payment made after the previous year's tax is calculated to correct the amount paid. If advance payments exceed the CIT liability for the year, the excess may be refunded.

Advance payments are not required if a taxpayer's profit for the proceeding year was less than AMD 500,000. Thus, newly established companies do not need to make advance payments until 25 April of the year following the start of operations.

Armenia also has a quarterly minimum CIT. If the advance CIT payable is less than 1% of revenues for the previous quarter less depreciation charges (up to a maximum of 50% of revenues), the excess is paid as a minimum CIT. The minimum CIT is applied against CIT payable for the year. Any excess is applied against the CIT liability for the subsequent year.

Taxpayers are required to make either advance payments or minimum CIT, whichever is higher.

Branches of foreign companies pay advance CIT biannually, but only if their CIT for the proceeding year exceeded AMD 2 million. Each advance payment is equal to 1/4 of the CIT paid for the previous year. Branches are not subject to the minimum CIT. The annual tax return for branches is filed by 15 April. The corresponding tax is payable by 25 April.

## Significant developments

### Corporate income tax (CIT)

The Aruba Government reintroduced a temporary investment allowance as of 1 January 2011. The investment allowance amounts to 6% of the investment and can be applied during the years 2011 and 2012. The investment allowance is a deduction on the taxable profit of a company and is applicable on investments greater then 5,000 Aruban florins (AWG) that are made in a financial year. *See the Tax credits and incentives section for more information.*

As of 1 June 2010, accelerated depreciation has been introduced on assets which are used in the course of an industrial business and whose acquisition or production costs are above AWG 90,000,000. Aforementioned assets may be depreciated in ten equal annual parts. Note that imputation payment companies can not apply this facility.

The Government of Aruba also increased the allowable gift deduction from AWG 10,000 to AWG 50,000. Only donations that are made to designated institutions are deductible for CIT purposes.

### Turnover tax

As of 1 June 2010, a turnover tax exemption was introduced on exports. The exemption is applicable if the entrepreneur has asserted that the turnover is realized in connection with the delivery of goods to customers located outside of Aruba, where the goods in connection with the delivery are sent or transported to a destination outside Aruba.

### Tourist levy (formerly known as room tax)

As of 1 January 2011, the name and character of the room tax has changed. The name room tax has been changed to tourist levy. Also, the lodging or hotel owner must now keep track of a guest information registry in which information which is of importance for the tourist levy is recorded.

Prior to the name change and as part of the establishment of two funds for the promotion of Aruba abroad and the improvement of the tourism product ‘Aruba’, the room tax rate was gradually increased during the year 2010. As of 15 May 2010, the room tax rate increased from 6% to 7.5%, after which the rate was further increased to 9.5% as of 1 September 2010. Furthermore, the taxable base for the room tax on timeshare units was codified and increased.

### Import duties and excise tax

Import duties on green products (e.g. solar panels, hybrid cars) have been decreased as of 1 January 2011.

Excise duties on beer, hard liquor, wines, and on all other wines have been increased as of 1 January 2011 in order to reverse the effect of the reduction of the turnover tax tariff from 3% to 1.5% that occurred on 1 January 2010.

***Oil refinery or oil terminal regime***

In connection with the aim of the Aruba Government to improve the investment climate for the exploitation of oil refineries or oil terminals, a so-called oil refinery or oil terminal regime was introduced as of 1 June 2010. The regime regards application, under certain conditions, of a lower CIT rate. Oil refineries or terminals whose shares are all held directly or indirectly by a company listed on a stock exchange recognized by the Minister are subject to a 7% CIT rate, while all other oil refineries or oil terminals are subject to a rate of 12%.

As of 1 January 2010, an unlimited carryforward loss compensation has also been introduced for companies operating an oil refinery or oil terminal.

Moreover, a 0% dividend tax rate was introduced as of 1 June 2010 for distributions from profits from the operation of an oil refinery and oil terminal.

## *Taxes on corporate income*

Resident companies are taxed on their worldwide income. Non-resident companies are taxed on the following Aruba source income:

- Profits allocated to a PE or permanent representative in Aruba.
- Profits from real estate located in Aruba.
- Profits on loans secured by a mortgage on real estate located in Aruba.

Aruba has a flat CIT rate of 28%. Aruba also has special tax regimes (e.g. the imputation payment company, the Aruba exempt company, the fiscal transparent company, the free zone company, and the so-called oil refinery or oil terminal regime), which are ultimately taxed at a lower tax rate. For a full discussion of these special tax regimes, *see the Tax credits and incentives section.*

CIT is levied on the income as reflected in the profit and loss statement less any allowable deductions based on Aruba tax and case law.

## *Corporate residence*

The place of residency of a corporation, association, society, foundation, or body is determined based on the circumstances. If the aforementioned entities are managed and controlled in Aruba, they will in principle be deemed to be resident in Aruba. If the legal form of an entity is governed by the Aruban law, then its place of residency will be considered continuously to be in Aruba.

If a foreign entity carries on a business through a PE or a permanent representative in Aruba, it will be subject to CIT in Aruba. While Aruba does not have rules and regulation as to the definition and interpretation of the term ‘permanent establishment’, a PE is deemed to exist if the place of execution of a building site or construction, excavation, maintenance, cleaning, assembly, or installation activities surpasses a period of 30 days. The memorandum of explanation refers to the commentary on Article 5 of the Organisation for Economic Co-operation and Development

(OECD) model convention for the definition and interpretation of the term ‘permanent establishment’.

## Other taxes

### Turnover tax

Aruba does not have a value-added tax or sales tax, but it does have a business turnover tax (TOT). TOT is levied at the rate of 1.5% on the delivery of goods or services rendered in Aruba. Goods which are imported into Aruba are not subject to TOT. As of 1 June 1 2010, a turnover tax exemption was introduced on exports. The exemption is applicable if the entrepreneur has asserted that the turnover is realized in connection with the delivery of goods to customers located outside of Aruba, where the goods in connection with the delivery are sent or transported to a destination outside Aruba.

Goods are all physical objects as well as electricity, gas, heating, cooling, and such. Services are all performances rendered against payment. A payment is defined as all proceeds in connection with the delivery of goods or services rendered. If a payment is not completely made via money, the fair market value of the compensation should be taken into account.

In the case of goods, the place of the taxable event is either where the transportation starts (if sold abroad) or at the physical location of the goods at the moment it is delivered. The place of the taxable event with regard to services is generally the place where the entrepreneur is established or from where one has a PE from which the service is rendered. As an exception to the aforementioned general rule, the place of the taxable event for certain services (e.g. services related to a real property) is the place where the actual services are rendered (e.g. the place where the real property is situated).

Some exemptions apply. For example, no TOT is levied on the sale of immovable property if it is also subject to transfer tax. Furthermore, exemptions also apply to interest received or payments for hotel rooms or leasing of apartments (insofar as room tax has been paid on the proceeds) and casino revenues (insofar as gambling duties are due on these revenues).

### Import and excise duties

Import duties are imposed by a tariff, which is set as a percentage of the Cost, Insurance, and Freight value of the product. A classification rule has been published that categorises various imported products into groups. A tariff ranging from 0% to 50% is levied on the various groups of products.

Excise duties are imposed on products such as spirits, cigarettes, mineral oil, and distillery. The taxable base of the excise duties is based on either the weight, volume, and/or the amount of the aforementioned products.

Import duties on green products (e.g. solar panels, hybrid cars) have been decreased as of 1 January 2011.

Excise duties on beer, hard liquor, wines, and on all other wines have been increased as of 1 January 2011 in order to reverse the effect of the reduction of the turnover tax tariff from 3% to 1.5% that occurred on 1 January 2010.

### *Stamp taxes*
Stamp taxes are, in principle, due on all documents as indicated in the Stamp State Ordinance. In practice, it is usually only levied on the documents used in the course of a legal suit.

### *Registration taxes*
Aruba does not impose registration taxes.

### *Ground tax*
A person or entity that, as of 1 January of each year, owns real estate in Aruba or uses real estate based on property rights is subject to ground tax. The ground tax is levied on the registered value, which is determined once every five years by the Tax Authorities, and can only be protested in the first year of the aforementioned period (taking into account the two month objection period as of the date of the assessment). The rate amounts to 0.4% of the registered value of the real estate minus a general exemption of AWG 60,000. If the real estate is not used or is empty for more than six months in a year, a reduction in the ground tax due can be requested from the Tax Authorities.

### *Real estate transfer tax*
If real estate situated in Aruba is transferred, the buyer of the real estate must pay transfer tax on the sales price of the real estate (unless the value registered at the Tax Authorities is higher, in which case the registered value is the basis for the levy). The rate for the transfer of the legal ownership of real estate with a value not exceeding AWG 250,000 is 3%. The rate for the transfer of the legal ownership of real estate with a value exceeding AWG 250,000 is 6% (due on the total amount).

If shares in a real estate company are sold, no transfer tax is due.

### *Foreign exchange commission*
A foreign exchange commission (FEC) is due when residents make a payment abroad in connection with certain legal transactions. The FEC is calculated as 1.3% of the payment abroad. Based on the State Ordinance, a payment abroad is considered:

- a payment with local currency or a payment from a florin account, whether or not by electronic transfer
- a payment with foreign currency or a payment from a foreign currency account, whether or not by electronic transfer, or
- a payment from a foreign currency account held abroad or from an inter-company account held by a person or entity abroad, whether or not by electronic transfer.

FEC is due to the extent the abovementioned payment is a result of one or more of the following legal transactions:

- the purchase of foreign instruments of payments or foreign monetary instruments
- obtaining control over receivables in one or more foreign currencies, or
- the crediting of an account in name of a non-resident of Aruba held at a foreign exchange bank or an institution abroad.

An exemption of the FEC is applicable for the following inter-island bank transactions:

- purchase of Antillean banknotes by Aruba residents and the purchase by Aruba residents of bank cheques in Antillean guilders and drawn from exchange banks situated in the Dutch Antilles

- transfers in Antillean guilders to residents of the Dutch Antilles by Aruba residents, or
- transactions in Aruba and Antillean banknotes between exchange banks on Aruba and on the Dutch Antilles.

Furthermore, FEC will be levied on the purchase of foreign currencies (except Antillean guilders or ANG) with AWG.

According to the policy of the Central Bank of Aruba, another exemption for the FEC applies when cash is transferred to a foreign bank account of an Aruban resident. In order to apply for this exemption, certain formalities must be met. First, the foreign bank account of the Aruba resident must be registered at the Central Bank of Aruba. Secondly, the Central Bank of Aruba must grant a so-called exemption for requirements. Also, certain overviews of transactions regarding the foreign bank account must be filed with the Central Bank of Aruba on a quarterly basis.

### *Tourist levy (formerly known as room tax)*

As of 1 January 2011, the name and character of the room tax has changed. The name room tax has been changed to tourist levy. Also, the lodging or hotel owner must now keep track of a guest information registry in which information which is of importance for the tourist levy is recorded.

Prior to the name change and as part of the establishment of two funds for the promotion of Aruba abroad and the improvement of the tourism product 'Aruba', the room tax rate was gradually increased during the year 2010. The room tax rate has been increased to 9.5% as of 1 September 2010. The new room tax rate is 9.5% of the compensation (including charges) that the tourist pays for the use of lodging or a hotel room.

Also the fixed fees for timeshare units have been increased. As of 1 May 2010, the taxable base for the room tax on timeshare units is set on:

- AWG 179 per day for studio units.
- AWG 193.95 per day for one bedroom units.
- AWG 223.75 per day for other then the abovementioned units.

Abovementioned fixed fees are not applicable in the event the time-share resort also makes space available to other guests under payment of compensation besides its time-share guests. In that case, 9.5% room tax is due per day on the compensation paid by other guests for the use of the unit.

With regard to all-inclusive packages, the taxable base is set on 40% of the price of the all-inclusive package with a minimum of AWG 162 per day, increased with charges (e.g. service charges and energy charges).

Local citizens registered in the Aruban municipal register are not subject to room tax. The owner of a condominium is also exempted from room tax.

## *Branch income*

Branch income is, in principle, determined according to the separate entity approach. Branches of foreign insurance companies apply a specific profit determination method. Furthermore, the transfer of profits to the head office is not subject to taxation.

Branch profits are subject to the normal CIT rate of 28%.

## Income determination

### Inventory valuation

Inventories may generally be stated on a last in first out (LIFO) or first in first out (FIFO) basis, provided the method chosen conforms to sound business practices. Conformity of book and tax reporting is not required.

### Capital gains

Capital gains are taxed as ordinary income. However, capital gains realised on the disposal of a shareholding qualifying for the participation exemption are tax exempt.

The participation exemption applies, in general, if an Aruban company holds shares or participation certificates in companies, associations, or foundations which carry on a business. If shares or participation certificates are held in a foreign entity, the participation exemption only applies if they are not held as an investment and the foreign entity is subject to a tax on profits.

The capital gain realised on the disposal of assets may be carried over to a special tax deferral reinvestment reserve but must be deducted from the acquisition costs of the new asset. In principle, this reinvestment reserve cannot be maintained for more than four consecutive years. If the reserve has not been used after four years, the remainder will be subject to taxation.

Capital losses are tax-deductible unless these losses are incurred on shares to which the participation exemption is applicable.

### Inter-company dividends

Provided the conditions of the participation exemption are met *(see the Capital gains section above),* an Aruban company is exempt from taxation on all benefits from the participation, including inter-company (cash) dividends.

Costs made in connection with the ownership of the participation (i.e. administration costs, interest, management expenses) are not deductible from the taxable result of the Aruba parent company.

### Stock dividends

Stock dividends are allowed and treated as regular dividend income. The stocks will be valued at market value for tax purposes.

### Foreign income

A resident taxpayer is subject to CIT on its worldwide income. Double taxation of certain foreign source income is avoided by means of the exemption method. If there is no legal possibility to exempt income and prevent double taxation, the foreign tax paid can be claimed as a deduction.

## Deductions

### Depreciation and depletion

Depreciation of tangible fixed assets, excluding land, is taken over the estimated useful life of the asset. The basis for the depreciation includes all costs incurred with the purchase of this asset less the residual value. The straight line method is customary; however, the declining balance method is also acceptable.

As of June 1, 2010, accelerated depreciation has been introduced on assets which are used in the course of an industrial business and whose acquisition or production costs are above AWG 90,000,000. Aforementioned assets may be depreciated in ten equal annual parts. Note that imputation payment companies can not apply this facility.

### *Charitable contributions*
The Government of Aruba also increased the allowable gift deduction from AWG 10,000 to AWG 50,000. Only donations that are made to designated institutions are deductible for CIT purposes.

### *Taxes*
Taxes paid by the company, with the exception of CIT, are tax-deductible. Taxes paid by the company with respect to the purchase of an asset (e.g. real estate transfer tax paid while obtaining real estate) should be capitalised in the cost of the asset.

### *Net operating losses*
A net operating loss (NOL) may be carried forward to the five years following the tax year in which the loss was incurred. If the NOL has not been offset against profits within this period, the remaining NOLs will expire. NOLs incurred by an imputation payment company and companies operating an oil refinery or oil terminal as of 1 January 2010 may be carried forward indefinitely. Carrybacks of NOLs are not permitted.

### *Payments to foreign affiliates*
If interest or other payments (e.g. remunerations paid for the use of material and/or immaterial goods or services rendered) are made to entities, these payments should be made at arm's length. If the transaction is not at arm's length, only the arm's-length payment may be deducted from the taxable income.

Even if the transaction is at arm's length, the interest or other payments may still not be deductible from the taxable result of the Aruban company unless the Aruban company asserts that one of the following circumstances is applicable:

- The receiving company is not affiliated *(see below)* to the Aruban company.
- The receiving company is subject to an effective tax rate of at least 15%.
- The shares in the receiving company are all held directly or indirectly by a company whose shares (for at least 50% of the outstanding shares and representing at least 50% of the voting rights) are listed at a qualified stock exchange.

An affiliation with the taxpayer is deemed to exist in each of the following cases:

- The taxpayer has an interest of at least one third in another entity.
- An individual or entity has an interest of at least one third in the taxpayer.
- A third party has an interest of at least one third in another entity, while this third party also has an interest of at least one third in the taxpayer.

If an at arm's-length payment is made to an affiliated company that is subject to taxation but pays an effective tax rate of less than 15%, only 75% of the payment made is allowed as a deduction.

## Group taxation

### Fiscal unity

Based on a policy of the Aruban Tax Authorities, Aruban resident public limited companies (naamloze vennootschap or NV) with at least 99% of the shares in other Aruban resident NVs can file a consolidated tax return (i.e. fiscal unity). In order to apply for this facility, a request must be filed with the Aruban Tax Authorities. Certain conditions must be met for the application of this regime, for instance the companies in the fiscal unity must be of the same tax regime. Advantages of this facility are that the recognition of inter-company profits may be deferred and losses may be offset with profits of other companies within the fiscal unity.

### Transfer pricing

The arm's-length principle (ALP) rule is codified in the Aruban State Ordinance Profit Tax (SOPT). If a corporate entity or individual participates, directly or indirectly, in the management, supervision, or the capital of two or more corporate entities, the conditions related to all transactions between these affiliated parties should be at arm's length. The ALP is applicable on all transfer pricing between affiliated companies with regard to all mutual legal relations (e.g. purchase prices, management fees, remunerations for services provided, royalty payments). The conditions should be business like, whereas the same conditions should apply as they would have been if the same transaction would take place with a third party.

Together with the codification, a documentation obligation was also introduced in the SOPT. The explanatory notes on the bill state that for the meaning and application of the ALP and the documentation obligation, the OECD guidelines for Multinational Enterprises and Tax Administration should be considered. The documentation obligation is applicable at the moment that a transaction takes place. It is not only applied to affiliated transactions after 1 January 2008, but also on (long term) contracts prior to this date. In this regard, the explanatory notes indicates that tax subjects should be allowed a reasonable period to produce such documentation, if such is not present, if requested at certain moments.

Non-compliance to the documentation obligation leads to a reversed burden of proof to the taxpayer. From the explanatory notes of the profit tax return forms, it seems that the Tax Authorities require, as a minimum amount of documentation about the transfer pricing method used, the reason why the method was chosen and a substantiation of the manner of how the price was determined.

In light of the extensive OECD guidelines and considering the small scale economy of Aruba, it is unclear to what extent the aforementioned requirements and the OECD guidelines should be followed. Up to this moment, the legislature has not provided detailed implementation guidelines on the documentation obligation.

### Thin capitalisation

Aruba does not have thin capitalisation rules.

### Controlled foreign company (CFC) regime

Aruba does not have CFC legislation.

## Tax credits and incentives

Aruban corporate income tax legislation no longer provides tax incentives. The legislation does, however, provide incentives for certain special tax regimes that can be used to reduce the overall tax liability, such as the imputation payment company, the Aruba exempt company, the fiscal transparent company, the free zone company, and the so-called oil refinery and oil terminal regime.

### Temporary investment allowance

The Aruba Government reintroduced a temporary investment allowance as of 1 January 2011. The investment allowance amounts to 6% of the investment and can be applied during the years 2011 and 2012. The investment allowance is a deduction on the taxable profit of a company and is applicable on investments greater then AWG 5,000 that are made in a financial year. One of the conditions is that the investment must take place with an Aruban company or entrepreneur. An Aruban company or entrepreneur includes an individual or legal entity that is respectively established and carries out business in Aruba. Permanent establishments (PE) of foreign legal entities are also included in the definition of an Aruban company for investment allowance purposes. Legal entities that are incorporated for the sole purpose of making investments in the context of the investment allowance do not qualify as an Aruban company or entrepreneur for investment allowance purposes.

Certain investments do not qualify for the investment allowance, such as: land, houses, and cars for personal use; stocks and shares; goodwill; animals; and investments designated for the use by third parties or as part of the exploitation of an oil refinery or an oil terminal. Furthermore there are also certain transactions that do not qualify for the investment allowance, such as certain inter-company transactions.

The investment allowance does not apply to investments by oil refineries, free zone companies, and imputation payment companies.

If an investment, on which the investment allowance was claimed, is sold within six years after the start of the calendar year in which the investment took place, a capital disposal charge is due of 6% of the sales price.

### The imputation payment company

The imputation payment company (IPC) is, in principle, an NV or a limited liability company (vennootschap met beperkte aansprakelijkheid or VBA) that pays the regular CIT rate of 28%. However, when certain stringent conditions are met, the shareholder of the IPC can request an imputation payment of 26/72 of the (formal) dividend distributed. Provided that the 0% dividend withholding tax (WHT) is applicable, the effective tax rate can be lowered to 2%.

In order to qualify for the IPC status, the following requirements must be met:

- The IPC must perform qualifying activities *(see below)* in Aruba.
- An Aruba-resident individual must be a member of the board of managing directors of the IPC.
- The articles of association state that the shares of the IPC are registered and that the directors keep a shareholders registry in which all shareholders are registered.
- The articles of association state that the financial statements are drawn up according to internationally accepted principles (like IAS or GAAP) and an audit by a qualified (group of) independent certified public accountant(s) is necessary.

- The board of managing directors must notify the Tax Authorities within a restricted period, and after the dividend has been distributed, that the shareholder will claim the imputation payment.

An independent certified public accountant must provide a yearly opinion regarding the compliance of the abovementioned first three requirements for the IPC status.

The shareholder must also meet certain requirements before the imputation payment can be granted, including:

- The shareholder must hold the (economic and legal ownership of the) shares for an uninterrupted period of at least 12 months to be eligible for the imputation payment.
- The shareholder must file a request (with several enclosures) with the Tax Authorities to receive the imputation payment.

The activities of the IPC are limited. The IPC company is not allowed to conduct non-qualified activities, no matter how small. The following activities are regarded as qualified activities:

- Exploitation of quality hotels. A quality hotel exists when the average revenue per available room (RevPar) amounts at least AWG 354 (USD 200), the hotel has a hotel license, and is operated at its own risk and account. Note that the RevPar can be changed annually.
- Exploitation of shipping enterprises.
- Exploitation of aviation enterprises.
- Developing, acquiring, holding, maintaining, and licensing of intellectual and industrial ownership rights.
- Insuring special entrepreneurial risks (captive insurance).
- Holding of shares or other participation certificates. The IPC may not hold more than 5% of low taxed shares or other participation certificates in foreign companies. The aforementioned are low taxed if they are subject to a 'profit' tax rate of at least 14%.
- Active financing (not being a credit institution) of other enterprises or companies, whether or not intra-group.
- Investing of funds, except in real estate and funds which are put at the disposal of group companies.
- Exploitation of a company aimed on generating sustainable energy.

### *The Aruba exempt company (AVV)*

The Aruba exempt company (Aruba Vrijgestelde Vennootschap or AVV) is a particular form of a NV and is often used for international tax planning purposes. The AVV is, in principle, subject to CIT against the normal CIT rate and the dividend WHT. However, the profit of the AVV may be exempted completely from CIT and dividend WHT if its activities are limited to one or more of the following qualified activities:

- Holding of shares or other participation certificates. The IPC may not hold more than 5% of low taxed shares or other participation certificates in foreign companies. The aforementioned are low taxed if they are subject to a 'profit' tax rate of at least 14%.
- Financing (not being a credit institution) of other enterprises or companies, whether or not intra-group.
- Investing of funds, except in real estate.
- Licensing of intellectual and industrial ownership rights.

As mentioned below, the AVV may, if certain conditions are met, also opt for the fiscal transparency regime for which it will not be subject to CIT and dividend WHT. In this case, the AVV is not required to perform the abovementioned qualified activities in order to enjoy the fiscal transparency status.

***Fiscal transparent company***

An NV, VBA, or AVV may opt, if certain conditions are met, to be treated as a partnership (fiscal transparent company). The fiscal transparent company is not subject to CIT, unless the fiscal transparent company carries on a business on Aruba. In that case, the shareholder would be subject to CIT with regard to the business it carries through a PE.

Dividends distributed by the fiscal transparent company to its shareholder are not subject to dividend WHT, since due to its transparency, all income and asset and liabilities are deemed to be attributed to its shareholder. The main requirements for this status is that all the company's shares must be registered, and a notification for the application for this status must be filed with the Tax Authorities within one month after the company has been incorporated.

***The free zone company***

The free zone is a specially designated area in Aruba where goods can be stored, processed, adapted, assembled, packaged, displayed, spread out, or subject to other treatments or where services can be provided.

Services include activities consisting of maintenance or repairs of goods of a non-Aruba enterprise, maintenance or repairs abroad of goods of a non-Aruba enterprise, or providing advice to or research on behalf of a non-Aruba enterprise/institution/private person. Financial services, however, are not allowed.

**Conditions**

A free zone company has to be a limited liability company that is incorporated according to the laws of Aruba. The free zone company is also only allowed to perform qualifying activities in the free zone (a designated area on Aruba). If activities are performed that are not allowed, the company may be banned from the free zone.

**Taxation**

- All profits generated from activities abroad are subject to 2% CIT. The free zone company must have a license to perform activities for residents. All activities performed for residents are subject to the regular CIT rate of 28%. The free zone company is allowed to generate a maximum of 25% of its turnover with local consumers in its first two years. The percentage of the turnover allowed with local consumers will be annually reduced by 4% after the initial two years. As from year seven, only 5% of the turnover is allowed to be generated with local consumers.
- No import duties are due if the products are imported, used in the activities in the free zone on Aruba, and exported abroad.
- No TOT is due by the free zone company on cross border supply of goods and/or the rendering of services.
- The free zone company is subject to the dividend WHT, which implies an effective tax rate of the free zone company of 11.8% or 6.9% (equal to the IPC).
- On request, the free zone company can be exempted from 1.3% foreign exchange commission (subject to approval of the Central Bank of Aruba). Normally this approval is a formality and no foreign exchange commission is due by the free zone company.

**Other characteristics**
The free zone company does not have to apply for a business license or an establishment license. Furthermore, a free zone company is subject to a so called free zone facility charge of 1.1% of the sales over its turnover.

### *Oil refinery or oil terminal regime*
In connection with the aim of the Aruba Government to improve the investment climate for the exploitation of oil refineries or oil terminals, a so-called oil refinery or oil terminal regime was introduced as of 1 June 2010. The regime regards application, under certain conditions, of a lower CIT rate. Oil refineries or terminals whose shares are all held directly or indirectly by a company listed on a stock exchange recognized by the Minister are subject to a 7% CIT rate, while all other oil refineries or oil terminals are subject to a rate of 12%.

As of 1 January 2010, an unlimited carryforward loss compensation has also been introduced for companies operating an oil refinery or oil terminal.

Moreover, a 0% dividend tax rate was introduced as of 1 June 2010 for distributions from profits from the operation of an oil refinery and oil terminal.

## *Withholding taxes*

### *Dividend WHT*
A dividend WHT is levied on all (formal and non-formal) dividend distributions of Aruba-resident entities. The tax rate is:

- 10% of the dividend distribution.
- 5% of the dividend distribution, if the shares (at least 50% of the outstanding shares and representing at least 50% of the voting rights) of the distributing company are listed at a qualified stock exchange. The same tax rate applies if all the shares of the distributing entity are held directly or indirectly by a company whom shares are (at least 50% of the outstanding shares and representing at least 50% of the voting rights) listed at a qualified stock exchange.
- 0% if the participation exemption *(see Capital gains in the Income determination section) is applicable on the receiving company.*

Dividends distributed from Aruba to countries within the Dutch Kingdom are subject to the Regulation for the Dutch Kingdom (the Regulation).

In certain situations, the Regulation reduces the rate of the dividend WHT from 10% to 7.5% or even 5%. The dividend WHT can be reduced to:

- 7.5% if the parent company owns at least 25% of the paid in capital of the distributing company.
- 5% if the parent company owns at least 25% of the paid in capital of the distributing company and the dividend at the parent company level is subject to a profit tax of at least 5.5%.

If a company is incorporated under Aruba law and transfers its factual place of management to another country, all dividend distributions by this relocated company will remain subject to the Aruba dividend WHT.

Dividend distributions include, among others:

- Formal dividend distributions.
- Liquidation payment.
- Bonus shares.
- Paying back of share capital, unless strict conditions are met.
- Imputation payment.

### *Formal requirements*

Within 15 days (based on the tax return: within one month) after a dividend becomes payable, a dividend WHT return must be filed together with payment of the amount due. A dividend is payable if it is at the disposal of the shareholder (i.e. the board of directors of the distributing company does not have to take any more action in order for the shareholder to claim the dividend). A dividend is also payable if the debt becomes interest bearing because of the distribution.

A statement of approval of the Central Bank of Aruba is required if dividends are distributed to a foreign shareholder. If the dividend exceeds AWG 750,000, a license from the Central Bank of Aruba is required.

## *Tax administration*

### *Returns*

Once a CIT return is issued by the Tax Authorities, the taxpayer is obliged to file the tax return within two months after date of issuance. If, within six months after the tax year has ended, no tax return has been issued, the taxpayer is obliged to request a return within 15 days after the six months period. It may be argued that this obligation does not exist if a taxpayer is not subject to taxation.

If the final CIT return cannot be filed within the required two month period, a request for an extension may be filed. The tax inspector may grant an extension for a maximum period of 12 months.

### *Payment of tax*

The CIT and ground tax are due upon receipt of an assessment. The amount of tax due must be paid within two months after the date of the assessment.

## Significant developments

New measures for the 'taxation of financial arrangements' (TOFA) apply with effect for income years commencing on or after 1 July 2010 (although a taxpayer may have been able to elect to apply the new measures to income years commencing on or after 1 July 2009). These measures provide tax-timing rules – accruals, realisation, fair value, retranslation, financial reports, and hedging – for gains or losses in respect of financial arrangements, along with revenue account treatment of the resulting gains or losses. 'Financial arrangement' is widely defined to cover arrangements that involve a cash settlable legal or equitable right to receive, or obligation to provide, something of economic value in the future. Exemptions from the new regime may be available having regard to the duration of the arrangement or the nature of the relevant taxpayer and the annual turnover or value of assets of that taxpayer. *See the Income determination section for more information*.

In February 2011, the Assistant Treasurer released exposure draft legislation setting out the proposed legislative details of the taxation laws to modernise the controlled foreign company (CFC) rules and to implement new foreign accumulation fund (FAF) rules. The government announced the modernisation of the CFC rules in May 2009 as part of wider reforms to Australia's foreign source income anti-tax-deferral (attribution) rules. The foreign investment fund (FIF) rules were repealed with effect from the 2010-11 income year and are proposed to be replaced with the proposed FAF regime which, in broad terms, is directed at investments in non-CFC foreign companies or fixed trusts which fail 'bright line' investment and accumulation tests. The changes are yet to be finalised and given legislative effect. The commencement date for the new rules is currently unknown. *See Foreign income in the Income determination section for more information*.

Following the outcome of Australia's Federal election, legislation was re-introduced into Parliament in September 2010 to change the tax treatment of expenditure on research and development (R&D) from 1 July 2010. The concessional deductions will be replaced with an R&D tax credit. For companies with an annual turnover of less than 20 million Australian dollars (AUD), there will be a 45% refundable tax credit, equivalent to a 150% tax concession, and for companies with a turnover of greater than AUD 20 million, they will have access to a non-refundable 40% tax credit, equivalent to a 133% tax concession. *See the Tax credits and incentives section for more information*.

In May 2010, the government released its interim response to the recommendations made following the comprehensive review of Australia's tax system (Henry Review) which commenced in May 2008. Since then, one of the key changes proposed by the government is that it will reduce the company tax rate from its current rate of 30% to 29% in the 2013-14 income year (or for small business companies from the 2012-13 income year), in conjunction with the introduction of a proposed new Minerals Resource Rent Tax (MRRT) applicable to iron ore and coal projects in Australia and an extension of the Petroleum Resource Rent Tax (PRRT) to apply to all Australian onshore and offshore oil and gas projects, including the North West Shelf. Legislation to give effect to these proposals will be subject to extensive consultation prior to enactment.

To further develop the Australian tax reform landscape the government will host a Tax Forum on 4 and 5 October 2011 to continue the debate of the Henry Review with a focus on business tax, state taxes, environmental and social taxes, personal tax, and system governance and to assist the government in prioritising its agenda for further tax reforms.

## *Taxes on corporate income*

Companies are subject to federal tax on their income at a flat rate of 30%. There are no state or municipal taxes on income.

## *Corporate residence*

A company is a resident of Australia for income tax purposes if it is incorporated in Australia or, if not incorporated in Australia, it carries on business in Australia and either (i) its central management and control are in Australia or (ii) its voting power is controlled by shareholders who are residents of Australia.

## *Other taxes*

### *Goods and services tax (GST)*

The federal government levies GST at a rate of 10%, and distributes the revenue to state governments. The GST is a value-added tax (VAT) applied at each level in the manufacturing and marketing chain and applies to most goods and services, with registered suppliers getting credits for GST on inputs acquired to make taxable supplies.

Food with some significant exceptions, exports, most health, medical and educational supplies, and some other supplies are ‘GST-free’ (the equivalent of ‘zero-rated’ in other VAT jurisdictions) and so not subject to GST. A registered supplier of a GST-free supply can recover relevant input tax credits, although the supply is not taxable.

Residential rents, the second or later supply of residential premises, most financial supplies, and some other supplies are ‘input-taxed’ (‘exempt’ in other VAT jurisdictions) and are not subject to GST. However, the supplier cannot recover relevant input tax credits, except that financial suppliers may obtain a reduced input tax credit of 75% of the GST on the acquisition of certain services.

Health insurance is GST-free. Life insurance is input taxed. General insurance is taxed. Reverse charges may apply to services or rights supplied from offshore, where the recipient is registered or required to be registered, and uses the supply solely or partly for a non-creditable supply.

### *Luxury car tax*

The luxury car tax is levied by the federal government at the rate of 33% of the value of the car that exceeds the luxury car tax threshold (AUD 57,466 for the 2010-11 financial year) and is payable on the GST-exclusive value above the threshold. No input tax credit is available for luxury car tax, regardless of whether the car is used for business or private purposes.

### *Wine equalisation tax (WET)*
The federal government levies WET at the wholesale level at a rate of 29%, in addition to 10% GST, which is calculated on the price including the WET, and it applies to wine from grapes, fruit and certain vegetables, mead, and sake. Retailers do not receive an input tax credit for WET. A rebate is available to a wine producer of 29% of the wholesale price (excluding WET or GST) for wholesale sales, and of 29% of the notional wholesale selling price for retail sales and applications for own use (up to a maximum of AUD 500,000).

### *Import and excise duties*
Imports into Australia are subject to duties under the Australian Customs Tariff. The top duty rate is 5%, other than for clothing and finished textiles which are currently taxed at 10% (to be reduced to 5% in 2015). A TCF Strategic Investment Program will operate until 2015.

Australia currently has comprehensive free trade agreements with the United States, Thailand, Singapore, New Zealand, and Chile. In addition, a regional free trade agreement between Australia, New Zealand, and Southeast Asian nations commenced on 1 January 2010, which progressively eliminates all barriers to trade in goods, services, and investments.

Excise duties are imposed at high levels on beer, spirits, liqueurs, tobacco, cigarettes, and petroleum products. A fuel tax credit system provides a credit for fuel tax (excise or customs duty) that is included in the price of taxable fuel. Broadly, credits are available to entities using fuel in their business and to households using fuel for domestic electricity generation and heating.

### *Fringe benefits tax (FBT)*
The federal government levies FBT on employers at the rate of 46.5% on the 'grossed-up value' of non-salary and wages fringe benefits provided to employees (and/or the employee's associates) by the employer or associates. The grossing-up of the value ensures tax neutrality between providing benefits and cash remuneration. FBT generally is deductible for income tax purposes. There are some exemptions from FBT, including some minor benefits, remote area housing in certain circumstances, and specified relocation costs. In addition, there are some concessional valuation rules, in particular for living-away-from-home benefits.

In relation to car fringe benefits, a new 'statutory formula' method is proposed to apply to new cars acquired under contracts entered into after 7.30pm (AEST) on 10 May 2011. The new statutory formula will be a flat 20% (phased in over four years) applied to the FBT base of the car, regardless of the annual kilometres travelled, and replace the current four-tiered statutory rate system.

### *Stamp duty*
All states and territories impose a stamp duty on a wide variety of transactions at different rates. All jurisdictions impose a stamp duty on real estate conveyances, but most exempt conveyances of goods (not associated with other property) from stamp duty. The imposition of duty on share transfers involving unlisted entities differs from state to state. Corporate reconstruction exemptions are available. Advice from a

stamp duty specialist should usually be obtained where substantial stamp duty may be imposed because the amount of duty may depend on the form of the transaction.

### *Payroll tax*

States and territories impose a tax on employers' payroll (broadly defined). The various jurisdictions have harmonised their payroll tax legislation, but some differences remain, particularly tax rates and the thresholds for exempting employers whose annual payroll is below a certain level, after taking into account grouping rules. For example, in New South Wales from 1 January 2011 the rate is 5.45% per annum with an annual exemption threshold of AUD 658,000. In Victoria, the rate is 4.9% from 1 July 2010 and the annual exemption threshold is AUD 550,000. A variety of rates and thresholds apply in other state and territory jurisdictions.

### *Insurance tax*

States impose taxes on insurance premiums, which may be substantial.

### *Land tax*

All states and territories (except the Northern Territory) impose a tax based on the unimproved capital value of land. In general, the principal place of residence and land used for primary production is exempt from land tax.

### *Local municipal taxes*

Local taxes, including water, sewerage, and drainage charges, are levied based on the unimproved capital value of land and include a charge for usage (for example water usage).

### *Superannuation guarantee levy*

The federal government effectively requires employers to contribute 9% of an employee's earnings base, subject to limited exceptions, to a registered superannuation fund or retirement savings account on behalf of the employee. Failure to make these contributions will result in the employer being liable for a non-deductible superannuation guarantee charge.

No level of Australian government imposes a social security levy.

## *Branch income*

Branch profits are subject to ordinary corporate rates of taxation, and there is no withholding on repatriated profits.

## *Income determination*

### *Inventory valuation*

Inventory generally may be valued at cost (full absorption cost), market selling value, or replacement price. Where, because of obsolescence or other special circumstances, inventory should be valued at a lower amount, the lower valuation generally may be chosen, provided it is a reasonable valuation. Special rules apply, however, regarding the valuation of trading stock for certain companies joining a consolidated group. Last in first out (LIFO) is not an acceptable basis of determining cost, nor is direct costing in respect of manufactured goods and work-in-progress.

Conformity is not required between book and tax reporting. For tax purposes inventory may be valued at cost, market selling value or replacement price, regardless of how inventory is valued for book purposes. Those who choose to come within the small-business entity measures (broadly defined as taxpayers who carry on business and who, together with certain 'connected' entities, have an aggregated turnover of less than AUD 2 million for the year) may ignore the difference between the opening and closing value of inventory, if on a reasonable estimate this is not more than AUD 5,000.

### *Capital gains*

A capital gains tax (CGT) applies to assets acquired on or after 20 September 1985. Capital gains realised on the disposal of such assets are included in assessable income and are subject to tax at the company's corporate tax rate, if the disposal is by a company. In order to determine the quantum of any gain for any assets acquired before 21 September 1999, the cost base is indexed according to price movements since acquisition, as measured by the official Consumer Price Index until 30 September 1999 (provided the asset has been held for at least 12 months). There is no indexation of the cost base for price movements after 1 October 1999. Disposals of plant and equipment are subject to general rules rather than the CGT rules. Capital losses are allowable as deductions only against capital gains and cannot be offset against other income. In calculating capital losses there is no indexation of the cost base.

Residents of Australia generally are liable for the tax on gains on the disposal of assets wherever situated, subject to relief from double taxation if the gain is derived and taxed in another country. However, the capital gain or capital loss incurred by a company from a CGT event in relation to shares in a foreign company is reduced by a percentage reflecting the degree to which the foreign company's assets are used in an active business, if the company holds a direct voting percentage of 10% or more in the foreign company for a certain period before the CGT event. Attributable income from CGT events happening to shares owned by a controlled foreign company (CFC) are reduced in the same way. Capital gains and capital losses made by a resident company in respect of CGT events happening in respect of 'non-tainted' assets used to produce foreign income in carrying on business through a permanent establishment in a foreign country are disregarded in certain circumstances.

For CGT events occurring on or after 12 December 2006, non-residents are subject to Australian CGT only where the assets are taxable Australian property – that is, Australian real property, or the business assets of Australian branches of a non-resident. Australian CGT also applies to indirect Australian real property interests, being non-portfolio interests in interposed entities (including foreign interposed entities), where the value of such an interest is wholly or principally attributable to Australian real property. 'Real property' for all these purposes is consistent with Australian treaty practice, extending to other Australian assets with a physical connection with Australia, such as mining rights and other interests related to Australian real property. A 'non-portfolio interest' is an interest held alone or with associates of 10% or more in the interposed entity.

CGT rollover relief is available for scrip-for-scrip (stock for stock) takeovers between companies (and also trusts) provided at least 80% of the target entity is acquired. This rollover is not limited to listed or Australian entities. Special rules apply to determine the cost base of interests acquired by the acquiring entity in the target where the scrip-for-scrip arrangement consists of a restructure (broadly where just after completion of the arrangement the market value of the replacement interests issued under the arrangement by the replacement entity is more than 80% of the market value of all the shares (including options, rights, and similar interests to acquire shares) issued by the replacement entity).

Demerger rollover relief is available where the head entity of a group transfers ownership of one or more of its subsidiaries to its shareholders provided at least 80% of the interests in the demerged entity are acquired by the owners of the head entity of the group and they receive interests in the demerged entity in the same proportion as their original interests. There are other requirements which must be satisfied in respect of each of these rollovers.

Rollover relief from CGT is available on the transfer of unrealised gains on assets, which are taxable Australian property between companies sharing 100% common ownership where the transfer is between non-resident companies, or between a non-resident company, on the one hand, and, on the other hand, a member of a consolidated group or multiple entry consolidated (MEC) group, or a resident company that is not a member of a consolidated group. *See the Group taxation section for more information*.

### *Inter-company dividends*

A 'gross-up and credit' mechanism applies to franked dividends (dividends paid out of profits which have been subject to Australian tax) received by Australian companies. The corporate shareholder grosses up the dividend received for tax paid by the paying company (i.e. franking credits attaching to the dividend) and is then entitled to a tax offset (i.e. a reduction of tax) equal to the gross-up amount. A company with an excess tax offset entitlement converts the excess into a carryforward tax loss using a special formula. Dividends paid to another resident company that are unfranked (because they are paid out of profits not subject to Australian tax) are taxable, unless they are paid within a group that has chosen to be consolidated for tax purposes. Dividends paid between companies within a tax consolidated group are ignored for the purposes of determining the taxable income of the group.

An exemption from withholding tax is available for dividends that are 'unfranked' under the dividend imputation rules (*see below*) and are declared to be conduit foreign income (CFI) received by non-resident shareholders (or unitholders) in an Australian corporate tax entity (CTE). These rules may also treat the CFI component of an unfranked dividend received by an Australian CTE from another Australian CTE as not taxable to the recipient, provided it is on-paid within a specified timeframe. Broadly, income will qualify as CFI if it is foreign income, including certain dividends, or foreign gains, which are not assessable for Australian income tax purposes or for which a foreign income tax offset has been claimed in Australia. Alternatively (and subject to certain conditions), if a foreign owned company resident in Australia receives a taxable unfranked dividend with no CFI component from a resident company in which it holds at least 10% of the voting power, a deduction may be allowed to the extent that the dividend is on-paid to a non-resident 100% parent company. In that case, the unfranked dividend on-paid to the non-resident parent generally will attract dividend withholding tax (subject to treaty relief – *see the Withholding taxes section*).

Foreign dividends are not assessable and are not eligible for a tax offset if received by an Australian resident company from a foreign affiliate where the recipient company has a voting power of at least 10% in the foreign affiliate. Income of a non-resident entity in which Australian residents hold interests is not assessable when repatriated to Australia where the income has been previously attributed to those residents and taxed in Australia (*see below*).

Dividends paid out of share capital accounts are unfrankable.

Where a company transfers an amount (e.g. profits) to a share capital account from another account, the capital account will become a tainted share capital account. Until it becomes untainted, any distribution debited to such an account is treated as an unfrankable dividend, and not as a return of capital.

A dividend imputation system allows Australian corporations (and New Zealand companies that have chosen to be a New Zealand franking choice company) to pass tax credits to individual resident shareholders, certain superannuation entities, life insurance companies in respect of their superannuation (Australian retirement plan) business, and certain registered organisations, such as registered trade unions and friendly societies, in respect of Australian tax imposed on profits from which dividends (including stock dividends treated as dividends) are paid.

A resident corporation (or New Zealand company that has chosen to be a New Zealand franking choice company) receiving a franked dividend, that is, a dividend paid out of Australian taxed profits, may further distribute the imputed tax credits to its own resident shareholders.

Franked dividends paid to non-residents are exempt from dividend withholding tax.

Companies that are effectively wholly owned by non-residents (known as 'exempting companies') may provide franking benefits only in limited circumstances. However, non-resident shareholders in receipt of franked dividends from exempting companies are exempt from dividend withholding tax.

There is legislation designed to prevent the selective streaming of franking credits to different shareholders. Selection plans under which shareholders are given a choice of a tax-free bonus share (stock dividend), unfranked dividend or franked dividend in lieu of another dividend are not effective.

Under debt and equity classification rules there may be situations where interest income is treated as if it were a dividend. Similarly, dividends paid on shares that are debt interests will not be frankable.

The dividend imputation system operates in the following way. The company's franking account is credited with tax paid. The corporate entity paying a dividend may determine the extent to which a dividend is franked, subject to anti-streaming rules and benchmarking rules that limit the ability to change the franking percentage in later periods. As indicated above, fully franked inter-company dividends effectively are untaxed under a 'gross-up and credit' method. A shareholder is entitled to franking credits on dividends only in respect of ordinary shares held at risk for at least 45 days (90 days for preference shares). There is an exemption from these franking credit trading rules for individuals, provided the imputation rebates received in the year of income do not exceed AUD 5,000 and the individual is not obliged to make a payment related to the dividend.

### *Foreign income*

On 17 February 2011, the government released Exposure Draft legislation for public comment setting out the legislative design of reforms to modernise the controlled foreign company (CFC) rules and to implement new foreign accumulation fund (FAF) rules. The operative framework of the draft legislation remains broadly unchanged from the consultation papers previously released by the government. The government first announced the modernisation of the CFC rules in May 2009 as part of wider reforms to Australia's foreign source income anti-tax-deferral (attribution) rules. The current basis upon which the foreign income of corporations resident in Australia is taxed is set out below, together with some of the key features of the proposals as released for consultation. The commencement date for the new CFC and FAF rules has not been announced.

- Non-active income of foreign companies controlled by Australian residents (determined by reference to voting rights and dividend and capital entitlements) may be attributed to those residents under rules which distinguish between companies resident in 'listed countries' (e.g. Canada, France, Germany, Japan, New Zealand, the UK, and the US) and in other 'unlisted' countries. In general, if the CFC is resident in an unlisted country and it fails the active income test (typically because it earns 5% or more of its income from passive or tainted sources), the CFC's tainted income (very broadly, passive income and gains, and sales and services income which has a connection with Australia) is attributable. If a CFC is resident in a listed country, a narrower range of tainted income is attributed even if the CFC fails the active income test. It is currently proposed under the new rules that the term 'control' will take its meaning from Australian accounting standards, rather than the current bright-line test of voting interest and entitlements to capital and dividends. With regard to the type of income to be attributed, it is proposed that sales and services income, which has a connection with Australia, derived by a CFC will no longer be attributable. It is proposed that passive income, defined in broadly similar terms to the existing rules, will continue to be attributable, however, a carve out is proposed where the income arises in connection with a permanent establishment of the CFC competing in a market through the ongoing use of labour within the CFC's country of residence, or which are profits from assets or financial arrangements that were held for the predominant purpose of producing active income. It is also proposed that rent from real estate, and passive income received from an active member of the same CFC group will not be attributable provided that payment of the amount does not provide a benefit, such as a deduction, to the attributable taxpayer or an associate.
- When income previously taxed on attribution is repatriated, it is not assessable for tax.
- Dividends received directly by a resident company from a foreign company are not assessable for tax where the resident company has a (non-portfolio) voting interest of at least 10% in the foreign affiliate and does not receive the dividend in its capacity as a trustee. The basis upon which distributions may qualify for such relief (i.e. where the payee has a voting interest of at least 10% in the payer) is currently under consideration as part of the redesign of the CFC rules. The proposal is currently that the relief should only be available where the distribution is in respect of an 'equity interest' (as defined for tax law purposes) and the Australian resident recipient company holds a total participation interest of at least 10% or the Australian resident is an attributable taxpayer. It is proposed that the relief will also be available where the distribution is received by an Australian resident company indirectly through a trust or partnership.
- Active foreign branch profits of a resident company from carrying on business through a permanent establishment in a foreign country and capital gains made by a resident company from the disposal of non-tainted assets used in deriving foreign branch income are not assessable for tax, except income and capital gains from the operation of ships or aircraft in international traffic. A rewrite of the foreign branch exemption has been proposed and represents a continued alignment of the foreign branch exemption with the CFC rules.
- Foreign income of Australian resident corporations and income of such taxpayers which is subject to foreign income taxes that is not effectively exempt (*as broadly described above*) is subject to tax, but, in most cases an offset for foreign income tax

paid is allowed to the extent of Australian tax payable on such income. For income years commencing prior to 1 July 2008, such offsets generally were confined to foreign tax paid in respect of foreign sourced income and computed in three separate classes: passive income, offshore banking income, and other income. In addition, it was possible to carry forward excess credits for a period of up to five years. The ability to carry forward excess credits was removed for income years commencing on or after 1 July 2008, subject to transitional rules permitting conversion of some existing carried forward balances to foreign income tax offsets. For income years commencing on or after 1 July 2008, there is no longer a quarantining of deductions or losses associated with the derivation of foreign source income.

- For the 2009-10 and earlier income years, rules dealt with passive foreign investment funds (FIFs) (including interests in foreign companies, foreign trusts and foreign life insurance policies). Essentially, and subject to important qualifications, the FIF rules tax (attribute) increases or deemed increases in the value of interests held by Australian residents in offshore entities (wherever located), except for some categories that are specifically exempted (e.g. investments in foreign companies listed on approved stock exchanges that are principally engaged in certain active businesses were exempt). The FIF rules were repealed with effect from the 2010-11 income year and are proposed to be replaced with a narrow anti-avoidance rule (proposed Foreign Accumulation Fund (FAF) regime) which, in broad terms, is directed at investments in non-CFC foreign companies or fixed trusts which fail bright line investment and accumulation tests, that is, income should not be attributed provided that more than 20% of the foreign entity's assets are not debt interests or 80% or more of the profits and gains of the entity are distributed within a defined period.
- In certain circumstances, foreign limited partnerships, foreign limited liability partnerships, US limited liability companies and UK limited liability partnerships will be treated as partnerships (i.e. as a flow-through entity) rather than as a company for the purposes of Australia's income tax laws.

### *Stock dividends*

Stock dividends, or the issue of bonus shares, as they are known under Australian law, are in general not taxed as a dividend, and the tax treatment is the spreading of the cost base of the original shares across the original shares and the bonus shares. However, if a company credits its share capital account with profits when issuing bonus shares, this will taint the share capital account (if it is not already a tainted share capital account), causing the bonus share issue to be a dividend. Certain other rules may apply to bonus share issues, depending on the facts.

### *Financial arrangements*

New measures for the TOFA apply for arrangements entered into from income years commencing on or after 1 July 2010, although a taxpayer may have elected to apply the new measures to arrangements entered into from income years commencing on or after 1 July 2009. A taxpayer may also have elected to have the new rules apply to all pre-existing financial arrangements that the taxpayer has at the start of the first income year to which new rules apply.

'Financial arrangement' is widely defined to cover arrangements that involve a cash settlable legal or equitable right to receive, or obligation to provide, something of economic value in the future.

The new measures provide for six tax-timing methods for determining gains or losses in respect of financial arrangements, along with revenue account treatment of the resulting gains or losses to the extent that the gain or loss is made in earning assessable income or carrying on a business for that purpose. The default methods are the accruals method and the realisation method, one or other of which will apply depending on the relevant facts and circumstances of a particular financial arrangement. The accruals method will apply to spread an overall gain or loss over the life of the financial arrangement where there is sufficient certainty that the expected gain or loss will actually occur. A gain or loss that is not sufficiently certain is dealt with under the realisation method. Alternatively, a taxpayer may irrevocably choose one of four elective methods – fair value, retranslation, financial reports, and hedging – to determine the tax treatment of financial arrangements covered by the legislation. Qualification criteria must be met before the elective methods may be used. Generally, these criteria require that the taxpayer prepare a financial report in accordance with Australian (or comparable) accounting standards and be audited in accordance with Australian (or comparable) auditing standards.

Exemptions from the new regime may be available having regard to the duration of the arrangement or the nature of the relevant taxpayer and the annual turnover or value of assets of that taxpayer. Certain types of financial arrangements are excluded from the new rules, including leasing and hire purchase arrangements. Foreign residents are taxable on gains from financial arrangements under the new measures to the extent that the gains have an Australian source.

### *Foreign exchange gains and losses*

Foreign currency gains and losses are recognised when realised regardless of whether there is a conversion into Australian dollars, and are included in or deducted from ordinary income, subject to limited exceptions. There are exceptions to the timing and characterisation aspects of the realisation approach where the foreign currency gain or loss is closely linked to a capital asset. Rollover relief may be available for the issuer of a succession of short-term foreign currency bill or securities, to the extent that money remains outstanding under the facility. To reduce compliance costs with foreign currency denominated bank accounts, taxpayers may elect to disregard gains or losses on low balance transaction accounts that satisfy a de minimis exemption, or may elect for retranslation by annually restating the balance of the account by reference to deposits, withdrawals, and the exchange rates at the beginning and end of each year (or by reference to amounts reported in accordance with applicable accounting standards).

For foreign exchange gains and losses associated with financial arrangements as defined, the compliance impact of the foreign exchange rules will be reduced for those taxpayers eligible to elect the retranslation or financial reports tax-timing methods under the taxation of financial arrangement measures *(as discussed above)*.

Entities or parts of entities, satisfying certain requirements, are able to choose to account for their activities in a currency other than Australian dollars for income tax purposes as an intermediate step to translating the result into Australian dollars.

## *Deductions*

### *Depreciation and depletion*

A capital allowances regime allows a deduction for the decline in value of depreciating assets held by a taxpayer. The holder of the asset is entitled to the deduction and may be the economic, rather than the legal owner. A 'depreciating asset' is an asset that has a limited effective life and can reasonably be expected to decline in value over the time it is used, but does not include land, trading stock or, subject to certain exceptions, intangible assets. Deductions are available for certain other capital expenditure.

Intangible assets that are depreciating assets (if they are not trading stock) are:

- certain mining, quarrying, or prospecting rights and information
- items of intellectual property
- in-house software
- indefeasible rights to use an international telecommunications submarine cable system
- spectrum licenses under radio communications legislation
- datacasting transmitter licenses, and
- telecommunications site access rights.

Goodwill and trademarks are not depreciating assets, and tax amortisation is not available.

Taxpayers that do not qualify as a small-business must depreciate the asset over its useful life (known as 'effective life'), using either straight-line (known as the 'prime cost' method) or diminishing-value method (straight-line rate multiplied by 200% for depreciating assets acquired on or after 10 May 2006).

Taxpayers may self-determine the effective life of a unit or plant or may choose the effective life contained in a published determination of the Commissioner of Taxation.

Non-small-business taxpayers are able to choose to write-off all items costing less than AUD 1,000 through a low-value pool at a diminishing-value rate of 37.5% per annum.

For those who satisfy the small business entity threshold (broadly defined as taxpayers who are carrying on business and who, together with certain connected entities, have an aggregated turnover of less than AUD 2 million for the year), a simplified depreciation system applies with more attractive depreciation rates.

'Project pool' rules allow expenditure that does not itself form part of a depreciating asset to be deductible over the life of a project that is carried on for a taxable purpose. Amongst other things, items that fall within the rules include the following:

- Amounts paid to create or upgrade community infrastructure for a community associated with the project.
- Site preparation costs for depreciating assets (except horticultural plants in certain circumstances).
- Amounts incurred for feasibility studies for a project.
- Environmental assessment costs applicable to the project.
- Amounts incurred to obtain information associated with the project.
- Amounts incurred in seeking to obtain a right to intellectual property.
- Costs of ornamental trees or shrubs.

The so-called 'blackhole' expenditure provisions allow a five-year straight-line write-off for capital expenditure incurred on or after 1 July 2005 in relation to a past, present or prospective business, to the extent that the business is, was or is proposed to be carried on for a taxable purpose. The expenditure is deductible to the extent that it is not elsewhere taken into account (for example by inclusion in the cost base of an asset for capital gains tax purposes) and that it is not denied deductibility for the purposes of the income tax law (for example, by the rules against deducting entertainment expenditure).

Special rules apply for primary producer assets, such as horticultural plants, water and land care assets, and the treatment of expenditure on research and development (R&D) (*see the Tax credits and incentives section*) and expenditure on certain Australian films.

A luxury car cost limit applies for depreciating the cost of certain passenger motor vehicles (AUD 57,466, cost limit for the 2010-11 income year).

Expenditure on the development of in-house software may be allocated to a 'software development pool' and written off over three years, starting in the year after the expenditure was incurred (40% in year two, 40% in year three, and 20% in year four). Amounts spent on acquiring computer software or the right to use it (except where the acquisition is for developing in-house software) generally is treated as incurred on acquiring a depreciating asset, deductible over its effective life (taken to be four years) commencing in the first year it is first used or installed ready for use. 'Shrink-wrapped' software acquired or manufactured for sale generally will be treated as trading stock.

A loss arising on the sale of a depreciating asset (depreciated value of the asset less sale consideration) is generally an allowable deduction. A gain on the sale of a depreciating asset, to the extent of depreciation recaptured, generally is taxed as ordinary income. Gains exceeding the amount of depreciation recaptured are also taxed as ordinary income.

A one-off tax benefit was available for certain capital expenditure in respect of depreciating assets (*see above*) where the taxpayer commences to hold the asset under a contract entered into between 13 December 2008 and 31 December 2009 (or where the taxpayer commences to construct the asset between those dates).

The cost of income-producing structural improvements, the construction of which started after 26 February 1992 is eligible for write-off for tax purposes on the same basis as that of income-producing buildings, that is, at a rate of 2.5% per annum.

Subject to exceptions referred to below, capital expenditure incurred after 15 September 1987 in the construction or improvement of non-residential buildings used for producing assessable income is amortised over 40 years at an annual 2.5% rate. Capital expenditure on the construction of buildings used for short-term traveller accommodation (e.g. hotels, motels) and industrial buildings (typically, factories) is amortised over 25 years at an annual 4% rate where construction commenced after 26 February 1992. The cost of eligible building construction that commenced after 21 August 1984 and before 16 September 1987 (or construction contracted before 16 September 1987) is amortised over 25 years at an annual 4% rate. There is no recapture of the amortised amount upon disposal of the building, except where the expenditure is incurred after 13 May 1997, in which case recapture will apply, subject to certain transitional rules.

Similar provisions apply in relation to income-producing residential buildings on which construction commenced after 17 July 1985.

The cost of consumables may be either written off immediately, or as used.

The following expenditure attracts an immediate 100% deduction: environmental protection activities, dealing with pollution and waste; landcare operations; exploring or prospecting for minerals (and from 1 July 2012 for exploration of geothermal energy sources); mine site rehabilitation; and certain expenditure in respect of the establishment of carbon sink forests.

Tax depreciation is not required to conform to book depreciation.

Percentage depletion based on gross income or other non-cost criteria is not available.

### *Net operating losses*

Losses may be carried forward indefinitely, subject to compliance with tests of continuity of more than 50% of ultimate stock ownership or compliance with a same business test. For consolidated group companies, the ability to utilise these losses is determined by a modified version of these tests. *See the Group taxation section*. More liberal rules apply when determining continuity of majority underlying ownership of certain widely held companies and companies which are majority-owned by widely held companies or certain other entities. These more liberal rules have two main effects: (i) the continuity of majority underlying ownership test may be satisfied by testing at certain points of time, without testing throughout the intervening periods, and (ii) in certain cases, special concessional tracing rules deem entities to hold voting, dividend or capital stakes in the company so that tracing through to the ultimate beneficial owners of those stakes is not needed. In particular, registered shareholdings of less than 10% are taken to be held by a single notional shareholder, in general avoiding the need to identify small ownership interests and the risk of failing the continuity of ownership test because of small shareholder churn. Companies (including tax consolidated groups) can choose the proportion of their carryforward losses to be deducted in a year. Making this choice deals with the situation where untaxed franked dividends and the imputation credit on such dividends would otherwise absorb carryforward and current year losses.

### *Payments to foreign affiliates*

A corporation can deduct royalties, management service fees, and interest charges paid to non-residents, provided the amounts are commercially realistic and referrable to activities aimed at producing assessable income.

### *Interest*

Special rules classify financial arrangements as either debt or equity interests. These rules focus on economic substance rather than legal form and take into account related schemes, and extend beyond shares. In this situation, interest expense on non-share equity would be treated as a dividend, which is potentially frankable, and would be non-deductible for the paying company/group.

Thin capitalisation measures apply to the total debt of the Australian operations of multinational groups (including branches of those groups). The measures cover investment into Australia of foreign multinationals and outward investment of Australian-based multinationals, and include a safe-harbour debt-to-equity ratio of 3:1. Interest deductions are denied to the extent that borrowing exceeds the safe-harbour ratio. Where borrowing exceeds the safe-harbour ratio, multinationals are not affected by the rules if they can satisfy the arm's-length test (that the borrowing could have been borne by an independent entity). A further alternative test is available for outward investing entities based on 120% of their worldwide gearing.

The thin capitalisation rules apply to inward investment into Australia, where a foreign entity carries on business through an Australian permanent establishment or has direct investments in Australia or in broad terms five or fewer non-residents have at least 50%, or a single non-resident has at least 40% of an Australian entity that has incurred interest expenses that might otherwise be deductible against its Australian taxable income. Separate rules apply to financial institutions. To facilitate their inclusion in the rules, branches are required to prepare financial accounts.

International Financial Reporting Standards (IFRS), equivalents of which apply in Australia from 1 January 2005, make it more difficult for some entities to satisfy thin capitalisation rules because of the removal of internally generated intangible assets from the balance sheets. After a four-year transitional measure that allowed taxpayers to calculate safe harbour debt amounts using the pre-1 January 2005 accounting standards, the law now allows departure from the Australian equivalents to IFRS in relation to certain intangible assets and to exclude deferred tax assets and liabilities and surpluses and deficits in defined benefit superannuation funds from applicable calculations.

### *Financial arrangements*

New measures for the TOFA apply with effect for arrangements entered into from income years commencing on or after 1 July 2010, although a taxpayer may have elected to apply the new measures to arrangements entered into from income years commencing on or after 1 July 2009. The new measures provide for two default methods and four elective methods for determining gains or losses in respect of financial arrangements, along with revenue account treatment of the resulting gains or losses to the extent that the gain or loss is made in earning assessable income or carrying on a business for that purpose. *See Financial arrangements in the Income determination section*.

### *Foreign exchange gains and losses*

Foreign currency gains and losses are recognised when realised, regardless of whether there is a conversion into Australian dollars, and are included in or deducted from ordinary income, subject to limited exceptions. *See Foreign exchange gains and losses in the Income determination section*.

### *Taxes*

In general, goods and services tax (GST) input tax credits, GST and adjustments under the GST law are disregarded for income tax purposes. Other taxes, including property, payroll, fringe benefits tax and other business taxes, excluding income tax, are deductible to the extent they are incurred in producing assessable income or necessarily incurred in carrying on a business for this purpose, and are not of a capital or private nature.

### *Other significant items*

Where expenditure for services is incurred in advance, deductibility of that expenditure generally will be prorated over the period during which the services will be provided, up to a maximum of 10 years.

Subject to limited exceptions, deductions are denied for expenditure on ‘entertainment’, which broadly is defined as entertainment by way of food, drink or recreation, and accommodation or travel to do with providing such entertainment.

The amount of a commercial debt forgiven (other than an intra-group debt within a tax consolidated group) that is not otherwise assessable or does not otherwise reduce an allowable deduction is applied to reduce the debtor’s carryforward tax deductions for revenue tax losses, non-deducted capital losses, non-deducted capital expenditure, and other capital cost bases in a certain order. Any amount not so applied is not assessable to the debtor. Forgiveness includes the release, waiver, or extinguishment of a debt (other than by full payment in cash) and the lapsing of the creditor’s recovery right by reason of a statute of limitations. For the 2009-10 and earlier income years, the net forgiven amount may in certain circumstances be apportioned among a non-consolidated group of companies related to the debtor.

General value shifting rules apply to shifts of value, direct or indirect, in respect of loan and equity interests in companies or trusts. Circumstances in which these rules may apply include where there is a direct value shift under a scheme involving equity or loan interests, or where value is shifted out of an asset by the creation of rights in respect of the asset, or where there is a transfer of assets or the provision of services for a consideration other than at market value. The value shifting rules may apply to the head company of a tax consolidated group or MEC group for value shifts also involving entities outside the group, but not to value shifting between group members, which the tax consolidation rules address. *See the Group taxation section*.

## *Group taxation*

A tax consolidation regime applies for income tax and capital gains tax purposes for companies, partnerships and trusts ultimately 100% owned by a single head company (or certain entities taxed like a company) resident in Australia. Australian resident companies that are 100% owned (either directly or indirectly) by the same foreign company and that have no common Australian head company between them and the non-resident parent are also allowed to consolidate as a multiple entry consolidated group (MEC group). The group that is consolidated for income tax purposes may differ from the group that is consolidated for accounts or for GST purposes. Groups that choose to consolidate must include all 100%-owned entities under an all-in rule and the choice to consolidate is irrevocable. However, eligible tier-1 companies (being Australian resident companies that have a non-resident shareholder) that are members of a potential MEC group, are not all required to join a MEC group, when it forms, but may form two or more separate MEC groups, if they so choose, of which the same foreign top company is the 100% owner. If an eligible tier-1 company joins a particular MEC group, all 100% subsidiaries of the company must also join the group. While the rules for forming and joining MEC groups allow more flexibility than with consolidated groups, the ongoing rules for MEC groups are more complex, particularly for tax losses and on the disposal of interests in eligible tier-1 companies, which are subject to cost pooling rules, although for practical purposes these rules are relevant only if the non-resident is holding or disposing of an indirect Australian real property interest. *See Capital gains in the Income determination section*.

A single entity rule applies to members of a consolidated or MEC group so that for income tax purposes the subsidiary members are taken to be part of the head company, while they continue to be members of the group and intra-group transactions are not recognised. In general, no group relief is available where related companies are not members of the same consolidated or MEC group. *However, see previously under Capital gains in the Income determination section for exceptions with regard to certain capital gains tax rollovers.*

Consolidated groups file a single tax return, and calculate their taxable income or loss ignoring all intra-group transactions.

When a consolidated group acquires 100% of an Australian resident entity, so that it becomes a subsidiary member, the cost base of certain assets (in general, those that are non-monetary) of the joining member are reset for all tax purposes, based on the purchase price plus the entity's liabilities, subject to certain adjustments. In this way, an acquisition of 100% of an Australian resident entity by a consolidated group is broadly the tax equivalent of acquiring its assets. Subject to certain tests being passed, tax losses of the joining member may be transferred to the head company, and may be utilised subject to a loss factor, which is broadly the market value of the joining member divided by the market value of the group (including the joining member). The value of the loss factor (referred to as 'the available fraction') that applies for transferred losses may be reduced by capital injections (or the equivalent) into the member before it joined, or into the group after the loss is transferred.

Franking credits, foreign tax credits carried forward under the former foreign tax credit regime and tax losses remain with the group when a member exits, and the cost base of shares in the exiting member is calculated based on the tax value of its assets at the time of exit, less liabilities subject to certain adjustments.

Generally members of the group are jointly and severally liable for group income tax debts on the default of the head company, unless the group liability is covered by a tax sharing agreement (TSA) that satisfies certain legislative requirements. A member who enters into a TSA generally can achieve a clean exit from the group where a payment is made to the head company in accordance with the TSA.

## *Tax credits and incentives*

### *Inward investment*

Depending on the nature and size of the investment project, state governments may give rebates from payroll, stamp and land taxes on an ad hoc basis and for limited periods.

### *Capital investment*

Incentives for capital investment are as follows:

- Accelerated deductions are available for capital expenditures on the exploration for and extraction of petroleum and other minerals (and from 1 July 2012 for exploration of geothermal energy sources); the rehabilitation of former mineral extraction sites, certain environmental protection activities, the establishment of certain 'carbon sink' forests and for certain expenditure of primary producers.
- Subject to changes proposed with effect from 1 July 2010 (*see below*), deductions of up to 125% of amounts expended apply to eligible R&D expenditure incurred by a company incorporated in Australia on projects whose details are set out in an R&D plan that has previously been approved by the company's board of directors or an authorised person. To qualify the company must lodge a registration application with Innovation Australia not later than 10 months after the end of the relevant income year. The concessional deduction may be cancelled retrospectively if subsequent exploitation of the results is not on normal commercial terms and is not "of the kind to be expected of hypothetical persons dealing with each other at arm's length and from positions of similar or like or roughly equivalent bargaining power". Expenditure in acquiring or gaining access to certain pre-existing technology, known as 'core technology expenditure', is deductible at a rate of 100% of the amount expended if the purpose of acquiring the technology is to carry on eligible R&D. The deduction in any year cannot exceed one-third of the amount of expenditure incurred in that year on R&D related to that core technology. Undeducted core technology expenditure may be carried forward for deduction in future years, subject to the same requirements. There is an R&D tax offset for certain small companies and a 175% premium rate deduction for certain expenditure years where companies increase their R&D expenditure over the average expenditure for the preceding three-year period. In certain circumstances, an Australian company undertaking R&D activities in Australia wholly or principally on behalf of a foreign related entity, may be able to claim the 175% rate.

Special grant programmes may be available to assist corporations in the conduct of certain research and development in Australia. These grants are awarded on a discretionary basis.

Within a consolidated regime, R&D concessions are claimed by the head company on behalf of the group.

As mentioned above, the government proposes to change the tax treatment of expenditure on R&D. For income years commencing on or after 1 July 2010, the current concessional deductions will be replaced with an R&D tax credit. For companies with an annual turnover of less than AUD 20 million, there will be a 45% refundable tax credit, equivalent to a 150% tax concession. This equates to a cash saving of 15% every dollar of R&D spend, and will be refundable where the company is in a tax loss position. For companies with a turnover of greater than AUD 20 million, they will have access to a non-refundable 40% tax credit, equivalent to a 133% tax concession. This equates to a cash saving of 10 cents for every dollar of R&D spend. Generally, only R&D activities undertaken in Australia qualify for the new R&D tax incentive. However, R&D activities conducted overseas also qualify in limited circumstances where the activities cannot be undertaken in Australia. The 175% premium concession and international premium concession will be abolished. Eligibility criteria will be tightened to support 'only genuine R&D'. Legislation to give effect to the proposals was reintroduced into Parliament in September 2010 and is yet to be enacted.

- There are a number of tax concessions aimed at encouraging investments in the venture capital sector. Non-resident pension funds that are tax-exempt in their home jurisdiction, are residents of Canada, France, Germany, Japan, UK, US, or another country prescribed by regulation, and satisfy certain Australian registration requirements are exempt from income tax on the disposal of investments in certain Australian venture capital equity held at risk for at least 12 months. A similar exemption is extended to other tax-exempt non-resident investors, including managed funds and venture capital fund-of-funds vehicles and taxable non-residents holding less than 10% of a venture capital limited partnership. These investors are able to invest in eligible venture capital investments through an Australian resident venture capital limited partnership or through a non-resident venture capital limited partnership. For periods from 1 July 2002 until the end of the 2006-07 income year, the exemption applies only to investors from the United States, United Kingdom, Japan, Germany, France and Canada, Finland, France, Italy, the Netherlands, New Zealand, Norway, Sweden, and Taiwan. Thereafter, the restriction on the country of residence of non-resident investors no longer applies (although general partners of specified classes of limited partnership are excluded). Eligible venture capital investments are limited to specified interests in companies and trusts. Detailed rules in the legislation prescribe the nature of such investments and the characteristics, which such companies and trusts and their investments must possess.
- There is a venture capital tax concession for pooled development funds (PDFs). PDFs are investment companies established to provide equity capital to small and medium-size enterprises. PDFs are taxed on their net income at 25%, except for income from small and medium-size enterprises, which is taxed at 15%. PDFs are entitled to imputation credits on the receipt of franked dividend income. Dividends from PDFs are tax exempt. Gains on the sale of shares in a PDF are exempt from tax, and losses are not deductible. The existing PDF arrangements have been progressively replaced by a newer investment vehicle called an early stage venture capital limited partnership (ESVCLP). The existing PDF arrangements closed to new registrations from 21 June 2007. For income years commencing on or after 1 July 2007 a new investment vehicle called an early stage venture capital limited

partnership (ESVCLP) has been introduced. The thresholds for qualification include requirements that, amongst other things, the committed capital of ESVCLP must be at least AUD 10 million but not exceed AUD 100 million, the investments made must fall within prescribed parameters as to size and proportion of total capital and the ESVCLP must have an investment plan approved by Innovation Australia. Where the thresholds for their application are met, the ESVCLP provisions provide flow-through tax treatment to domestic and foreign partners with the income and capital received by the partners being exempt from taxation. As the income will be tax exempt, the investor will not be able to deduct investment losses.
- The taxable income derived from pure offshore banking transactions by an authorised offshore banking unit in Australia is taxed at the rate of 10%.
- Taxation incentives currently are provided to both investors in, and producers of, films in Australia. However, the provisions which, subject to a number of conditions, provided an accelerated deduction for certain capital expenditures on films made wholly or substantially in Australia are being phased-out, with no deductions being available after the 2009-10 income year. These provisions regarding film incentives have been replaced with refundable tax offsets which are available to companies for certain expenditure incurred in Australia in producing specified classes of film or undertaking specified post, digital or special effects production activities in respect of specified classes of films. The concessions are only available to a company that is either an Australian resident or a non-resident carrying on business through an Australian permanent establishment and which has been issued with an Australian Business Number. The availability of the offsets is subject to a number of conditions, including meeting registration and minimum spend requirements. The rate of the offset varies from 15% to 40% depending upon the nature of the relevant film and activities undertaken.
- There is an Entrepreneurs' Tax Offset (ETO) of up to 25% for businesses run by small business entities, which can include companies with an annual turnover of up to AUD 75,000. The ETO is proposed to be abolished with effect from the 2012-13 income year.

### *Other incentives*

Cash grants for export-market development expenditure are available to eligible businesses seeking to export Australian-source goods and services.

## *Withholding taxes*

Notes

1. Dividends paid to non-residents are exempt from dividend withholding tax except when paid out of a company that has not borne Australian tax (i.e. unfranked dividends). Dividends include those stock dividends that are taxable. The rates shown apply to dividends on both portfolio investments and substantial holdings other than dividends paid in connection with an Australian permanent establishment (PE) of the non-resident. Unfranked dividends paid to non-residents are exempt from dividend withholding tax to the extent that the dividends are declared by the company to be conduit foreign income. There is also a deduction from 1 July 2000 in certain cases to compensate for the company tax on inter-entity distributions where these are on-paid by holding companies to a 100% parent that is a non-resident *(see Inter-company dividends under Income determination).* Dividends paid to a non-resident in connection with an Australian PE are taxable to the non-resident on a net assessment basis (i.e. the dividend and associated deductions will need to be included

in the determination of the non-resident's taxable income – the dividend is not subject to dividend withholding tax), and a franking tax offset is allowable to the non-resident company for franked dividends received.

2. Australia's interest withholding tax rate is limited to 10% of gross interest although the treaty may allow for a higher maximum limit. An exemption from Australian withholding tax can be obtained for interest on certain public issues or widely held issues of debentures. Provisions exist to ensure that discounts and other pecuniary benefits derived by non-residents on various forms of financings are subject to interest withholding tax. Interest paid to non-residents by offshore banking units is exempt from interest withholding tax where offshore borrowings are used in offshore banking activities (including lending to non-residents). An offshore borrowing is defined as a borrowing from (i) an unrelated non-resident in any currency or (ii) a resident or a related person in a currency other than Australian currency.
3. Royalties paid to non-residents (except in respect of a PE in Australia of a resident of a treaty country) are subject to 30% withholding tax (on the gross amount of the royalty), unless a double taxation agreement provides for a lesser rate.
4. For Australian-sourced dividends which are franked under Australia's dividend imputation provisions and paid to a person who directly holds at least 10% of the voting power of the company, the limit is 10% (although note that Australia does not impose withholding tax on franked dividends). For Argentinean-sourced dividends paid to a person who holds at least 25% of the capital in the company, the limit is 10%. A 15% limit applies to other dividends.
5. Source-country tax is limited to 10% of the gross amount of royalties in relation to copyright of literary, dramatic, musical, or other artistic work; the use of industrial or scientific equipment; the supply of scientific, technical or industrial knowledge; assistance ancillary to the above; or certain forbearances in respect of the above. Source-country tax is limited to 10% of the net amount of royalties for certain technical assistance. In all other cases it is limited to 15% of the gross amount of royalties.
6. Tax is limited to the indicated percentage of gross royalty.
7. Under a protocol signed on 23 January 2002 the maximum withholding tax rate on interest is 10%. The Protocol adopts a 5% dividend withholding tax rate to franked dividends paid by an Australian resident company and in the case of dividends paid by a Canadian resident company (other than a non-resident owned investment corporation) to a company that holds directly at least 10% of the voting power in the dividend company (although note that Australia does not impose withholding tax on franked dividends). Otherwise the maximum withholding tax rate on dividends will continue to be 15%. The protocol has effect in Australia in relation to dividends, interest and royalties derived on or after 1 January 2003.
8. Except Hong Kong and Macau.
9. The treaty between Australia and the Czech Republic allows Australia to impose a 5% withholding tax on the franked part of a dividend in certain circumstances (although note that Australia does not impose withholding tax on franked dividends). In the Czech Republic a rate of 15% applies to the gross amount of dividends if the dividends are paid to a company, which holds directly at least 20% of the capital of the company paying the dividend.
10. East Timor does not have a comprehensive double tax agreement with Australia. However, the Timor Sea Treaty governs the taxation rights between the two countries for petroleum-related activities conducted in the Joint Petroleum Development Area of the Timor Sea by any person or entity, irrespective of the residency status of that person or entity.
11. Where the Timor Sea Treaty applies to third-country resident payees, only 10% of the total gross interest, dividend or royalty payment is subject to Australian withholding tax, as follows: interest – 10% of total gross interest paid is subject to withholding tax at a rate of 10%; dividends – 10% of total gross unfranked dividends paid is subject to withholding tax at a rate of 15%, or at the relevant double tax agreement rate of the recipient; royalties – 10% of total gross royalties paid is subject to withholding tax at a rate of 10%, or at the relevant double tax agreement rate of the recipient. However the other 90% of each such amount is subject to East Timorese withholding tax at the same rates.
12. The current agreement came into force on 10 November 2007 and has effect in Australia in respect of withholding taxes for income derived on or after 1 January 2008 and in respect of other income, profit or gains derived on or after 1 July 2008.
13. On 20 June 2006 Australia and France signed a new agreement. The new agreement has effect in Australia in respect of withholding tax on income derived on or after 1 January 2010, being the calendar year next following 1 June 2009, which was the date on which the new agreement entered into force. The source country will exempt inter-corporate non-portfolio (i.e. minimum 10% shareholding) dividends paid out of profits that have borne the normal rate of company tax. There is a 5% rate limit for all other non-portfolio dividends. A rate limit of 15% will continue otherwise to apply for dividends. A rate limit of 10% applies to interest except no tax will be chargeable in the source country on interest derived by a financial institution resident in the other country or a government or political or administrative subdivision or local authority or central bank of the other country. The rate limit for royalties reduced to 5% from 1 January 2010. Amounts derived from equipment leasing (including certain container leasing) are excluded from the royalty definition and treated either as international transport operations or business profits.
14. The source-country limit under the Indian agreement is 10% for royalties paid in respect of the use of or rights to use industrial, commercial or scientific equipment or for the provision of consulting services related to such equipment. In other cases the limit is 15%.

15. The source-country limit under the Indonesian agreement is 10% for royalties paid in respect of the use of or the right to use any industrial, commercial or scientific equipment or for the supply of scientific, technical, industrial, or commercial knowledge or information, and it is 15% in other cases.
16. A zero dividend withholding tax rate applies to franked dividends paid by an Australian resident company to an entity that holds directly at least 10% of the voting power in the dividend paying company, otherwise a 15% withholding tax rate applies. In relation to dividends paid by a company resident of Malaysia, no withholding tax applies.
17. Source-country tax in Malta is limited to the tax chargeable on the profits out of which the dividends are paid.
18. A zero dividend withholding tax rate applies to franked dividends paid (in Mexico, those dividends that have been paid from the net profit account) to a company that holds directly at least 10% of the voting power in the dividend paying company. In all other cases, a 15% withholding tax rate will apply to dividends.
19. Source-country tax is limited to 10% when interest is paid to a bank or an insurance company, derived from bonds and securities that are regularly and substantially traded on a recognised securities market, paid by banks (except where the prior two criteria apply) or paid by the purchaser to the seller of machinery and equipment in connection with a sale on credit. It is 15% in all other cases.
20. For Australian-source dividends, the limit is 15%. Where dividends are sourced in Papua New Guinea, the limit is 20%.
21. Source-country tax is limited to 15% where relief by way of rebate or credit is given to the beneficial owner of the dividend. In any other case, source-country tax is limited to 25%.
22. Source-country tax generally is limited to 15% of gross royalties if paid by an approved Philippines enterprise. In all other cases, the rate is limited to 25% of the gross royalties.
23. Source-country tax (Australia) is limited to 5% where a dividend is paid to a Romanian resident company that holds directly at least 10% of the capital of the Australian company paying the dividend to the extent that the dividend is fully franked. Source-country tax (Romania) is limited to 5% where a dividend is paid to an Australian resident company that holds directly at least 10% of the capital of the Romanian company paying the dividend if the dividend is paid out of profits that have been subject to Romanian profits tax. In other cases it is limited to 15%.
24. Source country tax generally is limited to 15%. However, a rate of 5% applies where the dividends have been fully taxed at the corporate level, the recipient is a company which has a minimum direct holding in the paying company and has invested a minimum of AUD 700,000 or the Russian ruble equivalent in the paying company; and where the dividends are paid by a company that is a resident in Russia, the dividends are exempt from Australian tax.
25. The agreement with the Russian Federation is the first of Australia's new treaties to include spectrum licenses in the definition of royalties.
26. Source-country tax (Taiwan) is limited to 10% of the gross amount of the dividends paid to a company which holds at least 25% of the capital of the company paying the dividends. A rate of 15% applies in all other cases. To the extent that dividends are franked because they are paid out of profits that have borne Australian tax, they are exempt from dividend withholding tax. *See Note (1) above*. The treaty allows Australia to impose a 10% withholding tax on the franked part of a dividend.
27. The source-country limit where the recipient has a minimum 25% direct holding in the paying company is 15% if the paying company engages in an industrial undertaking; 20% in other cases.
28. The source-country limit is 10% when interest is paid to a financial institution. It is 25% in all other cases.
29. Source country tax is generally limited to 15%. However, an exemption applies for dividends paid to a listed company which satisfies certain public listing requirements and which controls 80% or more of the voting power in the company paying the dividend, and a 5% limit applies to dividends paid to other companies with voting power of 10% or greater in the dividend paying company.
30. Source country tax is generally limited to 10%. However, generally zero interest withholding tax is payable where interest is paid to a financial institution or a government body exercising governmental functions.
31. Source country tax is generally limited to 15%. Exceptions are: no source country tax is chargeable on dividends to a beneficially entitled company, which satisfies certain public listing requirements, and holds 80% or more of the voting power in the company paying the dividend. A 5% limit applies to dividends paid to other companies with voting power of 10% or greater in the dividend paying company. No limit applies to US tax on dividends paid on certain substantial holdings of Australian residents in US real estate investment trusts (REITs). In practical terms US tax on these dividends is increased from 15% to the current US domestic law rate of 30%. The 15% rate applies to REIT investments made by certain listed Australian property trusts subject to the underlying ownership requirements not exceeding certain levels. Investments in REITs by listed Australian property trusts acquired before 26 March 2001 are protected from the increased rate.
32. Source country tax generally is limited to 10%. However, generally zero interest withholding tax is payable where interest is paid to a financial institution or a government body exercising governmental functions. Rules consistent with US tax treaty policy and practice will allow interest to be taxed at a higher 15% rate (the rate that generally applies to dividends) and for tax to be charged on intra-entity interest payments between a branch and its head office.
33. Amounts derived from equipment leasing (including container leasing) are excluded from the royalty definition.
34. Source-country tax is limited to 15% (Australia) and 10% (Vietnam).

35. A zero withholding rate will apply in certain cases to inter-corporate dividends where the recipient holds directly at least 80% of the voting power in the dividend paying company for the 12-month period prior to payment. A rate of 5% applies to all other inter-corporate dividends where the recipient holds directly 10% or more of the voting power of the company paying the dividend. A general limit of 15% applies to all other dividends.
36. Prior to 1 January 2009, a zero withholding tax rate applied to dividends paid out of profits that have borne the normal rate of company tax and are paid to a company which holds directly at least 10% of the capital of the dividend paying company. A 15% rate applied in all other cases.
37. For dividend income derived on or after 1 January 2008, a zero withholding rate applies to inter-corporate dividends where the recipient holds directly 80% or more of the voting power of the company paying the dividend. A 5% rate limit applies on all other inter-corporate dividends where the recipient holds directly 10% or more of the voting power of the company paying the dividend. A 15% rate applies in all other cases.
38. A rate limit of 10% will apply to interest except no tax will be chargeable in the source country on interest derived by a financial institution resident in the other country or a government or political or administrative subdivision or local authority or central bank of the other country.
39. Amounts derived from equipment leasing (including certain container leasing) are excluded from the royalty definition and treated either as international transport operations or business profits. The rate of 5% applies to royalties derived on or after 1 January 2008. Before that date, a 10% rate applied.
40. On 31 January 2008 Australia and Japan signed a new agreement. The new agreement has effect in Australia in respect of withholding taxes on income derived on or after 1 January 2009. The source country will exempt inter-corporate dividends where the recipient holds directly 80% or more of the voting power of the company paying the dividend and certain limitation of benefit thresholds are met. A 5% rate limit will apply on all other inter-corporate dividends where the recipient beneficially holds directly 10% or more of the voting power of the company paying the dividend. A rate limit of 10% will otherwise apply for dividends. However where the dividends are paid by a company that is a resident of Japan, which is entitled to a deduction for the dividends in Japan, the rate limit is 15% where more than 50% of the assets of the paying company consist, directly or indirectly of real property situated in Japan and 10% in all other cases. Special rules apply to distributions to Japanese residents by REITs. A rate limit of 10% applies to interest except no tax will be chargeable in the source country on interest derived by a financial institution resident in the other country or a government or political subdivision or local authority or central bank or other specified entity of the other country. From 1 January 2009, a 5% withholding tax rate on royalties applies. Before 1 January 2009, a general limit of 10% withholding tax on royalties applied. Under the new agreement, amounts derived from equipment leasing (including certain container leasing) will be excluded from the royalty definition and treated either as international transport operations or business profits.
41. A general rate limit of 10% applies to interest. However, in respect of interest derived on or after 1 January 2008 no tax will be chargeable in the source country on interest derived by a government of the other country (including its money institutions or a bank performing central banking functions) from the investment of official reserve assets and on interest derived by a financial institution resident in the other country (excluding interest paid as part of a back-to-back loan arrangement).
42. The rate limit for royalties of 5% applies to royalties derived on or after 1 January 2008. Before that date, a 10% rate applied.
43. On 31 March 2008 Australia and South Africa signed a protocol amending the agreement. The provisions of the new Protocol relating to Australian withholding taxes have effect in respect of income derived by a non-resident on or after 1 January 2009. A 5% rate limit will apply on all inter-corporate dividends where the recipient beneficially holds directly 10% or more of the voting power of the company paying the dividend. A rate limit of 15% will otherwise apply for dividends. From 1 January 2009, a general rate limit of 10% applies to interest. However no tax will be chargeable in the source country on interest derived by a government of the other country (including a bank performing central banking functions) and on interest derived by a financial institution resident in the other country (excluding interest paid as part of a back-to-back loan arrangement). From 1 January 2009, a 5% rate on royalties applies. Before 1 January 2009, a general limit of 10% withholding tax on royalties applied.
44. On 28 October 2008, it was announced that the Australian and the United Kingdom governments would commence negotiations on a revised tax treaty. Submissions were due to be lodged with Australian Treasury by 14 November 2008.
45. On 26 June 2009, a new double tax agreement was signed between Australia and New Zealand. The new treaty takes effect for withholding tax purposes on 1 May 2010. From 1 May 2010, a zero withholding tax rate will apply in certain cases to inter-corporate dividends where the recipient holds directly at least 80% of the voting power in the dividend paying company. A rate of 5% will apply on all other inter-corporate dividends where the recipient holds directly 10% or more of the voting power of the company paying the dividend. A general limit of 15% will apply for all other dividends, including those paid prior to 1 May 2010. From 1 May 2010, source country tax on interest will continue to be limited to 10%. However, no tax will be chargeable in the source country on interest derived by a government or a political subdivision or local authority of the other country (including a government investment fund or a bank performing central banking functions) or on interest derived by a financial institution which is unrelated to and dealing wholly independently of the payer (excluding interest paid as part of a back-to-back loan arrangement and, for New Zealand payers, where that person has not paid approved issuer levy). From 1 May 2010, the royalty withholding tax rate reduced from 10% to 5%.

46. The government announced on 4 February 2010 that negotiations to update Australia's tax treaty with Austria would take place in March 2010.
47. Australia and Chile signed a new double taxation agreement (DTA) on 10 March 2010. The new agreement has not yet entered into force.
48. On 29 April 2010, the Australian and Turkish Governments signed a DTA. The DTA will enter into force when both countries advise that they have completed their domestic requirements.
49. Once in force the DTA will apply a 5% withholding tax rate to inter-corporate dividends where the recipient owns directly 10% of the voting power of an Australian resident company or directly owns 25% of the capital of a Turkish resident company where the profits out of which the dividend is paid has been subject to the full rate of corporation tax in Turkey. In all other cases, a 15% withholding tax rate will apply.
50. Once in force the DTA will apply a general limit of 10% withholding tax on interest. However, interest derived from the investment of official reserve assets by the either the Australian or Turkish Government, the Australian or Turkish central bank or a bank performing central banking functions in either Australia or Turkey shall be exempt from interest withholding tax.

### *Other payments*

A Pay-As-You-Go (PAYG) withholding regime applies to require the deduction and remittance of taxes on behalf of foreign resident individuals and entities that are in receipt of the following types of payments:

| Type of payment | Rate of withholding |
|---|---|
| Payments for promoting or organising casino gaming junket arrangements | 3% |
| Payments for performing artists, sportspersons, including payments to support staff such as art directors, bodyguards, coaches, hairdressers and personal trainers | – if recipient is a company, 30% |
| | – if recipient is an individual, the applicable non-resident marginal tax rate, (this effectively codifies existing ATO practice in relation to these types of payments) |
| Payments under contracts entered into after 30 June 2004 for the construction, installation and upgrading of buildings, plant and fixtures and for associated activities | 5% |

### *Managed investment trust distributions*

For income years commencing on or after 1 July 2007, a non-final withholding tax at the rate of 30% applied to distributions (fund payments) to non-residents, directly or through an intermediary, of income (other than dividends, interest, royalties, foreign source income and capital gains on assets that are not taxable Australian property) by a managed investment trust with defined connections to Australia. For fund payments made in income years commencing on or after 1 July 2008, a new regime applies, with divergent outcomes, depending upon whether or not the recipient of such fund payments is resident of a country identified as being one with which Australia has an effective exchange of information (EEOI) arrangement and which is regulated as such for purposes of these rules. For regulated EEOI countries, a final withholding tax at a 7.5% rate currently applies. For residents of non-EEOI regulated countries, a final withholding tax at a 30% rate applies.

EEOI countries have been identified by regulation to be the Antigua & Barbuda, Jersey, Isle of Man, the British Virgin Islands, Guernsey, Gibraltar, Netherlands Antilles and Bermuda and the countries with which Australia has concluded DTAs other than Austria, Belgium, Greece, Korea, Malaysia, the Philippines, Singapore, and Switzerland. The Australian government has announced its intention to regulate the following EEOI countries in due course: Belize, Cayman Islands, Bahamas, Monaco, San Marino, Singapore, St. Christopher and Nevis, and St. Vincent and the Grenadines. Australia has entered into EEOI agreements with Aruba, Anguilla, Belgium, Dominica, Grenada, Malaysia, Marshall Islands, Mauritius, Montserrat, Saint Lucia, Samoa, Turks and Caicos Islands, Vanuatu, and the Cook Islands; however, these countries have not yet been identified in regulations to be EEOI countries.

## *Tax administration*

### *Returns*

A corporation (including the head company of a tax consolidated group) generally lodges/files a tax return on the basis of a 1 July to 30 June year of income. However, a corporation may apply to adopt a substitute year of income, for example, 1 January to 31 December. A return is lodged/filed under a self-assessment system that allows the Australian Taxation Office (ATO) to rely on the information stated on the return. Where a corporation is in doubt as to its tax liability regarding a specific item, it can ask the ATO to consider the matter and obtain a binding private ruling.

### *Payment of tax*

A PAYG instalment system applies to companies other than those whose annual tax is less than AUD 8,000 that are not registered for GST. Most companies are obliged to pay instalments of tax for their current income year by the twenty-first days of the fourth, seventh and tenth months of that year and by the twenty-first day of the month immediately following that year. Instalments are calculated on a quarterly basis by applying an instalment rate to the amount of the company's actual ordinary income (ignoring deduction) for the previous quarter. The instalment rate is notified to the taxpayer by the ATO and determined by reference to the tax payable for the most recent assessment. The ATO may notify a new rate during the year on which subsequent instalments must be based. Taxpayers can determine their own instalment rate, but there may be penalty tax if the taxpayer's rate is less than 85% of the rate that should have been selected.

Final assessed tax is payable on the first day of the sixth month following the end of that income year or such later date as the Commissioner of Taxation allows by a published notice.

## Significant developments

On 20 December 2010, the 'Budgetbegleitgesetz 2011' passed the Austrian parliament. The Budgetbegleitgesetz 2011 includes numerous amendments having significant impact on the Austrian Income Tax Act, the Austrian Corporate Income Tax Act, and the Austrian Stamp Duty Act, such as the following:

- The research and development (R&D) premium was increased from 8% to 10% *(see the Tax credits and incentives section)*.
- The stamp duty on loan and credit agreements has been disposed of *(see the Other taxes section)*.
- The minimum holding requirement for the exemption from 25% Austrian withholding tax (WHT) on dividend payments between domestic companies was reduced to 10% *(see Note 5 of the Withholding taxes section)*.
- Interest expenses relating to the acquisition of shares from related parties are generally not deductible any more *(see the Deductions section)*.

In December 2010, the 'Betrugsbekämpfungsgesetz 2010', an act regarding the fight against fraud, was enacted. This act affects inter alia tax limitation periods. *See the Tax administration section for more information.*

Austrian transfer pricing (TP) guidelines were issued by Austrian tax authorities on 3 November 2010. The guidelines represent the Austrian authority's understanding of the Organisation for Economic Co-operation and Development (OECD) TP guidelines and are of relevance for the interpretation of Austrian income tax law by the tax administration. *See the Group taxation section for more information.*

In June 2010, a reform of the Austrian Corporate Income Tax Act ('Abgabenänderungsgesetz 2010') was enacted, which resulted in the introduction of an advanced ruling opportunity. With the implementation of this new regulation, legally binding information in the fields of TP, group taxation, and mergers & acquisitions (M&A) can be requested from the Austrian tax authorities for the payment of an administrative fee. The advanced ruling opportunity is applicable as of the beginning of the 2011 fiscal year onwards. *See the Group taxation section for more information.*

## Taxes on corporate income

### Basis of corporate income tax (Körperschaftsteuer)

Corporations (i.e. GmbH, AG) are subject to unlimited taxation in Austria of their entire (domestic and foreign) income if they have their legal seat or place of effective management in Austria. A non-Austrian corporate tax resident (with neither a legal seat nor place of effective management in Austria) is subject to limited taxation on certain sources of income in Austria.

### *Rates of corporate income tax (Körperschaftsteuer)*

Due to the qualification of corporations as independent tax subjects, a distinction must always be made between tax ramifications at the level of the company and those at shareholder level. At the level of the company, profits are taxed at the standard corporate income tax (CIT) rate of 25%, regardless of whether profits are retained or distributed. At the shareholder level, the profit distributions are usually subject to WHT of 25%.

There is also a minimum CIT, payable by companies in a tax-loss position. The minimum CIT amounts to 437.50 euros (EUR) for limited liability companies (GmbH) and EUR 875 for stock corporations (AG) for each full quarter of a year. To promote the formation of new companies, the minimum CIT is reduced to EUR 273 for the first four quarters. The minimum CIT can be carried forward without time limitation and be credited against future CIT burdens of the company.

There is no additional local income tax levied at the company level.

## *Corporate residence*

A corporation is resident in Austria for tax purposes if either it is registered in Austria (legal seat) or its place of effective management is located in Austria. The 'place of effective management' is located where the day-to-day management of the company is actually carried out and not where singular board decisions are formally made.

However, the definition of place of effective management under Austrian tax law does not significantly deviate from its definition under the OECD guidelines.

### *Permanent establishment (PE)*

An Austrian PE is defined under Austrian tax law as a fixed establishment where a business is carried out, in particular:

- the place where the management is carried out
- plants, warehouses, purchase and sales establishments, and other establishments where an entrepreneur or one's permanent representative carries out one's business, or
- construction sites, which last for more than six months.

However, the definition of PE is different in some tax treaties. The Austrian tax authorities generally follow the commentary to the OECD model convention regarding the PE concept.

## *Other taxes*

### *Value-added tax (VAT) (Mehrwertsteuer)*

Generally, the Austrian VAT law is based on the 6th European Union (EU) VAT Directive. Under the Austrian VAT law, companies and individuals carrying out an active business on a permanent basis are qualified as entrepreneurs for VAT purposes. As entrepreneurs, they have to charge the supply of goods or services provided to their customers with Austrian VAT at a rate of 20%. A certain limited range of goods and services (such as food, books, passenger transportation, cultural events) is taxed at the reduced rate of 10%. Certain other transactions are exempted from Austrian VAT (e.g. export transactions).

**Input VAT**

Entrepreneurs are entitled to deduct Austrian input VAT insofar as the input VAT does not result from goods/services purchased which are directly linked to certain VAT exempt sales (e.g. interest income, insurance premium). However, certain transactions are exempt from Austrian VAT (e.g. export transactions) without limiting the ability of the entrepreneur to deduct the related input VAT. To be entitled to deduct input VAT, the entrepreneur must obtain an invoice from one's supplier which fulfils certain formal requirements.

**VAT filing and payment**

Entrepreneurs have to file monthly or quarterly VAT returns by the 15th day of the second month following the month concerned or by the 15th day of the second month following the quarter concerned. The balance of the VAT due and the input VAT deducted has to be paid to the tax office (if VAT burden) or is refunded by the tax office (if in a net input VAT position) to the electronic tax account of the entrepreneur. A separate report has to be filed by the entrepreneur at the tax office showing the cross-border intra EU-transactions made.

### *Excise taxes*

Excise taxes are imposed on certain products including petroleum (approximately EUR 40 to EUR 600 per 1,000 litres), tobacco products (13% to 47% of price), and alcoholic beverages.

### *Customs duties*

Certain cross-border inbound movements of goods from non-EU countries trigger Austrian customs duty. The duty is levied according to the Austrian customs duty scheme, which is based on the EU-customs duty scheme. It defines the customs duty tariffs, dependent on the nature of the good.

### *Stamp duty*

Stamp duty is imposed in connection with certain legally predefined transactions for which a written contract has been established (e.g. lease contracts, bills of exchange, assignments of receivables). The Austrian administration's understanding of a 'written contract' is very broad and covers not only paper contracts but also contracts concluded by electronic means (e.g. electronically signed emails).

The stamp duty is triggered upon the establishment of a legal relationship if at least one Austrian party is contractually involved or, even if a contract is concluded between non-Austrian parties only, if the subject of the contract relates to Austria (e.g. lease contract on Austrian real estate). However, various possibilities are available for most legal transactions subject to stamp duty to structure them in a way without triggering stamp duties (e.g. setting up of contracts abroad, offer-acceptance procedure, usage of audio-tapes).

As of 2011, loan and credit agreements are no longer subject to stamp duty. This modification of the Stamp Duty Act refers to new agreements signed after 1 January 2011 as well as to agreements which are set up in written form in 2011 for loans/credits concluded before 2011.

The stamp duty rates for the most common legal transactions are as follows:

| Legal transactions | Duty (%) |
|---|---|
| Lease agreements | 1.00 |
| Certificates of bonds | 1.00 |
| Loan agreements (for written agreements set up until the end of 2010) | 0.80 |
| Credit agreements non-recurring or revolving during a period of five years (for written agreements set up until the end of 2010) | 0.80 |
| Credit agreements with a maturity exceeding five years (for written agreements set up until the end of 2010) | 1.50 |
| Bill of exchange | 0.13 |
| Assignment of receivables | 0.80 |

### *Capital transfer tax (Gesellschaftsteuer)*

Capital transfer tax is imposed at a rate of 1% on the initial contribution of capital, other contractual or voluntary contributions in cash or in kind, and certain hybrid financing instruments to Austrian corporations. However, in many cases a taxable event for capital transfer tax purposes can be eliminated by careful structuring (e.g. contributions made by the indirect shareholder of an Austrian company (so called 'grandparent contributions') do not trigger capital transfer tax).

### *Real estate tax*

Local authorities annually levy real estate tax on all Austrian real estate property whether developed or not. The tax is levied on the assessed standard ratable value ('Einheitswert') of immovable property. The assessed value is usually substantially lower than the market value. The effective tax rate depends on the intended use of the real estate and is calculated using a special multiplier.

Tax rates:

- Agricultural area and forestry
  - 1.6% for the first EUR 3,650 of the assessed standard ratable value.
  - 2% for the amount of the assessed standard ratable value exceeding EUR 3,650.
- Buildings and property are taxed at 2% of the assessed standard ratable value. This multiplier is reduced for:
  - Single family houses
    - to 0.5% for the first EUR 3,650 of the assessed standard ratable value, and
    - to 1% for the next EUR 7,300.
  - Leasehold und shared property
    - to 1% for the first EUR 3,650 of the assessed standard ratable value, and
    - to 1.5% for the next EUR 3,650.
  - All other property
    - to 1% for the first EUR 3,650 of the assessed standard ratable value.

After the assessed standard ratable value is multiplied by the relevant multiplier, the real estate tax is calculated by using a special municipal rate fixed by each municipality (maximum 500%). Finally, the tax amount is reduced by a general reduction of 25% as stated by law and increased by a 35% inflation adjustment.

### *Real estate transfer tax*

Tax is levied at 3.5% on any transaction which causes a change in the ownership of Austrian real estate or in the person empowered to dispose of such property. Real estate transfer tax is generally calculated on the basis of the acquisition price. However, in the case of corporate restructuring under the Reorganisation Tax Act and in case of real estate transfers free of consideration, the two-fold (in the case of the former) and the threefold (in the case of the latter) assessed standard ratable value for tax purposes is taken as the tax base.

Real estate transactions with a tax base of EUR 1,100 or below are exempt.

Note that an additional 1% registration fee (same tax base as Real Estate Transfer Tax) becomes due upon incorporation to the land register.

## Branch income

Austrian branches of foreign corporations are taxed in the same way as Austrian corporations, except that inter-company dividends received by Austrian branches of non-EU corporations are not tax exempt *(see the Income determination section)* and Austrian tax losses can be carried forward only if they exceed non-Austrian profits. Books and records generally can be kept abroad but must be brought to Austria in case of a tax audit (upon official request).

## Income determination

Taxable income is determined based on statutory accounts under Austrian generally accepted accounting principles (GAAP) adjusted for certain deductions and additions prescribed by the tax law.

### Inventory valuation

In general, inventories are valued at the lower of cost or market. If specific identification during stock movements is not possible, other methods, such as last in first out (LIFO) and first in first out (FIFO) are permitted when shown to be appropriate. Conformity between financial book keeping and tax reporting is required.

### Capital gains/exit taxation/inbound transfer

Generally, capital gains (short and long-term) are part of the normal annual result of a corporation and therefore are taxed at the ordinary CIT rate (25%).

A special tax treatment applies to capital gains with respect to the exit of taxable assets. In the case of a transfer of assets which formed part of a business from Austria to a foreign country (e.g. allocation of assets to foreign branch), latent capital gains generally are taxed at the time of the transfer. However, if these assets are transferred to an EU member state, capital gains taxation can be postponed upon request until the assets are sold or transferred outside the European Union.

In case of an inbound transfer, generally, the fair market value of the assets is considered for Austrian income tax purposes (step up). Therefore, any hidden reserves accumulated abroad are not taxed in Austria.

### Dividend income

Dividends received from an Austrian company at the corporate shareholder level are generally excluded from the tax base (no minimum stake, no minimum holding period). This tax exemption refers to domestic dividends only, not to capital gains or losses.

Additionally, dividends received from companies located within the European Union or from countries within the European Economy Area (EEA) with which an agreement on comprehensive administrative assistance was established (currently only Norway) are also tax exempt if the foreign company is subject to a tax similar to the Austrian CIT and if the foreign CIT rate is not below 15%.

In cases where the dividends from foreign investments are taxable, foreign CIT can be credited against the Austrian CIT.

### *International participation exemption for dividends and capital gains*
Dividends received from a foreign company are also tax exempt at the corporate shareholder level if the Austrian company holds at least 10% of the issued share capital for a minimum holding period of one year (international participation exemption). Furthermore, both capital gains and capital losses derived from shares qualifying for the international participation exemption are tax neutral. This means a deduction of capital losses is no longer available. However, the parent company can exercise an (irrevocable) option for each single participation acquired to treat both capital gains and capital losses as taxable (spread of losses and depreciations over a period of seven years). The option refers to capital gains (losses) only and does not affect the tax treatment of ongoing dividend distributions.

In the case of presumed tax abuse, the participation exemption for dividends and capital gains is replaced by a tax credit (switch-over-clause). The credit system is applied if the foreign subsidiary does not meet an active-trade-or-business test (i.e. passive income from royalties, interest, etc. is greater than 50% of total income of subsidiary) and is not subject to an effective foreign minimum CIT rate of more than 15%. The domestic and foreign participation exemptions are available to Austrian resident corporations and to Austrian branches of EU corporations only, but not to Austrian branches of non-EU corporations.

### *Portfolio dividends*
Portfolio dividends (i.e. dividends from an investment below 10%) received from corporations located in member states of the European Union, as well as dividends from corporations which are located in those EEA countries with which Austria has concluded an agreement on mutual assistance and collection of taxes (currently only Norway), are generally exempt from CIT. However, the switch-over to the credit method outlined under ‘Dividend income’ above has to be considered.

Currently, the exemption of portfolio dividends applies to dividends from EU/EEA countries only, but not to those from third countries. As a result of a decision of the ECJ of February 2011 (C-436/08 and C-437/08, Haribo/Salinen), the restriction of the exemption to portfolio dividends received from countries within the EU/EEA is contrary to EU law. Therefore, an extension of the exemption to third country portfolio dividends is planned to be implemented as a consequence of the ‘AbgÄG 2011’. Furthermore, the requirement of an agreement on the collection of taxes with the source country will have to be eliminated.

### *Stock dividends*
A conversion from revenue reserves (retained earnings) to capital by a company does not lead to taxable income for the shareholder (but triggers 1% capital transfer tax). However, capital reductions are treated as taxable income if within ten years prior to the capital reduction the above-mentioned increase in capital was repaid to the shareholder. Otherwise, they are tax exempt.

### *Interest income*
Interest income is taxed at the general CIT rate of 25%.

### Rents and Royalties
Rental income is treated as normal business income.

### Foreign income
Austrian resident corporations are taxed on their worldwide income. If a double taxation treaty (DTT) is in force, double taxation is mitigated either through an exemption or by granting a tax credit equal to the foreign WHT at the maximum (capped with the Austrian CIT incurred on the foreign source income). If foreign WHT cannot be credited at the level of the Austrian corporation (e.g. due to a loss position), Austrian tax law does not allow to carry forward the foreign WHT to future assessment periods. However, if the source of the income is a non-treaty country, exemption or a tax credit shall be available based on unilateral relief (representing a discretionary decision of the Austrian Ministry of Finance only but no legal entitlement for the applicant). Austrian tax law does not provide for a deferral of taxes on foreign income. Special rules for taxing undistributed income of foreign subsidiaries are applicable only to foreign investment funds.

Please note that Austrian Tax Law does not define special controlled foreign company (CFC) rules. However, under certain circumstances, the Austrian tax administration, under a substance over form approach, taxes passive income of foreign subsidiaries of Austrian companies located in low tax jurisdictions *(see switch-over-clause under International participation exemption for dividends and capital gains above).*

## Deductions

### Accrued expenses
Certain accruals (such as provisions for liabilities and impending losses) running for more than 12 months as of the closing date of the accounts are accepted for tax purposes at 80% of their value only. Exempted from this reduction are provisions for personnel benefits (severance payments, pensions, vacations, and anniversary awards) for which specific reduction and computation methods have been provided and provisions which were already calculated by discounting a future obligation.

In general, lump-sum accruals and accruals for deferred repairs and maintenance are not allowed for tax purposes.

### Depreciation and amortisation
Only the straight-line method is accepted for tax purposes, whereby the cost is evenly spread over the useful life of an asset. For certain assets, depreciation rates relevant for tax purposes are prescribed by the tax law and shown in the following chart:

| Assets | Rate (%) |
|---|---|
| Buildings (industrial use) | 3.0 |
| Buildings (banking, insurance) | 2.5 |
| Other buildings | 2.0 |
| Automobiles | 12.5 |

Goodwill arising in the course of an asset deal for tax purposes must be amortised over 15 years. Goodwill arising in the course of a share deal can be amortised only if the acquired company is included in a tax group *(see the Group taxation section).* Goodwill arising as a result of a corporate merger cannot be amortised.

Trademarks are usually amortised over 15 years. Other intangibles have to be amortised over their useful lives.

Tax depreciation is not required to conform to financial depreciation under Austrian GAAP. If depreciated property is sold, the difference between tax value and sale proceeds is taxed as a profit or loss in the year of sale.

### *Interest payments*
Interest payments (also inter-company) are generally tax deductible if they meet the general arm's-length requirements. *See Thin capitalisation in the Group taxation section for more information.*

### *Financing costs*
According to current tax law, interest expenses resulting from the debt financed acquisition of shares are usually tax deductible. This is so even if the Austrian participation exemption regime applies *(see the Income determination section)*.

As of 2011, interest expenses relating to the debt-financed acquisition of shares from related parties or (directly or indirectly) controlling shareholders are generally non-deductible. This disallowance of interest also applies in circumstances where the shareholder acquiring the shares has been funded by a debt-financed equity contribution (insofar as the equity contribution was made in direct connection with the share acquisition). Interest expenses resulting from intra-group share acquisitions conducted prior to 1 January 2011 are also covered by the new regulation. The deductibility of interest expenses incurred in connection with the acquisition of shares from a third party is not impacted.

Other financing costs (e.g. fees, legal advice) directly related to tax exempt dividend income are not deductible. However, foreign exchange expenses or profits accumulated in connection with the financing of tax exempted international participations are treated as a deductible or taxable (respectively) item.

### *Charitable contributions*
Charitable contributions are tax deductible up to a limit of 10% of the prior year profit.

### *Meals and entertainment*
The deductibility of costs for business lunches generally is limited to 50% of actual expenses incurred (provided the business lunch had the purpose of acquiring new business).

The deductibility of entertainment expenses is restricted to advertising expenses.

### *Payment to directors*
Payments to a member of the supervisory board ('Aufsichtsrat') are tax deductible up to a limit of 50%. Payments to members of the executive (managing) board are tax deductible without special limitation.

### *Organisational and start-up expenses*
Generally, organisational and start-up expenses are tax deductible.

### *Fines and penalties*
Fines and penalties are generally not tax deductible.

***Taxes***
Austrian and foreign taxes on income and other personal taxes, as well as VAT insofar as it relates to non-deductible expenditures, are non-deductible. Other taxes, such as payroll or capital transfer taxes, are deductible.

***Net operating losses***
Tax losses can be carried forward without any time limit. However, tax loss carryforwards generally can be offset against taxable income only up to a maximum of 75% of the taxable income for any given year. Some exceptions apply (e.g. in connection with tax groups or in the case of liquidations), allowing a company to charge tax loss carryforwards available against 100% of annual taxable income.

The Austrian tax law does not provide for a carryback of tax losses.

**Loss-trafficking (Mantelkauf)**
Tax loss carryforwards may be lost in the case of a share deal being classified as loss-trafficking (so called 'Mantelkauf') or in the course of a legal restructuring leading to similar results.

Under Austrian tax law, a share deal against compensation is classified as a Mantelkauf, if, from a substance over form perspective, the 'economic identity' of a company is changed due to the transaction. The change of economic identity of a company is realized if all of the following structural changes are made to the acquired Austrian company having the tax loss carryforwards available:

- Change of shareholder structure.
- Change of the organisational structure.
- Change of the business structure.

All three conditions cumulatively have to be met. There is no exact time period defined within which they have to be met; however, meeting them within one year after the share transfer usually is regarded as a strong indication for a Mantelkauf.

***Payments to foreign affiliates***
Generally, there are no restrictions on the deductibility of royalties, interest, and service fees paid to foreign affiliates, provided they are at arm's length (which should be appropriately documented by agreements, contracts, calculation sheets, etc.). Payments to affiliated companies not meeting arm's-length standards are treated as a hidden distribution of earnings (i.e. they are not tax deductible, and WHT is usually triggered at source). *See Transfer pricing in the Group taxation section for more information.*

Note that the domestic implementation of the EU Interest Royalty Directive which abolishes WHT on cross-border payments of interest and license fees (regardless of whether taken out by deduction or by assessment) between affiliated companies in the member states should be considered.

## *Group taxation*

In 2005, a new group taxation system replaced the 'Organschaft' concept under which Austrian resident companies as well as foreign companies (with restrictions) may be taxed as a unit. Under the 2005 system, two or more companies can form a tax group, provided the parent company directly or indirectly owns more than 50% of the shares in the subsidiaries. The tax group also can include foreign group members. If a group member withdraws from the group within a minimum commitment-period of three years, all tax effects derived from its group membership must be reversed.

Within a tax group, all of the taxable results (profit and loss) of the domestic group members are attributed to their respective group parent. From foreign tax group members, tax losses in the proportion of the shareholding quota are attributed to the tax group parent. Foreign tax losses utilised by the Austrian tax group parent are subject to recapture taxation at the time they are utilised by the tax group member in the source state, or in the moment the group member withdraws from the Austrian tax group. Under the recapture taxation scheme, the Austrian tax group has to increase its Austrian tax base by the amount of foreign tax losses used in prior periods (limited to the amount of tax losses actually utilised by the foreign tax group member).

For the purpose of the application of the recapture taxation scheme, a withdrawal from the tax group is also assumed if the foreign group member significantly reduces the size of its business (compared to the size of the business at the time the losses arose). Reduction of size is measured on the basis of business parameters such as turnover, assets, balance sheet totals, and employees, while the importance of the respective criteria depends on the nature of the particular business.

Goodwill arising in the course of a share deal (acquisition of an active business company from a third party contractor) must be amortised over 15 years, provided that the acquired company is included in a tax group.

Write-downs of participations in tax group members are not tax deductible.

### *Transfer pricing*
Under Austrian Tax Law there are no explicit TP regulations available defining in detail the local requirements with regards to arm's length, the documentation standards required, penalties, etc. In general, Austria applies the OECD TP guidelines referring to the OECD model tax convention. Furthermore, Austrian TP guidelines were recently issued by Austrian tax authorities. The guidelines represent the Austrian authority's understanding of inter-company business relationships with regards to their arm's-length classification and are based on the OECD TP guidelines.

According to these guidelines, all business transactions between affiliated companies must be carried out under consideration of the arm's-length principle. Where a legal transaction is deemed not to correspond to arm's-length principles, the transaction price is adjusted for CIT purposes. Such an adjustment constitutes either a constructive dividend or a capital contribution. Currently, there is the option of applying for a non-binding ruling of the tax authorities. Additionally, a reform of the Austrian CIT Act was recently enacted, which contains the introduction of an advanced ruling opportunity. With the implementation of this new regulation, binding information in the fields of TP, group taxation, and M&A can be requested from the Austrian tax authorities against payment of an administrative fee (the fee rate depends on the size of the applicant's business). The advanced ruling opportunity is applicable as of the 2011 fiscal year.

### *Thin capitalisation*
There are no explicit tax regulations available under Austrian tax law stipulating the minimum equity required by a company ('thin capitalisation rules'). Basically, group financing has to comply with general arm's-length requirements. Therefore, an Austrian group entity being financed by an affiliated entity must be able to document

that it would have been able to obtain funds from third party creditors under the same conditions as from an affiliated financing entity. Therefore, the appropriate ratio between an Austrian company's equity and debt will mainly depend on the individual situation of the company (profit expectations, market conditions, etc.) and its industry. Nonetheless, the fiscal authorities in administrative practice (i.e. no 'safe-harbour' rule) tend to accept a debt-equity ratio of approximately 3:1 to 4:1. However, the debt-equity ratio accepted by tax authorities also strongly depends on the average ratio relevant for the respective industry sector. If in inter-company loan for tax purposes is not accepted as debt, it is reclassified into hidden equity and related interest payments into (non-deductible) dividend distributions.

Furthermore, under Austrian commercial law (for companies subject to statutory audits), a minimum equity ratio of 8% is claimed. If the equity ratio of the company falls below 8% and its earning power (virtual period for debt redemption) at the same time does not meet certain requirements, a formal and public reorganisation process will have to be initiated.

## *Tax credits and incentives*

### *Research and development (R&D) incentives*

R&D costs are fully deductible at the time they accrue. As of 2011, an R&D premium of 10% (i.e. R&D expenses x 10% = tax refund) may be claimed for R&D activities performed in Austria.

Prior to 2011, an R&D premium of 8% was available for all R&D activities, not just those performed in Austria. An alternative R&D allowance of 25% to 35% of qualifying R&D expenses was also available.

The R&D premium (and allowance prior to 2011) is also available in case of contract R&D; however, R&D incentives cannot be claimed by both principal and agent.

### *Employment incentives*

A tax bonus payment of 6% or, alternatively, an allowance of 20% can be claimed for expenditures in connection with the training of employees. These incentives can be claimed for external training expenditures and for in house training expenditures, provided that there is a dedicated in-house training department (for in-house training expenditures, only the allowance can be applied for).

A new premium scheme for apprenticeships started in June 2008. This premium is based on the amount of actual wage as set out in the applicable collective contract and provides tax free subsidies, depending on the duration of the apprentice's employment.

### *Investment incentives*

For investment in certain regions, government grants and subsidies are available and are generally individually negotiated.

### *Foreign tax credit (matching credit)*

Generally, foreign WHT can be credited against Austrian CIT *(see Foreign income in the Income determination section)*. In special cases (e.g. China, Korea, Brazil), the DTT provides for a matching credit, which allows the credit of a pre-defined amount which exceeds the actually paid foreign WHT.

## *Withholding taxes*

### *Dividend WHT*

Under Austrian domestic law, there is generally a 25% WHT on dividends (profit distributions) paid to a foreign parent company. The WHT has to be deducted and forwarded by the Austrian subsidiary to the tax office.

To end up with the reduced WHT rate as defined under the DTT applicable, Austrian tax law provides for the following alternative methods of WHT relief: refund method or exemption at source method.

#### Refund method

The Austrian subsidiary generally has to withhold 25% WHT on profit distributions to the foreign parent company, and the parent company has to apply for a refund (of the difference between 25% WHT and the lower DTT rate). In the course of the refund process, the Austrian tax administration analyses whether the foreign shareholder can be qualified as beneficial owner of the dividends paid. If the refund is approved by the Austrian tax authority, dividend distributions within the following three years can be done without deduction of WHT (for distributions of a comparable size and provided the foreign holding structure did not change in the meantime).

#### Exemption at source method

Relief at the source is available only if the direct parent company issues a written declaration confirming that it is an ‘active’ company carrying out an active business that goes beyond the level of pure asset management and has its own employees and office space at its disposal (substance requirements).

#### WHT on dividends paid to EU companies

With regard to dividends paid to EU resident corporate shareholders, Austria has implemented the EU Parent/Subsidiary Directive according to which domestic WHT is reduced to zero. The requirements for the reduction are that the EU resident parent company, which also has to meet the substance requirements mentioned above *(see Exemption at source method),* must directly own at least 10% of the share capital of the Austrian subsidiary for a period of at least one year. In case of foreign EU shareholders being qualified as pure holding companies, the Austrian tax administration does not allow an exemption at source but claims the application of the refund method.

Provided the requirements according to the EU Parent/Subsidiary Directive are not met, Austrian WHT has to be deducted. If an EU parent company cannot credit the Austrian WHT deducted against the CIT of its resident state (e.g. because the foreign dividend income is exempted from the CIT or due to a loss position of the shareholder), it is entitled to apply for a refund of the Austrian WHT. This application has to include a confirmation/documentation that the Austrian WHT could (fully or partly) not be credited at the level of the parent company.

### *Interest WHT*

Interest payments to non-resident companies are not subject to WHT (provided no Austrian real estate property is used as security).

### *Royalties WHT*

On royalties paid to a non-resident company, Austrian WHT at a rate of 20% has to be deducted. This tax rate can be reduced under an applicable DTT or under the application of the EU Interest Royalty Directive which was implemented in Austrian Tax Law.

## *Tax treaties*

The following table lists the countries with which Austria has signed a DTT and provides details of the amount of Austrian WHT.

| Recipient | Dividends (%) (1, 2) | Interest (%) (3) | Royalties, licenses (%) (4) |
|---|---|---|---|
| Resident corporations | 0/25 (5) | 0/25 | 0 |
| Resident individuals | 25 (6) | 0/25 | 0 |

Notes

1. Dividend distributions attributable to a prior release of paid-in surplus or other shareholder contributions (classified as capital reserves) are deemed to be a repayment of capital, i.e. no WHT is incurred. At the shareholder's level, dividends received and those classified as contribution refund will reduce the tax basis assessment for investments. To the extent to which the tax basis would become negative, such dividends are treated as taxable income (unless taxation is eliminated by a tax treaty).
2. Under certain treaties, the amount of the WHT is dependent on the extent of the proportion of issued share capital held by the recipient. Where this is the case, all rates are given. Those marked with + refer to an investment of 10%, ++ to 15%, those marked with +++ refer to an investment of 20%, those marked with * refer to an investment of 25%, those marked with ** refer to an investment of 50%, and those marked with *** refer to an investment of 70%.
3. Interest on cash deposits in euro or foreign currency in bank accounts and fixed interest bearing securities in foreign currency (issued after 31 December 1988) and on fixed interest bearing securities denominated in Austrian Schillings or EUR (issued after 31 December 1983) are subject to a 25% WHT. If the recipient is an individual, this WHT is final (no further income taxation and inheritance taxation). Companies receiving interest payments may obtain an exemption from WHT if they provide the bank or other custodial agent with a written confirmation from the recipient that such interest payments constitute a part of the recipient's operating revenues (exemption statement). Interest payments to non-residents without a PE in Austria are generally not subject to WHT. At interest payments between affiliated companies, the regulations stipulated by the EU interest directive have to be taken into consideration.
4. In case of payments to countries marked with **, the rate is 0% unless more than 50% of the issued share capital of the company paying the royalties is held by the recipient, in which case the rate given applies. At royalty payments between affiliated companies, the regulations stipulated by the EU interest directive have to be taken into consideration.
5. If the recipient holds a participation of less than 10% (25% prior to 2011) in the distributing company, the dividends are subject to a 25% WHT. Since dividends distributed by an Austrian corporation to another Austrian corporation are generally not subject to taxation, the WHT is credited against CIT upon assessment of the recipient corporation for the respective tax year.
6. WHT on dividends from Austrian companies is final, i.e. no further income tax is collected from the recipient (provided it is an individual).
7. The treaty was signed on 14 December 2007 and entered into force on 1 September 2008. It is applicable as of the beginning of fiscal year 2009.
8. The treaty was recalled by Argentina in 2009. Austrian tax citizens are protected by section (§) 48 BAO (Bundesabgabenordnung (Austrian Fiscal Federal Code)) against double taxation. Austria will try to enter into new negotiations with Argentina.
9. 5% for shares of at least 25% and worth at a minimum of USD 250,000; 10% for shares of at least 25% and worth at least USD 100,000; 15% in all other cases.
10. 5% for industrial licenses and know-how not more than three years old; 10% in all other cases.
11. The treaty entered into force on 17 February 2011 and is applicable as of the beginning of fiscal year 2011.
12. The treaty entered into force on 1 April 2007 and is applicable as of the beginning of fiscal year 2008.
13. The treaty was signed on 16 December 2010. It has not yet been decided when it will enter into force.
14. 10% for copyright license fees in connection with literature, science, and art; 25% for trademarks license fees; 15% in all other cases.
15. The new treaty has entered into force on 3 February 2011 and is applicable as of the beginning of fiscal year 2011.
16. 6% for industrial, commercial, or scientific equipment; 10% in all other cases.
17. The treaty entered into force on 22 March 2007 and is applicable as of the beginning of fiscal year 2008.
18. 5% for license income from copyrights, brands, plans, secret formulas or procedures, computer software, industrial, commercial or scientific use of equipment, and information.
19. 0% for copyright royalties in connection with the production of literary, dramatic, musical, or artistic work; 5% in all other cases.
20. The new treaty was signed on 25 May 2007 and entered into force on 27 March 2008. It is applicable as of the beginning of fiscal year 2009.
21. 20% for films.
22. 5% for leasing of mobile goods, and 10% for other licenses.
23. 0% for shares of at least 50% and worth at a minimum of EUR 2,000,000; 5% for shares of at least 10% and worth at least EUR 100,000; 10% for shares in all other cases.
24. The treaty entered into force on 1 April 2009 and is applicable as of the beginning of fiscal year 2010.

25. The treaty entered into force on 1 January 2011 and will be applicable as of the beginning of fiscal year 2012 (Austria: 1 January 2012, Hong Kong: 1 April 2012).
26. 2% for license income from industrial, commercial, or scientific use, and 10% for other licenses.
27. The treaty entered into force on 16 May 2007 and is applicable as of the beginning of fiscal year of 2008.
28. 5% for the use of commercial or scientific equipment; 10% in all other cases.
29. The treaty was signed on 16 September 2010. It has not yet been decided when it will enter into force.
30. 5% in case of direct (or indirect over a patent-realisation-company) payments of royalties by companies of the other member state (with an industrial establishment in the other member state), and 10% for other licenses.
31. 5% in case of license income from industrial, commercial, or scientific use, and 10% for other licenses.
32. 15% for films.
33. 0% for copyright license fees in connection with literature, art, and scientific use, and 10% for other licenses.
34. The treaty was signed on 7 September 2007 and entered into force on 20 January 2008. It is applicable as of the beginning of fiscal year 2008.
35. 10% for the right of use of copyrights to artistic, scientific, or literary as well as cinematographic works, and 5% for other licenses.
36. The new treaty was signed on 13 September 2006 and entered into force on 13 November 2006. It was applicable as of the beginning of fiscal year 2007.
37. The treaty was signed on 21 September 2006 and entered into force on 1 December 2007. It is applicable as of the beginning of fiscal year 2008.
38. The treaty entered into force on 1 June 2007 and is applicable as of the beginning of fiscal year 2008.
39. For Portugal, the rate of WHT is 5%, but 10% if more than 50% of the issued share capital is owned by the recipient.
40. 5% if capital share amounts to at least 10% and worth at least USD 100,000; 15% in all other cases.
41. The treaty applies to Tajikistan and Turkmenistan. With Russia, a new treaty has been ratified.
42. The treaty entered into force on 1 June 2007 and is applicable as of the beginning of fiscal year 2008.
43. The treaty entered into force on 17 December 2010 and is applicable as of the beginning of fiscal year 2011.
44. 5% for copyright license fees; 10% for other licenses.
45. Until a new treaty will be established, the treaty with Czechoslovakia remains applicable.
46. For dividend distributions retroactive as of 1 January 2000.
47. The treaty was signed on 3 March 2009. It has not yet been decided when it will enter into force.
48. 15% for films.
49. The new treaty was signed on 28 March 2008 and entered into force on 1 October 2009. It is applicable as of the beginning of fiscal year 2010.
50. 10% for films.
51. The treaty entered into force on 17 March 2007 and is applicable as of the beginning of fiscal year of 2008.
52. The new treaty was signed on 2 June 2008 and entered into force on 1 January 2010. It is applicable as of the beginning of fiscal year 2011.
53. 7.5% for fees for technical services; 10% for royalties.

## *Tax administration*

### *Tax returns*

The standard tax assessment period in Austria is the calendar year. However, a company's financial year may deviate. When the tax and financial years deviate, the tax assessments for a year are based on the profits derived in the financial year(s) ending in the respective calendar year (e.g. if tax year 1 June 2009 – 31 May 2010: assessment FY 2010).

### *Tax return due dates*

Generally, the CIT return has to be submitted electronically by June 30 of the calendar year following the year in which the fiscal year of the company ends. However, if the company submits the tax return via a certified tax advisor, the tax return can be submitted by 31 March of the second following year at the latest, if the company will not be formally requested by the tax office to file it earlier.

### *Statute of limitation*

The right to assess CIT is subject to a general limitation period of five years after the end of the calendar year in which the fiscal year ends. Additionally, the limitation period can be extended for another two years in cases where certain interruptive events (e.g. tax audit, tax assessment) take place within the general limitation period.

As a result of the 'Betrugsbekämpfungsgesetz 2010', the maximum limitation period in case of tax evasion was prolonged from seven to ten years. The new limitation period is applicable for cases for which the ten-year limitation period has not expired as of 1 January 2011.

In certain cases, the maximum limitation period can be extended to 15 years.

### Payment of tax

CIT is prepaid in quarterly instalments during the calendar year, with a final settlement subsequent to the annual assessment. Prepayments of CIT generally are based on the most recently assessed tax year's tax burden (unless the taxpayer can show that its tax charge for the current year will be lower).

The difference between CIT as per the final assessment and the prepayments made is interest bearing from 1 October of the year subsequent to the year when the tax claim arose up to the date when the assessment is released (late payment interest). Interest at a rate of currently 2.38% is applied to underpayments (as well as overpayments) of tax.

### Electronic filing of annual CIT returns

The annual CIT return (as well as the annual VAT return) has to be filed by electronic means. In the case of a company that cannot reasonably be expected to file tax returns electronically due to the lack of technical prerequisites, filing of the tax return is allowed to be done via pre-printed forms.

### Audit cycle

In general, companies are audited every three to four years. The audit period usually covers three to four fiscal years, so generally each fiscal year is audited.

## Other issues

### Choice of business entity

The most important types of companies in Austria are the limited liability corporation (GmbH), and the joint stock corporation (AG). Foreign investors generally choose the GmbH since it provides a higher degree of corporate law control and allows for lower equity provision.

As a legal entity, the GmbH exists upon registration with the Companies' Register. The application for registration must contain the notarised signatures of all managing directors. The articles of association must be drawn up in the form of a notarial deed (written document executed by a public notary) and must, as minimum requirements, include the name of the company as well as its seat, the business purpose, the amount of registered capital, and the capital contribution of each of the various owners.

A GmbH's minimum registered capital amount is EUR 35,000. Generally, one half of the registered capital must be raised in cash while the remainder may be contributed in the form of assets (contributions in kind). Of the original capital contribution, 25%, or at least EUR 17,500, must actually be paid in upon incorporation. Under certain conditions, the capital can be provided exclusively in the form of assets (incorporation in kind, in this case the contribution is subject to an audit verifying the market value of the assets contributed). The articles of association may provide for additional capital contributions payable by the owners on the basis of a resolution adopted by the shareholder meeting.

The minimum share capital of an AG is EUR 70,000. For an AG, the same payment regulations apply as for a GmbH, but the owners can agree upon a further capital contribution going beyond the nominal value of the shares (premium). The premium is shown on the company's balance sheet as a capital reserve.

Since 2004, the company type Societas Europaea (SE) can be chosen in Austria. The SE is a stock corporation based on community law. The advantages of this legal form are the simplification of organisational structures (in particular for international groups) and the possibility of cross-border transfers of corporation seats without loss of the legal identity. The SE allows the choice of a business location under an economic point of view as well as the choice of the most favourable legislation. The minimum share capital required for the incorporation of a SE is EUR 120,000 while the statutory seat of the corporation must be located in the same country where the place of management is located in.

### *Restructuring measures (M&A from a business perspective)*

Transfers of assets and undertakings can be realised with retroactive effect and be tax neutral within the framework of the Austrian Reorganisation Tax Act.

The legislation administers the following areas (Article I-VI):

- Mergers (within EU also cross border) of corporations.
- Special conversion (from corporations to partnerships).
- Contribution of businesses and exchange of shares.
- Merger of partnerships.
- Demerger of partnerships.
- Demerger of corporations.

If the reorganisation qualifies for the application of the Austrian Reorganisation Tax Act, the reorganisation steps are realised tax neutrally and with a retroactive effect as of the reorganisation due date. Existing tax loss carryforwards can be transferred under certain conditions as well. Furthermore, several other tax privileges are granted under the Reorganisation Tax Act for stamp duties, capital transfer tax, etc.

## Significant developments

There have been no significant corporate tax developments in Azerbaijan during the past year.

## Taxes on corporate income

### Tax rates

According to the changes into the Tax Code (Code) in June 2009, effective as of 1 January 2010, the profit tax rate is reduced from 22% to 20%.

### Tax base

Taxable profits are defined to be the difference between a taxpayer's gross income and deductible expenses.

Gross income encompasses all revenues received by a taxpayer from all economic activities, unless the revenues are expressly exempted under the law.

Deductible expenses encompass all properly documented expenses that are incurred in the furtherance of a taxpayer's business activities.

### Taxable persons

Profit tax is imposed on domestic enterprises, as well as permanent establishments (PE) of non-residents.

### Simplified tax system

The Code also stipulates payment of taxes based on a simplified system for enterprises not registered as VAT payers and whose annual gross revenue is less than 150,000 Azerbaijan new mantas (AZN) starting from 1 January 2010, except for enterprises producing excisable goods, credit and insurance organizations, and investment funds and professional participants in the securities market. The simplified tax is imposed on gross revenue at a rate of 4% in Baku and at a rate of 2% in other regions of Azerbaijan. A special rate of simplified tax is set for enterprises involved in residential construction at a fixed amount of AZN 10 per square metre plus an applied co-efficient, which is determined by regional executive authorities.

### Other special corporate tax regimes

There are other tax regimes applicable under special agreements concluded between the Azerbaijan government and foreign oil companies: production sharing agreements (PSA) and host government agreements (HGA). The PSA and HGA regimes apply to all enterprises involved in these agreements, including foreign oil companies functioning as contractors and foreign service companies providing services to the contractor or the operating company.

As of 1 January 2010, there are 31 signed and ratified PSAs and two HGAs, each with its own separate tax regime. Each PSA and HGA contains a tax article that outlines the tax regime for that particular agreement. While there are several similarities with respect to tax terms in the various PSAs, there are some differences, other than merely differing tax rates (e.g. taxation of foreign subcontractors) or reporting requirements. Additionally, tax protocols for each PSA and HGA, which provide specific guidance regarding the procedures for payment of taxes and filing of reports, are negotiated with the Ministry of Taxes and other executive authorities.

## *Corporate residence*

A resident enterprise is any legal entity established in accordance with the legislation of the Azerbaijan Republic and performing entrepreneurial activity or any entity that is managed in Azerbaijan.

### *Permanent establishment (PE)*

A PE of a foreign legal entity is also subject to taxation with respect to the income attributable to such PE. A PE is an establishment of a foreign legal entity, through which it fully or partially performs commercial activities (for these purposes, a PE may be considered a management unit, office bureau, agency, construction site, etc.) for more than 90 consecutive days within any 12-month period. Activities of auxiliary or preparatory nature (e.g. exclusively storing or exhibiting goods or products belonging to a non-resident, purchasing goods, or collecting data by a non-resident enterprise for its own purposes) do not create a PE.

## *Other taxes*

### *Value-added tax (VAT)*

VAT is levied on the supply of goods and services and on the import of goods.

#### VAT rates

The standard rate of VAT is 18%.

Zero rating applies to the following:

- Exportation of goods and services.
- Importation under the PSA and HGA regimes.
- Importation of goods, the supply of goods, and the implementation of works and provision of services to grant recipients on the expense of financial aid (grants) received from abroad.
- International and transit cargo and passenger transportation, as well as the supply of works and services directly connected with international and transit flights.
- The supply of gold and other valuables to the National Bank of Azerbaijan.

#### Taxable persons

Any person who is, or is to be, registered as a VAT payer is regarded a taxable person.

Companies are required to register for VAT if their taxable income exceeds AZN 150,000 for the previous 12 months beginning from 1 January 2010 (previously, it was AZN 22,500 and three months respectively).

**Taxable transactions**
Supply of goods and services in Azerbaijan and imports into Azerbaijan are subject to VAT.

**Taxable amount**
The taxable base is established by starting with the value of the goods and services without adding the VAT amount, but including any customs duty and excise duty if applicable.

The value of taxable imports consists of the value of the goods determined in accordance with the customs legislation and taxes and duties (other than VAT) to be paid upon importation to Azerbaijan.

The amount of VAT to be paid is the difference between the amount of VAT received on taxable supplies of goods and services and VAT paid on the purchase of goods and services necessary to generate taxable supplies of goods and services.

The Cabinet of Ministers can grant exemptions for the import of goods and equipment used for production purposes or to provide advanced technology know-how. Such exemptions are granted for a specific period and in a specific area, and can only be granted if it is impossible to satisfy the respective needs from local resources.

***Excise duty***
Excise duties are imposed on tobacco products, alcoholic beverages, light vehicles, leisure and sports yachts, petroleum, and lubricants.

**Taxable persons**
Excise duties are paid by companies and organizations, including companies with foreign investment, as well as branches, divisions, and other independent subdivisions of companies in Azerbaijan that render services and sell self-produced goods.

**Taxable operations**
The following operations are subject to excise duties:

- Release of excise goods produced in Azerbaijan outside the premises of the building in which they were produced.
- Import of excise goods pursuant to the customs legislation of Azerbaijan.

***Property tax***
Property tax is levied on both movable and immovable tangible assets owned by individuals and companies.

**Property tax rates**
Property tax is imposed on the average annual book value of the taxable property at the rate of 1%.

**Taxable persons**
Taxable persons are comprised of the following:

- Resident companies, including companies with foreign investment that are treated as residents under Azerbaijani law, international organisations engaged in economic activities, and other enterprise.
- Branches and affiliated companies of such taxpayers.
- Agencies and representative offices of foreign legal entities located in Azerbaijan.
- Non-resident companies performing activities through a PE on the territory of Azerbaijan.

Enterprises can combine their assets and cooperate as joint owners. Joint owners are liable to pay tax according to their interest in the property concerned.

**Tax base**
The tax base varies according to the residency status of the taxpayer. Resident companies are subject to tax on their tangible assets recorded on their balance sheet. Non-resident companies carrying out a business activity through a PE in Azerbaijan are only subject to tax on their tangible assets connected with the PE.

The following assets are exempt:

- Facilities used for the purposes of the environment, fire protection, and civil defence.
- Product lines, railways and motorways, communication and power lines, and melioration and watering facilities.
- Automobile transport taxed for the road tax.
- Facilities of companies involved in education, health, culture, and sports that are used only for the purposes of such areas of activity.

**Administration**
Companies are required to report the average annual value of taxable property and pay tax on a quarterly basis, subject to any necessary recalculations at the end of the year. Tax payments are due within 15 days of the second month of each quarter. The payment should be 20% of the previous year property tax amount.

The tax on water and air transport means is estimated on 1 January each year by the tax offices based on data provided by the organizations responsible for registration of means of transport. The tax is assessed on the person named in the registration document.

When an asset changes ownership during the tax year, the tax liability is defined as the liability of the new owner.

### *Land tax*
Land tax is levied on Azerbaijan's land resources that are in the possession of or used by individuals or companies.

**Land tax rates**
The rate of land tax for agricultural land is AZN 0.06 per unit. The units are determined by the relevant authority on the basis of the purpose, geographical location, and the quality of agricultural land in the administrative regions.

The rate of land tax for industrial, construction, transport, telecommunications, trade and housing servicing, and other dedicated land varies from AZN 2 to 10 per 100 square metres, depending on the city or region.

**Taxable persons**
Companies and individuals who own, hold, or use land must pay land tax.

**Taxable base**
Land plants that are in ownership or used are subject to land tax. Exemptions apply to various types of land owned or used for public purposes by the state or other public authorities. The government may grant further tax exemptions and reliefs.

**Assessment and procedure of payment**
Companies must compute the exact amount of the land tax each year on the basis of documents evidencing the title of ownership, possession, and use. The computation must be submitted to the tax authorities by 15 May of each year. The tax must be paid by 15 August and 15 November in equal amounts.

Individuals receive each year, before 1 July, a calculation from the authorities for the tax amount due by them. The tax must be paid by 1 August.

## *Branch income*

In addition to profit tax paid by a PE of a non-resident, the amount transferred from the net profit of such PE to the non-resident is taxed at the source of payment at a rate of 10%.

## *Income determination*

Profit tax is levied on an enterprise's taxable profits. Profits are defined as the difference between the gross income and deductions defined by law.

### *Inventory valuation*
Inventory valuation is determined according to national accounting standards.

No inventory valuation method is stipulated for tax purposes.

### *Capital gains*
There is no separate capital gains taxation in Azerbaijan. Proceeds from the disposal of capital assets are included in the ordinary taxable income.

### *Dividend income*
Dividends received from Azeri sources and previously subject to withholding tax (WHT) (taxed at the source of payment) are not included in the taxable profits of the Azerbaijani recipient.

### *Inter-company dividends*
Inter-company dividends distributed to residents and non-residents are subject to WHT (taxable at sources upon payment). Therefore, the received dividend amounts of legal entities and physical persons are not taxable for profit (income) tax purposes.

### *Foreign income*
Resident taxpayers must pay tax on worldwide income. A non-resident enterprise operating in Azerbaijan through a PE must pay tax on the gross income generated from Azerbaijan sources less any related deductions attributable to the PE.

According to the Tax Code, if a resident of the Azerbaijan Republic directly or indirectly holds more than 20% of shareholders' equity or possesses more than 20% of the voting shares of a foreign legal entity that, in turn, received income from a state with a favorable taxation, then such income shall be included in the resident's taxable income.

A state with a favorable taxation is considered a country in which the tax rate is two or more times lower than that determined under the Tax Code of Azerbaijan Republic, or a country in which the laws on confidentiality of information about companies exist, which allow secrecy to be maintained concerning financial information, as well as the actual owner of property or income receiver.

Gross income of a non-resident enterprise generated from Azerbaijan sources and not connected with a PE will be taxed at the source of payment without any deductions allowed for expenses.

A non-resident enterprise generating income through the assignment of property not connected with a PE shall pay tax on the gross income received during a calendar year from Azerbaijan sources, after deducting expenses for the period that relates to such income.

## Deductions

All expenses connected with generating income, except for non-deductible expenses and expenses with limited deductibility, specifically defined by the law, are deductible from income.

Road, property, land, and mining taxes are also deductible.

### Non-deductible expenses

Non-deductible expenses are:

- Capital expenses.
- Expenses connected with non-commercial activity.
- Entertainment and meal expenses, accommodation, and other expenses of a social nature incurred for employees.

### Expenses deductible within certain limits

- Interest on loans received from overseas and/or from related parties may be deducted, limited to the interest rate on loans with similar currency and maturity at the interbank credit auction. In absence of such an auction, deductions for interest may not exceed rates of 125% of the interbank auction credit rates published by the National Bank of Azerbaijan Republic.
- The amount of repair expenses deductible each year is limited to the amount of the tax written down value of each category of fixed assets as of the end of the previous year. For buildings and premises the limit is 2%, for machinery and equipment the limit is 5%, and for other fixed assets the limit is 3%. An amount exceeding these limits shall be taken as an increase of the residual balance value of the fixed assets in the appropriate category.
- Actual business trip expenses are deductible from income within the standards established by the Cabinet of Ministers.
- A legal entity engaged in insurance activities is entitled to deduct allocations to reserve insurance funds within the standards established by the legislation of the Azerbaijan Republic.

- A taxpayer shall be entitled to a deduction for doubtful debts connected with goods, work, and services that have been realised where income from them was previously included in the gross income received from entrepreneurial activity. Doubtful debt deduction shall be allowed only if the debt is written off as worthless in taxpayer's books.
- Banks and credit entities engaged in certain types of banking activities shall be entitled to deduct from income the amounts assigned for establishment of special reserve funds, depending on the classification of assets in compliance with legislation, and in accordance with procedures established by the relevant executive authority.

### *Depreciation*
Depreciation may be calculated at the following rates:

- Buildings and premises: up to 7%.
- Machines, equipment, and calculation appliances: up to 25%.
- Means of transportation: up to 25%.
- Working cattle: up to 20%.
- Expenses incurred for geological and exploration works, as well as for preparatory works for the production of natural resources: 25%.
- Intangible assets with an undetermined period of use: up to 10%. For those with a determined period of use, pro-rata amount as per the useful life, in years.
- Other fixed assets: up to 20%.

### *Net operating losses*
Taxable losses incurred by legal entities may be carried forward for five years to offset future taxable profit, without limitations.

## *Group taxation*

Each taxpayer is liable to fulfil one's own tax liabilities. Azeri tax legislation does not have the concept of 'group taxation'.

## *Tax credits and incentives*

The rate of profit tax levied on production enterprises belonging to community organizations for disabled persons, and involving at least 50% of disabled persons, shall be reduced by 50%.

In determining eligibility for these privileges, disabled persons substituting permanent employees, contractors (i.e. who work under contractor agreements, civil legal contracts), or disabled persons till the age of 18 are not included into the average number of employees.

Banks, insurance, and re-insurance companies are exempt from profit tax on profit distributed for increasing their nominal equity (so called, charter capital) until 2012.

Taxpayers producing agriculture products are exempt from profit tax, VAT, and property tax until 2013.

### *The Law on the Special Economic Regime for Export-Oriented Oil and Gas Activities*

The Law on the Special Economic Regime for Export-Oriented Oil and Gas Activities was adopted in April 2009 and will remain effective for 15 years. This law avails the following tax incentives to contractors and subcontractors (excluding foreign subcontractors without permanent establishment in Azerbaijan):

- Local companies are permitted to choose between (i) profit tax at a rate of 20% or (ii) 5% WHT on gross revenues.
- Foreign subcontractors are taxable only by a 5% WHT.
- A 0% VAT rate.
- Exemption from dividend tax and taxation on branch's net profits.
- Exemption from customs duties and taxes.
- Exemptions from property tax and land tax.

In order to derive these benefits, the relevant taxpayer should obtain a special confirmation certificate from the Ministry of Industry and Energy.

### *The Law on Special Economic Zones*

The Law on Special Economic Zones (SEZ) became effective in June 2009. The companies operating in these zones shall have the following tax benefits:

- A 0.5% tax levied on profits from supplied goods, performed services, or works.
- A 0% VAT rate.
- Customs exemptions.

In order to operate in a SEZ, a special residency certificate is necessary. However, the following companies may not apply for this certificate:

- Parties producing or processing oil and gas.
- Parties producing alcoholic beverages and tobacco.
- Television or radio broadcasting companies.

As of January 2011, no SEZ were established in Azerbaijan.

### *Foreign tax credit for residents*

Azeri legal entities are taxed on worldwide profit; however, any tax paid overseas up to the tax amount that would be calculated under Azeri law will be allowed to offset the Azeri profits tax. The tax credit may not exceed the tax that would be imposed on such income in Azerbaijan. This credit applies only to residents of Azerbaijan.

## *Withholding taxes*

Income received from Azerbaijan sources not attributable to a PE (base) of a non-resident in Azerbaijan is subject to WHT at the following rates:

- Dividends paid by resident enterprises: 10%.
- Interest paid by residents, PEs of non-residents, or on behalf of such PEs (except for interest paid to resident banks or to PEs of non-resident banks): 10%.
- Rental fees for movable and immovable property: 14%.
- Royalties: 14%.
- Leasing, risk insurance, or reinsurance payments: 4%.
- Telecommunications or international transport services: 6%.

- Other Azeri-source income: 10%.

If a resident enterprise or a PE of a non-resident receives interest, royalties, or rental fees taxable at the source of payment in Azerbaijan, it is entitled to consider the tax deducted from the source of payment, providing the documents supporting the tax deduction are in place.

## *Tax administration*

### *Returns*

Resident enterprises and PEs of non-residents must file profit tax returns for a calendar year by 31 March of the following year. During liquidation of a legal entity or a PE of a non-resident, the tax return should be submitted within 30 days after the adoption of a decree on liquidation.

A non-resident that has no PE in Azerbaijan and receives income subject to WHT (except for dividends and interest) may file a tax return with respect to such income and expenses, connected with the generation of the income, for purposes of reassessment of profit tax at the rate of 20%.

If a taxpayer applies for an extension of time to file the profit tax return prior to the expiration of the filing deadline and at the same time settle the full tax amount due, the filing deadline may be prolonged for up to three months. The prolongation of the terms for filing the return will not modify the terms of tax payment.

Legal entities and entrepreneurs that withhold tax at the source of payment are obliged to file the WHT report with the tax authority within 20 days following the end of the quarter.

### *Tax payments*

Taxpayers must make advance quarterly tax payments of profit tax by the 15th day of the month following the end of the calendar quarter. Payments are determined either (i) as 25% of tax for the past fiscal year or (ii) by multiplying the amount of actual income through the quarter by a ratio of tax to gross income for the previous year.

# Bahrain

## Significant developments

There have been no significant corporate tax developments in Bahrain during the past year.

## Taxes on corporate income

There are no taxes in Bahrain on income, sales, capital gains, or estates, with the exception in limited circumstances to businesses (local and foreign) that operate in the oil and gas sector or derive profits from the extraction or refinement of fossil fuels (defined as hydrocarbons) in Bahrain. For such companies, a tax rate of 46% is levied on net profits for each tax accounting period. A company's accounting period should normally follow the (Gregorian) calendar year.

## Corporate residence

Income Tax Law No. 22 of 1979 does not define residence. In the case of businesses operating in the oil and gas sector, profits from taxable activities in Bahrain are taxed in Bahrain irrespective of the residence of the taxpayer.

## Other taxes

There are no other taxes on corporate income levied in Bahrain. However, companies are subject to stamp duties, customs duties, as well as a series of corporate registration fees, licence fees, and certain municipal taxes (e.g. taxes on leases of property and registration of land title).

## Branch income

Profit from branch income is taxable in Bahrain if it is derived from activities in the oil and gas sector.

## Income determination

There are no specific rules with respect to the calculation of specific items of income, such as inventory valuation, capital gains, inter-company dividends, foreign income, or stock dividends. However, the income tax law requires the taxable profits to be calculated using generally accepted accounting principles.

## Deductions

The law generally allows deductions for all costs associated with taxable activities in Bahrain, such as the cost of production, refinement, remuneration of employees associated with these taxable activities (including social insurance and pensions paid for the benefit of these employees), and other operational losses.

### Depreciation and depletion

Tax deductions may be claimed with respect to reasonable amounts for depreciation, obsolescence, exhaustion, and depletion incurred during the taxable year for properties used by the taxpayer in a trade or businesses from which income, taxable under the income tax law, is derived. Generally, such amounts may be claimed on a straight-line basis over the estimated remaining useful life of the properties, unless otherwise approved by the Minister of Finance.

### Taxes

All taxes and duties not imposed by the Bahrain income tax law, including customs duties, may be deducted from the taxable income as stipulated in Bahrain's income tax law.

### Other significant items

All reasonable and justifiable costs of production and exploration of products sold during the current taxable year are deductible for tax purposes, provided that these expenses have not been deducted elsewhere in calculating net taxable income.

### Net operating losses

Unutilised losses may be carried forward and deducted up to an amount equivalent to the net income in future years as defined by the Bahrain income tax law. Carryback of losses is not permitted.

### Payments to foreign affiliates

There are no specific restrictions in the income tax law pertaining to payments made to foreign affiliates.

## Group taxation

There is no legislation or mechanism for group relief or the taxation of group activities in Bahrain.

## Tax credits and incentives

There are no tax incentives in Bahrain.

## Withholding taxes

There are no withholding taxes on the payment of dividends, interest, or royalties.

### Tax treaties

Bahrain has double tax treaties in force with various countries including Algeria, Austria, Belarus, Brunei, Bulgaria, China, Egypt, France, Iran, Ireland, Jordan, Lebanon, Luxembourg, Malaysia, Morocco, Netherlands, Pakistan, Philippines, Singapore, Syria, Thailand, Turkey, and Yemen.

## *Tax administration*

### *Returns*

An estimated income tax statement must be submitted on or before the 15th day of the third month of the taxable year. Where applicable, a taxpayer may also be required to file an amended estimated income tax statement quarterly, unless a final income tax statement has been provided.

Approved accountants must prepare a certified tax return for the return to be acceptable to the authorities.

### *Payment of tax*

Taxes are payable in 12 equal monthly instalments. Payments are due starting the 15th day of the fourth month of the taxable year. Income tax as per the final/amended income tax statement will form the basis of tax payments for the next 12 months, and any excess income tax paid will be credited and used in the first invoice following the establishment of the credit by the Minister.

# Barbados

## Significant developments

During calendar 2010, Barbados signed double tax treaties with Panama, Portugal, and Spain. A protocol to the double tax treaty with the Peoples Republic of China was also concluded.

On 1 December 2010, the rate of the value-added tax (VAT) increased to 17.5% from 15%, and the environmental levy was abolished.

## Taxes on corporate income

Companies resident in Barbados are taxed on their worldwide income for the profits of the company earned in a fiscal period not to exceed 53 weeks. Non-resident companies are generally only taxed on income derived from sources and operations conducted within Barbados.

### Corporate income tax (CIT) rates

The following rates apply to taxes on corporate income:

| Type of entity | CIT rate (%) |
|---|---|
| Regular companies | 25 |
| Small companies (1) | 15 |
| Manufacturing companies (2) | 15 |
| Approved developers in special development areas | 15 |
| International business companies, international banks, and international societies with restricted liability | 2.5 to 1 |
| Life insurance companies (computed on gross investment income) | 5 |
| Companies engaged in the construction of houses (3) | 15 |

Notes

1. This concessionary tax rate is available to any small company as defined in the Small Business Development Act.
2. This concessionary tax rate is available only to companies registered as manufacturers with the Barbados Customs & Excise Department.
3. Selling price of the houses must be less than 400,000 Barbados dollars (BBD), including the house and land.

# Barbados

## Corporate residence

A corporation is deemed to be resident in Barbados if its management and control is exercised in Barbados.

## Other taxes

### Value-added tax (VAT)

As of December 1, 2010, VAT is levied at the rate of 17.5% (previously 15%) on the value of a wide range of goods and services imported or supplied in Barbados by VAT registered persons. A number of services, including financial services, real estate, medical services, and education are exempt. Intergroup transactions are taxable.

Persons operating under Barbados' VAT regime must be registered for VAT. Beginning 1 December 2010, the threshold for VAT registration is BBD 80,000 (previously BBD 60,000), but voluntary registration is permitted for persons whose annual turnover is less than BBD 80,000 (previously BBD 60,000).

Certain supplies are zero-rated, including exports, basic food items, prescription drugs, crude oil, and the supply of certain items to the international financial services sector, e.g. legal and accounting fees. There is a concessionary rate of 8.75% as of 1 May 2011 (previously 7.5%) applicable to the supply of accommodation by guest houses, hotels, inns, or any similar place, including a dwelling house normally let or rented for use as a vacation or holiday home.

Registered persons may deduct input tax from their output tax in calculating the tax payable for that VAT accounting period. Where input tax exceeds output tax, the registrant will be entitled to a refund of VAT.

### Land tax

The following land tax rates are currently in effect:

| **On the improved value of each parcel of land on which there is a dwelling house that is used exclusively for residential purposes:** | |
|---|---|
| On first BBD 150,000 | 0 |
| On amounts between BBD 150,000 and BBD 400,000 | 0.10% of the improved value |
| On amounts between BBD 400,000 and BBD 1,000,000 | 0.45% of the improved value |
| On amounts exceeding BBD 1,000,000 | 0.75% of the improved value |
| On the improved value of each parcel of land on which there is a building other than a residence | 0.65% of the improved value |
| On the site value of each parcel of unimproved land | 0.60% of the site value |

The following concessions have been granted for land taxes:

- For villas, as defined by the Tourism Development Act, land tax is calculated and payable on only 75% of the improved value of the property.
- For hotels, as defined by the Tourism Development Act, land tax is calculated and payable on only 50% of the improved value of the property.

- For pensioners occupying their own homes, land tax is calculated and payable on only 50% of the improved value of the property in excess of BBD 150,000 (effective from 1 April 2008).
- For land used for agricultural purposes, a rebate of 50% of the land tax paid is granted.

A 10% discount is granted if the land tax is paid within 30 days from the date of the tax demand notice or 5% if paid within 60 days.

### *Customs duties / import tariffs*
Customs duty is levied on a wide range of imported goods at rates specified in Part 1 of the First Schedule of the Customs Act. Barbados' Customs Tariff is based on the Common External Tariff of the Caribbean Common Market (CARICOM) with special derogations for certain items, e.g. spirituous beverages. Customs duty is calculated on either an *ad valorem* basis or at specific quantitative rates. The ad valorem rates for most items vary between 0% and 20%, but certain goods regarded as luxury items are subject to higher rates (e.g. jewellery 60%). In addition, a select group of items that are produced within Barbados and CARICOM (including some agricultural products) are subject to a duty rate of 60% when imported from outside the region.

Manufacturers and agriculturists, including persons involved in fishing and horticulture, are exempt from the payment of duty on inputs (including packaging materials, machinery, equipment, and spares) imported for use in their businesses.

The various departments and institutions, international bodies and organisations listed in Part II-B of the Customs Tariff are exempt from the payment of customs duty. Specific goods (e.g. computers), also mentioned in Part II-B, are exempt from customs duty.

### *Excise taxes*
Excise taxes existed in Barbados prior to the introduction of VAT in 1997, but these were confined to products of the rum industry. As of 1 January 1997, four categories of goods (both locally manufactured, as well as imported) became subject to excise taxes. These are motor vehicles, spirituous beverages, tobacco products, and petroleum products. Most excisable goods are subject to the tax at a specific rate, with the exception of motor vehicles, which are subject to *ad valorem* rates.

A few persons and goods are exempt from excise taxes. These include motor vehicles imported by the diplomatic corps, and other organisations exempt from customs duty under Part II-B of the Customs Tariff, goods imported for temporary use or for a temporary purpose that will be re-exported within 3 months, and goods (other than spirits) intended to be used as raw materials for the manufacture or production in Barbados of other taxable goods.

### *Property transfer taxes*
Property transfer taxes are levied as set out in the following table:

| | |
|---|---|
| Shares of companies listed on the Barbados Stock Exchange | Exempt |
| Shares of private companies* | 2.5% of value or amount of gross consideration above BBD 50,000 |
| Land with a building | 2.5% of value or amount of gross consideration above BBD 150,000 |
| Land with no building | 2.5% of value or amount of gross consideration |

| | |
|---|---|
| Leases of 25 years or more or short-term leases that are continuously renewed for a period equal to 25 years or more | 2.5% of value or amount of gross consideration |

*Any transfer of shares to a person who is resident outside of Barbados, whether or not the transferor is resident in Barbados, where the assets of the company concerned consists of foreign assets and its income is derived solely from sources outside Barbados, will not be subject to transfer taxes in Barbados.

### *Land development duty*
Where a person disposes of property situated in a specially designated development area within 15 years of the date specified by statute, duty may be charged. This may be at rates of up to 50% on the excess of the value of the consideration over the improved value at the specified base date, plus certain other expenses and an amount representing capital appreciation of the property.

### *Stamp duty*
Barbados imposes a stamp duty tax on various instruments, including written documents. The rates imposed vary depending on the document. Stamp duty applicable to documents for the transfer of shares, real estate and for mortgages are set out below:

| | |
|---|---|
| On sale of shares of companies listed on the Barbados Stock Exchange | 0 |
| On sale of real estate, leases, and shares in public companies* | BBD 10 per BBD 1,000 or part thereof |
| On mortgages | BBD 3 on each BBD 500 or part thereof |

*Any transfer of shares to a person who is resident outside of Barbados, whether or not the transferor is resident in Barbados, where the assets of the company concerned consists of foreign assets and its income is derived solely from sources outside Barbados, will not be subject to transfer taxes in Barbados.

### *Life insurance premium tax*
In addition to the CIT computed on the gross investment income of life insurance companies, a life insurance premium tax is levied on gross direct premium income earned by resident and foreign life insurance companies as set out in the following table:

| | Resident life insurance companies | Foreign life insurance companies |
|---|---|---|
| New business written for the income year | 6% | 6% |
| Renewal business | 3% | 5% |

### *General insurance premium tax*
In addition to the CIT computed on the gross investment income of general insurance companies, a general insurance premium tax is levied on gross direct premium income at a rate of 4.75% in respect of property insurance business and 4% for other general insurance business.

### *Environmental levy*
The environmental levy was abolished effective 1 December 2010.

Prior to that date, an environmental levy was in force in Barbados, and its main purpose was to defray the cost of the disposal of refuse generated by the use of goods imported into Barbados. The general rates were either 2% or 3% of the CIF (cost, insurance, and freight) of all goods, both imported and local, but some items were subject to specific rates, e.g. motor vehicles BBD 1,500 per vehicle and BBD 300 for other vehicles. Certain persons were exempt from the payment of this levy, including those organisations listed in Part II-B of the Customs Tariff, the international financial services sector, manufacturers, and the diplomatic corps.

## Branch income

Branches are taxed on the same basis as corporations. In addition, a 10% tax is assessed on the transfer or deemed transfer of the after-tax profits to the head office that are not reinvested in Barbados, unless a double taxation agreement overrides this.

## Income determination

### Inventory valuation

Inventory is generally stated at the lower of cost and net realizable value. First in first out (FIFO) or average values are generally used for book and tax purposes. Last in first out (LIFO) is not acceptable for tax purposes. The Inland Revenue will normally accept a method of valuation that conforms to standard accounting practice in the trade. Conformity between book and tax values is expected.

### Capital gains

Capital gains are not taxed in Barbados.

### Interest income

Amounts received on account of, in lieu of, or in satisfaction of interest are included in the calculation of assessable income. In certain instances (to the extent specified by regulation) certain types of interest may be exempt from inclusion into the calculation of assessable income, including interest on bonds, debentures, or stock of the Government of Barbados that is beneficially owned by a non-resident; interest on tax reserve and tax refund certificates; and interest on holdings (within certain limits) of National Development Bonds, National Housing Bonds, Savings Bonds, and Sugar Industry Bonds classified as non-taxable bonds, as well as interest income from some CARICOM countries.

### Partnership income

Amounts received from a partnership or syndicate for the income year, regardless of whether or not these amounts were withdrawn during the income year, are included in the calculation of assessable income.

### Foreign income

A Barbados corporation is taxed on foreign branch income as earned. Double taxation is avoided by means of foreign tax credits or an exemption where double taxation treaties exist.

## Deductions

Business expenses that are reasonable and incurred for the purpose of producing assessable income are deductible for tax purposes unless disallowed by a specific provision of the Income Tax Act. Deduction of capital expenditures is specifically prohibited, but special provisions may allow tax depreciation of these expenditures.

## *Depreciation*
Depreciation for tax purposes is computed on a straight-line basis at prescribed rates. The process is accelerated by additional initial allowances in the year of acquisition. Conformity between book and tax depreciation is not required. Gains on sales of depreciable assets are taxable as ordinary income up to the amount of tax depreciation recaptured, and losses on sales below depreciated value are deductible.

### Capital allowances

| Initial allowance | Rate |
|---|---|
| Plant and machinery | 20% |
| Industrial buildings | 40% |

| Annual allowance | Rate |
|---|---|
| Plant and machinery | Various rates |
| Industrial buildings | 4% |
| Intellectual property | 10% of 50% of the amount expended |

| Investment allowance (an incentive allowance limited by statute to entities operating in certain industries) | Rate |
|---|---|
| Basic industry* | 20% |
| Businesses or persons entitled to export allowance for exports outside of CARICOM countries | 40% |
| Business engaged in the manufacture and refining of sugar | 40% |
| Business engaged in the manufacture of clay and limestone products | 40% |

Notes

*As prescribed by the regulations to the Barbados Income Tax Act.

This allowance is not deducted from the cost of the asset in calculating tax written down value.

### Manufacturing allowance
Capital allowances are more complex for companies involved in the manufacturing sector, who are granted an additional 50% of the annual allowance claimed in an income year. Such companies are also often able to claim investment allowances. Please note that any company that is able to claim an investment allowance cannot also claim an initial allowance.

### Commercial building allowance
A deduction is available in respect of a commercial building. For each income year, the available allowance is calculated as 1% of the land tax improved value, or 10% of the land tax improved value if the building is registered with the National Trust.

## *Depletion*
For oil and gas companies, depending on certain circumstances, a depletion allowance of 20% or 10% is given in addition to annual depreciation on prescribed types of capital expenditure.

## *Bad debt*
Amounts representing debts owed that have been established as bad debts during the income year and have been previously included in calculating assessable income for that income year or a previous income year are deductible in calculating assessable income.

### Pension expenses
Contributions made by companies under pension schemes that are approved by the Commissioner are deductible in calculating assessable income.

### Taxes
Taxes on income are not deductible.

### Net operating losses
No carryback is allowed for CIT losses. Losses can generally be carried forward for nine years after the income year in which they are incurred and may be applied in full against future taxable profits. Notwithstanding this, a tax loss incurred by a person in respect of residential property can only be deducted against assessable income earned by that person in respect of residential property.

Losses of general insurance companies can only be carried forward for five years, and losses of life insurance companies cannot be carried forward at all.

### Payments to foreign affiliates
A Barbados corporation can claim a deduction for royalties, management fees, and interest charges paid to foreign affiliates, provided that payments are no greater than what it would pay to an unrelated party.

## Group taxation

Trading losses (i.e. the tax loss for the year, excluding capital allowances) incurred during an income year of a surrendering company may be set off wholly or partially against the profits of a claimant company, where both are members of the same group (defined as where one company is a 75% subsidiary of another, or both companies are 75% subsidiaries of a third company).

Group relief is not available to companies operating in the international business and financial services sector or any other company which is operating under concessionary legislation.

### Transfer pricing regime
Although Barbados has no specific transfer pricing legislation or regulations in place, the Income Tax Act does contain a section dealing with artificial transactions. This enables the revenue authorities to amend the assessable income of a person where they believe the main purpose of a non-arm's-length transaction is to artificially reduce that person's assessable income.

In such circumstances, the transaction is disregarded or modified to achieve the effect that it no longer results in the artificial reduction of that person's assessable income.

### Treatment of inter-company items
Dividends between two companies resident in Barbados are not taxed in the hands of the recipient. Dividends received by a resident Barbados company from a non-resident entity where the equity interest owned is at least 10% of the non-resident company and the shareholding is not held solely for the purpose of portfolio investments are not subject to tax. Dividends paid to a non-resident company are subject to 15% withholding tax (WHT) unless a double taxation agreement (DTA) overrides or reduces this WHT, or the dividends are paid out of income earned from sources outside of Barbados, or exemption is granted under specific legislation.

### Thin capitalisation rules
Barbados does not have tax provisions relevant to thin capitalisation.

### Controlled foreign company (CFC) regime
Barbados does not have tax provisions relevant to CFCs.

## Tax credits and incentives

### Foreign tax credit
Barbados allows a credit for foreign taxes (taxes paid in jurisdictions outside Barbados). The credit should not exceed the Barbados tax attributable to the income derived outside Barbados.

### Agricultural cash rebate
The following rebate may be claimed on agricultural or agro-processing machinery or plant that is new or imported into the island for the first time:

- Sugar cane harvesters: 10% or 15%.
- Other: 18%.

### Export allowance
There is a rebate of tax under the Income Tax Act in respect of income from export sales outside CARICOM. The maximum tax credit on eligible sales is 93%, which is available where eligible sales exceed 81% of total sales.

### Exempt Insurance Act
The Exempt Insurance Act is applicable to companies in Barbados that insure risks and earn premiums outside the island and for companies that manage the former. Under the Act, both types of companies are exempt from exchange control regulations. In lieu of standard CIT rates, exempt insurance companies are subject to tax at the rate of 0% for the first 15 years; thereafter, the rate is 8% on the first BBD 250,000 of taxable income and 0% on taxable income in excess of BBD 250,000. No WHT is levied on remittances of dividends or interest.

Exempt insurance companies are subject to an annual license fee of BBD 20,000.

### Fiscal Incentives Act
The Fiscal Incentives Act provides to manufacturers of an ‘approved product’ a full exemption from taxes and duties for varying periods, up to a maximum of 15 years.

### Foreign currency earnings credit
Persons carrying on business in Barbados may claim a tax credit of up to 93% of CIT on net profits from foreign currency earnings derived from construction projects or professional services undertaken outside of CARICOM or international insurance business.

### Housing Incentives Act
The Housing Incentives Act provides CIT, import duty, WHT, and other concessions to developers who implement low income housing projects. Approved developers are subject to CIT at a rate of 15%.

### *International Business Companies (IBCs) Act*

International business companies resident in Barbados but deriving income solely from sources outside Barbados are taxed at the following rates:

| Taxable income | Rate (%) |
|---|---|
| Up to BBD 10,000,000 | 2.5 |
| BBD 10,000,000 - BBD 20,000,000 | 2 |
| BBD 20,000,000 - BBD 30,000,000 | 1.5 |
| In excess of BBD 30,000,000 | 1 |

Freedom from exchange controls is granted to IBCs, as well as duty-free concessions on certain imports. No WHT is levied on remittances of dividends, royalties, interest, management fees, fees, or other income paid by IBCs to persons outside Barbados. IBCs may also claim a credit for taxes paid outside Barbados, provided that this does not reduce the company's rate of CIT in Barbados to less than 1%.

IBCs are subject to an annual license fee of BBD 850.

### *International Financial Services Act (IFSA)*

The IFSA provides for the establishment of international banking, trust administration, and other related or ancillary services by eligible companies incorporated in Barbados or branches of qualified foreign banks. An annual licence fee of BBD 100,000 is payable by IFSA licensees that take third party deposits, while IFSA licensees who take only related party deposits are required to pay BBD 50,000.

International financial service entities are exempt from exchange controls and are granted duty-free concessions on certain imports. Profits and gains are taxed at the same rates as for IBCs. No WHTs are levied on remittances of dividends, interest, or fees. International financial service entities may also claim a credit for taxes paid outside Barbados, provided that this does not reduce the entity's rate of CIT in Barbados to less than 1%.

### *International Trust Act*

The International Trust Act is aimed at facilitating the use of Barbados trusts for purposes previously made possible in many tax free financial centres. An international trust is taxed in Barbados as an individual that is resident but not domiciled in Barbados. This allows the trust to take advantage of a network of tax treaties while not subjecting its foreign earnings to Barbados tax unless they are remitted there. The Act exempts trusts from exchange control and WHT requirements. No registration is required.

### *Market development allowance for export sales or the tourist industry*

150% of certain expenditure on research and development for export sales outside of CARICOM or on tourism development is deductible.

### *Shipping (Incentives) Act*

The Shipping (Incentives) Act was enacted to encourage the development of Barbados' shipping activities by granting CIT, import duty, WHT and other concessions to approved shipping companies for a period of ten years.

### *Small Business Development Areas Act*

Companies incorporated under the Companies Act with at least 75% of their shares owned locally and having share capital of not more than BBD 1 million, annual sales not in excess of BBD 2 million, and not more than 25 employees may obtain approval as a small business. Such companies pay CIT at a reduced rate of 15% and are exempt from the payment of import duties on equipment imported for use in the business and from stamp duty on all documents related to the business that must be registered. In addition, 120% of certain expenditures directly related to the development of the business are deductible for tax purposes. Investors in such businesses are exempt from WHT on interest and dividends earned on their investment.

### *Societies with Restricted Liability (SRL) Act*

An SRL is a hybrid entity that can be recognized as a corporation or partnership in certain jurisdictions depending on the nature of its organizational documents. The entity has limited liability, and membership units are known as quotas. Societies qualifying under this Act may apply for a license to operate as international SRLs and as such are taxed at the same rates as IBCs. No WHT is levied on any distributions, interest, or other income paid by an international SRL to non-residents. International SRLs are granted duty-free concessions on certain imports, and no exchange control requirements are applicable. Entity mobility is also a prominent feature of this legislation. Qualifying societies organized overseas can continued into Barbados under the Act.

### *Special Development Areas Act*

The Special Development Areas Act provides relief for approved developers carrying out work in certain defined locations in Barbados and to persons financing such work (other than a commercial bank). Persons financing such work are exempt from income tax on interest received. Approved developers are exempt from import duties and value-added tax on inputs for the construction or renovation of buildings, WHTs on repatriation of interest (for a period of 15 years), land tax, and property transfer tax payable by vendors. An approved developer pays CIT at the rate of 15% and is granted initial and annual allowances on industrial buildings of 40% and 6%, respectively, and on commercial buildings of 20% and 4%, respectively.

### *Qualifying insurance companies*

Companies registered under the Insurance Act that derive at least 90% of their premiums from sources outside of CARICOM and at least 90% of whose risks originates outside of CARICOM may obtain a certificate of qualification. Such companies are entitled to the same exemptions from WHTs and exchange controls as exempt insurance companies. They are also entitled to the foreign currency earnings credit, which may reduce their CIT rate from 25% to 1.75% for general insurance business. The rate of tax on gross investment income applicable to life insurers may fall from 5% to 0.035%.

### *Tourism Development Act*

The Tourism Development Act provides that a qualifying owner of a tourism project or of a completed tourism product may offset expenditures on construction or the provision of certain amenities against its profits.

A tourism project includes the following:

- The construction of a new hotel.
- The alteration or renovation of an existing hotel.
- The conversion of an existing building or buildings into a hotel by reconstruction, extension, alteration, renovation, or remodelling.

- The furnishing and equipping of a building to be utilised as a hotel.
- The provision of tourist recreational facilities and tourism related services.
- The construction and equipping of a new restaurant.
- The alteration or renovation of an existing restaurant.
- The construction of a new attraction or the alteration or renovation of an existing attraction.
- The restoration, preservation, and conservation of natural sites.
- The establishment, restoration, preservation, and conservation of monuments, museums, and other historical structures and sites.
- The construction and furnishing of villas.
- The construction and furnishing of timeshare properties.
- The addition to a tourism product of any facilities or services intended to increase or improve the amenities that the tourism product provides.

Concessions extend to the following:

- The importation of building materials and supplies without payment of customs duty and an exemption from the payment of customs duties on specified supplies to be used for equipping that project.
- A refund of customs duty (including VAT) where the holder of a permit can satisfy the Comptroller of Customs that the building materials and supplies purchased for a tourism product have been purchased in Barbados, or in the case of importation that the customs duty was paid by the holder of the permit.
- Income tax concessions with respect to the write-off of interest, accelerated deduction of expenditure, interest rate subsidy, equity financing, training, and marketing.
- The set off of approved capital expenditures against revenues for a period of 15 years where the owner of a qualifying tourism project (except restaurants), which has a project with a value of up to BBD 200 million. Hotels with capital expenditure over BBD 200 million are allowed one additional year to write off expenditure for each additional BBD 20 million, up to a maximum of 20 years.

## *Withholding taxes*

### *Dividends, interest, royalties, and management fees*

WHTs are levied as follows:

| Recipient | Dividends (%) | Interest (%) | Royalties (%) | Management fees (%) |
|---|---|---|---|---|
| Barbados residents: corporations and individuals | 0/12.5 (25) | 12.5 (26) | 0 | 0 |
| Non-treaty countries | 15 | 15 | 15 | 15 |
| Austria | 5/15 (1) | 0 (3) | 0 (3) | 0 |
| Botswana | 5/12 (2) | 10 | 10 | 0 |
| Canada | 15 | 15 (4) | 10 (5) | 5 |
| CARICOM | 0 | 15 | 15 | 15 |
| China P.R. | 5/10 (6) | 10 | 10 | 0 |
| Cuba | 5/15 (7) | 10 | 5 | 0 |
| Finland | 5/15 (1) | 5 | 5 | 5 |
| Ghana* | 5/15 (1) | 0 (8) | 0 (9) | 0 |
| Luxembourg* | 0/15 (10) | 0 (3) | 0 (3) | 0 |

# Barbados

| Recipient | Dividends (%) | Interest (%) | Royalties (%) | Management fees (%) |
|---|---|---|---|---|
| Malta | 5/15 (11) | 5 | 5 | 0 |
| Mauritius | 5 | 5 | 5 | 0 |
| Mexico | 5/10 (12) | 10 | 10 | 0 |
| Netherlands* | 0/15 (13) | 5 | 5 | 0 |
| Norway | 5/15 (1) | 5 | 5 | 5 |
| Panama* | 5 (14) | 5/7.5 (15) | 7.5 | 0 |
| Portugal* | 5/15 (16) | 10 | 5 | 0 |
| Seychelles | 5 | 5 | 5 | 0 |

| Switzerland | 0 (18) | 0 (18) | 0 (18) | 0 |
| United Kingdom | 0 (19) | 15 (20) | 15 (21) | 0 |
| United States | 5/15 (22) | 5 | 5 | 0 |
| Venezuela | 5/10 (23) | 5/15 (24) | 10 | 0 |

*Treaty/protocol not yet in force; awaiting ratification.

Notes

1. The rate is 15% for portfolio dividends and 5% for holdings of at least 10%.
2. The rate is 12% for portfolio dividends and 5% for holdings of at least 25%.
3. Dividends and interest are only taxable in the territory in which the beneficial owner of the dividends or interest is resident.
4. This rate applies provided that the interest is subject to tax in the other territory.
5. This rate applies provided that the royalties are subject to tax in the other territory.
6. The rate is 10% for portfolio dividends and 5% for holdings of at least 25%.
7. The rate is 15% for portfolio dividends and 5% for holdings of at least 25%.
8. Interest is only taxable in the territory in which the beneficial owner of the interest is resident.
9. Royalties are only taxable in the territory in which the beneficial owner is resident.
10. The rate is 15% for portfolio dividends and 0% for holdings of at least 10%, held for at least 12 uninterrupted months prior to dividend distribution.
11. The rate is 15% for portfolio dividends and 5% for holdings of at least 5%.
12. The rate is 10% for portfolio dividends and 5% for holdings of at least 10%.
13. The rate is 15% for portfolio dividends and 0% for holdings of at least 10%.
14. The rate is 75% of the statutory nominal rate at the time of distribution; 5% for companies with holdings of at least 25%.
15. The rate is 7.5% of the gross amount; 5% if beneficial owner is a bank.
16. The rate is 15% for portfolio dividends and 5% for holdings of at least 25%.
17. The rate is 5% for portfolio dividends and 0% for holdings of at least 25%.
18. Agreement extended to Barbados by virtue of the agreement between Switzerland and the United Kingdom, on payments to non-residents from Barbados.
19. Dividends are exempt from WHT if they are subject to tax in the other territory.
20. This rate applies provided that the interest is subject to tax in the other territory.
21. WHT applies only to royalties in respect of cinematographic or television films. All other royalties are exempt from WHT, provided that they are subject to tax in the other territory.
22. The rate is 15% for portfolio dividends, 5% for holdings of at least 10%. Dividends paid by a regulated investment company will bear WHT at a rate of 15%, regardless of the percentage of shares held by the recipient. Dividends paid by a real estate investment trust (REIT) will qualify for the 5% WHT rate only if the beneficial owner is an individual holding less than 10% of the shares in the REIT, otherwise, a 30% WHT rate will apply.
23. The rate is 10% for portfolio dividends, 5% for holdings of at least 5%.
24. The rate is 5% if the recipient is a bank, 15% in all other cases.
25. Dividends paid to corporations are not subject to WHT, except for dividends paid on preference shares issued before January 1, 1975, which are subject to WHT at 25%. Dividends paid to individuals out of pre-July 1992 retained earnings are grossed up by 15% and included in taxable income. A 15% dividend tax credit is permitted on this income. Those paid from profits earned after July 1992 are subject to a final tax of 12.5%. There is no WHT on dividends paid out of exempt profits under the Fiscal Incentives Act.
26. Interest paid to pensioners over the age of 60 is exempt from WHT.

## *Tax administration*

### *Returns*

CIT returns are prepared on a fiscal year basis. Companies with fiscal years ending between 1 January and 30 September (both dates inclusive) are required to file a CIT return on or before 15 March in the year following the end of the fiscal period. Companies with fiscal years ending any time between 1 October and 31 December (both dates inclusive) are required to file a CIT return on or before 15 June in the year following the end of the fiscal period.

The Department of Inland Revenue has instituted an online filing system, which is still optional.

### *Payment of tax*

Companies with fiscal years ending between 1 January and 30 September (both dates inclusive) are required to make an instalment of CIT for the income year in which the fiscal period ends on or before 15 September of that year. The instalment is 50% of the net CIT payable for the preceding income year. The remainder of CIT due (if any) must be paid on filing of the CIT return by 15 March of the following year.

Companies with fiscal years ending between 1 October and 31 December (both dates inclusive) are required to make two instalments of CIT for the income year in which the fiscal period ends on or before 15 December of that year and 15 March of the following year. The instalments are each 50% of the net CIT payable for the preceding income year. The remainder of CIT due (if any) must be paid on filing of the CIT return by 15 June of the following year.

It is possible to apply for a reduction or waiver in the instalments if lower profits are anticipated in the current year when compared with those of the preceding year.

### *Penalties*

The penalties and interest for failing to file a return on time and pay the CIT due are as follows:

- Penalty for failing to file a CIT return by the due date is BBD 100 (USD 50) plus 5% of the tax assessed at the due date.
- Penalty for failing to pay CIT by the due date is 5% of the tax assessed and unpaid at the due date.
- Interest charge of 1% per month on the tax and penalties calculated for each month during which any amount of tax and penalties remain unpaid on the largest amount of tax and penalties that were due and unpaid at any time during that month.

The penalty for failing to make a prepayment of CIT by the due date is 10% of the CIT prepayment due, plus interest at 0.5% per month on the CIT prepayment and penalty outstanding.

## Significant developments

Changes to the Tax Code, effective 1 January 2011, have abolished the following taxes:

- 3% area development tax (local).
- 5% service tax (local).

The following two separate taxes were transferred into taxable objects of ecological (environmental) tax and state dues accordingly:

- Charge for issuance of the permission for transit of motor vehicles registered with Belarus within the territories of foreign countries.
- Duty for importation of ozone depleter to Belarus.

According to amendments to the Tax Code, effective 1 January 2011, ecological tax is abolished on the following objects:

- Production and/or import of plastic, glass containers, container-based paper, paperboard, and other products that could generate waste or do harm to the environment after the loss of their consumer characteristics.
- Manufacture and/or import of goods containing 50% or more of volatile organic compounds (paints and lacquer including enamel, polish, distemper paint, and products from related materials; patching material, assembly compounds, and other mastics; joint filler; and polygraphic paint).
- Import of goods packed in plastic, glass bottles, and containers from paper and paperboard, with certain exceptions.
- Oil refining, oil transportation via trunk pipelines, and oil products in transit.

In 2011, taxpayers may qualify for value-added tax (VAT) filing and payment on a quarterly basis regardless of the amount of sales revenue.

In 2011, sales of fixed and intangible assets below the book value, as well as further sales of goods acquired from third parties below acquisition costs, represent the value for VAT purposes.

Significant changes in corporate income tax (CIT) filing and payments procedures have been introduced. In 2011, a company will have to file a CIT return on an annual basis, whereas the tax should be paid by equal current instalments on a quarterly basis, based on two methods allowable for CIT base calculation.

A reduced 12% CIT is levied on dividends derived from local or foreign sources and on capital gains from disposal of shares or stocks in a Belarusian entity.

A company is entitled to deduct for CIT any business related costs if supported by proper documents, except for certain costs specifically restricted by the Tax Code.

In 2011, taxpayers are allowed to deduct representation expenses in full amount for CIT purposes, as well as interests on loans spent for acquisition of fixed, intangible, and other long-term assets.

## *Taxes on corporate income*

The standard CIT, also known as profits tax, rate is 24%.

Corporate income tax is charged on taxable income (net profits). Taxable income is generally determined as revenues from sales of goods, works, and services, excluding VAT, less production and business related costs, less other deductible expenses, plus net results of non-operating income and expenses.

Resident companies are taxed on their worldwide income.

### *Local taxes*
There are no local taxes due on net profits. The 3% local area development tax on net profits has been repealed as of 1 January 2011.

## *Corporate residence*

A company is resident in Belarus if it is incorporated in Belarus.

### *Permanent establishment (PE)*
According to local legislation, a non-resident company is deemed to have a permanent establishment (PE) in Belarus in cases where:

- it permanently carries out commercial activities in Belarus in whole or in part
- it carries out its activities through a dependent agent
- it uses a building site or construction, assembly, or equipment objects, or
- it provides services or performs works within a period of 90 days continuously or in the aggregate during a calendar year.

Double taxation treaties (DTT) may establish different rules of PE recognition. According to domestic law, where there is a DTT, the provisions of the treaty shall prevail.

Notwithstanding the activities which create a PE in Belarus, a non-resident company must be registered with the local tax authorities controlling the territory where activities are carried out, before starting a business in Belarus.

Any profits derived by a non-resident company via a PE in Belarus are subject to 24% CIT. Expenses incurred by a non-resident company either in Belarus or abroad that relate to a PE can be deducted, subject to local deductibility restrictions.

## Other taxes

### Value-added tax (VAT)
The standard VAT rate is 20%, whereas the preferential rate is 10%.

The 10% preferential rate applies on:

- local supplies of crop products (excluding floriculture, cultivation of ornamental plants), beekeeping, livestock (except for fur production), and fisheries locally produced and
- import and/or local supplies of certain food products and goods for children.

In general, local supplies of goods, works, and services made by a taxpayer performing its economic activities in Belarus, as well as the importation of goods, are subject to VAT.

Place of supply rules established by the Tax Code of Belarus should be followed to determine whether goods, works, and services are supplied locally, and therefore, subject to tax in Belarus.

When a non-resident company, which does not have a PE registered in Belarus, sells goods or provides works and services that are considered local supplies according to the place of supply rules, the VAT due on such supplies is paid by the purchaser registered with the local tax authorities from its own funds. This VAT could be deducted against output VAT, if any, or refunded from the budget in the established order.

Some exceptions apply to provision of construction and other similar works.

Exemptions with credit (zero-rated) include, but are not limited to, the following:

- Supply of goods exported outside of Belarus.
- Provision of works and services involving maintenance, loading, reloading, and any other similar works and services related to supply of exported goods.
- Transportation and any directly linked ancillary services related to the export or import of goods, including transit forwarding, as well as exported works for goods processing.
- Works and services related to repair (modernisation, conversion) of aircrafts (including engines and railway vehicles) and provided to non-resident companies or individuals.

In order to apply zero-rated VAT on goods carried out from Belarus, VAT payers must hold supporting documents as evidence that these goods were actually exported from Belarus to another country. Application of zero-rated VAT on respective works and services must be supported by the appropriate documents, which have to be provided to the local tax authorities where the taxpayer is registered for tax purposes.

Exemptions without credit include, but are not limited to, the following:

- Disposal of shares in resident legal entities.
- Supply of material rights for industrial property objects (e.g. inventions, utility models, industrial designs, breeding achievements, integrated circuits, know-how, trade names, trademarks, and service marks).
- Supply of securities, derivatives, and other similar financial instruments, certain limitations apply.

- Fiduciary management services related to funds and assets owned by an individual or an entity.
- Provision of all types of insurance and re-insurance (co-insurance) services rendered by insurance and re-insurance agents.
- Supply of medicines, medical equipment, instruments, medical products, as well as drugs, devices, equipment, veterinary products, under certain conditions.
- Personal or public health care services, under certain conditions.
- Social services supplied by institutions for children and young people care, nursing homes for the elderly and/or by care/guardianship institutions for disabled or by other non-profit entities.
- Supply of services in the field of culture and art, under certain conditions.
- Public services (services of barbers, baths, and showers; laundry and dry cleaning services; watch repairing; manufacturing and repair of clothing and footwear; repair and maintenance of household appliances; repair of personal and household goods).
- Services provided by religious organisations, if these services correspond to the purposes set out in their canons, statutes, and other documents.
- Funeral services, maintenance of the graves, tombstones, fences, and other objects associated with burial, as well as works on their production, under certain conditions.
- Supply of postage stamps, postcards, and envelopes marked, excise and control (identification) stamps for marking of goods at their nominal value, stamps which can be used as a confirmation of fees and charges payable in accordance with the legislation.
- Supplies of jewels as well as related services, under certain conditions.
- Retail trade of goods in duty-free shops, under certain conditions.
- Communication services rendered to individuals.
- Legal services supplied by certified lawyers.
- Research and development, design, and technological works and services, under certain conditions.
- Education and training services.
- Lotteries and gambling, under certain conditions.
- Financial services supplied by the banks, under certain conditions.
- Goods and equipment imported into Belarus, under certain conditions.

In order to apply exemptions, taxpayers should ensure that the services and goods supplied meet the appropriate VAT exemption requirements.

VAT returns shall be submitted on either a monthly or quarterly basis, by the 20th day of the month following the reporting period. VAT shall be paid on either a monthly or quarterly basis, no later than the 22nd day of the month following the reporting period.

### *State dues*

State dues are payable by legal entities that apply to the state institutions for the issuance of documents having legal force or other deeds, bring the cases before the courts for consideration, use bills of exchange in their activities, etc.

State dues include the following payments and duties:

- State fees (payable on suits, applications, appeals, and other documents that are submitted to or claimed from the courts or prosecution authorities, payable on applications for state registration of a legal entity, notary public services, real estate registration services, etc.).
- Patent fees (payable for registration and use of intellectual property).
- Stamp fees (payable on activities with bills of exchange).

- Consular fees (payable on the activities of state consular and diplomatic departments performed under the request of any applicant).

### *Offshore charge*
An offshore charge is levied upon the following activities of domestic entities:

- Any transfer of funds to an entity registered in an 'offshore jurisdiction', to a third party who is a creditor of that entity, or to the bank account of an offshore jurisdiction.
- In kind performance of obligation to an offshore entity, with some exceptions.
- Any transfer of material rights and obligations as a result of changes in commitment (cession or transfer of debt) between a domestic entity and an offshore entity.

According to Belarusian laws, an offshore jurisdiction is a territory which is included in the list of offshore territories established by the President, has a preferential tax treatment, and/or does not disclose the information related to financial transactions made by resident entities.

A list of 52 offshore territories has been published. With certain exceptions specified in the law, all payments to offshore companies or their branches for any kind of work or services, commodities, interest on loans, insurance premiums, guarantees, etc. are subject to an offshore charge, which is deductible for CIT purposes.

Tax relief is granted to: i) repayment of loans including interests on them, borrowed from entities located in offshore territories, ii) payments due under international marine cargoes and forwarding services, and iii) payments for bank operations under certain conditions.

An offshore charge is paid at a 15% rate and is deductible for CIT purposes.

The tax is reported and paid on a monthly basis, no later than the 20th day of the month following the reporting period.

### *Land tax*
Belarusian and foreign entities are subject to land tax collected by the local tax authorities with respect to land that they own or use in Belarus.

The tax base depends on plot location and purpose and is normally determined pursuant to cadastral value of a land plot.

Land for public roads and railways, as well as forest land, is exempt.

The tax is payable on an annual basis at the rates established by the Appendixes to the Tax Code of Belarus. Tax rates for agricultural plots vary from 97 Belarusian rubles (BYR) to BYR 264,354 per hectare. Tax rates on the land plots located in towns and rural areas range from 0.25% – 3% payable on the cadastral value.

Land tax is deductible, with some exceptions, for CIT purposes.

Land tax is reported annually, no later than 20 February of the next reporting year. Generally, the tax is paid quarterly by equal parts, before the 22nd of the second month of each quarter. Concerning payment terms for land tax due on agricultural plots, some exceptions can be applied.

### *Real estate tax (immovable property tax)*
Real estate tax is levied at the annual rate of 1% on the residual value of buildings, including separated premises, and constructions, late construction in progress (if construction works take longer than the deadline established in technical documentation), owned by legal entities.

The tax base of buildings and constructions located in the territory of Belarus and leased by individuals to legal entities will be the contract value of the leased real estate not less than its value established by the evaluation. Evaluation is conducted in the manner approved by the President of Belarus.

When the real estate subject to taxation is located in Belarus and leased by a resident company to a lessee, the lessee is considered a real estate taxpayer provided that the leased real estate is accounted for in its balance sheet. The lessee is also obliged to pay the tax due on real estate leased from foreign companies that are not considered as having a PE in Belarus.

The amount of tax, except the tax due on late construction in progress (if construction works take longer than the deadline established in technical documentation), is deductible for CIT purposes.

The tax reporting obligation must be fulfilled by a taxpayer before 20 January of the reporting year. The tax is paid on a quarterly basis by equal parts, no later than the 22nd day of the first month of each quarter.

### *Excise taxes*
Excise taxes are imposed on the following goods produced and sold in or imported to Belarus:

- Rectified ethyl alcohol and alcoholic drinks, including beer and wine.
- Alcohol-containing food products in the form of solutions, emulsions, suspensions, produced with the use of ethanol from all types of raw materials, other alcohol-containing products.
- Tobacco (excluding raw tobacco), including cigarettes, cigars, cigarillos, and smoking tobacco.
- Energetic products, including petrol, kerosene, diesel, and bio diesel, gasoline, fuel, marine fuel, oils for diesel engines, and engines with a carburettor and an injector.
- Liquefied hydro carbonated gas and compressed natural gas used as motor fuel.
- Vans and passenger cars, including those converted to cargo.

The tax rate depends on the type and quantity of goods. Rates of excise taxes are stipulated by the Appendixes to the Tax Code of Belarus. Compared to the rates applicable in 2010, rates of excise taxes effective in 2011 have increased to between 7% and 8%. Almost 240% growth of excise taxes on bio diesel and diesel fuel, corresponding STB 1658-2006 (EN 590:2004) appeared in 2011.

Excise taxes paid on the purchasing/importation of excisable goods to be used in manufacturing of goods or provision of works and services in Belarus are considered as deductible for CIT purposes, with certain exceptions.

The tax is reported and paid on a monthly basis, no later than the 20th day of the month following the reporting period.

### Customs payments

The Customs Union between Russia, Kazakhstan, and Belarus, with its unified trade regulations (effective as of 1 January 2010) and customs code (effective as of 6 July 2010), has significantly affected administering, customs clearance, and payment procedures to be followed by Belarus in 2011 in regards to exports and imports.

Indirect taxation issues within the Customs Union shall be administered in compliance with the International Agreement on Indirect Taxation and two Protocols signed by the Customs Union Member States.

The following charges are considered customs payments:

- Import duties.
- Export duties.
- Special anti-dumping and countervailing duties.
- VAT and excise taxes due upon importation of goods.
- Fees for customs processing/services.

Rates of import duties as well as description of goods subject to them are established by the Single Nomenclature of Goods of the Customs Union (HS Nomenclature) and Single Customs Tariff of the Customs Union.

However, for certain goods specified in Appendix 5 of HS Nomenclature, Belarus is allowed to apply specific rates of import duties different from the rates set in HS Nomenclature.

Export duties are not levied on exported goods, with the following exceptions: certain soft oil; light distillates; fuels and gasoline; wasted petroleum products; propane, butane, ethylene, propylene, and other liquefied gases; petroleum coke; petroleum bitumen, benzol, toluene, xylenes; etc. According to the Customs Union regulations, rates of export duties in regards to mentioned goods shall be established by Belarusian Government and shall be equal to the rates applied in Russia.

Import and export duties are calculated on the customs value of the goods, which is defined pursuant to the price of transaction method established by the Customs Union regulations. Generally, the following components are considered when calculating the customs value of imported goods:

- Contract price of the goods.
- Rebates and discounts provided by a supplier, under certain conditions.
- Transportation related expenses to the border of the Customs Union (i.e. Belarusian border).
- Insurance premiums.
- Cost of containers and other packaging.
- Part of direct or indirect income to be derived by the seller from future resale, transfer, or other use of imported goods.

Special, anti-dumping, and countervailing duties could be imposed as a measure to protect economic interests of Belarus.

Tax base for VAT calculation due on imported goods includes the total amount of customs value, import duty, and excise tax paid, if any.

Generally, the taxpayer is required to pay customs duties before the customs clearance of the appropriate goods; however, under certain conditions, a taxpayer may be provided with an extension of payment deadlines or allowed to pay only part of customs duties. It is also possible to pay customs duties in advance.

In 2011, electronic customs filing has been introduced. Electronic customs declaration is currently available for customs clearance of the goods declared in customs regime of temporary export, re-export (exports) as well as free circulation (imports).

### *Ecological (environmental) tax*

Ecological (environmental) tax is imposed on pollutants discharged into the environment, storage and disposal of industrial wastes, wastewater discharges, and on importation of ozone-depleting substances, including those contained in the products.

The following are excluded from taxation, including but not limited to:

- Pollutants discharged into the air by mobile sources (e.g. cars, vehicles).
- Transit of ozone-depleting substances, including those contained in the products through the territory of Belarus.

The tax base of environmental tax is the actual quantity of respective pollutants used/discharged. Tax rates of environmental tax are stipulated by the Tax Code of Belarus.

Environmental tax paid, with certain exceptions, is treated as deductible for CIT purposes.

The tax is reported and paid on a quarterly basis. Certain exemptions are provided to legal entities effecting tax payments on the basis of established annual limits. These taxpayers will have to file an annual tax return and provide it to a tax authority no later than 20 April of the calendar year.

### *Tax on natural resources*

A tax on natural resources is payable on the actual value of extracted natural resources. It depends on the kind and quantity of extracted resources.

Tax rates are established by the Tax Code of Belarus and are applied on natural resources that have been extracted by a taxpayer within established limits. Natural resources extracted over established limits are taxed by a standard tax rate multiplied by ten.

Tax paid on resources extracted within established limits, or if the limits are not established (for certain type of resources), is treated as deductible for CIT purposes.

The tax is reported and paid on a quarterly basis. Those taxpayers who calculate the tax on the basis of annual limits for extraction fulfil tax reporting and payment liability on an annual basis.

### *Local tax on providers (suppliers)*

The local tax on providers is levied on legal entities engaged in gathering/purchasing of wild plants (or parts thereof), mushrooms, and technical and medical raw materials of floral origin for their further industrial processing or resale.

Tax base is the cost of gathered items defined on the basis of procurement (purchasing) prices.

Tax rates do not exceed 5%. Tax on providers is treated as deductible for CIT purposes.

The tax is reported and paid on a quarterly basis.

## *Branch income*

Non-resident legal entities pay tax on profits attributable to a PE. A PE is broadly defined as “a branch, division, office, bureau, agency, or any other place through which a foreign legal entity regularly carries out its business activities in Belarus”. Belarus’s various DTTs may define a PE differently, which could in some cases result in tax relief. Conducting business through an agent may also create a taxable PE in Belarus.

### *Taxation of a PE*

A PE’s profits are computed on substantially the same basis as Belarusian legal entities, including the composition of tax deductible expenses. The Tax Code provides for the deductibility of expenses incurred abroad by a head office with respect to its PE in Belarus (including a reasonable allocation of administration costs).

To calculate a PE’s taxable income, a non-resident company is required to provide a tax authority with financial documents (i.e. accounting records, income statement, general ledger accounts, invoices, statements of services/works fulfilment, etc.) supporting the amount of revenue earned and expenses incurred. Generally, a PE’s taxable income is defined on a revenue less costs basis. Documentary support of each revenue and/or costs item is required.

When it is not possible to calculate a profit attributable to a PE, this profit can be calculated by the tax authority using one of the following methods:

- A profit sharing method (i.e. gross foreign profit is allocated to PE by using one of the following coefficients related to a PE: working time costs, expenses incurred, services/works performed).
- Benchmarking method (tax authority performs benchmarking study by collecting the respective ratios/indexes of other entities engaged in similar activities).

Head office expenses related to a PE are considered for calculation of taxable income in Belarus and require confirmation of an independent foreign auditor. Splitting of expenses is highly recommended in the audited financial statements of the parent company (head office).

If a non-resident company is deemed to have a PE in Belarus, it will have to register with a local tax authority and declare related profit. Profit related to a PE will be taxed by CIT at a rate of 24%.

Non-resident legal entities operating in Belarus through a PE are required to follow the filing and payment schedules established for Belarusian legal entities, although they shall submit CIT returns on a quarterly basis within established reporting deadlines and an annual tax report by 15 April of the following year.

### *Representative office*

Non-resident legal entities are also allowed to operate in Belarus via a representative office or to set up a resident legal entity.

A representative office of a non-resident company is defined as the structural subunit registered with the ministry of foreign affairs, which is entitled either to engage in commercial activities in Belarus or not, conclude contracts, and undertake obligations according to the power of attorney issued to the management official of the branch by its head company (founder).

The representative office is not considered a legal person.

A representative office conducting commercial activities is taxed in the same manner as a PE or as a local resident company, with some exceptions.

A non-commercial representative office pays taxes due on its primary and auxiliary activities, such as real estate tax (with some exceptions), customs duties, input VAT, personal income tax, social security contributions due on employment of individuals, etc.

## *Income determination*

### *Exemptions from taxable income*

The following types of income are exempt from CIT:

- 'Target financing' received from the state or municipal budget. The taxpayer is required to hold separate accounting records of income and expenses derived and incurred within 'target financing'.
- Amounts payable to a shareholder, whether in cash or in kind, not in excess of its contribution to the statutory capital of a legal entity in case of:
  - its liquidation
  - a shareholder's withdrawal from a legal entity, or
  - if the shares are purchased by a legal entity from its shareholder.
- Payments to a shareholder in the value of its shares or as a result of an increase in their nominal value made by the legal entity's sources, as long as such payments do not change the percentage of participation of either shareholder.
- Goods (works, services), material rights, and monetary means granted:
  - to the successors by a legal entity in case of its restructuring
  - as an inter-company transfer pursuant to corporate decision
  - to taxpayers engaged in crop production, animal husbandry, fish farming, and beekeeping, provided that this income is spent for the appropriate activities, or
  - as a foreign gratuitous help on conditions stipulated by the President.
- Monetary means or assets received by a taxpayer from its shareholders as their contributions to the statutory capital, not in excess of amounts provided by the statutory documents.
- Dividends received by venture companies.

### *Inventory valuation*

Under domestic accounting legislation, stock used in the production and included in the cost of produced goods may be generally valued by the following methods:

- Cost of each unit.
- Average cost.
- Weighted-average cost.
- Last in first out (LIFO).
- First in first out (FIFO).

The inventory valuation method used for CIT purposes must be the same method established by the taxpayer's accounting policy.

### *Capital gains*

Capital gains from disposal of shares/stocks in a Belarusian entity are taxed as part of the taxpayer's profits and are subject to 12% CIT. No tax exemptions are provided by the Tax Code for the capital gains taxation.

### *Dividend income*

Dividends distributed by a resident company to another resident company are subject to 12% CIT, which is withheld by a paying company.

The Tax Code provides no exemptions for taxation of inter-company dividends.

Dividends distributed by a foreign entity represent non-operating income of a receiving Belarus entity and are subject to 12% CIT payable by the receiving entity in Belarus, irrespective of the fact that the foreign entity has paid the withholding tax (WHT) on dividends distributed.

### *Foreign income*

Foreign income of Belarusian resident legal entities is taxed, except for dividends, as ordinary business income at a standard 24% CIT rate.

## *Deductions*

Deductible expenses include all the usual costs that an entity actually incurs for the purpose of earning income or receiving economic benefit, unless the Tax Code of Belarus or presidential regulations provide otherwise.

Limited deductible expenses include the following:

- Depreciation of fixed assets. For tax purposes, assets cannot be depreciated faster than indicated in the relevant tax and accounting legislation *(see below)*.
- Modernisation and reconstruction of fixed assets. The value of modernisation or reconstruction is included in the acquisition costs.
- Business trips.
- Representation.
- Management fees payable to outsourcing companies, with restrictions.
- Natural losses, with certain exceptions.
- Cost of fuel and energy resources, with restrictions established for certain entities.
- Environmental tax and tax on natural resources, with restrictions.
- Bad debts, only if proved and specific criteria are met.
- Social insurance contributions and expenses for the benefit of employees, with restrictions.
- Membership fees, contributions, and premiums, with restrictions.
- Premiums on certain types of voluntary insurance, with restrictions.

Non-deductible expenses include the following:

- Expenses on provision or acquisition of works and services not related to the taxpayer's business activities.
- Construction, maintenance, and other works, including all types of repair of assets that are not used for the purpose of earning income or receiving economic benefit.

- Default interest (forfeit), fines, and other sanctions paid to the budget.
- Certification related expenses (i.e. testing (analysis) of samples of goods subject to mandatory certification), if the results are negative.
- Dividends paid and similar type of payments.
- Contributions made to the authorised share capital.
- Expenses incurred on purchase and/or creation of depreciable assets.
- Depreciation for tangible and intangible assets not used in business, as well as for tangible assets that are not in operation.
- Cost of assets or material rights transferred as advance or a pledge to a third party.
- Expenses covered by reserves for future expenses created by a taxpayer in the prescribed manner.
- Interest on overdue loans, as well as on loans related to the acquisition of tangible and intangible assets, other long-term assets.
- Other expenses not related to the deriving of income and not attributed to operating activities of the entity as well as expenses that are not considered as allowable deductions under the Tax Code of Belarus.

### *Depreciation*

Assets may be depreciated using the directly proportional (straight-line) depreciation method, indirect disproportionate depreciation method, production depreciation method, or a declining-balance depreciation method. Depreciation may not exceed maximum rates established by the law.

Almost all types of fixed assets (buildings, premises, equipment, vehicles) are depreciated for tax purposes in accordance with the established procedures. Land plots are not depreciated. There are many different depreciation rates established for different types of fixed assets. Generally, fixed assets may be divided into five basic groups as follows:

| Group of assets | Description of the assets | Annual depreciation rate (%) |
|---|---|---|
| 1 | Buildings and constructions, premises | 1 and 2 |
| 2 | Vehicles and equipment | 10 |
| 3 | Cars and vehicles | 12.5 |
| 4 | Inventories (furniture, tools, etc.) | 10 |
| 5 | Computers and other related devices | 20 |

Fixed assets are obligatorily re-valued one time per year because of BYR inflation.

### *Goodwill*

Goodwill and personnel experience cannot be recognized as intangible assets for CIT purposes.

### *Charitable contributions*

Amounts not exceeding 5% of an entity's gross profit granted to the health, education, social welfare, culture, sports state institutions, or spent for acquisition of goods, works, or services for the benefit of the named institutions, are deductible.

### *Taxes*
Generally, the following taxes, dues, and other compulsory charges to the budget are deductible for CIT purposes:

- Excise taxes paid at purchasing/importation of excisable goods to be used in manufacturing of goods or provision of works and services in Belarus, with some exceptions.
- Environmental tax, with certain exceptions.
- Real estate tax, except the tax due on late construction in progress.
- Land tax, with some exceptions.
- Tax on natural resources, with some exceptions.
- State dues.
- Offshore charge.
- Tax on providers.
- Payments for social and other mandatory security.

The following taxes shall not be deducted for CIT purposes:

- VAT paid, with certain exceptions *(see below)*.
- CIT.

VAT can be treated as deductible for CIT purposes only if acquired goods, works, or services are used for production or sale of goods, works, or services that are VAT exempt.

### *Net operating losses*
Pursuant to local tax rules, net operating losses shall not be carried forward nor carried back. They must be fully recognised in the year incurred.

### *Payments to foreign affiliates*
Payments to foreign affiliates of a Belarusian resident legal entity in amounts of financing aimed to cover ongoing costs thereof are deductible for CIT purposes in Belarus.

## *Group taxation*

Currently, group taxation legislation and regimes are not available in Belarus. Each Belarusian entity is regarded as a separate taxpayer and may not deduct tax losses of any other group entity. Belarus Tax Code does not allow the deduction of foreign losses from domestic taxable income, or domestic losses from foreign taxable income.

### *Transfer pricing*
No transfer pricing rules exist in Belarus.

However, there is a mechanism to control transfer pricing provided by the DTTs applicable for Belarus. When interests under the loan agreement between related parties exceeds the arm's-length rate/basis (the amount which will be agreed upon between independent parties under normal business circumstances), a 5% rate of WHT (provided by the treaty) will be charged on the arm's length interest charge. Excess amounts, if any, will be taxed by WHT at a 10% rate.

### *Thin capitalisation*
No thin capitalisation rules exist in Belarus.

## Tax credits and incentives

### Special tax treatments

The Belarusian Tax Code provides a more favourable tax environment for particular resident legal entities. Special tax treatments are available for certain taxpayers depending on their location, amount of revenue, number of individuals employed, types of business, etc. Special tax treatments include, but are not limited to, the following:

- Simplified taxation.
- Tax on farmers and other producers of agricultural products.
- Tax on gambling business.
- Tax on lotteries.
- Tax on electronic interactive games.
- Free economic zones.

In cases where activities fulfil the criteria of a special tax treatment, the taxpayer is not permitted to use the general taxation regime with regard to income deriving from those activities, with certain exceptions. Concerning simplified taxation and tax on farmers, the taxpayer is entitled to determine whether to apply such treatment or not.

### Incentive for employing disabled persons

Entities employing disabled persons, if their number exceeds 50% of the average number of employees for the reporting period, are exempt from CIT due on taxable profit derived from production activity.

### Exemption of CIT on profits derived from various activities

- Profit of entities engaged in baby food production is exempt from CIT.
- Profit derived by insurance companies from investments of insurance reserves under the contracts of voluntary life insurance is exempt from CIT.
- Entities engaged in manufacturing of prosthetic and orthopaedic devices (including dental prostheses), provision of rehabilitation, and disability services are exempt from CIT due on profit derived from sales of these items.
- Entities deriving profit from sales of plants (except for flowers, ornamental plants), livestock (except for farming), fish farming, and beekeeping, provided the entities raise them, are exempt from CIT.

### Tax holidays

Profit from the services provided by hotels located at tourist sites established by the President of Belarus is exempt from CIT for three years starting from the commencement of its activities, with certain exceptions.

Profit derived by motels, hotels, campgrounds, maintenance stations, objects of trade and catering, cleaning, located on the roadsides of national highways is exempt from CIT for five years starting from the day when the permission for such activities was received.

### Capital investment tax incentive

Profit is excluded from CIT if it is spent for financing of capital investments for production purposes as well as for the repayment of bank loans received and used for this purpose. Capital investments are defined as any purchase of fixed assets or construction in progress, any capital construction in the form of new construction or creation of fixed assets, or any reconstruction and modernisation of fixed assets or construction in progress. This tax relief is provided if a taxpayer meets certain established requirements.

### *Scientific and Technological Association incentive*

Entities that are members of the Scientific and Technological Association established by Belarusian State University, in accordance with legislation, are entitled to apply a 5% CIT rate on their profit derived from sales of information technology and provision of information technology development services.

### *Incentives for the production of high-technology and laser-optical equipment*

High-technology producers included in the special list approved by the President of Belarus are taxed at 12% CIT with regard to the profit derived from sales of their own high-tech goods, works, and services, under certain conditions.

Entities engaged in production of laser-optical equipment, accounting for at least 50% of the entity's total production, can benefit from a reduced CIT rate of 10% under certain conditions.

### *Free economic zones*

Entities which are registered in Belarusian Free Economic Zones are exempt from CIT in relation to goods, works, and services of their own production for five years starting from the date when the profits were declared. After expiration of this term, the CIT rate is 12%.

Moreover, residents of Free Economic Zones are granted, under certain conditions, a partial VAT relief and a relief for real estate tax on buildings and constructions located in Free Economic Zone.

### *Foreign tax credit*

If a Belarusian legal entity derives income subject to taxation abroad, the tax paid abroad may be deducted from the calculated CIT.

In accordance with the Tax Code, the amount deducted from CIT may not exceed that part of the tax calculated in Belarus that is attributed to the income received in a foreign jurisdiction. If there is a valid DTT with the country in question, the provisions of the treaty regarding avoidance of double taxation shall apply.

## *Withholding taxes*

### *Domestic legislation*

The following income of a non-resident entity in Belarus that is not derived through a PE is deemed to be Belarusian-source income and is subject to WHT at the rates provided:

| Income | WHT (%) |
|---|---|
| Freight charges, (including demurrage) and freight-forwarding services (excluding freight charges for marine transportation and forwarding services) | 6 |
| Interest on any type of debt obligations including securities | 10 |
| Royalties | 15 |
| Dividends and other similar income | 12 |
| Penalties, fines, and other sanctions received for breach of contractual liabilities | 15 |
| Income derived from sports, entertainment activities, or performers' activities | 15 |

| Income | WHT (%) |
|---|---|
| Income derived from innovative, design, research and development activities, design of technological documentation engineering design, and other similar works and services | 15 |
| Income from provision of guarantees | 15 |
| Income from provision of disk space and/or communication channel for placing information on the server and services for its maintenance | 15 |
| Proceeds from the sale, transfer (with title), or lease of immovable property located in Belarus | 15 |
| Income derived by a foreign entity from the sale of an enterprise as a complex of assets located in Belarus | 15 |
| Capital gains (income from the sale of shares/stocks) in local companies | 12 |
| Income from the sale of securities (except shares) | 15 |
| Income derived from provision of works and services | 15 |

In calculation of WHT due on certain types of income, a taxpayer is permitted to deduct related expenses following the rules specified by the Tax Code.

Generally, the tax is withheld and paid to the budget by a local entity, an individual entrepreneur, a branch, or a PE of a foreign company. When certain types of Belarusian-source income is received (e.g. capital gains, sale, transfer of title of ownership or lease of immovable property, provision of licenses for software, and other copyright objects), a WHT shall be paid directly by a foreign entity.

Currently, Belarus has approximately 60 DTTs with foreign countries. Where a treaty for the avoidance of double taxation with the country in question contradicts the local tax regulations, the treaty provisions prevail.

Reduction of or an exemption from WHT under a DTT may be obtained if a special residence certificate is completed and provided to the tax authorities before the payment is made.

If the payment that is covered by the DTT has already been made and WHT at the local rate was withheld, it is possible to obtain an appropriate refund (reduction) by completing a special claim for a refund. The claim for a refund must be filed with additional documents, such as a residence certificate, copies of the contract, and other documents related to the payment.

## Tax administration

### Returns

A CIT return shall be submitted on an annual basis, whether a company has taxable income or not, by the 20th day of March following the reporting year.

The above CIT reporting rule is also applicable on PEs of foreign companies as well as non-commercial representative offices. Since 2011, an annual CIT return filed by non-commercial representative offices does not have to be audited by a Belarusian certified auditor.

CIT withheld on inter-company dividends must be reported by a tax withholding entity no later than the 20th day of the month following the month in which the dividends were accrued.

A tax-withholding entity must submit a WHT return to the tax authorities no later than the 20th day of the month following the month when the payment was made.

### *Payment of tax*

CIT must be paid via equal installments, on a quarterly basis, within the following deadlines:

- In 2011: before 22 March, 22 June, 22 September, and 22 December.
- Starting from 2012: before 22 April, 22 July, 22 October, and 22 January.

Remaining CIT, if any, shall be paid not later than 22 March following the expired tax period. The above deadlines shall also be followed by PEs of foreign entities.

CIT on inter-company dividends shall be paid no later than the 22nd day of the month following the month when dividends were paid.

WHT is to be calculated, withheld, and paid by a Belarusian company or a PE of a non-resident company no later than the 22nd day of the month following the month when the payment was made.

## Significant developments

### Dividends-received deduction (DRD): Revised conditions

As of 1 January 2010, Belgian tax-resident companies (or Belgian branches) must have, at the moment of distribution, a participation of at least 10% or an acquisition value of at least 2,500,000 euros (EUR) in the distributing company in order to deduct 95% of dividends received from qualifying holdings from their net taxable income. Prior to 1 January 2010, the minimum acquisition value was EUR 1,200,000.

In addition, the exemption from these conditions that was provided for credit institutions, insurance companies, and broker-dealers companies has been abolished as of 1 January 2010.

Finally, due to European Court of Justice (ECJ) jurisprudence, it is no longer required that the participations are booked as financial fixed assets in order for the dividend income they generate to benefit the DRD.

### Payments made to tax havens

As of 1 January 2010, Belgian companies (and Belgian branches) that make direct or indirect payments to recipients established in tax havens are obliged to declare them if they are equal to or exceed EUR 100,000 during the tax year. The reporting has to be made on a special form to be attached to the CIT return.

In the event of non-reporting, the payments will be disallowed expenses for CIT purposes. Where the payments have been reported duly and timely, their tax deductibility will be subject to the ability of the taxpayer to prove that (i) said payments were made as part of genuine, proper transactions and (ii) they were not made to an entity under an artificial construction.

*For more information about tax havens, see Payments to foreign affiliates in the Deductions section.*

### Notional interest deduction (NID)

Belgian companies (and Belgian branches) can claim tax relief for their cost of capital by deducting notional (deemed) interest, which is calculated on their adjusted accounting net equity. The NID rate for a given tax year is based on the ten-year government bond interest rate of the calendar year, two years prior to the tax year (e.g. for tax year 2012, reference is made to 2010 government bonds).

For budgetary reasons, the NID rate for tax year 2011 (i.e. financial years ending between 31 December 2010 inclusive and 30 December 2011 inclusive) has been capped at 3.8% (4.3% for small and medium-sized enterprises (SMEs), *see the Tax* *incentives section for definition*). For tax year 2012 (i.e. financial years ending between 31 December 2011 inclusive and 30 December 2012 inclusive), the NID rate is 3.425% (3.925% for SMEs).

### *Automobile costs*

As of 1 January 2010, rules related to the tax deductibility of automobile costs in the hands of Belgian companies (and Belgian branches) have been changed to introduce a system where the deductibility rate varies in a range between 50% and 120% of the automobile costs, depending on the CO2 emission of the automobile. Prior to 1 January 2010, the deductibility ranged from 60% to 90%.

Moreover, the deduction for fuel costs has been limited to 75% as of 1 January 2010.

Finally, the rules for determining the benefit in-kind arising from the private use of company automobiles have been amended. As of 1 January 2010, the benefit in-kind is calculated on the basis of a coefficient related to the CO2 emission of the automobile. Prior to 1 January 2010, this was determined on the basis of a fixed number of privately-driven kilometres (in principle 5,000 or 7,500) multiplied by a coefficient related to the fiscal horsepower of the automobile.

## *Taxes on corporate income*

### *Corporate income tax (CIT) rate*

In general, the tax base for CIT purposes is determined on an accrual basis and consists of worldwide income less allowed deductions. It is assumed that all income received by a company is, in principle, business income. The income tax base is based on the Belgian GAAP financial statements of the company.

#### General rate

CIT is levied at a rate of 33% plus a 3% crisis tax, which is a surtax, implying an effective rate of 33.99%. This rate applies to both Belgian companies (subject to Belgian CIT) and Belgian branches of foreign companies (subject to Belgian non-resident income tax).

#### Reduced rates

A progressive scale of reduced rates applies to taxpayers with lower amounts of taxable income. If the taxable income is lower than EUR 322,500, the following rates apply (including the 3% crisis tax):

| Taxable income (EUR) | Rate (%) |
|---|---|
| 0 to 25,000 | 24.98 |
| 25,001 to 90,000 | 31.93 |
| 90,001 to 322,500 | 35.54 |

Even if their taxable income does not exceed the aforesaid ceilings, certain companies are excluded from the reduced rate and always subject to the normal CIT rate. These companies include:

- Finance companies, which are defined as companies that own participations whose investment value exceeds, at the closure date of the annual accounts, 50% of the paid-up capital, possibly revalued, or 50% of the paid-up capital plus taxable

reserves and recorded (taxable or tax free) capital gains of the companies that want to benefit from the reduced rates. Participations that exceed 75% of the paid-up capital of the companies held are not taken into account for the purpose of this computation.
- Companies that are owned 50% or more by one single company.
- Companies that distribute dividends exceeding 13% of their paid-up capital at the beginning of the taxable period.
- Companies that, per taxable period, do not attribute a tax deductible remuneration of at least EUR 36,000 to at least one key individual (known as dirigeant d'entreprise/bedrijfsleider).
- Collective investment companies (e.g. BEVEK (Beleggingsvennootschap met veranderlijk kapitaal)/SICAV (Société d'investissment à capital variable), BEVAK (Beleggingsvennootschap met vast kapitaal)/SICAF (Société d'investissmenet à capital fixe), VBS (Vennootschap voor belegging in schuldvorderingen)/SIC (Société d'investissment en créances)), organisations for financing pensions, and recognised coordination centres.

### *Surcharge*

A surcharge is due on the final CIT amount upon assessment (including the crisis surtax). The surcharge can be avoided if sufficient advance tax payments are made *(see Payment of tax in the Tax administration section for more information)*. For tax year 2012 (i.e. financial years ending between 31 December 2011 inclusive and 30 December 2012 inclusive), the surcharge is 2.25%.

### *Secret commissions tax*

A special assessment of 309% (300% plus 3% crisis tax) is applicable to so called 'secret commissions', which are any expense of which the beneficiary is not identified properly by means of proper forms timely filed with the Belgian tax authorities. These expenses consist of:

- Commission, brokerage, trade, or other rebates, occasional or non-occasional fees, bonuses, or benefits in-kind forming professional income for the beneficiaries.
- Remuneration or similar indemnities paid to personnel members or former personnel members of the paying company.
- Lump-sum allowances granted to personnel members in order to cover costs proper to the paying company.

The secret commissions tax is not applicable if the payer demonstrates that the payments have been reported in the beneficiary's Belgian tax return. The 309% rate is also applicable to hidden profits that are not part of the property of the company, with the exception of certain specific hidden reserves. The special assessment of 309% and the expenses themselves are, however, fully deductible for CIT purposes.

## *Corporate residence*

A company is considered to be a resident of Belgium for tax purposes if it has its registered office, its principal place of business, or its seat of management in Belgium. The seat of management has been defined by Belgian case law as the place from where directing impulsions emanate or the place where the company's effective management and central administration abide, meaning the place where the corporate decision-making process actually takes place.

## Other taxes

### Value added tax (VAT)

**Scope of VAT**

The following transactions are subject to VAT in Belgium:

- The supply of goods effected for consideration by a taxable person acting as such.
- The supply of services effected for consideration by a taxable person acting as such.
- The importation of goods.
- Intra-Community acquisition of goods for consideration by a taxable person acting as such or by a non-taxable legal person.

**Intra-community supply and intra-community acquisitions**

An intra-community supply of goods is a supply of goods whereby the goods are moving from one EU member state to another EU member state. In the member state of departure of the goods, the goods can be, under certain conditions, VAT exempt. As a result, the intra-community acquisition of the goods (i.e. the arrival of the goods in the other member state) will be taxable.

**Standard and other VAT rates**

The standard VAT rate is 21%. This rate applies to all goods and services not qualifying for one of the reduced VAT rates.

The following supplies of goods and services have a 12% VAT rate:

- Restaurant and catering services, excluding beverages.
- Phytopharmaceutical products.
- Pay television.
- (Inner) tubes.
- Certain combustible material.

The following supplies of goods and services have a 6% VAT rate:

- Works on immovable property (limited in time and with strict conditions).
- Basic necessities, such as food and pharmaceuticals.
- Some printed materials.
- Transport services of persons.
- Hotels and camping.
- Admission to cultural, sporting, and entertainment venues.

The following supplies of goods and services are VAT exempt with credit ('zero-rated'):

- Exports and certain related services.
- Intra-community supplies of goods.
- Certain transactions on goods placed in a customs or VAT warehouse.
- Cross-border passenger transportation by ship or aircraft.
- Supplies to diplomats and international organisations.
- Certain supplies of goods and services to certain vessels and aircrafts mainly involved in international passenger transport.

The following supplies of goods and services are VAT exempt without credit:

- Healthcare services.
- Social services.

- Education services.
- Sport services.
- Cultural services.
- Services of lawyers and notaries.
- Banking services.
- Interest charges.
- Financial services.
- Insurance services.
- Land and real estate sales.
- Property leasing and letting.

It should be noted that specific conditions may apply to the above two categories.

**VAT grouping**

VAT grouping came into effect in Belgium on 1 April 2007. Under a VAT group, independent legal persons are treated as one single taxable person for VAT purposes if they are closely linked financially, economically, and organisationally. Hence, for VAT purposes, all supplies of goods and services to or by the group members are deemed to be made to or by the group itself.

The application of a VAT group has, amongst other, the following consequences:

- No issuance of 'inter-company' invoices between companies in the VAT group.
- No charging of VAT between companies in the VAT group.
- Filing of one VAT return for all companies in the VAT group.
- No risks of incorrect VAT treatment of transactions between companies in the VAT group.
- No cascade of the limitation of the right to deduct VAT when on charging costs to companies in the VAT group.

### *Registration duties*

Purchases and transfers of real estate located in Belgium, including buildings (except new buildings, which are subject to VAT as described above), are subject to registration duty at the rate of 12.5% of the higher of transfer price or fair market value (except in the Flemish Region, where the applicable rate is 10%).

No registration duty is due upon a capital contribution; only a fixed fee of EUR 25 is due.

### *Stamp duties*

Stamp duties are due on transactions relating to public funds that are concluded or executed in Belgium, irrespective of their (Belgian or foreign) origin, to the extent that a professional intermediary intervenes in these transactions. Exemptions for non-residents and others are available.

## *Branch income*

Branch profits are subject to the normal tax rate for Belgian corporations of 33.99% plus the possible surcharge for absence/insufficiency of advance payments *(see the Taxes on corporate income section).* Transfers of branch profits to the head office abroad do not give rise to further taxation in Belgium. Branches can benefit from the reduced CIT rates under specific conditions *(see the Taxes on corporate income section).* The specifications for the applicable conditions include:

- To determine whether the EUR 322,500 ceiling of taxable income is exceeded and whether the 'EUR 36,000 remuneration' requirement is satisfied, reference needs to be made to the branch's results only.
- All other conditions must be satisfied at the level of the foreign company, taken as a whole.

Capital gains realised on real estate located in Belgium by non-resident companies are subject to a professional withholding tax (WHT) at the normal CIT rate of 33.99%. The professional WHT is in fact an advance payment of the final Belgian non-resident CIT and can be offset against it. Any balance is refundable.

In general, taxable basis is the difference between the profits actually realised and the tax deductible costs actually incurred in the hands of the Belgian branch as determined from the separate set of accounts of the Belgian branch. Please note, however, that no legal requirement exists to keep a separate set of accounts in the hands of the permanent establishment (PE), in case no legal branch is deemed to exist in Belgium.

Should no separate set of accounts be kept, the taxable basis in the hands of the Belgian branch, in principle, will be determined on the basis of article 182, §1, 3°, a) of the Royal Decree implementing the Belgian Income Tax Code. As a result, the yearly taxable basis will be determined on 10% of the gross turnover realised in Belgium with a minimum of EUR 7,000 per employee and an absolute minimum of EUR 19,000. Note that the European Court of Justice has ruled that this 'minimum taxable basis' is in violation with the freedom of establishment. It is still applied in practice, though. Note that such determination of the taxable basis is often formalised in a written agreement with the local Belgian tax inspector without, however, deviating from the tax law criteria as mentioned.

## *Income determination*

### *Inventory valuation*

Belgian accounting law provides for the following four methods of inventory valuation: the method based on the individualisation of the price of each item, the method of the weighted average prices, the last in first out (LIFO) method, and the first in first out (FIFO) method. All of these methods are accepted for tax purposes.

### *Capital gains*

Capital gains are subject to the normal CIT rate. For tax purposes, a capital gain is defined as the positive difference between the sale price less the costs related to the disposal of the asset and the original cost of the acquisition or investment less the depreciations and write-offs which have been deducted for tax purposes.

Capital gains realised on tangible fixed assets and intangible assets can be subject to a deferred and spread taxation regime, provided that the following conditions are cumulatively met:

- The assets realised have been held by the company for more than five years, and depreciations have been claimed on them for tax purposes.
- The proceeds of the transfer are reinvested fully in tangible or intangible assets subject to depreciation in Belgium within three years (or five years in the case of reinvestments in buildings, vessels, or aircrafts).

If the above conditions are met, the taxation of the net capital gain is spread over the depreciation period allowed for tax purposes of the asset that is acquired to fulfil the reinvestment obligation. Deferred and spread taxation occurs at the normal CIT rate.

Net capital gains realised on shares are 100% tax exempt if dividends from such shares would meet the 'taxation conditions' under the dividends-received deduction regime (*see the Deductions section for more information*). The 'minimum participation condition' provided under that regime needs not be satisfied for capital gain exemption.

### *Dividend income*

Dividends received by a Belgian company are first included in its taxable basis on a gross basis when the dividends are received from a Belgian company or on a net basis (i.e. after deduction of the foreign WHT) when they are received from a foreign company.

Provided certain conditions are met, 95% of the dividend income can be offset by a dividends-received deduction (DRD). *See the Deductions section for more information.*

### *Bonus shares – stock dividends*

Distribution of bonus shares to shareholders in compensation for an increase of the share capital by incorporation of existing reserves is, in principle, tax free. The situation may be different if the shareholder has the choice between a cash or stock dividend.

### *Foreign income*

A Belgian resident company is subject to CIT on its worldwide income, and foreign source profits not exempt from taxation by virtue of a double tax treaty *(see the treaty list in the Withholding taxes section)* are taxable at the normal CIT rate in Belgium (i.e. 33.99%).

A foreign tax credit may be available for foreign royalty income and foreign interest income. *See the Tax credits and incentives section for more information.*

Undistributed income of subsidiaries, whether or not they are foreign, is not subject to any Belgian income tax (i.e. no controlled foreign company (CFC) rules).

## *Deductions*

As a general rule, expenses are tax deductible in Belgium provided that they are incurred in order to maintain or to increase taxable income, they relate to the taxpayer's business activity, they are incurred or have accrued during the taxable period concerned, and that evidence of the reality and the amount of such expenses is provided by the taxpayer.

### *Provisions and bad debt reserves*

Provisions and bad debt reserves are tax deductible provided that:

- they are set up to cover clearly identified losses and charges (i.e. not to cover 'general' risks that have been rendered probable by events) which took place during the taxable period concerned
- they are booked at the end of the financial year in one or more separate accounts on the balance sheet
- they are reported on a specific form enclosed with the tax return, and
- they relate to losses and charges that are deductible for Belgian tax purposes.

### *Interest expenses*

Interest paid is not tax deductible to the extent that it exceeds an amount corresponding to the market rate, taking into account factual circumstances proper to the appraisal of the risk linked to the operation and particularly the financial situation of the debtor and the duration of the loan. The latter test, however, is not applied with respect to interest paid to a Belgian-based financial institution.

### *Dividends-received deduction (DRD)*

A DRD of 95% of dividend income can be applied under certain conditions *(see below)*. Any unused portion of the DRD from dividends received from a European Economic Area (EEA) subsidiary or a subsidiary from a country with which Belgium has concluded a double tax treaty with a non-discrimination clause on dividends can be carried forward to future tax years. The possibility of carrying forward the unused portion of DRD from qualifying non-EEA dividends has not been codified, but should continue to apply based on an October 2009 practice note. The same also applies for dividends from Belgian subsidiaries.

The DRD is subject to a (i) minimum participation condition and (ii) a taxation condition.

#### Minimum participation condition

According to the minimum participation condition, the recipient company must have, at the moment of attribution, a participation of at least 10% or an acquisition value of at least EUR 2,500,000 in the distributing company. However, that condition neither applies to dividends received or attributed by investment companies nor to dividends attributed by intra-municipal organisations. The beneficiary of the dividend must have been holding the full legal ownership of the underlying shares for at least one year prior to the dividend distribution or commit to hold it for a minimum of one year.

#### Taxation condition

The taxation condition, in summary, means that the dividend income received must have been subject to tax at the level of the distributing company and its subsidiaries if the former redistributes dividends received.

The taxation condition is based on five 'exclusion' rules and certain exceptions to these rules. Basically, the exclusion rules apply to the following:

- Tax haven companies, which are companies that are not subject to Belgian CIT (or to a similar foreign tax) or that are established in a country where the common taxation system is notably more advantageous than in Belgium. Countries in which the minimum level of (nominal or effective) taxation is below 15% qualify as tax havens for the application of the regime (a list of tainted countries has been published). The common tax regimes applicable to companies residing in the European Union are, however, deemed not to be notably more advantageous than in Belgium.
- Finance, treasury, or investment companies that, although are subject in their country of tax residency to a taxation system similar to that of Belgium as mentioned in the item above, nevertheless benefit from a taxation system that deviates from the one commonly applicable.
- Offshore companies, which are companies receiving income (other than dividend income) that originates outside their country of tax residency and in these countries such income is subject to a separate taxation system that deviates substantially from the common taxation system.

- Companies having branches that benefit globally from a taxation system notably more advantageous than the Belgian non-resident corporate taxation system. This exclusion is deemed not applicable to EU companies with an EU branch.
- Intermediary holding companies, which are companies (with the exception of investment companies) that redistribute dividend-received income, which on the basis of regulations mentioned under the items above would not qualify for the DRD for at least 90% of its amount in case of direct holding.

While this is a summary of the major exceptions, numerous exceptions to these exclusion rules exist and need to be analysed on a case-by-case basis.

### *Depreciation and amortisation*

Depreciation of an asset is tax deductible to the extent that it results from a devaluation of the asset, and the devaluation effectively occurred during the taxable period concerned. The depreciation methods that are accepted by Belgian tax law are the straight-line method (linear method) and the double-declining balance method. In the latter case, the annual depreciation may not exceed 40% of the acquisition value. The double-declining method may not be used for intangible fixed assets, automobiles, minibuses and automobiles used for mixed purposes, and for assets, the use of which has been transferred to a third party (e.g. in the case of operational leasing).

Depreciation rates are based on the estimated lifetime of the assets concerned, which are normally agreed upon by the taxpayer with the tax authorities. However, for certain assets, rates are set by administrative instructions as follows:

| Assets | Depreciation rate (%) |
|---|---|
| Commercial buildings | 3 |
| Industrial buildings | 5 |
| Machinery and equipment (depending on the type) | 20 or 33 |
| Rolling stock | 20 |

Intangible fixed assets have to be amortised over a period of at least five years for tax purposes (except R&D expenses, for which the minimum amortisation period is three years).

For the year of acquisition of an asset, only the proportionate share of an annual depreciation calculation can be accepted as depreciation for income tax purposes (in principle to be computed on a daily basis). This provision, however, applies only to companies that cannot be considered as SMEs *(see the Tax credits and incentives section for definition).* In contrast, SMEs can deduct a full year of depreciation in the year of acquisition.

According to the position of the central tax administration, no depreciation can be accepted for the year in which the asset is disposed of.

Ancillary expenses incurred at the time of acquisition must be depreciated in the same way as the asset to which they relate (i.e. no full deduction in the year of acquisition, except for SMEs). Alternatively, ancillary expenses relating to the acquisition of land can be written down and such write-downs, if they are justified, may constitute a deductible expense.

### *Goodwill*

Belgian accounting and tax laws allow amortisation of goodwill arising at the occasion of an asset deal. For Belgian tax purposes, the amortisation period, which depends on the elements included in the goodwill, is a minimum of five years, and the straight-line method must be applied. According to the Minister of Finance, 'clientele' (client lists) should be amortised over a period of 10 to 12 years. The aforesaid accounting and tax amortisation for goodwill is not available in the case of mergers or de-mergers that occur tax free (i.e. they, among other things, follow the continuity principle from an accounting perspective).

### *Start-up expenses*

Incorporation costs, at the election of the taxpayer, may be deducted fully in the year of incorporation or can be depreciated over a maximum period of five years.

### *Net operating losses*

#### Principle: carryforward without limitation in time

Tax losses can, in principle, be carried forward without any limitation in time.

#### Change of control

In case of change in control of a Belgian company (e.g. if the shares of the company are transferred and along with them the majority of the voting rights), the amount of tax losses carried forward available in that company (before the change of control) can no longer be offset against future profits unless the change can be justified by legitimate needs of a financial or economic nature in the hands of the loss realising company (i.e. evidence must be brought that the change is not purely tax driven).

The condition of legitimate needs of a financial or economic nature is considered to be fulfilled when the employees and activities of the company are maintained by the new shareholder or when the company's control is acquired by a company belonging to the same consolidated group of companies as the former controlling company.

A ruling can be obtained from the Belgian tax authorities to obtain upfront certainty on the Belgian tax treatment of the contemplated operation, so as to ensure the losses are not forfeited as a result of a change of control.

#### Tax-free merger or (partial) de-merger

In the case of a tax-free merger or (partial) de-merger, Belgian tax law provides for a partial transfer/maintenance of the rollover tax losses of the absorbed/absorbing company. The carried forward tax losses of the companies involved are then reduced based on the proportionate net fiscal value of the company (before the restructuring) compared to the sum of the net fiscal values of both the merging entities (before the restructuring).

#### No carryback

There is no tax loss carryback provision under Belgian tax law.

### *Payments to foreign affiliates*

A Belgian corporation can claim a deduction for royalties, management service fees, and interest charges paid to foreign affiliates, provided such amounts are at arm's length. However, when such payments are made, either directly or indirectly, to a foreign person, entity, or branch which is not subject to tax or is subject to a tax regime that is notably more advantageous than the Belgian tax regime on such income, there is a reversal of the burden of proof. Such charges will be disallowed unless the Belgian enterprise can prove that the payments are reasonable and that they correspond to genuine and real transactions.

Fees, commissions, etc. paid to beneficiaries located in foreign countries, which are not properly reported on Form 281.50 and Summary Form 325.50, will, in principle, be subject to the secret commissions tax (of 309%), unless the taxpayer can prove that the beneficiaries have declared this income in their Belgian tax return.

**Payments to tax havens**

As of 1 January 2010, companies subject to Belgian CIT or Belgian non-resident CIT that make direct or indirect payments to recipients established in tax havens are obliged to declare them if they are equal to or exceed EUR 100,000 during the tax year. The reporting has to be made on a special form to be attached to the (non-resident) CIT return.

In the event of non-reporting, the payments will be disallowed expenses for CIT purposes. Where the payments have been reported duly and timely, their tax deductibility will be subject to the ability of the taxpayer to prove that (i) said payments were made as part of genuine, proper transactions and (ii) they were not made to an entity under an artificial construction.

A tax haven is defined as: (i) a jurisdiction regarded by the Organisation for Economic Co-operation and Development (OECD) as not being cooperative concerning transparency and international exchange of information or (ii) a jurisdiction where the nominal corporate tax rate is less than 10%. A royal decree containing the list of countries where the nominal corporate tax rate is lower than 10% is published. The countries which are mentioned in the royal decree are the following:

| | | |
|---|---|---|
| Abu Dhabi | Fujairah | Nauru |
| Ajman | Guernsey | Palau |
| Andorra | Jersey | Ras el Khaimah |
| Anguilla | Jethou | Saint-Barthelemy |
| the Bahamas | Maldives Islands | Sark |
| Bahrain | Isle of Man | Sharjah |
| Bermuda | Micronesia (Federation of) | Turks and Caicos Islands |
| British Virgin Islands | Moldavia | Umm al Qaiwain |
| Cayman Islands | Monaco | Vanuatu |
| Dubai | Montenegro | Wallis-and-Futuna |

### *Taxes, fines, and penalties*

Belgian resident and non-resident CIT, including advance tax payments, any surcharge imposed in case of insufficient advance tax payments, any interest for late payment of the CIT, and any Belgian movable WHT, is not tax deductible in Belgium. Immovable WHT (i.e. real estate tax), secret commissions tax and foreign taxes, however, are considered as tax deductible.

Regional taxes and contributions, including penalties, increases, ancillary expenses, and interest for late payment, are not tax deductible in Belgium (certain exceptions apply).

Any administrative and judicial fines or penalties (except for VAT proportionate fines) are not tax deductible in Belgium.

### Automobile costs

As of 1 January 2010, rules related to the tax deductibility of automobile costs in the hands of Belgian companies (and Belgian branches) have been changed to introduce a system where the deductibility rate varies in a range between 50% and 120% of the automobile costs, depending on the CO2 emission of the automobile. Prior to 1 January 2010, the deductibility ranged from 60% to 90%.

Moreover, the deduction for fuel costs has been limited to 75% as of 1 January 2010.

Finally, the rules for determining the benefit in-kind arising from the private use of company automobiles have been amended. As of 1 January 2010, the benefit in-kind is calculated on the basis of a coefficient related to the CO2 emission of the automobile. Prior to 1 January 2010, this was determined on the basis of a fixed number of privately-driven kilometres (in principle 5,000 or 7,500) multiplied by a coefficient related to the fiscal horsepower of the automobile.

### Disallowed expenses

The following expenses are not tax deductible in Belgium (this list is not exhaustive):

- 31% of restaurant expenses.
- 50% of representation expenses and business gifts (there are exceptions).
- Advantages granted to employees for social reasons with certain exceptions (e.g. hospitalisation insurance premiums, gifts of a small value).
- Capital losses on shares (except in the case of liquidation, up to the amount of paid-up capital of the liquidated company).
- Brokerage, commissions, commercial discounts, or other payments allocated directly or indirectly to a person in the form of a Belgian public bribery.

## Group taxation

Belgium does not apply any tax consolidation mechanism with respect to corporate tax.

### Transfer pricing

The arm's-length principle is formally codified in multiple articles of the Belgian Income Tax Code, and Belgian tax law contains standard anti-abuse provisions dealing with artificial profit shifting (e.g. deductibility of costs, excessive expenses, granting and receiving of abnormal or benevolent benefits, deductibility of interest paid to a tax haven, deductibility of excessive interest).

If a Belgian tax resident company grants an abnormal or benevolent advantage (i.e. an advantage which has no arm's-length character), the advantage should be added back to taxable income as a disallowed expense unless the advantage is taken into account to determine the taxable basis of the beneficiary. Notwithstanding the above exception, the abnormal or benevolent advantage should be added back to taxable income when the advantage is being granted to a non-resident affiliated company. Such granted abnormal or benevolent advantages can be offset against any tax deductible items (e.g. tax losses carried forward, notional interest deduction).

If a Belgian tax resident company receives an abnormal or benevolent advantage, and to the extent that such benefit is received from a related company, the advantage received cannot be offset by the Belgian company against its current year or carryforward tax losses or other tax deductions (e.g. dividends-received deduction, patent income deduction, notional interest deduction, and investment deduction). According to a debatable position of the tax authorities, the taxable basis of a Belgian company must be at least equal to the amount of the advantage received.

No specific transfer pricing documentation requirements or rules on the selection of transfer pricing methods are foreseen in the Belgian tax legislation. Nevertheless, transfer pricing requirements have been developed, mainly by the tax authorities, which are in line with the OECD transfer pricing requirements and the EU Code of Conduct. Based on these requirements, it is advisable to proactively compile a coherent and consistent documentation set, although there is no legal obligation to do so.

### *Thin capitalisation rules*

While there are no general thin capitalisation rules in Belgium, there are two specific thin capitalisation rules.

The deduction of interest paid by a Belgian company or branch can be denied partially when the beneficial owner of such interest is not subject to tax or is subject, with respect to the interest received, to a tax regime that is significantly more advantageous than the ordinary Belgian income tax system. In that case, the interest charge is considered a disallowed expense to the extent that the outstanding total amount of tainted loans, other than fixed interest securities, from such beneficiary exceeds seven times the sum of taxable reserves (at the start of the financial year) and paid-up capital (at the end of the financial year) of the interest paying company (i.e. so-called 7/1 debt equity ratio).

Interest due on advances or loans (other than bonds) granted to a Belgian company (i) by shareholders (private individuals only) of that company, (ii) by any person (not being a Belgian tax resident company) acting as a director, manager (known as gérant/zaakvoerder), payments to liquidators or those exercising a similar function in the company, or (iii) by the spouse or minor children of such persons may be recharacterised as dividend income to the extent that the interest rate exceeds the applicable market rate or the amount of such advances or loans exceeds the sum of the paid-up capital (at year-end) and taxable reserves (at the start of the financial year) of the Belgian company.

### *Excess profit rulings*

While the Belgian tax authorities have long since had at their disposal instruments to make upward adjustments to a taxpayer's Belgian taxable basis in case of non-arm's-length dealings. A recent measure now allows multinational companies to achieve a unilateral downward tax adjustment. Belgium will refrain from taxing profits that a Belgian tax resident company would not have realised if it had not been party to related-party dealings.

As the cost structure (or the profit potential) of a member of a multinational group of companies will normally differ from that of a stand-alone entity, its profit will normally also be higher. Applying the arm's-length principle, this profit differential, which does not result from the functions performed and risks assumed by the respective entities, should not be allotted to the Belgian group member. As such, Belgian tax law allows for unilateral adjustments of the Belgian tax base similar to the corresponding adjustments in article 9 of the OECD Model Convention. The underlying assumption is that the 'excess profit' forms part of the profits of the foreign related party.

The part of profit that is deemed to derive from related-party dealings and that is exempted from taxation in Belgium and how the 'part-of-the profits-of-the-foreign-related-party' condition should be interpreted will need to be submitted to the Belgian Ruling Office to obtain a ruling in advance. Such rulings are granted for renewable periods of five years and are based on a detailed functional, economic analysis of the relevant Belgian activities with a view to determining a profit level commensurate with the company's functional and risk profile.

## *Tax credits and incentives*

### *Foreign tax credits (FTC)*

**Royalty income FTC**

Unless a more advantageous provision (e.g. a tax sparing provision) would apply based on a double tax treaty concluded by Belgium *(see the treaty list in the Withholding tax section)*, a FTC is granted under Belgian tax law with respect to foreign royalty income, provided that this income has effectively been subject to taxation in its source country. This FTC is equal to 15/85 of the net frontier amount (i.e. after deduction of foreign WHT) of the royalty. The FTC is included in the taxable basis of the recipient company and is only creditable against Belgian income tax to the extent that said foreign income is included in the taxable basis of the Belgian company. Excess FTC, if any, is not refundable.

**Interest income FTC**

Unless a more advantageous provision (e.g. a tax sparing provision) would apply based on a double tax treaty concluded by Belgium *(see the treaty list in the Withholding tax section)*, the Belgian beneficiary of foreign interest income is entitled to a FTC under Belgian tax law, provided that this income effectively has been subject to taxation in its source country. The computation of the FTC is based on the net frontier interest income (i.e. after deduction of foreign WHT) and adjusted with a ratio taking into account the financial cost. The FTC is included in the taxable base of the Belgian lender. It is creditable against the CIT due but is not refundable in case of excess.

### *Notional interest deduction (NID)*

Belgian corporate income taxpayers are allowed to claim a NID for tax purposes reflecting the economic cost of the use of capital, equal to the cost of long-term, risk-free financing. The NID rate is in principle based on the average rate on ten-year Belgian government bonds. The NID rate will be adjusted annually (with a maximum upwards or downwards variation of, in principle, 1%) again by making reference to the average interest rate on ten-year Belgian government bonds of the prior year, but capped at maximum 6.5% (7% for SMEs).

An SME is a company that does not exceed more than one of the following criteria during the two foregoing financial years when evaluated on a consolidated level: a yearly average number of employees of 50, a turnover of EUR 7.3 million (excluding VAT), or total asset value of EUR 3.65 million.

A company that employs more than 100 employees on the basis of an annual average workforce is automatically considered to be a 'large' company.

The NID rate for tax year 2011 (i.e. financial years ending between 31 December 2010 inclusive and 30 December 2011 inclusive) is capped at 3.8% (4.3% for SMEs). For tax year 2012 (i.e. financial years ending between 31 December 2011 inclusive and 30 December 2012 inclusive), the NID rate is 3.425% (3.925% for SMEs).

As for determining the basis on which this deduction is calculated, the company's share capital plus its retained earnings, as determined for Belgian generally accepted accounting principles purposes and as per the last year-end date, will have to be taken into account.

Certain adjustments to the equity should be made in order to avoid double use. The accounting equity as per the last year-end date has to be reduced by, amongst others, (i) the fiscal net value of financial fixed assets qualifying as participations and other shares, and (ii) in case of a company that has a foreign PE, located in a jurisdiction with which Belgium has concluded a tax treaty, the positive difference between the net book value of assets attributable to the foreign PE and the liabilities (other than equity).

In addition, various adjustments should be made in order to avoid abuse.

### *Investment deductions*

The investment deduction is a deduction from the tax base in addition to the normal tax depreciation on, amongst others, qualifying patents, environmentally friendly R&D investments, and security and energy-saving investments.

A company can benefit from a one-shot investment deduction of 13.5% (for tax year 2012, i.e. financial years ending between 31 December 2011 inclusive and 30 December 2012 inclusive) of the acquisition value of qualifying investments. With respect to environmentally friendly R&D investments, a company can also opt for a spread investment deduction of 20.5% (for tax year 2012) of the depreciation on qualifying environmentally friendly R&D investments.

In case of insufficiency or absence of taxable profits, the investment deduction can be carried forward without any limitation in time or in amount. Certain restrictions apply as to the maximum amount of investment deduction carried forward that is tax deductible in a given year.

Under certain conditions, the investment deduction carried forward can be lost after a change of ownership *(see Net operating losses in the Deductions section)*.

Note that the investment deduction for patents and R&D cannot be combined with the tax credit for patents and R&D.

### *Patents and R&D tax credit*

As an alternative for the above investment deduction for patents and R&D, a company may opt for a tax credit for which the advantage corresponds to the advantage of the investment deduction (i.e. 13.5% one-time and 20.5% for a spread investment deduction), multiplied by the normal CIT rate of 33.99%. The investment deduction implies a deduction of the taxable basis, while the tax credit is a reduction of the tax due. A key advantage of the tax credit for patents and R&D is that it is refundable if it has not been deducted for five subsequent tax years.

Note that the amount of the tax credit should be deducted from the basis of the notional interest deduction.

### *Reduced payroll tax for qualifying researchers*

75% of the payroll tax withheld from wages of qualifying researchers by a Belgian company or establishment does not need to be remitted to the Belgian Tax Revenue provided that the researchers are employed in research and development programmes and have a qualifying degree (such as a degree in (applied) sciences, veterinary medicines, bio-technology, etc.). For the employee's personal tax liability, the Belgian Tax Revenue considers that the payroll withholding tax amount entirely was withheld.

### *Patent income deduction (PID)*

The PID allows a taxpayer to deduct, as an extra tax deduction in the tax return, 80% of qualifying gross patent income. Therefore, only 20% of gross patent income will be taxable at the normal CIT rate (33.99%), resulting in a maximum effective tax rate of 6.8%.

Qualifying taxpayers are corporate taxpayers in Belgium that are involved in the development or further improvement of patents through an in-house R&D centre. They include both Belgian companies and Belgian PEs of foreign companies. The company must be the owner, licensee, or usufruct holder of the patents for which they claim the benefits of the PID.

To benefit from the PID, the R&D centre should qualify as a 'branch of activity' or 'line of business', which means that it should be a division of an entity that is capable of operating autonomously. The Belgian company or PE should have relevant substance to perform and supervise research and development activities, but may use subcontractors, related or unrelated, in its development of the patents or extended patent certificates. The law specifically provides that the R&D centre can be located outside Belgium but must belong to a Belgian legal entity.

Belgian companies or PE's acting as 'contract R&D' service providers on behalf of another company cannot qualify for PID because they are not the owners, holder of beneficial rights to, or licensee of the patent.

#### Qualifying patents

The PID applies where patents or supplementary protection certificates are owned by a Belgian company or establishment as a result of its own patent-development activities (partly or fully) in an R&D centre in Belgium or abroad. The PID also applies where patents or supplementary protection certificates are acquired by a Belgian company or establishment from a related or unrelated party, in full ownership, joint ownership, usufruct, or via license agreement, provided it has further improved the patented products or processes in the company's R&D centre in Belgium or abroad.

Other Intellectual Property (IP), such as copyrights, know-how, designs, trade or marketing intangibles, are as such not eligible for the Belgian PID.

The Belgian company or establishment can license the patents to other parties. Alternatively, it can use the patents, which are owned by it or licensed to it, to manufacture and supply patented products or services.

For patents licensed by the Belgian company or establishment to any party, whether related or unrelated, the tax deduction amounts to 80% of the relevant patent income to the extent the income does not exceed an arm's-length price.

For patents used by the Belgian company or establishment for the manufacture of patented products, manufactured by itself or by a contract manufacturer on its behalf, the tax deduction is 80% of the license fee (known as 'embedded royalties') that the Belgian company would have received had it licensed the patents used in the manufacturing process to an unrelated party.

The tax deduction for patent income is available to all corporate taxpayers in Belgium. This includes essentially all Belgian resident companies and Belgian permanent establishments of non-resident companies.

No advance ruling is required to benefit from this deduction since it is applicable generally and automatically. Only minor compliance formalities apply. The taxpayer should submit a special application form together with the CIT return.

## *Withholding taxes*

Domestic corporations and branches of foreign corporations paying dividends, interest, royalties, and/or certain rentals are required to withhold tax. The standard rates applicable under Belgian tax law are fixed at 25% for dividends and 15% for interest, royalties, and certain rentals. However, some WHT reductions/exemptions are foreseen under Belgian domestic tax law.

- A reduced Belgian WHT of 15% applies to dividend distributions relating to non-preference shares subscribed in cash, issued as of 1 January 1994 and which, upon issuance, are nominative or have been deposited with a financial institution in Belgium, on condition that the distributing company does not irrevocably renounce its right to benefit from the reduced rate of WHT.
- A reduced Belgian WHT of 15% is possible for dividend distributions relating to non-preference shares issued as of 1 January 1994 in the context of a public offering (i.e. shares quoted on the stock exchange) on condition that the distributing company does not irrevocably renounce its right to benefit from the reduced rate of WHT.
- Under certain conditions, a reduced WHT of 15% applies to dividend distributions made by companies quoted on a stock market or by companies whose capital has been (partly) contributed by a PRIVAK/PRICAF, which must also be quoted on a stock market. A PRIVAK/PRICAF is a company with the sole objective of collective investment in non-quoted companies and in growth companies.
- A WHT exemption on dividends is foreseen if both the receiving and distributing companies are subject to Belgian CIT, if the receiving company holds a minimum shareholding of at least 10% for at least one year in the capital of the subsidiary and if certain formalities are complied with. If the one year holding requirement is not fulfilled at the time of distribution, the distributing company provisionally should withhold the amount of WHT due (but it does not have to pay the tax authorities). Once the one year holding requirement is met, the provisionally withheld tax amount can be paid out to the parent company. If the one year holding requirement eventually is not complied with (e.g. because the Belgian participation is disposed of by the parent company before the one year holding requirement is met) then the Belgian company has to pay the amount provisionally withheld increased by interest for late payment (at an annual rate of 7%) to the competent services of the Belgian tax authorities.
- A WHT exemption is foreseen also for the distribution of profits made by a Belgian subsidiary to an EU parent company, if both the parent and subsidiary have a legal form that is mentioned in the Annex to the EU Parent-Subsidiary directive, if both are subject to CIT, and if the parent company holds during an uninterrupted period of at least one year a shareholding of at least 10% in the capital of the distributing company. The same procedure as that described above applies in case the one year holding requirement is not met at the moment of the dividend distribution.
- A 10% tax is applicable to profits that are attributed or made payable as a result of the full or partial liquidation of a company or the acquisition by a company of its own shares. However, the exemption of Belgian WHT is maintained for liquidation proceeds distributed by a BEVEK (Beleggingsvennootschap met veranderlijk kapitaal)/SICAV (Société d'investissment à capital variable), for dividends resulting from tax-free mergers, and for liquidation proceeds resulting from the redemption

of own shares by a company listed on a regulated stock exchange. If the conditions described above apply, an exemption is also available.
- The application of the Parent-Subsidiary directive to dividend payments has been extended towards non-EU resident companies. Dividends distributed towards a country that has concluded a tax treaty with Belgium containing a qualifying exchange of information clause can be exempt from WHT subject to the same conditions as laid down in the Parent-Subsidiary directive.
- There is a WHT exemption on interest on loans granted by professional investors to banks established in the EEA or in a country which has concluded a double tax treaty with Belgium. For example, banks situated in France, the United Kingdom, or the United States should be able to benefit from this exemption.
- No Belgium interest WHT arises where two related companies with tax residence outside Belgium are involved in a financial transaction with the intervention of a Belgium based intra-group financial enterprise. Under these circumstances, the Belgium intra-group financial enterprise is not required to retain Belgium interest WHT if the entity merely intervenes as 'paying agent intermediary'.
- Belgian domestic tax law also provides for a WHT exemption on the following movable income sourced in Belgium (this list is not exhaustive):
  - Income from deposits allocated or attributed to non-resident savers by Belgian banks.
  - Income from bonds, treasury bonds, or other similar instruments of which the beneficiaries are identified as financial institutions.
  - Income from receivables (this includes income from commercial receivables) or loans of which the beneficiaries are identified as financial institutions or professional investors. Professional investors are defined as any Belgian resident company or branch not being a financial institution or any equivalent. As a result, interest payments between two Belgian companies are exempt from WHT. The applicability of this exemption has been extended. As a result, on transactions with banks situated in a country with which Belgium has concluded a double tax treaty, no withholding will be due. In practice this means that on transactions with inter alia French, UK, and US banks no withholding will be due.
  - Income from bonds paid by a Belgian resident financial institution or by a Belgian resident company to non-resident savers, provided that such bonds are registered on a nominal basis with the debtor of the income during the entire period to which the interest relates and that the foreign beneficiaries of the interest are not located in a tax haven country or held by more than 50% by Belgian residents.
  - Income from bonds and loans granted by 'eligible quoted companies' and 'eligible intra muros financial companies' to non-residents (under certain conditions).
  - Interest payments between a Belgian company and an EU tax resident company in case of direct or indirect shareholding of at least 25% for an uninterrupted period of at least one year (i.e. transposition of EU Interest & Royalty directive in Belgian tax law).

With respect to payments made to non-resident corporations or individuals, WHT exemptions and/or reductions can also be found in the double taxation treaties concluded by Belgium.

Notes

1. The treaty concluded with ex-Yugoslavia is still applicable to Bosnia-Herzegovina, Macedonia, Serbia, and Montenegro.
2. Not applicable to Hong Kong. Note that a new treaty with China has been signed (but not yet into force). The rates under the new treaty are 5% and 10% for dividends, 10% for interest, and 7% for royalties.
3. The treaty concluded with the former USSR is still applicable to Kyrgyzstan, Moldova, Tajikistan, and Turkmenistan.
4. It concerns an EU country or the treaty contains a qualifying exchange of information clause. Hence, the rate of 0% is applicable subject to the same conditions as invoked by the Parent-Subsidiary directive *(see above)*.
5. Under the Bilateral II agreement concluded between Belgium and Switzerland, a rate of 0% is applicable under certain conditions.
6. With respect to EU countries, a WHT exemption is applicable provided that the conditions laid down in the Interest & Royalty directive are met *(see above)*.
7. Since the Belgian domestic rate for interest and royalties is maximum 15%, the higher treaty rate will in principle not be applicable on interest and royalties arising from Belgium.

The treaties which are currently in force are listed above. The following tax treaties are signed, modified, or under renegotiation but have not yet entered into force (including some for the exchange of information clause): Armenia, Azerbaijan, Australia, Bahrain, China, Congo, Croatia, Denmark, Isle of Man, Finland, France, Germany, Iceland, Italy, Japan, Luxembourg, Macao, Malaysia, Malta, Moldova, the Netherlands, New Zealand, Norway, Qatar, Rwanda, San Marino, Seychelles, Singapore, Spain, Tajikistan, Uganda, and the United Kingdom.

## Tax administration

### Tax returns

As a general rule, the annual resident or non-resident CIT return cannot be filed less than one month from the date when the annual accounts have been approved and not later than six months after the end of the period to which the tax return refers. For instance, assuming that the accounting year has been closed on 31 December 2010, the corporate tax return needs to be filed, in principle, by 30 June 2011 at the latest (this deadline is often postponed).

### Payment of tax

CIT is payable within two months following the issue of the tax assessment. Interest for late payment is charted at the (non-cumulative) rate of 7% per year.

The advance tax payments needed to avoid the CIT surcharge *(see the Taxes on corporate income section)* can be made in quarterly instalments. In the situation where the company's financial year ends on 31 December 2011, the due dates for the advance tax payments are 11 April 2011, 12 July 2011, 10 October 2011, and 20 December 2011. Advance tax payments give rise to a tax credit. The tax credit amounts to 3%, 2.25%, 2%, or 1.5% of the advance tax payment made, depending on whether such payment has been made respectively in the first, second, third, or fourth quarter (percentages applicable for tax year 2012). If the total amount of credits exceeds the surcharge, no surcharge is due, but the excess is not further taken into account for the final tax computation. The taxpayer can choose to either have the excess reimbursed by the tax authorities as the excess can be used as an advance tax payment for the next year.

### Belgian ruling practice

Belgium has a long tradition of providing formal and informal rulings. Currently, a taxpayer may request an advance tax ruling on a wide range of subjects including but not limited to: CIT, individual tax, non-resident income tax, legal entity income tax, VAT, customs, and registration duties. The request should cover a 'specific and concrete' operation, which effectively is envisaged to be realised in a foreseeable future. The ruling should be filed before the transaction takes place. In practice, the ruling decision should be granted prior to the filing of the CIT return of the year of the transaction. A ruling is binding upon the Belgian tax authorities for a renewable period of five years. Delivery of a requested ruling takes, on average, three months.

The Ruling Office is autonomous from the Belgian tax authorities and has the legal authority to issue decisions, which are binding upon the Belgian tax authorities. The Ruling Office increasingly has adopted a constructive approach towards the taxpayer and is seen in the Belgian tax practice as a powerful insurance instrument ascertaining the Belgian tax treatment of contemplated operations.

## Significant developments

The Bermuda Government has recently extended the tax exemption granted to Bermuda companies under the Exempt Undertakings Act of 1976 from 28 March 2016 until 2035. The extended Undertaking provides protection to companies from any newly enacted taxes on income or capital gains until 2035. Existing companies are required to apply for the tax exemption extension.

Further, the Bermuda government has recently agreed to Tax Information Exchange Agreements (TIEAs) with a number of key trading partners, including The People's Republic of China, Canada, and Italy. 24 TIEAs have now been agreed to/signed (including all of the G7 countries). The follow list of countries have agreed to/signed TIEAs with Bermuda: Aruba, Australia, Canada, China, Denmark, Faroe Islands, Finland, Germany, France, Greenland, Iceland, India, Ireland, Italy, Japan, Mexico, Netherlands, Netherlands Antilles, New Zealand, Norway, Portugal, Sweden, the United Kingdom, and the United States.

Bermuda also has a Double Taxation Agreement with the Kingdom of Bahrain and a Limited Tax Treaty with the United States which only applies to 'enterprises of insurance'.

Under certain circumstances, the United States-Bermuda Tax Treaty provides for relief from taxation of insurance business profits. The business profits of a Bermudian insurance company will not be taxed in the United States unless a company has a permanent establishment (PE) in the United States. The United States-Bermuda Tax Treaty also provides for mutual assistance on tax matters. The purpose of a mutual assistance provision is to prevent or decrease tax avoidance. The United States also believed that having a tax treaty with Bermuda would be beneficial for the United States-Bermuda diplomatic relations.

Bermuda's double taxation agreement with the Kingdom of Bahrain includes a provision for the full exchange of information on criminal and civil tax matters, consistent with the internationally agreed standard for transparency and the exchange of information for tax purposes set by the Organisation for Economic Co-operation and Development (OECD).

## Taxes on corporate income

Income tax and taxes on capital gains are not imposed on corporations in Bermuda.

# Bermuda

## Corporate residence

Entities that are incorporated in Bermuda are considered to be resident in the country.

## Other taxes

### Value-added tax (VAT)
There is no VAT or sales tax in Bermuda.

### Customs duties/import tariffs
Customs duties are imposed on almost all goods arriving on the island at varying rates.

### Excise taxes
There are no excise taxes imposed in Bermuda.

### Property taxes
A land tax is imposed on all developed land throughout Bermuda, with certain exceptions. The tax is assessed on the annual rental value of each valuation unit, depending on whether such unit is a private dwelling or any other dwelling. The owner of the valuation unit is liable for the land tax.

Private dwellings are taxed on a progressive scale of tax rates that ranges between 0.6% and 19% based on the annual rental value of the unit, while commercial properties are taxed on a single rate of tax of 4.4%.

### Transfer taxes
There is no transfer tax imposed in Bermuda.

### Stamp taxes
Bermuda does impose a stamp duty on certain types of legal instruments; however, exempt companies are not subject to stamp duty.

### Social insurance
If an employer has employees in Bermuda for 26 or more weeks in a calendar year, the employer will have to register and obtain an account number from the Department of Social Insurance (DSI) (unless previously registered) and pay social insurance tax for its employees. At the same time, the employer must also apply for and obtain from the DSI a social insurance number for each employee, which is required to pay social insurance. Once the employer has registered for a social insurance account number and the employees have obtained social insurance numbers, the DSI will automatically send an electronic print-out to the employer with an itemised list of employees as well as the amount of social insurance tax due for the month. Under certain facts and circumstances, the employer may also file an Employee Amendment Form, which shows any change in status (i.e. termination or unpaid leave) of employees that could affect the amount of social insurance tax due.

The amount of social insurance tax due is calculated as 60.80 Bermudian dollars (BMD) per employee per week (effective 1 April 2010), with the employer and employee each paying half of the liability (or BMD 30.40). The employer must pay and remit monthly (for all employees), to the DSI, the total social insurance tax due per employee. The amount of social insurance tax due per month is based on the number of Mondays in the month and must be paid by the end of the following month. Employed persons over the age of 65 are not required to pay their half (BMD 30.40). The employer continues to pay their half (BMD 30.40).

### *Payroll tax*

Under Section 3 of the Payroll Taxes Act 1995, an employer (viewed as the entity that has control over an individual's remuneration) is required to remit payroll taxes (currently 14% on all remuneration paid or given up to a maximum compensation of BMD 750,000) for each of its employees whose employment in Bermuda exceeds four consecutive weeks in a calendar year (whether or not with one or more employers). If an employee's stay in Bermuda is for a period of less than four consecutive weeks, the employer is not obligated to remit the payroll taxes.

Once an employee's service period in Bermuda has exceeded four consecutive weeks, the employer must register the employee with the Office of the Tax Commissioner (OTC). The employer must obtain a payroll tax account number by filing an application with the OTC, if no previous account exists for such employee. The application must be filed within seven days after the end of the quarterly tax period (the four quarters end on 1 January, 1 April, 1 July, and 1 October) in which the employee's stay exceeded four consecutive weeks. A payroll tax return and remittance of tax must be filed with the OTC 15 days after the end of each quarterly period (i.e. 15 January, 15 April, 15 July, and 15 October). A return is due only when an employee's stay exceeds four consecutive weeks in a tax period. The employer may recover from the employee a maximum of 5.25% of the 14% payroll tax, and the employer is allowed an exemption of BMD 600 (of remuneration paid) per employee for each quarterly tax period. Penalties for tax returns filed late are 5% of the payroll tax due for each month (or part thereof) that the tax return is late (with a maximum of 30%).

Compensation subject to the payroll tax under the Payroll Taxes Act includes all remuneration paid or given to the employee. Remuneration includes:

- wages, salary, leave pay, commission, gratuity, fee, bonus, perquisite, or allowance
- money paid under a profit-sharing scheme
- money or anything of value paid or given to an employee or ex-employee in connection with the permanent termination of employment
- any amount paid with respect to a retirement or provident fund, scheme, or society, or under a hospital or health insurance scheme
- the value of meals, boarding, lodging, or other benefit of any kind, whether provided in cash or otherwise
- the rental value of any place of residence provided rent-free, or the difference between the rent paid and the rental value if the rent paid is lower than the rental value, and
- any gain on the exercise or right to acquire company stock based on services rendered.

All employers or self-employed persons are required to report remunerations up to a maximum of BMD 750,000 per annum per employee, deemed employee, or self-employed person. There is no payroll tax on remunerations above BMD 750,000.

Please note that the Payroll Taxes Act is extremely broad in its definition of remuneration. Therefore, a Bermuda employer should take caution when calculating the amount of remuneration paid to an employee.

### *Annual company fee*
Every exempted company shall, in the month of January, forward to the Registrar of Companies a declaration, signed on behalf of the company, as to the company's principal business and its assessable capital together with the appropriate fee payable. For the purposes of the Companies Act 1981, an exempted company means a local company which does not comply with the requirements of the Companies Act 1981. Exempt companies are generally owned by non-Bermudans.

| Assessable capital of the exempted company (BMD) | Annual company fee (BMD) |
|---|---|
| 0 to 12,000 | 1,870 |
| 12,001 to 120,000 | 3,820 |
| 120,001 to 1,200,000 | 5,890 |
| 1,200,001 to 12,000,000 | 7,850 |
| 12,000,001 to 100,000,000 | 9,815 |
| 100,000,001 to 500,000,000 | 17,530 |
| 500,000,001 or more | 29,220 |

### *Corporate services tax*
A 4% corporate service tax is imposed on a provider of corporate services in respect of gross earned revenue derived from an exempted undertaking for taxable corporate services provided during a tax period. Corporate services include corporate administrative services, corporate management services, corporate secretarial services, the provision of a registered office, the performance of functions in the capacity of director or resident representative, and the provision of accounting and/or financial services.

### *Hotel occupancy tax*
A 7.25% tax is imposed on revenue received from hotels and other forms of accommodation.

### *Betting duty*
There is a betting duty charge of 20% imposed on all bets made, received, or negotiated by a person licensed under the Betting Act of 1975.

## *Branch income*

Branches are treated the same as other corporations doing business in Bermuda.

## *Income determination*

Since income taxes are not imposed on corporations in Bermuda, income determination is not relevant in the context of Bermuda taxation.

## *Deductions*

Since income taxes are not imposed on corporations in Bermuda, deductions from income are not relevant in the context of Bermuda taxation.

## Group taxation

Since income taxes are not imposed on corporations in Bermuda, group taxation is not relevant in the context of Bermuda taxation.

## Tax credits and incentives

Bermuda offers no specific tax incentives.

## Withholding taxes

There are no withholding taxes in Bermuda.

## Tax administration

Since income taxes are not imposed on corporations in Bermuda, tax returns are not required to be completed for corporate income tax compliance purposes. *For information regarding tax returns, due dates, and the payment of tax for non-income taxes imposed in Bermuda (e.g. Social insurance and Payroll tax), please see the Other taxes section.*

## Other issues

### Foreign exchange controls

Exempt companies and permit partnerships are considered as non-residents for exchange control purposes. This allows these entities to make dividend payments, distribute capital, open and maintain foreign bank accounts, maintain bank accounts in any currency, and purchase securities.

There is a Foreign Currency Purchase Tax imposed at the rate of 1% on foreign currency purchased by a resident from a local bank.

### Tax treaties

There are no tax treaties between Bermuda and other nations due to the fact that Bermuda does not impose direct taxes. However, Bermuda has a Double Taxation Agreement with the Kingdom of Bahrain and a Limited Tax Treaty with the United States which only applies to 'enterprises of insurance'. Bermuda also has Tax Information Exchange Agreements with the following 24 countries: Aruba, Australia, Canada, China, Denmark, Faroe Islands, Finland, Germany, France, Greenland, Iceland, India, Ireland, Italy, Japan, Mexico, Netherlands, Netherlands Antilles, New Zealand, Norway, Portugal, Sweden, the United Kingdom, and the United States.

## Significant developments

A specific tax on lottery and gambling games came into force in late December 2010. The tax is also applicable to business promotions that involve a raffle or random activities in providing awards in order to increase sales or attract clients. The tax rate for lottery and gambling games is 30%, whereas the tax rate for business promotions is 10%.

The Bolivian government approved a new Pension Law in December 2010, which establishes additional employer social contribution obligations. Social tax charges for employers are now equal to 16.71% (previously was 13.71%) of gross salary in general and 18.71% (previously was 13.71%) for the mining sector.

In late 2010, changes to the Bolivian Tax Code established minimum amounts for which taxpayers must document their economic transactions (i.e. payment of acquisition of goods and services) through 'reliable means of payment', which consist of documents of payments recognised by the Bolivian financial system and regulated by the Autoridad de Supervisión del Sistema Financiero (ASFI) (i.e. the bank regulator).

The above changes were subsequently regulated in late May 2011, establishing the minimum amount of 50,000 bolivianos (BOB) for each economic transaction and the obligation to document such economic transactions with 'reliable means of payments'. Non-compliance with these new requirements implies the lack of the possibility to compute input VAT and to deduct the associated expenses for corporate income tax (CIT) purposes.

## Taxes on corporate income

All companies in Bolivia are subject to CIT at a rate of 25%. The taxable base is the profit arising from financial statements prepared in accordance with Bolivian generally accepted accounting principles (GAAP), adjusted for tax purposes (i.e. by non-deductible and non-taxable items) as per the requirements established in the tax law and regulations.

Bolivia taxes the income generated by corporations following the 'income source' principle (i.e. on a territorial basis). Therefore, income arising from goods and assets located or utilised economically within Bolivian territory and from any activity carried out within the country is considered Bolivian income source. Hence, such income is subject to CIT, regardless of the nationality/residence of the parties involved in generating such income or the place where the contracts were subscribed.

### *Surtax on extractive activities*

There is an additional CIT at a rate of 25%, which affects only extractive activities of non-renewable natural resources (mining and oil/gas). This additional tax is calculated on the same basis as the normal CIT, except that two additional deductions are allowed: (i) up to 33% of the accumulated investment as from 1991; and (ii) 45% of the gross revenue of each extractive operation (e.g. a field or a mining site) with a threshold of BOB 250 million for each extractive operation.

### *Special taxes on mining companies*

In addition to the general CIT of 25% and the 25% surtax on extractive activities, all mining companies are also subject to an additional tax, calculated on the taxable net profits, at the following rates:

- 12.5%, if the mining company carries out exploitation activities.
- 7.5%, if the mining company carries out manufacturing activities with raw minerals that add value.

Mining companies are also subject to mining royalties at a rate of between 1% and 7% (depending on the kind of mineral), calculated on the total sales price. Note that there is a 60% discount on the rates of mining royalties if minerals are sold within the Bolivian market. Mining royalties can be offset against CIT if official mineral prices are lower than the prices established by the tax law; however, in this case, mining royalties paid will not be deductible for CIT purposes. On the contrary, if official mineral prices are higher than the prices established by the tax law, then mining royalties will be considered a deductible expense for CIT purposes.

### *Tax on gross income*

The tax on gross income (also known as transaction tax) generally taxes gross income arising from the performance of any economic or commercial activity (including non-profitable activities) at a rate of 3% on a monthly basis. However, exceptions exist for the sale of investments (as defined by the Stock Exchange Law) and the sale of minerals, oil and gas within the local market, as long as such sales will ultimately be exported.

Corporations pay either CIT or transaction tax, whichever is higher. From an administrative perspective, CIT is due and paid at the end of each tax year and is considered an advanced payment of transaction tax, while transaction tax is due monthly. If during the year the cumulative monthly transaction tax due exceeds the CIT prepayment, the taxpayer will be subject to transaction tax on a monthly basis until the end of the tax year. For example, a corporation pays CIT for the 2009 fiscal year in April 2010. This payment is considered a prepayment for the transaction tax due between May 2010 and April 2011.

## *Corporate residence*

A corporation is considered resident in Bolivia if it has been incorporated in Bolivia.

Note that Bolivian commercial laws allow foreign corporations to carry out isolated commercial acts in Bolivia without the obligation to constitute a permanent representation in Bolivia; however, such corporations cannot carry out habitual commercial acts without fulfilling the requirements established to constitute a company in Bolivia (e.g. through either a subsidiary or a branch). Unfortunately, Bolivian legislation does not include provisions to regulate situations that could trigger permanent establishment (PE) nor does it define what should be understood by 'carrying out habitual commercial acts'.

## Other taxes

### Value-added tax (VAT)

VAT is levied on the sale of movable goods and provision of services carried out within Bolivian territory at a rate of 13%, including definitive importations. Since this tax is included in the final price, the effective tax rate amounts to 14.94% (13% / 87%).

### Customs duties

Definitive importations are also subject to customs duties at a rate of 10% and 5% for consumption goods and capital assets, respectively. Customs duties are calculated over the 'transaction value' of the merchandise valued as per Bolivian customs legislation, plus transportation and insurance costs.

### Property tax on real estate and vehicles

Real estate and vehicles are subject to a property tax calculated at different rates based on a scale value determined by the municipal government as follows:

| Property value (BOB) | | Property tax liability | | |
|---|---|---|---|---|
| From | Up to | BOB | Plus (%) | over excess of (BOB) |
| 0 | 200,000 | 0 | 0.35 | 0 |
| 200,001 | 400,000 | 700 | 0.50 | 200,000 |
| 400,001 | 600,000 | 1,700 | 1.00 | 400,000 |
| 600,001 | Onwards | 3,700 | 1.50 | 600,000 |

| Vehicle value (BOB) | | Vehicle tax liability | | |
|---|---|---|---|---|
| From | Up to | BOB | Plus (%) | over excess of (BOB) |
| 0 | 24,606 | 0 | 1.50 | 0 |
| 24,607 | 73,817 | 492 | 2.00 | 24,607 |
| 73,818 | 147,634 | 1,722 | 3.00 | 73,818 |
| 147,635 | 295,268 | 4,306 | 4.00 | 147,635 |
| 295,269 | Onwards | 10,949 | 5.00 | 295,269 |

### Taxes on specific goods for consumption (excise tax)

Specific goods are taxed at the following rates:

| Product | Tax rate (%) |
|---|---|
| Cigarettes and tobacco for pipes | 50 to 55 |
| Vehicles (except those of high capacity and weight, which will pay a 10% rate of excise tax) | 18 |

Other specific products taxed by specific measure:

| Product | Tax rate (BOB) |
|---|---|
| Soft drinks (except natural water and fruit juices) | 0.30/litre |
| Energising drinks | 3.50/litre |

| Product | Tax rate (BOB) |
|---|---|
| Maize liquor | 0.62/litre |
| Alcohol | 1.18/litre |
| Beers with 0.5% or more volumetric degrees | 2.60/litre + 1% |
| Wines | 2.40/litre + 5% |
| Ciders and sparkling wines (except maize liquor) | 2.40/litre + 5% |
| Liquors and creams in general | 2.40/litre + 5% |
| Rum and vodka | 2.40/litre + 10% |
| Other brandies/liquors | 2.40/litre + 10% |
| Whiskey | 10.01/litre + 10% |

### *Special tax on hydrocarbons and derived products*
A tax is charged on the commercialisation of the following products within the local market, regardless of whether they are produced in Bolivia or imported:

| Product | Tax rate (BOB) |
|---|---|
| Gasoline | 1.23/litre |
| Premium gasoline | 2.18/litre |
| Aviation gasoline | 1.85/litre |
| Kerosene | 0.29/litre |
| National jet fuel | 0.32/litre |
| International jet fuel | 4.28/litre |
| National diesel oil | 0.00/litre |
| Agro fuel | 0.00/litre |
| Fuel oil | 1.25/litre |

### *Direct tax on hydrocarbons*
A direct tax on hydrocarbons (IDH) is applied on the production of hydrocarbons, measured at the wellhead point, at a rate of 32%. To determine the taxable base for this tax, production of hydrocarbons must be valued taking into account the average sales price and considering the market (internal/external) where such hydrocarbons were sold.

### *Financial transaction tax*
A financial transaction tax is levied on bank transactions (deposit or transfer of funds), carried out within the domestic financial system, at a rate of 0.15%.

### *Special tax on lottery and gambling games*
A specific tax on lottery and gambling games came into force in late December 2010. The tax is also applicable to business promotions that involve a raffle or random activities in providing awards in order to increase sales or attract clients. The tax rate for lottery and gambling games is 30%, whereas the tax rate for business promotions is 10%.

### *Social contributions*
The Bolivian government approved a new Pension Law in December 2010, which establishes additional employer social contribution obligations. Social tax charges for employers are now equal to 16.71% (previously was 13.71%) of gross salary in general and 18.71% (previously was 13.71%) for the mining sector.

### Stamp taxes

There are no stamp taxes in Bolivia.

## Branch income

Branch income is subject to the same tax applicable to other types of Bolivian corporations (i.e. CIT of 25%). However, note that net profits of Bolivian branches are deemed to be distributed to the head office at the annual filing due date for CIT (i.e. 120 days after the fiscal year end); hence, a Bolivian branch must withhold 12.5% on such deemed distributed profits. Note that this can be avoided as long as the head office decides to reinvest Bolivian branch's net profits.

## Income determination

Taxable income is determined based on the financial statements prepared under Bolivian GAAP; then the income is adjusted for tax purposes in accordance with guidelines provided with respect to non-deductible and non-taxable items.

### Inventory valuation

Inventories must be valued at replacement cost or market value for tax purposes, whichever is lower. Replacement cost is defined as the necessary costs incurred in acquiring or producing the assets as of the year-end, whereas market value is defined as the net value that the company would have obtained for the sale of assets in normal conditions as of the year-end, less commercialisation direct expenses.

### Capital gains

Bolivian legislation does not include specific regulations for capital gains. Capital gains must be included in annual CIT if they are considered Bolivian-source income and hence will be taxed at a rate of 25%.

### Dividend income

Dividend income obtained from domestic corporations subject to CIT must be excluded from the net taxable profits of the investor. Dividend income obtained from foreign corporations is not subject to CIT due to the fact that is not considered Bolivian-source income.

### Interest income

Interest income is subject to annual CIT if loans have been economically utilised within Bolivian territory and hence associated interest is considered Bolivian-source income.

### Rent/royalty income

Rent/royalty income is subject to annual CIT as long as the income comes from an asset situated or economically utilised in Bolivian territory.

### Foreign income

Bolivian corporations are taxed only on income generated within Bolivian territory.

## Deductions

As a general principle, expenses may be deducted for CIT purposes as long as they are necessary to generate Bolivian-sourced income and are properly documented.

### *Depreciation*
Depreciation of fixed assets is permitted for CIT purposes if fixed assets contribute to generate taxable income. Depreciation must be calculated based on a straight-line method and considering useful lives included in tax law. Fixed assets which are not included in the tax law must be depreciated under a straight-line method in accordance with their useful lives, and this need to be communicated before the tax authorities within ten working days following the incorporation of the affected fixed assets.

### *Interest expense*
Interest paid to owners or shareholders is not deductible to the extent the interest rate exceeds the London Interbank Offered Rate (LIBOR) plus 3% in the case of foreign owners/shareholders and to the extent the interest rate exceeds the official interest rate on loans published by the Central Bank of Bolivia for national owners/shareholders. Interest deductible on shareholder loans may not exceed 30% of the total interest paid to third parties.

### *Bad debt*
Allowances for bad debt provisions are permitted if determined as required by law, which establishes an average method based on uncollectable receivables of the last three years. Uncollectable receivables are defined by current legislation as those which come from trade receivables and either: (i) remain unpaid for more than one year and have been sued without obtaining a seizure or (ii) when the receivables do not justify being sued due to the quantity of the receivables, remain unpaid for more than three years.

### *Compensation expenses*
Salaries, as well as associated compensations, paid to employees without the application of withholding taxes (i.e. RC-IVA) are not deductible. Employees are subject to RC-IVA at a rate of 13%, which is calculated on the gross salary (including any other compensation in kind/cash) less social contributions and four minimum national salaries (approx. BOB 48,950). RC-IVA must be withheld and paid to the tax authorities by the employer on a monthly basis.

Provisions for employees' severance payments are deductible. Provisions of other bonuses (e.g. holiday, productivity bonuses) accrued on behalf of employees are tax deductible as long as they are paid prior to the annual CIT filing due date and the company demonstrates it has withheld taxes (if applicable).

### *Charitable contributions*
Donations are not deductible unless made to non-profit organisations that are not subject to CIT. These donations are deductible up to a maximum of 10% of the donor's net taxable profit.

### *Taxes*
Taxes effectively paid by the corporation as a direct taxpayer, other than CIT, are deductible for tax purposes. Any transaction tax (tax on gross income) that has been offset against CIT paid is not deductible for CIT purposes.

Taxes paid in the acquisition of fixed assets are not deductible. These taxes must be included in the cost of the asset and depreciated accordingly.

### *Other significant items*
In broad terms, the following additional items are not deductible for tax purposes, according to current legislation:

- Owners' or shareholders' personal withdrawals and living expenses.
- Fees paid to individuals (i.e. acquisition of goods and services) for which no WHT have been withheld.
- Amortisation of trademarks and other intangible assets, unless a price has been paid to acquire them.
- Provisions that are not specifically authorised by the tax law and regulations.
- Depreciation of fixed assets that include a revaluation reserve.
- Losses arising from illegal acts.

### *Net operating losses*
Tax losses can be carried forward with no time limit. Bolivian legislation does not envisage carryback provisions for tax losses.

### *Payments to foreign affiliates*
Payments to foreign affiliates are subject to a 12.5% WHT with no restriction if the Bolivian company is remitting Bolivian-sourced income (e.g. interest on loans, provision of any kind of services, royalties).

## *Group taxation*

Bolivia does not include group taxation rules within its legislation.

### *Transfer pricing*
Bolivian legislation does not include provisions for transfer pricing; however, transactions carried out between related companies must be performed at market value or as they were carried between third parties (i.e. sort of arm's-length principle) and any excess must be considered non-deductible for tax purposes. Note that there are not further regulations as regards to how taxpayers must demonstrate that transactions carried out between related parties were carried out at market value.

### *Thin capitalisation*
Bolivian legislation does not include provisions for thin capitalisation apart from establishing restrictions on deductibility of interest when funding is provided by shareholders *(see Interest expense in the Deductions section)*.

## *Tax credits and incentives*

### *Investment incentives*
No incentives are granted in Bolivia for domestic or foreign investment.

### *Export incentives*
Export activities benefit from reimbursement of VAT and customs duties paid in the process of producing goods to be exported (with some limitations for oil/gas companies).

### *Other incentives*
Foreign exchange transactions are legal in Bolivia, and a system of free-floating exchange rates exists.

Tourist and lodging services by hotels to foreign tourists without a residence or address in the country are exempt from VAT.

### Regional manufacturing tax incentives
New investments in manufacturing in the states of Oruro and Potosi are entitled to the following tax exemptions:

| Exemption | Conditions of exemption |
|---|---|
| Import tariffs and VAT on imported machinery | Machinery imported exclusively for the new industry until start-up of operations. |
| Import tariffs on imported inputs | They do not replace domestic inputs of the same kind and are destined to a transformation process. The exemption is granted for the first ten years of operation. |
| Transaction tax | For ten years from the start-up of operations. |
| CIT | For ten years from the start-up of operations if the amount exempt is reinvested in fixed assets in the following fiscal year. |

## Withholding taxes

### Payments made to Bolivian residents
Dividends paid to Bolivian residents, either individuals or corporations, are not taxable.

Payments made by corporations to individuals with respect to the acquisition of goods or provision of services that are not supported with an invoice or fiscal receipt are subject to a WHT of 8% on goods and 15.5% on services.

### Payments to non-residents
Dividend payments, distributions of profits to the head office by Bolivian branches, interest payments, royalty payments, and fees paid for any type of services made to non-residents are subject to a WHT of 12.5%.

### Tax treaties
Bolivia currently has in force double tax treaties (DTT) with the Andean Community (i.e. Colombia, Ecuador, and Peru), Argentina, France, Germany, Spain, Sweden, and the United Kingdom.

Beneficial WHT rates on dividend distributions are provided by DTT with Spain and Sweden at 10% and 0%, respectively, provided the Spanish or Swedish holding company demonstrates it is the ultimate beneficial owner and holds more than a 25% interest in the Bolivian company.

## Tax administration

### Returns
CIT is assessed on a self-assessment basis every fiscal year, and the due date for submission and payment is 120 days after the fiscal year-end. Tax returns must be accompanied by audited financial statements (if applicable) and ancillary tax information as requested by the tax authorities.

The fiscal year varies according to the activity of the corporation. Banks and commercial and other service activities have a fiscal year end as of 31 December; industrial, oil, and gas companies as of 31 March; agribusiness and forestry companies as of 30 June; and mining companies as of 30 September.

### *Payment of tax*
CIT is payable in one annual payment, except for mining companies which are obliged to make advance payments on a monthly basis with respect to the additional tax (i.e. 12.5% and 7.5% for exploitation and manufacturing mining companies, respectively).

## Significant developments

### New law on corporate income in Brčko District

The new Corporate Income Tax Law of Brčko District is applicable as of 1 January 2011. The new law is now in the line with corporate income tax regulations of the Federation of Bosnia and Herzegovina and Republika Srpska. However, significant differences still exist.

### Transfer pricing increasingly in the focus of the local tax authorities

The transfer pricing provisions were included in the Corporate Income Tax Laws of all three administrative entities of Bosnia and Herzegovina a few years ago. However, transfer pricing has never been of interested to the tax authorities until recently when the tax authorities included a transfer pricing review in several tax audits. Transfer pricing audits might increase due to the requirement of the government to increase tax revenue.

## Taxes on corporate income

Bosnia and Herzegovina consists of two entities: Federation of Bosnia and Herzegovina (FBiH) and Republika Srpska (RS), with a third region, the Brčko District (BD), being administered by both. Direct taxes are imposed on entities at the district level, while indirect tax regulations are imposed at the state level. Corporate income tax (CIT) systems in Bosnia and Herzegovina have been partially harmonised in the past few years, but significant differences remain.

The Federation of Bosnia and Herzegovina, Republika Srpska, and the Brčko District tax resident corporations on a worldwide basis. Non-residents are taxed on income realized in the FBiH, RS, and BD territories.

### FBiH CIT

A CIT payer in the Federation of Bosnia and Herzegovina is a resident business association or other legal entity performing independent and permanent business activity through the sales of products and providing services on the market for the purpose of generating profit.

A CIT payer in the Federation of Bosnia and Herzegovina is also a non-resident who generates profits through business activity from a business unit in the territory of the Federation of Bosnia and Herzegovina.

A non-resident whose registered seat or management is not in the Federation of Bosnia and Herzegovina and who does not have a business unit in the Federation of Bosnia and Herzegovina is subject to withholding tax (WHT) for income generated in the Federation of Bosnia and Herzegovina.

The CIT rate in the Federation of Bosnia and Herzegovina is 10%.

***RS CIT***
A CIT payer in Republika Srpska is:

- A legal entity from Republika Srpska that generates income from any source in Republika Srpska or abroad.
- A business unit of a legal entity that generates income in the territory of Republika Srpska.
- A non-resident legal entity that conducts business activity and has a permanent establishment (PE) in Republika Srpska, for income that is related to that PE.
- A non-resident legal entity that generates income from immovable property in Republika Srpska, for the income generated in Republika Srpska.
- A non-resident legal entity that generates income in Republika Srpska, not mentioned above, and is subject to WHT in accordance with the CIT law of Republika Srpska.

The CIT rate in RS is 10%.

***BD CIT***
A CIT payer in Brčko District is:

- A legal entity from Brčko District that generates income from any source in Bosnia and Herzegovina or abroad.
- A business unit of a legal entity with headquarters in the Federation of Bosnia and Herzegovina or Republika Srpska, for income generated in Brčko District.
- A non-resident legal entity that conducts business activity and has a PE in Brčko District, for income that is related to that PE.
- A non-resident legal entity that generates income from immovable property in Brčko District, for the income generated in Brčko District.
- A non-resident legal entity that generates income in Brčko District, not mentioned above, and is subject to WHT in accordance with the CIT law of Brčko District.

The CIT rate in Brčko District is 10%.

## *Corporate residence*

***FBiH residency***
Under FBiH CIT law, a resident is a legal entity whose headquarters (registration) is entered into a court registry or whose management and supervision over the business activities is located in the Federation of Bosnia and Herzegovina.

A PE of a non-resident is a permanent place of business through which the non-resident performs activity in whole or partially throughout the territory of the Federation of Bosnia and Herzegovina.

A PE under FBiH CIT law is considered to be one of the following:

- Management headquarters.
- Branch office.

- Business office.
- Factory.
- Workshop.
- Location of natural resources extraction.
- Construction site (construction or mounting project) when the work is performed during a period exceeding six months.
- Providing consulting or business services lasting for a period exceeding three months consecutively over a 12-month period.
- A representative acting independently on behalf of a non-resident related to the activities of signing a contract or keeping supplies of products delivered on behalf of a non-resident.

### *RS residency*
Under RS CIT law, a resident is a legal entity registered in Republika Srpska.

A PE is considered to be a place of business of a non-resident in Republika Srpska (i.e. construction works, installation and assembly works, infrastructure used for research or exploitation of natural resources or supervisory of the same). A PE shall also be considered to be a place of business where an individual or legal person has the authorisation to conclude contracts for a foreign legal entity.

### *BD residency*
The BD CIT law prescribes that a resident is a legal entity registered in Brčko District.

A PE of a non-resident in Brčko District is considered to be:

- construction works, installation and assembly works, infrastructure used for research or exploitation of natural resources, or supervisory of the same, or
- a place of business where an individual or legal person has the authorisation to conclude contracts for a foreign legal entity.

## *Other taxes*

### *Value-added tax (VAT)*
The standard VAT rate is 17%, and the VAT regime applies equally throughout the country of Bosnia and Herzegovina. There is no reduced VAT rate in Bosnia and Herzegovina.

Taxable persons are all individuals and legal entities registered, or required to be registered, for VAT. Any person making taxable supplies of goods and services that exceeds or is likely to exceed a threshold of 50,000 konvertibilna maraka (BAM) (EUR 25,000) is required to register as a VAT payer.

The export of goods is zero-rated.

Taxable transactions include the supply of goods and services in Bosnia and Herzegovina by a taxable person, as well as the importation of goods to Bosnia and Herzegovina by any person. The following transactions are also taxable:

- Transactions for no consideration or for a consideration less than the market value.
- The private use of taxable goods by a taxable person (self-supply).

The following services are exempt from VAT in Bosnia and Herzegovina:

- The leasing and subletting of residential houses, apartments, and residential premises for a period of longer than 60 days.
- The supply of immovable property, except for the first transfer of the ownership rights or the rights to dispose of newly constructed immovable property.
- Financial services.
- Insurance and reinsurance services.
- Educational services provided by private or public educational institutions.
- Postal services.

The VAT period is one calendar month.

Any tax credit that has not been used after a period of six months shall be refunded. Registered exporters are to be refunded within 30 days.

### *Excise duties*
There is a single excise regime throughout Bosnia and Herzegovina which levies excise tax on the following products: petroleum products, tobacco products, non-alcoholic drinks, alcohol and alcoholic drinks, beer and wine, and coffee (unroasted, roasted, and ground coffee and coffee extracts). The duties on petroleum products and drinks are set at a specific amount per litre, and the coffee excise is a specific amount per kilo.

### *Customs duties*
The customs policy law and the rates of customs tariffs to be applied exist and are largely based on European Union (EU) standards. Bosnia and Herzegovina has signed the Stabilisation and Association Agreement (SAA) and the Central European Free Trade Agreement (CEFTA).

### *Property taxes*
#### FBiH property taxes
FBiH property taxes are imposed on the cantonal level (ten cantons in total), and the rates as well as the taxpayers are different between the cantons.

#### RS property taxes
RS property taxes are imposed on the entity level. The annual tax rate is between o.05% and 0.5% of the market value of the property. The applicable tax rate is determined every year by the municipalities.

#### BD property taxes
BD property taxes are imposed by the BD assembly. The annual tax rate is between 0.05% and 1% of the market value of the property. The rate is adopted by the assembly for every year based on the proposed annual budget.

### *Tax on transfer of land and real estate*
#### FBiH transfer taxes
The FBIH tax on transfer of land and real estate is imposed at the cantonal level. The rate differs by canton; however, it cannot be higher than 5%.

#### RS and BD transfer taxes
There is no tax on transfer of land and real estate in Republika Srpska and Brčko District.

### *Other taxes*
There are several other taxes introduced at the entity, cantonal, and municapility level. The duties differentiate based on company location, business size, and type of business.

FBiH other taxes include the communal tax, fire prevention contribution, tourist community contribution, forestry contribution fee, Foreign Trade Chamber of Bosnia and Herzegovina duty, Chamber of Commerce FBiH duty, and administrative stamp duties.

RS other taxes include the special republic tax, communal tax, forestry contribution fee, fire prevention contribution, Foreign Trade Chamber of Bosnia and Herzegovina duty, Chamber of Commerce FBiH duty, and administrative stamp duties.

BD other taxes include the communal tax, fire prevention contribution, forestry contribution fee, Foreign Trade Chamber of Bosnia and Herzegovina duty, and administrative stamp duties.

## *Branch income*

Representative offices of foreign companies are permitted, although the concept of an international branch has not been recognized in Bosnia and Herzegovina.

## *Income determination*

Taxable profit is profit determined by adjusting the accounting profit as stated in the profit and loss statement and determined in accordance with International Financial Reporting Standards (IFRS) and accounting legislation, in accordance with the provisions of the CIT law.

### *FBiH income*
Income for assessment of taxable profit in the Federation of Bosnia and Herzegovina is income from the sales of products, services, goods, and materials, as well as financial, extraordinary and other income calculated in the profit and loss balance in accordance with accounting regulations and International Financial Reporting Standards/ International Accounting Standards (IFRS/IAS).

Income on the basis of collected written-off debt, in the event that it was included in income in a previous period and was not subject to tax allowable or recognised expenditure, shall not be included in the tax base.

There are no deferral or anti-deferral provisions in the Federation of Bosnia and Herzegovina.

#### Inventory valuation
Expenses of production in accordance with accounting regulations and IFRS/IAS shall be recognised in the value of stocks of unfinished production, semi products, and finished products for the calculation of taxable profit.

The inventory is valued by using the average price method.

### Capital gains
The taxable base shall include profit from liquidation and capital gain from the balance sheet.

### Dividend income
Dividends realised based on participation in the capital of other taxpayers shall not be included in the tax base. Shares in the profit of a business association will be considered dividends.

### *RS income*
Taxable revenue for the purpose of computing the tax base in Republika Srpska includes all revenue (domestic and foreign) from whatever source derived whether in cash or in kind or whether related or unrelated to the legal person's economic activity.

In the event of revenue received in the form of property (other than cash) or services, the amount of revenue is equal to the market price of the property or services received.

### Inventory valuation
Inventory includes goods used for resale, final goods produced by the taxpayer, semi-final goods used for further production, as well as main and auxiliary materials for production.

Purchase value of inventories at the beginning and end of a fiscal year has to be expressed using the same method for determination of purchase value of inventories.

The purchase value of inventories can be determined by using the first in first out (FIFO) method or the weighted average cost method.

### Capital gains
Capital gain is realised through the sale or other type of transfer of capital or investment assets and represents a difference between the sales price and adjusted base of an asset. The sales price is the contracted price (i.e. the market price established by the competent tax authority in case it finds the contracted price to be lower than the market price).

Capital gains or losses realised during the fiscal year can be offset, and the realised net gain or loss is added or subtracted from the taxable base, if they are not already included in the income or expense.

### Dividend income
Income from dividends is not included in the taxable base.

### *BD income*
Taxable income in Brčko District includes all income from any source (domestic or foreign), whether in cash or in kind, independently of the fact of whether the income is related to the business activity of the legal person.

### Inventory valuation
The purchase value of inventories can be determined by using the first in first out (FIFO) method or the average cost method.

### Capital gains
Capital gain is realized by sale or transfer of capital and investment goods and represents positive difference between the sales price and adjusted property base.

### Dividend income
Income from dividends is not included in the taxable base.

## *Deductions*

### *FBiH deductions*
Expenditures are deductible from revenue in computing the FBiH tax base if the expenditures directly relate to the realised revenue.

### Depreciation
Depreciation cost is deductible only if it relates to the property subject to depreciation and being used.

Depreciation of fixed assets is deductible up to the amount established by proportionate application of the highest annual depreciation rates using the linear method, prescribed by the FBiH government, as follows:

| Assets | Rate (%) |
|---|---|
| Buildings, except | 10 |
| Management, administration, office, and other buildings for providing service activities | 3 |
| Apartment houses, hotels, restaurants | 14.3 |
| Roads, communal objects, upper railway rails machine | 14.3 |
| Equipment, vehicles, mechanicals except | 20 |
| Equipment for water management, water-supply, and canalisation | 14.3 |
| Computers and equipment for environment protection | 33.3 |
| Crops | 14.4 |
| Livestock units | 40 |
| Intangible non-current assets | 20 |

Property being depreciated with a value of less than BAM 1,000 may be fully deducted in the purchase year, on condition that that the property was put in service.

The purchase value of computer hardware and software may be deducted fully in the year the purchase was made.

Depreciated assets, once depreciated, shall not be re-included in the depreciation calculation for the purposes of the tax balance.

Depreciation is allowed for increases in the value of fixed assets due to revalorisation in accordance with IFRS/IAS, up to the amount of calculated depreciation on the revalorisation base and by using the proportion method prescribed by law.

### Bad debt
The expenses occurring based on the write-off of doubtful debts are deductible. Debts are considered doubtful if one of the following is fulfilled:

- The debts have not been collected within 12 months from due date.
- The taxpayer has started court procedures in regard to the receivable or started the enforced collection procedure.
- The receivable is registered in the bankruptcy procedure.
- Agreement has been reached with the debtor in the bankruptcy or liquidation procedure.

### Tax reserves
Tax deductible expenditures include expenditures to set up reserves for the following:

- Severance pay paid up to the prescribed amount.
- Expenditures of natural resources renewal.
- Expenditures in guaranteed time frames.
- Initiated court procedures.
- Potential credit losses of banks and microcredit organisations.

### Charitable contributions
Costs of humanitarian, cultural, educational, scientific, and sports purposes (except professional sports) are deductible in the amount of up to 3% of total income.

### Other deductible expenses
Representation costs pertaining to business activity are deductible in the amount of 30% of representation costs.

Expenses of membership fees to the chambers are deductible in the amount not exceeding 0.1% of total income, with the exception of membership fees regulated by the law.

Expenses based on sponsorship are deductible in the amount of 2% of total income.

### Net operating losses
Tax losses may be offset against profits in a future tax period, not exceeding five years. Tax losses are utilised on a first in first out (FIFO) basis.

Tax losses cannot be carried back.

### Payments to foreign affiliates
Payments to foreign affiliates are generally allowed if they relate to realised revenue.

### *RS deductions*
Expenditures are deductible from revenue in computing the RS tax base if the expenditures directly relate to the realised revenue.

### Depreciation
Depreciation deductions are allowed only with respect to depreciable assets that are being used.

A depreciable asset is any tangible or intangible asset that is held for use in the production or supply of goods and services, for rental to others, or for administrative purposes. Land or any other asset that does not decrease in value through wear and tear or obsolescence is not considered a depreciable asset.

The assets are depreciated using the linear method of depreciation except for machines and equipment which can be depreciated with acceleration (first year at 40%, second year at 30%, and third year at 30%). The CIT Rulebook prescribes a wide range of accepted depreciation rates, depending on type of assets, ranging from 1% to 50% annually.

### Bad debts
A legal person using the accrual form of accounting is allowed a deduction with respect to bad debts and reserves.

Legal persons, other than banks, authorised credit institutions, or insurance companies, are entitled to a bad debt deduction that arose in connection with a sale of goods or services but only if the revenue from the sale was previously included in the tax base of the legal person.

A loan or trade receivable is considered to be a bad debt only if the receivable has not been collected within 12 months from the due date, and:

- the taxpayer has started court litigation for the receivables or if enforced collection procedure is initiated
- the receivables are registered in the bankruptcy procedure of the debtor, or
- an agreement has been reached with the debtor who is not a physical or related person in the bankruptcy or liquidation procedure.

In the case of a bank or other authorised credit institution, a deduction is allowed for increases in the reserve account for customary losses due to unpaid loans, and the amount may not exceed 20% of the tax base.

In the case of an insurance or reinsurance company, a deduction is allowed for increases in reserves as registered in accounting documents and as authorised according to applicable law. For insurance contracts pertaining to reinsurance, reserves are to be reduced so that they cover only part of the risk remaining with the insurer, and the amount may not exceed 20% of the tax base.

The tax savings resulting from a reduction or cancellation of any reserve that is collected later on will be included in taxable revenue at the moment of collection in accordance with this law.

### Charitable contributions

Contributions to public institutions and humanitarian, cultural, and educational organisations are deductible in an amount not exceeding 3% of the fiscal year's total revenue. Any excess contribution may be carried forward three years.

### Other deductible expenses

Expenditures that are recognised and deductible from revenue also include the following:

- 30% of the cost of entertainment, meals, and amusements related to the legal person's economic activity.
- Sponsorship expenses in an amount not exceeding 2% of the fiscal year's total revenue.
- Scholarships to students in an amount of up to 75% of average monthly net salary per employee in Republika Srpska in accordance with the latest published data from the body in charge of statistics.

### Net operating losses

Losses may be carried forward and offset against income in the following five years. Tax losses are utilised on a FIFO basis.

Tax losses cannot be carried back.

### Payments to foreign affiliates

Payments to foreign affiliates are generally allowed if they relate to realised revenue.

### *BD deductions*
Expenditures are deductible from revenue in computing the BD tax base if the expenditures directly relate to the realised revenue.

### Depreciation
Depreciation deductions are allowed only with respect to depreciable assets that are being used.

A depreciable asset is any tangible or intangible asset that is held for use in the production or supply of goods and services, for rental to others, or for administrative purposes. Land or any other asset that does not decrease in value through wear and tear or obsolescence is not considered a depreciable asset.

The assets are depreciated using the linear method of depreciation except for machines and equipment which can be depreciated with acceleration (first year at 40%, second year at 30%, and third year at 30%). The CIT Rulebook prescribes a wide range of accepted depreciation rates, depending on type of assets.

The calculation of depreciation for newly purchased property starts the following month on the day when it was put to use. The calculation of depreciation for newly constructed buildings starts from the first day of the following year in which it was put to use.

### Bad debts
Legal persons, other than banks, authorised credit institutions, or insurance companies, shall be entitled to a bad debt deduction that arose in connection with a sale of goods or services but only if the revenue from the sale was previously included in the tax base of the legal person. For this purpose, a credit or trade receivable is considered a bad debt only if one of the following is true:

- It is more than 12 months past the due date for payment of the invoiced receivable and the creditor has sued for the receivables or an enforced collection procedure is initiated due to receivables.
- The receivables are registered in the bankruptcy procedure of the debtor or an agreement has been reached with the debtor who is not a physical or related person in the bankruptcy or liquidation procedure.

In the case of a bank or other authorised credit institution, a deduction is allowed for increases in the reserve account for customary losses due to unpaid loans, and the amount may not exceed 20% of the tax base.

In the case of an insurance or reinsurance company, a deduction is allowed for increases in reserves as registered in accounting documents and as authorised according to applicable law. For insurance contracts pertaining to reinsurance, reserves are to be reduced so that they cover only part of the risk remaining with the insurer, and the amount may not exceed 20% of the tax base.

### Charitable contributions
Contributions to public institutions and humanitarian, cultural, and educational organisations are deductible in an amount not exceeding 3% of the fiscal year’s total revenue.

**Other deductible expenses**
Expenditures that are recognised and deductible from revenue also include the following:

- 30% of the cost of entertainment related to the legal person's economic activity.
- Awards to employees, up to the prescribed amount.
- Costs of business trips, meal allowance, transportation, and holiday allowance, up to the prescribed amount.
- Sponsorship expenses in an amount not exceeding 2% of the fiscal year's total revenue.
- Scholarships to students in an amount up to 75% of average monthly net salary in Brčko District.
- Committee membership fees, up to 0.2% of total revenue in the tax year.
- Expenses for research and development (R&D) in accordance with the Rulebook.

**Net operating losses**
Losses may be carried forward and offset against income in the following five years. Tax losses are utilised on a FIFO basis.

Tax losses cannot be carried back.

**Payments to foreign affiliates**
Payment to foreign affiliates is generally allowed if it relates to realised revenue.

## *Group taxation*

### *FBiH group taxation*
A business association has the right to request tax consolidation on the condition that all businesses in the group are residents of the Federation of Bosnia and Herzegovina.

A headquarters company and its branches may form a business association when there is direct or indirect control between them with no less than 90% share.

A request for tax consolidation must be filed to the authorised branch office of the tax authorities by a headquarters company.

Each group member is required to file its tax balance, and the headquarters of the business association may file a consolidated tax balance for the group.

The consolidated tax balance may offset losses of one or more businesses against the profit of other businesses in the association.

Individual group members are liable for the tax calculated on the consolidated balance proportionately to the profit from the individual tax balance, and the headquarters is the payer of the tax calculated on the consolidated balance.

Once approved, tax consolidation shall be applied for the consecutive period of no less than five years.

When one, several, or all the businesses in the association later opt for individual taxation, all group members shall be obliged to pay the difference proportionately on behalf of the tax privilege they have used.

***RS group taxation***
An affiliated group of legal persons located within Republika Srpska may elect to file a consolidated annual tax declaration.

An affiliated group of legal persons is a group of one or more legal entities from Republika Srpska that are connected through the ownership of stock with a common parent, provided that the common parent owns at least 80% of the stock in a legal person that is included in the affiliated group. If the common parent does not own at least 80% of the stock in a legal person that is included in the affiliated group, then the parent may file a consolidated tax declaration if one or more other legal persons in the affiliated group own at least 80% of the stock in such legal person.

***BD group taxation***
An affiliated group of legal persons located within Brčko District may elect to file a consolidated annual tax declaration.

An affiliated group of legal persons is a group of one or more legal entities from Brčko District that are connected through the ownership of stock with a common parent provided that the common parent owns at least 80% of the stock in a legal person that is included in the affiliated group.

***Transfer pricing***
Transfer pricing requirements are imposed at the entity level. The Federation of Bosnia and Herzegovina and Republika Srpska have different regulations in place, including different rules in regard to applicable methods, related parties, and documentation. The regulations in place do not differ if the transactions are within one entity, cross-border, or international. Basically, this means that all transactions can fall under the transfer pricing scope.

Brčko District has issued a new law on corporate income tax which states that the Rulebook will introduce provisions in regard to transfer pricing; however, the Rulebook has not been published yet.

With Bosnia and Herzegovina not being an EU or an OECD member, the local legislation does not have the same requirements with respect to transfer pricing documentation as in EU countries nor does the legislation refer to the OECD guidelines.

**Related parties**
As per the applicable RS legislation, related parties of a legal person are considered to be physical or legal persons if those persons possess more than 10% of active shares with voting rights.

A legal person can be a related party if it possesses more than 10% active shares in the other person indirectly or directly. Indirect ownership is considered to be:

- If a legal person possesses more than 10% of a dependant company, and that dependant company possesses more than 10% in the other legal person.
- If both legal persons have a common shareholder who possesses more than 10% active shares with voting rights in both legal persons.

In the Federation of Bosnia and Herzegovina, a related party is considered to be an individual or legal person who has the possibility of control or significant influence on the business decisions of the taxpayer. Owning more than half or individually the most stocks or shares in a company is considered to be enabled control.

Significant influence is considered to be mutually high sales turnover, technical dependence, or otherwise gained control over the management.

**Prescribed methods**
The RS regulation prescribes the following five methods that can be used in order to establish whether the prices are in accordance with the arm's-length principle:

- Comparable price method.
- Cost plus method.
- Resale price method
- Profit split method.
- Transactional net margin method.

### *Thin capitalisation*
There are no thin capitalisation rules in Bosnia and Herzegovina.

## *Tax credits and incentives*

### *FBiH tax incentives*
**Foreign tax credit**
When a taxpayer generates income or profit through business activities outside of the Federation of Bosnia and Herzegovina (directly or through a business unit) and pays the profit tax on such activities, the tax paid abroad shall be credited up to the amount of the profit tax that would have been paid for the income or profit generated by the same activities in the Federation of Bosnia and Herzegovina.

**Investment incentive**
A taxpayer who invested in production within the territory of the Federation of Bosnia and Herzegovina for five consecutive years for a minimum fee of BAM 20 million will be relieved from taxation for a period of five years, starting with the first year in which it has invested at least BAM 4 million.

**Special needs employment incentive**
A taxpayer who employs more than 50% of handicap or special needs individuals within its company for a period of time longer than one year is relieved from CIT for the year in which more than 50% of handicap or special needs individuals are employed within the company.

**Export incentive**
A taxpayer who realises more than 30% of annual income by export will be relieved from CIT for that year.

### *RS tax incentives*
**Foreign tax credit**
If a legal entity from Republika Srpska obtains revenue from a foreign state and the revenue is taxed both in Republika Srpska and in the foreign state, then the tax paid to the foreign state, whether paid directly or withheld and remitted by another person, is to be credited from RS CIT, unless such legal entity from Republika Srpska elects to treat the foreign tax as a deductible expenditure in determining the fiscal year tax base.

There are no other tax incentives available in Republika Srpska.

### *BD tax incentives*

#### Foreign tax credit

If a legal entity from Brčko District obtains revenue from a foreign state and the revenue is taxed both in Brčko District and in the foreign state, then the tax paid to the foreign state, whether paid directly or withheld and remitted by another person, is to be credited from the BD CIT, unless such legal entity from Brčko District elects to treat the foreign tax as a deductible expenditure in determining the fiscal year tax base.

#### Investment incentive

For a taxpayer who invests in machines and equipment for performing its own registered business activity on the territory of Brčko District, a deduction is allowed for the amount of the investment.

#### Employment incentive

For a taxpayer who employs new employees for an indefinite period of time during the tax period, a second deduction is allowed for the total amount of paid gross salaries for the new employees.

## *Withholding taxes*

### *FBiH WHT*

WHT in the Federation of Bosnia and Herzegovina is calculated on non-resident income generated throughout the territory of the Federation of Bosnia and Herzegovina.

The base for calculation of WHT is the gross amount paid by a resident of the Federation of Bosnia and Herzegovina to a non-resident for dividends, interest, royalties and other intellectual property rights, compensations for market research, tax consulting services, auditors' services, fun and sports events, premium insurance for insurance or reinsurance of risk in the Federation of Bosnia and Herzegovina, telecommunication services between the Federation of Bosnia and Herzegovina and other countries, as well as all other services performed on the territory of the Federation of Bosnia and Herzegovina.

WHT shall be paid at the rate of 5% on dividend payments and 10% for interest, royalties, and other, if not reduced under a tax treaty.

### *RS WHT*

Any legal or physical person from Republika Srpska, as well as any non-resident legal or physical person with PE in Republika Srpska, who pays revenue to a non-resident legal person is to withhold tax from the total payment of revenue and is to remit the withheld tax to the Public Revenues Account of Republika Srpska.

The WHT applies to the following revenue payments, regardless of whether the revenue is received in Republika Srpska or abroad:

- Payment of interest or its functional equivalent under financial instruments and arrangements from a resident.
- Payment for entertainment or sporting activities carried out in Republika Srpska, regardless of whether the revenue is received by the entertainer or sportsman or by another person.

- Payment for the performance of management, consulting, financial, technical, or administrative services, if the revenue is from a resident or if the revenue is paid by or included in the books and records of a PE in Republika Srpska or if such payment is deducted for the purpose of determining the tax base.
- Payment in the form of insurance premiums for the insuring or reinsuring of risks in Republika Srpska.
- Payment for telecommunication services between Republika Srpska and a foreign state.
- Payment of royalties.
- Payment of lease for movable property.
- Payment for the performance of other services in Republika Srpska.

WHT is not due on dividend payments. The WHT rate in Republika Srpska is 10%.

### *BD WHT*

Any legal or physical person from Brčko District, as well as any non-resident legal or physical person with PE in Brčko District, who pays revenue to a non-resident legal person is to withhold tax from the total payment of revenue and is to remit the withheld tax to the Public Revenues Account of Brčko District.

The WHT applies to the following revenue payments, regardless of whether the revenue is received in Brčko District or abroad:

- Payment of interest or its functional equivalent under financial instruments and arrangements from a resident.
- Payment for entertainment or sporting activities carried out in Brčko District, regardless of whether the revenue is received by the entertainer or sportsman or by another person.
- Payment for the performance of management, consulting, financial, technical, or administrative services, if the revenue is from a resident or if the revenue is paid by or included in the books and records of a PE in Brčko District or if such payment is deducted for the purpose of determining the tax base.
- Payment in the form of insurance premiums for the insuring or reinsuring of risks in Brčko District.
- Payment for telecommunication services between Brčko District and a foreign state.
- Payment of royalties.
- Payment of lease for movable property.
- Payment for the performance of other services in Brčko District.

WHT is not due on dividend payments. The WHT rate in Brčko District is 10%.

## *Tax administration*

### *FBiH tax administration*

#### Returns

An FBiH taxpayer is obliged to file correctly and accurately a completed tax return (declaration) with the tax balance to the authorised branch office of the tax administration by 31 March of the following year.

The deadline for submission of annual calculation of business results is 28 February of the following year.

#### Payment of tax
A taxpayer shall pay FBiH CIT pursuant to the final tax declaration. CIT prepayments are determined based on the tax return from the prior year and have to be paid monthly until the last day of the month for the previous month.

### *RS tax administration*
#### Returns
The RS tax declaration for a tax year shall be filed no later than 90 days upon the end of the tax year, and in case of a calendar year, no later than 31 March of the current year for the previous year.

#### Payment of tax
A taxpayer shall pay RS CIT pursuant to the final tax declaration. CIT prepayments are determined based on the tax return from the prior year and have to be paid monthly until the tenth day of the month for the previous month.

### *BD tax administration*
#### Returns
The BD tax declaration for a tax year shall be filed no later than 90 days upon the end of the tax year, and in case of a calendar year, no later than 31 March of the current year for the previous year.

#### Payment of tax
A taxpayer shall pay BD CIT pursuant to the final tax declaration. CIT prepayments are determined based on the tax return from the prior year and have to be paid monthly until the tenth day of the month for the previous month.

## Significant developments

Botswana is effecting the following changes to its tax regime with effect as of 1 July 2011.

### Corporate income tax (CIT)

- The two tier CIT system will be replaced by a single CIT rate of 22% for resident companies.
- The CIT rate for non-resident companies (i.e. branch income) will increase to 30%.
- The tax rate for manufacturing companies and IFSC companies will remain at 15% in respect of approved activities for such businesses.
- Companies will cease to generate Additional Company Tax (ACT) for the tax year ending 30 June 2012 and subsequent tax years.
- Utilisation of accumulated ACT will end on 30 June 2011, after which date all unutilised ACT will fall away.
- Withholding tax will not be able to be offset against CIT.

### Withholding tax (WHT)

The WHT on dividends will be reduced to 7.5%.

### Capital gains

The exemption from tax on capital gains on the sale of certain shares, units, or debentures of a resident company will only apply if the shares, units, or debentures were held by the taxpayer for a period of at least one year prior to the date of disposal.

### Mines and minerals

The mining tax rate for non-diamond mining companies (derived in terms of the existing formula) will not be less than the CIT rate of 22%.

## Taxes on corporate income

Botswana has a source-based taxation system.

Currently, CIT is imposed at a rate of 15% for non-manufacturing companies and 5% for manufacturing companies. ACT is imposed at a rate of 10%, and the ACT amount could be carried forward up to five years to be offset against WHT payable on dividends paid.

As of 1 July 2011 (i.e. during the 2012 tax year), CIT will be charged at a single flat rate of 22% with no ACT component. Any accumulated ACT can be utilised before 30 June 2011, after which date all unutilised ACT will fall away.

### *Sample corporate tax calculation for a non-manufacturing company during the fiscal year ending 30 June 2011*

| | | BWP* |
|---|---|---|
| **Net income before taxation** | | **1,000,000** |
| **Add** | | |
| Depreciation | 50,000 | |
| Accounting loss on disposal of machinery and equipment | 5,000 | |
| Donations | 1,000 | |
| Balancing charge (Tax profit on disposal of machinery and equipment) | 35,000 | 91,000 |
| | | 1,091,000 |
| **Less** | | |
| Accounting profit on disposal of industrial buildings | 33,000 | |
| **Initial allowance:** | | |
| Industrial buildings at 25% on cost | 100,000 | |
| **Annual allowances:** | | |
| Commercial buildings at 2.5% on cost | 5,000 | |
| Industrial buildings at 2.5% on cost | 10,000 | |
| Plant and machinery at 15% on cost | 40,000 | |
| Office equipment at 10% on cost | 2,000 | |
| Computer equipment at 25% on cost | 10,000 | |
| Motor vehicles at 25% on cost (Subject to BWP 175,000 limit for motor cars) | 20,000 | |
| Approved training expenditure (Additional 100% of cost of 20,000) | 20,000 | 240,000 |
| | | 851,000 |
| Add – Taxable capital gain on disposal of property | | 49,000 |
| Taxable income | | 900,000 |
| Tax at 25%** | | 225,000 |

* Botswana pulas (BWP)
**CIT at a rate of 15% plus ACT at a rate of 10%.

### *International Financial Services Centre (IFSC) profits*

IFSC companies are currently taxed at a flat rate of 15% and will continue to be taxed at that rate going forward. Companies must apply for a certificate to be classified as IFSC companies, which deal only in specified services and only with non-residents.

### *Mining profits*

Mining profits, other than profits from diamond mining, shall be taxed according to the following formula:

Annual tax rate = 70 minus (1,500/x), where x is taxable income as a percentage of gross income.

The tax rate shall not be less than the combined CIT and ACT rate (25%) prior to 1 July 2011 and not less than the flat CIT rate (22%) as of 1 July 2011.

### *Diamond mining*

Diamond mining is usually taxed in terms of an agreement with the Government of Botswana.

## Corporate residence

If a company's registered office or place of incorporation is in Botswana or if the company is managed and controlled in Botswana, then the company is a considered a resident of Botswana.

The term permanent establishment (PE) has been defined in the Income Tax Act only in the limited context of interest, commercial royalty, and management or consultancy fee. However, the term PE is defined in all the Double Taxation Agreements (DTA) that Botswana has entered into with other contracting states. The definition of PE in the DTA follows the definition in the Organisation for Economic Co-operation and Development (OECD) Model Tax Convention on Income and Capital.

## Other taxes

### Value-added tax (VAT)

VAT is imposed on taxable supplies and the importation of goods into Botswana. The standard VAT rate of 12 % applies to all supplies that do not qualify for an exemption or are not zero-rated.

### Capital transfer tax (CTT)

CTT is levied on the donee upon the transfer (by way of inheritance or gratuitous disposal of property) of tangible or intangible, movable or immovable property, at 12.5%.

### Vocational training levy (VTL)

VTL is payable when submitting the VAT return, by every tax payer who is registered for VAT. It is calculated as a percentage of turnover ranging from 0.2% to 0.05% depending on the turnover of the company.

### Transfer duties on immovable property

Transfer duty is levied at 5% of the value of immovable freehold and leasehold property. The first BWP 200,000 of such value is exempt from transfer duty in case of transfer to a Botswana citizen.

In the case of agricultural property, transfer duty is levied at the rate of 30% for a non-citizen. This duty is 5% in the case of a Botswana citizen.

## Branch income

Currently, CIT is payable on branch profits at the rate of 25%. As of 1 July 2011, the rate will increase to 30%.

## Income determination

### Inventory valuation

Inventories are valued at cost less such amounts, if any, that the Commissioner General believes are reasonable as representing the amount by which the value of such stock has been diminished because of damage, deterioration, obsolescence, or other cause. Although not expressly excluded by legislation, last in first out (LIFO) has not been accepted in practice by the tax authorities.

### *Capital gains*
Gains from disposal of specified capital assets (immovable property and marketable securities, including shares in private companies) are included in taxable income in the hands of the corporate taxpayer. Acquisition costs of immovable property are subject to a 10% compound annual addition for inflation for the period from acquisition to 30 June 1982, and thereafter to an inflation addition based on the increase in the consumer price index to the date of sale. For other gains, no inflation allowances are granted, but the taxable gain is set at 75% of the total gain.

Currently, the sale of any shares, units, or debentures of a resident company is exempt from tax under any of the following circumstances:

- The resident company whose shares are being sold is a public company.
- The shares, units, or debentures are traded on the Botswana Stock Exchange.
- The company has released for trading 49% or more of its equity on the Botswana Stock Exchange.

As of 1 July 2011, this exemption shall only apply if the shares, units, or debentures were held by the tax payer for a period of at least one year prior to the date of disposal.

The aggregate amount of capital losses is offset against the aggregate amount of capital gains in the same tax year. Any excess of loss is deducted from aggregate gains over losses accruing in the succeeding tax year only. Capital losses cannot, in any circumstances, be deducted against other income.

### *Dividend income*
Dividend income is not subject to tax.

### *Interest income*
In case of a resident company, interest income is included in gross income and taxed at the CIT rate. In case of a non-resident company, interest income will be subject to WHT, which will constitute a final tax.

### *Royalty income*
Royalty income is included in gross income and taxed at the CIT rate. In case of a non-resident company, royalty income will be subject to WHT, which will constitute a final tax.

### *Partnership income*
Partnership income is taxed in the hands of the partners, in proportion to their share in the partnership.

### *Foreign income*
Resident corporations are not generally taxed on a worldwide income basis. However, interest and dividend income from a foreign source is taxed in the hands of the resident company on an accrual basis. Relief is currently given for any WHT imposed on such income. As of 1 July 2011, however, WHT will not be able to be offset against CIT.

## *Deductions*

### *Depreciation and depletion*
Annual and capital allowances available are as follows.

### Companies other than mining companies

Annual taxation allowances for expenditures incurred on machinery and equipment before 30 June 1982 can be claimed up to 100%. This allowance may be for any proportion of previously unclaimed expenditures. For expenditures incurred on machinery and equipment after 30 June 1982, annual allowances are granted, calculated on cost by the straight-line method on the basis of the expected useful lives of the individual assets. Guidelines are provided for expected useful lives of different categories of assets, which vary from four to ten years. Book depreciation is not required to conform to tax depreciation. The capital allowance claimable on a company motorcar is restricted to a maximum of BWP 175,000.

An initial allowance of 25% of cost is granted on certain industrial buildings. All industrial and commercial buildings (excluding residential properties) are granted a 2.5% annual allowance based on cost or, in the case of an industrial building on which an initial allowance has been claimed, the original cost less the initial allowance.

Balancing allowances and charges are brought to account on the disposal of assets on which allowances have been claimed. Where disposal value of an item of machinery or equipment exceeds the difference between expenditures incurred on the asset and allowances granted, the whole amount is taxable as corporate income or the balancing charge can be offset against further additions of new equipment, thus providing rollover relief. However, there is no rollover relief on motorcars except where the cars are used in a car rental or taxi service business.

### Mining companies

In ascertaining the business income for any tax year from a business of mining, there shall be deducted from business income an allowance, to be known as a mining capital allowance, computed in accordance with 100% of the mining capital expenditure made in the year in which such expenditure was incurred, with unlimited carryforward of losses.

### *Taxes*

Any taxes paid are specifically disallowed in computing a company's taxable income.

### *Other significant items*

An allowance is granted for dwelling houses erected for employees by a business other than a mining business. The amount of the allowance is the lower of cost or BWP 25,000 for each dwelling house constructed.

A deduction of 200% of the cost of an approved training expenditure is allowed.

Companies with shareholders having 5% or more of equity, either directly or indirectly, are classified as close companies, and there are additional tax regulations in respect of these shareholders.

Small companies, that is resident private companies whose gross income does not exceed BWP 300,000, may elect that the company be taxed as a partnership.

Expenses incurred by the company for having its shares listed on the Botswana Stock Exchange are deductible in determining the chargeable income of the company.

### Net operating losses
Losses may be carried forward for five years, with the exception of farming, mining, and prospecting operations, for which there is no time limit. There is no allowance for carrybacks.

### Payments to foreign affiliates
Royalties, interest, and service fees paid to foreign affiliates are generally deductible, provided such amounts are at arm's length and WHT is paid.

In the case of a mining company, head office expenses allowed as a deduction in ascertaining gross revenue from mineral licence shall be limited to 1.5% of gross income for the year of assessment, and any excess of such expense above the limit shall be treated and taxed as a dividend.

Where the interest rate on a loan made by a foreign-based mining company to an affiliate mining company resident in Botswana is considered by the commissioner to be in excess of the market rate, such excess will be disallowed as a deduction and taxed as a dividend.

## Group taxation

There are no concessions for group taxation, other than for wholly-owned subsidiary companies of the Botswana Development Corporation Limited (BDC).

BDC was established in 1970 to be the country's main agency for commercial and industrial development. The Government of Botswana owns 100 percent of the issued share capital of the Corporation.

Where in any tax year a wholly owned subsidiary of BDC has incurred any assessed loss, such member may, during the current tax year, by notice in writing to the Commissioner General, elect that the whole or part of such assessed loss shall be deducted in ascertaining the chargeable income of one or more of the other wholly owned subsidiaries.

### Transfer pricing
Botswana currently does not have any transfer pricing regulations, so transfer pricing is currently monitored through the anti-avoidance provisions contained in Section 36 of the Income Tax Act.

The arm's-length principle should always be followed in transactions between related parties. If such transactions have created rights or obligations that would not normally be created between independent persons dealing at arm's length, the Commissioner General may determine the liability in such manner as deemed appropriate. However, related party balances arising out of normal trading transactions (e.g. credit purchases with 30 days credit period) would not be subjected to these provisions.

Interest (at prime rate) should be charged/provided on loans from shareholders/ amounts due to related parties. If no interest has been charged/provided, in terms of the close company legislation, BURS may deem interest at the prime rate prevailing at the beginning of the tax year, as income in the hands of the lender without allowing the corresponding interest as a charge against the profits of the borrower. The borrower is obliged to deduct WHT at the prevailing rate on the deemed interest.

Amounts due from shareholders/directors may be deemed as dividend income and shall form part of the taxable income of the borrower, in which event these will be taxed at the prevailing dividend WHT rate in the hands of the borrower.

### *Thin capitalisation*

Thin capitalisation rules can be found in the Income Tax Act, but only in relation to mining companies and IFSC companies.

Where a foreign controlled resident mining company has a foreign debt-to-equity ratio in excess of 3:1 at any time during the year of assessment, the amount of interest paid by the resident company during that year on that part of the debt that exceeds the ratio shall be disallowed as a deduction, and the amount so disallowed shall be treated and taxed as a dividend.

In case of an IFSC company, where an amount of foreign debt interest is allowable as a deduction in a particular tax year and, at any time during that tax year, the total foreign debt exceeds the foreign equity product for that year, then the amount of foreign debt interest ascertained in accordance with the following formula will be disallowed:

I x (A/B) x (C/365)

A = amount of the excess of the total foreign debt over the foreign equity product.

B = the total foreign debt.

C = the number of days in that tax year during which the total foreign debt exceeded the foreign equity product by that amount.

I = the foreign debt interest.

## *Tax credits and incentives*

To encourage investment in Botswana, extra tax relief on revenue or capital accounts will be granted for specific business development projects if the government is satisfied that such projects are beneficial to Botswana.

## *Withholding taxes*

WHT at the following rates must be deducted from payments to residents and non-residents unless a double taxation agreement exists.

| **Residents** | **WHT rate (%)** |
|---|---|
| Interest | 10 |
| Dividends (7.5% as of 1 July 2011) | 15 |
| Payments due under certain construction contracts | 3 |
| **Non-residents** | **WHT rate (%)** |
| Interest | 15 |
| Dividends (7.5% as of 1 July 2011) | 15 |
| Payments due under certain construction contracts | 3 |
| Payments for royalties, management, or consultancy fees | 15 |

| | |
|---|---|
| Payments for entertainment fees | 10 |

Botswana has tax agreements with the following countries, which provide for WHT at the rates shown.

| Recipient | Dividends (%) (1) | Interest (%) | Royalties (%) | Management and consultancy fees (%) |
|---|---|---|---|---|
| Mauritius | 5/10 (2) | 12 | 12.5 | 15 |
| South Africa | 10/15 (3) | 10 | 10 | 10 |
| Sweden | 15 | 15 | 15 | 15 |
| United Kingdom | 5/12 (2) | 10 | 10 | 7.5 |
| France | 5/12 (2) | 10 | 10 | 7.5 |
| Russia | 5/10 (2) | 10 | 10 | 10 |
| Barbados | 5/12 (2) | 10 | 10 | 10 |
| Seychelles | 5/10 (2) | 7.5 | 10 | 10 |
| Namibia | 10 | 10 | 10 | 15 |
| Zimbabwe | 5/10 (2) | 10 | 10 | 10 |
| India | 7.5/10 (2) | 10 | 10 | 10 |

Notes

1. It is expected that the reduction in the dividends WHT rate to 7.5% on July 2011 will result in a change in the DTA negotiated rates for dividend WHT.
2. 5% or 7.5% rate of WHT is applicable if the beneficial shareholder is a company resident in the double taxation agreement country and holds at least 25% of the share capital in the company paying dividends. Otherwise, the other rate applies (10% or 12% as the case may be).
3. 10% rate of WHT is applicable if the beneficial shareholder is a company resident in the double taxation agreement country and holds at least 25% of the share capital in the company paying dividends.

## *Tax administration*

### *Returns*

Botswana has a fiscal year ending on 30 June. However, a business may select its own accounting year, which may end on a date other than 30 June. This accounting year is accepted for the computation of the company's taxable income.

Botswana requires self-assessment, which means that the return submitted constitutes the assessment. The system is one that requires all taxpayers to file tax returns in standard format (providing information relating to taxable income earned) within four months after the financial year end of the company.

### *Payment of tax*

Under the self-assessment tax procedures, if the tax payable for a tax year exceeds BWP 50,000, then estimated tax is required to be paid in equal quarterly instalments over the period of 12 months ending on the company's financial year-end date. Accordingly, the first quarterly payment should be made within three months of the beginning of the financial year and the balance quarterly payments at three monthly intervals thereafter. The final (balance) payment, if any, is to be made within four months from the end of the financial year, when submitting the return.

Where the tax is less than BWP 50,000, then the tax is payable within four months from the company's financial year-end date.

## Significant developments

### New changes to the tax on financial transactions (IOF) rules

With the aim of stemming speculative short-term investment and the depreciation of the US dollar against the Brazilian real, the Brazilian government has adopted new fiscal measures. On 28 March 2011, the applicable IOF rate on foreign currency exchange transactions (on an inflow of funds into the country only) related to loans with an average payment term of up to 360 days and subject to registration at the Brazilian Central Bank was raised from 0% to 6%.

Only 8 days later (on 6 April ), the rules were amended so that the 6% rate now applies to foreign currency exchange transactions related to loans with an average payment term of up to 720 days (as opposed to 360 days).

Prior to these changes, only loan arrangements with an average payment term of up to 90 days were subject to the IOF tax at the rate of 5.38%.

### New regulation on Brazilian thin capitalisation rules

On 13 May 2011, the Brazilian Revenue Service issued Normative Instruction (NI) 1,154, with the aim of regulating the deductibility of interest and other general expenses paid or credited by a Brazilian source to individuals or legal entities considered related or resident/domiciled in a tax haven or in a jurisdiction under a privileged tax regime.

Especially in connection with the Brazilian thin capitalisation rules *(see the Group taxation section),* the NI details the concept of related party and the calculation procedures towards the debt/equity ratios and excess of interest expense to be added to the corporate income tax basis.

## Taxes on corporate income

Brazilian resident companies are taxed on worldwide income. Non-resident companies are generally taxed in Brazil through a registered subsidiary, branch, or permanent establishment (PE), based on income generated locally. Other than that, non-resident companies can be subject to withholding income tax on income derived from a Brazilian source.

Corporate income tax (Imposto de Renda de Pessoa Jurídica or IRPJ) is assessed at the fixed rate of 15% on annual taxable income, using either the 'actual profits' method or the 'presumed profits' method *(see the Income determination section)*.

### Surcharge

Corporate taxpayers are also subject to a surcharge of 10% on the annual taxable income in excess of 240,000 Brazilian real (BRL).

### Social contribution on net income

All legal entities are subject to a social contribution to the federal government (Contribuição Social sobre o Lucro Líquido or CSLL) at the rate of 9% (except for financial and insurance institutions, which are taxed at the rate of 15%), which is not deductible for IRPJ purposes. The tax basis is the profit before income tax, after some adjustments.

## Corporate residence

A corporation is considered resident in Brazil if it has been incorporated in Brazil, and its tax domicile is where its head office is located.

### Permanent establishment (PE)

Brazilian tax law has yet to develop rules similar to those existing in other countries, which treat a non-resident as having a PE under various factual circumstances.

Currently, there are few rules to determine whether a foreign business constitutes a taxable presence in Brazil and the concept of 'permanent establishment' only appears in Brazil's treaties.

In general, a non-resident company may be treated as having a taxable presence if it operates in Brazil either through: (i) a fixed place of business or (ii) an agent who has the power to enter into contracts in Brazil in the name of or on behalf of the non-resident.

## Other taxes

### Value-added tax (VAT)

VAT is payable on imports, sales, and transfers of goods and products in the form of (i) a federal excise tax (Imposto sobre Produtos Industrializados or IPI) at various rates in accordance with the nature of the product (normally around 10% to 15%, but in certain cases ranging to over 300%) and (ii) a state sales and service tax (Imposto sobre as operações relativas à Circulação de Mercadorias, e sobre a prestação de Serviços de transporte interestadual e intermunicipal e de comunicação or ICMS) with rates ranging from 7% to 25%.

Except for services related to freight and transportation, communications, and electric energy, which are subject to ICMS, income from services rendered is normally subject to a municipal service tax (Imposto Sobre Serviços de qualquer natureza or ISS), which is not a VAT, with rates ranging from 2% to 5%.

### Import tax

Import tax (Imposto de Importação or II) is levied on the cost, insurance, and freight (CIF) price of the imported good. The rates depend on the degree of necessity and are defined in accordance with the product's tariff code contained in the Mercosur Harmonised System (NCM/SH). The rates tend to be in the range of 10% to 20%, although there are many exceptions which are subject to higher or lower rates.

### *Social assistance contribution (Contribuição para o Financiamento da Seguridade social or COFINS)*

COFINS, a monthly federal social assistance contribution calculated as a percentage of revenue, is levied at the rate of 7.6%. A COFINS credit system is meant to ensure the tax is applied only once on the final value of each transaction. However, some taxpayers (such as financial institutions, telecommunication companies, cooperatives, and companies which opt to calculate IRPJ and CSLL using a 'presumed profits' method) are still subject to the previous COFINS system, which applies a rate of 3% with no credit system.

### *Federal social contribution (Programa de Integração Social or PIS)*

PIS, which is also a federal social contribution calculated as a percentage of revenue, is levied at the rate of 1.65%. A PIS credit system is meant to ensure the tax is applied only once on the final value of each transaction. However, some taxpayers (such as financial institutions, telecommunication companies, cooperatives, and companies which opt to calculate opt to calculate IRPJ and CSLL using a 'presumed profits' method) are still subject to the previous PIS system, which applies a rate of 0.65% with no credit system.

### *PIS and COFINS on imports*

Importation of goods and services are also subject to PIS and COFINS (in addition to all other taxes imposed on import transactions). PIS and COFINS are imposed on the Brazilian entity or individual (the importer of goods or services) and applied at the rates of 1.65% and 7.6%, respectively. The contributions paid upon import transactions may, in some instances, be creditable.

### *Tax on financial transaction (Imposto sobre operações de crédito, câmbio, seguro e sobre operações relativas a títulos e valores mobiliários or IOF)*

IOF is a tax levied primarily on certain financial transactions, such as loans, foreign exchange operations, insurance, and securities, as well as transactions with gold (as a financial asset) and foreign exchange instruments. The applicable rate will vary depending on the transaction. The IOF rate may be reduced to 0% in some cases, such as: (i) exchange transactions relating to the inflow of revenues in Brazil deriving from the export of goods and services; (ii) exchange transactions relating to the inflow and outflow of resources in and from Brazil, stemming from foreign loans with average term exceeding 720 days; and (iii) remittances of interest on net equity and dividends relating to investment in the stock market.

Foreign loans with average payment term of up to 720 days, contracted as of 7 April 2011, are subject to the IOF at a 6% rate on the foreign exchange transaction corresponding to the inflow of the resources.

### *Contribution for the intervention in the economic domain (Contribuição de Intervenção no Domínio Econômico or CIDE)*

CIDE is a contribution levied at the rate of 10% on remittances made by corporate taxpayers for royalties and for administrative and technical services provided by non-residents. CIDE is payable by the local entity, and therefore, not creditable to the non-resident. CIDE does not represent a liability to the foreign recipient. CIDE is not applied on the payments relating to the license to use, market, or sublicense software, provided that it does not involve transfer of technology.

### *Property taxes*

Imposto Predial e Territorial Urbano (IPTU) is a property levied annually based on the fair market value of property in urban areas at rates that generally vary according to the municipality and location of the property. In the municipality of São Paulo, the basic IPTU rate is 1% for residential properties or 1.5% for commercial properties (both rates may be increased or decreased according to the market value of the property).

Imposto de Transmissão de Bens Imóveis Inter Vivos (ITBI) is a property tax levied at the transfer of immovable property, with rates also varying based on the municipality were the property is located. The ITBI rate in the municipality of São Paulo is currently 2%, applied over the market value of the property.

Imposto sobre Transmissão Causa Mortis e Doações (ITCMD) is a state property transfer tax normally payable at rates varying from state to state on inheritances and donations of goods and rights. In the State of São Paulo, ITCMD is charged at the rate of 4%.

## *Branch income*

Profits of branches of foreign corporations are taxable at the normal rates applicable to Brazilian resident corporations.

## *Income determination*

Brazilian taxpayers have the option (subject to some restrictions) to calculate IRPJ and CSLL using an 'actual profits' method ('Lucro Real'), which is based on total taxable income (book results before taxes), adjusted by certain additions and deductions as determined in the legislation.

Brazilian taxpayers also have the option to calculate IRPJ and CSLL using a 'presumed profits' method ('Lucro Presumido'). Under the 'presumed profits' method, the income is calculated on a quarterly basis on an amount equal to different percentages of gross revenue (based on the entity's activities) and adjusted as determined by the prevailing legislation.

### *Inventory valuation*
Brazilian income tax regulations require that inventory may be valued at the actual average cost or by the cost of the most recently acquired or produced goods. Rulings to the effect that last in first out (LIFO) is not acceptable have been given.

### *Capital gains*
Capital gains derived from the sale of assets and rights, including shares/quotas, are taxed as ordinary income. However, profits on certain long-term sales of permanent assets may be computed for tax purposes on a cash basis. Profits on long-term contracts may be computed on a percentage-of-completion basis. When these contracts are entered into with the government or government-owned companies, the profit may be recognised on a cash basis for tax purposes.

Except during the year when incurred, capital losses may be offset only against capital gains. Unused capital losses are treated similarly to income tax losses with regard to limits on use and carryforward period.

Capital gains derived by non-residents (including transactions carried out abroad between two non-resident investors, involving assets or rights located in Brazil) are taxed in Brazil. The Brazilian source performing the remittance of capital gains to the non-resident (whether a Brazilian acquirer or the local solicitor of a foreign acquiring entity) must withhold the applicable income tax on such amounts on behalf of the latter at the rate of 15% (or 25% if the beneficiary is located in a tax haven jurisdiction).

### Foreign income
Brazilian resident companies are taxed on worldwide income. Profits of foreign subsidiaries, affiliates, and controlled companies are taxed at the date of the financial statements in which the profits are calculated, regardless of remittance. Double taxation may be avoided by means of foreign tax credits.

### Foreign currency exchange gain/loss
With respect to foreign currency exchange gain/loss, which may arise from receivables or liabilities denominated in foreign currency, Brazilian tax legislation allows the local company to elect to consider the related effect, for tax computation purposes, either upon accrual or cash basis (i.e. actual receipt/payment of funds).

### Financial income
Fixed-rate interest income from short, medium, or long-term financial market transactions, including swap transactions, is subject to withholding tax (WHT) at rates ranging from 15% to 22.5%. Non-fixed financial gains related to stock/commodities exchange and/or futures market transactions are taxed at the rates of 20% (day-trade) and 15% (all other cases). The total income or gain is considered taxable income, and the tax withheld may be offset against the total tax due by the corporate taxpayer.

## Deductions

### Depreciation and depletion
Depreciation is allowable on a straight-line basis over the useful life of the asset. The annual rates normally allowable are 10% for machinery, equipment, furniture, and instalations; 20% for vehicles; and 4% for buildings. Accelerated depreciation is allowed for companies with a two or three working shift operation by increasing normal rates by 50% and 100%, respectively.

Depletion allowances are allowed for natural resources on a useful-life basis. Special incentive depletion allowances are granted for mining operations.

### Bad debts
Losses on bad debts are tax deductible, depending on the amounts, time overdue, and administrative and/or legal actions taken to recover losses. Losses arising from inter-company transactions are not tax deductible.

### Taxes/contributions
Taxes, contributions, and related costs, such as late-payment interest, are deductible for tax purposes on the accrual basis. This rule does not apply to taxes/contributions being or to be challenged by the taxpayer at any level of litigation, which are deductible for tax purposes only on a cash basis.

### Travel expenses
Travel expenses may only be considered deductible if they are duly documented and substantiated.

### Charitable contributions
Donations are deductible up to certain limits if recipients are registered as charitable institutions.

### Research and development (R&D) expenditures

At the option of the company, R&D expenditures may be deducted when incurred or deferred until termination of the project and then amortised over a period of not less than five years.

### Medical and pension expenses

Expenses of group medical care and health insurance programmes for employees and contributions to private supplementary pension schemes are considered deductible if supplied to all employees indistinctly.

### Interest on net equity

Companies can pay interest (calculated on a pro rata basis and up to a given rate known as the 'long-term interest rate' (Taxa de Juros de Longo Prazo or TJLP), which is currently set at 6% in 2011) to partners and/or share/quotaholders, based on the company's net equity. Such interest, which may not exceed the highest of 50% of the annual profits or 50% of the accumulated earnings and profits, is deductible for both IRPJ and CSLL purposes and is subject to 15% WHT at the source (or 25% if the beneficiary is located in a tax haven jurisdiction). Whenever the beneficiary is a legal entity subject to normal income tax in Brazil, the tax withheld at the source may be taken by the recipient as a tax credit against the normal corporate income tax due or the tax due at the source on distributions of interest. If the beneficiary is a Brazilian resident individual, such interest will not become subject to any further taxation.

### Interest and other payments to entities in a tax haven or under a privileged tax regime

Provisions similar to those for thin capitalisation *(see the Group taxation section)* are also applicable to interest paid or credited by a Brazilian entity to an individual or legal entity (whether or not a related party) resident or domiciled in a tax haven or in a jurisdiction under a privileged tax regime. In these cases, the interest expense is only deductible for Brazilian income tax purposes if it is viewed as necessary to the company's activities and the total amount of the Brazilian entity's debt with any foreign party resident or domiciled in a tax haven or in a jurisdiction under a privileged tax regime does not exceed 30% of the Brazilian entity's net equity.

The Law also provides that amounts paid, credited, delivered, used, or remitted under any title, directly or indirectly, to related or unrelated individuals or legal entities which are resident or domiciled in a tax haven or in a jurisdiction under a privileged tax regime will only be viewed as deductible for Brazilian income tax purposes if all of the following conditions are met: (i) the effective beneficiary of the payment is identified; (ii) there is evidence that the payment beneficiary has operational capacity (i.e. substance); and (iii) there is adequate documentation to support the relevant payments and the corresponding supply of goods, rights, or utilisation of services.

#### Tax havens and privileged tax regime lists

On 7 June 2010, Brazilian tax authorities issued a Normative Instruction (NI RFB 1,037/2010), with an updated tax havens list. The regulation is divided in two separate articles. Article 1 enumerates jurisdictions which are considered not to tax income or to tax it at a rate lower than 20% or that deny access to information regarding shareholding and ownership of assets and rights. The main change made to the new tax haven list was the inclusion of Switzerland, who's inclusion has been temporarily suspended pending a review requested by the Swiss government.

Article 2 of the NI, by its turn, enumerates jurisdictions which are considered to have 'privileged tax regimes', as set forth in Brazilian legislation. The following types of entities are included in the updated list:

- Holding Companies incorporated under the law of Denmark, which do not carry out substantial economic activity.
- Holding Companies incorporated under the law of the Netherlands, which do not carry out substantial economic activity. Note that inclusion has been temporarily suspended pending a review requested by the Dutch government.
- International Trading Companies (ITC) incorporated under the law of Iceland.
- Offshore Companies (KFT) incorporated under the law of Hungary.
- Limited Liability Companies incorporated under the state law of the United States, owned by non-residents and not subject to US federal income tax.
- Holding Companies (ETVE) incorporated under the law of Spain. Note that inclusion has been temporarily suspended pending a review requested by the Spanish government.
- International Trading Companies (ITC) and International Holding Companies (IHC) incorporated under the law of Malta.

It is generally understood that the concept of a privileged tax regime is subject to stricter transfer pricing, thin capitalisation, and tax deduction rules. As for the jurisdictions considered as tax havens, besides the tax consequences applicable for privileged tax regimes, the withholding income tax rate due on capital gains and cross-border payments such as services fees, royalties, and interest is increased from 15% to 25%.

### *Net operating losses*

Tax losses may be carried forward without any time limitation. However, the tax loss may not reduce taxable income by more than 30% of its amount prior to the compensation of the tax loss itself. Tax loss is defined as the accounting loss adjusted for tax purposes. There is no carryback of tax losses.

### *Payments to foreign affiliates and related companies*

Royalties and technical service fees payable to foreign companies with a direct or indirect controlling interest in the Brazilian company are deductible for tax purposes (observing applicable deduction limits), provided the contract has been duly registered with the National Institute of Industrial Property (Instituto Nacional da Propriedade Industrial or INPI) and approved by the Brazilian Central Bank.

In addition to the recently introduced thin capitalisation rules, which restrict the deductibility of interest expenses in Brazil, deductibility of interest is also conditioned to approval of the respective contract by the Brazilian Central Bank. However, on unregistered related-party loans, the deductible interest may not exceed interest calculated using the six-month US dollar deposit LIBOR (London Interbank Offered Rate) rate plus 3%.

## *Group taxation*

Consolidated tax returns are not permitted in Brazil.

### *Transfer pricing*

The Brazilian transfer pricing rules apply to import and export transactions of goods, services, and rights between related parties (the legislation provides a broad list of the parties considered as 'related' for transfer pricing purposes). Under such rules, the transfer price determined between related parties will be acceptable, for Brazilian tax purposes, if it is determined that such price is at arm's length according to one of the traditional methods established by the legislation (no profit methods available). Moreover, all operations with jurisdictions considered as tax havens will also be subject to transfer pricing rules whether involving related parties or not.

The statutory rules provide that interest on related party loans that are duly registered with the Brazilian Central Bank will not be subject to transfer pricing adjustments. However, interest paid on a loan contracted with a related party, not registered with the Brazilian Central Bank, will be deductible only to the extent that the interest rate equals the LIBOR dollar rate for six-month loans plus 3% per year (adjusted to the contract's period).

Operations involving royalty agreements will not be subject to the rules below if the related contract is registered with the Banco Central do Brasil (BACEN) and INPI.

Therefore, the adequacy of the price practiced between the related parties in any operations involving goods, services, and rights may be supported through the application of one of the following methods, as determined under the Brazilian transfer pricing regulations (the company may choose the most convenient method).

Methods used on import transactions:

- Comparable Independent Price Method (PIC).
- Resale Price Less Profit Method (PRL).
- Production Cost Plus Profit Method (CPL).

Methods used in export transactions:

- Export Sales Price Method (PVEx).
- Resale Price Method.
- Acquisition or Production Cost Plus Taxes and Profit Method (CAP).

Relief of proof rules for inter-company export transactions are available.

### *Thin capitalisation*

On 14 June 2010, Provisional Measure 472/2009, which introduced new thin capitalisation rules in Brazil, was converted into Law 12,249.

The Law establishes that interest paid or credited by a Brazilian entity to a related party (individual or legal entity), resident or domiciled abroad, not constituted in a tax haven or in a jurisdiction with a privileged tax regime, may only be deducted for income tax purposes if the interest expense is viewed as necessary for the activities of the local entity and the following requirements are met: (i) the amount of debt granted by the foreign related party (which has participation in the Brazilian entity) does not exceed twice the amount of its participation in the net equity of the Brazilian entity; (ii) the amount of debt granted by a foreign related party (which does not have participation in the Brazilian entity) does not exceed twice the amount of the net equity of the Brazilian entity; (iii) the total amount of debt granted by foreign related parties as per (i) and (ii) does not exceed twice the sum of participation of all related parties in the net equity of the Brazilian entity; and (iv) in case debt is only granted by related parties that do not have a participation in the Brazilian entity, the total amount of debt granted by all of these related parties does not exceed twice the amount of the Brazilian entity's net equity. If one of the mentioned 2:1 ratios is exceeded, the portion of interest related to the excess debt amount will not be deductible for Brazilian income tax purposes.

Normative Instruction 1,154, issued by the Brazilian Revenue Service on 13 May 2011, further regulated the concept of related party and the calculation procedures in connection with the thin capitalisation tests.

## *Tax credits and incentives*

### *Investment project incentives*

Total or partial exemption from duty, excise tax, and social contributions on imported equipment is granted on certain approved investment projects.

Approved investment projects are also granted accelerated depreciation on nationally produced equipment and access to low-cost financing. Sales of some capital equipment are exempt from state sales tax.

Brazilian corporate taxpayers can apply a percentage of their income tax liability on deposit for reinvestment and investment in their own approved investment projects. These approved investment projects are normally granted total or partial income tax exemption.

The Brazilian legislation also provides tax incentives for projects focusing on technological innovation.

### *Regional incentives*

Income tax exemptions or reductions are also available for companies set up in specified regions within Brazil, primarily the north and northeast regions. These incentives are designed to accelerate the development of certain less-developed regions and industries considered to be of importance to the economy.

### *Other incentives*

Excise and sales tax exemptions are granted to exporters of manufactured goods.

## *Withholding taxes*

Profits/dividends distributed to resident or non-resident beneficiaries (individuals and/or legal entities) are not subject to WHT. This provision is also applicable to dividends paid to non-resident companies located in a tax haven jurisdiction.

The WHT rate applicable to payments for services rendered by non-resident companies or individuals is generally 15% but can be increased to 25% in certain cases.

Payments for services, royalties, and interest to non-resident companies located in a tax haven jurisdiction are subject to WHT at the rate of 25%.

Certain types of income paid by Brazilian companies to non-resident recipients are subject to WHT as follows:

| Recipient | Dividends (%)(1, 3) | Interest (%) (3) | Royalties (%) (3) |
|---|---|---|---|
| Non-resident companies and individuals: | | | |

# Brazil

| Recipient | Dividends (%)(1, 3) | Interest (%) (3) | Royalties (%) (3) |
|---|---|---|---|
| Non-treaty: | 0 | 15 | 15 |
| Tax Haven | 0 | 25 | 25 |
| | | | |
| Treaty (2): | | | |
| Argentina | 0 | 15 | 15 |
| Austria | 15 | 15 | 10/15/25 |
| Belgium | 10/15 | 10/15 | 10/15/20 |
| Canada | 15 | 10/15 | 15/25 |
| Chile | 10/15 | 15 | 15 |
| China, P.R. | 15 | 15 | 15/25 |
| Czech Republic | 15 | 10/15 | 15/25 |

| South Africa | 10/15 | 15 | 10/15 |
| Spain | 10/15 | 10/15 | 10/15 |
| Sweden | 25 | 25 | 25 |
| Ukraine | 10/15 | 15 | 15 |

Notes

1. Note that the remittance of dividends is not subject to taxation in Brazil.
2. Treaty rates in excess of those in force for non-treaty countries are automatically reduced. The treaty concerned should be consulted to confirm that the tax reduction is applicable in each case.
3. For treaties with multiple WHT rates, the following rules generally apply:
    - Dividends: if there was WHT on dividends, which is not the case according to Brazilian legislation, the 10% (or 15%) rate would generally apply if the beneficial owner is a company which holds directly a certain minimum participation in the capital of the company paying the dividends; the 15% (or 25%) rate is considered for all other cases.
    - Interest: the 10% rate generally applies to loans with a certain minimum term granted for specific purposes (e.g. acquisition of capital goods); the 15% rate is considered for all other cases.
    - Royalties: the 10% rate generally applies to royalties arising from the use of, or the right to use, cinematograph films, and films or tapes for television or radio broadcasting, and any copyright of literary, artistic, or scientific work produced by a resident of a contracting state; the 25% (or 15%) rate generally applies to royalties arising from the use of, or the right to use, trademarks; and the 15% (or 10%) rate is considered for all other cases.

## Tax administration

### Returns
For tax purposes, a company's year-end is 31 December. A different year-end for corporate purposes is irrelevant.

With few exceptions, corporate entities, including those that are foreign-controlled, must file an annual adjusting tax return consolidating the monthly results of the previous calendar year. This tax return must normally be filed by the end of June following the tax year ending on 31 December.

Supporting documentation must be retained for at least five years.

### Payment of tax
In the case of income tax, it is calculated monthly, and prepayments must be paid by the last working day of the subsequent month. Any amounts of income tax due for the year (exceeding the prepayments performed) must be paid by the last working day of March of the subsequent year.

There is an option to pay the tax due at the end of each quarter in three installments, the first one starting from the subsequent month to the end of the quarter. When income tax is calculated quarterly, the taxpayer must perform the applicable payment by the last working day of the month subsequent to the end of the quarter.

### Public digital bookkeeping system (SPED)
Brazil is currently implementing a new public system of digital bookkeeping known as SPED, which aims at gradually replacing paper copies of invoices and tax records for electronic files. SPED can be defined as an instrument that unifies the activities of reception, validation, storage, and legalisation of records and documents that are part of the commercial and tax bookkeeping of companies, through a single, computerised flow of data.

Comprised of three pillars (electronic invoice, digital fiscal bookkeeping, and digital accounting bookkeeping), the implementation of SPED requires adjustments to the relationship with tax authorities, clients, suppliers and, mainly, on the internal operational processes, which will demand an integrated action from different areas (tax, accounting, IT, supplies, production, commercial, and others). On the other hand, occasional inconsistencies from databases, as well as operational errors related to tax and accounting information to be generated, usually unknown to the companies' administration, will be subject to an increased visibility and monitoring by the Brazilian tax authorities.

## Significant developments

### Tax relief for interest and royalties payable between European Union (EU)/European Economic Area (EEA) companies

As of 1 January 2011, interest and royalty payments payable to EU-based associated companies are subject to a reduced 5% withholding tax (WHT) rate in Bulgaria. Associated company criteria are identical to those in the Interest and Royalty Directive and require holding of at least 25% for at least two years. Exemption from WHT on interest and royalties payable to associate companies will be introduced as of 1 January 2015.

### WHT on service fees payable to offshore companies

As of 1 January 2011, any fees for services and use of rights (in addition to technical services fees and royalties) accrued to entities in low-tax jurisdictions attract 10% Bulgarian WHT unless there is proof of the effective provision of the supply. Subject to 10% WHT would also be any accruals for penalties or damages payments to entities in low-tax jurisdictions, except for insurance compensations.

### Increased value-added tax (VAT) for tourist services

As of 1 April 2011, the reduced VAT rate applicable to certain tourist services was increased from 7% to 9%.

### Insurance premium tax

A tax of 2% is levied on all insurance premiums paid after 1 January 2011 under insurance agreements covering risks insured in Bulgaria. Life insurance, reinsurance, aircraft, vehicle, and international transport insurance agreements are exempted from this tax.

### Tourist tax

As of 1 January 2011, a tourist tax was introduced, replacing the previously existing tourist fee. The tourist tax is levied with respect to the number of nights spent in hotels and other places for accommodation and may vary between 0.20 Bulgarian leva (BGN) and BGN 3 per night.

## Taxes on corporate income

In general, corporate income is subject to corporate income tax (CIT) at a flat rate of 10%.

### Alternative tax

Income earned by organisers of games of chance is subject to 12% or 15% alternative tax, applied on a specific tax basis (e.g. the total value of the stakes made). A fixed-sum tax is applied to the operation of gaming machines.

### Tonnage tax regime
A special alternative tax regime applies to the operation of commercial maritime vessels, as per their net tonnage, at a rate of 10%.

## Corporate residence

A corporation is resident in Bulgaria for tax purposes if it is incorporated in Bulgaria.

### Permanent establishment (PE)
Permanent establishments (PE) of foreign tax residents (e.g. branches) are treated as separate entities similar to Bulgarian residents for tax and accounting purposes.

The definition of a PE in the Bulgarian legislation follows, in general, the Organisation for Economic Co-operation and Development (OECD) model; however, it covers a broader scope of activities leading to a tax presence in Bulgaria. A PE is generally defined as a fixed place (own, rented, or otherwise used) through which a foreign entity partly or wholly carries out business activities in the country.

## Other taxes

### Value-added tax (VAT)
The standard VAT rate is 20%. As of 1 April 2011, a reduced VAT rate of 9% applies to certain tourist services (7% prior to 1 April 2011). Some activities are zero-rated, including intracommunity supplies, exports of goods to countries outside the European Union, and international transport of goods (i.e. transport to or from countries outside of the European Union).

Some supplies are VAT exempt without the right to a VAT credit, including (but not limited to) certain land transactions; leasing of residential property to individuals; and financial, insurance, gambling, educational, and health services. Options to charge VAT exist for certain land transactions, leasing of residential property to individuals, and finance lease contracts.

The following statutory periods for VAT refunds apply:

- 30 days for persons that have performed supplies subject to zero-rate (e.g. exports) within the last 12 months exceeding 30% of the total value of all taxable supplies performed by them in the same period, as well as by large investors meeting certain specific conditions.
- Two months and 30 days in all other cases.

The following mechanism for VAT recovery applies to VAT-registered companies: the positive or negative difference between the output VAT charged by the company and the input VAT for the respective month for which recovery is claimed results, respectively, in VAT payable or refundable. The VAT payable should be remitted to the state budget not later than the 14th day of the month following the respective month. VAT refundable is offset against any VAT payable in the following two months, and any remainder is effectively recovered within 30 days thereafter.

It is possible to claim a refund for VAT paid with respect to assets acquired not earlier than five years prior to the VAT registration, under certain conditions. In the case of real estate, the term is 20 years.

### *Excise duties*
Excise duties are charged as a percentage of the sales price or customs value or as a flat amount in BGN per unit, unless a suspension regime applies. For 2011, excisable products include petrol and diesel fuel, LPG, heavy oil, kerosene, beer and spirits, tobacco products, and electricity.

The applicable rates are as follows:

- Unleaded petrol: BGN 710 per 1,000 litres.
- Diesel: BGN 615 per 1,000 litres.
- LPG: BGN 340 per 1,000 kg.
- Kerosene: BGN 615 per 1,000 litres.
- Natural gas: BGN 0 per gigajoule.
- Heavy oil: BGN 600 per 1,000 litres.
- Electricity: BGN 2 per MWh (zero rate if used by households).
- Beer: BGN 1.50/hl/°Plato.
- Wine: zero rate.
- Ethyl alcohol: BGN 1,100 per hectolitre.
- Cigarettes: 23% *ad valorem* + 101/1,000 pieces (min. BGN 148).

Lower rates may apply in certain cases (e.g. energy products used for heating purposes or mixed with bio fuels, beer produced by independent small breweries, etc.).

The Excise Duties and Tax Warehouse Act introduced the tax warehousing regime and regulates the production, storage, and movement of excisable products.

### *Insurance premium tax*
A tax of 2% is levied on all insurance premiums paid after 1 January 2011 under insurance agreements covering risks insured in Bulgaria. Life insurance, reinsurance, aircraft, vehicle, and international transport insurance agreements are exempted from this tax. The taxable base is the insurance premium received by an insurance company under an insurance agreement.

Insurance companies and their tax representatives are liable to collect the tax and remit it to the budget monthly by the end of the month following the month when the insurance premium was collected.

### *Property tax*
The property tax rate is determined by each municipality and currently ranges from 0.01% to 0.45% of the tax value of property. Individuals and legal entities that are owners of immovable property (i.e. land and buildings) are liable for property tax. For individuals and residential properties of the enterprises, the taxable base is the tax value as determined by the municipal authorities based on certain statutory criteria. The taxable base for properties of enterprises is the higher of the property's gross book value and its tax value determined by the respective municipal authorities.

A garbage collection fee is payable for immovable property at a rate determined by the local municipal council annually.

### *Transfer tax*
A transfer tax is due on the value of transferred real estate or motor vehicles, subject to certain exemptions (e.g. contributions in-kind, acquisitions under the Law on Privatisation and Post-privatisation Control). The rate of the transfer tax ranges from 0.1% to 3% and is determined by each municipality.

### Tourist tax

As of 1 January 2011, a tourist tax was introduced, replacing the previously existing tourist fee.

The tourist tax is levied with respect to the number of nights spent in hotels and other places for accommodation. The municipalities may determine the tax within a range of BGN 0.20 to BGN 3 per night depending on the type of accommodation facility.

The tax is payable on a monthly basis by the 15th day of the following month.

### One-off taxes

The following corporate expenses are subject to a one-off tax:

- Representative expenses related to a company's business.
- Social expenses provided to employees in kind (monetary social expenses are subject to personal income tax).
- Expenses related to the exploitation and maintenance of cars where they are used for management activities (as distinguished from administrative activities).

The rate of the one-off tax with respect to the above expenses is 10%. Both the expenses and the related one-off taxes are deductible for CIT purposes.

## Branch income

Although branches are not deemed to be separate legal persons, branches of non-resident companies have separate balance sheets and profit and loss accounts and are subject to CIT at the standard rate of 10% as well as other general taxes (e.g. VAT, property tax).

Representative offices of foreign entities are not allowed to carry out business activities and are not subject to CIT. A representative office registered under the Encouragement of Investments Act may perform only those activities that are not regarded as 'economic activities' (e.g. marketing activities normally carried out by a representative office and auxiliary to the activities of its head office). Representative offices do not constitute PEs of the non-resident entities, unless they engage in business activities in breach of the law.

Profits repatriated by a branch to its head office abroad are not subject to WHT. However, certain income payable by a Bulgarian branch or a PE to other parts of the enterprise abroad may trigger WHT (e.g. income from technical services, interest, royalties), unless the respective expenses are not deductible to the branch or the PE, or are recharged at cost.

## Income determination

The taxable result is based on the statutory accounting principles relating to profit/loss and adjusted for tax purposes. Statutory accounting is maintained on an accrual basis in line with the applicable accounting standards.

Small and medium-sized companies may apply specific national standards for the financial statements of small and medium-sized companies, or optionally, International Financial Reporting Standards (IFRS). The principles provided by the Standards for the Financial Statements of Small and Medium-sized Companies are similar to those provided by IFRS. Certain types of companies, including banks and insurance companies, are obliged to apply IFRS.

### *Inventory valuation*

The tax legislation follows the accounting rules for inventory valuation methods. The accounting rules may restrict the application of certain methods (e.g. last in first out (LIFO) is not allowed under IFRS).

Inventory valuation and revaluation methods applicable under accounting standards may be used for tax purposes. Companies may choose the method of inventory valuation but must apply the chosen method consistently throughout the accounting period. An inventory of assets and liabilities is carried out in each accounting period. Accounting gains and losses realised upon revaluation of inventory will not be recognised for tax purposes and will form a temporary tax difference. These gains and losses will be recognised for tax purposes in the period in which the inventory is disposed of.

### *Capital gains*

Realised capital gains are included in corporate income and are taxed at the full CIT rate.

Note that capital gains from securities will not be subject to taxation if resulting from shares in listed companies and tradable rights in such shares on a regulated securities market in the EU/EEA. Assets distributed as dividends are deemed realised at market value, and any capital gains arising from this will be subject to tax.

### *Dividend income*

Inter-company dividend payments between Bulgarian companies and dividends distributed by EU/EEA residents to Bulgarian companies (except for dividends from special purpose investment companies or in case of 'hidden distribution of profits') are not included in the tax base of the recipient company.

Dividends distributed by Bulgarian companies to foreign shareholders and resident individuals are subject to 5% WHT under the domestic legislation *(see the Withholding taxes section for exceptions for payments to EU/EEA tax residents and under double tax treaties (DTTs))*.

### *Stock dividends*

No explicit regulation with respect to stock dividends exists in the Bulgarian CIT act. Rather, the tax treatment of stock dividends would follow accounting treatment.

### *Exchange rate gains/losses*

Exchange rate gains and losses are reported in the profit and loss account and reflected in the assessment of taxable profit.

### *Foreign income*

Income derived outside Bulgaria by resident legal entities and income derived in Bulgaria by Bulgarian branches of non-residents is included in the taxable base for the purpose of CIT, regardless of whether such income is subject to taxation abroad.

In instances where the provisions of a DTT are applicable, a tax credit or exemption for the foreign tax paid may be allowed. There is also a unilateral tax credit which may not exceed the amount of the tax that would be payable in Bulgaria for the same type of income.

Undistributed income of foreign subsidiaries of a Bulgarian resident company is not taxed.

## Deductions

### Depreciation and depletion

For accounting purposes, depreciation is calculated in accordance with the straight-line, progressive, or declining methods of depreciation. Accounting regulations permit Bulgarian companies to establish a depreciation schedule for each tangible and intangible fixed asset on the basis of the method chosen by the company.

For tax purposes, only the straight-line method is permitted. For machines and equipment that are part of the initial investment, accelerated depreciation may also apply, subject to certain conditions.

For tax purposes, fixed assets are divided into the following seven categories:

| Category | Assets | Maximum rates (%) |
|---|---|---|
| I | Massive buildings, industrial constructions/equipment, transmission facilities/lines (incl. electricity) | 4 |
| II | Machinery, production facilities, apparatuses | 30/50 |
| III | Vehicles (except cars), coverage of roads and runways | 10 |
| IV | Computers, peripherals to computers, software and rights to use software | 50 |
| V | Cars | 25 |
| VI | Long-term intangibles with legal or contractual limitations on the period of use | 33 1/3 |
| VII | Other assets | 15 |

Under certain conditions, assets classified in Category II that are new may be depreciated at a maximum rate of 50% for tax purposes.

The depreciation rate for Category VI is determined by the period of limitations, but not more than 33 1/3%.

Depletion is not specifically regulated for tax purposes.

### Net operating losses

The taxpayer has the right to carry forward tax losses incurred in a given year over the following five years. The loss subject to carryforward is the negative amount of the financial result adjusted for tax purposes, with certain add-backs and deductions specified in the tax legislation.

Tax losses may be reversed up to the amount of the positive financial result after tax adjustments (without the effect of the loss subject to be carried forward itself).

Carryforwards of foreign-source losses may only offset income from the same source. However, EU/EEA-source losses may offset income from other sources, including Bulgarian sources.

Loss carryback is permitted in very specific cases.

### *Payments to foreign affiliates*
Payments to foreign affiliates may be subject to recalculation by the tax authorities if such payments are not made at arm's length.

## *Group taxation*

No group consolidation is permitted for tax purposes in Bulgaria. All companies must pay tax on the basis of individually assessable profits and losses.

### *Transfer pricing rules*
Bulgarian law requires that taxpayers determine their taxable profits and incomes applying the arm's-length principle to prices at which they exchange goods, services, and intangibles with related parties (transfer prices). Bulgarian transfer pricing rules generally follow OECD Transfer Pricing Guidelines.

Transfer prices are not set in compliance with the arm's-length principle where:

- prices of the supply of goods or services differ from the market prices or
- loans are received or granted against an interest rate that differs from the market interest rate effective at the time the loan agreement is concluded.

The market interest rate is defined as the interest payable under the same conditions for a loan provided or received, notwithstanding the form of the loan, between non-related parties. The market interest is determined according to the market conditions.

The taxable person should be able to evidence that its relations with related parties are in line with the arm's-length principle.

For the purposes of transfer pricing rules, market prices are determined by the following methods:

- Comparable uncontrolled price method.
- Resale price method.
- Cost plus method.
- Transactional net margin method.
- Profit split method.

Preparation of transfer pricing documentation is not mandatory but is recommendable for material related party transactions. Recently, the revenue authorities tend to focus more on the transfer pricing area.

Currently, there is no possibility to obtain an advance pricing agreement (APA). However, it is possible to obtain an opinion from the revenue authorities on a case-by-case basis. Such opinions are not binding, but they may provide protection from assessment of interest for late payment and penalties.

### Thin capitalisation rules

Interest payable by local companies to local or foreign persons may be restricted by the thin capitalisation rules (which also apply to interest due to non-affiliated companies).

The tax deductibility for interest expenses that exceed interest income is restricted to 75% of the accounting result of the company, exclusive of interest income and expense. If the accounting result of the company before including the effect of the interest income and expenses is a loss, none of the net interest expense will be deductible for tax purposes. Interest on bank loans and interest under financial lease agreements are subject to thin capitalisation regulations only when the agreements are between related parties or guaranteed by or extended at the order of a related party.

The thin capitalisation rules do not apply if the debt-to-equity ratio does not exceed 3:1 for the respective tax period.

Interest expenses restricted in a given year under the thin capitalisation rules may be deducted from the financial result for tax purposes during the following five consecutive years. This reversal may be made up to the tax allowed interest expenses, as per the above formula.

## Tax credits and incentives

Tax incentives may apply in certain circumstances, including:

- Partial granting back of CIT due for performance of agricultural activities.
- Additional tax deductions for hiring of long-term unemployed, handicapped, or elderly persons.
- Full granting back of CIT due for investment in regions with high unemployment.

## Withholding taxes

Bulgarian companies are required to withhold tax on payments of dividends and liquidation proceeds; interest (including that incurred under finance lease agreements and on bank deposits); royalties; fees for technical services; payments for the use of properties; payments made under operating leasing, franchising, and factoring agreements; and management fees payable to non-residents.

Capital gains from the transfer of shares in a Bulgarian company or immovable property located in Bulgaria realised by a non-resident are also subject to domestic WHT; however, the tax is payable by the non-resident. Capital gains from securities are not subject to WHT if they result from shares in listed companies and tradable rights in such shares on a regulated securities market in the EU/EEA.

Dividends and liquidation proceeds are also taxed where payments are made to resident individuals and non-profit organisations. (*For details on dividend payments between domestic companies see Dividend income in the Income determination section.)* Dividends capitalised into shares (stock dividends) are not subject to WHT.

As of 1 January 2011, interest and royalty payments payable to EU-based associated companies are subject to a reduced 5% WHT rate in Bulgaria. Associated company criteria are identical to those in the Interest and Royalty Directive and require holding of at least 25% for at least two years. Exemption from withholding tax on interest and royalties payable to associated companies will be introduced as of 1 January 2015.

As of 1 January 2011, any fees for services and use of rights (in addition to technical services fees and royalties) accrued to entities in low-tax jurisdictions will attract 10% Bulgarian WHT unless there is proof of the effective provision of the supply. Subject to 10% WHT would also be any accruals for penalties or damages payments to entities in low-tax jurisdictions, except for insurance compensations. The tax legislation introduces a list of low-tax jurisdictions. These are certain off-shore territories which are explicitly listed, as well as countries with which Bulgaria has not signed a DTT and in which the applicable corporate tax rates are more than 60% lower than the applicable rate in Bulgaria.

Certain types of income (other than dividends) accrued by a PE of a foreign person to other parts of its enterprise located outside the country are subject to WHT *(except for that mentioned in the Branch income section).*

### *Dividends*
When a dividend is accrued to a non-resident company or an individual (both resident and foreign), it is subject to WHT at a rate of 5%, unless the rate is reduced by an applicable DTT. No differentiation is made between portfolio and substantial holdings for purposes of this WHT on dividends.

Dividends distributed by a Bulgarian resident company to an entity that is a tax resident in an EU/EEA member state are not subject to Bulgarian WHT.

### *Interest*
A 10% rate applies to interest (including interest from bank deposits) payable to a non-resident, unless the rate is reduced by an applicable DTT.

Interest on borrowings by the government or the Bulgarian National Bank from international financial institutions is not taxable if the respective loan agreements contain relevant exemption arrangements (international treaties override domestic legislation).

Interest paid to an associated EU-based related company is subject to a 5% WHT unless reduced by a DTT (require at least 25% holding for at least two years).

### *Royalties*
Royalties payable to foreign persons are taxed at a rate of 10% at source, unless the rate is reduced by an applicable DTT.

Royalty payments to an associated EU-based related company are subject to a 5% WHT unless reduced by a DTT (require at least 25% holding for at least two years).

### *Capital gains and technical services*
Capital gains and technical service fees payable to foreign residents are subject to 10% WHT, unless the rate is reduced by an applicable DTT. As per the domestic legislation, technical services include installation and assembly of tangible assets as well as consultancy services and marketing research.

### *Application of DTT relief*
Applying DTT relief is generally possible only after completing an advance clearance procedure with the Bulgarian tax authorities. Companies have to evidence that they

satisfy the requirements for applying the DTT (e.g. tax residence, beneficial ownership, existence of contractual relationship, actual accrual/payment of the income). The procedure usually takes 60 days to complete.

The above procedure has to be followed only if the annual income payable by a Bulgarian resident exceeds BGN 500,000 (approximately EUR 250,000). In all other cases, DTT relief can be applied directly, through submitting a tax residence certificate and a beneficial ownership declaration with the payer of the income.

Beneficial ownership is explicitly defined in Bulgarian legislation. A company is considered a beneficial owner of the income if it has the right to dispose of the income, has discretion over its use, bears the whole or a significant part of the risk of the activity from which the income is realized, and does not qualify as a conduit company.

A conduit company is a company which is controlled by persons who would not benefit from the same type and amount exemption if the income was realised directly by them, does not carry out any economic activity except for owning and/or administering the rights or the assets from which the income was realized, and does not own assets, capital, or personnel relevant to its economic activity or does not control the use of the rights or assets from which the income was realised.

The conduit company restriction does not apply to companies which have more than a half of their voting shares traded on a registered stock exchange.

The following is a summary of the main parameters of the Bulgarian DTTs as of 1 January 2011:

| Recipient | Dividends* (%) | Interest** (%) | Royalties** (%) | Capital gains (%) |
|---|---|---|---|---|
| Albania (3, 6, 9, 28) | 5/15 | 0/10 | 10 | 0/10 |
| Algeria (24) | 10 | 0/10 | 10 | 0 |
| Armenia (1, 2, 6, 28, 36) | 5/10 | 0/5/10 | 5/10 | 0/10 |
| Austria (12, 28) | 0 | 0 | 0 | 0 |
| Azerbaijan (6, 28, 34) | 8 | 7 | 5/10 | 0 |
| Bahrain (6) | 5 | 0/5 | 5 | 0 |
| Belarus (6) | 10 | 0/10 | 10 | 0 |
| Belgium (6, 10, 27) | 10 | 0/10 | 5 | 0 |
| Canada (9, 16, 28) | 10/15 | 10 | 10 | 0/10 |
| China (2, 6, 9, 28) | 10 | 0/10 | 7/10 | 0/10 |
| Croatia | 5 | 5 | 0 | 0 |
| Cyprus (3, 26, 27) | 5/10 | 7 | 10 | 0/10 |
| Czech Republic (11, 27) | 10 | 10/0 | 10 | 0 |
| Denmark (3, 27) | 5/15 | 0 | 0 | 0 |
| Egypt (6) | 10 | 0/12.5 | 12.5 | 10 |
| Estonia (9, 16) | 0/5 | 5 | 5 | 0/10 |
| Finland (4, 9, 12, 27) | 10 | 0 | 0/5 | 0/10 |
| France (5, 27) | 5/15 | 0 | 5 | 0 |
| Georgia (6) | 10 | 0/10 | 10 | 0 |
| Germany (11, 16, 26, 27, 36) | 5/15 | 0/5 | 5 | 0/10 |
| Greece (27) | 10 | 10 | 10 | 0 |
| Hungary (6, 27) | 10 | 0/10 | 10 | 0 |

# Bulgaria

| Recipient | Dividends* (%) | Interest** (%) | Royalties** (%) | Capital gains (%) |

Notes

*Under Bulgarian domestic legislation, dividends distributed to non-residents are subject to 5% WHT, unless the recipient is a resident of an EU/EEA member state.

** Under Bulgarian domestic legislation, interest and royalty payments to EU-resident companies satisfying the Interest and Royalty Directive requirements are subject to a reduced 5% WHT rate.

1. The lower rate applies to dividends paid out to a non-resident that is the direct owner of at least the equivalent of USD 100,000 forming part of the capital of the company making the payment.
2. The reduced rate for royalties is available for the use of (or right to use) industrial, commercial, or scientific equipment.
3. The lower rate applies to dividends paid out to a foreign company that controls directly at least 25% of the share capital of the payer of the dividends. In the specific cases of the different countries, more requirements may be in place.
4. There is no WHT on royalties for the use of (or the right to use) scientific or cultural works.
5. The lower rate applies to dividends paid out to a foreign company that controls directly at least 15% of the share capital of the payer of the dividends.
6. There is no WHT on interest when paid to public bodies (government, the central bank, and, in several cases, certain governmental bodies).
7. 5% royalties are applicable if the Netherlands applies WHT under its domestic law.
8. Up to 10% branch tax may be imposed on PE profits.
9. The 10% rate on capital gains from securities applies in specific cases that are described in the respective treaty.
10. The zero rate on interest applies if the loan is extended by a bank and also for industrial, trade, and scientific equipment on credit.
11. The zero rate on interest applies if the interest is paid to public bodies (government, municipality, the central bank, or any financial institution owned entirely by the government), to residents of the other country when the loan or the credit is guaranteed by its government, or if the loan is extended by a company for any equipment or goods.
12. The Council of Ministers has stated its intention to renegotiate the DTTs with Austria, Malta, and Finland.
13. A 5% rate on royalties applies if the Swiss Confederation introduces in its domestic law WHT on royalties paid to non-residents.
14. The 10% rate on interest applies if the interest is received from a financial institution, including an insurance company.
15. The 5% rate on royalties applies if the royalties are paid for the use of copyright for literary, art, or scientific work.
16. The lower rate applies to dividends paid out to a foreign company that controls directly at least 10% of the share capital of the payer of the dividends.
17. The zero rate applies to dividends payable by a Bulgarian resident entity to an entity resident in Malta. The 30% rate applies to dividends payable by a Maltese entity to a Bulgarian entity.
18. The 10% rate applies to dividends distributed by companies that enjoy a reduced or zero CIT by virtue of a tax incentive for investments. In all other cases, the rate is equal to one half of the applicable rate as per the national legislations of Bulgaria and Israel. Nevertheless, the WHT rate may not be less than 7.5% or more than 12.5%.
19. The 5% rate applies to interest payable to banks or other financial institutions. The zero rate applies to interest payable to certain public bodies (governments, municipalities, central banks) or to residents of the other country when the loan or credit is guaranteed, insured, or financed by a public body of that country or by the Israeli International Trade Insurance Company.
20. The rate on royalties is equal to one half of the applicable rate as per the national legislations of Bulgaria and Israel. Nevertheless, the WHT rate may not be less than 7.5% or more than 12.5%.
21. The rate on capital gains from securities is equal to one half of the applicable rate as per the national legislations of Bulgaria and Israel. Nevertheless, the WHT rate may not be less than 7.5% or more than 12.5%. However, capital gains from transfers of shares in entities whose real estate properties exceed 50% of their assets are taxed in the country in which the real estate is located.
22. The zero rate applies to dividends and interest paid to certain public governmental and local bodies as well as entities fully owned by the state.
23. The 5% rate on royalties applies if the royalties are paid for the use of copyright for literary, art, or scientific work as well as for the use of industrial, commercial, or scientific equipment.
24. There is no WHT on interest when paid to and beneficially owned by public bodies (government, local public authorities, the central bank, or any financial institution wholly owned by the government), as well as on interest derived on loans guaranteed by the foreign government or based on an agreement between the governments of the states.

25. The 7% rate on royalties applies if the royalties are paid for the use of, or the right to use, cinematograph films and films or tapes for radio or television broadcasting, any patent, trademark, design or model, plan, secret formula, or process.
26. The zero rate applies for capital gains from shares in a Bulgarian resident company that are traded on the Bulgarian Stock Exchange.
27. In accordance with the EU Parent-Subsidiary Directive implemented in the Bulgarian legislation, dividends distributed by a Bulgarian resident company to an entity that is a tax resident in an EU member state may not be subject to Bulgarian WHT.
28. Full WHT at source may be levied on capital gains from the sale of shares in companies, the main assets of which are directly or indirectly holdings in real estate situated in Bulgaria, and in some other cases (subject to the specifics stipulated in the respective treaty).
29. There is no WHT on interest when paid to public bodies (government, the central bank, governmental institutions) or any financial institution wholly owned by the government.
30. Pension funds and charities are considered resident persons.
31. The zero rate does not apply to dividends distributed to real estate investment trusts (REITs).
32. The zero rate does not apply to interest paid under a back-to-back loan.
33. The benefits of the treaty are limited to entities that satisfy certain criteria (Limitation of Benefits clause).
34. The 5% rate on royalties applies if the royalties are paid for the use of, or the right to use, any patent, design, model, plan, secret formula, process, or know-how.
35. A new Bulgaria-Austria DTT has entered into force recently. Its WHT provisions, which will take effect as of 2012, provide for the following WHT rates: 5% on dividends, 5% on interest (except for bank and government loans and credit sale of equipment), 5% on royalties, 10% on capital gains unless shares were sold on a stock exchange or seller owned at least 20% of the issuing company's capital. The CIT provisions of the treaty entered into force as of 1 January 2011.
36. The reduced rate for interest is available for bank loans (subject to specifics in the treaty).

Under some DTTs, technical service payments fall within the definition of royalty payments and are taxed accordingly.

## *Tax administration*

### *Returns*

Annual profit must be declared no later than 31 March of the year following the financial (tax) year. The financial and tax years coincide with the calendar year. Along with their annual CIT returns, companies are required to file financial information for their business activities during the year in a standard statistical form not subject to a financial audit. The self-assessment principle is applied.

### *Payment of tax*

If a company ended the preceding financial year with a taxable profit, it is liable for advance CIT payments each month in the current year at the rate of 10%. The monthly taxable base for the second, third, and fourth quarters is one-twelfth of the annual taxable profit for the preceding year multiplied by a coefficient determined in the State Budget Act for the current year. However, the taxable base for the advance payments during the first quarter is one-twelfth of the taxable profit of the company for the year before the preceding year multiplied by a coefficient defined in the State Budget Act for the current year.

Corporate taxpayers having a tax loss or zero taxable result in the previous year and companies established during the current year make quarterly advance payments during the current fiscal year. The base of the quarterly advance payments is the profit for the corresponding period accumulated from the beginning of the current year.

Companies with a net sales revenue below BGN 200,000 for the preceding year and newly incorporated companies (if not established as a result of a transformation of another entity) are not required to make advance payments of CIT.

Overpayment of CIT may be offset against advance and annual payments of the respective taxes due for the next period. The difference between the annual tax declared in the CIT return and the advance tax paid for the corresponding year must be paid by the deadline for submitting the tax return on 31 March of the following year.

## Significant developments

### Tax on immovable property (ToIP)

Further to the 2010 Law on Financial Management, the Ministry of Economy and Finance (MEF) has issued Prakas No. 493 MEF/PrK on the ToIP. Based on the Prakas, the ToIP is levied at 0.1% per annum on the market value of immovable property (determined by the Immovable Property Valuation Committee) less the threshold of 100 million Cambodian riels (KHR) (approximately 25,000 US dollars (USD)). Immovable property valued below the threshold is not subject to ToIP.

Immovable property is defined to include land, buildings, and other constructions on land (e.g. infrastructures built on land, regardless of having a wall or roof). Certain exemptions exist for government-owned property, agricultural land, property owned and used for cultural and religious purposes, property of foreign embassies and non-governmental organisations (NGOs), and property in the special economic zones.

At the first phase of implementation, the ToIP will only cover immovable property located in all cities in Cambodia.

The owners, possessors, and final beneficiaries of immovable property are required to register and obtain a Tax Identification Number for each immovable property valued above the threshold from the tax administration where the immovable property is located. Any changes in relation to the registered immovable property (e.g. a change of title) are also required to be reported.

The owners, possessors, and final beneficiaries hold responsibility for calculating ToIP, preparing and filing ToIP return, as well as remitting the ToIP liability to the tax administration once per year by 30 September. A ToIP return is required for every single immovable property and must be completed and filed separately. Since this is a self-assessment tax, the tax administration will perform tax audit on ToIP in the subsequent years.

### Tax on profit (ToP) and other taxes of insurance companies

Further to Circular No. 006 MEF, dated 29 December 2009, on ToP and Tax on Salary of Insurance Company, the MEF has issued Circular No.003 MEF.GDT, dated 10 February 2011, on ToP and Other Taxes of Insurance Company that provides insurance and reinsurance companies with additional guidelines on taxation issues in relation to ToP, patent tax, and other taxes. The additional guidelines include the following:

**ToP**

- The tax rate of 5% only applies to gross insurance premium earned during a taxable year.
- Income derived from other business activities, except insurance/reinsurance, is subject to the standard ToP rate at 20%.

- Net interest income paid by local registered banks and saving institutions after withholding 4% or 6% withholding tax (WHT) is exempt from ToP.

**Patent tax and other taxes**

- Insurance companies have to submit patent tax returns for all business activities and remit the patent tax by 31 March each year.
- Insurance companies shall comply with the tax laws and regulations in respect with other taxes.

### *The amendment of custom duties on certain imported goods*

The MEF has issued Prakas No. 1194 MEF/PrK to change customs duties on certain imported petroleum products, those are: gasoline from 35% to 15%, diesel from 15% to 0%, and kerosene from 7% to 0%. The Sub-decree became effective as of 1 January 2011.

### *The amendment of specific tax and export duties on certain products*

This Sub-decree was issued by the Royal Government of Cambodia to alter specific tax (SPT) rates on certain imported products and export duties on certain exported products and to implement a unit-based tariff on the exportation of rubber products. Based on the Sub-decree, the SPT rate is increased from 10% to 20% for import of vehicles, and decreased from 33.33% to 10% for import of gasoline. Export duty rate is increased from 10% to 20% for export of stone (e.g. marble, granite, and pebble) and metal (e.g. steel, iron, copper, aluminium, lead, zinc, and tin), and decreased from 10% to 0% for export of cement. In addition, unit-based tariffs are introduced to export of rubber products as follows:

- USD 50 per ton if export prices are less than USD 2,000 per ton.
- USD 150 per ton if export prices range from USD 2,000 to below USD 3,000 per ton.
- USD 200 per ton if export prices range from USD 3,000 to below USD 4,000 per ton.
- USD 250 per ton if export prices equal to or are greater than USD 4,000 per ton.

The Sub-decree became effective as of 1 February 2011.

## *Taxes on corporate income*

### *Corporate tax system*

Cambodia's taxation rules vary according to the taxpayer's regime, the classification of taxpayers under different tax collection and control procedures of the General Department of Taxation (GDT). Real-regime taxpayers include large or incorporated taxpayers duly registered with the Ministry of Commerce and the GDT. The majority of foreign investors will fall into the real regime. Unless otherwise stated, the focus of this summary is on real-regime taxpayers.

Resident taxpayers are subject to tax on worldwide income while non-residents are taxed on Cambodian-sourced income only. A permanent establishment (PE) is taxable on its Cambodian-source income only.

### *Corporate tax rate*

The standard rate of corporate income tax, known as tax on profit (ToP), for companies and PEs is 20%.

### Industry-specific tax rates

Oil and gas and certain mineral exploitation activities are subject to ToP at the rate of 30%.

Insurance companies are taxable at a rate of 5% on the gross premium income and at the rate of 20% on other income derived from non-insurance/reinsurance activities. Net interest income of insurance companies received after withholding 4% or 6% WHT is not taxable income.

### Minimum tax

Real-regime taxpayers are subject to a separate minimum tax. The minimum tax is an annual tax with a liability equal to 1% of annual turnover inclusive of all taxes except value-added tax (VAT). However, an exemption has been provided for Qualified Investment Projects (QIP) *(see the Tax credits and incentives section for more information)*.

As a separate tax to the ToP, the minimum tax is due irrespective of the taxpayer's profit or loss position (i.e. the minimum tax will be liable if the 1% of total annual turnover exceeds the 20% ToP liability).

### Prepayment of ToP

A prepayment of ToP equal to 1% of monthly turnover inclusive of all taxes, except VAT, is required to be paid on a monthly basis. The prepayment can be offset against the annual ToP liability and the minimum tax.

Where a taxpayer is in the period of ToP holiday, the taxpayer is also exempted from the prepayment obligations. However, a nil monthly return will need to be lodged.

Where a taxpayer is not subject to minimum tax, a monthly prepayment of ToP must still be made. However, unutilised prepayments from a prior year can be used to offset the current amount due, and no physical payment may be required.

### Additional ToP on dividend distribution

A dividend-paying taxpayer is required to pay an additional ToP at the time of dividend distribution if the profit was previously subject to a 9% or 0% ToP.

A shareholder is entitled to establish a special dividend account from which the relevant dividend that was already subject to 20% ToP may be on-paid without further additional ToP obligations.

A dividend will be exempt from tax in the hands of the shareholder if additional ToP and WHT for non-resident shareholders has been paid.

## Corporate residence

Resident taxpayers include companies organised, managed, or having their principal place of business in Cambodia.

### Permanent establishment (PE)

A PE may be determined if there is a permanent place or entity through which the non-resident persons carry on their business or if there is an exercise of the authority to conclude a contract on behalf of a foreign entity or if business activities exceed certain time periods in Cambodia.

Factors to be considered in determining a PE include a place of management, an agent or office, a warehouse or factory, a workshop, any place of extraction of natural resources, a plantation, etc. Carrying out projects (e.g. supervisory activities of construction project, provision of services) exceeding a time period of six months in any 12 month period may also be considered as having a PE.

## *Other taxes*

### *Value-added tax (VAT)*
VAT is applicable to real-regime entities and is charged at 10% on the value of the supply of most goods and services. Exported goods and services rendered outside Cambodia are zero-rated. In addition, 0% VAT applies to the supporting industries or contractors who directly supply goods or services to the export-oriented garment manufacturers, textile, and footwear industries. Some supplies are VAT exempt, the main categories being public postal services, medical and dental services, electricity, transportation of passengers by wholly state-owned public transport systems, insurance services, and primary financial services. Note that strict record-keeping requirements do exist.

### *Specific tax on certain merchandise and services (SPT)*
SPT is a form of excise tax that applies to the importation or domestic production and supply of certain goods and services. SPT on domestically produced goods is generally applied to the ‘ex-factory selling price’, which is defined as 65% of the selling price before VAT and any discount. For imported goods, SPT is due on the CIF (cost, insurance, and freight) value inclusive of customs duty. For hotel and telecommunication services, SPT is payable based on the invoice prices.

For local and international air transportation of passengers, SPT is 10%, payable based on the air ticket value issued in Cambodia for travel within and outside Cambodia. The SPT base is inclusive of all taxes other than SPT and VAT. For example, for return air tickets from Phnom Penh to Singapore costing USD 500, exclusive of airport tax, the SPT payable is USD 45.45 (USD 500/1.1 x 10%).

### *Import and export duties*
Import duties are levied on a wide range of products. Rates vary from 0% to 35%. Following Cambodia’s entry into the Association of South-East Asia Nations (ASEAN) during 1999, the government is required to reduce import duties in accordance with the Common Effective Preferential Tariffs program.

Export duties are levied on a limited number of items, such as timber and certain animal products (including most seafood).

### *Accommodation tax*
Accommodation tax is calculated at 2% of the accommodation fee inclusive of all taxes and other services except accommodation tax and VAT.

### *Tax for public lighting (TPL)*
TPL is imposed on the distribution in Cambodia of both foreign made and locally produced alcoholic and tobacco products. TPL is levied at 3% of the value of such products at the time of each in-country sale. Value for these purposes includes all taxes other than TPL and VAT.

### Tax on immovable property (ToIP)
ToIP is levied at 0.1% per annum on the market value of immovable property (determined by the Immovable Property Valuation Committee) less the threshold of KHR 100 million (approximately USD 25,000). Immovable property valued below the threshold is not subject to ToIP.

Immovable property is defined to include land, buildings, and other constructions on land (e.g. infrastructures built on land, regardless of having a wall or roof). Certain exemptions exist for government-owned property, agricultural land, property owned and used for cultural and religious purposes, property of foreign embassies and non-governmental organisations (NGOs), and property in the special economic zones.

At the first phase of implementation, the ToIP will only cover immovable property located in all cities in Cambodia.

The owners, possessors, and final beneficiaries of immovable property are required to register and obtain a Tax Identification Number for each immovable property valued above the threshold from the tax administration where the immovable property is located. Any changes in relation to the registered immovable property (e.g. a change of title) are also required to be reported.

The owners, possessors, and final beneficiaries hold responsibility for calculating ToIP, preparing and filing ToIP return, as well as remitting the ToIP liability to the tax administration once per year by 30 September. A ToIP return is required for every single immovable property and must be completed and filed separately. Since this is a self-assessment tax, the tax administration will perform tax audit on ToIP in the subsequent years.

### Tax on unused land
Land in towns and other specified areas without any construction, or with construction that is not in use, and even certain built-upon land, is subject to the tax on unused land. The tax is calculated at 2% of the market value of the land per square metre as determined by the Commission for Valuation of Unused Land on 30 June each year. The owner of the land is required to pay the tax on 30 September each year.

### Patent tax
Registered businesses must pay a (relatively nominal) patent tax on initial business registration and annually thereafter. Patent tax is levied with reference to turnover or estimated turnover.

In practice, the GDT imposes patent tax at the top band regardless of the level of turnover.

### Tax on means of transportation
The tax on means of transportation imposes a number of statutory fees on the registration of certain vehicles including trucks, buses, motor vehicles, and ships.

### Registration tax (property transfer tax)
Certain documents relating to the establishment, dissolution, or merger of a business, or the transfer of title in certain assets (such as land and vehicles), are subject to registration tax. The tax is imposed at the rate of 4% and is generally levied on the transfer value.

### Fiscal stamp tax
Fiscal stamp tax is to be paid on certain official documents and, perhaps more importantly for foreign investors, certain advertising postings and signage. Amounts vary according to such factors as the location of the signage, illumination, and nationality of any scripted words.

### Tax stamp
Domestic producers or importers of cigarettes have the obligation to buy and affix tax stamps on packets of cigarettes. No person is allowed to sell or display packaged cigarettes for sale without a tax stamp.

### Tax on salary (ToS)/fringe benefits (ToFB)
Cambodia's ToS rules follow internationally familiar residency and source principles. A Cambodian resident taxpayer's worldwide salary will be subject to Cambodian ToS. For non-residents, only the Cambodian sourced salary will be subject to ToS. The place of salary payment is not considered relevant in determining source.

A distinction is made between cash and fringe benefit salary components. Different tax scales also apply.

ToS or ToFB is a tax on employees' income, but employers are held liable to these taxes if the employers fail to withhold.

## Branch income

Income of a branch is taxable in the same way as those for corporate profits.

## Income determination

### Inventory valuation
Inventory can be valued at weighted-average cost, first in first out (FIFO), or current value at the close of the period, where this value is lower than the purchase price or production cost. Work-in-progress should be valued at production costs.

### Capital gain
There is no specific provision on capital gain tax in Cambodia. However, capital gains form part of taxable profit.

### Inter-company dividend
Inter-company dividends between residents are exempt from ToP *(see the Withholding taxes section for more information)*.

### Passive income
Designated passive income (such as interest, royalties, and rent) forms part of the taxable profit.

### Foreign income
Resident entities are taxed on their worldwide income, and tax credits are available for foreign taxes incurred.

## Deductions

### Depreciation and amortisation

Property should be depreciated at rates according to four classes of assets as specified in the tax legislation. Land is not considered a depreciable asset. The straight-line or the declining-balance method is specifically required to be used for each class of assets.

| Assets | Method | Rate (%) |
|---|---|---|
| Building and structures | Straight line | 5 |
| Computers, electronic information systems, software, and data handling equipment | Declining balance | 50 |
| Automobiles, trucks, office furniture, and equipment | Declining balance | 25 |
| All other tangible property | Declining balance | 20 |

Expenditures on intangible property are amortisable over the life of the property or at 10% per annum.

### Special depreciation

A QIP will be entitled to a 40% special depreciation in the first year of purchase or, if later, the first year the assets are used. However, the special depreciation will only apply to assets used in 'manufacturing and processing' (still to be defined) and only if the taxpayer has elected not to use a tax holiday. A clawback provision exists for assets held for less than four years.

### Interest expense

Interest deductibility in any year is limited to the amount of interest income plus 50% of the net profits excluding interest income and interest expense. The excess non-deductible interest expense can be carried forward to the following tax years indefinitely.

### Taxes

Taxes that are not a charge to the enterprise (e.g. WHT, ToS, ToFB, ToP, and additional ToP on dividend distribution) are not deductible.

### Net operating losses

Taxpayers may carry forward their losses for five years. The carryback of losses is not permitted. There is no provision for any form of consolidated filing or group loss relief.

To be eligible to carry forward tax losses a taxpayer must not change its activities or ownership.

If a taxpayer received a unilateral tax reassessment from the GDT, a taxpayer will not be able to utilise the tax losses brought forward in the year of reassessment.

### Loss between related parties

No deduction is available for certain losses incurred on dealings between 51% commonly owned parties.

## Group taxation

There is no specific provision for group taxation in Cambodia.

### *Transfer pricing*
The GDT has wide powers to redistribute income and deductions between parties under common ownership in order to prevent the avoidance or evasion of taxes. Common ownership exists at a relatively low level of 20%.

### *Thin capitalisation*
There is no provision for thin capitalisation in Cambodia.

## *Tax credits and incentives*

### *Foreign tax credit*
Residents earning foreign-sourced income can receive credits for foreign taxes paid.

### *Inbound investment*
The Council for the Development of Cambodia (CDC) may be approached for a one-stop service to register a project and obtain approval for a QIP status. CDC licensing is, however, not mandatory (except for certain large, politically sensitive projects) and is applicable to those projects that do not fall within the ‘negative list’. We list some of the projects in the ‘negative list’ below:

- All kinds of commercial activities, import and export, any transportation services (except the railway sector).
- Currency and financial services.
- Activities that relate to newspapers and media.
- Production of tobacco products.
- Provision of value-added services of all kinds of telecommunication services.
- Real estate development.

The current investment incentives which are applicable to the QIP registered with the CDC include a ToP exemption period of up to six years or special depreciation *(see Special depreciation in the Deductions section)*, import duty exemptions, and exemption from minimum tax. Not all QIP will be entitled to all incentives.

Annually, a QIP is required to obtain a Certificate of Compliance (CoC) from the CDC to guarantee its investment incentives. The CoC is intended to provide confirmation that the QIP has acted in compliance with the relevant tax regulations.

## *Withholding taxes*

WHT needs to be withheld on payments made by residents (and it seems only to those who fall under the real regime). The withheld tax constitutes a final tax when withheld in respect of resident and non-residents.

The types of payments caught are as follows.

### *WHT on payment to residents*
- Rental: 10%.
- Interest: 15% (except payment to a Cambodian bank).
- Services: 15% (except payment to a registered taxpayer and supported by a valid VAT invoice).
- Royalties: 15%.

### WHT on payment to non-residents

- Interest: 14%.
- Rent or right for use of property: 14%.
- Management or technical fees (not defined): 14%.
- Dividends: 14%.

WHT is due when the amount is paid. An expense is considered 'paid' when it is recorded in the accounting records.

## Tax administration

### Returns

The standard tax year is the calendar year, although different accounting year-ends may be granted upon application. The return for annual tax (i.e. ToP/minimum tax) is to be filed annually, within three months of tax year-end.

Return for annual patent tax is to be filed annually, within three months of calendar year-end.

Returns for monthly taxes (e.g. 1% Prepayments of ToP, WHT, ToS or ToFB, SPT, PLT, and accommodation tax) are to be filed monthly, within 15 days of the following month. However, return for VAT is due within 20 days of the following month.

### Payment of tax

ToP or minimum tax is due for payment three months after tax year-end. The ToP or minimum tax liability can be reduced by prepayment of ToP payments.

Patent tax is due three months after calendar year-end.

Monthly taxes are due for payment by the 15th day of the succeeding month, except for VAT which is by the 20th day.

## Other issues

### Statutory audit requirement

All enterprises (physical or legal persons) that meet two of the following criteria are required to have their financial statements audited by an independent external auditor registered with the Kampuchea Institute of Certified Public Accountants and Auditors (KICPAA):

- Annual turnover above KHR 3 billion (approximately USD 750,000).
- Total assets above KHR 2 billion (approximately USD 500,000).
- More than 100 employees.

QIPs registered with the CDC are required to have their financial statements audited by independent external auditors registered with the KICPAA.

The law does not state the deadline for the enterprises to submit their audited financial statements. However, the deadline for audited financial statements to be completed is six months after accounting year-end (i.e. for the financial year ended 31 December 2010, the deadline is 30 June 2011).

## Significant developments

The following significant tax developments were part of the 2011 Finance Law which went into effect as of 1 January 2011:

- General fees settled in cash for amounts equal to or more than 1 million CFA francs (BEAC) (XAF) are no longer deductible.
- A 5.5% withholding tax (WHT) has been instituted on remuneration of services rendered by members of liberal professions domiciled in Cameroon.
- The deduction at source of VAT and instalments of income tax has been reintroduced.
- There is now an obligation to deposit corporate tax returns in hard and soft copy.
- The rate of WHT on rents of buildings has increased from 5% to 10%.

## Taxes on corporate income

The total Cameroon corporate income tax (CIT) rate is 38.5%.

Resident corporations in Cameroon are taxed on their worldwide income; non-resident corporations are taxed only on Cameroon-source income.

The profits subject to the company tax are determined with sole regard to profits earned by entities located in Cameroon or transactions effected in Cameroon.

The net taxable profits are established after deduction of all charges directly entailed by the exercise of activities subject to assessment in Cameroon.

### Reduced CIT rate for newly listed companies

The basic CIT rate of 38.5% is reduced to 33% for companies during their first three years of listing on the national stock exchange of Cameroon.

### Minimum tax

There is a 1.1% minimum tax in Cameroon that is based on the turnover. This 1.1% minimum tax is an instalment of CIT. As such, it shall be offset against CIT. It is the sole tax payable if it is greater than CIT.

# Cameroon, Republic of

## Corporate residence

An entity is deemed resident if its registered office, centre of activity, or management is located in Cameroon, if it has resident employees in Cameroon that provide services to customers, or if it has a permanent establishment (PE) in Cameroon.

### Permanent establishment (PE)

In Cameroon, the internal regulations do not provide for any definition of the concept of PE. For this reason, the tax authorities may refer to the definitions provided by the models of United Nations (UN) and that of Organisation for Economic Co-operation and Development (OECD) Tax Conventions, which constitute the basis of the double tax treaties concluded between Cameroon and France, Canada, and Tunisia.

According to these conventions, a PE is a fixed place of business through which an enterprise wholly or partly performs its activities.

## Other taxes

### Value-added tax (VAT)

VAT shall be levied on natural persons or corporate bodies which automatically, habitually, or occasionally carry out taxable transactions consisting of provisions of services or sales of goods.

The total VAT in Cameroon is 19.25%. Exports are zero rated. The VAT paid upstream is recoverable, except where otherwise stated.

### Custom duties

Customs duties of between 5% and 30%, depending on the nature of the goods imported, are levied based of the customs value.

### Excise taxes

An excise duty of 25% is applicable to cigarettes, drinks, cosmetics, or luxury (e.g. jewels, precious stones). A reduced rate of excise duty (12.5%) shall apply to soft drinks and private vehicles with engine capacities of 2,000 cm3.

### Real property tax

Cameroon property tax is payable annually on real estate with or without an ownership certificate or an administrative or judicial order issued. Tax is charged at 0.11% of the assessed property value.

### Transfer tax

The sale of a business in Cameroon is subject to a transfer tax rate of 15%.

### Business license tax

Any natural person or corporate body carrying on trade, industry, or profession in Cameroon shall be liable to a business license tax. The business license tax is paid annually according to a graduated scale and is assessed on turnover.

New enterprises shall be exempt from the payment of the business license tax during the first two years of operation.

### Registration duty

The registration duty applies to certain deeds listed by the general tax code. The assessment basis depends on the nature of transactions, and the rate varies from 1% to 15%.

The formation of a company and subsequent capital increases in Cameroon are not subject to registration duties. This exemption was provided by the Finance Law for 2010.

### Social security contributions

Employer and employee must contribute on a monthly basis to Cameroon's National Social Insurance Fund at 11.2% and 2.8%, respectively. The basis of contribution is capped at XAF 300, 000 per month. Employers in Cameroon must also contribute 1.75%, 2.5%, or 5% of total salaries to the National Social Insurance Fund for Industrial Accidents, depending on the risk category of activities performed by employees. The calculation basis in this category is the gross salary including the benefits in kind assessed for their actual amount.

### Payroll tax

Employers in Cameroon are required to make monthly contributions of 2.5% of the total amount of salaries and fringe benefits of their employees to the Housing Loan and Employment Fund of Cameroon.

## Branch income

The local branch of any foreign company is taxed at the same rate as a company. The net profits (after CIT) of entities having their residence or head office outside Cameroon (such as the branch of a foreign company) are assumed to be distributed each fiscal year to companies not located in Cameroon.

## Income determination

### Inventory valuation

Stocks shall be valued at cost price; however, if the market price is lower than the cost price, the undertaking shall make provisions for depreciation of inventory.

### Capital gains

Capital gains are normally taxed at full CIT rates.

### Foreign income

As matter of both fact and law, revenue from abroad earned by corporate bodies situated in Cameroon shall be subject to CIT in Cameroon. There is a provision on tax deferral in Cameroon.

## Deductions

### Depreciation

Depreciation is generally computed on a straight-line basis over the useful life according to the rates provided for by the Tax Code, including those which might have already been deferred in times of deficit.

The following depreciation rates are generally accepted for tax purposes:

- Construction: the rates vary from 5% to 20%.
- Stationary equipment and tools: the rates vary from 5% to 20%.
- Portable equipment: the rates vary from 10% to 100%.
- Transport equipment: the rates vary from 10% to 33.33%.
- Railway lines: the rates vary from 1% to 10%.
- Engines: the rate is 5%.
- Rehabilitation: the rates vary from 5% to 25%.
- Furniture fittings and other equipment: the rates vary from 10% to 33.33%.
- Fishing equipment and fishing vessels: 15%.

The deduction of depreciation can be carried forward indefinitely.

### *Net operating losses*
Any loss sustained in a given year can be carried forward up to the fourth year following the recording of the loss. The carryback of losses is not permitted in Cameroon.

### *Payments to foreign entities*
Head office overhead expenses for operations carried out in Cameroon and the remuneration of certain effective services (studies, technical, financial, or accounting assistance) provided to Cameroonian firms by foreign natural persons or corporate bodies are not totally deductible. Fees paid are deductible up to a maximum of 10% of the taxable profit before deducting the expenses concerned.

## *Group taxation*

There is specific taxation of groups within the Economic and Monetary Community of Central Africa (CEMAC) area.

Where a joint stock company and a private limited company own either registered stock in a joint stock company or shares in a private limited company, the net proceeds of the share in the second company paid to the first during the financial year shall be deducted from the total net profit of the latter, less a percentage for costs and charges. This percentage is fixed at 10% of the total amount of the proceeds. This system shall apply when all of the following conditions are met:

- The stocks or shares owned by the parent establishment represent at least 25% of the capital of the subsidiary firm.
- The parent and subsidiary firms have their registered office in a CEMAC state (Cameroon, Central African Republic, Chad, Gabon, Equatorial Guinea, and Republic of Congo).
- The stocks or shares allotted at the time of issue are still registered in the name of the participating company which undertakes to retain them for at least two consecutive years in registered form.

### *Transfer pricing*
There are provisions in the General Tax which relate to transfer pricing, but audits from Tax Administration are not yet aggressive.

### *Thin capitalisation*
There is no specific thin capitalisation rule in Cameroon.

## Tax credits and incentives

Three major tax incentives are granted in Cameroon under the tax systems.

### The system of reinvestment relief

Any corporate body reinvesting in Cameroon may be granted, under certain conditions, a reduction in CIT.

The reinvestment must take a form described by the general tax code as construction or extension of permanent buildings for industrial, agricultural, forestry, tourism, or mining purposes, including technical offices, housing salaried workers free of charges, etc.

Note that total investment less than XAF 25 million are not eligible for reinvestment relief.

The reinvestment relief consists of a deduction from the taxable basis in an amount equal to 50% of the investment effected by the undertaking and approved by the tax authorities. The rate is 25% for telecommunication companies.

### The special fiscal regime for structuring projects

The special fiscal regime for structuring projects applies to major enterprises with annual turnover not less than XAF 1 billion and small and medium-sized enterprises with annual turnover of less than XAF 1 billion.

The tax incentives consist of:

- Exemption from payment of the business license tax for the first two years of operation.
- Fixed registration fee of XAF 50,000 for transfers of real estate which directly concern the establishment of the project.
- Exemption from payment of VAT on local purchases of building materials and on imports related to the establishment of the project.
- Extension of the carryover period for deficits from four to five years.

A taxpayer must apply, required conditions must be met, and authorisation must be issued for this tax incentive to be granted.

### Incentives applicable to listed companies

Companies whose ordinary shares are listed on the Cameroon Stock Exchange shall be entitled to the following CIT reduced rates:

- 22% for a period of three years for capital increases which represent at least 20% of the share capital.
- 27.5% for a period of three years for transfers of shares which represent at least 20% of the share capital.
- 30.8% for a period of three years from the date of listing for capital increases or transfers of shares which represent less than 20% of the share capital.

Companies whose ordinary shares are listed on the bond market in Cameroon shall be entitled to pay basic CIT at a reduced rate of 33% for three years, effective from the date of listing.

### Foreign tax credit
Taxes paid abroad are not considered as tax credits unless provided as such by international tax treaties.

## Withholding taxes

A special tax is levied at an overall discharging rate of 15% on income paid to natural persons and corporate bodies domiciled outside of Cameroon by enterprises or establishments based in Cameroon for various services provided or used in Cameroon. The tax is withheld at source by the Cameroonian entity which pays the remuneration.

### Dividends
A total WHT of 16.5% applies to dividends paid to both Cameroon residents and non-residents. The WHT rate may be reduced under an applicable tax treaty.

### Interest
As of 1 January 2011, the interest from foreign loans is subject to 16.5% WHT. Prior to 1 January 2011, the payment of 16.5% WHT on interest from foreign loans had been suspended.

### Royalties
Royalties paid to non-residents are subject to a 15% WHT. The tax rate may be reduced under an applicable tax treaty.

### Tax treaties
Cameroon has tax treaties with France, Canada, Tunisia, and members of CEMAC (Cameroon, Gabon, Equatorial Guinea, Congo, Chad, and Central African Republic).

| Recipient | Dividends (%) | Interest (%) | Royalties (%) | Head office expenses and technical assistance (%) |
|---|---|---|---|---|
| CEMAC | 16.5 | 16.5 | N/A | N/A |
| Canada | 16.5 | 16.5 | 16.5 | 15 |
| France | 15 | 15 | N/A | 7.5 |
| Tunisia | 12 | 15 | 15 | 15 |

## Tax administration

### Returns
The tax year in Cameroon is the calendar year.

On or before 15 March, taxpayers are expected to submit to the tax administration the annual return of revenue derived from their business venture during the period serving as tax base.

This return must be presented in conformity with the Organisation for the Harmonisation of Business Law in Africa (OHADA) accounting system.

### *Payment of tax*
An instalment representing the 1.1% minimum tax of turnover realised during each month shall be paid to the tax authorities not later than the 15th of the following month.

Advance payment of 1% on imports or purchases of goods for resale is withheld at source by the supplier.

The balance of CIT is paid, at the latest, on 15 March following the fiscal year-end, when submitting the CIT return.

### *Surplus tax payments*
A surplus tax payment can be offset against future taxes of the same nature to be paid. For the specific case of VAT, a reimbursement process is provided for by the General Tax Code under certain conditions.

## Significant developments

Canada's corporate summary reflects all 2011 federal, provincial, and territorial budgets. Many of the tax changes are aimed at tightening perceived loopholes or inequities in various aspects of the tax system. Notably, a proposed measure curtails a corporation's ability to defer income tax by taking advantage of the timing of the year-ends of partnerships of which it is a member. This proposal will affect tax planning that is common in a number of sectors, including oil and gas, real estate, and retail, as well as in income trust conversions. Other measures enhance targeted programs, such as book publishing, film, and media tax credits and incentives for manufacturing and processing. The summary is based on enacted and proposed legislation and assumes that the proposed legislation will become law.

Note that on 25 March 2011, the federal minority government was defeated. As a result, the 22 March 2011 federal budget died, along with outstanding bills and legislation. However, because the same party won a majority in the 2 May 2011 federal election, those measures are expected to be reintroduced, and therefore are reflected in this summary.

### Corporate income tax rates

Federal general (and manufacturing and processing) corporate income tax rates decreased from 18% to 16.5% on 1 January 2011, and will decrease to 15% on 1 January 2012. Provincial corporate rates have generally declined.

### Capital tax

All provincial general capital taxes have been eliminated, except for Nova Scotia's, which will be eliminated by 1 July 2012.

### Stock options

Significant changes to the rules for stock options permit only the employer or employee (not both) to claim a tax deduction for cashed-out stock options and eliminate employee elections to defer the payment of tax on stock option benefits until the shares are sold (relief may be available). The changes also eliminate the undue hardship exemption for withholdings on stock option benefits and require withholdings in connection with these benefits after 2010. Grandfathering rules may apply.

### Canada Revenue Agency (CRA) access to documents

The CRA's revised policy on access to taxpayer and third-party documents demonstrates its heightened interest in supporting documents that assist in the determination of tax obligations and entitlements, and signals that taxpayers may receive more frequent requests for supporting documents.

### *Tax avoidance*
Draft legislation makes an 'avoidance transaction' meeting certain conditions a 'reportable transaction' that must be reported to the CRA, generally for transactions entered into after 2010, and those that are part of a series of transactions completed after 2010. Quebec already has a provincial reporting regime for certain aggressive tax planning transactions, generally carried out after 14 October 2009.

### *Non-resident trusts (NRTs)*
Draft legislation refines the NRT rules that generally apply to taxation years ending after 2006; trusts subject to these rules will be deemed resident for Canadian income tax purposes. A trust will be allowed to elect to be deemed resident for the 2001 and subsequent years.

### *Offshore investment funds*
Draft legislation maintains the enacted provision for investments in offshore investment funds, but increases the prescribed income percentage by 2%, and extends the statute-barred period for taxpayers that have invested in offshore investment funds by three years, for taxation years ending after 4 March 2010.

### *Specified investment flow-throughs (SIFTs)*
Certain earnings of SIFTs (i.e. publicly traded income trusts and partnerships) are subject to a SIFT tax and are deemed to be a dividend when distributed. These rules apply starting the 2007 taxation year, for SIFTs first publicly traded after 31 October 2006, and starting the 2011 taxation year, for other SIFTs. New rules facilitate the conversion of SIFT trusts into corporations, generally for transactions that occur after 13 July 2008 and before 2013.

### *Group taxation*
The federal government has issued a consultation paper, *The Taxation of Corporate Groups*, that explores possible approaches for a new system for taxing corporate groups in Canada.

### *Partnership deferral*
Under proposed rules that apply to corporate partners with taxation years ending after 22 March 2011, corporate partners with a significant interest in a partnership will generally be unable to defer taxation on the partnership income. Instead, they must accrue partnership income up to the end of the corporation's taxation year. An election may be available to change the partnership's fiscal period. Partnerships in multi-tier structures must adopt the same fiscal period (31 December, unless otherwise elected by the partnerships). Certain transitional reserves may be available for up to five years.

### *Partnership information returns*
For partnerships with fiscal periods ending after 31 December 2010, the CRA has replaced the requirement to file a partnership information return that is based on the number of partners with one related to financial thresholds and partner structure.

### *Stop-loss rule on share redemption*
Subject to certain exceptions, an existing rule reduces the loss realised by a corporation from the disposition of a share by the amount of tax-free dividends received, or deemed to be received, on the share on or before the disposition. A proposal removes the exceptions, with respect to any deemed dividend arising on the redemption of shares held by a corporation, for redemptions after 21 March 2011, unless the corporation

and the shareholder are both private corporations and the shareholder is not a financial institution.

### *Financial statement reporting*
For fiscal years beginning after 31 December 2010:

- Most 'publicly accountable enterprises' must adopt International Financial Reporting Standards (IFRS).
- Private enterprises must adopt either IFRS or Accounting Standards for Private Enterprises (ASPE).

As a result, IFRS and ASPE have become Canadian generally accepted accounting principles (GAAP). This could affect the measurement and reporting of income taxes for financial statement purposes and the calculation of Canadian taxes payable.

### *Provincial sales tax harmonisation*
Although British Columbia's provincial sales tax (PST) was harmonised with the federal goods and services tax (GST) on 1 July 2010, a referendum will be held from June to July 2011 to determine if the harmonised sales tax (HST) will be cancelled and replaced with the former PST and GST regime. If the HST regime is retained in British Columbia:

- the HST rate will decrease in stages from 12% to 10% by 1 July 2014, and
- the general corporate income tax rate will increase from 10% to 12% on 1 January 2012.

## *Taxes on corporate income*

### *Federal income tax*
The following rates apply for 31 December 2011 year ends. For non-resident corporations, the rates apply to business income attributable to a permanent establishment in Canada. Different rates may apply to non-resident corporations in other circumstances. Non-resident corporations may also be subject to branch tax (*see below*).

| | **Federal rate (%)** |
|---|---|
| Basic rate | 38 |
| Less—Provincial abatement (1) | 10 |
| Federal rate | 28 |
| Less—General rate reduction or manufacturing and processing (M&P) deduction (2) | 11.5 |
| Net federal tax rate (3, 4) | 16.5 |

Notes

1. The basic rate of federal tax is reduced by a 10% abatement to give the provinces and territories room to impose corporate income taxes. The abatement is available in respect of taxable income allocated to Canadian provinces and territories. Taxable income allocable to a foreign jurisdiction is not eligible for the abatement and normally is not subject to provincial or territorial taxes.
2. The general rate reduction and M&P deduction do not apply to the first 500,000 Canadian dollars (CAD) of active business income earned in Canada by Canadian-controlled private corporations (CCPCs), investment income of CCPCs, and income from certain other corporations (e.g. mutual fund corporations, mortgage investment corporations and investment corporations), which may benefit from preferential tax treatment. The general rate reduction and M&P deduction increased from 10% to 11.5% on 1 January 2011, and will increase to 13% on 1 January 2012.
3. Provincial or territorial taxes apply in addition to federal taxes. Provincial and territorial tax rates are noted below.

4. For small CCPCs, the net federal tax rate is levied on active business income above CAD 500,000; a federal rate of 11% applies to the first CAD 500,000 of active business income. Investment income (other than most dividends) of CCPCs is subject to the federal rate of 28%, in addition to a refundable federal tax of 6 2/3%, for a total federal rate of 34.7%.

## *Provincial/territorial income tax*

All provinces and territories impose income tax on income allocable to a permanent establishment in the province or territory. Generally, income is allocated to a province or territory by using a two-factor formula based on gross revenue and on salaries and wages. Provincial and territorial income taxes are not deductible for federal income tax purposes. The rates given apply to 31 December 2011 year ends and do not take into account provincial tax holidays, which reduce or eliminate tax in limited cases.

| | **Provincial/territorial rate (%) (1, 2)** |
|---|---|
| Alberta | 10.0 |
| British Columbia (3) | 10.0 |
| Manitoba (4) | 12.0 |
| New Brunswick (5) | 10.5 |
| Newfoundland and Labrador | 14.0 or 5.0 |
| Northwest Territories | 11.5 |
| Nova Scotia | 16.0 |
| Nunavut | 12.0 |
| Ontario (6) | 11.7 or 10.0 |
| Prince Edward Island | 16.0 |
| Quebec | 11.9 |
| Saskatchewan (7) | 12.0 or 10.0 |
| Yukon Territory | 15.0 or 2.5 |

Notes

1. When two rates are indicated, the lower rate applies to M&P income.
2. In all provinces and territories, the first CAD 500,000 (CAD 400,000 in Manitoba and Nova Scotia and before 2011, the Yukon) of active business income of a small CCPC is subject to reduced rates that range from 0% to 8.0%, depending on the jurisdiction.
3. British Columbia's rate decreased from 10.5% to 10% on 1 January 2011, but will increase to 12% on 1 January 2012, if British Columbia keeps the harmonised sales tax regime *(see Harmonised sales tax below)*.
4. Manitoba's rate will decrease from 12% to 11% at a date to be determined, subject to balanced budget requirements.
5. New Brunswick's rate decreased from 12% to 11% on 1 July 2010 and will decrease to 10% on 1 July 2011. New Brunswick's 2011 budget maintains the rate at 10%. The rate was to decline to 8% on 1 July 2012.
6. The lower Ontario rate applies to profits from manufacturing and processing, and from farming, mining, logging, and fishing operations carried on in Canada and allocated to Ontario. This rate decreased from 12% to 10% on 1 July 2010.

   Ontario's non-M&P rate decreased from 14% to 12% on 1 July 2010, and will decrease to 11.5% on 1 July 2011, and to 11% on 1 July 2012, and to 10% on 1 July 2013.

   Corporations subject to Ontario income tax may also be liable for corporate minimum tax (CMT) based on adjusted book income. The CMT is payable only to the extent that it exceeds the regular Ontario income tax liability. The CMT rate decreased from 4% to 2.7% on 1 July 2010, and the CMT thresholds increased as shown in the following table.

| | | Taxation years ending | |
|---|---|---|---|
| | | before 1 July 2010 | after 30 June 2010 |
| Thresholds for CMT to apply (6a) | Total assets | > CAD 5 million | ≥ CAD 50 million |
| | | or | and |
| | Annual gross revenues | > CAD 10 million | ≥ CAD 100 million |

6a. Thresholds apply on an associated basis.

7. Saskatchewan's M&P rate is as low as 10% (reduced from the 12% non-M&P rate), depending on the extent to which the corporation's income is allocated to the province.

## *Corporate residence*

As a general rule, corporations resident in Canada are subject to Canadian income tax on worldwide income. As a result of special provisions in the Income Tax Act, almost all corporations incorporated in Canada are resident in Canada. A corporation not incorporated in Canada may be considered resident in Canada if its central management and control are exercised in Canada.

A corporation incorporated in Canada will cease to be a Canadian resident if it is granted articles of continuance in a foreign jurisdiction or if it is a predecessor corporation in a cross-border amalgamation. Similarly, a foreign corporation will become resident in Canada if it is continued in Canada or is a predecessor corporation of an amalgamated corporation that is resident in Canada.

Non-resident corporations are subject to income tax on income derived from carrying on a business in Canada and on capital gains arising upon the disposition of taxable Canadian property. The purchaser of the taxable Canadian property is generally required to withhold tax from the amount paid unless the non-resident vendor has obtained a clearance certificate.

Taxable Canadian property includes, among other things, real or immovable property situated in Canada, both capital and non-capital property used in carrying on a business in Canada and shares in Canadian-resident corporations that are not listed on a stock exchange. In certain circumstances, shares in Canadian-resident corporations that are listed on a stock exchange, shares in non-resident corporations, and interests in non-resident trusts will be considered taxable Canadian property. However, commencing 5 March 2010, taxable Canadian property excludes shares of corporations, and certain other interests, that do not derive their value (over a 60-month look-back period) principally from real or immovable property situated in Canada, Canadian resource property, or timber resource property. Therefore, with some exceptions, non-residents are no longer required to report dispositions of these properties and obtain a clearance certificate.

Withholding tax at a rate of 25% is imposed on interest (other than most interest paid to arm's length non-residents), dividends, rents, royalties, certain management and technical service fees, and similar payments, made by a Canadian resident to a non-resident of Canada.

Canadian income tax and withholding tax can be reduced or eliminated if Canada has a treaty with the non-resident's country of residence. A list of treaties that Canada has negotiated and applicable withholding tax rates is provided under *the Withholding taxes section.*

## Other taxes

### Goods and services tax

The federal goods and services tax (GST) is levied at a rate of 5%. It is a value-added tax applied at each level in the manufacturing and marketing chain and applies to most goods and services. However, the tax does not apply to sales of zero-rated goods, such as exports and basic groceries, or to tax-exempt supplies, such as certain services provided by financial institutions.

Generally, businesses pay GST on their purchases and charge GST on their sales, and remit the net amount (i.e. the difference between the GST collected and the input tax credit for the tax paid on purchases). Suppliers are entitled to claim input tax credits on zero-rated goods and services, but not on tax-exempt supplies.

### Harmonised sales tax

Five provinces have harmonised their sales tax systems with the GST and impose a single harmonised sales tax (HST). The HST includes the 5% GST and a provincial sales tax component. It is imposed on essentially the same base as the GST. HST rates follow.

| | **HST rate (%)** |
|---|---|
| British Columbia (1) | 12 |
| New Brunswick | 13 |
| Newfoundland and Labrador | 13 |
| Nova Scotia (2) | 15 |
| Ontario (3) | 13 |

Notes

1. British Columbia harmonised its 7% Social Services Tax (SST) with the 5% GST on 1 July 2010. However, British Columbia's government has indicated that it will honour the results of a provincial referendum to be held from June to July 2011, to determine if the 12% HST will be cancelled and replaced with the former regime. If the HST regime is retained:
   - the HST rate will decrease from 12% to 11% on 1 July 2012, and to 10% on 1 July 2014 (i.e. the provincial component will decrease from 7% to 6% and then to 5%), and
   - the general and M&P corporate income tax rate will increase from 10% to 12% on 1 January 2012.
2. Nova Scotia's HST rate increased from 13% to 15% on 1 July 2010.
3. Ontario harmonised its 8% retail sales tax with the 5% GST on 1 July 2010.

### Retail sales tax

Manitoba, Prince Edward Island, and Saskatchewan levy a retail sales tax at rates ranging from 5% to 10% on most purchases of tangible personal property for consumption or use in the province and on the purchase of specific services. As mentioned, on 1 July 2010, retail sales tax in British Columbia and Ontario was replaced with the harmonised sales tax.

Quebec's sales tax is structured essentially in the same way as the GST and applies to most goods and services that are subject to the GST. The general Quebec sales tax rate is 8.5% (7.5% before 2011 and 9.5% after 2011). Quebec administers the GST in that province.

Only Prince Edward Island and Quebec levy sales tax on prices that include the GST.

Alberta and the three territories (the Northwest Territories, Nunavut, and the Yukon) do not impose a retail sales tax. However, the GST applies in those provinces/territories.

### Property tax

Property taxes are levied by municipalities in Canada on the estimated market value of real property within their boundaries and by provinces and territories on land not in a municipality. In most provinces and territories, a general property tax is levied on the owner of the property. Some municipalities levy a separate business tax, which is payable by the occupant if the premises are used for business purposes. These taxes are based on the assessed value of the property at tax rates that are set each year by the various municipalities. School taxes, also generally based on the value of real property, are levied by local and regional school boards or the province or territory.

### Land transfer tax

All provinces and territories levy a land transfer tax or registration fee on the purchaser of real property within their boundaries. These levies are expressed as a percentage, primarily on a sliding scale, of the sale price or the assessed value of the property sold, and are generally payable at the time title to the property is registered. Rates generally range from 0.02% to 2%, depending on the province or territory, but may be higher if the purchaser is a non-resident. Some exemptions (or refunds) are available. Additional land transfer taxes apply for properties purchased in the municipalities of Montreal or Toronto. Other municipalities may also impose these taxes and fees.

### Federal capital taxes

The federal government does not levy a general capital tax. It imposes the Financial Institutions Capital Tax (Part VI Tax) on banks, trust and loan corporations, and life insurance companies at a rate of 1.25% when taxable capital employed in Canada exceeds CAD 1 billion. The tax is not deductible in computing income for tax purposes. It is reduced by the corporation's federal income tax liability. Any unused federal income tax liability can be applied to reduce Part VI Tax for the previous three and the next seven years. The thresholds are shared among related financial institutions. In effect, the tax constitutes a minimum tax on financial institutions.

### Provincial capital taxes

All provincial general capital taxes have been eliminated, except for Nova Scotia's, which will be eliminated by 1 July 2012. However, most provinces still impose a capital tax on financial institutions. Capital taxes are deductible for federal income tax purposes. The federal government has proposed to limit the deductibility of capital taxes, but has delayed implementing this proposal indefinitely. As an interim measure, any increase in these taxes, with certain exceptions, is not deductible. The territories do not impose capital taxes.

Provincial capital taxes are imposed at the following rates for 31 December 2011 year ends. Certain exemptions and reduced rates apply.

| | General (%) | Banks, trust and loan corporations (%) |
|---|---|---|
| Alberta | – | – |
| British Columbia (1) | – | – |
| Manitoba (2) | – | 3 |
| New Brunswick | – | 3 |
| Newfoundland and Labrador | – | 4 |
| Nova Scotia (3) | 0.075 | 4 |
| Ontario (4) | – | – |
| Prince Edward Island | – | 5 |
| Quebec (5) | – | 0.25 |

| | General (%) | Banks, trust and loan corporations (%) |
|---|---|---|
| Saskatchewan (6) | – | 3.25 |

Notes

1. British Columbia's financial institutions capital tax was eliminated on 1 April 2010. Before 1 April 2010, for financial institutions with either a head office in British Columbia or net paid-up capital of CAD 1 billion or less, the rate was 0.33%, and for other financial institutions, the rate was 1%. A financial institutions minimum tax that was to apply starting 1 April 2010, will not come into effect.
2. Manitoba's general capital tax was eliminated on 1 January 2011 (earlier for certain manufacturing and processing companies), except for Crown corporations, for which the rate remains 0.3%. The rate had been 0.2% for taxation years commencing after 1 January 2010; other rates applied to the first CAD 21 million of taxable capital employed in Manitoba. Manitoba's 2011 budget eliminates the financial institutions capital tax when taxable paid up capital is under CAD 4 billion, for taxation years ending after 12 April 2011.
3. Nova Scotia's general rate decreased from 0.15% to 0.1% on 1 July 2010 and will decrease to 0.05% on 1 July 2011. These rates are doubled for corporations with taxable capital under CAD 10 million. The general capital tax will be eliminated on 1 July 2012.
4. Ontario's capital tax was eliminated for all corporations on 1 July 2010 (it was reduced or eliminated earlier for certain manufacturing and resource corporations). Ontario's general rate had been 0.15%, and its financial institutions rates were 0.45% (deposit-taking institutions) and 0.36% (other); lower rates applied to financial institutions with taxable capital of CAD 400 million or less.
5. Quebec's 0.12% general capital tax was eliminated on 1 January 2011 (it was reduced or eliminated earlier for certain manufacturing corporations).
   Quebec's 0.25% financial institution rate is the 0.25% compensatory tax on paid-up capital. A compensatory tax of 3.9% (2% for taxation years ending before 31 March 2010 or beginning after 31 March 2014) on payroll also applies. Quebec's financial institutions base rate of 0.24% was eliminated on 1 January 2011.
6. Saskatchewan's rate for financial institutions that have taxable paid-up capital of CAD 1.5 billion or less is 0.7%. However, retroactive to taxation years ending after 31 October 2009, financial institutions that qualified for the 0.7% capital tax rate in taxation years ending after 31 October 2008 and before 1 November 2009, will be subject to a 0.7% capital tax rate on their first CAD 1.5 billion of taxable capital, and a 3.25% capital tax rate on taxable capital exceeding CAD 1.5 billion.

### *Additional taxes on insurers*
All provinces and territories impose a premium tax ranging from 2% to 4.4% on insurance companies (both life and non-life). In addition, Nova Scotia imposes a capital tax on all insurance companies (which will be eliminated on 1 July 2012), while Ontario and Quebec impose a capital tax on life insurance companies only. Quebec also levies a compensatory tax on insurance premiums at a rate of 0.55% (0.35% for taxation years ending before 31 March 2010 or beginning after 31 March 2014).

### *Part III.1 tax on excess designations*
Federal Part III.1 tax applies at a 20% or 30% rate if, during the year, a CCPC designated as eligible dividends an amount that exceeds its general rate income pool (GRIP), or a non-CCPC pays an eligible dividend when it has a positive balance in its low rate income pool (LRIP). A corporation subject to Part III.1 tax at the 20% rate (i.e. the excess designation was inadvertent) can elect, with shareholder concurrence, to treat all or part of the excess designation as a separate non-eligible dividend, in which case Part III.1 tax will not apply to the amount that is the subject of the election.

Eligible dividends are designated as such by the payor and include dividends paid by:

- public corporations or other corporations that are not CCPCs, that are resident in Canada and are subject to the federal general corporate income tax rate (i.e. 16.5% in 2011), or
- CCPCs, to the extent that the CCPC's income is:
  - not investment income (other than eligible dividends from public corporations), and
  - subject to the general federal corporate income tax rate (i.e. the income is active business income not subject to the federal small business rate).

Non-eligible dividends include dividends paid out of either income eligible for the federal small business rate or a CCPC's investment income (other than eligible dividends received from public companies).

### *Provincial/territorial payroll taxes*

Employers in Manitoba, Newfoundland and Labrador, Ontario, and Quebec are subject to payroll tax. Maximum rates range from 1.95% to 4.3%. In addition, Quebec employers with payroll of at least CAD 1 million must allot 1% of payroll to training or to a provincial fund. Employers in the Northwest Territories and Nunavut must deduct from employees' salaries a payroll tax equal to 2% of employment earnings.

### *Social security taxes*

For 2011, employers are required to pay, for each employee, government pension plan contributions up to CAD 2,217.60 and employment insurance premiums up to CAD 1,101.46. However, Quebec employers contribute, per employee, a maximum of CAD 872.51 in employment insurance premiums and up to CAD 481.28 to a Quebec parental insurance plan.

### *Excise taxes and duties*

Excise duties are levied at various rates on alcohol, alcoholic beverages, and tobacco products manufactured in Canada, while imports are subject to customs duties (*see below*).

Excise tax is imposed on petroleum products and automobiles. In addition, a 10% federal excise tax is imposed on insurance against a risk in Canada if it is placed by insurers through brokers or agents outside Canada or with an insurer that is not authorised under Canadian or provincial law to transact the business of insurance. Certain premiums are exempt, including those for life, personal accident, marine, and sickness insurance.

### *Custom duties*

Custom duties generally are intended to protect Canadian industry from foreign competition and not as a source of revenue. The majority of most-favoured-nation (MFN) duty rates are below 10%; notable exceptions are footwear, textiles and apparel, and certain food products (the last may be subject to 'tariff rate quotas'). Goods imported from developed countries with which Canada does not have free trade agreements will attract the MFN duty rate. Many products, however, are duty-free regardless of their country of origin.

Qualifying goods that originate in the North American Free Trade Agreement (NAFTA) territory (Canada, the United States and Mexico) can enter Canada duty-free. Canada has implemented free trade agreements (FTAs) with Chile, Costa Rica, the European Free Trade Association countries, Israel, and Peru, and has signed or is negotiating agreements with several other countries. Like the NAFTA, these agreements set out rules of origin for determining whether the goods are eligible for preferential duty rates under the particular FTA.

Canada extends preferential duty rates to most (but not all) products imported from developing countries (the General Preferential Tariff) and has granted further concessions to goods originating in 'Least Developed Countries'. In either case, goods must satisfy rules of origin and be shipped directly to Canada from the beneficiary countries to qualify for these rates.

Canada applies the 'general duty rate' of 35% only to North Korea.

## Branch income

A non-resident corporation will be subject to income tax at normal corporate rates on profits derived from carrying on a business in Canada. However, Canada's tax treaties generally restrict taxation of a non-resident's business income to the portion allocable to a permanent establishment located in Canada.

In addition, a special 25% 'branch tax' applies to a non-resident's after-tax profits that are not invested in qualifying property in Canada. The branch tax essentially is equivalent to a non-resident withholding tax on funds repatriated to the foreign head office. In the case of a company resident in a treaty country, the rate at which the branch tax is levied may be reduced to the withholding tax rate on dividends prescribed in the relevant tax treaty (generally 5%, 10% or 15%). Some of Canada's treaties prohibit the imposition of branch tax or provide that branch tax is payable only on earnings in excess of a threshold amount. The branch tax does not apply to transportation, communications and iron-ore mining companies. Nor does it apply to non-resident insurers, except in special circumstances.

Whether or not a treaty applies, a non-resident corporation that has a permanent establishment in Canada may be subject to federal capital taxes (i.e. financial institutions capital tax) and provincial capital taxes (*see Provincial capital taxes under Other taxes section*).

## Income determination

### Inventory valuation

In most cases, all property included in an inventory can be valued at fair market value, or each item can be valued at its cost or fair market value, whichever is lower. Most well-established and reasonable approaches to inventory costing can be used for tax purposes, except for the last in first out (LIFO) method. Conformity between methods used for book and tax reporting is not mandatory, but the method chosen should be used consistently for tax purposes. Inventory must be valued at the commencement of the year at the same amount as at the end of the immediately preceding year.

### Capital gains

Half of a capital gain constitutes a taxable capital gain, which is included in the corporation's income and taxed at ordinary rates. Capital losses are deductible, but generally only against capital gains. Any excess of allowable capital losses over taxable capital gains in the current year can be carried back three years and forward indefinitely, to be applied against net taxable capital gains from those years, except in the case of an acquisition of control. No particular holding period is required. Intent is a major factor in determining whether the gain or loss is income or capital in nature. Complex transitional rules ensure that gains and losses accrued to the end of 1971 have no tax effect. Capital gains were not taxable before 1972.

### Interest, rents and royalties

Interest that accrued, became receivable by, or was received by a corporation, and rents and royalties received by a corporation are taxable as income from a business or property, as the case may be.

### Intercompany dividends

Dividends received by one Canadian corporation from another Canadian corporation generally can be deducted in full in determining taxable income. However, dividends on certain preferred shares are an important exception and are taxed at full corporate rates. The intent is to allow preferred share investors to transfer benefits of accumulated deductions or losses from the entity that incurred the expense.

Dividends on most preferred shares are subject to a 10% tax in the hands of the recipient, unless the payer elects to pay a 40% tax (instead of a 25% tax) on the dividends paid. The payer can offset the tax against its income tax liability. The tax is not imposed on the first CAD 500,000 of taxable preferred-share dividends paid in a taxation year. Nor does it apply to dividends paid to a shareholder with a 'substantial interest' in the payer (i.e. at least 25% of the votes and value).

Dividends received by private corporations (or public corporations controlled by one or more individuals) from Canadian corporations are subject to a special refundable tax of 33 1/3%. The tax is not imposed if the recipient is connected to the payer (i.e. the recipient owns more than a 10% interest in the payer) unless the payer was entitled to a refund of tax in respect of the dividend. When the recipient pays dividends to its shareholders, the tax is refundable at CAD 1 for every CAD 3 of dividends paid.

### *Foreign income*

Corporations resident in Canada are subject to Canadian federal income taxes on worldwide income, including income derived directly from carrying on business in a foreign country, as earned. In addition, resident corporations may be taxable currently on certain passive and active income earned by foreign subsidiaries and other foreign entities. Relief from double taxation is provided through Canada's international tax treaties, as well as foreign tax credits and deductions for foreign taxes paid on income derived from non-Canadian sources.

Canada is negotiating 11 Tax Information Exchange Agreements (TIEAs) and has signed 13. One TIEA has entered into force (with the former Netherlands Antilles). Canada intends to sign more TIEAs with other non-treaty countries. To encourage non-treaty countries to enter into TIEAs:

- an exemption will be available for dividends received out of active business income earned by foreign affiliates resident in non-treaty countries that have agreed to a TIEA with Canada, and
- active business income earned by foreign affiliates in non-TIEA, non-treaty countries will be treated as foreign accrual property income (FAPI), which is taxable on an accrual basis, if a TIEA with Canada is not concluded within a specified time period.

Foreign investment income earned directly, other than dividends, is taxed as earned, with foreign tax credits available in respect of foreign withholding taxes. Dividends received by private corporations from non-connected foreign corporations are subject to the special refundable tax of 33 1/3% referred to above, to the extent that the dividends are deductible in determining taxable income.

The tax treatment of foreign dividends depends on whether the payer corporation is a foreign affiliate of the recipient. A foreign corporation is considered a foreign affiliate of a Canadian corporation if the Canadian corporation owns, directly or indirectly, at least 1% of any class of the outstanding shares of the foreign corporation and the Canadian corporation and related persons (together) own, directly or indirectly, at least 10% of any class of the outstanding shares of the foreign corporation.

Dividends received from foreign corporations that are not foreign affiliates are taxed when received, with foreign tax credits available in respect of foreign withholding taxes. Dividends received from foreign affiliates are permitted to flow tax-free between corporations, subject to certain limitations. These limitations pertain to the nature of the earnings from which the dividends were paid, the underlying foreign taxes paid and withholding tax paid.

Canadian corporations are taxed on certain investment income (foreign accrual property income) of controlled foreign affiliates (e.g. more than 50% voting shares owned by the Canadian corporation, related parties or a limited number of Canadian residents, among other things) as it is earned, whether or not distributed. A grossed-up deduction is available for foreign income and withholding taxes paid in respect of the income.

In light of recommendations made by the Advisory Panel on Canada's System of International Taxation and others, draft legislation refines the tax treatment of certain investments in non-resident trusts (NRTs) and in offshore investment funds.

Draft legislation treats NRTs as being deemed resident for Canadian income tax purposes. The NRT rules will apply commencing 2007. A trust will be allowed to elect to be deemed resident for the 2001 and subsequent years.

Draft legislation maintains the enacted version of the rules for offshore investment funds property, but with some modifications. The legislation increases the prescribed income percentage by 2%, and extends the statute-barred period for taxpayers that have invested in offshore investment funds by three years, for taxation years ending after 4 March 2010.

### *Stock dividends*

If the payer is resident in Canada, stock dividends are treated for tax purposes in the same manner as cash dividends. The taxable amount of a stock dividend is the increase in the paid-up capital of the payer corporation because of the payment of the dividend. Stock dividends received from a non-resident are exempt from this treatment. Instead, the shares received have a cost base of zero.

### *Foreign exchange gains and losses*

The foreign exchange gains and losses of a Canadian taxpayer that arise from business transactions (i.e. on income account), including the activities of a branch operation, are generally fully includable in income or fully deductible, as the case may be. Any method that is in accordance with generally accepted accounting principles may be used to determine foreign exchange gains or losses on income transactions, providing the treatment is consistent with previous years and conforms to the accrual method of accounting.

A foreign exchange gain or loss that is on capital account is treated the same as any other capital gain or loss. The accrual method of accounting cannot be used for purposes of reporting gains or losses on capital account. This follows from the CRA's view that a taxpayer has not made a capital gain or sustained a capital loss in a foreign currency until a transaction has taken place. Therefore, paper gains and losses are disregarded.

### *Partnership income*

For Canadian tax purposes, a partnership is treated as a conduit, and the partners are taxed on their share of the partnership income, whether or not distributed. A corporation is not restricted from being a member of a partnership. Income is determined at the partnership level and is then allocated among the partners according to the terms of the partnership agreement. However, certain deductions, such as depletion allowances, exploration and development expenses, and donations, will flow through to be deducted by the various partners directly, as will any foreign tax credits, dividend tax credits, or donation credits. Partners generally may deduct expenses incurred directly, such as interest on borrowings to acquire partnership interests, in computing income from the partnership.

Under current rules, income earned by a corporation as a member of a partnership is included in the corporation's income for the corporate taxation year in which the fiscal period of the partnership ends. Therefore, if the fiscal year of a partnership differs from the taxation year of a corporate partner, income and tax could be deferred by up to one year (or longer, potentially, in the case of multiple 'tiers' of partnerships with different fiscal periods). Proposed rules that apply to corporate partners with taxation years ending after 22 March 2011, will generally not allow these partners to defer taxation on partnership income in respect of partnerships in which they (together with related parties) hold a greater than 10% interest (share of income or entitlement to assets); income from these partnerships must be accrued up to the end of the corporation's taxation year.

The accrual will be based on partnership income for the fiscal period ending in the corporation's taxation year (the 'formulaic amount'), unless a lower amount is designated by the partner. Penalties can apply if the designated amount reported is less than both the formulaic amount and the actual prorated income of the subsequent partnership fiscal period. An election may be available to change the partnership's fiscal period. Partnerships in multi-tier structures must adopt the same fiscal period (31 December unless otherwise elected by the partnerships). Certain transitional reserves may be available for up to five years.

### *Earnings of specified investment flow-throughs (SIFTs)*
Certain earnings of SIFTs (i.e. publicly traded income trusts and partnerships) are subject to a SIFT tax and are deemed to be a dividend when distributed, starting the 2007 taxation year for SIFTs first publicly traded after 31 October 2006, and starting the 2011 taxation year for other SIFTs. These rules are intended to discourage corporations from converting to income trusts and effectively force existing trusts to consider either restructuring or abandoning the income trust model. The rules do not apply to Real Estate Investment Trusts that meet certain conditions.

## *Deductions*

### *Business expenses*
Business expenses that are reasonable and paid out to earn income are deductible for income tax purposes unless disallowed by a specific provision in the Income Tax Act. Some expenses are deductible subject to limitation, e.g. charitable donations, entertainment expenses and the cost of providing an automobile to employees. Deduction of capital expenditures is specifically prohibited, but special provisions may allow depreciation or amortisation of these expenditures. Because Canadian corporations are taxable on worldwide income, there are basically no territorial limits on the deductibility of related expenses. Payments to affiliates are deductible if they reflect arm's length charges.

### *Depreciation*
Generally, depreciation for tax purposes (capital cost allowance) is computed on a pool basis, with only a few separate classes (pools) of property. Annual allowances

are generally determined by applying a prescribed rate to each class on the declining-balance basis. For example, the prescribed annual rate on most furniture and fixtures is 20%, on automotive equipment 30% and on most buildings 4% to 10%. In the year of acquisition, only half of the amount otherwise allowable may be claimed on most classes of property. Generally, capital cost allowance may not be claimed until the taxation year the property is available for use. The taxpayer can claim any amount of capital cost allowance up to the maximum. Capital cost allowance previously claimed may be recaptured if assets are sold for proceeds that exceed the undepreciated cost of the class. Temporary incentives to accelerate depreciation for eligible manufacturing and processing machinery and equipment acquired after 18 March 2007, and before 2014, revise the rate and method from 30% declining balance to 50% straight-line.

### *Mining and oil and gas activity*

Generally, mining and oil and gas companies are allowed a 100% deduction for exploration costs and certain preproduction development costs. Other development costs are deductible at the rate of 30% on a declining-balance basis. Capital property costs are subject to the depreciation rules noted above under *the Depreciation section.* In addition, in certain cases, significant asset acquisitions and assets acquired for a new mine or major expansion benefit from accelerated depreciation up to 100% of the income from the mine. For certain oil sands assets acquired after 18 March 2007, accelerated depreciation will be reduced gradually starting 2011 and will be eliminated by 2015.

Provinces levy mining taxes and royalties on mineral extraction and on oil and gas production. These provincial levies are mostly deductible.

Proposed changes that bring the taxation of oil sands properties more in line with that of the conventional oil and gas sector, generally for acquisitions after 21 March 2011, reduce the deduction rate per year:

- for the cost of acquiring oil sands leases and other oil sands resource or oil shale property from 30% to 10% on a declining balance basis, and
- for preproduction development expenses from 100% to 30% on a declining balance basis (transitional relief is available).

Investment tax credits (ITCs) are available federally (and in some provinces) to individuals who invest in shares to fund prescribed mineral exploration expenditures. The federal credit in 2011 for qualified ‘flow-through’ share investments is 15% of qualifying mining grassroots exploration expenditures. Certain mining exploration and preproduction expenditures that are incurred by a Canadian corporation and not used for flow-through are eligible for a 10% ITC. These credits can be used to offset current taxes payable or carried over to certain previous or subsequent taxation years.

### *Net operating losses*

Net operating losses generally may be carried back three tax years and forward 20 (ten years if the loss was incurred in taxation years ending before 2006 and after 22 March 2004, seven years if before 23 March 2004). Special rules may prohibit the use of losses from other years when there has been an acquisition of control of the corporation.

### *Payments to foreign affiliates*

Royalties, management fees, and similar payments to affiliated non-residents are deductible expenses to the extent that they are incurred to earn income of the Canadian company and do not exceed a reasonable amount (fair market value in most cases).

### Interest

Interest on borrowed money used for earning business or property income or interest in respect of an amount payable for property acquired to earn income is deductible, provided the interest is paid pursuant to a legal obligation and is reasonable in the circumstances.

Thin capitalisation rules can limit interest deductions when debt owing to certain non-resident shareholders (or persons not dealing at arm's length with a non-resident shareholder) exceeds two times the corporation's equity.

The Anti-Tax-Haven Initiative, which would have restricted the deductibility of certain interest payable after 2011 on investments in debt or equity of foreign affiliates, was repealed. The rule would have prevented multinational corporations from using tax havens and other tax avoidance structures to generate two expense deductions (one in Canada and another in a foreign subsidiary) for only one borrowing (so-called double-dipping).

### Taxes

Federal, provincial, and territorial income taxes are not deductible in determining income subject to tax. The tax treatment of federal capital taxes and provincial payroll and capital taxes is discussed above.

### Scientific research and experimental development (SR&ED)

Canada provides a generous combination of deductions and tax credits. Current and capital expenditures on research and development can be deducted in the year incurred or carried forward indefinitely to be used at the taxpayer's discretion to minimise tax payable.

In addition, a taxpayer can benefit from the ITC, which is generally a 20% non-refundable credit on SR&ED expenditures that can be applied against taxes payable. Alternatively, this tax credit can be carried back three years or forward 20 to be applied against taxes owing.

A qualifying CCPC can qualify for a 35% refundable tax credit annually on its first CAD 3 million in expenditures. This enhanced credit is subject to certain income and capital limitations.

SR&ED ITCs have been extended to certain salary and wages (limited to 10% of salary and wages directly attributable to SR&ED carried on in Canada) incurred in respect of SR&ED carried on outside Canada.

In addition to the federal research and development incentives, all provinces (except Prince Edward Island) and the Yukon provide tax incentives to taxpayers that carry on research and development activities.

### Business meals and entertainment

Deductions by a corporation for business meals and entertainment expenses are limited to 50% of their cost. This includes meals while traveling or attending a seminar, conference, or convention, overtime meal allowances, and room rentals and service charges, etc., incurred for entertainment purposes. If the business meal and entertainment costs are billed to a client or customer and itemised as such, the disallowance (i.e. the 50% not deductible) is shifted to the client or customer.

### *Doubtful accounts and bad debts*
A reasonable reserve for doubtful accounts may be deducted for tax purposes. The reserve calculation should be based on the taxpayer's past history of bad debts, industry experience, general and local economic conditions, etc. Special rules apply for determining reserves for financial institutions. A taxpayer can deduct the amount of debts owing that are established to have become bad debts in the year, provided the amount has previously been included in the taxpayer's income or relates to loans made in the ordinary course of business. Recoveries of bad debts previously written off must be included in income in the year of recovery.

### *Fines and penalties*
Most government-imposed fines and penalties are not deductible. Fines and penalties that are not government-imposed are generally deductible, if they were made or incurred by the taxpayer for the purpose of gaining or producing income from the business or property.

### *Other significant items*
Transfers of losses and other deductions between unrelated corporate taxpayers are severely limited after an acquisition of control.

Three-quarters of capital expenditures for goodwill and certain other intangible properties can be amortised at a maximum annual rate of 7%, on a declining-balance basis. A portion of proceeds may be taxable as recapture or as a gain on disposition.

Charitable donations made to registered Canadian charitable organisations are deductible in computing taxable income, generally to the extent of 75% of net income. A five-year carryforward is provided.

Insurance premiums relating to property of a business are generally deductible, but life insurance premiums are generally not deductible if the company is the named beneficiary. However, if a financial institution lender requires collateral security in the form of life insurance, a deduction is allowed for the associated net cost of any pure insurance for the period.

## *Group taxation*

Group taxation is not permitted. However, the federal government has issued a consultation paper, *The Taxation of Corporate Groups*, that explores possible approaches for taxing corporate groups.

### *Transfer pricing*
Canadian transfer pricing legislation and administrative guidelines are generally consistent with the Organisation for Economic Cooperation and Development (OECD) Guidelines. Statutory rules require that transactions between related parties be carried out under arm's length terms and conditions.

Penalties may be imposed when contemporaneous documentation requirements are not met. A taxpayer will be deemed not to have made reasonable efforts if the taxpayer does not maintain complete and accurate documentation to evidence that it has determined and used arm's length prices for its related party transactions. The documentation must be prepared on or before the taxpayer's documentation due date, which is six months after the end of the taxation year.

The transfer pricing penalty is 10% of the transfer pricing adjustment, if the adjustment exceeds the lesser of CAD 5 million and 10% of the taxpayer's gross revenue for the year. The penalty is not deductible in computing income, applies regardless of whether the taxpayer is taxable in the year and is in addition to any additional tax and related interest penalties.

Canada has an Advance Pricing Agreement (APA) program that is intended to help taxpayers determine transfer prices acceptable to the local tax authorities and, when negotiated as bilateral or multilateral APAs, with tax authorities in other jurisdictions. Under this program, 237 APAs have been completed or are in progress.

Many of Canada's international tax agreements contain provisions concerning income allocation in accordance with the arm's length principle. These include a Mutual Agreement Procedure, which is a treaty-based mechanism through which taxpayers can petition competent authorities for relief from double taxation resulting from transfer pricing adjustments.

## *Tax credits and incentives*

### *Regional incentives*

In specified regions of Canada (i.e. Atlantic provinces, the Gaspé region, and Atlantic offshore region) a 10% federal ITC is available for various forms of capital investment (generally, new buildings, and/or machinery and equipment to be used primarily in manufacturing or processing, mining, oil and gas, logging, farming, or fishing.) The ITC is fully claimed against a taxpayer's federal tax liability in a given year. Unused ITCs reduce federal taxes payable for the previous three years and the next twenty, or they may be partly refundable.

The provinces and territories may also offer incentives to encourage corporations to locate in a specific region. Income tax holidays are available in Newfoundland and Labrador, Nova Scotia, Ontario, Prince Edward Island, and Quebec for certain corporations operating in specific industries (e.g. in Ontario and Quebec, commercialisation of intellectual property; in Prince Edward Island, bioscience or aviation) or meeting certain conditions (e.g. job creation for Newfoundland and Labrador).

### *Industry incentives*

Canada offers many tax incentives at the federal, provincial, and territorial levels, for various industries and activities, including those related to:

- Research and development *(see Scientific research and experimental development under the Deductions section)*.
- Film, media, computer animation and special effects, and multi-media productions.
- Manufacturing and processing.
- Environmental sustainability.

## *Withholding taxes*

Canada is continually renegotiating and extending its network of treaties, some with retroactive effect. This table summarises withholding tax rates on payments arising in Canada. The applicable treaty should be consulted to determine the withholding tax rate that applies in a particular circumstance.

| Recipient | Dividends % | Related-party Interest (1) % | Royalties (2)% |
|---|---|---|---|
| Resident corporations and individuals | 0 | 0 | 0 |
| Non-resident corporations and individuals: | | | |
| Non-treaty | 25 | 25 | 25 |
| Treaty | | | |
| Algeria | 15 | 15 | 0 or 15 |
| Argentina | 10 or 15 (4) | 12.5 | 3, 5, 10, or 15 |
| Armenia | 5 or 15 (4) | 10 | 10 |
| Australia | 5 or 15 (4) | 10 | 10 |
| Austria | 5 or 15 (4) | 10 | 0 or 10 |
| Azerbaijan (7) | 10 or 15 (4) | 10 | 5 or 10 |
| Bangladesh | 15 | 15 | 10 |
| Barbados | 15 | 15 | 0 or 10 |
| Belgium | 5 or 15 (4) | 10 | 0 or 10 |
| Brazil | 15 or 25 (4) | 15 | 15 or 25 |
| Bulgaria | 10 or 15 (4, 5) | 10 | 0 or 10 (5) |

| United Kingdom | 5 or 15 (4) | 10 | 0 or 10 |

| Recipient | Dividends % | Related-party Interest (1) % | Royalties (2)% |
|---|---|---|---|
| United States | 5 or 15 (4) | 0 (11) | 0 or 10 |
| Uzbekistan (7) | 5 or 15 (4) | 10 | 5 or 10 |
| Venezuela | 10 or 15 (4, 5) | 10 | 5 or 10 |
| Vietnam | 5, 10, or 15 (4) | 10 | 7.5 or 10 |
| Zambia | 15 | 15 | 15 |
| Zimbabwe | 10 or 15 (4) | 15 | 10 |

Notes

1. Interest—Canada does not impose withholding tax on interest (except for 'participating debt interest') paid to arm's length non-residents. Most treaties have an explicit provision for higher withholding tax on interest in excess of fair market values in non-arm's length circumstances.
2. Royalties—A zero royalty rate generally applies to:
   - copyright royalties and payments for a literary, dramatic, musical, or other artistic work (but not royalties for motion picture films, work on film or videotape, or other means of reproduction for use in television), and/or
   - royalties for computer software, a patent, or for information concerning industrial, commercial, or scientific experience (but not royalties for a rental or franchise agreement).

   Different rates may apply in the case of immovable property (e.g. payments that relate to Canadian natural resources). Most treaties explicitly provide for higher withholding tax on royalties in excess of fair market value in non-arm's length circumstances. A zero rate of tax may apply in certain circumstances.
3. The treaty has been signed, but is not yet in force. Absent a treaty, Canada imposes a maximum 25% rate of withholding on dividends, interest, and royalties.
4. The lower (lowest two for Vietnam) rate applies if or when the beneficial owner of the dividend is a company that owns/controls a specified interest in the paying company. The nature of the ownership requirement, the necessary percentage (10%, 20%, 25%, or higher), and the relevant interest (e.g. capital, shares, voting power, equity percentage) vary by treaty.
5. If the other state (Canada for the treaty with Oman) concludes a treaty with another country providing for a lower withholding tax rate (higher rate for Kenya), the lower rate (higher rate for Kenya) will apply in respect of specific payments within limits, in some cases.
6. Canada's treaty with China does not apply to Hong Kong.
7. The treaty status of the republics that comprise the former U.S.S.R. is as follows:
   - Azerbaijan, Estonia, Kazakhstan, Kyrgyzstan, Latvia, Lithuania, Russia, Ukraine, and Uzbekistan—new treaties entered into force *(see table for rates).*
   - Other republics—no negotiations are underway.

   Belarus, Tajikistan, and Turkmenistan will not honour the treaty with the former U.S.S.R. As a result, Canada will impose a maximum 25% rate of withholding on dividends, interest, and royalties until a new treaty enters into force. For other republics that comprise the former U.S.S.R., the status of the former treaty with the U.S.S.R. is uncertain. Because the situation is subject to change, Canadian taxpayers are advised to consult with the CRA as transactions are carried out.
8. A treaty with Italy was signed on 3 June 2002. Upon ratification, its provisions will apply:
   - for purposes of non-resident withholding tax, to amounts paid or credited after 31 December of the calendar year the treaty is ratified, and
   - for other taxes, for taxation years beginning after that date.

   The rates in the table are from this treaty. Under this treaty, the withholding tax rate will:
   - be reduced from 15% to 5% on dividends paid to a company that owns at least 10% of the payor's voting stock (the rate will remain 15% on other dividends)
   - be reduced from 15% to 10% on interest, but certain interest payments will be exempt, and
   - remain 10% on royalties, but certain royalties for the use of computer software, patents, and know-how will be subject to a rate of 5% and certain copyright royalties will be exempt.
9. The Canada-Hellenic Republic (Greece) treaty entered into force on 16 December 2010. Its provisions apply:
   - for purposes of non-resident withholding tax, to amounts paid or credited after 31 December 2010, and
   - for other taxes, to taxable years beginning after 2010.
10. The Canada/Republic of Turkey treaty entered into force on 4 May 2011. Its provisions apply:
    - for purposes of non-resident withholding tax, to amounts paid or credited after 31 December 2011, and
    - for other taxes, to taxable years beginning after 2011.

    Before then, the rates are 25%.
11. For the United States, the zero rate applies between related persons, subject to the Limitations of Benefits article.

# Canada

## *Tax administration*

### *Returns*

Both the federal and the provincial/territorial corporation tax systems operate on an essentially self-assessing basis. The tax year of a corporation, which is normally the fiscal period it has adopted for accounting purposes, cannot exceed 53 weeks. The tax year need not be the calendar year. Once selected, the tax year cannot be changed without approval from the tax authorities.

All corporations must file federal income tax returns. Alberta and Quebec tax returns must also be filed by corporations that have permanent establishments in those provinces, regardless of whether any tax is payable. Corporations with permanent establishments in other provinces that levy capital tax must also file capital tax returns. Tax returns must be filed within six months of the corporation's tax year end. No extensions are available.

Certain corporations with annual gross revenues exceeding CAD 1 million are required to electronically file (e-file) their federal corporate income tax returns via the Internet. Also, information return filers that submit more than 50 information returns annually must e-file via the Internet. Penalties are assessed for failure to e-file.

For partnerships with fiscal periods ending after 31 December 2010, the CRA has replaced the requirement to file a partnership information return based on the number of partners with one related to financial thresholds and partner structure.

### *Functional currency*

The amount of income, taxable income, and taxes payable by a taxpayer is determined in Canadian dollars. However, certain corporations resident in Canada can elect to determine their Canadian tax amounts in the corporation's 'functional currency'.

### *Payment of tax*

Corporate tax instalments are generally due on the last day of each month (although some CCPCs can remit quarterly instalments, if certain conditions are met). Any balance payable is generally due on the last day of the second month following the end of the tax year.

### *Assessments, audit cycle, and statute of limitations*

The tax authorities are required to issue an assessment notice within a reasonable time following the filing of a tax return. These original assessments usually are based on an initial high level review of the corporation's income tax return and either indicate agreement with the return (which is the result in the majority of cases) or outline in detail any differences that arise from this limited initial review.

A reassessment of the tax payable by a corporation that is not a Canadian-controlled private corporation (CCPC) may be made within four years from the date of mailing of the original notice of assessment, usually following a detailed field audit of the return and supporting information. The limitation period is three years for CCPCs. The three- and four-year limits are extended a further three years to permit reassessment of transactions with non-arm's length non-residents. Reassessments generally are not permitted beyond these limits unless there has been misrepresentation or fraud. Different time limits may apply for provincial reassessments.

The CRA has traditionally audited larger corporations (gross income exceeding CAD 250 million) annually. Medium-sized corporations (gross income between CAD 20 million and CAD 250 million) are generally selected based on a screening process and identified risks. Smaller CCPCs (gross income under CAD 20 million) are subject to compliance or restricted audits, selected based on statistical data and a screening process, and generally are subject to audits covering the current and previous years. However, the CRA announced in the fall of 2010 that, over the next five years, it will implement a new 'risk assessment' model to select corporations, partnerships, income trusts and private equity funds for audit. Large corporations and their affiliated entities will be classified as high, medium or low risk and will be subject to either a full, restricted or compliance audit. Factors that will determine the risk category include the taxpayer's history with the CRA, the type of industry and the internal controls in place.

The CRA's policy on access to taxpayer and third-party documents confirms that the CRA is authorised to inspect, audit, review or examine a taxpayer's books and records, and documents of any other person that relate to a taxpayer's books and records.

### *Appeals*

A taxpayer that disagrees with a tax assessment or reassessment may appeal. The first step is to file a formal notice of objection within 90 days from the date of mailing of the notice of assessment or reassessment, setting out the reasons for the objection and other relevant information. Different time limits may apply for provincial reassessments. Corporations that qualify as 'large corporations' must file more detailed notices of objection. The CRA will review the notice of objection and vacate (cancel), amend or confirm it. A taxpayer that still disagrees has 90 days to appeal the CRA's decision to the Tax Court of Canada, and if necessary, to the Federal Court of Appeal and the Supreme Court of Canada. However, the Supreme Court hears few income tax appeals.

### *Topics of focus for tax authorities*

Topics of interest to Canadian tax authorities include:

- The deductibility of:
  - royalty payments made by Canadian corporations to non-arm's length non-residents
  - business restructuring expenses incurred by a group of corporations located in more than one country
  - interest paid on loans if the funds derived from the loans are used offshore, and
  - guarantee fees paid by Canadian corporations to related non-resident corporations.
- The offshoring of Canadian-source income by factoring the accounts receivable of Canadian corporations.
- Treaty shopping to reduce Canadian withholding taxes and capital gains tax.
- Surplus stripping to reduce Canadian withholding taxes by artificially increasing a Canadian corporation's paid-up capital and subsequently distributing the surplus as a return of capital.
- The generation of foreign tax credits by a corporation for foreign income taxes that have not been borne by the corporation.

### *Foreign reporting*

Reporting requirements apply to taxpayers with offshore investments. The rules impose a significant compliance burden for taxpayers with foreign affiliates. Failure to comply could result in substantial penalties.

### *Tax avoidance*

Draft legislation makes an 'avoidance transaction' meeting certain conditions a 'reportable transaction' that must be reported to the CRA, generally for transactions entered into after 2010, and those that are part of a series of transactions completed after 2010. Quebec already has a provincial reporting regime for certain aggressive tax planning transactions, generally carried out after 14 October 2009.

## *Other issues*

### *Forms of business enterprise*

Canadian law is based on the British common-law system, except in Quebec where a civil-law system prevails. The principal forms of business enterprise available in Canada are the following.

- Corporation – A legal entity distinct from its shareholders. Whether public or private, incorporated federally, provincially or territorially.
- Partnership – A business relationship between two or more 'persons' (i.e. individuals, corporations, trusts, or other partnerships) formed for the purpose of carrying on business in common. Not treated as a legal entity distinct from its partners.
- Sole proprietorship – An unincorporated business operated by an individual that is carried on under the individual's own name or a trade name.
- Trust – A relationship whereby property (including real, tangible and intangible) is managed by one person (or persons, or organisations) for the benefit of another. May hold commercial enterprises.
- Joint Venture – Generally, the pursuit of a specific business objective by two or more parties whose association will end once the objective is achieved or abandoned. Not treated as a legal entity distinct from the participants.

Foreign investors usually conduct business in Canada through one or more separate Canadian corporations, although operation as a branch of a profitable foreign corporation may be preferable during the start-up period. In addition, foreign investors may participate as partners in partnerships carrying on business in Canada or as joint venturers.

## Significant developments

### Corporate income tax

It is envisaged that a new corporate income tax code will enter into force in the near future. The tax process code and a general tax law are already drafted. However, the date at which the new tax legislation will enter into force is still unknown.

### Other taxes

As of August 2010, an ecologic charge applies to packing material, whether empty or full, imported or produced internally, non-biodegradable or made out of metal, glass, or plastic.

### Tax incentives

The following four new tax incentives recently entered into force. *For more information on these incentives, see the Tax credits and incentives section.*

- A new law entered into force on 8 December 2010 provides tax and custom benefits for industrial activity.
- A regime for promotion, encouragement and access, licensing, and exploitation inherent to the exercise of independent production and self-production of electricity based on renewable energy sources is in force as of 1 January 2011.
- The International Business Centre (IBC) regime entered into force on 2 March 2011 and provides tax benefits to entities licensed to operate in the IBC on income from industrial or business activities and services in respect of operations carried out with other IBC licensed entities or with non-residents entities (without a permanent establishment in Cape Verde).
- A regime that provides for tax and financial incentives for investment projects in order to promote the internationalisation of Cape Verdean companies is in force as of 23 March 2011.

## Taxes on corporate income

### Basis of taxation

Cape Verde has a single tax on income, called Imposto Único sobre os Rendimentos (IUR), which is levied on profits arising from business activities carried out in Cape Verde by resident companies or individual entrepreneurs and by Cape Verdean permanent establishments (PE) of non-resident entities.

Taxable profit is computed according to the local accounting rules and adjusted for tax purposes. The taxation system in Cape Verde is based on a territorial principle; if the source of the income is located abroad, no Cape Verde taxation is imposed on it.

### Tax rates
The IUR rates applicable are the following:

- Companies are subject to a tax rate of 25%, where taxable income corresponds to the profit less any tax benefits and any losses carried forward, as stated in the tax return.
- Non-residents without a PE in Cape Verde are subject to a 20% withholding tax (WHT) on the amount of the invoice.

### Surcharge
The IUR rate is increased by a fire brigade surcharge, called Taxa de Incêndio, of 2% on the tax due. This surcharge is levied in the municipalities of Praia (Island of Santiago), and Mindelo (Island of São Vicente).

## Corporate residence

A company or entity is deemed to be resident in Cape Verde if its registered head office or its place of effective management is in the Cape Verde territory.

### Permanent establishment (PE)
Non-resident companies deemed to have a PE in Cape Verde are also subject to tax in Cape Verde.

Under Cape Verdean tax law, a non-resident company is deemed to have a PE if the non-resident company:

- has any fixed installation or permanent representation located in Cape Verde through which, among others, activities of commercial, industrial, or agricultural nature, or fishing and rendering of services are carried out (including agricultural, fishing, and cattle raising explorations, or other quarries or any other places of natural resources extraction) or
- carries out its activity in Cape Verde through employees, or any other personnel hired for that purpose, for a period (continuous or not) of not less than 90 days within a twelve month period.

## Other taxes

### Value-added tax (VAT)
The VAT system in Cape Verde closely follows the European Union (EU) VAT system, and it is assessed at the standard rate of 15% and at a reduced rate of 6%.

The standard VAT rate of 15% is a general tax on consumption, applicable to the import and sale of goods and services in Cape Verde territory.

The 6% reduced VAT rate applies to lodging and restaurants, due to the important role they assume in the Cape Verde economy.

The VAT regulations establish two types of exempt transactions: exempt transactions without credit and exempt transactions with credit (i.e. zero-rated transactions). VAT incurred is recoverable in as far as the goods and services are used for the purposes of the taxed transactions of a taxable person or for zero-rated transactions.

Exempt transactions without credit include the following:

- Hospital and medical care and closely related activities undertaken by bodies governed by public law, or comparable activities undertaken by other hospitals and centres for medical treatment.
- The provision of medical care through the exercise of the medical and paramedical professions, as well as the supply of transport services for sick or injured persons, and the supply of human organs, blood, and milk.
- The supply of services and goods closely linked to welfare and social security work.
- The supply of services and goods closely linked to the protection of children and young persons by bodies governed by public law.
- The provision of children's or young people's education, school or university education, including the supply of services and goods closely related thereto.
- The supply of services, and goods closely linked thereto, by non-profit-making organizations.
- The supply of copyright and art objects by the original creators or their heirs.
- The supply by the public postal services of stamps and stamped paper.
- The supply of certain cultural, educational, technical, and recreational services.
- Garbage removal.
- Burial and cremation supplies.
- Banking, financial, insurance, and reinsurance transactions, including related services performed by insurance brokers and insurance agents.
- Immovable property transactions (excluding the provision of accommodation in the hotel sector or in sectors with a similar function, the granting of facilities for collective parking of vehicles, the leasing of permanently installed machinery and equipment, and the granting of facilities for exhibitions and advertising).
- Specified basic foodstuffs and pharmaceutical products.
- Goods used in agriculture, stockbreeding, forestry, and fisheries.

Exempt transactions with credit (i.e. zero-rated transaction) on imports include the following:

- Import of goods whose supply qualifies for exemption.
- Re-import of goods by the person who exported them, in the state in which they were exported, where they qualify for exemption from customs duties.
- Services in connection with the import of goods where the value of such services is included in the taxable amount.
- Import of gold by the central bank.
- Import into ports by sea fishing undertakings of their catches, unprocessed or after undergoing preservation for marketing but before being supplied.
- Import of goods under diplomatic and consular arrangements which qualify for exemption from customs duties.
- Import of goods for the fuelling and provisioning of sea-going vessels and aircraft.

The most important exemptions with credit (i.e. zero-rated) for exports and connected transactions include the following:

- Supply, modification, repair, maintenance, chartering, and hiring of aircraft used by airlines operating both on domestic and international routes, and the supply, hiring, repair, and maintenance of equipment incorporated or used therein.
- The supply of goods for the fuelling and provisioning of such aircraft.
- Services meeting the direct needs of such aircraft or their cargoes.

### *Stamp duty*
Stamp duty is payable on a wide variety of transactions and documents, at rates that may be set in specific amounts or on a percentage basis.

Stamp duty rates:

| Item | Stamp duty rate |
|---|---|
| Loans | |
| With determined term, over one year | 0.5% |
| With undetermined term or under one year (for each month) | 0.05% |
| Bank interest and fees / commissions | 3.5% |
| Guarantees | 0.5% |
| Insurance | 3.5% |
| Promissory notes, securities | 0.5% |
| Corporate structuring operations | 0.5% |
| Real estate purchases and sales | 1% |
| Sale of a business as a going concern | 5% |
| Letting of immovable property | 10% |
| Property leasing | 1% |
| Emoluments, registrations acts | 15% |
| Contracts | CVE 1,000 * |

* Fixed exchange rate EUR 1 = 100.265 Cape Verde escudos (CVE) under an exchange agreement between Cape Verde and Portugal.

### *Property taxes*

A property tax, called Imposto Único sobre o Património (IUP), is levied at the rate of 3% in Cape Verde.

IUP is due on the ownership of immovable property on an annual basis by the owner of the real estate, registered as such on 31 December of the relevant year. The taxable basis corresponds to 25% of the value attributed by the Evaluation Commission.

IUP is also due on the transfer (gratuitously or for a consideration) of real estate, based on the value of the contract declared by the transferee.

Exemption of IUP due on the acquisition is granted to:

- Cape Verdean emigrants which own saving bank accounts.
- Retired individuals.
- Projects with Touristic Utility Status *(see the Tax credits and incentives section for more information)*.

In taxable transfers (not exempt), IUP is payable by the transferee.

IUP is also due on the capital gains arising from the sale of:

- Plots of land for construction if the sales price is more than double the purchase price.
- Buildings or other real estate if the sale price exceeds the purchase price by more than 30%.

IUP on capital gains is normally paid by the transferor, on the highest of the declared price and the official value of the property concerned.

Capital gains obtained by companies that are in the business of buying real estate for resale are not subject to IUP.

### *Special consumption tax*

A special consumption tax is imposed at rates ranging from 10% to 150% on goods which are deemed superfluous, luxurious, or undesirable for economic, social, or environmental policy reasons.

### *Customs duties/import tariffs*

Customs duties are levied at rates ranging from 0% to 50% on the customs value of most imported goods. Since Cape Verde imports the majority of the goods it consumes, a 50% tariff protection applies for certain domestically produced goods.

Raw materials or capital goods can be imported with an exemption from custom duties or at a low rate.

### *Ecologic charge*

Cape Verde's Ecologic Charge, in force since August 2010, is applied to packing material, whether empty or full, imported or produced internally, non-biodegradable or made out of metal, glass, or plastic.

The ecologic charge varies from CVE 2 to CVE 100 per item, depending on the quantity or weight of the goods.

This fee is due by the local producer or the importer.

Exemptions are available in the case of packing material used in medicine, essential food (e.g. corn, rice, sugar, flour, and milk), and construction (e.g. cement). Packing material that is exported, reutilized, or recycled is also exempt.

## *Branch income*

A branch is not considered a separate legal entity distinct from the foreign head office. It is governed by the domestic law of Cape Verde.

From a tax perspective, branches are subject to corporate income tax, if considered a PE under Cape Verde law.

## *Income determination*

Taxable income is computed on the basis of the accounting income, adjusted by deducting from taxable profits the prior years' losses and any deductions under the tax (incentive) legislation.

### *Capital gains*

Capital gains are not subject to a separate capital gains tax and are treated and taxed as ordinary business income.

The gain corresponds to the amount by which proceeds from disposal exceeds the cost of asset acquisition.

Capital gains realised from the sale of shares and part of the capital of companies with a registered head office or place of effective management in Cape Verde, if owned for at least one year, are not subject to taxation.

### *Dividend income*

Dividend income is currently fully exempt from taxation in Cape Verde.

### *Foreign income*

Resident companies and PEs of non-resident companies are taxable on a territorial base principle, meaning that income obtained outside Cape Verde is not subject to taxation therein.

## *Deductions*

### *Depreciation*

Depreciation is considered a deductible cost with respect to all fixed assets (except land), up to the limits determined by the applicable tax law.

As a general rule, depreciation must be computed by using the straight-line method. Tax authorities may allow other depreciation methods on the basis that the actual depreciation is higher than the one calculated at regular rates or according to the taxpayer's accounting practice.

Under the straight-line method, the maximum depreciation that is deductible is calculated by applying the general depreciation rates set out in a Ministerial Decree of 28 January 1984 to the adjusted purchase cost or production cost.

Land is not depreciable.

Main depreciation rates:

| Group | Asset | Depreciation rate (%) |
|---|---|---|
| 1 | **Plantations, land for exploration, other land and natural resources** | To be determined on a case-by-case basis |
| 2 | **Buildings and other constructions** | |
| | Residential, commercial, and industrial buildings | 4 |
| | Light structures (fibreglass wood, wood, metal) and other constructions | 10 |
| | Quays, docks, and similar harbour infrastructure | 2 |
| | Walls, silos, parks, roads, adornments, runways | 5 |
| 3 | **Basic equipment, machines, and other installations** | |
| | Fishing gear | 25 |
| | Electronic, sound, laboratory, telephone, and radar equipment | 20 |
| | Telecommunication stations and installations | 12.5 |
| | Water installations | 6.66 |
| | Machines | 16.66 |
| | Oil pipelines, fuel and gas reservoirs | 8.33 |
| | Transformation stations, air networks, equipment, and underground cables for communications and transport of energies | 5 |
| | Other equipment and machines | 10 |
| 4 | **Tools (for industries / others)** | 20/25 |

| Group | Asset | Depreciation rate (%) |
|---|---|---|
| 5 | **Cargo and transport material** | |
| | Animals and lightweight motor vehicles | 12.5 |
| | Aircrafts | 14.28 |
| | Ships and boats | 10 |
| | Cranes, barges, etc. | 7.14 |
| | Trucks | 20 |
| | Other cargo and transport material | 16.66 |
| 6 | **Administrative and social equipment and furniture** | |
| | Furnishings and decorative items | 16.16 |
| | Calculating machine, typewriter, and accounting machine | 20 |
| | Metallic furniture | 8.33 |
| | Non-metallic furniture | 12.5 |
| | Clothes, tableware, and glasses | 50 |
| | Others administrative and social equipment and furniture | 25 |
| 7 | **Packing material (wood / metal / other)** | 14.28/20/33.33 |
| 8 | **Other tangible fixed assets** | 10 |
| 9 | **Intangibles** | |
| | Patents, trademarks, licences, concessions and other rights, formation and organization of the company | 10 |
| | Other intangibles | 33.33 |

### *Net operating losses*
Income tax losses can be offset against taxable profit and can be carried forward for three years. Carryback of tax losses is not allowed in Cape Verde.

The tax losses incurred by a company are not transferable to another company, unless previously accepted by the tax authorities.

### *Payments to foreign affiliates*
Currently, there are no special restrictions on the deductibility of royalties, interest, and service fees paid to foreign affiliates, provided that the payments are regarded as indispensable to generate taxable profits and gains and to maintain the business of the company.

### *Taxes*
Taxes paid in connection with the activity of the company are tax deductible, excluding IUR and the IUP due on an annual basis. However, under the current tax law, the annual IUP can be deducted from the IUR assessed.

## *Group taxation*

There is no special tax regime for groups of companies in Cape Verde.

### *Transfer pricing regime*
There is no special tax regime regarding transfer pricing in Cape Verde.

## *Tax credits and incentives*

### *Foreign investor status (Estatuto do Investidor Externo)*

Direct foreign investments in Cape Verde made in any business sector by entities with the Foreign Investor Status benefit from an exemption from WHT on distribution of profits (this will be relevant once the new tax Codes enter into force), as well as interest derived from the financing of the investment, paid to foreign investors. Currently, dividends are not taxed in Cape Verde under a domestic exemption. The benefit applies for the first five years of the investment or whenever the profits are reinvested in Cape Verde, in the same or another economic activity. This benefit is granted following a request filed with the Cape Verdean Agency for Foreign Investment.

### *Industrial Activity Law*

A new law entered into force on 8 December 2010 provides the following tax and custom benefits for industrial activity:

#### IUR benefits

Industrial Entrepreneurs benefit from a five year exemption from IUR on the income generated by each industrial establishment. Under this regime, 'Industrial Entrepreneurs' are individuals and/or companies that solely or jointly declare the intention to develop an industrial project.

This exemption is renewable for the same period in the case of reinvestment, via a tax deduction corresponding to the total sum of the profits reinvested in the same or in other industrial unit.

The exemption period is increased to seven years in the case of industrial projects set up in less-developed areas (yet to be defined), which contribute to job creation or to diversify the production of goods and services.

#### IUP benefits

Industrial Entrepreneurs benefit from a ten year exemption from IUP on the ownership of real estate used exclusively for industrial purposes. There is also an exemption on the acquisition of real estate for the same purpose and on cargo and passenger transport vehicles used exclusively for the purposes of the industrial activity.

#### VAT benefits

Industrial Entrepreneurs benefit from a VAT exemption on the acquisition of equipment and vehicles (not more than five years old) for the transport of goods and workers of the industrial establishment.

#### Custom duty benefits

Industrial Entrepreneurs benefit from an exemption from custom duties on the import of construction material, machines, utensils, semi and finished materials, and products used exclusively in the production of goods within a new industrial product.

The law also provides for an exemption from custom duties on the acquisition of fuel and lubricants (except gasoline) used in the production of energy and desalinized water for consumption by the industrial establishment.

### *International Business Centre (IBC) of Cape Verde*

The IBC regime is in force as of 2 March 2011. The Cape Verdean Agency for Foreign Investment is the entity responsible for granting the licenses to operate within the IBC, upon previous proposal of the Zona Franca Comercial S.A.. The following tax benefits are applicable to entities licensed to operate in the IBC on income from industrial or business activities and services in respect of operations carried out with other IBC licensed entities or with non-residents entities (without a PE in Cape Verde).

Note that these tax benefits are not applicable to entities engaged in tourism, banking and insurance, real estate, or construction.

**IUR benefits**

From 1 January 2011 thru 31 December 2018, the IUR rate is reduced by 90% to an effective rate of 2.5%.

From 1 January 2019 thru 31 December 2025, the IUR rate is reduced by 85% to an effective rate of 3.75%.

Under current IUR law, foreign-sourced income is not subject to taxation in Cape Verde.

**VAT and custom duty benefits**

All the exemptions foreseen in the VAT Regulation apply.

An exemption from custom duties applies with respect to certain goods used within the scope of the activity developed and licensed under the IBC.

**WHT benefits to shareholders of entities licensed to operate in the IBC**

An exemption from WHT applies with respect to distributed profits which have been taxed at the reduced IUR rates applicable within the IBC. Currently, besides the foreign income not being subject to taxation in Cape Verde, distributed dividends are not subject to taxation.

An exemption from WHT applies with respect to interest, and other income, from shareholders loans or other capital entries.

***Tax and financial incentives for internationalisation of Cape Verdean companies***

A regime that provides for tax and financial incentives for investment projects in order to promote the internationalisation of Cape Verdean companies is in force as of 23 March 2011.

The following incentives, to be granted under a contract of not more than three years, apply to internationalisation projects of companies with head office and place of effective management in Cape Verde, which are undertaken before 31 December 2020.

**IUR benefits**

The IUR rate is reduced by 50% to an effective rate of 12.5% throughout the duration of the investment contract.

An additional deduction of 30% of costs incurred in training young (i.e. not older than 30 years of age) people is available, as is an additional deduction of 30% of costs incurred in hiring young people or long term unemployed people.

An additional deduction of 50% or 80% of the costs of non-fixed term labour agreements is available, provided there is creation of net employment (respectively more than 10 or more than 50 jobs).

### IUP benefits
An exemption from IUP is available on the acquisition of real estate for the establishment or expansion of the activity of the investor.

### VAT and custom duty benefits
Exemptions provided for in the VAT Code apply, as well as custom duties incentives as provided for in the applicable legislation.

### Stamp duty and other benefits
An exemption from stamp tax is available on the incorporation of companies and increase of share capital of existing companies. An exemption from stamp duty is also available on financing transactions.

An exemption from notary and registration fees is available on the incorporation and registration of companies.

### *Tax benefits for social housing*
Entities responsible for the construction of social housing, duly authorized by the competent regulatory authority (CCC-SNHIS), may benefit from the following:

- Only 30% of the income derived from the activity carried out within the scope of the social housing project is subject to IUR, under certain conditions.
- A refund of 80% of the VAT incurred in the Cape Verdean market is available in cases where those entities carry exclusively exempt operations without the right to deduct input VAT.
- A reduction of 75% of custom duties levied on construction material listed in an annex to the diploma is available.

Development promotion entities, provided they are also authorized by CCC-SNHIS, are also eligible for VAT benefits.

### *Touristic Utility Status (Estatuto de Utilidade Turística)*
Cape Verde may grant Touristic Utility Status to certain touristic projects. Touristic Utility Status is granted to the following types of touristic projects:

- Installation – granted to new touristic projects.
- Functioning – granted to touristic projects already running.
- Refurbishment – granted to touristic projects in case of refurbishment projects with a value of at least 25% of the initial investment.

Touristic Utility Status generally allows for the following tax incentives and benefits:

- Exemption from IUR – 100% in the first five years of activity, 50% in the following ten years.
- Exemption from IUP on the acquisition of real estate used for construction and installation of touristic projects.
- Exemption from custom duties on the importation of materials and equipment used in the touristic project, capped at 15% of the total amount of the investment.

### *Tax incentives for renewable energies*
A regime for promotion, encouragement and access, licensing, and exploitation inherent to the exercise of independent production and self-production of electricity based on renewable energy sources is in force as of 1 January 2011.

Water, wind, solar, biomass, biogas or industrial, agricultural or urban waste, oceans and tides, and geothermal are to be consider sources of renewable energy. Under the regime, renewable energy producers may benefit from the following.

**IUR benefits**
The IUR rate is reduced by 100% during the first five years of production of energy (per project) and by 50% during the next five years production of energy (per project). The IUR rate is reduced by 25% during another five years (years 11 thru 15) of production of energy (per project), provided the reinvestment accumulated in the last three years exceeds 50% of the initial investment.

**Custom duty benefits**
An exemption from custom duties and other custom charges (except stamp duty, charges, and fees due for the provision of services) applies on the importation of capital goods, raw materials and supplies, finished and semi-finished products and other materials which are incorporated or used in the production of goods or services involved in the production of electrical energy from renewable sources.

### *Shipping transport industry incentive*
A five-year income tax exemption, beginning in the year of activity, is available to Cape Verde individual entrepreneurs and domestic companies engaged in shipping transport as well as to shipping transport companies which are owned at least 25% by Cape Verde citizens and/or companies.

### *Job creation incentives*
Companies are entitled to an increased payroll expense deduction with respect to the net permanent job increase related to newly hired workers who are not older than 30 years of age or have been unemployed for one year or more. The total deduction allowed corresponds to 130% or 150% of the payroll costs, depending on whether the net job increase that year is between five and ten or more than ten, respectively.

A deduction equal to 180% of the payroll cost is available to companies that hire, for six months or more, workers with a disability between 50% and 66%. The deduction is 130% in case of workers with a disability of less than 50%. In case of disabled workers hired for less than six months, the deduction is reduced to 140% and 115%, respectively.

Companies are entitled to a deduction equal to 130% of expenses incurred for scholarships granted to students who are not older than 25 years of age.

Employers are entitled to a deduction equal to 150% of expenses incurred for training workers who are not older than 35 years of age in official training centres.

## *Withholding taxes*

Payments (services, interest, and royalties) between resident companies are generally not subject to withholding tax (WHT). Rental payments due by resident company are, however, subject to WHT of 10%.

For a Cape Verde-based recipient, tax withheld is a payment on account against the final single income tax due.

Any non-Cape Verdean resident entity carrying out an economic activity in Cape Verde is subject to a final 20% WHT, applied on interest, royalties, rents, and fees. The Cape Verdean Tax Authorities consider that the payment for services to non-residents is also subject to WHT at the rate of 20%, although this understanding does not fully adhere to the current wording of the Cape Verdean tax law.

Dividends are not subject to WHT, irrespective of the residence status of the recipient.

### *Tax treaties*

The only tax treaty that Cape Verde has in force is with Portugal. Under the Cape Verde/Portugal tax treaty, WHT is limited as follows:

- Royalties: 10%
- Interest: 10% (0% applies to interest paid by public bodies).

Note that WHT on dividends under the Cape Verde/Portugal tax treaty is limited to 10%. However, dividends are currently not taxed in Cape Verde.

## *Tax administration*

### *Tax returns*

As a general rule, the tax year is the calendar year. A different tax year may be applied, subject to authorization from the Ministry of Finance, in the case of non-resident companies with a PE in Cape Verde.

Taxpayers are required to file a tax return by 31 May of the year following the end of the tax year.

### *Payment of tax*

Corporate taxpayers must make a prepayment of their income tax liability for the current tax year. The prepayment is calculated as 30% of the preceding tax year's income tax liability and should be paid by 20 January of the following year.

Taxpayers are required to self-assess the tax due by 31 May of the year following the end of the tax year.

The tax authorities will verify the tax return and raise a final assessment of tax liability by 20 July of the same year. The taxpayer must then pay the remaining tax due by 31 July.

## Significant developments

### Recent political developments

On 10 October 2010, the Netherlands Antilles dissolved, and the Caribbean Netherlands (Bonaire, Saba, and St. Eustatius, also known as the BES islands) have become a public body of the Kingdom of the Netherlands. Prior to dissolution, the Netherland Antilles consisted of five islands: St. Maarten, Curaçao, Bonaire, Saba, and St. Eustatius.

While each of the islands will remain within the Kingdom of the Netherlands structure, the ties between the islands will be loosened. Defence and foreign affairs will remain within the province of the government of the Kingdom of the Netherlands. Also, the judiciary system will remain an integral part of the Kingdom of the Netherlands.

### Compliance with sound international fiscal standards

In recent years, the Caribbean Netherlands, as part of the former Netherlands Antilles, has complied with international standards as set forth by the Organisation for Economic Co-operation and Development (OECD) and the European Union (EU). There is, for example, no distinction in the fiscal treatment of offshore and onshore taxpayers. The Caribbean Netherlands does not have bank secrecy laws, and the tax information exchange agreements (TIEAs) that in recent years have been concluded with several countries remain applicable to the Caribbean Netherlands.

## Taxes on corporate income

Income from immovable property is subject to real estate tax. The real estate tax is levied based on the value of real estate. As is the case at present, the value is established for five years each time. The income is deemed to be 4% of the value of the real estate and the tax rate is 25%. Therefore, effectively 1% of the value is taxed.

Exemptions apply for the dwelling that serves as the principal residence, real estate with a value not exceeding 50,000 US dollars (USD) (the ‘kunuku’ house), and land that is being commercially operated for agricultural or forestry purposes.

A revenue tax is levied on the revenues from shares and profit-sharing certificates, as well as on distributions from foundations, special purpose funds, or a closed-end common fund. The rate of the revenue tax is 5%.

There are no other taxes on income or capital gains.

The revenue tax and the real estate tax only apply if certain requirements of residency have been met. A corporation that is established in the Caribbean Netherlands that does not meet certain criteria will, for the purpose of the revenue tax and the real estate tax, be deemed to be established in the Netherlands and will be taxed accordingly. That means that instead of revenue tax and real estate tax, the Dutch corporate income tax of 25.5% will apply, as well as the Dutch dividend tax of 15% *(see the Corporate residence section for more information)*.

## *Corporate residence*

Corporate residence is, in principle, determined by the place of incorporation. However, other factors may also determine residence. For example, a foreign company with effective management in the Caribbean Netherlands is considered to be a resident.

However, for the purposes of the revenue tax and the real estate tax, a corporation is deemed to be established in the Netherlands, unless specific criteria have been met, the purpose of which is to guarantee commercial ties with the Caribbean Netherlands.

An entity is deemed to be established in the Caribbean Netherlands, not the Netherlands, based on the following criteria:

- It has been admitted to a bonded warehouse for commerce and services, or
- It obtained a declaration from the Inspector of Taxes that one of the following conditions applies:
  - It is not active in financial services or insurance, turnover is not more than USD 80,000, and assets are not more than USD 200,000.
  - The assets usually consist of less than 50% of investments, participations, liquidities, and assets that are made available for use to persons outside the Caribbean Netherlands, as well as assets, directly or indirectly, used for financing persons outside the Caribbean Netherlands.
  - It usually provides permanent work to at least three persons living in the Caribbean Netherlands who engage independently in activities relating to the assets mentioned above and whose responsibility is in line with their job position, and it has, at its disposal, real estate situated in the Caribbean Netherlands for a period of at least 24 months with a value of at least USD 50,000 for the activities, and this real estate is used as an office with facilities that are customary in the financial sector.
  - It holds, at a minimum, 95% of the shares of an entity as mentioned above.

Corporations that do not meet these criteria are deemed to be established in the Netherlands, which causes them to be subject to the Dutch corporate income and dividend withholding taxes (WHT). This does not apply to foundations, special purpose funds, or a closed-end common fund.

## *Other taxes*

### *Sales tax*

A general expenditure tax (Algemene Bestedings Belasting or ABB) has replaced the levy of import duties, as well as the former sales tax (Omzetbelasting or OB and Belasting op Bedrijfsomzetten or BBO), of the former Netherlands Antilles. The rate is 8% in Bonaire and 6% in Saba and St. Eustatius. The rate for insurances is 9% and 7%, respectively. A rate of 25% applies to cars, unless it concerns a very low energy car, in which case the rate is 0%.

ABB is levied in respect of:

- Sale of goods by manufacturers.
- Delivery of services within the levy area.
- Import of goods.

Therefore, the sale of goods will only be subject to tax once, at the manufacturer or at the time of import. The sale of bread has been exempt. In addition, the supply of grain, potatoes, and rice will also be exempt. Other exemptions that apply, similar to the former OB and BBO legislation, are:

- Public transportation.
- Medical services and hospitals.
- Water and electricity.
- Fuels and other products, including supplies, for international transportation.
- Renting of houses.

### *Transfer and property taxes*

The transfer of immovable property on the islands of the Caribbean Netherlands is subject to a 5% transfer duty. There is also a property tax of 0.3% on the value of real estate.

### *Excise tax*

Excise tax is due on gasoline. On Bonaire, excise tax is also due on alcohol, with different tariffs for liquor, wine, and beer, as well as for tobacco. This does not apply to Saba and St. Eustatius.

The excise rates are USD 41.86 per hectolitre of gasoline or approx. USD 1.60 per gallon on Bonaire (USD 1.30 on Saba and St. Eustatius).

Only on Bonaire:

- USD 67.04 per hectolitre of beer.
- USD 128.50 per hectolitre of wine.
- USD 12.85 per volume percent of alcohol per hectolitre of distilled products.
- USD 5.34 per 100 cigarettes.
- USD 9.78 per 100 cigars.
- USD 4.89 per 100 cigarillos.
- USD 30 per kilogram of smoking tobacco.

## *Branch income*

Entities not established in the Caribbean Netherlands are only taxed on the fixed income of local real estate (i.e. 25% real estate tax on 4% of the value of the property the corporation owns in the Caribbean Netherlands). The revenue tax does not apply to the remittance of profits from the PE to the head office of the corporation. No other taxes are levied.

## *Income determination*

In the Caribbean Netherlands, there is a tax on the fixed income of local real estate (real estate tax) and on profits distributed to the shareholders (revenue tax). As long as income is not distributed, profits other than from real estate are not subjected to tax. Therefore, there are no regulations with regard to income determination.

## Deductions

No deductions are allowed on the fixed income with regard to real estate tax or the distributions of profit for revenue tax purposes.

## Group taxation

Distribution of profits to another corporation on one of the islands of the Caribbean Netherlands is exempt from revenue tax if the other corporation holds, at minimum, a 5% interest in the corporation that is making the distribution.

## Tax credits and incentives

A corporation that has been designated as a bonded warehouse for commerce and services is exempt from ABB and excise tax. As a result, goods in transhipment remain tax free. However, if goods that have been admitted to a bonded warehouse are sold within the Caribbean Netherlands, this will be considered importing these goods and ABB and excise tax will be due.

## Withholding taxes

A revenue tax of 5% is levied on distributions from corporations as well as distributions from foundations, special purpose funds, or a closed-end common fund.

### Tax treaties

The Caribbean Netherlands currently has a tax treaty in effect with Norway. A DTA has been negotiated with Jamaica, but this has not entered into force yet. Furthermore, TIEAs have been signed with several countries including Australia, Canada, Denmark, Mexico, Spain, Sweden, New Zealand, and the United States. As a result, the Caribbean Netherlands, as part of the former Netherlands Antilles, has been moved to the white list of the OECD Global Forum.

### Tax arrangement for the Kingdom of the Netherlands (TAK)

As part of the Kingdom of the Netherlands (TAK), the Caribbean Netherlands is party to a federal tax agreement with Aruba, Curaçao, and St. Maarten as well as a tax agreement for the Netherlands (TAN) with regard to the attribution of tax between the Netherlands and the Caribbean Netherlands. Subject to the TAK and the TAN, dividends, interest, and royalties paid to a company resident in the Caribbean Netherlands may qualify for reduced rates of WHTs in the subject countries or in the Netherlands.

Dutch dividend WHTs are 15% if the Caribbean Netherlands company owns less than 10% of the Dutch company. If the Caribbean Netherlands company's interest is 10% or more, Dutch WHT can be reduced to 0%. Aruban dividend tax will be reduced from the statutory rate of 10% to 5%. In the Caribbean Netherlands, the dividends will not be taxed when they are received. However, at the time the dividends are distributed to the shareholder, they will be subject to the 5% revenue tax.

The TAN came into force on January 1, 2011. The TAK is to be revised.

## *Tax administration*

### *Returns*
Revenue tax must be paid at the end of the quarter of the year in which the distribution has been made.

The real estate tax is levied by way of a tax assessment.

### *Payment of tax*
Revenue tax must be paid at the time of filing and in a lump sum on the basis of the self-assessment.

The real estate tax must be paid within two months of the date of the tax assessment.

### *Statute of limitations*
A reassessment can be imposed until five years after the tax year.

## Significant developments

There have been no recent significant developments in Cayman Islands corporate taxation.

## Taxes on corporate income

Corporate income, capital gains, payroll, or other direct taxes are not imposed on corporations in the Cayman Islands.

## Corporate residence

Since no corporate income, capital gains, payroll, or other direct taxes are currently imposed on corporations in the Cayman Islands, corporate residency is not relevant in the context of Cayman Islands taxation.

Entities engaged in 'scheduled' trade and business in the Cayman Islands (as defined in the Trade & Business Licensing Law) are required to have a trade and business license. Effecting and concluding contracts in the Cayman Islands and exercising, in the Cayman Islands, powers necessary for the carrying on of a business outside the Cayman Islands is generally not considered to be engaging in trade and business in the Cayman Islands.

## Other taxes

### Value-added tax (VAT)
There is no VAT imposed in the Cayman Islands.

### Stamp taxes
Stamp duty is paid, at various rates, on transfers of land/property and execution of certain documents.

### Import duties
Import duty is paid, at various rates, on importation of most goods.

## Branch income

Branches are treated the same as other corporations doing business in the Cayman Islands.

## Income determination

Since no corporate income, capital gains, or other taxes are imposed on corporations in the Cayman Islands, income determination is not relevant in the context of Cayman Islands taxation.

## Deductions

Since no corporate income, capital gains, or other taxes are imposed on corporations in the Cayman Islands, deductions from income are not relevant in the context of Cayman Islands taxation.

## Group taxation

Since no corporate income, capital gains, or other taxes are imposed on corporations in the Cayman Islands, group taxation is not relevant in the context of Cayman Islands taxation.

## Tax credits and incentives

Since no corporate income, capital gains, or other taxes are imposed on corporations in the Cayman Islands, tax incentives are not relevant in the context of Cayman Islands taxation. However, Cayman entities carrying on business outside the Cayman Islands can register as 'exempted companies' (i.e. a company formed primarily to do business outside of the Cayman Islands and subject to certain requirements) and can apply under the Tax Concessions Law for an undertaking to be issued by the Governor-in-Council (i.e. the Cayman Islands government) exempting such company from any tax on profits, income, gains, or appreciation which might be introduced in the period of 20 years following the grant of such concessions. The concession is extendable for a further ten years after expiry. 'Exempted limited liability partnerships' (i.e. certain partnerships formed primarily to do business outside of the Cayman Islands) can apply under the Exempted Limited Partnership Law for a similar concession which is for 50 years (rather than 20 years).

## Withholding taxes

Currently, no withholding taxes are imposed on dividends or payments of principal or interest.

## Tax administration

No tax returns, forms, or procedures are required to be completed for tax compliance purposes in the Cayman Islands.

# Cayman Islands

While there are no tax treaties, there are tax information exchange agreements between the Cayman Islands and a number of countries. Please refer to the Cayman Islands Tax Information Authority's website (http://www.tia.gov.ky/html/assistance.htm) for the latest list.

The Cayman Islands agreed with the United Kingdom government to implement the Savings Directive, and so the Reporting of Savings Income Information (European Union) Law (2007 Revision) came into force, setting out a reporting regime whereby Cayman paying agents making interest payments to individuals who are tax resident in a European Union member state may have to report interest paid. The Cayman Tax Information Authority receives or facilitates submission of such information reporting.

## Significant developments

There have been no significant corporate tax developments in Chad during the past year.

## Taxes on corporate income

The profits subject to the company tax are determined with sole regard to profits earned by businesses carried out or transactions conducted in Chad.

The net taxable profits are established after deduction of all charges directly entailed by the exercise of activities subject to assessment in Chad. As income from other countries is not liable to tax, foreign charges and losses are not deductible either.

The corporate tax rate in Chad is 40%.

The minimum tax is 1.5% based on the turnover in excess of XAF 1 million.

## Corporate residence

Registered entities (i.e. companies, branches, and subsidiaries) conducting economic activities in Chad are liable to pay corporate tax.

## Other taxes

### Capital gains and dividends tax

Capital gains and dividends are taxed at 20%.

### Valued-added tax (VAT)

An operation performed in Chad which constitutes an economic activity and for which payment is made, unless included in the list of exemptions in the law governing VAT, is liable for VAT even if the residence of the natural person or the registered office of the legal entity is located outside Chad.

The standard VAT in Chad is 18%.

The VAT law provides a list of transactions exempt from VAT which includes the following:

- Sales of products that are directly made by farmers, cattle farmers, or fishermen to consumers, farming, and fishing operations.
- Imports, operations, and sales of newspapers and periodicals, other than the advertising revenues.
- Exports and related international transportation.

There are no specific rules relating to refunds to non-residents.

There are no refunds of the excess in practice. If the amount paid exceeds the VAT payable, the credit can be offset against the VAT payable until the end of the second financial year following the birth of this credit. After that, it becomes a loss, which is deductible under corporate tax.

### *Real property tax*

The real property tax differs according whether it is build or an unbuild property and whether it is located in N'Djamena or elsewhere.

The tax rate on build property is 12% in N'Djamena and 11% elsewhere.

The tax rate on unbuild property is 21% in N'Djamena and 20% elsewhere.

The calculation base is the potential revenues of that property. The potential revenues correspond to 4/5 of the rental value, the rental value being 10% of the market value. For rural unbuild property, the market value is fixed to 50,000 CFA francs (XAF) per hectare.

### *Accommodation tax*

The person occupying a building (owner or renter) has to pay the following amount as accommodation tax:

| | N'Djamena | Elsewhere |
|---|---|---|
| For construction in local material | 3,000 | 1,500 |
| For solid constructions | 10,000 | 5,000 |
| For R+ solid constructions and each supplementary level | 10,000 | 5,000 |

### *Transfer tax*

Fixed or proportional transfer duties must be paid on the transfer of ownership of estates, personal property, and real property. Transfer duties are also due on contributions to companies and divisions of property.

### *Customs duties*

The tax base of customs duties corresponds with the customs valuation, namely the selling price of the goods plus cost of delivery to Chad (costs of insurance, transportation, etc.).

The rates of customs duties depend on the nature of the goods and range from 5% to 30%. These rates can be summarised as follows:

- Goods of first need (basic necessities): 5%.
- Raw materials and goods of equipment: 10%.
- Intermediate and miscellaneous goods: 20%.
- Consumer goods: 30%.

### *Excise duty*
Excise duty applies to goods of great consumption: cigarettes, drinks (water, beers and wines), cosmetics, and luxury products. Excise duty rates depend on the nature of the goods and range from 5% to 25% of the value of the good.

This value differs depending on the origin of the good. If the good has been manufactured in the Economic and Monetary Community of Central Africa (CEMAC) zone, the value corresponds with the selling price charged by the manufacturer. If the good is imported into the CEMAC zone, the value is the sum of the freight value plus insurance costs and custom duties.

The rates are as follows:

- Water: 5%.
- Beer under 6.5% alcohol: 15%.
- Tobacco, perfume, jewellery, electronic devices (except computers and telephones etc.), private vehicle with an engine capacity above 1600 $cm^3$, weapons: 20%.
- Other alcoholic drinks: 25%.

### *Stamp duties*
Stamp duties must be paid on each civil or judicial document intended to be used as evidence. Stamp duty is generally XAF 1,000 per page.

### *Registration duty*
The registration duty applies to certain deeds listed by the general tax code. The assessment basis depends on the nature of transactions, and the rate varies from 1% to 15%.

### *Business licence tax*
Any natural person or corporate body carrying on a trade, industry, or profession in Chad shall be liable to a business licence tax. The business licence tax is paid annually and is assessed as follows:

- A determined duty based on 0.1% of the first XAF 2 billion of turnover; above that, only 1/10 of the turnover is taxed.
- 10% of the rental value of the premises.
- 10% of the determined duty for the Social Security Fund.
- 7% of the determined duty for the consular commercial chamber.
- XAF 480 per year for the rural intervention fund.

### *Social security contributions*
The monthly contribution to Chad’s Social Security Fund is 16.5% of total salaries for the employer (upper limit: XAF 82,500 per month) and of 3.5% for the employee (upper limit: XAF 17,500 per month), withheld by the employer.

### *Payroll tax*
Employers in Chad are required to make monthly contributions of 7.5% of the total amount of salaries and fringe benefits paid to permanent employees.

### *Apprenticeship tax*
Employers in Chad are required to make monthly contributions of 1.2% of the total amount of salaries and fringe benefits of their employees (permanent and temporary) to the National Professional Training Fund (FONAP).

## Branch income

In Chad, there is a presumption of distribution of profits realized by branches. These profits are deemed distributed to their headquarters and are therefore subject to tax on income from capital gains at the rate of 20%.

However, this presumption of distribution is simple. Branches can provide evidence that the profits they have made have not actually been transferred but remained in the accounts of the branch.

## Income determination

Subject to international conventions, taxable income is the revenue made by enterprises after deduction of the expenses incurred for the operation of the business.

Taxable income is the net income, determined after considering all operations performed by the enterprise. It includes gains made through the disposal of assets.

### Inventory valuation

Stocks shall be valued at cost price; however, if the market price is lower than the cost price, the undertaking shall make provisions for depreciation of inventory.

### Capital gains

Capital gains are taxed at 20%.

### Dividend income

Dividends are taxed at 20%.

### Foreign income

Income from other countries is not liable to tax in Chad.

## Deductions

Expenses are deductible under the following conditions:

- They must lead to a reduction of the assets.
- They must be incurred in the interest of the enterprise.
- They must be regularly included in the accounts of the entity and justified by receipts.
- They must be related to the present fiscal year or a former fiscal year.
- They must not be considered as non-deductible by the law.

### Depreciation

According to accountancy principles, depreciation is calculated based on the probable length of use of the asset. The straight-line system of depreciation is applicable, and rates vary according to the nature of the business activity concerned and the normal useful life of the assets involved.

From an accountancy point of view, it is possible to depreciate whatever amount seems corresponding to the above mentioned principles. However, from a tax point of view, depreciation (i.e. enabling a deduction of the depreciated amount from the taxable income) is only possible under one condition and within certain limits.

Deduction of depreciation is only possible under the condition that the depreciation has been entered into the statement of accounts. Therefore, only a legal entity in Chad owning the assets is able to depreciate its assets.

In addition, a 1997 order sets a yearly limit of depreciation. As a consequence, if depreciation in the statement of accounts is higher than the depreciation authorized, the difference is not deductible and has to be reinstated in the taxable income.

The starting point for depreciation is the day of first use. If this date is not the first day of the financial year, the first year's depreciation is reduced pro-rata.

It should be noted that, despite the above, goods that are leased are depreciated at the rate that they are paid for.

Depreciation of goods that are made available for free to managers and supervisors of the business are deductible if the corresponding benefit in kind is declared.

The sum of depreciation applied to the acquisition or creation of an asset cannot, at the end of each financial year, be less than the amount of depreciation calculated on the linear system and spread out over the normal usage period.

Depreciation in loss-making years may be carried forward to the first profitable financial year, and to subsequent years if necessary.

Chadian tax legislation has established a list of maximum rates of depreciation allowance applicable to certain assets:

| Assets | Rate per year (%) |
|---|---|
| Construction | |
| Commercial and industrial buildings, garages, workshops, sheds | 5 |
| Transformation cabin | 5 |
| Waterfalls and dam installations | 5 |
| Factories | 5 |
| Dwellings | 5 |
| Lime and plaster ovens | 10 |
| Electric ovens | 10 |
| Temporary buildings or buildings that can be dismantled | 20 |
| Handling material | |
| Elevator vehicles | 20 |
| Big cranes | 10 |
| Motorized cranes | 10 |
| Furniture, equipment and installations | |
| Equipment, facilities, installations | 10 |
| Office furniture | 10 |
| Office equipment | 15 |
| Hardware | 33.33 |
| Photocopy equipment | 33.33 |
| Telecommunication equipment | 33.33 |
| Hotels, cafés, restaurants | |
| Glassware, crockery, kitchen utensils | 50 |

| Assets | Rate per year (%) |
|---|---|
| Linen | 33.33 |
| Silverware | 20 |
| Decorative fitting-out | 20 |
| Carpets, curtains, stained items | 20 |
| Refrigerators, air conditioners | 25 |
| Stoves | 20 |
| Plastic equipment | |
| Moulds | 33.33 |
| Heater or sterilizers | 20 |
| Lozenge production machine | 20 |
| Injection presses | 20 |
| Vacuum machines | 20 |
| Metalizing machines | 20 |
| Soldering or welding and cutting machines | 20 |
| Compression press | 10 |
| Gel producing machines, coil production machine | 20 |
| Transfer presses | 10 |
| Equipment subject to chemicals' action | |
| Leaching machines, diffusers | 20 |
| Recycling devices | 20 |
| Cooking devices | 20 |
| Fixed devices and equipment | |
| Vapour boiler | 10 |
| Cement vat | 5 |
| Electric power line in permanent material | 15 |
| Paper and cotton machine | 10 |
| Oil refining equipment | 10 |
| Hydraulic presses | 10 |
| Compression presses | 10 |
| Heavy oil engines | 10 |
| Oil tanks | 10 |
| Heavy high power transformers | 10 |
| Vapour Turbine and machines | 10 |
| Electric power line in provisional material | 20 |
| Transmission and commutation equipment | 10 |
| Network equipment | 10 |
| Movable equipment | |
| Pétrins mécanique (mechanical), mixer | 15 |
| Excavators | 15 |
| Tuns and tanks of brewery, distillation or verification | 10 |
| Wood cutting devices | 20 |
| Purification and drawing devices | 10 |
| Lamination and spin drying devices | 10 |
| Light machine tools, lathes, mortising machines, planning machines, drills | 20 |
| Factory material including machine tools | 20 |

| Assets | Rate per year (%) |
|---|---|
| Pneumatic drills | 20 |
| Hand tools so called small tools | 100 |
| Transport material | |
| Carts | 25 |
| Naval and air equipment | 20 |
| Transport barrels (beer, wine) | 20 |
| Containers | 20 |
| Motor vehicles | |
| Light motor vehicles used in town | 25 |
| Light rented or driving school motor vehicles | 33.33 |
| Heavy motor vehicles used in the bush | 33.33 |
| Tractors | 20 |
| Tractors used by foresters | 33.33 |

### *Interest expense*
Interests paid for the depositing of funds by a shareholder are deductible within the base rate of the Central Bank plus two points, calculated on the basis of the share capital.

### *Charitable contributions*
Donations and liberalities are deductible within a 0.5% limit of the annual turnover, net of tax, when they are duly justified. However, a decision from the Minister of Finances is required.

### *Non-deductible expenses*
The following expenses are not deductible:

- Provisions for laying off employees.
- Provisions for self insurance.
- Income taxes.
- Tax and customs penalties.
- Insurance premiums paid for a third-party.

### *Other expenses not entirely deductible*
The following expenses are not fully deductible:

- Foreign social security contributions are deductible only within 15% of the base salary of the expatriates when related to a compulsory retirement plan. Nonetheless, Chad's social security contributions are fully deductible.
- Restaurants, hotels, receptions, and related costs are deductible within a 0.5% limit of the turnover, net of tax.
- Travel expenses for expatriates and their families for vacation are deductible, limited to one trip per year.

### *Net operating losses*
Losses arising from the normal business activities of the company are deductible and may be carried forward for up to three years.

Carryback of losses is not permitted.

### Payments to foreign affiliates

There is a specific regulation relating to head office and foreign technical assistance costs that are subject to a 10% limitation of deductibility.

The scope of the 10% limitation covers study expenses, technical assistance, and other expenses, including commercial and industrial royalties, paid to the head office of an enterprise established outside Chad and outside the CEMAC zone.

Duly justified, these costs are only deductible within 10% of the intermediary fiscal profit (accounting profits plus non-allowable charges/costs) prior to their deduction.

## Group taxation

There is specific taxation of groups within the CEMAC area.

Where a joint stock company and a private limited company own either registered stock in a joint stock company or shares in a private limited company, the net proceeds of the share in the second company paid to the first during the financial year shall be deducted from the total net profit of the latter, less a percentage for costs and charges. This percentage is fixed at 10% of the total amount of the proceeds. This system shall apply when all of the following conditions are met:

- The stocks or shares owned by the parent establishment represent at least 25% of the capital of the subsidiary firm.
- The parent and subsidiary firms have their registered office in a CEMAC state (Cameroon, Central African Republic, Chad, Gabon, Equatorial Guinea, and Republic of Congo).
- The stocks or shares allotted at the time of issue are still registered in the name of the participating company which undertakes to retain them for at least two consecutive years in registered form.

### Transfer pricing regime

The Tax Code acknowledges that dependant or controlled companies may transfer benefits indirectly to their company abroad it is dependant of or to the company abroad it is controlled by.

In order to calculate the real benefit, the indirectly transferred benefits (by means of increase of purchase price or decrease of sales price to the controlling company or by any other means) are incorporated into the result established by the accounts.

If the tax administration does not have enough precise elements to determine the benefit, it will establish the taxable benefit by way of comparison to companies normally operated in Chad.

The Tax Code provides further, in accordance with CEMAC regulation, that interest paid to shareholders on sums which they lend over and above their share capital is deductible at the rate for loans allowed by the central bank increased by two percentage points. This deduction is only possible if the amounts lent do not exceed 50 % of the share capital.

### Thin capitalisation rules

Chad applies Organisation for the Harmonization of Business Law in Africa (OHADA) regulations with regards to thin capitalisation rules.

In cases where the equity capital gets, due to the recorded losses in the summarising financial statement, below 50% of the share capital, a shareholder consultation has to be organised within four months to decide upon a potential anticipated dissolution of the company.

If the dissolution is excluded, the company has to reconstitute its equity capital up until it equals 50% of the share capital within the two years following the date of the end of the loss-making financial year.

Otherwise, provided it stays above the legally required share capital minimum, the company has to reduce its share capital of an amount at least equal to the losses that it has not been able to charge against reserves.

In cases where no decision has been taken regarding dissolution, any interested person may claim dissolution of the company in front of a court. Any interested person is allowed to bring a legal action if the reconstitution of the equity capital has not taken place within the legal timeline.

This action ceases to exist the day the cause for dissolution ceases to exist or if the court has ruled on the grounds.

## *Tax credits and incentives*

Chad does not offer any tax incentives.

## *Withholding taxes*

### *Withholding tax (WHT) on commerce of retail goods*

A 4% WHT rate applies to natural persons and legal entities that purchase or sell wholesale or retail goods. This WHT also applies to imports.

According to the 2004 Finance Act, companies with more than one shareholder that regularly pay their taxes may apply for a suspension of payment of WHT (renewable every three months).

### *WHT on capital gains*

WHT on capital gains is 20% and applies to residents and non-residents.

### *WHT on income of non-residents*

WHT on income of non-residents is 25%. It applies to income of any legal or natural person which is not resident in Chad.

### *WHT on personal income*

WHT on personal income is withheld by the employer every month.

WHT on income from public procurement contracts financed from outside of the country and income from petroleum projects.

Chad's lowest WHT rate on income is of 12.5%. It applies in either of the following two cases:

- On income of agents, consultancy firms, and corporations executing a contract within the framework of public procurement contracts financed from outside of the country.
- On income of companies working within the petroleum projects.

### *WHT on interests of bonds, certificates, and notes*
Bonds and notes are subject to a WHT of 20% of the interests for registered bonds and 30% of the interests for bearer participation certificates.

### *WHT on rent*
WHT on rent is 15% for residents and 20% for non-residents.

### *Tax treaties*
Chad has one tax treaty with the member states of CEMAC (Cameroon, Gabon, Equatorial Guinea, Congo, Chad, and Central African Republic).

## *Tax administration*

### *Returns*
Corporate tax returns are due on 15 April.

### *Payment of tax*
Certain taxes are considered instalment payments of corporate tax. Once the amount of corporate tax is known, these payments are deductible from the amount and only the balance has to be paid. These taxes include the minimum corporate tax, the quarterly instalment payments, and the 4% discharge for retail goods, if applicable.

#### Minimum corporate tax (monthly)
The minimum corporate tax payment must be made prior to the 15th day of the month following the month of achievement of the turnover.

If this instalment payment exceeds the annual corporate tax, the remainder is lost.

#### One third instalment payments (paid three times quarterly)
Corporations which fulfil the following conditions are subject to quarterly instalment payments:

- Liable to corporate tax.
- Made a profit during the prior fiscal year.
- The amount of the corporate tax of the prior fiscal year is superior to at least XAF 100,000.

The quarterly instalment payments are equal to one-third of the difference between the corporate tax due during the prior fiscal year and the minimum income tax paid during the same period.

The payment must take place before the 10th day of April, July, and October.

## Significant developments

Pursuant to Law No. 20,455, published on 31 July 2010, several amendments to legal provisions were enacted for purposes of financing the plan for reconstruction of the country after the earthquake.

Law No. 20,455 provides a temporary increase in the First Category tax (i.e. corporate income tax) from current 17% to 20% for income received or accrued during calendar year 2011. The rate will be 18.5% for income received or accrued during calendar year 2012. Finally, income received or accrued during calendar year 2013 and subsequent years will again be subject to a 17% tax. The monthly income tax prepayments must be adjusted accordingly.

Law No. 20,455 also established that the transitory reduced stamp tax rate introduced under Law No. 20,326 is now a permanent amendment to the stamp tax law. As of 1 July 2010, stamp tax rates are now half of the prior rates (e.g. 0.6% maximum tax rate instead of the prior 1.2%).

## Taxes on corporate income

### First Category tax

The basic tax on income of a Chilean legal entity domiciled or resident in Chile and engaged in commerce, mining, fishing, or industry is the First Category tax, which is assessed at a rate of 20% on the entity's worldwide income during calendar year 2011. Prior to 2011, the rate was 17%. The rate will be 18.5% for income received or accrued during calendar year 2012. Income received or accrued during calendar year 2013 and subsequent years will again be subject to a 17% tax.

Non-domiciled and non-resident shareholders and partners are subject to an 'additional' withholding tax (WHT) of 35% on their Chilean-source distributions or remittances, with a credit granted for the First Category tax paid on the underlying profits. This results in an effective tax rate of 35%.

## Corporate residence

Companies incorporated in Chile are considered to be domiciled in the country.

## Other taxes

### Value-added tax (VAT)

VAT is payable on transfers and services at a rate of 19%. In general terms, this tax is levied over the price of the following goods and services:

- Sales and other contracts used to transfer ownership of tangible goods, or real estate owned by a construction company, provided that said operations are customary. The law assumes that all sales made within the ordinary course of business are customary.
- Services that are commercial, industrial, or financial, or that are connected to mining, construction, insurance, advertising, data processing, and other commercial operations.
- Imports, customary or not.

Normally, the sale of fixed assets is not subject to VAT, unless the assets are sold before the end of their useful lives or within four years from the date of acquisition. The sale of immovable property as fixed assets is subject to VAT only when the sale takes place within 12 months from the date of acquisition.

VAT works on a credit-debit system. The tax borne by a company or business in the acquisition of goods or services is called the 'VAT credit'. The VAT charged on the goods and services sold to customers is called the 'VAT Debit'. As a general rule, the seller or service provider is obliged to withhold and pay the VAT. The tax amount is added to the invoice for goods or services, as the final consumer is the economic taxpayer.

Exceptionally, when a seller or service provider is not domiciled in Chile or when, for other reasons, it is difficult for the Chilean Internal Revenue Service (IRS) to supervise the correct payment of VAT, the responsibility to withhold and pay the tax is transferred to the buyer or beneficiary of the service.

The tax is paid every month by deducting the VAT credit from the VAT debit. The balance due to tax authorities (when the debit is larger than the credit) must be paid no later than the 12th of the following month.

If on a given month the VAT credit is larger than the VAT debit, the balance may be kept and carried forward in the following months.

### Customs duties

The rate of custom duty is, in general, 6%.

Chile has an extended network of Free Trade Agreements (e.g. with China, United States, Mexico, Japan, European Union, Canada, Panama, Central America, and South Korea). Therefore, reduced or non-existing customs duties rates are available.

Duties on goods are imposed on the cost, insurance, and freight (CIF) price, without deducting special discounts.

In general, Chile has a very open economy and there are no significant barriers to foreign trade.

### Excise taxes

Alcoholic and non-alcoholic beverages and certain luxury items, such as jewels, are subject to additional sales taxes ranging from 13% to 50%.

A variable gasoline tax is also levied on the difference between a fixed amount and the sales price of gasoline and diesel oil.

### *Real estate tax*

Real Estate Tax is levied over an official valuation of real estate at an annual rate of 1.2% in case of non-farming real estate, and 1% for farming real estate. Some real estate is exempt from this tax.

Law No. 20,455, for purposes of financing the plan for reconstruction of the country after the earthquake, provides a temporary increase in the Real State Tax rate of 0.275% per year for non-farming real state with an official valuation equal or superior to 96,000,000 Chilean pesos (CLP) (approximately USD 205,000) during 2011 and 2012.

### *Stamp tax*

Stamp tax is payable mainly on documents that evidence money lending operations, and its rate varies depending on the document being executed.

Pursuant to Law No. 20.455, a transitory reduced stamp tax rate introduced under Law No. 20,326 is now a permanent amendment to the stamp tax law. As of 1 July 2010, stamp tax rates are now half of the prior rates (e.g. 0.6% maximum tax rate instead of the prior 1.2%).

This permanent amendment entered into force retroactively to 1 July 2010 (the Law was published in 31 July 2010). Hence, every transaction that took place between 1 July 2010 and 31 July 2010 is subject to the tax refund procedure set forth in Revenue Ruling No. 39/2010 issued by the Chilean IRS.

## *Branch income*

Branches of foreign corporations that are operating in Chile are taxed on their Chilean-source income. Branches are subject to the First Category tax, which is assessed at a rate of 20%.

Branches are also subject to a 35% ‘additional’ tax on amounts remitted or withdrawn during a given calendar year, less a credit for the First Category tax paid, which is payable in April of the year following the distribution. Thus, the tax burden for a branch is 35%.

## *Income determination*

For purposes of the First Category tax, as a general rule, corporate revenue must be determined on an accrual basis.

### *Inventory valuation*

Inventories must be valued in accordance with monetary correction provisions, basically by adjusting raw material content and direct labour to replacement cost (which is generally the most recent cost), but excluding indirect costs. No conformity is required between book and tax reporting for income determination. Last in first out (LIFO) is not allowed.

### Capital gains

Capital gains are subject to normal taxation unless special provisions, such as those pertaining to gains on the sale of shares or monetary correction on capital repayments, establish exemptions.

Under domestic laws, in certain circumstances, the capital gains derived from the following securities will be subject to a preferential tax treatment:

- Stock of listed local companies.
- Investment fund quotas, listed on an authorized stock exchange.
- Mutual funds quotas, if the fund invests in stock trade values.
- Investment funds quotas with no stock exchange participation or mutual funds, where at least a 90% of the investment portfolio is in a stock market.

### Dividend income

Dividends received from Chilean corporations are exempt from the First Category tax.

### Stock dividends

Stock dividends are not taxed.

### Foreign income

Resident corporations are subject to taxes on their worldwide income. In general, foreign income and dividends received by a domestic corporation are subject to Chilean taxation in the financial year when received (i.e. on a cash basis). A tax credit for taxes paid abroad is granted, subject to the regulations of the Income Tax Law.

Branches of foreign corporations are taxed on their income without regard to the results of the head office.

## Deductions

Net taxable income of a taxpayer is arrived at by deducting from gross income the expenses incurred to generate the income that have not been already deducted from gross revenue as costs.

As a general rule, expenses are not deductible for income tax purpose if they are not incurred to generate taxable income.

### Depreciation and depletion

Depreciation rates are calculated based on the estimated useful life of the assets. The normal periods of depreciation for new assets under normal conditions are as follows: heavy machinery, 15 years; trucks, seven years; factory buildings, in general, 20 years to 40 years. At the request of the Foreign Investment Committee or the taxpayer, the IRS may reduce the normal useful life.

Annual depreciation is taken by the straight-line method. However, taxpayers may recover capitalised costs by using the accelerated depreciation method for up to one third of the normal useful life with respect to new or imported fixed assets, provided that the normal period of depreciation is at least three years.

Accelerated depreciation may be used only to reduce the taxable basis of the First Category tax. For the purpose of the tax applicable to distributions of dividends, accelerated depreciation is not considered.

No conformity is required between book and tax depreciation.

For tax purposes, depletion for natural mineral resources is allowed on a unit-of-production basis.

### *Bad Debts*
In general, bad debts are deductible only if they are a consequence of operations related to the business purpose, if they have been opportunely written off into accounting, and the company has prudentially exhausted all reasonable means to collect them.

Determination of whether the company has prudentially exhausted all reasonable means to collect the bad debts varies according to the total amount of the debts. Therefore, a simple estimation or general provision for bad debts is not allowable.

### *Charitable contributions*
Charitable contributions may be deducted provided they are made to the institutions named by varied Laws (i.e. primary and secondary educational institutions; universities, professional or technical educational institutions, National Fire Brigade, National Solidarity Fund, etc.).

In case of charitable contribution, the total annual tax deduction for this purpose is limited. The deductible amount for this purpose may not exceed 5% of the company's net taxable income.

### *Taxes*
Taxes imposed by Chilean laws are deductible, provided they are related to the normal activities of the company. However, income taxes and special contributions for promotion or improvement are not deductible.

### *Net operating losses*
An indefinite carryforward of losses is allowed. Consistent with monetary correction, losses are carried forward, adjusted by a cost-of-living increase. No carrybacks are allowed, except in a case where a taxpayer has retained tax profits and has a subsequent tax loss.

### *Payments to foreign affiliates*
The deductibility of payments made abroad for the use of trademarks, patents, formulas, and consulting and similar services is limited to a maximum of 4% of the income derived from sales and services in the corresponding year, unless the royalty is subject to income tax of greater than 30% in the country of the beneficiary.

Transfer pricing regulations are in line with general Organisation for Economic Co-operation and Development (OECD) principles.

## *Group taxation*

Consolidated returns are not allowed in Chile.

### *Transfer pricing*
Special provisions of the Income Tax Law regulate the prices charged between related companies located in Chile and companies located in other jurisdictions.

The rules contained in the Income Tax Law on transfer pricing matters apply to both operations between a branch and its head office, and operations between a foreign company and a Chilean company in which the former participates (directly or indirectly) in the conduction, control, or capital.

These rules allow the IRS to challenge the prices paid by the Chilean company branch to its head office or to a foreign related company when the prices agreed are not adjusted to those applicable in operations between unrelated parties.

In order to contest the prices, the IRS may take into account a reasonable profit, bearing in mind the characteristics of the operation, or else the production costs plus a reasonable profit margin.

The same rules will apply with regard to prices paid or owed for goods or services provided by the head office, or by any of its branches or related companies, when those prices are not adjusted to the normal market prices charged in operations between non-related parties.

If the branch (or the local company) only has operations with related companies, the IRS will be allowed to challenge those prices taking into consideration the values of the respective goods or services in the international market.

Although domestic legislation regulating transfer pricing aspects of related-party transactions is broad and general, the fact that Chile became an OECD member in 2010 has been of great relevance from a tax perspective in the Chilean local market. The IRS has made public its intention to ensure its assessment policies and general practices are adequate and consistent with international OECD approaches to corporate restructuring, general tax planning, and in particular transfer pricing.

To date, new transfer pricing legislation has not been approved in Chile. However, based on public communications made by key tax officials in the local media, a new tax bill is due to be tabled before the parliament, and it is expected that this bill will introduce the main principles and pricing methodologies established by the OECD Guidelines.

### *Thin capitalisation*

Thin capitalisation rules apply in case of related party loans at a 3-to-1 debt to equity ratio. In this regard, the total annual amount of such loans is deemed to exceed the 3-to-1 ratio if the monthly average value of the sum of all related party loans and financial liabilities that the debtor has at the end of the taxable year in which the loan was granted exceeds three times the debtor´s adjusted tax equity.

## *Tax credits and incentives*

### *Investment incentives*

The principal investment incentives are the following:

- Tax benefits and other incentives for companies operating in the northernmost and southernmost parts of the country.
- Tax benefits to forestry companies, contracts for oil operation, and nuclear material operations.

### *Inbound investment incentives*

The principal incentives to encourage foreign capital contributions are statutory guarantees covering the repatriation of capital, remittance of profits, non-discrimination toward foreign investment, and access to the foreign exchange market for remittance purposes. In general, foreign investors are subject to the same legislation as national investors. A guaranteed income tax rate of 42% may be granted for ten years or, provided the capital investment project exceeds USD 50 million, 20 years for the development of industrial or extractive projects.

The overall rate is comprised of the corporate tax on profits and WHT on dividend or branch profit distributions. The tax rate on dividend or profit distributions is the difference between 42% and the underlying tax paid at a corporate level. The option to be subject to an overall effective tax rate of 42% without change for ten or 20 years is usually not exercised by foreign investors, because the current combined effective tax rate on profits and dividend distribution is 35% under the general tax regime.

Under the Foreign Investment Contract, a foreign investor may petition for tax stability with respect to VAT and customs duty regimes. With respect to customs duties, however, stability is granted only for the importation of certain machinery and equipment not available in Chile.

### *Export incentives*

The principal incentives for exports can be summarised as follows:

- Taxes paid in the importation or acquisitions of goods required in the export activity are reimbursed.
- VAT on exports is zero-rated.
- Chile has signed free-trade agreements with Australia, Bolivia, Canada, Central America (i.e. Costa Rica, El Salvador, Guatemala, Honduras, Nicaragua), China, Colombia, the European Union (EU), Mexico, Panama, Peru, Republic of South Korea, Turkey, and the United States. All these agreements provide for reduced customs duties.

### *Foreign tax credit*

In order to avoid double taxation, the Chilean Tax Law recognizes a tax credit mechanism in which the tax effectively paid abroad may be deducted from the taxes to be paid in Chile.

In order to regulate this matter, the Chilean Tax Law distinguishes between those countries with which there is a double taxation treaty (DTT) in force with Chile and those that do not have a DTT in force with Chile.

## *Withholding taxes*

Dividends paid to a non-resident recipient are subject to a 35% withholding of ‘additional’ tax, with a credit available that is equivalent to the income tax effectively paid at the corporate level, corresponding with the First Category tax paid by the corporation. This credit is added to the amount that is distributed to form the taxable base for the ‘additional’ tax. Consequently, the tax burden for a non-resident recipient of dividends, including taxes at the company level, is 35%.

Branches are subject to a 35% ‘additional’ tax on amounts remitted or withdrawn, less the First Category tax credit. *See the Branch income section for more information.*

In the case of a foreign investor that has applied for the 42% tax invariability, the effective tax burden is also 42%.

Interest paid to non-residents is subject to additional WHT at a general 35% rate. Interest on loans granted by foreign banking or financial institutions is subject to a sole 4% additional WHT. Thin capitalisation rules requesting a 3:1 debt: equity ratio become applicable when the debt generating interest subject to the 4% rate is secured by related entities.

Royalties paid to non-residents are subject to additional WHT at a 30% rate. Royalty payments in connection to software are subject to additional WHT at a 15% rate. Such rate is increased in case the beneficiary of the payment is resident in a tax haven or in case the payment is made to a related entity.

### *Tax treaties*

Chile has in force double taxation treaties with the following countries: Argentina, Belgium, Brazil, Canada, Colombia, Croatia, Denmark, Ecuador, France, Ireland, Malaysia, Mexico, New Zealand, Norway, Paraguay, Peru, Poland, Portugal, Republic of South Korea, Spain, Sweden, Switzerland, Thailand, and the United Kingdom.

Please note that Chile has signed double taxation treaties with Russia, Australia, and the United States which are not yet in force.

The following table shows the higher and lower rates on WHT applicable by Chile and the countries with which DTTs exist. The application of one or the other rate will depend on the specific provisions of each treaty.

| Recipient | Dividends (%) | Interest (%) | Royalties (%) |
|---|---|---|---|
| Belgium | 15 | 5/15 | 5/10 |
| Brazil | 10/15 | 15 | 15 |
| Canada | 5/15 | 10/15 | 10 |
| Colombia | 0/7 | 5/15 | 10 |
| Croatia | 5/15 | 5/15 | 5/10 |
| Denmark | 5/15 | 5/15 | 5/10 |
| Ecuador | 5/15 | 5/15 | 10 |
| France | 15 | 5/15 | 5/10 |
| Ireland | 5/15 | 5/15 | 5/10 |
| Malaysia | 5/15 | 15 | 10 |
| Mexico | 5/10 | 5/10/15 | 10 |
| New Zealand | 15 | 10/15 | 10 |
| Norway | 5/15 | 5/15 | 5/10 |
| Paraguay | 10 | 10/15 | 15 |
| Peru | 10/15 | 15 | 15 |
| Poland | 5/15 | 5/15 | 5/10 |
| Portugal | 10/15 | 5/10/15 | 5/10 |
| South Korea | 5/10 | 5/15 | 5/10 |
| Spain | 5/10 | 5/15 | 5/10 |
| Switzerland | 15 | 5/15 | 5/10 |
| Sweden | 5/10 | 5/15 | 5/10 |
| Thailand | 10 | 10/15 | 10/15 |

| Recipient | Dividends (%) | Interest (%) | Royalties (%) |
|---|---|---|---|
| United Kingdom | 5/15 | 5/15 | 5/10 |

## Tax administration

### Returns

The tax year coincides with the calendar year. The tax system is one of self-assessment by the taxpayer, with occasional auditing by the tax authorities. Tax returns must be filed with the IRS before 30 April of each year with respect to the income of the previous calendar year.

Note that there are many other sworn statements with different deadlines, from March until June of each year.

### Payment of tax

Taxes are payable when the annual tax return is submitted in April of each year. Taxpayers, in general, are subject to monthly advance payments on account of their yearly income taxes. The difference between the advance payments and the final tax bill is payable in cash at the time the tax return is filed. If prepayments exceed the final tax bill, the excess is reimbursed by the Treasury.

## Significant developments

### China/Singapore tax treaty

On 26 July 2010, the State Administration of Taxation (SAT) issued a Departmental Interpretation Notes (DIN) for the tax treaty concluded between China and Singapore. It is the first time the SAT introduced a set of technical views, interpretation, and practice guidelines for the implementation of a tax treaty in such a comprehensive manner. More importantly, this set of interpretation is also applicable to other tax treaties concluded by China if the provisions of the relevant articles in those tax treaties are the same as those in the China/Singapore tax treaty. Thus, it is likely to have a wide impact to tax residents of other countries/regions which have entered into tax treaties with China.

### Urban construction and maintenance tax and educational surcharge

Urban construction and maintenance tax and educational surcharge are two types of surcharges imposed at a certain rate on the amount of China's indirect taxes (i.e. business tax, value-added tax, and consumption tax) payable by the taxpayer. Effectively, the taxpayers of the above mentioned indirect taxes are also the taxpayers of urban construction and maintenance tax and educational surcharge. Foreign investment enterprises and foreign enterprises were temporarily exempted from these two surcharges before. On 18 October 2010, the State Council released a circular to resume the collection of these two surcharges from foreign investment enterprises and foreign enterprises effective from 1 December 2010.

### Local educational surcharge

Local educational surcharge is another type of surcharge that is levied at 2% on the same tax basis as that for urban construction and maintenance tax and educational surcharge. It was not levied in many places in China. On 7 November 2010, the Ministry of Finance released a circular requesting all the local governments to unify/resume the collection of local educational surcharge. However, as the circular does not specify the effective date, the current local practice varies.

## Taxes on corporate income

Tax resident enterprises (TRE) are subject to corporate income tax on their worldwide income. A non-TRE that has no establishment or place in China is taxed only on its China-source income. A non-TRE with an establishment or place in China shall pay CIT on income derived by such establishment or place from sources in China as well as income derived from outside China which effectively is connected with such establishment or place.

Under the CIT law, the standard tax rate is 25%. There is no local or provincial income tax in China.

A lower CIT rate is available for the following sectors/industries:

- Qualified new/high tech enterprises are eligible for a reduced CIT rate of 15%. An enterprise has to fulfil a set of prescribed criteria and be subject to an assessment in order to qualify as a new/high tech enterprise.
- Integrated circuit (IC) production enterprises with a total investment exceeding CNY 8 billion, or which produce integrated circuits with a line-width of less than 0.25 micrometre, are eligible for a reduced CIT rate of 15%.
- Key software production enterprises are eligible for a reduced CIT rate of 10%. An enterprise has to fulfil a set of prescribed criteria and be subject to an assessment in order to qualify as a key software production enterprise.
- From 1 January 2009 to 31 December 2013, qualified technology-advanced service enterprises in 21 cities (e.g. Beijing, Shanghai, Tianjian, Guangzhou, and Shenzhen) are eligible for a reduced CIT rate of 15%. This incentive is only available to certain technology-advanced service sector members, and an enterprise has to fulfil a set of prescribed criteria and be subject to an assessment in order to qualify as a technology-advanced service enterprise.
- Qualified small and thin-profit enterprises are eligible for a reduced CIT rate of 20%. An enterprise has to fulfil certain conditions in order to qualify as a small and thin-profit enterprise.

## *Corporate residence*

Enterprises established in China are always TREs. A foreign enterprise with a place of effective management in China is also regarded as a TRE.

An 'establishment or place' is defined in the CIT regulations as an establishment or place in China engaging in production and business operations, including the following:

- Management organisations, business organisations, and representative offices.
- Factories, farms, and places where natural resources are exploited.
- Places where labour services are provided.
- Places where contractor projects, such as construction, installation, assembly, repair, and exploration are undertaken.
- Other establishments or places where production and business activities are undertaken.
- Business agents who regularly sign contracts, store and deliver goods, etc. on behalf of the non-TRE.

## *Other taxes*

China has a turnover tax system consisting of the following three taxes: value-added tax (VAT), business tax, and consumption tax.

### *Value-added tax (VAT)*

The sales or importation of goods and the provision of repairs, replacement, and processing services are subject to VAT. VAT is charged at a standard rate of 17%, and the rate for small-scale taxpayer is 3%. The sales of certain necessity goods may be subject to VAT at a reduced rate of 13%, as specified in the VAT regulations.

The VAT system is a consumption-based VAT system, which means that input VAT on fixed assets is fully recoverable except for situations specified in the VAT regulations.

Export of goods from China may be entitled to a refund of VAT incurred on materials purchased domestically. The refund rates range from 0% to 17%. There is a prescribed formula for determining the amount of refund, under which many products do not obtain the full refund of input VAT credit and suffer different degree of export VAT costs.

### *Business tax*

A business tax is imposed on services, transfer of intangible assets, and immovable property taking place within China. Services taking place within China refers to situations where the service provider, the service recipient, or both are in China. This may make services even being rendered outside China subject to business tax in China. Business tax rates are 3% or 5%, except for the leisure and entertainment industry, which may be subject to a rate of up to 20%. Business tax is not recoverable but is deductible for CIT purposes.

### *Consumption tax*

A consumption tax is imposed on 14 categories of goods, including cigarettes, alcoholic beverages, and certain luxury and environmental unfriendly items. The tax liability is computed based on the sales amount and/or the sales volume depending on the goods concerned. It is not recoverable but is deductible as an expense for CIT purposes.

### *Urban construction and maintenance tax*

Urban construction and maintenance tax is imposed at a certain rate on the amount of China's indirect taxes (i.e. business tax, VAT, and consumption tax) payable by the taxpayer. Effectively, the taxpayers of indirect taxes are also the taxpayers of urban construction and maintenance tax. It is charged at three different rates depending on the taxpayer's location, 7% for urban areas, 5% for county areas, and 1% for other areas. Foreign investment enterprises and foreign enterprises were temporarily exempted from urban construction and maintenance tax until 1 December 2010.

### *Educational surcharge*

Educational surcharge is imposed at 3% on the amount of China's indirect taxes (i.e. business tax, VAT, and consumption tax) payable by the taxpayer. Effectively, the taxpayers of indirect taxes are also the taxpayers of educational surcharge. Note that foreign investment enterprises and foreign enterprises were temporarily exempted from educational surcharge until 1 December 2010.

### *Local educational surcharge*

Local educational surcharge is levied at 2% on the amount of China's indirect taxes (i.e. business tax, VAT, and consumption tax) payable by the taxpayer. Effectively, the taxpayers of indirect taxes are also the taxpayers of local educational surcharge. It was not levied in many places in China. On 7 November 2010, the Ministry of Finance released a circular requesting all the local governments to unify/resume the collection of local educational surcharge. However, as the circular does not specify the effective date, the current local practice varies.

### *Real estate tax*

A real estate tax, which is based on the value of the property or rental received, is assessed on land and buildings used for business purpose or leased. The tax rate is 1.2% of the original value of buildings. A tax reduction of 10% to 30% is commonly offered by local governments. Alternatively, tax may be assessed at 12% of the rental value. Real estate tax is deductible for CIT purposes.

### *Land appreciation tax*

A land appreciation tax is levied on the gain from the disposal of properties at progressive rates from 30% to 60%. Land appreciation tax is deductible for CIT purposes.

### *Customs duties*

In general, a customs duty is charged in either specific or *ad valorem* terms. For specific duty, a lump sum amount is charged based on a quantitative amount of the goods (e.g. CNY 100 per unit or per kg). For *ad valorem* duty, the customs value of the goods is multiplied by an *ad valorem* duty rate to arrive at the amount of duty payable. The applicable duty rate generally is determined based on the origin of the goods.

An exemption from customs duty applies to machinery and equipment imported by a foreign investment enterprise within the amount of its total investment, for its own use if the project falls within the encouraged category of the 'Catalogue for the Guidance of Foreign Investment Industries', and the imported machinery or equipment is not within the list of commodities that are not exempted from customs duty.

A customs duty and VAT exemption may be allowed on importation of raw materials for contract processing or import manufacturing. Goods may be imported into, and exported out of, designated Free Trade Zones and Bonded Logistics Zones without liability to customs duty or VAT.

### *Stamp tax*

All enterprises and individuals, who execute or receive 'specified documentation', including 11 types of contracts and a few specified documents, are subject to stamp tax. The stamp duty rates vary between 0.005% on loan contracts to 0.1% for property leasing and property insurance contracts. A flat amount of CNY 5 applies to certification evidencing business licences and patents, trademarks, or similar rights.

### *Motor vehicle acquisition tax*

A motor vehicle acquisition tax at a rate of 10% of the taxable consideration will be levied on any purchase and importation of cars, motorcycles, trams, trailers, carts, and certain types of trucks.

### *Deed tax*

A deed tax, generally at rates from 3% to 5%, may be levied on the purchase or sale, gift or exchange of ownership of land use rights or real properties. The transferee/assignee is the taxpayer.

### *Vehicle and vessel tax*

A vehicle and vessel tax is a tax that is levied on all vehicles and vessels registered within China. A fixed amount is levied on either a yearly or quarterly basis. Transport vehicles generally are taxed on a fixed amount according to their own weight, with passenger cars, buses, and motorcycles being taxed on a fixed unit amount. Vessels are taxed on a fixed amount, according to the deadweight tonnage.

### *Urban and township land-use tax*

An urban and township land-use tax is levied on taxpayers who utilise land within the area of city, country, township, and mining districts. It is computed annually based on the space of area actually occupied by a taxpayer multiplied by a fixed amount per square metre that is determined by the local governments.

### *Resource tax*

A resource tax may be levied, generally on a tonnage or volume basis, at rates specified by the Ministry of Finance in consultation with relevant ministries of the State Council on natural resources including crude oil, natural gas, coal, other raw non-metallic metals, raw ferrous metals, non-ferrous metallic minerals and salt (including solid and liquid salt). In lieu of a resource tax, mine area usage fees are collected from joint ventures exploiting crude oil or natural gas.

Resource tax is now undergoing reform. As a result, enterprises and individuals exploiting crude oil and natural gas in Xinjiang Autonomous Region and the western region are now subject to resource tax at 5% on sales turnover.

## *Branch income*

Under the CIT law, a branch of a non-TRE in China is taxed at the branch level. If there is more than one branch, they may elect to file their tax at the main office in China on a consolidated basis. There is no further tax upon remittance of branch profits.

## *Income determination*

Taxable income is defined as "gross income in a tax year after deduction of non-taxable income, tax exempt income, various deductions, and allowable losses brought forward from previous years". The accrual method of accounting should be used.

Gross income refers to monetary and non-monetary income derived by an enterprise from various sources, including, but not limited to, the sales of goods, provision of services, transfer of property, dividends, interest, rentals, royalties, and donations.

Non-taxable income refers to fiscal appropriation, governmental administration charges, governmental funds, and other income specified by the central government.

### *Inventory valuation*

Inventory must be valued according to costs. In computing the cost of inventories, the enterprise may choose one of the following methods: first in first out (FIFO), weighted average, or specific identification.

### *Unrealised gain or loss due to changes in fair value*

An unrealised gain or loss due to changes in the fair value of financial assets, financial liabilities, and investment properties held by an enterprise is not taxable/deductible for CIT purpose. The gain/loss is taxable/deductible only when the asset/liability actually is disposed or realised.

### *Capital gains*

Capital gains are treated in the same way as ordinary income of a revenue-nature for a TRE.

### *Dividend income*
An exemption exists for CIT on dividend derived by a TRE from the direct investment into another TRE except for where the dividend is from stocks publicly traded on the stock exchanges and the holding period is less than 12 months.

### *Interest, rental, royalty income, and income from stock transactions*
Interest, rental, and royalty income, as well as income from stock transactions, are treated as ordinary income.

### *Partnership income*
Partnerships registered in China are not subject to CIT. The income of a partnership is taxable at the partners' level.

### *Unrealised exchange gains*
Unrealised exchange gain (loss) from the year-end translation of assets (liabilities) denominated in foreign currency generally is taxable (deductible).

### *Foreign income*
The worldwide income of a TRE and its branches both within and outside China is taxable. There are no provisions in the CIT law which allow foreign income directly earned by the TRE to be deferred for tax purposes. The CIT law contains a controlled foreign company (CFC) rule under which the unremitted earning of a foreign company controlled by Chinese enterprises may be taxable in China *(see the Group taxation section for more information)*. A foreign tax credit is allowed for foreign income taxes paid on foreign-source income.

## *Deductions*

Generally, an enterprise is allowed to deduct reasonable expenditures which actually have been incurred and are related to the generation of income.

### *Depreciation of fixed assets*
Fixed assets with useful lives of more than 12 months must be capitalised and depreciated in accordance with the CIT regulations. Generally, depreciation is calculated by the straight-line method. Shorter tax depreciation life or accelerated depreciation may be allowed due to advancement of technology or suffering from constant vibration or severe corrosion. Production-nature biological assets, such as livestock held for breeding and commercial timber, also have to be capitalised and depreciated using the straight-line method.

Under the straight-line method, the cost of an item, less its residual value, is depreciated over the useful life of the asset. Residual value should be reasonably determined based on the nature and usage of the asset. The CIT law provides minimum useful lives for the following assets:

| Assets | Years |
|---|---|
| Buildings and structures | 20 |
| Aircrafts, trains, vessels, machinery, mechanisms, and other production equipment | 10 |
| Appliances, tools, and furniture etc. related to production and business operations | 5 |
| Means of transport other than aircrafts, trains, and vessels | 4 |

| Assets | Years |
|---|---|
| Electronic equipment | 3 |
| Production-nature biological assets in the nature of forestry | 10 |
| Production-nature biological asset in the nature of livestock | 3 |

### *Amortisation of intangibles and goodwill*
A deduction is allowed for amortisation of intangible assets, such as, but not limited to, patents, trademarks, copyrights, and land use rights. Generally, intangible assets have to be amortised over a period of not less than ten years. For an intangible asset obtained through capital contribution or assignment, it can be amortised according to the useful life prescribed in the laws or agreed in the contracts, if any. However, acquired goodwill is not deductible until the invested enterprise is entirely transferred or liquidated.

### *Organisational and start-up expenses*
Organisational and start-up expenses are tax deductible fully in the first year of operation.

### *Research and development (R&D) expense*
For R&D expenses incurred for new technology, new products, or new craftsmanship, an extra 50% of the actual expenses incurred are also tax-deductible as an incentive.

### *Asset loss*
Asset loss (including bad debt loss) may be deductible in the tax year during which such loss is incurred, provided that supporting documents are submitted to the in-charge tax bureau during annual income tax reconciliation filing.

### *Interest expenses*
Interest on loans generally is tax-deductible. For interest expenses on borrowings from non-financial institutions by a non-financial institution, the portion that does not exceed the commercial rate is deductible. The tax deduction of interest paid to related parties is subject to the thin capitalisation rule under the CIT law *(see the Group taxation section for more information)*.

### *Reserves and provisions*
Provisions for asset impairment reserves (e.g. bad debt provisions) and risk reserves generally are not tax-deductible unless otherwise prescribed in the tax rules. Financial institutions and insurance companies may deduct certain provisions and reserves subject to the caps specified in the relevant tax circulars.

### *Contingent liabilities*
The CIT law does not specifically address the deductibility of contingent liabilities. According to the general principle of the CIT law, contingent liabilities are liabilities that an enterprise has not actually incurred and thus shall not be tax-deductible.

### *Charitable donations*
Charitable donations are tax-deductible up to 12% of the annual accounting profit.

### *Wages and staff welfare expenses*
Reasonable wages and salaries of employees incurred by an enterprise are tax-deductible. Directors' fees are also tax-deductible.

Basic social security contributions, including basic pension insurance, basic medical insurance, unemployment insurance, injury insurance, maternity insurance, and housing funds, that are made by an enterprise in accordance with the scope and criteria as prescribed by the state or provincial governments are deductible.

Commercial insurance premiums paid for investors or employees shall not be tax-deductible unless it is paid for safety insurance for workers conducting special types of work.

Staff welfare expenses, labour union fees, and staff education expenses are tax-deductible up to 14%, 2%, and 2.5% of the total salary expenses, respectively.

### *Entertainment expenses*

Entertainment expenses are tax-deductible to the lesser of 60% of the costs actually incurred and 0.5% of the sales or business income of that year. The excess amount must not be carried forward to and deducted in the following tax years.

### *Advertising expenses and business promotion expenses*

Advertising expenses and business promotion expenses are deductible up to 15% of the sales (business) income of that year unless otherwise prescribed in the tax regulations. Any excess amount is allowed to be carried forward and deductible in the following tax years. Advertising expenses and business promotion expenses incurred by the tobacco industry are entirely not tax-deductible.

### *Other non-deductible expenses*

In addition, the following expenditures are non-tax deductible expenditures: CIT payments; tax surcharges; penalties, fines, and losses arising from confiscation of property; non-charitable donations; and sponsorship expenditures which are non-advertising and non-charitable in nature.

### *Net operating losses*

Tax losses can be carried forward for no longer than five years starting from the year subsequent to the year in which the loss was incurred. Carryback of losses is not permitted.

### *Payments to affiliates*

Management fees for stewardship are not deductible, but services fees paid for genuine services provided by affiliates in China or overseas and charged at arm's length should be deductible. Other payments to affiliates, such as royalties, are also tax-deductible provided that the charges are at arm's length.

## *Group taxation*

Group taxation is not permitted under the CIT law unless otherwise prescribed by the State Council.

### *Transfer pricing regime*

All enterprises are required to conduct transactions with related parties on an arm's-length basis. The Chinese tax authorities are empowered to make adjustments to transactions between related parties which are not conducted at arm's length and resulting in the reduction of taxable income of the enterprise or its related parties using the following appropriate methods: comparable uncontrolled price method, resale price method, cost plus method, transactional net margin method, profit split method, and other methods which are consistent with the arm's-length principle. China also adopts stringent requirements on the disclosure of related party transactions in the filing of the annual tax return. In addition, there is also a requirement to prepare contemporaneous transfer pricing documentation if the amount of related parties' transactions with an enterprise exceeds a certain prescribed threshold.

The CIT law also contains transfer pricing provisions relating to cost sharing arrangements and advance pricing arrangements. In addition, it also contains a few tax avoidance rules such as a CFC rule, a thin capitalisation rule, and general anti-avoidance rules.

### *Thin capitalisation rule*

The CIT law has a thin capitalisation rule disallowing interest expense arising from excessive related party loans. The safe harbour debt/equity ratio for enterprises in the financial industry is 5:1 and for enterprises in other industries is 2:1. However, if there is sufficient evidence to show that the financing arrangement is at arm's length, these interests may still be fully deductible even if the ratios are exceeded.

### *Controlled foreign company (CFC) rule*

Under the CFC rule, the undistributed profits of CFCs located in low-tax jurisdictions with an effective income tax rate of less than 12.5% may be taxed as a deemed distribution to the TRE shareholders. The Chinese tax authorities have published a list of countries (i.e. a 'white list') that they do not regard to be low-tax jurisdictions.

## *Tax credits and incentives*

The CIT law adopts the 'Predominantly Industry-oriented, Limited Geography-based' tax incentive policy. Key emphasis is placed on 'industry-oriented' incentives aiming at directing investments into those industry sectors and projects encouraged and supported by the state. The tax incentive policies mainly include the following and are applicable to both domestic and foreign investments.

### *Tax reduction and exemption*

CIT may be reduced or exempted on income derived from the following projects:

| Projects/industries | CIT incentive | Valid period |
|---|---|---|
| Agriculture, forestry, animal-husbandry, and fishery projects | Exemption or 50% reduction | All years, as long as it is engaged in these projects |
| Specified basic infrastructure projects | 3 + 3 years tax holiday (2) | Starting from the first income-generating year |
| Environment protection projects and energy/ water conservative projects | 3 + 3 years tax holiday (2) | Starting from the first income-generating year |
| Qualified new/high tech enterprises established in Shenzhen, Zhuhai, Shantou, Xiamen, Hainan, and Pudong New Area of Shanghai after 1 January 2008 | 2 + 3 years tax holiday (1) | Starting from the first income-generating year |
| Newly established software production enterprises | 2 + 3 years tax holiday (1) | Starting from the first profit-making year |
| Integrated circuits design enterprises | 2 + 3 years tax holiday (1) | Starting from the first profit-making year |

| Projects/industries | CIT incentive | Valid period |
|---|---|---|
| Integrated circuits production enterprises with a total investment exceeding CNY 8 billion or which produce integrated circuits with a line-width of less than 0.25um, provided that its operation period exceeds 15 years | 5 + 5 years tax holiday (3) | Starting from the first profit-making year |
| Integrated circuits production enterprises which produce integrated circuits with a line-width of less than 0.8um | 2 + 3 years tax holiday (1) | Starting from the first profit-making year |
| Qualified energy-saving service enterprises | 3+3 years tax holiday(2) | Starting from the first income-generating year |

Notes

1. '2 + 3 years tax holiday' refers to two years of exemption from CIT followed by three years of 50% reduction of CIT.
2. '3 + 3 years tax holiday' refers to three years of exemption plus three years of 50% reduction of CIT.
3. '5 + 5 years tax holiday' refers to five years of exemption plus five years of 50% reduction of CIT.

For income derived from the transfer of technology in a tax year, the portion that does not exceed CNY 5 million shall be exempted from CIT; and the portion that exceeds CNY 5 million shall be allowed a 50% reduction of CIT.

A CIT exemption applies to the dividend derived by a TRE from the direct investment into another TRE except where the dividend is from stocks publicly traded on the stock exchanges and the holding period is less than 12 months.

A CIT exemption also applies to the income derived by recognised non-profit-making organisations engaging in non-profit-making activities.

### *Reduced tax rate*

The CIT rate may be reduced under certain conditions for different industries *(see the Taxes on corporate income section for more information).*

### *Reduction of revenue*

Where an enterprise uses resources specified by the state as its major raw materials to produce non-restricted and non-prohibited products, only 90% of the income derived is taxable.

### *Offset of certain venture capital investment*

For a venture capital enterprise that makes an equity investment in a non-listed small to medium-sized new/high tech enterprise for more than two years, 70% of its investment amount may be used to offset against the taxable income of the venture capital enterprise in the year after the holding period has reached two years. Any portion that is not utilised in that year can be carried forward and deducted in the following years.

### *Investment tax credit*

Enterprises purchasing and using equipment specified by the state for environmental protection, energy and water conservation, or production safety purposes are eligible for a tax credit of 10% of the investment in such equipment. Any unutilised amount can be carried forward and creditable in the following five years.

### *Other incentives*

There are also tax incentives in relation to the deduction of expenses and cost (e.g. 50% additional R&D deduction, shorter tax depreciation period, and accelerated depreciation). *See the Deductions section for more information.*

### *Foreign tax credit*

A TRE is allowed to claim foreign tax credit in relation to foreign income tax already paid overseas in respect of income derived from sources outside China based on a country-basket principle. The creditable foreign tax also includes foreign income tax paid by qualified CFCs. However, the creditable amount may not exceed the amount of income tax otherwise payable in China in respect of the foreign sourced income. In addition, there is a five-year carryforward period for any unutilised foreign tax.

## *Withholding taxes*

Foreign enterprises without establishments or places of business in China shall be subject to a unilaterally concessionary rate of withholding tax (WHT) at 10% on gross income from dividends, interest, lease of property, royalties, and other China-source passive income unless reduced under a tax treaty. Nevertheless, dividends distributed by a foreign investment enterprise out of its pre-2008 profit are still exempted from WHT.

WHT rates under China's tax treaties with other countries/nations are as follows (as of 1 June 2011):

| Recipient | Dividends (%) | Interest (%) (1) | Royalties (%) (2) |
|---|---|---|---|
| Albania | 10 | 10 | 10 |
| Algeria | 5/10 (3a) | 7 | 10 |
| Armenia | 5/10 (3a) | 10 | 10 |
| Australia | 15 | 10 | 10 |
| Austria | 7/10 (3b) | 7/10 (4a) | 6/10 |
| Azerbaijan | 10 | 10 | 10 |
| Bahrain | 5 | 10 | 10 |
| Bangladesh | 10 | 10 | 10 |
| Barbados | 5/10 (3a) | 10 | 10 |

Notes

- This table is a summary only and does not reproduce all the provisions relevant in determining the application of WHT in each tax treaty/arrangement.
- The former Czechoslovak Socialist Republic is divided into Czech Republic and Slovak Republic.
- The former Yugoslavia is divided into Bosnia, Croatia, Macedonia, Serbia, Slovenia, and Yugoslavia.
- There is no tax treaty signed between China and Bosnia and Serbia.

1. 0% is due on interest paid to government bodies except for Australia, Brunei, Cyprus, Israel, Slovenia, and Spain. Reference should be made to the individual tax treaties.
2. The lower rate on royalties applies for the use of or right to use any industrial, commercial, or scientific equipment.
3. The following notes apply to dividend WHT:
    a. The lower rate applies where the beneficial owner of the dividend is a company (not a partnership) that directly owns at least 25% of the capital of the paying company.
    b. The lower rate applies where the beneficial owner of the dividend is a company that directly owns at least 25% of the voting shares of the paying company.
    c. The lowest rate (i.e. 0%) applies where the beneficial owner is a company that owns directly or indirectly at least 50% of the capital of the paying company and the investment exceeding EUR 2 million. The lower rate (i.e. 5%) applies where the beneficial owner is a company that directly or indirectly owns at least 10% of the capital of the paying company and the investment exceeding EUR 100,000.
    d. The lower rate applies where the beneficial owner of the dividend is a company that directly owns at least 25% of the capital of the paying company.

   e. The lower rate applies where the beneficial owner of the dividend is a company that directly or indirectly owns at least 25% of the capital of the paying company.
   f. The lower rate applies where the beneficial owner of the dividend is a company that owns at least 10% of the voting stock of the paying company.
   g. The lower rate applies where the beneficial owner of the dividend is a company that directly owns at least 10% of the capital of the paying company.
   h. The lower rate applies where the beneficial owner is a company (other than a partnership) which directly owns at least 10% of the capital of the paying company.
4. The following notes apply to interest WHT:
   a. The lower rate applies to interest payable to banks or financial institutions.
5. The following notes apply to royalties WHT:
   a. The higher rate applies to trademarks.
   b. The higher rate applies to copyright of literary, artistic, or scientific work, including cinematograph films or tapes for television or broadcasting.
   c. The lower rate applies to royalties paid for technical or economic studies or for technical assistance.
6. These tax treaties have not yet entered into force as of 1 June 2011.

In addition to the above tax treaties, China has also entered into tax information exchange agreements with the following countries:

- Argentina.
- Bahamas.
- Bermuda.
- BVI.
- Guernsey.
- Jersey.
- Isle of Man.

## Tax administration

### Returns

The tax year commences on 1 January and ends on 31 December. Enterprises are required to file their annual income tax return within five months after the end of the tax year, together with an audit certificate of a registered public accountant in China. Information on related party transactions must be filed with the annual income tax return.

### Payment of tax

Enterprises are required to file and pay provisional income taxes on a quarterly or monthly basis within 15 days following the end of each month/quarter. Three options are available to the taxpayer in computing the provisional tax: (i) actual profits of the month/quarter, (ii) average monthly or quarterly taxable income of the preceding year, or (iii) other formulas approved by the local tax authorities.

Settlement of tax payment is due, in conjunction with the annual income tax return, within five months after the end of the tax year.

### Statute of limitations

For unintentional errors (e.g. calculation errors) committed by the taxpayer in its tax filing, the statute of limitation is three years and extended to five years if the amount of tax underpaid is CNY 100,000 or more. For transfer pricing adjustments, the statute of limitation is ten years. There is no statute of limitation for tax evasion, refusal to pay tax, or defrauding of tax payment.

### *Audit cycle*
There is no fixed audit cycle in China. Tax audit targets are selected pursuant to certain criteria.

### *Recent focus of Chinese tax authorities*
Since 2009, the Chinese tax authorities have strengthened their tax administration on transfer pricing and income derived by non-TREs. The SAT has released a number of tax circulars addressing the tax administration of transfer pricing, foreign contractors and service providers, WHT on passive income, etc.

In particular, the Chinese tax authorities have geared up their efforts in recent years to scrutinise investment structures involving intermediate holding companies incorporated in low tax jurisdictions. One of their focuses is on the indirect equity transfer of Chinese companies by non-TRE. The income derived by a non-TRE from the disposal of a non-Chinese company is not taxable under China's domestic income tax law. However, if the Chinese tax authorities are of the view that the non-TRE transferor has used an abusive arrangement to indirectly transfer the equity of the Chinese company (i.e. interposing and disposing of the special purpose vehicle for no reasonable commercial purpose, but just for avoidance of China withholding income tax), it may re-characterize the equity transfer based on the 'substance over form' principle and disregard the existence of the special purpose vehicle. Once the special purpose vehicle is disregarded, the transfer would be effectively a transfer of the underlying Chinese company's equity, and the transfer gain would be China source and subject to China withholding income tax.

In addition, the SAT has also released circulars relating to the claiming of treaty benefits by non-TREs and interpretation of certain articles and terms in the tax treaties, such as dividends, royalties, beneficial ownership, etc. Aggressive tax planning (including, but not limited to, tax-avoidance and treaty-abusive arrangements) not supported by reasonable commercial purposes and substance will be subject to scrutiny by the Chinese tax authorities.

On 26 July 2010, the SAT issued a Departmental Interpretation Note (DIN) for the tax treaty concluded between China and Singapore. It is the first time the SAT has introduced a set of technical views, interpretation, and practice guidelines for the implementation of a tax treaty in such a comprehensive manner. More importantly, this set of interpretation is also applicable to other tax treaties concluded by China if the provisions of the relevant articles in those tax treaties are the same as those in the China/ Singapore tax treaty. Thus, it is likely to have a wide impact to tax residents of other countries/regions which have entered into tax treaties with China.

### *General anti-avoidance rules (GAAR)*
There is a GAAR provision in the CIT law allowing the Chinese tax authorities to make adjustments to taxable revenue or taxable income where business arrangements, structures, or transactions are entered into without reasonable commercial purpose. The Chinese tax authorities may initiate GAAR investigation if they suspect that an enterprise undertakes any of the following arrangements: abuse of preferential tax treatments, abuse of tax treaties, abuse of corporate structure, use of tax havens for tax avoidance purposes, or other arrangements that do not have a reasonable commercial purpose.

## Other issues

### Choice of business entity

Foreign companies, enterprises, or individuals may, subject to approval from the Ministry of Commerce or other relevant ministries, establish equity joint ventures, contractual joint ventures, wholly foreign-owned enterprises, or representative offices in China. Certain foreign financial institutions, including banks and insurance companies, may, subject to approval, set up branches in China. As of 1 March 2010, foreign investors are allowed to establish foreign invested partnerships in China.

### Exchange controls

Foreign exchange transactions are administered by the State Administration of Foreign Exchange (SAFE) and its branches. The regulatory administration on foreign exchange transactions of an enterprise depends on whether the transaction is a current account item or a capital account item. Current account items refer to ordinary transactions within the context of international receipts and payments, including, but not limited to, balance of payments from trade, labour services, and unilateral transfers. Capital account items refer to items of increase or decrease in debt and equity due to inflow or outflow of capital within the context of international receipts and payments, including, but not limited to, direct investment, all forms of loans, and investment in securities. If a transaction falls under the category of capital account items, generally prior approval from the SAFE should be obtained. Generally, a payment that falls under the category of a current account may be remitted to overseas if supported with proper contracts, invoices, and tax payment/exemption certificates.

### Intellectual properties

Patents, trademarks, and copyrights are governed by separate laws and administered by separate governmental bodies. The government encourages the development and transfer of intellectual properties. The transfer of technology and technical services are currently exempted from business tax.

### Mergers & acquisitions (M&A) activities

Both Chinese domestic and foreign investors increasingly are using M&A transactions to establish or expand their Chinese operations.

The Ministry of Finance and the SAT jointly released a tax circular that addresses the CIT treatments for six forms of restructuring transactions, namely, change in legal form, debt restructuring, equity acquisition, assets acquisition, merger, and spin-off. The general principle is that enterprises undergoing corporate restructuring should recognise the gain/loss from the transfer of relevant assets/equity at fair value when the transaction takes place. However, if certain prescribed conditions are satisfied, the parties involved could opt for special tax treatments, which are essentially tax deferral tax treatment. In other words, recognition of gain/loss of the transferor from transfer of assets/equity can be deferred with respect to the equity-payment portion; and the transferee may take over the transferor's tax basis of the acquired assets/equity. Such special tax treatments are only available to a very few specific types of cross-border transactions.

## Significant developments

Colombia has signed double taxation treaties (DTTs) with Spain, Chile, Switzerland, Canada, and Mexico, the first two of which are in force as of 30 April 2010, while the others are still being finalised or awaiting the ratification process.

The equity tax originally due to expire in 2010 was rolled over into 2011 (accruing only once on 1 January 2011) at rates substantially higher than those that applied from 2007 through 2010, and the taxable base was reduced to net equity above 1 billion Colombian pesos (COP) (approximately USD 540,000). Additionally, a 25% surcharge to the ordinary equity tax was established, so that the equity tax that was 4.8% under the new rates was effectively 6% (for net equities exceeding COP 5 billion) and the equity tax that was 2.4% under the new rates was effectively 3% (for net equities between COP 3 billion and COP 5 billion).

The so-called 30% fixed asset super-deduction, which was enacted as an investment incentive, has been reduced to 0%.

As of 2011, law 1429 established that small companies (not exceeding USD 1,400,000 in total assets or 50 employees) initiating activities after the enactment of this law will be subject to income tax in the following way: 0% of the statutory income tax rate for the first two years, 25% of the statutory income tax rate for the third year, 50% of the statutory income tax rate for the fourth year, and 75% of the statutory income tax rate for the fifth year.

The stamp tax rate was reduced to 0% for documents executed as of 1 January 2010.

As of 2011, the tax reform introduced a rule over which the foreign tax credit on dividend income is enhanced to include a third-tier of credit availability, subject to specific ownership requirements.

The new tax bill established that the financial transactions tax will be reduced to 0.2% for year 2014 and 2015, to 0.1% for years 2016 and 2017, and to 0% for year 2018 and onwards.

## Taxes on corporate income

National companies (i.e. incorporated in Colombia under Colombian law) are taxed on worldwide income. Foreign companies and local branches of foreign companies are taxed on their Colombian-source income only. The current general corporate income tax (CIT) rate is 33%, which is a flat rate applied on taxable income. Taxable income is generally defined as the excess of all operating and non-operating revenue over deductible costs and expenses.

### *Minimum presumptive tax*

Corporate income taxpayers are required to pay a minimum amount of income tax, which is determined based on the so-called presumptive income method. Under this method, presumptive taxable income is measured as 3% of net assets (or tax equity) as of 31 December of the prior tax year as reported by the tax payer on the corresponding CIT return. The CIT rate is then applied to the greater of regular taxable income (revenue less allowable costs and expenses) or presumptive taxable income (exempting certain business activities).

In order to determine the taxable base for presumptive income purposes, it is necessary to subtract from the total amount of net assets, which is the base to calculate presumptive income, the following amounts:

- The net asset value of the shares owned in national companies.
- The net asset value of the assets affected by force majeure.
- The net asset value of assets associated with operations in unproductive periods.

Each year, taxpayers must compare the value resulting from the application of the foregoing two systems. The income tax for the taxable year will be calculated on the higher value resulting from this comparison. If presumptive income is higher than the ordinary net income, the difference constitutes an excess of presumptive income, which can be carried forward (adjusted for inflation) to any of the following five taxable years and offset against the net income determined by the taxpayer.

### *Stability Agreement Regime*

In an effort to continue to attract local and foreign investments, a 2005 law created a Stability Agreement Regime whereby taxpayers can, upon satisfaction of several requirements, agree with the government on a contract that any future adverse tax changes will not apply. However, to the extent changes are for the benefit of the taxpayer (i.e. income tax rate reduction), they will apply. In order to obtain a legal stability contract, an investor has to satisfy certain requirements, which include the payment of a premium of 0.5% or 1% on an investment commitment, the definition of which is a new investment or enhancement of an existing investment which is worth COP 3,862,500,000 or more.

## *Corporate residence*

Corporate residence is determined by the place of incorporation of any given company.

For income tax purposes, companies incorporated under foreign laws and which have their main domicile abroad are considered ‘foreign companies’, whereas any company incorporated in Colombia under Colombian law qualifies as a ‘national company’ even if fully owned by foreign shareholders.

### *Permanent establishment (PE)*

The concept of PE is not included under Colombian internal legislation for CIT laws. This concept is only relevant in the context of DTTs, and therefore, its applicability varies between one DTT to another one.

The concept of PE, in the case of the DTTs, follows the Organisation for Economic Co-operation and Development (OECD) criteria. In the case of Spain and Chile, the concept of PE therefore means a fixed place of business throughout which an entity carries out its activity, whether partially or in its whole.

Regarding the above, each DTT has exemptions for the incorporation of a PE.

## *Other taxes*

### *Value-added tax (VAT)*

The Colombian VAT taxes the sale in the country of any items of tangible personal property that are not fixed assets and are not covered by an exemption, the provision of services within the national territory (certain services supplied outside Colombia but imported also attract VAT), and the importation of tangible personal property that is not covered by an exemption.

The Colombian VAT is based on a credit-debit system throughout the entire chain of a business. However, certain products are only taxed at the manufacturer level (one-phase VAT). For purposes of VAT calculation, the VAT taxpayer may credit the VAT (input) paid to vendors (certain limitations apply) against any VAT (output) collected from customers.

The general VAT rate is 16%. However, certain services and goods are taxed at 10% (i.e. coffee, rice) and 20% (i.e. mobile phone services). Luxury goods attract higher rates within the range between 20% and 35%. Wines and other alcoholic beverages are not considered as luxury goods, but the applicable VAT rate is higher (ranging between 20% and 25%) than the general rate.

Under current law, there are VAT exemptions available for the following items, among others:

- Equipment and materials for the construction, installation, assembly, and operation of environmental monitoring and control systems.
- Imports of raw materials and supplies made under the so-called Vallejo Plan for further processing and incorporation into products that are to be subsequently exported *(see the Tax credits and incentives section for more information on the Vallejo Plan)*.
- Temporary importation of heavy machinery and equipment for basic industries (mining, hydrocarbons, heavy chemistry, the iron and steel industry, metallurgy, power generation and transmission, and the water industry).
- Importation of machinery and equipment, which is not produced in the country, for recycling and processing of waste and refuse.
- Regular imports by major exporters of industrial equipment, which is not produced in the country, for the transformation of raw material.
- Freight transportation.
- Public transportation of passengers in the national territory by water or land.
- Transportation of gas and hydrocarbons.
- Interest and other financial income from credit operations.
- Financial leasing.
- Medical care services.
- Public utilities.
- Internet services for low to mid-income residential customers.

A non-resident supplier of VAT-subject services does not require VAT registration. Rather, it is the locally-based recipient that must apply a reverse-charge. No VAT fiscal representation is allowed.

As of 2011, no VAT filings are required for periods where no inputs or outputs exist. An amnesty is granted for taxpayers who failed to file such VAT returns in the past, such that they will not be subject to late filing penalties if making the delinquent filings within six months following the enactment of the law.

### *Customs duties*
Imports, according to customs rules, consist of the entry of goods to the 'national customs territory' from the rest of the world, or from a free trade zone (FTZ), with the purpose of remaining permanently or temporarily in it for the achievement of a specific purpose.

The importation processes before the Colombian Internal Revenue and Customs Service (DIAN) can only be carried out by users registered in the Customs Information System, either Customs Agencies (previously called Customs Intermediation Companies) or Permanent Customs Users (UAPs). The latter may file their own customs declarations, as long as the value of the imported goods exceeds the sum of USD 1,000; otherwise, they must do it through the Customs Agencies.

According to the Harmonized System of Designation and Coding of Goods approved by the World Trade Organization (WTO), imported goods are classified into subentries composed of six digits. Also, two digits are added which are for exclusive use of the CAN, and two final digits which correspond to the digits for use of Colombia. The custom subentry, which is the ten digit result, is exposed in the Colombian Customs Tariff, which is governed by Decree 4589 of 2006, which also reflects the applicable tariff of each duty. VAT, which is also part of the customs duties, is regulated in the Colombian Tax Code.

The general VAT rate for the importation of goods is 16% and the general rate for custom duties is 5%.

### *Excise taxes*
There are some excise taxes for the consumption of beer and its derivates, wine, liquor and its derivates, and cigarettes and similar products.

The excise taxes are of municipal in nature. Therefore, the tax rates and applicable laws vary from one municipality to another.

### *Equity tax*
For taxable years 2007 through 2010, corporate income taxpayers were subject to an equity tax based on net equity held as of 1 January 2007, provided it amounted to COP 3 billion or more, at the annual rate of 1.2%. Net equity is generally defined as gross assets less allowable liabilities as reported on the CIT return.

The life of the equity tax was extended to 2011 for those taxpayers who held an amount of tax equity that was equal to or greater than COP 3 billion but less than COP 5 billion as of 1 January 2011, with the tax rate being 2.4%. Where the tax equity was equal to or greater than COP 5 billion, a 4.8% rate applied.

In order to collect funds to deal with the 2010 flooding disaster, the Government reduced the equity taxable base for 2011 to net equity above COP 1 billion (approximately USD 540,000). For taxpayers with net equity between COP 1 billion and COP 2 billion, the rate was 1%, and for taxpayers with net equity between COP 2 billion and COP 3 billion, the rate was 1.4%.

Additionally, a surtax of an additional 25% was established on net equity above COP 3 billion. This meant that the equity tax rate that was 4.8% was effectively 6% (for net equities exceeding COP 5 billion) and the equity tax rate that was 2.4% was effectively 3% (for net equities between COP 3 billion and COP 5 billion).

The 2011 equity tax is payable in eight equal instalments starting in 2011 through 2014. The 2011 equity tax is not deductible for CIT purposes and cannot be offset against any tax receivables.

It is important to establish that the applicable rate covers all of the net equity of the taxpayer. If, for example, a taxpayer has a taxable equity of COP 10 billion, the applicable rate will be 4.8% over the whole equity.

In addition to the above, it is important to mention that the taxable base for this tax is the amount of the net assets of the taxpayer as of 1 January 2010, excluding the net asset value of the shares held in Colombian companies. The date of accrual of the tax is 1 January 2011.

This tax is not deductible or creditable for income tax purposes, and it cannot be offset against any other taxes either. However, the law authorises taxpayers to charge this tax against the asset revaluation account, without affecting the income statement for the year.

### *Stamp tax*
The stamp tax rate was reduced to 0% for documents executed as of 1 January 2010.

### *Financial transactions tax*
The financial transactions tax is a permanent tax on financial transactions, the collection of which is the responsibility of regulated financial institutions and the Central Bank (Banco de la República).

The tax rate is 0.4%, and the taxable event is the carrying out of financial transactions that involve the disposal of resources deposited in checking or savings accounts as well as in deposit accounts with Banco de la República, and the issuance of cashier’s checks.

25% of the total tax paid is deductible for CIT purposes, regardless of whether or not the transactions have a causal nexus with the income producing activity of the taxpayer.

The law establishes a series of operations and transactions that are exempted from this tax.

The new tax bill established that the financial transactions tax will be reduced to 0.2% for year 2014 and 2015, to 0.1% for years 2016 and 2017, and to 0% for year 2018 and onwards. Currently 25% of this tax is deductible for CIT purposes; however, 50% of this tax will be deductible from 2013 onwards. Planning strategies such as payment to third parties using overdrafts, repos, buy/sell back transactions, or portfolio investments that did not trigger this tax, are not permitted.

### Property tax

The property tax is a municipal tax which is imposed on real property located in urban, suburban, or rural areas. It is levied on both improved and unimproved real estate. Therefore, the property taxpayers are the owners or holders of real property.

The taxable base of this tax is the current cadastral value of the property, as adjusted for inflation. In some cities, such as Bogotá, the taxable base is the value of the property as appraised by the taxpayer directly.

Property tax rates depend upon the nature and usage of the property, and generally range between 0.4%and 1.2%.

This tax is fully deductible for CIT purposes provided the same has a causal nexus with the income producing activity of the taxpayer (for example, where the tax is paid on rental property).

### Industry and trade tax

The industry and trade tax is a municipal tax that is imposed on revenue obtained from the exercise of industrial, commercial, or service activities in any Colombian municipal jurisdiction. It can be viewed as a special form of a turnover tax.

The industry and trade tax rates are determined by each municipality, and as a rule they range between 0.2% and 1%. All of this tax can be deducted for CIT purposes when effectively paid.

## Branch income

Branch income is taxed at the same rate as corporate income, which is 33%. A 7% remittance tax on branch profits was eliminated in 2007 but still applies to retained profits incurred prior to 2007.

## Income determination

### Inventory valuation

The value of inventories, which includes all expenses and direct and indirect charges necessary to put in a position to use or sale, must be determined using one of the following methods: first in first out (FIFO), last in first out (LIFO), specific identification, or weighted average. Special rules may authorize the use of other methods of recognized technical value.

### Capital gains

The general capital gains tax rate is 33%.

### Dividend income

The so-called double income taxation on corporate earnings was eliminated from the Colombian tax system many years ago. This means that shareholders of Colombian companies are, as a rule, not required to pay any income taxes on dividend distributions, but only to the extent that dividends are paid out from earnings that were taxed at corporate level prior to distribution. When the dividends are paid out from earnings that went untaxed at the corporate level, a foreign shareholder is required to pay income taxes on the dividends at 33% via a withholding tax (WHT) collected by the distributing company. Certain DTTs offer limited or full relief for the 33% income tax on dividends.

### *Interest income*

Interest income derived from activities in Colombia is considered part of the CIT base for Colombian entities; however, if interest is paid to a non-resident that is not compelled to file CIT in Colombia, a WHT is accrued over the payment or deposit at a rate of 33%, if the loan term does not exceed of one year, or 14%, if the loan term does exceed of one year.

Note that there are some special conditions derived from DTTs which decrease the WHT rate.

### *Royalties*

Royalties paid in favour of a Colombian entity are subject to taxes in Colombia; consequently, such royalty payments are part of the CIT base. If royalties are paid in favour of a non-resident (i.e. in favour of an entity that is not compelled to file CIT in Colombia), WHT is accrued over the payment or deposit at a rate of 33%.

### *Foreign income*

The following cases, among others, qualify as foreign-source income:

- Income obtained from external debt, if it complies with some requirements provided by law. Interest produced by this external debt is not taxed via CIT, and there is no WHT liability.

  Additionally, the expense derived from this concept will be 100% deductible.
- Income derived from technical services of repair and maintenance of equipment carried out abroad.

## *Deductions*

In Colombia, the customary costs and expenses of a business are generally acceptable as deductible expenditure for income tax purposes provided they are necessary, reasonable, and have been realised during the relevant tax year under the accrual method of accounting. Examples of common (and not so common) deductions include the items below.

### *Depreciation*

As a general rule, the acquisition cost of tangible fixed assets is fully depreciable for income tax purposes. The normal estimated useful lives are as follows:

| Asset | Useful life (years) |
|---|---|
| Buildings and pipelines | 20 |
| Machinery and equipment, office furniture, and fixtures | 10 |
| Vehicles and computer equipment | 5 |

The acceptable methods for the depreciation are:

- Straight-line: The straight-line method is the easiest and most commonly used method of depreciation by companies; it is calculated by dividing the value of the asset by the asset's useful life.
- Declining balance: The reducing balance method allows one to consider a certain depreciation percentage to depreciate the alignment machine rate annually. This method takes into consideration an accelerated rate of depreciation. This is useful for those assets in which a higher value is lost during the beginning years of usage.
- Any other method of recognised value in accordance with the opinion of the tax authorities.

Depreciation rates can be increased by 25% for each additional eight-hour shift of asset use (and pro rata for fractions thereof). When tax depreciation exceeds book depreciation, the taxpayer is required to establish a reserve equivalent to 70% of the difference. Recapture of depreciation on the sale of depreciated property is taxed at 33%.

### *Depletion*
Depletion is available under certain specific circumstances.

### *Amortisation of intangible assets*
Taxpayers can amortise, for income tax purposes, the cost of any acquired intangible asset over a period of five years, at a minimum, unless the taxpayer is able to prove that the amortisation period should be less because of the specific nature or conditions of the business.

### *Interest expenses*
Taxpayers are generally entitled to deduct any interest paid to financial institutions or to third parties.

### *Expenses incurred abroad*
As a general rule, the deduction of expenses incurred abroad which are not subject to WHT are limited to 15% of the taxpayer's net income. However, these expenses are fully deductible when they have to be capitalised under Colombian generally agreed accounting principles (GAAP).

### *Special deductible items*
Colombian income tax laws have established certain special deductible items, which include the following:

- 100% of the industry and trade tax and real property tax actual payments and 25% of the financial transactions tax actual payments are deductible.
- 100% of acquisition costs are available as a tax amortisation or depreciation base.
- 125% of the investments made in certain scientific and/or technological projects or in professional training projects of governmental, public, or private institutions of higher education are deductible. This deduction cannot exceed 20% of the taxpayer's net income as determined before subtracting the amount of the investment.
- 100% of the investments made for the control and improvement of the environment are deductible. This deduction cannot exceed 20% of the taxpayer's net income as determined before subtracting the amount of the investment.

### *Net operating losses*
Net tax losses (adjusted for inflation) incurred in 2007 or thereafter may be carried forward without limitation. There is no loss carryback provision. Certain limitations apply to the offset of losses transferred on merger reorganisations.

### *Payments to foreign related parties*
#### Royalties and similar charges
Royalties and the costs of exploitation or acquisition of all kinds of intangible property that are charged by foreign related parties are allowable as CIT deductions, provided that the corresponding WHT is collected at generally 33% (10% in the case of most DTTs). Other types of payments are subject to the general rules for expenses incurred abroad.

#### Management overhead expenses
Management overhead expenses paid to a foreign related party (e.g. the parent company) are deductible provided they meet the arm's-length test under transfer pricing regulations and provided the management services are real and are specifically related to the income producing activity of the local subsidiary which pays them. These expenses must also be carefully documented such that the local subsidiary can provide evidence to the authority of the fact that they are specifically related to its Colombian operations: to the planning and direction of the operations, the setting and implementation of management controls, the measurement of progress made toward specific business goals, the related financial results, etc. Where these services are supplied inside Colombia, a 33% WHT is also required to ensure deductibility.

#### Interest
Interest and related financial costs (including foreign exchange losses) paid to foreign related parties are deductible provided they meet the arm's-length test under transfer pricing regulations. Furthermore, interest and the related financial costs paid on short-term financing relating to imports of merchandise and raw materials directly supplied by foreign related parties are also deductible for income tax purposes. Interest paid to non-resident triggers WHT over the payment or deposit at a rate of 33%, if the loan term does not exceed of one year, or 14%, if the loan term does exceed of one year. However, only financial institutions registered with the Colombian Central Bank are permitted to extend loans into Colombia.

## *Group taxation*

Group taxation or group consolidation is not allowed for CIT purposes in Colombia.

### *Transfer pricing*
In Colombia, transfer pricing rules are applicable to the transactions performed by local taxpayers with foreign related parties. Thus, for CIT purposes, Colombian taxpayers must determine their income, costs, expenses, assets, and liabilities on the basis of prices and profit margins used in comparable transactions entered into with or between independent or unrelated parties.

In general terms, the rules related to comparability criteria, supporting documents, and advanced pricing agreements (APAs) follow international transfer pricing standards. However, they introduce a wide definition of 'related companies' for transfer pricing purposes, including subordination and individual or joint control exercised by a foreign parent company or by individuals located in Colombia or abroad.

The law presumes that transactions with foreign non-domiciled entities located in the so-called ‘tax havens’ are transactions performed with related parties and are subject to transfer pricing rules. However, the Colombian government has not yet issued the list of tax havens for these purposes, nor further regulations applicable to the payments made to such jurisdictions. Therefore, the Colombian tax rules related to tax havens are not yet applicable.

If (i) the gross equity (assets) of the local taxpayer on 31 December of each year is equal to, or higher than, the equivalent to 100,000 Tax Value Units (COP 2,513,200,000 or approximately USD 1,400,000) or (ii) the gross income obtained by the local taxpayer in a given year is equal to, or higher than, the equivalent to 61,000 Tax Value Units (COP 1,533,052,000 or approximately USD 852,000), it shall be required to prepare transfer pricing supporting documents (i.e. a transfer pricing study) and to file with the tax authority an informative return in connection with the transactions performed, during the corresponding year, with the foreign related parties.

If the local taxpayer does not file the supporting documents, it may be subject to fines equivalent to 1% of the total value of the transactions performed with related parties. This fine would not exceed the equivalent to 39,000 Tax Value Units (COP 980,148,000 or approximately USD 545,000).

### *Thin capitalisation*
There are no thin capitalisation rules applicable in Colombia.

## *Tax credits and incentives*

### *CIT exemptions*
As items of exempt income, the law has established the following:

- Income obtained by publishing companies from the publication of scientific and cultural books, until year 2013.
- The principal and interest (as well as related commissions and fees) paid pursuant to public foreign debt operations.
- Income from the sale of electric power generated from wind, biomass, or agricultural waste, for a period of 15 years, provided the seller issues and negotiates Greenhouse Gas Reduction Certificates.
- Income obtained from slow yield crops and plantations, including cocoa, rubber, palm oil, citrus, and other fruits.
- Income obtained from river transportation services with shallow draft vessels and barges, for a period of 15 years, starting in 2003.
- Income obtained from hotel services offered in new hotels that are built within 15 years counted from 2003, for a term of 30 years, until 2032.
- Income obtained from hotel services offered in refurbished or enlarged hotel facilities, where the related work is started within 15 years counted from 2003, for a term of 30 years.
- Income obtained from ecotourism services, for 20 years starting in 2003.
- Income obtained from investment in new forestry plantations, sawmills, and plantations of timber-yielding trees.
- Income obtained from new medicinal and software products developed in Colombia and protected under new patents registered with the authorities, with a high content of national research and technology, until 2013.

- As of 2011, the gain in trading derivatives that are qualified as securities will not be subject to CIT, provided that the underlying asset is stock traded in the Colombian stock exchange, indexes, or participations in funds tracking such stock.

### *Special CIT rate for free trade zones (FTZs)*
FTZ industrial users enjoy a special CIT rate. The so-called FTZ industrial goods users and industrial service users pay CIT at a reduced rate of 15% on income earned from their FTZ operations.

Note that capital gains are still taxed at the standard CIT rate of 33%.

### *Reduction to the statutory CIT rate for small companies*
Small companies (not exceeding USD 1.4 million in total assets or 50 employees) initiating activities after 1 January 2011 are subject to CIT at the following reduced rates: 0% of the statutory CIT rate for the first two years, 25% of the statutory CIT rate for the third year, 50% of the statutory CIT rate for the fourth year, and 75% of the statutory CIT rate for the fifth year.

### *Reduction of payroll fees for small companies*
Small companies (not exceeding USD 1.4 million in total assets or 50 employees) initiating activities after 1 January 2011 are subject to payroll fees at the following reduced rates: 0% of the payroll fees for the first two years, 25% of the payroll fees for the third year, 50% of the payroll fees for the fourth year, and 75% of the payroll fees for the fifth year.

### *Tax credit on payroll fees paid*
A tax credit is granted to employers hiring employees under 28 years old; women above 40 years old; low-income workers earning less than 1.5 times the minimum monthly wage (approximately USD 420); and disabled, reintegrated (from armed conflict), or displaced (as victims of armed conflict) workers, subject to certain requisites and time limitations (two to three years).

### *Interest amnesty*
An amnesty of 50% of interest derived from tax obligations of fiscal year 2008 and previous years is granted, provided that the tax and applicable penalties are settled by the taxpayer.

### *Vallejo Plan for raw materials*
The Vallejo Plan allows for the total or partial suspension of customs duties upon receipt, within the national customs territory, of specific goods destined to be totally or partially exported within a certain period of time, after having undergone transformation, manufacture, or repair, including the materials needed for these operations. Under the Vallejo Plan, machinery, equipment, and spare parts may also be imported, to be used partially or entirely in the production and sale of goods and services destined for export. The goods so imported remain under restrictions of sale.

### *Foreign tax credit*
Foreign income taxes are creditable, subject to certain limitations. Generally, the amount of the credit cannot exceed the Colombian CIT rate. DTT's provide for more comprehensive credit systems as well.

As of 2011, the tax reform introduced a rule over which the foreign tax credit on dividend income is enhanced to include a third-tier of credit availability subject to specific ownership requirements.

A third-tier of credit means that before the tax reform, Colombian entities could only claim as a tax credit the taxes paid by a company in which it had a direct investment. However, as from the enactment of this reform, Colombian entities can claim a tax credit not only for taxes paid by a company in which it has a direct investment, but also for taxes paid by a company in which it has an indirect investment.

As an example, Colombian entity (A) used to be able to take as a tax credit only the taxes paid by a company (B) in which the company (A) had a direct investment, but not the taxes paid by a company (C) in which the company (B) had an investment. However, as of January 2011, the company (A) can take both the taxes paid by the companies (B) and (C), as long as some specific requirements are met.

## *Withholding taxes*

The Colombian tax system provides for WHT as a general mechanism of advance tax collection. Under the law, as a general rule, all corporate entities are required to collect or withhold taxes from payments made to third parties. The WHT collection agents must collect the applicable WHT amounts, deposit the withheld amounts with the authority, file monthly WHT returns, and issue WHT certificates to the payees. The payees who are also CIT return filers credit the withheld taxes against the annual CIT liability computed on their returns.

As noted above, foreign non-resident persons are taxed on their Colombian-source income only. Generally, the full tax liability accruing on payments made to foreign non-resident persons is satisfied via the collection of the applicable WHT. The WHT rate on payments made to foreign non-resident persons for taxable dividends, royalties, and taxable interest is 33%. On payments made for consulting, technical assistance, and technical services the WHT rate is 10% (whether supplied inside or outside Colombia). On payments made for software licences, the WHT rate is 26.4%.

On other types of payments which give rise to Colombian source income, the general WHT rate is 14%, with the foreign non-resident payee being required to file a CIT return in Colombia to report the final CIT liability, at 33% of net income (and being entitled to a refund where the final liability is less than the amount withheld at the 14% rate or being required to pay the deficit should the case be the opposite).

As of 2011, WHT returns do not need to be filed where there are no taxes to declare or pay. An amnesty is granted for taxpayers who failed to file such returns in the past, such that they will not be subject to late failing penalties if making the delinquent filings within six months following the enactment of the law.

### *Offsetting of WHT*

WHT returns filed on a non-payment basis will be treated as not filed, except if the filer has a refundable tax credit balance over USD 1,065,000 to offset the outstanding payment. A six-month deadline applies for the taxpayer to apply the offsetting of the credit balance. Otherwise, late filing penalties will apply.

### *Self-withholding on some exports*

The tax reform granted an authorisation to the Government to establish up to a 10% self-WHT on exports for the mining, oil, and gas industry. The self-withholding would be creditable against the CIT liability.

### Exempt interest

As of 2011, the interest payments abroad on loans or cross-border leasing agreements, formerly not subject to WHT if the debtor's activities were deemed of interest for the economic and social development of the country, are now subject to a 14% WHT, if the loan term exceeds one year. If the loan or cross-border agreement has a term not exceeding one year, a 33% WHT is triggered.

A grandfather rule was provided for loans and leasing agreements executed before 31 December 2010.

### Summary chart

| Type of payment | WHT rate (%) |
|---|---|
| Dividends | 33 |
| Royalties | 33 |
| Taxable interest | 33 |
| Royalties on software licences | 26.4 |
| Technical assistance, consulting, and technical services | 10 |
| Other types of payments | 14 |

## Tax administration

### Tax returns

For income tax purposes, the taxable period is the calendar year, with no exceptions being admissible.

Income tax return filing due dates are set by the government every year. Usually they fall in the month of April; but for the case of the large taxpayers, the filing due dates are usually in February.

### Payment of tax

For CIT purposes, corporate taxpayers are divided into 'large taxpayers' and 'other taxpayers'. Large taxpayers pay their estimated outstanding CIT liability (outstanding after deducting applicable WHT from the estimated final liability) in five instalments over the year in which they file their annual CIT return. The due date varies according to the last digits of its NIT (Number of Tax Identification).

Other tax payers pay their estimated outstanding CIT liability in two instalments over the year in which they file their annual CIT return. The due date varies according to the last digit of its NIT.

### Statute of limitations

The statute of limitations is generally two years following the actual filing of the return (a longer or shorter statute of limitations applies in certain cases).

A method to reduce the statute of limitations was due to expire in 2010 but was rolled over into years 2011 and 2012. This benefit enables one to reduce the statute of limitations of a CIT return if the CIT liability increases by a given number of times inflation with respect to the former year. The ordinary 2-years statute of limitations may be reduced to: 18 months if the CIT liability increases by five times inflation, 12 months if the CIT liability increases by seven times inflation, and 6 months if the CIT liability increases by 12 times inflation.

## Other issues

### Choice of business entity

The most common type of company used in Colombia since the beginning of 2009 has been the so-called simplified stock company or simplified corporation, known as a SAS (sociedad por acciones simplificada). Besides SAS, foreign investors also use branch offices of an offshore entity as their investment vehicles in Colombia.

As a general rule, from a high-level perspective, there are no mayor differences between a branch office and a subsidiary (such as a SAS), as far as Colombian taxation is concerned, other than the taxation regarding dividends or profits.

However, the following is a chart explaining the main differences between a branch and a subsidiary in Colombia.

| Tax | Subsidiary in Colombia | Branch of a foreign entity |
|---|---|---|
| CIT | Colombian companies are subject to CIT on their worldwide income at a rate of 33%.<br><br>The CIT base applicable to Colombian companies is, as a general rule, the ordinary net taxable income determined by subtracting from the gross income of the corresponding taxpayer the cost and expenses allowed by the tax laws; however, Colombian law establishes a minimum taxable base called 'presumptive income' which is equivalent to 3% of the net equity (i.e. the result of subtracting the liabilities from assets) of the taxpayer on 31 December of the previous taxable year.<br><br>The CIT of a taxpayer must be determined based on the presumptive income if the ordinary taxable income of the corresponding year, determined according to the ordinary or normal rules, is lower than the presumptive income.<br><br>In addition, please bear in mind that related party liability is not allowed, except when a DTT applies. | Branches of foreign companies are taxed only on their Colombian-source income. The rate at which branches pay income taxes is the general CIT rate of 33%.<br><br>The presumptive income rule applicable to Colombian companies is applicable to the branches of foreign entities as well. |

| Tax | Subsidiary in Colombia | Branch of a foreign entity |
|---|---|---|
| Income tax on dividends or profits | Dividends received by foreign non-domiciled entities (which would be the case of the foreign shareholders of the local company) are not subject to income tax withholding, provided that such dividends correspond to profits subject to income tax at a corporate level. If such dividends correspond to profits that would have been subject to taxation if distributed to a Colombian resident (profits not taxed at the corporate level), they shall be subject to a 33% income tax withholding on the amount paid.<br><br>In addition, please bear in mind that Colombia has DTTs with Spain and Chile that are currently in application. Under these treaties, the dividends or profits shall not be levied in Colombia or will be levied with a lower WHT rate.<br><br>The taxes applicable to dividends received by foreign non-domiciled entities must be withheld on the basis of the total amounts distributed or accrued.<br><br>Please be advised that foreign non-domiciled entities are not required to file Income Tax returns in Colombia if their entire income was subject to the withholdings provided in articles 407 to 411 of the Colombia Tax Code (which refer to dividends, among other concepts). Therefore, if the entire income obtained by the foreign shareholders of the local company corresponds to dividends remitted by the company, and the applicable withholdings are duly performed, they would not be required to file Income Tax returns for the relevant periods. | In the case of profits obtained through a branch, please note that such profits are not considered as dividends and Colombian law does not provide for an income or remittance tax applicable to the transfer of profits from a branch to its main office. Therefore, if the profit obtained by a branch is not subject to income tax in Colombia at the branch level, the profit may be remitted abroad to the home office without the payment of any additional tax in Colombia. |
| WHT | As a means to collect income taxes in advance, the Colombian law establishes a system of tax withholdings that requires every person making payments to a taxpayer to withhold a certain percentage depending on the concept being paid. For those who must file an income tax return, all amounts withheld are a prepayment of the final tax liability and, as such, are credited on their return.<br><br>The withholding agent must file every month a WHT return.<br><br>Please bear in mind that technical services, technical assistance services, and consultant services rendered by a foreign non-domiciled entity are subject to 10% income tax withholding, regardless of the place in which the service is rendered, in Colombia or abroad. | Applies exactly the same WHT described for a subsidiary as for the branch of a foreign entity. |

In conclusion, as per Colombian law, there are no substantial differences between the fiscal treatment of a subsidiary or a branch, apart from the tax implications for the payment of dividends and territorial source of taxation.

All the taxes discussed in this summary would apply equally to a branch operation or a subsidiary operation. However, from a commercial perspective, and specifically from the perspective of corporate liability, operating through a branch office means that the head office is exposed to direct liability for all the obligations of the branch, tax obligations included. Operating through a subsidiary means that only the subsidiary is liable for its obligations as a general rule, that is to say that the shareholders are not liable for company obligations. Of corporations, the advisable choice would be a SAS, which is very flexible in nature, easy to incorporate, and can be held by one single shareholder (regular corporations require a minimum of five shareholders).

## Significant developments

There have been no significant corporate tax developments in the Democratic Republic of Congo (DRC) during the past year.

## Taxes on corporate income

Corporate income tax (CIT), known as impôt sur les bénéfices et profits in the Democratic Republic of Congo, is paid on profits realised by a company which carries out any operational activity in the country.

The Democratic Republic of Congo taxes resident corporations on a territorial basis.

Foreign-sourced profits (e.g. dividends received from a foreign subsidiary, for instance) are exempt from corporate tax.

The CIT rate is currently 40% (30% for mining companies), with a minimum tax of 0.1% of the yearly turnover. Note that the minimum tax cannot be less than 2,500 US dollars (USD). Also note that turnover includes all profits and interest received, in essence any credits on the income statement which have the nature of income or gain.

## Corporate residence

Non-resident companies that carry out an activity in the Democratic Republic of Congo are taxable on profits they realise through permanent establishments or fixed establishments located in the Democratic Republic of Congo.

### Permanent establishment (PE)

A non-resident company is deemed as having a PE in the Democratic Republic of Congo in either of the following cases:

- It has a material place of business (e.g. head office, branch) or any other fixed or permanent installations producing revenues in the DRC.
- Without having a material place of business, it carries out a professional activity under its own name during a period of at least six months, insofar as such an activity cannot be considered as a technical assistance to a local company.

## Other taxes

### Tax on rental income

Rental income related to buildings, houses, offices, premises, warehouses, etc. is taxed in the Democratic Republic of Congo at the rate of 22%.

In order to secure the payment of this tax, the tax code has put into practice a withholding tax (WHT) system. The tenant is liable to withhold 20% of the rentals paid and to remit this tax to the authorities.

## Branch income

Tax rates on branch profits are the same as on corporate profits. However, the costs incurred abroad by the head office of the branch are not deductible in the Democratic Republic of Congo, and the branch is liable for taxation of deemed distributed profits on top of the CIT. On profits realised, a branch will pay both the 40% CIT and a 20% tax based on 50% of the net profits after deduction of CIT.

## Income determination

Taxable income consists of profits from any industrial, commercial, agricultural, or real estate operations entered into by the taxpayer in the Democratic Republic of Congo, as well as any increases of assets invested as a result of such activities and any increases derived from capital gains either realised or not, of any nature and origin.

To arrive at taxable income, the taxpayer may deduct all costs actually incurred in the production of income of the company during the year, such as:

- Rents actually paid and rental expenses linked to buildings or parts of buildings used in the exercise of the activity and any overheads derived from their maintenance, lighting, etc.
- Overheads costs, from maintenance of furniture and equipment used in connection with the company's activities.
- Wages, salaries, bonuses, and allowances of employees and workers used in the operation, as well as benefits in kind if these have been added to remunerations paid.
- Depreciation of fixed assets used in the company's operations.
- Interest costs on funds borrowed from third parties and invested in the company's operations and similar type expenses, such as annuities or fees related to the operation.

Please note if the borrower is a private limited company (Société Privée à Responsabilité Limitée or SPRL) and if the lender is one of its shareholders, the interests on loan paid are not deductible from the CIT basis.

## Deductions

Professional expenses directly related to the acquisition of income are tax-deductible.

The following are examples of expenses which may not be deducted to arrive at taxable income:

- Expenses of a personal nature, such as accommodation, school fees, leave indemnities, and any other expenses not necessarily incurred in the business.
- Income tax.
- Legal or administrative fines of any nature.
- Expenses linked to rental properties as a landlord as well as related depreciation expenses.
- Any kind of provisions (e.g. for taxes, for bad debts).

### *Net operating losses*

Tax losses can be carried forward for the next five years following the tax loss year; however, the losses must be deducted from the first year of tax profits of the company.

There is no carryback loss regime in the Democratic Republic of Congo.

A company may get audited up to five years after submission of a tax return. In practice, there is a tax audit every year.

### *Payments to foreign affiliates*

In respect of payments made by a local company to a foreign company for services (e.g. management services, technical assistance services), such expenses are deductible provided that:

- the services rendered can be clearly identified
- the services cannot be rendered by a local company, and
- the amount paid for the service is not overstated and is commensurate to the nature of the service itself.

Technical assistance/management services must be clearly formalised in an agreement, including the modalities of calculation of the corresponding fees payable.

## *Group taxation*

There is no group taxation regime per the DRC tax legislation.

### *Transfer pricing*

Transfer pricing rules are limited to the following provisions:

- Interests on loans are not considered as deductible expenses for the borrower, provided that it is an SPRL (Private limited company) and that the lender is a shareholder.
- Where a local company is directly or indirectly controlled by a foreign company, any abnormal advantage given to the latter is considered as an indirect distribution of profits and is then added back to the profits of the local company.
- In respect of payments made by a local company to a foreign company, for services (management services, technical assistance services), the Tax Code provides that such expenses may be deductible if (i) the services rendered can be clearly identified, (ii) the services cannot be rendered by a local company, and (iii) the amount paid for the service is not overstated and is commensurate to the nature of the service itself.

### *Thin capitalisation*

There are no thin capitalisation rules in the DRC tax legislation.

## *Tax credits and incentives*

The Investments Code allows for a certain number of tax, customs, and general order measures designed to favour direct investments. The preferential tax treatment measures of the Investments Code apply to direct investments and/or to entities that carry them out.

The regime of the Investments Code does not apply to numerous sectors, notably:

- Mining and hydrocarbon.
- Banking and insurance.
- Trade.

In order to take advantage of the provisions of the Investments Code, the following conditions must be fulfilled by the investor:

- The investor must be a Congolese legal entity.
- The investment must be at least USD 200,000.
- The investing company must comply with the rules and regulations relating to environment.
- The investing company must undertake to train local personnel in technical and executive duties.
- The investing company must undertake to create an added value of 35% of its initial investment (within a stipulated time period to be agreed).

The application file is examined by the National Agency for the Promotion of Investments in the Democratic Republic of Congo (ANAPI) and then sent to the Minister of Finance, who decides on the grant of the advantages foreseen in the Investments Code to the applicant, by the way of a Ministerial Order.

### *Tax holiday*
The Investments Code grants appointed investors an exemption of corporate tax during the investment period, which is determined by the location of the investments: three years in Kinshasa, four years in Lubumbashi or Kolwezi, and five years in Katanga.

## *Withholding taxes*

The following payments are subject to a WHT in the Democratic Republic of Congo:

- Dividends paid by a local company to its shareholders.
- Royalties.
- Interest on funds borrowed for business purposes. Note that if the interest is paid to a local company, the WHT does not apply since the interest is included in the taxable income of the company charging such interest.

The Democratic Republic of Congo has not entered into a double tax treaty with any other nation, so it is impossible to get any WHT reimbursed.

### *WHT rate and payments*
The rate of WHT is 20%, which is based on the gross amount of sums paid.

If the payee does not withhold the tax from the amount invoiced and pays the tax of 20% directly, then the tax authorities consider that the basis of the 20% tax is composed of the amount invoiced plus the amount of the tax.

Consequently, in the case that the DRC company takes in charge the corresponding WHT, the WHT rate will be 25% (20/80) and the amount of tax will not be tax-deductible.

For royalties, the WHT is charged on the net amount of the royalties paid. The tax authorities consider that the net amount of royalties is calculated by deducting 30% from the royalties invoiced (i.e. the taxable basis will be 70% of the royalties invoiced).

Mining companies are, under certain conditions, exempt from WHT on interest paid and are subject to just a 10% WHT on dividends paid to their shareholders.

## *Tax administration*

### *Returns*

The yearly CIT return is due by 31 March of the following year.

### *Payment of taxes*

Final payment of CIT is required when submitting the yearly tax return, which is due by 31 March of the following year.

CIT is payable in local currency through a DRC bank account by a wire transfer to the bank account of the Public Treasury. Consequently, in order to operate in the Democratic Republic of Congo, the opening of a bank account in a DRC bank is mandatory. Moreover, the tax authorities require the bank account number of the applicant in order to grant a taxpayer number.

The collection of CIT is on an instalment basis or by way of prepayments (depending on taxpayer type).

#### Instalments of corporate tax

Instalments, in respect of CIT, apply to taxpayers who come under the supervision of two specific kinds of tax departments: the Directorate General (DGE), the department of the tax authorities in charge of the most important taxpayers, and the Centre des Impôts (CDI), tax centres.

These taxpayers have to pay two instalments each representing 40% of the CIT paid during the previous fiscal year (including the amounts assessed by the tax authorities). This, therefore, totals 80% of the CIT actually paid in the previous year. The first instalment must be paid before 1 August, and the second instalment before 1 December. Both payments are offset against the final CIT due for the fiscal year. The balance is paid when the tax return is submitted.

#### Prepayments of corporate tax (Précompte BIC)

Prepayments of CIT are to be paid by taxpayers (excluding those under the supervision of DGE and the CDI) in respect of import and export activities by wholesalers and on the settlement of invoices relating to provisions of services or for building works.

Prepayments of CIT are withheld at source and collected by:

- the customs authorities, L'Office des Douanes et Accises (OFIDA), for imported and exported goods
- local manufacturers, wholesalers or semi-wholesalers, and beneficiaries for services rendered, and
- customers or contracting authority for building works on the settlement of the invoices.

Amounts withheld at source must be remitted monthly to the tax authorities and are creditable against the final CIT to be paid at the end of the fiscal year by the importer, exporter, service provider, etc.

The prepayment rate is 1%, which is based on the invoice value.

## Significant developments

Further to the promulgation of the 2011 Finance Act on 29 December 2010, the following new tax measures for companies have been introduced and are effective as of 1 January 2011.

- The corporate income tax rate is now at 35% (previously 36%).
- A favourable taxation regime has been implemented for headquarters operations of foreign companies.
- Pre-existing tax regulations have been codified. They relate to Congolese registered companies that earn at least 70% of their income from activities with oil sector companies and are subject to the simplified tax regime. These companies can revert to the general taxation regime during the fiscal year following which their total income from oil sector companies became less than 70%.
- Non-resident companies are now obligated to appoint a tax representative in the Republic of Congo.
- Insurance contracts may now be registered free of charge.
- Legal regularisation of the date for declaration and monthly payment of tax on insurance contracts has been set to the fifteenth day of every month.
- Registration of contracts of sub-contractors in the public works sector shall be at a fixed rate of EUR 155.44.
- Registration of private commercial contracts shall be at the rate of 1% of the amount of the transaction, due within three months from the date of signature.
- The value-added tax (VAT) deduction principle for taxpayers not exclusively carrying out transactions giving right to VAT has been revised.
- The excise duty is now at the rate of 25%, (previously 24%).
- The National Fund for Housing tax is now at 1% (previously 2%).

## Taxes on corporate income

The majority of corporate income tax (CIT) provisions in the Congolese General Tax Code arise from the implementation, under Congolese law, of Central African Economic and Monetary Community (CEMAC) Regulation No. 02/01/UEAC-050-CM-06, which revised the Act No. 3/72-153-UDEAC dated 22 December 1972.

### Tax rates

The standard CIT rate in the Republic of Congo is 35%, with certain exceptions. Prior to 1 January 2011, the standard CIT rate was 36%.

The minimum tax payable is 1% of the annual turnover and cannot be less than 1,524.49 euros (EUR) (EUR 762.25 if annual turnover is less than EUR 15,244.90).

A 2% minimum tax is payable by companies showing losses during two consecutive fiscal years. The 2% rate is applied to the sum of gross turnovers and products and benefits realised by the company in the most recent year in which it earned a profit. The 2% tax is not deductible for CIT purposes. However, in a company's first profit-making year after incurring the losses, half of the 2% tax is deductible.

A 20% withholding tax (WHT) is imposed on income sourced in the Republic of Congo that is derived by foreign companies not necessarily engaged in activities in the Republic of Congo.

### *Industry specific rates*

The CIT rate for agricultural companies is 25%.

A tax rate of 30% applies for:

- property companies
- revenues resulting from leasing or occupation of built or empty lands received by public establishments and non-profit making organisations
- revenues resulting from capital assets that are not subject to tax on securities received by public establishments, non-profit-making organisation, or communities.

A tax rate of 35% is applied on a deemed profit equal to 22% of the total gross remuneration (i.e. an effective tax rate of 7.70% of the taxable turnover made in the Republic of Congo) derived from services rendered by:

- foreign companies that qualify for this simplified tax regime
- local companies and branches that realise more than 70% of their annual turnover with oil companies and oil services companies (in this case, the deemed profit tax is regarded as an advance payment of CIT levied at the rate of 35% on net profits).

Note that these companies would revert to the general taxation regime the year after which the turnover realised with oil and gas sector companies became less than 70%.

### *Headquarters operations of foreign companies*

The headquarters operations of foreign enterprises taxation regime is subject to prior approval by the tax authorities.

If enacted, headquarters operations of foreign enterprises and international groups will be granted a favourable tax status in the Republic of Congo. For those that qualify, corporate income tax is charged on a deemed profit equivalent to a prescribed percentage of headquarters expenses. The percentage of which is currently unknown.

To qualify, the headquarters must be registered under the form of a public limited company or branch and must act solely for the benefit of the group in the area of management, control, or coordination.

### *Global flat taxation*

The global flat tax was previously at the rate of 8% and is now at 10%. It is calculated on the annual turnover of small and medium size enterprises taxable under the flat rate regime, whose turnover does not exceed EUR 60,980.

# Congo, Republic of

## Corporate residence

### Resident companies

Congolese registered companies are taxed on the territoriality principle. As a result, Congolese companies engaged in business outside of the Republic of Congo are not taxed in the Republic of Congo on the related profits.

### Non-resident companies

In the absence of a tax treaty stating otherwise, a non-resident company is liable for CIT on income realised in the Republic of Congo or derived from or resulting from work / services of any nature supplied or used in the Republic of Congo.

## Other taxes

### Value-added tax (VAT)

Under the provisions of the VAT Law No. 12-97 dated 12 May 1997, all economic activities conducted in the Republic of Congo are subject to VAT, regardless of their purpose, profitability, or the legal status of the business performing them, and irrespective of whether these activities are habitual, occasional, or originate in the Republic of Congo or from a foreign country. Therefore, any person, natural or legal, engaged in an industrial, commercial, or professional activity is subject to VAT unless specifically exempt by law.

Section 8 of the VAT law states a service is considered as provided in the Republic of Congo when the service is used or exploited in the Republic of Congo.

The Congolese VAT rate is 18%. In addition to VAT, there is a sales tax (surtax) calculated at the rate of 5%, applied to the amount of VAT, which must be invoiced and paid at the same time as the VAT. Therefore, the VAT rate is globally 18.9%. The surtax is not deductible (final cost).

In principle, an entrepreneur is entitled to credit the VAT paid on purchases of goods, equipment, and services for use in business (input VAT) against the total of the tax charges to one's customers for deliveries made and services rendered (output VAT).

Taxpayers not exclusively carrying out transactions giving rise to a VAT deduction shall deduct VAT proportionally on the portion of the income pertaining to taxable transactions and not a flat rate as was previously the case.

A VAT return must be filed on a monthly basis before the fifteenth of every month.

### Business tax and accessory taxes

The business tax ('patente', in French) is a tax collected by local communities. This tax, paid during the first three months of every year, includes both a fixed and variable fee depending on the specifications of the profession. The principal amount of the tax is increased with 'additional centimes', 'communal centimes', and 'contributions to the National Investment Fund' (accessory taxes).

Business tax is paid by traders and professionals. It is imposed on most commercial, industrial, and professional enterprises (including branches of foreign enterprises), although some traders are exempt. The business tax is charged on the actual or deemed annual rental value of the tangible assets of the enterprise, on the power of the machines, and on the average number of employees.

Any new taxpayer undertaking an activity requiring a trading licence must declare it in writing to the tax administration within 15 days following the start of the business. For the first tax year, the business tax is paid on the basis of the date on which the business started (i.e. the tax is due from the first day of the quarter during which the business started).

### Computer royalty

The 2003 Finances Act instituted a computer royalty, to cover expenses incurred by the Customs Administration on computer data processing, applicable without exception or exemption to all importation and exportation of goods. The royalty applies on the customs taxable value of any imported or exported goods in the Republic of Congo. The rate is fixed at 2%, as per the 2010 Finances Act.

### Oil and gas

Specific rules and caps apply for the upstream (production) oil and gas industry.

### Customs duties

When applicable, import duties are payable at rates ranging from 5% to 30% on the customs value of imported goods. Customs value is calculated on the cost, insurance, and freight level (CIF).

### Customs duties rates

| Group | Rates (%) |
|---|---|
| Basic necessities | 5% |
| Raw materials and capital goods | 10% |
| Intermediate and miscellaneous goods | 20% |
| Consumer goods | 30% |

### Additional entry taxes

Additional entry taxes apply on the importation of goods, such as:

- CEMAC integration tax: 1% on CIF value.
- Statistic tax: 0.20% on CIF value.
- Organisation for the Harmonisation of Business Law in Africa (OHADA) contribution: 0.05% on CIF value.
- Economic Community of Central African States (CEEAC) contribution: 0.04% on CIF value.

### Rent tax

Rent tax is payable annually on the rental of built property. It also applies on non-built property for business purposes. The rent tax is imposed on the occupant of the premises (whether the occupant is the owner, a tenant, or a subtenant).

The rent tax, which is equal to one-twelfth of the rents due within a year, is due annually on or before 28 February. For new lease agreements, the rent tax is due within three months of the effective date of the lease agreement and is calculated as a proportion of the rents due until the end of the year.

The rent tax is paid by the tenant on behalf of the owner, or by the subtenant on behalf of the tenant. The tenant / subtenant has the legal obligation to pay this tax on behalf of the lessor. Tenant and subtenants make a once-a-year deduction between 1 January and 30 April of the same year from all the rents due to the owner.

A 50% fine, assessed on the amount of the tax, is due for any late payment of the rent tax.

### *Registration fees and stamp duties*

Lease agreement registration fees amount to 5% of the value of the annual rent paid during the tax year, including premises charges if any (Article 18 of the Congolese General Tax Code, Part II, Book I). 'Additional centimes' also apply at a 5% rate of the registration fees. Stamp duties and registration fees should be paid for the total duration of the lease agreement. In the case where the lease agreement is renewed, stamp duties and registration fees should be paid for the renewable period.

Stamp duty ranges from 200 CFA francs BEAC (XAF) to XAF 20,000 on certain documents.

Examples of documents that are subject to stamp duty include:

- Letters of agreement and other letters, which are prepared for use as evidence of act, fact, or condition of civil nature.
- Notarial deeds and their copies.
- Visas and flight tickets.

The following fees for the registration of contracts are due within three months from date of signature:

- Private commercial contracts (as opposed to public commercial contracts) at the rate of 1% on the estimated amount of the transaction.
- Purchase orders for public contracts at the rate of 2% for contracts with a value exceeding EUR 15,240.
- Subcontracts in building construction and public work sector at a fixed fee of EUR 155.44.
- Insurance contracts are registered free of charge.

Prior to the Finance Act of 2011, tax on insurance contracts were registered during the first thirty days of a quarter, being either 30 January, 30 April, 30 July, or 30 October. Now, insurance contracts shall be registered and tax on insurance paid on the fifteen day of the month following the insurance subscription.

Transfer of company shares are subject to a 5% registration fee.

### *Land tax on built properties*

Land tax is payable annually on built properties and is due from the owner. However, properties built for the purpose of accommodation are exempt for ten years, and properties built for business purposes are exempt for five years. The effective rate is determined every year by the local council.

The land tax is levied on the rental value after a deduction of 25% (decline, maintenance, and repair expenses) for properties built for business purposes. The land tax is levied on the cadastral value after a deduction of 25% (decline, maintenance, and repair expenses) for properties built for accommodation purposes.

### *Land tax on non-built properties*

Land tax is payable annually on non-built properties and is due from the owner. However, properties intended for plantations and breeding are temporarily exempt for a three to ten year range. The effective rate is determined every year by the local council.

The land tax is levied on 50% of the cadastral value, determined every year by the Ministry of Finances. The land tax is arbitrarily assessed by hectares in rural areas according to the nature of the plantations.

## Branch income

Tax rates on branch profits are the same as for domestic corporations. No tax is withheld on transfers of profits to the head office.

## Income determination

### Determination of income

Taxable income is based on financial statements prepared according to generally accepted principles and the standard statements of the Organisation for Harmonisation of Business Law in Africa (OHADA) treaty.

Business expenses are generally deductible, unless specifically excluded by law.

### Capital gains

Capital gains are treated as ordinary business income and are taxed at the standard CIT rate of 35%. However, a capital gain realised on the disposal of a fixed asset in the course of trading is excluded from income for a period of three years if the taxpayer reinvests the gain in new fixed assets for the business.

If the business is totally or partially transferred or discontinued, only half of the net capital gain is taxed if the event occurs less than five years after the start-up or purchase of the business and only one-third of the gain is taxed if the event occurs five years or more after the business is started or purchased. However, the total gain is taxed if the business is not carried-on in any form.

### Dividends

Dividends paid by a Congolese company are subject to a 20% withholding tax (WHT) on securities income (Impôt sur les Revenus des Valeurs Mobilières or IRVM) unless a different rate applies under an international tax treaty (France, CEMAC, Organisation Commune Africaine et Malgache (OCAM)). This IRVM is regarded as an advance payment for the final calculation of CIT.

Dividends are treated as ordinary business income and are taxed at the standard CIT rate of 35% for resident corporations.

After three years, profits credited to the non-compulsory reserve are considered to be dividends and are accordingly subject to the 20% WHT on dividends.

### Inter-company dividends

Dividends received from a Congolese company (DivCo) by a commercial company incorporated in the Republic of Congo (HoldCo) are exempt from CIT and subject to a final 20% WHT if the following conditions are met:

- HoldCo and DivCo are incorporated in the CEMAC
- HoldCo holds 25% of the capital of DivCo
- HoldCo holds the shares for at least two years from the date of purchase.

However, 10% of dividends that are deemed to represent the share of cost and expenses are included in the taxable profits of HoldCo and liable for the CIT.

If the above conditions are not met, dividends received from a Congolese company by another Congolese company are subject to a 20% WHT, which is an advance payment of the recipient's CIT.

## *Deductions*

Generally, a deduction is allowed for all expenditures incurred to obtain, collect, and maintain business profits. To be deductible, expenses should be incurred necessarily for the normal purposes of the business and be supported by suitable evidence.

### *Depreciation and depletion*

In general, all types of fixed assets, except land, are depreciable for tax purposes as long as they can be shown to have been acquired for business purposes of the corporation. Depreciation must be calculated on the original purchase price. The straight-line method is used, and the Congolese General Tax Code sets forth maximum rates of depreciation. Goods costing less than EUR 152.44 per item may be written-off at purchase as expenses.

Depreciation recorded when the company is in a loss position may be carried forward without limitation and deducted from the first available taxable profits, provided it was appropriately disclosed in the annual corporate income tax return.

Recoverable and identifiable packaging is regarded as fixed assets. They are recorded in a fixed asset account at the time of purchase. This packaging is regarded as returnable packaging when the supplier intends to act as the sole owner of the packaging.

Unrecoverable packaging is recorded as an expense and deductible for tax purposes.

Exceptional accelerated depreciation may be authorised in certain circumstances for heavy equipment with a value of more than EUR 60,979.60. This special accelerated depreciation does not apply to private vehicles owned by the enterprises.

### *Exceptional depreciation method*

The exceptional depreciation method is an accelerated depreciation method.

Companies may elect the accelerated depreciation method for heavy materials and equipments that:

- are purchased new for a value higher than EUR 60,979.60
- have a useful life of at least three years
- are used for manufacturing, processing, transport and handling
- are bound to an intensive use.

The application for the accelerated depreciation must be submitted to the head office of taxes within three months of the purchase of the assets to be depreciated. The option is granted upon approval of the ministry in charge of finances. According to the implementation instructions adopted by the head office of taxes on 24 January 2003, if the administration fails to respond to the application for accelerated depreciation within three months, the application is tacitly granted.

According to the implementation instructions adopted by the head office of taxes on 24 January 2003, a 40% deduction may be taken in the year of acquisition of the previously mentioned assets, increased with the normal rate calculated on the residual value after application of the accelerated depreciation. These assets are depreciated on a straight-line basis thereafter.

### *Net operating losses*

For tax purposes, losses may be carried forward to offset profits earned in the three succeeding fiscal years. Carry back losses are not permissible.

In accordance with Article 114 of the Congolese General Tax Code, Part 1, depreciation recorded when the company is in a loss position may be carried forward without limitation.

### *Payments to foreign affiliates*

Allowable deductions include sums paid abroad to foreign companies for:

- actual services, notably overhead for the operations made for the benefit of a company based in the Republic of Congo, including: costs of studies; technical, financial, and accounting assistance; commissions and fees; and interests
- use of patents, licenses, trademarks, drawings, manufacturing processes, patterns, and similar rights to the extent the payer proves they correspond to actual operations, and they are neither abnormal nor excessive.

Subject to the provisions of tax treaties (France, CEMAC, and OCAM), the deduction is allowed within a limit of 20% of taxable profits before deduction of the expenses in question.

In the event of losses, the rate is applied on the results of the last profit period, which is not statutory limited. In the absence of profits during the period out of statutory limitation, the sums paid are not allowed as tax deductions.

When the sums are not allowed, as a whole or in part, in the deductible expenses, they are deemed to be paid benefits and are subject to tax on the dividends at the rate of 20%.

Royalties for the transfer or concession of patents, trademarks, drawings, and other similar titles are deductible to the extent the payer proves they are still valid. When these royalties benefit an enterprise contributing in the management or share capital of an enterprise in the Republic of Congo, they are deemed to be paid benefits and are subject to tax on the dividends at the rate of 20%.

Commission or brokerages, relating to goods purchased on behalf of enterprises based in Congo, are allowable tax deductions up to 5% of the purchase amount made by the central purchasing office, the head office, or the intermediaries. The reductions shall benefit enterprises based in the Republic of Congo. An original supplier’s invoice must be attached to the intermediary’s invoice.

The payer shall prove that:

- the purchases necessitated the interventions of a broker or intermediary
- the commissions provided better supply conditions compared with the actual situations on the market
- the commissions are not excessive compared with the nature of the services.

### *Taxes*
Taxes, other than income taxes, are usually deductible. Examples of deductible taxes include: customs duties, excise duties, payroll taxes, business license tax, registration taxes, and unrecoverable VAT.

Corporate income tax itself is not deductible, nor is the special tax on company-owned cars.

Taxes withheld on remuneration, paid to third parties (third parties taxes), and remitted to the tax office by a Congolese enterprise are not deductible.

### *Interest paid to shareholders*
Interests are deductible subject to two conditions.

1. General limit – regardless of the form under which a legal entity is registered, the deduction is allowed with an interest rate limited to the rate of the advances in current accounts on states funds of the Bank of the States of Central Africa (BEAC) raised by two points. Currently, the ceiling for the deduction of interests is 7.25%.
2. For private limited companies and public limited companies, the deduction is allowed according to the status of control over the management of the enterprise.
   - For shareholders who have control over the company de facto or de jure, the deduction is allowed only to the extent that the sums paid do not exceed, for the shareholders as a whole, half of the paid-up capital and are within the limit sets forth in the 'General limit'.
   - For other shareholders, the General limit applies.

## *Group taxation*

There is no tax provision in the Republic of Congo for group taxation.

## *Tax credits and incentives*

The current investment regime in the Republic of Congo was set out by Law No. 6-2003 of 18 January 2003, which established the investment charter. The charter's application, Decree No. 2004-30 of 18 February 2004 established modes of business registration.

1. Scope – the following may be registered under the investment charter:
   - Businesses wishing to pursue an activity in the Republic of Congo, except for activities such as brokerage, trade, import and production of arms, and import or processing of toxic waste and by products.
   - Under certain conditions, commercial activities linked to collection, storage, distribution, and export of locally produced products, except alcoholic beverages and tobacco.
   - New activities (as opposed to pre-existing activities).
   - Forestry businesses benefiting from a forestry permit called the forestry development unit.
   - New companies coming from the redemption of a registered company.
2. Conditions of eligibility for the investment charter – to be eligible, a company must satisfy the conditions below:

- Be registered with the Trade and Personal Credit Registry in the Republic of Congo.
- Create permanent employment, to be carried out over a minimum of 280 days per year.
- Maintain company share capital equal to or greater than 20% of investments.
- Primarily use local principal materials necessary for the production of the finished or semi-finished product, when available, with equal conditions concerning price, quality, and time of delivery to outside, in the case of industry.
- Primarily use local business services, when available, with equal conditions concerning quality, price, and time of realisation regarding payments to external businesses, for the case of service businesses.
- Be registered at the Congolese National Welfare Fund.
- Open an account at a local bank or any other financial, savings, or credit establishment.
- Primarily use a local workforce, when available, with the same expertise as the foreign workforce.

3. Registration procedure – entitlement to the benefits prescribed by the charter is subject to obtaining a registration agreement, provided by the National Investment Commission.
4. Fiscal and customs benefits set out by the Investment Charter – these benefits vary according to privileged regimes, motivation measures, and in a general manner.

***Privileged regimes***

The charter sets out three privileged regimes:

- General regime (G).
- Special regime (S).
- Preferential development zone regime.

***General regime (G)***

The general regime applies to businesses that fulfil the aforementioned general requirements, and carry out investments greater than or equal to EUR 152,450.

Special advantages are conferred according to the period of activity of the registered business.

During the set-up period and the first three exploitation tax years, the company receives several benefits.

- In customs matters, the company benefits from the provisions of the CEMAC customs code relative to asset improvement mechanisms for export activity and from the suspension of customs duty in the form of temporary admission or franchise for natural resource research activities.
- In fiscal matters, the company benefits from the 50% reduction of registration fees for business foundation, increases in capital, company mergers, and transfer of company stocks and shares.

For the three first exploitation tax years and until the first year of sale or first service, the following fiscal benefits are added with the aforementioned reduction of registration duties:

- Total exemption from the tax on company earnings.
  - Companies that are subject to CIT because of their size or activity will be exempt from CIT.

    - Businesses that are subject to personal income tax because of their size or activity will be exempt from personal income tax.
- The authorisation to proceed to accelerated depreciation.
- The authorisation to carry forward losses for the first three tax years.
- The application of zero-rate VAT on exported products.

### *Special regime (S)*
The special regime applies to businesses that fulfil the aforementioned general requirements and carry out investments between EUR 45,734 and EUR 152,450.

In addition to the advantages of the aforementioned (G) regime, businesses registered under the (S) regime benefit during the set-up period and the first three exploitation tax years from the moderation of registration duties for the incorporation of the business, increases in capital, company mergers, and transfer of company stocks and shares.

This moderation of registration duties is granted exclusively by decree of the Minister in charge of the Economy and Finances upon a decision of the National Investment Commission.

### *Preferential development zone regime*
All exporting businesses registered under the investment charter are eligible for the preferential development zone system, including free-trade zones.

The institution, organisation, and function of the preferential development zone are fixed by a specific text.

### *Incentive measures*
Respect for the aforementioned general requirements set out by the charter is a prerequisite for benefiting from these motivation measures.

### *Export incentives*
This measure is reserved for businesses that export at least 20% of their production.

The benefits are:

- The provisions of the CEMAC customs code, relating to asset improvement mechanisms.
- Exemption from customs duties and taxes on manufactured products, except computing fees and statistic tax.
- Application of a zero-rate VAT on exported products.

Non-manufactured goods remain subject to the common law export system.

### *Incentive to reinvest earnings*
This measure is reserved for businesses that carry out new investments of at least one-third of existing assets.

The benefit conferred consists in a 50% reduction of the tax on company earnings for the three years following the realisation of the investment.

Notwithstanding, this benefit is granted upon the following conditions:

- The business declares to the permanent secretary of the National Investment Commission its investments, planned investment, and the state of existing capital assets.
- The National Investment Commission, on the report of checking teams, verifies if the new investments correspond to one-third of the preceding capital assets.
- All investments are realised within one year.
- Investments generate new employment.
- Investments increase capacity of production by at least 10%.
- The business has sound ethical concerns.

### *Incentives to set up in remote areas*

All new businesses registered under (G) or (S) regimes, which are located in a remote area, benefit from a reduction of 50% on the tax on company earnings in the fourth and fifth year following the first three tax years for which the business benefited from total exemption from the tax on earnings or personal income tax.

The business is considered as belonging to a remote area from the moment its production units are set-up and 90% of the production unit workforce is working in the remote location.

The appraisal of a zone's location results from the exclusive competency of the National Investment Commission.

### *Incentives for social and cultural investment*

All new businesses registered under (G) or (S) regimes, carrying out investments of a social and cultural character, may benefit from a fiscal reduction by ministerial decree of the Minister in charge of Finance and the Economy, upon the decision of the National Investment Commission.

These benefits may not, however, be added to those mentioned above and allocated to remote areas, even if the business concerned is set-up in such a location.

### *General measures*

For the duration of the privileged regime, and subject to current texts, the company shall enjoy fiscal stability in terms of local and state taxes.

Privileged regimes (G) and (S) are allocated only once and are not renewable. The business may receive fiscal and customs advantages pertaining to the set-up period.

Fiscal advantages concerning the exploitation period are applicable only after the set-up period.

The end of the set-up period is certified by decision of the Minister in charge of Economy and Finance after the adoption of the verification report by the National Investment Commission.

## *Withholding taxes*

The Republic of Congo is a member of CEMAC, established by the treaty signed on 16 March 1994 in N'Djamena (Chad) that became effective in June 1999. The organisation replaced what was then the Customs and Economic Union of Central Africa (UDEAC) and adopted its commitments. The CEMAC unites the following six states: Cameroon, Central African Republic, Republic of Congo, Gabon, Equatorial Guinea, and Chad.

# Congo, Republic of

The Republic of Congo has signed the following tax treaties.

### *The tax treaty of the Common Organisation for Africa and Madagascar (OCAM)*

The member states of this organisation adopted a tax cooperation agreement 29 January 1971, which was ratified by the Republic of Congo on 3 September 1971. The OCAM, which initially had 14 members, had 17 members when it was dissolved by the Conference of Heads of State in 1985. Those members were Cameroon, Central African Republic, Chad, Congo, Ivory Coast, Dahomey, Gabon, High Volta, Madagascar, Mauritius, Niger, Rwanda, Senegal, Togo, and the Democratic Republic of Congo. The Republic of Congo has not denounced the application of this tax treaty.

### *The tax treaty of the CEMAC Convention*

The Republic of Congo signed the UDEAC Convention of 13 December 1966, which was designed to avoid or to limit double taxation among the member states: Cameroon, Central African Republic, Congo, Gabon, Equatorial Guinea and Chad. This tax treaty remains significant to companies interested in affiliate creation in Central Africa countries.

### *The tax treaty between the Republic of Congo and the French Republic*

This tax treaty, which concluded on 27 November 1987, was designed to avoid double taxation and to prevent tax evasion related to income tax, inheritance tax, registration law, and stamp duty.

### *Services, dividends, attendance fees*

#### Services

The tax regime set forth for foreign suppliers is defined in Section 185 Ter of the Congolese General Tax Code, Part 1. According to the provisions of Section 185, as well as the wide interpretation made by the Congolese Tax Authorities, the services rendered by the foreign suppliers should be subject to a 20% WHT.

In addition, Section 185 Ter provides that companies, which have no tax residence in the Republic of Congo, are subject to a 20% WHT if they earn revenues realised in the Republic of Congo or coming from the Republic of Congo, and which come from works or services of any nature performed or used in the Republic of Congo.

The provisions of the Section 185 Ter do not apply to resident suppliers of a country that has signed an international tax treaty with the Republic of Congo, provided certain conditions are met.

#### Dividends

Dividends distributed by a Congolese company are subject to a 20% WHT unless a different rate applies under an international tax treaty (France, CEMAC, OCAM). The same rate applies for dividends distributed to a resident shareholder.

Under the tax treaty between France and Congo, the applicable WHT rate is 15%. There is no specific rate defined in the CEMAC and OCAM tax treaties.

#### Attendance fees

Attendance fees are subject to a 22% WHT unless a different rate applies under an international tax treaty (France, CEMAC, OCAM).

C

### Payments to local independent contractors

Payments to local independent contractors (self-employed contractors – i.e. those not registered with the Congolese Trade Registry) are subject to a WHT at the rate of 5% from such payments to be remitted to the Public Treasury.

Late remittance of the WHT is subject to a late payment penalty of 50% within the first two months and 100% if the late payment exceeds two months.

### WHT rates summary

| Recipient | Dividends (%) | Interest (%) | Royalties (%) |
|---|---|---|---|
| Resident corporations | 20 | 0 | 0 |
| Resident individuals | 20 | 0 | 0 |
| Non-resident corporations and individuals: (Non-treaty) | 20 | 20 | 20 |
| Treaty with: | | | |
| France | 15 | 0 | 15 |
| OCAM | 0 | 0 | 0 |
| CEMAC | 0 | 0 | 0 |

## Tax administration

### Tax returns

Taxable business profits are computed on the basis of normal accounting principles as modified by certain tax adjustments.

The annual corporate tax return is a specific form (Document Statistique et Fiscal or DSF) which should be prepared in accordance with OHADA accounting principles. The form cannot be completed electronically.

The books must be maintained in French and in XAF. This accounting system must follow the OHADA chart of account. All entries have to be booked under OHADA standard throughout the year.

The annual corporate tax return must be filed within four months following the end of the fiscal year of the company (i.e. before 1 May).

### Payment of tax

Resident companies are required to pay quarterly instalments of tax (15 February, 15 May, 15 August, and 15 November), and these quarterly instalments are generally calculated with reference to the most recent corporate tax return. Special calculations of instalments apply to new taxpayers.

Based on the self-assessment system, when submitting annual tax returns due by 1 May every year, taxpayers must pay the amount of tax calculated in the annual tax return to the extent this amount exceeds tax instalments paid during the year.

Non-resident companies and individuals shall appoint tax representatives in the Republic of Congo. The Congolese resident shall be considered as tax representative if the non-resident person fails to appoint a tax representative.

## Significant developments

There have been no significant corporate tax developments in Costa Rica during the past year.

## Taxes on corporate income

Corporate income is taxed at a 30% rate. However, the law establishes special regulations for small companies whose gross income does not exceed 87,004,000 Costa Rican colónes (CRC). For this category, the following rates apply:

- 10% for companies with gross income up to CRC 43,253,000.
- 20% for companies with gross income of more than CRC 43,253,000, but not more than CRC 87,004,000.
- 30% for companies with gross income over CRC 87,004,000.

Please note that these income tax brackets are adjusted yearly, effective 1 October to 30 September of the following year. The tax brackets listed are for the 2011 fiscal year.

## Corporate residence

In most cases, the place where a company is incorporated is regarded by Costa Rican authorities as the corporate residence. However, any business that carries on industrial, agricultural, or commercial activity in Costa Rica is subject to income taxation on local income in the same way as a registered business, irrespective of the place of incorporation. Such corporations doing business in Costa Rica are subject to permanent establishment (PE) rules.

On the other hand, under the Costa Rican income tax law, income from transactions carried out abroad may be regarded as non-Costa Rican-source income and is not subject to income taxes.

## Other taxes

### Sales tax

A fixed sales tax rate of 13% is applied at all stages of the sale of merchandise or the invoicing of certain limited services. The tax is levied on (i) sales of merchandise within the national territory (except sales of land, buildings, exports, and certain basic necessity items, such as basic foodstuffs, certain medicines, and veterinary products); (ii) the value of services performed by restaurants, bars, motels, printing companies, social and recreational clubs, painting and repair shops, and others; and (iii) imports consisting of merchandise for personal use or consumption or to satisfy commercial needs.

### *Property tax*

Each local municipal government is in charge of real estate appraisal. The property tax to be applied throughout the Costa Rican territory is 0.25% of the appraised value, registered in the respective municipality where the tax liability originates. The first CRC 13,203,000 is exempt from property tax if the taxpayer is an individual who owns only one piece of property within the country. Tax will be levied on the amount in excess of CRC 14,229,000 for the year 2011.

### *Selective consumption tax*

The selective consumption tax may be applied at a rate of up to 100% and is levied on goods that are considered non-essential. The tax base is either the cost, insurance, and freight (CIF) price plus import duties for imported items or the sales value for items produced in Costa Rica. The tax is levied at only one stage in the sale of merchandise. Payment of the tax is required at the time of importation or, for articles produced in Costa Rica, within 15 days of the month of the sale.

### *Real estate transfer tax*

Real estate transfer is calculated as 1.5% of the selling price of the real estate or its tax value, whichever is greater.

### *Capital gains tax*

At present, there is no capital gains tax on the sale of real estate or securities when such sales are not a habitual activity. There is capital gains tax, at the regular rate, on the sale of depreciable assets when their sale price is higher than their adjusted basis (book value).

### *Franchise tax*

The payments realised abroad for the use of a franchise will be subject to remittances abroad, with a 25% withholding tax (WHT).

## *Branch income*

Branch income is subject to income tax at the rates applicable for corporate income taxes. There is a WHT of 15% on dividends distributed within the country and a 15% tax, in lieu of a dividend WHT, on profits transferred abroad.

## *Income determination*

### *Capital gains*

Capital gains and losses on the disposition of non-depreciable fixed assets or shares of other companies are excluded for income tax purposes if such dispositions are not a habitual activity.

### Inter-company dividends
Dividends between domestic subsidiaries and other domestic corporations are not subject to taxes. There are no ownership requirements to qualify for this exclusion.

### Stock dividends
Stock dividends are subject to income tax at 15% if the stock is not listed in an officially recognized stock exchange or 5% if the stock is registered in a stock exchange officially recognized by the Costa Rican government.

Dividends paid in the form of stock of the distributing company are allowed and exempt from taxes.

### Foreign income
Foreign-source income is not taxable.

## Deductions

### Depreciation and depletion
The straight-line and sum-of-the-years-digits methods of depreciation are allowed.

| Assets | Useful life (years) |
|---|---|
| Buildings | 2 to 6 |
| Machinery and equipment | 7 to 15 |
| Furniture and fixtures | 10 |
| Vehicles | 10 |
| Agricultural plantations | 10 to 50 |

The tax administration, at the request of the taxpayer, could adopt technically acceptable special depreciation methods in cases duly justified by the taxpayer. In addition, the tax administration could authorise, through general resolution, accelerated depreciation methods on new assets, acquired by corporations with monetary activities requiring constant technological updates, higher installed production capacity, and productive reconversion processes, in order to maintain and strengthen their competitive advantage.

### Taxes
With the exception of sales tax, selective consumption tax, specific taxes over consumption and special duties over them established by law, penalties and interest paid over any tax obligation, and the income tax itself, all other taxes are deductible expenses when determining taxable income.

### Net operating losses
Losses incurred by industrial and agricultural enterprises may be carried forward and deducted from the taxable profits for the following three years for industrial enterprises, and five years for agricultural enterprises. Loss carrybacks are not allowed.

### Payments to foreign affiliates
Corporations may claim deductions for royalties, technical and management service fees, and interest charges paid to foreign affiliates, provided that a tax of 25% for royalties, franchises, and other services, and a tax of 15% for interest is withheld.

However, the deductions for technical and management service fees may not exceed 10% of gross sales in the aggregate if paid to the parent company.

## Group taxation

There is no group taxation in Costa Rica.

## Tax credits and incentives

### Free zones

Entities established in free zones may enjoy exemption from import duties on goods, income tax, sales tax, export tax, selective consumption tax, real estate transfer tax, and WHT on payments abroad, as well as the discretionary use of foreign currency generated abroad. However, these incentives will be affected by the rules established by the World Trade Organization (WTO) in force in the year 2015.

### Drawback industries

Special benefits exist for industries that import semi-manufactured materials for assembly in Costa Rica and export finished products. Benefits consist of duty-free imports of raw materials for subsequent export as manufactured products. Machinery for these industries may also be imported duty-free.

### Tourism development

The Incentive Law for Tourism Development grants several tax benefits, such as exemption from import duties on certain tourism service-related goods and from property tax for companies dedicated to tourism, but only for those with a signed tourism agreement.

## Withholding taxes

### Payments to non-domiciled foreign corporations or individuals

Regarding payments to non-domiciled foreign corporations or individuals, taxes are withheld as follows:

- Dividends: 15%. Withholding depends on the origin or source of the retained earnings. Total or partial exemption will be authorised by the tax authorities to the extent that a foreign tax credit is totally or partially disallowed to the taxpayer in the taxpayer's country of residence. This exemption will not be allowed, however, if this type of income is not taxable to the taxpayer in the country of residence.
- Interest and other financial expenses: 15%. No tax is withheld if the recipient is a bank or a financial institution recognised as a first-class bank by the Central Bank of Costa Rica or a supplier of merchandise. Interest or financial expenses paid to parties other than those aforementioned are subject to a 15% WHT. An 8% WHT applies to interest on bearer documents issued by financial entities registered at the Central Bank's General Auditor's Office or stock exchange. No WHT applies to interest paid on securities issued by the Workmen's Bank or the Mortgage Housing Bank and its authorised institutions or on foreign currency securities issued by the state banks.
- Special tax on banks and non-resident financial entities. Banks or non-resident financial entities that are part of a local financial group are payers of this tax. The taxpayers mentioned in the 'interest and other financial expenses' section must pay,

in lieu of tax on remittances abroad, a local currency tax equivalent to USD 125,000 per annum. The tax period will run from 1 January to 31 December of each year.

- Royalties, patents, trademarks, franchises, and formulas: 25%.
- Technical service and management fees: 25%.
- Personal services from a Costa Rican source. Employees: 10%; directors: 15%; others: 30%, depending on the nature of the services rendered.
- Transportation and communication services: 8.5%.

### *Tax treaties*

Costa Rica is a full member of the Central American Common Market, which guarantees free trade among the countries of the area. It also has a free-trade bilateral treaty in force with Mexico (1994), the Dominican Republic (1998), Chile (1998), Canada and Panama, and the CAFTA-DR entered into force on 1 January 2009. These agreements aim to provide favourable conditions for the exchange of merchandise between contracting parties.

The only tax treaty in force between Costa Rica and the United States, effective since 12 February 1991, is a Tax Information Exchange Agreement, whereby both countries agree to exchange information, from and/or in relation to public and private entities and individuals, at the request of the party's corresponding authority, in relation to any tax relevant issue.

## *Tax administration*

### *Returns*

With certain exceptions, all corporations must file a tax return by 15 December on the basis of a fiscal year-end of 30 September. Entities with an operating period of less than four months may present a return together with the following year's tax return. Current legislation contemplates that other fiscal year-ends may be adopted with the prior approval of the tax authorities.

The tax system is one of self-assessment with occasional auditing by the tax authorities.

### *Payment of tax*

In March, June, and September all corporations and taxpayers must prepay instalments that total 75% of the average income taxes paid in the past three fiscal years, or the amount paid in the prior year, whichever is greater. Failure to pay on these dates results in the accrual of interest unless the taxpayer has requested, on a timely basis, that the tax authorities eliminate the corresponding payments. Any amount owed in excess of the instalments should be paid by 15 December.

## Significant developments

Amendments to the Corporate Income Tax Act were introduced on 1 July 2010, and amendments to the Corporate Income Tax Ordinance were introduced on 4 November 2010.

The following significant tax law changes were introduced by these amendments.

### Profit tax

- Provisions on transfer pricing and interest deduction were introduced in business relationships between resident parties, if one party has beneficial tax status (i.e. pays taxes at lower rates) or an entitlement to carry forward tax losses from the previous years.
- An entitlement to carry forward tax losses in case of statutory changes of legal entities is prescribed in detail, limiting the entitlement where the legal predecessor was inactive and in case of a significant change in business activity or ownership structure.
- Provisions for unused holidays in accordance with the accounting regulations are allowed for tax purposes.
- The minimum value of long-term assets (assets used by the company for more than one year) is now increased to 3,500 Croatian kuna (HRK).

### Withholding tax (WHT)

In addition to the current WHT rate of 15%, an increased rate of 20% is introduced. The increased rate applies to all services paid to foreign entities whose place of seat or management is in a country with a profit tax rate below 12.5%. This provision does not apply to European Union (EU) member countries.

### Crisis tax

A special tax at the rate of 2% on earnings ranging from HRK 3,000 to HRK 6,000 was abolished as of July 2010. The remaining special tax at the rate of 4% on income over HRK 6,000 was also abolished as of 1 November 2010.

## Taxes on corporate income

### Profit tax

Profit tax is paid at a flat 20% rate by enterprises engaged in independent activities on a long-term basis for the purpose of deriving profit, branches of foreign enterprises, enterprises that control shares in capital (unless the object of investment itself pays profit tax), and natural persons who choose to pay profit tax instead of personal income tax.

The profit tax base is the difference between revenue and expenditures, adjusted for increasing and decreasing items. Croatian residents pay profit tax on profit derived in Croatia and abroad, and non-residents (e.g. branches) pay profit tax only on profits derived in Croatia. The tax base also includes gains arising from liquidation, sale, change of legal form, and division of the taxpayer where it is determined at the market rates.

Payments into voluntarily pension funds paid by an employer for an employee under certain conditions prescribed by Corporate Income Tax Act are also considered expenditures.

Expenditures are not considered to be expenditures if they are not related to the taxpayer's business activity.

The profit tax base is reduced by the following items:

- Income from dividend and profit sharing.
- Unrealised profits from value adjustments of shares (increase of financial asset value), if these were included as profit in the P&L account.
- Income from collected written-off claims that were included in the tax base in the previous tax periods, but not excluded from the tax base as recognised expenditure.
- The amount of depreciation not recognised in previous tax periods, up to the amount prescribed by the Corporate Income Tax Act.
- The amount of tax relief or tax exemption in line with special regulations (i.e. costs of education, costs of research and development (R&D), costs of a new employee's salary).

The profit tax base is increased by the following items:

- Unrealised losses from value adjustments of shares (decrease of financial asset value), if these were included as expenses in the P&L account.
- The amount of depreciation in excess of the amounts prescribed by the Corporate Income Tax Act.
- 70% of entertainment costs (food and drink, gifts with or without the printed firm logo or product brand, and expenses for vacation, sport, recreation and leisure-time, renting cars, vessels, airplanes, and holiday cottages). Entertainment costs do not include the costs of goods and merchandise adapted by a taxpayer for business entertainment purposes, labelled 'not for sale', and other promotional objects with the name of the firm or merchandise or other advertising objects (e.g. glasses, ashtrays, table cloths, mats, pencils, business diaries, cigarette lighters, tags) put to use in the selling area of the purchaser and given to consumers, provided that their value does not exceed HRK 80 per item.
- 30% of the costs, except insurance and interest costs, incurred in connection with owned or rented motor vehicles or other means of personal transportation (e.g. personal car, vessel, helicopter, airplane) used by managerial, supervisory, and other employees, provided that the use of means of personal transportation is not defined as salary.
- Asset shortfalls exceeding the amount prescribed by the Croatian Chamber of Economy or Croatian Chamber of Trades and Crafts, in accordance with the VAT Act and on the basis of which no personal income tax was paid.
- The costs of forced collection of tax and other levies.
- Fines imposed by competent bodies.
- Late payment interest charged between associated persons.

- Privileges and other economic benefits granted to natural or legal persons for the purpose of causing or preventing a certain event in favour of the company (generally related to commissions paid to parties acting on behalf of the taxpayer).
- Donations in excess of the amounts prescribed by the Corporate Income Tax Act.
- Expenditures identified during Tax Authority's audit, including VAT, surtax, and contributions related to hidden profit payments and withdrawals from shareholders, company members, and physical persons performing independent activities taxable by profit tax.
- Any other expenditure not directly related to profit earning, as well as other increases in the tax base, which were not included in the tax base.

### *Local taxes*

A legal entity that is liable to pay profit tax and is registered for the performance of the business activity may be subject to tax on trade name at the amount of up to HRK 2,000, depending on the decision of the municipality or city.

## *Corporate residence*

In terms of Corporate Income Tax Act, residents are legal or natural persons whose seat is recorded in the Register of Companies or other register in Croatia, or whose place of effective management and control of business is in Croatia. Residents are also entrepreneurs/natural persons with domicile or habitual residence in Croatia, whose business activity is recorded in a register or other records.

A non-resident is any person who does not satisfy one of the requirements referred to above.

### *Permanent establishment (PE)*

Definition of a business unit of a non-resident is based on the Organisation for Economic Co-operation and Development (OECD) guidelines, which provides that a non-resident's business unit is a place of management, a branch, an office, a factory, a workshop, a mine, an oil or gas well, a quarry, or any other place of extraction of natural resources or construction site or project for a period longer than six months, including agents acting in its name, having the right to conclude contracts or hold stock of products which it distributes on the Croatian market in the name of a foreign entrepreneur. The business unit of a non-resident also includes the performance of services (i.e. advisory and business consulting services) for the same or a related project, which lasts for more than three months in a 12-month period.

## *Other taxes*

### *Value-added tax (VAT)*

The general VAT rate is 23%.

VAT is a consumption tax and has a neutral effect on enterprises by operation of the input and output mechanism. Accordingly, the tax burden is borne by the final consumer.

#### VAT returns and payments

A VAT-registered entity must calculate its VAT liability or refund and submit a monthly (by the end of the following month) VAT return to the relevant Tax Authority Office or a quarterly VAT return (by the end of month following the quarter) if the taxpayer is classified as small (annual turnover below HRK 300,000). An annual VAT return must be submitted by 30 April of the following year.

Where the amount of input tax credits exceeds the entity's VAT liability, a taxpayer is entitled to a refund of the difference or may choose to use the difference as a VAT prepayment.

VAT paid to the customs office at the time of import can be credited to the taxpayer's VAT account and offset against any domestic VAT liability. A VAT entity must self-assess VAT on imported services provided by a foreign entity. This VAT can be reclaimed through the VAT return as described above.

### Determination of VAT taxpayers

VAT taxpayers are defined as entrepreneurs that deliver goods or perform services in Croatia. An 'entrepreneur' is a legal entity or a natural person that continuously and independently performs an activity for the purpose of deriving profit. In addition to those that may be regarded as 'normal' taxpayers, domestic enterprises receiving imported services from foreign enterprises and legal entities and individuals that issue invoices or receipts including VAT without authorisation are also liable to pay VAT.

A taxpayer is required to register for VAT where turnover in the previous year exceeded HRK 85,000. Voluntary registration is also possible.

Foreign entrepreneurs may also become VAT registered in Croatia through a tax representative. This will entitle them to reclaim input VAT incurred in Croatia.

In addition to foreign individuals, foreign legal entities are now also entitled to claim a VAT refund under reciprocity agreement terms.

### Determination of VAT base

The VAT base for goods and services supplied domestically is the consideration received. Where no consideration is provided, for instance where goods are exchanged, the VAT base is the market value of the good or service. The VAT base of imports is the customs value as prescribed by customs regulations, increased by customs duties, import duties, special taxes, and other fees paid during customs clearing.

### VAT-exempt supplies

VAT-exempt supplies are similar to those contained in the EU's Sixth Directive and include rental of residential property (with some exceptions); granting of credits and credit guarantees; transactions related to bank accounts, interest, winnings from special games of chance in casinos, slot machine clubs, and other forms of gambling; supplies of domestic and foreign legal tender, securities and shares, and supplies of gold by the central bank.

Other exemptions include the following:

- Services and deliveries of goods by public institutions in the field of culture, such as museums, galleries, archives, libraries, theatres, religious communities and institutions, primary and secondary schools, universities, and student catering and boarding institutions.
- Medical services, including services conducted by doctors, dentists, nurses, physiotherapists, and biochemistry laboratories engaged in private practices; services of medical care performed in healthcare institutions; and services performed by social care institutions and child and adolescent care institutions.

- Supplies (transfers) of real estate (land, buildings, parts of buildings, housing premises, and other structures) with the exception of newly built buildings.
- Temporary imports of goods which are exempt from customs duty.

**Zero-rated supplies**
The following supplies are zero-rated or 'VAT free' under the Croatian VAT legislation:

- Bread and milk, including baby food used as a substitute for mother's milk.
- Books of a scholarly, scientific, artistic, cultural, and educational character as well as school textbooks (primary, secondary, and tertiary education, including materials printed on paper and other media, such as CD-ROMs, video cassettes, and audio tapes).
- Certain medicines and surgical implants.
- Scientific journals.
- Services rendered by cinemas.

**Reduced-rate services**
There is a reduced rate of 10% for services related to the following:

- Organised stays (accommodation or accommodation with breakfast, full or half board, in all kinds of commercial hospitality facilities) and agency fees with respect to the abovementioned services.
- Daily and periodic newspapers and magazines (with the exception of those that consist entirely of advertisements or are used mainly for advertising purposes).

***Excise duties***
There are a number of excise duties levied on specific products. They are levied at a fixed amount and are payable by the producer or importer. VAT is applied first, after which the fixed amounts are added.

- Oil derivatives: Tax ranging from HRK 110 to HRK 3,600 per 1,000 litres.
- Tobacco products: Tax on cigarettes may reach up to HRK 180 per 1,000 pieces plus 30% proportional special (excise) tax from retail price; for cigars HRK 1,100 per 1,000 pieces; for cigarillos HRK 220 per 1,000 pieces; and HRK 234 per kilogram for tobacco (HRK 136 prior to 1 January 2011).
- Beer: HRK 40 per 1% volume fraction of the actual alcohol contained in one hectolitre of finished product.
- Soft drinks: HRK 40 per hectolitre for domestically produced brands and imported soft drinks. Some soft drinks, including mineral water and natural fruit juices, are exempt.
- Alcohol:
  - Excise duty on products with the volume of actual alcohol content at 15% and higher is paid in the amount of HRK 800 per hectolitre of finished product.
  - Excise duty on products with the volume of actual alcohol content of less than 15% is paid in the amount of HRK 500 per hectolitre of finished product.
  - Excise duty on ethyl alcohol is to be paid in the amount HRK 5,300 per hectolitre of pure alcohol.
- Imported coffee: HRK 5 to HRK 20 per kilogram.
- Passenger cars and motor cycles: from 13% to HRK 177,500 plus 63% of the amount exceeding HRK 500,000.
- Imported boats and aircrafts: from 5% to HRK 445,000 plus 16% of the amount exceeding HRK 4 million.

- Luxury products: 30% of the sales value of the product without VAT.
- Liability and comprehensive road vehicle insurance premiums: for obligatory motor vehicle insurance premium, 15% of the contractual amount; and for comprehensive motor vehicle insurance premium, 10% of the contractual amount.

### *Custom duties*
As Croatia is in the accession negotiations process with the European Union, customs regulations are largely in compliance with the EU customs standards. The general customs duty rate is 10%. However, it varies depending on the type and the origin of imported goods, as prescribed by the Customs Tariff. The Customs Tariff is based on the Harmonized Commodity Description and Coding System (HS Nomenclature).

### *Real estate tax*
The acquisition of real estate is subject to taxation. 'Real estate' includes agricultural, construction, and other land as well as residential, commercial, and other buildings. Transactions include the sale, exchange, and any other means of acquiring real estate for consideration.

Tax is charged at 5% of the market value of the real estate on the contract date and is paid by the acquirer.

### *Chamber of Commerce contribution*
Employers pay a mandatory contribution to the Croatian Chamber of Commerce. The amount varies between HRK 55 to HRK 5,500 depending on company size and 0.0056% of total income.

### *Stamp tax*
There are no stamp taxation provisions in Croatia.

## *Branch income*

Foreign corporations carrying on business in Croatia are taxed on their Croatian-source income at a 20% rate.

## *Income determination*

### *Inventory valuation*
Inventories are generally valued at the lower of their acquisition cost or net realisable value. Taking into consideration the accounting principles set out in the Accounting Act and the International Accounting Standards (IAS), a company can choose to adopt the most favourable method.

### *Capital gains*
Capital gains or losses are covered by the profit tax regime. They are either an increasing or decreasing item to the profit tax base.

### *Inter-company dividends*
Inter-company dividends are treated as income under the profit tax regime but are not included in the tax base.

## Deductions

### Depreciation
Most companies depreciate assets on a straight-line basis; this is because depreciation calculated this way, at the prescribed rates, is recognised for tax purposes. Companies are, however, free to use any depreciation method defined in the IAS and to estimate the useful lives of all fixed assets in accordance with their accounting policies.

Prescribed annual depreciation rates are as follows:

| Assets | Depreciation period (years) | Depreciation rate (%) |
|---|---|---|
| Buildings and ships of over 1,000 gross registered tonnage (GRT) | 20 | 5 |
| Basic herd and personal cars | 5 | 20 |
| Intangible assets, equipment, vehicles (except personal cars), and machinery | 4 | 25 |
| Computers, computer hardware and software, mobile telephones, and computer network accessories | 2 | 50 |
| Other non-mentioned assets | 10 | 10 |

However, depreciation expenses in excess of the amount allowed for tax purposes are taxable. The value adjustment of tangible fixed assets rarely occurs in practice, except in the case of financial assets and claims.

The Corporate Income Tax Act no longer allows taxpayers to wholly write off plant and equipment acquired or built during the tax period. Furthermore, by the newly introduced changes in the Corporate Income Tax Act, applicable from 1 July 2010, the cost of depreciation of assets which are not used for business purposes is not deductible.

Plant and equipment are taken to be acquired in the period in which it is installed or ready for use. Plant and equipment includes: tools of trade, information technology infrastructure including software, furniture and fittings, and motor vehicles (excluding vehicles for personal use).

If the taxpayer writes off a portion of a depreciable asset, the remaining undepreciated portion will be depreciated at the rate prescribed by law. According to the Corporate Income Tax Act, the taxpayer can double depreciation rates.

Land and forests (renewable resources) are not depreciated.

Financial assets, cultural monuments, and art work are not depreciated.

Depreciation of vessels, aircrafts, condominiums, and vacation houses can be tax deductible only if certain conditions are met.

### Goodwill
Goodwill paid on the acquisition of a business must be amortised over five years. It is usually the difference between the estimated statistical value of assets and liabilities and their book value.

However, the amortisation of goodwill arising from mergers and acquisitions is not recognised for taxation purposes.

### Net operating losses

Tax losses may be carried forward and utilised within five years following the year in which the losses were incurred and must be utilised in the order in which they occurred. The losses may not be transferred to any third entity except in the case of merger, de-merger, or acquisition. Tax losses cannot be carried back.

By the newly introduced changes in Croatian Corporate Income Tax from July 2010, utilisation of tax losses from previous years in case of statutory changes of legal entities is prescribed in detail, limiting the entitlement where the legal predecessor is inactive and in case of a significant change in business activity or ownerships structure.

### Payments to foreign affiliates

The treatment of payments made to foreign affiliates is dealt with through the mechanism of the profit tax base. The profit tax base is increased for any concealed profit payments made. The Tax Administration may audit the expenditure of non-resident taxpayers, examining expenditure on goods and services abroad as well as management, intellectual property, and other fees and payments that may have the character of a profit transfer. If the Tax Administration discovers that transactions have been used to conceal profit transfers, the difference between the declared price/fee and the average market price/fee will be added back into the taxpayer's tax base.

## Group taxation

There are no group taxation provisions in Croatia.

### Transfer pricing

Prices between a Croatian entity and its foreign related parties must be set at fair market value (the arm's length principle). By the changes of the Corporate Income Tax Act applicable from 1 July 2010, provisions on transfer pricing and interests are also introduced in transactions between resident related parties if one of the parties has:

- beneficial tax status (i.e. reduced tax rates) or
- entitlement to carry forward tax losses from previous years.

If the prices between related entities are different than those between non-related resident and non-resident entities, the tax base must be calculated with prices that would be charged between unrelated companies. In order to determine the market value of the related party's transaction, the following methods can be used:

- Comparable uncontrolled price.
- Resale price.
- Cost plus.
- Profit split.
- Net-profit.

### Thin capitalisation

Interest on loans from a shareholder or a member of a company holding at least 25% of shares or voting power of the taxpayer will not be recognised for tax purposes, if the amount of the loan exceeds four times the amount of the shareholder's share in the capital or their voting power. Interest on loans obtained from financial institutions is exempt from this provision. A third-party loan will be considered to be given by a shareholder if it is guaranteed by the shareholder.

## *Tax credits and incentives*

The Investment Incentive Act provides the following relief and incentives for taxpayers.

### *Investment incentives*

Investment incentives are usually organised as corporate tax credits applicable for up to ten years upon completion of various conditions.

General incentives apply for investors profit earned as a result of an investment under the following conditions:

| Investment amount (EUR) | Tax benefit rate (%) | Period (years) | Necessary to employ (employees) |
|---|---|---|---|
| From 300,000 to 1.5 million | 10 | 10 | 10 |
| More than 1.5 million | 7 | 10 | 30 |
| More than 4 million | 3 | 10 | 50 |
| More than 8 million | 0 | 10 | 75 |

Tax benefits cannot exceed investment amount.

### *Incentive for investment in significant projects*

A non-refundable money subsidy in an amount of up to 5% of justified costs related to investment in significant projects (maximum amount of up to EUR 1 million) may be granted to a company, providing that certain conditions are met.

A significant project investment consists of high economic activity, such as the construction of a new plant or industrial facility, initiation of a new economic activity, or new technology development, with investment in assets greater than EUR 15 million. At least 100 workplaces must be opened upon expiration of one year of investment.

### *Custom free zones*

Taxpayers in custom free zones can take advantage of incentives prescribed in the Investment Incentives Act. Taxpayers that were engaged in or participating in the building of infrastructure within a zone, in projects with a value exceeding HRK 1 million before July 2008, and that did not fully utilise the incentive prescribed by the Investment Incentive Act, are exempt from paying profit tax until the full amount has been used, but no later than 31 December 2016.

### *Employment incentives*

Taxpayers whose business activities are based on agriculture or fishing in areas under special state care and employing more than five persons on a permanent bases (certain limitations apply), will be exempted from the payment of profit tax until EU accession, up to 100%.

Taxpayers with business activities other than agriculture or fishing in areas under special state care and who employ more than five persons on a permanent basis (subject to certain limitations and depending on the area) will be exempt from tax, up to a certain amount of the profit tax rate, as prescribed by local legislation. Exemptions will be gradually decreased until year 2014 or 2017, when it will no longer be applicable.

Companies established in the territory of the City of Vukovar and employing more than five persons on a permanent basis will be exempted from the payment of any profit tax until EU accession.

Companies established in mountain regions that employed more than five persons on a permanent basis, enjoyed up to a 75% profit tax reduction in the period starting from 2008 until the end of 2010.

### *Research and development (R&D) incentives*

Registered scientific organisations, centres of scientific excellence, individual scientists, and groups of scientists are entitled to apply for the state subsidies and tax incentives for scientific research, basic research, applied R&D research.

Depending on the type of research (e.g. scientific, basic, applied research, or technical feasibility) and size of entrepreneur (i.e. small, medium, or large entrepreneur, according to the Accounting Act), the percentage of the costs covered by state subsidy can vary between 25% and 100%. Additionally, the profit tax base can be decreased (depending on the same criteria) by up to 150% of the amount of the costs covered by the state subsidy, where the profit tax liability decrease is granted up to the amount of the percentage of the costs covered by state subsidy.

### *Foreign tax credit*

If a domestic taxpayer has paid tax abroad on profit derived abroad, the tax paid will be included in its profit tax, up to the amount of tax paid abroad. The amount of paid tax abroad, which can be offset with the domestic tax, is calculated in the following way:

- The domestic tax rate is charged on the revenues/profit derived from abroad, and the result represents the highest amount of tax which can be offset with the domestic tax.

If the amount of paid tax abroad was charged at the rate lower than 20%, the actual amount of foreign tax paid can be offset with the domestic tax.

## *Withholding taxes*

Taxpayers who pay fees for the use of intellectual property rights (the right to reproduction, patents, licenses, copyrights, designs or models, manufacturing procedures, production formulas, blueprints, plans, industrial or scientific experience, and such other rights); fees for market research services, tax consulting services, legal, auditing, or such other services; or interest to foreign legal entities, natural persons excluded, shall, when making the payment, calculate and withhold tax at a rate of 15%.

In addition to the current withholding tax (WHT) rate of 15%, an increased rate of 20% applies to all services paid to foreign entities whose place of seat or management is in a country with a profit tax rate below 12.5%. This provision does not apply to EU member countries.

The following countries have a profit tax below 12.5%:

| | | |
|---|---|---|
| Andorra | Gibraltar | Netherlands Antilles |
| Anguilla | Grenada | Niue |
| Antigua and Barbuda | Guernsey | Panama |

| | | |
|---|---|---|
| Aruba | Isle of Man | Saint Kitts and Nevis |
| Bahamas | Jersey | Saint Lucia |
| Bahrain | Liberia | Saint Vincent and the Grenadines |
| Belize | Liechtenstein | Samoa |
| Bermuda | Marshall Islands | Seychelles |
| British Virgin Islands | Monaco | Turks and Caicos Islands |
| Cayman Islands | Montserrat | US Virgin Islands |
| Cook Islands | Nauru | Vanuatu |
| Dominica | | |

Note that tax is not withheld from interest payments on the following:

- Commodity loans for the purchase of goods used for carrying out a taxpayer's business activity.
- Loans granted by a non-resident bank or other financial institution.
- To holders of government or corporate bonds, who are non-resident legal persons.

The WHT rate on dividends is 0%, regardless of the period in which the dividends were received.

## *Tax administration*

### *Returns*

All profit tax taxpayers are obliged to submit an annual profit tax return to the tax authorities no later than four months after the end of the tax period for which profit tax is assessed.

The Ministry of Finance administers taxation matters through the Tax Administration and the Financial Police. These organisations have responsibilities and powers defined by law.

### *Payment of tax*

Every taxpayer is required to make monthly profit tax instalments (on the last day of each month) on the basis of the previous year's tax return.

In the first year of operation, taxpayers are not obliged to pay any profit tax advances.

Profit tax is assessed at the end of the calendar year, and the assessed amount, less any instalments made, is payable by the day of submission of the tax return.

## Significant developments

### Recent political developments

On 10 October 2010, the Netherlands Antilles dissolved, and Curaçao became an autonomous country within the Kingdom of the Netherlands. Prior to dissolution, the Netherland Antilles consisted of five islands: St. Maarten, Curaçao, Bonaire, Saba, and St. Eustatius.

While each of the islands will remain within the Kingdom of the Netherlands structure, the ties between the islands will be loosened. Defence and foreign affairs will remain within the province of the government of the Kingdom of the Netherlands. Also, the judiciary system will remain an integral part of the Kingdom of the Netherlands.

### Compliance with sound international fiscal standards

In recent years, Curaçao, as part of the former Netherlands Antilles, has complied with international standards as set forth by the Organisation for Economic Co-operation and Development (OECD) and the European Union (EU). There is, for example, no distinction in the fiscal treatment of offshore and onshore taxpayers. Well-known incentives such as a participation exemption comparable to that applied in the Netherlands and Luxemburg apply to all taxpayers, as well. Curaçao does not have bank secrecy laws, and the tax information exchange agreements (TIEAs) that in recent years have been concluded with several countries remain applicable to Curaçao.

### Tax treaties

Curaçao currently has tax treaties in effect with the Netherlands (including the Caribbean Netherlands), Aruba, St. Maarten, and Norway. A double tax agreement (DTA) has been negotiated with Jamaica but has not yet entered into force.

Furthermore, TIEAs have been signed with several countries, including Australia, Canada, Denmark, Mexico, Spain, Sweden, New Zealand, and the United States. As a result ,Curaçao, as part of the former Netherlands Antilles, has been moved to the white list of the OECD Global Forum.

### Transitional legislation

While the offshore tax regime was abolished in 2001, qualifying offshore companies incorporated before 1 January 2002 may continue to apply the old regime until 2019, provided that certain conditions are met under transitional legislation.

### Recent tax proposals

The Government has announced that it is planning to review the current tax system. It is looking for a shift from direct tax to indirect tax as well as to broaden the base of the income and corporate income tax, while lowering the tax rate. For the corporate income tax, the Government has introduced a proposal to lower the tax rate from 34.5% to 27.5% for the current year and aims for further reductions to possibly 20% in 2014.

## Taxes on corporate income

Resident corporations are taxed on worldwide income. Non-resident companies are taxed on the following Curaçao-source income:

- Income attributable to a permanent establishment (PE).
- Income from real property situated on Curaçao.
- Interest on loans secured by a mortgage on property situated on Curaçao.

Capital gains are not differentiated from operating income and are subject to the same applicable rates. Corporations are taxed on their income as reflected in their profit and loss account, less certain deductible items.

Companies are generally taxed at a flat rate of 34.5%.

Special minimum rates apply to the taxable income of certain companies:

| Type of company | Rate (%) |
|---|---|
| E-zone companies | 2 |
| New industries and hotels | 2 |
| Land development companies | 2 |

### Shipping business

Shipping companies are subject to the general profit tax rate of 34.5% but may apply for the tonnage regime. If applicable, their profit is calculated based on the rates provided in the table below. If a shipping company applies the tonnage regime, the actual profits or losses are not taken into account, regardless of whether they are regular profits or capital gains.

The calculated profit based on the table below is subject to the general tax rate of 34.5%.

| Over (tons) | Not over (tons) | Profit per net ton (ANG*) |
|---|---|---|
| 0 | 10,000 | 2.00 |
| 10,000 | 25,000 | 1.35 |
| 25,000 | | 0.60 |

* Antilles guilders

### Exempt companies

*Please see the Tax credits and incentives section for information on tax exempt companies.*

### Companies under transitional offshore rules

The transitional rules distinguish three types of offshore companies.

- Offshore companies which, on the last day of the financial year that ended before 1 January 2002, had all (or almost all) investments in or revenues from portfolio investments, royalties, holding companies, finance companies, or technical support subject to tax rates of 2.4% to 3% (while capital gains and losses were not taken into account) will be grandfathered through the last day of the financial year of the company that starts before 1 July 2019.

- Offshore companies which, on the last day of the financial year that ended before 1 January 2002, had all (or almost all) their profit subject to tax rates of 4.8% to 6% or, under certain circumstances, 2.4% to 3% and which had a valid ruling with the tax inspector (e.g. trading companies, banks, captives commissions, and fee-earning companies) on the aforementioned date or for which a request for (extension of) such a ruling had been filed on that date will be grandfathered through the last day of the financial year of the company that starts before 1 July 2019.
- Offshore companies that, on the last day of the financial year that ended before 1 January 2002, had invested all (or almost all) investments in or revenues from real estate property or rights connected thereto, located outside the Netherlands Antilles. These revenues were, under the old offshore regime, exempt from tax. For profit tax purposes, these companies will be grandfathered through the last day of the financial year of the company that starts before 1 July 2019.

Specific rules are applicable to companies that were incorporated after 30 June 1999 but before 31 December 2001. These companies may also qualify for the aforementioned transitional rules provided that these companies have been active in a meaningful way. In principle, a company will not be considered to have been active in a meaningful way if the assets of the companies consist predominantly of deposits or receivables on shareholders or affiliated parties.

The grandfathering period continues until 2019.

## Corporate residence

Corporate residence is, in principle, determined by the place of incorporation. However, other factors may also determine residence. For example, a foreign company with effective management on Curaçao is considered to be a resident. A company that has been established on Curaçao will always be considered a resident of Curaçao.

Offshore entities on Curaçao must have a local managing director. This function is easily provided by one of the many trust companies established on Curaçao.

### Permanent establishment (PE)

The definition of a PE on Curaçao is generally in line with the OECD model.

### Transfer of legal seat

Legislation has been enacted under which a Curaçao company is allowed to transfer its legal seat to another jurisdiction (if permitted under the laws of the outside jurisdiction) and a foreign company is allowed to migrate to Curaçao.

## Other taxes

### Turnover tax

A 5% turnover/sales tax is levied on the revenue derived from services and deliveries rendered by an entrepreneur or company on Curaçao.

A limited number of services and deliveries are exempt, such as:

- Exports.
- Electricity and water.
- Certain services to non-residents.

- Medical services.
- Services at the airport or in the harbour regarding imported or exported goods or goods in transit.
- Advisory and management services provided to or by offshore companies and offshore banks.

An entrepreneur liable to turnover/sales tax must file a declaration, with the Tax Inspectorate before the 16th day of the month following the month concerned, at the Tax Collector's office.

### Excise tax
Excise tax is due on gasoline; alcohol, with different tariffs for liquor and beer; as well as for tobacco.

### Land tax
A land tax is levied on real estate located on Curaçao at an annual rate of 0.3% on the value of the land.

### Transfer taxes
The transfer of immovable property located on Curaçao is subject to a 4% transfer duty.

## Branch income

### Branches operating on Curaçao
Tax rates on the profits of PEs are the same as for resident corporations.

There are specific rules for the PE of an insurance company. In that case, the company may elect to declare profit based on a percentage of premiums received by the PE, as well as premiums the company has received from insured residents and from insured risks on Curaçao. The insurance company may also elect to declare a profit that is in the same proportion to total profit of the company as the aforementioned premiums to total premiums.

No tax is withheld on transfers of profits to the head office.

### Branches of Curaçao-based companies
Curaçao has adopted a definition of a branch (permanent establishment/permanent representatives) that is in line with the definition in the OECD Model Double Taxation Convention on Income and Capital.

The profits of a PE in Aruba, St. Maarten, or the Netherlands, including the Caribbean Netherlands, are tax exempt on Curaçao based on the tax arrangement with the Kingdom of the Netherlands. In the case of a PE outside the Kingdom of the Netherlands (i.e. the Netherlands, Aruba, Curaçao, and St. Maarten), the income realised through the PE, after deduction of foreign taxes, is tax exempt. In the case of a foreign loss, this is not deductible.

Foreign real estate is always deemed to be part of a PE and, as such, is fully tax exempt.

## Income determination

### Inventory valuation

Both the last in first out (LIFO) and first in first out (FIFO) methods of inventory valuation are permitted, provided the chosen method conforms to sound commercial practice. Conformity of book and tax reporting is not required. However, occasions or situations for differences are very rare.

### Capital gains

Capital gains or losses are, in principle, considered ordinary income and subject to standard corporate rates. An exemption from profit tax is granted for advantages (dividends and capital gains) from a qualifying participation *(see Dividend income below)*.

Under the transitional regime for offshore companies (investment, holding, finance, and patent holding companies), capital gains and losses are tax exempt.

### Dividend income

In general, a full participation exemption applies to all local as well as foreign participations for dividends as well as for capital gains. However, it is now required that dividends be derived from an active participation (non-portfolio investment) or a participation that is subject to tax.

Expenses incurred in connection with a qualifying participation (including capital losses) are not deductible, unless it can be demonstrated that these are indirectly incurred to realise profits that are subject to tax on Curaçao.

#### Non-portfolio investment clause

A participation is deemed to be active if the gross income of that participation consists of not more than 50% of dividends, interest, or royalties received other than from an enterprise of that participation.

#### Subject-to-tax clause

A participation is deemed to be subject to tax if it is subject to a tax rate of at least 10%.

If at least one of these clauses has been met, the 100% participation exemption will apply. If none of these clauses are met, the participation exemption is limited to 70% of dividends. Consequently, the dividends would be subject to an effective tax rate of 10.35% (30% x 34.5% regular tax rate).

The 100% exemption also applies to income other than dividends, such as capital gains derived from qualifying participations.

#### Immovable property

The aforementioned clauses do not apply to dividends from a participation that (almost) exclusively (directly or indirectly) holds immovable property. The 100% participation exemption applies to these dividends.

#### Definition of dividend

A dividend is defined as a distribution of profits on shares or profit-sharing notes, paid from statutory profits or profit reserves. Dividends shall not be considered payments for the purchase of own shares or profit-sharing notes, distributions on shares upon liquidation, repayment of paid-up capital, or the distribution of bonus shares.

**Minimum cost-price threshold for participations**
The minimum cost-price threshold for shareholdings, profit-sharing notes, or voting rights of less than 5% is ANG 890,000.

### *Foreign income*
A Curaçao corporation is taxed on foreign interest and other income as earned, and on foreign dividends when received. Undistributed income of foreign subsidiaries is not taxable.

The profit of a PE is tax exempt, and foreign losses are not deductible.

## *Deductions*

### *Depreciation and amortisation*
Depreciation of tangible fixed assets, excluding land, is taken over the estimated useful life of the asset. The depreciable base includes purchase price, customs duties, shipping costs, and installation costs, less residual value, if any. The straight-line method is customary, but the declining-balance method is also acceptable. In addition, an accelerated deduction of one-third of the assets' depreciable basis may be taken. The assets' remaining cost basis (two-thirds) is depreciated using one of the acceptable methods.

The cost basis of certain intangible assets, such as patents, trademarks, and copyrights, can be amortised over their expected useful lives. Goodwill and other intangibles resulting from the excess of purchase price over the cost basis of assets purchased are amortised over three to five years.

### *Charitable contributions*
Charitable donations to qualifying entities within the Kingdom of the Netherlands may be deducted to the extent that they exceed 1% of net income and ANG 100 after utilisation of tax loss carryforwards. The maximum deduction is 3% of net income.

### *Taxes*
Taxes, other than the corporate profit tax itself, incurred in the course of doing business are deductible.

### *Fines and penalties*
Fines and penalties are not deductible in cases where they have been imposed by a criminal court in Curaçao, or have been paid to avoid prosecution, and in cases of administrative fines imposed by a Government agency in Curaçao.

### *Bribes, kickbacks, and illegal payments*
Expenses that are connected to a criminal offence for which a taxpayer has been convicted are not deductible. Bribes paid to public servants and politicians are not deductible.

### *Net operating losses*
Losses may be carried forward for a period of ten years. Start-up losses during the first four years for companies having tax holidays may be carried forward indefinitely. Carrybacks are not permitted.

### *Payments to foreign affiliates*
The Corporate Tax Act provides for specific limitations for deduction of interest in certain cases of restructuring and refinancing involving the creation of artificial flows of interest payments to persons who are tax exempt or subject to lower taxes in their jurisdiction.

## *Group taxation*

### *Fiscal unity*
The Corporate Tax Act provides for fiscal unity treatment for corporate profit tax purposes. Resident companies with wholly owned resident subsidiaries could qualify for this regime. The parent company is entitled to submit one consolidated income tax return on behalf of the entire fiscal unity group. As a result, only the parent company is assessed.

Within certain limitations, losses of one company can be offset against the profits made by another company in the fiscal unity group. No profits need to be recognised on inter-company transactions, as these are disregarded for tax purposes. The fiscal unity applies for profit tax purposes only; the participating entities remain separate and identifiable under civil law.

Fiscal unity relief is confined to companies organised under the laws of Curaçao, the Netherlands, Aruba, or St. Maarten. The companies which invoke this relief must have their place of management on Curaçao.

On the basis of the non-discrimination provision of a relevant tax treaty, entities established under the laws of a tax treaty party may also be admitted to the fiscal unity regime provided that they are resident on Curaçao.

### *Transfer pricing*
There are no specific regulations with regard to transfer pricing. However, based on case law, businesses can be required to show that in case of intra-company transactions, these transactions have been made at arm's length.

### *Thin capitalisation*
In cases where a company receives a loan from an associated exempt private limited liability company (Besloten Vennootschap or BV), and the amount of the loan is more than three times the net equity of the company, the interest on the loan is not deductible for the part that is more than three times the net equity.

## *Tax credits and incentives*

### *Foreign tax credit*
A tax credit applies to income from abroad that has been subject to tax at source or to another tax on income. The tax credit is allowed for the income tax levied abroad, but shall not exceed the Curaçao profit tax that is attributable to that foreign income.

### *Inward investment and capital investment*
There are tax incentives or holidays for the establishment of new economic enterprises and hotels with a predetermined minimum employment and capital investment. Special provisions relate to the taxation of shipping and insurance companies.

### *Investment allowance*
For a minimum investment of ANG 5,000, an 8% investment allowance on acquisitions and improvements (for new buildings, 12%) is permitted as a deduction from taxable profit in the year of investment and in the subsequent year, for businesses operating on Curaçao.

### *Accelerated depreciation and tax rollover reserve*
An accelerated deduction of one-third of the assets' depreciable basis may be taken. If a profit results at the time of sale of capital assets with the intention to replace that asset, the profit may be placed in a tax rollover account.

### *Tax exempt company*
It is possible to elect tax-exempt status for a private limited company (Besloten vennootschap or NABV). To qualify for the exemption, a number of conditions must be met, including (but not limited to) the disclosure of beneficiaries, management, financials, and the activities (only investment and financing activities) of the company. Recently, the licensing of intellectual and industrial property rights and other comparable property and usage rights have been added to the list of allowed activities.

Another condition has been added that requires that no more than 5% of the revenues of the exempt company consist of dividends from subsidiaries that are not subject to a tax regime comparable to that of Curaçao. A profit tax regime is comparable to that of Curaçao if the foreign tax regime provides for a profit tax rate of at least 15% (50% of the Curaçao tax rate, excluding island surcharges).

The subject-to-tax requirement is also met if the foreign tax regime appears on a list of comparable tax regimes. The list that has been issued includes all EU and OECD member states and all jurisdictions with which Curaçao has a tax treaty. According to the list, the subject-to-tax requirement is also met in the case of a jurisdiction that is included in the white list issued by the OECD, provided that no special tax regime is applicable.

#### Independent expert
Currently, an independent expert is required to certify that the exempt company meets the requirements for exempt status. If more than 5% of the revenues of the exempt company consist of dividends from subsidiaries that are not subject to a tax comparable to that of Curaçao, the independent expert must inform the Inspectorate of Taxes. The inspector notifies the company that it no longer meets the requirements for exempt status. The exempt status is then terminated starting the first day of the year following the year in which the notification becomes final.

### *Ocean shipping companies*
Ocean shipping companies are taxed on a fixed profit per net ton of ANG 0.60 up to ANG 2.00 (or per 10 net ton in case of management and control). International aviation companies may apply a reduced tax rate against 80% of their profit, as their profits are deemed to be gained outside of Curaçao. As a result, the overall effective tax rate is 9.66%.

### *E-zone companies*
An e-zone is an area designated for international trade and services. The activities of companies established in an e-zone must be focused on trading or providing services to companies located outside of Curaçao. There are two types of e-zones:

- Designated areas where, amongst others, goods can be stored, processed, machined, assembled, packaged, displayed, and released or handled in any other way. On Curaçao, there are two of this type of e-zone that are dedicated to goods, one located at the harbour, and the other at the airport.
- E-zones where international trade and trade supportive services may be performed, supported by electronic communcation and information equipment (e-commerce). There are several e-commerce zones on Curaçao.

E-zone companies are subject to a minimum 2% corporation tax until 1 January 2026. They will be granted special facilities regarding turnover tax.

### *New industries and hotels*
New industries and hotels are granted partial exemption from profit tax and a minimum 2% tax rate for a period of five to 11 years. A minimum investment is required. Losses incurred during the first four years of operations may be used to offset taxable income for an indefinite period of time.

### *Land development companies*
Land development companies are granted a tax holiday. They are exempt from tax on profits realised on the sale of the developed land. A minimum investment of ANG 1 million is required. Activities should be expected to enhance the economic development of Curaçao.

### *Private foundations*
Private foundations are exempt from Curaçao profit tax, and their distributions are exempt from Curaçao gift tax, as are contributions of assets to the foundation by a non-resident. Gift tax in the contributor's country may be applicable.

The 'private' foundation is a variant of the long-existing 'common' foundation. The most important difference is that the purposes of a common foundation may not include making distributions (other than distributions of an idealistic or social nature). This restriction does not apply to private foundations, whose purpose may include making distributions to the founders and others. A private foundation may not run a business or enterprise for profit. Acting as a holding company or investment company is not considered running a business. The private foundation is intended to be an alternative to the Anglo-Saxon trust, especially in civil law jurisdictions.

### *Mergers, split-ups, and re-incorporations*
In cases of a business merger, relief is granted under certain circumstances. Although there is no specific provision in the Corporate Tax Act with regard to legal mergers, legal split-ups, and re-incorporations, the Tax Inspectorate has announced that when certain conditions are met, a tax facility also applies in these cases.

## *Withholding taxes*

Although a dividend withholding tax (WHT) was approved in 1999, it has been decided that for the foreseeable future this tax will not enter into force. If it is decided that the tax will enter into force, there is a mandatory transitional period during which the tax will not be applicable to legal entities resident at that time on Curaçao.

### *Tax treaties*
Curaçao currently has tax treaties in effect with the Netherlands, Aruba, St. Maarten, and Norway. A double tax agreement (DTA) has been negotiated with Jamaica, but

this has not entered into force yet. Furthermore, TIEAs have been signed with several countries including Australia, Canada, Denmark, Mexico, Spain, Sweden, New Zealand, and the United States. As a result, Curaçao, as part of the former Netherlands Antilles, has been moved to the white list of the OECD Global Forum.

### *Tax arrangement for the Kingdom of the Netherlands (TAK)*

As part of the Kingdom of the Netherlands (TAK), Curaçao is party to a federal tax agreement with the Netherlands, Aruba, and St. Maarten. Subject to this treaty, dividends, interest, and royalties paid out to a Curaçao company may qualify for reduced rates of WHT in the subject countries.

Dutch dividend WHT is 15% if the Curaçao company owns less than 25% of the Dutch company. On Curaçao, only 5% of these dividends are taxed, at a rate of 34.5%, which results in an effective profit tax rate of 1.725%.

If the Curaçao company's interest is 25% or more, Dutch WHT can be reduced to 8.3%. This tax is then paid, under a special procedure, to the Curaçao tax authorities. These dividends are fully exempt from profit tax on Curaçao.

Capital gains derived from shareholdings in Netherlands' corporations are fully exempt from profit tax on Curaçao, provided that the shareholding amounts to at least 25% interest in the corporation. If the shareholding amounts to less than 25%, the capital gain is tax exempt for 95%.

The WHT regime in the TAK also applies to the old Curaçao offshore companies.

The TAK is to be revised.

## *Tax administration*

### *Returns*

Profit tax is levied by way of a self-assessment system. Returns are to be filed on a calendar-year basis. Non-resident corporations may file their returns based on a calendar-year basis or on a different book-year. On request, this may also apply, for example, when a resident company is the subsidiary of a foreign parent company (i.e. only a local company must request for a different tax year end).

A provisional return must be filed within three months after the end of the book-year. A final return must be filed within six months after the end of the book-year.

### *Payment of tax*

Payment is to be made at the time of filing and in a lump sum on the basis of the self-assessment.

In general, at the time of filing the provisional return, an amount equal to the profit tax of the previous year must be paid; the remaining balance due for the year for which the return is filed must be paid at the time of filing the final return.

For example, if the tax due for the year 2009 was 100, then at the time of filing the provisional return for 2010, that same amount must be declared and paid. If there is reason to believe that the amount for the year 2010 will be lower than for 2009, the estimated lower amount may be paid at the time of filing the provisional return, upon request.

At the time of filing the final return for the year 2010, the balance due must be paid; or if the total amount is less than the amount already paid up, a repayment will follow.

### *Statute of limitations*

A reassessment can be imposed until five years after the tax year. In cases where the tax payer is considered to be in bad faith, a reassessment can be imposed until ten years after the tax year.

## *Other issues*

### *Mergers*

The Corporate Tax Act provides for a tax facility for business mergers. In a business merger, a company acquires all or a substantial part of the trade or business of another company with a view towards combining the business operations of the two companies into a permanent financial and economic organisation. If the business is transferred as part of a business merger, the gains realised by the transferor are not subject to profit tax if certain conditions are met.

Although there is no specific provision in the Corporate Tax Act with regard to legal mergers, legal split-ups, and re-incorporations, the Tax Inspectorate has announced that when certain conditions are met, a tax facility also applies in these cases.

### *Exchange controls*

In general, exchange control regulations are very liberal for offshore companies. Offshore companies established on Curaçao can obtain non-resident status for exchange control purposes, which basically provides for total exemption from exchange controls. Onshore companies are subject to slightly stricter rules. These companies are subject to a licence fee of 1%.

## Significant developments

There have been no significant corporate tax developments in Cyprus during the past year.

## Taxes on corporate income

The corporate tax rate in Cyprus is 10% on taxable income.

### Life insurance companies

Profits of insurance companies are liable to corporation tax, similar to other companies, except in the case where the corporation tax payable on taxable profits of a life insurance business is less than 1.5% of the gross premiums. In this case, the difference is paid as additional corporation tax.

### International Collective Investment Schemes (ICIS)

The ICIS law, enacted in 1999, provides the required legal framework for the registration, regulation of operations, and supervision of ICIS. The sole objective of ICIS is the collective investment of funds of the unit-holders.

ICIS can take the following legal forms:

- International fixed capital company.
- International variable capital company.
- International unit trust scheme.
- International investment limited partnership.

ICIS are exempt from tax on profits arising on disposal of titles. Dividend income also is exempt (with minor limitations), whereas interest income is taxed at the rate of 10%.

ICIS set-up in Cyprus can utilise the double taxation treaty (DTT) network of Cyprus.

## Corporate residence

All companies that are tax residents of Cyprus are taxed on their income accrued or derived from all sources in Cyprus and abroad. A non-Cyprus tax resident company is taxed on income accrued or derived from business activity which is carried out through a permanent establishment (PE) in Cyprus and on certain other incomes arising from sources in Cyprus.

Only companies managed and controlled in Cyprus are treated as tax resident of Cyprus.

## Other taxes

### Value-added tax (VAT)

VAT is imposed on the provision of goods and services in Cyprus as well as on the acquisition of goods from the European Union and the importation of goods into Cyprus. Taxable persons charge VAT on their taxable supplies (output tax) and are charged with VAT on goods or services which they received (input tax).

The standard VAT rate in Cyprus is 15%. Two reduced VAT rates, an 8% rate and a 5% rate, apply in Cyprus:

- The reduced VAT rate of 8% applies on accommodation, restaurant and catering services, as well as on certain local passenger transport services. As of 10 January 2011, the term 'restaurant and catering services' includes the supplies of prepared and unprepared foodstuffs and beverages that are accompanied by sufficient support services that enable the immediate consumption of the foodstuffs and beverages supplied.
- The reduced rate of 5% applies on foodstuffs, pharmaceutical products, books and newspapers, as well as on a variety of other goods and services which are beyond the scope of this summary.

Exports from Cyprus are zero-rated (i.e. no VAT must be charged on the export, and the company is entitled to recover the relevant input VAT suffered). The services for the international transport of passengers as well as the transportation of goods either from or to countries outside the EU are also zero-rated.

Supplies of goods to businesses resident in other EU member states are outside the scope of Cypriot VAT. Certain education services as well as the majority of financial, insurance, and medical services are exempt from Cypriot VAT. Supplies of land and buildings also are exempt from VAT, unless the supply relates to new buildings before its first use.

#### VAT registration

VAT registration is compulsory for business with:

- turnover in excess of 15,600 euros (EUR) during the 12 preceding months or
- an expected turnover in excess of EUR 15,600 within the next 30 days.

Business with turnover of less than EUR 15,600, or with supplies that are outside the scope of VAT but for which the right to claim the amount of the related input VAT is granted, have the option to register on a voluntary basis.

An obligation for registration also arises for businesses which make acquisition of goods from other EU member states in excess of EUR 10,251.61 during any calendar year.

In addition, as of 1 January 2010, an obligation for VAT registration arises for businesses engaged in the supply of intra-Community services for which the recipient must account for VAT under the reverse charge provisions. Furthermore, an obligation for VAT registration arises for business carrying out economic activities from the receipt of services from abroad for which an obligation to account for Cyprus VAT under the reverse charge provision exists, subject to the registration threshold of EUR 15,600 per any consecutive 12 month period.

No registration threshold exists for the provision of intra-Community supplies of services.

Exempted products and services, and disposals of items of capital nature, are not taken into account for determining annual turnover for registration purposes.

Registration is effected by completing the appropriate application form.

### VAT declaration and payment/return of VAT

VAT returns must be submitted quarterly, and the payment of VAT must be made by the 10th day of the second month that follows the month in which the tax period ends.

VAT registered persons have the right to request for a different filing period. Approval of the VAT authorities is required. The VAT Commissioner also has the right to request for a taxable person to file one's VAT returns for a different period.

Where in a quarter input VAT is higher than output VAT, the difference is refunded or is transferred to the next VAT quarters.

## *Immovable property tax*

Immovable property is subject to property tax, which is levied on the market value of the property as of 1 January 1980, and is payable by the end of September each year.

The tax rates vary from 0 per thousand to 3.5 per thousand on values of up to EUR 854,300 and 4 per thousand on any excess.

Public property, buildings under preservation order and of charitable organizations, as well as agriculture, are generally exempt.

## *Capital duty*

### Upon incorporation of the company

Upon incorporation of the company, capital duty is due on the authorised share capital at EUR 102.52 plus 0.6% of the authorised share capital.

As for the issued share capital, there is no stamp duty payable if the shares are issued at their nominal value. There is a EUR 17.09 flat duty if the shares are issued at a premium.

### Upon subsequent increases

Upon subsequent increases, capital duty is due on the authorised share capital at 0.6% of the nominal value of the additional share capital.

As for the issued share capital, EUR 17.09 is due on every issue batch, whether the shares are issued at a premium or not and irrespective of the number of shares issued every time.

## *Stamp duty*

The general rule is that Cyprus stamp duty is imposed only on written contracts relating to assets located in Cyprus or to matters that will take place in Cyprus. The applicable rates are based on the value of each document and are 0.15% for the first EUR 170,860 and 0.20% thereafter, subject to an overall maximum of EUR 17,086 per contract.

### *Special contribution for defence*

Special contribution for defense is imposed on income earned by Cyprus tax residents. Non-tax residents of Cyprus are exempt from this special contribution for defence. Special contribution for the defence of the Republic is imposed on certain types of income.

Dividends generally are exempt from defence contribution, subject to certain rarely applicable limitations *(see Dividend income in the Income determination section)*.

Interest received by close-ended or open-ended collective investment schemes (CIS) is never subject to the special defence contributions but is only taxed under corporate income tax after deducting expenses at the standard corporate tax rate of 10%.

Interest received by other companies in the ordinary course of business, including interest closely connected to the ordinary course of business, is again only taxed under corporate income tax after deducting expenses at the standard corporate tax rate of 10%. When companies receive interest that does not satisfy the conditions prescribed immediately above, the interest is subject to special defence contribution without expense deduction at the rate of 10%, except interest received from government savings bonds and development bonds which are subject to special contribution for defence at the lower rate of 3%. Such 'passive' nature interest would, however, be exempt from corporate income tax.

Gross rental income reduced by 25% is subject to special contribution for defence at the rate of 3%.

### *Social security*

Employed persons are compulsorily insured under a state-administered social insurance fund. Contributions to the fund are borne by both employer and employee. The employer's contributions are made as a percentage of earnings to the following funds:

| Funds | Employer contribution (%) |
|---|---|
| Social insurance fund | 6.8 |
| Redundancy fund | 1.2 |
| Training development fund | 0.5 |
| Social cohesion fund | 2.0 |
| Holiday fund ( option for exception) | 8.0 |

With the exception of the social cohesion fund, the maximum amount of monthly earnings on which the contributions are made is EUR 4,342 as of 1 January 2011.

## *Branch income*

The rate of tax on branch profits is the same as on corporate profits. No further tax is withheld on transfers of profits to a foreign head office.

## Income determination

### Inventory valuation
Inventories generally are stated at the lower of cost and net realisable value. Last in first out (LIFO) is not permitted for taxation purposes. First in first out (FIFO) is permitted. Conformity between book and tax reporting is not required.

### Capital gains on immovable property
Capital gains tax is imposed at the rate of 20% on gains arising from the disposal of immovable property situated in Cyprus and of shares in companies (other than companies whose shares are listed in any recognised stock exchange) that own immovable property situated in Cyprus. Liability is confined to gains accruing since 1 January 1980. The costs deducted from gross proceeds on the disposal of immovable property are its market value at 1 January 1980, or the costs of acquisition and improvements of the property, if made after 1 January 1980, as adjusted for inflation up to the date of disposal on the basis of the consumer price index in Cyprus.

Other expenses which are related to the acquisition and disposal of immovable property also are deducted, subject to certain conditions (e.g. interest costs on related loans, transfer fees, legal expenses).

### Dividend income
All dividends received from other Cyprus companies are excluded from all taxes at all times.

Dividends earned from foreign investments are exempt from income tax in Cyprus. Such dividend income is also exempt from special contribution for defence unless:

- more than 50% of the foreign paying company's activities result directly or indirectly in investment income and
- the foreign tax is significantly lower than the tax burden in Cyprus (i.e. less than 5%).

Note that where the Cyprus participation exemption on foreign dividend incomes is not available, then any foreign withholding tax (WHT) imposition on dividends paid to the Cyprus company will be credited against the Cyprus flat tax rate of 15% tax on such dividends. Furthermore, in some cases, underlying tax credit will also be granted.

### Stock dividends
A Cyprus corporation can distribute tax-free dividends of common stock (bonus shares) proportionately to all common stock shareholders.

### Foreign income
Resident corporations are subject to tax on their worldwide income. However, foreign-branch income, as well as dividend income from abroad, is exempt from taxation in Cyprus *(see above)*.

Where foreign income is taxed in Cyprus, double taxation is avoided, either through unilateral relief by giving credit for foreign taxation or by treaty relief. This credit may not exceed the Cyprus taxes imposed on the same income.

Profits from a PE abroad are exempt from income tax. This exemption is always applicable unless:

- more than 50% of the foreign PE's activities result directly or indirectly in investment income and
- the foreign tax on the income of the foreign PE is significantly lower than the tax burden in Cyprus (i.e. less than 5%).

## Deductions

### Depreciation and depletion

Depreciation is computed on a straight-line basis at rates that vary, depending on the life and type of asset. Tax depreciation is not required to conform to book depreciation. Gains on the sale of depreciated property are taxable as ordinary income to the extent of depreciation allowed.

### Charitable contributions

Charitable donations or contributions made for educational, cultural, or other charitable purposes to the Republic, or to approved charitable institutions, are wholly deductible, provided that these expenses are supported with relevant vouchers.

### Taxes

Taxes that are deducted in computing profits for corporate tax purposes include VAT not recovered and the employer's share of contributions to the social insurance and other funds.

### Other significant items

Any expenditure on scientific research of a capital nature for which no capital allowance is granted is deductible from taxable income and spread equally over the year in which it has been incurred and the five subsequent years. Scientific expenditure of a revenue nature is deducted in the year incurred.

Any expenditure incurred on the acquisition of patents, patent rights, and intellectual property is deductible from taxable income, and spread equally over the life of the patents or patent rights.

### Net operating losses

Tax losses can be carried forward indefinitely and set-off against taxable profits of future years. Carrybacks are not permitted.

### Payments to foreign affiliates

A Cyprus corporation can claim a deduction for royalties and interest charges paid to foreign affiliates, and a reasonable amount of head office expenses of an overseas company, provided such expenditures can be justified as having been incurred in the production of the income.

In the case of insurance companies, the amount of head office expenses should not exceed 3% of the net premiums in Cyprus for the general insurance business and 2% for the life insurance business.

## Group taxation

Group relief provisions allow, subject to certain conditions, companies of the same group to transfer losses from the loss-making companies to profitable companies. A group includes only Cypriot resident companies with at least a 75% direct or indirect holding relationship.

### *Transfer pricing*

Cyprus tax law does not contain any transfer pricing provisions. However, transactions between related parties should be carried out at pure commercial terms (i.e. at arm's length).

## *Tax credits and incentives*

The following tax incentives exist:

- Profits from disposals of corporate titles are unconditionally exempt from income tax. 'Titles' is defined as shares, bonds, debentures, founders' shares, and other titles of companies or other legal persons incorporated in Cyprus or abroad and options thereon as well as futures/forwards on titles, short positions on titles, swaps on titles, depositary receipts, repos, units in open or close CIS, ICIS, undertakings for collective investments of transferable securities (UCITS), investment trusts and funds, mutual funds, real estate investment trusts (REITS), and units in stock exchange indices.
- For ship-owning companies, the profits derived by the owner or bare boat charterer of a ship registered in the European Union or European Economic Area (EEA) (as well as foreign subject to conditions) from its operation are fully exempt from all direct taxes. A similar exemption applies to charterers and ship managers. Instead of corporate tax, ship owners, charterers, and managers pay tonnage tax (TT) on the net tonnage of the ships they own, charter, or manage. In addition, there is no tax on dividends paid at all levels of distribution by the above persons out of profits subject to TT and related capital gains on the sale of the ship and no capital gains tax on the sale or transfer of a ship, share in a ship, or shares in a ship owning company. The same legislation also provides for income tax exemption of the salaries and benefits of the captain, the officers, and the crew aboard a Cyprus flag vessel. This treatment applies until 2020 and is compulsory for Cyprus flag ship owners, but optional for other ship owners, charterers, and ship managers.
- Transfers of assets and liabilities between companies can occur without tax consequences within the framework of a tax-exempt qualified reorganisation. Reorganisations include mergers, demergers, partial divisions, transfers of divisions of activities, and exchanges of shares.

## *Withholding taxes*

The following tables give a summary of the WHT provided under the double tax treaties entered into by Cyprus.

### *Paid from Cyprus*

| Recipient | Dividends (%) (1) | Interest (%) (1) | Royalties (%) (1) |
|---|---|---|---|
| Non-treaty countries | 0 | 0 | 0 (2) |
| Treaty countries: | | | |
| Armenia (20) | 0 | 0 | 0 |
| Austria | 10 | 0 | 0 |
| Belarus | 5 (18) | 5 | 5 |

| Recipient | Dividends (%) (1) | Interest (%) (1) | Royalties (%) (1) |
|---|---|---|---|
| Belgium | 10 (8) | 10 (6, 19) | 0 |
| Bulgaria | 5 (23) | 7 (6) | 10 |
| Canada | 15 | 15 (4) | 10 (5) |
| China, P.R. | 10 | 10 | 10 |
| Czech Republic | 0 (29) | 0 | 0 (30) |
| Denmark | 10 (8) | 10 (6) | 0 |

| South Africa | 0 | 0 | 0 |
| Serbia (26) | 10 | 10 | 10 |
| Seychelles | 0 | 0 | 5 |
| Sweden | 5 (8) | 10 (6) | 0 |
| Syria | 0 (8) | 10 (4) | 10 |
| Tadzhikistan (20) | 0 | 0 | 0 |
| Thailand | 10 | 15 (21) | 5 (22) |
| Ukraine (20) | 0 | 0 | 0 |
| United Kingdom | 15 (14) | 10 | 0 (3) |
| United States | 5 (9) | 10 (10) | 0 |

Notes

1. Under Cyprus legislation there is no WHT on dividends, interests, and royalties paid to non-residents of Cyprus.
2. Royalties earned on rights used within Cyprus are subject to WHT of 10%.

3. A rate of 5% on film and TV royalties.
4. 0% if paid to a government or for export guarantee.
5. 0% on literary, dramatic, musical, or artistic work.
6. 0% if paid to the government of the other state.
7. This rate applies for patents, trademarks, designs or models, plans, secret formulas, or processes, or any industrial, commercial, or scientific equipment, or for information concerning industrial, commercial, or scientific experience.
8. A rate of 15% if received by a company controlling less than 25% of the voting power.
9. A rate of 15% if received by a person controlling less than 10% of the voting power.
10. 0% if paid to a government, bank, or financial institution.
11. The treaty provides for WHT on dividends but Greece does not impose any withholding tax in accordance with its own legislation.
12. A rate of 5% on film royalties.
13. A rate of 5% if received by a person controlling less than 50% of the voting power.
14. This rate applies to individual shareholders regardless of their percentage of shareholding. Companies controlling less than 10% of the voting shares are also entitled to this rate.
15. A rate of 10% for payments of a technical, managerial, or consulting nature.
16. Treaty rate is 15%, therefore restricted to Cyprus legislation rate.
17. A rate of 10% if a dividend is paid by a company in which the beneficial owner has invested less than EUR 100,000.
18. If investment is less than EUR 200,000, dividends are subject to 15% WHT which is reduced to 10% if the recipient company controls 25% or more of the paying company.
19. No WHT for interest on deposits with banking institutions.
20. Armenia, Kyrgyzstan, Tajikistan, and Ukraine apply the USSR/Cyprus treaty.
21. A rate of 10% on interest received by a financial institution or when it relates to sale on credit of any industrial, commercial, or scientific equipment or of merchandise.
22. This rate applies for any copyright of literary, dramatic, musical, artistic, or scientific work. A 10% rate applies for industrial, commercial, or scientific equipment. A 15% rate applies for patents, trademarks, designs or models, plans, secret formulas, or processes.
23. This rate applies to companies holding directly at least 25% of the share capital of the company paying the dividend. In all other cases the WHT is 10%.
24. This rate does not apply if the payment is made to a Cyprus international business entity by a resident of Bulgaria owning directly or indirectly at least 25% of the share capital of the Cyprus entity.
25. A rate of 7% if paid to a bank or financial institution.
26. Slovenia, Serbia, and Montenegro apply the Yugoslavia/Cyprus treaty.
27. This rate applies if received by a company (excluding partnerships) that holds directly 25% of the shares. A rate of 10% applies in all other cases.
28. Applies to any consideration for the use of, or the right to use, any copyright of literary, artistic or scientific work (including cinematograph films and films, tapes or discs for radio or television broadcasting), computer software, any patent, trademark, design or model, plan, secret formula or process, or for information concerning industrial, commercial, or scientific experience.
29. This rate applies if received by a company (excluding partnership) which holds directly at least 10% of the shares for an uninterrupted period of no less than one year. 5% applies in all other cases.
30. 10% for patent, trademark, design or model, plan, secret formula or process, computer software or industrial, commercial, or scientific equipment, or for information concerning industrial, commercial, or scientific experience.

Tax treaties pending signature include Armenia, Bahrain, Georgia, Germany, Iran, Monaco, and United Arab Emirates.

## *Tax administration*

### *Returns*

Business organisations are required to prepare audited accounts based on International Financial Reporting Standards (IFRS). Tax returns are completed based on these accounts on a calendar-year basis. The tax return needs to be submitted to the tax authorities by 31 December of the year following the relevant tax year.

### *Payment of tax*

Corporate entities must pay provisional tax on the current year’s income in three equal instalments on 1 August, 30 September, and 31 December. A final payment must be made on or before 1 August of the following year on a self-assessment basis to bring the total payments of tax to the total actually due according to the tax return.

## Significant developments

2010 was not a year rich in corporate income tax (CIT) developments, which may be perceived as a good signal of having relatively stable tax legislation. In 2010, for the first time, residents from other EU member states were expressly permitted to file a tax return for the tax liability on income sourced in the Czech Republic, which allows them to deduct related costs. In cases where their income was subject to withholding tax (WHT), they have a right to have the potential tax overpayment refunded.

2010 also brought certain crucial decisions made by the Supreme Administration Court. Once and for all, contrary to the past standpoint of tax authorities, the court concluded that the costs of financing of dividend payments should be treated as tax deductible.

As of 2011, tax exemptions for green energy sources (e.g. solar and wind energy plants) are no longer valid. A special regime for solar plants has been introduced, namely a special tax depreciation regime and a levy of 26% of the purchase price of electricity to be withheld by the energy distributor from the preferential price paid to the energy producer.

A new Code on Administration of Taxes has come into effect as of 1 January 2011.

The Value-added Tax (VAT) Act has been substantially amended as of 1 April 2011, and the changes are comprised of the following:

- The entitlement to claim input VAT is deferred to the moment when the taxpayer receives a tax document.
- Creditors whose receivable has not been paid are, under certain conditions, allowed to claim refund of VAT.
- VAT payers who purchase goods or services from other Czech VAT payers are exposed to potential liability to pay VAT if their supplier had not paid the output VAT and the purchaser knew, should have known, or might have known that this would be the case.
- The domestic reverse charge mechanism is extended also to the supplies of emission permits and scrap (further extended to the providers of construction works starting from 2012).
- VAT payers must issue a corrective tax document (credit note or debit note) in all situations when they allow an additional discount or goods are returned.

## Taxes on corporate income

CIT applies to the profits generated by all companies, including branches of foreign companies. Corporate partners in general partnerships (i.e. unlimited) and corporate general partners (i.e. unlimited) in a limited partnership are subject to CIT on their share of the profits in the partnership.

Czech resident companies are required to pay CIT on income derived from worldwide sources. Non-resident companies are required to pay CIT on income sourced in the Czech Republic.

The 19% CIT rate applies to all business profits, including capital gains from the sale of shares (if not exempt under the participation exemption regime).

There is a special tax rate of 15% levied on dividend income of Czech tax resident entities from non-resident entities (unless subject to participation exemption).

## *Corporate residence*

A company is resident in the Czech Republic for CIT purposes if it is registered in, or has a place of management located in, the Czech Republic. A Czech tax resident company is liable for CIT on its worldwide income.

## *Other taxes*

The taxes discussed below may apply in addition to CIT.

### *Value-added tax (VAT)*

VAT is charged at 20% on the supply of goods and services within the Czech Republic, but certain supplies (such as groceries) are taxed at a rate of 10%. It is planned that the lower rate will be increased to 14% in 2012. From 2013 onwards, only one unified VAT rate of 17.5% should apply.

Exports are generally exempt from VAT with a credit. Some supplies are exempt without a credit, including the lease of real estate (with certain exceptions), financial and insurance services, radio and TV broadcasting, education, health, and welfare.

#### VAT registration

A company must be registered for VAT if its taxable supplies exceed CZK 1 million for a period of 12 consecutive months or purchases of goods from other EU countries exceeds CZK 326,000 per calendar year. A company can register voluntarily even if its turnover fails to reach the threshold if it renders taxable supplies in the Czech Republic. These are general rules applicable to entities established in the Czech Republic. Different rules apply to non-Czech entities. It is planned that the registration threshold will be reduced to CZK 750,000 starting in 2012.

#### VAT returns and payments

The VAT return must be filed and tax paid within 25 days after the end of the taxable period. The taxable period is a calendar month or calendar quarter depending on taxpayer turnover. Tax overpayment should be returned to the taxpayer by the tax office within 30 days after the request for the tax overpayment refund.

### *Road tax*

Road tax is payable annually with respect to vehicles (including private vehicles) used for commercial purposes. Foreign vehicles are also liable to road tax while in the Czech Republic. Rates vary depending on engine capacity and vehicle size.

### Real estate tax
Real estate tax is payable annually by the owner of land or buildings. The amount of the tax is dependent on area, location, and usage of the land or buildings.

### Real estate transfer tax
Real estate transfer tax is levied on the transferor of real estate at a rate of 3% on the greater of the transaction price or the officially appraised value. The taxpayer is the transferor; transferee acts as tax guarantee.

### Excise taxes
Excise tax is charged on the production or import of tobacco products, wines, spirits, beer, fuel, and lubricants.

### Customs duties
The Czech Republic is an EU member state, and therefore EU customs code applies.

### Stamp duties
There are no stamp duties in the Czech Republic. Certain business operations in which a notary has to be involved by operation of law are subject to notarial fee.

### Environmental taxes
Environmental taxes are imposed on electricity and natural gas, and on certain solid fuels. The environmental taxes have a character similar to excise taxes.

### Social security and health insurance contributions
Employers contribute 34% of the employee’s gross salary to the state health and social security funds. A cap on the premium is available. Substantial changes are expected starting in 2012.

## Branch income

A foreign company can trade in the Czech Republic through a Czech branch. A branch usually creates a Czech permanent establishment (PE) of the foreign entity for CIT purposes (depending on the character of the activities carried out through the branch). The basis of taxation is the same as for corporations (i.e. tax base is calculated as taxable revenues less tax-deductible costs). In some cases, it may be possible for taxpayers to negotiate with the tax authorities regarding the basis on which profits are attributed to the branch.

A branch is liable for tax on its attributable profits at the standard CIT rate.

## Income determination

### Inventory valuation
Stock (i.e. inventory) is valued at cost. Czech legislation specifically provides for the use of the arithmetical average cost and first in first out (FIFO) methods to value stock. Last in first out (LIFO) and the replacement-cost methods (except for livestock) may not be used.

### Capital gains
No separate capital gains tax is levied in the Czech Republic. Capital gains are included in the CIT base and taxed as ordinary income in the year in which they arise.

Capital gains from the sale of shares may be exempt from Czech taxation if all of the following conditions are met:

- The Czech or EU parent holds at least 10% of the shares of the subsidiary for at least 12 months.
- The subsidiary is a tax resident of the Czech Republic or another EU member state.
- Both the parent and the subsidiary have one of the legal forms listed in the Annex to the EU P/S directive.

If the subsidiary is not a tax resident of the Czech Republic or another EU member state, the exemption may be applied, provided that the subsidiary is a tax resident of a country where there is a double-tax treaty (DTT) in place with the Czech Republic, it has a legal form similar to a limited liability company or a joint stock company, it is subject to CIT at the nominal rate of at least 12% in a year when dividends are paid, and the time test of 10% for at least 12 calendar months is met. The time test may be met both prospectively and retrospectively.

### *Dividend income*

Dividends received by Czech tax resident corporations from non-resident entities are subject to a special tax rate of 15%, unless exempt under the participation exemption regime described below.

Dividends paid by Czech tax resident corporations to Czech resident entities are subject to 15% final withholding tax (WHT), unless exempt under the participation exemption regime.

Dividends paid by Czech tax resident corporations to Czech non-resident entities are subject to 15% final WHT, unless exempt under the participation exemption regime or decreased under the relevant DTT.

### *Participation exemption regime*

Dividend income may be exempt from Czech taxation (i.e. WHT, when a Czech company is paying dividends and CIT, when a Czech company is receiving dividends) if all of the following conditions are met:

- The Czech or EU parent holds at least 10% of the shares of the subsidiary for at least 12 months.
- The subsidiary is a tax resident of the Czech Republic or another EU member state.
- Both the parent and the subsidiary have one of the legal forms listed in the Annex to the EU P/S directive.

Regarding dividends paid, provided that conditions above are met, the exemption also applies when dividends are paid by a Czech subsidiary to Switzerland, Norway, or Iceland.

Regarding dividends received, if the subsidiary is not a tax resident of the Czech Republic or another EU member state, exemption on dividends received by a Czech resident may be applied, provided that the subsidiary is a tax resident of a country where a DTT with the Czech Republic is in place, it has a legal form similar to a limited liability company or a joint stock company, it is subject to CIT at the nominal rate of at least 12% in a year when dividends are paid, and the time test of at least 10% for at least 12 consecutive calendar months is met.

### *Foreign income*

Companies resident in the Czech Republic are taxed on their worldwide income. A Czech corporation is taxed on its foreign branch income when earned (accrual basis) and on foreign dividends when approved by general meeting.

The participation exemption regime described above may be applicable.

There is no controlled foreign companies (CFC) legislation in the Czech Republic.

### *Exchange gains and losses*

Realised as well as unrealised foreign exchange gains and losses are accounted for in profit and loss accounts and represent taxable revenues or tax-deductible costs, respectively.

The default functional currency is the Czech koruna (CZK). A Czech company cannot opt for any foreign currency to be the functional currency for tax purposes.

## *Deductions*

### *Depreciation and amortisation*

Methods of tax depreciation are prescribed by tax legislation and are independent from depreciation methods for accounting purposes. Tax depreciation is calculated on an asset-by-asset basis, applying the straight-line or accelerated basis methods of depreciation at statutory rates. Under both methods, depreciation expense in the first year is lower than for subsequent years. The company may choose which method to apply to a new asset, but once the choice is made, it cannot be altered. All assets are classified into six groups, which determine the number of years over which the asset will be written off, as follows:

| Assets | Depreciation group | Minimum depreciation period (years) |
|---|---|---|
| Office machines and computers, tools | 1 | 3 |
| Engines, motor vehicles, machines, audio-visual equipment | 2 | 5 |
| Elevators, escalators, turbines, air conditioning equipment, electric motors, and generators | 3 | 10 |
| Buildings made of wood and plastic, long-distance lines, and pipes | 4 | 20 |
| Buildings (except for those listed in groups 4 and 6), roads, bridges, tunnels | 5 | 30 |
| Administrative buildings, department stores, historical buildings, and hotels | 6 | 50 |

'Tangible assets' (i.e. assets which are subject to tax depreciation) are defined by tax legislation generally as assets with economic useful lives of greater than one year and acquisition prices higher than CZK 40,000. Certain assets, such as buildings, are always considered tangible assets.

Taxpayers are generally not obliged to depreciate a tangible asset for tax purposes every year. Depreciation may be interrupted in any year and continued in a later year without a loss of depreciation potential.

Tangible assets are generally depreciated by the taxpayer with ownership title. Certain exceptions apply, for instance, technical appreciation of a rented asset carried out by a tenant may be depreciated by that tenant, subject to certain conditions.

Depreciation can start only once the assets are put into use and comply with the requirements of specific laws.

Certain assets have special depreciation methods (e.g. moulds are depreciated based on expected life or number of products).

The value to be used as the basis for tax depreciation depends on how the asset is acquired, for example:

- Acquisition cost (construction and equipment costs, architect fees, legal fees, notary's fees, etc.), if the asset is acquired for consideration.
- Internal costs incurred, if the asset is acquired or produced internally.

'Intangible assets' are defined by tax legislation as software, valuable rights, intangible results of research and development (R&D), and other assets regarded as assets for accounting purposes, provided that they:

- were acquired from a third party or developed internally for the purpose of trading with them
- have an acquisition price of more than CZK 60,000, and
- have a useful life of greater than one year.

Intangible assets are amortised for tax purposes based on the number of years that the taxpayer has a license for the assets, if the license is for a limited number of years. Otherwise, amortisation for tax purposes will vary depending on the asset (e.g. software is amortised over 18 months, results of R&D is amortised over 36 months).

### *Travel expenses and meal allowances*
Payments for travel expenses and meal allowances that are made to employees are tax-deductible, but only within the statutory limits.

### *Charitable contributions*
Certain charitable donations are deductible. The minimum deductible donation is CZK 2,000 and the maximum deductible donation is 5% of the tax base (a maximum of up to 10% of the tax base is possible if gifts are granted to universities or R&D centres).

### *Taxes*
Road tax, real estate tax, and most other taxes, with the exception of income taxes, are deductible, as are social security contributions paid by an employer with respect to employees.

### *Other deductions*
Fees paid to members of other statutory bodies of companies for their services are not deductible for tax purposes.

### *Net operating losses*
Losses incurred in a tax year may be carried forward to offset taxable profits generated in the following five tax years. Losses may not be carried back.

### Payments to foreign affiliates

Generally, deductions may be claimed for royalties, management service fees, and interest charges paid to foreign affiliates, provided such amounts are at arm's length.

## Group taxation

Currently, the Czech Republic does not permit group taxation. Each company in a group is taxed individually. Consolidated tax base applies only for the general partners and their shares in profit of their general partnership.

### Transfer pricing

For tax purposes, prices agreed between related parties have to meet the definition of the arm's-length principle, and these prices are often subject to tax audits by tax authorities. The consequences of incorrect transfer pricing adjustments are tax exposure and penalties. In the case of companies receiving investment incentives, incorrect transfer pricing can cause a loss of the investment incentives. Generally, pricing methods as described in Organisation for Economic Co-operation and Development (OECD) guidelines should be followed.

Although there is no legal requirement to keep transfer pricing documentation, in practice it is strongly recommended to keep it as the taxpayer bears the burden of proof upon challenge of prices by tax authorities.

Taxpayers may request the tax administrators to issue an advance pricing agreement (APA) regarding progressing or future transactions between related parties.

### Thin capitalisation

Thin capitalisation rules apply in the Czech Republic and may limit the tax deductibility of interest payments on debt financing from related parties as well as from third parties.

Below is a brief summary of the thin capitalisation rules:

- The tax-deductibility test applies not only to interest but also to all so-called 'financial costs' on loans (e.g., interest plus other related costs, such as bank fees).
- Thin capitalisation applies only to related-party loans.
- The debt-to-equity ratio for related-party loans is 4:1.
- Unrelated-party loans (e.g. bank loans) guaranteed by a related party are not considered related-party loans for thin capitalisation purposes. If, however, a bank provides a back-to-back loan to a Czech entity where the loan is provided to the bank by a related party, such a bank loan to the Czech entity is considered a related party loan.
- Interest on profit-participating loans is not deductible for tax purposes.

### Controlled foreign company regime

There is no controlled foreign companies (CFC) legislation in the Czech Republic.

## Tax credits and incentives

### Foreign tax credit

Foreign tax credits are available only under tax treaties. If credit is not available under a treaty, CIT paid abroad may be deducted as an expense in the following year provided it is imposed on the income included in Czech taxable income.

### Investment incentives

Investment incentives are available only to Czech entities (including Czech subsidiaries of foreign companies) engaged in the manufacturing industry. Incentives include income tax relief, financial support for the creation of new jobs, financial support for training or retraining of employees, and a transfer of land at a specially reduced price.

The former programmes for the support of business support service centres and for the development of technology centres, which were focused primarily on investments in human capital as well as the training or retraining of skilled staff, were abolished based on the decision of the Ministry of Industry and Trade in July 2008. However, these activities currently are supported by the EU structural funds, especially under the operational programmes Enterprise and Innovation.

### R&D allowance

Up to 100% of specific R&D expenses (or costs) incurred in a given tax year may be deducted from the tax base as a special tax allowance. These costs are deducted twice for tax purposes: once as a normal tax-deductible cost and then again as a special tax allowance.

The following costs can be included in the R&D tax allowance:

- Direct costs (e.g. personnel costs of R&D engineers, consumed materials).
- Tax depreciation of fixed assets used for R&D activities.
- Other operational expenses directly related to the realisation of R&D activities (e.g. telecommunications fees, electricity, water, gas).

Only qualifying expenses are deductible for tax purposes and must be separately identified from other expenses (or costs). This allowance does not apply to costs of purchased services or intangible results of R&D acquired from other entities, except for expenses (or costs) incurred in connection with the certification of the results of R&D projects. In addition, expenses that were supported from public sources are also excluded.

Any non-utilised R&D allowance may be carried forward for three subsequent years.

A taxpayer may request a binding ruling with respect to R&D costs from the respective Tax Office in the event that the taxpayer is unsure of whether certain R&D costs are eligible for the allowance.

## Withholding taxes

Czech corporations are required to withhold tax on payments of dividends, interest, and royalties as follows:

| Recipient | Dividend (%) (1) | Interest (%) (2) | Royalties (%) (3) |
|---|---|---|---|
| Resident corporations | 15 | 0 | 0 |
| Resident individuals | 15 | 0 | 0 |
| Non-resident corporations and individuals: | | | |
| Non-treaty | 15 | 15 | 15 |
| Treaty: | | | |
| Albania | 5/15 | 0/5 | 10 |

| Recipient | Dividend (%) (1) | Interest (%) (2) | Royalties (%) (3) |
|---|---|---|---|
| Armenia | 10 | 5/10 | 5/10 |
| Australia | 5/15 | 10 | 10 |
| Azerbaijan | 8 | 5/10 | 10 |

| Switzerland | 5/15 | 0 | 10/5 |
| Syria | 10 | 10 | 12 |
| Tajikistan | 5 | 0/7 | 10 |
| Thailand | 10 | 0/10 | 5/10/15 |
| Tunisia | 10/15 | 0/12 | 5/15 |
| Ukraine | 5/15 | 5 | 10 |
| United Arab Emirates | 0/5 | 0 | 10 |
| United Kingdom | 5/15 | 0 | 0/10 |
| United States | 5/15 | 0 | 0/10 |
| Uzbekistan | 10 | 0/5 | 10 |
| Venezuela | 5/10 | 0/10 | 12 |
| Vietnam | 10 | 0/10 | 10 |
| Yugoslavia (former) | 5/15 | 0 | 10 |

Notes

1. The lower rate applies if the recipient is a company that owns at least a certain amount of the capital or a certain amount of the voting shares of the company paying the dividend directly.
2. The lower rate applies mostly in situations when the interest is received by the government or a state-owned institution or is paid by the government.
3. The lower rate applies mostly to cultural royalties.

## *Tax administration*

### *Returns*

A corporation may choose between the calendar year or an accounting year as its tax year.

Returns must be filed within three months of the end of the tax period.

A three-month extension of the filing deadline is available if a taxpayer is represented by a registered tax advisor or if the taxpayer is subject to a statutory accounting audit.

In some special cases, a filing deadline of less than three months may apply (e.g. upon merger or liquidation). This shorter deadline may, however, be extended if approved by the tax office.

### *Payment of tax*

Tax payments are due on the same day as the filing deadline.

A company is obliged to make CIT advances based on its last known tax liability. The tax advances are paid semi-annually or quarterly, depending on the amount of the last known tax liability.

Upon filing a tax return, tax advances paid during the year for which the tax return is filed will offset the tax liability declared in the tax return. Any outstanding amount must be paid on the date the tax return is due. Any overpayment will be refunded upon request or may be credited against future tax liabilities.

## Significant developments

Taxation of dividends and interest paid by Danish entities to foreign group companies has been a hot topic in Danish taxation in the last year or two. One of the main issues seems to be whether holding companies incorporated in the European Union (EU) can qualify as the beneficial owner of dividends and interest payments received from Danish group entities and, consequently, whether these payments can be remitted from Denmark without source taxation (withholding taxes).

One of the most recent developments within this area was a ruling from the Danish tax tribunal (the highest Danish administrative tax authority) in late December 2010 in which the Danish tax authorities prevailed. Two previous cases from 2010 had been decided in favor of the taxpayer.

The Danish tax authorities brought up these issues when they started to enquire into the tax implications related to inter-company payments and, more specifically, whether Danish entities have complied with the withholding tax (WHT) requirements regarding dividends and interest. After these enquiries, numerous Danish entities belonging to international groups have been asked to pay substantial amounts of non-withheld taxes to the Danish tax authorities. Many of the Danish companies involved in these cases have disputed the claims.

The main focus of the Danish tax authorities seems to be private-equity-owned Danish groups, a number of which have been subject to the enquiries by the Danish tax authorities. However, industrial groups have also been subject to enquiries from the Danish tax authorities.

The increased focus on beneficial ownership has had some related effect on Danish tax legislation enacted in March 2011. Despite Danish tax law not defining the term ‘beneficial ownership’, rules on cross-border mergers and rules on transparent entities (rules targeting adverse consequences of the US ‘check-the-box’ rules) have been amended so as to affect the possibilities for tax exemption and deductibility of interests/royalty payments respectively.

## Taxes on corporate income

According to Danish tax law a territoriality principle prevails. Hence, a Danish company is not taxed on its worldwide income. Instead, income from a permanent establishment (PE) outside Denmark or from real estate located abroad is excluded from taxable income. Non-resident companies are taxed only on profits distributed from income sourced in Denmark.

The corporate income tax (CIT) rate is 25%. There is no local corporate income tax or similar surcharge.

### *Hydrocarbon income tax*
A special CIT is levied on profits from the exploration and extraction of oil and gas on the Danish continental shelf at a rate of 52% under the new system applicable for licenses granted after 1 January 2004 (70% in the old system). CIT (25%) is deductible in computing the hydrocarbon tax.

### *Tonnage Tax Scheme*
Danish tax law provides for a special tax scheme for shipping entities.

The main principle of the Tonnage Tax Scheme is that qualifying shipping entities are not taxed on the basis of their actual income derived from their business but on a fictitious income based on the net tons carrying capability of their fleet used for purposes covered by the Tonnage Tax Act.

The Tonnage Tax Scheme is available to Danish shipping entities organised as limited liability companies (Aktieselskab (A/S) or Anpartsselskab (ApS)), foreign shipping companies with the place of management and control in Denmark, and European Union (EU) shipping companies with a PE in Denmark.

The scheme is available upon application to the Danish tax authorities. A decision to enter into the scheme is binding for a period of ten years.

As a general rule, group related shipping companies based in Denmark must make the same choice regarding the Tonnage Tax Scheme. However, shipping companies that do not have the same management or operating organisation and do not conduct business in related fields may be exempt from the joint decision provision.

The Tonnage Tax Scheme is restricted to certain types of business activities. The entity must carry out commercial transportation of passengers or cargo between different destinations. The ships must be owned or chartered on a 'bareboat' or time-charter with a call/buy option by the company' basis and have a minimum gross tonnage of 20 tons. Certain restrictions apply for ships chartered on a time-charter basis without a call/buy option. The ships must be strategically and commercially run from Denmark.

Income from activities that are carried out in close connection with this business, such as the usage of containers and loading facilities, etc. may also be included in the Tonnage Tax Scheme. Ships used for exploration, diving, fishing, towing, sand dredging, etc. are specifically exempt from the scheme. The same applies for certain types of ships, such as barges, floating docks, etc. However, EU or European Economic Community (EEC) registered ships used for towage activities at sea (i.e. not in and around ports) during at least 50% of its operating time during the income year may be included in the tonnage tax system.

Ship operating companies may also use the Danish Tonnage Tax Scheme. A ship operator is defined as a company doing business with crew management and technical management of ships qualified for use in the tonnage tax system. It is a requirement that the ship operator has taken over the full operating responsibility and all obligations and responsibilities according to the International Safety Management codex.

### Taxable income
The taxable income for the part of the business that qualifies for the Tonnage Tax Scheme is determined for each ship as a fixed amount of Danish kroner (DKK) per 100 net tons (NT) per day according to the following:

| Ship net ton | Fixed amount per day |
|---|---|
| 0 to 1,000 NT | DKK 7.8 per day per 100 NT |
| 1,001 to 10,000 NT | DKK 5.6 per day per 100 NT |
| 10,001 to 25,000 NT | DKK 3.35 per day per 100 NT |
| Over 25,000 NT | DKK 2.2 per day per 100 NT |

The income is taxed at the ordinary corporate tax rate (25%). No deductions relating to shipping income will be allowed. Special rules apply for financial income and financial expenses, and in relation to so called ‘thin capitalisation’. Income that does not qualify for the tonnage tax scheme is taxed according to the general tax provisions in Denmark.

### Depreciation
Shipping entities that apply the Tonnage Tax Scheme from the time of their establishment may not deduct depreciation for tax purposes. Special rules apply for shipping entities that were already in existence when they elected to become subject to the scheme and for entities that elect to include certain other assets at a later point in time that were not previously subject to the scheme.

### Gains on the sale of ships
Gains on the sale of ships that have not been used in the scheme prior to 1 January 2007 are tax exempt. The same applies to gains on the sale of contracts on the delivery of ships, provided that the ship was destined to be delivered after 1 January 2007. Gains on the sale of ships used in the scheme in prior years are taxable. The taxable gain is calculated as the sale price minus the purchase price plus improvements. Any losses on ships acquired and sold within the same income year as the income year in which a gain is realised may be offset against the gain.

## *Corporate residence*

A corporation is resident in Denmark for tax purposes if it is incorporated in Denmark and registered in the Companies Register as having a Danish place of business. Further, foreign companies having their actual place of management in Denmark are also tax resident in Denmark. The actual place of management is typically the place where the management decisions concerning the company’s day-to-day operations are made.

### *Permanent establishment (PE)*
Non-resident companies are only liable to tax in Denmark on business profit if derived trough a PE in Denmark. Domestic law does not provide autonomous rules for determining the existence of a PE. Instead, the existence of a PE is determined according to the guidelines provided in the Organisation for Economic Co-operation and Development (OECD) Model Convention (article 5).

## Other taxes

### Value-added tax (VAT)

The general VAT rate is 25% of the price charged (exclusive of VAT).

Exemption or a special reduced rate of 0% applies to a limited range of supplies (e.g. newspapers; hospital treatment; insurance and reinsurance services; most financial activities, including deposits of money, loans, and provision of loans).

Denmark was one of the first countries to introduce a VAT system. Since the first VAT Act came into force on 3 July 1967, the VAT legislation in Denmark has undergone several changes. The most important changes have been modifications to bring the legislation in line with the Sixth EC VAT Directive (which from 1 January 2007 is officially named the Council Directive 2006/112/EC on the common system of Value Added Tax) and the so-called EU VAT Package1 that entered into force on 1 January 2010.

Compared to the Directive, the Danish VAT legislation includes minor deviations and the use of various discretionary provisions.

All supplies of goods and services by so-called 'taxable persons' (entrepreneurs who independently carry out economic activity) are subject to VAT, unless specifically exempted. The VAT exemptions are restricted to a limited range of services and goods but are nonetheless subject to discussions and complications in the Danish VAT jurisprudence. Transactions are subject to Danish VAT only when they are deemed to take place in Denmark. For the sake of tax neutrality, VAT is also levied on (i) imports (i.e. receipt of goods from non-EU territories), (ii) intra-Community acquisitions (i.e. receipt of goods from EU member states), and (iii) purchase of most types of services from abroad.

In order to avoid VAT being borne by any other than the final consumer, those who qualify as taxable persons can, with some exceptions, recover VAT charged by their suppliers according to the invoice/credit method, provided that the purchases relate to VAT taxable transactions. VAT is recovered either via the periodical VAT return (as a deduction in VAT payable) or by filing a special application.

In general, it is the supplier's responsibility to collect and report VAT on supply of goods or services.

### Customs duties

Denmark is a member state of the European Union, and, according to EU's Common Customs Tariff, many goods imported into Denmark from outside the European Union are subject to customs duties. The rates of duty vary widely between goods.

### Excise duties

According to Danish tax law, several excise duties are levied. Some of the excise duties are enacted based on EU regulations while others are enacted according to domestic law only.

Excise duties are chargeable on a long list of goods, including hydrocarbon oil products, packaging, alcoholic drinks and tobacco, chocolate and products containing sucker, coffee/tea, etc.

The excise duty rates depend on the type of goods (e.g. chocolate, packaging) as well as, in some cases, the category of the goods (e.g. plastic bags, paper bags).

Only goods sold in Denmark (or taken into Denmark) are liable to the Danish excise duties. Companies importing goods into Denmark or companies producing goods in Denmark must be registered with the Danish tax authorities to settle the excise duties. This also applies even though the goods are taken out of Denmark again. If goods are taken from Denmark to another country, difficulties may appear regarding the reimbursement of excise duties paid.

### *Property Tax*
Owners of non-residential property must pay land tax. The land tax rate is set by the municipalities and must be between 1.6% and 3.4% of the value of the land. Municipalities may, furthermore, levy a special coverage charge on certain properties of maximum 1% of the value minus the value of the land. Land tax and coverage charge are deductible.

### *Stamp tax*
Stamp tax is payable on a few documents, such as a deed of transfer of real estate (0.6% of the transfer sum). There is no stamp duty on transfer of shares.

### *Employer's tax (social security charges)*
The employer's contribution to Arbejdsmarkedets Tillægspension (ATP) (i.e. old-age pension) charges is DKK 2,160 per annum for a full-time employee.

Companies that provide VAT-exempt services are liable to pay the employer's tax, which is calculated on the total annual salary cost. The rate can be as high as 9.13%, which is the rate for banks and other financial institutions, the most significant sector paying the employer's tax. This tax is deductible for income tax purposes.

Other than these taxes, an employer's obligation for social security taxes is minimal. The main social security charge is an additional income tax of 8% on salaries and wages, which is borne by employees.

### *Environmental taxes*
Danish companies must pay environmental taxes, which were introduced to reduce companies' energy consumption, discharges of fluids with an environmental impact, and emission. The tax is paid to the company that provides the energy, who pays the tax to the Danish tax authorities.

In general, almost all VAT registered companies in Denmark can receive a reimbursement of some of the environmental taxes. From 2010, the environmental taxes have increased, the possibilities to get a reimbursement have decreased, and the majority of companies will likely suffer a significant increase in tax costs.

## *Branch income*

Danish branches and PEs of foreign companies are taxed under the same rules and rates as Danish resident companies. There is no branch remittance tax or other similar tax on branch profits.

## Income determination

Taxable income generally is calculated as income determined for accounting purposes that is adjusted and modified for several items, as prescribed by the tax laws. Typical timing differences include reserves, work in progress, and depreciation.

### Inventory valuation

Inventory is valuated at either acquisition costs, current market value, or manufacturing costs (if manufactured by the company itself) according to a first in first out (FIFO) principle. The company may opt for different principles for each category of goods and may furthermore change principle from income year to income year, provided certain conditions are met.

### Capital gains

Gains and losses realised on the sale of tangible and intangible assets, including goodwill, are generally included in taxable income. However, gains realised on the sale of shares are tax-exempt if the shares qualify as either ‘subsidiary shares’ or ‘group shares’.

‘Subsidiary shares’ are shares held by a corporate shareholder that holds a minimum of 10% of the share capital in a subsidiary that is located in the European Union, European Economic Area (EEA), or a country with which Denmark has a double taxation treaty (DTT). A special anti-avoidance rule applies, which is targeted at Danish shareholders joining their shareholdings in order to reach the 10% threshold.

‘Group shares’ are defined as shares in companies with which the shareholder is jointly taxed or might be jointly taxed. The definition of a group is therefore the same as in the joint taxation rules and generally corresponds to the definition of a group for accounting purposes. The location where the companies are registered is irrelevant, as long as the companies are affiliated.

If the shares do not constitute group shares, subsidiary shares, or treasury shares, they constitute portfolio shares. Gains on portfolio shares are fully taxable regardless of holding period. Losses on the sale of portfolio shares generally are tax-deductible. However, special rules may apply for losses on unlisted shares.

Gains realised on the sale of real estate property are taxable whereas losses are not tax-deductible unless the property is a building qualifying for tax depreciation. A loss realised on the sale of land and other buildings may be utilised only against taxable profits on the sale of real estate properties in the same year or may be carried forward infinitely.

A capital gain may, under certain conditions, be deferred if the capital gain is reinvested in properties. Reinvestment must be made no later than the income years following the income year of disposal.

Gains and losses on financial instruments generally are included in taxable income, according to the mark-to-market principal, which is required. There are special rules for losses on certain share-based contracts.

### Dividend income

Dividends received on ‘subsidiary shares’ or ‘group shares’ are tax exempt regardless of the length of the ownership period, whereas dividends received on portfolio shares are fully included in taxable income.

Regardless of whether the shares qualify as 'subsidiary shares' or 'group shares', dividends are fully taxable if received from a foreign company that can deduct the dividends paid, unless a tax exemption is provided for in the EU parent/subsidiary directive.

### *Stock dividends*
Stock dividends may be distributed to shareholders free of tax, provided that the dividends are in proportion to the existing shareholdings (i.e. bonus shares).

### *Foreign income*
As a general rule, foreign source income, such as interest, is included in taxable income. However, income from a PE or real estate outside Denmark is excluded from taxable income.

The income of a foreign subsidiary may be taxed in the hands of its Danish parent company if the subsidiary constitutes a controlled foreign company (CFC). *See the Group taxation section for more information.*

## *Deductions*

### *Depreciation, amortisation, and depletion*
Tax depreciation need not be in conformity with book depreciation.

Annual depreciation allowances on machinery and equipment may be claimed under the diminishing-balance method at up to 25%. The depreciation base is the cost of fixed assets less sales proceeds from disposals and depreciation allowances previously claimed.

For ships, the depreciation rate is 20% in the year of construction and a 12% declining-balance basis in subsequent years.

Depreciation allowances on buildings (other than residential buildings and office buildings not adjoining an industrial building) may be claimed at up to 4% on the straight-line basis.

Airplanes, trains, and utility plants can be depreciated only at a 15% declining balance (presently subject to phasing-in rates).

Rails, telecommunications facilities, and certain other long-life plant and equipment can be depreciated only at a 7% declining balance.

Depreciation allowances that are recaptured as part of a capital gain on the sale of an asset generally are fully taxable.

Acquired goodwill and other intangible property rights can be amortised at up to one-seventh per year on a straight-line basis. Costs related to the purchase of patents or know-how (including rights/licenses to utilise patents or know-how) can either be fully expensed in the year of acquisition or amortised over a seven-year period on a straight-line basis.

Certain restrictions regarding the depreciable value of goodwill apply in the case of group transactions. Goodwill on the purchase of shares cannot be amortised for tax purposes.

Depletion of the cost of acquisition or exploitation of natural resources is subject to special rules.

### *Interest expense*

*See Thin capitalisation and interest relief limitations in the Group taxation section.*

### *Taxes*

Taxes are non-deductible for income tax purposes, except for employer's tax and non-recoverable VAT.

### *Net operating losses*

Tax losses may be carried forward indefinitely.

Certain restrictions on the right to carry tax losses forward apply when more than 50% of the share capital or 50% of the voting rights at the end of the financial year are owned by shareholders different from those that held control at the beginning of the income year in which the tax loss was incurred.

Similarly, under certain circumstances, tax losses are cancelled if a Danish company receives a debt forgiveness or comparable transaction. However, there are numerous exceptions (e.g. inter-company transactions).

Tax losses may not be carried back and utilised in previous income years.

### *Payments to foreign affiliates*

A Danish corporation can claim a deduction for royalties, management fees, and similar payments made to foreign affiliates, provided that such amounts are made on an arm's-length basis and reflect services received. Interest at normal commercial rates paid to foreign affiliates generally will be allowed as a deduction but is subject to very complex thin capitalisation and interest relief limitation rules.

## *Group taxation*

### *Mandatory Danish tax consolidation*

A mandatory tax consolidation regime obliges all Danish resident companies and Danish branches that are members of the same domestic or international group to file a joint group tax return. The definition of a group generally corresponds with the definition of a group for accounting purposes. The tax consolidated income is equal to the sum of the taxable income of each individual Danish company and branch that are a member of the consolidated group.

The top parent company participating in the Danish tax consolidation group will be appointed the role of a so-called management company; this company is responsible for settling advance and final corporate tax payments of all group members.

### *Elective cross border tax consolidation*

A non-Danish subsidiary may be included as a member to a Danish tax grouping provided that the group includes all of its foreign companies and branches in the Danish tax grouping. In effect, this all-or-nothing provision rules out the possibility for major international groups to have their Danish subgroup file a Danish group tax return that includes only certain hand-picked (typically loss-making) foreign group members.

If a general cross-border tax consolidation is established, it will be binding for ten years; however, there are certain possibilities of 'breaking' the ten-year period (e.g. in connection with takeovers).

The comments under Mandatory Danish tax consolidation with respect to the calculation of the tax consolidation income, 'management' company, etc. generally also apply to international tax consolidation.

### *Transfer pricing*
Danish transfer pricing rules apply to transactions between related parties (e.g. inter-group transactions), whether the transactions are made between residents or non-residents. The rules apply when a company or person directly or indirectly owns at least 50% of the share capital or 50% of the voting rights in another company.

Companies are obliged to disclose in the annual tax return certain information regarding type and volume of intra-group transactions. Companies also are obliged to maintain detailed and extensive transfer pricing documentation to substantiate that intra-group transactions are conducted in accordance with arm's-length principles. A company is subject to fines for failure to comply with the documentation rules.

### *Thin capitalisation and interest relief limitations*
Danish resident companies and Danish branches of foreign companies are subject to three sets of restrictions, each of which may seriously limit or disallow Danish tax relief for financing costs. There is no recharacterisation of interest as dividends.

Firstly, there is the thin capitalisation rule. This rule works to disallow gross interest costs and capital losses on related party debt to the extent the overall debt to equity ratio exceeds 4 to 1. Related party debt is defined so as to include external bank debt if group member companies or shareholders have provided guarantees to the bank. This rule does not apply if the controlled debt is less than DKK 10 million. When calculating the 4 to 1 ratio, a special consolidation rules applies if two or more companies are considered affiliated (note that the definition of affiliated companies differs from the definition under the Danish rules on joint taxation).

Secondly, there is an asset-based rule. To the extent a Danish company on a stand-alone basis or, if part of a joint tax group, together with group companies has net financing costs in excess of DKK 21.3 million (full-year amount for 2010 and 2011), tax relief may be obtained only within an amount equal to 5% (rate applicable for 2010) of the tax basis of certain assets of the group (rate applicable for 2011 is 4.5%). Net financing costs consist of, among other things, interest income/expenses, taxable gains/losses on debt, receivables and financial contracts, taxable gains/losses on shares, and taxable dividend.

Thirdly, there is an earnings before interest and tax (EBIT) based rule that works to limit interest relief to an amount equal to 80% of the Danish company's/tax group's taxable EBIT income. This rule applies the same definition of net financing costs as the asset-based rule, and it also allows for a minimum deduction of DKK 21.3 million in cases where EBIT is too low or negative.

### *Controlled foreign company (CFC) rules*
According to the Danish CFC rules, a Danish company has to include in its taxable income the total income of a subsidiary, foreign or Danish, if such subsidiary qualifies as a CFC. A subsidiary qualifies as a CFC if all of the following criteria are met:

- The Danish company, together with other group member companies, directly or indirectly owns more than 50% of the capital or controls more than 50% of the voting rights in the subsidiary.
- More than half of the subsidiary's taxable profits, as hypothetically assessed under Danish tax laws, are predefined CFC income types (mainly interest, royalty, capital gains, etc.).
- During the income year, the subsidiary's CFC assets (assets, where the return is characterised as a CFC income type) make up more than 10% of the subsidiary's total assets.

There is no black or white list that exempts subsidiaries resident in certain countries.

## *Tax credits and incentives*

### *Capital expenditure incentives*

A small variety of tax incentives are available in the form of deductions for capital expenditures.

Danish tax law allows for an immediate write-off of capital expenditures for research and development (R&D). Alternatively, the taxpayer may choose to take tax depreciation in the same year and the following four years on a straight-line basis. Costs incurred in connection with the exploration for raw materials may also be fully deducted in the same year.

Costs related to purchase of patents, know-how (including rights/licenses to utilise patents or know-how) may either be fully expensed in the year of acquisition or amortised over a seven-year period on a straight-line basis.

### *Foreign tax credit*

According to Danish tax law, relief is generally available to credit foreign tax paid on non-Danish source profits against the Danish tax on the same profits. As Danish companies are not taxed on income from foreign PEs or properties, the rules have limited application.

For share holdings of 10% or more of the share capital in foreign companies, Denmark has further rules allowing 'underlying' tax relief in respect of foreign dividends, so that tax suffered at lower levels can be relieved where dividends flow to Denmark via a chain of companies. As Danish tax law, as a main rule, exempts dividends from companies resident in countries with which Denmark has a tax treaty in which the Danish recipient company holds 10% or more, this rule, as well, has a limited application.

## *Withholding taxes*

### *On payments to foreign corporations and non-resident aliens*

**Dividends**

Dividends paid to a parent company in another EU member state or a state with which Denmark has a DTT are exempt from WHT provided that the shares qualify as subsidiary shares. The same applies for dividends paid on group shares (that are not also subsidiary shares, i.e. holdings below 10%), provided that the recipient company is resident within the EU/EEA.

Dividends paid on portfolio shares to a foreign shareholder are levied WHT of 28%. A change in law has reduced the rate to 27% with effect from 2012. If the portfolio shareholder is situated in a country with which Denmark has a Tax Information Exchange Agreement (TIEA), the tax rate on the dividend is reduced to 15% and the difference between the higher WHT rate and the lower WHT rate may be reclaimed. However, the reduced rate does not apply if the shareholder is resident outside the European Union and together with related entities owns more than 10% of the capital in the Danish distributing company.

### Interest

Interest generally is not subject to WHT unless paid to a foreign group member company that is tax resident outside the European Union and outside any of the states with which Denmark has concluded a tax treaty. In this situation, interest WHT is levied at 25%. Certain other exemptions apply, mainly relating to CFC taxation.

### Royalties

Royalties are subject to a 25% WHT. In most cases, the payer may reduce its withholding in accordance with the tax treaty applicable to the payee. Also, the EU Interest/Royalty Directive may provide an exemption from WHT if the payee is an immediate parent, sister, or subsidiary company resident in the European Union.

Notes

1. Denmark does not operate a system of WHT on dividends when the parent company holds:
   a. at least 10% of the share capital of the distributing Danish company, provided the receiving company is resident in a EU/EEA member state or a state with which Denmark has entered a double tax treaty (subsidiary shares) or
   b. less than 10% of the share capital in the distributing company, provided that the receiving company is an EU/EEA-resident and the distributing and the receiving company are affiliated companies (group shares).
2. Interest generally is not subject to WHT unless paid to a foreign group member company that is tax resident outside of the European Union and outside of any of the states with which Denmark has concluded a tax treaty. In this situation, interest WHT is levied at 25%.
3. Exemptions apply if the receiving company is directly or indirectly controlled by a Danish parent company or if the receiving company is controlled by a company resident in a state with which Denmark has a double tax convention and that company may be subject to CFC taxation. Finally, an exemption applies if the receiving company establishes that the foreign taxation of interest is not less than three-quarters of the Danish corporate taxation and that the interest is not paid to another foreign company subject to taxation less than three-quarters of the Danish corporate taxation.
4. Denmark has terminated its treaty with Spain and France with effect from 1 January 2009. The termination means that each country will tax the relevant income according to its domestic tax rules. New treaties are not expected to be agreed in the near future. Companies in Spain and France receiving dividends from a Danish company may, however, qualify for tax exempt dividends since they are EU member states.
5. The EU Interest/Royalty Directive may provide an exemption from WHT if the payee is an immediate parent, sister, or subsidiary company resident in the European Union.
6. Serbia has succeeded in the treaty between Denmark and Yugoslavia.
7. Different rates apply depending on the characteristics of the assets on which royalty is paid.
8. The 10% rate is applicable for royalties, whereas the 5% rate is applicable to fees for technical support.

## *Tax administration*

### *Returns*

Tax returns are completed on the basis of audited financial accounts with adjustments for tax. Tax returns should be filed no later than six months following the end of the accounting year. Corporations with an accounting year-end that falls in the period from January 1 to March 31 must file a tax return no later than 1 August in the same calendar year.

The tax system, in practice, is based on self-assessment. Tax assessments are made automatically by the tax authorities on the basis of the tax return. However, the tax authorities may subsequently audit the tax return.

### *Payment of tax*
Corporate income tax must be paid on a current year basis in two equal instalments due on 20 March and 20 November. The authorities request payments of 50% of the average of the last three years' final income tax. In addition, voluntary additional payments may be made at the same dates; such voluntary payments are adjusted by 0.7% when set against the final tax bill.

The final tax bill is settled by 20 November in the following year. Underpaid tax is then payable by 20 November with a surtax of 5.1% of the tax amount (for the 2010 tax year). Overpaid tax is refunded by November of the following year with interest of 1.6% (for the 2010 tax year).

### *Statute of limitations*
The general statute of limitations is 1 May in the fourth calendar year after that of the end of the relevant accounting period. This limitation is extended for another two years with respect to inter-company (transfer pricing) issues.

## *Other issues*

### *Tax-free restructuring*
Restructuring, such as mergers, demergers, share exchanges, drop-down of assets, etc., can, in many cases, be carried out tax-free under the provisions of the EU Mergers Directive as implemented into Danish law. These types of restructuring can be carried out in a tax-exempt manner without prior approval from the tax authorities. However, several objective conditions must be fulfilled. Formation, merger, reorganisation, and liquidation expenses are mostly non-deductible.

## Significant developments

### General Norm 01-11 of 4 March 2o11

Legal entities that purchase advertising services, or other services subject to value-added tax (VAT) from a non-for-profit entity, shall serve as VAT withholding agents. All expenses incurred from receiving such services will be deductible against income tax returns provided (i) withholding tax (WHT) is made and (ii) such expenses have a fiscal supporting document number (NCF).

Non-profit entities are not bound to file monthly Tax on the Transfer of Industrialized Goods and Services (ITBIS) tax returns unless the totality of such tax was not withheld.

### General Norm 02-11 of 10 March 2011

A new corporate vehicle 'Simplified Stock Company' is added to the definition of legal entities, which shall have the same tax treatment as stock companies regarding Capitalization Tax (1%) for its incorporation or capital increase. Furthermore, Tax Authorities may inactivate Tax Identification Numbers (RNC) in the following cases: (i) the fiscal domicile registered by taxpayers does not correspond to the social domicile or to the company's main establishment and (ii) non-compliance to the dispositions of the Dominican Tax Code.

### Decree 162-11 of 15 March 2011 (modified by Decree No. 294-11 of 12 May 2011)

All requests for tax exemptions granted by any law, concession, or contracts duly ratified by the National Congress shall be submitted before the Ministry of Finance for its analysis and process. Furthermore, Tax and Custom Authorities will only admit tax exemptions approved by the Ministry of Finance. These dispositions do not apply to exemptions that benefit diplomatic and consular missions, duly credited, nor religious entities signatory to the Catholic, Apostolic, and Roman Church.

Prior to this Decree, the tax exemption requests were channelled through Tax Authorities.

### Ruling No. 293-11 of 12 May 2011

This Decree modifies Ruling No. 140-98 for the Application of Title III of the Dominican Tax Code. The main modifications include the following:

- The concept of the persons subject to this new legislation is broadened, adding those that lack civil personality and capacity but are considered an economic unit.

- Transfer of industrialised goods, even when discount applies, and services, whether there is a counterpart or not, are VAT generating activity, as well as the transfer of industrialised goods for promotion (samples), exchange for other goods/services subject to VAT, and goods for waste.
- Services rendered are subject to VAT, even if it isn't expressly stated in the contract.
- VAT payment obligation to:
  - debtor when a debt is liquidated through a 'giving in payment'
  - creditor when the event that generates the debt occurs, and
  - those that exchange industrialized goods for the good received.
- Lease of ships and airplanes are subject to VAT.
- Airfares bought abroad are subject to VAT, provided the departure is Dominican Republic (DR).
- Charge on excess luggage weight, made by airlines or ships, are subject to VAT. Foods and beverages offered in said transportation are not.
- Non-VAT taxpayers shall file a VAT return if these have acted as withholding agent for this tax.
- Services benefited by entity's owners, partners, managers, shareholders, legal representatives, and similar, are subject to tax.
- VAT obligation of goods missing on inventory is generated from the moment the good is missing.
- VAT for the return of goods after 30 days of the generation of the taxable event should be assumed by the entity that makes the return.
- Excise Tax will be part of VAT's taxable base, except for telecommunication services.
- Introduces transfer pricing concept for determining VAT's taxable base on the transfer of goods/services between related parties.
- Air or maritime cargo is not part of VAT taxable base when the service is rendered from abroad into the Dominican Republic or vice-versa.
- VAT compensation or refund request may be made when filing VAT return (Form IT-1) in which it shall reflect the fiscal credit.

### *Pending legislation*

Please note this information is current as of 1 June 2011. Typically, pending legislation is announced in June or July. Please visit the Worldwide Tax Summaries website at www.pwc.com/taxsummaries to see any significant corporate tax developments that occurred after 1 June 2011.

## *Taxes on corporate income*

The Dominican Republic follows a territorial concept, ergo the tax treatment for corporations, partnerships, and limited liability companies is similar in most aspects.

The current corporate income tax rate is a flat rate of 25%. Please note that the asset tax is an alternative minimum tax that is payable when it is higher than a company's corporate income tax liability *(see Asset tax in the Other taxes section)*.

Dividends remitted abroad or paid locally by Dominican entities (not applicable to branches or permanent establishments) are subject to a WHT of 25%. This WHT may be used as a credit against the company's corporate income tax of the same tax year as long as the dividends were paid out of profits which had already been subject to the corporate income tax.

# Dominican Republic

## *Corporate residence*

A company is resident when it is registered or incorporated under the laws of the Dominican Republic. Foreign entities are considered as residents when they are registered in the Dominican Republic as a branch or permanent establishment (PE), and they are subject to local tax in the same manner.

## *Other taxes*

### *Value-added tax (VAT)*

In the Dominican Republic, VAT is known as Tax on the Transfer of Industrialized Goods and Services (ITBIS). The ITBIS is a VAT applied to industrialised goods (movable) and services, with exemptions established by law to certain goods and services. The rate is 16%. 0% rates apply to exports, including sales to Free Trade Zones.

### *Internal and consumption taxes collected at customs upon import*

These taxes are assessed at various rates depending on the nature of the goods and their country of origin since free trade agreements exist (e.g. the United States-DR-Central American Free Trade Agreement (CAFTA)) which decrease the custom duty rates for goods imported from the member countries.

#### Selective Consumption Taxes (ISC)

The ISC is applied to the acquisition or import of certain goods and services.

There is an ISC for alcoholic goods and cigarettes, adjusted by inflation annually:

- Alcohol: ranges from 356.84 Dominican Republic pesos (DOP) to DOP 437.56 for every litre of pure alcohol.
- Cigarettes: DOP 33.24 for a 20 pack and DOP 16.62 for a 10 pack.

There are ISC that vary based on the product, which range from:

- 7.5% on the transfer of alcoholic beverages, applied on the retail price. Imports and transfers made by local manufacturers are accountable for this tax.
- 20% on the transfer of tobacco products, applied on the retail price. Imports and transfers by local manufacturers are accountable for this tax.
- 19.50% to 130% on the consumption of certain imported goods (listed in the law) that are considered to be non-essential.
- 10% on telecommunications services.
- 16% on insurance services.
- 0.0015% on the value of cheques or wire transfers made through financial entities (this tax does not apply to cash withdrawals or credit card use).

### *Real Property Transfer Tax*

The Real Property Transfer Tax is assessed at a basic rate of 3% on any transfer of ownership of real estate.

### *Stamp taxes*

Stamp taxes have been abolished.

### *Asset tax*

Asset tax/Law No. 557-05 imposes a 1% tax on total assets, net of depreciation, amortization, and bad debt reserves. Share investments in other companies, land in rural areas, immovable property pertaining to livestock and agriculture, asset revaluations, and tax advance payments are excluded from this tax base.

The asset tax is a minimum tax filed and liquidated through the Annual Corporate Income Tax Return (Form IR-2) and paid, applying the following rules:

- The income tax is allowed as a credit against the asset tax.
- If the income tax is greater than the asset tax, the obligation to pay the asset tax is cancelled and the income tax is paid instead.
- If the income tax is less than the asset tax, the difference (in order to complete the asset tax value) shall be paid in two equal instalments as follows:
  - First instalment: shall be paid during 120 days subsequent to closing date.
  - Second instalment: shall be paid within six months after first quote's due date.

Entities may request a temporary exemption from the asset tax. Entities that require large capital (among other requirements established by General Ruling 3-06) may make such a request, which should be submitted at least 90 days before the filing due date. The local internal revenue service shall evaluate the merits of the request and approve or deny, as appropriate.

If the entity has an income tax credit arising from excess advance payments, it may request the refund of such balance be applied against the asset tax.

In the case of financial institutions, power generation and distribution companies, pension fund entities, and stock brokerage companies, the tax is calculated based on the fixed assets book value.

According to Rule 07-2007, construction companies may seek exemption from the asset tax, provided that such entities meet the requirements established in this rule.

## *Branch income*

Branch profits are taxed at the same rate as corporate profits (25%). There is no WHT on branch profit remittances to the company's headquarters, provided that the corresponding annual corporate tax has been paid.

## *Income determination*

### *Inventory valuation*

The last in first out (LIFO) method of inventory valuation is accepted for tax purposes. Other methods may be authorised upon request.

Conformity between book and tax reporting is not required.

### *Capital gains*

Capital gains are added to the ordinary taxable income and subject to the same tax rate of 25%. Capital gains are defined as the difference between the sale price of an asset and the acquisition or production price adjusted for inflation.

### Dividend income
Dividend distributions are subject to a 25% WHT, which should constitute a tax credit against the annual corporate income tax corresponding to the same taxable year in which the distribution was made.

### Stock dividends
Stock dividends are not subject to taxation.

### Foreign income
Dominican-resident companies, branches, and PEs are subject to taxation on income from Dominican sources and on income from foreign sources arising from investments and financial gains. Tax determined on income from foreign source is subject to a credit mechanism. Taxes paid in the country where the income is originated can be credited up to the amount of the tax payable in the Dominican Republic on the same income.

## Deductions

### Depreciation and depletion
Depreciation allowances on fixed assets are determined by the declining balance method at the following rates:

| Assets | Rate (%) |
|---|---|
| Buildings | 5 |
| Office furniture, fixtures, computers, light vehicles, etc. | 25 |
| Other assets not specified | 15 |

The fiscal book value is adjusted by the annual inflation rate.

### Taxes
In principle, income taxes, as well as taxes related to inheritances, donations, and fringe benefits, are not deductible. Interest and surcharges imposed on taxes are not deductible in general.

### Other significant items
For tax purposes, the following significant items should be considered:

- Bad debts are deductible only in the year the loss is suffered. Authorisation may be obtained to use an alternative method, which consists of creating a provision allowing the deduction only in the year the bad debts qualify as doubtful, up to 4% of the balance of the accounts receivable at year-end.
- Amortisation of intangible assets (e.g. patents, author's rights, drawings, franchises, and contracts without set expiration date) is not deductible.
- Changes in methods are not allowed without prior approval.
- Bonuses paid to employees within 120 days after the end of the taxable year are deductible for the year just ended.

### Net operating losses
The carryforward of losses of legal entities can be used to offset profits up to the fifth period following the period in which the losses were generated, with a maximum amortisation of 20% in each period. For the fourth period, the deduction allowed

should not exceed 80% of the net taxable income. In the fifth period, the percentage is 70%.

### *Payments to foreign affiliates*
Payments to foreign affiliates for royalties, interest, or service fees are deductible, provided that the 25% WHT was paid.

Payments of interest on loans abroad to foreign financial institutions are subject to a WHT of 10%.

## *Group taxation*

Group taxation is not permitted in the Dominican Republic.

## *Tax credits and incentives*

In the Dominican Republic, tax incentive laws exist for the following:

- Tourism.
- Alternative energy.
- Industrial renovation and modernisation.
- Industrial Free Trade Zone operations.
- Border development.

## *Withholding taxes*

Dividends in cash to resident and non-resident individuals and corporations are subject to a WHT of 25%.

The WHT on payments to foreign corporations, which are not permanently established in the Dominican Republic, are as follows:

| Recipient | Interest/dividends (%) | Royalties (%) | Technical assistance (%) | Other services (%) |
|---|---|---|---|---|
| Non-treaty, basic | 25* | 25 | 25 | 25 |
| Treaty (Canada) | 18 | 18 | 25 | 25 |

* Payments on interest (loans) to foreign financial institutions are subject to a WHT of 10%.

## *Tax administration*

### *Returns*
The Corporate Annual Tax Return (Form IR-2) must be filed and taxes paid within 120 days after year-end. Tax authorities may allow extensions of up to 60 days, upon request.

Tax returns are based on self-assessment and must be filed on electronic forms supplied by the internal tax department.

### *Payment of tax*

The balance of any tax due must be paid no later than the due date for filing the return. Corporations domiciled in the country and PEs of foreign enterprises shall be obliged to make monthly advance payments of tax related to the period in progress.

### *Year-end dates established by the DR tax code*

Corporate bylaws should establish as year-end, one of the following: 31 December, 31 March, 30 June, or 30 September. Once the year-end is selected, any change should be authorised by the tax authorities.

### *Example of income tax calculation for the year ending 31 December 2010*

| **Pre-tax income** | **DOP 1,000,000** |
|---|---|
| Add: | |
| Non-deductible expenses: | |
| Charitable contribution in excess of limitation | 25,000 |
| Tax on compensation-in-kind (120,000 at 25%) | 30,000 |
| Total of non-deductible expenses | 55,000 |
| | |
| Deduct: | |
| Dividends from domestic operation | 50,000 |
| Carryover loss | 100,000 |
| Total deductions | 150,000 |
| | |
| Taxable income | 905,000 |
| | |
| Tax at 25% | 226,250 |

# Ecuador

## Significant developments

As in previous years, a new tax reform was introduced at the end of 2010, with the publication of the Production Code. The reform intends to promote new investments within the country by granting tax holidays for up to five years *(see the Tax credits and incentives section for more information)*.

The International Financial Reporting Standards' (IFRS) implementation deadline for companies (except for financial institutions) was suspended until 2012 (for entities with assets lower than 4 million US dollars (USD)). As to date, the local Internal Revenue Service has not established the tax treatment for the accounting records that were or may be booked as a consequence of the implementation of the IFRS.

## Taxes on corporate income

Taxes on corporate income are levied at the following rates for fiscal year 2011:

| Income | Rate (%) |
|---|---|
| Distributed or undistributed profits of local corporations and branches | 24 |
| Reinvested profits of local corporations and branches | 14 |

Note that these rates are reduced annually by 1% until they reach 22% and 12%, respectively, in 2013.

Resident entities are taxed on their worldwide income. Non-resident entities are subject to tax on Ecuadorian-source income only.

## Corporate residence

Corporate residence is determined by the place of incorporation. For foreign branches, it is the place stated in the domiciliary deed.

### Permanent establishment (PE)

According to the tax legislation in force, a company can be deemed to have a PE in Ecuador if it maintains any place or fixed center within the country, in which a foreign company develops all or part of its activities.

In that sense, the corresponding regulations point out that a PE also exists when a foreign company maintains within the country a person or an entity that acts on its behalf and habitually exercises an economic activity. Said regulations contemplate several instances where this is applicable, among them:

- A person with legal representation, which is normally granted through a power of attorney or through a legalized decision by the company and includes the capacity to legally act on behalf of the company.
- A person working under a contractual relationship for a foreign company to carry out economic activities on behalf of that company.
- A centre for the direction of the activities of the foreign company.
- A branch, agency, or office that acts on behalf of the foreign company.
- An office for the provision of technical consultancy services related to contracts that are executed in the country.

## *Other taxes*

### *Value-added tax (VAT)*

VAT is levied at the rates of either 12% or 0% on the ownership transfer of goods, import of goods and services, as well as services rendered within the country or imported. Royalties and intangible property imported or locally paid are also levied with a 12% VAT.

The following are transactions exempt from VAT:

- In-kind contributions to capital of companies.
- Inheritance and assets obtained from liquidation of companies.
- Transfer of business as a whole, amalgamations, mergers, takeovers, and spin-offs.
- Donations to public entities and non-profit organisations.
- Transfers of shares and securities.

Goods and services which are subject to 0% rate are explicitly listed in the law.

Among others, the following goods are taxed at a 0% rate upon either importation or local transfer of ownership:

- Most agricultural goods and foodstuff, when these remain in their natural state; this includes refrigerated or packaged goods that have not undergone further processing. Also included in this category are milk, meats, sugar, salt, bread, butter and margarine, flour, and cooking oil.
- Drugs, medicines, and other pharmaceutical products, including raw materials for their production.
- Fertilisers, insecticides, animal foods, and similar products, including the raw materials required for processing such goods.
- Agricultural machinery and equipment.
- Goods that are exported.
- Paper, books, magazines, and newspapers.

Among others, the following services are taxed at a 0% rate:

- Transportation of persons and cargo, except air transportation of persons and local air transportation of cargo.
- Book printing services.
- Housing rental.

- Water, electric, sewage, and other public services, including garbage collection.
- Financial services.
- Exported services.

12% VAT paid on imports and local purchases can be deducted from 12% VAT charged on sales or services rendered. The VAT paid on raw materials, fixed assets, or components required for the production of goods or rendering of services is also creditable when the final product is considered taxable at 12%. Similarly, VAT paid on raw materials, services, components, or fixed assets necessary for production of export goods is also recoverable.

VAT may not be recovered (by either tax credit or other means) on the local acquisition or import of goods and services that are used for the production of goods or services taxed at a rate of 0%. In these cases, non-recoverable VAT is part of the cost of the purchased goods and services or an expense, both deductible for income tax computation purposes.

Companies designated as 'special taxpayers' (qualified as such by the tax authorities, which, in recognition of its economic importance defined in special parameters, contributes to the effective collection of taxes, subject to special regulations regarding the compliance of their formal duties and payment of taxes) are required to withhold 30% of VAT applicable on their purchases of goods taxed at 12% and 70% of VAT applicable on their purchase of services taxed at 12%, except with respect to services rendered by professionals, in which case 100% of VAT charged must be withheld.

### *Customs duties*

Since Ecuador is a member of the Andean Community, goods to be imported are classified under the Common Nomenclature of the Andean Countries participating in the Categena's Agreement (NANDINA) Pact, which is based on the Customs Cooperation Council Nomenclature (also known as the Brussels tariff nomenclature). Most consumer good imports pay 20%, while intermediate goods are usually imported at a 10% or 15% rate. Raw materials and capital goods generally pay 0% to 5%. Ecuador has negotiated exceptions under the Andean common tariff that allow lower duties on certain capital goods and industrial inputs. There is duty-free import of agricultural goods and equipment.

The price listed on the commercial bill or invoice is the basis for the assessment of duties, except when the Central Bank of Ecuador (CBE) considers the listed price unreasonable, in which case market prices in arm's-length transactions will be used. The burden of proof lies with the importer.

In addition to import duties, all imports are subject to 12% VAT, 0.25% for CORPEI (Exports and Investment Promotion Corporation), and an additional 0.5% tax for the Children's Development Fund.

Except for the 0.25% for CORPEI, which is based on the free on board (FOB) value, all other charges are based on the cost, insurance and freight (CIF) value of the merchandise.

All Ecuadorian imports and exports are subject to inspection by authorized international verification companies operating in the country (there are some imports exempt from verification). Goods are appraised for value, quantity, quality, and weight at the port of origin.

### *Municipal asset tax*
The municipal asset tax is levied on all individuals and companies required to keep accounting records in accordance with Ecuadorian tax legislation. This tax is levied annually at a rate of 1.5 per thousand (or 0.15%) of total assets less current and contingent liabilities, as shown on the balance sheet.

### *Municipal real estate tax*
The city governments assess an annual municipal property tax, which ranges between 0.25 per thousand and 5 per thousand (0.025% to 0.5%) of the commercial value of the property, as determined by valuation carried out every five years by the city government, for both urban and rural properties (rural property is taxed at a maximum of 3 per thousand or 0.3%).

### *Municipal tax on capital gain in the transfer of real estate (Plusvalía)*
The real estate transfer tax applies to the transfer of real estate. It is taxed at 10% of profits.

### *Special consumption tax (Impuesto a los Consumos Especiales, ICE)*
ICE is imposed on domestic and imported goods which are explicitly listed in the law. This tax is levied at a progressive rate from 5% to 35% on certain automobiles and 15% on airplanes, helicopters, and boats. The tax on cigarettes, alcoholic beverages, and soft drinks ranges from 10% to 150%. It must be paid monthly and is collected upon sales. The ICE tax base for imported goods is the *ad valorem* value.

### *Foreign assets tax (Impuesto a los Activos en el Exterior)*
The tax base for the foreign assets tax is the average monthly balance of cash deposits held in foreign entities by private entities registered in the stock market and regulated by the Superintendent of Banks and Companies. The monthly tax rate is 0.084%.

### *Remittance tax (Impuesto a la Salida de Divisas)*
Remittance tax is imposed on the transfer of money abroad in cash or through cheques, transfers, or courier of any nature carried out with or without the mediation of the Ecuadorian financial system. As of January 2010, the applicable rate is 2%.

## *Branch income*

Distributed or retained branch profits are taxed at a 24% rate. No further taxes are payable when profits are remitted to headquarters, except if located in a tax haven country. Re-invested profits are levied at a 14% income tax rate. Companies must increase their share capital within the following fiscal year to be beneficiaries of the income tax rate reduction. There is not a branch remittance tax in Ecuador, except for payments to tax haven countries, which are subject to withholding tax (WHT) at 10%.

### *Countries and territories considered as tax havens by tax authorities*

| | | | |
|---|---|---|---|
| Albania | Cook Island | Maldivas | Saint Elena |
| Andorra | Djibouti | Malta | Saint Kitts and Nevis Islands |
| Angola | Emirates of Saudi Arabia | Man Islands | Saint Lucia |

| Cocos Island or Keeling | Macao | Qatar | Virgin Islands of the United States |
| Commonwealth of Dominica | Madeira (Portugal) | Qeshm Islands | Yemen |

## *Income determination*

### *Inventory valuation*
The valuation of inventories is not specifically treated in the tax law, so Ecuadorian accounting standards must be applied. Inventories are carried at acquisition cost. Last in first out (LIFO), first in first out (FIFO), and average cost methods are used, with average cost being the preferred method.

### *Capital gains*
Occasional gains from stock sales are tax exempt, and gains from investment funds and investment trusts are income tax exempt, as long as the income has been taxed at source. Gains on the sale of fixed assets are added to the taxable base and levied at regular income tax rates, except gains derived from occasional sales of real estate, which are tax exempt.

### *Dividends*
Dividends received by a resident company or foreign company, not domiciled in a tax haven, from a resident company are tax exempt.

### *Foreign income*
Foreign-source income is considered exempt for tax purposes; companies must demonstrate the income tax payment abroad. Tax haven countries are not considered to be part of this exemption.

## Deductions

As a general rule, operations that exceed USD 5,000 should be performed through an institution of the Ecuadorian financial system, otherwise such operations will become non-deductible.

### Depreciation and amortisation

Straight-line depreciation applies, at rates specified by law. The director of the Internal Revenue Service of Ecuador authorises higher rates of depreciation in cases such as obsolescence, excessive use, and faster than expected wear-out of assets.

Depreciation rates are as follows:

| Asset | Depreciation % |
|---|---|
| Real estate (except land), aircraft, naval crafts, and similar property | 5 |
| Facilities, machinery, equipment, and furniture | 10 |
| Vehicles, trucks, and tractors used for construction | 20 |
| Computer equipment and software | 33.33 |

Depreciation rates apply to the cost of assets.

Intangible assets are amortised either within the terms specified in the contract or over a 20-year period.

### Interest expenses

Interest on debts incurred for business purposes are deductible.

Foreign loan interests are deductible, to the extent that they are registered with the CBE and do not exceed the maximum rates established by CBE. Interest on foreign loans that are not registered with the CBE are non-deductible.

### Organisational and start-up expenses

Organisation, experimentation, and preoperational expenses are to be amortised over five years at the rate of 20% per year.

### Statutory profit sharing

According to the Ecuadorian Labour Code, companies must distribute 15% of their pre-tax earnings amongst their employees. This profit sharing is a deductible expense for corporate income tax purposes.

### Taxes

Taxes, rates, levies and contributions to the social security system related to the generation of taxable income are deductible.

### Fines and penalties

Interest and fines paid as penalties imposed on late payments of tax obligations and on income tax payments are not deductible for income tax calculation purposes.

### Net operating losses

The carryforward of losses is allowed to a maximum of five years, with an amortisation limit of 25% per year over the taxable base. There is no loss carryback.

### *Payments to foreign affiliates*
In most cases, payments made abroad are deductible, as long as income taxes have been withheld (at the rate of 24% over the taxable base). Professional fees, royalties, commissions, or any payment made abroad is subject to withholding at a rate of 24% over the taxable base. Payments on imports are deductible and are not subject to withholding of income taxes.

## *Group taxation*

Group taxation is not permitted in Ecuador.

### *Transfer pricing*
The transfer pricing regime in Ecuador is based on the Organisation for Economic Co-operation and Development (OECD) guidelines. Related party transactions must be carried out at arm's length. Formal documentation requirements exist.

### *Thin capitalisation*
A thin capitalisation rule on foreign loans granted by related parties at a 3:1 ratio over equity must be considered. For branches of a foreign corporation, only capital must be considered.

## *Tax credits and incentives*

### *Handicapped employee and new employee increases*
An amount equivalent to 150% and 100% remunerations of handicapped and new employees, respectively, can be considered an additional deduction for income tax calculation purposes. New employees must be working with the company for at least six months.

### *Income tax exemptions*
Investments made by new companies located outside the cities of Quito and Guayaquil, in specific sectors determined by law, will have five years of income tax exemption.

### *Foreign tax credit*
There are no provisions in Ecuador for a foreign tax credit. In general terms, income taxed abroad is considered as an exempt income, with some special exceptions.

## *Withholding taxes*

Dividends prepaid are subject to a 24% income tax withholding.

Dividends paid to non-resident entities generally are not subject to WHT. However, dividends paid to non-resident entities in tax haven countries are subject to 10% WHT at source.

Interest paid on loans obtained from non-residents is subject to a 24% WHT unless reduced by tax treaty. Royalties paid to a non-resident are subject to 24% WHT unless reduced by tax treaty.

Revenues from occasional services provided by non-resident individuals are levied at 24% WHT. Payments made abroad to non-resident individuals and companies are subject to a 24% WHT. Other payments made abroad, other than dividends or profits, are subject to a 24% WHT.

Periodically, the Internal Revenue Service of Ecuador establishes withholding percentages on local payments, which are not greater than 10%. Local payments (including interest paid by financial institutions) are subject to 1%, 2%, 8%, and 10% withholding.

### *Tax treaties*

As a member of the Andean Community, Ecuador has adopted Decision 578, which provides relief from double taxation for individual or company members. Furthermore, Ecuador has similar tax treaties with Belgium, Brazil, Canada, Chile, France, Germany, Italy, Mexico, Romania, Spain, and Switzerland.

Withholding rates could vary from 0% to 15%, depending on the nature of the payment.

## *Tax administration*

### *Returns*

The fiscal year is the calendar year from 1 January to 31 December. The tax system operates on the basis of self-assessment, with subsequent inspection by the tax authorities.

Tax filing deadlines begin on 10 April and continue up to 28 April. The tax return due dates are determined by the ninth digit of the company's Tax Identification Number (TIN).

### *Payment of tax*

Corporations are required to keep accounting records and must make advance income tax payments, in two equal instalments in July and September, based on the following calculation:

The sum of 0.4% of the taxable income, 0.4% of total assets, 0.2% of total equity, and 0.2% of deductible expenses less WHT held on the last fiscal year.

Differences between advance payments and the income tax returns must be paid with the tax return. If the difference is in favour of the taxpayer, the taxpayer could request a reimbursement from the Internal Revenue Service.

## Significant developments

Transfer Pricing Guidelines were finally launched in Egypt, and the first part of which was issued in final version to the public provides guidance on the arm's-length principle, how to establish comparability, choosing the most appropriate transfer pricing method(s), and documentation requirements.

Due to the current political and economic circumstances in Egypt, the Military Supreme Council, which is in power until presidential and parliamentary elections later this year, has issued a decree (decree no. 8 of 2011) whereby an Egyptian company could pay the corporate tax due in three equal installments, providing certain procedures to be followed for that purpose. This installment regime should not result in any interests or delay fines on the taxpayer. It has not been mentioned if this decree will apply in future years, and we are still waiting for any formal announcement in this regard.

On 22 February 2011, the Egyptian Tax Authority issued a circular (circular letter no. 3) dictating that tax inspection for financial year 2005 is closed, in consideration of the current political circumstances. Accordingly, inspection will apply to the financial years 2006, 2007, and 2008.

Ministerial decree no. 363 of 2009 provided the procedures to be followed in order to conclude specific tax court cases between taxpayers and the Egyptian Tax Authority. This ministerial decree specifies the topics of arguments to which it applies. Another ministerial decree has been issued on 3 April 2011, amending the part of ministerial decree no. 363 of 2009 which specifies the topics of arguments, making it more comprehensive covering arguments related to income taxes for years preceding, applying the income tax law no. 91 of 2005, as well as arguments related to stamp taxes for the years preceding, applying law no. 143 of 2006. Further, it dictates that the amended ministerial decree applies to natural persons as well as juridical persons.

The monthly social insurance thresholds shall increase from 850 Egyptian pounds (EGP) to EGP 875 for basic salaries, and from EGP 900 to EGP 1050 for variable salaries. This should be effective 1 July 2011. However, in order to be effective, an official proclamation must be made, which still has not taken place.

It has been decided to grant expatriates working in Egypt a renewable work permit for a maximum limit of three years. In order to allow granting a work permit, an expatriate should prove a relevant experience in the position one will be filling in the local company, and this requires presenting the relevant experience certificates reflecting this fact. Finally, this regulation is newly introduced and we expect to be amended if the concerned parties demonstrated a clear opposition towards it, on the grounds of being in need to specific expatriates' experience which might require staying in Egypt beyond the three year limit.

## *Taxes on corporate income*

The corporate tax rate is 20% for income generated from all types of business activities except for oil exploration companies, whose profits are taxed at 40.55%. In addition, the profits of the Suez Canal Authority, the Egyptian Petroleum Authority, and the Central Bank of Egypt are taxable at a rate of 40%.

Resident companies are taxed on worldwide income. Non-resident corporations and partnerships pay tax on income derived from their permanent establishments (PE) in Egypt.

## *Corporate residence*

Foreign corporations and partnerships are classified as residents of Egypt if they meet one of the following conditions:

- The entity is established according to the Egyptian law.
- The government or a public authority owns more than 50% of the capital of the entity.
- The effective place of management is in Egypt.

The executive regulations of the law indicate that Egypt is considered as the effective place of management if the entity meets any two of the following conditions:

- Daily managerial decisions take place in Egypt.
- Members of the board of directors hold their meetings in Egypt.
- At least 50% of the board members or managers reside in Egypt.
- The major shareholders (owners of more than 50% of the shares or voting rights) reside in Egypt.

### *Permanent establishment (PE)*

The PE concept was introduced in the income tax law 91 of 2005 and defined as follows:

- Headquarters.
- Branch.
- Building used as sale outlet.
- Office.
- Factory.
- Workshop.
- Places of extraction of natural resources.
- Farms.
- Building site, construction or assembly point, installations, supervisory activities of the same, which exists for more than six months.
- An agent who has the power to ratify contracts on behalf of a foreign company.
- An independent broker or agent who is proved to have dedicated most of one's time during the year in the interest of a foreign company.

A foreign company that is deemed to have a PE risk, according to the Egyptian Companies Law, should incorporate a legal entity in Egypt.

There are several legal forms existing under the Egyptian Companies Law from which a foreign company can choose to incorporate, and these are: joint-stock company, limited liability company, branch, or a representative office.

## *Other taxes*

### *Sales tax*

The standard sales tax rate is 10% of the value of commodities (except for those referred to in special schedules of the law) and 5% to 10% for specific services. Some examples of the commodities subject to sales tax rates other than the standard 10% rate are as follows:

- Cement: 5%.
- Specific types of televisions and fridges: 25%.
- Air conditioners: 25%.

The Sales Tax Department is responsible for assessing the tax on the sales of locally produced goods and imported goods, except for those exempted by a special decree.

Consequently, all natural persons and legal entities are required to collect general sales tax and remit it to the Sales Tax Department. This includes manufacturers and providers of taxable services and every importer of commodities or taxable services.

In addition, there are plans to introduce a newly developed sales tax law; however, after the social unrest that has taken place in Egypt, it is difficult to predict when this new law will be introduced.

### *Customs duties*

The liability for customs duty rests with the person who is importing the goods from abroad.

Customs duty rates on imported goods range from 5% to 40%, with the exception of vehicles for which different rates apply.

Where entities import machines and equipment as capital assets, and to establish the company's project, the machines and equipment will be charged customs duty at 5%.

Component parts, which are imported to be assembled in Egypt, are assessed customs duty based on the complete product. Then, it is reduced by a percentage ranging from 10% (if the local content of the final product is less than 30%) to a maximum of 90% (if the local content exceeds 60%).

Machines, equipment, and similar capital assets (with the exception of private motor cars) imported on a temporary basis, are subject to fees at 20% of the original customs duty for each year or fraction of a year during which they remain in Egypt until they are exported.

There is also a proposed new law regarding this issue, which is currently at the draft stage.

### Excise taxes
There are no excise taxes in Egypt.

### Stamp tax
There are two distinct types of stamp tax, which are imposed on legal documents, deeds, banking transactions, company formation, insurance premiums, and other transactions, as follows:

- The nominal stamp tax is imposed on documents, regardless of their value. The tax rate for items such as contracts is EGP 1 for each paper.
- Percentage or proportionate stamp tax is levied based on the value of transactions.

A proportional tax at the rate of 0.4% is imposed on the balances of credit facilities and loans and advances provided by Egyptian banks or branches of foreign banks during the financial year, with the bank paying 0.1% on the balance at the end of each quarter of the year. The bank and the customer each bear half of the tax.

Loans from other establishments are not subject to this tax.

### Real estate taxes
The new real estate tax law was effective from January 2010. The new law takes into consideration the different variables that can affect the value of a property, such as location, value of similar buildings, and the economic situation of the district in which the property is located. This is to be updated every five years.

Real estate tax is levied on all constructed real estate units. This covers land and building, excluding plant and machinery.

Such tax is assessed based on the rental value of the land and building, and these value assessments are set by the committees, after approval of the Minister or whomever the Minister delegates, and published in the Official Journal. Based on the announcement, any taxpayer can appeal the rental value assessment.

The real estate tax rate is 10% of the rental value, and the calculation of the rental value differs for residential units and non-residential units. Specific percentages of deductions are provided by the law to account for all the expenses incurred by the taxpayer, including maintenance costs.

## Branch income

Branches of foreign corporations operating in Egypt receive tax treatment identical to that of corporate entities for the results of their activities in Egypt.

A branch, but not a subsidiary, may deduct a 'head office charge' of an amount up to 7% of its taxable income.

## Income determination

### Capital gains
A foreign company is taxed on all capital gains realised in Egypt. However, capital gains on the sale of Egyptian securities listed on the Egyptian Stock Exchange are not taxable.

Capital gains are not taxed separately; they are considered as part of the company's income and taxed accordingly (i.e. at the 20% corporate tax rate) after deducting all tax deductible expenses.

### Dividend income
Dividends distributed by a company residing in Egypt are not subject to corporate taxes. Conversely, dividends that non-resident companies distribute are subject to the Egyptian corporate tax, after deducting foreign taxes paid abroad.

### Stock dividends
Stock dividends receive the same treatment as ordinary dividends.

### Interest income
Interest expenses are deducted from interest income when calculating the interest income to be included in taxable income.

### Rent/royalties income
Rent/royalties income are not taxed separately; they are considered as part of the company's income and taxed accordingly (i.e. at the 20% corporate tax rate).

### Foreign income
Income from any source, domestic or foreign, received by a corporation within Egypt is subject to corporate tax. The scope of tax covers the activities carried out inside and outside Egypt, which are administered or managed within Egypt.

## Deductions

In order for expenses to be acceptable for tax deduction, such expenses must be:

- actual and supported by documents
- business related, and
- necessary for performing the company's activity.

### Depreciation and amortisation
The tax law set the depreciation and amortization rates for tax purposes to the following:

- 5% of the cost of purchasing, establishing, developing, and renovating buildings and establishments is deductible based on the straight-line method.
- 10% of the cost of purchasing, developing, and improving intangible assets is deductible based on the straight-line method.
- Computers, information systems, software, and data storage sets are depreciated at a 50% rate on a declining balance method.
- All others assets are depreciated at a rate of 25% of the depreciation basis for each fiscal year, on a declining-balance method.

### Accelerated depreciation
A company may deduct 30% accelerated depreciation from the cost of new or used machines and equipment used in industries during the first fiscal year of their employment.

### Interest expense

Interest expenses are deductible for tax purposes after offsetting any tax-exempt interest income.

Interest expense deductions are only allowed if the following conditions are fully met:

- The interest rate does not exceed twice the discount rate as determined by the Central Bank of Egypt at the beginning of the calendar year in which the tax year ends.
- The interest expense is in return for loans complying with the local thin capitalisation rule: 4:1 debt to equity ratio.
- The Egyptian transfer pricing rules (i.e. arm's-length principle) must be followed. In case of a tax audit, if the interest rate wasn't proven to be at arm's length, the Tax Authority would have the right to adjust this price to arrive at a 'neutral price' and re-calculate the taxes due accordingly.
- The loan is business related.

### Charitable contributions

Donations to the government are tax deductible. Donations to Egyptian charities are also deductible, but only up to 10% of taxable income.

### Non-deductible costs

The following items are not tax-deductible:

- Reserves and appropriations of all different types.
- Financial fines and penalties paid by the taxpayer because they or one of their subordinates has committed a deliberate felony or misdemeanour.
- Income tax payable according to the income tax law.
- Profit shares, distributed dividends, and the attendance fees paid to shareholders for attending the general assembly's meetings.
- Compensation and allowances obtained by the chairmen and board members.
- Workers profit share to be distributed according to the law.

### Net operating losses

A company may carry losses forward for a period not to exceed five years. Nevertheless, if a change occurs in the ownership of its capital exceeding 50% of the shares, stocks, or the voting rights, if the company is either a Joint Stock Company or a Company Limited by Shares whose shares are not listed on the Egyptian Stock of Exchange, and if the company changes its activity, the company cannot carry the losses forward.

In general, companies cannot carry losses back, except for contracting companies, which are allowed a loss carryback period of five years.

### Payments to head office

A branch may deduct head-office charges up to 7% of its taxable income. Moreover, the branch or subsidiary should withhold taxes before the payment of interest, royalties, and service fees to non-resident foreign corporations or affiliates.

## Group taxation

The Egyptian tax law treats every company in a group of companies as a separate legal entity. Thus, affiliated companies or subsidiaries cannot shift the profits/ losses within the group.

### *Transfer pricing*
Transfer pricing rules were introduced in Egypt for the first time by Law No. 91 for the year 2005. The law introduced the arm's-length principle (ALP), specifying that any transaction between related parties should be at arm's length (i.e. market value).

The law does not specify penalties with regard to transfer pricing. However, the law states that the Egyptian tax authorities may adjust the pricing of transactions between related parties if the transaction involves elements that would not be included in transactions between non-related parties, and whose purpose is to shift the tax burden to tax exempt or non-taxable entities. Where this is the case, the tax authorities may determine the taxable profit on the basis of the neutral price. The acceptable methods for determining such neutral price, according to the rule of the law, are as follows:

- Comparative free price same as Comparable Uncontrolled Price method (CUP).
- Total cost with an added margin of profit (same as Cost Plus method).
- Resale price.

On 29 November 2010, the Egyptian Tax Authority launched the Transfer Pricing Guidelines ('the TP Guidelines'). The TP Guidelines are being issued as a series of parts, the first part of which was issued in final version to the public and provides guidance on the ALP, how to establish comparability, choosing the most appropriate transfer pricing method(s), and documentation requirements. The coming parts should cover more complex transfer pricing topics, specifically transactions involving intellectual property, intra-group services, cost contribution arrangements, and advanced pricing agreements.

The Egyptian Tax Authority noted that this launch does not represent an inauguration of transfer pricing rules in Egypt because transfer pricing law has existed since 2005. Accordingly taxpayers are required to prepare contemporaneous documentation studies to support the arm's-length nature of their controlled transactions since issuance of transfer pricing law in Egypt in 2005. The Egyptian Tax Authority specified, however, that they didn't require the submission of transfer pricing documentation studies with the tax return; rather, they are required to be available upon request in a tax audit. Studies are acceptable in English, but a translation may be requested from the taxpayer.

The Egyptian Tax Authority explained that TP Guidelines will be utilized as a practical guide to assist taxpayers and tax inspectors in understanding how to implement and examine transfer pricing transactions. Egyptian TP Guidelines were compared to the Organisation for Economic Co-operation and Development (OECD) by an OECD representative and were found to be similar.

### *Thin capitalisation*
The Egyptian thin capitalisation rule provided by the Egyptian income tax law dictates that the debt to equity ratio starting from the year 2009 going forward is 4:1. Accordingly, the law disallows the deductibility of debit interests of Egyptian companies on loans and advances if such loans and advances are in excess of fourfold the equity average (which is calculated according to the financial statements prepared pursuant to the Egyptian accounting standards).

The debit interest includes all amounts chargeable by the company in return for the loans; advances of any kind obtained thereby, bonds and bills. The loans and advances include, for purposes of this item, bonds and any form of financing by debts through securities with fixed or variable interest.

For determining the equity, the following items represent the basis for the calculation: the paid up capital in addition to all reserves and dividends reduced by retained losses, provided that the differences of the adjusted account is not included in the reserves account and is determined to be non-taxable. In case of retained or carry-forward losses, they must be used to reduce retained profits and reserves solely; the percentage is calculated on basis of total loans and advances in proportion to the remaining equity amount, after deducting the retained losses with a minimum of the paid up capital.

## *Tax credits and incentives*

Egypt offers no specific tax incentives.

### *Foreign tax credit*

The foreign tax paid by a resident company on its profits earned abroad is deductible from the tax payable in Egypt; however, losses incurred abroad are not deductible.

## *Withholding taxes*

A corporation paying invoices must withhold 0.5% to 5% of payments, depending on the services and commodities, to local taxpayers and remit them quarterly to the Tax Department.

Payments of interest, royalties, and services by a domestic corporation to foreign or non-resident bodies are subject to withholding tax (WHT) as follows.

### *Interest*

Interest on loans with a three-year term or more entered into by private sector companies are exempt from WHT, while loans of less than three years are subject to 20% WHT on interest. However, an applicable double tax treaty (DTT) between Egypt and the foreign country may result in the reduction of such tax rate. *Please see below for the new ministerial decree affecting the treatment of interest and royalty payments.*

### *Royalties*

Royalty payments are subject to the 20% WHT. However, an applicable DTT signed between Egypt and the foreign country may result in a reduction in this rate. *Please see below for the new ministerial decree affecting the treatment of interest and royalty payments.*

### *Service payments*

Service payments are subject to the 20% WHT. However, an applicable DTT signed between Egypt and the foreign country may result in the elimination of this rate.

### *Tax treaties*

Egypt has concluded DTTs with about 50 countries, which could change the tax treatment of transactions carried out between Egyptian entities and residents of a treaty country.

| Recipient | Interest (%) | Royalties (%) |
|---|---|---|
| Non-treaty | 20 | 20 |
| Treaty: | | |
| Algeria | 5 | 10 |

| Recipient | Interest (%) | Royalties (%) |
|---|---|---|
| Austria | 15 | - |
| Bahrain | - | - |
| Belarus | 10 | 15 |
| Belgium | 15 | 15 |
| Bulgaria | 15 | 15 |
| Canada | 15 | 15 |
| China | 10 | 8 |
| Cyprus | 15 | 10 |
| Czech Republic | 15 | 15 |
| Denmark | 15 | 20 |
| Finland | 15 | 20 |
| France | 15 | 15 (franchise) |
| | | 15 (for other royalties) |
| Germany | 15 | 15 |
| Holland | 12 | 12 |
| Hungary | 15 | 15 |
| India | 20 | 20 |
| Indonesia | 15 | 15 |
| Iraq | 20 | 16 |
| Italy | 20 | 15 |
| Japan | 20 | 15 |
| Jordan | 15 | 20 |
| Korea | 15 | 15 |
| Lebanon | 10 | 5 |
| Libya | - | - |
| Malaysia | 15 | 15 |
| Malta | 10 | 12 |
| Morocco | 20 | 10 |
| Norway | 20 | 15 |
| Oman | 12.50 | 15 |
| Pakistan | 15 | 15 |
| Palestinian Territories | 15 | 15 |
| Poland | 12 | 12 |
| Romania | 15 | 15 |
| Russia | 10 | 15 |
| Serbia & Montenegro | 15 | 15 |
| Singapore | 15 | 15 |
| South Africa | 12 | 15 |
| Sudan | 20 | 10 |
| Sweden | 15 | 14 |
| Switzerland | 15 | 12.50 |
| Syria | 15 | 20 |
| Tunisia | 10 | 15 |
| Turkey | 10 | 10 |
| Ukraine | 12 | 12 |
| United Arab Emirates | 10 | 10 |

| Recipient | Interest (%) | Royalties (%) |
| --- | --- | --- |
| United Kingdom | 15 | 15 |
| United States | 15 | 15 |
| Yemen | 10 | 10 |

### *New ministerial decree*
A new ministerial decree was issued on 29 December 2009, declaring that the reduced rate of WHT on interest or royalties provided by an applicable DTT should be ignored when withholding the tax. However, under certain conditions, the foreign recipient of payments would be able to get a refund for the amount resulting from the variance between the normal rate of 20% and the reduced treaty rate.

## *Tax administration*

### *Returns*
The tax year is the financial year of the taxpayer. The taxpayer is required to assess taxes due for every financial year and settle them with the tax return.

The corporate tax return is due within four months from the end of the financial year; so if a company's financial year ends 31 December, then the tax return has to be filed before the end of April of the following year.

### *Payment of tax*
Advance payments are deducted from taxes assessed per the tax return, and the balance is payable in a lump sum at the date of submitting the tax return.

The advance payment (i.e. WHT) is submitted on a quarterly basis.

## Significant developments

As of January 2011, a 10% withholding tax (WHT) has been established on interests paid for loans from foreign banks. This WHT is 20% if the transaction takes place between related parties.

As of February 2010, there was a decrease in the percentage of anticipated income tax payment for corporations that sell fuels (gasoline and diesel) from 1.5% to 0.75% monthly.

The Export Reactivation Law was recently derogated, which included a 6% drawback for the exporters. In January 2011, a return mechanism was approved for duties paid on raw and input materials imported that were definitively exported out of the country.

## Taxes on corporate income

The corporate income tax (CIT) rate is 25%.

Income tax is based on the principle of territoriality, and, by general rule, taxes are paid on goods located, activities realized, and capital invested in El Salvador as well as on services rendered or utilized in the country. Nevertheless, there is a special rule regarding securities and financial instruments, since income is considered to be obtained in El Salvador if the issuing entity is domiciled in El Salvador.

Taxable income is equal to gross income net of costs and expenses considered necessary for generating and maintaining the related source of income and other deductions allowed by law. Gross income is comprised of income or profits collected or accrued, either in cash or in kind, from any sources in El Salvador.

Corporations are required to follow the accrual method of accounting, and income is computed for 12-month periods beginning on 1 January and ending on 31 December of each year.

### Income tax advance payment

A 1.5% tax is applied to gross revenues accrued. This tax is paid monthly as an advance payment which is applied against the CIT at the end of the year.

# El Salvador

## Corporate residence

A company incorporated in El Salvador is a resident entity in the country for tax purposes and subject to CIT on Salvadorian source income. Also, branches from foreign companies authorised in El Salvador and entities operating as a permanent establishment are considered resident entities for tax purposes and subject to CIT on Salvadorian source income.

## Other taxes

### Value-added tax (VAT)

VAT (i.e. Impuesto al Valor Agregado or IVA) is levied at a rate of 13% over the taxable amount. As a general rule, the taxable amount is the price or remuneration agreed upon by the parties. For imports, the taxable amount is the customs value.

The following transactions are subject to VAT when performed within the Salvadoran territory:

- transfer/sale of tangible movable goods
- withdrawal of tangible movable goods from the inventory made by the company for self-consumption by its partners, directors, or personnel
- import of goods and services
- the supply of services of any type whether permanent, regular, continuous, or periodic, including technical advice and project designs; lease and sublease agreements over tangible goods; lease and sublease agreements over real estate for commercial purposes; lease of services in general; construction of real estate properties or building contracts; auctions; freight, whether inland, air or maritime; lease, sublease, and any form of use regarding trademarks.

The following imports are exempt from VAT:

- imports made by diplomats and consulate representatives of foreign nations with presence in the country according to international agreements adopted by El Salvador
- imports made by international organisations to which El Salvador is a party
- traveller's luggage according to customs regulations
- donations to non-profit organisations
- imports made by municipalities, if the goods imported are for the public benefit of the community
- imports of machinery by taxpayers duly registered for this purpose, which will be part of the taxpayer's fixed assets
- vehicles for public transportation, which can only be transferred after five years.

The following services are exempt from VAT:

- health services rendered by public institutions
- lease and sublease of real estate properties for housing
- services rendered under a labour relationship as well as those rendered by public and municipal employees
- cultural public performances authorised by competent authorities
- educational services rendered by authorised entities, i.e. Ministerio de Educación (the Ministry of Education)

- interest on deposits and loans provided by local financial institutions or entities registered at the Salvadoran Central Bank (BCR)
- interest on securities issued by the government and / or private entities traded through a stock exchange
- water supply by public institutions
- public transportation
- insurance premiums covering individuals, and reinsurance in general.

VAT is levied on exports at a rate of 0%. Foreign source income is not subject to VAT.

VAT taxes paid by a registered taxpayer company on its purchases (tax credits) are credited against VAT taxes charged to its customers (tax debits), on a monthly basis.

### *Tax on transfer of real estate property*
A 3% tax is applied to transfers of real estate property. This tax is applied to the amount by which the value of the real estate exceeds 28,571.43 US dollars (USD).

### *Tax on simple or sweetened soft drinks*
An *ad valorem* tax on simple or sweetened soft drinks is levied at the rate of 10% over the selling price to the public as suggested by the manufacturer, importer, or distributor, excluding VAT and returnable bottle taxes.

### *Tax on the production and importation of alcohol and spirits*
A tax is levied on domestically produced or imported alcohol and spirits at rates ranging from USD 0.0825 to USD 0.15 for each 1% of alcohol volume per litre or in proportion thereof. Spirits and alcohol also have an *ad valorem* tax levied at the rate of 5% over the suggested selling price to the public, excluding VAT.

### *Tax on tobacco products*
A tax is levied at USD 0.005 per cigarette, cigar, little cigarette, or other tobacco product. Also, an *ad valorem* tax is levied at the rate of 39% over the suggested consumer selling price to the public, excluding VAT.

### *Annual business tax*
Companies are required to register themselves with the Registry of Commerce and pay an annual business licence fee assessed on the company's assets, as follows:

| Assets (USD) | Fee (USD) |
|---|---|
| 2,000 to 57,150 | 91.43 |
| 57,151 to 114,286 | 137.14 |
| 114,287 to 228,572 | 228.57 |
| An additional charge for each office, branch, or agency property of a company | 34.29 |

If the assets exceed the amount of USD 228,572, there is an additional duty of USD 11.43 for each additional USD 100,000 in assets or fraction thereof. In any case, the relevant duties are limited to USD 11,428.57.

### *Social security contributions*
Social Security contributions (ISSS) are mandatory for both employee and employer and are destined to public health services. The employee's contributions are withheld from the employee's monthly salary and are transferred by the employer to the

Salvadorian Institute of Social Security through monthly payrolls. The contribution amounts are summarized in the table below:

| Monthly employee's salary (USD) | Employee's rate | Employer's rate |
|---|---|---|
| 0 to 685.71 | 3% | 7.50% |
| Over 685.71 | 0% | 0% |

Contributions to Pension Fund (AFP) are mandatory for both employee and employer. The employee's contributions are withheld from the employee's monthly salary and are transferred by the employer. The employer's contributions are paid to the AFP. Both contributions are reported to the Pension Fund Administrator through a monthly payroll. The percentages are summarized below:

| Monthly employee's salary (USD) | Employer's rate |
|---|---|
| 0 to 5,354.52 | 6.75% |
| Over 5,354.52 | 0% |

Entities with more than ten employees must also pay a payroll tax which is destined to INSAFORP (National Institute of Professional Development), this institute promotes professional development through courses and complementary studies. The percentages are summarized below:

| Monthly employee's salary (USD) | Employer's rate |
|---|---|
| 0 to 685.71 | 1% |
| Over 685.71 | 0% |

### *Municipal taxes*
Municipal taxes are assessed according to a progressive tariff list issued by each municipality. The taxes are applicable to the company's assets located in each municipality, and are paid on a monthly basis. The tariff lists are applied separately to commercial, industrial, and financial sectors.

### *Stamp taxes*
No stamp taxes are assessed as the pertinent law was abrogated in 1992.

## *Branch income*

In El Salvador, tax rates on branch profits are the same as for domestic corporations. No tax is withheld on transfers of profits to the head office provided the entity distributing them reports the payments and pays the corresponding income tax thereon.

### *Administrative offices*
The law does not provide separate treatment for administrative offices located in El Salvador. The general regulations indicate that branches, agencies and / or establishments permanently operating in the country, with owned or leased installed infrastructure, employing domestic staff, and performing their economic activities in a material and perceptible manner in the country, are subject to the same taxes as companies duly incorporated.

## Income determination

In El Salvador, income is considered taxable if it is obtained from goods located in the country, activities undertaken within the national territory, or services rendered or utilized in the country.

### Inventory valuation

For tax purposes, taxpayers are authorised to use any one of the following inventory methods, provided they are technically appropriate for the particular business, consistently applied, and easily audited:

- Purchase or manufacturing costs.
- Last purchase costs.
- Direct average allocation costs.
- Average costs.
- Last in first out (LIFO).
- First in first out (FIFO).
- Specific methods for fruits and farm products.
- Specific method for cattle.

Other than the methods enumerated above, taxpayers are not permitted to use other methods for valuing their inventories except with prior authorisation of the tax office, provided that in the latter's judgement the method in question contains clear determination and bona fide elements available to the office. Once an inventory valuation method is adopted, the taxpayer may not change it without the tax office's prior authorisation.

### Capital gains

Capital gains are taxed at a flat rate of 10% of net profits, except when gains are realised within 12 months following the purchase date, in which case they are taxed as ordinary income. Capital losses can only be offset against capital gains. Whenever capital losses exceed capital gains, the remaining balance may be carried forward to future capital gains within a five-year period.

### Dividend income

Cash profits or dividends remitted or credited to shareholders are non-taxable provided the entity distributing them reported and paid the corresponding income taxes.

Stock dividends are also not taxable provided the entity distributing them reported and paid the correspondent income taxes.

### Interest income

Interest income is taxable in El Salvador when the entity paying the interest is resident in El Salvador, when the capital is invested in the country, and when the risk is assumed in El Salvador.

### Partnership income

Partnership income is taxable if it is Salvadorian-source income; nevertheless, no specific provisions exist in El Salvador regarding partnership income.

### Rent/royalties income

Rent and royalties income is taxable if it is Salvadorian-source income; nevertheless, no specific provisions exist in El Salvador regarding rent and royalties income.

### Condoned debts
Condoned debts are considered taxable income and must be included as part of the income generated in that fiscal period.

### Foreign income
Under the territoriality source of income principle, extraterritorial income is not taxable in El Salvador, with the exception of income and other benefits from securities and other financing operations. In this case, interest arising from loans granted to a resident of El Salvador is considered as taxable income, and the person or entity paying the loan must withhold 10% of the interest. If the financial services are rendered between related parties, the withholding must be of 20%.

## Deductions

All business expenses considered necessary to produce taxable income and / or maintain income sources (e.g. freight, marketing, power, telecommunications, water, salaries, lease contracts, merchandise and transport insurance, fuel, and interest paid on loans used by income generating sources) are deductible for income tax purposes.

### Depreciation and amortisation
Depreciation is calculated using the straight-line method, which results in the following maximum annual rates for determining depreciation deductions.

| Assets | Rate (%) |
|---|---|
| Buildings | 5 |
| Machinery | 20 |
| Vehicles | 25 |
| Other movable assets | 50 |

Depreciation of new software is permitted at a rate of 25% of purchase or production costs.

Amortisation of goodwill, trademarks, and other similar intangible assets are not deductible for income tax purposes.

### Charitable contributions
The deductibility of charitable donations is limited to 20% of the donor's net income after deducting the donation amount.

### Fines and penalties
Penalties and interest charges on unpaid taxes are deductible.

### Taxes
Taxes paid are not deductible.

### Net operating losses
Operating losses cannot be carried forward to future years or carried back. Capital losses, however, may be carried forward to offset capital gains for five years.

### Payments to foreign affiliates
Remittance of royalties, interest income, and service fees to foreign affiliates are deductible provided proper contracts are in place, a 20% withholding tax (WHT) is applied, and these services have actually been received. Note that payments to entities located in tax haven regimes are subject to a 25% WHT.

## Group taxation

There are no grouping rules in El Salvador between independent entities. Each entity, even if related, is treated separately and must report and pay their taxes independently.

### Transfer pricing
In El Salvador, it is mandatory for entities that have operations with related parties or with entities resident in tax havens to undertake these operations according to the rules of market prices.

Local tax authorities can establish the value of the operations according to market prices rules if, according to their point of view, these operations have not been undertaken according to the arm's-length principle.

### Thin capitalisation
No specific provision for thin capitalisation exists in El Salvador.

## Tax credits and incentives

El Salvador offers a wide range of incentives to attract foreign investment and drive new commercial and industrial developments. There are also no restrictions on foreign ownership or on mergers, acquisitions, or joint ventures.

There are three specific laws in El Salvador that seek to encourage foreign investment by improving the country's competitiveness in all areas involving the granting of tax incentives. These laws are the Industrial and Commercial Free Zone Law, the Law of International Services, and the Export Reactivation Law.

The Industrial and Commercial Free Zone Law No. 405, dated 3 September 1998, grants companies the following incentives:

- income tax exemption
- VAT exemption
- municipal tax exemption
- exemption from real estate transfer taxes when land is intended to be used for productive activities
- exemption from duties for imports on machinery, raw materials, equipment, and intermediate goods used for production
- an option to sell merchandise or services linked to international trade produced in the free zone in the Salvadoran market as long as the corresponding import taxes, income tax, VAT, and municipal taxes are paid on the final goods or services.

Any foreign company may establish and function in a free zone or bonded warehouse and benefit from these incentives if they are engaged in production, assembly, manufacturing, processing, transformation, or commercialisation of goods and services and/or rendering of services linked to international or regional trade, such as gathering, packaging and repackaging, cargo consolidation, distribution of merchandise, and other activities connected or complementary to them.

The Law of International Services No. 431, dated 11 October 2007, grants the same benefits as the Free Zone Law, but the beneficiaries are companies operating in Service Centres specially created according to this law and dedicated to international services as defined therein.

The Export Reactivation Law No. 460 (i.e. Ley de Reactivación de las Exportaciones), dated 15 March 1990, grants reimbursement of 6% free on board (FOB) value of exports destined outside the region.

## *Withholding taxes*

Payments or amounts credited to non-residents arising from income obtained in El Salvador are subject to a 20% WHT. Income earned in El Salvador covers income from assets located in the country, from any activities performed or capital invested in the land, and from services rendered or used in the national territory, regardless of whether they are provided or paid outside the country. Income from services used in the country is income earned in El Salvador by the service provider, irrespective of whether the relevant income generating activities are performed abroad. Note that payments to foreign entities located in tax haven regimes are subject to a 25% WHT.

Payments to resident individuals with respect to services rendered, other than under a labour relationship, are subject to a 10% WHT.

The acquisition of intangible goods among resident entities in the country is subject to a 10% WHT.

Certain transactions are subject to a reduced WHT rate of 5%, such as the following:

- International Transport services paid to non-residents.
- Insurance services, re-insurances, and bondings paid to non-residents.
- Payments for transfer of intangible assets or use of the rights to intangibles and tangible assets related to films, movies, music records, cable TV, satellite, etc.

Moreover, a treaty to avoid double taxation exists between El Salvador and Spain, this treaty established reduced WHT, such as the following:

- 12% WHT made to dividend payments.
- 10% WHT made to interest payments.
- 10% WHT made to rent and royalties payments.
- 10% WHT made to payments for services.

## *Tax administration*

National taxes, fees, and other contributions on all types of goods, services, and income in El Salvador are levied by the National Congress. Local governments (municipalities) may suggest contribution rates and propose their approval to the National Congress by way of a specific law.

The Ministry of Finance (Ministerio de Hacienda) controls the State's finances and defines and guides the government's financial policy. It also harmonises, directs, and implements its policies on taxation through its agencies.

### *Returns*

CIT annual returns must be filed each year no later than 30 April, following the end of the year under taxation. In El Salvador, the fiscal year is from 1 January to 31 December.

VAT returns are filed on a monthly basis within the first ten working days of each month following the period under taxation.

### *Payment of tax*

Taxes are due on the date established for filing the tax returns. In El Salvador, tax payments are made together with the filing of tax returns, and payments must be made at the banks of the local financial system.

In addition, public and private legal entities resident in the country for tax purposes, other than farm and cattle concerns, are required to make advance income tax payments at 1.5% of gross revenues. These advance payments are due, together with the corresponding return, within ten working days following the corresponding calendar month and are ultimately applied against the CIT at the end of the year.

## Significant developments

There have been no significant tax regulatory developments regarding corporate taxation in the past year in Equatorial Guinea.

## Taxes on corporate income

The corporate income tax (CIT) must be paid by any resident entity.

Taxable profit is determined by deducting from gross income all expenses tied to the performance of taxable activities in Equatorial Guinea.

In principle, all expenses are deductible, but the Tax Code provides rules of deductibility for some of them.

Resident companies are subject to CIT on their worldwide income. Non-resident entities are subject to a 10% withholding tax (WHT) on gross income derived from sources in Equatorial Guinea.

The CIT rate is 35% on taxable profits.

### Minimum income tax

Minimum income tax is 1% of the turnover of the company for the previous year.

This amount cannot be lower than 800,000 CFA francs (BEAC) (XAF) (even if the company does not have revenues). The minimum income tax can be totally or partially deducted from the CIT to be paid.

## Corporate residence

A legal entity present in Equatorial Guinea more than three months within a calendar year, or more than six months within two consecutive calendar years, and performing an economic activity or providing paid services in the country is considered as a resident for taxation purposes and is liable for CIT on its taxable profits. On the contrary, a non-resident company is only subject to a 10% WHT on gross income from Equatorial Guinea (in the non-oil and gas and the oil and gas sector).

The notion of residence applies equally to any kind of activity (even if there is some specificity in the oil and gas sector).

## Other taxes

### Value-added tax (VAT)

VAT is an indirect tax on consumption based on turnover.

All operations performed in Equatorial Guinea are subject to VAT, unless they are included in the list of exemptions provided by the Equatorial Guinea Tax Code or a specific tax regime.

VAT is generally chargeable on the following:

- Goods sold or assigned for valuable consideration.
- Services provided.
- Self-consumed goods and services.
- Imports.
- Other operations carried on by individuals or legal entities in their sphere of business, professional, and individual activities, including extraction activities.

The standard VAT rate is 15%.

A rate of 0% is applicable to a specific list of products and equipment provided in the Tax Code (e.g. certain medical products, some equipment for construction).

A reduced rate of 6% is applicable to a limited list of basic consumables and books.

### Social security contributions

Employers contribute 1% of gross salary to the Work Protection Fund (Fondo de Protección al Trabajo) and 21.5% to the National Social Security Fund (INSESO) on a monthly basis.

Employees contribute 0.5% of net salary to the Work Protection Fund and 4.5% to the INSESO on a monthly basis.

### Transfer tax

For the transfer of goods between residents and non-residents, and between non-residents, there is a 3% tax on the value of the goods.

Real estate transfers between residents are taxed at the rate of 5% on the value of the real estate. The rate increases to 25% on real estate transfers between residents and non-residents, and between non-residents.

### Real property tax

A 1% urban property tax applies to 40% of the value of the land and the buildings on such land. Urban property is defined by the Tax Code as “any land with or without buildings and the buildings built thereon, whenever located in urban areas”.

### Stamp taxes

Stamp duties are payable on a variety of instruments and transactions and vary depending on the concerned legal act.

## Branch income

Branch income is subject to CIT. We understand that there is no branch remittance tax even if sometimes challenged by Tax Authorities.

## Income determination

### Inventory valuation

Inventory is evaluated at cost price for tax purposes.

### Capital gains

Capital gains are, in principle, subject to CIT.

Some exemptions and specific tax regimes can apply, as follows:

- The capital gains that come from the assignment, in the ongoing operation, of the components of the fixed assets will not be included in the taxable profit of the fiscal year in course of which they have been obtained, if the taxpayer puts them in a special account named 'capital gains to be reused' and is committed to reinvesting in new fixed assets in its company before the expiration of a period of time of three years, starting from the close of this fiscal year, an amount equal to the amount of these capital gains plus the cost of the assigned components.
- The capital gains different from those obtained on goods, resulting from free assignment of stock, corporate portions, or liabilities, as a consequence of the merger of corporations, limited partnerships by shares, or limited companies, will be exempt from the tax regarding the profits made by those corporations, on condition that the take-over company or the new company has its corporate headquarters in Equatorial Guinea.

### Dividend income

All dividends received by a resident company are subject to CIT.

A personal income WHT of 25% is applicable on dividends paid to individuals or companies not having their usual domicile or headquarters in Equatorial Guinea. This tax is a final tax for those taxpayers.

The net products of the shares owned and earned by the parent company from its subsidiary can be deducted from the total net profits of the parent company after offsetting from this amount 25% (expenses and charges lump sum amount) if the:

- shareholder holds at least 25% of shares of the subsidiary and
- shareholder guarantees the shares have always been registered in the name of the participating company and commits it will hold these shares for at least two consecutive years.

This proportional part is established at 10% of the amount of these products and represents the management expenses already deducted from overhead costs.

### Foreign income

Resident companies are subject to CIT on their worldwide income.

## Deductions

### Depreciation

A straight-line method of computation of the depreciation should be applied to fixed assets. The depreciation rates provided by the Tax Code are as follows (non-binding translation from Spanish):

| Assets | Rate (%) |
|---|---|
| **Structures:** | |
| Commercial, industrial buildings, garages, workshops and hangars | 5 |
| Processing booth | 5 |
| Dams and dykes | 5 |
| Factories | 5 |
| Residential houses | 5 |
| Removable or temporary buildings | 20 |
| Electric ovens | 10 |
| **Material and permanent tools:** | |
| Steam boiler | 10 |
| Cement vat | 5 |
| Electric transmission cables – in final material | 15 |
| Electric transmission cables – in temporary material | 20 |
| Oil refinery machines | 20 |
| Hydraulic dams | 10 |
| Compression dams | 10 |
| Motors or heavy oils | 10 |
| Oil deposits | 10 |
| High output heavy-duty transformers | 10 |
| Steam turbines and machines | 10 |
| **Mobile material:** | |
| Mechanical kneaders | 15 |
| Excavators | 15 |
| Hogsheads, brewery, distillation, or experimentation vats | 10 |
| Wood-carving machines or devices | 20 |
| Purification machines or devices | 10 |
| Lamination machines | 10 |
| Light machinery, lathes, and similar items | 20 |
| Manufacturing material, including its tools | 20 |
| Drills | 20 |
| Small tools | 100 |
| **Transportation material:** | |
| Roads | 25 |
| Naval and air material | 20 |
| Containers | 20 |
| Automobile material: Light, used in city | 25 |
| Automobile material: Light rental or school vehicle | 33.33 |
| Automobile material: Heavy (trucks) | 33.33 |
| Tractors | 20 |
| Tractors used by foresters | 33.33 |

| Assets | Rate (%) |
|---|---|
| Material for port manipulation: Lift vehicles | 20 |
| Material for port manipulation: Cranes | 10 |
| **Furnishings and facilities:** | |
| Facilities, layouts, and development | 20 |
| Office furnishings | 10 |
| Office material | 15 |
| Computer material | 25 |
| Reprographic material | 33.33 |
| Ships or fishing boats | 15 |
| **Hotels, coffee shops, and restaurants:** | |
| Pots, glassware, and kitchen utensils | 50 |
| Laundry | 33.33 |
| Silverware | 20 |
| Decorative material | 20 |
| Carpeting, curtains, and painting | 25 |
| Refrigerators and air conditioning | 25 |
| Kitchen ovens | 20 |
| **Material subjected to the action of chemical products:** | |
| Buckets, containers, receptacles, or diffusers of chemical products | 20 |
| Product recycling devices | 20 |
| Bleaching devices | 20 |
| Baking devices | 20 |
| Fixed asset expenses | 20 |

### *Net operating losses*
Net operating losses can be carried forward for three years. Losses cannot be carried back. Losses of one entity cannot be transferred to another entity in a reorganisation.

In theory, when the results of a company, no matter the kind of the company, are negative during a maximum period of three consecutive years, this company will immediately be removed from the register by the Tax Administration for the practice of the activity for which it was registered, except when the company is newly created.

### *Payment to foreign affiliates*
The deductibility of the technical assistance made by the parent company to its subsidiary is limited to 50% of the intermediary tax result (accounting result plus potential fiscal reintegration).

In case of a deficit, the relevant basis for the evaluation of the foreign technical assistance amount to be reintegrated will be the intermediary result of the last beneficiary fiscal year.

## *Group taxation*

Equatorial Guinea law does not provide specific provisions for taxation of groups.

### Thin capitalisation

According to the Tax Code:

"Interest paid to the partners for amounts made available to the company, in addition to their capital contributions, no matter the form of the company, will be admitted within the limits established for the advances of the Central Bank.

In the incorporated or limited companies, the deduction of interest will not be allowed for partners or shareholders that have the right to hold, or actually hold, the company management except to the extent that the amounts deposited do not exceed the combination of the contributions of these partners or shareholders."

## Tax credits and incentives

Some tax and customs exemptions can be granted by the government for some specific economic sectors (e.g. oil and gas sector, public work sector). These exemptions shall be negotiated in the contract signed between the company and the administration (e.g. Production Sharing Contract, Public Work Contract).

### Foreign tax credit

There is no foreign tax credit in Equatorial Guinea.

## Withholding taxes

### WHT in the non-oil and gas sector

There is a 10% tax withheld on the gross incomes obtained in Equatorial Guinea by non-residents.

There is a 25% WHT on royalties for non-Economic and Monetary Community of Central Africa (CEMAC) residents.

Dividends and interests paid to non-residents are subject to 25% WHT.

### WHT on the oil and gas sector

In Equatorial Guinea:

- a 6.25% WHT is imposed on payments made to a resident entity within the oil and gas sector and
- a 10% WHT is imposed on payments made to a non-resident entity within the oil and gas sector.

In practice, the tax authorities consider this tax only applies to sales of services.

The tax basis is composed of the gross amount paid to the provider.

## Tax administration

### Returns

CIT returns must be filed within the first four months of the year following the taxable fiscal year.

### *Payment of tax*
Payment of CIT must be made within 15 days from the day following the date of receipt of the tax liquidation issued by the Ministry of Finance and Budget.

The minimum company tax of 1% of the previous year's turnover is payable by 31 March.

### *Penalties*
Penalties of XAF 200,000 per month late, up to 75% of the tax owed, apply for late filing of CIT returns.

A penalty of 50% to 100% of the undeclared amount applies in case of shortfall in the return and in case of arbitrary settlement, 50% of the total amount if the good faith of the taxpayer is established or assumed and 100% wherever the taxpayer does not prove good faith.

## Significant developments

Estonia is regarded as offering a relatively favourable income tax regime, as all undistributed corporate profits are tax exempt. Estonia levies a corporate income tax only on profits that are distributed as dividends, share buy-backs, capital reductions, liquidation proceeds, or deemed profit distributions. Distributed profits are generally subject to 21% corporate tax (21/79 on the net amount of the profit distribution). According to the new programme of the coalition government, it is expected that the income tax rate will be reduced to 20% in 2015.

On 1 January 2011, the tax treaties with Albania, Serbia, and Republic of Korea became effective.

## Taxes on corporate income

All undistributed corporate profits are tax exempt. This exemption covers both active (e.g. trading) and passive (e.g. dividends, interest, royalties) types of income. It also covers capital gains from the sale of all types of assets, including shares, securities, and immovable property. This tax regime is available to Estonian resident companies and permanent establishments (PE) of non-resident companies that are registered in Estonia.

The taxation of corporate profits is postponed until the profits are distributed as dividends or deemed to be distributed, such as in the case of transfer pricing adjustments, expenses and payments that do not have a business purpose, fringe benefits, gifts, donations, and representation expenses.

Distributed profits are generally subject to the 21% corporate income tax (CIT) at 21/79 of the net amount of profit distribution. For example, a company that has profits of 100 euros (EUR) available for distribution can distribute dividends of EUR 79, on which it must pay CIT of EUR 21.

From the Estonian perspective, this tax is considered a CIT and not a withholding tax (WHT), so the tax rate is not affected by an applicable tax treaty. Certain distributions are exempt from such tax *(see the Income determination section)*.

In Estonia, resident companies are taxed on profits distributed from their worldwide income, while PEs of non-residents are taxed only on profits distributed from income derived from Estonian sources. Other Estonian-source income derived by non-residents may be subject to final WHT or income tax by way of assessment.

## Corporate residence

A legal entity is considered resident in Estonia for tax purposes if it is established under Estonian law. There is no management and control test for the purpose of determining corporate residency. Most tax treaty tie-breakers for legal entities are based on competent authority procedures.

### Permanent establishment (PE)

A PE (including a branch registered in the Commercial Register) of a foreign entity is deemed to be a non-resident taxpayer. Under the domestic law, which deviates from the Organisation for Economic Co-operation and Development (OECD) Model Tax Convention, a PE is defined as an enterprise through which the permanent business activities of the non-resident are conducted in Estonia. A PE is deemed to be created as a result of the business activities conducted in Estonia which are geographically linked or having movable character or as a result of the business activities of an agent which is authorized to conclude contracts in the name of the non-resident.

## Other taxes

### Value-added tax (VAT)

The following transactions are subject to Estonian VAT:

- Taxable supplies of goods and services (the place of supply of which is Estonia).
- Taxable imports of goods.
- Taxable intra-community acquisitions of goods.

The standard VAT rate is 20%. A reduced rate of 9% is applied to books, periodicals with few exceptions, hotel accommodation services, and listed pharmaceuticals.

The VAT rate on the export of goods and certain services is 0% (i.e. exempt with credit). Some services, such as health care, insurance, certain financial, and transactions with securities, are exempt (i.e. exempt without credit).

Transactions in real estate are generally exempt from VAT, but there are certain significant exceptions (e.g. transactions in new and significantly renovated buildings). Taxpayers can elect to add VAT to real estate transactions if certain conditions are met.

As of 2011, the reverse charge mechanism has been extended to the supply of waste metal and real estate, under which VAT is accounted for by the VAT liable purchaser and not by the supplier. For real estate, the reverse charge applies only when the seller has opted for taxation of real estate.

If the taxable supplies of Estonian resident businesses or a PE of a non-resident business in Estonia exceed EUR 16,000 in a calendar year, VAT registration is required. Voluntary registration is also possible. Certain transactions of non-resident businesses require Estonian VAT registration without any threshold.

The VAT accounting period is generally a calendar month, and VAT should be declared and paid on or before the 20th day of the following month.

Under certain conditions, a European Union (EU) taxable person that is not registered for VAT in Estonia will be entitled to a refund of input VAT paid in Estonia. Non-EU taxable persons are entitled to claim VAT refunds based on reciprocity.

Estonia has implemented a system that allows, under certain conditions, a company to account for VAT on imports on the VAT return without paying VAT to the customs authority.

### *Excise duties*
Excise taxes are levied on tobacco, alcohol, electricity, some packaging materials, and motor fuel.

### *Customs duties*
After becoming a member of the European Union, Estonia also became a member of the Customs Union. The Community Customs Code and related implementation regulations apply, meaning that:

- trade between Estonia and other EU countries is customs-free
- imports from non-EU countries are subject to EU customs tariffs, and
- numerous free trade agreements concluded between EU and non-EU countries apply to Estonia.

### *Social security and unemployment insurance*
Employers operating in Estonia (including non-residents with a PE or employees in Estonia) must pay social tax on certain payments to individuals at the rate of 33% (where 20% is used for financing public pension insurance and 13% is used for financing public health insurance). Social tax paid by employers is not capped and mainly applies to salaries, directors' fees, and service fees paid and fringe benefits granted to individuals. According to the new program of the coalition government, it is expected that the monthly social tax (except its public health insurance component) will be capped at EUR 4,000 per individual from the year 2014.

In addition to social tax, employers are also required to pay and withhold unemployment insurance contributions. Employers must pay 1.4% and employees must pay 2.8% (collected by employers through payroll withholding). The contributions mainly apply to salaries and service fees paid to individuals.

### *Compulsory accumulative pension scheme*
Employers' payroll withholding includes 2% or 1% contributions to the compulsory accumulative pension scheme, if the employee has joined that pension scheme.

### *Land and property taxes*
Land is subject to an annual land tax, which is calculated on the assessed value of land at rates between 0.1% and 2.5%, depending on the municipality. The tax is paid by the owners of land, or sometimes by the users of land, in three instalments between 31 March and 1 October.

There is no property tax (i.e. tax on the value of buildings).

Property transfers are generally subject to state and notary fees.

### *Heavy goods vehicle tax*
The heavy goods vehicle tax is paid for the following classes of vehicles that are registered with the Estonian National Motor Vehicle Register and are intended for the carriage of goods:

- Lorries with a maximum authorised weight or gross laden weight of not less than 12 tons.

- Road trains composed of trucks and trailers with a maximum authorised weight or gross laden weight of not less than 12 tons.

The tax is paid by the owners or users of the vehicles. The quarterly tax rates range from EUR 0 to EUR 232.60 per heavy goods vehicle.

### *Gambling tax*

Gambling tax is imposed on amounts received from operating games of skill, totalisator, betting, lotteries, and promotional lotteries. Tax is also charged on gambling tables and machines used for games of chance located in licensed premises. The tax is paid monthly by authorised operators.

### *Local taxes*

Local taxes can be imposed by rural municipalities or city councils; however, the fiscal significance of local taxes is almost non-existent. Local taxes include sales tax, boat tax, advertisement tax, road and street closure tax, motor vehicle tax, tax on keeping animals, entertainment tax, and parking charges. Note that the sales tax and boat tax will be abolished from the list of local taxes effective from year 2012.

## *Branch income*

Registered PEs of non-residents, much as with resident companies, are subject to CIT only in respect of profit distributions, both actual and deemed, as defined in domestic law.

Transactions and dealings between a head office and its PE(s) should be conducted on arm's-length terms. Thus, such profits should be attributed to a PE of a non-resident taxpayer that the PE would be expected to make if it were a distinct and separate taxpayer engaged in the same or similar activities, and under the same or similar conditions, and dealing in a wholly independent manner with its head office.

## *Income determination*

Distributable profits are determined based on financial statements drawn up in accordance with Estonian Generally Accepted Accounting Principles (GAAP) or International Accounting Standards (IAS)/International Financial Reporting Standards (IFRS), and there are no adjustments to accounting profits for tax purposes (e.g. tax depreciation, tax loss carryforward or carryback).

The CIT liability associated with the distribution of dividends is accounted for as an expense at the time the dividends are declared, regardless of when the profits were generated or distributed.

Dividends paid by Estonian companies are generally subject to 21/79 CIT at the level of the distributing company. However, dividends distributed by Estonian companies are exempt from CIT if the distributions are paid out of:

- dividends received from Estonian, EU, European Economic Area (EEA), and Swiss tax resident companies (except tax haven companies) in which the Estonian company has at least a 10% shareholding
- profits attributable to a PE in the EU, EEA, or Switzerland

- dividends received from all other foreign companies in which the Estonian company (except tax haven companies) has at least a 10% shareholding, provided that either the underlying profits have been subject to foreign tax or if foreign income tax was withheld from dividends received, or
- profits attributable to a foreign PE in all other countries provided that such profits have been subject to tax in the country of the PE.

In addition, stock dividends (bonus shares) distributed to stockholders are exempt from 21/79 CIT charge.

Certain domestic and foreign taxes can also be credited against the 21/79 CIT charge under domestic law or tax treaties.

## Deductions

Distributable profits are determined based on financial statements drawn up in accordance with Estonian GAAP or IAS/IFRS, and there are no adjustments to accounting profits for tax purposes (e.g. tax depreciation, tax loss carryforward or carryback).

### Payments to foreign affiliates

Payments to foreign affiliates are deductible for tax purposes (i.e. not subject to 21/79 CIT as deemed profit distributions) if the payment serves a business purpose, provides a benefit to the payer, is at arm's length, and is substantiated by sufficient documentation.

Payments to foreign affiliates may also be subject to various WHT. Certain payments to affiliates located in tax haven countries are always subject to 21/79 CIT or a 21% WHT rate.

### Taxes

All taxes paid are deductible for CIT purposes. In certain circumstances, domestic or foreign taxes may be creditable against the 21/79 CIT charge under domestic law or an applicable tax treaty.

### Fringe benefits

Employers operating in Estonia (including non-resident companies that have a PE or employees in Estonia) are liable to Estonian taxation on any fringe benefits granted to their employees (including directors).

Fringe benefits are subject to an exceptional tax treatment in Estonia, as only the employer is obliged to pay taxes on the fringe benefits furnished to the employee. Taxable fringe benefits received by a resident employee are generally not included in the taxable income of the employee for Estonian tax purposes. Fringe benefits are subject to 21/79 CIT and 33% social tax. For example, where the amount of the benefit is EUR 100, the CIT due by the employer would be EUR 26.58 (21/79 x 100) and the social tax due EUR 41.77 (0.33 x 126.58), for a total fringe benefit tax charge of EUR 68.35.

### Gifts, donations, and representation expenses

The 21/79 CIT is generally due on gifts and donations. Gifts and donations made to certain qualifying recipients are only subject to 21/79 CIT if such expenses exceed one of two limitations:

- 3% of the calculated social tax base for the existing calendar year or
- 10% of the profit of the last financial year according to statutory financial statements.

Representation expenses, those expenditures whose character and primary purpose is for representational or entertainment related activities, are generally subject to 21/79 CIT only if they exceed the threshold of EUR 32 per month plus 2% of the calculated social tax base of the calendar month in which the expenses are paid.

### *Other significant items*

The 21/79 CIT is generally due on expenses and payments that do not have a business purpose and that are regarded as deemed profit distributions. These may include, for example, late payment interest on tax arrears, penalties imposed by law, bribes, purchase of services, or settlement of obligations not related to taxpayer's business and acquisition of assets not related to taxpayer's business.

Furthermore, there are specific anti-tax haven rules treating certain transactions and dealings with tax haven companies as deemed profit distributions, which are therefore subject to 21/79 CIT. These include the following:

- Acquisition of securities issued by a tax haven entity (exception for certain listed securities).
- Acquisition of an ownership interest in a tax haven entity.
- Payment of fines or penalties to a tax haven entity, unless settled by court or arbitrage.
- Granting loans or making prepayments to a tax haven entity or otherwise acquiring a claim against a tax haven entity.

## *Group taxation*

There is no form of consolidation or group taxation for CIT purposes in Estonia.

### *Transfer pricing*

Transfer pricing rules are applicable to all types of transactions between related parties. Both domestic and cross-border transactions with related parties must be conducted at arm's length. Estonian tax legislation includes a relatively broad definition of related parties. Under the present corporate tax system, if the transactions between related parties do not follow the arm's-length principle, then the subsequent transfer pricing adjustments are treated as hidden profit distributions subject to 21/79 monthly CIT.

As a general rule, Estonian group companies and PEs of foreign companies are obliged to prepare transfer pricing documentation to prove the arm's-length nature of the inter-company transactions with all related parties.

However, this documentation requirement does not apply to small and medium-size enterprises (SME), unless they have conducted transactions with entities located in low-tax territories. A company or PE is deemed to be an SME provided that the consolidated results of the previous financial year of an Estonian company or a PE together with its associated enterprises or head office (i.e. at the group level) are below all of the following criteria:

- Annual sales below EUR 50 million.
- Balance sheet below EUR 43 million.

- The number of employees below 250.

Apart from the formal transfer pricing documentation and general requirement to disclose the transactions with the related parties in the annual reports, there are no additional reporting requirements related to transfer pricing in relation to inter-company transactions.

### Thin capitalisation

There are no thin capitalisation rules in the Estonian tax legislation.

### Controlled foreign company (CFC) regime

Estonia has no CFC rules for corporate taxpayers.

## Tax credits and incentives

There are no special tax incentives in Estonia. However, the entire Estonian corporate tax system, which provides for an indefinite deferral for taxing corporate profits, may be viewed as a tax incentive that promotes reinvestment of profits and thus stimulates economic growth.

### Foreign tax credit

Dividends distributed by Estonian companies are exempt from 21/79 CIT if the distributions are paid out of:

- dividends received from Estonian, EU, European Economic Area (EEA), and Swiss tax resident companies (except tax haven companies) in which the Estonian company has at least a 10% shareholding
- profits attributable to a PE in the EU, EEA, or Switzerland
- dividends received from all other foreign companies in which the Estonian company (except tax haven companies) has at least a 10% shareholding, provided that either the underlying profits have been subject to foreign tax or if foreign income tax was withheld from dividends received, or
- profits attributable to a foreign PE in all other countries provided that such profits have been subject to tax in the country of the PE.

In certain circumstances, domestic or foreign taxes may be creditable against the 21/79 corporate income tax charge under domestic law or an applicable tax treaty.

## Withholding taxes

Withholding agents must withhold income tax from certain payments. Withholding agents include resident legal entities, resident individuals registered as sole proprietorships or acting as employers, and non-residents having a PE or acting as employers in Estonia. The tax must be reported and paid by the tenth day of the month following the payment. Income tax is not withheld from payments to resident companies, registered sole proprietorships, and registered PEs of non-resident companies. The following rules are in place with respect to payments that are subject to WHT:

- There is no WHT on dividends.
- There is no WHT on interest payments to non-residents on the condition that the interest charged does not significantly exceed the arm’s-length rate at the time the

debt is incurred and the interest payments are made. A 21% Estonian WHT rate will thus apply only to the part of interest that significantly exceeds the arm's-length amount.
- Royalties (including payments for the use of industrial, commercial, or scientific equipment) paid to non-residents are generally subject to a 10% WHT rate under domestic law, but reduced rates may be available under double tax treaties (DTT). Certain royalty payments to associated EU and Swiss companies that meet certain conditions are exempt from WHT.
- Rental payments to non-residents for the use of immovable property located in Estonia and movable property subject to registration in Estonia (excluding payments for the use of industrial, commercial, or scientific equipment) are subject to a 21% WHT rate under domestic law, but DTTs may exempt payments for the use of movable property from WHT.
- Royalties and rental payments to resident individuals are subject to a 21% WHT rate.
- Payments to non-resident companies for services provided in Estonia, including management and consultancy fees, are subject to a 10% WHT rate under domestic law, but may be exempt under DTTs. Service fee payments to tax haven entities are always subject to a 21% WHT rate.
- Salaries, directors' fees, and service fees paid to individuals are subject to a 21% WHT rate under domestic law, but DTTs may exempt service fee payments to non-resident individuals from WHT.
- Payments for the activities of non-resident artistes or sportsmen carried out in Estonia are subject to a 10% WHT rate.
- Certain pensions, insurance benefits, scholarships, prizes, lottery winnings etc. paid to non-residents and resident individuals are subject to a 21% WHT rate under domestic law.

For non-residents without a PE in Estonia, the tax withheld from these payments at domestic or treaty rates constitutes final tax in terms of their Estonian source income and they do not have any tax reporting requirements in Estonia.

For certain types of Estonian-source income, non-residents are liable under Estonian domestic law to self assess their Estonian tax and submit a tax return to the Estonian tax authorities. These types of income include:

- Taxable capital gains.
- Profits derived from business conducted in Estonia without a registered PE.
- Other items of income from which tax was not withheld but should have been withheld.

Estonia has effective tax treaties with: Albania, Armenia, Austria, Azerbaijan, Belarus, Belgium, Bulgaria, Canada, the People's Republic of China, Croatia, the Czech Republic, Denmark, Finland, France, Germany, Georgia, Greece, Hungary, Iceland, Ireland, Isle of Man, Israel, Italy, Kazakhstan, the Republic of Korea, Latvia, Lithuania, Luxembourg, Macedonia, Malta, Moldova, the Netherlands, Norway, Poland, Portugal, Romania, Serbia, Singapore, Slovakia, Slovenia, Spain, Sweden, Switzerland, Turkey, Ukraine, the United Kingdom, and the United States. Treaties have also been concluded with Russia, United Arab Emirates, and Jersey, but these are not yet effective.

The following WHT rates apply to dividends, interest, and royalties paid to a recipient or beneficial owner resident in a tax treaty country. The lower of the domestic or the treaty rate is given.

| Recipient | Dividends (%) (1) | Interest (%) (2) | Royalties (%) (3) |
|---|---|---|---|
| Non-treaty | 0 | 0/21 | 0/10 |
| Treaty: | | | |
| Albania | 0 | 0/21 | 5 |
| Armenia | 0 | 0/21 | 10 |
| Austria | 0 | 0/21 | 0/5/10 (4) |
| Azerbaijan | 0 | 0/21 | 10 |
| Belarus | 0 | 0/21 | 10 |
| Belgium | 0 | 0/21 | 0/5/10 (4) |
| Bulgaria | 0 | 0/21 | 0/5 |
| Canada | 0 | 0/21 | 10 |
| China, People's Rep. of | 0 | 0/21 | 10 |
| Croatia | 0 | 0/21 | 10 |
| Czech Republic | 0 | 0/21 | 0/10 |
| Denmark | 0 | 0/21 | 0/5/10 (4) |
| Finland | 0 | 0/21 | 0/5/10 (4) |
| France | 0 | 0/21 | 0/5/10 (4) |
| Germany | 0 | 0/21 | 0/5/10 (4) |
| Georgia | 0 | 0/21 | 10 |
| Greece | 0 | 0/21 | 0/5/10 (4) |
| Hungary | 0 | 0/21 | 0/5/10 (4) |
| Iceland | 0 | 0/21 | 5/10 (4) |
| Ireland, Rep. of | 0 | 0/21 | 0/5/10 (4) |
| Isle of Man | 0 | 0/21 | 0 |
| Israel | 0 | 0/21 | 0 |
| Italy | 0 | 0/21 | 0/5/10 (4) |
| Kazakhstan | 0 | 0/21 | 15 |
| Korea, Rep. of | 0 | 0/21 | 5/10 (4) |
| Latvia | 0 | 0/21 | 0/5/10 (4) |
| Lithuania | 0 | 0/21 | 0/10 |
| Luxembourg | 0 | 0/21 | 0/5/10 |
| Macedonia | 0 | 0/21 | 5 |
| Malta | 0 | 0/21 | 0/10 |
| Moldova | 0 | 0/21 | 10 |
| Netherlands | 0 | 0/21 | 0/5/10 (4) |
| Norway | 0 | 0/21 | 5/10 (4) |
| Poland | 0 | 0/21 | 0/10 |
| Portugal | 0 | 0/21 | 0/10 |
| Romania | 0 | 0/21 | 0/10 |
| Serbia | 0 | 0/21 | 5/10 (5) |
| Singapore | 0 | 0/21 | 7.5 |
| Slovakia | 0 | 0/21 | 0/10 |
| Slovenia | 0 | 0/21 | 0/10 |
| Spain | 0 | 0/21 | 0/5/10 (4) |
| Sweden | 0 | 0/21 | 0/5/10 (4) |
| Switzerland | 0 | 0/21 | 0/5/10 (4) |
| Turkey | 0 | 0/21 | 5/10 (4) |

| Recipient | Dividends (%) (1) | Interest (%) (2) | Royalties (%) (3) |
|---|---|---|---|
| Ukraine | 0 | 0/21 | 10 |
| United Kingdom | 0 | 0/21 | 0/5/10 (4) |
| United States | 0 | 0/21 | 5/10 (4) |

Notes

1. Under the domestic law, the rate is nil for all non-resident individual and corporate shareholders.
2. The rate is nil on the condition that the interest paid to a non-resident does not significantly exceed the arm's-length rate at the time the debt is incurred and the interest payments are made. Estonian WHT at the domestic rate of 21% will thus apply only to the part of interest that significantly exceeds the arm's-length amount. This WHT could be reduced under tax treaties.
3. The rate is nil for arm's-length royalties paid to an associated EU or Swiss company if certain conditions are met.
4. The lower 5% rate applies to royalties paid for the use of industrial, commercial, or scientific equipment.
5. The lower 5% rate applies to royalties paid for the use of copyright royalties, excluding software royalties.

## Tax administration

### Returns

The tax period is a calendar month. The combined CIT and payroll tax return (form TSD with appendices) must be submitted to the local tax authorities by the tenth day of the month following a taxable distribution or payment. Tax returns may be filed electronically via the Internet.

### Payment of tax

CIT and payroll taxes must be remitted to the local tax authorities by the tenth day of the month following a taxable distribution or payment. No advance CIT payments are required.

### Advance rulings

An advance ruling system became available in Estonia on 1 January 2008. The aim of the procedure is to provide certainty on the tax consequences of specific transactions or combination of transactions taking place in the future. The ruling is binding on the authorities (and not on the taxpayer) if the transaction was made within the deadline and the description provided in the ruling and the underlying legislation has not been substantially changed in the meantime. Estonian legislation specifically excludes obtaining rulings when the interpretation of the legislation is objectively clear, the situation is hypothetical, or the main purpose of the planned transaction is tax avoidance. In addition, transfer pricing valuation issues are excluded from the scope of the binding ruling system.

## Other issues

### Company restructurings

In accordance with the EC Directive 2009/133/EC on mergers, divisions, partial divisions, transfers of assets, and exchanges of shares concerning companies of different member states, the mergers, divisions, and re-organisations of companies are generally tax-neutral in Estonia. The principle of going concern is applied in taxation of referred restructuring transactions.

## Significant developments

The following changes became effective 1 January 2011:

- The export income deduction has been extended to 2015 but with reduced rates *(see the Tax credits and incentives section)*.
- A 150% deduction is available for expenditure not exceeding 250,000 Fijian dollars (FJD) on marketing goods and services for export to some South Pacific Island countries.
- The Sixth Schedule of the Income Tax Act in relation to film-making and audiovisual incentives has been repealed and replaced.
- The value-added tax (VAT) rate has increased from 12.5% to 15%.

As of 1 August 2010, the supply of certain insurance services is subject to VAT.

As of 1 May 2011, certain capital gains are subject to capital gains tax of 10%, and land sales tax is no longer applicable.

## Taxes on corporate income

Normal tax is payable and assessed on the chargeable income of the business calculated by subtracting deductible expenses from all assessable income specified under Section 11 of the Income Tax Act.

Normal tax is payable on taxable income at the following rates:

| Type of company | Rate (%) |
|---|---|
| Non-resident shipping companies in respect of outgoing business from Fiji | 2 |
| Companies listed on the South Pacific Stock Exchange that have at least 40% resident shareholding are eligible for this tax rate for at least three years | 20 |
| Other companies, including non-resident companies carrying on business in Fiji (e.g. branch profits) | 28 |

## Corporate residence

A company incorporated in Fiji is considered a 'resident' in Fiji. A company not incorporated in Fiji is resident in Fiji if it carries on business in Fiji and either its practical management and control are in Fiji or its voting powers are controlled by shareholders who are residents of Fiji.

## Other taxes

### Value-added tax (VAT)

VAT generally applies on the supply of goods and services in Fiji by a registered person in the course or furtherance of a taxable activity carried on by that person. As of 1 January 2010, the threshold amount for VAT registration is FJD 50,000 for the supply of goods and /or services.

As of 1 January 2011, the VAT rate increased from 12.5% to 15%.

The supply of financial services, residential accommodation, and education by an approved institution is exempt. However, as of 1 August 2010, the supply of certain insurance services is subject to VAT.

The sale of edible oil, tin fish, rice, flour, tea, powdered milk, and kerosene are zero-rated. Exports of goods and services and international transportation are zero-rated. The export of services, however, is zero-rated only under certain conditions.

The due date for lodgement of VAT returns and payment of any VAT payable is the end of the month following the taxable period.

VAT refunds can no longer be transferred or assigned to another registered entity.

Under certain conditions, Directors of companies with insufficient funds may be held liable for any outstanding VAT or income tax liability of the company and may be sued in their personal capacity.

### Land sales tax

The land sales tax is no longer applicable as of 1 May 2011.

### Excise taxes

Excise tax is payable on tobacco, alcohol products, and carbonated soft drinks manufactured in Fiji.

### Customs duties/import excise tax

The government has introduced a new import excise tax (in addition to the existing fiscal duties imposed on importation) that will be levied on selected goods, such as the following:

- Alcohol and tobacco.
- Used or second hand LPG powered motor vehicles.
- New or used licensed mini buses.
- Some goods which are also locally manufactured.
- Certain white goods and luxury items.

### Stamp duties

Under the Fiji Stamp Duties Act, stamp duty is payable in respect of instruments including, but not limited to, declaration of trusts, leases, mortgages, transfer of property (or interest therein), shares, etc.

### Hotel turnover tax (HTT)

Under the Hotel Turnover Tax Act of 2006, HTT is imposed on hotel charges at the rate of 5%.

For ease of administration to both hoteliers and the Fiji Revenue and Customs Authority (FRCA), the due date for payment is aligned with the VAT Decree requirements (i.e. end of the following month). The HTT Act includes a seven year record keeping requirement.

Directors of companies have been included in the definition of accountable persons in the HTT Act. An accountable person is a person who is operating a licensed hotel which has levied the HTT on hotel charges and must account for it.

### *Gambling turnover tax (GTT)*

Under the Gambling Turnover Tax Decree of 1991, GTT is imposed on the value of consideration paid or payable in respect of the provision of prescribed gambling services (i.e. acceptance of bets and provision of tickets for any lottery) at the rate of 15%.

## *Branch income*

The profits of a foreign company's branch operating in Fiji are subject to the same tax rate as the tax rate levied on profits of a resident corporation (i.e. 28% in 2010 and subsequent years).

## *Income determination*

Normal tax is payable and assessed on taxable income of the business. Taxable income is calculated by subtracting allowable deductions from all assessable income (i.e. all sources of income).

### *Inventory valuation*

Inventories are normally valued at the lower of cost and net realisable value. While the first in first out (FIFO) method is acceptable, the last in first out (LIFO) method is not, for either book or tax purposes. Conformity between book and tax reporting is not required, and there are no special provisions for valuing inventories or determining inventory flows.

### *Capital gains*

Effective from 1 May 2011, capital gains may be subject to capital gains tax of 10%.

### *Dividend income*

Transfers of property by private companies to shareholders and associates may be deemed to be a dividend paid by that company.

Resident corporations may exclude from taxable income dividends received from a company incorporated in Fiji. There are no ownership requirements for this exclusion.

### *Stock dividends*

Bonus shares are tax-free, except where paid out of the revenue or profits of investment or service-type companies. Tax-free stock dividends issued by private companies may be taxable upon sale of the shares.

### *Partnership income*

The income of the partners from a partnership for any income year is equal to each partners' respective share of income from that partnership. Each partner declares income separately and is individually liable for filing a tax return for each applicable year.

### *Liability of directors/shareholders*
Directors/shareholders of companies in liquidation may be held liable for any outstanding tax liability of the company. Directors/shareholders of private companies or companies with insufficient assets may also be held liable for any outstanding tax liability of the company under certain conditions.

### *Other significant items*
Where a foreign-controlled business in Fiji produces less income than might be expected, the revenue authorities may determine the income for tax purposes.

A person normally residing outside Fiji, which disposes of an interest in land in Fiji held directly or through a shareholding in a company, may be assessed to income tax on the profit on that disposal.

### *Foreign income*
Resident corporations are taxed on their worldwide income. Foreign income derived from a treaty country is taxed according to the treaty. Foreign income sourced from a non-treaty country is subject to income tax in Fiji. A credit is allowed in Fiji for foreign tax paid on foreign income, limited to the lesser of the Fiji tax payable or the overseas tax paid on such income. There are no special provisions for taxing undistributed income of foreign subsidiaries.

## *Deductions*

Generally, expenses wholly and exclusively incurred in deriving assessable income are allowable deductions. Expenditures, capital or domestic in nature, are generally not deductible.

### *Depreciation and depletion*
Depreciation is calculated on the cost of an asset on a straight-line basis. The rates of depreciation are based on the estimated life of the asset. Upon disposal of an asset, either recoupment of depreciation claimed is taxable or the excess of tax written-down value over sale proceeds is deductible. The taxpayer has an option to set-off recoupment of depreciation against the cost of replacement assets. Conformity between book and tax depreciation is not required.

There are seven broad bands of depreciation rates for assets acquired after 1 January 1998, and the prescribed effective life of the asset is used to determine the relevant depreciation rate. The seven broad bands and the depreciation rates are as follows:

| Band | Effective life (years) | Standard rate (%) | Maximum rate (%) |
|---|---|---|---|
| 1 | 2 to less than 3 | 50 | 60 |
| 2 | 3 to less than 5 | 33 1/3 | 40 |
| 3 | 5 to less than 6 2/3 | 20 | 24 |
| 4 | 6 2/3 to less than 10 | 15 | 18 |
| 5 | 10 to less than 20 | 10 | 12 |
| 6 | 20 to less than 40 | 5 | 6 |
| 7 | 40 and over | 2.5 | 3 |

An optional 20% loading, which applies on the broadband rate, may be claimed. Assets acquired before 1 January 1998 continue to be depreciated at the former rates.

Accelerated depreciation is available for (i) buildings constructed between 1999 and 2012 that are to be used for agricultural, commercial, or industrial purposes, (ii) multi-storey, multi-unit residential buildings, and (iii) other capital expenditure considered of benefit for the economic development of Fiji. Up to one-fifth of the expenditure may be claimed in each of any five years of an eight-year period.

Renewable energy plant and water storage facilities also qualify for a 100% write-off.

Capital expenditure aimed at economising on the consumption of fuel, electricity, or its derivatives or on an asset using energy sources indigenous to Fiji may be eligible for accelerated depreciation at varying rates.

The cost of the acquisition of a mining lease or tenement and the cost of development of mines may be written off in equal instalments in any five of the first or last eight years of a nine-year period, commencing with the year in which the expenditure was incurred.

A deduction for depletion of other natural resources is not available.

### *Bad debt*
Provisions for expenses not yet incurred (e.g. bad debts) are not tax-deductible. A deduction is permitted in respect to amounts that are subsequently paid or written off.

### *Charitable contributions*
The deduction threshold for contributions to approved charitable organisations is FJD 100,000.

There are certain other specific donations which qualify for varying levels of deductions, including:

- Donations to the Fiji Heritage Foundation, which qualify for a deduction of 150%.
- Cash donations exceeding FJD 50,000 to the Poverty Relief Fund for Education, which qualify for a deduction of 200%.
- Cash donations exceeding FJD 100,000 to a Sports Fund (as approved by the Commissioner of Inland Revenue) for purposes of sports development in Fiji, which qualify for a deduction of 150%.

### *Taxes*
Taxes levied on income are not deductible.

### *Net operating losses*
Losses may be carried forward for eight years, provided the company can demonstrate a minimum 51% continuity of shareholding between the year of loss and the year of claim. Notwithstanding the change in ownership, losses may also be carried forward where a company carries on the same business in the carried forward year as it did in the loss year. Loss carrybacks are not permitted.

Losses incurred in agricultural or pastoral pursuits may be carried forward indefinitely.

### *Payments to foreign affiliates*
Subject to the normal rules of deductibility, a deduction can be claimed for royalties, management service fees, and interest charges paid to foreign affiliates. However, as

of 1 January 2010, any deductions claimed by any company carrying on business in Fiji (whether incorporated in Fiji or not) in respect of head office charges or any other like payments shall not exceed 3% of total gross Fiji income.

## *Group taxation*

Group taxation is not available in Fiji.

### *Thin capitalisation*

There are no thin capitalisation rules in Fiji.

## *Tax credits and incentives*

The tax incentives in Fiji are designed primarily to promote export sales and to encourage the development of industries that are considered of benefit to the economic development of Fiji.

### *Export income deduction*

A deduction for export income is allowed in accordance with the following:

| Year of assessment | Percentage of export income to be deducted |
|---|---|
| 2008 to 2011 | 50% (100% on the island of Vanua Levu until 2010) |
| 2012 | 40% |
| 2013 | 30% |
| 2014 | 20% |
| 2015 | 10% |

'Export income' means net profit derived by a taxpayer from the business of exporting goods and services; and the Commissioner of Inland Revenue may, where separate records for export income are not maintained, determine such income on the basis of a formula as set out in the legislation.

The 5th Schedule of the Income Tax Act – 'Export Incentives' – has been repealed. However, the existing beneficiaries are expected to continue to enjoy the incentives under this schedule until the expiry of the incentives granted.

### *Information communication technology (ICT) tax incentives*

The income of an information communication technology operator may be exempt from income tax, provided that the business employs 50 employees or more for six months within the income year and 60% or more of the total value of its services in that income year is exported, if it is:

- operating on or before 1 January 2009 in the declared Kalabu Tax Free Zone (exempt from 1 January 2007 to 31 December 2016) or
- granted a licence after 1 January 2009 (exempt for a period of 13 years from the date of issue of the licence).

The following tax incentives are available to taxpayers engaged in new ICT business and for existing taxpayers so engaged who are able to show a significant increase in capacity and number of employees:

- 80% tax exemption for businesses employing more than 101 employees.
- 60% tax exemption for those that employ between 60 and 100 employees.
- 40% tax exemption for those employing 10 to 59 employees.

A 150% deduction is available for costs incurred for the development of an ICT business by any taxpayer employing 500 or more employees. This deduction is available till 31 December 2012.

'Information communication technology business' means an entity engaged in software development, call centres, or internet service provision. It does not include an internet café, any retail or wholesale of information technology products, or the repair, sale, or service of any such products.

### *Employment incentives*
Salary and wages paid to first-time employees for the first 12 months of employment qualify for a 150% deduction. This deduction is available until 31 December 2012.

### *Hotel industry incentives*
Approved capital expenditure incurred in building, renovating, or expanding a hotel is subject to an investment allowance of 55% of the approved expenditure, in addition to normal depreciation.

Under the Short Life Investment Package (SLIP) the following concessions are available:

- Exemption from income tax for a period of ten years, provided that the capital investment in the hotel is more than FJD 7 million.
- Duty-free entry of all capital equipment, plant, and machinery upon receiving provisional approval from the Minister.
- Permission to generate own electricity, the excess to be sold to the Fiji Electricity Authority.

The recipients of provisional approval for hotel investment tax incentives are required to commence implementation of the hotel projects within one year from the date provisional approval is granted.

### *Filmmaking and audio-visual incentives*
A tax exemption or reduced tax rate is available on the income of non-resident employees of an approved non-resident company engaged or intending to be engaged in making a film in Fiji.

A resident entity (excluding an entity holding a broadcast license in television or radio in Fiji or with substantial shareholdings in the same) may deduct of up to 150% of expenditures on audio-visual production in respect of income in the year of the expenditures. 'Audio-visual productions' include production for exhibition or sale of theatrical films, broadcast television, direct-to-video and video disk programme, audio recording, computer software, and interactive websites.

A tax exemption is available on the income derived by a taxpayer from the commercial exploitation of a copyright until the taxpayer has received from the commercial exploitation a return of up to 60% of the expenditure. The expenditure must be of capital nature and in relation to the audio-visual production costs in respect of a qualifying audio-visual production.

Tax concessions are also available for residents of areas declared as studio city zones by the appropriate government Minister.

### *Other tax incentives*

An investment allowance of 55% is available for the construction of a vessel, in addition to normal depreciation. Effective 1 January 2011, investment allowance is available for refurbishment and renovation of a vessel subject to certain conditions.

An approved mining company may, for a specified period, be exempt from income tax or taxed at a lower rate. The holder of a valid prospecting license may write off approved expenditure on prospecting for minerals against income from all sources.

A 150% deduction is available for direct capital expenditures incurred by commercial banks in rural banking programmes.

Prior to 1 January 2011, a 200% deduction was available for capital expenditures incurred by entities in the agriculture and fisheries sector not enjoying other concessions under the Income Tax Act.

Investors engaged in value adding processes in the food processing, agricultural processing, fisheries, or forestry business may be able to claim a 100% deduction with respect of amounts invested or re-invested (for expansion), provided that the businesses meet the 50% local content rule.

An income tax exemption may be available to a taxpayer engaged in commercial agricultural farming and agro-processing subject to certain conditions:

- any new activity approved and established between 1 January 2009 and 31 December 2009, for a period of four to ten consecutive fiscal years, depending on the level of capital investment, or
- any new activity approved and established between 1 January 2010 and 31 December 2014, for a period of ten consecutive fiscal years with a capital investment of at least FJD 2 million.

Income derived by a taxpayer from a new activity in processing agricultural commodities into bio-fuels may be exempt from income tax for a period of ten years under certain conditions.

An exemption from income tax for a period of five years may be available to a taxpayer engaging in renewable energy projects and power cogeneration.

Entities in the agriculture, fisheries, and tourism industries, with a maximum turnover threshold of FJD 300,000, may also be exempt from income tax.

An investment allowance equal to 60% of the qualifying expenditure is available as a deduction for investment in Fixed Line Next Generation Networks. A qualifying expenditure means an expenditure of FJD 50,000 or more incurred for the purpose of acquiring a capital asset in any of the years from the 2009 year of assessment to the 2012 year of assessment.

A 150% deduction is available on expenses incurred in reorganising a company for the purpose of listing on the South Pacific Stock Exchange.

### Foreign tax credit
A credit is allowed in Fiji for foreign tax paid on foreign income, limited to the lesser of the Fiji tax payable or the overseas tax paid on such income.

## Withholding taxes

| Recipient | Dividends (%) | Interest (%) | Royalties (%) | Know-how, management fees (%) | Professional fees (%) |
|---|---|---|---|---|---|
| Resident corporations | 0 | 31 (1) | 0 | 0 | 0 |
| Non-resident corporations: | | | | | |

Notes

1. Applies to interest (over FJD 200) on savings and deposits with commercial banks and other financial institutions.
2. 10% of gross amount of dividends if beneficial owner is a company (other than a partnership) that holds directly at least 25% of the capital of the company paying the dividends; 15% in all other cases.
3. 5% of gross amount of dividends if beneficial owner is a company (other than a partnership) that holds directly at least 10% of the capital of the company paying the dividends; 15% in all other cases.
4. Depending on the provisions of the applicable double taxation agreement.
5. The maximum withholding tax rate imposed on dividends under the Fiji Income Tax Act is 15%.

## Tax administration

The Tax Administration Decree (TAD) was promulgated effective 1 January 2010 with the stated intention of harmonising the administration of the various tax laws, including income tax and VAT.

Effective 1 January 2011, if a due date falls on a Saturday, Sunday, or holiday, the due date is the last working day before the due date.

### Returns
Tax is assessed on income derived during the calendar year preceding the year of assessment. Returns are therefore generally accepted on a calendar-year basis, although approval is also given to use an alternative fiscal-year basis. For purposes of assessment of returns completed on a fiscal-year basis, the calendar year in which more than one-half of the fiscal year falls is deemed to be the calendar year in which the income is derived. The Fiji tax system is not based on self-assessment. Returns of income contain information on the basis of which assessments are raised by the tax authorities.

The due date for lodgement of income tax returns is three months after the end of the income year. However, under the Tax Agent Lodgement Programme, an extension of time may be granted to lodge the income tax returns.

### *Payment of tax*

Advance tax payments are required in three equal instalments after the end of the taxpayer's fiscal year-end as follows:

- First advance: due on the last day of the financial/fiscal year.
- Second advance: due three months after the end of the taxpayer's fiscal year-end.
- Third advance: due seven months after the end of the taxpayer's fiscal year-end.

The advance payments are allowed as credits against the tax due on assessment.

The TAD provides for various ways to ensure the collection of taxes including, but not limited to, the following:

- Departure prohibition order: A departure prohibition order may be used by the tax office to prevent taxpayers from leaving the country without settling outstanding taxes.
- Garnishee orders: The tax office may garnish bank accounts for outstanding taxes.
- Registration of charges on personal and real properties of the taxpayer.
- Distress and sale of personal property.
- Temporary closure of business.

### *Penalties*

Administrative penalty provisions have been amended and increased by the TAD. Some of the penalties are as follows:

- Failure to register: Every person who fails to apply for registration as required pursuant to the Decree, commits an offence against the Decree, and will on conviction be liable to a fine not exceeding 50% of the tax payable, where the delay does not exceed six months; or a fine not exceeding the tax payable, where the delay exceeds six months.
- Late filing of a return: A registered person who fails to lodge a VAT return is liable for a penalty of 20% of the tax payable in the case where tax is payable or, in any other case, FJD 1 for each day of default.
- Late payment of tax payable: Where any tax remains unpaid on the expiry of the due date, a penalty of 25% of the tax payable in respect of that taxable period will apply.
- Failure to maintain proper records: A registered person who fails to keep, retain, or maintain account, documents, or records is liable for a penalty of 75% (knowingly or recklessly made) or 20% (in other cases).

### *Topics of focus for tax authorities*

The TAD has introduced a binding ruling system. However, the provisions will only apply after the Minister of Finance has appointed a date by notice in the Gazette.

The tax authorities may void any transaction, agreement, or arrangement made or entered into for the purpose of altering the incidence of tax; relieving any person from tax liability; or defeating, evading, or avoiding any tax imposed.

## Significant developments

The Finnish income tax system is expected to undergo some changes in the coming years. A group nominated by the Ministry of Finance has evaluated the current tax system and suggested amendments to it. The outcome of the possible tax reform is uncertain due to the parliamentary elections which took place in April 2011. Possible changes in corporate income taxation will be decided by the new government. However, at this stage, no decisions with respect to the possible changes have been made.

## Taxes on corporate income

Finnish resident companies are subject to Finnish corporate income tax (CIT) on their worldwide income (i.e. unlimited tax liability). Also, Finnish permanent establishments (PE) of non-resident companies are subject to Finnish CIT on their worldwide income attributable to the PE.

The CIT rate is 26%.

## Corporate residence

A company is deemed to be resident on the basis of incorporation. Consequently, a company is deemed to be resident in Finland if it is incorporated (registered) in Finland.

### Permanent establishment (PE)

A PE is, in general, formed in line with the Organisation for Economic Co-operation and Development (OECD) Model Convention.

## Other taxes

### Value-added tax (VAT)

The general VAT rate is 23%. A reduced rate of 13% is applied to food and animal feed. The reduced VAT rate of 13% also applies to restaurant and catering services. A reduced VAT rate of 9% is applied to books, accommodation, and passenger transport.

A zero rate applies in certain instances (e.g. subscriptions to newspapers and periodicals, intra-Community supplies of goods, and exports of goods). Additionally, certain services (e.g. financial services, insurance services, and certain educational services) are exempted from VAT.

# Finland

### *Customs duties*
Many goods imported into Finland from outside the European Union are subject to customs duties. The rates of duty are provided by the EU's Common Customs Tariff and vary widely.

### *Excise duties*
Alcohol and alcoholic beverages, tobacco products, liquid fuels, electricity, natural gas, and coal are subject to EU harmonised excise duties. National excise duties are levied in Finland on waste delivered to landfill sites, lubricating oil, oil imported into or through Finland, ice cream, sweets, soft drinks, beverage containers, and tall oil.

### *Stamp tax*
No stamp taxes are levied in Finland.

### *Real estate tax*
Municipalities impose an annual real estate tax. The tax is levied on the taxable value of buildings and land. The municipal council determines the applicable tax rates, although the minimum and maximum tax rates are set by tax legislation (e.g. 0.32% to 0.75% for permanent dwellings, 0.6% to 1.35% for other real estate). The tax is deductible from taxable business income if the real estate is used for business purposes. The tax is deductible from taxable income of the so-called other source of income if the real estate is used to acquire other taxable income than business income.

### *Transfer tax*
A transfer tax of 4% of the sales price is payable on the transfer of real estate situated in Finland. The transfer of shares in Finnish companies and other domestic securities is subject to a transfer tax of 1.6%. Generally, the transfer tax is payable by the transferee.

No transfer tax is payable on the transfer of securities made through the stock exchange. Similarly, no transfer tax is payable if both the seller and the transferee are non-residents. Transfer tax is, however, always payable on transfers between non-residents if the transferred shares are shares in a Finnish housing or real estate company.

### *Social security contributions*
According to the Finnish social security legislation, both Finnish and foreign employers have a liability to pay several social security payments in Finland in cases where an employee performs one's tasks partly or wholly in Finland. The liability concerns all employers, regardless of the form of the company and whether the foreign company has a PE in Finland. The percentage rates for the employer's (and employee's) social security contributions are revised on an annual basis.

Compulsory social security contributions payable by the employer in 2011, according to the paid salaries, are as follows:

- Employer's social security charge: 2.12% (no cap).
- Employer's pension insurance contribution: 17.10% (on average, no cap).
- Employer's unemployment insurance contribution: 0.80% for the first 1,879,500 euros (EUR) of gross salaries and 3.20% for the portion of the gross salaries exceeding EUR 1,879,500 (no cap).
- Group life insurance premium: 0.07% (on average, no cap).
- Accident insurance premium: 1.00% (on average, no cap).

The new rates for employer's social security charge are applicable to salaries paid as of 1 January 2011. The employer's social security charge is paid to the regional tax office, and the other contributions are paid to the insurance company. All of these contributions are tax deductible as salary cost.

Compulsory social security contributions payable by the employee in 2011 are as follows:

- Employee's pension insurance contribution: 4.70% or 6.00% used for employees of age 53 or over (no cap).
- Employee's unemployment insurance contribution: 0.60% (no cap).

Abovementioned contributions are tax deductible for the employee. These contributions are withheld from the gross salary at the time of salary payment and remitted by the employer to the appropriate insurance company together with the employer's pension and unemployment contributions.

- Employee's sickness insurance contribution: 2.01% (no cap).

The sickness insurance consists of two payments, daily allowance contribution 0.82% and medicare contribution 1.19%. From these two contributions, only the daily allowance contribution is tax deductible for the employee. The medicare contribution is not tax deductible. Unlike other employee's social security contributions, the sickness insurance contribution is included in the withholding tax rate of the employee's personal withholding tax card and, thus, withheld and remitted to the tax authorities together with the withheld income taxes and is finally settled in the final assessment.

If an employee is regarded as a foreign-posted employee and has an E-101 certificate or a certificate of coverage from one's home country, neither the aforementioned employer's social security contributions nor the employee's social security charges are payable in Finland.

## *Branch income*

As a general rule, a branch is taxed like a corporation (tax rate 26%) on the profits attributable to it, provided the branch constitutes a PE in Finland. No tax is withheld on transfers of (taxed) profits to the head office.

## *Income determination*

Companies and other legal entities may have income from three different sources: income from business activities, agricultural income, and personal source income. The net taxable income is calculated separately for each source. The expenses of one source of income cannot be deducted from the taxable income of another source, and a loss from one source of income cannot offset taxable income from another source. All taxable income received by a company is taxed at the CIT rate of 26% irrespective of the source to which it is attributable.

Income from business and professional activities falls into 'business source' income (taxed in accordance with Business Income Tax Act or BITA), while income from non-business activity is 'personal income'. Typically, personal income is passive income derived, for example, from investments. As an example, rental income from real estate let to non-related companies is usually regarded as 'personal source' income. The same can apply to a dividend received from stock exchange quoted companies, where the recipient of the dividend is a passive holding company. Farming and forestry income are, as a main rule, treated as agricultural source income.

In general, Finland has a very broad income concept, and taxable income includes all income derived from a company's activities, though there are some significant exceptions, including (among others):

- Capital contributions by shareholders.
- In most cases, dividends from unlisted companies *(see Dividend income below)*.
- Liquidation gains and capital gains qualifying for the participation exemption *(see Capital gains below)*.
- Proceeds from disposal of company's own shares.
- Merger gain.

There is no general distinction between capital gains and other income; capital gains of a company are taxed as part of its general income either in the 'business income' basket or the 'other income' basket. No rates other than the general CIT rate of 26% are applied to any part of taxable income of a company.

Taxable income of a company generally is computed on an accrual basis (i.e. income is taxable in the year it is earned). However, exemptions to this main rule do exist, including unrealised exchange gains and losses, which are taxable/deductible in the year of the rate change.

### *Inventory valuation*
Inventories may be written down to the lower of direct first in first out (FIFO) cost, replacement cost, or net realisable value. Conformity between book and tax reporting is required.

### *Capital gains*
Capital gains and losses are generally included in the taxable business income (i.e. sales proceeds are included in the taxable income, and the undepreciated balance of the asset sold is deducted in the sales year) and treated as ordinary income. However, the entire stock of machinery and equipment is treated as a single item, and the capital gain on machinery and equipment is entered as income indirectly by deducting the selling price from the remaining value of the stock of machinery and equipment.

Capital gains arising from the sale of shares are tax exempt via a participation exemption, under certain circumstances. Specifically, capital gains arising from the sale of shares are tax exempt if:

- the seller is not a company carrying out private equity activities (as defined by BITA)
- the seller has owned continuously, for a period of at least one year, at least 10% of the share capital of the target company, and
- the shares are part of the seller's fixed assets and the shareholding is included in the seller's business income source for tax purposes.

For the participation exemption to apply, the target company cannot be a real estate company, a housing company, or a company the activities of which mainly include owning of real estates. The target company must also be a Finnish company, a company referred to in the European Commission (EC) Parent-Subsidiary Directive, or a company resident in a country with which Finland has concluded a tax treaty which applies to the target company's dividend distribution.

Note that a capital gain is taxable to the extent that the gain corresponds with a previous tax-deductible write-down or provision made in connection with the acquisition cost of shares, subsidies received for acquiring shares, or previous capital losses deducted for Finnish tax purposes from intragroup transfer of the shares.

Capital losses are non-deductible in situations where capital gains are exempt from tax.

### *Dividend income*

Dividends received by a Finnish company are tax exempt in most cases. However, dividends received are partly (75%) taxable if:

- the dividend is received on shares belonging to 'investment assets' and the receiving company does not own at least 10% of the equity of the distributing company that is resident in another European Union (EU) member state and covered by the EC Parent-Subsidiary Directive (note that only financial, pension, and insurance institutions may have assets which are considered as 'investment assets')
- the dividend is received from a company other than a Finnish or EU resident, and
- the dividend is received from a publicly quoted company, the receiving company is not a publicly quoted company, and the shareholding is less than 10% of the equity of the distributing company.

Dividends that a Finnish company receives from other than a company resident in Finland or another EU member state are, however, fully taxable (100%) if there is no applicable tax treaty. Note that most of the Finnish tax treaties include provision enabling tax exempt dividends from the tax treaty country in case of at least a 10% shareholding.

### *Stock dividends*

Stock dividends (bonus shares) may be distributed to stockholders, which are corporations and other legal entities with some exceptions, free of tax on the shareholder *(see Dividend income above)*.

### *Foreign income*

A Finnish corporation is taxed on foreign dividends when the decision to distribute dividends is made and on foreign branch income and other foreign income (e.g. interest and royalties) as earned. The principal method of avoiding double taxation is the credit method, although the exemption method is still applied in a few older treaties *(see the Tax credits and incentives section for more information)*.

## *Deductions*

As with taxable income, the concept of deductible costs is wide and covers, in general, all costs incurred in the pursuance of taxable income. Significant exceptions to this rule include (among others):

- Income taxes *(see below)*, tax late payment interests, and punitive tax increases.
- Fines and other punitive payments.
- 50% of entertainment costs.

- Capital losses and liquidation losses if capital gains from the sale of shares of a target company would qualify for the participation exemption *(see Capital gains in the Income determination section)*.
- Losses from the disposal of a company's own shares.
- Merger losses.

As the accrual method is applied to calculation of taxable income, expenses are usually deductible in the year they are realised (i.e. the year the obligation to pay has arisen).

### *Depreciation, amortisation, and depletion*
Maximum annual rates of depreciation calculated on net book value (declining-balance method) are 25% for machinery and equipment and from 4% to 20% for buildings and other constructions, depending on the type and estimated life of the asset. Net book value is defined as cost less accumulated depreciation and, in the case of machinery and equipment, proceeds on disposal of the assets. The straight-line method is applied to certain intangible assets and capitalised expenditures and to assets with long economic use, such as dams. Tax depreciation is limited to the cumulative charges made in the books.

Costs related to qualifying intangible property are usually amortisable over a period of ten years or a shorter period if the economic life is proven to be less than ten years.

The capital cost of mines, sandpits, quarries, and peat bogs is written off in proportion to the quantities extracted. Short-lived items (the economic life of which is three years or less) may be written off immediately.

Land is not a depreciable asset.

### *Goodwill*
Acquired goodwill is amortisable for tax purposes over its economic life, up to a maximum of ten years.

### *Taxes*
No income taxes are deductible when determining taxable income. However, the real estate tax is deductible.

### *Net operating losses*
Losses may be carried forward for ten subsequent years. However, the right to carryforward may be forfeited in certain instances, such as in cases where there is a direct or indirect change in the ownership of the company operating at a loss. Loss carrybacks are not allowed.

### *Payments to foreign affiliates*
A Finnish corporation may claim a deduction for royalties, service fees, and interest charges paid to foreign affiliates, provided the underlying transaction is beneficial to it and the amounts paid are at arm's length.

## *Group taxation*

Companies within a group are not consolidated for CIT purposes. However, via group contributions (i.e. lump sum payments of cash based on annual taxable profits), group companies may even out their taxable profits and losses, which leads effectively to the same result as consolidation would. A group contribution is a deductible cost for the granting company and taxable income for the receiving company, provided that all of the following are true:

- Both companies belong to a structure where there is a direct or indirect common ownership of at least 90%, and the structure has existed for the entire tax year.
- Both companies are Finnish resident for tax purposes.
- Both companies are limited liability companies or co-operatives with business activities (i.e. have a source of income from business activities, *see the Income determination section)* and are not financial, insurance, or pension institutions.
- The contribution is recorded in the annual statutory accounts of both companies involved and must affect their annual net income.
- The accounting period for both companies ends at the same date.
- The amount of contribution does not exceed the taxable business income of the granting company.
- The contribution is not considered a capital investment.

Based on case law, the ownership chain may also be traced via foreign entities, provided there is a tax treaty between Finland and the country wherein the ultimate parent for the group is resident.

### *Transfer pricing*
All transactions between related parties must happen at arm's length. The requirement is imperative even in relation to purely domestic transactions. If the arm's-length requirement is not followed, income or deductions of a company may be adjusted for tax purposes, in addition to which a risk for substantial penalties exists.

A Finnish company is obliged to prepare transfer pricing documentation to support transactions between its non-Finnish related parties. Documentation is subject to statutory requirements regarding content, which vary depending on the volume of related party transactions. The documentation requirement does not concern small and medium-sized companies that have less than 250 employees and feature a turnover of no larger than EUR 50 million or a balance sheet of no more than EUR 43 million.

Thresholds are calculated at the group level. Failure to present appropriate documentation may lead to a punitive tax increase.

### *Thin capitalisation*
There is no special legislation governing thin capitalisation. A Finnish company may deduct interest payments to affiliates provided that the amount of debt and rate of interest are at arm's length. If not, a possibility for application of the general anti-avoidance provision may exist.

### *Controlled foreign company (CFC) regime*
The Finnish CFC regime was amended in 2009 for the purpose of bringing the regime into compliance with European Community law.

The CFC rules are applicable with respect to foreign entities in low tax jurisdictions controlled by Finnish residents. The undistributed profits of such foreign entities may be taxed as profit of the Finnish resident direct or indirect shareholders. The entity is deemed to be controlled by Finnish residents if at least 50% of the capital or total voting rights are directly or indirectly held by Finnish residents or if Finnish residents have the right to at least 50% of the profits of the entity. The taxable person in such a case is the Finnish resident shareholder who owns directly or indirectly at least 25% of the capital of the corporate body or have right to at least 25% of the profits of the entity. A foreign entity is considered to be low taxed if the actual income tax burden of the foreign corporation in its country of residence is lower than three-fifths of the tax burden of a comparable Finnish corporation (i.e. an effective rate of less than 15.6%, which is three-fifths of the Finnish tax rate of 26%).

Foreign PEs of non-resident companies can be regarded as equal to foreign companies provided that the PE's profits are not taxed in the head office state. Due to the transitional period, the PE provision would be applicable to PEs of foreign entities only as of 1 January 2015.

Certain types of businesses are excluded from the scope of the CFC rules (e.g. income principally from industrial, manufacturing, or shipping activities, as well as sales or marketing activities related to such activities, if they are directed principally to the country of residence of the sales or marketing company). Also, companies resident in a country with which Finland has a double tax treaty (DTT) generally are outside the scope of the CFC rules if the company does not benefit from any special tax incentives in that treaty country. Tax treaty countries that are not covered by this rule are exhaustively mentioned in a specific 'black list' provided by the Ministry of Finance. These countries are Barbados, Bosnia-Herzegovina, Georgia, Macedonia, Malaysia, Moldova, Montenegro, Serbia, Singapore, Switzerland, United Arab Emirates, and Uzbekistan.

In addition to these two mentioned exclusions, the Finnish CFC rules are not applicable in cases of genuine economical establishment in a foreign country, which is either an EU/European Economic Area (EEA) member state or a tax treaty state not on the 'black list'. The genuine economical establishment is evaluated in light of the requirements of the business in question and paying special attention to capable personnel and office space located in the low tax jurisdiction.

## *Tax credits and incentives*

### *Foreign tax credit*

The principal method of avoiding double taxation is the credit method, although the exemption method is still applied in a few older treaties. Foreign tax can be credited against taxes payable in Finland on the same income over the same period on a pro-rata basis. The credit is given for taxes paid to a foreign state and covered by the relevant double tax treaty. The maximum credit is the lesser of either the amount of the foreign tax or an amount equal to the Finnish tax payable on the income from a foreign state. This maximum is calculated on a source-by-source basis. Unused credit of foreign tax paid may be carried forward for five years on an income basket basis.

### *Research and development (R&D) activities*

Qualifying R&D related costs may be deducted annually under certain circumstances, despite the fact that they should be capitalised under general rules.

## *Withholding taxes*

Finnish corporations paying certain types of income are required to apply a 28% withholding tax (WHT) on payments to foreign corporations and non-resident individuals.

According to domestic legislation, interest paid to a non-resident is usually tax exempt in Finland. Dividends paid to a company referred to in the EC Parent-Subsidiary Directive, owning at least 10% of the capital of the dividend distributing company, are also tax exempt.

No WHT is levied on dividend payments received by companies resident in the EU/EEA area (other than in Liechtenstein), which would have been tax-free if paid to a Finnish corporate body, if the WHT cannot be credited in the company's country of residence.

See the table below for tax to be withheld at source, by countries of residence (of recipient).

For countries not included in table, the WHT rate is 28%.

Note that each tax treaty should be studied carefully because there are often exceptions to general rules.

| **Recipient** | **Dividend (portfolio)/ interest on cooperative capital (%)** | **Dividend (direct investment) (%) *** | **Investment fund profit share (%) **** | **Royalty (%) ***** |

|---|---|---|---|---|
| Zambia | 15 | 5 (25%) | 28 | 15 (1, 11) |

Notes

* The recipient is a company whose share in the company making the payment is at least the percentage indicated in parentheses.

** No tax on profit shares meant in EC Directive 2003/48/EC (§ 3.7, Act on Tax at source).

*** No tax on royalties between associated companies meant in EC Directive 2003/49/EC (§ 3 b-f, Act on Tax at source).

1. Tax is not levied on literary, scientific, or artistic royalties *(for film royalties, see text of treaty).*
2. The tax rate is 10% on use of films, literary, scientific, or artistic works and 25% on use of trademark or royalties paid for usufruct.
3. The tax rate is 15% on films, tapes used in television or radio broadcasts, use of copyright of literary, artistic, or scientific works or royalty paid for usufruct.
4. The tax rate is 10% on literary, scientific, artistic, and film royalties.
5. The tax rate for an individual is 28% if income is tax exempt in the country of residence.
6. A lower tax in certain cases, *as for India see article V in protocol 1997.*
7. Foreign capital greater than USD 100,000 when dividend becomes due and payable.
8. *See the treaty for additional requirements.*
9. The tax rate is 7% on industrial, scientific, and commercial royalties.
10. The tax rate is 28% if the recipient is a special holding company.
11. The tax rate is 5% on royalties from films and tapes.
12. The tax rate is 5% on royalties paid for the use of industrial, commercial, or scientific equipment.
13. The tax rate is 15% if the payer is also an industrial enterprise.
14. The 10% is calculated on the total voting stock.
15. The tax rate is 28% on an unremitted amount, if free from tax in Singapore.
16. The tax rate is 1% for a finance lease of equipment and 5% for an operating lease of equipment and computer software.
17. The tax rate is 5% for the use of secret process or for know-how, no tax for computer software or patent.
18. The tax rate is 10% on industrial royalty, 3% on royalties to news agency, and 5% on artistic royalty to the author or his mortis causa successor.
19. The tax rate is 2.5% on royalties paid for the use of industrial, commercial, or scientific equipment or computer software.
20. The tax rate is 15% if the recipient is a company.
21. No tax on dividends to qualified parents-subsidiaries and pension funds (Article 10 paragraph 3).
22. No tax if the recipient proves that he has domicile (individual) or is incorporated in the United Arab Emirates.
23. The tax rate is 19.5% if paragraph 3 of Act on Tax at source (RP 113/2008) is applicable.

Non-treaty areas include Andorra, Antigua and Barbuda, Bahama Islands, Bahrain, Belize, Cayman Islands, Channel-Islands, Cyprus, Gibraltar, Grenada, Greenland, Hong Kong, the Spitzbergen, Jan Mayen, Liberia, Macao, Mauritius, Monaco, Netherlands Antilles, Panama, Samoa, San Marino, Vanuatu, and Virgin Islands.

## *Tax administration*

### *Returns*

The tax year is generally the calendar year. A company having an accounting period other than the calendar year is taxed for the accounting period or the accounting periods ending during the calendar year. A company must file a CIT return within four months from the end of the accounting period.

### *Payment of tax*
Income taxes are levied as prepayments during the tax year. After the assessment of the taxes, any excess prepayments are refunded without application. If the total prepayments are less than the actual income tax to be paid, the remaining amount is levied by the local tax office.

### *Topics of focus for tax authorities*
Current issues in special focus of tax audits are transfer pricing and permanent establishments.

### *The Tax Account system*
As of the beginning of 2010, a new system for reporting and paying unprompted taxes (e.g. VAT and employer's social charges) was introduced. The Tax Account system is a taxpayer-specific information system under which unprompted taxes are declared on a monthly basis. There are changes in the existing system of monthly returns, due dates, payments, and refunds. Payments are made through regular payment channels.

Tax types not covered by the Tax Account system are income tax, real estate tax, inheritance tax, gift tax, forestry fees, and transfer tax. It is important to note that WHTs are henceforth declared through the Tax Account system.

## *Other issues*

### *Company restructurings*
In accordance with the EC directive 2009/133/EC on mergers, divisions, partial divisions, transfers of assets, and exchanges of shares concerning companies of different EU member states, it is possible to carry out the said restructurings tax neutral, if statutory conditions are met. In cross-border situations, both parties should be resident in the European Union. The principal of going concern is applied in taxation (i.e. the receiving company receives the assets with the values the transferring company had for those assets in its taxation).

## Significant developments

### The use of patented or patentable technologies in manufacturing

New provisions, effective from 1 January 2011, enable companies which are involved in the manufacturing of products in France containing patented or patentable technologies, or companies which incorporate such technologies into goods which are manufactured in France, to benefit from a reduced effective rate of tax.

To date, the reduced 15% tax rate applicable to royalty income from the licensing of patents or patentable inventions was 'neutralised' in the event that such an arrangement existed between two connected French companies. If the licensor company benefitted from a 15% tax rate, the licensee company would, conversely, only be entitled to claim a reduced tax deduction for amounts paid under the licence (i.e. 15/33.33 of the amounts paid). Therefore, to truly benefit from this provision in a group context, it was necessary for the licensee company to be an overseas company.

Article 216 of the Finance Act removes this capping of the tax deduction for licensee companies, where the licensing arrangement is between connected French companies.

These new provisions will apply equally to existing licensing arrangements as well to new agreements.

It follows, therefore, that in the case of a licensing arrangement between connected French companies, the licensor will benefit from a reduced 15% tax rate on royalty income, whereas the licensee company will benefit from a tax deduction at 33.33%.

In order for a licensee company to benefit from full deductibility for royalties paid, the new rules require that the licensee company 'effectively exploits' the rights available to it.

### Thin capitalisation

In the specific case where the repayment of a loan granted by a third party (including banks) is guaranteed by a related party or by a third party whose commitment is itself secured by a related one, then the proportion of interest which is payable on that part of the loan which is secured in this way is potentially subject to thin capitalisation rules.

The new provisions will not apply where the loan:

- takes the form of a bond issued by way of a public offering or under equivalent foreign regulations, although this excludes private placements
- is guaranteed by a related party solely by way of a pledge of shares in the debtor, security over the debtor's receivables, or shares in a company directly or indirectly

owning the debtor so long as the holder of such shares and the debtor are members of the same tax group; as a result, this exception will not apply where a foreign company grants a pledge of shares in its French subsidiary to guarantee the bank loan granted to it
- is obtained in the context of a refinancing to allow the debtor to complete the mandatory repayment of a pre-existing debt, which is required as a result of a direct or indirect takeover of the debtor (allowed up to the amount of the loan principal repaid and accrued interest to that date), or
- has been obtained prior to 1 January 2011 in connection with an acquisition of securities or the refinancing of such acquisition debt.

These new anti-abuse provisions are applicable to fiscal years ending on or after 31 December 2010. As a result, companies (except those benefitting from the last exception mentioned above) may be subject to the new rules for their 2010 accounting periods.

### *Distribution followed by absorption or sale of subsidiary*
The new rules abolish the possibility for a company to accumulate the exemption of dividends received from its subsidiaries (under the participation exemption regime or the tax consolidation regime) and the deduction of a loss in value resulting from the dividends' distribution due to previous distributions at the time of the securities exchange or sale of shares.

In principle, the subsidiary's shares must be kept by the parent company for at least two years in order to benefit from the participation exemption regime. However, some operations lead to a break of the two-year holding period. In that case, the exchanged shares are deemed withheld until the sale of the securities received in exchange.

For fiscal years ending after 31 December 2010, the exchanged shares will be deemed kept for the application of the participation exemption regime only if the gain or loss is not taken into account in the result of that exchange. If the gain or loss is included in the result, the dividends received may not benefit from the participation exemption regime and will be taxed.

### *Tax consolidation*
There will be no neutralisation of dividends received from other companies in a tax-consolidated group that cannot benefit from the participation exemption regime if the shares have not been held for more than two years. In order to determine the capital gain or loss in this case, the companies' costs will be reduced by the amount of the received dividends whose amount was deducted from the overall consolidated result.

### *Capital gains on shares sold to a related company*
In accordance with the article 13 of the Finance Act for 2011, in the specific case where shares held for less than two years in a subsidiary are sold to a related company, the capital gain/capital loss deriving from this disposal is not immediately taxable/deductible. In such a case, the gain/loss will be taxed/deducted when:

- the vendor stops being subject to corporate income tax (CIT)
- the shares concerned are held by a non-related entity, or
- the shares concerned are held for at least two years by the related buyer.

### *Systemic risk tax*
As of 2011, a bank tax known as a systemic risk tax has been implemented to prevent excessive risk behavior by banks. The new tax is payable by certain financial institutions (including credit institutions).

It should be noted that 'fund' entities (e.g. hedge funds or securitisation vehicles) are outside the scope of the tax.

French banks are subject to the bank tax on their worldwide business activities. The equity requirements which are used as the taxable basis for the calculation of the bank tax are calculated on a consolidated basis. Therefore, institutions which fall within the scope of the tax and which belong to a consolidated group are not subject to the tax on an individual basis. Where they are not part of such a group, institutions pay a contribution calculated on their individual position. The taxable basis is made up of the minimum equity required of the institution, as set out by the Prudential Control Authority to meet reserve ratio requirements in accordance with Basel II standards and specified during the previous calendar year.

The rate of the bank tax amounts to 0.25% of the taxable basis, and any amounts paid in that respect will be deductible for CIT purposes.

The bank tax is due on 30 April annually. A tax return must be filed by 30 June every year, and the total balance due must be settled at the same time.

Subject to the principle of reciprocity, it should be noted that taxpayers for which the registered office or the group parent company is located in a country which has enforced a similar tax on systemic risk, can benefit from a tax credit. This tax credit can be used to settle the tax due or can be reimbursed.

### *Capitalisation reserve*

#### Exit tax

The Finance Act for 2011 provides for an exit tax assessed on the amount of capitalisation reserve booked by French insurance companies and French branches of foreign insurance companies.

The exit tax should be equal to 10% of the global amount of capitalisation reserve booked on 1 January 2010.

Nonetheless, the tax could be capped at 5% of the net equity of the company (including the capitalisation reserve) booked on 1 January 2010.

50% of the exit tax has to be paid before 30 April 2011 (i.e. filing's date of the special form) and 50% has to be paid before 30 April 2012 if FB promulgated before year end.

The exit tax is not CIT deductible.

#### New tax treatment of the provision booked

As of 1 January 2010, any new provision booked to the capitalisation reserve is not tax deductible and the release of such provision is not taxable.

### *Allocation of the tax charge within a tax consolidated group*

In an important decision dated 12 March 2010 ('Wolseley Centers France'), the French Supreme Court disagreed with the French Tax Authorities by ruling that the tax charge of the group can be freely allocated between members of the consolidated tax group.

Following this decision, group companies are free to enter into a tax consolidation agreement stating the conditions for the allocation of the group tax charge or, where applicable, the tax savings arising from the group arrangement.

The Supreme Court concludes that since the terms of an agreement to allow a re-allocation taking into account the specific results of each of the group companies, the terms of this re-allocation cannot be regarded as an indirect subsidy. However, this allocation should not undermine the corporate benefit of each group member nor the minority shareholders rights otherwise this will result in an abnormal act of management.

### *Underpriced sale of asset between two entities of a same tax consolidated group*

In a decision dated 10 November 2010 ('Société Corbfi'), the French Supreme Court has specified that an underpriced sale of an asset between two entities members of the same tax group must be neutralised at the group level only after the computation of the entities results on a standalone basis.

First, on a standalone basis, the seller has to add back the advantage given to the buyer (i.e. the difference between the fair market value and the amount paid) and the buyer adds back this advantage as if it was a dividend. Second, when reprocessing the different entities results, the advantage added back by the buyer has to be neutralised at the group level.

### *Transfer pricing documentation*

As of 1 January 2010, the Amended Finance Act of 2009 introduced new French transfer pricing documentation requirements concerning large corporations located in France (i.e. with annual turnover or amount of gross assets in excess of 400 million euros (EUR)).

According to this new provision, the documentation must contain general information regarding the relevant group of companies, including notable activities, operational and legal structures of the related companies, functions performed and risks borne, main intangible assets, and group transfer pricing policy, amongst others.

### *Anti-avoidance rules applicable to Non-Cooperative States or Territories (NCST)*

For French tax purposes, a state or territory is considered non-cooperative if it meets at least one of the following criteria:

- It is not a member of the European Community.
- It has been reviewed and monitored by the Organisation for Economic Co-operation and Development (OECD) Global Forum on Transparency and Exchange of Information.
- It has not concluded at least 12 administrative assistance agreements/treaties that allow a complete exchange of information for tax purposes.
- It has not concluded an administrative assistance agreement/treaty with France.

Under the new tax regime, the French parent-subsidiary regime is no longer applicable to dividends paid from entities located in an NCST with respect to tax years beginning on or after 1 January 2011.

As of 1 January 2010, withholding tax (WHT) on passive income increased to 50% for transactions with an NCST person or entity.

Payments (e.g. interests, royalties, payments for services) made to an NCST person or entity are, as a general rule, not tax deductible. In addition, it is no longer possible to offset WHT in France with any foreign WHT borne by the entity located in a NCST.

Moreover, concerning shareholders (individuals and companies) located in a NCST, a tax amounting to 50% is levied on capital gains derived from the disposal of shares in French companies whatever the level of shareholding.

## *Taxes on corporate income*

France levies CIT at a rate of 33.33%. No tax is levied on income at the regional or local level.

A resident company is subject to CIT in France on its worldwide income, with the exception of income attributable to foreign business activity (if there is no treaty in force between France and the relevant foreign country) or to a foreign permanent establishment (PE) (if a tax treaty does apply).

A non-resident company is subject to CIT in France on income attributable to French business activity or to a French permanent establishment (PE), as well as on income from real estate located in France.

### *Social contribution tax*

Concerning large size companies, a social contribution tax amounting to 3.3% is assessed on the CIT amount from which a EUR 763,000 allowance is withdrawn.

### *Patent box regime*

Under certain conditions, income derived from the sale or license of patents or patentable inventions is taxed at a reduced 15% rate.

### *Capital gains*

Reduced tax rates of 15% or 8% apply to certain capital gains. *See Capital gains in the Income determination section for more information.*

## *Corporate residence*

France is defined as metropolitan France (excluding Monaco, but including the continental shelf), Corsica, and the overseas departments (French Guyana, Guadeloupe, Martinique, Reunion).

As a general rule, a resident company is a company that is incorporated under French commercial laws.

## *Other taxes*

### *Turnover taxes*

Turnover taxes are assessed on goods sold and services rendered in France, and operate much like a value-added tax (VAT). The normal rate is 19.6%. Restaurants, transports of travellers, and sales of books are taxable at a 5.5% reduced rate. Other specific sales and services are taxable at a 2.1% reduced rate. Exports and certain specific services invoiced to non-French residents are zero-rated.

As of 1 January 2010, business-to-business (B2B) suppliers of services are taxable at the location of the customer and no longer at the location of the supplier. For business-to-consumer (B2C) suppliers of services, the place of taxation remains where the supplier is established.

Turnover taxation applies only to taxable persons, partly taxable persons, and non-taxable legal persons that are registered for turnover taxes.

Specific new turnover taxation rules apply to transportation leases, cultural, arts and sports services, electronic and telecommunication services, and transportations of goods.

### *Territorial and economic contribution*

As of 1 January 2010, the business tax has been replaced by the territorial and economic contribution, known in French as Contribution Economique Territoriale (CET). CET is comprised of two different taxes: the companies' land contribution, known in French as Cotisation Foncière des Entreprises (CFE), and the companies' added value contribution (CVAE). Although they have a similar scope, the taxes are subject to very different rules.

The CFE tax is based on the rental value of assets that are subject to the real estate tax, excluding movable goods and equipment. For industrial plants, the taxable base is reduced by 30%. There is a specific rental value for each town and an upgrading ratio is set forth at the national level each year.

The CVAE is based on a company's added value. Only taxpayers which are not exempt from the CFE and whose turnover is greater than EUR 152,500 are subject to CVAE. However, tax relief equal to the amount of the tax is provided for companies whose turnover is under EUR 500,000. The tax rate for companies whose turnover ranges from EUR 500,000 to EUR 50 million is assessed according to a progressive scale, which ranges from 0 to 1.5%.

There is an upper ceiling on the added value that applies to the CET. As a consequence, tax relief applies and is equal to the excess of the sum of CFE and CVAE over 3% of the added value of the company.

### *Registration duties*

Registrations duties mentioned hereafter are imposed on the purchaser. However, the seller may be liable for these duties in case of non-settlement by the purchaser.

#### Transfer of goodwill

The transfer of goodwill is subject to a registration duty at a rate of 3% on the part of the transfer price amounting from EUR 23,000 to EUR 200,000 and at a rate of 5% on the part exceeding EUR 200,000.

#### Transfers of shares

The transfer of shares of Société anonyme (SAs, which are corporations) and Société par Actions Simplifiées (SASs, which are simplified corporations) is subject to registration duty at a rate of 3%, with a maximum of EUR 5,000 per transfer.

The transfer of interests or quotas in legal entities whose capital is not divided into shares (e.g. Société à responsabilité limitée or SARLs, which are a form of private limited liability corporate entity) is subject to a registration duty of 3%.

The transfer of shares in non-quoted companies whose assets consist principally of immovable property is subject to a registration duty of 5%.

### Transfer of real estate
The sale of land and buildings is subject to registration duty at a rate of 5.09% on the transfer price, including expenses.

### *Real estate tax*
All properties located in France are subject to a 3% real estate tax. The tax is assessed on the fair market value of the real estate, in proportion to the direct or indirect interest held. All entities in the chain of ownership are jointly liable for the payment of the tax.

Automatic exemptions apply in three situations. First, to entities whose French real estate assets represent less than 50% of their total French assets. Second, to entities listed on a regulated market whose shares, units, or rights are significantly traded on a regular basis. Third, to entities having their registered office in France, in a European Union (EU) member state, or in a country that has concluded a double tax treaty (DTT) with France providing for an administrative assistance or a non-discrimination clause, where:

- their direct or indirect interest in the French real estate is less than either EUR 100,000 or 5% of the fair market value of the French real estate
- they are pension funds or public charities recognised as fulfilling a national interest whose activities justify the need to own French real estate, or
- they are non-listed French real estate funds (société de placement à prépondérance immobilière à capital variable (SPPICAV) or fonds de placement immobilier (FPI)) or foreign funds subject to equivalent regulations.

Where an automatic exemption does not apply, a claim may be submitted for conditional exemption.

## *Branch income*

Tax rates on branch profits are the same as on corporate profits. However, as a principle, branch profits are deemed to be distributed to the head office.

A WHT is levied on French branches of non-resident non-EU corporations at the rate of 25%, or a reduced tax treaty rate (e.g. for the United States, 5%) on net profits. Refund (limited or full) of tax may be claimed to the extent that the taxable amount exceeds the dividend(s) actually distributed by the foreign corporation during the 12 months following the close of the fiscal year concerned, or to the extent the dividends are distributed to residents of France.

Profits realised in France by non-resident corporations whose head offices are located in a EU country are not subject to branch WHT, provided that certain conditions are met (e.g. effective head office in a EU country or non-resident corporation subject to corporate taxation).

## *Income determination*

### *Inventory valuation*
Inventories must be valued at the lower of cost or market. Cost must be determined in accordance with the first in first out (FIFO) or the average-cost method. The last in first out (LIFO) method is prohibited.

### *Capital gains*
Capital gains generally are taxable as ordinary income and subject to CIT at the standard rate of 33.33%, regardless of the duration of ownership of the assets sold.

However, a reduced rate of 15%, increased by the social contribution tax, is applied to capital gains on the disposal of patents or patentable inventions, as well as on income from the licensing of patents or patentable inventions.

Gains on the sale of shares in subsidiaries held for at least two years benefit from significant relief (95% of such capital gains are excluded from CIT, with the remaining 5% portion being taxed at the standard 33.33% rate).

#### Capital gains of non-residents
As a general rule, non-resident companies are not taxable in France regarding capital gains which derive from the disposal of French assets.

There are two main exceptions to this principle:

- Capital gains derived from the disposal of real estate assets located in France or derived from the disposal of French real estate non-listed companies are subject in France to WHT at a 33.33% rate.
- Capital gains deriving from the disposal of shares held in a French company subject to CIT are subject in France to WHT at a 19% rate in the specific case where the seller has owned, at any point in time during the five years preceding the sale, at least 25% of the rights in the profits of the French company.

Note that in the specific case where the non-resident company is located in a non-cooperative state or territory (NCST), all capital gains deriving from the disposal of French assets are subject to WHT in France at a specific rate of 50%.

### *Inter-company dividends*
French parent companies (i.e. companies incorporated in France and holding qualifying shares that represent at least 5% of the issued capital of subsidiaries, French or foreign) have the option of excluding 95% of the subsidiaries' net dividends from CIT (5% of charges and expenses must be added back to the parent company's taxable results). The French parent-subsidiary regime extends to certain shares without voting rights. There is no formal commitment to hold the shares for at least two years, and companies can benefit from this regime from the acquisition date of the shares. However, the obligation remains to hold the shares over this period of time. Certain shares of listed real estate companies are not eligible to the French parent-subsidiary regime.

Regarding fiscal years ending on or after 31 December 2010, the taxation of dividends received by a parent company from its subsidiary cannot be capped at the amount of the expenses actually incurred by the parent company. Thus, the tax liability will be equal to 5% of the dividends received, tax credits included.

As of 1 January 2011, the French parent-subsidiary regime is no longer applicable to dividends paid from entities located in an NCST.

### *Foreign income*
Resident corporations are not taxed on foreign source income derived from activities carried out abroad through foreign branches. Other foreign income is not taxable until actually repatriated to French resident corporations. As a result, undistributed income of foreign subsidiaries is not taxable. The only exception to the territoriality principle is

provided by Article 209 B of the Tax Code, known as the Controlled Foreign Company (CFC) rules *(see the Group taxation section for more information)*.

## Deductions

### Depreciation

The depreciation of fixed assets has to be carried out component by component. The components of a fixed asset have to be depreciated separately according to their own lifetime.

Declining-balance depreciation is allowed for certain new and renovated assets whose useful life is more than three years.

For assets bought or manufactured between 4 December 2008 and 31 December 2009, the rate is computed by multiplying the rate of straight-line depreciation by:

- 1.75, if the useful life of the asset is three or four years
- 2.25, if the useful life of the asset is five or six years, or
- 2.75, if the useful life of the asset is more than six years.

For assets bought or manufactured after 31 December 2009, the rate is computed by multiplying the rate of straight-line depreciation by:

- 1.25, if the useful life of the asset is three or four years
- 1.75, if the useful life of the asset is five or six years, or
- 2.25, if the useful life of the asset is more than six years.

### Goodwill

Under French tax rules, goodwill (e.g. clientele, trade-marks) cannot be amortised.

### Research and development (R&D) and software expenses

Concerning R&D and software expenses, a business may elect to immediately deduct costs incurred in R&D of software or to amortise their cost straight-line over a maximum period of five years.

The cost of acquiring software may be written off straight-line over 12 months.

The cost of patents acquired can be amortised over a five years period.

### Bad debts

Bad debts which are definitively non-recoverable are treated, from a tax point of view, as losses.

Under certain conditions, a tax deductible reserve can be established for debts whose recovery is uncertain.

### Charitable donations

Charitable donations made by companies to certain foundations or societies are deductible up to 60% of their amount (limited to EUR 5,000 of the turnover before taxes).

### *Taxes*
Most taxes, including unrecoverable turnover taxes, registration duties, and CET, are deductible. The major exceptions are CIT and tax penalties.

### *Net operating losses (NOLs)*
For tax purposes, the distinction between ordinary losses and losses corresponding to deferred depreciation has been eliminated. Companies subject to CIT can carryforward their losses for an unlimited period of time.

Corporations may also elect to carry back NOLs. Losses of a given fiscal year may be offset against undistributed taxable profits of the three preceding years. The lower of the tax paid on these profits or the potential tax savings represented by the tax loss of the fiscal year is a tax credit. Such credit may be offset against CIT of the following five fiscal years; thereafter, any excess credit may be refunded.

### *Payments to foreign affiliates*
Payments to foreign affiliates are allowed, as long as they meet the arm's-length test. If they do not, article 57 of the French Tax Code provides that income directly or indirectly transferred to the foreign affiliate, through either the increase or the reduction of the purchase or sales price of goods and services, or through any other means, must be added back to taxable income. For the purpose of this provision, foreign affiliates are defined as parent or sister companies.

Where the payments are made to companies located in a country with a privilege tax regime, the French taxpayer must prove that the transaction is bona fide and that the amount due is not exaggerated *(see the Group taxation section for more information on countries with a privilege tax regime).*

## *Group taxation*

French corporations and their 95% owned domestic subsidiaries may elect to file one single tax return, thus allowing offset of losses of one group corporation against the profits of a related corporation. CIT is then levied on the aggregate income after certain adjustments for intra-group provisions (e.g. debt waivers, dividend distributions) have been made.

Other group consolidation systems are available with the prior authorisation of the Ministry of Finance, as follows:

- Bénéfice consolidé: The 50% owned subsidiary consolidation system allows the combined reporting of profits and losses of all controlled branches, subsidiaries, and partnerships, whether French or foreign.
- Bénéfice mondial: Worldwide tax consolidation allows French corporations to include in their French tax return the results of their foreign activities carried out by branches.

When shares in a company that will be integrated into the group are acquired by a group company from individuals or legal entities that control this group, either directly or indirectly, a portion of the group's overall financial expense incurred by the members of the group is progressively added back to the group's taxable income on a straight-line basis over a nine year period.

As of January 2009, a French subsidiary can be included in a tax consolidated group even if its parent company is not located in France. However, at least 95% of the share capital of the foreign company must be held, directly or indirectly, by the French company that is head of the tax consolidated group. In addition, the foreign company must be subject to CIT, be located in the European Union or in a member state of the European Economic Area (EEA) whose tax treaty with France includes a mutual administrative assistance clause to fight tax fraud and tax evasion, and hold 95% of the lower-tier subsidiary's shares.

A PE of a foreign company subject to French CIT can be a member of a French tax consolidated group if the shares of the foreign company are held by other French companies, which are members of the consolidated group.

Provisions on the tax neutrality of intra-group transaction flows (e.g. dividends, provisions, waivers of debts, interest, and capital gains on the sales of shares) have been modified to treat tax consolidated groups with an intermediate foreign company the same as other tax consolidated groups.

### *Thin capitalisation rules*

Under current rules, the tax deduction of interest paid by a French company to its foreign controlling shareholders is subject to the following three restrictions.

#### Interest rate limitation

Under the amended article 212 of the French Tax Code, tax deduction of interest paid to related parties is limited to the higher of (i) the average annual interest rate applied by credit institutions to companies for medium-term variable rate loans or (ii) the interest that the borrowing company could have obtained from independent banks under similar circumstances. This rate is 3.82% for financial years ending on 31 December 2010. Having passed this interest rate test, French indebted companies have to pass a second test: the debt ratio.

#### Debt ratio

That part of interest paid to related parties which is deductible under the rate limitation test is disqualified if it exceeds all of the three following limitations during the same financial year:

- Interest relating to financing of any kind granted by related parties, within the limit of 1.5 times the net equity of the borrower.
- 25% of adjusted net income before tax ('résultat courant avant impôt', defined as the operating income, increased by certain items).
- Interest income received from related parties (i.e. there is no limitation on thin capitalisation grounds when the borrowing company is in a net lending position vis-a-vis related entities).

The portion of the interest which exceeds the three above limits is not deductible, except if it is lower than EUR 150,000.

#### Carryforward of excess interest

That part of the interest which is not deductible immediately by the borrowing company can be carried forward, without time limit, for relief in subsequent years, provided there is an excess capacity during such years. The amount in excess is, however, reduced by 5% each year, from the second financial year following the financial year in which the interest expense has been incurred.

### Exceptions
The thin capitalisation rules do not apply to interest payable by banks and credit institutions, and also to certain specific situations such as interest in connection with intra-group cash pools or with certain leasing operations.

The thin capitalisation rules do not apply if the French indebted company can demonstrate that the debt-to-equity ratio of the worldwide group to whom it belongs exceeds its own debt-to-equity ratio.

Deductibility is also facilitated within a French tax consolidated group. The thin capitalisation rules apply to each company member of the group taken on a stand-alone basis. Any excess interest incurred by such company is, however, not carried forward by it. Instead, it is appropriated at group level.

### *Controlled foreign company (CFC) regime*
The CFC rules provide that:

- French corporations are required to include in their taxable income profits made by their more than 50% owned foreign subsidiaries and branches. The 50% holding is determined by direct and indirect control of shares and voting rights.
- The minimum holding threshold has to be reduced to 5%, if over 50% of the share capital of the foreign entity is indirectly held through French or foreign companies controlled by the French parent company. However, if the shares in the foreign entity are listed on a regulated market, the French tax authorities will have to demonstrate that the French parent company, together with other entities holding shares in such foreign entity, is acting in concert.
- The CFC rules are only applicable if the foreign legal entity or PE in which the French company owns the requisite percentage of shares is in a country with a privileged tax regime. A privileged tax regime is defined by the French tax code as a tax regime in which a foreign jurisdiction subjects taxable income of a foreign entity to at least 50% or lower of the income tax liability which would been incurred in France, had the activity of the foreign entity been performed in France.
- Profits of the foreign entity which fall under the CFC rules are no longer taxed separately. They are now aggregated with the other taxable profits of the French parent company. Consequently, any tax losses incurred by the French parent company may be offset against the foreign entity's profits.
- The French parent company can avoid the application of the CFC rules if it demonstrates that the foreign entity carries an effective trading or manufacturing activity, conducted from its country of establishment or registered office. Furthermore, the CFC rules, in principle, are not applicable with respect of foreign branches or subsidiaries located in another EU country. However, this exception is not applicable if the French tax authorities can demonstrate that the foreign entity located in another EU country constitutes an artificial arrangement, set up to circumvent French tax legislation. This concept is similar to the 'abuse of law' concept, although it does not have all the same characteristics.

## *Tax credits and incentives*

### *R&D tax credit*
The R&D tax credit is determined on the basis of the eligible R&D expenses incurred during the calendar year.

Currently, the R&D credit equals 30% of the R&D eligible expenses incurred during the year, up to EUR 100 million in eligible R&D expenses, and 5% beyond this amount. In addition, eligible R&D expenses incurred by the company can be included in the basis for computation on the tax credit up to 100% of that amount.

Moreover, the 30% ‘standard’ rate is increased to 50% and 40% for the first and the second year, respectively, during which the company incurs eligible R&D expenses, or after the expiration of a period of five consecutive years during which the company did not benefit from the tax credit, provided, in both cases, that the concerned company is not affiliated with another company which benefited from the R&D tax credit within the same time period.

The tax code classifies eligible technical and scientific research operations in three areas: fundamental research, applied research, and experimental development.

The eligible expenditures include the following:

- Tax deductible depreciation expenses relating to fixed assets, created or acquired newly, assigned to eligible R&D works/projects, including patents acquired.
- Costs relating to staff qualifying as scientists and/or engineers (staff costs relating to ‘young graduate doctors’ are retained at up to 200% during the 24 months following their hiring by the company).
- Expenses resulting from outsourced R&D works/projects.
- Expenses incurred for patent registration and/or in connection with the defence of patents.
- Expenses relating to the monitoring of technical developments.
- Premiums paid in connection with insurance contracts relating to the legal defence of patents.

### *Inbound investment incentives*
No particular incentives are available to foreign investors in France. However, the government offers a comprehensive programme of tax incentives and development subsidies to encourage investment in underdeveloped areas.

Capital investment is encouraged through the declining-balance method of depreciation as well as through exceptional depreciation for certain capital expenditures.

## *Withholding taxes*

Payments to resident corporations and individuals are not subject to WHT.

Payments to non-resident corporations and individuals are subject to WHT, as shown below.

Explanation of columns

**Column 2:** Individuals and companies not qualifying as parents are subject to the WHT rates for dividends as indicated in this column.

**Columns 3 and 4:** Column 3 indicates the WHT rate for dividends paid to a foreign 'parent' company. To be considered as a parent company, the foreign company must hold a specified percentage of the French company's share capital or voting rights. These minimum percentages range from 0% to 50%, as indicated in Column 4, and certain other conditions must be met *(see each treaty)*. If no percentage is indicated, either no minimum shareholding is required, or the tax treaty does not reduce the WHT rate of 25%.

No WHT is levied on dividends paid to an EU parent company by a French company that is subject to CIT, provided all the following conditions are met:

- The EU parent company has held a minimum percentage of the share capital of the distributing company, directly and continuously, for at least two years. As of 1 January 2009, the participation required is 10%.
- The EU parent company is the effective beneficiary of the dividends.
- The EU parent company has its effective seat of management in an EU State and is not deemed to be domiciled outside the EU under an applicable tax treaty.

- The EU parent company is one of the legal forms enumerated by the relevant Directive.
- The EU parent company is subject to CIT in the member state where it has its effective seat of management.
- There is an anti-avoidance rule.

**Column 5:** The tax mechanism has been changed so as to exempt the interest from WHT in France except where the interest is paid to a financial institution established in a non-cooperative state or territory (WHT at a rate of 50% applicable). The payer can, however, be exempt if one proves that the main purpose and effect of such a payment is not to take advantage of locating the income in such a jurisdiction.

These provisions apply to income paid as of 1 March 2010. A special provision applies to loans entered into outside of France by French companies and some investments funds prior to this date. Interest paid on these loans and on related loans after 1 March 2010 will continue to be exempt.

**Column 6:** There is no requirement to withhold income tax on royalties paid to EU companies if all the following conditions are met:

- The taxpayer is a French resident company or a French PE of a company resident in another EU member state.
- The recipient of the income is an EU resident company.
- The taxpayer and the recipient are at least 25% associates, which means that either one holds directly 25% or more of the share capital or voting rights in the other, or a third party holds directly 25% or more of the capital or voting rights in them both.

**Column 7:** WHT is automatically imposed on after-tax profits of a PE unless certain conditions are met. The rate is 25% or the reduced tax treaty rate.

Notes

1. *See explanation of Columns 3 and 4.*
2. Exceptions where the dividends are excluded from the taxable income of the company which has received the dividends.
3. A rate of 15% is applicable for dividends distributed by certain companies.
4. The dividend WHT rate is eliminated if the recipient owns 15% or more in votes or value of the distributing corporation and is (a) a company regularly traded on either the Japanese or the French stock market, (b) a company more than 50% owned by the government of either country, (c) an individual or a quoted company resident in either country, or (d) any combination of (a), (b), and (c).
5. The 1929-type Luxembourg holding companies are not entitled to any of the benefits of the France-Luxembourg tax treaty.
6. A 25% rate applies if dividends are not included in the income taxed to either corporate or income tax.
7. No WHT applies if dividends are taxable in Morocco.
8. Full or partial exemption is applicable when specific conditions provided by the treaty are met.
9. These are taxed when attached to a PE in France.
10. The 26 November 1996 tax treaty came into force on 9 February 1999.
11. The 5% rate applies to dividends when three conditions are fulfilled, as follows: (1) the effective recipient of the dividends must have invested at least EUR 76,224.51 in the company that pays these dividends; (2) the recipient must be a company liable for corporate tax; and (3) the latter company must be exempt from corporate tax. The rate is 10% when only condition (1) or conditions (2 and 3) are fulfilled. In all other cases, the rate is 15%.
12. An addendum signed on 22 July 1997 modifies the provisions of the French-Swiss tax treaty relating to dividends, interest, and royalties, and provides for the removal of the 5% WHT on profits realised by French PE of Swiss resident companies.
13. The rate indicated applies to Swiss resident companies controlled by Swiss residents.
14. The rate indicated applies to Swiss resident companies that are controlled by non-Swiss residents (non-UE) (Article 11.2.b ii) and meet the conditions of Article 14 of the tax treaty. In the case of column 3, the 15% rate applies to these companies, provided both the recipient and the distributing company are not quoted on a stock exchange. If these conditions are not met, the tax exemption applies.

15. The rate indicated applies to Swiss resident companies controlled by non-Swiss residents but not complying with Article 14 of the tax treaty.
16. The 15% rate applies to dividends paid to an industrial company.
17. The 5% rate applies to gross dividends if the effective recipient is a Ukrainian company that holds directly or indirectly at least 10% of the French company's capital. The rate is 0% if the participation exceeds 50% and EUR 762,245. It is 15% in all other cases.
18. Non-treaty recipients of royalties and management fees are subject to a 33.33% withholding rate. Where a treaty exists, management fees are exempt from WHT unless they are included in the definition of royalties subject to WHT.
19. In France, the WHT is levied on a provisional basis at 25% of the net profit. This amount is reduced to the extent it exceeds the dividends actually paid by the company during the previous 12 months, and the amount of dividends paid to residents of France. Consequently, if the foreign head office undertakes not to distribute dividends in a given year, the after-tax profits of its French branch are not subject to WHT, even when they are transferred abroad.
20. WHT on interest on loans with a contract is 0%, while withholding on other interest is in a range from 15% to 50%. For treaty rates, consult the individual entry in the table.
21. The WHT rate can be 60% for certain securities if the investor's identity is not disclosed.
22. The WHT is levied on the following amount: French net profit divided by the total foreign company net profit, multiplied by the amount of the distribution.
23. The rate of 10% is applicable on royalties for the use of literary, artistic, or scientific works, including films, 25% on royalties for the use of trademarks, and 15% otherwise.
24. Exemption is granted only to recipients actually subject to income tax on the payment in their own country.
25. No WHT is applicable on a royalty arising from the use of or the right to use literary, artistic, or scientific works (excluding film).
26. WHT is reduced to 6% for royalties paid for the lease of industrial, commercial, or scientific equipment.
27. A rate of 5% (Cyprus) and 10% (Israel) is applicable on royalties paid for the use or the right of the use of films.
28. Profits realised in France by foreign corporations whose head offices are located in a European country are not subject to WHT if certain conditions concerning the foreign corporation are met (effective head office in a European country; foreign corporation subject to corporate taxation).
29. No WHT is applicable on a royalty arising from the use or the right to use literary, artistic, or scientific works.
30. The rate is reduced to 10% in certain circumstances (for equipment or bank loans) mentioned in the treaty, or nil in other circumstances.
31. The rate of 25% is applicable on royalties paid for the use of trademarks.
32. No WHT is levied on certain royalties paid in the field of audiovisual techniques.
33. The 5% rate is levied on royalties paid for the use of literary, artistic, and scientific works. The 25% rate is levied on royalties paid for the use of trademarks.
34. The rate of 15% is applicable on royalties paid for the use of industrial property and trademarks.
35. A rate of 33.33% is applicable on royalties paid for the use of or the right to use films.
36. The rate of 5% is applicable on royalties paid for the use of literary, artistic, or scientific works, excluding films.
37. The rate of 33.33% is applicable on royalties paid for the use of literary and artistic works, including films, and for information concerning commercial experience.
38. No WHT is levied on royalties paid for the use of or the right to use literary or artistic works, excluding films and recordings.
39. No WHT is levied on royalties paid for the use of or the right to use copyrights or films.
40. No WHT is levied on royalties paid for the use of or the right to use industrial, commercial, or scientific equipment.
41. The rate of 20% is applicable on royalties paid for the use of trademarks, 15% for the use of industrial property, and 5% for the use of literary, artistic, or scientific works.
42. Taxed in certain circumstances provided by the treaty.
43. No WHT is applicable on a royalty arising from the use of or the right to use literary, artistic, or scientific works, films, recordings, or computer software.
44. The rate of 5% is applicable on royalties for the use of literary, artistic, or scientific works, not including films.
45. The rate of 5% is applicable on royalties for the use or the right to use industrial, commercial, or scientific equipment.
46. The reduced rate is applicable if the beneficial owner is a company (other than a partnership).
47. Voting shares solely.
48. French domestic law decreases the WHT rate from 25% to 18% concerning individuals who are resident in another EU member state, in Iceland and in Norway.
49. *See explanation of Column 6.*

## Tax administration

### Payment of tax

Payment of tax is made during the fiscal year by way of four instalments totalling 33.33% of the taxable income of the preceding year.

Currently, for companies which have a gross income in excess of EUR 500 millions, the last down-payment is now assessed on the basis of the estimated taxable income of the present year (in case of significant increase of the taxable profits in comparison with the previous fiscal year). This modification leads to an anticipated payment of CIT.

### Late payment interest

For a reassessment after a tax audit, late-payment interest is currently 4.8% per year or 0.4% per month.

### The ruling system

To secure the tax status of a situation, foreign companies and individuals can request a private ruling from the French tax authorities as to whether their activities constitute a PE or fixed base.

The French tax authorities have to provide an answer within three months after the receipt of the request. In the absence of response from the French tax authorities within this period of time, the foreign company or individual will be deemed not to have a PE in France.

## Other issues

### Individual advanced pricing agreements (APAs)

APAs are available for taxpayers only on the basis of international agreements entered into in accordance with Article 25 of the OECD Model Tax Convention. Currently, taxpayers are allowed to enter into APAs with the French tax authorities on a unilateral basis. In practice, taxpayers are entitled to submit their transfer pricing policy to the French tax authorities. Agreement of the tax authorities to the APA precludes a later challenge.

## Significant developments

The Financial Act relating to fiscal year 2011 has been enacted, providing some exemptions of taxes applicable exclusively to authorised companies during the performance of a social housing investment project. *See the Tax credits and incentives section for more information.*

The Financial Act has also instituted a specific tax regime derogatory to the common law tax regime which is applicable, under conditions, to groups of companies. *See the Group taxation section for more information.*

## Taxes on corporate income

Corporate income tax (CIT) is assessed on profits minus deductible expenses and charges. Profits are composed of all operations carried out in Gabon by enterprises during the period of taxation, including notably fixed assets capital gains.

The CIT rate is fixed at 35%.

### Impôt Minimum Forfaitaire (IMF)

The IMF is a lower limit to the CIT and is calculated as 1% of the global turnover carried out during the fiscal-year of taxation. Note that the IMF cannot be less than 1 million CFA francs (BEAC) (XAF), even in the case of a negative turnover.

New companies are exempt from this minimum tax during the first two fiscal years of their existence.

## Corporate residence

Subject to the provisions of international tax treaties, non-resident companies carrying out operations in Gabon are subject to taxation in Gabon.

## Other taxes

### Value-added tax (VAT)

VAT is a cumulative tax levied on the sale of goods and the provision of services rendered or used in Gabon.

There are three rates of VAT:

- Standard rate: 18% (applies to all transactions unless otherwise provided for by the law).
- Reduced rate: 10% (applies to manufacturing operations and sales of products mentioned in a limitative list provided by Article 221 of the new Gabonese Tax Code, including mineral water, chicken, sugar, cement).
- Zero-rate: 0% (applies to exports and international transports).

### *Franchise tax*
The franchise tax is a fixed annual duty varying from XAF 10,000 to XAF 500,000, according to the size, nature, and location of the company. Each company that carries on a trade, business, or activity that is not expressly exempted is liable for franchise tax.

Activities that are expressly exempted from franchise tax are those carried out by companies of provident, craftsmen, teachers and professors, lyrical and dramatic artists, farmers, cattle-breeders, fishers, etc.

### *Tax on property*
Tax on buildings (Contributions Foncières des Propriétés Bâties or CFPB) is at the rate of 15% of the rental value of the building after deduction of 25% for deterioration and maintenance. Tax on non-built property is at the rate of 25% of the taxable revenue corresponding to 4% to 5% of the rental value or 10% of the purchase value.

### *Registration duties*
Registration duties in Gabon are fixed, proportional, or progressive, depending on the nature of the acts and transfers in question.

### *Stamp duty*
A stamp duty is levied on all paperwork relating to civil and judicial actions and to documents which could be produced in court as evidence.

All signatories for mutually binding contracts, lenders and borrowers for loans, and ministerial officials who receive or modify deeds announcing unstamped deeds or books are jointly responsible for the payment of stamp duties and fines.

### *Tax on insurance premiums*
Insurance or annuity agreements made with insurance companies or any other Gabonese or foreign insurer are subject to an annual obligatory tax.

The tax is levied on the sums charged by the insurer and on any accessory payments made to this party by the insured party according to the following rates:

| Nature of the policies | Rate (%) |
|---|---|
| Marine policies | 5 |
| Life policies | Exempt |
| Fire policies | 30 |
| Other (e.g. personal liability, transportation) | 8 |
| Reinsurance | Exempt |

### Social security contributions

Employers must contribute to the social security system (National Social Security Fund or CNSS).

The taxable basis for social security contributions is made up of gross salaries including indemnities having the function of a salary and any benefits in kind. However, there is an annual ceiling of XAF 18 million (or XAF 1.5 million per month).

The social security contributions are determined according to the following rates:

| Contribution | Rate (%) |
|---|---|
| Family allowances | 8 |
| Industrial accidents (work injuries) | 3 |
| Retirement pensions | 5 |
| Health evacuation funds | 0.6 |
| Medication distribution | 2 |
| Hospitalisations | 1.5 |
| Total | 20.1 |

## Branch income

Taxation of branch income is the same as for corporate income. However, a 10% withholding tax (WHT) on profit is due at the time the profit is taken by the head office of the branch located abroad.

### Simplified tax regime for oil subcontractors

There is a simplified tax regime specific to the oil sector which is a lump-sum tax regime granted for a triennial period. The rates for the 2009, 2010, and 2011 fiscal years is 8.68%, corresponding to CIT (5.6%) and personal income tax for expatriate employees (3.08%).

Features of this specific regime are as follows:

- The option for this regime is irrevocable.
- The option is granted by the Director of the General Tax Office to foreign companies.
- The subcontractor must have signed, with an oil company, a temporary agreement for the provisions of services to this company.
- The option is no longer granted to companies that have been in Gabon for more than nine years. The duration of nine years is calculated from the year during which the company started its activities in Gabon.
- The subcontractor must constitute a Gabonese branch office.

### Specific regime for regional offices (quartiers généraux)

A regional office is a company or a branch that renders various administrative services such as management or accounting exclusively to other companies of the same group based in a given geographical area (usually a group of countries).

Taxation is based on the expenses of the regional office. A rate, between 5% and 12%, is applied to operating expenditures to determine the tax basis. The CIT rate is then applied to that basis.

# Gabon, Republic of

## Income determination

### Capital gains
Capital gains arising from the transfer of assets must be used for the calculation of taxable profits. However, the tax on capital gains can be deferred if a company reinvests an amount equal to the capital gain and the sale price of the transferred asset back into its fixed assets within three years.

### Inter-company dividends
Inter-company dividends are taxed at a reduced rate in full discharge of the 10% WHT if paid and received by or from companies with their registered office in a Central African Economic and Monetary Community (CEMAC) country, shares were allotted at the time of issue or kept for two years, and the Gabonese company owns more than 25% of the share capital of the subsidiary.

### Foreign income
Foreign interest, royalties, and dividends are included in taxable income, subject to international tax treaties. Note that tax treaties provide that certain/all types of income are not includable in Gabon taxable income. Gabon has tax treaties with France, Belgium, the other countries of CEMAC, and the African and Malagasy Common Organisation (OCAM).

## Deductions

### Depreciation
The straight-line method and an accelerated depreciation method are permitted in Gabon. Tax and book conformity is obligatory (i.e. annual depreciation must be booked to preserve tax deductibility).

The main depreciation rates provided by the Gabonese tax code are the following:

| Asset | Rate (%) |
|---|---|
| Buildings | 8 |
| Machinery, equipment | 8 to 20 |
| Office furniture | 15 |
| Office equipment | 20 |
| Vehicles | 20 to 33.3 |
| Computing equipment | 25 to 33.3 |

### Other significant items
- To be tax deductible, provisions must relate to existing liability or loss. General provisions are not deductible.
- Fines and third-party taxes borne by companies are not tax deductible.

### Net operating losses
The Gabonese Tax Code does not provide the possibility to carry back losses. It does, however, provide for a three-year carryforward for net operating losses.

Regarding depreciation deferred in the accounts, they can be carried forward indefinitely.

### *Payments to foreign affiliates*
Management fees paid to a foreign parent company are deductible if they meet all of the following conditions:

- They reflect real transactions.
- They do not present an abnormal characteristic.
- They are not exaggerated.

Management fees determined in a lump sum basis are not deductible.

Interests paid to shareholders are deductible only within the limit of the Central Bank's (BEAC) normal rate for advances plus two percentage points, on the condition that the registered capital is entirely paid. The portion exceeding the ceiling is not deductible and is thus subject to taxation.

## *Group taxation*

### *Specific group tax regime*
The Financial Act of 2011 has instituted a specific tax regime derogatory to the common law tax regime which is applicable, under conditions, to groups of companies.

According to the provisions of Article 11 b. of the Law No. 44/2010, groups of companies are those which are organised around a head of the group of companies having its head office located in Gabon and having the control of companies located in Gabon and/or abroad.

To be eligible for this specific tax regime, and without any prejudice of other activities performed to the profit of third parties, the head of the group of companies must perform to the profit of other companies of the group an activity relating exclusively to the following fields:

- Provisions of services of any kind notably technical, accounting, financial, administrative, data processing, legal, human resources, and commercial corresponding to functions of management, coordination, and control of the group's companies.
- Research and development to the sole profit of the group.
- Management of the finance intra-group.

Each company subject to CIT which is a member of the group and fulfils the conditions provided by the law will be subject to a separate taxation of its results according to the rules of common law and subject to amendments expressly provided by the law for the determination of the taxable result.

The express amendments provided in the scope of the specific tax regime applicable to groups of companies are the following:

#### Capital gains
Net capital gains are taxed at a reduced rate of 20% when they are realised in the scope of intra-group operations.

#### Expenses deductible from the taxable result subject to CIT
The following expenses are deductible within the group:

- Head office fees and management fees determined in a lump sum basis, according to the conditions of allocation of the expense between the companies members of the group defined in a previous ruling with the Tax Authorities.
- The whole of the interests on partners' current accounts (i.e. on the sums put, by the partners, at the disposal of a company of the group) within the sole limit of the intervention rate on invitation to tender (TIAO) of the Bank of the Central African States (equivalent to 4%) raised by 2%.
- Rentings of movables carried out within the group by the mother company or between companies of the same group.

**10% WHT**

Sums subject to CIT according to the provisions of Article 206 of the Gabonese Tax Code paid by a Gabonese debtor member of a group of companies to a foreign company member of the same group are exempted from the 10% WHT even though no double tax treaty (DTT) aiming to avoid double taxation has been concluded between Gabon and the country of residence of the beneficiary of the remunerations.

### Transferable securities income tax (IRCM)

Companies of the group which benefit from transferable securities income originating from Gabon are exempted from IRCM when the said revenues are paid by a company member of the group.

In return, payments carried out by the head of the group of companies to the profit of its partners (individuals or legal entities) are subject to IRCM at a unique and at source rate of 10% (instead of 20% for individuals and 15% for legal entities).

It is to be noted that the transferable securities incomes having their source abroad and which gave rise to taxation in their country of origin give the right in Gabon to a tax credit of the amount of the taxation which is deductible from the CIT of the fiscal year of perception of the incomes. The aforesaid tax credit applies even though no DTT aiming to avoid double taxation has been concluded between Gabon and the country of origin of the incomes.

**VAT**

The head of the group of companies is liable for VAT.

Members of a group of companies could, however, on option, consider the following provisions of services performed within the group as being out of the scope of application of VAT.

- Provisions of services of any kind, notably technical, accounting, financial, administrative, data processing, legal, human resources, and commercial.
- Fees relating to studies.
- Putting at disposal of personal.
- Management of finance.

The option for the subjection of the abovementioned operations must be formulated by the concerned taxpayers on express request addressed to the General Tax Manager.

### Registration duties

Deeds relating to incorporation, increase or reduction of share capital, breaking up with or without clearance, merger, scission, partial contribution of assets, and transfer of shares of a company member of a tax group, are subject to a fixed duty of XAF 20,000.

In the absence of a more favourable duty provided by the common law of registration, the changes of ownership and use which are not provided at Article 6 of the Gabonese Tax Code are subject to a proportional rate of 1% when carried out by members of the same tax group.

**Business licence tax**
The head of the group of companies is exempted from the payment of the business licence tax.

**Requirements relating to declaratory obligations**
The adherence to the group tax regime must be notified in writing by the head of the group of companies to the General Tax Manager accompanied by the list of the companies included in the tax perimeter of the group.

Each company remains liable for the periodical returns applicable to its activity.

For the purpose of calculation and verification of the returns, each tax return relating to the CIT of each company of the group will be gathered and filed at the same time by the head of the group of companies before the Tax Office.

### *Transfer pricing*
The Gabonese Tax Code provides rules regarding transfer pricing issues.

According to these rules, any payment considered to be a result of mismanagement will be subject to the CIT rate at 35% plus penalties.

Indeed, Article 12 of the Code provides that “By virtue of law or in fact, for companies which are dependent of companies or groups of companies located outside the CEMAC area, or for those which possess the control of companies located outside the CEMAC area, payments or expenses realized by any mean whatsoever, comparable to abnormal act of management, constitute transfer of profits subject to corporate income tax.”

It is applicable for the following:

- Payments constituting increase or decrease of purchases or sales.
- Payments of excessive royalties or royalties without compensation.
- Relinquishment of revenues (underestimated sale price, free of charge service provision, granting of a free loan or a loan with low interests).

The abnormal act of management is not limited to expenses; it also includes any form of advantages or allowances granted to third parties without any equivalent compensation for the company.

Article 13 of the Gabonese Tax Code provides that “The advantages or assistance granted by companies belonging to the same group can only be considered as resulting from a normal management if the company which grants these advantages or assistance demonstrates the existence of its own interest in acting as such. The general interest of the group is not sufficient to justify such practices.”

## Tax credits and incentives

### Foreign tax credits
DTTs include provisions relating to the attribution of foreign tax credits. Such tax credits aim to limit the double taxation of profits that are subject to taxation in both Member States of the treaty.

### Tax credits for job creation
There is a mechanism in place for granting corporate tax credits for any salaried appointments of Gabonese personnel.

This tax credit is equal to 20% of the gross salary paid to new employees and is subject to the creation of a minimum number of jobs, according to the size of the company as follows:

- Two jobs, for companies with less than 20 employees.
- Three jobs, for companies with 20 to 50 employees.
- Five jobs, for companies with more than 50 employees.

Note: The tax credit is granted only on newly created jobs since the preceding fiscal year. Contracts concluded with the employees must also be for an undetermined duration, and the new jobs must not result from the diminution of existing jobs.

### Inbound investment incentives
Due to the provisions of the Investments Law, any private investment in Gabon can benefit from:

- A common law framework.
- Privileged frameworks.
- Specifically agreed frameworks.

Depending on the frameworks it is eligible for, a company can benefit from customs privileges and tax breaks.

Industrial companies already set up in Gabon and wishing to increase their production capacity can be admitted to a preferential tariff framework. This entails the application of a global reduced rate of 5% for duties and taxes paid on imports of equipment (excluding materials, furniture, and spare parts) provided that these correspond to an investment schedule and their value is in excess of XAF 100 million.

New industrial companies can also benefit from this framework, if they are not subject to any of the other privileged frameworks outlined by current legislation.

The granting of this privileged tariff framework occurs on the basis of a decision by the Minister of Finances, following a proposal from the Director of Customs and Indirect Taxes.

### Capital investment incentive
New companies are exempt from the IMF, the minimum taxation of CIT, during the first two years of operations.

### Social housing incentive
The Financial Act of 2011 provides some exemptions of taxes applicable exclusively to authorised companies during the performance of a social housing investment project.

The concerned companies are those authorized for the planning of urban lands intended for social habitat and the building of housings of a socioeconomic nature and industrial units of manufacturing of materials and other inputs used for the performance of section relating to the building of social housings. The abovementioned tax exemptions relate to CIT, VAT, and business licence tax.

## *Withholding taxes*

### *10% WHT*

When they are paid by a debtor established in Gabon to individuals or companies subject to corporate income tax or personal income tax that do not have a permanent professional base in Gabon, the following amounts are subject to a 10% WHT:

- All amounts paid pursuant to the practice of an 'independent profession' in Gabon.
- Payments received by inventors, payments relating to copyrights, and all payments relating to intellectual and commercial property as well as assimilated rights.
- All amounts paid for services materially rendered or effectively used in Gabon.
- Interest, arrears, and all others fixed-income investment-products, pertaining to income declared as professional revenue of the beneficiary.

Net profits carried out by branches of foreign companies having their head offices abroad are also subject to a 10% WHT in Gabon before they are taken into account by the foreign companies.

### *Transferable securities income tax (IRCM) at rate 15%*

The IRCM is due on revenues from stocks and shares paid to legal entities. It is due by beneficiaries of these revenues and must be withheld by the distributing company.

## *Tax administration*

### *Returns*

Returns for the previous calendar year are to be filed before 30 April of each year. Companies are required by law to have a 31 December closing of any fiscal year.

### *Payment of tax*

Tax is payable to the General Tax Office in two instalments on 30 November and 30 January. The balance of the tax due tax must be paid by 30 April. The first instalment must equal one-quarter of the tax assessed in the previous year and the second instalment must equal one-third of this tax.

## *Other issues*

### *Legal reserve*

According to the provisions of the OHADA Uniform Act relating to commercial companies and economic interest groups, one tenth of the year's profits, reduced, if applicable, by any previous losses, must be put into a reserve account named 'Legal Reserve'.

The endowment of this reserve ceases to be obligatory when its value reaches one fifth (20%) of the company share capital.

# Georgia

## Significant developments

To attract foreign investment, the Georgian government has reduced withholding tax (WHT) rates on passive income as follows:

- The WHT rate on dividends paid to non-residents is 5%. The rate will be reduced to 3% on 1 January 2013 and to 0% on 1 January 2014.
- The WHT rate on interest paid to non-residents is 5%. The rate will be reduced to 0% on 1 January 2014.

### Transfer pricing

The tax code introduces transfer pricing rules. The rules are broadly based on the Organisation for Economic Co-operation and Development (OECD) arm's-length principle, adopted in tax treaties and by most countries when they implement domestic transfer pricing rules *(see Transfer pricing in the Group taxation section for more information)*.

The Ministry of Finance of Georgia is in the process of preparation of guidance on the application of the transfer pricing rules.

### Thin capitalisation

With the introduction of the tax code, thin capitalisation rules became effective on 1 January 2011. Interest expense may be disallowed if a company's debt-to-equity ratio exceeds 3:1. The thin capitalisation rules will not apply to financial institutions, entities that have gross income of less than 200,000 Georgian lari (GEL), and entities with interest expense that is less than 20% of their taxable income before deducting such interest expense.

## Taxes on corporate income

Corporate income tax (CIT) in Georgia is applied to taxable profit at a rate of 15%. Taxable profit is defined as gross income minus deductible expenses.

Resident enterprises are subject to CIT on worldwide income.

Non-resident enterprises carrying out economic activities in Georgia through a permanent establishment (PE) are subject to CIT with respect to gross income earned from Georgian sources, which can be reduced by deductions attributable to such income.

Non-resident enterprises earning income from Georgian sources, other than through a PE, are subject to WHT *(see the Withholding taxes section for more information)*.

## Corporate residence

A resident enterprise is any legal entity that is established under the laws of Georgia or has its place of effective management in Georgia.

The domestic definition for a PE essentially adopts the definition for PE found in the OECD Model Tax Convention.

Local legislation provides the definition for economic activity to be any activity undertaken with the intent to gain profit, income, or compensation, regardless of the results of such activity, unless otherwise provided by the tax code.

## Other taxes

### Value-added tax (VAT)

The standard VAT rate is 18% and applies to the sale of all goods and services supplied in Georgia. Goods are considered to be supplied in Georgia if they are transferred in or their shipment originates in Georgia. Services generally are considered to be supplied in Georgia if they are performed in Georgia. However, special rules apply for services relating to immovable property and certain services provided to non-residents.

The export of goods is exempt from VAT with the right to credit input tax (formerly referred to as zero-rated). VAT-exempt supplies include financial services, goods and services required for oil and gas operations, and medical services.

Reverse-charge VAT applies to services provided to Georgian taxpayers by a non-resident entity.

A VAT payer is a person who is registered or required to be registered as a VAT payer. Any person whose annual taxable turnover exceeds GEL 100,000 in any continuous period up to 12 months or who produces or imports excisable goods must register as a VAT payer. In addition, an enterprise that expects to perform one-off taxable transaction of more than GEL 100,000 must also register as a VAT payer before effecting the transaction.

### Property tax

Property tax is payable at the rate of 1% on the annual average residual value of fixed assets (except for land) on the balance sheet as well as on leased out property of Georgian entities or foreign entities with taxable property in Georgia. For property acquired before 2005, the average residual value must be multiplied by a coefficient of between 1.5 and 3, depending on the acquisition date.

### Land tax

The annual land tax rate for agricultural land varies according to the administrative unit and the land quality.

The base tax rate per 1 hectare of agricultural land varies from GEL 1.50 to GEL 100. The tax is further adjusted by a territorial coefficient of up to 150%, depending on the location.

The base tax rate payable on non-agricultural land is GEL 0.24 per square metre, which is further adjusted by a territorial coefficient not exceeding 150%.

### Excise tax

Excise tax is levied on specified goods that are produced in Georgia or imported into Georgia. Excise tax generally is calculated with reference to the quantity of goods (e.g. volume, weight), or in the case of automobiles, on the basis of the engine's displacement and vehicle age. Excise tax rate varies from GEL 0.4 to 400 for one unit.

Excise tax applies to the following goods:

- Alcoholic drinks (i.e. GEL 5 per litre of whiskey).
- Condensed natural gas, except for pipeline.
- Oil distillates.
- Goods produced from crude oil.
- Tobacco products.
- Automobiles.
- Ferrous and non-ferrous metal scrap (i.e. GEL 160 per ton).

The export of excisable goods is taxed at a rate of 0%.

## Branch income

Branch income is taxed at the general rate of 15%. There is no tax on branch profit remittances.

## Income determination

Taxable profit is determined as the difference between the gross income of a taxpayer and the relevant deductions granted under the Georgian tax code.

### Inventory valuation

A taxpayer is required to record the value of goods produced or acquired as the outlays (except for depreciation charges) or the purchase price in tax accounting. Furthermore, the taxpayer shall include the storage and transportation expenses into the value of such goods.

A taxpayer is entitled to record the cost of inventory using the individual accounting method, the average weighted cost method, or first in first out (FIFO).

### Capital gains

The Georgian tax code does not define any separate tax for capital gains. Capital gains are taxable as normal business income at the general CIT rate.

### Dividend income

Dividends received by local legal entities (except for the sole enterprises and entrepreneur partnership) are not subject to taxation at the source and shall not be included in gross income.

Dividends received by non-resident enterprises from resident enterprises are subject to WHT at source *(see the Withholding taxes section for more information)*.

### Interest income

Resident legal entities and PEs of non-residents that received interest income that was taxed as source in Georgia are entitled to a credit tax paid to the State budget.

Interest income received from a licensed financial institution is not subject to WHT at source, and it should not be included in the gross income of a recipient unless the recipient is another licensed financial institution.

### *Partnership income*
In case of joint ownership (co-ownership) arrangement that involves ownership by more than one person but without establishment of a legal person, the taxable income shall be attributed to the owners pro rata shares and included in their gross income.

Regardless of whether the partnership distributes the profit by the end of the tax year or not, the shareholders are obliged to include the receivable income in gross income in the year when the partnership reported profit.

### *Rent/royalty income*
Rent and royalty income received by resident companies and/or PEs of non-resident enterprises should be included in the gross income of the enterprise and taxed at the CIT rate of 15%.

### *Foreign income*
Resident legal entities are subject to CIT on their worldwide income. Foreign income is subject to CIT at 15%.

## *Deductions*

Expenses connected with the receipt of income generally are deductible from income, provided sufficient primary documentation is available.

The following expenses are not deductible:

- Expenses not related to the generation of income (such as tax fines and penalties).
- Expenses related to the receipt of income exempted from CIT.

The deduction of certain expenses is subject to limitations, including:

- Representation expenses up to 1% of gross income.
- Charitable donations up to 10% of taxable profit.
- Repair expenses up to 5% of the book value of the relevant asset at the end of the year. Any excess must be capitalised and deducted through depreciation.

### *Interest paid on loans*
Interest paid on loans is deductible within the limits established by the Finance Minister. The annual deductible interest rate limitation established by the Minister of Finance of Georgia for the year 2011 is 24%.

### *Bad debts*
A taxpayer is entitled to deduct bad debts only if all of the following conditions are met:

- The bad debt is related to the taxpayer's goods or services sold.
- Income received from the sale of goods or services was previously included in taxable gross income.
- The bad debt has been written off and recorded as such in the taxpayer's accounting records.

### Depreciation
The declining balance method of depreciation applies to fixed assets for tax purposes. The maximum rate of depreciation is 20% for most fixed assets, though buildings and construction are subject to depreciation at the rate of 5% (please contact us for additional information regarding other groups and rates).

A taxpayer is entitled to fully deduct costs of fixed assets (excluding those contributed to capital) in the year when the fixed assets are put into operation (a form of capital allowance). In case the taxpayer employs the right of full deduction in this manner, this method may not be changed for five years.

### Net operation losses
Losses may be carried forward for five years but may not be carried back.

A taxpayer may elect to extend the carryforward period to ten years. However, this also results in the statute of limitations period being extended from six to 11 years.

International financial companies, free warehouse enterprises, and international enterprises are not entitled to carryforward losses.

An international financial company is a financial institution, which on behalf of the application of plenipotentiary representative, gets state registered, is granted as ‘international financial company’, and is given a status confirming certificate. These are resident companies that, after application, were granted the status of international financial company.

An international enterprise is an enterprise operating in the free industrial zone, which, for the purposes of tax exemption, is granted the status of international enterprise.

## Group taxation

Georgian law does not provide for taxation of groups.

### Transfer pricing
The transfer pricing rules introduced in the tax code are broadly based on the Organisation for Economic Co-operation and Development (OECD) arm’s-length principle, adopted in tax treaties and by most countries when they implement domestic transfer pricing rules.

The law recognises the five OECD transfer pricing methods for evaluating whether prices are arm’s length:

- Comparable uncontrolled price method.
- Resale price method.
- Cost plus method.
- Net profit margin method.
- Profit split method.

The tax code stipulates that in accordance with the Ministry of Finance instructions, the tax authority may recalculate the taxes if they can prove that the prices applied by related parties of transactions differ from the market prices.

The following general penalties, determined by tax legislation, apply for non-compliance with the arm's-length principle or failing to prepare or submit transfer pricing documentation:

- An understated tax liability (e.g. VAT, CIT) is subject to a penalty of 50% or 75% of the understated tax.
- Late payment of taxes is subject to interest at a rate of 0.07% per day.
- Failing to submit a required document is generally subject to a penalty of GEL 400 (approximately USD 220).

The Ministry of Finance of Georgia is in the process of preparation of guidance on the application of the transfer pricing rules.

### *Thin capitalisation*

With the introduction of the tax code, thin capitalisation rules became effective on 1 January 2011. Interest expense may be disallowed if a company's debt-to-equity ratio exceeds 3:1. The thin capitalisation rules will not apply to financial institutions, entities that have gross income of less than GEL 200,000, and entities with interest expense that is less than 20% of their taxable income before deducting such interest expense.

## *Tax credits and incentives*

The following are exempt from profit tax (the list is not exhaustive):

- Income of budgetary, international, and charitable organisations (including grants, membership fees, and donations), except for the profit from commercial activity.
- Profit received from financial services conducted by international financial companies.
- Gains on sales of securities issued by international financial companies.
- Income received from re-exporting goods from an independent warehouse via a free warehouse enterprise.

### *Free industrial zone (FIZ)*

The following rules apply for enterprises located in a FIZ:

- Income received by an international enterprise from its permitted activities conducted in a FIZ is exempt from income tax.
- The importation of foreign goods into a FIZ is free of customs duties and VAT-exempt.
- Operations carried out in FIZ are VAT-exempt.
- Property located in FIZ is exempt from property tax.
- The personal income tax of employees is paid by those individuals through self-reporting.

### *Foreign tax credit*

Income tax or profit tax paid on income earned from outside Georgia may be credited against CIT payable in Georgia. The amount of credited taxes may not exceed the Georgian tax payable on the foreign income.

## Withholding taxes

Non-resident enterprises earning income from Georgian sources, other than through a PE, are subject to WHT at the following rates:

| Income | WHT (%) |
|---|---|
| Dividends (reducing to 3% on 1 January 2013) | 5 |
| Royalties | 15 |
| Interest (reducing to 0% on 1 January 2014) | 5 |
| Oil & gas subcontractor income | 4 |
| International transportation/communication | 10 |
| Income from services rendered in Georgia | 15 |
| Other Georgian source income | 15 |
| Insurance and re-insurance | 0 |

## Tax administration

The tax departments under the Ministry of Finance are responsible for tax administrative matters in Georgia.

### Returns

The tax year is the calendar year in Georgia. A CIT return should be submitted and any taxes paid before 1 April of the year following the reporting period.

### Payments

CIT is paid in advance in four equal instalments on a quarterly basis before the 15th day of the month following the end of the previous quarter. The advance instalments are estimated according to the previous year's annual tax. A taxpayer with no prior-year CIT obligation is not required to make advance payments. Excess CIT payments may be offset against other tax liabilities.

## Significant developments

A new coalition government took office in the last quarter of 2009. It caused parliament to enact a number of specific measures for 2010, mainly in reaction to the worldwide financial crisis, but otherwise has announced that for the next four years priority is to be given to a return to financial and budgetary stability, rather than to any major reform of the tax system. In particular, there will be no tax cuts before 2013.

The main corporate tax measures enacted were:

- The suspension of the curtailment of loss relief provisions to enable corporate recovery of troubled businesses in 2008 and 2009 has been extended indefinitely. However, since then, the European Commission has decided that this suspension in favour of all troubled businesses is to be viewed as unauthorised state aid. Germany is contesting this view. The same loss curtailment provisions were repealed for reorganisations solely within groups and otherwise to the extent the loss carryforward is covered by hidden reserves in German assets other than shareholdings.
- The interest limitation threshold of EUR 3 million for 2008 and 2009 has been prolonged indefinitely. Unutilised taxable EBITDA (earnings before interest, tax, depreciation, and amortisation) above this threshold may now be carried forward.
- The deemed implicit interest charge in property rentals was reduced from 65% to 50% of the rent paid. The amount of rental disallowed for trade tax thus falls from 16.25% of the total to 12.5%.

The Accounting Modernisation Act, an accounting reform, was enacted in 2009, intended as a simpler alternative for unquoted companies to full International Financial Reporting Standards (IFRS) statements. From the tax point of view, the most radical change is the abolishment of the strict requirement for conformity between book and tax reporting. This has been replaced by a provision allowing a company to exercise all options permitted under the tax acts in its own tax interest without regard to the accounting treatment for the item in question. As a consequence, full deferred tax accounting is now mandatory. The Accounting Modernisation Act must be applied to accounting years ending in 2010. Application of this act was permitted but not required for 2009. IFRS statements remain mandatory for the published group accounts of quoted companies, whilst the Accounting Modernisation Act statements are the basis for the tax returns of all companies.

## Taxes on corporate income

Germany taxes its corporate residents on their worldwide income. However, most double tax treaties (DTTs) exempt income attributable to a foreign permanent establishment (PE). Non-residents with PE or property income are taxed by assessment on German-source income; those earning royalties and dividends are taxed by withholding at source. Interest paid abroad is, in most cases, free of German tax altogether.

German business profits are subject to two taxes, corporation tax and trade tax.

### *Corporation tax (Körperschaftsteuer)*
Corporation tax is levied at a uniform rate of 15% and is then subject to a surcharge of 5.5% (solidarity levy).

### *Trade tax (Gewerbesteuer)*
The effective rate of trade tax varies by location from a minimum of 7%, which is the legal minimum and applies in a few small villages in depressed areas, to the Munich rate of 17.1%. The local rates in most cities range between 14% and 16%, whilst those in small towns can be as low as 12%. The basis for this tax is the adjusted accounting profit: in particular, 25% of all financing costs over EUR 100,000, including the implicit financing costs in leasing, rental, and royalty payments, are added back to taxable income.

If the basis for the two taxes is identical (unlikely in practice), the overall burden on corporate profits earned in Munich would be 33%. In Frankfurt, the burden would be 31.9%. In Berlin, the burden would be 30.2%.

## *Corporate residence*

A corporation is resident in Germany for tax purposes if either its place of incorporation or its main place of management is in Germany. A corporation meeting neither of these criteria will be regarded as non-resident with tax obligations limited to its income from German sources. These include active business activities through a PE or the letting of property, as well as investment income, royalties, and equipment rental (leasing). Income of the first two categories is generally taxed by assessment on the actual net earnings. That of the last three is usually taxed at source by withholding from the gross amount payable. Interest paid abroad is generally tax-free. However, interest on convertible or profit-sharing bonds is taxed as a dividend; interest on a German property or ship mortgage is seen as property or shipping income respectively.

## *Other taxes*

### *Value-added tax (VAT)*
Proceeds of sales and services effected in Germany are subject to VAT under the common system of the EU at the standard rate of 19% (7% on certain items, such as food and books). The taxpayer generally is entitled to deduct the VAT charged on inputs from that payable on outputs.

VAT is administered by the tax office responsible for the corporation tax assessment of a company. It is based on returns filed monthly or quarterly by the tenth of the following month (monthly where the output tax in the previous year was more than 7,500 euros (EUR)) drawn up on the basis of the actual transactions during the filing period as shown in the books of account. A permanent filing extension of one month is available against an advance payment of one-eleventh of the total net tax due during the previous year. Otherwise, payment is due when the return is filed.

Legally, VAT is an annual tax. Each taxpayer must file an annual return for each calendar year, regardless of the actual accounting date for the business. The VAT return is filed together with the corporation and trade tax returns. If the annual return does not agree with the total of the monthly or quarterly returns, the tax office can be expected to ask for a detailed explanation and to penalise any irregularity.

### *Excise taxes*

Excise taxes on fuel, electric power, insurance, and some other products are not a compliance issue for businesses other than dealers in bonded goods and insurance companies, although they can be a significant additional cost factor for business users. These excise taxes also have an environmental element in as much as the rates are set to discourage excessive use of pollutants. However, an air passenger duty is the only tax on pollution as such. Energy producers (such as power stations) can claim a refund of the excise tax borne in the cost of the energy products used in the production process.

### *Social security contributions*

All employers are required to account for social security contributions on wages and salaries paid, up to set monthly limits. There are four separate types of insurance: for old-age pensions, unemployment benefits, health care, and invalidity care. Employees regularly earning more than EUR 4,125 per month can opt out of the health and invalidity insurances provided they take out appropriate coverage with a private insurance company. The pension and unemployment insurances are compulsory for all employees. The upper monthly salary limits are EUR 5,500 (EUR 4,800 in the eastern part of Germany) for the pension and unemployment insurances and EUR 3,712.50 for the health and invalidity insurances. The rates are as follows:

- Pension insurance: 19.9%, of which the employee's share is one half.
- Unemployment insurance: 3.0%, of which the employee's share is one half.
- Health insurance: 15.5%, of which the employee's share is 8.2%.
- Invalidity insurance: 1.95%, of which the employee's share is one half.

### *Stamp taxes*

The only significant German stamp tax is the real estate transfer tax of 3.5% of the consideration on all conveyances of German property.

This tax is also levied on indirect transfers from the acquisition of at least 95% of the shares in property owning companies. This applies to shares in the shareholder throughout the corporate chain. If the transfer is indirect, and therefore without its own specific consideration, the basis for the tax is 12.5 times the annual rentable value. This value is derived from rents actually achieved over the past three years or estimated from statistics maintained by the local authority.

The tax is not levied on direct or indirect transfers without consideration in the course of a corporate reorganisation under the laws of a member state of the European Economic Area (EEA), provided at least 95% of the ultimate interest in the property remains unchanged for five years before and after the transaction.

Real estate transfer tax is currently under attack before the Constitutional Court.

### *Property taxes*

There are no taxes on wealth or capital employed. There is a minor local authority tax on property, but the effect of this is largely offset by an additional trade tax deduction.

### *Customs duties*
Customs duties are levied under a common system on imports into the European Union. The rate is set at zero on most imports from EU candidate countries and on many imports from countries with which the European Union has an association agreement.

For manufactured products from other countries, the rates generally lie within the range of 0-10%. The basis is the import value of the goods and thus includes uplifts for royalty or other payments associated with their use but not apparent from the transit documents.

The European Commission also sets 'countervailing' duties from time to time on specific imports from specific countries in order to counter dumping attempts. The countervailing duty rate is set to fully absorb the dumping margin and is therefore usually much higher than 10%.

## *Branch income*

Both corporation tax and trade tax are imposed on the taxable income of a foreign company's German branch. The rates are the same for branches as for resident German companies, although the withholding tax (WHT) on dividend distributions by German companies is not deducted from profits transferred by a German branch to its foreign head office.

## *Income determination*

Strict conformity between book and tax reporting is no longer required. Rather, a company must draw up its financial statements according to the dictates of fair presentation, but may exercise all valuation and other options in the tax acts in its own best tax interest without regard to the accounting treatment for the item concerned. It must keep a register of all variances between the financial statements and the tax computation showing the basis on which each arose and its reversal. IFRS financial statements are not accepted as a basis for computing taxable income.

### *Inventory valuation*
Inventories normally are valued at the lower of actual cost, replacement cost, and net realisable value. However, any write-downs below actual cost must be for specific reasons. If specific identification of the inventories is not possible, valuation at either standard or average cost is acceptable. The last in first out (LIFO) method is accepted as an option. First in first out (FIFO) is not accepted unless its assumption accords with the facts, although this condition is often fulfilled in practice.

### *Long-term liabilities and accruals*
Non-interest bearing long-term liabilities, other than advance payments received, must be discounted at 5.5% per year. A similar provision applies to refurbishment (to restore an asset to its original condition) and other accruals which accumulate over time.

### *Capital gains*
Generally, capital gains realised by a corporate entity from a disposal of business assets are treated as ordinary income. It is possible to postpone the taxation of part or all of the gain on real estate by offsetting the gain against the cost of a replacement property.

Capital gains from the sale of investments in other companies are exempt from corporation and trade taxes. Corresponding losses are not deductible. However, 5% of the capital gains are added back to taxable income as non-deductible directly related expenses.

### *Dividend income*

Dividends received are exempt from corporation and trade taxes, regardless of the level of shareholding and the length of time it has been held. However, portfolio dividends are subject to trade tax. 5% of the tax-free gross dividend is added back to taxable income as non-deductible business expenses.

Note that banks do not enjoy this exemption on dividends from securities held for trading.

### *Stock dividends*

In principle, a declaration of stock dividends (by converting reserves to capital stock) by a company will not lead to taxable income for the shareholder or to other tax effects. Subsequent capital reductions, however, will be treated as cash dividends in most circumstances. There is no German tax reason for distributing a stock dividend as opposed to merely leaving accumulated profits on the books to be carried forward. The decision, therefore, depends upon the situation in the investor's home country.

### *Foreign income*

Foreign income, except dividends, received by a German corporation from foreign sources is included in taxable income for corporation tax unless a tax treaty provides for an exemption. Foreign PE income, in most cases, is exempt from corporation and trade taxes, while double taxation on most items of passive income (e.g. interest and royalties) is avoided by foreign tax credit or, at the taxpayer's option, by a deduction of the foreign taxes as an expense.

Irrespective of any tax treaty, income from a foreign branch or partnership is not charged to trade tax.

A Foreign Tax Act sets anti-avoidance (including Controlled Foreign Company [CFC]) rules with respect to subsidiaries in certain lines of business subject to a low-tax regime. A low-tax regime is one in which the rate applicable to the income in question is less than 25%. Most forms of passive income fall under the CFC rules, which essentially attribute the income to the German shareholder as though it had been earned directly. Active business income is not generally caught where the business operates from properly established facilities.

Investment income held in an EU/EEA subsidiary (except Liechtenstein) is also exempt from attribution, provided the subsidiary is commercially active in its country of operation and maintains at least a minimum establishment.

Other provisions give the tax office the right to insist on full disclosure of all the facts and circumstances surrounding a transaction as a condition for the deduction of a business expense incurred within an essentially tax-free environment for the supplier. This rule operates independently of ownership or shareholding considerations.

## Deductions

### Depreciation and amortisation

Depreciation on movable fixed assets is calculated on the straight-line method over the asset's anticipated useful life. The declining-balance method is not available for assets acquired in 2008, although it may be continued for assets acquired through 31 December 2007. The option was reintroduced for movable fixed assets capitalised in 2009 and 2010 at a maximum of two and a half times the straight-line rate, but in no case to exceed 25%. Depreciation takes the residual value of the asset into account, only if it is material, with any gains on a sale being treated as normal business income.

Buildings are depreciated on a variety of straight-line or reducing rate systems designed to reach a full write-down between 25 and 50 years, depending on the age of the building and on whether the taxpayer was its first owner.

In addition to normal depreciation, special depreciation is deductible for tax purposes in certain limited circumstances (e.g. small businesses, ancient monuments, buildings in designated renovated city zones).

Intangibles are amortised straight-line over their estimated useful lives with goodwill amortised over 15 years.

### Interest limitation

Annual net interest expense (the excess of interest paid over that received) is only deductible up to 30% of EBITDA (earnings before interest, tax, depreciation, and amortisation) for corporation and trade tax purposes. The 30% limitation applies to all interest, whether the debt is granted by a shareholder, related party, or a third party.

This limitation does not apply where the total net interest expense for the year is less than EUR 3 million or where the net amount paid to any one shareholder of more than 25% (or a related party) is no more than 10% of the total. If the company is part of a group, this latter concession is dependent on the demonstration that the equity to gross assets ratio of the company is no more than two percentage points below that of the group as a whole. Unused EBITDA potential may be carried forward for up to five years to cover future excess interest cost. This carryforward is otherwise subject to the same principles as the loss carryforward, including the curtailment of the carryforward on change of shareholder(s).

It is emphasised that the interest limitation is additional to, and not a substitute for, the transfer pricing requirement that related party finance be at arm's length.

### Taxes

All taxes borne are deductible except for corporation tax, trade tax, and VAT on non-deductible expenses. Late payment interest and similar charges are also not deductible.

### Net operating losses (NOLs)

NOLs are carried forward without time limit. For corporation tax (but not trade tax), there is an optional carryback to the previous year of up to EUR 511,500.

The loss relief brought forward claimable in any one year is limited to EUR 1 million plus 60% of current income exceeding that amount. The remaining 40% of income over EUR 1 million is charged to trade and corporation taxes at current rates. This is referred to as 'minimum taxation'.

The loss carryforward ceases if a single (immediate or ultimate) shareholder acquires more than 50% of the issued capital (voting rights) within a five year period. An acquisition of between 25% and 50% leads to a corresponding reduction in the loss carryforward.

Under the statute, these forfeiture rules do not apply to share acquisitions in connection with the recovery of a troubled business, where the change is part of a group internal reorganisation without effect on the single ultimate shareholder, or inasmuch as the loss carryforward is covered by hidden reserves in the company's assets that, on realisation, will lead to German taxation. This excludes the appreciation in value of shareholdings in other companies as well as business assets held in foreign PEs. However, the European Commission has recently decided to view the exemption from the forfeiture rules for share acquisitions within the context of a corporate recovery bid as unlawful state aid. Application of the provision has been suspended since April 2010; the government has announced that it intends to contest the Commission's finding.

### *Payments to foreign affiliates*
A German corporation can claim a deduction for royalties, management service fees, and, subject to the interest limitation, interest charges paid to foreign affiliates, provided the amounts are at arm's length. Detailed provisions covering both form and substance define this. In particular, all services must be covered by prior written agreement, and it is also necessary to conclude agreements for the purchase and sale of goods in writing where this would be usual between third parties (e.g. for quantity rebates on sales). The substance tests must be satisfied, both as to value for money and as to business relevance. Thus, the manager of a German subsidiary must be able to show both an adequate business benefit from a related party transaction and that the company could not have obtained a better deal on the open market. These and all other aspects of inter-company (related-party) trading fall under strict and extensive documentation requirements, breach of which can lead to serious penalties.

### *Special features for trade tax*
There are a number of differences between the income subject to trade tax and to corporation tax.

The most significant is the trade tax disallowance of one-quarter of the interest costs, including interest included implicitly in leasing, rental, and royalty charges. Banks have an exemption from this interest disallowance.

## *Group taxation*

If a German parent holds more than 50% of the voting rights in a domestic subsidiary, the two may conclude a formal, five-year, court registered profit pooling agreement. The ensuing relationship is then referred to as an Organschaft. Effectively, the annual results of an Organschaft are pooled in the accounts and tax returns of the parent. Profits and losses within a group can therefore be offset, but there is no provision for the elimination of intra-group profits from the total tax base.

### *Transfer pricing*
Extensive rules on transfer pricing in respect of all transactions with foreign related parties are in force. The basic principle is that all trading should be at arm's length, but the documentation requirements go far beyond the level of documentation normally found sufficient to demonstrate a conscientious approach to true third party business. Failure to meet these rules exposes the company to serious risk of penalties as well

as unfavourable estimates by the authorities with the right to exercise every possible leeway or margin to the taxpayer's disadvantage.

### Thin capitalisation

There are no thin capitalisation rules as such; their substitute is the 'interest limitation' to, basically, 30% of EBITDA discussed in the *Deductions section.*

### Controlled foreign company (CFC) regime

Germany operates a CFC regime aimed at passive income sheltered abroad and taxed at less than 25%. Essentially, the income is added to that taxable in Germany in the regular manner against a credit for the foreign tax actually paid and not recoverable by either the foreign entity or its shareholder. Active business income, except from tourism and the arms trade, is generally exempt from the CFC net, provided it is earned through a properly established facility of a scale appropriate to the activity concerned and treaty (or EU directive) rules exempting foreign income from German taxation are respected. However, taxpayers will have to demonstrate their treaty entitlement.

## Tax credits and incentives

Germany does not offer tax incentives except in very limited circumstances, not usually of direct business relevance (e.g. special depreciation for buildings under a conservation order). Partly, this is a question of the state budget, and partly, it reflects the constitutional requirement for equal treatment of all taxpayers.

### Other incentives

Investment grants of 7.5% or 15% are available on capital investment in new manufacturing facilities or hotels in the eastern part of Germany. The system is to be phased out by 2013.

Local authorities may offer facilities on favourable terms, such as the provision of cheap land on industrial estates.

### Foreign tax credit

If foreign source income is not exempt from German taxation, a credit will be given for the foreign tax actually paid and not otherwise recoverable. However, the credit is limited to the corporation tax (including the solidarity levy) on the net income after deducting the related expense. Unused credit is lost, as there are no provisions for carryforward or for offset against other taxes, such as trade tax. There are still a few cases of fictitious foreign tax credits under tax treaties with developing countries (to protect the treaty partner's investment incentives), but German treaty policy is to seek to abandon such provisions at the first opportunity.

## Withholding taxes

Resident corporations paying certain types of income are required to withhold tax as shown in the following tables. There is also a solidarity levy of 5.5% on the tax due.

### General

| Recipient of German-source income | Dividends (%) (1) | Interest (%) (1, 2, 3) | Royalties (%) | Movable asset rentals (%) (4) |
|---|---|---|---|---|
| Resident corporations and individuals | 25 | 25 | 0 | 0 |

| Recipient of German-source income | Dividends (%) (1) | Interest (%) (1, 2, 3) | Royalties (%) | Movable asset rentals (%) (4) |
|---|---|---|---|---|
| Non-resident corporations and individuals (1): | | | | |
| EU corporations (5, 6) | 0 | 0 | 0 | 0 |
| Non-treaty corporations | 25 | 25 | 15 | 15 |
| Non-treaty individuals | 25 | 25 | 15 | varies |

Notes

1. Corporate recipients of dividend and interest income (interest on convertible and profit-sharing bonds) can apply for refund of the tax withheld over the corporation tax rate of 15% regardless of any further relief available under a treaty.
2. Generally, only interest paid by banks to a resident is subject to a WHT. A 25% tax is also withheld from income on convertible or profit-sharing bonds.
3. Interest paid to non-residents other than on convertible or profit-sharing bonds is generally free of WHT. Tax on loans secured on German property is not imposed by withholding, but by assessment to corporation tax at 15% (plus solidarity levy) of the interest income net of attributable expenses. The tax authorities can order a WHT of 15.825% (including solidarity levy) if ultimate collection of the tax due is in doubt. Both forms of tax are reduced by treaty relief.
4. Movable asset rentals are taxed by assessment rather than by withholding. For corporations, the rate is the standard 15% corporation tax rate (plus solidarity levy) unless reduced by treaty.
5. Where the European Commission (EC) Parent/Subsidiary Directive applies, dividends paid by a German company to a qualifying parent company resident in another EU member state are exempted from German WHT. The minimum shareholding is 10%, to be held continuously for at least one year.
6. The EC Interest and Royalties Directive exempts payments from WHT if made to an associated company in another EU member state. The association must be through a common shareholding of at least 10%, to be held continuously for at least one year.

Notes

1. Corporate recipients of dividend and interest income (interest on convertible and profit-sharing bonds) can apply for refund of the tax withheld over the corporation tax rate of 15% regardless of any further relief available under a treaty.
2. Generally, only interest paid by banks to a resident is subject to a WHT. A 25% tax is also withheld from income on convertible or profit-sharing bonds.
3. Interest paid to non-residents other than on convertible or profit-sharing bonds is generally free of WHT. Tax on loans secured on German property is not imposed by withholding, but by assessment to corporation tax at 15% (plus solidarity levy) of the interest income net of attributable expenses. The tax authorities can order a WHT of 15.825% (including solidarity levy) if ultimate collection of the tax due is in doubt. Both forms of tax are reduced by treaty relief.
4. Movable asset rentals are taxed by assessment rather than by withholding. For corporations, the rate is the standard 15% corporation tax rate (plus solidarity levy) unless reduced by treaty.
5. The treaty does not (effectively) limit the taxation of profit-based interest income; thus, the domestic rate (plus solidarity levy) applies.
6. The USSR treaty continues in force with Armenia, Moldova, and Turkmenistan.
7. The lower royalty rate applies to commercial and industrial royalties, as opposed to cultural royalties.
8. Mortgage interest to a Belgian business is exempt unless the recipient holds at least 25% of the voting rights in the payer.
9. The Yugoslav treaty continues in force with Bosnia-Herzegovina and Serbia. Croatia, Macedonia, and Slovenia have their own treaties. There is no treaty with Kosovo or Montenegro.
10. The higher royalty rate applies to film and TV royalties, licenses to use trademarks and names, and to franchises.
11. The 5% royalty rate applies to films and TV.
12. The Czechoslovak treaty continues to apply to the Czech Republic and to Slovakia. Interest on profit-sharing bonds is taxed as a dividend.
13. The tax on trademark royalties is also subject to the solidarity levy.

14. The higher royalty rate of 5% applies to commercial, industrial, and scientific royalties.
15. There is no treaty relief for copyright or trademark royalties, except for those on films and TV.
16. There is no treaty relief for copyright royalties, except for those on films and TV.
17. Interest to banks is exempt. Otherwise, tax is levied at the domestic rate (including solidarity levy) without treaty relief.
18. Cultural royalties are exempt.
19. Interest on convertible and profit-sharing bonds is taxed as a dividend; mortgage interest is exempt.
20. The 15% royalty rate applies to copyrights.
21. Treaty relief on interest, royalties, and rentals is conditional on taxation in country of receipt.
22. The 5% royalty rate applies to copyrights.
23. Royalties for copyrights, except for films and TV, are exempt.
24. The 10% interest rate applies in certain circumstances where the recipient is a bank.
25. The 15% royalty rate applies to patents, trademarks, films, and TV.
26. The treaty with the UAE has not yet been ratified, but is to have retroactive effect to 1 January 2009.
27. The dividend exemption applies to corporate shareholders with at least 80% throughout the previous 12 months.
28. The 5% royalty rate applies to industrial, commercial, film, and TV royalties.
29. The 10% royalty rate applies to access to industrial, commercial, or scientific experience.
30. The treaty with Uruguay is not yet in force. Effective from the 1 January following ratification.
31. The former treaty with Turkey expired on 31 December 2010. A new treaty has been initialled, but not yet signed or published. If ratified, it will enter into force with retroactive effect from 1 January 2011.

## Tax administration

### Returns

Returns are filed for each calendar year and reflect the financial statements for the business year ending in that calendar year. Assessments are issued once the tax office has reviewed the return.

In principle, returns are due by May 31 of the following year. However, there is a virtually automatic extension to December 31 for those filing with professional assistance. A further extension to February 28/29 is possible, if justified under the circumstances. Known late-filers and those with a record of other irregularities can be asked to submit their returns before these extension dates, though not before May 31.

### Electronic returns

Monthly or quarterly returns for WHT from employee salaries, dividends, interest, royalties, and other payments, and for VAT must be submitted electronically. Electronic filing of the annual returns for trade tax and VAT is encouraged, but is not yet required. For corporation tax, electronic filing is not yet available, though it will be required in 2012 for 2011 returns. This electronic filing requirement will also include the financial statements supporting the return.

### Payment of tax

Taxes are payable in quarterly instalments during the year, with a final settlement when the assessment is issued. The quarterly instalments are based on the estimated ultimate liability. Usually, this is the total tax due shown by the last assessment issued, as adjusted by any rate changes. The corporation tax instalments are due on the tenth day of March, June, September, and December. For trade tax, the due dates are the 15th day of February, May, August, and November. Failure to pay by the due date followed by a three day grace period leads to a penalty of 1% per month.

Corporation and trade tax assessments bear interest on the net amount payable after deduction of all credits and previous payments. The rate is 0.5% per month simple interest, and the period runs from 1 April of the second year following the year of assessment. The interest period is independent of the actual date of assessment. It thus runs in retrospect on assessments issued later, for example following a tax audit.

### *Rulings*
Tax offices are able to issue binding rulings in respect of planned transactions, provided the taxpayer can show a particular interest in the tax consequences of the intended action. The fee varies between EUR 121 and EUR 91,456, depending upon the amount of tax involved.

### *Advance pricing agreements (APA)*
A taxpayer can request the Central Tax Office to negotiate an APA on related-party transactions with a foreign tax authority on one’s behalf. The vehicle is the mutual agreement procedure under the treaty, and the fee is a lump sum EUR 20,000 for each new agreement.

## Significant developments

The Government of Ghana in 2010 established the Ghana Revenue Authority (GRA) to replace the then Internal Revenue Service (IRS), the Customs Excise and Preventive Service (CEPS), and the Value Added Tax Service (VATS) for the administration of taxes in Ghana. The GRA is regulated by the Ghana Revenue Act 2009 (Act 791).

The introduction of the GRA Act has amended some sections (especially the tax administration sections) of the laws guiding the former revenue agencies (i.e. IRS, CEPS, and VATS). The GRA has the following divisions:

- Domestic Tax Revenue Division (formerly IRS, VATS).
- Customs Division (formerly CEPS).
- Support Services Divisions.
- Any other Division determined by Parliament.

Under the current GRA, there is only one Commissioner - General (C-G) responsible for the day to day administration of the Authority. The C-G would be assisted by the various Commissioners and staff of the Divisions of the GRA.

It is expected that having all three revenue agencies under the same body would reduce the administrative burden of taxpayers having to deal with the various revenue agencies at different locations/offices.

The principal legislation governing income taxes in Ghana is the Internal Revenue Act, 2000 (Act 592), with amendments in 2002, 2003, 2004, 2005, 2006, 2007, 2008, and 2010.

Other tax enactments are also contained in the Internal Revenue Regulations, 2001 (legislative instrument or L.I. 1675), 2002 (L.I. 1698), 2003 (L.I. 1727), 2004 (L.I. 1803), 2005 (L.I. 1811), 2006 (L.I. 1820), (L.I 1831) 2007, (L.I 1834) 2007, (L.I. 1959) 2009, (L.I. 1963) 2009, and (L.I. 1965) 2010.

Following the enactment of the GRA Act, the following laws/legislations were repealed:

- The Revenue Agencies (Governing) Board Act, 1998 (Act 558).
- The Internal Revenue Service Act, 1986 (PNDCL 143).
- The Revenue Agencies (Retention of Part of Revenue) Act 2002 (Act 628).

## Taxes on corporate income

National income tax is payable on the following:

- Income accruing in, derived from, brought into, or received in Ghana in respect of gains or profits from a trade, business, profession, or vocation.
- Dividends, interest, or discounts.
- Any charge or annuity.
- Royalties, premiums, and any other profits arising from property, including rents.
- Receipts, including royalties and deferred payments of any kind.

The corporate tax rate is 22% (this rate is applicable for three years for companies listed after 1 January 2004) for companies listed on the Ghana Stock Exchange (GSE), and 25% for companies that are not listed. The rate for companies engaged in non-traditional export and rural banking is 8% after ten years (due to a special exemption); bank lenders to the agricultural and leasing sectors pay 20% corporate tax; and companies in the hotel industry pay 25%.

## Corporate residence

Corporate residence is determined by the place where the trade, business, profession, or vocation is carried on. Hence, where a non-resident corporate body carries on any trade, business, profession, or vocation in Ghana (part of the operations of which may be carried on outside Ghana), the full gains or profits of the trade, business, profession, or vocation are deemed to be derived from Ghana.

If the corporate body's activities are carried on entirely outside Ghana, the mere supply of goods or services to Ghana does not constitute carrying on trade or business in Ghana.

## Other taxes

### Value-added tax (VAT)

Most economic sectors which formerly attracted a 15% service tax (e.g. service, entertainment; betting; hotel accommodation and food; food served in restaurants and snack bars; and advertisements), are now subject to VAT at a rate of 12.5% and a national health insurance levy (NHIL) of 2.5%. Most professional services are also subject to the same VAT and NHIL rates, including the following:

- Management services.
- Insurance brokerage and other services.
- Financial, tax, and economic consulting.
- Engineering and technical services.
- Accounting services.
- Courier services.
- Legal services.
- Provision of satellite television.
- Architectural services.
- Mobile cellular phone services.
- Services rendered by surveyors.

Exports of goods and services are zero-rated. Unless specifically exempt, supplies of all goods and services are subject to VAT.

There is a VAT Flat Rate Scheme (VFRS) under which businesses which meet the following thresholds are expected to pay 3% of their annual turnover as VAT without recourse to input VAT.

All businesses with an annual turnover between 10,000 Ghana cedi (GHS) and GHS 90,000 are now obliged to operate the VFRS charging a rate of 3%. All businesses whose annual turnover exceeds the GHS 90,000 threshold are obliged to charge and account for VAT at 15%. Businesses whose designation has changed due to the amendment are to convert to the appropriate system which they now qualify for.

Other amendments to the VAT system in Ghana are as follows:

- The following items which were previously zero-rated have now been classified as exempt goods:
  - Locally produced pharmaceuticals (list of essential drugs will be published).
  - Locally produced text and exercise books.
  - Locally manufactured agricultural machinery and other agricultural implements and tools.
- Transportation which was defined as an exempt supply has been narrowed to exclude haulage and vehicle hiring, making them liable to VAT.

### *Customs and excise duties*
Customs and excise duties are imposed on the importation of goods at the port of entry and certain manufactured goods produced or imported into Ghana. Some significant changes made to excise duties include a 2.5% reduction in *ad valorem* excise duty rates on all excisable goods, except spirits and cigarettes, and a revocation of the concessionary duty rate for the inputs of the tourism industry.

In addition to these, the government recently imposed a 20% environmental excise duty on polythene bags and other plastic packaging materials covered under the harmonized system and customs tariff schedules, effective as of 1 February 2011. The tax excludes the plastic packaging materials for water and mineral water.

### *National Fiscal Stabilisation Levy (NFSL)*
Originally set at a rate of 5% for two years from 2009 to 2010, the NFSL was recently extended until the end of 2011. NFSL is chargeable on the profit before tax of businesses and is applicable only to banks (excluding rural and community banks), non-bank financial institutions, insurance companies, communications companies, mining companies, and breweries.

### *Communications service tax (CST)*
CST is levied on charges payable by consumers for the use of Communication Services provided by Communications Class 1 licencees as defined in the National Communications Authority act. This essentially covered national fixed and mobile cellular network operators and Internet Service Providers (ISPs). Per recent amendments, CST has been extended to cover:

- Public/corporate data operators.
- Providers of radio (FM) broadcasting services.
- Providers of free-to-air and pay-per-view television service.

### Gift tax
A Gift tax is a tax payable by a person who receives a taxable gift. Gifts that are subject to tax have been defined in the Internal Revenue Act 2000 (Act 592) as amended. The gift tax rate was increased from 5% to 15% in the 2011 budget. However, the annual exemption for gifts valued up to GHS 50 remains unchanged.

### Airport taxes
Ghana also has Airport taxes which were revised to take retrospective effect from 1 January 2011 as follows:

| Description | Old rates | New rates |
|---|---|---|
| Domestic travel | GHS 1 | GHS 5 |
| International travel: within West Africa | USD 50 | USD 60 |
| International travel: outside West Africa (economy class) | USD 75 | USD 100 |
| International travel: outside West Africa (business class) | USD 75 | USD 150 |
| International travel: outside West Africa (first class) | USD 75 | USD 200 |

### Other taxes
Apart from these, there are property taxes and business rates, which are nominal amounts.

## Branch income

The rates on branch profits are the same as on corporate profits. However, the profits for the period deemed to arise in connection with the operations of the branch may, at the discretion of the tax authorities, be computed by reference to the total consolidated profits of the entire group, taking into account the proportion that the turnover of that branch bears to the total consolidated turnover of the group. When repatriating branch profits, the amount to be repatriated is subject to an additional tax of 10%.

## Income determination

### Inventory valuation
There is no statutory guidance on the principles of stock (inventory) valuation for income tax purposes. Any method of valuation of stock and work-in-progress based on sound accounting principles is acceptable, provided it is adopted and consistently applied from one period to another. In practice, inventory is normally valued for tax purposes at the lower of cost and net realisable value.

### Capital gains
A capital gains tax (CGT) is payable by every person, including a corporate body, on any capital gain accruing or derived from the realisation of any chargeable asset. These chargeable assets include buildings of a permanent or temporary nature; business and business assets, including goodwill; land other than agricultural land; and any assets declared as chargeable by legislative instrument made under the law.

Capital gains in excess of GHS 50 are subject to tax at 15%. However, gains resulting from a merger, amalgamation, reorganisation, reconstruction, and gains accruing to or derived from a venture capital financing company, are exempt from CGT. It is important to note that effective January 2011, gains from the sale of securities of companies listed on the Ghana Stock Exchange which were previously exempt from CGT are now subject to CGT. Details of further exemptions can be found in the income tax laws of Ghana.

### *Dividend income*
A dividend paid to a resident company by another resident company is exempt from tax where the company receiving the dividend controls, directly or indirectly, 25% or more of the voting power in the company paying the dividend.

### *Stock dividends*
The issue of stock dividends is permitted under Section 74 (1) of the Ghana Companies Code 1963, Act 179. It is, however, subject to income tax at the dividend tax rate of 8%.

### *Other significant items*
Specific exemptions from tax include the following:

- Income of a local authority.
- Income of a statutory or registered building society.
- Income of an ecclesiastical, charitable, or educational institution.
- Income of organisations formed for the purpose of promoting social or sporting amenities not-for-profit.
- Income accruing from a farming enterprise for a limited period.
- Income of a registered trade union.
- Income of rural banks for the first ten years of operations.
- Gain or profit from the business of operating ships or aircraft by non-resident corporate bodies.
- Investment income of a pension or provident society.
- Income or profit of any registered cooperative society.
- Income of a company engaged in the construction and sale or leasing of residential premises during the first five years following commencement of operations of the company.

### *Foreign income*
Resident corporations are taxed on their foreign income as and when it is brought into or received in Ghana. Foreign income is taxed together with other income derived in Ghana, and double taxation is avoided through treaties or foreign tax credits. No special rules exist for taxing undistributed income of foreign subsidiaries.

## *Deductions*

### *Depreciation and depletion*
Depreciation of capital assets in the accounts of a business is not an allowable deduction in computing taxable profits. It is replaced by capital allowances at statutorily prescribed rates. These allowances are available on capital expenditure for the following types of depreciating assets used in a trade:

- Plant and machinery.
- Trawlers and dredges.
- Furniture, fixtures, and fittings.
- Airplanes and helicopters.
- Industrial buildings.
- Mines and oil wells.
- Ships.
- Timber concessions.

Allowances are granted only on the following conditions:

- The taxpayer must own the asset.
- Capital expenditure must be incurred.
- The asset must be used in the trade.
- The asset must be in use up to the end of the basis period.

Capital allowances are granted for every year in which the asset is in use. In some cases, balancing allowances and charges are made where use continued until immediately before disposal of the asset.

For intangibles, such as patents, trademarks, and copyrights, the law allows deduction of fees and expenditure incurred in obtaining the grant and the cost of registration and renewals.

For capital expenditure for acquisition of Ghanaian mineral concessions and related interest in land, an annual write-down allowance is allowed of 80% of the cost base added to the pool during the basis period and 50% of the balance of the pool, if any. There is also an additional 5% allowance calculated on the previous year's additions.

### *Net operating losses*
Losses can be carried forward and deducted from assessable income for the five years immediately following the year in which the loss was incurred. This provision covers the following industries: farming and agro-processing, mining, manufacturing (for export only), tourism, and ICT (software development) industries.

Carryback of losses is permitted for persons deriving income relating to a long-term contract. A long-term contract of a business refers to a contract for manufacture, installation, or construction.

### *Payments to foreign affiliates*
No special restrictions are imposed on the deductibility of royalties, interest, and service fees paid to foreign affiliates, provided they are expenses incurred wholly, exclusively, and necessarily in the production of the income. However, the C-G may disallow certain transactions if of the opinion that they are artificial or fictitious.

### *Taxes*
No taxes are deductible in determining taxable income.

### *Other significant items*
No special deductions are allowed. Principal non-deductible items include the following:

- Domestic or private expenses, including cost of travel between residence and place of business or employment.
- Any disbursement or expense not being wholly and exclusively paid or expended for the purpose of acquiring income.
- Capital withdrawn or any sum employed or intended to be employed as capital.
- Capital employed in improvement.
- Any sum recoverable under an insurance contract of indemnity.
- Rent of or any expense in connection with premises or a part of premises not occupied or used for the purpose of producing business income.
- Any amount paid or payable in respect of any income tax, profits tax, or similar tax, whether due within or outside Ghana.

- Any payment to a provident, savings, or other society or fund, unless specifically allowed by the tax C-G.
- Any sum payable by way of mortgage or debenture interest by any person to a non-resident person, except where tax has been deducted and accounted for.
- Depreciation of any fixed assets of a permanent nature.

## *Group taxation*

No form of combined reporting of results of operations by a group or affiliates is permitted.

## *Tax credits and incentives*

### *Inward investment*

Under the Ghana Investments Promotion Centre Act 1994, various incentives are available to encourage investments in the country, particularly in the areas of agriculture; manufacturing industries engaged in export trade or using predominantly local raw materials or producing agricultural equipment, etc.; construction and building industries; mining; and tourism.

Incentives generally include exemption from customs import duties on plant and machinery; reduced corporate income tax rates; more favourable investment and capital allowances on plant and machinery; reduction in the actual corporate income tax payable where appropriate; retention of foreign exchange earnings where necessary; guaranteed free transfer of dividends or net profits, foreign capital, loan servicing, and fees and charges in respect of technology transfer; and guarantees against expropriation by the government.

### *Capital investments*

Venture capital tax incentives include the following:

- Relief from stamp duty in each year on subscriptions for new equity shares in venture capital funds.
- Full tax exemption from corporate income tax, dividend tax, and CGT for five years.
- Carryforward of losses from disposal of shares during the tax-exempt period to the post-exempt period up to five years.
- Chargeable income tax deduction equal to 100% of their investment for financial institutions which invest in venture capital subsidiaries.

### *Tax holidays*

Until January 2011, the income of a company from a business of construction for sale or letting of residential premises was exempt from tax for a period of five years. This was abolished in the 2011 national budget. The tax holiday is now limited to companies which partner with the Minister responsible for Works and Housing for construction for sale or letting of low cost affordable residential premises and are certified as such by the Minister responsible for Works and Housing.

## Withholding taxes

The threshold for WHT on goods and services has been increased from GHS 50 to GHS 500, hence only contracts for the supply of goods and services exceeding GHS 500 will attract a WHT. The rates, however, remain the same as follows:

| Income | Rate (%) |
|---|---|
| From employees' monthly salaries | * |
| **Resident persons** | |
| Interest (excluding individual and resident financial institutions) | 8 |
| Dividend | 8 |
| Rent (for individuals and as investment income) | 8 |
| Fees to part-time teachers, lecturers, examiners, and endorsement fees | 10 |
| Commissions to insurance agents, sales persons, and fees to directors, board members, etc. | 10 |
| On commissions of lottery agents | 5 |
| Supply of goods and services exceeding GHS 50 | 5 |
| **Non-resident persons** | |
| Dividend | 8 |
| Royalties, natural, resources payments, and rents | 10 |
| Management, consulting, and technical service fees, and endorsement fees | 15 |
| Interest income | 8 |
| Short-term insurance premium | 5 |

*Graduated tax rates as per regulations made under the Act.

## Tax administration

### Returns

The tax year runs from 1 January to 31 December. Corporations with financial periods other than the calendar year are taxed on their financial period ending during the calendar year. Separate provisions exist for commencement and cessation of business.

The tax administration system is an information return system, with subsequent assessment being issued by the tax authorities. Upon request to the Ghana Revenue Authority (GRA), a taxpayer is given Income Tax Form 22A for completion and submission to the IRS. This form provides the relevant information for determining taxable income and is filed by the taxpayer or an appropriate agent.

Companies are expected to submit a return four months after the end of the financial year. They may file an application for extension of filing time for not more than two months.

The following are to be furnished together with a return:

- Certified statement of turnover for the period covered by the return.
- Copy of certified accounts of the business for the period.
- An estimate of the tax due on the income declared and remittance of the tax so computed.

### *Assessments*
An assessment may be made on the company after the beginning of each year of assessment. If the return is considered incorrect and inadequate, additional assessments may be made as often as necessary. The tax authorities may make a provisional assessment before a return is filed, which can serve as a tax credit against the final assessment based on the return.

### *Payment of tax*
Where the assessment has been finalised, the tax is payable within 30 days after service of the notice. At the discretion of the Tax C-G, the time for payment may be extended. Without notice or demand from the C-G, a taxpayer is required to pay not less than the total of the tax paid or payable in respect of the preceding year of assessment. This may be paid by equal quarterly instalments at the end of March, June, September, and December in each year of assessment, but such payments are not deemed to be the actual tax payable.

Where tax is not paid by the due date, a penalty is assessed at 10% of the tax payable in addition to the tax unpaid up to three months after the due date; thereafter, the penalty is 20%.

## Significant developments

On 16 June 2010, the Gibraltar Government published the text of the new, amended, and consolidated Income Tax Act under cover of a pre-legislative briefing paper. The new Act paved the way for the introduction of a low rate of corporate tax of 10%, with utility and energy providers and companies that abuse a dominant position paying an extra 10% surcharge. It has also lead to the end of the exempt tax regime.

The bill was formally published on 2 September 2010 and passed by Parliament in October 2010, with the legislation becoming effective as of 1 January 2011.

The main changes are summarised below. Please note that this information is current as of 1 June 2011. Typically, pending legislation is announced at the end of July in Gibraltar. Please visit the WWTS website at www.pwc.com/taxsummaries to see any significant corporate tax developments that occurred after 1 June 2011.

### Increased investigative powers

The Commissioner has been granted increased powers for the purposes of investigating tax returns. Under the new Act, the Commissioner may also request information to satisfy any international exchange of information obligations.

### Change in the basis of taxation

Income tax is now assessed on an actual basis instead of a prior-year basis.

Companies still have the freedom to choose their financial year end. However, there is no longer any reference to a year of assessment.

### Exempt income

Under the new Act, tax on interest (except in the case where it is an integral part of the company's revenue stream, such as with banks, finance, or money lending companies), dividends, and royalties has been abolished.

### Introduction of self assessment and filing due dates

The new Act introduces the concept of self-assessment with new filing due dates as well as penalties and fines for non-compliance. *See the Tax administration section for more information*.

### Anti-avoidance

Like the existing Act, the new Act contains a generic anti-avoidance clause which allows the Commissioner to disregard an arrangement which he believes is fictitious or artificial. In addition, it introduces specific anti-avoidance measures including:

- Thin capitalisation rules.

- Transfer pricing legislation.
- Back to back loans.
- Dual employment contracts.
- Transfer of assets abroad.
- Head office charges.

*See the Group taxation section for further details.*

The new Act also requires that promoters of tax planning schemes notify the Commissioner within 30 days of any schemes which result in the payment of less tax. The Commissioner will decide whether the scheme is in the spirit of the Act and whether legislation is required to prevent it.

### *Transitional rules*

Complex transitional rules have been introduced in order to accommodate the change in the basis of taxation. Cessation rules will be applied as of 31 December 2010.

For companies in transitional years, the Act contains a table showing when and what the basis payments on account will be and when they will be due and payable.

With respect to capital allowances under the new Act, companies which were previously tax exempt will take the closing net book value of their assets at 31 December 2010 as the value of the opening pool available for allowances. For existing taxpayers, the amount will be the tax written down value at 1 January 2011, the date of entry of the new legislation.

## *Taxes on corporate income*

As of 1 January 2011, companies are subject to Gibraltar taxation on income accrued in, derived from, or received in Gibraltar on an actual basis.

Tax on interest (except in the case where it is an integral part of the company's revenue stream, such as with banks, finance, or money lending companies), dividends, and royalties has been abolished.

Prior to 1 January 2011, companies were subject to Gibraltar taxation on income accrued in, derived from, or received in Gibraltar on a prior-year basis. The main exemption to this was dividends, which were taxed on a worldwide basis, although tax could be mitigated provided certain criteria were met (*see the Income determination section*).

### *Corporate tax rates*

As of 1 January 2011, the 'low rate' of corporate income tax rate is 10%, with utility and energy providers and companies that abuse a dominant position paying a higher rate of 20%.

Prior to 1 January 2011, the standard rate of corporate income tax was 22%, but there was a 'small company' rate of 20% that applied where the profits of an accounting period were less than 35,000 British pounds sterling (GBP) per annum and a marginal rate that was charged on profits of between GBP 35,000 and GBP 43,333.

A 'small company' was one whose trading activities in any year had a minimum of 80% of its total trading receipts derived from sources other than the following: dividends, interest or discounts, rents, royalties, premiums, and any other profits arising from property.

### *Start-up relief*

Prior to 1 January 2011, a 'start-up' rate of 10% applied to any business established in Gibraltar after 1 July 2009.

As an anti-avoidance provision, the start-up relief did not apply in respect of any commercial activity carried out before 25 June 2009 and which was reorganised by the taxpayer in the name of a different entity for the purpose of benefiting from this scheme.

### *Exempt company*

On 31 December 2010, the tax exempt company legislation was repealed. As of 1 January 2011, all formerly tax exempt companies are subject to taxation at the rate of 10%, or 20% if they fall within the category of higher rate taxpayers.

Prior to 1 January 2011, an exempt company was not subject to taxes in Gibraltar. In order to qualify for such status, the exempt company must have demonstrated that it was not beneficially owned by Gibraltarians (or residents of Gibraltar) and did not trade with such persons.

The legality of this status was challenged by the European Union (EU) under the EU State Aid Rules in July 2001. In January 2005, the Government of Gibraltar reached an agreement with the EU Commission to permit existing tax-exempt companies to continue enjoying such status until 31 December 2010, provided that neither the beneficial ownership nor the activities of the company changed, in which case they became ordinarily resident entities taxable at the standard rate above.

Please note that no new exemptions were granted after 30 June 2006.

## *Corporate residence*

A company will be considered resident in Gibraltar if the management and control of its business is exercised from Gibraltar.

The location of central management and control will be established under legal principles laid down in the UK and is the place of the highest form of control and direction over a company's affairs, as opposed to decisions on the day-to-day running of the business.

## *Other taxes*

### *Value-added tax (VAT)*

There is no VAT in Gibraltar.

### *Customs and excise duties*

Goods imported into Gibraltar from outside are, with some exceptions, generally subject to import duty at the applicable rate, which is usually 12%. Different rates apply to food, alcohol, and tobacco (among others).

### Property tax
A general business property rate is levied on all businesses in Gibraltar. The amount varies depending on the property and is subject to an annual review.

### Stamp duty
Stamp duty is payable on the transfer or sale of any Gibraltar real estate or shares in a company owning Gibraltar real estate (on an amount based on the market value of said real estate) at the following rates:

- Less than GBP 200,000: 0%.
- Between GBP 200,000 and GBP 350,000: 2% on first GBP 250,000 and 5.5% on balance.
- Over GBP 350,000: 3% on first GBP 350,000 and 3.5% on balance.

### Gaming tax
Gaming tax is levied at 1% of the gaming income. The tax paid is subject to a minimum of GBP 85,000 and maximum of GBP 425,000.

### Capital duty
Capital duty of GBP 10 is payable on the initial authorisation of capital or any subsequent increase thereto.

### Social insurance
Employers are obliged to pay a proportion of social insurance on behalf of their employees.

Employers' social insurance contribution for employees paid weekly is calculated as 20% of gross earnings, subject to a minimum of GBP 15.00 and a maximum of GBP 32.97 per week.

Employers' social insurance contribution for employees paid monthly is calculated as 20% of gross earnings, subject to a minimum of GBP 65.00 and a maximum of GBP 142.87 per month.

## Branch income

The basis for taxation of branches of foreign enterprises is the same as for corporations.

## Income determination

Generally, companies are subject to Gibraltar taxation on income accrued in, derived from, or received in Gibraltar.

Prior to 1 January 2011, the main exception to this was dividends, which were taxed on a worldwide basis, although tax on this could be mitigated (*see Dividends section below*). As of 1 January 2011, please note that dividends are no longer taxed.

Where a taxpayer seeks to reduce their liability to tax by creating an artificial split between activities in Gibraltar and outside of Gibraltar, the Commissioner shall use anti-avoidance provisions to defeat such an attempt.

### *Inventory valuation*
Inventory is valued at the lower of historical cost or net realisable value. The last in first out (LIFO) method is not permitted. Generally there are no material differences between accounts prepared on a normal accounting basis and those prepared on a tax basis.

### *Capital gains*
Capital gains are not subject to tax in Gibraltar.

### *Dividends*
As of 1 January 2011, there is no charge to tax on the receipt by a Gibraltar company of dividends from any of its subsidiaries, regardless of where incorporated.

There is no withholding tax on dividends.

Prior to 1 January 2011, only dividend income received from companies listed on a recognised stock exchange (except in the case where the income formed part of the company's trading receipts) was not taxable in Gibraltar.

Also prior to 1 January 2011, dividends received from participating interests or from any subsidiaries in the participating interest group were not liable to taxation in Gibraltar. A participating interest existed where there was a direct or indirect shareholding of at least 10% in a company registered in the EU (or a company which was registered in a country which has a bilateral agreement with the EU).

There was no tax on dividends paid by one Gibraltar company to another, and there was no liability to tax on dividends paid by a Gibraltar company to a person who was not resident in Gibraltar.

### *Interest*
As of 1 January 2011, interest, except where it is an integral part of the company's revenue stream (e.g. banks, finance, or money lending companies), is not taxable in Gibraltar.

For companies where interest is considered 'a trading receipt', no tax shall be charged on the net interest receivable from deposits received from related parties to the extent that these funds do not themselves generate interest income from money lending activities to third parties.

Prior to 1 January 2011, interest received from financial institutions, except in the case where the income formed part of the company's trading receipts, was not taxable in Gibraltar.

With respect to non-bank loans, where the situs of a loan was outside Gibraltar, there was no source of income which would give rise to a liability to tax in Gibraltar in respect of the interest received on that loan.

The situs of a loan depended upon:

- the place of residence of the debtor
- the source from which the interest was paid
- the place where the interest was paid, and
- the nature and location of the security for the debt.

Where loans were primarily secured on assets situated in Gibraltar, unless there were compelling reasons to the contrary, they were likely to have their situs in Gibraltar.

## *Deductions*

For the purpose of ascertaining the assessable income there shall be deducted all expenses wholly and exclusively incurred in the production of the income. No deduction shall be allowed in respect of the following:

- Domestic or private expenses.
- Expenses not incurred wholly and exclusively in the generation of income.
- Any expenses of a capital nature.
- Any sum recoverable under an insurance contract or contract of indemnity.
- Property expenses not incurred for the purposes of producing income.
- Any tax charges under the Income Tax Act.
- Depreciation of assets (although capital allowances are available, *see below*).
- Employee remuneration not accompanied by a certified statement of name, addresses, and amount of remuneration.
- Certain business entertainment expenditure falling within guidelines published by the Commissioner.
- Interest paid to a non-Gibraltar resident at more than a reasonable commercial rate.

### *Capital allowances*

As of 1 January 2011, the concept of 'pooling' of allowances was introduced.

The first GBP 30,000 of qualifying expenditure on plant and machinery (including fixtures and fittings) and the first GBP 50,000 of qualifying expenditure on computer equipment is fully deductible in the first year.

Annual capital, or wear and tear, allowances are available for plant and machinery (including fixtures and fittings), computer equipment, and motor vehicles at the rate of 15% (20% for companies that are obliged to pay the higher rate of corporate tax - *see the Taxes on corporate income section*) and are calculated on a reducing balance basis. Capital allowances for industrial buildings are deductible at the rate of 4% per annum on a straight-line basis.

Prior to 1 January 2011, the first GBP 30,000 of qualifying expenditure on plant and machinery (including fixtures and fittings) acquired in a year of assessment was fully deductible, with the balance deductible at the rate of 25% per annum on a straight-line basis.

The first GBP 50,000 of qualifying expenditure on computer equipment was fully deductible, with the balance deductible at the rate of 25% per annum on a straight-line basis.

An expenditure on motor vehicles which did not qualify as plant and machinery was deductible at the rate of 25% per annum on a straight-line basis.

An expenditure on industrial buildings was deductible at the rate of 4% per annum on a straight-line basis.

Both prior to and after 1 January 2011, capital payments for leases which are for periods of less than 12 years qualify for capital allowances on a straight-line basis over the remaining period of the lease.

### *Operating losses*

A trading loss incurred in an accounting period may be offset against trading income arising in the same period or subsequent period, provided that within a period of three years there has not been both a change in the ownership of the company and a major change in the nature or conduct of the trade.

There is no provision for the carrying back of losses.

## *Group taxation*

### *Trading losses*

Companies are assessed on an individual basis, and trading losses of group members may not be offset against profits of other members of the group.

### *Anti-avoidance*

Like the existing Act, the new Act contains a generic anti-avoidance clause which allows the Commissioner to disregard an arrangement which he believes is fictitious or artificial. In addition, it has introduced specific anti-avoidance measures including:

#### Thin capitalisation

Interest paid on a loan to related parties (or loans where security is provided by related parties) where the ratio of the value of the loan capital to the equity of the company exceeds five to one will be considered as dividend payments and thus not a deductible expense for tax purposes. This provision is not applicable to Gibraltar banks and money lenders.

#### Transfer pricing

More stringent transfer pricing rules have come into effect. The amount of interest payments to connected persons which is in excess of that payable at 'arms length' will be deemed to be a dividend. Where the amount charged for goods and services by connected persons is not at 'arms length', the excess will be disallowed as a taxable expense. Any expenses allowed will be subject to the lesser of (i) the expense, (ii) 5% of the gross turnover of the company, and (iii) 75% of the pre-expense profit of the company.

Prior to 1 January 2011, the transfer pricing regime consisted of just the Commissioner's ability to disregard a transaction under anti-avoidance provisions and specific rules governing non-resident individual control over a resident individual.

#### Back to back loans

Since interest income is not taxable, nor is the interest expense deductible.

#### Dual employment

Income from dual employment contracts will be taxed in Gibraltar where the two employers are connected persons.

#### Transfer of assets abroad

Where assets are transferred abroad with the propose of avoiding tax and the taxpayer has the power to enjoy these assets either now or in the future, then any income or benefits received from these assets will be deemed to be income chargeable to income tax.

**Head office charges**
Allowable head office charges or expenses incurred by a Gibraltar branch for the common purpose of the company and its branches, or for the purpose of the head office or another branch exclusively, have been limited to 5% of turnover of the Gibraltar branch.

## *Tax credits and incentives*

### *Development aid*
In order to encourage private development in Gibraltar, promoters and developers of approved projects are offered certain incentives such as tax relief, import duty relief, and rates relief.

In order to qualify for the above relief, the project needs to be a new project, which is for the economic benefit of Gibraltar and the aim of which is:

- to create a tangible immovable asset in Gibraltar that will remain in existence after the applicant has ceased to derive the benefits under the license
- to provide more than two additional units of housing accommodation in Gibraltar
- to contribute materially to the development of the tourist industry in Gibraltar
- to afford any new employment opportunities or career prospects in Gibraltar, or
- to improve materially the economic or financial infrastructure of Gibraltar.

The project needs to be completed within a specified time (dependent on the type of project) following the issue of the licence, and the applicant must not expend less than the prescribed amount for the project.

Application for development aid must be made to the Minister for Trade.

### *Deduction of approved expenditure on premises*
For taxpayers with an interest in a building situated in Gibraltar, an allowance is available for approved expenditure on the painting, decorating, repair, or enhancement of the frontage of that building.

The approved amount will be available as a deduction against the taxpayer's income. This deduction is in addition to any deduction, relief, or allowance given in accordance with any other provision of the Income Tax Act in respect of the same expenditure.

The claim for the deduction must be made within two years after the end of the year of assessment with respect of which the deduction is claimed.

## *Withholding taxes*

There are no withholding taxes (WHT) in Gibraltar except in the following cases:

- Payments to subcontractors in the construction industry. Unless the subcontractor is in possession of an exemption certificate, tax is withheld at the rate of 25% of the amount which relates to the labour and profit element of the contract.

- Payments to employees under the Pay As You Earn (PAYE) system. Under the PAYE regulations, employers are obliged to deduct an amount of tax in accordance with the employee's tax code.

Prior to 1 January 2011, interest payments on Gibraltar situs loans payable to non-financial institutions were subject to WHT at the corporate tax rate.

## *Tax administration*

### *Tax returns*
As of 1 January 2011, companies are required to file returns and calculate their tax liability for the year. The return, together with the estimated liability, needs to be accompanied by payment of the tax due six months after the date of the company's financial year end.

Companies with turnover of GBP 500,000 or more are also obliged to file audited accounts within nine months of the company's financial year end.

Companies with turnover of less than GBP 500,000 will be obliged to file unaudited accounts accompanied by an Independent Accountant's Report within nine months of the company's financial year end.

Prior to 1 January 2011, tax returns were due by 30 September in the year of assessment.

### *Payment of tax*
As of 1 January 2011, companies are required to make payments on account of future liabilities on 28 February and 31 August in each calendar year. Each payment should be equal to 50% of the tax based on the previous year's assessable income.

The balance of tax due (i.e. the actual liability less payments on account) is due on the date of filing of the return.

Prior to 1 January 2011, tax for any year of assessment was due on the later of 28 February in the year of assessment or 60 days after the issue of the assessment.

### *Appeals*
As of 1 January 2011, a taxpayer may appeal against a disputed assessment by notice in writing addressed to the Commissioner within 28 days of the date of service of the notice of the assessment.

Prior to 1 January 2011, the appeal notice period was 21 days.

### *Fines and penalties*
As of 1 January 2011, the following penalties and fines are applicable:

For the late payment of tax, there is a penalty of 10% of the amount of tax due on the day immediately after such payment was due. If unpaid for 90 days, a further amount of 20% of the tax due is charged; and if still unpaid after this period, then a 10% per annum surcharge will be added which is compounded on a daily basis until the amount of the tax and penalties are fully paid.

Failure to file a return by the due date will result in a penalty of GBP 50 with a further penalty of GBP 300 if the return is not submitted within three months after the due date.

Failure to respond to a notice or request to submit information or documentation will result in a fine of GBP 200 on the day the failure occurs and a penalty of up to GBP 500 per day thereafter. Failure to comply beyond a three month period, if convicted, can result in imprisonment.

For fraudulently, recklessly, or negligently delivering to the Commissioner an incorrect return, accounts, or information there is a fine of up to 150% of the difference between the actual tax due and the tax due as per the original declaration. The amount of the penalty will depend on:

- the amount of the tax lost and / or delayed
- the gravity of the offence (i.e. if deliberate or an honest mistake), and
- the level of cooperation in the investigation.

Failure to pay to the Commissioner PAYE or social insurance which has been withheld or should have been withheld will become a criminal offence leading to imprisonment and / or a fine.

If an amount of PAYE and / or social insurance exceeding GBP 5,000 is outstanding for over three months, the Commissioner will, after giving 14 days notice, publish in the Gibraltar Gazette the name of the person whom he has reason to believe has failed to comply with the PAYE Regulations.

Failure to notify the Commissioner of an arrangement the main benefit of which is to avoid the payment of tax will result in a fine of GBP 100 on the day the failure occurs and a penalty of GBP 200 per day thereafter.

Fines and penalties introduced under the new Act will not apply until after 30 June 2012; however, interest on unpaid tax will apply as from the introduction of the Act.

Prior to 1 January 2011, penalties were imposed if tax was not paid by the due date. The amount of the penalty was equal to 10% of the tax due. If tax remained unpaid for five months after the due date, the Commissioner at his discretion could levy additional penalties of 10% of the tax due for each of the additional five months that passed until the tax was repaid.

If a person made an incorrect return by omitting or understating any income without a reasonable excuse, they were liable on conviction to a fine and double the amount of tax which had been undercharged as a consequence of the incorrect return. Default of payment could result in imprisonment.

A person who wilfully and with intent to evade or to assist any other person to evade tax by purposely omitting income from a return, maintained false accounts, or provided a false answer or statement was, if convicted, liable to a fine being treble the amount of tax not paid as a result of the offence and imprisonment.

## Significant developments

The new tax law 3943/2011 adopted by the Greek Parliament amended the Greek tax regime by introducing new provisions affecting all fields of taxation. The most significant amendments in the field of corporate taxation are the following:

- The two corporate income tax (CIT) rates for non-distributed and distributed profits of legal entities that were introduced by L.3842/2010 are abolished.
- The CIT rate of legal entities is set at 24% for income of financial year 2011 and at 20% for income of financial years 2012 onwards. Financial year 2012 in Greece would normally cover any financial year ending after, but not including, 31 July 2011.
- A 25% withholding tax (WHT) is imposed on profits distributed by Greek Societe Anonymes to individuals or legal entities, Greek or foreign, independent of whether the payment is made in cash or in kind (shares). Specifically for profits distributed within 2011, the WHT rate is 21%.
- Similar taxation is imposed on profits distributed by Greek Limited Liability Companies (and also some associations) to individuals or legal entities, Greek or foreign.
- WHT shall not be imposed on dividends paid to a legal entity established in another member state of the European Union (EU), subject to the conditions of L.2578/1998 (Parent-Subsidiary Directive).
- A participation exemption is introduced on dividends received by Greek Societe Anonymes and Limited Liability Companies from subsidiaries that have their registered seat in another EU member state, in which they participate, in the meaning of article 11 of L.2578/1998 (Parent – Subsidiary Directive), on the condition that these profits are booked in a untaxed reserve account.
- Capital gains derived by legal entities maintaining double entry accounting books from the sale of shares listed on the Athens Stock Exchange, which are acquired from 1 January 2012 onwards, will be taxed based on the general income tax provisions.
- Amendment to the rules on special restrictions on transactions with non-cooperative states and states with preferential tax treatment. Expenses concerning transactions realized between Greek companies and entities established in non-cooperative states or preferential tax regimes may be deductible for Greek companies, on the condition, however, that satisfactory evidence is provided that transactions are real and usual and do not have as a result the transfer of profits or income or capital with the purpose of tax evasion or tax avoidance.

## Taxes on corporate income

The CIT rate of legal entities is set at 24% for income of financial year 2011 and at 20% for income of financial years 2012 onwards. Financial year 2012 in Greece would normally cover any financial year ending after, but not including, 31 July 2011.

Resident corporations are taxed on their worldwide income. Non-resident corporations are taxed in Greece for any Greek-source income they derive. Such tax may take the form of a WHT, depending on the nature of the income, or of PE taxation, if the criteria for establishment of a PE in Greece are met.

### Local/state/provincial tax rates

No local taxes on income are paid at a local level. However, it should be noted that the aforementioned rates are reduced by 40% for profits of companies derived from activities carried out on islands with less than 3,100 inhabitants (Article (Art.) 118 par.2 Income Tax Code (ITC)).

### Special one-off contribution on profits

A one-off special lump sum contribution aimed to address the current fiscal deficits was imposed on the total net income of legal entities for financial year 2009. It is possible that such contribution will also apply for 2010 and 2011, depending on progress of the Greek economy, but no relevant legislation has been adopted as of April 2011.

The special one-off contribution is imposed on the total net income declared by legal entities, provided that it exceeds 100,000 euros (EUR) or the total net income of legal entities publishing financial statements under International Financial Reporting Standards (IFRS), whichever is higher.

The abovementioned lump sum is calculated based on a progressive scale of rates and, more specifically, at 4%, 6%, 8%, and 10% for income from EUR 1 up to EUR 300,000, from EUR 300,001 up to EUR 1,000,000, from EUR 1,000,001 up to EUR 5,000,000, and exceeding EUR 5,000,001, respectively. The amount of the lump sum is reduced so that the remaining total net income does not fall under EUR 100,000.

L.3943/2011 introduced a provision, in order to avoid the imposition of the special contribution on income of legal entities derived from participations, for which the special contribution has already been paid by the subsidiary company, not only based on the provision of L.3842/2010, but also based on the provisions of L.3808/2009 (special contribution that had been imposed on income of fiscal year 2008).

## Corporate residence

Corporate residence is determined primarily by place of incorporation. However, based on the effective management criterion under the corporate law rules, the place of legal seat could be relevant.

### Permanent establishment (PE)

Subject to related tax treaty provisions, foreign corporations are subject to Greek taxation if they maintain a PE in the country. Such PE may arise in cases of foreign companies maintaining inventories from which orders are filled; maintaining offices, warehouses, factories, etc.; carrying out any other operations for the purposes of exploiting natural resources; processing raw materials or agricultural products in their own factories or through third parties; or providing services of a technical or scientific nature (surveys, designs, or research) (Art. 100 ITC).

Note that the local definition of a PE is generally broader than the standard Organisation for Economic Co-operation and Development (OECD) definition; however, where a double tax treaty (DTT) applies, its provision will override the domestic definition.

## Other taxes

### Value-added tax (VAT)

As of 1 July 2010, the standard VAT rate is 23%. As of 1 January 2011, the reduced rate on basic necessities is 13%. A super reduced rate of 6.5% for accommodation in hotels or similar establishments (including holiday accommodation and letting of places in camping or caravan sites), medicines of CN3003 and 3004, and vaccines of CN3002 intended for human consumption is applicable. The aforementioned rate is also applicable for children's books, coloring, and drawing books.

Supplies of goods and services to individuals and legal entities subject to VAT and established in EU countries (intra-Community supplies) are exempt from VAT (zero-rated). Exports of goods and certain services to non-EU countries are also exempt (zero-rated).

With the following exceptions, real estate leases are generally exempt from VAT. As of 1 January 2007, shopping centres lease contracts may be subject to VAT, on condition that the taxable person opts for the submission to taxation of the leasing right. The newly introduced L.3943/2011 further extended the aforementioned option to logistics centres.

### Custom duties

Many goods imported into Greece from outside the European Union are subject to customs duties. The rates of duty are provided by the EU's Common Customs Tariff.

### Stamp taxes

Rentals of non-residential properties are subject to 3.6% stamp duty (with the exception of shopping centres and logistics centres subject to VAT).

In general, loans and interest may be subject to a 2.4% stamp duty. However, there are a number of exemptions, the main one covering bank loans and bond issues.

Other stamp duties may apply, in certain limited cases.

### Excise taxes

Excise taxes are imposed on energy and electricity products (e.g. petrol, natural gas, electricity), manufactured tobacco, and alcoholic products. The tax rates vary depending on the category of products.

### Real estate tax

An annual real estate tax is imposed effective from 2010 onwards on real estate located in Greece, which is owned on 1 January of the tax year by individuals or legal entities, regardless of nationality or residence.

The applicable tax rate for legal entities amounts to 0.6%, 0.3%, or 0.1% depending on their profit or non-profit making character and the use of the properties. The tax rate remains reduced at 0.33% for real estate owned by hotel enterprises and used for their business activities.

An exemption from real estate tax is provided for buildings built within three years from the issuance of the initial building permit, unless these have been leased or in any other way used, from the year 2011 onwards.

### *Special real estate tax*
The special real estate tax of 3% effective as of 1 January 2003, on legal entities owning real estate property in Greece on the objective value of such property, was increased to 15% as of 1 January 2010. This tax is mainly directed against property held, directly or indirectly, by offshore companies for the purpose of tax avoidance of transfer and inheritance taxes by the real owners. In this context, exemptions apply to listed companies, companies with registered shares up to the individual shareholder (provided such shareholder holds a tax registration number in Greece), companies for which the income derived from the real estate property does not exceed the income from other activities, EU banks, insurance companies, investment funds, etc, on the condition, however, that these are not established in non-cooperatives states *(see the Deductions section for more information on non-cooperative states)*.

### *Real estate transfer tax*
Each transfer of real estate, which is not subject to VAT, is subject to real estate transfer tax. The tax rates of the real estate transfer tax amount to 8% for the value up to EUR 20,000 and 10% for the exceeding value of the real estate.

Exemptions from real estate transfer tax for the acquisition of primary residences are determined according to the value of the property.

### *Contribution tax on capital accumulation*
A 1% tax contribution is imposed on capital accumulation by:

- business companies and joint ventures
- associations of all degrees and any other form of company, legal entity, or union of persons or society aiming to make profits, and
- branches of foreign companies (unless of EU origin).

For Societe Anonyme (SA) companies, an additional 0.1% duty is payable on capital to the competition committee.

## *Branch income*

For profits arising in financial year 2011, profits of branches of foreign companies are subject to CIT at a rate of 24%, and at 20% for income of financial years 2012 onwards. Financial year 2012 in Greece would normally cover any financial year ending after, but not including, 31 July 2011.

Note that the equivalent of a dividend WHT is also imposed on profit repatriations from the branch to its head office or other foreign branches of the legal entity.

## Income determination

### Inventory valuation

Inventories are stated at the lower of cost or market (replacement value). The Greek tax system recognises various valuation methods such as first in first out (FIFO), last in first out (LIFO), weighted average, etc.

### Capital gains

In general, capital gains are included in the taxable profits of Greek companies. Certain special rules apply in the case of sales of shares in listed or non-listed entities.

### Capital gains tax on sale of listed shares

The sale of listed shares that were acquired up to 31 December 2011, and irrespective of the time of sale of those shares, is subject to a transaction duty at a rate of 0.2%. The capital gains derived from the sale of such listed shares shall be exempt from income tax, on the condition that the capital gain is booked in a special tax-free reserve.

Capital gains derived by legal entities maintaining double entry accounting books from the sale of listed shares, which are acquired from 1st January 2012 onwards, will be taxed based on the general income tax provisions. Any loss, arising within the same year and for the same reason, shall be offset with capital gains. Moreover, if losses arise following the offset, reference is made to the provision on the carrying forward of losses. The law includes details in relation to the specification of profits. Similar provisions are introduced with regard to profits realized by individuals or legal entities keeping income-expenses accounting books. The transaction duty of 0.2% is abolished for such shares.

### Transfer tax on sale of non-listed shares

The sale of Greek shares non-listed on the Stock Exchange triggers a 5% tax calculated on the transfer value as either agreed by the parties or determined on the basis of a 'minimum-value' formula set forth by law, whichever is the higher. The aforementioned 5% tax is also due in the case of transfer of foreign non-listed shares by a Greek tax resident, calculated on the consideration agreed. In the case where the seller is a Greek corporation, the payment of the 5% tax does not exhaust the transferor's tax liability. Any capital gains arising thereof, are further subject to tax at the standard CIT rate (i.e. they are included in the taxable profits of the company). It should be noted that the 5% tax paid at the time of the transfer may, under certain conditions, be provided as a credit against the company's annual corporate liability.

Moreover, gains arising from the sale of parts of limited liability companies (LLC) are subject to a 20% tax rate. In cases where the seller is a Greek entity, the tax liability is not exhausted and the respective capital gain is taxed according to the general tax provisions with the 20% tax being credited against the final income tax liability.

### Dividend income

Profits distributed from Greek companies are not included in the taxable profits of their shareholders.

A participation exemption is applicable also on dividends received by Greek Societe Anonymes and Limited Liability Companies from subsidiaries that have their registered seat in another EU member state, in which they participate, in the meaning of article 11 of L.2578/1998 (Parent – Subsidiary Directive), on the condition that these profits are booked in a untaxed reserve account.

Other foreign dividends are included in taxable profits, but a foreign tax credit may be obtained under certain conditions.

### *Stock dividends*
Stock dividends are treated as cash dividends for income tax purposes.

### *Interest income*
Interest income is generally taxable. There are certain special rules that govern the receipt of interest income from bonds by banks and insurance companies.

### *Partnership income*
Both general partnerships (Omorrythmi Etairia or OE) and limited partnerships (Eterrorythmi Etairia or EE) are not tax transparent. They are generally taxed at a rate of 25%, but there are special rules on income determination or cases where partners are individuals.

### *Rents/royalties income*
Income derived from rents and royalties is taxed as ordinary income.

### *Foreign income*
Resident corporations are taxed on their worldwide income. Foreign income received by a domestic corporation is taxed together with other income. If related income tax is paid or withheld abroad, a tax credit is generally available up to the amount of the applicable Greek income tax. Losses incurred abroad can only be offset against foreign profits.

There are no special anti-deferral regimes or controlled foreign company (CFC) rules in Greece.

## *Deductions*

In general, expenses are deductible subject to certain conditions. The following is a list of certain key conditions or restrictions on expense deductibility:

- Accrued interest from loans or credits of a company is generally deductible, with the exception of interest on arrears due to the debt of taxes, duties, contributions, and fees to the state and other legal entities governed by public law; interest on loans for the purchase of shares in any type of company, to the extent that this participation is transferred within a two-year period; interest on loans used for the purchase of shares in a legal entity established in non-cooperating states or states with preferential tax regime; and interest paid to companies established in such states.
- The deductibility of hotel expenses, expenses for corporate gifts, education of personnel, special clothing of personnel, and mobile telephone expenses are subject to specific conditions set out in Art. 31 of the ITC.
- Payroll expenses are not deductible when they are not paid through professional bank accounts or cheques paid through the same accounts.
- The value of raw and ancillary materials and other goods (plus processing thereon), which is paid to a legal entity whose role consists exclusively of the invoicing of the transactions, while the delivery of goods or provision of services is conducted by a third party, is not deducted from the gross profits of companies.
- Car expenses are generally deductible up to 70% for motor vehicles up to 1,600 cc and 35% for motor vehicles exceeding 1,600 cc.

- Expenses concerning transactions realised between Greek companies and entities established in preferential tax regimes may be deductible for Greek companies, on the condition that satisfactory evidence is provided that the transactions are real, usual, and do not result in the transfer of profits, income, or capital for the purpose of tax evasion or tax avoidance.

### *Accrued expenses*
Accrued expenses are, in principle, non-deductible until they become final and settled, supported by respective invoices.

### *Bad debt*
Tax-deductible bad debt provisions are calculated at 0.5% on the stated value of invoices for sale of goods or provision of services, after a reduction for discounts, sales to the State or other entities governed by public law and the special consumption tax imposed in certain cases. Special restrictions and rules apply to certain transactions, while there is a recapture system for provisions which are not realised.

### *Charitable contributions*
Donations and sponsorships paid to charitable institutions, non-profit making foundations, churches and monasteries, and various other welfare institutions may be deductible up to 10% of the total net profits or income arising from the balance sheet of the legal entity.

### *Depreciation of fixed assets*
Depreciation of tangible assets is compulsory for financial years ending after 30 December 1997 (not compulsory for financial years ended within the period from 1 January 1992 through 30 December 1997). Fixed assets with acquisition value of up to EUR 1,200 each may be written off to profit and loss in the year acquired or when used in operations. Depreciation is computed on the basis of the straight-line method or, in some cases, the declining-balance method on the acquisition value, increased by any additions and improvements. The straight-line method or the declining-balance method must be used consistently. However, new companies, for the three consecutive financial years that follow the financial year in which their productive operation commenced, are permitted to depreciate all their fixed assets either at 0% or at a rate equal to 50% of the applicable rate, provided that the selected rate will not change from year to year. If the declining-balance method is used, the straight-line method rates increase three times.

For each category of assets, maximum and minimum annual depreciation rates are determined by a presidential decree. Companies may select any rate within this range, provided that this is consistently applied.

### *Goodwill*
There are some court cases which support the deductibility of goodwill as a start-up expense, but the specifics of each case must be carefully considered.

### *Taxes*
Taxes, other than income tax and real estate tax, are recognised as deductible expenses if supported by related tax returns and payment receipts and borne by the company.

### *Fines and penalties*
Fees received from activities constituting a criminal offence, from penal clauses, fines, and penalties are not recognised as deductible expenses.

### Special restrictions on transactions with non-cooperative states and states with preferential tax treatment
Greek tax law has established rules in relation to non-cooperating states and states with preferential tax treatment in Art. 51A and B of the ITC.

Non-cooperating states are defined as states that on 1 January 2010 are not EU member states and which, up to the aforementioned date, have not concluded agreements of administrative assistance in the tax sector with Greece or with, at least, 12 other states. Non-cooperative states will be enumerated in an annual Ministerial Decision to be issued annually.

An individual or legal entity, irrespective of its legal form, is considered located in a preferential tax regime, even if its residence of registered office is located in an EU member state, in cases where it is not subject to taxation in this state or is de facto not subject to taxation, or is subject to tax on income or capital at an amount which is lower than 60% of the tax that would have been due, in accordance with Greek tax legislation, if such entity were resident or were maintaining a PE in Greece.

Expenses concerning transactions realized between Greek companies and entities established in non-cooperative states or preferential tax regimes may be deductible for Greek companies, on the condition, however, that satisfactory evidence is provided that transactions are real and usual and do not have as a result the transfer of profits or income or capital with the purpose of tax evasion or tax avoidance.

### Net operating and capital losses
Losses can be carried forward five years. Carrybacks are not permitted.

### Organisational and start-up expenses
The amount of start-up expenses (including costs for acquisition of real estate) is amortised, either as a lump sum during the year of its realization or in equivalent instalments within a five year period. Specifically, expenses realised by financial leasing companies in relation to the acquisition of real estate, which will constitute the object of an agreement of the same law, may be depreciated in equivalent amounts, in analogy to the years of duration of the agreement.

### Payments to foreign affiliates
Royalties, interest, and service fees paid to foreign affiliates are deductible expenses under certain requirements and conditions.

### Pension expenses
Group life insurance premiums, which include pension plans, may be deducted at up to EUR 1,500 per employee.

### Payment for directors
Fees of board members are taxed at source at a rate of 35%. Such amounts are tax-deductible.

Bonuses (benefits in cash, on top of regular remunerations and overtime payments) paid to executives of credit institutions up to financial year 2013 are subject to special increased taxation. Taxation is based on the general progressive tax scale applicable to individuals provided the total annual income of the executive does not exceed EUR 60,000 and the amount of the bonus does not exceed 10% of the total annual regular remuneration. For amounts exceeding the outlined limitations, taxation at source based on a progressive tax scale is provided as follows:

- Up to EUR 20,000: 50%.
- EUR 20,001 to EUR 40,000: 60%.
- EUR 40,001 to EUR 60,000: 70%.
- EUR 60,001 to EUR 80,000: 80%.
- EUR 80,001 and above: 90%.

## *Group taxation*

Group taxation is not permitted in Greece.

### *Transfer pricing*

Article 26 of L.3728/2008 on 'Monitoring the Markets and other provisions' of the Ministry of Development introduced, for the first time in Greece, rules on the documentation of prices of inter-group transactions with the intention of "detecting possible overpricing of inter-group transactions, expanding artificially the cost of sold products and services, having as a consequence the reduction of the gross profit of enterprises in Greece, picturing the increase of sale prices to the final consumers as necessary and justified".

In accordance with the relevant transfer pricing rules, companies operating in any form in Greece are obliged to apply to their transactions with companies that are connected to them, terms in accordance with the arm's-length principle (ALP).

For this purpose, companies must document the prices for all their inter-group transactions with a complete and standardised study of documentation of prices. The study consists of the 'basic documentation file', concerning groups in which the parent company is Greek and the 'Greek documentation file', with regard to Greek subsidiaries of foreign groups and foreign companies operating in any form in Greece.

These files must be made available when requested by the competent authorities of the Ministry of Development within 30 days from the notification of the relevant request. Moreover, companies that have inter-company transactions must submit annually, within four months and 15 days from the end of the accounting period, to the Ministry of Development a catalogue in which the data of their inter-group transactions, and specifically the number and their value, are documented. In case of non-compliance with these obligations, an independent fine is imposed, equal to 10% of the value of the transactions for which the relative documentation was not submitted or the foreseen catalogue was not submitted timely.

If an infringement of the ALP is established, the competent tax authorities are immediately informed in order for the provisions of tax legislation and the imposition of the relevant tax penalties to apply.

In parallel to the aforementioned regimes, transfer pricing is also regulated by the ITC.

The aforementioned provisions of Art. 39 and 39A ITC were amended by Article 11, par.13 of L.3842/2010. Specifically, the provisions expanded the frame of application of the provision to leases of movable or immovable property, while the condition of (direct or indirect) tax avoidance taxes for the application of the provision was abolished. Moreover, the new provisions provide for a 20% fine on the surplus net profits arising on behalf of enterprises in case of infringement of the ALP, as well as a fine equal to 20% on the value of the transaction in case of non-compliance, faulty compliance, or overdue filing of the required documentation. With reference to the obligation of documentation, the deadline within which enterprises are obliged to present the file is 30 days and the minimum amount of transactions for which documentation is required is EUR 100,000 annually.

### *Thin capitalisation*
Article 3 of L.3775/2009 established, for the first time, rules on thin capitalisation of enterprises in Greece.

According to the relevant thin capitalisation rules, accrued interest on loans paid to affiliated companies are deductible on the condition that the debt to equity ratio is 3:1.

The aforementioned provisions of Article 3 of L.3775/2009 were amended by Article 11, par.7, of L.3842/2010. Specifically, the new provisions extended the exceptions from the application of the thin capitalisation rules to banks, factoring companies, as well as special vehicle companies of L.3156/2003, and L.3601/2007 (an exception was already in force for leasing companies). It was, moreover, provided that loans assumed by third companies and for which any kind of guarantee has been issued by the aforementioned connected companies are added to the total amount of loans undertaken by the connected companies. Finally, the relevant provisions abolished the clause of non-application of thin capitalisation rules for loans that had been concluded until the publication of L.3775/2009 (namely until 21 July 2009) (grandfathering clause), thus as of 2010 the debt equity ratio covers also older loans.

Pursuant to the provisions of the newly introduced L.3943/2011, the exemption from thin capitalization provisions is extended to Investment Service Companies of L.3606/2007.

### *Controlled foreign company (CFC) regime*
There are no CFC rules in Greece.

## *Tax credits and incentives*

### *Foreign tax credit*
Tax paid abroad for income taxable in Greece is credited but is limited to the amount of Greek tax due.

### *Incentives for the maintenance of workplaces*
Legal entities, which suffer a reduction of turnover for two consecutive accounting periods without reducing their workforce, can enjoy a reduction of the tax rate by three percentage units. However, a revocation of the granted benefit and imposition of further tax in case of reduction of personnel or increase of the turnover within the three-year period is provided.

### *Other tax incentives*
Apart from the aforementioned tax incentives, L. 3908/2011 on 'Bolstering of Private Investments for Economic Growth, Entrepreneurship and Regional Sustainability' (the new Investment Incentive Law) includes the following tax incentives:

- Any investment plan in any sector of the economy may receive benefits under the law. Only certain cases explicitly specified in the law are exempt (e.g. power generation from photovoltaic arrays).
- The types of subsidized expenditures for tangible and intangible assets are indicatively mentioned, whereas the expenses that may not be subsidized are

exhaustively enumerated. Especially the subsidy percentage for the expenditure of intangible assets may not exceed 50% of the total eligible expenditure of the investment plan.

- The term of 'new' enterprises is specifically defined for the new law's purposes. An enterprise is considered as 'new', if the establishment procedures have not been completed before the enterprise applies for aid according to the new law or if it has been established within the past 24 months prior to filing the application.
- There are three types of aid: (a) tax exemption, (b) subsidy, and (c) leasing subsidy.
- The new law lists three categories of General Investment Plans and specifies the type of aid for each of them: (a) General Entrepreneurship which only the tax exemption may be granted for, whereas for the (b) Technological Development and the (c) Regional Sustainability investment plan, the subsidy and/or the leasing subsidy may be granted in principle, with different percentages for the existing and the new enterprises. The remaining percentage may be covered by tax exemption.
- The law also lists four categories of Special Investment Plans: (a) Youth Entrepreneurship, (b) Major Investment Plans, (c) Integrated Long-Term Investment Plans, and (d) Synergy and Networking. The aids granted are further specified by type, volume, and/or percentage for each of them.
- The percentages of aid available are specified in conjunction with the division of the country into three zones (A, B, and C) and are the following:

| Zones | Large enterprises | Medium-sized enterprises | Small & micro enterprises |
|---|---|---|---|
| ZONE A' (Prefecture of Attica, Prefecture of Viotia) | 15% | 20% | 25% |
| ZONE B' (Prefectures with GDP per capita > 75% of the average GDP of the country) | 30% | 35% | 40% |
| ZONE C' (Prefectures with GDP per capita < 75% of the average GDP of the country) | 40% | 45% | 50% |

In any case, the above percentages should comply with the ceiling set by the Regional State Aid Map (RSAM) approved by the European Commission.

- An additional 5% aid percentage, up to the ceiling set by the RSAM, is granted for investment plans in Industrial Entrepreneurship Zones and Innovation Zones. Benefits are also granted up to the ceiling set by the RSAM, by enterprise size and up to 50% of the eligible expenditure, for investment plans on islands and regional units of islands that belong administratively to the regions of the mainland.
- The new law sets a ceiling for each aid (EUR 10 million to 15 million in principle, but graduated according to various criteria).
- The period for filing the application (April and October, with the exception of large investment projects) and the conditions for approval are further specified.
- The law specifies the conditions and evaluation criteria for each investment project and determines, in general, the procedure for evaluation, approval, and monitoring of implementation of investment projects (further specification by ministerial decisions).
- The mode of payment of each type of aid is further determined. Especially for the aid of tax exemption, the law stipulates that the amount of tax exemption aid is annually formed with the following restrictions:
  - The enterprise is entitled to the use benefit of the incentive from the fiscal year in which the decision on the completion and beginning of the productive

  - operation of the investment has been published. In this fiscal year, the ceiling of tax exemption to be used is set at 1/3 of the approved amount of the tax exemption aid.
  - In the following fiscal year, the ceiling of tax exemption to be used, including the aid for the first fiscal year, is set at 2/3 of the approved amount of the tax exemption aid.
  - The remaining amount of the approved tax exemption aid may be covered within ten fiscal years for new enterprises and within eight fiscal years for existing enterprises following the fiscal year in which the decision on the completion and beginning of the productive operation of the investment has been published.
- The amount of the tax exemption aid shall be shown as a tax-free reserve in a special account in the enterprise's accounting books and shall consist of the income tax on the net profits reported in the initial timely income tax return which shall not be paid based on the tax exemption granted.
- Where the equipment is acquired through leasing, the tax exemption to which the enterprise is entitled in each fiscal year is calculated on the part of the purchase price of the equipment which is included in the rents already paid by the end of this fiscal year.
- The law stipulates that the amounts of subsidies and leasing subsidies as well as of tax exemption shall be shown as tax-free reserves in special accounts. Said reserves may not be distributed or capitalized and shall be returned in case of dissolution of the enterprise. In case of distribution or capitalization, certain penalties shall be imposed.
- The law stipulates that any aid to be paid is exempt from any tax, stamp duty, right, and any other charge in favor of the State or any third party.
- Finally, the new law specifies the obligations of the beneficiary enterprises and penalties in case of non-compliance.

The above rules are very detailed, and analytical and careful advices needs to be sought before making any decision in respect thereof.

## *Withholding taxes*

Profits distributed by Greek Societe Anonymes or Limited Liability Companies (and also some associations) in the form of dividends, Board and Directors fees, profits distributed to personnel, as well as interim dividend payments made to individuals or legal entities, Greek or foreign, and independent of whether the payments are made in cash or in kind (shares), are subject to 25% WHT.

Specifically for profits distributed within 2011, the WHT rate is 21%.

Tax is withheld by Greek Societe Anonymes, Limited Liability Companies, and associations with exhaustion of tax liability of the beneficiaries. An exception is provided with regard to individuals that are taxed on their total income at a tax rate lower than the WHT rate, in which case income derived from dividends or the aforementioned participations shall be taxed based on the general provisions with a credit on the tax withheld.

WHT shall not be imposed on dividends paid to a legal entity established in another member state of the European Union, subject to the conditions of L.2578/1998 (Parent-Subsidiary Directive).

25% WHT shall also be applicable on the distribution of profits remitted or credited by a PE of a foreign legal entity in Greece to its registered seat or to another permanent establishment located abroad.

The dividend WHT is equally applicable for distributed or capitalized profits of previous fiscal years.

The following table provides a summary of the WHT applicable under the respective DTT entered into by Greece:

| Recipient | Dividends (%) | Interest (%) | Royalties (%) |
|---|---|---|---|
| Resident individuals and companies | 21/25 (1) | 10/20 (2) | 0 |
| | | | |

Notes

1. The 21%/25% WHT applies to distribution of dividends by Greek Societes Anonymes and Greek EPEs (i.e. Limited Liability Company). The rate is 21% for distributions within 2011 and 25% from 2012 onwards.
2. Interest earned on deposits with banks operating in Greece, as well as on any kind of bonds, is subject to WHT at the rate of 10% withheld at source. WHT on interest payable to non-Greek residents is 40%.
3. Payments of royalties and service fees to foreign residents are subject to a WHT at the rate of 25%.
4. The new DTT concluded between Greece and Austria will apply to income earned as of 1 January 2011. For payments realised up to 31 December 2010 the former DTT applies, which provides for a WHT of 8% for interest payments and 7% for royalty payments.
5. The rate of 5% will apply if the beneficial owner is a company which holds directly at least 25% of the voting power of the company paying the dividends.
6. The rate of 5% applies in case the beneficiary is a company (excluding a partnership) and directly holds at least 25% of the capital of the paying company.
7. The rate of 5% is applicable only for the right to use cinematograph films.
8. Rate of 5% applies to loans not incorporated into negotiable instruments and granted by banks.
9. A rate of 5% is applicable to shareholders of 25% and above.
10. The rate is 5% applies if the royalties consist of payments of any kind received as a consideration for the use of or the right to use any copyright of literary, artistic, or scientific work, including cinematograph films.
11. Exemption ('0' rate) applies to payments of any kind received as a consideration for the use of, or the right to use, any copyright of literary, artistic, or scientific work including cinematograph films and films or tapes for television or radio broadcasting.
12. Interest (on bonds, securities, notes, debentures, or on any other form of indebtedness) received from sources within Greece by a resident or corporation of the United States (US) not engaged in trade or business in Greece through a PE therein, shall be exempt from Greek tax but only to the extent that such interest does not exceed 9% per annum; but such exemption shall not apply to such interest paid by a Greek corporation to a US corporation controlling, directly or indirectly, more than 50% of the entire voting power in the paying corporation.
13. The DTT applies to income earned as of 1 January 2011.

14. The 5% rate is applicable if the royalties consist of payments of any kind received as a consideration for the use of industrial, commercial, or scientific equipment, and the 10% rate is applicable for all the other cases.
15. The 8% rate is applicable when the beneficiary of the interests is a bank or a financial institution, 10% rate is applicable for all the other cases.
16. Exemption ('0' rate) applies to copyright royalties and other like payments in respect of the production or reproduction of any cultural or artistic work (but not including royalties in respect of motion picture films nor royalties in respect of works on films or videotapes or other means of reproduction for use in connection with television broadcasting).

In general, it should be noted that certain DTTs may include specific clauses on specific cases that are not all captured in the table; therefore, a careful review of each DTT is highly advisable.

## *Tax administration*

### *Returns*

Income tax returns of Greek SAs, EPEs, and branches of foreign companies are filed on a special form within four months and ten days from the end of their financial year, which can be on either 30 June or 31 December. By a decision of the Minister of Finance, the filing date for SAs may be extended a few days, depending on the last digit (figure) of their tax registration number (known in Greece as the arithmos phorologikou metroou or AFM). Branches and subsidiaries (at least 50% participation) of foreign companies may follow the financial year of the parent company. A Greek company that is at least 50% held by another Greek company that is in turn a subsidiary of a foreign company that has participation with the same or higher percentage may also follow the financial year of the foreign parent company. The income tax return constitutes the basis for assessment.

Tax returns are required to be submitted electronically from 2011 onwards.

### *Payment of tax*

Income tax and tax prepayment (80% [100% for banks operating in Greece] of the current year's income tax less tax withheld at source) based on the tax return are paid in eight equal monthly instalments, the first of which should be paid upon filing. For newly established companies, the pre-payment is reduced to 50% for the first three years of their operating. A deduction of 1.5% in case of a lump sum payment of income tax liability applies to tax returns filed from 2010 onwards.

### *Audit cycle*

#### Tax audit procedures

The tax audit commences with the issuance of an audit order for tax open years, usually not more than five. The order concerns the audit of all tax issues (income tax, VAT, WHT, capital gain tax, etc.). The duration of the audit may vary from a few weeks to a few months, in certain cases.

A regular or temporary audit may also be conducted from the office of the audit authority. Such audit from the office is based on the data of the file, the sheets of information, the audit reports of the Financial Crime Prosecution Unit and other authorities of the Ministry of Finance, the books and records that the taxpayer may be required to submit, the data and information of the entities stipulated in article 17 of L. 3842/2010, and the data accruing from the electronic data processing at the General Secretariat for Information-Security Systems. The possibility of issuing from the office an act of partial tax determination for one, or more, fiscal years, without auditing all the books and records and without requiring the audit of other taxes, also applies, in case where it is derived from other data at the disposal of the audit authority (i.e. information sheets, reports of the Financial Crime Prosecution Unit, electronically processed data of the General Secretariat for Information-Security Systems) that the liable entity omitted to declare, or inaccurately declared taxable income, or even miscalculated the percentages, or deductions.

However, the ability of conducting an audit at the registered seat of the legal entity, specifically with regard to cases that are explicitly stipulated in the law, is in parallel applicable.

Following the audit and the notification of tax audit findings, the company may in turn:

- Negotiate with the tax authorities with a view to reducing the tax burden and achieve an 'out of court settlement'. The out-of court settlement offers the possibility to reduce additional taxes (not the principal amount of tax) at the rates provided now under the provisions of L.2238/94 (reduction of the additional tax to 3/5). The conclusion of such a settlement presupposes that the company accepts the findings of the audit (e.g. of expenses) for the audited years and is likely to face the same issues in the following years as well.
- Take the case to court (filing of a recourse), which necessitates an advance payment (50% of the taxes and penalties assessed). The first decision normally takes two to three years and another six to eight years until a decision by the Court of Appeal and Supreme Court is issued.
- There is also a possibility to take the case to a Fiscal Arbitration Body, competent to arbitrate over dispute resolution arising from tax assessments exceeding EUR 150,000, by filing an application and subject to the consent by the Minister of Finance. The commencement of operation of the Fiscal Arbitration Body is to be determined by a Presidential Decree to be issued following the suggestion of the Ministers of Finance and Justice – to date (April 2011) such Presidential Decree has not been issued.

Criminal sanctions are also imposed on the company's representative under certain conditions, which are waived in the case of settlement on the amount of taxes assessed.

**Tax auditors' practice**

The complexity of the Greek tax legislation and the vagueness of its requirements enable the tax auditors to dispute either the company's results reflected in its accounting records or to disallow expenses. This is true in all tax audits and in spite of companies' endeavours to comply with the tax requirements, tax audits always result in assessment of additional taxes and penalties.

The amount of additional taxes depends mainly on the following:

- Company's vulnerability because of nature of business and transactions.
- Taxes already paid on the basis of the company's income tax returns.
- Profits declared by competitors.
- Weaknesses and shortcomings which the tax auditors might reveal, if a full audit is carried out.

The amount of additional taxes is capped and cannot exceed:

- 60% for the submission of a delayed tax return and
- 120% for the submission of an inaccurate submission or non-submission of a tax return.

In respect of deductible expenses, the legislation prescribes, among other requirements, that such expenses must be of a 'business' nature, without defining what a business expense is. Consequently, the tax auditors dispute the deductibility of various items arguing that, in their opinion, they are not contributing to the company's business.

In a worst-case scenario, if serious violations are detected that make the audit verifications impossible, then the validity of the accounting books may be contested, resulting in the deemed (out-of-books) profit calculation and the imposition of heavy penalties and additional taxes.

Specifically, the validity of the books may be contested on the basis of the kind and gravity of infringements, which are divided in two categories:

- Infringements determining the books as 'inadequate'.
- Infringements determining the books as 'inaccurate'.

In the extreme cases, where the accounting books are treated as 'inadequate' or 'inaccurate', the taxable income and the tax due by the company will not be calculated according to book figures; but instead, the out of books determination method is applied, according to which the company's gross income of each financial year will be multiplied by the net profit rates defined by the Greek Ministry of Finance. These rates have been defined on the basis of the business activities of each company. In cases where the books are deemed to be 'inaccurate', these rates would be surcharged by 40% to 80%, depending on the kind of infringement from which the inaccuracy of the books has resulted.

The practice could change as the tax audit force is undergoing a serious reshuffling. In this direction, it is expected that Greek companies will be required to obtain a 'tax certificate' from their certified auditors, confirming compliance with Greek tax legislation.

### *Statute of limitations*

The right of the Greek State to seek to collect unpaid taxes is normally five years starting from the end of the year in which the relevant tax return should be filed. For example for taxes due in 2009, the clearance VAT return should be filed in 2010 and the statute of limitation expires on 31 December 2015. However, in the case where a return is not filed, then the statute of limitation is extended to ten years. Furthermore, it should be noted that the statutes of limitation may be extended by law. This has happened many times in the past. Thus, the statutes of limitation for tax audit cases regarding accounting years 2000, 2001, 2002, and 2003 and fictitious or forged invoices' cases were extended until 31 December 2010.

## *Other issues*

### *Choice of business entity*

The main differences between a subsidiary (i.e. SA, EPE, or LLC) and a branch of a company from the law/establishment perspective are as follows:

- A subsidiary is a separate legal entity from its parent company, whereas a branch does not form a separate legal entity, does not have its own shareholders, and consequently the funds needed for its operation are transferred from the overseas parent company.

- The parent company of a branch must be either the equivalent of a Greek SA or a LLC, whereas there is no such restriction for subsidiaries.
- The day-to-day management of a branch is exercised by the legal representative, a person appointed by the parent company, whereas an SA is represented by its board of directors (BoD) and a LLC is administered and directed by the administrator(s).
- No minimum capital is required for the establishment of a branch, nevertheless the share capital of the parent company should be at least EUR 60,000 if it is an SA and EUR 4,500 if it is a LLC.
- An SA appears to be a more prestigious type of company than a branch and a LLC. This has a mainly psychological effect. Certain investors still tend to opt for the establishment of an SA company, particularly if they would like to participate in public tenders, etc.

The main legal differences between a SA and a LLC in Greece from a company law/ establishment perspective are as follows:

- An SA is managed by a BoD consisting of at least three members, whereas a LLC can be managed by only one individual, the administrator (legal entities are permitted to be appointed as BoD members or administrators). Both BoD members and administrators have to acquire a Greek tax registration number and a Greek residence permit before the establishment of the companies. Obtaining a residence permit for non-EU citizens is a time consuming procedure.
- The shareholders of an SA are not required to be registered with the Greek tax authorities, whereas the partners of an LLC have to be registered with the Greek tax authorities and this may prove to be a time consuming procedure.
- An SA is established by virtue of registration or approval (in case the company's share capital is higher than EUR 3 million as well as in special cases) of the notarial deed which embodies the company's Articles of Association (AoA). The announcement of the Ministry of Development, containing a summary of the AoA, must be published in the 'Bulletin of Societes Anonymes and Limited Liability Companies' of the Government Gazette. Generally, the registration of a SA requires approximately one to two working days after submission of relevant documentation. However, the time period may be extended to ten working days, in the case that a special approval by the Ministry of Development is required. Whereas a LLC is established by a notarial deed, which incorporates the company's AoA, filed with the relevant authority (Registry with the Court of First Instance). A summary of the AoA must be published in the 'Bulletin of Societes Anonymes and Limited Liability Companies' of the Government Gazette. Such registration usually takes three to five working days after the signature of the notarial deed.
- An SA company is supervised by the Greek Ministry of Development (Prefecture), which necessitates certain filings to be performed (e.g. minutes of BoD, general announcements, financial statements). Whereas, at least at this stage, no supervising authority exists for an LLC and thus its filing requirements are less restrictive.

## Significant developments

As of 2010, all optional income tax regime taxpayers and drawback industry taxpayers are required by law to file audited financial statements along with their annual income tax returns.

## Taxes on corporate income

The tax system of Guatemala is a unitary system, whereby income of all kinds, other than capital gains, is lumped together and subject to a single tax. The components of gross income subject to tax are usually business income, interest, dividends, rent, salaries, and services. Companies are subject to income tax only on their Guatemala-source income. Dividends and other income payable abroad are taxed separately by way of withholding taxes (WHT).

There are two income tax regimes in Guatemala: general and optional.

### General income tax regime

A rate of 5% is applicable to a company's gross income from Guatemalan sources (less exempt income).

A rate of 5% is applicable on gross revenue of juridical entities and individuals performing mercantile and non-mercantile activities, resident in Guatemala.

The tax is payable under flat tax withholdings (the tax is to be retained by either the customer or the recipient of services) or by direct remittances to the tax office made monthly within the first ten working days of the month following the invoice date.

### Optional income tax regime

A rate of 31% is applicable to a company's taxable income from Guatemalan sources.

A rate of 31% is applicable on net income of juridical entities and individuals resident in Guatemala.

Under this system, the tax is determined and paid at the end of each quarter, without prejudicing the end-of-period final tax liquidation.

# Guatemala

## *Corporate residence*

The place of incorporation determines corporate residence. Entities incorporated under Guatemalan laws are required to have their fiscal and corporate residence in Guatemalan territory.

There are no specific provisions that determine corporate residence or permanent establishment (PE).

## *Other taxes*

### *Value-added tax (VAT)*

A 12% VAT is levied on the sale or transfer of merchandise and on non-personal services rendered or effected in Guatemala. The tax is payable to the government by way of the invoice method, whereby the tax charged to the customers is offset by the VAT paid over purchases, and the government collects the net resulting amount. The issuance and circulation of credit titles is VAT-exempt.

#### Sale of goods

The taxable amount on the sale of goods includes the sales price, less any discounts provided under sound commercial practices, plus other charges shown on the invoice.

#### Services

The taxable amount of services includes the price of the service, less any discounts provided under sound commercial practices, plus financial charges and products used to render the services.

#### Imports and leases

The tax base for imports is the value declared for import duties computation purposes.

The tax base for leases of movable or immovable property is the value of the lease.

#### Exempted sales and services

The following items are exempt from VAT:

- Importations made by:
  - cooperatives legally constituted as registered on imported machinery, equipment, and other goods relating to the activity or service of the cooperative
  - individuals and juridical entities under temporary importation regulations, and
  - diplomatic and consular missions accredited before the Guatemalan government.
- Banking institution services and their agents.
- The issuance, circulation, and transfer of credit bonds, value bonds, and stocks of any kind.
- Interest accrued by credit bonds and other obligations issued by mercantile partnerships, negotiated through an authorised stock exchange.
- Exports of goods and services.
- Contributions and donations to educational, cultural, assistance, or security service partnerships, constituted as not-for-profit entities.

#### VAT tax return

The amount payable to the Superintendencia de Administración Tributaria (SAT), Guatemala’s tax authority, is the difference between the debits and credits accrued during the tax period (one month) and is paid monthly by filing a tax return in the following calendar month at the end of each tax period.

**Refunds of VAT**
Any tax credits at the end of the tax period may be carried forward the next month to offset any tax debits that month. No cash refunds are allowed other than to exporters.

### *Stamp taxes*
Other than sales invoices, contracts, and documents subject to VAT, and other minor exemptions, a stamp tax must be paid on all documents covering commercial and legal transactions (e.g. collection of dividends), either by preparing the document on papel sellado, which is special stamped paper, or by affixing stamps on the documents. This tax is also assessed on documents issued abroad, other than drafts or promissory notes and commercial invoices from foreign suppliers. Letters of credit and acceptances involving international transfers of funds are generally exempt from stamp taxes.

The normal tax rate is 3% and is calculated on the face value of the documents or on the gross value of the related transaction.

### *Real estate tax*
Real estate taxes are assessed annually at 2 Guatemalan quetzales (GTQ) per thousand on declared property values of from GTQ 2,000 to GTQ 20,000, at GTQ 6 per thousand on values from GTQ 20,000 to GTQ 70,000, and at GTQ 9 per thousand on values in excess of GTQ 70,000 (e.g. property valued at GTQ 1,000,000 will pay real estate taxes of GTQ 9,000).

### *Solidarity tax (Impuesto de Solidaridad or ISO)*
The ISO tax rate of 1% is assessed on the net assets of a corporation, or on the gross income of a corporation, whichever is higher, and there is no limit on the amount to be paid. Tax paid may be credited against the corporation's income tax. If the annual business tax exceeds the income tax, no reimbursement is possible.

The tax is to be paid quarterly on the basis of the corporation's opening balance sheet for each fiscal period.

### *Social security contribution*
Corporations contribute 12.67% of their monthly payroll and employees contribute 4.83% of their monthly salary to social security.

## *Branch income*

In Guatemala, branches are taxed as any other legal entity. There are no specific taxes for branches.

## *Income determination*

### *Inventory valuation*
There are no provisions regarding inventory valuation in Guatemala.

### Capital gains
Capital gains are taxed at 10% in the general income tax regime and at 31% in the optional income tax regime. Capital losses can be netted only against capital gains.

### Dividend income
Dividends from domestic subsidiaries and other domestic corporations are not subject to income tax withholdings if Guatemalan income tax has been paid.

### Interest income
Interest income earned by resident persons other than banks is subject to a flat WHT rate of 10%. The interest taxed must be included by taxpayers in their income tax returns as non-taxable income.

### Foreign income
Foreign-source income received by a domestic corporation is generally exempt from Guatemalan income tax.

## Deductions

Deductions apply only under the optional income tax regime.

### Depreciation
Depreciation is generally computed on a straight-line basis. Upon request by the taxpayer, the tax authorities may authorise other depreciation methods. The maximum annual rates allowed as deductible expenses are the following:

| Asset | Rate (%) |
|---|---|
| Building and improvements | 5 |
| Machinery and equipment | 20 |
| Furniture and fixtures | 20 |
| Vehicles | 20 |
| Tools | 25 |
| Tree and vegetable species | 15 |
| Computer equipment and software | 33.33 |
| Any other depreciable asset | 10 |

Tax depreciation must conform to book depreciation.

### Interest expense
The deduction of interest expense is limited to the maximum interest rate used by the National Bank annually (to date approximately 12-13%) in excess of the authorised rate for commercial banks.

### Employee pension/retirement funds
The deduction of provisions to establish or increase employee pension and retirement funds or reserves is allowed, provided the government approves the related plans.

### Severance compensation payments
Severance compensation payments are allowed as deductible expenses as well as limited allocations (not to exceed 8.33% of total annual salaries and wages) to a reserve for severance compensation. Provisions pertaining to actual liability for severance

compensation per year are also allowed, provided the related plans, based on collective bargaining agreements, are approved by the employer and employees.

### *Charitable contributions*

Duly proven donations made to the government, the municipalities, and their agencies, as well as to duly authorised not-for-profit welfare, social service, and scientific associations and foundations, universities, political parties, and guild entities are deductible. The maximum deductible amount for income tax purposes of each period shall not exceed 5% of the donor's net income up to a maximum of GTQ 500,000 per year.

### *Taxes*

All taxes other than income tax and VAT are deductible.

### *Net operating losses*

Operating losses may not be carried forward for deduction from otherwise taxable profits. Guatemalan laws also do not permit carryback of losses.

### *Payments to foreign affiliates*

Deduction for royalties will be allowed, up to 5% of gross income. Charges for technical service fees are deductible, up to 1% of gross income or 15% of total salaries paid to Guatemalans, whichever is larger.

Expenses incurred abroad by non-residents in connection with income earned from Guatemalan sources cannot be deducted for income tax purposes by merely having the supporting receipts, as the regulations to the law do not permit such a deduction for these purposes, unless these expenses are related with the Guatemalan company operations and these expenses are needed for generating taxable income.

## *Group taxation*

No consolidation for tax purposes is permitted as each group entity is treated as an independent taxpayer, which shall file its own tax return.

### *Transfer pricing*

There is no specific transfer pricing legislation; however, the tax authorities have the power to hire professionals in law, economics, finance, or other scientific or technical specialties where it is necessary for the best performance of their auditing and collection functions.

### *Thin capitalisation*

There is no specific legislation regarding thin capitalisation in Guatemala.

## *Tax credits and incentives*

### *Drawback industries (Maquila)*

The Law of Promotion and Development of Exports Activities and Drawback Industries is known in Guatemala as maquila. This law seeks to promote, encourage, and develop the manufacture of products within areas controlled by the Customs Authority for export to countries outside the Central American region, as well as to regulate exporting and drawback activities.

The exporter may apply for authorisation to operate under any of the following three systems provided by the law:

- Export under a temporary admission system.
- Export under the reimbursement of duties system.
- Export under the total added national component system.

Tax incentives and benefits of the law include the following:

- Exemption of taxes, import duties, and other charges on imports of machinery and equipment, including VAT.
- Discontinuance of VAT payments on temporary raw material imports.
- Exemption of income tax for ten years on profits obtained under this law.

### *Free Trade Zones Law*

The Free Trade Zones Law seeks to encourage and regulate the establishment of free trade zones that promote domestic development by activities carried out within certain zones, particularly those that tend to strengthen export activities, generate employment, and transfer technology.

Tax incentives and benefits of the law include the following:

- Import duties exemption.
- Income tax exemption as follows:
  - Ten-year period for the administrative agency.
  - Ten-year period for industrial & service permit holders.
  - Five-year period for commercial permit holders.
- Exemption of real estate taxes for a five-year period.
- Exemption of tax stamps on the conveyance of title over properties.
- Dividends or profits distributed by the administrative agency and permit holders shall also be considered tax-exempted income.
- Exemption of custom duties and any other charges on import and consumption of fuel oil, bunker, butane, and propane gas used exclusively in the free trade zone.
- Foreigners working in the free trade zone are subject to the provisions of the immigration law and the Labour Code.

## *Withholding taxes*

The following WHT rates apply on payments to non-resident corporations or individuals:

| Payment | WHT (%) |
|---|---|
| Dividends, profit participations, earnings, and other benefits (1) | 10 |
| Commissions, salaries | 10 |
| Interest (2) | 10 |
| Professional fees, royalties, technical service fees | 31 |

Notes

1. For taxpayers that already paid corporate income tax, there is no WHT regarding dividends.
2. Interests will not be taxed (i.e. no withholding applies) when:
   - These interests are paid to a legal bank or financial institution.
   - The interests are in connection with a loan registered in the Guatemalan banking system.
   - The loan was used in taxable activities.

### Tax treaties
Guatemala has no tax treaties in force.

## Tax administration

### Returns
#### General income tax regime
Under the general income tax regime, there is no tax return to be filed.

#### Optional income tax regime
Under the optional income tax regime, the annual final tax liquidation period begins on 1 January and ends on 31 December of each year. Returns are due after the end of the fiscal period (31 December) but no later than 31 March of each year.

The income tax return shall be accompanied by the documents required by the regulations, which might include a:

- balance sheet
- statement of results of operations
- statement of cash flows, and
- statement of cost of production.

Documents must be duly certified by a professional or an independent accounting firm. The financial statements that accompany the return shall agree with both those recorded in the financial statements ledger and those destined for publication.

Both the income tax return and exhibits thereto shall be signed by the taxpayers, their agent, or their legal representative or by any other responsible persons so determined by this law and the tax code.

### Payment of tax
#### General income tax regime
Under the general income tax regime, tax is payable via flat tax withholdings (the tax is to be retained by either the customer or the recipient of services) or by direct remittances to the tax office made monthly within the first ten working days of the month following the invoice date.

Taxes on income are governed by the income tax law, Ley del Impuesto sobre la Renta, and its related regulations. Administration of the law is vested with the SAT.

#### Optional income tax regime
Under the optional income tax regime, taxpayers are required to prepay their estimated annual income tax liability in quarterly instalments. The balance is due upon filing the return.

Taxpayers may choose one of the following procedures for computing estimated quarterly tax liability:

- Tax on income shown by partial closure of accounts or computation of presumed liquidation of operations at the end of each quarter.
- Tax on 5% of overall gross income earned during the corresponding quarter of the preceding year (5% of the 30% income tax rate = 1.5%).
- Tax equivalent to one-fourth of the tax paid for the immediately preceding tax year.

## *Other issues*

Accurate and current information regarding taxation in Guatemala is often difficult to obtain as the country lacks reporting services such as those available in other countries. It is also difficult to determine how the tax laws will be applied in practice in complex situations. The laws and regulations are limited and ordinarily cover only the most common situations. The system of legal precedent resulting from court decisions is narrowly used, and each issue is resolved by reference to the respective codes. Guatemala has shown little interest in tax planning, but it is possible to have informal consultations with the tax authorities and to obtain authoritative rulings in many cases. Discrepancies between government and management criteria are commonly brought to judgment by the Constitutional Court, whose binding sentences generally abrogate the laws in dispute.

## Significant developments

The tax regime underwent radical changes with effect from 1 January 2008 with the introduction of the zero/ten tax legislation. Under this regime, the standard rate of company income tax moved to 0%, with a 10% rate applied to income derived from banking businesses and a 20% rate applied to publicly regulated utility companies and income derived from property located in Guernsey.

The new regime also saw the abolition of the 'international company' designation and two categories of exempt company status with effect from 1 January 2008. As a result, a company may no longer be able to negotiate a specific rate of tax with the Income Tax Office. The only companies that may potentially qualify for the exempt company status are certain categories of collective investment schemes and unit trusts.

The new zero/ten regime is currently under review and may therefore change in the future.

## Taxes on corporate income

Companies pay income tax at the standard rate of 0% on taxable income.

Income derived from a banking business is taxable at 10%. 'Banking business' is broadly defined as income that arises as a result of the provision of credit facilities by any type of company and the utilisation of customer deposits. Relief is available for eligible expenses that are allocated against different streams of income.

Any income derived from the exploitation of property located in Guernsey or received by a publicly regulated utility company is subject to tax at the higher rate of 20%.

### Exempt companies

Some collective investment schemes and unit trusts may qualify for exempt status, which would place them completely outside the Guernsey tax regime. For each year for which exempt status is sought, a charge of 600 pounds sterling (GBP) is levied.

One of the following conditions, among others, must be met for the company to be considered exempt:

- The company is beneficially owned outside of Guernsey.
- No Guernsey resident individual or company has a beneficial interest in the company (with the exception of shareholders, loan creditors, or nominees/trustees).

### Loans to participators
If a company makes loans with preferential terms to an individual or entity connected with the company, this will be deemed to be income in the hands of the debtor, and the creditor company will be required to account for, withhold, and pay the tax. Certain exemptions apply.

## Corporate residence

All Guernsey-registered companies are regarded as residents in the island unless granted exempt company status. In addition, a company will be treated as a resident in Guernsey (regardless of where it is incorporated) if shareholder control is exercised by persons resident in the island.

## Other taxes

### Dwellings profit tax
The dwellings profit tax has been abolished with effect from 28 January 2009.

## Branch income

Branch income is taxed in the same manner as companies, at the appropriate rate according to the activity being undertaken.

No further tax is withheld on the transfer of profits abroad to group companies, provided no Guernsey resident individual has an interest in the company.

## Income determination

### Inventory valuation
Inventory is valued at the lower of historical cost or net realisable value. Use of last in first out (LIFO) is not permitted. Generally, there are no material differences between accounts prepared on a normal accounting basis and those prepared on a tax basis.

### Capital gains
Capital gains are not subject to tax in Guernsey.

### Inter-company dividends
All dividends paid by a standard tax-paying company (0%) are deemed to have been paid from income arising after 31 December 2007, (i.e. after the introduction of the new zero/10 tax regime) unless the company elects to have them treated otherwise.

### Stock dividends
Stock dividends may be treated as income.

### Foreign income
Resident corporations are liable to tax on their worldwide income. Income tax is levied on foreign branch income when earned, and on investment income from foreign dividends, interest, rents, and royalties. Double taxation is mitigated either through unilateral relief (by giving credit for foreign taxation of up to three-quarters of the effective Guernsey rate) or by treaty relief.

## Deductions

### Capital allowances

Depending on the life of an asset, annual allowances (depreciation for tax purposes) are available on machinery and equipment, including vehicles, on diminishing-balance or on straight-line basis at varying standard rates. Obsolescence allowance is given when, on disposal, proceeds of a sale are less than the unclaimed annual allowances on machinery and equipment being replaced. Any surplus of realisation value of an asset over its tax written-down value is liable to tax, up to the total amount of allowances claimed.

Limited allowances are applicable to buildings but not to the depletion of natural resources.

### Taxes

Local income tax paid is not deductible in computing taxable income.

### Other significant items

Normally, business deductions are allowed if they are incurred wholly and exclusively for the purpose of the trade.

### Net operating losses

Losses from one class of income may be used to offset the profits from another class of income if both classes are subject to tax at the same rate. Unrelieved trading losses may be carried forward to offset future trading income.

Upon cessation of trade, operating losses arising from balancing allowances may be carried back to the previous two years of charge to be relieved against past trading profits.

### Payments to foreign affiliates

Guernsey-source royalties and long-term interest are subject to taxation at source. Relief is obtained by the retention of the tax deducted. Short-term interest, unless owed to an authorised bank, is not deductible, unless the advance in respect of which it is paid is used wholly and exclusively for the purposes of the trade. Other fees must be paid on an arm's-length basis.

## Group taxation

Group loss relief may be claimed when both companies are members of the same group and the companies are either carrying on business in Guernsey through a permanent establishment (PE) or incorporated in Guernsey. Loss relief is available only against income taxed at the same rate.

A claim for group loss relief must be made by the claimant company within two years after the end of the calendar year in which the relevant accounting period ended, and the claim must be accompanied by a declaration by the surrendering company that it consents to the surrender.

## Tax credits and incentives

In view of the low rate of tax, no special incentives are available to local businesses.

## Withholding taxes

### Deemed distributions

A company will be required to withhold tax on any distributions made to or in reference to any Guernsey resident individual shareholders.

Furthermore, following certain trigger events, such as the sale of shares, death of the beneficial member, etc., the company is deemed to have distributed all of the Guernsey resident shareholder's share of the company's undistributed profits accumulated since 1 January 2008. All investment income is deemed to be distributed as it arises.

Although the liability to tax is the shareholder's, the company is obligated to account for, withhold, and pay tax to the Income Tax Office and may then claim this back from the shareholder.

### Agency

A company also is required to withhold tax when it is acting as an agent and making payments to a non-resident liable to Guernsey tax.

## Tax administration

### Returns

An income tax return is required to be filed one year and 15 days after the end of the calendar year in which the accounting period ends. Should a company meet the conditions below, a simplified return may be filed without either a computation or financial statements.

In order to qualify for a simplified return, a company must have none of the following:

- Guernsey employees (other than directors).
- Guernsey resident individual beneficial owners.
- Income from utilities (e.g. Guernsey water or electricity companies).
- Income from Guernsey properties.
- Income from a banking business.
- Loans to Guernsey participators.
- Distributions made to Guernsey resident individuals.

Should a company have Guernsey resident individual beneficial members and/or make loans to participators, it will be required to submit quarterly returns accounting for distributions and deemed distributions and loans advanced.

### Payment of tax

In Guernsey, tax is payable in two instalments, on 30 June and 31 December in the year of charge (calendar year). If liabilities have not been determined, this may necessitate initially raising estimated assessments based on prior year figures and raising a final assessment when the figures are agreed.

## Significant developments

The following tax reforms became effective on 12 May 2010:

- A 10% withholding tax (WHT) on the distribution of profits or dividends to non-resident companies was initiated.
- Distribution or payment of dividends or any other form of distribution of retained earnings or reserves to resident or domiciled individuals is taxed via WHT at 10%.
- The Temporary Solidarity Contribution tax rate was increased to 10% for 2010 and 2011, 6% for 2012, 5% for 2013, 4% for 2014, and 0% for 2015.
- Taxpayers with annual income over 15 million Honduran lempiras (HML) are required to withhold 1% from payment to their suppliers on purchase of goods, machinery, and services if they do not use the payment on account regime. This WHT is credited against the annual income tax.

Effective 1 June 2011:

- Corporate and individual taxpayers will be subject to a 1% income tax on gross income if the income tax calculation for the fiscal year is lower than 1% of gross income.

Please note this information is current as of 1 June 2011. Typically, pending legislation is announced in June or July. Please visit the Worldwide Tax Summaries website at www.pwc.com/taxsummaries to see any significant corporate tax developments that occurred after 1 June 2011.

## Taxes on corporate income

Honduran resident companies are taxed on their worldwide income. Non-resident companies are subject to income tax only on income derived from Honduran sources.

The corporate tax rate for a resident company is 25% of its net taxable income.

### Temporary Solidarity Contribution

The Temporary Solidarity Contribution is a non-deductible surcharge levied on all companies with taxable income in excess of HNL 1 million. The Temporary Solidarity Contribution tax rate is 10% for 2010 and 2011, 6% for 2012, 5% for 2013, 4% for 2014, and 0% for 2015.

# Honduras

## Corporate residence

The place of incorporation is regarded by Honduran authorities as the corporate residence. Non-resident companies are companies incorporated/registered outside of Honduras.

### Permanent establishment (PE)

PE is not regulated in Honduras; nonetheless, a law reform on this matter is expected for 2011.

## Other taxes

### Sales tax

Sales tax is charged on all sale and purchase transactions of goods and services made in Honduran territory.

The general tax rate is 12%. It applies to most goods and services, with the exception of machinery and equipment, basic grains, pharmaceutical products, raw materials for the production of non-taxable goods, petroleum products, school supplies, and insecticides, among others.

The import and sale of beer, other alcoholic beverages, cigarettes, and other tobacco products are subject to 15% sales tax.

There is a 15% sales tax applicable to some PCS, cellular, internet broad band, cable TV, and energy services, depending on the amount of consumption billed by the supplier.

There is an 18% sales tax levied on first class and business class air tickets.

### Net assets tax

The net assets tax is an annual 1% tax on the net asset value of the company. It applies to the gross value of assets less reserve for accounts payable and any accumulated depreciation allowed under the income tax law and other deductions allowed by law. The law also allows a special deduction of HNL 3,000,000.

The net assets tax is in lieu of the corporate income tax when the corporate income tax is less than the amount due for net asset tax. Resident companies during their preoperative period (i.e. the period in which the company started operations but has not issued its first invoice) and companies operating in Free Zones, among others, are exempt from the net assets tax.

Non-resident companies are not liable for the net assets tax.

### Capital gains tax

In general, a 10% tax is applied on capital gains, regardless of the person's residence status. Under the Zolitur law territory, a special regime, the tax rate is a 4% flat tax on capital gains.

### Customs duties

The duty assessed by the Honduran government at the time of Customs clearance ranges between 0% and 15% for most items.

Honduras is a member of the Central American Common Market (CACM), which also includes Guatemala, El Salvador, Nicaragua, and Costa Rica. Honduras' rates on most goods from outside CACM are currently within the 0% to 15% range. Under the Dominican Republic-Central America Free Trade Agreement (CAFTA-DR) with the United States (US), about 80% of US industrial and commercial goods can now enter the region duty-free, with the remaining tariffs to be phased out over ten years. Nearly all textile and apparel goods that meet the Agreement's rules of origin are now duty-free and quota-free, promoting new opportunities for US and regional fiber, yarn, fabric, and apparel manufacturing. (The Agreement's tariff treatment for textile and apparel goods was made retroactive to 1 January 2004.)

It is necessary to first obtain the appropriate Harmonized System (HS) classification number for determining when a particular product can enter the CAFTA-DR region duty-free. With this number, it is then possible to check the country and product-specific tariff elimination schedule.

*Ad valorem* import taxes can be as high as 20%. In addition, imports are subject to the sales tax of 12% or 15% that applies to the sum of the cost, insurance, and freight (CIF) value; the *ad valorem* duty; and the customs fees.

### Payroll taxes and contributions

Payroll taxes and contributions are paid by employers at the following rates:

- Social security: 7.2% with a ceiling of HNL 4,800.
- Instituto Nacional de Formación Profesional (INFOP): 1%.
- Housing fund ('Régimen de Aportaciones Privadas' or RAP/ ' Fondo Social para la Vivienda' or FOSOVI): 1.5%.

### Municipal taxes

Companies doing business in Honduras are also subject to the rules and regulations of the respective municipalities. Taxes and obligations are ruled by the 'Plan de Arbitrios'. Some of these tax obligations include the following:

- Industry, commerce, and service tax, which is based on sales volume per year.
- Public services tax, which is paid for services such as waste management.
- Real estate tax, which is a tax on assets and asset gains.
- Sign tax, which is a tax on public advertising.

## Branch income

Branch income is subject to income tax at the rates applicable for corporate income.

## Income determination

Income is computed in accordance with generally accepted accounting and commercial principles, subject to certain adjustments required by the tax law.

### Inventory valuation

Inventories are generally valued using the first in first out (FIFO), last in first out (LIFO), and weighted-average cost methods.

### Dividend income
The income from dividends is considered 'other income', thus non-taxable under the general income tax rates. Stock dividends are also not taxable.

### Interest income
Honduran Bank interests are subject to a 10% WHT at the moment the interest is given, when the sum is over HNL 50,000. Interests from abroad are considered as normal income.

### Royalty income
Royalties are taxed in the same manner as general income if the recipient is a local company or branch.

### Foreign income
Deferral and anti-deferral of foreign income are not regulated in Honduras.

## Deductions

The net taxable income of an enterprise is determined by deducting all the ordinary and necessary expenses incurred in the generation of income, including amortisation and depreciation; municipal taxes; donations made in favour of the State, the Central District, the Municipalities, and legally recognised educational institutions, charities, and sporting facilities; mandatory employer-employee contributions to the social security system; and 'reasonable' charges for royalties and management services.

In general, all expenses incurred in the generation of taxable income are considered as deductible for income tax purposes. However, there are some 'non-deductible' expenses, even if incurred in the generation of income (e.g. interest paid to owners or shareholders, capital losses).

### Contingent liabilities
Provisions for contingent liabilities, such as severance pay, are not deductible for tax purposes; actual payments during the fiscal period, for those liabilities, are considered to be deductible expenses.

### Depreciation
Depreciation may be computed using the straight-line method. Companies may also obtain authorisation from the tax authorities to use other depreciation methods. However, after a company selects a depreciation method, it must apply the method consistently thereafter. The following are the applicable straight-line method rates for some common assets.

| Asset | Rate (%) |
|---|---|
| Buildings | 2.5 to 10 |
| Plant and machinery | 10 |
| Vehicles | 10 to 33 |
| Furniture and office equipment | 10 |
| Tools | 25 |

### Taxes
With the exception of the Temporary Solidarity Contribution, net asset taxes, income tax, and sales tax (i.e. if sales tax paid is used as a credit to net the sales tax payable to the government), taxes and contributions paid to district or municipalities are deductible expenses when determining taxable income.

### Capital losses
Capital losses are not deductible to determine the net taxable income. Capital losses can only be netted against capital gains, which are subject to a tax rate of 10%.

### Net operating losses
Companies engaged in agriculture, manufacturing, mining, and tourism may carryforward losses for three years. However, certain restrictions apply. Losses may not be carried back.

## Group taxation

No provisions exist for group taxation in Honduras.

### Transfer pricing
Transfer pricing is not regulated in Honduras; nonetheless, a law reform is expected on this matter in 2011.

## Tax credits and incentives

Companies operating under a special tax regime are exempted from income tax, sales tax, customs duties, and some municipal taxes. These special tax regimes are the following:

- Free zone.
- Industrial processing zone ('Zona Industrial de Procesamiento' or ZIP).
- Temporary import regime ('Régimen de Importación Temporal' or RIT).
- Tourism incentive law.
- Law of the Tourism Free Zone of the Bay Islands ('Ley de la Zona Libre Turística de las Islas de la Bahia').
- Law promoting the generation of electric energy with renewable resources ('Ley de Promoción a la Generación de Energía Eléctrica con Recursos Renovables'), which provides tax exemptions for projects generating 50MW and over.

Companies must comply with some governmental requirements to operate under one of the abovementioned special regimes.

### Drawback industries
Special benefits exist for industries that import semi-manufactured materials for assembly in Honduras and export finished products. Benefits consist of duty-free imports of raw materials for subsequent export as manufactured products. Machinery for these industries may also be imported duty-free.

## Withholding taxes

### WHT for residents

Distribution or payment of dividends or any other form of distribution of retained earnings or reserves to resident or domiciled individuals is taxed via WHT at 10%.

### WHT for non-residents

For non-residents in Honduras, any income derived from Honduran sources is taxable under the following table of the Income Tax Law:

| Income source | WHT (%) |
|---|---|
| Real estate and movable property rent, except dividends and interest | 10 |
| Royalties from mining operations and other natural resources | 10 |
| Salaries paid for services and other remuneration for rendering of services within national territory or abroad | 10 |
| Profit transfers from branch office to head office | 10 |
| Dividends | 10 |
| Royalties | 10 |
| Interest paid on commercial operations, bonds, securities or negotiable instruments, and other types of obligations | 10 |
| Income from operation of airplanes, ships, and vehicles | 10 |
| Income from operation of telecommunication companies | 10 |
| Insurance premiums | 10 |
| Income obtained from public shows | 10 |
| Films and video tapes for cinemas, TV, video clubs, and cable TV | 10 |
| Any other income not mentioned previously | 10 |

### Tax treaties

Honduras has not signed any tax treaties with foreign jurisdictions.

## Tax administration

The 'Dirección Ejecutiva de Ingresos' (DEI) is the tax authority in Honduras. It is responsible for the administration of the tax and customs system. Taxpayers may request approval from the DEI regarding direct or indirect taxes (e.g. accelerated depreciation methods on new assets, acquired by corporations with monetary activities requiring constant technological update, higher installed production capacity and productive re-conversion processes, in order to maintain and strengthen their competitive advantage).

### Returns

The statutory tax year runs from 1 January through to 31 December. However, taxpayers may apply to use a special tax year by requesting an authorisation from the DEI. Companies must file an income tax return on 30 April every year.

### Payment of tax

Mandatory advance tax payments are payable each quarter, based on the income tax paid for the preceding tax year. Final tax is due with the income tax return on 30 April every year.

## Significant developments

### Developments in tax treaty network

Hong Kong's treaty network expanded at an unprecedented pace during the 13-month period from April 2010 to April 2011, in which 15 comprehensive double tax agreements (CDTAs) were signed by Hong Kong with various Asian and European countries. All these CDTAs adopt the more liberal 2004 Organisation for Economic Co-operation and Development (OECD) version of the Exchange of Information (EoI) article. In addition, the EoI articles of the CDTAs previously signed with Mainland China and Luxembourg were updated to the 2004 OECD version by means of a protocol signed in May and November 2010 respectively. Accordingly, Hong Kong has concluded 17 CDTAs that adopt the latest international standard of EoI as of April 2011.

Of the 15 newly signed CDTAs, the ones concluded with Austria, Brunei, Hungary, Ireland, and the United Kingdom were ratified and entered into force in late 2010/early 2011. The CDTAs with Brunei and the United Kingdom became effective as of 1 April 2011 in Hong Kong whereas the remaining three will become effective as of 1 April 2012 in Hong Kong.

*For more information about Hong Kong's existing treaty network, please see the Withholding taxes section.*

### Newly enacted tax legislation

The following are the two Hong Kong profits tax measures that became effective in the past 12 months:

- The legislation that provides for an accelerated 100% tax deduction for capital expenditure on environment-friendly vehicles was enacted in June 2010. Prior to the enactment of the legislation, the purchase costs of all vehicles (including environment-friendly vehicles) used for producing assessable profits were eligible for a 60% initial tax depreciation allowance in the year of purchase and an annual tax depreciation allowance of 30%. With the enactment of the legislation, the purchase costs of environment-friendly vehicles can now be fully deducted in the year of purchase, with a few exceptions.
- In March 2011, another piece of tax legislation was enacted to expand the scope of concessionary profits tax treatment for qualifying debt instruments (QDIs). Prior to the change in the tax law, interest and trading profits derived from medium-term QDIs were entitled to a concessionary profits tax rate (i.e. 50% 0f the normal rate) whereas those derived from long-term QDIs were tax exempt. With the enactment of the legislation, interest and trading profits derived from the short-term QDIs (i.e. with a maturity period of less than 3 years) are also entitled to the 50% concessionary profits tax rate. In addition, the requirement for these QDIs to be issued to the public in Hong Kong has been replaced with a less restrictive

requirement. Under the new law, such QDIs only need to be issued in Hong Kong, at issuance, to (i) ten or more persons or (ii) less than ten persons if none of whom is an associate of the issuer of the instrument.

However, the new legislation also introduces a specific anti-avoidance measure that denies the concessionary tax rate/tax exemption for interest and trading profits derived from QDIs by a person who is an associate of the issuer of the QDIs. The anti-avoidance provision applies to QDIs issued on or after 25 March 2011.

## *Taxes on corporate income*

Hong Kong adopts a territorial basis of taxation. Profits tax is payable by every person (defined to include corporation, partnership, and sole proprietorship) carrying on a trade, profession, or business in Hong Kong on profits arising in or derived from Hong Kong from that trade, profession, or business. However, capital gains and receipts that are capital in nature are not subject to tax. Dividends are also not subject to tax in Hong Kong. The tax residence of a person is generally irrelevant for profits tax purposes. The tax treatments of public and private companies are the same.

Certain income that would not otherwise be subject to Hong Kong profits tax is deemed to arise in or be derived from Hong Kong from a trade, profession, or business carried on in Hong Kong and thus becomes taxable in Hong Kong. This includes royalties received by a non-resident for the use of or right to use in Hong Kong a patent, design, trademark, copyright material, secret process or formula, or other property of a similar nature.

The tax rates are 16.5% for corporations and 15% for unincorporated businesses for year of assessment 2011/12.

There are special rules for determining the tax liabilities of certain industries such as shipping, air services, and financial services.

Incomes from certain qualifying debt instruments (QDIs) are either tax exempt or subject to a concessionary tax rate (i.e. 50% of the regular profits tax rate). A specific anti-avoidance provision was recently introduced whereby the concessionary tax rate/tax exemption does not apply to incomes derived from QDIs by a person who is an associate of the issuer of the QDIs.

Offshore funds having Hong Kong fund managers and investment advisors with full discretionary powers are exempt from Hong Kong profits tax on profits derived in Hong Kong from six types of 'specified transactions' which are carried out or arranged by 'specified persons'. However, there are also specific anti-avoidance provisions in the Inland Revenue Ordinance (IRO) deeming certain resident persons to be subject to profits tax on their share of the non-resident person's tax exempt profits.

## *Corporate residence*

In general, for Hong Kong profits tax purposes, corporate residency is not important in determining taxability of an entity. The decisive factors for taxability are (i) whether a corporation is carrying on a trade, profession, or business in Hong Kong, and (ii) whether the profits are arising in or derived from Hong Kong.

However, where it is necessary to determine the corporate residence, such as for the purpose of a comprehensive double tax agreement (CDTA), companies incorporated in Hong Kong and companies that are normally managed or controlled/centrally managed and controlled (depending on the provisions of the relevant CDTA) in Hong Kong are generally considered as a Hong Kong tax resident.

For Hong Kong profits tax purposes, whether a foreign corporation is carrying on a trade, profession, or business in Hong Kong and the source of profits, rather than whether there is a permanent establishment (PE) in Hong Kong, are the decisive factors in determining taxability.

## *Other taxes*

### *Value-added tax (VAT)*
Hong Kong does not have a VAT, goods and services tax, or sales tax.

### *Property tax*
Property tax is charged annually to the owner of any land or buildings (except government and consular properties) in Hong Kong at the standard rate of 15% on the net assessable value of such land or buildings. Net assessable value of a property is the consideration payable to the owner for the right to use the land or buildings less rates paid by the owner and a 20% notional allowance.

Rental income derived by a company from a Hong Kong property is subject to profits tax. The company that is subject to profits tax may apply for an exemption from property tax in respect of the property. If no exemption is applied, the property tax paid can be used to offset against the profits tax payable by the company.

### *Customs duties*
There is no tariff on general imports in Hong Kong.

### *Excise tax*
Duties are levied on limited categories of dutiable commodities (i.e. tobacco, liquor, methyl alcohol, and hydrocarbons), regardless of whether they are imported or locally manufactured.

### *Stamp duty*
Stamp duty is charged on transfer of Hong Kong stock by way of sale and purchase at 0.2% per transaction. Hong Kong stock is defined as stock the transfer of which must be registered in Hong Kong.

For conveyance on sale of immovable property, the stamp duty payable depends on the property consideration and ranges from a flat rate of 100 Hong Kong dollars (HKD) (for property consideration of up to HKD 2 million) to the highest rate of 4.25% of the consideration of the property (for property consideration exceeding HKD 20 million), with marginal relief upon entry into each higher rate band. For lease of immovable property, stamp duty is calculated at a specified rate of the annual rental that varies with the term of the lease. Currently, the applicable rate ranges from 0.25% (for lease period of not more than one year) to 1% (for lease period of more than three years).

Exemption is available to certain transactions, such as transfer of shares between associated corporate bodies and certain stock borrowing and lending transactions, provided that the specified conditions for exemption are satisfied.

### *Special stamp duty (not yet implemented)*
In November 2010, a Special Stamp Duty (SSD) on resale of residential property within 24 months from the date of acquisition was proposed by the Hong Kong SAR Government in order to further discourage speculation on residential properties. The SSD will be imposed on top of the normal stamp duty currently payable on conveyance on sale of immovable property, with a few exemptions available. The seller and buyer are jointly and severally liable for paying the SSD. The SSD payable will be calculated based on the stated consideration or the market value (whichever is higher) of the resold property at the following regressive rates, with higher rates for shorter holding periods.

- 15% for residential properties held for six months or less.
- 10% for residential properties held for more than six months but for 12 months or less.
- 5% for residential properties held for more than 12 months but for 24 months or less.

The proposed effective date for the SSD is 20 November 2010, that is, the SSD will be applied retrospectively from 20 November 2010 upon enactment of the relevant legislation. However, the related amendments to the Stamp Duty Ordinance have not yet been approved and implemented as of May 2011.

### *Business registration fees*
Every person who carries on a business in Hong Kong is required to apply for business registration with a fee within one month from the date of commencement of the business. The business registration certificate has to be renewed either on an annual basis or every three years with a payment of a business registration (renewal) fee. Special registration and licence fees are applicable to banks and deposit-taking companies.

### *Capital duty*
A fee of HKD 1 for all or part of HKD 1,000 of the nominal share capital, or increase in nominal share capital, is payable as capital duty. The fee is capped at HKD 30,000 per case, counted on a company (rather than group) basis.

### *Government rates and rent*
Rates are an indirect tax levied on properties in Hong Kong. Rates are charged at 5% of the rateable value, which is the estimated annual rental value of a property at the designated valuation reference date of 1 October.

Privately owned land in Hong Kong is normally held by way of a government lease under which rent is payable to the Hong Kong SAR Government in return for the right to hold and occupy the land for the term (i.e. duration) specified in the lease document. Currently, government rent is calculated at 3% of the rateable value of the property and is adjusted in step with any subsequent changes in the rateable value.

### *Transfer tax*
Hong Kong does not have a transfer tax.

### *Turnover tax*
Hong Kong does not have a turnover tax.

## Branch income

The tax rate for branch is the same as that for corporations. The Hong Kong profit of a foreign corporation with a branch in Hong Kong is determined according to the accounts maintained for the Hong Kong operation (or business). If the Hong Kong accounts do not disclose the true profits arising in or derived from Hong Kong attributable to the Hong Kong operation, the Hong Kong profit will be computed according to the ratio of turnover in Hong Kong to total turnover (or the proportion of Hong Kong assets over total assets) on the worldwide profits. Alternatively, the Hong Kong Inland Revenue Department (HKIRD) tax assessor may estimate the profits of the Hong Kong branch. In certain situations, the profits of the Hong Kong branch could be estimated based on a fair percentage of the turnover in Hong Kong.

## Income determination

### Inventory valuation

Inventory may be stated at the lower of cost or market value. Last in first out (LIFO) may not be used for tax purposes. First in first out (FIFO) must be consistently applied.

The prevailing accounting standards require financial assets and liabilities held for trading purpose (e.g. shares and securities held as trading stock) to be carried at market value, with fluctuations in values of such assets and liabilities taken to the profit and loss accounts, irrespective of whether the profits or losses are realised. The HKIRD requires that this accounting treatment be followed in computing the assessable profits for tax purposes.

There are special tax provisions for valuation upon cessation of a business under which inventory is valued at market value, unless it is sold to a person carrying on business in Hong Kong, who may deduct a corresponding amount as the cost of the inventory in computing the assessable profits.

### Capital gains

Gains from realisation of capital assets or receipts that are capital in nature are not taxed.

### Dividend income

Dividends from sources either inside or outside Hong Kong are not subject to Hong Kong profits tax. Hong Kong corporations may declare bonus issues (i.e. stock dividends), which are not taxable in the hands of the recipients.

### Interest income

Interest income received by or accrued to a corporation carrying on a trade or business in Hong Kong is subject to profits tax. Exemption is provided to interest income derived from any deposit placed in Hong Kong with a financial institution, unless the deposit secures a borrowing the interest expense of which is deductible. This exemption, however, does not apply to interest accruing to a financial institution.

Interest accruing to a bank or financial institution will be deemed to be sourced and taxable in Hong Kong if the interest arises through or from the carrying on of business in Hong Kong by the bank or financial institution.

### *Royalties*
Royalties paid or accrued to a non-resident for the use of or right to use in Hong Kong or outside Hong Kong (if the royalties are deductible in ascertaining the assessable profits of a person for Hong Kong profits tax purposes) a trademark, patent, design, copyright material, secret process, or other property of a similar nature, or for the use in Hong Kong of cinema or television tape or any sound recording, are deemed to be taxable in Hong Kong.

A total of 30% of the sum receivable is deemed to constitute profits subject to tax in normal situations. Where such royalties are received by or accrued to an associated corporation, however, 100% of the sum is deemed to constitute profits under certain circumstances.

### *Partnership income*
Partnership business is taxed as a single entity though an individual partner can use its share of losses incurred by a partnership to offset against the assessable profits of its other business. In general, there is no special registration requirement other than business registration for a partnership. The assessable profits of a partnership are basically determined in the same way as those of a corporation, with certain special rules (e.g. salaries or other remunerations paid to a partner or a partner's spouse are not deductible).

### *Unrealised exchange gains/losses*
In general, unrealised gains/losses are taxable/deductible if they are recognised in the profit and loss accounts in accordance with the generally accepted accounting principles (GAAP), provided that they are revenue in nature and with a Hong Kong source. The nature and source of exchange gains/losses are determined by the nature and source of the underlying transactions. Exchange gains/losses arising from ordinary business transactions (e.g. trade receivables or payables) are taxable/deductible whereas exchange gains/losses arising from capital transactions (e.g. sale of capital assets) are non-taxable/non-deductible.

### *Foreign income*
Hong Kong resident corporations are not taxed on their worldwide income. Foreign-sourced income, whether or not remitted to Hong Kong, is not taxed. As such, there is no specific tax provision dealing with deferral or non-remittance of foreign earnings. Nor does Hong Kong have any controlled foreign company (CFC) legislation.

## *Deductions*

Expenses that are incurred for producing profits chargeable to tax and that are not capital in nature are generally tax deductible. In addition, special tax relief is available for certain capital expenditure. There are special rules for deduction of certain expenses (e.g. interest expenses).

Accounting treatments are usually followed in determining the assessable profits except when there is an explicit rule in the IRO. Accrued expenses recognised in the profit and loss accounts in accordance with the GAAP are usually deductible if they are incurred for producing profits chargeable/subject to tax and are not capital in nature.

Expense items of which a tax adjustment is necessary in determining the amount of taxable profits from the accounting profits include: tax depreciation allowance vs.

accounting depreciation, expenses that are capital in nature, general provisions that are non-deductible, and non-deductible interest expenses on borrowings used to finance non-income producing assets.

Set out below are the Hong Kong profits tax treatments of some common expense items.

### *Tax depreciation of fixed assets*

Tax depreciation allowances/deductions are available for capital expenditure incurred on the construction of buildings or structures and in the provision of machinery and plant for trade or business purposes, as follows:

- Industrial buildings and structures: An initial allowance of 20%, in addition to an annual allowance of 4%, of the cost of construction or cost of purchase from a developer is granted for an industrial building or structure occupied for the purpose of a qualifying trade. Provision is made for balancing allowance or charge in the year of assessment in which the building is disposed of to adjust the written-down value of the building to the disposal price. Balancing charges are restricted to the total of initial and annual allowances previously given.
- Commercial buildings and structures: An annual allowance of 4% of the capital expenditure incurred on the construction is applicable. A balancing allowance or charge applies upon disposal. Balancing charges are restricted to the total annual allowances previously given.
- Plant and machinery: An initial allowance of 60% of the capital expenditure on plant and machinery is given for the year of assessment during the basis period in which the expenditure is incurred. An annual allowance is also given for depreciation at three prescribed rates on the reducing value of each of the three depreciation rate 'pools'. The three prescribed rates are 10%, 20%, and 30%, and the reducing value of each of the three depreciation rate pools is original cost less initial and annual allowances and sales proceeds. Provision is made for balancing charges when plant and machinery within one of the three depreciation rate pools is sold or disposed of and the reducing value of that pool is less than the sale price, which is capped at the original amount incurred in the pool. In addition, balancing allowances or charges may be applicable upon cessation of business. Otherwise, sales proceeds are deducted in calculating the reducing value on which the annual allowance is calculated.

Book depreciation is adjusted for tax purposes in accordance with the above depreciation allowances granted under the IRO.

### *Goodwill*

Cost of acquisition of goodwill/amortisation of goodwill is not deductible as they are capital in nature.

### *Organisational and start-up expenses*

In general, company formation/start-up expenses that are incurred before the commencement of a trade, profession, or business and that are for the establishment of the overall income producing structure are capital in nature and not tax deductible.

### *Research & development (R&D)*

There is a specific provision allowing the deduction of expenditure incurred on R&D (including payments made to an approved research institute and in-house expenditure), provided that certain specified conditions are met.

### *Interest expenses*
There is no thin capitalisation rule in Hong Kong. However deduction of interest expense is subject to stringent and complicated rules which are designed to guard against loan arrangements with an intention to avoid Hong Kong profits taxes.

### *Bad debts*
A bad or doubtful debt incurred in any trade, business, or profession, proved to the satisfaction of the HKIRD to have become bad during the basis period for a year of assessment, is deductible. The deduction is limited to debts which were included as a trading receipt in ascertaining the taxpayer's assessable profits or debts in respect of money lent in the ordinary course of a money-lending business in Hong Kong.

If any bad or doubtful debt which has previously been allowed as a deduction is ultimately recovered, it will be treated as taxable profits of the basis period in which it is recovered.

### *Charitable contributions*
A deduction is allowed for cash donations to approved charities made in the basis period for a year of assessment if the aggregate of such donations is not less than HKD100. The deduction is limited to 35% of the assessable profits of the year of assessment.

### *Pension expenses*
A deduction is allowed for regular/ordinary contributions to a mandatory provident fund scheme or recognised occupational retirement scheme made by an employer in respect of an employee to the extent that the contributions do not exceed 15% of the employee's total emoluments for the period to which the contributions relate.

Special payments other than the ordinary contributions to a mandatory provident fund scheme or recognised occupational retirement scheme are capital in nature but can be deducted evenly over a five-year period under a specific provision of the IRO.

There are also specific rules for deduction of provisions for contributions to a mandatory provident fund scheme or recognised occupational retirement scheme.

### *Payments for directors*
Director fees or other remunerations paid by a corporation to its directors are generally deductible under the normal deduction rule. Nevertheless, no deduction is allowed on salaries or other remunerations paid to a sole proprietor or any partners or partners' spouses of a partnership business.

### *Contingent liabilities*
Generally speaking, general provisions for expenses are not deductible whereas specific provisions are deductible if the HKIRD is satisfied that the amount has been incurred (i.e. the taxpayer has a legal/contractual obligation to pay such amount in future) and that the provision represents a reasonably accurate estimate of the future liability.

### *Special deductions*
There are special deduction rules for expenditures incurred (i) for refurbishment of a building or structure, other than a domestic building or structure; (ii) on environmental protection instalation and machinery; (iii) on environment-friendly vehicles; (iv) on machinery or plant used specifically and directly for any manufacturing process, computer hardware (other than that which is an integral part of machinery or plant), computer software, and computer systems (collectively known as prescribed fixed

assets); (v) for registering trademarks, designs, or patents used in the production of taxable profits; and (vi) on the purchase of patent rights or rights to any industrial information or techniques likely to assist in the manufacture or processing of goods or materials, for use in Hong Kong.

It has also been proposed in the 2010/11 Budget that a deduction (i.e. over a five-year period, starting from the year of purchase) be provided for capital expenditures incurred on the purchase of registered trademarks, copyrights, and registered designs. However, the legislation giving effect to that proposal has not been enacted as of May 2011.

### *Fines and penalties*
Fines and penalties are generally not deductible as the HKIRD does not consider them to be expenses incurred for producing profits chargeable/subject to tax.

### *Taxes paid*
Taxes paid on corporate profits are generally not deductible for the purpose of calculating the assessable profits. However, the HKIRD generally accepts that a foreign tax that is an expense that must be borne regardless of whether or not a profit is derived (e.g. a foreign withholding tax levied on the gross amount of interest or royalties received), as opposed to a charge on the profits themselves, is deductible under the general deduction provision. Where interest income or gains from the sale of a certificate of deposit or bill of exchange are deemed to be subject to profits tax, a deduction is allowed for foreign taxes of substantially the same nature of Hong Kong profits tax paid in respect of the same income, provided that the taxpayer is not eligible for double taxation relief under a CDTA.

### *Net operating and capital losses*
Net operating losses incurred in an accounting year can be carried forward indefinitely to offset future profits of the business. A corporation carrying on more than one business may have losses in one business offset profits of the others, with any balance being carried forward. Net operating losses cannot be carried backward.

Capital losses are not tax deductible.

### *Payments to foreign affiliates*
Royalties and service fees paid/payable by a Hong Kong corporation to foreign affiliates are deductible provided they are incurred for the production of profits chargeable/ subject to tax. There is no special restriction on the deductibility of these payments. Interest payable to a foreign affiliate is not deductible if the recipient is not chargeable/ subject to Hong Kong profits tax on the interest income received.

## *Group taxation*

Hong Kong does not have a consolidated or group taxation regime.

### *Transfer pricing regime*
Strictly speaking, there is no comprehensive transfer pricing legislation in Hong Kong. While a few existing provisions in the IRO may be employed by the tax authority to tackle non-arm's-length transactions, such provisions are primarily aimed at transactions with closely connected non-residents or tax avoidance transactions rather than specific legislation on transfer pricing.

In 2009, the HKIRD issued two Departmental Interpretation and Practice Notes (DIPNs) to address the transfer pricing issues in Hong Kong. DIPN 45 focuses on the administrative/procedural issues involved in providing double tax relief in a treaty context such as when such relief is available and what are the procedures for claiming such relief. DIPN 46 outlines the HKIRD's view on the legislative framework for transfer pricing in Hong Kong (including the statutory provisions in the IRO and the articles in a CDTA that are relevant to transfer pricing) and provides guidance on numerous transfer pricing related issues such as the application of the arm's-length principle, the acceptable transfer pricing methodologies, which are largely in line with the OECD transfer pricing guidelines. The DIPN also spells out the documentation that taxpayers should consider retaining to support their transfer pricing arrangements and explains the interaction between the transfer pricing and sourcing rules in Hong Kong.

In general, the HKIRD adopts the arm's-length principle and would seek to apply the OECD transfer pricing guidelines except where they are incompatible with the express provisions in the IRO.

### *Thin capitalisation rules*
Hong Kong does not have thin capitalisation rules.

### *Controlled foreign company (CFC) regime*
Hong Kong does not have a CFC regime.

## *Tax credits and incentives*

### *Foreign tax credits*
Foreign tax credits are available if foreign taxes are payable/paid on income derived from a jurisdiction which has entered into a CDTA with Hong Kong and the same income is subject to tax in Hong Kong. *See the Withholding taxes section for a list of jurisdictions that have entered into a CDTA with Hong Kong.*

### *Tax holidays*
Hong Kong does not have a tax holiday program.

### *Foreign investment incentives*
Hong Kong does not have any specific incentives for foreign investment except that offshore funds may be exempt from profits tax under certain circumstances.

## *Withholding taxes*

There is no withholding tax (WHT) on dividends, interest, or royalties. However, the 4.95%/16.5% (for corporations) or 4.5%/15% (for unincorporated businesses) tax on royalties received by non-residents *(see Royalties in the Income determination section)* is in effect similar to a WHT.

Resident consignees are required to furnish quarterly returns to the HKIRD showing the gross proceeds from sales on behalf of their non-resident consignors and to pay to the HKIRD Commissioner a sum equal to 0.5% of such proceeds. The HKIRD normally accepts this as satisfying the Hong Kong tax obligations of the non-resident.

# Hong Kong

Hong Kong has so far entered into a CDTA with Austria, Belgium, Brunei, France, Hungary, Indonesia, Ireland, Japan, Kuwait, Liechtenstein, Luxembourg, the Netherlands, New Zealand, the People's Republic of China (PRC), Portugal, Spain, Switzerland, Thailand, the United Kingdom, and Vietnam. The agreements with France, Indonesia, Japan, Kuwait, Liechtenstein, the Netherlands, New Zealand, Portugal, Spain, and Switzerland have not yet entered into force, pending the completion of the ratification procedures of the governments concerned.

The following table shows the applicable WHT rates for payments made from Hong Kong payers to non-treaty and treaty country corporate recipients. The rates shown in the table are the lower of the domestic and treaty rates. For WHT rates on payments received by Hong Kong recipients from treaty country payers, please refer to the summaries of the respective treaty countries.

| Recipient | Dividends (%) (1) | Interest (%) (1) | Royalties (%) |
|---|---|---|---|
| Non-treaty | 0 | 0 | 4.95 (2) |
| Treaty: | | | |
| Austria | 0 | 0 | 3 |
| Brunei | 0 | 0 | 4.95 (3) |
| Belgium | 0 | 0 | 4.95 (3) |
| China, the People's Republic of (PRC) | 0 | 0 | 4.95 (3) |
| France | 0 | 0 | 4.95 (3) |
| Hungary | 0 | 0 | 4.95 (3) |
| Indonesia | 0 | 0 | 4.95 (3) |
| Ireland | 0 | 0 | 3 |
| Japan | 0 | 0 | 4.95 (3) |
| Kuwait | 0 | 0 | 4.95 (3) |
| Liechtenstein | 0 | 0 | 3 |
| Luxembourg | 0 | 0 | 3 |
| The Netherlands | 0 | 0 | 3 |
| New Zealand | 0 | 0 | 4.95 (3) |
| Portugal | 0 | 0 | 4.95 (3) |
| Spain | 0 | 0 | 4.95 (3) |
| Switzerland | 0 | 0 | 3 |
| Thailand | 0 | 0 | 4.95 (3) |
| United Kingdom | 0 | 0 | 3 |
| Vietnam | 0 | 0 | 4.95 (3) |

Notes

1. Hong Kong IRO does not impose WHT on dividends and interest currently. However, the treaties provide for a maximum WHT rate on dividends and interest should Hong Kong IRO impose such WHT in the future. Some of the treaties also provide for a reduced WHT rate on dividends and interest if conditions specified in the treaties are met.
2. Generally, royalties paid to non-resident corporations that are not otherwise chargeable to Hong Kong profits tax are subject to WHT at 4.95%. The 16.5% rate applies if the royalties are received by or accrued to a non-resident from an associate, unless the Commissioner is satisfied that no person carrying on business in Hong Kong has at any time wholly or partly owned the property in respect of which the royalties are paid.
3. Since a higher rate is specified in the treaty, the lower domestic/non-treaty rate of 4.95% will apply.

## Tax administration

### Returns

A year of assessment (or tax year) begins on 1 April of a year and ends on 31 March of the following year.

Tax returns are issued on the first working day of April each year. The filing deadline is usually within a month from the date of issue. However, corporations whose financial year ended after November 30 and are represented by a tax representative are normally granted with an extension for filing their returns. The exact filing due date depends on the accounting year end date of the taxpayer.

The basis of assessment is the accounting profits of the financial year ending within the year of assessment, with appropriate adjustments for tax purposes. A tax return is usually filed together with a tax computation showing the tax adjustments to the accounting profits in arriving at the taxable profits or allowable tax losses for a given year of assessment.

Corporate taxpayers are also required to attach their audited accounts as supporting documents when filing a profits tax return, unless they qualify as a small corporation as defined by the HKIRD (i.e. mainly those with gross income for a basis period of not exceeding HKD 2 million plus a few other conditions). Small corporations are not required to attach supporting documents with their profits tax returns but are still required to keep those documents and submit them upon request. A branch of a foreign corporation doing business in Hong Kong is required to file a profits tax return annually, and the HKIRD may require audited accounts of the foreign corporation to support the Hong Kong branch's profits tax return.

Notice of assessment will be issued after the tax return has been examined by the HKIRD. Taxpayers may be subject to post-assessment investigation or field audit under the computerised random selection procedures of the HKIRD at a later date.

### Payment of tax

The dates of payment of tax are determined by the HKIRD Commissioner and specified in the assessment notice. A system of provisional tax payments applies whereby estimated tax payments are made during the current year. The provisional profits tax payable is normally estimated based on the previous year's profits tax liability. The provisional profits tax already paid is credited against the final profits tax assessed for a year of assessment, which is determined after filing of the return.

### Statute of limitation

An additional assessment may be made by a HKIRD tax assessor if a taxpayer chargeable to tax has not been assessed to tax or has been assessed at less than the proper amount. The assessment must be made within the relevant year of assessment or within six years after the end of that year of assessment. The time limit for making additional assessments is extended when a taxpayer either has not been assessed, or is under-assessed, due to fraud or wilful evasion. In that case, an additional assessment may be made up to ten years after the end of the relevant assessment year.

A statement of loss is not an assessment, and the above six-year time limit does not apply to issue or revision of a statement of loss. A tax loss year remains technically open until the sixth year after the first year in which the taxpayer has an assessable profit after utilising all the tax losses brought forward.

### Tax audit cycle
There is no specific tax audit cycle in Hong Kong. Tax audit targets are selected with reference to certain criteria determined by the HKIRD.

### Topics of focus for tax authorities
Issues that are often subject to close scrutiny of the tax authority include offshore claim of profits, capital claims of income, transactions with related parties and closely connected non-residents, and deductibility of expenses (e.g. interest expenses, share-based payments, and intra-group management/service fees).

### General anti-avoidance rules (GAAR)
The IRO includes a GAAR (i.e. section 61A) allowing the HKIRD to disregard a transaction or counteract the tax benefit conferred by a transaction if the sole or dominant purpose of entering into such a transaction is to obtain a tax benefit. Whether the sole or dominant purpose of entering into a transaction is for obtaining a tax benefit will be assessed according to a set of factors stipulated in section 61A. Another GAAR in the IRO is section 61, which empowers the HKIRD to disregard a transaction that reduces or would reduce the amount of tax payable by any person if that transaction is considered artificial or fictitious. Although both GAARs could be used, in practice, section 61A is more often invoked by the HKIRD in tackling tax avoidance schemes.

### Specific anti-avoidance provision for related party transactions
In addition to the general anti-avoidance provisions described above, there is a specific anti-avoidance provision dealing with transactions with closely connected non-residents. Under the specific provision, if a resident person carries on a business with a closely connected non-resident person such that no profits or less than the ordinary profits are derived by the resident person in the course of such business, the non-resident person can be assessable and chargeable to tax in respect of his profits derived from such business in the name of the resident person.

## Other issues

### Foreign investment restrictions
In general, Hong Kong does not impose restriction to foreign investors to make investments in Hong Kong; and wholly foreign owned companies are allowed. The only exception is the restriction on foreign ownership of Hong Kong's licensed television/sound broadcasters, of which the collective foreign ownership ceiling is 49% of the voting power. In addition, an approval from the Broadcasting Authority must be obtained for holding, acquisition, or exercise of voting control by a foreign investor of more than 2% of a licensee.

### Exchange controls
Hong Kong does not have any foreign exchange control. There is no restriction on entry or repatriation of capital or remittance of profits from investments. Funds can be freely remitted to persons outside Hong Kong by various means such as dividends, interest, royalties, service fees, and branch profits, etc.

### Choice of business entity
The principal forms through which a business can be conducted in Hong Kong are as follows:

- Company incorporated in Hong Kong (either private or public via listing on the Stock Exchange of Hong Kong).

- Branch of a foreign company.
- Representative or liaison office of a foreign company.
- Joint venture (can be set up either as a company or partnership).
- Partnership.
- Sole proprietorship.

Of the above, privately incorporated companies and branches of a foreign companies are most commonly used by foreign investors, as limited liability is usually desirable.

### *Intellectual property regulations*

The Intellectual Property Department is responsible for monitoring the intellectual property regime and ensuring the protection and enforcement of intellectual property rights in Hong Kong. The Department is also responsible for investigating complaints against infringements and has extensive powers of search and seizure. Registration and protection of patents, copyrights, trade marks, and registered designs are each governed by a separate ordinance.

### *Merger & acquisition (M&A) activities*

There are no specific restrictions on M&A activities in Hong Kong. The following tax considerations are relevant in the M&A context:

- Hong Kong does not impose any tax on dividends or other forms of distribution of profits (e.g. distribution of branch profits to the head office).
- Capital gains arising from an M&A transaction is not taxable in the hands of the transferor, whereas amortisation of the goodwill in the transferee's accounts is not tax deductible due to its capital nature.
- For a share deal, stamp duty is payable on the transfer of Hong Kong shares at 0.2% unless an exemption applies; for an asset deal, stamp duty is payable on conveyance of immovable property at progressive rate of up to 4.25%.
- Gains derived from transfer of revenue items (e.g. trade receivables) in an asset deal would be subject to profits tax.
- There is no special tax concession/incentive relating to M&A transactions.
- Tax losses in the acquired company can generally be carried forward indefinitely to set off against future assessable profits. However, there are specific anti-avoidance provisions in the IRO that prevent the transfer of shares of a company with accumulated tax losses to owners of a profitable company for the sole or dominant purpose of utilising the tax losses i.e. offsetting the tax losses against the profits generated from other trade, profession, or business of the transferee.

## Significant developments

As of 1 January 2011, the following significant changes were introduced to the Hungarian tax system.

H

### Corporate income tax (CIT)

- The CIT rate is now 10% on the first 500 million Hungarian forint (HUF) of a positive CIT base. The tax base above this limit is subject to 19% CIT. As of 2013, a 10% general CIT rate will be applicable to the entire positive CIT base.
- Withholding tax (WHT) is no longer levied on interest, royalty, or service fees paid to foreign organisations in low tax countries.
- The EU Community legal framework for a European Research Infrastructure Consortium (ERIC) entered into force on 28 August 2009. This new legal form is designed to facilitate the joint establishment and operation of research facilities of European interest.
- New controlled foreign company (CFC) legislation reduced the effective tax rate ceiling for CFC qualification from 12.66% to 10%.
- The Tax Authority and the Customs Authority have been merged to become the National Tax and Customs Authority.

### Value-added tax (VAT)

- Cost-sharing groups were introduced as a new VAT category. The service provided by a cost-sharing group to its members qualifies as tax-exempt for a member that does not order the service as a taxpayer or receives the service for certain specified tax-exempt activities. In addition, the consideration received by the group may not exceed the certified expenses of the provision of the service, and members will have to provide the consideration to the group in the form of members' contributions.
- Hungary is obliged to implement the general place-of-supply VAT rules for cultural, artistic, scientific, educational, entertainment, and sports services. One exception to the general rule is facilitating entry to such events; in such cases, the place of supply will be where the service is physically carried out.
- In the course of 2010, a definition of what qualifies as a public donation was introduced. Public donations are no longer treated as supplies of goods or services for consideration and are not subject to VAT. Under the new regulations, and according to the Tax Authority's practice based on these regulations, the right to deduct VAT on purchases made for business purposes will not be restricted unless the purchase in question is made for the purpose of donation.
- As there have been technical difficulties with the implementation of the New VAT refund procedure for foreign taxpayers in the EU member states, the deadline for filing 2009 refund applications was extended to 31 March 2011, as proposed by the European Commission.

### Excise duty
Excise duty rates of tobacco products increased as of 1 January 2011. The duty rates from 1 January 2011 are as follows:

- Cigarettes: HUF 9,750 (approximately EUR 35) per thousand cigarettes plus 28.4% of the retail sale price, but a minimum of HUF 18,080 (approximately EUR 65) per thousand cigarettes. The tax base per cigarette also depends on the length of the cigarette (without filter). It is double if the length of the cigarette is 8cm to 11 cm, triple if the length is 11cm to 14 cm, and so on.
- Cigars and cigarillos: 28.5% of the retail price.
- Fine-cut tobacco: 52% of the retail price, but a minimum of HUF 7,860 (approximately EUR 30) per kilogram.
- Other tobacco: 32.5% of the retail price, but a minimum of HUF 7,860 (approximately EUR 30) per kilogram.

A new duty rate was introduced for flavoured beers that contain less than 2.8% alcohol, depending on the alcohol content (compared to other beers, which are taxed on the basis of Balling (Plato) Degree). The duty rate for such flavoured beers is HUF 1,400 (approximately EUR 5) per alcohol degree and per hectolitre.

## Taxes on corporate income

Resident taxpayers are subject to all-inclusive or unlimited CIT liability. Non-residents are subject to CIT on their income from their Hungarian branch's business activities.

As of 1 January 2011, the CIT rate is 10% on the first HUF 500 million of a positive CIT base without any further preconditions. The tax base above this limit is subject to 19% CIT. As of 2013, a 10% general CIT rate will be applicable to the entire positive CIT base.

Prior to 1 January 2011, the CIT rate was 10% on just the first HUF 50 million of a positive CIT base.

As of 1 January 2011, foreign organisations are no longer subject to 30% WHT on interest, royalties, and service fees received from Hungarian resident companies.

### Minimum tax base
If a company's CIT base or the pre-tax profit, whichever is higher, is less than 2% of its total revenues reduced by the cost of goods sold, the value of mediated services, and the income of the foreign permanent establishments (PE) (i.e. the 'minimum tax base'), the company can choose to file a declaration and pay CIT either according to the general provisions or on its minimum tax base.

### Special income tax
Companies with the following activities are liable to pay a special 'austerity' tax:

- Retail sales in stores.
- Telecommunications activity.
- Business activity of energy suppliers.

The special 'austerity' tax base is the net sales revenue and not the pre-tax profit. The tax rates are progressive and depend on the company's business activity, as follows:

### Retail sales in stores
Tax base is the net sales plus revenue on services provided to retail supplier and revenue from discount.

| Tax base (HUF) | Rate (%) |
|---|---|
| 0 to 500 million | 0 |
| 500 million to 30 billion | 0.1 |
| 30 billion to 100 billion | 0.4 |
| above 100 billion | 2.5 |

### Telecommunications activity
Tax base is the net sales revenue of the activity of telecommunication.

| Tax base (HUF) | Rate (%) |
|---|---|
| 0 to 500 million | 0 |
| 500 million to 5 billion | 4.5 |
| above 5 billion | 6.5 |

### Business activity of energy suppliers
Tax base is the net sales revenue of the activity of supplying energy.

| Tax base (HUF) | Rate (%) |
|---|---|
| 0 to 5 billion | 0.3 |
| 500 million to 5 billion | 1.05 |

Financial organisations that closed their financial statements before 1 July 2010 are subject to a special tax at the rate of 5.6%.

## *Local taxes/local business tax*
All municipalities are entitled to levy local taxes and, as of 29 June 2010, their administration has been delegated back to them from the Hungarian State Tax Authority. Local taxes are deductible for Hungarian CIT purposes and are not normally treated as 'income tax' in the application of the tax treaties.

The local business tax base is the net sales revenue reduced by the cost of goods sold, subcontractors' work, the costs of materials, mediated services, and research and development (R&D) costs. General service fees, depreciation, and labour costs are typically not deductible for local business tax purposes. 100% of royalty, interest, or dividend income and the local business tax base of a foreign PE of a Hungarian company are exempt from local business tax. The local business tax rate may differ from municipality to municipality but is capped at 2% by law.

Additionally, as of 2011, the special tax base allocation method will be introduced for companies in the telecommunications sector. The allocation will be based on the net revenues a company realises in the municipalities where its clients' billing addresses are located.

## *Innovation contribution*
Companies defined as such in the Accounting Act, except for small and medium-sized enterprises and branches, are also subject to an innovation contribution. The tax base

of the innovation contribution is the same as the local business tax base. The tax rate is 0.3%. Additionally, the direct costs of R&D are deductable from the tax payable (not the tax base).

## *Corporate residence*

Corporations are residents for CIT purposes if they are incorporated in Hungary, although foreign corporations may also be deemed to be Hungarian residents for CIT purposes if their place of effective management is in Hungary.

Foreign entities may carry out business through resident corporations or through PEs (branches). Commercial representative offices may be opened for auxiliary activities which do not create a taxable presence.

### *Permanent establishment (PE)*

Hungary treats PEs as separate and distinct entities, and profit is attributed to a PE based on the principles set out in the Organisation for Economic Co-operation and Development (OECD) guidelines.

In the Corporate Income Tax Act a PE is defined as fixed business premises (machinery or equipment) through which the entrepreneurial activity of an enterprise is partly or wholly carried on, regardless of the title of the taxpayer to those premises. A PE may consist of any of the following: a place of management; offices, including representative offices, registered in Hungary; factories and workshops; and mines, crude oil or natural gas wells, quarries, or other places from which natural resources are extracted.

Construction sites (including assembly) and related supervisory activities constitute a PE if they last, in the aggregate, for at least three months in a calendar year. All activities carried out at the same construction site qualify together as a single PE, regardless of whether they are based on separate contracts or were ordered by different persons. Construction sites are defined as sites which represent a unit for economic, business, and geographical purposes.

PEs are also created by the direct utilisation of natural resources by a foreign person. A foreign person is deemed to have a PE in Hungary if it utilises natural resources or immovable property for consideration, including the alienation of any rights related to the immovable property or natural resources.

A non-resident enterprise is considered to have a PE with respect to activities undertaken on its behalf by another person if its agent is authorised to conclude contracts in Hungary on behalf of the non-resident entity and the agent regularly exercises this right or maintains a stock of goods and products from which it regularly makes deliveries in the name of the non-resident entity.

The insurance of risks occurring in Hungary and insured on behalf of the non-resident person by another person constitutes a PE of the foreign insurer, except for reinsurance activities.

Furthermore, as mentioned above, a foreign taxpayer must also be treated as having a PE if it has a Hungarian branch.

The definition of a PE does not include the following:

- Establishments used solely for the purpose of storing and presenting the goods or products of a non-resident person.
- The stockpiling of goods and products solely for the purpose of storing, presenting, or processing by another person.
- Establishments used for collecting information, or purchasing goods and products, exclusively for the non-resident person.
- Establishments used for other activities of a preparatory or auxiliary nature.
- Activities of independent agents, provided they are acting in their ordinary course of business.

Note that a different definition of a PE is applicable for local business tax, and no definition is available for special 'austerity' tax.

## Other taxes

### Value-added tax (VAT)

VAT is payable on sales of goods and the provision of services. VAT is also payable on the importation of intra-Community acquisitions of goods and on the purchase of certain services provided to Hungarian companies by foreign suppliers.

The general VAT rate is 25%. A reduced VAT rate of 5% is available for most medicines.

Certain services are exempt from VAT, including most transactions in land (an option to be taxed under the general rule is available); the letting of residential property (an option to be taxed under the general rule is available); medical, cultural, sporting, and educational services provided as public services; and financial and insurance services. Intra-Community supplies of services and exports are also treated as exempt transactions. For the rental of industrial sites and office buildings, VAT exemption is optional.

VAT deduction is available for the business-related element of purchases made partially for non-business purposes.

Under the new general VAT liability regulations, VAT is also chargeable if an invoice is issued but the supply is not carried out.

#### Place-of-supply rules

The general rule for business to business (B2B) services is that the place of supply is where the customer is established. Some exceptions to this rule have been introduced (e.g. for catering services and services connected to immovable property, the place of supply is where the supplier is established). The general rule for business to consumer (B2C) services is that the place of supply is where the supplier is established.

#### VAT recovery

If a taxpayer has a negative VAT balance in a return period, this amount can be recovered provided that the tax balance reaches or exceeds an absolute value of HUF 1 million for monthly filers, HUF 250,000 for quarterly filers, or HUF 50,000 for annual filers. The VAT Act extends the application of the reverse-charge mechanism to a variety of activities in addition to the sale of waste materials, including construction and assembly and services related to real property (repairs, maintenance). The condition that only the VAT content of financially settled invoices is reclaimable continues to apply.

**Directive for refunds of foreign European Union (EU) taxable persons**
EU-registered non-Hungarian taxable persons can recover local VAT. In the new system, refund applications have to be submitted electronically, and the rules governing the time available/deadlines for tax authorities in certain phases of the procedure have changed. Reclaim requests should be submitted to the Tax Authority of the country where the taxable person is established.

**Reporting obligations for cross-border transactions**
A new requirement is that suppliers of cross-border services must submit full statements for each VAT return period of all the services supplied to taxable and non-taxable legal persons where the latter are liable for VAT in their own country. Please note that purchase lists are required in Hungary in addition to European Community (EC) sales.

**Group taxation**
The VAT Act allows all companies that have established business presences in Hungary and qualify as related enterprises to form a VAT group. The essence of a VAT group is that its members act under a single VAT number in their transactions (i.e. they issue invoices under a shared VAT number and submit a single, joint tax return), and product and service supplies between the members do not qualify as business transactions from a VAT perspective.

***Excise taxes***
The following goods are subject to excise duty:

- Petroleum products.
- Alcohol and alcoholic beverages. Any product with an alcohol content of 1.2% or more by volume qualifies as an alcohol product.
- Beers.
- Wines.
- Sparkling wines.
- Intermediate alcoholic products.
- Tobacco products.

As of 1 January 2011, the excise duty rates are as follows:

- Petroleum products: HUF 97,350 to HUF 124,200 (approximately EUR 340 to EUR 450) per thousand litres or HUF 4,425 to HUF 116,000 (approximately EUR 15 to EUR 400) per thousand kilograms, depending on the type of petroleum product.
- Alcohol products: HUF 276,100 (approximately EUR 1,050) per hectolitre of pure alcohol.
- Beer: HUF 633 (approximately EUR 2) per hectolitre per Balling (Plato) grade. For flavoured beers that contain less than 2.8% alcohol, HUF 1,400 (approximately EUR 5) per alcohol degree and per hectolitre.
- Wines: HUF 0 for grape wines; HUF 9,400 (approximately EUR 40) per hectolitre for wines made from other types of fruit.
- Sparkling wines: HUF 14,250 (approximately EUR 50) per hectolitre.
- Intermediate alcoholic products: HUF 22,100 (approximately EUR 80) per hectolitre.
- Tobacco products:
  - Cigarettes: HUF 9,750 (approximately EUR 35) per thousand cigarettes plus 28.4% of the retail sale price but a minimum of HUF 18,080 (approximately EUR 65) per thousand cigarettes. The tax base per cigarette also depends on the length of the cigarette (without filter). It is double if the length of the cigarette is 8cm to 11 cm, triple if the length is 11cm to 14 cm, and so on.
  - Cigars and cigarillos: 28.5% of the retail price.

- Fine-cut tobacco: 52% of the retail price, but a minimum of HUF 7,860 (approximately EUR 30) per kilogram.
- Other tobacco: 32.5% of the retail price, but a minimum of HUF 7,860 (approximately EUR 30) per kilogram.

The Customs Body of the National Tax and Customs Authority is responsible for excise duty. The European Union's excise duty rules apply in Hungary.

### *Registration taxes*

Registration tax is charged on passenger cars, motor homes, and motorcycles before they can be registered and put into service in Hungary. The duty is payable with the first domestic registration or in the case of a conversion.

The registration tax rate is applied as follows:

- Passenger cars: HUF 250,000 to HUF 9,622,000 (approximately EUR 950 to EUR 37,000), depending on the technical features of vehicles (cc, engine type) and environmental classification.
- Hybrid or electrical cars: HUF 190,000 (approximately 750 EUR).
- Motorcycles: HUF 20,000 to HUF 230,000 (approximately EUR 70 to EUR 900), depending on technical features of the motorcycles (cc).

The registration tax is levied by the Customs Body of the National Tax and Customs Authority.

### *Customs duties*

Hungarian customs legislation and policies have been fully harmonised with EU legislation.

The EU customs legislation is comprised of the following main regulations:

- Council Regulation 2913/92/EEC establishing the Community Customs Code.
- Council Regulation 2454/93/EEC laying down provisions for the implementation of Council Regulation 2913/92/EEC establishing the Community Customs Code.
- Council Regulation 918/83/EEC setting up a Community system of reliefs from customs duty.
- Council Regulation 2658/87/EEC on the tariff and statistical nomenclature and on the Common Customs Tariff.

### *Environmental protection product fee*

The following products are subject to the environmental protection product fee: other crude oil products, tyres, packaging, batteries, commercial printing paper, and electrical and electronic products (based on customs tariff numbers applicable on 1 January 2010).

The following entities are liable to pay the product fee:

- The first domestic distributor or user for own purposes.
- In the case of domestically manufactured commercial printing paper and other crude oil products, the first buyer from the first domestic distributor.
- In the case of toll manufacturing, the party that orders the toll manufacturing.

The product fee is calculated on the basis of the weight of the product multiplied by the fee rate. For example, it is HUF 6 to HUF 44 (approximately EUR 0.02 to EUR 0.18) /

kg for packaging and HUF 83 to HUF 1,000 (approximately EUR 0.33 to EUR 4) /kg for electrical and electronic products.

The Customs Body of the National Tax and Customs Authority controls the payment and reporting of the product fee and carries out product fee inspections. The Customs Authority registers taxpayers by Economic Operators Registration and Identification (EORI) customs numbers and Global Location Number (GLN), the environmental identification numbers, thus taxpayers will need to obtain both. As of 1 January 2010, the product fee is self-assessed. The product fee return must be submitted quarterly to the Customs Authority via its electronic system.

The product fee penalty is generally 100% of the product fee shortfall in cases of non-payment or underpayment.

The product fee payment liability can be reduced in certain instances (e.g. by meeting the mandatory recycling rate).

### *Environmental load charges*

Environmental pollution charges were introduced to protect the natural environment, to reduce its impairment, to encourage the users of the environment to engage in activities aimed at the preservation of the natural environment, and to provide funding from the central budget for environmental protection and nature preservation.

Emitting entities liable to pay charges include those who operate point-source emitters subject to registration, pursue activities subject to a water right permit, or who do not use available public drainage systems and dispose of their sewage under a water right permit or a permit from the local water management authorities.

Qualifying materials include sulphur dioxide, nitrogen oxides, mercury, phosphorous, cyanides, and others.

The load charge is calculated on the basis of the quantity of emitted materials multiplied by the fee rate. Basically, the amount of the fee payable depends on the hazard level of the emitted material, e.g. HUF 50 (approximately EUR 0.2) /kg for sulphur dioxide and HUF 220,000 (approximately EUR 846) /kg for mercury.

### *Energy tax*

Goods are subject to energy tax at the following rates:

- Electricity: HUF 295 (approximately EUR 1) per megawatt hour.
- Coal: HUF 2,390 (approximately EUR 9) per thousand kilograms.
- Natural gas: HUF 88.5 (approximately EUR 0.3) per gigajoule.

As of 1 January 2010, the following entities are subject to energy tax:

- Energy traders.
- End-users.
- Producers.

The tax is self-assessed, except in the case of imports, and the Customs Body of the National Tax and Customs Authority is responsible for the related customs administration procedures.

### *Stamp duties*
The most common types of stamp duty are gift duty and duty on transfers of property for consideration. Stamp duty is levied on movable and immovable property and property rights if they were acquired in Hungary, unless an international agreement rules otherwise.

#### Gift duty
Gift duty arises on the date when a contract concerning a gift is concluded.

Transfers of movable property, immovable property, and property rights without consideration are subject to gift duty. In these cases, however, gift duty is only incurred if the transaction was formally documented; except for immovable property with a market value of more than HUF 150,000, where gift duty must be paid in any event.

The base of gift duty is the net value of the gift, which is the market value minus any liabilities related to the gift. The general duty rates vary, depending on the base, as follows:

- 21% for a base of up to HUF 18 million.
- 30% on the part of the base exceeding HUF 18 million, up to HUF 35 million.
- 40% on the part of the base exceeding HUF 35 million.

Transfers of assets without consideration and acquisitions of claims without consideration including waivers of claims and assumptions of debts are exempt from gift duty, provided that the recipient is a company.

Furthermore, if a company is 100% owned by the other company in the transaction, or both companies are 100% owned by a third party, a reduced rate should be applied as follows:

- 11% for a base of up to HUF 18 million.
- 15% on the part of the base exceeding HUF 18 million, up to HUF 35 million.
- 21% on the part of the base exceeding HUF 35 million.

#### Duty on transfer of property for consideration
The obligation to pay duty on the transfer of movable and immovable property for consideration arises on the date when the contract is concluded.

For acquisitions of real estate, the stamp duty is 4% of the market value of the property. For acquisitions of direct or indirect participations (stocks, shares, co-operative shares, investor shares, converted investor shares) in a company that owns real estate, the duty base is the part of the market value of the company's properties held that represents the percentage of the participation, except when the transaction is between related parties. The stamp duty for real estate company sales is 4% up to HUF 1 billion and 2% of the amount exceeding HUF 1 billion up to a maximum of HUF 200 million.

There are special rules for real estate trading companies and credit institutions. Under certain circumstances, exemptions are available more generally.

Stamp duties are also levied on certain court procedures (e.g. Court of Registration) and on submissions to certain authorities (e.g. appeals to the Tax Authority). Stamp duty is, for instance, levied in an amount of:

- HUF 100,000 on the registration of a private stock company or a limited liability company
- HUF 600,000 on the registration of a public stock company or a European Company
- HUF 100,000 on the registration of any other entity with legal personality
- HUF 50,000 on the registration of a branch office, and
- HUF 50,000 on the registration of a representative office.

### *Property and land taxes*
Hungarian municipalities can levy property tax and land tax at their own discretion.

#### Property tax
The owner of a building is subject to property tax liability annually on the first day of the calendar year.

The local government can determine the tax base in either of the following ways:

- The net floor space of the building expressed in square metres, with a maximum tax rate of HUF 900/m2.
- The adjusted market value of the building, with a maximum tax rate of 3% of the adjusted market value.

#### Land tax
The owner of the land is subject to land tax liability annually on the first day of the calendar year. Undeveloped plots of land situated within the area of jurisdiction of a local government are subject to this tax. The local government can determine the tax base in either of the following ways:

- The actual area of the plot expressed in square metres, with a maximum tax rate of HUF 200/m2.
- The adjusted market value of the plot, with a maximum tax rate of 3% of the adjusted market value.

#### Stamp duty
Stamp duty has to be paid on the acquisition of a direct or indirect participation of at least 75% in a company that owns real estate (even if the real estate is a minor part of its total assets). Exceptions may be available if certain criteria are met.

There is no transfer tax in Hungary, but transfers of direct or indirect participations in companies that own real estate may be subject to stamp duty.

As of 1 July 2010, transfers of real estate-owning companies' shares between related parties have been exempt from real estate transfer tax.

#### CIT
A company and its related parties are defined as real estate holding companies if at least 75% of the market value of their assets is domestic real estate and if they have a foreign shareholder that is not resident in a country that has a double tax treaty (DTT) with Hungary or the treaty allows capital gains to be taxed in Hungary.

The tax base of real estate holding companies in cases of share transfers and share capital decreases is the positive amount of the consideration minus the acquisition price of the shares less the costs of acquisition and of administration. *The tax rate is the same as was mentioned in the Taxes on corporate income section.*

Please note that the definition of the payer for CIT purposes is very different from the definition used for stamp duty purposes.

## Branch income

Foreign companies may establish branch offices in Hungary. A branch office is an organisational unit of a foreign company without legal personality, vested with financial autonomy, and registered in the Hungarian companies register as a branch office of the foreign company. The provisions of the Hungarian Accounting Act apply to branch offices, which must prepare reports using double-entry bookkeeping. Statutory audits are obligatory, except for the branches of corporations whose registered office address is in the European Union.

A branch office is regarded as established when it has been entered into the companies register. A branch office may start operating once the application for registering the branch office has been submitted to the Court of registration, provided that it indicates 'under registration' on its corporate correspondence. Until a branch has been registered, it cannot carry out any activities that are subject to official permission. A branch office is considered dissolved upon its removal from the companies register.

Branch offices are treated as PEs for taxation purposes. They must determine their tax base according to the general rules applicable to Hungarian companies. The profit for the year (calculated on the basis of the Hungarian accounting system and adjusted by specific provisions of the Corporate Tax and Dividend Tax Act or CDTA) is subject to CIT of 10% on the first HUF 500 million of the positive CIT base. The tax base above this limit is subject to 19% CIT. The definition of PE is similar to that in the tax treaties but somewhat broader. For treaty countries, the respective treaty definition applies.

A foreign company's CIT base is determined for all its domestic PEs (except for branches) collectively and for its branches separately. A branch should account for costs and revenues as if it were independent from its foreign parent company.

For a Hungarian PE, earnings before taxes are reduced by cumulated administrative costs incurred proportionately at the headquarters and any of its PEs, with the maximum proportion defined as the revenues of the PE compared to all revenues of the foreign company.

The increasing items for a Hungarian PE are the administrative costs accounted by the PE plus 5% of the revenue earned by the PE's activities but accounted elsewhere.

However, if there is a treaty between Hungary and the other country, the provisions of the treaty have priority over domestic law. Therefore, the provisions of the treaty have to be followed in the first instance, and all costs related to the activity of the branch have to be allocated to the branch, without the above restrictions in domestic law, and all profit realised with respect to the branch must also be allocated to the branch. The allocation method must be consistent from year to year, unless there is a good reason for changing it.

The foreign parent must continuously provide the assets and funds required for the operation of the branch office and the settlement of its liabilities. The employees of a branch office are in a legal relationship with the foreign company, and the foreign parent exercises employer's rights. A branch is considered to be related to its parent company/headquarters. Therefore, the prices used in inter-company transactions have to be at arm's length, and transfer pricing documentation has to be prepared.

## *Income determination*

The CIT base should be calculated by modifying the accounting pre-tax profit by adjustments and deductions as provided by the CDTA.

### *Inventory valuation*

Inventories are generally valued at their historical cost unless their fair market value is significantly lower than their book value, in which case, the fair market value should be recorded. Cost may be determined on the basis of first in first out (FIFO) or average cost.

### *Capital gains*

Capital gains (losses) are treated as ordinary income (losses) for tax purposes. The gain on the sale of depreciable assets equals the sales revenue reduced by the net value of the asset for CIT purposes.

If a participation (of at least 30%) is registered within 30 days of acquisition and held continuously for at least one year, capital gains from the sale or contribution in kind of the participation is exempt from CIT in general. As of 2010, any additional acquisitions may also be registered, provided that the 30% participation was already registered.

### *Stock transactions*

Shareholders of a real estate holding company are also subject to CIT on their income from the sale of the shares in the real estate holding company. Transfers of direct or indirect participations in companies that own real estate may be subject to CIT.

### *Dividend income*

Except in the case of CFCs *(see the Group taxation section),* dividends received and accounted for as income in the given tax year are tax-free.

### *Interest income*

No specific provision exists in Hungary for interest income. Therefore, interest income is taxable for CIT purposes.

### *Royalty income*

50% of royalty income is deductible for CIT purposes, up to 50% of pre-tax profit. Royalties as revenues are derived from (i) permission for the exploitation of patents, from the industrial design of assets under industrial law, and from know-how; (ii) permission to use trademarks, business names, and business secrets; (iii) permission to use copyrights and similar rights attached to protected work; (iv) transfers of the property described above (except for trademarks, business names, and business secrets).

### *Unrealised exchange gains/losses*

Tax deferral is applicable to unrealised exchange gains/losses.

### *Foreign income*

Taxpayers resident in Hungary and foreign entrepreneurs must calculate their CIT base exclusive of any income that is subject to taxation abroad, if so prescribed by an international treaty. In any other case, a foreign tax credit is available for income taxes paid abroad *(see Foreign tax credit in the Tax credits and incentives section for more information)*.

In Hungary, there are no provisions under which income earned abroad may be tax deferred.

## Deductions

In general, costs and expenses incurred in relation to the taxpayer's income-generating business activity are deductible for CIT purposes.

### Accrued expenses

Accrued expenses are recognised for taxation purposes in the tax year they affect.

H

### Depreciation and amortisation

Accounting depreciation that is accounted as expenditure, and thus included in the accounting profit, should be added to the CIT base. Tax depreciation calculated according to the CDTA reduces the tax base, even if the tax depreciation is higher than the accounting depreciation. The tax depreciation of tangible assets should be calculated using the straight-line method, on the basis of the historical value from the time when the asset was first used for business purposes.

Examples of tax depreciation rates include the following:

| Assets | Depreciation rate (%) |
|---|---|
| Computers and other high-tech machinery | 33 or 50 |
| Vehicles | 20 |
| Other tangible assets | 14.5 |
| Buildings (long-life structure) | 2 |
| Rented buildings | 5 |

Assets newly acquired since 2003 can be depreciated at 50% annually; these instruments include, among other items, machinery and intellectual property.

There is no prescribed amortisation rate for intangibles. The historical value, the residual value, and the useful life should be considered.

Additionally, goodwill cannot be amortised either for accounting or tax purposes if it does not lose its value during its use. However, if extraordinary amortisation is accounted on goodwill, the extraordinary amortisation will also be recognised for CIT purposes. In the case of transformations, specific amortisation rules apply.

### Organisational and start-up expenses

Companies are not obliged to capitalise the costs of formation/reorganisation. The capitalisation of these costs is at the company's discretion, but the company should comply with its accounting policy. Furthermore, only the direct costs of formation/reorganisation that are not classified as investments or renovations and are likely to be recovered ultimately can be capitalised.

### Development reserve
50% of pre-tax profit may be assigned as development reserve. The maximum value of the reserve is HUF 500 million; however, it has increased from four years to six years for development reserves included in the 2008 financial statement. For other development reserves, the period remains four years.

### Tax base allowance regarding R&D
A tax base allowance is only applicable for R&D activities if the taxpayer carries out basic research, applied research, or experimental research activities for its own purposes. The direct cost of the basic research, the applied research, and the experimental research, or the amount of depreciation on the research activity (if the cost of R&D activity is capitalised), is deductible from the tax base.

300% of the direct costs of research activity (up to a maximum of HUF 50 million) are deductible from the tax base if the research activity is carried out jointly with a higher education institution, the Hungarian Academy of Sciences, or a research institute established by them.

### Bad debts
Under the Accounting Act, bad debts are only deductible for CIT purposes if they are supported by legally valid third-party documents that the receivable cannot be collected. Expenses claimed that cannot be enforced in court and expired claims are not deductible for CIT purposes.

In addition to the above, 20% of eligible bad debts are deductible from the CIT base if the debt was not settled within 365 days from the due date.

### Charitable contributions
Grants made or assets that are transferred without consideration, as well as liabilities assumed or services provided free of charge, will qualify as business expenses if the taxpayer has a declaration from the recipient stating that the recipient's profit will not be negative without the income received.

Grants will always qualify as non-business expenses if they are provided to a foreign person or foreign resident company.

In the case of film and sports (football, basketball, handball, ice-hockey, and water polo) sponsorship grants, the amount of support is deductable both from the CIT base (as an expense) and from the CIT amount, provided that an official sponsorship certificate is available.

### Employee benefit expenses
Employee benefits and the fringe benefit tax payable on them are tax-deductible.

### Fines and penalties
Fines and penalties are not deductible for CIT purposes.

### Bribes, 'kickbacks', other illegal payments
Bribes, 'kickbacks', and illegal payments are not recognised as business costs for CIT purposes and are non-deductible from the tax base.

### Net operating losses
Losses can be carried forward indefinitely, and the Tax Authority's approval is not required. However, the Tax Authority may later audit whether a company has exercised

its rights in accordance with the intended purpose of these rights when carrying losses forward. Furthermore, from 2011, financial institutions can also carry losses forward.

Note that earlier tax losses must be used first (FIFO principle), and the losses of predecessors are also deductible from the successor company's CIT base.

Losses cannot be carried back (except for agricultural companies, who may account deferred losses by self-revision or by correcting the amount of tax paid in the previous two tax years).

### *Payments to foreign affiliates*

There is no general restriction on the deductibility of a consideration due to a foreign entity provided the payment is a justifiable business cost. General anti-avoidance provisions (abuse of law, substance-over-form) may also result in non-deductibility. If the parties are considered to be related parties under the definition of the CDTA, the Hungarian tax office is entitled to adjust the Hungarian party's tax base to reflect the market price (arm's-length price) if the parties did not make the adjustment themselves.

Considerations due for services are only deductible if the actual performance of the services is supported and the Hungarian taxpayer can prove that it benefits from the service.

Thin capitalisation rules may apply to interest on any non-banking debt in excess of three times the equity *(see Thin capitalisation in the Group taxation section)*.

The consideration paid to a CFC is not deductible for CIT purposes unless the taxpayer is able to prove that it serves the purposes of business operations. *For further details on the CFC rules, see the Group taxation section.*

## *Group taxation*

Group taxation is not available for CIT purposes in Hungary. *See Value-added tax in the Other taxes section for a description of group taxation for VAT purposes.*

### *Transfer pricing regime*

If parties qualify as related parties (as defined in the Hungarian CDTA) and the price applied differs from the arm's-length price, the CIT base should be modified by a proper transfer pricing adjustment. In addition, the foreign PEs of a Hungarian company and the Hungarian head office also qualify as related entities and are subject to transfer pricing regulations.

Taxpayers are obliged to prepare transfer pricing documentation on intra-group transactions. The documentation has to be prepared for every contract between related parties (including in-kind contributions made at the time of establishment).

As of 2011, when determining the transfer prices applied between related companies, in addition to the traditional methods (comparable uncontrolled price, resale-minus, and cost-plus methods), it is also possible to use the transactional net margin method and the profit-split method. In addition to these methods, companies may continue to use other methods if the traditional methods are inadequate.

Taxpayers are allowed to prepare two types of documentation (as opposed to the previous practice): country-specific documentation or consolidated transfer pricing documentation. Taxpayers may prepare consolidated transfer pricing documentation if this does not jeopardize comparability, and the contracts:

- have the same subject matter and all their terms and conditions are identical or only slightly different or
- closely relate to each other.

Taxpayers are required to make a declaration in their CIT returns as to which type of documentation they choose.

In summary, the requirements of the country-specific documentation have not changed as of 2010 compared to previous documentation requirements. This type of documentation must include, for example, the following:

- A functional analysis.
- Industry and company analyses.
- An economic analysis.
- A financial analysis.
- An account of the process of selecting the transfer pricing methodology.

Consolidated transfer pricing documentation must consist of two main parts:

- The core documentation, which includes the standard data for each company within the group which is resident in any EU member state.
- Country-specific documentation, which describes the agreements between the taxpayer and its related parties.

The documentation has to be available no later than the filing deadline for the CIT return in any given year, otherwise the Tax Authority may assess a default penalty up to HUF 2 million for each case of missing or deficient documentation. Note, however, that this documentation only has to be prepared and kept in the company's files, rather than being filed with the Tax Authority.

### *Thin capitalisation*

Thin capitalisation rules may apply to interest on any non-banking debt in excess of three times the equity.

Where debt means the average daily balance of outstanding loans, outstanding debt securities offered privately and bills payable (with the exception of bills payable on account of suppliers' debts), and any other liability other than loans, debt securities, and bills payable shown in the balance sheet that entails the payment of interest from the taxpayer's profit (with the exception of debts of credit institutions and financial companies incurred in connection with and for the purposes of financial service activities); and equity means the average daily balance of subscribed capital, capital reserve, retained earnings, and tied-up reserves (or own funds of the like).

### *Controlled foreign company (CFC) regime*

CFCs are foreign persons or entities established abroad and/or foreign resident entities if, among other conditions, they are owned by a resident private individual/entity who is deemed to be the beneficial owner (i.e. has a certain ownership share or voting ratio or dominant influence in the enterprise) or if the majority of their income derives from Hungarian sources and, in both cases, the effective tax rate of the persons/entities is lower than 10%. Certain exceptions may be available (for companies in EU member states, OECD member states, and treaty countries, if a real economic presence can be proved).

## Tax credits and incentives

### Foreign tax credit

Foreign tax credit is available for income taxes paid abroad, up to the Hungarian tax payable on the creditable income (at a maximum of 90% of income tax paid abroad) after increasing the tax base by the tax paid abroad.

The foreign income has to be classified by country of origin and revenue type. The deducted tax may not exceed the lesser of either the applicable foreign tax or the applicable tax based on the taxation treaty between Hungary and the given country.

If there is no taxation treaty, 90% of the tax payable abroad is credited against the tax liability up to a hypothetical tax liability calculated by using the average Hungarian tax rate. Full tax credit is applicable if so described by a tax treaty. The average tax rate is the CIT rate, reduced by the applicable tax allowances, divided by the tax base. Indirect costs should be allocated in proportion to the revenue of the branch office to the total revenue of the whole company, as per Section 28 (4) of CDTA.

### Development tax incentive

Each development tax incentive may be claimed for a ten-year period (beginning on the completion of the development) on the CIT returns over a maximum period of 14 years from the original application for the incentive. In any given tax year, the tax incentive is available for up to 80% of the tax payable but in total up to the state aid intensity ceiling. Applications for the tax incentive only have to be submitted to the Ministry of Finance if the aggregated eligible costs of the investment exceed EUR 100 million. If the investment is below this threshold, taxpayers only need to notify the Ministry of Finance before starting the investment. Tax incentives are available for investments if:

- the current value of the investment is at least HUF 3 billion or
- the current value of the investment is at least HUF 1 billion in certain designated areas and provided that:
  - the investment results in the creation of new facilities or the extension of existing facilities
  - the investment results in substantially changed products or production processes (excluding investments in basic research, applied research, and experimental development), or
  - in the four years following the year in which the tax incentive is first used against the tax base:
    - the annual average number of employees has increased by at least 150 compared with either the year before the investment was made or the average number of employees for the three years preceding the investment (by 75 in certain designated areas) or
    - the annual wage costs have increased by 600 times the minimum wage effective on the first day of the tax year (by a multiple of 300 in certain designated areas) compared with either the annual wage costs of the year before the investment was commenced or the average annual wage cost for the three years preceding the investment.

Provided that the investment results in the creation of new facilities or the extension of existing facilities, or substantially changed products or production processes, the government may also grant incentives to companies that invest:

- at least HUF 100 million in equipment for zoogenic food production
- at least HUF 100 million in environmental protection projects
- at least HUF 100 million in broadband Internet services
- at least HUF 100 million in the production of films and videos
- at least HUF 100 million in basic research, applied research, and experimental development projects
- at least HUF 100 million in projects financed by an issue of stock market-quoted shares, if (i) the project is started before the last day of the third calendar year following the date of issue, (ii) the total nominal value of the shares issued by the fifth year following the start of the project continuously reaches 50% of the value of the registered shares, (iii) the total issue price reaches 50% of the eligible costs, and (iv) at the date of the application for the incentive the company has at least 25 shareholders or at least 25% of the issued shares are owned by shareholders where each of them does not have more than 5% of the issued shares' nominal value, and
- at least HUF 500 million in projects initiated by small and medium-sized enterprises, if certain criteria are met.

Tax incentives may also be granted for projects that create new jobs. The restrictions prescribed in the CDTA regarding the headcount of staff and the percentage of new entrants to the labour market that may be claimed for such investments have been abolished, although the conditions prescribed in the relevant decree must still be met.

### *Tax holidays*

Ongoing tax holidays granted before Hungary's accession to the European Union can be used until 31 December 2011.

### *Other tax incentives*

Film production companies that receive a state subsidy for their activity may deduct the amount of the subsidy from their CIT base.

A tax incentive is available for small and medium-sized enterprises (basically, those with a maximum of 250 employees; annual net revenue of a maximum of EUR 50 million; or a maximum annual balance sheet total of EUR 43 million). Taxpayers that take a loan from a financial institution for the acquisition or production of tangible assets may deduct 40% of the interest paid on the loan from their tax due, up to a maximum deduction of HUF 6 million. However, taxpayers engaged in certain business sectors cannot use this tax incentive (e.g. transportation, agricultural activity).

In the case of software development, a taxpayer may decrease its calculated CIT by 10% (or 15% in the case of small and medium-sized companies) of wage costs which were accounted for as the costs of basic research or applied research or experimental development or which arose through employing software developers. The tax incentive may be claimed in the tax year in which these costs are incurred and in the following three years, in equal instalments. However, the tax incentive claimed may not exceed 70% of the calculated CIT decreased by the tax incentives specified in the CDTA (including development tax incentives).

In addition, a new type of tax allowance may be used in the future to support team sports (football, basketball, handball, ice-hockey, and water polo). The regulations on tax allowances related to supporting team sports will take effect 15 days after the European Commission's approval.

## Withholding taxes

Under the domestic rules, there is no WHT on dividends, interest, or royalties.

As of 1 January 2011, foreign organisations are no longer subject to 30% WHT on interest, royalties, and service fees received from Hungarian resident companies.

Hungary has an extensive treaty network with maximum WHT rates as follows:

| Payer (1) | Dividends (%) | Interest (%) | Royalties (%) |
|---|---|---|---|
| Albania | 5/10 (2) | 0 | 5 |
| Australia | 15 | 10 | 10 |
| Austria | 10 | 0 | 0 |
| Azerbaijan | 8 | 8 | 8 |
| Belarus | 5/15 (2) | 5 | 5 |
| Belgium | 10 | 15 (3) | 0 |
| Brazil | 15 | 10/15 (4) | 15/25 (5) |
| Bulgaria | 10 | 10 | 10 |
| Canada | 5/10/15 (6) (7) | 10 | 10 |
| China, P.R (8) | 10 | 10 | 10 |
| Croatia | 5/10 (2) | 0 | 0 |
| Cyprus | 15/5 | 10 | 0 |
| Czech Republic | 5/15 (2) | 0 | 10 |
| Denmark | 5/15 (2) | 0 | 0 |
| Egypt | 15/20 | 15 | 15 |
| Estonia | 5/15 (2) | 10 | 5/10 (10) |
| Finland | 5/15 (2) | 0 | 5 |
| France | 5/15 (2) | 0 | 0 |
| Germany | 5/15/25 (2) | 0 | 0 |
| Greece | 10/45 | 10 | 10 |
| Hong Kong | 5/10 (12) | 5 | 5 |

Notes

1. List of the DTTs Hungary is a party to and the highest rates of WHT a foreign-source country may charge on (the gross) income paid to Hungarian residents.
2. The lower rate applies if the recipient has a stake of at least 25% in the distributing company.
3. Interest is exempt if paid in respect of (i) commercial claims (including claims represented by negotiable instruments) and instalment payments for the delivery or supply of goods and/or services, (ii) current accounts or registered loans placed by a financial institution, and (iii) funds and deposits not represented by bearers' securities placed at any of the financial institutions (including public credit institutions).
4. 10% applies to bank loans used for industrial purposes, R&D, or public works.
5. 25% applies to royalties paid for the use of or the right to use trademarks.
6. The lower rate applies if the recipient has control, directly or indirectly, of 25% of the voting rights in the distributing company.
7. 10% is applicable if a non-resident owned investment corporation pays dividends to a recipient that has control, directly or indirectly, of 25% of the voting rights in the distributing company.
8. The China-Hungary Treaty does not apply to Hong Kong.
9. The lower rate applies if the recipient has a stake of at least 40% in the distributing company.
10. The lower rate applies to royalties for the use of industrial, commercial, or scientific equipment, or for transmission by satellite, cable optic fibre, or similar technology.

11. The same rate applies to technical service fees.
12. The lower rate applies if the recipient has a stake of at least 10% in the distributing company.
13. Cultural royalties are exempt.
14. The lower rate applies if the recipient (other than a partnership) has a stake of at least 25% in the distributing company.
15. The lower rate applies if the recipient has a stake of 25% in the distributing company that carries out industrial activities.
16. 10% applies if the recipient of the interest is a financial institution, including an insurance company.
17. The lower rate applies if the recipient has voting stock of at least 10% in the distributing company.
18. 10% applies to technical service fees.
19. If a lower rate is set in a treaty or agreement or minutes between India and any OECD country (excluding Hungary), then this lower rate should also be applied for India-Hungary.
20. 5% applies for the use of industrial, commercial or scientific facilities or for transmissions by means of satellite, cable, optical fibre, or any similar technology.
21. 5% for commission.
22. 0% on interest paid on inter-bank loans.

## Tax administration

### Returns

CIT must be calculated by reference to the accounting year, which is either the calendar year or, for group companies, the group's accounting year. Returns must be lodged within 150 days following the last day of the accounting year. The tax payable is determined by self-assessment.

Tax returns may be submitted either electronically or in paper format. However, those who are legally obliged to submit monthly tax and contribution returns (e.g. employers and payers) may only submit tax returns electronically.

### Payment of tax

CIT instalments must generally be reported and paid quarterly or monthly (above HUF 5 million tax payable). In the case of taxpayers with net sales revenues of over HUF 100 million, 100% of the expected final payment is due by the 20th day of the last month of the accounting year. However, a late payment penalty is only levied if the company fails to pay at least 90% of the expected final payment by the above deadline. The late payment penalty is 20% of the difference between the tax advances paid (including the top-up payment) and 90% of the actual CIT liability.

### Statute of limitations

In general, the statute of limitation is five years from the end of the calendar year in which the tax return should be filed. Self-revision interrupts the term of limitation.

### Topics of focus for tax authorities

The tax authority will take more stringent measures against 'aggressive tax planning' (tax planning that takes advantage of unintended administrative or legal loopholes) using its international experience and cooperation agreements.

Generally, the following categories of taxpayers may expect to be scheduled for tax audits:

- Taxpayers whose records show frequent changes in registered address or ownership.
- Businesses that have operated for several years with substantial loans from their shareholders.
- Taxpayers that declared significant amounts of payable and deductible VAT during their pre-company period.
- Taxpayers that have been in continuous operation despite continuing losses.
- Taxpayers that spend a significant portion of their sales revenues on services.

- Taxpayers that have significant tax base decreasing items, tax allowances, and subsidies related to investments.
- Taxpayers that deduct R&D expenses.

The tax authority will also pay more attention to the actual content of transactions conducted between related parties and to the methods companies use to determine the arm's-length price.

## *Other issues*

### *Principal forms of doing business*

- Branch.
- Partnership.
- Limited liability company.
- Private company limited by shares.
- Public company limited by shares.

### *Mergers and acquisitions (M&A) from a business and tax perspective*

Mergers in Hungary are tax-free transformations provided that they qualify under the definition of preferential transformation. Preferential transformation means that a company, without going into liquidation, transfers all its assets and liabilities to another company in exchange for the issue to its shareholders of securities representing the capital of that other company, and a cash payment not exceeding 10% of the nominal value, or, in the absence of a nominal value, of the accounting par value of those securities.

In a preferential transformation, the predecessor company does not have to amend its tax base by the difference between the adjusted book value and the book value. The adjusted book value means the historical value of assets less any depreciation deducted from the tax base plus the readjusted amount of extraordinary depreciation. Furthermore, for shareholders, the income accounted in excess of the historical value of the shares they acquire in the preferential transformation is also not taxable for CIT purposes for as long as the shareholder holds its participation.

In any other case, if two companies merge, the difference between the market value and the book value of the assets and liabilities is taxable for the successor company. Furthermore, the predecessor company may decrease its tax base by the amount of the difference between the adjusted book value of its assets and their book value if the adjusted book value is the higher of the two. The company will increase its tax base if the book value is higher than the adjusted book value.

### *International Financial Reporting Standards (IFRS) adoption*

Since 2005, companies defined in Section 4 of Decision no. 1606/2002/EC (mainly companies listed on the stock exchange) have had to prepare their consolidated annual reports according to the IFRS, although it was possible to obtain an exemption until 2007 due to the ongoing harmonisation of the Hungarian regulations. However, non-listed subsidiaries of EU-listed entities are exempt from the preparation of IFRS consolidated financial statements. If a company chooses IFRS, Hungarian Accounting Rules (HAR) financial statements must also be prepared and filed with the Court of Registration.

## Significant developments

### Corporate income tax (CIT)

In January 2011, the following taxes were raised:

- CIT rate for limited liability companies was raised from 18% to 20%.
- CIT rate for partnerships was raised from 32.7% to 36%.
- Capital income tax was raised from 18% to 20%.

### Dividends as remuneration

Taxpayers who are self-employed and are required to determine remuneration for themselves shall file 50% of the received dividends, as per laws on limited companies, as salary income insofar as the company's allowed dividend distribution totals more than 20% of its tax net worth (book value) at the end of the fiscal year.

### Value-added tax (VAT)

As of 1 January 2011, those who sell goods or services for under 1 million Icelandic kronur (ISK) every 12 months do not have to register for VAT purposes. This limit used to be ISK 500,000.

Those who sell goods or services for less than ISK 3 million only need to file VAT returns once a year instead of the average of six times a year.

Conditions for VAT registrations have become stricter.

A penalty of ISK 5,000 is applied for late submission of a VAT return. This also applies to null returns.

VAT filing is electronic unless a special permission is granted by tax authorities to file on paper.

### Tax on financial services

Financial services permitted to operate as banks and savings banks are subject to 0.041% tax on total debt at year end.

### Deduction for dividends and capital gains from sales of shares

Received dividends and gains from sales of shares can only be deducted if the ownership of the company paying dividends or being sold is at least 10%. Also beginning in and including the 2012 fiscal year, all operating loss carryforward will be required to be offset before any deduction is allowed.

### Forgiveness of debt
Temporary rules stating that forgiveness of debt is not implicitly to be treated as taxable income were introduced. The rules also include a possibility to distribute a part of forgiven debt over the period of 2015 to 2019.

### Pending legislation
Please note the information in this summary is current as of 1 June 2011. Typically, pending legislation is announced in June. Please visit the Worldwide Tax Summaries website at www.pwc.com/taxsummaries to see any significant corporate tax developments that occurred after 1 June 2011.

## Taxes on corporate income

Resident corporations pay tax on their worldwide income less operating expenses. Deductible operating expenses are comprised of all the expenses and costs needed to provide, insure, and maintain income.

CIT for limited liability companies and limited partnership companies is assessed at a rate of 20%.

CIT for other types of legal entities (e.g. partnerships) is assessed at a rate of 36%.

## Corporate residence

In general, all corporations incorporated and registered in Iceland are considered to be tax residents in Iceland. The same applies to corporations which have their home address in Iceland according to their articles of association or if the management of the company is carried out in Iceland.

Foreign corporations are regarded as Icelandic tax residents if the effective management is carried out in Iceland.

The Internal Revenue Directorate can decide with a ruling whether a corporation's residence is in Iceland. The ruling can be appealed to a court of law.

## Other taxes

### Valued-added tax (VAT)
VAT was established in Iceland with the Value Added Tax Act no. 50/1988 which came into effect on 1 January 1990. VAT is a consumption tax levied on all stages of domestic business transactions. VAT is levied on all goods and services, as well as on the imports of goods and services, unless specific exemptions apply.

#### VAT rates
The general VAT rate is 25.5%.

The following goods and services are subject to a reduced VAT rate of 7%:

- Rental of hotel and guest rooms and other accommodation.
- Subscription to radio and television.
- Newspapers, periodicals, and magazines.

- Books, both Icelandic and translated, and well as their audio recordings.
- Geothermal hot water, electricity, and fuel oils used for heating houses and swimming pools.
- Food and other consumables for people as detailed in an addendum to the Value Added Tax Act.
- Access to roads and other transport related constructions.
- Compact discs, records, audiocassettes, and other equivalent mediums for music only and not videos.

Certain services and goods are zero-rated, which means that there is, in fact, no VAT charge. All VAT information for zero-rated services and goods must be shown on invoices, and the transactions, as well as input VAT which can be reclaimed, must also be included in VAT returns. Zero-rated VAT mainly applies to exported goods and services provided abroad. As per Article 12 of the VAT Act, the following are zero-rated:

- Export of goods and services. Output tax is not levied on goods exported from the country nor on and services provided abroad.
- Transport of goods between countries. The same applies to domestic transport of goods when the transport is part of a contract for the transport of goods between countries.
- Production of goods at the expense of a foreign party when the production company exports the goods upon completion, as well as the processing and formation of goods at the expense of a foreign party when the production takes place abroad.
- The design, planning, and other comparable services related to construction and other real property abroad.
- Provisions, fuel, instruments, and other equipment delivered for use on board of inter-country vessels, as well as the service provided to such vessels. This exemption does not cover fishing vessels selling their catch abroad, pleasure boats, or private aircraft, only vessels used for the transport of freight.
- The sale and leasing of aircraft and ships. This exemption does not cover boats less than six metres in length, pleasure boats, or private aircraft.
- Shipbuilding and repair and maintenance work on ships and aircraft and their fixed equipment, as well as materials and goods used or provided by the company providing the repair work. This exemption does not cover boats less than six metres in length, pleasure boats, or private aircraft.
- Contractual payments from the Treasury related to the production of milk and sheep farming.
- Services provided to foreign fishing vessels related to the landing or sale of fish catches in Iceland.
- A service of refunding VAT to parties domiciled abroad.
- Sales of services to parties neither domiciled nor having a venue of operations in Iceland, provided that the services are wholly used abroad. A taxable service provided in connection with cultural activity, arts, sports, education, and other similar activity taking place in Iceland, and is tax-exempt cf. Paragraph 3, Article 2 of this Act, is always deemed as being used here. Sales of services to parties neither domiciled nor having a venue of operations in Iceland are, in the same manner, exempt from taxable turnover, even if the service is not wholly used abroad, provided the purchaser could, if its operations were subject to registry in Iceland, count the VAT on the purchase of the services as part of the input tax, cf. Articles 15 and 16. The following services come under this point:
  - The sale or lease of copyright, patent rights, registered trademarks and copyrighted designs, and the sale or lease of other comparable rights.
  - Advertising services.

- Services of consultants, engineers, lawyers, accountants, and other similar specialised services as well as data processing and delivery of information, except for labour or services related to liquid assets or real property in Iceland.
- Electronic services; these services are considered used where the buyer is domiciled or having a venue of operations; the same applies to data centres' sale of mixed services to buyers neither domiciled nor having a venue of operations in Iceland.
- Obligations and duties related to business or production activity or the use of rights listed under this point.
- Employment agency services.
- The rental of liquid assets, except for means of transport.
- The services of agents acting on behalf of others and for their account as regards the sale and delivery of services listed under this point.
- Telecommunications services.

### VAT-able entities

Businesses engaged in the trade of taxable goods and services for business purposes must register and collect VAT.

### Services exempt from VAT

The Value Added Tax Act details certain services that are exempt from the tax, such as healthcare services, social services, the operation of schools, various education services, cultural activities, athletic activities, passenger transportation, postal services, sale of real estate (not including the rental of hotel and guest accommodation), rental of car workshops, insurance activity, services of financial banks as well as securities trading, lotteries and betting pools, artistic activities, services of travel agencies, funeral services, and all services of ministers of the church.

Those selling taxable goods and services totalling less than ISK 1 million per year are also exempt from paying VAT.

### Agents for non-resident parties

Non-residents who are engaged in taxable transactions in Iceland but are neither domiciled nor have permanent residence in Iceland must appoint VAT agents with residence in Iceland to report on their behalf. Both parties are liable for the VAT payments (responsible for ensuring remittance of VAT). If a non-resident does not appoint a VAT agent, the purchaser of the services/goods is responsible for paying the VAT (reverse charge).

### Tax base

Tax base is the price the buyer pays for goods or services before VAT is added and before any costs or service expenses are deducted from the price. VAT is therefore added to the sales price.

### VAT accounting periods and due dates

VAT is generally filed and paid on a bi-monthly basis for the following periods: January and February; March and April; May and June; July and August; September and October; November and December. The due date for payment of VAT is one month and five days after the end of the settlement period. For example, the due date for the January and February payments is 5 April.

If the VAT is not paid on the due date, a 1% penalty charge is added for every day up to a total of 10%. Late penalty interests also apply.

Should the total input tax exceed the total output tax, the Treasury will refund the difference within 15 days from the due date.

Those selling goods and services totalling less than ISK 3 million during a full calendar year can return the VAT payments on a yearly basis. The due date for filing and paying is 5 February each year.

Parties that do not file a VAT report within the required deadline will have their VAT estimated. The tax authorities are allowed to deregister parties of VAT register if they have had their VAT estimated for two years or longer.

If a VAT report is submitted after the tax authorities have estimated VAT, a penalty of ISK 5,000 is imposed.

### VAT reimbursement

Under the provisions of Regulation no 288/1995, issued by the Ministry of Finance, foreign enterprises, which are neither residents of Iceland nor have a permanent establishment here, may obtain reimbursement of VAT paid on goods and taxable services which have been purchased or imported for the commercial purposes of such enterprises in Iceland after 1 March 1995.

Such reimbursement can be effected to foreign enterprises that would be subject to registration in Iceland according to Article 5 and Article 6 of the Value Added Tax Act if the enterprises in question were engaged in such business in Iceland. This means that such enterprises as travel agencies, insurance companies, banks, and other financial institutions cannot obtain such reimbursement.

Another prerequisite shall be that the enterprise shall have sold neither goods nor taxable services in Iceland during the period to which the application refers.

Any reimbursement of VAT to foreign enterprises shall be only to the same extent as Icelandic enterprises can include the VAT on purchases of a corresponding nature in the tax on purchases according to Article 15 and Article 16 of the Value Added Tax Act.

No reimbursement shall thus be granted in respect of VAT on purchases relating to meals for the owners and employees of the enterprises or relating to entertainment expenses and presents.

Parties domiciled abroad can get partial VAT reimbursement on goods they have bought in Iceland if they take them abroad with them within three months from the date of purchase. They then must provide the goods, along with any necessary documents, to the appropriate reimbursement company or to the customs authorities on the date of departure, and the purchase price must amount to at least ISK 4,000.

## *Property taxes*

A municipal property tax is applied on the assessed value of real estate in Iceland.

## *Customs duties/import tariffs*

Iceland, Liechtenstein, Norway, and Switzerland are members of the European Free Trade Association (EFTA). The EFTA Convention established a free trade area among its member states. In addition, the EFTA states have jointly concluded free trade agreements with a number of countries in Central and Eastern Europe as well as in the Mediterranean region, Mexico, and Singapore. Also the EFTA states entered into the Agreement on the European Economic Area (EEA) in 1992. The current contracting parties are, in addition to the three EFTA states, the European Community (EC) and the 15 EC member states. Iceland also has a bilateral agreement with its two neighbouring countries, Greenland and Faeroe Islands.

### *Excise tax*
Excise tax is levied on a variety of goods, specified in the Icelandic Excise Tax Act. The tax base is either the quantity of the product or a specific percentage of the manufacturing price of taxable goods.

### *Turnover taxes*
There is an agricultural charge of 1.20% of agricultural turnover.

### *Stamp taxes/transfer taxes*
Stamp duty is levied on the execution of various documents at rates ranging from 0.4% to 2%.

A stamp duty of 0.5% is levied on the nominal value of all new share certificates issued to shareholders in a public limited liability company. Private limited companies are not required to issue share certificates and, therefore, are not subject to stamp duty.

The endorsement of documents is generally not subject to stamp duty.

When issuing deeds and purchase agreements of real estate and land, a 0.4% stamp duty is levied on the officially registered value of the real estate. The same applies to the deeds and purchase agreements of ships. Lease agreements are subject to a 2% stamp duty of the rental price.

### *Taxes on natural resources*
#### Carbon tax
A carbon tax for liquid fossil fuels is paid to the treasury. Liquid fossil fuels are gas and diesel oils, petrol, aircraft and jet fuels, and fuel oils. All importers of fossil fuels are liable for the carbon tax regardless of whether it is for retail or personal use. The tax rate is:

- ISK 4.35 per litre of gas and diesel oils.
- ISK 3.80 per litre of petrol.
- ISK 4.10 per litre of aircraft and jet fuels.
- ISK 5.35 per kilo of fuel oil

#### Tax on electricity/hot water
A special tax is collected from parties that sell electricity and/or hot water to end users.

#### Carbohydrate tax
Corporations licensed for carbohydrate investigations, research, and/or processing, as well as anyone who directly or indirectly participates in the processing or distribution of carbohydrates, must either pay a processing tax, which is independent of processing performance, or a carbohydrate tax, which is collected after the processing starts making a profit.

### *Other taxes*
There is a National Broadcasting Fee of ISK 17,900 per year.

## Branch income

A branch is treated as an extension of a trading activity of the overseas parent company incorporated in another jurisdiction and is not a separate legal entity.

Due to the fact that a branch acts in the name of the overseas parent company, a branch's income is taxable in accordance with the parent company (i.e. if the parent company is a limited liability company, the branch is subject to a CIT rate of 20%).

Tax treaties may allow Icelandic CIT as a credit against foreign income tax imposed on the parent company.

There is no branch profits remittance tax on the repatriation of profits to the parent company.

## Income determination

Resident corporations pay tax on their worldwide income less operating expenses.

### Inventory valuation

The valuation method of raw materials and finished goods is on a first in first out (FIFO) basis or via the average cost method. When computing the value of produced goods, both direct and indirect production cost must be taken into account. For tax purposes, inventories can be further written down at a rate of 5% of calculated value.

Last in first out (LIFO) is not permitted.

### Capital gains

Capital gains are treated as taxable income in the year that transfer of ownership occurs and, as such, taxed as part of the general corporate income. Capital gains are generally not subject to withholding tax (WHT). There are rules that allow full deduction of net capital gains from the sale of shares, provided certain conditions are met; so, in general, corporations are not subject to taxation on capital gains from sale of shares.

### Dividend income

Dividend income is treated as taxable income and taxed as a part of corporate income. There are extensive rules that allow full deduction of the dividend, provided certain conditions of ownership (time and quantity) are met; so, in general, corporations are not subject to taxation on dividends. Dividends are subject to WHT (currently 20%), which is a temporary payment towards the final tax assessment.

### Foreign income

Income earned abroad is generally taxed as a part of corporate income since a resident company is subject to CIT on its worldwide income.

Controlled foreign company (CFC) rules stipulate that profits of companies in low-tax jurisdictions must pay income tax of such a profit in direct proportion to shares, regardless of distribution. A low tax jurisdiction is defined as a jurisdiction where the CIT rate is less than two-third of the Iceland´s tax rate (i.e. 13.3%, being two-thirds of 20%). *See Controlled foreign company (CFC) regime in the Group taxation section for more information.*

Double taxation of foreign income is avoided either through tax treaties or domestic tax provisions.

## Deductions

Deductible operating expenses are comprised of all the expenses and costs needed to provide, insure, and maintain income (e.g. interest expense, employee expense, travel expense, insurance expense).

### Bad debt

As a general rule, 5% of bad debt can be written off. Certain conditions must be met in order to write off a higher percentage of bad debts.

Temporary provisions in Icelandic tax law allow corporations to make a credit entry for only 50% of debt write-off totalling ISK 50 million and 75% of debt write-off for amounts over ISK 50 million in income years 2009-2011. The requirement for the provision is that the debt is business-related and operating loss and transferable loss has been offset.

The debt write-off can be carried forward from the income year 2010 to the income year 2014. The transferrable amount that can be carried forward on a yearly basis is the amount that exceeds the transferable operating losses and the possible operating loss, tax depreciation, and write-down each year. All assets that can be depreciated have to be depreciated and all possible write-downs on receivables and stock have to be done to fulfil the requirements of the provisions. No dividend can be distributed for the income years 2010-2014 and the company can also not be merged, wound up, or be jointly taxed with another company during the period. At the end of this five year period (i.e. at the end of the income year 2014), it will be possible to transfer any debt write-off that exceeds ISK 500 million as profit with an equal amount each year from the income year 2015 to the income year 2019. If the write-off does not exceed ISK 500 million, the amount will not be subject to taxation.

### Charitable contributions

Charitable contributions up to 0.5% of total income are deductible.

### Depreciation

| Assets | Depreciation rate (%) |
|---|---|
| Ships, ship equipment, and personal vehicles | 10 to 20* |
| Aircraft and accessories | 10 to 20* |
| Heavy machinery, industrial machinery, and equipment | 10 to 30* |
| Office equipment | 20 to 35* |
| Machinery, equipment, and vehicles that are not covered in the above categories | 20 to 35* |
| Residential, commercial, and office accommodation | 1 to 3 |
| Factory buildings, garages, warehouses, etc. | 3 to 6 |
| Purchased proprietary rights for ideas and trademarks, such as copyrights, publishing rights, information rights, patents, and logos | 15 to 20 |
| Purchased goodwill | 10 to 20 |

*The depreciation base for these assets is their purchase value less earlier depreciations (book value).

### *Start-up expenses*
Purchased fishing rights (quotas) cannot be depreciated.

Start-up costs for agricultural production rights can be depreciated without revaluation over five consecutive years. The following assets can be depreciated in full in the year they are initiated or paid with steady payments over five years:

- Start-up costs, such as enterprise registration and obtaining operation licences.
- Cost of research, developments, marketing, obtaining patents and trademarks. If the use of individual assets does not fall into the same depreciation category, the depreciation base will be dependent on how much of it is used, so that if an asset is used for three-quarters or more for the same operation, the whole asset will have the same depreciation percentage.

### *Goodwill*
Purchased goodwill can be written down at 10% to 20% per year.

### *Pension expenses*
Payments to obligatory pension funds for employees at a minimum of 8% of wages are deductible.

### *Fines and penalties*
Fines and penalties are not deductible.

### *Bribes, kickbacks, and illegal payments*
Bribes, kickbacks, and other illegal payments are not deductible.

### *Net operating losses*
Operating losses may be deducted from income from business and independent economic activity. Tax losses can be carried forward ten years and utilised over ten years from the year that the loss was incurred.

No carryback of losses is allowed.

### *Payments to foreign affiliates*
An Icelandic corporation can claim a deduction for royalties, management fees, and similar payments made to foreign affiliates, provided that such amounts are made on an arm's-length basis and reflect services received. Interest at normal commercial rates paid to foreign affiliates generally will be allowed as a deduction conditional though that the loan terms are comparable to those that would have been agreed upon by unrelated parties.

## *Group taxation*

Companies may opt for consolidated taxation if a company owns at least 90% share in another company. Consolidated taxation means, among other things, that losses of one company can be offset against profits of other companies. Consolidated taxation cannot be extended to non-resident companies or permanent establishments of foreign companies.

### *Transfer pricing*
The statutory authority for addressing transfer pricing issues is found in the application of general legal concepts, such as the anti-avoidance rule.

Article 57 of the Icelandic Income Tax Act No. 90/2003 (originally included in the tax code in 1971) includes a general anti-avoidance rule that states that business transactions between all parties should be based on the arm's-length principle. With reference to the general concept of this Article, tax authorities can, in cases where transfer prices are not at arm's length, adjust the taxpayer's revenues and expenses in order to reflect market value. These adjustments can be performed only within the domestic statute of limitation period, i.e. six years. Authorities have thus based their transfer pricing conclusions on Article 57.

The Income Tax Act includes several separate rules that can be identified as transfer pricing rules, but those rules generally concern transactions between individuals and not companies, including a rule that obligates employees who receive their wages in kind to account for them on their tax return based on market value.

### *Treatment of inter-company dividends*
Inter-company dividends are deductible if loss of the year and carry forward losses have been offset. Another condition is that the receiver of the dividend must own at least 10% of the company paying the dividend at the end of the year which the dividend payment is related to.

### *Thin capitalisation*
There are no specific rules regarding thin capitalisation in Iceland, but anti-avoidance principles can be applied *(see Transfer pricing above)*.

### *Controlled foreign company (CFC) regime*
Any individual who either directly or indirectly owns a share in any kind of a company, fund, or organisation domiciled in a low-tax jurisdiction must pay income tax on the profit of such corporations in direct proportion to one's own share, regardless of distribution.

The same applies to taxpayers chairing companies, funds, organisations, or associations in a low-tax jurisdiction from which they receive direct or indirect benefits. In order for the above to apply, the foreign party must be domiciled in the low-tax jurisdiction, half the ownership of the foreign party must be directly or indirectly in the hands of Icelandic taxpayers, or they must have effective management and executive control during the income year.

CFC regulations do not apply if a fund or an organisation is protected by a double taxation treaty between Iceland and the low-tax country or if such entities are registered in another EEA member country where they have legitimate business operations and the countries have assigned a double taxation treaty between them.

## *Tax credits and incentives*

### *Temporary Reimbursements in Respect of Filmmaking in Iceland*
On account of Act no 43/1999 on Temporary Reimbursement in Respect of Filmmaking in Iceland, it is possible to have 20% of production expenses incurred in the production of films or television material in Iceland reimbursed. When more than 80% of the total production cost of a motion picture or television programme is incurred in Iceland, the reimbursement shall be calculated from the total production cost incurred within the EEA. Production costs refer to all costs incurred in Iceland deductible from the revenues of enterprises pursuant to the provisions of the Act on Income Tax. Payments pertaining

to employees and contractors are only to be included in production costs if they are verifiably taxable in Iceland.

Application for reimbursement of production costs shall be submitted to the Ministry of Industry. The application, with supporting documentation, shall be submitted before production commences in Iceland.

In assessing whether a proportion of the production costs of a motion picture or television programme shall be reimbursed, the following conditions must be fulfilled:

- The production shall be suitable for promoting Icelandic culture and the history and nature of Iceland.
- The production shall be suitable for enhancing the experience, knowledge, and artistic ambition of the parties involved. A specific company shall be established in Iceland for the production; an Icelandic branch or agency of a company registered in another member state of the EEA shall be considered a specific company.
- Information on the principal parties involved in the film or television programme shall be made available.
- Information on domestic parties and their share in the production of the film or television programme shall be made available.
- An itemised estimate of the production costs and sources of funding shall be made available, together with confirmation by the funding parties and a declaration by the applicant to the effect that the production conforms to the aims of the Act.
- Information about the content of the proposed production of a motion picture or a television programme shall be made available, such as a script and information about filming locations.
- A statement shall be made available to the effect that the material to be produced is intended for general distribution to cinemas or television stations.
- The subject matter of the film or television programming should not violate the provisions of law relating to film inspection and the ban on violent films, nor the provisions of the General Penal Code concerning pornography.

Act No. 43/1999 on Temporary Reimbursements in Respect of Filmmaking in Iceland expires at year end 2011. All projects approved by that date will be reimbursed in accordance with the law.

### *Research and development (R&D)*

Innovative companies are entitled to a special deduction from CIT amounting to 20% of expenses incurred on the projects, provided certain conditions are met.

The maximum amount on which the deduction is calculated within each company shall not exceed ISK 100 million for each operating year. In the case of purchased R&D services, maximum expenses shall not exceed ISK 150 million.

## *Withholding taxes*

Dividends paid to a resident company are subject to a 20% WHT. Dividends paid to a non-resident company are subject to 18% WHT. The final taxation of dividends paid to a company within the EEA is nil, as WHT will be reimbursed in the year following payment upon filing a tax return.

Interest paid to resident company is subject to a 20% WHT, and interest paid to non-resident company is subject to 18% WHT.

Gross royalties paid to a non-resident are taxable at the standard 20% CIT rate and subject to withholding.

| Recipient | Dividends (%) | Interest (%) | Royalties (%) |
|---|---|---|---|
| Non-resident corporations/individuals: | | | |
| Non-treaty | 18/20 | 18/20 | 20/37.31 to 46.21 |
| Treaty rates: | | | |
| Belgium | 5/15 (1) | 10 | 0 |

Notes

1. The lower rate applies to corporate shareholders with a minimum ownership of 10%.
2. The lower rate applies to corporate shareholders with a minimum ownership of 25%.

3. The lower rate applies to copyright royalties (except films, etc.) and royalties for computer software or patent, or for information concerning industrial, commercial, or scientific experience (except information provided in connection with a rental or franchise agreement).
4. The lower rate applies to royalties paid for the use of industrial, commercial, or scientific equipment.
5. The lower rate applies to the right to use computer software or patent concerning industrial, commercial, or scientific experience.
6. The lower rate applies to corporate shareholders with a minimum ownership of 10%, and which has been held for a period of at least 12 months preceding the date the dividends were declared.
7. The lower rate applies to Russian corporate shareholders with a minimum ownership of 25% of capital in the Icelandic company and the foreign capital invested exceeds USD 100,000.
8. The higher rate applies to royalties for the use of trademarks, know-how in relation to a trademark, and films, etc.

## Tax administration

### Returns

The tax year is the calendar year. However, in certain circumstances, the Internal Revenue Directorate can allow a different fiscal year from the calendar year upon application.

At the beginning of every year, the Internal Revenue Directorate determines the time limit for taxpayers to submit their tax returns and supporting documentation. The deadline for receipt of tax returns from corporations is 31 May each year. This deadline is extended upon application. Those who have their tax returns prepared by professional services can have the deadline extended until 10 September each year.

The final assessment must be completed no later than ten months after the end of the income year. Tax assessments for corporations will be available at the end of October.

### Payment of tax

Advance tax payments are due on the first day of every month, except January and October. Corporations pay income tax in advance, which is in turn deducted from the final tax assessment in October each year. The advance tax is collected in the months of February to September and amounts to 8.5% of the 2010 income tax on each due date. In total the advance tax payments amount to 68% of the income tax for 2010. Any deficit remaining when final tax is assessed must be paid in equal instalments in November and December.

Income tax payments on dividends and interest income are due every quarter. Due dates in 2011 are 20 April, 20 July, 20 October, and 20 January, and the final deadline for payment is 15 days later.

### Statute of limitations

Tax authorities in Iceland have the right to reassess tax returns for CIT six years prior to the year of the assessment (i.e. the statutory period of limitation is six years). The statutory period only reaches a maximum of two years in time if tax returns have been filled out properly and all necessary information presented for tax authorities to establish a correct assessment. This means that in the year 2011, tax authorities can, in theory, reassess the company´s tax back to income year 2005.

### Topics of focus for tax authorities

The topic of focus for tax authorities in Iceland is tax avoidance in general.

## Other issues

### Foreign currency financial statements / accounting in foreign currencies

Companies can apply to the Registry of Annual Accounts for an authorisation to keep their books and prepare their annual accounts in a foreign currency. An application must be filed no later than two months before the beginning of the company's fiscal year. The authorisation is valid for five years, and the Registry of Annual Accounts is responsible for ensuring that the authorised companies continue to fulfil one or more of the following necessary conditions:

- The company's main business operations take place abroad or the company is a part of a foreign company group.
- The company owns foreign subsidiaries or shares in foreign companies and its main business transactions are with those companies.
- The company's main place of business is Iceland, while a considerable number of their transactions are in foreign currencies.
- A considerable portion of the company's investments and related debts are in foreign currencies.

If the company deems that it no longer fulfils the conditions, it must notify the Registry of Annual Accounts. The Registry can postpone its decision of the authorisation's discontinuance for two fiscal years if the situation that is causing the fact that the company does not continue to fulfil the necessary conditions is deemed to be temporary.

The average exchange rate for the fiscal year must be used when converting income and expenses, depreciations included, into ISK. The exchange rate at the end of the fiscal year must be used when converting assets, debts, and capital. Exchange rate differences that may arise do not affect income on profit and loss accounts.

### Rules on foreign exchange

In 2008, the Central Bank of Iceland issued new rules on foreign exchange in order to restrict or temporarily prevent certain types of cross-border capital movements or foreign exchange transactions related thereto, which, according to the Central Bank of Iceland, can cause serious and considerable instabilities in exchange rates and financial matters.

The Act on Foreign Exchange defines capital movements as:

- The issue, sale, or purchase of shares, debt instruments, drafts, unit shares in mutual funds, and other long-term and short-term securities.
- Deposits in and withdrawals from accounts with depository institutions.
- Lending, borrowing, and the issue of securities not related to international transactions with goods and services.
- The import and export of share certificates and domestic and foreign currencies.
- Forward contracts, options, currency and interest-rate swaps, and other related foreign exchange transactions in which the ISK is one of the denominated currencies.
- Presents, grants, or other transactions equivalent to the ones detailed above.

### *Capital movements of foreign currencies*
All capital movements of foreign currencies between countries are prohibited, with the exception of payments for the purchase of goods and services or other capital movements specifically exempt from the regulations, according to Rules no. 370/2010 on Foreign Exchange, issued by the Central Bank of Iceland.

### *Capital movements of domestic currencies*
Capital movements between countries in domestic currencies are also prohibited. There are several exceptions to this rule.

Capital movements specifically exempt from the above regulations are as follows:

- Capital movements in relation to the purchase or sale of goods and services (not including lending, borrowing, and the issue of securities not related to international transactions with goods and services) and payments in cash or by withdrawals from an account the buyer has in an Icelandic depositary institution.
- Capital movements in relation to real estate purchases in Iceland or business transactions with securities issued in the domestic currency and payments by withdrawals from an account the buyer has in an Icelandic depositary institution.
- Capital movements in relation to claims from a liquidated company and payments of contractual debts according to composition agreements, according to Act no 21/1991.

## Significant developments

Over the past year there have been numerous developments in the Indian corporate tax regime. The most significant developments are as follows.

### Corporate income tax (CIT)

Indian companies are liable to pay CIT at 30% (plus a surcharge).The rate of surcharge has been reduced from 7.5% to 5% on the amount of income tax if the total income exceeds 10 million Indian rupees (INR). For foreign companies, the rate remained unchanged (i.e. 40% and a 2% surcharge).

### Minimum alternate tax (MAT)

Indian companies are liable to pay MAT on their income. The rate of MAT increased from 19.93% to 20.01% (including surcharge, education cess, and secondary and higher education cess). For foreign companies, the rate has increased from 18.91% to 19.44% (including surcharge, education cess, and secondary and higher education cess). Surcharge is payable only where total taxable income exceeds INR 10 million.

A Special Economic Zone (SEZ) developer, and a unit in an SEZ, is now liable to pay MAT by virtue of amendment to section 115JB by the Finance Act, 2011 with effective from tax year 2011-12. An SEZ is a designated area which has special economic regulations and where an assessee is eligible for a tax holiday.

Limited liability partnerships (LLPs) pay Alternative Minimum Tax (AMT) at an effective rate of 18.5% (plus surcharge, education cess, and secondary and higher education cess) with credit available for up to ten years.

### Withholding tax (WHT)

There are certain specified payments made to residents which are liable for WHT. The WHT for a fiscal year is required to be deposited with the government treasury on or before the due date of the filing of the tax returns; otherwise, the expense payment is not eligible as a tax deductible expense. In relation to payments made to non-residents, or to foreign companies, WHT is now required to be deposited with the government treasury within the timeline provided on a month-to-month basis with effect from 1 April 2012.

### Research and development (R&D) expenditures

The weighted deduction available in respect of expenditures incurred on scientific research in an in-house R&D facility approved by the prescribed authority has been increased from 150% to 200% for companies engaged in specified businesses.

Contributions made to the National Laboratory, approved scientific research associations, universities, and the Indian Institute Technology are now 200% deductible instead of 175% deductible.

### *Conversion of a company into an LLP*

Conversion of a private company, or an unlisted public company, into a LLP will no longer attract capital gains tax, if the following prescribed conditions are fulfilled:

- Turnover or gross receipts of the company being converted do not exceed INR 6 million in any of the three preceding tax years.
- All the assets and liabilities of the company immediately before the conversion become the assets and liabilities of the LLP.
- All the shareholders of the company immediately before conversion become the partners of the LLP and their capital contribution and profit sharing ratio in the LLP are in the same proportion as their shareholding on the date of conversion.
- The shareholders of the company do not receive any consideration or benefit, directly or indirectly, in any form or manner, other than by way of share in profit and capital contribution in the LLP.
- The aggregate of the profit sharing ratio of the shareholders of the company in the LLP is not less than 50% at any time during the period of five years from the date of conversion.
- No amount is paid, directly or indirectly, to any partner out of the balance of the accumulated profit appearing in the accounts of the company on the date of conversion for a period of three years from the date of conversion.

One may also note the following:

- Any unabsorbed business loss or depreciation allowance of the company is eligible for carry forward and set-off in the hands of the successor LLP.
- Any unutilised MAT credit in the hands of a company is not available to the successor LLP.
- Transfer of shares by the shareholders of the company under this conversion will not attract capital gains tax subject to fulfilment of the prescribed conditions.

### *Social Security agreements*

India has, so far, entered into social security agreements with the following eleven countries: Belgium, Germany, France, the Netherlands, Luxembourg, Switzerland, Denmark, Hungary, the Czech Republic, the Republic of Korea, and Norway. However, only agreements with Belgium, Germany, and Switzerland are currently operational.

## *Taxes on corporate income*

For India, the tax year ends on 31 March. A resident company is taxed on its worldwide income. A non-resident company is taxed only on income that is received in India, or that accrues or arises, or is deemed to accrue or arise, in India.

The CIT rate applicable to an Indian company for the tax year 2011-2012 is 30% (plus surcharge, education cess, and secondary and higher education cess). Resident companies are liable to pay surcharge at the rate of 5% on the amount of CIT if the total income exceeded INR 10 million.

Foreign companies operating in India are taxed at 40% (plus surcharge, education cess, and secondary and higher secondary education cess). For tax year 2011-12, surcharge for non-resident companies is 2%.

The education cess is 2%, and the secondary and higher education secondary cess is 1%.

### *MAT*

Resident companies are liable to pay the MAT on their adjusted book profits where the tax liability for the year is less than 20.01% of the adjusted book profits for the tax year 2011-12 (19.93% for assessment year 2011-12). In such cases, the tax liability is fixed at 20.01% of the adjusted book profits of the company.

Non-resident companies are liable to pay MAT on their adjusted book profits from India-sourced income where the tax liability for the year is less than 19.44% of the adjusted book profits from India-sourced income for tax year 2011-12 (18.91% for assessment year 2011-12). In such cases, the tax liability is fixed at 19.44% of the adjusted book profits of the company from India-sourced income.

Surcharge is payable only where total taxable income exceeds INR 10 million.

Sick companies (loss companies which have made losses continuously and may or may not be revived to making profits) are not subject to MAT.

From tax year 2010-11, companies are allowed to take the benefit of carrying forward the credit of tax paid under MAT for ten years.

A SEZ developer and a unit in an SEZ are now liable to pay MAT by virtue of amendment in section 115JB by the Finance Act, 2011 with effect from tax year 2011-12.

### *Tonnage tax scheme*

The tonnage tax scheme can be elected by an Indian company which has a place of effective management in India, owns at least one qualifying ship, and whose main object is to carry on the business of operating qualifying ships. The tonnage tax scheme is in place of CIT and is levied on the basis of tonnage of vessels owned, operated, or chartered by it instead of net income generated by commercial operations.

In relation to non-resident shipping companies that have regular/occasional shipping income, presumptive tax provisions are applicable. Under the tonnage tax scheme, deemed income shall be assessed at a rate of 7.5% of the amount paid or payable (whether in or out of India) for carriage of passengers, livestock, mail, or goods shipped at any port in India and the amount received or deemed to be received in India on account of carriage of passengers, livestock, mail, or goods shipped at any port outside India shall be treated as profits and gains of the business or profession.

Tax rates applicable to a non-resident should take into consideration any treaty provisions.

Under a presumptive tax system, taxpayers can opt to be taxed on their income at a pre-designated tax rate.

A government company, or a public company, formed and registered in India with the main object of operating ships is eligible for a deduction not exceeding 50% of the profits to the extent that it is transferred to a special reserve created for the purpose which is utilised in accordance with the provisions of the Act.

### *Direct taxes code*

A new direct taxes code replacing the existing Income-tax Act, 1961 is proposed and is expected to be introduced by 1 April 2012.

## *Corporate residence*

A company is treated as a resident of India if:

- it is an Indian company, or
- during the tax year, the control or management of its affairs is situated wholly in India.

A company that does not fulfil either of these conditions is treated as a non-resident.

A partnership firm or an LLP is treated as a resident in India, if any portion of its control and management is in India. A partnership firm or LLP is a non-resident, if its control and management is situated wholly outside India.

### *Permanent establishment (PE)*

A permanent establishment (PE) is defined in India as a fixed place of business through which the business of an enterprise is wholly or partly carried on.

## *Other taxes*

### *Value-added tax (VAT) / Central sales tax (CST)*

The sale of movable goods in India is chargeable to tax at the central or state level. The Indian regulatory framework has granted power to state legislatures to levy tax on goods sold within that state. Such sales are, therefore, chargeable to VAT at the rates notified under the VAT laws of the relevant state. All goods sold in the course of interstate trade are subject to CST.

Where goods are bought and sold by registered dealers, for trading or for use as inputs in the manufacture of other goods or specified activities (such as mining or telecommunication networks), the rate of sales tax is 2%, provided Form 'C' is issued by the purchasing dealer. In the absence of Form 'C', the applicable rate would be the rate of VAT on such goods in the originating state. Interstate procurement, on which CST is charged by the originating state, is not eligible for input tax credit in the destination state and hence is a cost to a buyer.

State level sales tax has been replaced by VAT in all the states. Under the VAT regime, the VAT paid on goods purchased within the state is eligible for VAT credit. The input VAT credit can be utilised against the VAT/ CST payable on the sale of goods. It is, thus, ensured that the cascading effect of taxes is avoided and only the value addition is taxed.

Currently, there is no VAT on imports into India. Exports are zero rated. This means that while exports are not charged to VAT, VAT charged on inputs purchased and used in the manufacture of export good or goods purchased for exports is available to the purchaser as a refund.

The state VAT is charged at tax rates of 1%, 4% to 6% (range). Goods other than those notified to be covered under the above rates are charged in the range of 12.5% to 16.5%. The rate of VAT depends on the nature of goods involved and varies from state to state.

Turnover threshold is prescribed so as to exclude small traders from the ambit of the VAT. A tax under composition scheme, at a lower rate, may be levied on such small traders in lieu of VAT.

### *Dividend distribution tax (DDT)*

Indian companies distributing or declaring dividends are liable to pay dividend distribution tax (DDT) at 15% (plus surcharge, education cess, and secondary and higher education cess). This tax is payable on declaration, distribution, or payment, whichever is earlier, and it is in addition to the CIT payable on business profits.

As of tax year 2009-10, a holding company does not have to pay DDT on dividends paid to its shareholders to the extent that it has received dividends from its subsidiary company on which DDT has been paid by the subsidiary. However, the benefit will not be available if the holding company is itself a subsidiary of another company which has a shareholding of more than 50%. SEZ developers and units in a SEZ are liable to pay DDT at 15% (plus surcharge, education cess and secondary and higher education cess) with effect from 1 June 2011.

### *Securities transaction tax (STT)*

STT at the rate of 0.125% is applicable to transactions involving the purchase or sale of equity shares, derivatives, units of equity-oriented funds through a recognised stock exchange, or the sale of a unit of an equity-oriented fund to any mutual fund. STT paid is eligible to be claimed as a tax-deductible expenditure when computing the tax on income from the sale of securities.

### *Wealth tax*

All companies are liable to pay wealth tax assessed at 1% of the value of specified net assets, if the value of net wealth exceeds INR 3 million. Valuation of assets is in terms of specific rules notified by the government.

### *Customs duty*

Customs duty is levied by the Central Government on the import of goods into, and export from, India. The rate of customs duty applicable to a product proposed to be imported or exported depends upon its classification under the Customs Tariff. With regard to exports from India, customs duty is levied only on a very limited list of goods.

The Customs Tariff is aligned with the internationally recognised Harmonised System of Nomenclature (HSN) provided by the World Customs Organisation.

Customs duty is levied on the transaction value of the imported or exported goods. According to section 14 of The Customs Act, 1962 (CA), the concept of transaction value is the sole basis for valuation for the purposes of import and export of goods. While the general principles adopted for valuation of goods in India are in conformity with the World Trade Organisation (WTO) agreement on customs valuation, the Central Government has notified independent Customs Valuation Rules applicable to export and import of goods.

India does not have one uniform rate of customs duty, and the customs duty applicable to any product is composed of a number of components. The types of customs duty applicable are as follows:

- The Basic Customs Duty (BCD) is the basic component of customs duty levied at the effective rate notified under the First Schedule to the Customs Tariff Act (CTA) and applied to the landed value of the goods (i.e. the cost, insurance, and freight (CIF) value of the goods plus landing charges at 1%). Typically, the rate of BCD is 10%.
- The additional customs duty in lieu of excise duty (CVD) is equivalent to, and is charged in lieu of, the excise duty applicable on like goods manufactured or produced in India. CVD is calculated on the sum of landed value of the goods and the applicable BCD. However, the CVD on specific consumer goods intended for retail sale in India is calculated on the basis of the maximum retail price (MRP) less specified abatement printed on their packs. The general rate of excise duty is currently 10%, and, consequently the rate of CVD is also 10%. In addition, education cess at 2% and secondary and higher education cess at 1% are also levied on the CVD.
- Education cess at 2% and secondary and higher education cess at 1% are also levied on the aggregate of the custom duties (except in cases of safeguard duty, countervailing duty, and anti-dumping duty).
- Additional duty of customs (ADC) to countervail state taxes and VAT of 4% is charged in addition to the above duties on all imports, subject to a few exceptions. ADC is calculated on the aggregate of the assessable value of the imported goods, the total customs duties (i.e. BCD and CVD) and the applicable education cess and secondary and higher education cess.

BCD, education cess, and secondary and higher education cess levied on the aggregate of duties of customs are a cost of any import transaction. The duty incidence arising on account of all other components may be set off or refunded subject to prescribed conditions. Where goods are imported for purposes of manufacture, the Indian manufacturer may take a credit of the CVD and ADC paid at the time of import for offset against the output excise duty. In the case of service providers, the credit of only the CVD is available. Similarly, the Central Government provides exemption from payment of ADC on import of certain specified goods. The Central Government also has prescribed a refund mechanism in relation to ADC paid on goods imported for the purpose of trading in India, subject to fulfilment of the conditions prescribed under the governing notifications and circulars issued in this regard.

### *CENVAT (Excise duty)*

Central Value Added Tax (CENVAT) is an excise duty levied by the Central Government on the manufacture or production of movable and marketable goods in India.

The rate at which excise duty is leviable on the goods depends on the classification of the goods under the Excise Tariff. The Excise Tariff is primarily based on the eight digit HSN classification adopted so as to achieve conformity with the Customs Tariff.

The excise duty on most consumer goods, which are intended for retail sale, is chargeable on the basis of the MRP printed on the package of the goods. However, abatements are admissible at rates ranging from 20% to 50% of the MRP. Goods, other than those covered by MRP based assessments, are generally chargeable to duty on the ‘transaction value’ of the goods sold to an independent buyer. In addition, the Central Government has the power to fix tariff values for charging *ad valorem* duties on the goods.

Typically, the duty rate is 10%. However, notifications granting partial or complete exemption for specified goods from payment of excise duties are also available. Education cess at 2% and secondary and higher education cess at 1% are applicable on the aggregate of excise duties.

The central excise duty is a modified VAT wherein a manufacturer is allowed credit of the excise duty paid on locally sourced goods and the CVD and ADC paid on imported goods. The CENVAT credit can be utilised for payment of excise duty on the clearance of dutiable final products manufactured in India. In light of the integration of goods and services tax initiated in 2004, manufacturers of dutiable final products are also eligible to avail CENVAT credit of the service taxes paid on input services used in or in relation to the manufacture of final products and clearances of final products from the place of removal, subject to fulfilment of conditions.

### *Service tax*

Service tax is levied on specified taxable services identified under Chapter V of the Finance Act, 1994 (the Act). At present, over 100 services are classified as taxable under the Act. The existing rate of service tax is 10%. In addition, an education cess of 2% and secondary and higher education cess of 1% of the service tax have also been levied on taxable services. Thus, the effective rate of service tax is 10.30%. There is no service tax on the services which qualify as exports, subject to fulfilment of prescribed conditions.

The onus of payment of service tax lies with the provider of services. However, in the case of specified services, such as transport of goods by road, sponsorship services, and import of services, the service tax liability rests with the recipient of the services as against the service provider.

In light of the integration of goods and services tax, a service provider can avail CENVAT credit of excise duties paid on capital goods and inputs used for providing output services, apart from availing CENVAT credit of the service taxes paid on input services, subject to fulfilment of conditions.

Taxable services provided by service providers located outside India to a recipient in India are subject to service tax in terms of the Services (Provided from Outside India and Received in India) Rules, 2006. In terms of these Rules, where the taxable services are provided from outside India and received in India, the service recipient is required to become registered and to pay the tax in accordance with the relevant provisions of law.

Further, the Central Government has introduced the Point of Taxation Rules, 2011 which envisages the point in time when a service shall be deemed to have been provided, thereby creating a deeming fiction for imposing the tax even prior to receipt of consideration for the services rendered.

### *Advance ruling for customs, excise, and service tax*

In order to enable foreign investors to ascertain their indirect tax liabilities arising from proposed business ventures in India, the Central Government has constituted the Authority for Advance Rulings (AAR) as a high level quasi-judicial body. The functions of the AAR comprise of giving advance rulings on a specific set of facts relating to specified matters under customs, central excise, and service tax.

Advance rulings may be sought by any non-resident investor entering into a joint venture in India in collaboration with another non-resident, or a resident of India, or a resident setting up a joint venture in India in collaboration with a non-resident.

Through the Finance Act 2005, this facility has also been made available to an existing Joint Venture in India. The Central Government is also empowered to notify any other class or category of persons as eligible for availing the benefit of an advance ruling.

### *Entry tax/Octroi duty*

'Entry tax' is a tax on entry of goods into the state from outside the state for use, consumption, or sale therein. Entry tax continues to exist under the VAT regime; however, in most states, it has been made VAT-able and can be offset against the output VAT liability in the state. The only exception is where entry taxes have been imposed in lieu of Octroi for which no offset is allowed, and hence it is a cost. It is levied on the purchase value, which is defined to mean the amount of the valuable consideration paid or payable by a person for the purchase of any goods. The value of the specified goods can be ascertained from the original invoice for purchase of such goods.

Further, it is important to note that the levy of entry tax has been considered as unconstitutional by the High Courts of a few of the states. The state governments have filed petitions before the Supreme Court to challenge the decision of the High Courts, and at present, the matter is pending for final adjudication before the Supreme Court.

Octroi is a municipal levy which is levied at the time of entry of specified goods into the limits of the relevant municipal corporation. Thus, Octroi is leviable, if there is movement of goods from one city to another in the same state, in the event the cities fall under the jurisdiction of two different municipal corporations.

### *Goods and services tax (GST)*

The Central Government took a major step towards the transition to a national integrated GST in 2006. In this regard, a Joint Working Group (JWG) was constituted by the Empowered Committee (EC) to study global GST models and identify suitable models for introduction in India. In 2007, the JWG recommended a dual GST model for India which was subsequently studied and approved by the EC and the Ministry of Finance.

The EC released the First Discussion Paper on the proposed GST in India on 10 November 2009). In the discussion paper, the Government indicated that GST shall have two components. One levied by the Centre (Central GST or CGST) and the other levied by the states (State GST or SGST). The CGST and the SGST would be applicable on all transactions of goods and services made for a consideration except for exempted goods and services, goods which are outside the purview of GST, and transactions which are below the prescribed threshold limits. The exact date of implementation of GST is not yet decided. Details of taxes which would be subsumed in the dual GST are as follows.

The following taxes will be subsumed in the CGST:

- Excise duty.
- CVD/ADC.
- Service tax.

The following taxes will be subsumed in the SGST:

- VAT.
- Entertainment tax.
- Luxury tax.
- Lottery taxes.

- State cesses and surcharges.
- Entry tax not in lieu of octroi.

It is likely that CST will be phased out in the GST regime.

The input tax credit (ITC) for the CGST and SGST would operate in parallel and would be available for utilisation only against the output payment of CGST and SGST. Both CGST and SGST will be levied on import of goods and services into the country. The incidence of tax will follow the destination principle. Full and complete offset will be available on the GST paid on import of goods and services.

The Union Finance Minister (FM) met the EC on 21 July 2010, and the key highlight of the meeting was a single rate structure with unification of the rate for goods and services proposed to be achieved in a phased manner as below:

| | Year one | Year two | Year three |
|---|---|---|---|
| Goods | | | |
| Standard rate | 10% | 9% | 8% |
| Lower rate | 6% | 6% | 8% |
| Services | 8% | 8% | 8% |

The FM has requested that the states adopt similar rates for the SGST.

In the Budget speech, while the FM did not indicate a specific deadline by which the GST would be introduced, he mentioned that there has been considerable progress in the last four years and that the areas of divergence of opinion with the states have been narrowed. He also said that work is underway on drafting of the model legislation for the Central and State GST. Various amendments in the Central Excise, Customs and Service tax law, which include withdrawal of certain exemptions, retaining the present tax/duty rates and structure were done to align the present tax/duty structures consistent with the intended GST rates.

## *Branch income*

Branches of foreign companies are taxed on income that is received in India, or which accrues or arises in India, at the rates applicable to foreign companies. There is no WHT on remittance of profits to the company's head office.

## *Income determination*

### *Inventory valuation*

Inventories are generally valued at cost or net realisable value, whichever is lower. Generally, there is conformity between book and tax reporting. The first in first out (FIFO) and average cost methods are acceptable, provided that they are consistently applied.

### *Capital gains*

Capital gains refer to the gains made on the transfer of a capital asset, including extinguishment of the rights in an asset. Capital assets are classified into short-term capital assets and long-term capital assets. Long-term capital gains are eligible for concessional rate of tax.

Short-term capital assets are capital assets held for a period of less than 36 months. In the case of shares, listed securities, or units of specified mutual funds or zero-coupon bonds, the short-term holding period is less than 12 months. Capital assets that do not qualify as short-term capital assets are considered as long-term capital assets.

Normally, long-term capital gains are determined after increasing the cost by prescribed inflation factors. In the case of foreign companies, capital gains on the transfer of shares or debentures in Indian companies are computed in the foreign currency in which the shares or debentures were acquired, and the capital gains are reconverted into Indian currency.

Capital gains are taxed as follows:

- Long-term capital gains on the transfer of shares in a company, or units of an equity-oriented fund, which are subject to STT are exempt from taxation. However, such gains are taxable under MAT provisions.
- Other long-term capital gains are subject to taxation at 20% (plus the surcharge, education cess, and secondary and higher secondary education cess). However, long-term capital gains arising from the transfer of listed securities, units, or zero-coupon bonds are taxed at 10% (without adjusting the cost for inflation) or at 20% (after adjusting the cost for inflation), whichever is more beneficial to the taxpayer. These rates exclude surcharge, education cess, and secondary and higher education cess.
- Short-term capital gains on the transfer of shares in a company or units of an equity-oriented fund which are subject to STT are taxed at 15% (plus the surcharge, education cess, and secondary and higher secondary education cess).
- Other short-term capital gains are subject to taxation at the normal corporate rates applicable to a company.

In the case of certain overseas financial organisations (e.g. off-shore funds and foreign institutional investors), long-term capital gains arising on the transfer of units purchased in foreign currency are taxable at 10% (plus the surcharge, education cess, and secondary and higher education cess) on the gross amount.

Long-term capital gains earned by non-residents on the transfer of bonds relating to Indian companies (issued abroad in accordance with government guidelines or approved schemes and acquired in foreign currency) are taxable at 10% (plus surcharge, education cess, and secondary and higher education cess) on the gross amount of gains.

The rules of carryforward and offset of loss for capital gains are as follows:

- Capital losses arising from the transfer of a short-term capital asset can be offset against capital gains arising from any other asset. However, capital losses arising from the transfer of a long-term capital asset can be offset only against capital gains arising from the transfer of any other long-term capital asset.
- Capital losses that cannot be offset can be carried forward and offset against the future capital gains. Losses can be carried forward for offset for a period of eight years after the year of loss.
- Gains and losses arising on the sale of depreciable assets are classified as short-term capital gains or losses, and the gains are taxed at the same rate as business income.

The transfer of unlisted (not tradable and not listed on any stock exchanges) shares of a company to a firm or a company without consideration or for inadequate consideration is taxable as income in the hands of the recipient firm or company.

### *Dividend income*

Dividend income received from Indian companies is not taxable in the hands of all the shareholders. This applies to resident as well as non-resident shareholders.

Income received by overseas financial organisations (offshore funds) from units of specified mutual funds, or from the Unit Trust of India, that is purchased in foreign currency, as well as interest received by non-residents on bonds issued abroad by Indian companies following in terms of government guidelines and acquired in foreign currency, are taxable at 10% on the gross amount of income. Dividends (other than those received from Indian companies) and interest earned by foreign financial institutions from investment in the Indian capital market are taxable at 20% on the gross amount.

Income received from units of specified mutual funds is not taxable in the hands of the recipient. The distributing mutual fund is liable to pay a distribution tax of 25% or 30% (plus surcharge, education cess, and secondary and higher education cess). The above tax is not chargeable in respect of income distributed by an equity oriented fund in respect of distribution under such scheme.

Stock dividends (bonus shares) distributed are not taxed at the time of receipt in the hands of the recipient shareholders, but capital gains provisions are applicable to the sale of these stock dividends.

### *Interest income*

Interest income received by a resident company is taxable at normal CIT rates. Interest income received by a non-resident company is taxed at a concessional rate of withholding at 20%, subject to conditions.

### *Partnership/LLP income*

A partnership firm and an LLP are taxed as a separate legal entity. The share of income of partners from a partnership firm or an LLP is exempt from tax. The partnership and LLP is taxed at the rate of 30% (plus education cess and secondary and higher education cess).

An LLP is required to pay Alternative Minimum Tax (AMT) at the rate 18.5% of its adjusted total income with effect from 1 April 2012, where the regular income tax liability is less than the AMT calculated. The credit of AMT is available to an LLP to be carried forward (for offset in a subsequent year) for a period of ten years.

The interest payment to the partner on the capital or current account is allowed as a tax deductible expenditure; however, the maximum interest allowable for tax purposes is 12% per annum. A working partner can be paid salary, bonus, commission, or remuneration. The maximum permissible deduction in respect of remuneration payable collectively to all working partners would be based on the book profit at a specified percentage for different quantum slabs of the book profit.

### *Unrealised exchange gains/losses*

There are no specific rules under the tax law for determining the nature of unrealised foreign exchange gains or losses. However, there are various judicial precedents available which lay down certain principles for classification of foreign exchange gains or losses.

- Profit/loss is considered to be trading profit/loss if foreign currency is held on revenue account or as trading assets or as a part of circulating capital invested in the business.
- Profit/loss is considered to be of a capital nature if a foreign currency loan is taken for capital asset or fixed asset.

### *Foreign income*
A resident company is taxed on its worldwide income. A non-resident company is taxed only on income that is received in India, or that accrues or arises, or is deemed to accrue or arise, in India. This income is subject to any favourable tax treaty provisions. Double taxation of foreign income for residents is avoided through treaties that generally provide for the deduction of the lower of foreign tax, or Indian tax, on the doubly taxed income from tax payable in India. Similar relief is allowed unilaterally where no treaty exists, in which case a resident would be taxed at the rate which would be the lower of the Indian tax rates or the rate of the other country in which income is already taxed.

## *Deductions*

Expenditures which are revenue in nature are allowed as a deduction if they are:

- incurred wholly and exclusively for the purpose of the business
- not in the nature of a personal expense, and
- not in the nature of a capital expense.

### *Depreciation*
Depreciable assets are grouped in blocks, and each block is eligible for depreciation at a prescribed rate (usually 15% to 100% for machinery, 5% to 100% for buildings, 10% for furniture, and 25% for intangible assets) on the opening value (net of depreciation charged in preceding years), plus cost of acquisition, less deletions, during the year. A deletion is the reduction by way of sale, discarding, demolition, or destruction of the assets and the amount realised is reduced.

Depreciation is restricted to 50% of the prescribed rate if the asset acquired is used for less than 180 days during the year of acquisition. If money receivable on the transfer exceeds the opening written-down value plus acquisitions of the block concerned, the excess is taxed as a short-term capital gain at the same tax rates as that applicable to business income.

Additional depreciation of 20% on the cost of new plant and machinery (other than ships or aircrafts) is allowable in the year of commissioning for manufacture. Power-generating or power-distributing companies have the option either to apply the reducing balance method provided under the normal schedule or to charge depreciation on a straight-line basis. The straight-line rates are aligned to the power companies' book depreciation rates.

Know-how, patents, licenses, franchises, and similar intangible assets form part of the block of depreciable assets, provided that they are owned and put to use in the course of their business and are eligible for depreciation at the prescribed rate, which is 25%.

Tax depreciation is not required to conform to book depreciation.

### Interest
Any interest paid by an assessee (taxpayer) on capital borrowed for the purposes of their business or profession is a tax deductible expense. If the capital is borrowed for acquiring a capital asset for the purpose of extension of an existing business or profession, then interest liability pertaining to the period, until the time the asset is put to use, cannot be allowed as a tax deductible expense and will have to be added back to the cost of such asset.

### Organisational and start-up expenses
Certain expenses are incurred by taxpayers either before the start-up of a business or after start-up of business, in connection with extension of the industrial undertaking, or in connection with setting-up a new unit. One fifth of such expenditure is allowed as a deduction each year, over a period of five years.

### Bad debts
The amount of any bad debt, or part thereof, which has been written off as irrecoverable in the accounts of the assessee (taxpayer) for the year, is allowed as a tax deductible write-off.

### Charitable contributions
Any charitable contribution made by a company to any charity is allowed as a tax deductible expense. This is subject to certain conditions. The tax deductibility ranges from 50% to 100% of the charitable contribution, depending upon the nature of charity. The tax deductibility of charitable contribution is restricted to 10% of the total taxable income.

### Bribes, kickbacks, illegal payments
Expenditures incurred by a taxpayer which are illegal are not deemed to have been incurred for the purpose of the business or profession, and no deduction will be allowed.

### Taxes
All taxes (tax, duty, cess, or fees by whatever name called) relating to business (other than income tax and wealth tax) incurred during the tax year are deductible in that year, provided they are paid by the following 30 September. Otherwise, they are deductible in the year of payment.

### Expenses allowable on actual payment basis
Certain expenses, such as, but not limited to, employees' provident fund dues (i.e. retirement benefit funds), bonus to employees, and interest payable to financial institutions and banks are allowed as tax deductible expenses only on actual payment.

### Net operating losses
Losses can be carried forward and offset against income from subsequent year(s) for periods set out in the following table:

| Types of losses | Time limit |
|---|---|
| Unabsorbed depreciation | Perpetually |
| Other business losses (other than speculation business losses) | 8 years |
| Speculation business losses | 4 years |
| Capital losses | 8 years |

There are no provisions in India for carrying losses back.

### *Payments to foreign affiliates*
Indian companies can claim deduction for payment of royalties, and for interest and fees for technical or management service provided by foreign affiliates, as long as they are not capital in nature, are incurred wholly and exclusively for the purpose of the business, and requisite tax is withheld from such payment. However, if the requisite tax is not withheld from such payment, or is not paid into the government treasury after withholding, a tax deduction of the payment is available in the year of payment of tax into the government treasury.

## *Group taxation*

Group taxation is not permitted under the Indian tax law.

### *Transfer pricing*
The Indian transfer pricing (TP) regulations stipulate that income arising from 'international transactions' between 'associated enterprises' should be computed at 'arm's-length price'. Furthermore, any allowance for expenses or interest arising from any international transaction is also to be determined at 'arm's length price'.

The expressions 'international transactions' and 'associated enterprises' have been defined in the Indian TP regulations. Various (presently five) methods for computation of arm's-length price have been specified under the Indian TP regulations, which are broadly in line with the Organisation for Economic Co-operation and Development (OECD) Guidelines, and taxpayers are required to adopt the most appropriate method. Taxpayers are also required to maintain a comprehensive set of prescribed information and documents relating to international transactions which are undertaken between associated enterprises, on an annual basis, within the prescribed timelines (due date of filing the Income-tax return). Further, taxpayers are required to obtain an Accountant's Report (in prescribed Form 3CEB) from an independent accountant certifying the nature and amount of international transactions. The certificate needs to be filed along with the Income-tax return. The burden of proving the arm's-length character of the transaction is primarily on the taxpayer.

The Indian TP regulations adopt an arithmetic mean of comparable prices as the arm's-length price with a flexibility of the percentage as may be notified by the Central Government across different segments of business activity.

Where the transfer pricing officer is of the opinion that the arm's-length price was not applied, the officer may re-compute the taxable income after giving the taxpayer an opportunity to be heard. Stringent penalties are prescribed in cases of failure to comply with the provisions of the Indian TP regulations.

To facilitate quick resolution of disputes, the Central Board of Direct Taxes (CBDT) has provided for an alternative dispute resolution mechanism and constituted a Dispute Resolution Panel (DRP) comprised of three Commissioners of Income Tax. In cases of foreign companies, the transfer pricing orders passed by the tax officer (TO) on or after 1 October 2009 and which are prejudicial to the taxpayer, the TO shall be required to issue a draft order to the taxpayer. The taxpayer can file objections against the draft order before the DRP. After considering all evidence or objections and further enquiries, the DRP is required to issue binding directions to the TO within a period of nine months. The TO is required to pass an order within one month, in conformity with the directions of the DRP. Orders passed by a TO on the basis of directions of the DRP are appealable directly before the Income Tax Appellate Tribunal (ITAT).

In order to lessen the litigation under transfer pricing regulations, provisions empowering the issue of safe harbour rules are contained in the tax law which would be separately issued by the CBDT. The safe harbour rules are not yet issued. The rules would provide the circumstances under which the tax authorities would accept the transfer price as declared by the assessee.

Taxpayers enjoying a tax holiday in India are also required to comply with the Indian TP regulations.

### *Thin capitalisation*
No prescribed debt-equity ratios or thin capitalisation rules exist under India taxation law.

### *Controlled foreign company (CFC) regime*
India currently has no CFC rules, so there will be no India tax on foreign profits that remain unremitted from offshore subsidiaries.

## *Tax credits and incentives*

Tax incentive provisions normally have conditions applicable for the period within which the preferred activity should be undertaken and the period for which the tax incentive is available. It may also be necessary to fulfil certain other conditions such as 'forming' of a 'new' undertaking.

### *Tax incentives for undertakings other than infrastructure development undertakings*
New industrial undertakings located in specified 'backward' states and districts are entitled to full tax exemption of profits for the first three or five years of operation, followed by a partial tax exemption of 30% of profits for the next five years. The list of backward districts has been streamlined into category A and category B districts, depending upon the current level of infrastructure development in those areas. The initial tax holiday period is five years in the case of category A districts and three years in the case of category B districts. A similar incentive is also applicable for hotels satisfying prescribed conditions.

If certain conditions are met, a tax holiday is permitted on the profits of an undertaking engaged in any of the following:

- Integrated business of handling, storage, and transportation of food grains.
- Developing and building of housing project.
- Scientific research.
- Commercial production or refining of mineral oils.
- Setting up and operating a cold chain for agricultural produce.
- Processing, preservation, and packaging of fruits or vegetables.
- Operating and maintaining a hospital in a rural area.

The tax holiday periods range from five to ten years, and the percentage of the rebate is either 30%, 50%, or 100% in initial years and 30% in the later years. The number of years constituting 'initial' and 'later' years varies from sector to sector.

### *Tax incentives for infrastructure development undertakings*

Enterprises engaged in the business of power generation, transmission, or distribution; developing or operating and maintaining a notified infrastructure facility, industrial park, or SEZ; making substantial renovation and modernisation of the existing network of transmission or distribution lines (between specified periods); or laying and operating a cross country natural gas distribution network are eligible to a tax exemption of 100% of profits for any ten consecutive years falling within the first 15 years of operation (20 years in the case of infrastructure projects, except for ports, airports, inland waterways, water supply projects, and navigational channels to the sea).

'Infrastructure facility' means roads, including toll roads, bridges, rail systems, highway projects, water supply projects, water treatment systems, irrigation projects, sanitation and sewerage systems or solid waste management systems, ports, airports, inland waterways, inland ports, or navigational channels to the sea.

### *Tax incentives for exports*

The export profits from a new industrial undertaking satisfying prescribed conditions established in a Free Trade Zone (FTZ), Software Technology Park (STP), or Electronic Hardware Technology Park (EHTP), or a 100% export-oriented undertaking (EOU) or a unit in a SEZ are exempt from income tax for ten years, commencing from the first year of manufacture. However, this exemption was available only if the manufacturing activity commenced before the end of the tax year 2010-2011.

The export profits from a new industrial undertaking satisfying the prescribed conditions established in an SEZ is eligible for tax exemption of 100% of profits for the first five years, from the year of commencement of manufacturing, followed by a partial tax exemption of 50% of profits for the next five years. A further tax exemption of 50% of the profits for five years is also available after that, subject to an equal amount of profit being retained and transferred to a special reserve in the books of account.

### *Tax incentives for units in the North Eastern Region of India*

Measures are in place to facilitate the development of the Indian North Eastern Region and of the state of Sikkim. Undertakings located in these states which (i) begin to manufacture or produce any eligible article, (ii) undertake substantial expansion, or (iii) commence an eligible business between 1 April 2007 and 1 April 2017 are eligible for a 100% deduction of profits for ten consecutive years.

A list of eligible businesses has been provided by the Indian government. The eligible businesses include hotels (not below two-star category), adventure and leisure sports including ropeways, the provision of medical and health services in nursing homes with a minimum capacity of 25 beds, operating a vocational training institute for hotel management, catering and food crafts, entrepreneurship development, nursing and para-medical training, civil aviation related training, fashion design and industrial training, running information technology related training centre, manufacturing of information technology hardware, and bio-technology. Businesses other than the above listed eligible businesses are not entitled to claim the tax holiday.

### *Tax incentives for hotels/convention centres located in specified districts*

A tax holiday of five years is provided to hotels (two, three, or four star) and convention centres located in the National Capital Territory of Delhi and the districts of Faridabad, Gurgaon, Gautam Budh Nagar, and Ghaziabad, provided the date of functioning of the hotel or completion of the construction of convention centre was started by 31 July

2010 (the earlier date was 31 March 2010).Hotels located in a specified district having a World Heritage Site, if such a hotel is constructed and has started functioning at any time during the period 1 April 2008 to 31 March 2013, are eligible for a tax holiday for a period of five years.

### *Tax incentives for certain income relating to offshore banking units and international financial services centre*

A scheduled bank, or any bank incorporated by or under the laws of a country outside India, which has an offshore banking unit in an SEZ or an international financial services centre with a specified income which is subject to prescribed conditions, is eligible for a tax exemption of 100% of the specified income for five consecutive years beginning from the year in which the permission under the Indian Banking Regulation Act, 1949 was obtained and for 50% of the specified income for five consecutive years.

### *Tax incentive of capital expenditure on certain specified businesses*

Capital expenditure is allowed at 100% in respect of the following specified businesses:

- Setting up and operating cold chain facilities.
- Setting up and operating warehousing facilities for storage of agriculture produce.
- Laying and operating a cross-country natural gas or crude or petroleum oil pipeline network for distribution, including storage facilities being an integral part of such a network.
- Building and operating a hotel of two-star or above category in India.
- Building and operating a hospital with at least 100 beds.
- Developing and building a housing project under a scheme for slum redevelopment or rehabilitation framed by the government.
- Developing and building specified housing projects under an affordable scheme of the central/state government.
- Investment in a new plant or newly installed capacity in an existing plant for production of fertilizer.

The following characteristics and conditions may be noted:

- Any sum received or receivable in cash or in kind on transfer, etc. of the capital asset shall be considered as business income, if expenditure on such an asset has been allowed as a deduction under this section.
- Any loss computed in respect of the above specified businesses shall be allowed to be offset or carried forward and offset only against the profits and gains of specified businesses.
- The specified business should:
  - not be set up by splitting up or reconstruction of a business already in existence
  - not be set up by transfer of used machinery or plant exceeding 20% of the total value of the machinery or plant used in such business, and
  - have been approved by the prescribed authority (i.e. the government).

### *Research and development (R&D) expenditures*

The weighted deduction available in respect of expenditures incurred on scientific research in an in-house R&D facility approved by the prescribed authority has been increased from 150% to 200% for companies engaged in specified businesses.

A payment made to an approved research association undertaking research in social science or statistical research or to an Indian company to be used by it for scientific research is now eligible for a weighted deduction of 125% of the payment made.

Contributions made to the National Laboratory, approved scientific research associations, universities, and the Indian Institute Technology are now 200% deductible instead of 175% deductible.

## Withholding taxes

There is an obligation on the payer (either resident or non-resident) of income to deduct tax at source (i.e. withhold tax) when certain specified payments are credited and/or paid. Some of the expenses which require tax withholding are as follows.

### Payments by resident companies

| Nature of payment | Payment threshold for WHT (INR) (1) | WHT rate (%) |
|---|---|---|
| Specified type of interest | None | 10 |
| Non-specified type of interest | 5,000 (2) | 20 |
| Professional or technical service | 30,000 | 10 |
| Commission and brokerage | 5,000 | 10 |
| Rent of plant, machinery, or equipment | 180,000 | 2 |
| Rent of land, building, or furniture | 180,000 | 10 |
| Contractual payment (except for individual/Hindu undivided family (HUF)) | 30,000 (single payment)<br>75,000 (aggregate payment) | 2 |
| Contractual payment to individual/HUF | 30,000 (single payment)<br>75,000 (aggregate payment) | 1 |
| Royalty or fees for technical services | 30,000 | 10 |

Notes

1. Payments have different threshold limits. The payer is only required to withhold tax if the payment is above the limit.
2. The threshold limit for WHT for non-specified type of interest is INR 5,000 except in the case of interest received from a bank, co-operative society, or deposit with post office, for which it is INR 10,000.

### Payment to non-resident companies

| Nature of payment | WHT rate (%) |
|---|---|
| Dividend | 0 |
| Interest on foreign currency | 10 |
| Royalty and technical fees | 10 |
| Long-term capital gains other than exempt income | 20 |
| Income by way of winning from horse races | 30 |
| Other income | 40 |

Notes

1. Percentage to be increased by a surcharge, education cess, and secondary and higher education cess to compute the effective rate of tax withholding.
2. Income from units of specified mutual funds is exempt from tax in the hands of the unit-holders.
3. Dividends received from Indian companies are tax-free in the hands of the shareholder.
4. Short-term capital gains on transfer of shares of a company or units of an equity oriented fund would be taxable at 15%, if they have been subjected to STT.
5. Long-term capital gains on transfer of shares (through stock exchange) in listed companies or units of an equity oriented fund are exempt from tax if they have been subjected to STT.
6. There is no threshold applicable for payment to non-residents companies up to which no tax is required to be withheld.

### *Treaty rates*

Some tax treaties provide for lower WHT rates from certain types of income, as follows:

| Recipient | Dividend (%) (1) | Interest (%) | Royalty (%) (12) | Fee for technical services (%) (12) |
|---|---|---|---|---|
| Armenia | 10 | 10 | 10 | 10 |
| Australia | 15 | 15 | 10/15 (2) | 10/15 |
| Austria | 10 | 10 | 10 | 10 |
| Albania | Government Press Release dated 29 January 2009. Treaty yet to be notified. | | | |
| Bangladesh | 10 (3)/15 | 10 | 10 | N/A (5) |
| Belarus | 10(9)/15 | 10 | 15 | 15 |
| Belgium | 15 | 10 (11)/15 | 10 | 10 |
| Botswana | 7.5 (9)/10 | 10 | 10 | 10 |
| Brazil | 15 | 15 | 25 (15)/15 | N/A (5) |
| Bulgaria | 15 | 15 | 15 (7)/20 | 20 |

I

| Recipient | Dividend (%) (1) | Interest (%) | Royalty (%) (12) | Fee for technical services (%) (12) |
|---|---|---|---|---|
| Zambia | 5 (10)/15 | 10 | 10 | 10 |

Notes

1. The treaty tax rates on dividends are not relevant since under the current Indian tax legislation, most dividend income from Indian companies which is subject to DDT is exempt from income tax in the hands of the recipient.
2. 10% for equipment rental and ancillary services:
   - for other cases in the first five years: 15% if government or specified organisation is the payer and 20% for other payers.
   - for subsequent years: 15% in all cases (income of government organisations is exempt from taxation in the country of source).
3. If at least 10% of capital is owned by the beneficial owner (company) of the company paying the dividend or interest.
4. If at least 20% of capital is owned by the beneficial owner (company) of the company paying dividend or interest.
5. In absence of specific provision, it may be treated as business profits or independent personal services under respective treaties, whichever is applicable.
6. The 'most favored nation' clause is applicable. The protocol to the treaty limits the scope and rate of taxation to that specified in similar articles in treaties signed by India with an OECD or another country.
7. If royalty relates to copyrights of literary, artistic, or scientific work.
8. If the company paying the dividend is engaged in an industrial undertaking.
9. If at least 25% of capital is owned by the beneficial owner (company) of the company paying the dividend
10. If at least 25% of capital is owned by the company during at least six months before date of payment.
11. If paid on a loan granted by a bank/financial institution.
12. The tax rate for royalties and fees for technical services, under the domestic tax laws, is 10%. This rate is to be increased by a surcharge at 2.5% on the income tax and education cess at 2% and secondary and higher secondary education cess at 1% on the income tax including surcharge. As a consequence, the effective tax rate is 10.558%. This rate applies for payments made under an agreement entered into on or after 1 June 2005. Accordingly, a tax resident can either use the Treaty rate or domestic tax rate, whichever is more beneficial.
13. If interest is received by a financial institution.
14. Taxable in the country of source as per domestic tax rates.
15. If royalty payments arise from the use or right to use trademarks.

## *List of limited agreements between India and other countries*

A list of the countries with which India has entered into limited agreements for double taxation relief with respect to income of airlines/merchant shipping, is given here.

| Country | Government Notification Reference |

## *Tax administration*

### *Returns*

Accounts for tax purposes must be made up to 31 March. The electronic return of income is required to be filed by 30 September of the tax year.

### *Quarterly withholding tax returns*

Quarterly statement of taxes withheld are to be filed electronically with the tax authorities on or before 15 July, 15 October, and 15 January for the first three calendar quarters of the tax year and on or before 15 May following the last calendar quarter of the tax year.

### *Payment of tax*

Tax is payable in advance (if tax for the year exceeds INR 10,000) in specified instalments during the tax year (April to March) in respect of the income of the tax year ending 31 March. Any balance of tax due on the basis of the return must be paid on a self-assessment basis before the return is filed.

### *Audit for income tax purposes*

Persons carrying on business are required to get their books of account audited for income tax purposes where the turnover is INR 6 million. For persons carrying on a profession, the turnover threshold is INR 1.5 million. The penalty for non-compliance with this audit requirement is INR 0.15 million.

## *Other issues*

### *Mergers and acquisitions*

The expression 'merger' has not been defined in the Act but has been covered as part of the definition of the term 'amalgamation'. Amalgamation is defined as a merger of one or more companies with another, or the merger of two or more companies to form a new company, in such a way that all the assets and liabilities of the amalgamating company or companies become the assets and liabilities of the amalgamated company and shareholders holding not less than 75% in value of the shares in the amalgamating company or companies become shareholders of the amalgamated company.

#### Capital gains

No capital gains tax is levied on the transfer of capital assets by an amalgamating company to the amalgamated company, provided the amalgamated company is an Indian company. Similar is the position in case of a demerger by a demerged company to a resulting company.

In cases where shares of an Indian company are transferred by a foreign company or a demerged foreign company to any another foreign company or resulting foreign company, there is no tax payable, provided it satisfies certain specified conditions. Furthermore, the shareholder of the amalgamating company or demerged company is not liable to pay capital gains tax on the exchange of shares with that of amalgamating company or the resulting company under the scheme of amalgamation.

### Carryforward of accumulated losses of amalgamating company

The losses and unabsorbed deprecation of the amalgamating company are deemed to be those of the amalgamated company in the year in which the amalgamation takes place, provided it satisfies certain specified conditions.

In the case of amalgamation of a company owning an industrial undertaking, the amalgamated company shall achieve the level of production of at least 50% of the installed capacity of the undertaking before the end of the four years from the date of amalgamation and continue to maintain the minimum level of production till the end of five years from the date of amalgamation. If the above conditions are violated, the benefit claimed will be taxed in the hands of the amalgamated company in the year of default.

In case of demerger of a company, the accumulated losses or unabsorbed depreciation of the demerged company directly relatable to the undertaking or the division transferred is allowed to be carried forward and offset in the hands of the resulting company.

### Amalgamation or demerger of co-operative banks

An amalgamated or resulting co-operative bank is eligible for offset and carryforward of the unabsorbed losses or accumulated depreciation of the amalgamating or demerged cooperative bank subject to fulfilment of certain conditions.

The following transactions are not liable for capital gains tax and are tax neutral:

- The transfer of a capital asset in business reorganisation by a predecessor co-operative bank to a successor co-operative bank.
- The transfer by a shareholder, in a business reorganisation of capital assets, of a share or shares held, in the predecessor co-operative bank, if the transfer is made as part of an allotment to the predecessor of any share or shares in the successor co-operative bank.

## Significant developments

Tax reforms, which started in 2008, covering amendments of the General Tax Provisions Law, Income Tax Law, and the Value-Added Tax (VAT) Law, were completed in 2010. Subsequent to the commencement of the new laws, the government issued several implementing regulations which provide clearer guidance on various matters. The latest Government Regulation pertained to the Income Tax Law and was issued in December 2010. The Minister of Finance (MoF) and the Indonesian Tax Office (ITO) have also issued further implementing regulations in response to queries and discussions on different interpretations of several issues. Developments in implementing these regulations should be monitored closely by business players as well as potential new investors in Indonesia.

Industry specific regulations have also been issued by the government, such as the regulation on Cost Recovery and Income Tax for the Oil and Gas Sector. This landmark regulation is a potential watershed providing the first dedicated regulation dealing with cost recovery and tax arrangements for this important industry.

In May 2011, the MoF issued a revision to the guidance on tax audit procedures. The tone of the regulation is friendlier to taxpayers as it provides a clearer procedure and strengthens the control of the tax auditors at the same time.

The focus of the ITO has been increasingly directed at tax treaty abuse and cross-border related party transactions, which was shown with the introduction of the ITO's regulations regarding Transfer Pricing Compliance, Mutual Agreement Procedures, and Advance Pricing Agreements.

Transfer pricing is still the main focus of the ITO in its ongoing audits, and it has commenced with a number of transfer pricing specific audits. Taxpayers must make detailed disclosures in their annual corporate income tax (CIT) return pertaining to their level of transfer pricing documentation, the method used, and the reasons why the method is appropriate. Taxpayers that have not prepared adequate documentation can likely expect a tax audit.

The amendments to the VAT law, which took effect as of 1 April 2010, generally only reflect changes of an administrative nature, rather than a fundamental change in the VAT system. However, the new requirement that a valid VAT invoice be delivered at the time of the taxable delivery (as opposed to the previous deadline of the end of the month following the taxable delivery) has forced a change in the administrative practices of many taxpayers.

### Industry-based profitability benchmarking

The ITO has introduced profitability benchmarking based on taxpayer industries. The benchmarking is based on analysis conducted internally by the ITO and is intended to be used in assessing the risk profile of Indonesian corporate taxpayers as a tool in its audit selection process. Taxpayers with profitability that falls below the ITO's benchmarks for their industry may be asked for further information, asked to amend a tax return, or possibly be subject to an audit.

The benchmarking contains a range of financial ratios for the industries examined, including gross profit margin, operating profit margin, net profit margin, and corporate tax to turnover. Up to now, the ITO has released benchmarking guidelines of 115 industries. Further benchmarking regulations are likely to be issued in the future which cover additional industries.

## *Taxes on corporate income*

Taxable business profits are calculated on the basis of normal accounting principles as modified by certain tax adjustments. Generally, a deduction is allowed for all expenditure incurred to obtain, collect, and maintain taxable business profits. A timing difference may arise if an expenditure recorded as an expense for accounting, cannot be immediately claimed as a deduction for tax *(see the Deductions section)*.

Resident corporations are taxed based on worldwide income. A foreign company carrying out business activities through a permanent establishment (PE) in Indonesia will generally be required to assume the same tax obligations as a resident taxpayer.

Resident taxpayers and Indonesian PEs of foreign companies have to settle their tax liabilities either by direct payments, third party withholdings, or a combination of both. Foreign companies without a PE in Indonesia have to settle their tax liabilities for their Indonesian-sourced income through withholding of the tax by the Indonesian party paying the income.

### *CIT rates*

A flat CIT rate of 25% applies as of 2010.

#### Public company discount

Public companies that satisfy a minimum listing requirement of 40% and certain other conditions are entitled to a tax discount of 5% off the standard rate, providing an effective tax rate of 20%.

#### Small company discount

Small enterprises (i.e. corporate taxpayers with an annual turnover of not more than 50 billion Indonesian rupiahs (IDR)) are entitled to a tax discount of 50% off the standard rate, which is imposed proportionally on taxable income on the part of gross turnover up to IDR 4.8 billion.

### *Final income tax*

Certain types of income are subject to a 'final' income tax at a specified percentage of the gross amount of income, without regard to any attributable expenses:

| Income | Tax rate (%) |
|---|---|
| Rental of land and/or building | 10 |
| Proceeds from transfers of land and building rights | 5 |
| Fees for construction work performance | 2/3/4 |

| Income | Tax rate (%) |
|---|---|
| Fees for construction work planning | 4/6 |
| Fees for construction work supervision | 4/6 |
| Interest on time or saving deposits and on Bank of Indonesia Certificates (SBIs) other than that payable to banks operating in Indonesia and to government-approved pension funds | 20 |
| Interest on bonds other than that payable to banks operating in Indonesia and government-approved pension funds | 15 |
| Sale of exchange-traded shares on the Indonesian stock exchange | 0.1 |
| Income from lottery prizes | 25 |
| Forward contract derivatives | 2.5 |

Resident companies, PEs, representatives of foreign companies, organisations, and appointed individuals are required to withhold the above final tax from the gross payments to resident taxpayers and PEs.

### *Special industries and activities*

Companies engaged in upstream oil and gas and geothermal industries typically have to calculate CIT in accordance with their production sharing contracts (PSCs). Certain companies engaged in metal, mineral, and coal mining are governed by a contract of work (CoW) for the income tax calculation. Different provisions may apply to them pertaining to corporate tax rates, deductible expenses, and how to calculate taxable income.

## *Corporate residence*

A company is treated as a resident of Indonesia for tax purposes by virtue of having its establishment or its place of management in Indonesia.

## *Other taxes*

### *Value-added tax (VAT)*

With a few exceptions, VAT is applicable on deliveries (sales) of goods and services within Indonesia at a rate of 10%. VAT on export of goods is zero-rated while the import of goods is subject to VAT at a rate of 10%. As of 1 April 2010, zero-rated VAT is also applicable on exported services, but subject to a MoF limitation. Currently, only certain exported services, including toll manufacturing services, are subject to the 0% VAT rate. Inbound use or consumption of foreign services or intangible goods, with a few exceptions, is also subject to a self-assessed VAT at a rate of 10%.

The VAT law allows the government to change the VAT rate within range of 5% to 15%. However, since the enactment of the VAT law in 1984, the government has never changed the VAT rate.

As of 1 April 2010, a valid VAT invoice must be delivered at the time of the taxable delivery (as opposed to the previous deadline of the end of the month following the taxable delivery). VAT filing is done on a monthly basis, with payment and filing being due no later than the last day of the month following the taxable delivery.

### *Luxury-goods sales tax (LST)*
In addition to VAT, some goods are subject to LST upon import or delivery by the manufacturer to another party at rates ranging from 10% to 200%.

### *Import duty*
Import duty is payable at rates from 0% to 150% on the customs value of imported goods. Customs value is calculated on cost, insurance, and freight level (CIF).

| Group | Good | Rate (%) |
|---|---|---|
| Automobiles | Passenger and commercial vehicles | 0 to 50 |
| Automobile parts | | 0 to 10 |
| Vessel | Ship, boats, and floating structure | 0 to 5 |
| Electronic goods | | 0 to 12,5 |
| Footwear | | 5 to 25 |
| Beverages, ethyl alcohol, and alcoholic drinks | Ethyl alcohol, beer, wine, spirits, and other beverages | 5 to 30, IDR 14,000 to IDR 125,000/ltr |
| Essential oils and resinoids | Odoriferous substances | 5 to 150 |
| Agricultural products | Animal and vegetable products | 0 to 25 |
| Textile, textile products, and accessories | Bags, harness, apparels, and clothing accessories, etc. | 5 to 15 |
| Other | Chemicals, pharmaceutical products, plastic, and rubber products, etc. | 0 to 25 |

As a commitment to liberalising trade, the Indonesian government is progressively lowering import duty rates on most products. Higher duty rates remain to protect certain industries and goods regarded as sensitive for security or social and cultural reasons.

#### Duty relief/exemption/deferral
The Indonesian government offers duty relief, duty exemption, and duty deferral concessions to foreign and domestic investors in order to promote the development of local and export industries. Such concessions include the Investment Coordinating Board (Badan Koordinasi Penanaman Modal or BKPM) Masterlist, Bonded Zone, Bonded Warehouse, KITE, and Free Trade Zone (FTZ) in Batam, Bintan, and Karimun.

### *Land and buildings taxes*
Land and buildings tax (Pajak Bumi dan Bangunan or PBB) is due annually at 5% of the government-determined sales value.

In a land and building transfer, the acquirer is liable for duty on the acquisition of land and building rights (Bea Pengalihan Hak atas Tanah dan Bangunan or BPHTB) at 5% of the greater of the transaction value or the government-determined value.

### *Stamp duty*
Stamp duty is nominal and payable as a fixed amount of either IDR 6,000 or IDR 3,000 on certain documents.

### *Regional taxes*
A corporate taxpayer may be liable for a number of regional taxes and retributions. The rates range from 1.5% to 35% of a wide number of reference values determined by the relevant regional governments. The followings are regional taxes that may apply:

- Motor vehicle tax.
- Motor vehicle ownership transfer fee.
- Motor vehicle fuel tax.
- Surface water tax.
- Cigarette tax.
- Hotel tax.
- Restaurant tax.
- Entertainment tax.
- Advertisement tax.
- Road illumination tax.
- Non-metal and rock minerals tax.
- Parking tax.
- Ground water tax.
- Swallow-nest tax.

### *Jamsostek*
Employers are held responsible for ascertaining that their employees are covered by Jamsostek (workers social security program) which provides compensation in the event of working accidents, deaths, and old age (55 years) as well as sickness or hospitalisation. The program calls for premium contributions from both the employers and the employees. Employees' contributions are collected through payroll deductions. The premium contributions are calculated as a percentage of regular salaries/wages, ranging from 0.24% to 3%.

## *Branch income*

Branch profits are subject to the ordinary CIT rate of 25%. The after-tax profits are subject to a withholding tax (WHT) (i.e. branch profits tax or BPT) at 20%, regardless of whether the profits are remitted to the home country. However, a concessional WHT rate may be applicable where a tax treaty is in force *(see the Withholding taxes section for more information)*. The BPT may be exempt if the profits are entirely reinvested in Indonesia *(see the Tax credits and incentives section for more information)*.

## *Income determination*

### *Inventory valuation*
Inventories must be measured at cost by using either the average or first in first out (FIFO) methods. Once a costing method is adopted, it must be applied consistently.

### *Capital gains*
Capital gains are generally assessable together with ordinary income and subject to tax at the standard CIT rate. However, gains from the transfer of land and buildings are not subject to regular CIT but rather are subject to final income tax at a rate of 5% of the transaction value or the government-determined value, whichever is higher.

The proceeds from sales of shares listed on Indonesian stock exchanges are not subject to normal CIT. Instead, the proceeds are subject only to a final WHT of 0.1% of the gross sales consideration. An additional tax of 0.5% applies to the share value of founder shares at the time an initial public offering takes place, irrespective of whether the shares are held or sold. Shareholders may elect not to pay this tax, in which case the actual gain will be subject to normal tax at the time the shares are sold.

### *Dividend income*
In principle, dividend income received by a resident taxpayer from a limited liability company (generally referred to as a Perseroan Terbatas or PT) is taxable as ordinary income for the taxpayer receiving the dividend. However, if the dividend recipient is a PT with a minimum shareholding of 25% in the company paying the dividend and the dividend is paid out of retained earnings, it is exempt from CIT.

Where the recipient is not resident in Indonesia, a WHT rate of 20% applies, subject to variation by tax treaties *(see the Withholding taxes section for more information)*.

The same rules apply to stock dividends (bonus shares), including dividends paid out of share premium (agio).

### *Exchange gains and losses*
Gains and losses arising from currency fluctuations are generally recognised on an accrual basis in accordance with the prevailing Indonesian Accounting Standards, which resemble International Accounting Standards in most respects.

### *Foreign income*
Foreign branch income of an Indonesian company must be accounted for as Indonesian taxable income under the controlled foreign corporations (CFCs) regulation. These rules apply to Indonesian tax residents owning at least 50% of the paid-up capital (shares) in a CFC. The rules make no reference to such terms as tax avoidance or tax evasion and therefore apply even if the CFC is domiciled in a non-tax haven country. The only situation in which the rules do not apply is when the CFC's shares are listed on a recognised stock exchange. In very broad terms, under the CFC rules, the Indonesian shareholder of the CFC is deemed to receive a dividend with respect to the CFC profits based on a shareholding proportional calculation.

## *Deductions*

Note that expenses relating to gross income subject to final income tax are not deductible for CIT purposes.

### *Depreciation, amortization, and depletion*
Depreciable/amortisable assets include both tangible and intangible property with a useful life of more than one year, except land that is owned and used in business. Depreciation and amortisation may be calculated under the straight-line method or the declining-balance method on an individual asset basis. Once a method is chosen, it should be applied consistently. In calculating depreciation, depreciable assets are divided into the following classes:

| | Depreciation rate | |
|---|---|---|
| **Class** | **Straight-line method (%)** | **Declining-balance method (%)** |
| Property: | | |
| Useful life of four years | 25 | 50 |
| Useful life of eight years | 12.5 | 25 |
| Useful life of 16 years | 6.25 | 12.5 |
| Useful life of 20 years | 5 | 10 |
| Buildings: | | |
| Permanent | 5 | – |

| Class | Depreciation rate | |
|---|---|---|
| | Straight-line method (%) | Declining-balance method (%) |
| Non-permanent | 10 | – |

Special rules apply for assets used in certain business fields and/or certain areas. Tax depreciation need not conform to book depreciation.

The cost incurred for acquiring the rights, with a beneficial life of more than one year, for mining, oil, and natural gas concessions; forest concessions; and other rights to exploit natural resources should be amortised by the production-unit method. Except for the right to acquire oil and natural gas concessions, the depletion rate used should not exceed 20% per annum.

### *Benefits in kind*
Most benefits received in-kind by employees, such as free housing, are not tax-deductible to the entity providing the benefit. Free motor vehicle and telephone expenses, including depreciation, are tax-deductible but only for 50% of the total expenses incurred. Expenses for meals and transportation made available to all staff are tax-deductible. Apart from these, certain benefits in kind (e.g. housing provided in remote areas as designated by the MoF, Integrated Economic Development Areas as designated by Presidential Decree) can also be claimed as tax-deductible expenses.

### *Taxes*
Land and buildings tax and regional taxes may be deducted from taxable income. With several exceptions, input VAT is also deductible against taxable income as long as it is not claimed as a credit against output VAT.

### *Net operating losses*
Losses may be carried forward for a maximum period of five years. Carrying back of losses is not permitted. Offsetting losses within a corporate group is not permitted.

### *Payments to foreign affiliates*
WHT is applied as a final tax on the recipient for payments of royalties, interest, and service fees to foreign non-resident companies. Excessive and non-arm's-length payments to related parties are disallowed as deductions. The tax law denies deductions for all payments from a branch to its head office for royalties, interest, and services provided by the head office (exceptions apply for loans between bank branches and their head offices).

## *Group taxation*

Consolidated returns are not allowed in Indonesia.

### *Transfer pricing*
Transactions between related parties must be consistent with the arm's-length principle. If the arm's-length principle is not followed, the Director General of Tax (DGT) is authorised to recalculate the taxable income or deductible costs arising from such transactions applying the arm's-length principle.

Under the General Tax Provisions Law, the government requires specific transfer pricing documentation to prove the arm's-length nature of related-party transactions. Transfer pricing documentation is frequently requested during tax audits because transfer pricing issues are subject to close scrutiny by the ITO.

Detailed transfer pricing disclosures are required in the CIT return for 2009 and later tax years. The disclosures required include the following:

- The nature and value of transactions with related parties.
- The transfer pricing methods applied to those transactions and the rationale for selecting the methods.
- Whether the company has prepared transfer pricing documentation.

Transfer pricing disputes may be resolved through the domestic objection and appeal process, or, where the dispute involves a transaction with a related party in a country that is one of Indonesia's tax treaty partners, the parties may request double tax relief under the Mutual Agreement Procedures (MAP) article of the relevant tax treaty. However, the ITO may terminate the MAP process if certain conditions exist, such as the Indonesian resident taxpayer making the request for MAP submits an objection letter to the DGT or an appeal to the tax court.

The tax law authorises the DGT to enter into Advance Pricing Agreements (APAs) with taxpayers and/or another tax country's tax authority on the future application of the arm's-length principle to transactions between related parties. The process may or may not involve cooperation with foreign tax authorities. Once agreed, an APA will typically be valid for a maximum of three tax years after the tax year in which the APA is agreed. The APA can also be applied to tax years before it was agreed if certain conditions are met, such as the tax year has not been audited and there is no indication of tax crime. However, the rollback of an APA to prior years is not automatic and will be subject to agreement between the taxpayer and the DGT.

### Increase in transfer pricing focused investigations

The number of tax audits with transfer pricing as the key focus area has significantly increased following the issuance of new regulations relating to transfer pricing. Transactions under particularly close scrutiny include payments of royalties and technical or management services fees, inter-company services, royalty and financing transactions, and exports to related parties.

Where a taxpayer has no documentation available to substantiate these transactions, there is a high risk that deductions for the payments will be denied in full. In this regard, the 30-day time limit within which a taxpayer must produce any documentation requested by the ITO during an audit is being strictly enforced. Any documentation provided after the 30-day time limit is being disregarded by the ITO in its decision making process.

Several transfer pricing specific audits have been conducted by the ITO for the past year. The ITO will identify high priority targets for transfer pricing specific audits based on:

- profit performance of the company (companies that have incurred consistent losses will be the highest priority but there is also a risk of being selected for companies with profits below industry norms) and
- materiality of the company's related party transactions.

In addition to transfer pricing audit activity, the ITO has also issued questionnaires to several taxpayers who are not under an audit that focus primarily on transfer pricing issues. It is possible that the information gathered by the ITO from these questionnaires will lead to follow-up investigations or audits in some cases.

### *Thin capitalisation*

The MoF is authorised to make a determination on an appropriate ratio of debt to equity. Under the law, debt between related parties may be recharacterised as equity, thus giving rise to the disallowance of a tax deduction for related costs. However, the MoF has not yet issued a ruling on these matters.

## *Tax credits and incentives*

### *Inbound investment incentives*

The DGT, on behalf of the MoF and based on the recommendation of the BKPM chairman, may provide the following tax concessions to PT companies following their investment in certain designated business areas or in certain designated regions:

- A reduction in net income of up to 30% of the amount invested (generally amount spent on assets), prorated at 5% for six years from commercial production date, provided that the assets invested are not transferred out within six years.
- Acceleration of fiscal depreciation deductions.
- Extension of tax loss carryforwards for up to ten years.
- A reduction of the WHT rate on dividends paid to non-residents to 10%.

The same tax facilities may be granted by the DGT to companies conducting business in an Integrated Economic Development Area (Kawasan Pengembangan Ekonomi Terpadu or KAPET). Specific approval must be obtained from the DGT for these tax facilities. If the company has bonded zone (Kawasan Berikat or KB) status, the tax facilities will also include those typically enjoyed by a KB company, for example:

- Non-collection of VAT and sales tax on certain luxury goods transactions.
- Exemption from prepaid income tax on the importation of capital goods and other equipment directly relating to production activities.
- Postponement of import duty on capital goods and equipment and goods and materials for processing.
- Exemption from import duty for four years on machinery and certain spare parts.

The designation of an area as a KAPET is set out in a specific presidential decree. Currently, there are approximately 25 areas designated as KAPETs.

### *Reinvestment of branch profits*

PEs that reinvest their after-tax profits in Indonesia within the same year or no later than the following year are exempt from branch profit tax on these profits. The reinvestment should be one of the following forms:

- As a founder or a participant founder in a newly established Indonesian company through capital participation.
- As a shareholder of an established Indonesian company through capital participation.
- Acquisition of a fixed asset used by the PE to conduct its business or activities in Indonesia.
- Investment in the form of an intangible asset used by the PE to conduct its business or activities in Indonesia.

Shares in a newly established company shall not be transferred until, at a minimum, two years from the date that the company commences commercial production. In regard to the investment in an established Indonesian company, acquisition of a fixed asset, or investment of an intangible asset, the investment shall not be transferred until, at a minimum, three years after the investment.

### *Other incentives*

Income earned by venture capital companies in the form of profit-sharing from their investments in Indonesia is exempt from tax, provided that the following conditions are met:

- Entities are small or medium-scale businesses in one of the sectors designated by the Indonesian government.
- Investments are not listed on the Indonesian stock exchange.

## *Withholding taxes*

Indonesian income tax is collected mainly through a system of withholding taxes. Where a particular income item is subject to WHT, the payer is generally held responsible for withholding or collecting the tax. These withholding taxes are commonly referred to using the relevant article of the Income Tax Law, as follows.

### *Article 23/26 WHT*

Article 23/26 WHT is levied on a variety of payments to corporations and individuals, resident and non-resident, at the following rates:

| | Dividends (%) | | | | |
|---|---|---|---|---|---|
| | Portfolio | Substantial holdings | Interest (%) | Royalties (%) | Branch profits (%) |
| Resident corporations (6) | 15 | 0 | 15 | 15 | N/A |
| Resident individuals | 10 | 10 | 15 | 15 | N/A |
| | | | | | |
| Non-resident corporations and individuals | | | | | |
| Non-treaty: | 20 | 20 | 20 | 20 | 0/20 |
| Treaty: | | | | | |
| Algeria | 15 | 15 | 0/15 | 15 | 10 |
| Australia | 15 | 15 | 0/10 | 10/15 | 15 |
| Austria | 15 | 10 | 0/10 | 10 | 12 |
| Bangladesh | 15 | 10 | 0/10 | 10 | 10 |
| Belgium | 15 | 10 | 0/10 | 10 | 10 |
| Brunei | 15 | 15 | 0/15 | 15 | 10 |
| Bulgaria | 15 | 15 | 0/10 | 10 | 15 |
| Canada | 15 | 10 | 0/10 | 10 | 15 |
| China | 10 | 10 | 0/10 | 10 | 10 |
| Czech Republic | 15 | 10 | 0/12.5 | 12.5 | 12.5 |
| Denmark | 20 | 10 | 0/10 | 15 | 15 |
| Egypt | 15 | 15 | 0/15 | 15 | 15 |
| Finland | 15 | 10 | 0/10 | 10/15 | 15 |
| France | 15 | 10 | 0/10/15 | 10 | 10 |

| | Dividends (%) | | | | |
|---|---|---|---|---|---|
| | Portfolio | Substantial holdings | Interest (%) | Royalties (%) | Branch profits (%) |
| Germany (1) | 15 | 10 | 0/10 | 10/15 | 10 |
| Hungary (3, 4) | 15 | 15 | 0/15 | 15 | 20 |
| India | 15 | 10 | 0/10 | 15 | 10 |
| Iran | 7 | 7 | 0/10 | 12 | 7 |
| Italy | 15 | 10 | 0/10 | 10/15 | 12 |
| Japan | 15 | 10 | 0/10 | 10 | 10 |
| Jordan (3) | 10 | 10 | 0/10 | 10 | 20 |
| Korea (North) | 10 | 10 | 0/10 | 10 | 10 |
| Korea (South) (2) | 15 | 10 | 0/10 | 15 | 10 |
| Kuwait (4) | 10 | 10 | 0/5 | 20 | 0/10 |
| Luxembourg (1) | 15 | 10 | 0/10 | 12.5 | 10 |
| Malaysia (5) | 10 | 10 | 0/10 | 10 | 12.5 |
| Mexico | 10 | 10 | 0/10 | 10 | 10 |
| Mongolia | 10 | 10 | 0/10 | 10 | 10 |
| Netherlands | 10 | 10 | 0/10 | 10 | 10 |
| New Zealand (3) | 15 | 15 | 0/10 | 15 | 20 |
| Norway | 15 | 15 | 0/10 | 10/15 | 15 |
| Pakistan (1) | 15 | 10 | 0/15 | 15 | 10 |
| Philippines | 20 | 15 | 0/10/15 | 15 | 20 |
| Poland | 15 | 10 | 0/10 | 15 | 10 |
| Portugal | 10 | 10 | 0/10 | 15 | 10 |
| Qatar | 10 | 10 | 10 | 5 | 10 |
| Romania | 15 | 12.5 | 0/12.5 | 12.5/15 | 12.5 |
| Russia | 15 | 15 | 0/15 | 15 | 12.5 |
| Seychelles | 10 | 10 | 0/10 | 10 | 20 |
| Singapore | 15 | 10 | 0/10 | 15 | 15 |
| Slovakia | 10 | 10 | 0/10 | 10/15 | 10 |
| South Africa (3, 4) | 15 | 10 | 0/10 | 10 | 20 |
| Spain | 15 | 10 | 0/10 | 10 | 10 |
| Sri Lanka (3) | 15 | 15 | 0/15 | 15 | 20 |
| Sudan | 10 | 10 | 0/15 | 10 | 10 |
| Sweden | 15 | 10 | 0/10 | 10/15 | 15 |
| Switzerland (1) | 15 | 10 | 0/10 | 10 | 10 |
| Syria | 10 | 10 | 10 | 15/20 | 10 |
| Taiwan | 10 | 10 | 0/10 | 10 | 5 |
| Thailand | 20 | 15 | 15 | 15 | 20 |
| Tunisia | 12 | 12 | 0/12 | 15 | 12 |
| Turkey | 15 | 10 | 0/10 | 10 | 10 |
| Ukraine | 15 | 10 | 0/10 | 10 | 10 |
| United Arab Emirates | 10 | 10 | 0/5 | 5 | 5 |
| United Kingdom | 15 | 10 | 0/10 | 10/15 | 10 |
| United States | 15 | 10 | 0/10 | 0/10 | 10 |
| Uzbekistan | 10 | 10 | 0/10 | 0/10 | 10 |
| Venezuela | 15 | 10 | 0/10 | 10/20 | 10 |

| | Dividends (%) | | | | |
|---|---|---|---|---|---|
| | Portfolio | Substantial holdings | Interest (%) | Royalties (%) | Branch profits (%) |
| Vietnam | 15 | 15 | 0/15 | 15 | 10 |

Domestic Article 23 WHT is also payable at the rate of 2% for most types of services where the recipient of the payment is an Indonesian resident.

Notes

1. Fees for technical, management, and consulting services rendered in Indonesia are subject to WHT at rates of 5%, 7.5%, 10%, and 15% for Switzerland, Germany, Luxembourg, and Pakistan, respectively.
2. VAT is reciprocally exempt from the income earned on the operation of ships or aircraft in international lanes.
3. The treaty is silent concerning branch profit tax rate. The ITO interprets this to mean that the tax rate under Indonesian Tax Law (20%) should apply.
4. Tax only applies if the profits are remitted.
5. Labuan offshore companies (under the Labuan Offshore Business Activity Tax Act 1990) are not entitled to the tax treaty benefits.
6. In the case of dividends received by a resident shareholder, 'portfolio shareholding' refers to share ownership of less than 25% of the paid-up capital. In this respect, the dividend tax withheld by the payer constitutes a prepayment of the income tax liability of the shareholder. 'Substantial shareholding' refers to the share ownership of 25% of the paid-up capital or more.

The issue of beneficial ownership has come under tax office scrutiny. For treaty WHT rates to apply to passive income such as interests, dividends, and royalties, the recipient of such income must be the beneficial owner. The recipient must also provide a Certificate of Domicile (CoD) in the form required by the ITO certified by their home country tax authority, certifying that the recipient is a tax resident of that country. The CoD in the form prepared by the other country's tax authority may only be used in limited circumstances. Further, the CoD form also requires a number of declarations to be made by the recipient that acknowledges that the use of the treaty jurisdiction was not merely for obtaining the benefit of the treaty. These declarations place onerous obligations on both the Indonesian payer and the recipient entity. Without a certified CoD, a WHT at a rate of 20% will apply. These aspects need to be considered when paying income of this nature.

### *Article 22 Income Tax*

Article 22 income tax is typically applicable to the following:

| Event | Tax rate (%) | Tax base |
|---|---|---|
| 1. The import of goods using an Importer Identification Number (Angka Pengenal Impor or API) | 2.5 | Import value (i.e. CIF value plus duties payable) |
| 2. The import of goods without an API | 7.5 | Import value (i.e. CIF value plus duties payable) |
| 3. The sale of goods to the government requiring payment from the State Treasury and certain state-owned companies Proxy of Budget User (Kuasa Pengguna Anggaran or KPA) | 1.5 | Selling prices |
| 4. The purchasing of steel products | 0.30 | Selling prices |
| 5. The purchasing of automotive products | 0.45 | Selling prices |
| 6. The purchasing of paper products | 0.10 | Selling prices |
| 7. The purchasing of cement | 0.25 | Selling prices |
| 8. The purchasing of luxury goods | 5 | Selling prices |

Notes

1. The tax does not apply, either automatically or given an Exemption Certificate issued by the DGT, on the following types of imports:
   - Goods exempted from import duties and VAT.
   - Goods that have been temporarily imported (i.e. goods for re-export).
   - Goods for re-importing (i.e. to be repaired or tested for subsequent re-exporting).
2. In event 3, the tax collector (the State Treasury, state-owned company, etc.) must withhold Article 22 income tax from the amount payable to a particular supplier (vendor). In the other events, the importer or the buyer of the designated goods must pay Article 22 income tax in addition to the amounts payable for the goods imported or purchased.
3. Vendors of goods under events 4 through 8 can only collect Article 22 income from buyers if they have been appointed by the DGT to undertake this role (i.e. if there has been a specific DGT Appointment Decision).
4. Article 22 income tax constitutes a prepayment of corporate/individual income tax liabilities for events 1 through 8.
5. Tax exemption applies to certain categories of goods or to the importing/purchasing of goods for non-business purposes.

## *Tax administration*

### *Payments of tax and tax returns filing*

Tax liabilities for a particular period or year must typically be paid to the State Treasury through a designated tax-payment bank (bank persepsi) and then accounted for at the DGT office through the filing of the relevant tax returns. The tax payments and tax return filing for a particular tax must be undertaken monthly or annually, depending upon the tax obligation in question.

Corporate tax liabilities may be settled either by direct payments, third party withholdings, or a combination of both. Monthly tax instalments constitute the first part of tax payments to be made by taxpayers as a prepayment of their current year CIT liability. A monthly tax instalment is generally calculated using the most recent CIT return. The tax withheld by third parties on certain income or tax to be paid in advance on certain transactions (i.e. imports) also constitute prepayments for the current year corporate tax liability of the income recipient or the party conducting the import. If the total amounts of tax paid in advance through the year are less than the total CIT due, the company concerned has to settle the shortfall before filing its CIT return. Returns for transaction taxes such as WHT must be filed on a monthly basis.

A summary of these tax obligations is as follows:

#### Monthly tax obligations

| Type of tax | Tax payment deadline | Tax return filing deadline |
|---|---|---|
| Article 21/26 WHT | The 10th of the following month | The 20th of the following month |
| Article 23/26 WHT | The 10th of the following month | The 20th of the following month |
| Article 25 Income Tax Instalment | The 15th of the following month | The 20th of the following month |
| Article 22 Income Tax on imports / Payments to Tax Collectors | The 10th of the following month | The 20th of the following month |
| Article 4(2) Final Income Tax | The 10th of the following month | The 20th of the following month |
| VAT and LST | Prior to the tax return filing deadline | The end of the following month |

# Indonesia

## Annual tax obligations

| Type of tax | Tax payment deadline | Tax return filing deadline |
|---|---|---|
| Corporate Income Tax | The end of the fourth month after the book year end before filing the tax return | The end of the fourth month after the book year end |
| Land and Building Tax (PBB) | Six months after the receipt of a Tax Due Notification Letter from the ITO | N/A |

## Penalties

Late payments of the above taxes incur interest penalties at 2% per month, with a maximum of 48%. Part of a month, for example a single day, is considered a full month.

Late filing of a tax return or failure to file a tax return incurs an administrative penalty at the following amounts:

| Type of tax return | IDR |
|---|---:|
| VAT return | 500,000 |
| Other monthly tax returns | 100,000 |
| Corporate income tax return | 1,000,000 |

### *Tax assessments*

Indonesia uses a self-assessment system under which taxpayers are trusted to calculate, pay, and report their own taxes in accordance with prevailing tax laws and regulations. However, the DGT may issue tax assessment letters to a particular taxpayer if it finds that, based on a tax audit or on other information, the taxpayer has not fully paid all tax liabilities. A tax assessment letter may also be issued by the DGT to a taxpayer who ignores a warning letter to file a tax return within a specified period. Failure to maintain books in accordance with the prescribed standards is another condition that may lead the DGT to issue an official tax assessment.

### *Statute of limitation*

Under the current Tax Administration Law, the DGT can issue an underpaid tax assessment letter for the years up to 2007 only within ten years after the incurrence of a tax liability, the end of a tax period (month), or the end of (part of) a tax year, but no later than 2013. For years from 2008 onwards, the time spans for the issuing of underpaid tax assessment letters is reduced to five years.

### *Tax audits*

The tax audit of a company may cover only a particular tax or all taxes for a particular tax period (a tax month) or tax year. It may be conducted at the company's premises, at the DGT offices, or at both.

### *Conditions triggering a tax audit*

A tax refund request will always trigger a tax audit. Due to the requirement for the DGT to decide on a refund request within 12 months, a tax audit will typically begin from a few weeks to several months from the refund request date. A corporate tax refund request will normally trigger a complete tax audit covering all taxes. A refund request of any other tax will normally trigger a tax audit covering only one particular tax. The DGT will likely broaden the tax audit scope to include other taxes.

Other events which may trigger a tax audit include the following:

- A tax return in an overpayment position (not necessarily accompanied by a refund request).
- An annual income tax return presenting/claiming a tax loss.
- A tax return not filed within the prescribed time.
- A tax return meeting certain (undisclosed) DGT criteria.

### *Industry-based profitability benchmarking*
The ITO has introduced profitability benchmarking based on taxpayer industries. The benchmarking is based on analysis conducted internally by the ITO and is intended to be used in assessing the risk profile of Indonesian corporate taxpayers as a tool in its audit selection process. Taxpayers with profitability that falls below the ITO's benchmarks for their industry may be asked for further information, asked to amend a tax return, or possibly be subject to an audit.

The benchmarking contains a range of financial ratios for the industries examined, including gross profit margin, operating profit margin, net profit margin, and corporate tax to turnover. Up to now, the ITO has released benchmarking guidelines of 115 industries. Further benchmarking regulations are likely to be issued in the future which cover additional industries.

## *Other issues*

### *M&A from a business and tax perspective*
Transfers of assets in business mergers, consolidations, or business splits must generally be dealt with at market value. Gains resulting from this kind of restructuring are assessable, while losses are generally claimable as a deduction from income.

However, a tax-neutral merger or consolidation, under which assets are transferred at book value, can be conducted but subject to the approval of the DGT. To obtain this approval, the merger or consolidation plan in question must pass a business-purpose test. Tax-driven arrangements are prohibited, and tax losses from the combining companies may not be passed to the surviving company.

Subject to a similar, specific DGT approval, the same concession is also available for business splits that constitute part of an initial public offering (IPO) plan. In this case, within one year of the DGT's approval being given, the company concerned must have made an effective declaration regarding registration for an IPO with the Capital Market Supervisory Board (Badan Pengawas Pasar Modal or BAPEPAM). In the event of complications beyond the company's control, the period may be extended by the DGT for up to four years.

## Significant developments

The supplier will be subject to withholding tax (WHT) at the rate of 3% to 3.3%. Note that for the oil and gas industry, these rates are expected to double in the near future, reaching the rate of 7%. New instructions issued in this regard are expected to soon be approved by the legislators.

## Taxes on corporate income

All income derived from Iraq is subject to tax in Iraq regardless of the residence of the recipient.

The effective corporate income tax (CIT) system presented in Iraq for juristic persons (except partnerships) is based on a statutory CIT rate of 15% at all income levels with no progressive tax rate scale.

### Foreign oil company income tax

The income realised in Iraq from contracts concluded with foreign oil companies, their branches or offices, and subcontractors working in Iraq in the oil and gas production sector and related industries are taxed at a rate of 35%.

## Corporate residence

One of the key issues in determining when a company becomes taxable in Iraq is whether the foreign company is considered to be doing business 'in Iraq' or 'with Iraq'. In 2009, with Instructions No. 2/2008, the Iraqi tax administration provided a clearer distinction between business 'in Iraq' and business 'with Iraq'.

Once the determination has been made that the company is trading 'in Iraq', the company should legally register in Iraq and then register with the General Commission for Taxes (GCT). A company that is registered with the GCT will be subject to CIT and will be required to file a CIT return.

### Permanent establishment (PE)

It is important to note that the current Iraq income tax law does not clearly define a PE; therefore, it is important to monitor commercial activity being performed in the country to ensure compliance with the registration requirements and tax law. The company should consult with their internal tax department and external advisers if they have signed a contract to provide any type of services inside Iraq to determine if the company should have a legal registration and begin to file CIT returns.

## Other taxes

### Sales tax
A sales tax of 10% of the value of services is imposed on services rendered by deluxe and first class restaurants and hotels in Iraq.

### Custom duty
The customs duty system and procedures in Iraq are currently evolving. In March 2010, the Iraqi Presidency Counsel issued Law 12 of 2010 (Custom Tariff Law). The new law is comprised of 11 articles and primarily addresses custom duties on goods imported into Iraq. The law notes that customs duties shall be levied based on percentages set in the custom tariff and agricultural agenda that is annexed to the Custom Tariff Law. For the purposes of the Custom Tariff Law, the custom tariff and agricultural agenda refers to the schedule comprised of itemised and codified sections and notes based on the international harmonised system adopted by the World Customs Organization (WCO).

### Excise taxes
There is no tax provision in the Iraqi Tax Law addressing excise taxes.

### Property taxes
A basic tax of 10% is assessed on the annual revenue for all real-estate collected from the real estate owner or the long-term lessee (five years). In cases where the owner or long-term lessee cannot be located, the person occupying the real-estate will be assessed. Note that the annual revenue for each real-estate is discounted by 10% for expenses and maintenance before assessing the tax on that real-estate.

### Transfer taxes
There are no restrictions or taxes on transferring funds into or out of Iraq.

### Stamp duty
All direct and indirect contracts related to credit facilities and other bank's activities (e.g. letter of credit contracts) are subject to the stamp fees at a rate of 0.2% of the contract value.

## Branch income

The tax treatment for the branch is similar to the local Iraqi corporation. In general, CIT is imposed on corporate entities and foreign branches with respect to taxable profit from all sources arising or deemed to arise in Iraq. However, certain limitations apply to head office expenses.

## Income determination

A corporation has to determine its profit/loss according to its income statement for a tax period as established under the Unified Accounting System (Iraqi GAAP). However, to reach the taxable income, positive or negative adjustments have to be made to the profit/loss as determined according to GAAP.

### Inventory valuation
There is no tax provision in the Iraqi Tax Law addressing inventory valuation.

### *Capital gains*
Capital gains on sales of depreciable assets are taxed at the normal CIT rate. Gains derived from the sale of shares and bonds not in the course of a trading activity are exempt from tax. Capital gains derived from the sale of shares and bonds in the course of a trading activity are taxable at the normal CIT rate.

### *Dividend income*
Under the tax law, dividends paid out of profits that have been subject to tax are not taxed again in the hands of the shareholder.

### *Interest income*
Interest income deemed to arise in Iraq is taxed at the normal CIT rate.

### *Rent/royalties income*
Rent and royalties income deemed to arise in Iraq are taxed at the normal CIT rate.

### *Foreign income*
There is no tax provision in the Iraqi Tax Law addressing foreign income.

## *Deductions*

In general, all expenses incurred by the taxpayer in order to produce income during the year are deducted from income, provided that such expenses are confirmed by acceptable documents, with some exceptions.

### *Bad debt*
Bad debt is deductible if it was included in earlier income and there is proof of the unsuccessful steps to collect it.

### *Charitable contributions*
Charitable contributions to the Government and Socialist Sector departments and to scientific, cultural, educational, charitable, and spiritual organisations, which are legally recognised (provided that the Minister of Finance has issued a list containing the names of these organisations), are deductible.

### *Depreciation*
The Iraqi Depreciation Committee sets the maximum depreciation rates for various types of fixed assets. If the rates used for accounting purposes are greater than the prescribed rates, the excess is disallowed.

The depreciation method is either a straight-line method or declining-balance method.

### *Bribes and illegal payments*
Bribes and illegal payments are not allowed or deductable.

### *Net operating losses*
Under the tax law, loss of a taxpayer in some sources of income arising in Iraq, substantiated by legally accepted documents, are generally deducted from profits arising from other sources.

Losses which cannot be settled in this manner shall be carried forward and deducted from the income of the taxpayer over five consecutive years, provided that losses may not offset more than half of the taxable income of each of the five years and the loss is from the same source of income from which it has arisen.

## Group taxation

Iraqi law does not contain any provisions for filing consolidated returns or for relieving losses within a group of companies.

### Transfer pricing

The precise meaning of transfer pricing under the effective Iraqi tax system is rather unclear from a tax and legal perspective.

We note that whilst having no specific transfer pricing legislation, Iraq does have a 'third party' arm's-length provision contained within its tax legislation; whereby, if a non-resident taxpayer is engaged in business with a resident and it appears to the tax authority that due to the connection existing between the resident and the non-resident, and the substantial control of one over the other, that the business relationship is arranged in a manner that leaves no profits to the resident, or the profits left are much less than what is normally earned, the tax shall be assessed on the actual profits of the non-resident and charged to the resident as if the resident is the business agent for the non-resident.

## Tax credits and incentives

In accordance with the Iraqi Investment Law, approved industrial projects are given certain custom duty and tax incentives; however, oil and gas is not one of the sectors that is normally granted investment promotion exemptions incentives.

The tax incentives may include corporate tax, individual tax, and others; however, the tax incentives vary from one project to another.

The Board of Investment Promotion has the authority to add any sector or specific project to the list of sectors or projects that benefit from the investment promotion law incentives.

### Foreign tax credit

Income tax paid to a foreign country on income earned in that country may be credited against tax paid to Iraq. The amount of the credit may not exceed the amount of tax assessed in Iraq.

## Withholding taxes

Under the tax law, the amount due from any residing taxpayers to a non-resident, whether the payment is made in cash or credited to the account, is subject to WHT at the rate of 15% if such amounts are related to interest on debentures, mortgages, loans, deposits and advances, as well as annual allowances, pension salaries, or other yearly payments.

## Tax administration

### Returns

The statutory time line for filing tax returns is the first day of June of the year of assessment. If the self assessment of tax is not accepted by the tax authorities, tax is assessed on the income of the taxpayer based on the information available to the tax authorities.

Failure to file a tax return may lead to an estimate of income and assessment of tax by the tax authorities; however, such an assessment does not relieve the taxpayer from responsibility for non-submission of the return within the statutory time line stipulated by law.

### Payment of taxes

Payment of the tax liability has to be paid within 21 days from the assessment date by the tax authority. There is no requirement of quarterly payments during the taxable year.

### Iraqi GAAP

The Iraqi tax law requires all taxpayers to maintain books and records in accordance with Iraq's local unified accounting system (Iraqi GAAP).

These books shall constitute tax books/accounts. This accounting treatment will determine when income is accrued and costs are incurred for computing taxable profits.

## Significant developments

### Section 110 company

Finance Act 2011 made a number of amendments to the Section 110 regime. The Section 110 regime is a favourable tax regime for Irish resident special purpose companies which hold and/or manage 'qualifying assets' which provides for an onshore investment platform (with access to Ireland's treaty network) in an environment of increased international focus on tax havens and transparency.

I

These changes have significantly expanded the range of assets that a Section 110 company can invest in, whilst also seeking to restrict the use of Section 110 in specific targeted circumstances.

Prior to the publication of the Finance Act 2011, Section 110 companies were limited to investing in financial assets. The range of investments in which a Section 110 company can invest has been significantly extended to include investments in commodities and plant and machinery.

Greenhouse gas emissions allowance has been redefined as a qualifying asset to include 'carbon offsets' and has been broadened significantly. These are very welcome changes, particularly in the context of recent market interest in commodity transactions and the launch of the Irish Government's 'Green International Financial Services Centre (IFSC)' initiative. In addition, the extension of the Section 110 regime to include plant and machinery will benefit Ireland's position as the preferred destination for aircraft financing and leasing activities and will give an added boost to Ireland's position as the centre of excellence for aircraft financing transactions *(see the Tax credits and incentives section for further details)*.

### Exemption for start-up companies

Finance Act 2011 confirms that the exemption for start-up companies from corporation tax is to be extended to companies which commence a new trade in 2011. The relief available is now linked to the amount of employer's social insurance (PRSI) paid by a company in an accounting period and is intended to target the relief at companies generating employment.

### Energy efficient equipment

The scheme of 100% upfront capital allowances (tax depreciation) for energy efficient equipment has been extended by Finance Act 2011 for a further three years to 31 December 2014.

### Stamp duty

In December 2010, the rate of stamp duty on residential property was reduced from 9% to a rate of just 1% (with any excess above 1 million euros (EUR) chargeable at 2%).

### *Value-added tax (VAT)*

From 1 July 2011, a reduced 9% VAT rate will apply to certain services in the tourism sector. These include restaurant and catering services, hotel and holiday accommodation, and various entertainment services such as admissions to cinemas, theatres, museums, fairgrounds, amusement parks, and sporting facilities. Under current legislation, this rate will apply until 31 December 2013.

### *Mandatory disclosure*

In a move to promote transparency between taxpayers, practitioners, and tax authorities, provisions relating to the disclosure of tax schemes are applicable as of January 2011. These require promoters of such schemes to provide information to the tax authorities within a specified time of having made the scheme available. A transaction which comes within the new law and which therefore must be reported to Revenue is not necessarily a tax avoidance transaction for the purposes of existing legislation. The rules are wide reaching and essentially cover all tax heads including corporation tax, income tax, capital gains tax, stamp duty, VAT, customs duties, and excise duties.

## *Taxes on corporate income*

### *Corporation tax*

Corporation tax is chargeable as follows on income and capital gains:

| Standard rate on income 'trading rate' | Higher rate on income 'passive rate' | Capital gains rate |
|---|---|---|
| 12.5% | 25% | 25% |

Resident companies are taxable in Ireland on their worldwide profits (including gains). Non-resident companies are subject to Irish corporation tax only on the trading profits of an Irish branch or agency and to Irish income tax (generally by way of withholding) on certain Irish source income.

Non-trading (passive) income includes dividends from companies resident outside Ireland (with some exceptions), interest, rents, and royalties. Legislation provides that certain dividend income (e.g. income from foreign trades) is taxed at 12.5% *(see the Income determination section)*. The higher rate (i.e. 25%) also applies to income from a business carried on wholly outside Ireland and to income from land dealing, mining, and petroleum extraction operations.

An additional 'profit resource rent' tax applies to certain petroleum activities. Depending on the profit yield of a site, the tax rate applicable can range from 25% to 40%.

Close companies *(see the Income determination section)* may be subject to additional corporate taxes on undistributed investment income (including Irish dividends) and on undistributed income from professional services. Examples of professional services include professions such as solicitor, accountant, doctor, and engineer.

## Corporate residence

A company that is incorporated, or has its place of central management and control, in Ireland will be regarded as resident in Ireland for the purposes of corporation tax and capital gains tax. This is subject to the following two exceptions where a company incorporated in Ireland is not considered a tax resident.

A treaty exception applies if the Irish incorporated company is, by virtue of an Irish double tax treaty (DTT), considered to be tax resident in the treaty partner country and not resident in Ireland.

An active trading exception applies if the Irish incorporated company or its 50% affiliate carries on a trade in Ireland and the company has qualifying ownership. A 50% affiliate is essentially a company where:

- one company is a 50% subsidiary of the other or both companies are 50% subsidiaries of a third company
- there is an entitlement to at least 50% of the profits available for distribution, and
- there is an entitlement to at least 50% of the assets available in the case of a winding up of the other company.

Qualifying ownership requires that the Irish incorporated company or a 50% or more affiliate/parent is listed on a stock exchange in an EU member state or a territory which has a tax treaty with Ireland or, in the absence of such a listing, that the ultimate control (more than 50%) of the Irish incorporated company rests with persons who are tax resident in EU or treaty countries.

### Permanent establishment (PE)

Non-resident companies are subject to Irish corporation tax only on the trading profits attributable to an Irish PE, plus Irish income tax (generally by way of withholding, though this is not the case with Irish source rental profits) on certain Irish source income.

For non-resident companies, the liability to corporation tax depends on the existence of any kind of PE through which a trade is carried on. The meaning of PE for Irish tax purposes is set out in statute; it is largely based on the Organisation for Economic Co-operation and Development (OECD) Model Tax Convention definition, but is not identical in all respects.

Subject to the terms of the relevant double taxation agreement, a non-resident company will have a PE in Ireland if:

- it has a fixed place of business in Ireland through which the business of the company is wholly or partly carried on or
- an agent acting on behalf of the company has and habitually exercises authority to do business on behalf of the company in Ireland.

A fixed place of business includes (but is not limited to) a place of management, a branch, an office, a factory, a workshop, an installation or structure for the exploration of natural resources, a mine, oil or gas well, quarry, or other place of extraction of natural resources, or a building or construction or installation project. A company is not, however, regarded as having an Irish PE if the activities for which the fixed place of business is maintained or which the agent carries on are only of a preparatory or auxiliary nature (also defined in the statute).

## Other taxes

### Value-added tax (VAT)

VAT is charged at 21% on the supply of most goods and services in the course of business.

There are two lower rates. A 13.5% rate applies to most building services, labour intensive services, domestic fuel and power, and other reduced rate supplies. A 4.8% rate applies to livestock and greyhounds.

From 1 July 2011, a reduced 9% VAT rate will apply to certain services in the tourism sector. These include restaurant and catering services, hotel and holiday accommodation, and various entertainment services such as admissions to cinemas, theatres, museums, fairgrounds, amusement parks, and sporting facilities. Under current legislation, this rate will apply until 31 December 2013.

Most exports, food, oral medicine, and children's clothing and footwear are zero-rated.

Some supplies are exempt from VAT. The main exempt categories are most banking services, insurance services, medical services, passenger transport, education, and training.

Zero rating is preferable to exemption because most VAT costs incurred in making a zero-rated supply can be recovered, while those incurred in making an exempt supply generally cannot.

### Customs duties

Many goods imported into Ireland from outside the European Union are subject to customs duties. The rates of duty are provided by the EU's Common Customs Tariff.

### Excise duties

Excise duties are chargeable on most hydrocarbon oil products, electricity supply, alcoholic drinks, and tobacco products imported into or produced in Ireland.

### Local taxes

Local taxes known as 'rates' are not based on income but rather are levied on the occupiers of business property by reference to a deemed rental value of the property concerned. The level of rates levied can depend on the region in which the property is located. Rates are an allowable deduction for corporation tax purposes.

Local authorities are also empowered to levy charges on all occupiers for specific services (e.g. water supply). These charges are also deductible for corporation tax purposes.

### Stamp duty

Stamp duty is a tax on instruments. It is payable on transfers of land and on other assets whose legal title cannot be passed by delivery. It is also chargeable on all instruments of transfer executed in Ireland, and on instruments, wherever executed, which relate to Irish property or activities. The transfer of assets between associated companies may not be liable to stamp duty, provided the following key conditions are met:

- The companies have a 90% relationship (that is, one company is the beneficial owner of at least 90% of the ordinary share capital of the other and is entitled to at least

90% of the profits available for distribution and is entitled to at least 90% of the assets in the case of a winding-up of the other company).
- The companies are in a group 90% relationship as defined above that can be traced as far up the group chain as is necessary to establish the qualifying relationship.
- This relationship is maintained for a period of two years after the transfer of the assets to avoid the relief being clawed back.

There is an exemption for transfers of intellectual property (IP), and the categories of IP qualifying for this exemption are broadly similar to those for which IP capital allowances are available *(see Intellectual property regime in the Deductions section)*.

Stamp duty rates are up to 6% of the value transferring. Rates of 1% to 2% apply for residential property. Stamp duty is levied at 1% on transfers of Irish shares.

A EUR 1 stamp duty applies to a policy of insurance, other than life insurance, relating to risks located in Ireland. The stamp duty is normally collected under the terms of a composition agreement, which provides for regular, usually quarterly, payments of duty.

### *Capital duty on share capital*
Ireland does not levy capital duty on share capital of companies.

### *Capital taxes*
Ireland does not levy tax on the net worth of companies.

### *Social security*
Employed persons are compulsorily insured under a state-administered scheme of pay-related social insurance (PRSI). Contributions are made by both the employer and the employee. The employer is responsible for making PRSI contributions up to a rate of 10.75%, and these are an allowable deduction for corporation tax purposes.

### *Insurance premium tax (IPT)*
A levy of 3% of gross premiums received applies in relation to non-life insurance policies relating to risks located in Ireland. This levy is payable four times per annum, within 30 days of the end of each quarter (i.e. within 30 days from quarters ending 31 March, 30 June, 30 September, and 31 December).

A levy of 1% of gross premiums received applies in relation to certain classes of life insurance policies relating to risks located in Ireland. This levy is payable four times per annum, within 25 days of the end of each quarter (i.e. within 25 days from quarters ending 31 March, 30 June, 30 September, and 31 December).

Pension business and reinsurance business are excluded from the levy.

### *Environmental taxes*
In Ireland, a levy (currently 22 cents per bag) is imposed upon consumers provided with a plastic bag when purchasing goods in supermarkets and other retail outlets. Under the applicable legislation, retailers are obliged to collect 22 cents in respect of every plastic bag or bag containing plastic, regardless of size, unless specifically exempted, that is provided to customers and remit all plastic bag levies collected to Irish Revenue. As a result of the levy, most non-supermarket retailers provide paper carrier bags, and many retailers provide ‘bags for life’, which are made from non-plastic material and, therefore, not subject to the environmental levy.

### Carbon tax

A carbon tax has been introduced on mineral oils (e.g. auto fuels, kerosene) which are supplied in Ireland. The rates of carbon tax on oil and gas broadly equate to EUR 15 per tonne of CO2 emitted. Relief applies where mineral oils are supplied to an Emissions Trading Scheme (ETS) installation or for electricity generation. Pure biofuels are exempt from carbon tax. There is full relief for the biofuel component of the fuel. Where biofuel has been mixed or blended with any other mineral oil, the relief from carbon taxes shall apply to the biofuel content of the mixture or blend, regardless of the percentage.

A carbon tax has also been introduced on natural gas and solid fuel where supplied for combustion. Again, reliefs apply where these fuels are supplied to ETS installations or used in electricity generation, chemical reduction, or in the electrolytical or metallurgical processes.

## Branch income

Irish branches of foreign companies are liable to corporation tax at the rates which apply to Irish resident companies. No tax is withheld on repatriation of branch profits to the head office.

## Income determination

Irish trading profits are computed in accordance with Irish Generally Accepted Accounting Principles (GAAP) or International Financial Reporting Standards (IFRS), subject to any adjustment required by law. Prior-year adjustments may arise on the first-time adoption of IFRS, which may result in double counting of income or expenses or of income falling out of the charge to tax. Generally speaking, in order to avoid such an outcome, transitional adjustments exist whereby amounts of income or expenses that could be double-counted or that would fall out of the charge to tax are identified and the amounts concerned are taxed or deducted as appropriate over a five year period.

### Inventory valuation

Each item of inventory is valued for tax purposes at cost or market value, whichever is lower, and this will normally accord with the accounting treatment. The method used in arriving at cost or market value of inventory generally must be consistent and must not be in conflict with tax law. The first in first out (FIFO) method is an acceptable method of calculation for tax purposes. The base-stock method has been held to be an inappropriate method for tax purposes, as has the last in first out (LIFO) method.

### Capital gains

Companies are subject to capital gains tax in respect of gains arising on the disposal of capital assets. The taxable gain is arrived at by deducting from the sales proceeds the cost incurred on acquiring the asset (as indexed to reflect inflation only up to 31 December 2002). The resulting gain is taxable at 25%. In cases of disposals of interests in offshore funds and foreign life assurance policies, indexation relief does not apply; while, with effect from 1 January 2011, a tax rate of 30% applies to funds and policies located in EU/European Economic Area (EEA)/DTT countries, and a rate of 27% or 40% applies to funds or policies located in all other jurisdictions. Special rules apply to gains (and losses) from the disposal of development land in Ireland.

Companies that are tax resident in Ireland (that is managed and controlled in Ireland or incorporated in Ireland and not qualifying for exclusion) are taxable on worldwide gains. Non-resident companies are subject to capital gains tax on capital gains arising on the disposal of Irish land, buildings, mineral rights, and exploration rights on the Irish continental shelf, together with shares in unquoted (unlisted) companies, whose value substantially (greater than 50%) is derived from these assets. Non-resident companies also are subject to capital gains tax from the realisation of assets used for the purposes of a business carried on in Ireland.

Losses arising on the disposal of capital assets may be offset against capital gains in the accounting period or carried forward for offset against future capital gains. No carryback of capital losses is permitted. There is no facility to offset capital losses against business income or to surrender capital losses within a tax group.

Irish capital gains tax legislation facilitates corporate reorganisations on a tax-free basis in situations where there is a share for share exchange.

### *Participation exemption from capital gains*

A participation exemption is available to Irish resident companies on the disposal of a shareholding interest if:

- a minimum of 5% of the shares (including the right to profits and assets on winding up) is held for a continuous 12-month period
- the share sale takes place during the period for which the minimum 5% holding is held
- the sale takes place within two years after meeting the holding requirement, to take account of gradual dispositions over time
- the company whose shares are sold is resident in an EU member state (including Ireland) or in a country with which Ireland has a DTT in force at the time of the disposal, and
- a trading condition is met at the time of the disposal whereby either: (i) the business of the company whose shares are disposed of consists wholly or mainly of the carrying on of one or more trades or (ii) taken together, the businesses of the Irish holding company and all companies in which it has a direct or indirect 5% or more ownership interest consist wholly or mainly of the carrying on of one or more trades.

If the Irish holding company is unable to meet the minimum holding requirement but is a member of a group (that is, a parent company and its 51% worldwide subsidiaries), the gain arising on the disposal still will be exempt if the holding requirement can be met by including holdings of other members of the group. Thus, the Irish company may be exempt from capital gains tax on a disposal of shares even if it does not directly hold a significant shareholding. The exemption also applies to a disposal of assets related to shares, such as options and convertible debt. However, it does not apply to a sale of either shares or related assets that derive the greater part of their value (more than 50%) from Irish real property, minerals, mining rights, and exploration and exploitation rights in a designated area. Shares deriving their value from non-Irish real property, minerals, and mining rights qualify for exemption if the other conditions are met.

Capital losses arising on the disposal of a shareholding where a gain on disposal would be exempt under the participation exemption are not deductible.

### *Dividend income*
Dividends from Irish companies are exempt from corporation tax. Dividends paid out of the trading profits of a company resident in a country with which Ireland has a DTT may be taxed at the 12.5% rate, provided a claim is made. The 12.5% corporate tax rate applies to the same type of dividends received from companies resident in non-treaty countries, that is, where the company that paid the dividend is a listed company or is part of a 75% listed group the principal class of the shares of which are substantially and regularly traded on the Irish Stock Exchange, a recognised Stock Exchange in a country with which Ireland has a DTT, or on such other Stock Exchange as is approved by the Minister for Finance for the purposes of this relief from double taxation.

Foreign dividends received by an Irish company where it holds 5% or less of the share capital and voting rights in that foreign company are exempt from corporation tax where the Irish company would otherwise be taxed on this dividend income as trading income.

Dividends from Irish resident companies are not liable to further tax, other than a surcharge on close companies if the dividend is not redistributed. Broadly speaking, a close company is a company which is under the control of five or fewer 'participators'. Participators can include individual shareholders, corporate shareholders, loan creditors, any person with a right to receive distributions from the company, etc. Where not less than 35% of the shares of a company (including the voting power) are listed, a company would not be regarded as a close company.

A close company surcharge of 20% is payable on certain non-trading income (for example, rental income, certain dividend income, and interest income) if it is not distributed to shareholders within 18 months of the accounting period in which the income was earned. Since 31 January 2008, a close company making a distribution and the close company receiving a distribution have the option jointly to elect to have the dividend disregarded for surcharge purposes. This can give close companies the option of moving 'trading income' up to a holding company without incurring a surcharge. Generally speaking, close companies avoid the surcharge through the payment of dividends within the prescribed period.

### *Stock dividends*
Stock dividends taken in lieu of cash are taxed to the shareholder on an amount equivalent to the amount which would have been received if the option to take stock dividends had not been exercised. If the recipient is an Irish resident company and it receives the stock dividend from a quoted (listed) Irish company, then there will be no tax. For a quoted (listed) company paying the stock dividend, dividend WHT with the appropriate exemptions and exclusions applies. Other stock dividends (bonus issues) are generally non-taxable.

### *Foreign income*
Resident companies are liable to Irish tax on worldwide income. Accordingly, in the case of an Irish resident company, foreign income and capital gains are, broadly speaking, subject in full to corporation tax. This applies to income of a foreign branch of an Irish company as well as to dividend income arising abroad.

In general, income of foreign subsidiaries of Irish companies is not taxed until remitted to Ireland, although there are special rules that seek to tax the undistributed capital gains arising from the sale of Irish land and buildings by certain non-resident close companies *(see Dividend income above for further information in relation to close companies)*.

Foreign taxes borne by an Irish resident company (or Irish branch of an EEA resident company), whether imposed directly or by way of withholding, may be creditable in Ireland *(see Foreign tax credit in the Tax credits and incentives section)*.

## Deductions

In general, expenses incurred wholly and exclusively for the purposes of the trade are tax-deductible.

### Accrued expenses

General accruals and provisions are not tax-deductible.

### Depreciation

Book depreciation is not deductible for tax purposes (except in the case of IP assets). Instead, tax depreciation (known as capital allowances) is permitted on a straight-line basis in respect of expenditure incurred on assets which have been put into use by the company. The following rates are applicable:

| Asset type | Tax depreciation rate (%) |
|---|---|
| Plant and machinery | 12.5 |
| Industrial buildings used for manufacturing | 4 |
| Motor vehicles | 12.5 |
| IP assets | Book depreciation or 7 |

The allowances are calculated on the cost after deduction of grants, except for plant and machinery used in the course of the manufacture of processed food for human consumption. In this case, the allowances are calculated on the gross cost. Allowances on cars are restricted to a capital cost of EUR 24,000 and may be restricted further (to 50% or zero) depending on the level of carbon emissions of the vehicle.

### Accelerated capital allowances

A 100% first year capital allowance is available in respect of expenditures incurred on certain approved energy-efficient equipment up to 31 December 2014. The categories of equipment that may be eligible for inclusion are:

- Information and communications technology.
- Heating and electricity provision.
- Electric and alternative fuel vehicles.
- HVAC control systems.
- Lighting.
- Motors and drives.
- Building energy management systems.
- Refrigeration and cooling systems*.
- Electro-mechanical systems*.
- Catering and hospitality equipment*.

*Subject to Commencement Order

### Leasing

Ireland operates an eight-year tax depreciation life on most assets. For short life assets (that is, those with a life of less than eight years), Ireland has allowed lessors to follow the accounting treatment of the transaction in the case of finance leases. This basically allowed finance lessors to write-off their capital for tax purposes in line with the economic recovery on the asset. In 2010, Ireland extended this beneficial tax treatment to operating leases of certain assets. Heretofore, operating lessors of such assets were required to write-off their capital over a period of eight years which created a mismatch with the economic recovery. The change means that operating lessors may now elect to follow the accounting treatment so that they are charged to tax on the rentals received from operating lease (that is, rentals included in P&L account) without addback for depreciation and without a deduction for tax depreciation. The new approach provides a faster write-off of the capital cost of an asset where before they were relying on tax depreciation over eight years. The new provision applies to incremental expenditure incurred in accounting periods commencing on or after 1 January 2010.

### *Interest expenses*
A deduction for interest is allowed only to the extent that borrowings are used for the purpose of a trade or other limited purposes.

### *R&D expenses*
Expenditure on scientific R&D and payments for the acquisition of know-how in general are allowable deductions, as are the costs of obtaining or extending patents and obtaining and renewing trademarks.

### *Charitable contributions*
Companies are entitled to a deduction, as a trading expense, for qualifying donations to approved charities, educational institutions, schools, churches, research foundations, sports bodies, and other approved organisations which satisfy certain conditions.
To qualify for a tax deduction, the donation(s) to an organisation in a 12-month accounting period must amount to at least EUR 250.

### *Meals and entertainment*
Costs incurred for third-party entertainment are not tax-deductible. Entertainment includes the provision of accommodation, food, drink, and any other form of hospitality including the provision of gifts. Expenditure on bona fide staff entertainment is allowable as a deduction provided its provision is not incidental to the provision of entertainment to third parties. Certain promotional costs are tax-deductible if they are incurred wholly and exclusively for the purposes of the trade.

### *Pension expenses*
Contributions to certain employee pension schemes and the cost of setting up such schemes are deductible. Pension contributions are allowable as a deduction for employers in the year in which they are paid.

### *Taxes*
Taxes that are deductible in computing profits for corporation tax include VAT not recovered, the employer's share of PRSI contributions, and local taxes (i.e. rates levied on commercial property and local authority charges).

### *Net operating losses*
Losses are computed for tax purposes in the same way as business profits. Trading losses can be offset against other income of any nature, either in the current or preceding accounting period (of equal length). The amount of losses required to shelter the income is dependent on the tax rate which would have been applied to the income in the absence of the loss relief. Any excess losses can be carried forward indefinitely against future trading income. Certain changes in ownership may prevent the

carryforward of losses to future periods. Terminal losses which arise within 12 months of the date a company ceases to trade may be carried back three years.

### *Payments to foreign affiliates*

Generally, deductions can be claimed for royalties, management service charges, and most interest charges paid to foreign affiliates, provided the amounts do not exceed what would be paid to unrelated entities. Depending on the circumstances, certain elections may be required. Ireland does not have any thin capitalisation rules.

## *Group taxation*

The concept of 'fiscal unity' or consolidated group tax does not exist in Ireland. However, trading losses as computed for tax purposes may be offset on a current period basis against taxable profits of another group company. As with loss relief in a single company, the amount of losses required to shelter the income is dependent on the tax rate which would have been applied to the income in the absence of the loss relief.

A group consists of a parent company and all of its 75% subsidiaries, with all group members being tax resident in Ireland or in another member state of the EEA. Non-Irish members may only surrender losses from activities which would, if profitable, be subject to Irish tax.

Capital losses cannot be surrendered within a group.

Relief from capital gains tax is available on intragroup transfers of capital assets. Where a capital asset is transferred from a resident company to another resident company in a 75% group, no capital gains tax charge arises. A group, for capital gains tax purposes, consists of a principal company and its 75% subsidiary companies. A 75% subsidiary is defined by reference to the beneficial ownership of ordinary share capital, owned either directly or indirectly. A capital gains tax group can include EEA resident companies for the purpose of analysing the beneficial ownership of a company.

It also is possible for an Irish resident company and an Irish branch of an EEA company in the same group to transfer capital assets without crystallising a capital gains charge, provided the asset transferred remains within the scope of the charge to Irish capital gains tax.

Subsequent to an intragroup transfer, a charge to capital gains tax will arise when either:

- the asset is sold outside the group, in which case the tax is calculated by reference to the original cost and acquisition date of the asset when first acquired within the group or
- a company owns an asset which was transferred by a group company and subsequently leaves the group within a ten year period of the intragroup transfer. The gain on this intragroup transfer crystallises and becomes payable at this point.

### *Transfer pricing*

In April 2010, Ireland enacted broad based transfer pricing legislation. The legislation endorses the OECD Transfer Pricing Guidelines for Multinational Enterprises and Tax Administrations and adopts the arm's-length principle. The introduction of general transfer pricing legislation in Ireland was widely anticipated and brings the Irish tax regime into line with international norms in this area. The new regime applies to domestic as well as international related party arrangements and is effective for accounting periods commencing on or after 1 January 2011 in relation to certain arrangements entered into on or after 1 July 2010.

The new transfer pricing rules apply to arrangements entered into between associated persons, involving the supply or acquisition of goods, services, money, or intangible assets and relating to trading activities within the charge to Irish tax at the trading rate of 12.5%. The rules confer a power on the Irish tax authorities to re-compute the taxable profit or loss of a taxpayer where income has been understated or where expenditure has been overstated as a result of certain non-arm's-length arrangements. The adjustment will be made to the Irish taxable profits to reflect the arrangement had it been entered into by independent parties dealing at arm's length.

The legislation also places an obligation on a taxpayer to provide documentation 'as may reasonably be required' to support the arm's-length nature of the related party arrangements and that documentation will need to be prepared 'on a timely basis'. Guidance note issued by the Irish tax authorities on transfer pricing documentation support the legislative basis and indicate that a company is required to have transfer pricing documentation available for inspection if requested by the Irish tax authorities. Notably, the guidance notes state that "it is best practice that the documentation is prepared at the time the terms of the transaction are agreed". Additionally, the guidance notes state that in order "for a company to be in a position to make a correct and complete tax return, appropriate transfer pricing documentation should exist at the time the tax return is filed". It is worth noting that the taxpayer can maintain documentation in the form 'of its choosing'. Additionally, where documentation exists in another territory which supports the Irish arrangement, this will also be sufficient from an Irish transfer pricing perspective, provided that the documentation is in English. The Irish tax authorities have also confirmed that they will accept documentation that has been prepared in accordance with either the OECD Transfer Pricing Guidelines or the code of conduct adopted by the EU Council under the title 'EU Transfer Pricing Documentation'.

Note that arrangements entered into between related parties prior to 1 July 2010 are 'grandfathered' and thereby excluded from the scope of the new transfer pricing rules. There is also an exemption from the new rules for small and medium-sized enterprises. Broadly speaking, small and medium-sized enterprises include enterprises employing less than 250 people and that have either a turnover of less than EUR 50 million or assets of less than EUR 43 million.

### *Thin capitalisation*
Ireland does not have any thin capitalisation rules.

### *Controlled foreign company (CFC) regime*
Ireland does not have CFC rules.

## *Tax credits and incentives*

The main tax incentives in Ireland are:

- 12.5% corporation tax rate on active business income.
- A 25% credit on incremental R&D spending over the base year of 2003; total effective tax deduction of 37.5%.
- Ability to exploit IP at favourable tax rates.

- Accelerated tax depreciation allowances for approved energy efficient equipment.
- Ability to carry out investment management activities for non-Irish investment funds without creating a taxable presence in Ireland for such funds.
- An effective legal, regulatory, and tax framework to allow for the efficient redomiciliation of investment funds from traditional offshore centres to Ireland.

### *R&D credit*

Incremental R&D expenditure (over a base year of 2003) qualifies for a tax credit of 25% in addition to a tax deduction. This means that the total tax deduction on qualifying expenditure is 37.5%. Expenditure on buildings used for R&D now also can qualify for the credit as long as at least 35% of the building is used for R&D activities. This hurdle is measured over the course of four years. This is of particular assistance where R&D is carried on in a manufacturing environment. It should be noted that expenditures incurred on the acquisition of an intangible asset that qualify for capital allowances under the IP regime will not qualify for the R&D credit.

Further enhancements to the R&D regime cater to pre-trading expenditures and other specific circumstances. Where a company incurs R&D expenditures but has not yet commenced to trade, all R&D claims in this regard must be made within 12 months from the end of the accounting period in which the company first commences to trade.

The R&D credit can be used to generate a tax refund through a carryback against prior year profits. In addition, repayment for excess credits is available over the course of a three-year cycle. Repayments are limited to the greater of the corporation tax payable by the company in the preceding ten years or the payroll tax liability for the period in which the relevant R&D expenditure is incurred.

In addition, under Irish GAAP, companies may account for the R&D tax credit through their profit and loss account or income statement in arriving at the pre-tax profit or loss.

### *Intellectual property (IP) regime*

Legislation provides for a tax deduction for capital expenditure on the acquisition of qualifying IP assets. The definition of IP assets is widely drafted and includes the acquisition of, or the licence to use, the following:

- Patents and registered designs.
- Trademarks and brand names.
- Know-how (broadly in line with the OECD model tax treaty definition of know-how).
- Domain name, copyrights, service marks, and publishing titles.
- Authorisation to sell medicines, a product of any design, formula, process, or invention (and rights derived from research into same).
- Applications for legal protection (for example, applications for the grant or registration of brands, trademarks, patents, copyright, etc.).
- Expenditure on computer software acquired for commercial exploitation.
- Goodwill, to the extent that it relates directly to the assets outlined above.

Capital allowances will be available at the same rate as the depreciation/amortisation charge for financial accounting purposes. Alternatively, the company may elect to claim allowances over a period of 15 years.

Tax deductions (e.g. financing costs) are available for offset against income generated from exploiting IP assets, up to a maximum deduction of 80% of the relevant IP profits. The remaining 20% is taxable at the 12.5% corporation tax rate. There is no clawback provided the IP is held for ten years (reduced from 15 years in Finance Act 2010).

There is currently an option to elect to stay within the 'old' regime for know-how and patents for IP acquired up until 7 May 2011. A shorter write off period of eight years has also been retained for acquired software rights under the existing capital allowances regime where the rights are not acquired for commercial exploitation (i.e. were acquired for end use by the company).

### *Exemption for new start-up companies*

A corporation tax holiday applies to certain start-up companies that commence to trade during 2009, 2010, or 2011. The relief applies for three years where the total amount of corporation tax payable does not exceed EUR 40,000 in each year. Marginal relief is available where corporation tax payable is between EUR 40,000 and EUR 60,000. Finance Act 2011 confirms that the exemption for start-up companies from corporation tax is to be extended to companies which commence a new trade in 2011. The relief available is now linked to the amount of employer's PRSI paid by a company in an accounting period and is intended to target the relief at companies generating employment.

### *Section 110 company*

Ireland has a favourable tax regime for entities known as Section 110 companies. A Section 110 company is an Irish resident special purpose company that holds and/or manages 'qualifying assets' which provides for an onshore investment platform (with access to Ireland's treaty network) in an environment of increased international focus on tax havens and transparency. The Section 110 regime has been in existence since 1991 and with appropriate planning effectively allows for corporation tax neutral treatment, provided that certain conditions are met. The regime is widely used by international banks, asset managers, and investment funds in the context of securitisations, investment platforms, CDOs, and capital markets bond issuances.

In this context, Finance Act 2011 made a number of amendments to the Section 110 regime. These changes, arrived at following extensive industry consultation, have significantly expanded the range of assets that a Section 110 company can invest in, whilst also seeking to restrict the use of Section 110 in specific targeted circumstances.

Prior to the publication of Finance Act 2011, Section 110 companies were limited to investing in financial assets. The term 'financial asset' is widely defined and includes both mainstream financial assets such as shares, loans, leases, lease portfolios, bonds, debt, and derivatives, as well as assets such as greenhouse gas emissions allowance, all types of receivables, etc.

The range of investments in which a Section 110 company can invest has been significantly extended to include investments in commodities and plant and machinery. Greenhouse gas emissions allowance has been redefined as a qualifying asset to include 'carbon offsets' and has been broadened significantly. These are very welcome changes, particularly in the context of recent market interest in commodity transactions and the launch of the Irish Government's 'Green International Financial Services Centre (IFSC)' initiative.

In addition, the extension of the Section 110 regime to include plant and machinery will benefit Ireland's position as the preferred destination for aircraft financing and leasing activities and will give an added boost to Ireland's position as the centre of excellence for aircraft financing transactions

### *Grants*
Cash grants may be available for capital expenditures on machinery and equipment and industrial premises, training of employees, creation of employment, rent subsidies, R&D, manufacturing and exporting products, providing services to customers overseas, etc. The level of grant aid depends on a number of factors and is specific to each project. Rates depend on the location of the new industry.

### *Foreign tax credit*
Foreign taxes borne by an Irish resident company (or Irish branch of an EEA resident company), whether imposed directly or by way of withholding, may be creditable in Ireland. The calculation of the credit depends on the nature of the income item, but for income sources other than dividends and some related party interest, the credit is limited to the Irish tax referable to the particular item of income. A system of onshore pooling of excess foreign tax credits applies to dividends from 5% or greater corporate shareholdings, and excess credits in the dividend pool can be carried forward indefinitely. A similar pooling system applies to some related party interest and also to foreign branch income.

An Irish resident company with a branch or branches outside Ireland is generally taxable in Ireland on the foreign branch profits with a credit for foreign taxes paid on those profits. A unilateral form of credit relief for foreign taxes paid by foreign branches operating in countries with which Ireland does not have a tax treaty is available also. To the extent that there were foreign taxes on branch profits that were not utilized in the relevant period (that is, where credit for foreign tax exceeds the Irish tax payable), these unused credits were lost, unless they could be used against Irish corporation tax on other foreign branch profits arising in the same accounting period. For accounting periods ending on or after 1 January 2010, any unused credits can be carried forward indefinitely and credited against corporation tax on foreign branch profits in future accounting periods.

## *Withholding taxes*

Irish resident companies are required to withhold tax on certain types of payments as set out below *(see table at end of this section for rate reductions and exemptions).*

| Recipient | Dividends (%) | Interest (%) | Patents, royalties (%) |
|---|---|---|---|
| Resident companies | 0 | 20 | 20 |
| Resident individuals | 20 | 20 | 20 |
| Non-resident companies and individuals | 20 | 20 | 20 |

### *Dividend withholding tax (WHT)*
Dividend WHT applies at 20% to dividends and other distributions, unless the recipient of the dividend is either an Irish company or a non-Irish company eligible for the Parent-Subsidiary Directive (which in Ireland requires a 5% or greater shareholding).

Exemptions from dividend WHT also are available where the recipient of the distribution falls into one of the categories listed below and provided an appropriate declaration is made to the company paying the distribution in advance of the distribution. In a move to significantly ease the administrative burden in applying for exemption for dividend WHT, this declaration is now self-assessed and valid for up to six years.

- Irish tax resident companies (a declaration is not required for Irish tax resident companies which hold a 51% or greater shareholding of the company).
- Non-resident companies, which are resident in a country with which Ireland has a tax treaty or in another EU member state, where the company is not controlled by Irish residents.
- Non-resident companies which ultimately are controlled by residents of a tax treaty country or another EU member state.
- Non-resident companies whose principal class of shares is traded on a recognised stock exchange in a treaty country or another EU member state or on any other stock exchange approved by the Minster for Finance (or if recipient of the dividend is a 75% subsidiary of such a listed company).
- Non-resident companies that are wholly owned by two or more companies the principal class of shares of each of which is traded on a recognised stock exchange in a treaty country or another EU member state or on any other stock exchange approved by the Minister for Finance.
- Individuals who are resident in a tax treaty country or in another EU member state.
- Certain pension funds, retirement funds, sports bodies, collective investment funds, and employee share ownership trusts.

Companies that make a dividend distribution are required, within 14 days of the end of the month in which the distribution is made, to make a return to the tax authorities containing details of the recipient of the dividend, the reason for any exemption from dividend WHT, and to pay over any tax withheld.

### *WHT on capital gains*

Where any of the following assets is disposed of, the person by whom or through whom the consideration is paid (i.e. the purchaser) must deduct capital gains tax at 15% from the payment:

1. Land or minerals in Ireland or exploration rights in the Irish continental shelf.
2. Unquoted (unlisted) shares deriving their value or the greater part of their value (more than 50%) from assets described in (1).
3. Unquoted (unlisted) shares issued in exchange for shares deriving their value or the greater part of their value from assets as described in (1).
4. Goodwill of a trade carried on in Ireland.

The requirement to withhold tax is not required where the consideration does not exceed EUR 500,000 or where the person disposing of the asset produces a certificate from the Revenue Commissioners authorising payment in full. A clearance certificate may be obtained by making application on Form CG50 to the Revenue Commissioners supported by a copy of the agreement or contract for sale. The certificate may be obtained on the grounds that the vendor is Irish resident or that no capital gains tax is due in respect of the disposal or that the capital gains tax has been paid. WHT is creditable against the capital gains tax liability of the vendor, and any excess is refundable.

To avoid the requirement to withhold, clearance must be obtained before the consideration is paid. There is no exemption from the withholding procedure where the asset is held as trading stock or where the transaction is intragroup and a capital gains tax liability does not arise. Failure to obtain the certificate will lead to the purchaser being assessed to capital gains tax for an amount of 15% of the consideration.

### *Professional services withholding tax (PSWT)*
Individual income tax at the standard rate (currently 20%) is deducted from payments for professional services by government departments, state bodies, and local authorities. Credit is granted for any PSWT withheld against the corporation tax (or income tax for an individual) liability of the accounting period in which tax is withheld.

### *Relevant contracts tax (RCT)*
There are special WHT rules (with exemptions available) relating to payments made by principal contractors to sub-contractors in respect of relevant contracts in the construction, forestry, and meat processing industries. Where relevant operations under a relevant contract are carried out in Ireland, the RCT system applies regardless of whether or not parties to the contract are non-resident in Ireland, parties to the contract are not liable to tax in Ireland in respect of those operations, the contract is executed outside Ireland, or payments under the contract are made outside Ireland.

The principal contractor must deduct tax at a rate of 35% from such payments and remit this to the Revenue unless the sub-contractor produces a certificate (Form C2) authorising the receipt of the amount without deduction of tax and the principal contractor obtains a Relevant Payments Card in relation to the sub-contractor.

Qualification for exemption from WHT is a two-part test, and it is critical that both parts are satisfied before any payment is made gross. The gross amount receivable under the contract is included in the computation of the profit of the sub-contractor, and the sub-contractor is entitled to credit for, or repayment of, the tax suffered.

### *WHT rate reductions and exemptions*
Exemptions and rate reductions apply under domestic law and under tax treaties.

Legislation recently has been amended to allow for favourable treatment in situations where a DTT has been signed but not yet ratified.

* These treaties are currently under renegotiation.

** Awaiting ratification.

*** Protocols to the DTTs with Belgium, Malaysia, Switzerland, and Austria are awaiting ratification. These protocols do not have any impact upon the exemptions and rate reductions outlined above.

**** A protocol to the DTT with South Africa is awaiting ratification. The above exemptions and rates are as per the pending protocol. Currently the above payments to South African companies are exempt from WHT.

***** Protocol agreed and renegotiated treaty awaits ratification. Under the renegotiated treaty, the following dividend WHT rate will apply: 0/5/15.

Notes

1. Individuals (and most companies) resident in countries with which Ireland has a tax treaty should be able to qualify for exemption from WHT subject to filing appropriate documentation.
2. Financial institutions operating in Ireland are obliged to withhold tax (deposit interest retention tax or DIRT) at 25% out of interest paid or credited on deposit accounts in the beneficial ownership of resident companies, unless the financial institution is authorised to pay the interest gross. There is no DIRT on interest paid to non-residents where a written declaration of non-residence is completed. Certain annual interest payments are subject to WHT at 20%. Interest payments by companies to companies resident in other EU member states or in treaty countries are generally not subject to WHT. The EU Interest and Royalties Directive may also provide an exemption from WHT for payments between associated companies.
3. Royalties, other than patents, are not generally subject to WHT under domestic law. Documentation and reporting may be required to access lower treaty withholding rates in other cases. The EU Interest and Royalties Directive may also provide an exemption from WHT for payments between associated companies. Associated companies, for the purpose of this directive, are companies where one can directly control at least 25% of the voting power of the other or at least 25% of the voting power of both companies is directly controlled by a third company. In all cases, all companies must be resident in a member state of the European Union.
4. Where the beneficial owner of the dividends is a resident of a contracting state and is a company which holds directly at least 25% of the capital of the company paying the dividends.
5. Refer to Ireland/Pakistan DTT.
6. Where the beneficial owner of the dividends is a resident of the contracting state and is a company which controls directly or indirectly 10% or more of the voting power in the company paying the dividends.
7. Where the beneficial owner of the dividends is a resident of the contracting state and is a company which controls directly 10% or more of the voting power in the company paying the dividends.
8. For loans from banks and, in the case of Norway, certain government funds.
9. Where the beneficial owner of the dividends is a resident of the contracting state and controls directly or indirectly at least 10% of the voting power in the company paying the dividend and has invested more than EUR 100,000 in the capital of the company paying the dividend. The above details in general are subject to any special relationship that may exist between the payer and the recipient, and it is assumed that the recipient does not have a permanent establishment (taxable presence) in the other contracting state.
10. Where the beneficial owner of the dividends is a resident of a contracting state and is a company which holds directly at least 70% of the voting power of the company paying the dividends.
11. Refer to Ireland/Vietnam DTT.
12. Treaty comes into effect on 1 January 2012.

# Ireland

## *Tax administration*

### *Return*
Corporation tax returns must be submitted within nine months (and no later than the 21st day of the ninth month) after the end of the tax accounting period in order to avoid a surcharge (maximum of EUR 63,485) or a restriction of 50% of losses claimed, to a maximum of EUR 158,715. The tax accounting period normally coincides with a company's financial accounting period, except where the latter period exceeds 12 months.

### *Statute of limitations*
A system of self-assessment and Irish Revenue audits is in operation in Ireland. Irish Revenue may undertake a Revenue audit of a company's tax return within a period of four years from the end of the accounting period in which the return is submitted.

### *Payment of tax*
Corporation tax payment dates are different for 'large' and 'small' companies. A small company is one whose corporation tax liability in the preceding period was less than EUR 200,000. Interest on late payments or underpayments is applied at approximately 10% per year.

#### Large companies
The first instalment of preliminary tax totaling 45% of the expected final tax liability, or 50% of the prior period liability, is due six months before the end of the tax accounting period (but no later than the 21st day of the month).

The second instalment of preliminary tax is due 31 days before the end of the tax accounting period (but no later than the 21st day of the month). This payment must bring the total paid up to 90% of the estimated liability for the period.

The balance of tax is due when the corporation tax return for the period is filed (that is, within nine months of the end of the tax accounting period, but no later than the 21st day of the month in which that period of nine months ends).

#### Small companies
Small companies only are required to pay one instalment of preliminary tax. This is due 31 days before the end of the tax accounting period (but no later than the 21st day of the month).

The company can choose to pay an amount of preliminary tax equal to 100% of the corporation tax liability for its immediately preceding period or 90% of the estimated liability for the current period. As is the case for large companies, the final instalment is due when the corporation tax return is filed.

## *Other issues*

### *Asset management*
Irish tax legislation contains provisions aimed at enhancing Ireland as a leading location for the management of both Undertakings for Collective Investment in Transferable Securities (UCITS) and non-UCITS funds. UCITS III and IV brought about fundamental changes to both the management and structuring of UCITS. One of the reforms introduced permits UCITS management companies located in one EU jurisdiction to manage UCITS domiciled in another EU jurisdiction. One of the areas of concern is

whether the activities of the management company could bring a foreign UCITS within the charge to tax in the management company's home jurisdiction (e.g. by creating a branch or agency or causing the fund to be regarded as tax resident there). In the case of an Irish management company managing a non-Irish UCITS, such management company will not be regarded as a branch or agency of the non-Irish UCITS and will not bring the profits of the foreign UCITS within the charge to Irish tax or treat the foreign UCITS as an Irish regulated fund.

Following the US and OECD review of offshore domiciles, which has resulted in increased regulation and tax obligations, fund managers are being forced to consider possible alternative onshore jurisdictions for their investment fund products. Because of its international reputation of its investment funds industry and the favourable corporate tax regime, Ireland is seeing a significant trend in investment managers moving their investment platforms there from the traditional offshore jurisdictions. Recent company law changes also allow corporate funds to migrate to Ireland through a re-registration process, whereby the fund company would benefit from its continued existence, including the ability to retain the fund's performance track record post migration and avoid potential adverse tax consequences and costs that typically arise from a merger of an offshore fund with a new onshore fund. The Irish Financial Regulator has introduced a coordinated authorisation process to facilitate speed to market, which at present is a key advantage in comparison to delays being experienced in other EU domiciles.

### *Islamic finance*
The Irish tax treatment of certain Islamic finance transactions, such as funds, certain ijara (leasing), takaful (insurance), and re-takaful (reinsurance) is accommodated within existing Irish tax legislation. Specific legislation was also introduced to facilitate the issuance of sukuk (i.e. Islamic bonds) in Ireland. Overall, the intention of the legislature is to ensure that Islamic finance transactions are treated in the same favourable manner as conventional financing transactions. The legislation also introduced changes in relation to the taxation (and tax impact) of UCITS management companies. The UCITS structure is one of the commonly used structures for many different types of Islamic funds, such as retail Islamic equity funds, Shariah-compliant money market funds, Shariah-compliant exchange traded funds (ETFs), etc. This demonstrates the Irish government and tax authorities desire to enhance the attractiveness of Ireland as a location for Islamic finance transactions by extending to this form of financing the relieving provisions which currently apply to conventional financing.

### *Islamic insurance*
The Irish Revenue has recently provided guidance in respect of the Irish tax treatment of general takaful (non-life), re-takaful (reinsurance), and family (life) takaful arrangements. Legislative changes are not currently required to facilitate Islamic insurance in Ireland.

### *Exchange control*
Ireland does not have exchange control regulations.

### *Choice of legal entity*
Foreign investors tend to operate either through an Irish legal entity or as a branch of a foreign entity. Both are equally valid means of doing business in Ireland, and the choice would normally depend on the commercial fact pattern and individual circumstances of the investor parent company.

### *Mandatory disclosure*

In a move to promote transparency between taxpayers, practitioners, and tax authorities, provisions relating to the disclosure of tax schemes are applicable as of January 2011. These require promoters of such schemes to provide information to the tax authorities within a specified time of having made the scheme available. A transaction which comes within the new law and which therefore must be reported to Revenue is not necessarily a tax avoidance transaction for the purposes of existing legislation. The rules are wide reaching and essentially cover all tax heads including corporation tax, income tax, capital gains tax, stamp duty, VAT, customs duties, and excise duties.

## Significant developments

### Tax treaties

The Isle of Man has, in January 2011, signed a double tax agreement (DTA) with Bahrain, bringing the total number of treaties to four. The DTA with Belgium which was signed in July 2009 is still awaiting ratification.

The Isle of Man now has a total of 25 tax information exchange agreements (TIEAs), including those signed during 2011with Canada, India, Poland, and, most recently, Mexico.

### Income attributed to shareholders

Legislation currently exists which attributes the profits of an Isle of Man resident company to any Manx resident shareholders as if that profit had been distributed to them. Although any resulting tax charge falls on the shareholder, the legislation places reporting and filing obligations on the Isle of Man resident company in respect of profits realised and distributions made.

This legislation was abolished in the 2011 budget and will no longer apply for accounting periods commencing after 6 April 2012.

## Taxes on corporate income

Companies resident in the Isle of Man are taxed on their worldwide income, and any company with Manx-source income is required to file an annual income tax return reporting taxable profits calculated in line with local legislation and practice.

The majority of companies pay income tax at 0% in the Isle of Man. However, certain profits of licensed banks and companies that receive income from the rental or development of land situated in the Isle of Man pay tax at 10%. The general rules for the calculation of taxable income are the same whether a company is liable to tax at 0%, 10%, or a combination of both rates.

Unilateral relief from double taxation in respect of foreign source income is given by way of tax credit.

## Corporate residence

A company incorporated in the Isle of Man is automatically resident for tax purposes and must therefore file an annual income tax return whether it pays tax at 0% or 10%. A company which is incorporated elsewhere will be considered resident in the Isle of Man if it is 'managed and controlled' in the Isle of Man. 'Managed and controlled' is generally interpreted as being the place where the board of directors meets, although this is not always conclusive. In cases where a company is resident in the Isle of Man and also resident in a country with which the Isle of Man has a tax treaty, then a tie-breaker may operate to determine residence.

## *Other taxes*

### *Value-added tax (VAT)*

VAT is a transaction based tax and is applied on the domestic supply of most goods and services and is currently charged at a standard rate of 20% (increased from 17.5% with effect from 4 January 2011). VAT is designed to be a tax borne by the final consumer and there is a mechanism for businesses to recover VAT incurred in a supply chain, subject to meeting certain conditions.

For VAT purposes, the Isle of Man forms a single VAT jurisdiction with the United Kingdom, and the VAT rules are broadly identical. This means that VAT is charged on supplies between Isle of Man and UK businesses as if they were domestic supplies. The Isle of Man has its own tax authorities who work in conjunction with the UK tax authorities.

Some supplies are charged at 0%, including food, books and publications, and public transport, and there is also a 5% rate applying to domestic property repairs, amongst others. Finally, some supplies are exempt from VAT, including insurance and financial services, betting and gaming, education, and health.

### *Customs and excise duties*

In addition to VAT, the Isle of Man forms a common jurisdiction for customs and excise duties with the United Kingdom, and, again, the rules are broadly identical. Customs duties are levied on most goods imported from outside the European Union into the Isle of Man and there are various rates of duty which apply. Excise duties apply to such things as alcohol, tobacco, and fuels, and there are various rates of duty which apply. There is also a levy on commercial passenger flights known as Air Passenger Duty.

### *Betting duty*

There are no other transaction taxes in the Isle of Man other than betting duty on gaming transactions which is levied at differing rates of up to 15%, depending on the nature of the gaming transaction and whether it is on-line or land based.

## *Branch income*

The income of branches is taxed in the same way as other corporate income in the Isle of Man.

## *Income determination*

The general rules for the calculation of taxable income are the same whether a company is liable to tax at 0%, 10%, or a combination of both rates.

### *Banking income*
Licensed banks are taxed at 10% on income from deposit taking and interest earned from the investment of regulatory reserves only. Income earned on capital and reserves in excess of the regulatory capital, group funded lending, fiduciary deposits, assurance, insurance, custody, trust, and corporate services are taxed at 0%. Expenses are allocated against 0% and 10% income streams on a pro rata basis.

### *Inventory valuation*
Inventories are generally stated at the lower of cost or market value. Any method of valuation that is in accord with sound commercial principles is acceptable for tax purposes, provided it is adopted consistently at the beginning and end of the accounting period and does not conflict with tax law. In practice, inventories are normally valued for tax purposes at the lower of cost or net realisable value. A first in first out (FIFO) basis of determining cost where items cannot be identified is acceptable, but not the base stock method or the last in first out (LIFO) method.

In general, the book and tax methods of inventory valuation must conform.

### *Capital gains*
There is no capital gains tax in the Isle of Man.

### *Foreign income*
Resident corporations are liable to tax on their worldwide income (albeit the relevant rate of tax is often 0%). UK tax is relieved under the treaty with the United Kingdom by way of tax credits. However, the treaty does not cover dividends or debenture interest. Where a liability to tax at 10% arises, the Isle of Man grants unilateral relief from double taxation in respect of all foreign-source income arising outside the United Kingdom by way of tax credit.

## *Deductions*

Relief is given in calculating the taxable profit of a company if the expense is incurred in the normal course of the business and is incurred wholly and exclusively for business purposes. However, certain expenses which are deductible in the computation of profits are not allowable for tax purposes. These include depreciation, unpaid but accrued pension and bonus payments, certain lease payments, and interest paid to non-Manx resident lenders.

### *Depreciation*
Relief for depreciation is given using ‘capital allowances’ based on a reducing-balance method. Plant and machinery, tourist premises, industrial buildings, commercial buildings within a designated area, fish processing buildings, and agricultural buildings and works have an initial allowance of 100%. There are restrictions on allowances for expensive motorcars.

Isle of Man government grants are not taken into account in determining the amount of expenditure on which allowances may be given.

Tax depreciation is not required to conform to book depreciation.

Upon disposal, allowances will be reclaimed on the resale value, restricted to cost.

### *Taxes*
Local income taxes paid are not deductible when calculating net taxable profit.

### *Net operating losses*
Losses can be carried forward indefinitely against future profits from the same trade.

Trading losses incurred may be carried back against preceding year profits. There are additional rules which apply in the opening years of trade. Terminal losses in the last year of trade can be carried back against profits for the previous three years of trading.

## *Group taxation*

Trading losses and excess capital allowances may be surrendered (subject to certain restrictions) between 75% affiliates resident in the Isle of Man. Similar concessions are available to members of a consortium, but only a fraction of the loss or excess may be set-off, that fraction being equal to the members' share in the consortium in the relevant year of assessment.

### *Transfer pricing*
There is no transfer pricing regime in the Isle of Man. If, however, the Assessor of Taxes is of the opinion that the main purpose, or one of the main purposes, of any transaction is the avoidance or reduction of tax liability, assessments may be made to counteract that avoidance or reduction of tax liability.

### *Thin capitalisation*
There is no specific thin capitalisation rule in the Isle of Man.

### *Controlled foreign company (CFC) regime*
There is no CFC regime in the Isle of Man.

## *Tax credits and incentives*

In view of the low rate of income tax in the Isle of Man, there are no special tax incentives available.

### *Foreign tax credit*
*See Foreign income in the Income determination section for a description of foreign tax credits.*

## *Withholding taxes*

Withholding tax (WHT) should be deducted from certain payments made to non-residents by Isle of Man resident companies as follows:

- Rent from Manx land and property: 10% if paid to a company, 20% if paid to an individual.
- Dividends: WHT is not required.
- Loan interest and royalties: WHT is generally not required, but there are certain exceptions which may apply.

- Other: The Assessor of Income Tax in the Isle of Man has the power to require WHT, at a rate determined by the Assessor, on payments of taxable income made to a non-resident (e.g. payments made to non-resident sub contractors).

## Tax administration

### Returns
All companies are required to submit income tax returns on an accounting period basis, whether they are liable to tax at 0% or at 10%. The tax return is due for submission one year and one day following the end of an accounting period. An accounting period for tax filing purposes can be no more than 12 months; and where the financial statements cover more than 12 months, two (or more) returns may be required. Fixed rate penalties apply if returns are filed late.

### Payment of tax
Payment of tax is due within one year and one day of an accounting period end. Interest is charged on tax paid late.

## Other issues

### Tax treaties
The Isle of Man has, in January 2011, signed a double tax agreement (DTA) with Bahrain, bringing the total number of treaties to four. The DTA with Belgium which was signed in July 2009 is still awaiting ratification.

The Isle of Man now has a total of 25 tax information exchange agreements (TIEAs), including those signed during 2011with Canada, India, Poland, and, most recently, Mexico.

### Choice of business entity
There are several different entities through which businesses may operate in the Isle of Man. These include companies, limited liability companies, partnerships, limited partnerships, and protected cell companies.

# Israel

## Significant developments

The current corporate tax rate of 24% is scheduled to be reduced to 23% in 2012, 22% in 2013, 21% in 2014, 20% in 2015, and 18% in 2016 and thereafter.

On 29 December 2010, the Israeli Parliament approved a major reform amendment to The Law for the Encouragement of Capital Investments which is intended to simplify the manner of taxation that applies to income generated from an Approved Enterprise (AE) by applying a uniform tax rate for all AE-generated taxable income (2011 Amended Law) *(see Approved Enterprises in the Tax credits and incentives section)*. Prior to these amendments, the corporate tax rate applicable to an AE depended upon many factors, including the tax route selected, the geographical area in which the industrial site is located, the level of foreign investment ownership, and attribution of taxable income between different tiers of AE plans further to complex formulas.

It should be noted that the 2011 Amended Law may apply by filing an irrevocable election for income generated by an AE during 2011 and thereafter. Important transition rules apply.

As having AE status can provide material tax benefits for a company, a company's specific AE plans and overall corporate tax circumstances should be carefully analyzed in order to determine the optimal legislative alternative to be selected for any AE plans in force prior to the 2011 Amendment.

## Taxes on corporate income

Israel incorporated companies and foreign companies that have a branch presence in Israel are both subject to Israeli corporate tax. An Israeli-resident entity is subject to Israeli corporate tax on worldwide income while a non-resident entity is subject to Israeli corporate tax only on income accrued or derived in Israel. Income sourcing rules determine when income is to be considered from an Israeli source.

As of 2011, the current corporate tax rate is 24% (25% prior to 2011). The corporate tax rate is scheduled to be reduced to 23% in 2012, 22% in 2013, 21% in 2014, 20% in 2015, and 18% in 2016 and thereafter.

Approved enterprises are subject to reduced rates of tax depending upon the level of foreign ownership and location *(see the Tax credits and incentives section)*.

Israel does not impose local taxes on corporate income.

## Corporate residence

The following are considered to be resident in Israel:

- A company incorporated in Israel.
- A company whose business is managed and controlled from Israel.

In the absence of a definition of the term 'management and control' either in Israeli legislation or a direct discussion of this term by the Israeli courts, it is difficult to determine whether a company that is incorporated outside of Israel shall be viewed as managed and controlled from Israel. This is a complex subject that needs to be addressed on a case by case basis. When an entity is both an Israeli tax resident and a resident of a foreign jurisdiction which is party to an income tax treaty with Israel, most treaties provide a tiebreaker test in the determination of an entity's tax residency.

### Permanent establishment (PE)

Foreign resident entities might be exempt from corporate tax to the extent that its activities do not constitute a PE under the tax treaty applicable between Israel and the foreign resident's country of residency.

Whether a non-resident has a taxable presence under Israeli domestic tax law is far less clear than the definition of PE under a relevant tax treaty. There is no detailed legislation or Israeli court decisions which directly address this issue.

## Other taxes

### Value-added tax (VAT)

The current rate of VAT is 16%.

Exports of goods and certain services and various other transactions are zero-rated, and certain transactions are exempt. Banks and other financial institutions pay VAT-equivalent taxes at the rate of 16% based on their total payroll and on profits. Not-for-profit organisations pay VAT (wage tax) at the rate of 8% of their total payroll.

### Real estate – capital gains

Capital gains on real estate are subject to the Land Appreciation Tax Law. The law relates to any real estate in Israel, including houses, buildings, and anything permanently fixed to land; real estate rights; and leases for 25 years or more. Tax calculations closely follow the calculation of company tax on capital gains *(see Capital gains in the Income determination section)*.

The tax rate on the real gain is the applicable corporate tax rate (24% in 2011).

A special tax rate may apply with respect to real estate acquired prior to 1960.

### Transfer tax

The purchaser of real estate is generally subject to acquisition tax at rates of 0.5% up to a maximum of 5%.

### Municipal tax

Municipal tax is levied annually on buildings by local municipalities based on the size, location, and purpose of the property.

### *Stamp taxes*
There are no stamp taxes imposed in Israel.

### *Customs duties*
Customs duty is imposed on certain products imported into Israel. The rates of duty depend upon their classification according to the Harmonised Customs Tariff and the country of origin. Israel has concluded free-trade agreements with the United States, Canada, Mexico, the European Union (EU), and the European Free Trade Association (EFTA).

### *Employer's national insurance contributions*
Employers are obliged to pay national insurance contributions based on a percentage of each employee's income on a monthly basis. Employers are responsible for withholding employees' contributions from wages and remitting these together with the employer's own contributions. The employer's contribution rates (current as of April 2011) for Israeli-resident employees are 3.45% up to monthly income of 4,984 Israeli shekels (ILS) and 5.9% on the difference between ILS 4,984 and the maximum monthly income of ILS 73,422.

For non-resident employees, the employer rates are significantly lower and are 0.49% up to monthly income of ILS 4,984 and 1.17% on the difference between ILS 4,984 and the maximum monthly income of ILS 73,422. The minimal National Insurance payments for non-resident employees do not provide any retirement benefit for the non-resident but generally provides a certain element of work accident coverage.

When an irregular salary payment in excess of one quarter of the usual salary is made, special provisions apply to the computation of social charges by which the application of this payment is equally attributed to the current month and to the past 11 months.

Israel has social security totalisation agreements with 14 countries which may allow for an exemption from Israeli National Insurance throughout the employment period of the employee in Israel.

## *Branch income*

A branch is liable for tax at the standard corporate rate on Israel-source income. No tax is withheld on transfers of profits to the foreign head office unless the branch is an approved enterprise *(see the Tax credits and incentives section)*.

## *Income determination*

In general, the annual results (i.e. the excess of income over expenses or vice versa) of an Israeli company or branch, as detailed in the taxpayer's financial statements, form the basis for computing the taxable income of the business.

The base amount is then adjusted pursuant to the provisions of the tax law to arrive at 'taxable income'.

### *Inventory valuation*
Inventories are generally valued at the lower of cost or market value (i.e. net realisable value). Conformity is required between book and tax reporting of inventory. The first in

first out (FIFO) or weighted-average basis of valuation is acceptable; the last in first out (LIFO) method is not accepted.

## *Capital gains*

Capital gains tax is generally payable on capital gains by residents of Israel on the sale of assets (irrespective of the location of the assets) and by non-residents on the sale of the following:

- Assets located in Israel.
- Assets located abroad that are essentially a direct or indirect right to an asset or to inventory, or that are an indirect right to a real estate right or to an asset in a real estate association, located in Israel. Taxation applies only in respect of that part of the consideration that stems from the above property located in Israel.
- Assets that are a share or the right to a share in an Israeli entity.
- Assets that are a right in a foreign resident entity which is essentially a direct or indirect right to property located in Israel. Taxation applies only with respect to that part of the consideration that stems from the property located in Israel.

The cashless transfer of rights and assets arising from certain mergers, spin-offs, and asset transfers may be exempt from tax upon meeting various requirements.

### Determination of the capital gain – Computation of real gain and inflationary components

Company tax on capital gains is imposed on the disposal of fixed and intangible assets where the disposal price is in excess of the depreciated cost.

For tax purposes, the capital gain is generally calculated in local currency, and there are provisions for segregating the taxable gain into its real and inflationary components. The inflationary amount is the original cost of the asset, less depreciation (where applicable), multiplied by the percentage increase in the Israeli consumer price index (CPI) from the date of acquisition of the asset to the date of its sale. The inflationary amount component is exempt to the extent it accrued after 1 January 1994 and is generally subject to tax at the rate of 10% if it accrued before that date.

The real gain component, if any, is taxed at the rates set out further below.

A non-resident that invests in capital assets with foreign currency may elect to calculate the inflationary amount in that foreign currency. Under this option, in the event of a sale of shares in an Israeli company, the inflationary amount attributable to exchange differences on the investment is always exempt from Israeli tax.

### Sale of assets (including publicly and non-publicly traded shares)

The real gain is generally subject to tax at the corporate tax rate applicable in the year of the gain (24% in 2011). Special exemptions may apply for non-residents *(see further below)*.

### Special rule for retained profits upon sale of shares

In the case of a disposal by corporations of: (i) non-traded shares and (ii) traded shares when the seller generally directly or indirectly holds at least 10% of the sold Israeli company during the 12-month period preceding the sale, special provisions apply to such part of the real gain which is attributed to the seller's share of retained profits. The share of retained profits is the amount of gain equal to the proportional part of the retained profits of the company that the seller of the shares would have rights to by virtue of those shares. Detailed rules apply in determining this profit component.

Generally, the seller's proportionate part of the company's retained profits is taxed as if this amount had been received as dividends immediately before the sale (i.e. at a tax rate of 0% in the case of an Israeli-resident corporate shareholder or at a tax rate of 25% when the seller is a non-Israeli resident corporate shareholder that generally holds 10% or more in the rights of the Israeli company, subject to a reduced rate in accordance with the provisions of an applicable tax treaty). The part of the retained profits that is attributed to the period ending on 31 December 2002 is subject to tax at the rate of 10%.

### Special exemptions for non-residents

*Publicly traded Israeli shares*

Non-residents corporations not having a PE in Israel are exempt from tax on capital gains from the sale of shares of an Israeli company traded on the Israeli stock exchange or on a foreign stock exchange.

Where the shares were purchased by the non-resident prior to being publicly traded, capital gains tax applies for the portion of the gain that was generated up to the day of the share's public listing but not to exceed the capital gain actually arising upon the sale of the share and provided that the value on the day of public listing was more than their value on the date of purchase and that the proceeds upon sale exceeded the value on the date of purchase.

*Non-publicly traded shares*

For purchases after 1 January 2009, an exemption exists under domestic law for non-residents, regardless of their percentage holding in an Israeli company, from gains derived from the sale of securities not traded on a stock exchange, provided the following conditions are met:

- The investment is not in a company the majority of whose assets are real estate assets in Israel.
- The capital gains were not derived by the seller's PE in Israel.
- The shares were not purchased from a relative (as defined in the Income Tax Ordinance (ITO)) or by means of a tax-free reorganisation.

For shares purchased between 1 July 2005 and 1 January 2009, more restrictive conditions apply in order to be eligible for the exemption. Detailed rules apply.

### Treaty exemption

Non-residents may qualify for a tax treaty capital gain exemption depending upon the particular circumstances and the provisions of the applicable tax treaty (e.g. in some tax treaties, no capital gains exemption is allowed where the holding in the sold Israeli company exceeds a certain percentage).

When assets are attributable to an Israeli PE or are real estate rights (including rights in a real estate association), a treaty exemption will generally not be available.

The Israel Tax Authority (ITA) is very sensitive to treaty shopping, and it will be necessary to demonstrate to the ITA that the foreign holding entity has business substance in its country of residence and that the structuring of the holding through that entity was not implemented for tax treaty benefit purposes.

## *Capital losses*

Capital losses may offset all capital gains (including gains from Israeli or foreign securities) and gains from the sale of property (whether Israeli or foreign source).

Where the capital loss is from a non-Israeli asset (including when carried forward into future years), the loss must first be offset against foreign source capital gains.

Capital losses derived from the sale of securities may also be offset against interest and dividend income generated from the sold security and also against interest and dividend income received from other securities (where the income was not subject to tax of more than 25%).

Capital losses from the sale of shares are generally reduced by any dividends received by the selling corporation during the 24 months preceding the sale, where tax on the dividends of at least 15% was paid.

Capital losses can generally be carried forward indefinitely and set-off only against capital gains.

### *Exit tax*

When an Israeli tax resident, including a company, ceases to be an Israeli resident for tax purposes, its assets are deemed to have been sold one day before it ceased being an Israeli resident. Although exit tax is primarily applicable to individuals, this might also apply to corporations incorporated outside of Israel whose management and control is transferred from Israel to another jurisdiction at a particular time.

Any gain attributable to the deemed sale of assets may be paid on the day the residency ceased or it may be postponed until the date the assets are actually realised. When the tax event is deferred to the sale date of the assets, the amount of the Israeli capital gain portion is determined by taking the real capital gain at the time of realisation, multiplied by the period of ownership from the day on which it acquired the asset until the day it ceased being an Israeli resident, divided by the entire period from the day of the asset's acquisition until the day of realisation. The Minister of Finance is authorised to prescribe provisions for the implementation of the exit tax including provisions for the prevention of double taxation and the submission of tax reports, but no provisions have yet been issued.

### *Dividend income*

#### Received by an Israeli-resident company

Dividends received by an Israel-resident company from another Israeli-resident company which originate from income accrued or derived in Israel are exempt from corporate tax, except for dividends paid from income of an approved enterprise *(see the Tax credits and incentives section)*. This affords the opportunity to transfer after tax profits within an Israeli group of companies for further investment.

Dividends received by an Israeli-resident company from a non-resident company as well as dividends received from an Israeli company which arise from foreign source income of the distributing company are generally taxable for the receiving company at the rate of 25%. Under certain circumstances, the receiving company may elect to be taxed on such dividends at the corporate tax rate, in which case it would also be entitled to a foreign tax credit with respect to corporate taxes paid by the company distributing the dividend (i.e. an 'underlying' tax credit).

#### Received by a non-resident shareholder

Dividends received by a non-resident shareholder from an Israeli company are generally subject to tax at the rate of 20% (25% if paid to a 10% or more shareholder), subject to a reduced rate of tax under an applicable tax treaty.

Several of Israel's tax treaties have very beneficial withholding tax (WHT) rates for dividends and interest being paid from Israel. The ITA is very sensitive to treaty shopping, and it will be necessary to demonstrate to the ITA that the foreign holding entity has business substance in its country of residence and that the structuring of the holding through that entity was not implemented for tax treaty benefit purposes. Furthermore, many of the treaties contain a beneficial ownership clause as a condition to enjoying the treaty WHT rates.

### *Interest income*

**Received by an Israeli-resident company**

Interest income received by an Israeli-resident company is subject to the regular corporate tax rate (24% in 2011).

**Received by a non-resident**

Interest income received by a non-resident company is generally subject to tax at the rate of 20% or subject to a reduced rate of tax under an applicable tax treaty.

Interest received by a non-resident from deposits of foreign currency with an Israel bank is exempt from tax, subject to certain conditions.

### *Rent/royalties income*

Rent and royalty income, less allowable deductions for tax purposes, is subject to tax at the regular corporate tax rate (24% in 2011).

### *Partnership income*

From an Israeli tax perspective, a partnership is in principle a fiscally transparent vehicle. Accordingly, Israeli tax law does not tax partnerships as such, but generally each partner is taxed in respect of its share of the partnership income, with the taxable income allocated to a corporate partner taxed at the regular company tax rate. Consequently, the actual distribution of partnership income to a partner is a non-taxable event.

### *Foreign income*

An Israeli-resident company is liable for tax on its worldwide income. Double taxation is avoided by way of a foreign tax credit mechanism that also applies unilaterally in the absence of an applicable double taxation treaty (*see the Tax credits and incentives section)*.

Under the CFC regime in Israeli tax law, an Israeli company or individual may be taxed on a proportion of the undistributed profits of certain Israeli-controlled non-resident companies in which the Israeli shareholder has a controlling interest (10% or more of any of the CFC's 'means of control'). *See Controlled foreign companies in the Group taxation section for more information.*

## *Deductions*

Costs incurred by a branch or a company are deductible as a business expense for tax purposes where they are incurred 'wholly and exclusively in the production of income'. The amount of the deduction may be limited or disallowed further to other ITO provisions and income tax regulations.

### *Depreciation*
The ITO and tax regulations prescribe standard annual rates of tax depreciation for assets serving in the production of taxable income. Depreciation is generally on a straight-line basis for industrial and other enterprises based on the specific asset types as set out in the tax regulations.

Accelerated rates of depreciation may be available in regard to certain activities (such as industrial) where there is unusual wear and tear due to additional shifts of equipment use. Detailed rules apply.

Depreciation is not permitted on land.

### *Goodwill*
In general, under Israeli tax regulations, goodwill purchased after 1 July 2003 may be amortisable by the purchaser over a 10-year period (10% annually).

### *Organisational and start-up expenses*
Organisational and start-up expenses are generally not immediately deductible but rather are to be capitalised for tax purposes.

### *Research and development (R&D) costs*
Special tax relief is provided under the ITO for R&D costs incurred *(see the Tax credits and incentives section)*.

### *Accrued expenses*
Payments are generally deductible on an accrual basis for commercially justifiable expenses representing arm's-length consideration. However, when such payments attract WHT, the deduction will generally be allowed provided the payment is effected within the tax year. Alternatively, such payments may be deductible in a tax year if the applicable WHT is deducted within three months after the tax year-end and remitted to the tax authorities within seven days of the deduction, together with index linkage differences and interest accrued since the year-end.

However, accrued expenses for severance pay, vacation pay, recreation pay, holiday allowances, and sick pay are not deductible, even if there is an obligation to make these payments. They are only deductible in the year in which they are actually paid to the beneficiary or to a recognised fund.

### *Contingent liabilities*
Based on Israeli court decisions, contingent liabilities may be deductible for tax purposes upon satisfying the following criterion: (i) according to accepted accounting principles, the taxpayer must include in its balance sheet a suitable provision for the potential liability; otherwise, its income will be considered to have been incorrectly reported; (ii) the circumstances of the case and the technical means according to accepted accounting practice must be provided, enabling an agreed determination of the amount of the liability; and (iii) there is a high probability that the potential debt with respect to which the provision was made will become an absolute debt.

### *Excess (disallowed) expenses*
Israeli tax law disallows the partial deduction of certain employee-related expenses incurred by a company doing business in Israel. These include so-called 'excess expenses'. Examples of these are (i) payments for business, travel, and meals which exceed allowable deductions; (ii) expenses incurred in respect of a benefit granted by an employer to its employees but which cannot be attributed to a particular

employee; and (iii) certain vehicle maintenance expenses (all expenses relating to a company owned vehicle that was also designated for use of an employee are generally tax deductible).

A company is obliged to pay a monthly advance on excess expenses in the amount of 45% of the excess expense. The amount paid as an advance in respect of excess expenses is deemed a payment on account of the regular tax advances and payments that the company must pay for corporate income tax and is offset against them, but it is not refundable (i.e. when a taxpayer's tax liability in a given year is lower than the excess expense advances paid, the unutilised amount shall be carried forward to future tax years). Detailed rules apply.

### *Bad debt*
Provisions for bad debts are deductible in the year in which it is evident that the debt has become irrecoverable. Detailed rules apply for making this determination.

### *Charitable contributions*
Charitable contributions do not constitute a regular business expense. However, a tax credit may be available *(see Tax credit for donations in the Tax credits and incentives section)*.

### *Fines and penalties*
Payment of fines and penalties are generally not deductible.

### *Pension expense*
Pension fund contributions are generally deductible for the employer provided inter alia the contributions do not exceed a prescribed level and are effected on a regular basis.

### *Directors' fees*
Payments for commercially justifiable director fees should generally be deductible.

### *Net operating losses*
Business losses can be offset against income from any source in the same year. Loss carrybacks are not allowed. Losses may be carried forward (generally linked to the CPI) and set-off without time limit against income from any trade or business or capital gains arising in the business, but not against income from any other source.

### *Payments to foreign affiliates*
Payments of interest, royalties, and management fees to foreign affiliates are deductible if based on normal commercial terms and practices and evidenced by an inter-company agreement and transfer pricing documentation. Where such payments attract WHT, the deduction will only be allowed where such tax has been withheld and paid in accordance with certain requirements. All cross-border payments to foreign affiliates for goods and services have to comply with arm's-length pricing standards *(see Transfer pricing in the Group taxation section)*.

## *Group taxation*

As a general rule, a parent company and its subsidiaries may not submit consolidated tax returns. Only groups of industrial companies in the same line of business, as well as parent companies that control industrial companies in the same line of business and have at least 80% of their assets invested in industrial companies, are eligible to file consolidated tax returns.

### Transfer pricing

The ITO and its accompanying regulations contain elaborate transfer pricing provisions, including the arm's-length principle, which apply to any international transaction in which there is a special relationship between the parties to the transaction and for which a price was settled on for property, a right, a service, or credit. In general, the regulations are based upon internationally recognised transfer pricing principles (i.e. United States tax regulations or Organisation for Economic Co-operation and Development (OECD) rules). These regulations generally require the taxpayer to support the pricing of international transactions with a transfer pricing study, inter-company agreements, and other documentation. In accordance to Israeli High Court Rulings, the terms of transaction conducted between related parties should be set in written contracts.

Since transfer pricing is a subject that receives considerable attention from the ITA in its examination of related inter-company transactions, transfer pricing principles and documentation requirements should be carefully adhered to.

A taxpayer is required to include in its annual corporate tax return a special form entitled 'Declaration of International Transactions' providing details for every cross-border transaction conducted with related parties. The taxpayer must sign the form which includes a declaration that the transactions with related parties abroad were in accordance with the arm's-length principle, as defined in the Israeli transfer pricing regulations promulgated under the ITO. As a result of this form and declaration, the importance of appropriate transfer pricing documentation has increased.

### Thin capitalisation

Israel has no statutory or regulatory provisions or other rules concerning thin capitalisation for tax purposes as exist in certain other jurisdictions. Since there are no thin capitalisation rules and Israel has no specific debt-equity ratio requirements, a company may be financed with minimum capital and there is no limit to the amount of debt that may be used. Transfer pricing principles shall apply with regards to interest charges.

### Controlled foreign companies (CFC)

Under the CFC regime in Israeli tax law, an Israeli company or individual may be taxed on a proportion of the undistributed profits of certain Israeli-controlled non-resident companies in which the Israeli shareholder has a controlling interest (10% or more of any of the CFC's 'means of control'). A CFC is a company to which a number of cumulative conditions apply including that most of its income or profits in the tax year were derived from passive sources (e.g. capital gains, interest, rental, dividend, royalties) and such passive income has been subject to an effective tax rate that does not exceed 20%.

## Tax credits and incentives

### Foreign tax credit

Double taxation is avoided by way of a foreign tax credit mechanism that also applies unilaterally in the absence of an applicable double taxation treaty. The foreign tax credit is limited to the Israeli corporate tax payable with respect to the same income. Foreign sourced income is divided into 'baskets' (i.e. categories) on the basis of the income source (e.g. dividends, business income), and a particular credit limitation applies to each basket. Excess uncredited foreign income can be carried forward for the subsequent five tax years.

### *Approved enterprises (AEs)*
AE status, which provides for cash and tax benefits, may be granted under the Law for the Encouragement of Capital Investments (the Law) to enterprises that increase the productive capacity of the economy, improve the balance of payments, or provide new employment opportunities.

The Law differentiates between three geographical regions (A, B, and C). Area A enjoys the most incentives, while Area C (generally the central area of the country) enjoys the least amount of incentives.

New AE programmes and expansion of prior existing AE programmes are governed by the Law which underwent a major amendment on 29 March 2005 (2005 Amended Law) and also on 29 December 2010 (2011 Amended Law), effective for 2011 and thereafter.

AE programmes which commenced their period of benefits generally prior to 2005 are still subject to the Law's provisions prior to these amendments.

The 2011 Amended Law is intended to simplify the manner of taxation that applies to income generated from an AE by applying a uniform tax rate for all AE-generated taxable income. Prior to these amendments, as summarized below, the corporate tax rate applicable to an AE depended upon many factors, including the tax route selected, the geographical area in which the industrial site is located, the level of foreign investment ownership, and attribution of taxable income between different tiers of AE plans further to complex formulas.

It should be noted that the 2011 Amended Law shall apply for income generated by an AE during 2011 and thereafter. Transition rules allow AE owners to elect to continue with the AE tax benefits allowed for under the Law prior to these amendments or to choose, in any tax year, to commence to apply the new provisions of the Law and to waive the remaining benefit period those AE benefits provided under the Law prior to its amendment. It should also be noted that once such an election is made by the taxpayer to implement the new provisions, it may not be altered in future tax years. Moreover, as part of the transition rules, an AE owner is generally allowed to elect until 2012 to apply for a new AE status under the terms of the Law in effect prior to its amendment, so long as part of the relating investment was made during 2010. This election can allow the AE owner to further extend the benefits available under the terms of the Law prior to the legislation.

This general overview will address the Law as applicable prior to the 2011 Amended Law as well as setting forth the material tax law changes under the 2011 Amended Law.

We would caution that our comments in regard to the 2011 Amended Law should be regarded as preliminary in nature and they do not address all of the legislative changes. Further detailed rules apply and certain areas still await further legislation and clarifications as to the Israeli Income Tax Authorities' interpretive positions.

#### Cash grants (applicable also under the 2011 Amended Law)
Approved enterprises located in development areas A and B are eligible for cash investment grants, which vary according to the geographic location of the enterprise. Grant amounts and conditions are subject to governmental change from time to time.

### *AE tax incentives prior to 2011 Amended Law*

#### Reduced tax rates

In addition to financial incentives for the establishment or expansion of an AE, various tax incentives are available once a new AE or expansion thereof is operational.

The reduced tax rates generally apply for a seven-year benefit period (or a ten-year period in certain cases of local companies established in development area A or in the case of a foreign investor company, see below), commencing with the year in which the AE first generates taxable income.

Generally, this seven or ten-year period of benefits is limited to 12 years from the year of implementation. For AE plans governed prior to the 2005 amendment to the Law, the period of benefits cannot extend beyond 12 years from the year the enterprise commenced its operations or beyond 14 years from the year in which approval of status as an AE was granted, whichever is earlier.

#### Locally owned companies

Income derived by a company from an AE during the maximum seven-year period of benefits is generally subject to company tax at a rate of 25%.

A WHT rate of 15% (subject to a possible reduction under a tax treaty) applies to dividends paid from profits of an approved enterprise earned during the benefits period, if distributed either during the benefits period or during the subsequent 12 years. Note that dividends from non-approved enterprise profits that are paid to non-residents are generally subject to a maximum 25% WHT rate that may be further reduced under the terms of a relevant tax treaty.

#### Foreign investors' companies (FIC)

A company that qualifies as a FIC is entitled to enhanced tax benefits on AE income. In general, a FIC is a company having more than 25% of its share capital (in terms of rights to shares, profits, voting, and the appointment of directors) and its combined share capital and investor loan capital owned by foreign residents. To qualify for FIC status, a foreign investor must make an investment in the company of at least ILS 5 million.

A FIC benefits from reduced company tax on the profits of an AE for a period of ten years (instead of seven years) commencing with the first year in which taxable income is generated. The total period of benefits is restricted as discussed above.

A FIC enjoys reduced company tax rates applicable to its AE income as shown below:

| Percentage of foreign ownership | Company tax rate (%) |
|---|---|
| Over 25% but less than 49% | 25 |
| 49% or more but less than 74% | 20 |
| 74% or more but less than 90% | 15 |
| 90% or more | 10 |

The foreign ownership percentage is annually determined as the lowest level retained during the specific tax year.

Dividends paid by a FIC out of the profits of its AE are subject to tax in the hands of the recipient at the rate of 15%, without limitation as to their distribution date, provided the dividends are distributed out of AE profits derived during the benefits period.

## Alternative system of tax benefits for approved enterprises (tax holiday)

Companies with new or expanding AEs may elect to forego all government cash grants and receive instead a total exemption (i.e. tax holiday) from company tax on undistributed profits of the approved enterprise for ten years in development area A, for six years in development area B, and for two years in development area C. The area of incentive being the area in which the company's facilities are located.

The tax holiday provides an Israeli tax exemption so long as the AE profits generated in the exemption period are retained within the company. Should a subsequent distribution of such profits occur, company tax and dividend WHT is imposed on the income distributed, at the rates which would have been applicable if the tax holiday had not been elected (i.e. 25% or at a lower rate if the company is a FIC with a foreign ownership percentage of 49% or more during those years).

Under certain anti-avoidance provisions applicable to tax holidays, amounts paid or credited directly or indirectly by an approved enterprise to a relative, a major shareholder, or to a related entity controlled by either a relative or a major shareholder may be treated as a deemed taxable distribution of profits by the AE.

## Ireland track and strategic investment track

For companies having an AE in development area A that seek to distribute dividends while maintaining a low company and dividend tax burden, there is an 'Ireland track' under which the aggregate Israeli corporate and dividend WHT for a foreign resident shareholder is 15% and for an Israeli resident shareholder is 24.8%. This track is in contrast to the standard alternative benefit track discussed above, which provides a tax holiday provided that profits remain undistributed.

Furthermore, a 'strategic investment track' allows for an exemption during the benefit period from company tax and dividend WHT for a company having (depending on its location within Area A of the country) very significant investment and revenue levels. This means that during the benefits period, a company eligible for benefits from income accrued under this track will have no tax liability whatsoever for its productive activity arising from such investment and for the distribution of profits. Detailed rules apply to these tracks.

## Qualifying for AE status

*Minimal investment amount*

For entitlement of tax benefits under the alternative benefit track, there must be a certain minimal investment amount ('Minimum qualifying investment') towards purchasing productive assets (e.g. machinery and equipment, but not buildings) within three years.

In the case of a new factory, the minimum required investment is ILS 300,000.

For expansion of a factory, the amount of required investment is ILS 300,000 or the amount based on the formula shown below, whichever is higher:

| Value of productive assets in the factory in the tax year prior to the year the minimum qualifying investment commences (in ILS million) | Amount of investment required expressed as a percentage of the value of the productive assets (%) |
|---|---:|
| Up to 140 | 12 |
| 140 to 500 | 7 |
| Above 500 | 5 |

Detailed rules apply in determining how to value the assets for purposes of these tests (including in regards to AEs operated by affiliated companies).

For AE plans governed by the Law prior to its amendment, a general condition for approval is that a minimum of 30% of the investment in fixed assets must be equity-financed.

For investors wanting to expand their current AE, a new requirement has been added to the Law that demands at least a two year waiting period before an investor can obtain AE status for its new investments. Upon completion of these investment conditions, the taxpayer must file the election of the investments implementation year. Such election must generally be filed by the filing date of the relevant annual tax return but no later than 12 months from the end of that tax year.

*Automatic approval*
Where an investment project meets all of the eligibility criterion under one of the alternative tracks (Standard Alternative Track, Ireland Track, or strategic investment Track) as set out in the Law and in regulations to be issued, a project will automatically qualify for the AE taxation benefits under the Law with no need for prior approval from the ITA (i.e. a 'green lane'). The criteria that confer tax benefits in the alternative track of the Law are handled by the ITA. A mechanism is available which enables a company to apply for a pre-ruling from the ITA, where it desires to obtain certainty as to the taxation status of its investment under the Amended Law. The application to the ITA must be submitted no later than six months following the end of the investment's implementation year (first year of potential benefits for the AE).

For AE plans governed by the Law prior to its 2005 amendment, the certification of a new or expanding approved enterprise status required interaction with the Israeli Investment Centre (IC) which had to approve the application for approved enterprise status and was responsible for issuing a final implementation approval following its determination that all requirements relating to investments in assets and minimum capital have been met.

*Interruption of entitlement to benefits*
Unlike the Law prior to its 2005 amendment, where an AE owner was generally required to continue to operate the AE for the entire benefit period, under the Law following its amendment in 2005, the examination as to whether an owner is entitled to enjoy AE benefits for a tax year is determined on a year by year basis. Consequently, if in any tax year during the benefit period a company does not meet any of the conditions required under the Law, then for that tax year it is not entitled to benefits. However, if the company again meets the conditions during the benefit period, the company is entitled to the benefits during the remainder of the benefit period.

*Mixed enterprises*
Special rules govern the allocation of taxable income of 'mixed enterprises'. These are essentially entities that derive only part of their income from an AE or entities which operate under a number of approvals relating to separate investment projects. The company tax payable in respect of income from each part of a mixed enterprise is separately computed and a composite WHT is applicable to dividends distributed by a mixed enterprise.

*Neutralisation of assets*
Assets used in the operation of an enterprise that are not part of an AE are regarded as non-approved assets. Consequently, turnover which is deemed to be generated from the

non-approved assets will result in non-approved enterprise income that should be taxed at the regular Israeli corporate tax rate applicable for the relevant year.

For plans operating under the Law prior to its 2005 amendment, in some cases, upon request, the Investment Centre granted neutralisation of assets that were not part of the approved investment plan, so that they would have no negative impact on the tax benefits. Neutralised assets have a 'neutral' effect, as they are not considered part of the approved investment plan or part of a non-approved plan. For certain industrial equipment, neutralisation is not available. Assets that are of a non-productive nature may receive neutralisation.

In accordance with the 2005 Amended Law, this issue arises only in connection to assets purchased which had previous use in Israel.

### *AE 2011 Amended Law overview*

The various reduced tax routes described above are cancelled and replaced with a new uniform tax rate based on the corporate tax rate applicable during the relevant year, as follows:

| Year | Area A | Rest of country | Scheduled regular corporate tax rate |
|---|---|---|---|
| 2011 – 2012 | 10% | 15% | 24% (2011), 23% (2012) |
| 2012 – 2014 | 7% | 12.5% | 22% (2013), 21% (2014) |
| 2014 and thereafter | 6% | 12% | 20% (2015) and 18% in 2016 and thereafter |

A modified Strategic Investment Track has been introduced, but it appears that its qualifying terms and conditions should make this track not particularly relevant for most investors.

The WHT rate applicable to dividends distributed to foreign shareholders remains 15% (subject to being reduced under the terms of an applicable tax treaty). Distributions to Israeli corporations shall not be subject to tax while distributions to Israeli individuals shall be subject to tax at a rate of 15%.

This is a major change in policy from the pre-2011 Amendment FIC route discussed above, which encouraged foreign investment in Israeli companies having AE programs by providing for increasingly reduced rates (e.g. 10% rate where 90% foreign owned). Further to the amendments, there will no longer be available any additional AE tax benefits specifically linked to foreign investment. Notwithstanding the cancellation of the tax holiday route, a distribution or deemed distribution of profits that were tax-exempted under the tax holiday route before the legislative change had taken effect shall continue to be subject to company tax at the applicable AE reduced rates in addition to the dividend WHT that will be imposed on the income distributed.

Although it would appear that the 2011 Amendments may result in an increased Israeli tax liability for many investors, depending on the particular circumstances, some investors may still benefit from the new changes. Consequently, each investor should examine the impact of such changes upon its financial results and prepare its action steps accordingly.

**Transition rules**
It should be noted that the 2011 Amended Law shall apply for income generated by an AE during 2011 and thereafter. Transition rules allow AE owners to elect to continue with the AE tax benefits allowed for under the Law prior to these amendments or to choose in any tax year to commence to apply the new provisions of the Law and to waive the remaining benefit period those AE benefits provided under the Law prior to its amendment. Once such an election is made by the taxpayer to implement the new provisions, it may not be altered in future tax years. Moreover, as part of the transition rules, an AE owner is generally allowed to elect until 2012 to apply for a new AE status under the terms of the Law in effect prior to its amendment, so long as part of the relating investment was made during 2010. This election can allow the AE owner to further extend the benefits available under the terms of the Law prior to the legislation.

### *Research and development (R&D) incentives*
Under special relief provided under the ITO which was enacted for the purpose of encouraging taxpayers to invest in R&D activities, R&D costs can generally be deductible for tax purposes even when they represent capital costs.

The ITO provision generally distinguishes between two types of investors in R&D projects:

- The R&D project is conducted or sponsored by the owner of an enterprise in the fields of industry, agriculture, transportation, and energy, and it is intended to develop this enterprise.
- The R&D costs are borne by a taxpayer that is not the owner of an enterprise in the above mentioned fields or the taxpayer participates in R&D costs of another developer in consideration for a reasonable return, when such R&D projects also enjoy government grants.

In regard to the first group of taxpayers, the R&D expenses shall be deducted in the tax year incurred when such expense has been approved as an R&D expense by the relevant government department (the approval in regard to industrial related projects is generally granted by the Office of the Chief Scientist (OCS)). When such OCS approval is not obtained, the expense shall be deducted over three tax years.

The R&D expenses incurred by the second group of taxpayers shall generally be deducted over two tax years. The deductible expenses allowed to a participant in R&D costs of another developer generally may not exceed 40% of the taxable income of the investor in the year in which the expenses had been incurred.

For acquisitions between 1 January 2011 and 31 December 2015, an Israeli tax resident company that acquires a controlling interest in a private Israeli company that meets certain R&D activity levels shall be entitled to amortize its acquisition amount (i.e. consideration paid for shares less the purchased company's positive equity capital if any) from its taxable income equally over five years beginning with the tax year following the acquisition. Entitlement to this deduction is subject to the fulfillment of detailed qualifying conditions which include inter alia that both companies have AE plans in the year of acquisition, meet certain R&D investment levels, employ a certain prescribed percentage of employees having academic degrees in certain qualifying fields, and for the first three years of the amortization period the R&D expenses of the acquired company are incurred for its own company or that of the purchasing company and at least 75% of such expenses are incurred in Israel. Detailed rules apply.

### *Tax credit for donations*
A tax credit is granted in respect of donations to approved state and charitable institutions aggregating at least ILS 310 (for 2010) in a tax year. The donor is allowed a tax credit equal to the amount of the contribution times the corporate tax rate applicable during the year, provided the donations do not exceed the lower of the following: (i) 30% of the corporation's taxable income in that year or (ii) ILS 7,636,000 (in 2010). The above figures are adjusted each year according to the CPI. Excess unused tax credits may be carried forward for three years subject to detailed rules.

### *Incentive to promote foreign investment in Israeli corporate bonds*
In order to promote foreign investment in the Israeli corporate bonds market, there is an exemption from tax with respect to interest income received by foreign investors on or after 1 January 2009 on their commercial investments in Israeli corporate bonds traded on the Tel Aviv stock exchange (TASE). The exemption is not granted to a foreign investor that has a PE in Israel or is related to, or holds 10% more of the means of control in, the investee company. In addition, in order for the exemption to apply to a foreign investor that has 'special relations' with the investee company, regularly sells products to or provides services to the investee company, or is employed by the investee company, the investor must prove that the interest rate on the corporate bond was determined in good faith.

## *Withholding taxes*

Under Israeli domestic tax law, a 25% WHT on payments of Israeli-source income is generally deducted by an Israeli paying bank from all income remittances abroad, unless a tax certificate is obtained from the ITA authorising withholding-exempt remittances or a reduced rate of tax pursuant to an applicable tax treaty.

Set out below is a listing of WHT rates for dividends, interest, and royalties under domestic tax law and pursuant to tax treaties in force. Detailed rules apply under certain tax treaties for eligibility to the treaty reduced rates (e.g. beneficial ownership, having no permanent establishment in Israel). The applicable tax treaty should be consulted to determine the relevant WHT rate and to examine detailed conditions that may apply for the specific circumstance.

| Recipient | Dividends (%) | Interest * (%) | Royalties (%) |
|---|---|---|---|
| Resident corporations | 0/25 | 25 | 25 |
| Resident individuals | 20/25 | 15/35 | 30 |
| Non-resident corporations: | | | |
| Non-treaty | 20/25 | 25 | 25 |
| Treaty: | | | |
| Austria | 25 | 15 | 0/10 (49) |
| Belarus | 10 | 5/10 (30) | 5/10 (50) |
| Belgium | 15 | 15 | 0/10 (51) |
| Brazil | 10/15 (1) | 15 | 10/15 (52) |
| Bulgaria | 10/12.5 (2) | 5/10 (31) | 12.5 (53) |
| Canada | 15 | 15 | 0/15 (54) |
| China, P.R. | 10 | 7/10 (32) | 10 (55) |
| Croatia | 5/10/15 (3) | 5/10 (33) | 5 |
| Czech Republic | 5/15 (4) | 10 | 5 |

| Recipient | Dividends (%) | Interest * (%) | Royalties (%) |
|---|---|---|---|
| Denmark | 25 | 25 | 10 |
| Estonia | 0/5 (5) | 5 | 0 |
| Ethiopia | 5/10/15 (6) | 5/10 (34) | 5 |

| United Kingdom | 15 | 15 | 0 (67) |
| United States | 12.5/25 (29) | 10/17.5 (48) | 10/15 (68) |
| Uzbekistan | 10 | 10 | 5/10 (69) |
| Vietnam | 10 | 10 | 5/7.5/15 (70) |

Notes

* Some Israeli tax treaties provide for an exemption from WHT on interest involving governmental and quasi-governmental parties. Such exemptions are not separately indicated in the table above.

1. 10% where beneficial owner holds directly at least 25% of the capital of the company paying the dividends.

I

2. At a rate which is 50% of the rate which would have been imposed but for this provision but not to exceed 12.5 % and not less than 7.5%. A 10% rate applies where paid from profits generated by an enterprise entitled to special tax rates under the Encouragement of Investment Law.
3. 5% if the beneficial owner is a company (other than a partnership) which holds directly at least 25% of the capital of the company paying the dividends; 10% rate if the beneficial owner is a company which holds directly at least 10% of the capital of the company paying the dividends where that latter company is a resident of Israel and the dividends are paid out of profits which are subject to tax in Israel at a rate which is lower than the normal rate of Israeli company tax; 15% rate applies in all other cases.
4. 5% if the beneficial owner is a company (other than a partnership) which holds directly at least 15% of the capital of the company paying the dividends; 15% rate in all other cases.
5. 0% if the beneficial owner is a company (other than a partnership) which holds directly at least 10% of the capital of the company paying the dividends; 5% rate in all other cases.
6. 5% if the beneficial owner is a company (other than a partnership) which holds directly at least 10% of the capital of the company paying the dividends; 10% rate if the beneficial owner is a company which holds directly at least 10% of the capital of the company paying the dividends where that latter company is a resident of Israel and the dividends are paid out of profits which are subject to tax in Israel at a rate which is lower than the normal rate of Israeli company tax; 15% rate in all other cases.
7. 5% if the beneficial owner is a company (other than a partnership) which controls directly at least 10% of the voting power in the company paying the dividends; 15% rate in all other cases.
8. 5% if the beneficial owner is a company which holds directly or indirectly at least 10% of the capital of the company paying the dividends; 10% rate if the beneficial owner is a company which holds directly or indirectly at least 10% of the capital of the company paying the dividends and the dividends are paid out of profits which are subject to tax in Israel at a rate which is lower than the normal rate of Israeli company tax; 15% rate in all other cases.
9. At the domestic Israeli tax rate.
10. 5% if the recipient holds directly at least 10% of the capital of the company paying the dividends.
11. 10% if the beneficial owner is a company (other than a partnership) which holds directly at least 25% of the capital of the company paying the dividends.
12. 15% if the beneficial owner is a company (other than a partnership) which holds directly or indirectly at least 10% of the voting power of the company paying the dividends.
13. 5% if the beneficial owner is a company which owns at least 25%of the voting shares of the company paying the dividends during the period of six months immediately before the end of the accounting period for which the distribution of profits takes place.
14. 5% if the beneficial owner is a company which holds directly or indirectly at least 10% of the capital of the company paying the dividends; 10% rate if the beneficial owner is a company which holds 10% of the capital of the company paying the dividends and the dividends are paid out of profits which are subject to tax at a rate which is lower than the normal rate of the corporation tax; 15% rate in all other cases.
15. 5% if the beneficial owner is a company (other than a partnership) which holds directly at least 10% of the capital of the company paying the dividends; 10% rate if the beneficial owner is a company which holds directly at least 10% of the capital of the company paying the dividends where the dividends are paid out of profits which by virtue of provisions in the Israeli Law of Encouragement of Investments in Israel are exempt from tax or subject to tax at a rate that is lower than the normal rate of Israeli company tax; 15% rate in all other cases.
16. 5% if the beneficial owner is a company (other than a partnership) which holds directly at least 10 % of the capital of the company paying the dividends; 10% rate if the beneficial owner is a company which holds directly at least 10% of the capital of the company paying the dividends where the dividends are paid out of profits which by virtue of provisions in the Israeli Law of Encouragement of Investments in Israel are exempted from tax or subject to tax at a rate that is lower than the normal rate of Israeli company tax; 15% rate in all other cases.
17. 5% if the beneficial owner is a company (other than a partnership) which holds directly at least 10% of the capital of the company paying the dividends; 10% rate if the beneficial owner is a company which holds directly at least 10% of the capital of the company paying the dividends and the dividends are paid out of profits which are subject to tax in Israel at a rate which is lower than the normal rate of Israeli company tax; 15% rate in all other cases.
18. 5% if the beneficial owner is a company which holds directly or indirectly at least 10% of the capital of the company paying the dividends.
19. 5% if the beneficial owner is a company (other than a partnership) which holds directly at least 25% of the capital of the company paying the dividends.
20. With respect to dividends paid to a company which holds directly at least 25%of the capital of the company paying the dividends: (i) 10% where the dividends are paid out of profits which, by virtue of provisions in Israeli law for the encouragement of investment in Israel, are exempted from tax or subject to tax at a rate that is lower than the standard rate levied on the profits of a company resident in Israel; (ii) 5% where paid out of regularly taxed profits. A 15% rate applies in all other cases.
21. 10% if the beneficial owner is a company (excluding partnership) which holds directly at least 10% of the capital of the paying company.
22. 5% if the recipient holds directly at least 15% of the capital of the company paying dividends.
23. 5% if the beneficial owner is a company (other than a partnership) which holds directly at least 25% of the capital of the company paying the dividends; 10% rate if the beneficial owner is a company which holds directly at least 25% of the capital of the company paying the dividends where that latter

company is a resident of Israel and the dividends are paid out of profits which are subject to tax in Israel at a rate which is lower than the normal rate of Israeli company tax; 15 % rate in all other cases.
24. 5% if the beneficial owner holds directly at least 10% of the capital of the company paying the dividends.
25. 5% if the recipient holds directly or indirectly at least 10% of the capital of the company paying the dividends.
26. 5% if the beneficial owner is a company (other than a partnership) which holds directly at least 10% of the capital of the company paying the dividends; 10% rate if the beneficial owner is a company which holds directly at least 10% of the capital of the company paying the dividends where that latter company is a resident of Israel and the dividends are paid out of profits which are subject to tax in Israel at a rate which is lower than the normal rate of Israeli company tax; 15% rate in all other cases.
27. 10% if the dividends if the recipient holds at least 25% of the capital of the company paying the dividends.
28. 5% if the beneficial owner is a company (other than a partnership) which holds directly at least 25% of the capital of the company paying the dividends; 10% if the beneficial owner is a company which holds directly at least 10% of the capital of the company paying the dividends where that latter company is a resident of Israel and the dividends are paid out of profits which are subject to tax in Israel at a rate which is lower than the normal rate of Israeli company tax.
29. 12.5% but only if (i) during the part of the paying corporation's taxable year which precedes the date of payment of the dividend and during the whole of its prior taxable year (if any), at least 10% of the outstanding shares of the voting stock of the paying corporation was owned by the recipient corporation, and (ii) not more than 25% of the gross income of the paying corporation for such prior taxable year (if any) consists of interest or dividends (other than interest derived from the conduct of a banking, insurance, or financing business and dividends or interest received from subsidiary corporations, 50% or more of the outstanding shares of the voting stock of which is owned by the paying corporation at the time such dividends or interest is received). A 15% rate applies for payments from income derived during any period for which the paying corporation is entitled to the reduced tax rate applicable to an approved enterprise under Israel's Encouragement of Capital Investments Law (1959). A 25% rate applies in all other cases.
30. 5 %for interest in connection with the sale on credit of any industrial, commercial, or scientific equipment or on any loan of whatever kind granted by a bank.
31. 5% for interest in the case of a bank or other financial institution.
32. 7% for interest received by any bank or financial institution.
33. 5% for interest paid on a loan granted by a bank.
34. 5% for interest paid on any loan of whatever kind granted by a bank.
35. 5% where in connection with the sale on credit of any industrial, commercial, or scientific equipment, or sale on credit of any merchandise by one enterprise to another enterprise, or on any loan of whatever kind granted by a bank loans made by banks; 10% in all other cases. An election can be made to be taxed on the net amount of the interest as if such interest were business profits.
36. 5% for interest paid in connection with the sale on credit of any industrial, commercial, or scientific equipment, sale on credit of any merchandise by one enterprise to another enterprise, or on any loan of whatever kind granted by a bank.
37. 7.5 % for interest if received by any bank or financial institution.
38. 5 % where paid on any loan of whatever kind granted by a bank.
39. 5% where paid on any loan of whatever kind granted by a bank.
40. 10% where paid to a bank or a financial institution.
41. 5% where paid in connection with the sale on credit of any industrial, commercial, or scientific equipment, or sale on credit of any merchandise by one enterprise to another enterprise, or on any loan of whatever kind granted by a bank.
42. 2% rate applies to government debt or government-assisted debt; 5% rate applies when paid to a financial institution; 10% rate applies in all other cases.
43. 5% rate in connection with the sale on credit of any industrial, commercial, or scientific equipment, or in connection with the sale on credit of any merchandise by one enterprise to another enterprise, or on any loan granted by a financial institution.
44. 5% rate for interest paid on any loan of whatever kind granted by a bank.
45. 7% rate for interest paid on any loan of whatever kind granted by a bank.
46. 10% rate for interest received by any financial institution (including an insurance company).
47. 5% rate for interest paid on any loan of whatever kind granted by a bank.
48. 10% for interest derived from a loan of whatever kind granted by a bank, savings institution, or insurance company or the like. 17.5% rate for other interest. An election may be made to be taxed on interest income as if that income were industrial and commercial profits.
49. 0% for literary, dramatic, musical, or artistic work copyright royalties (excluding in respect of motion picture films or films for use in connection with television).
50. 5% for copyright royalties for literary, artistic, or scientific work (excluding cinematograph films) or for the use of, or the right to use, industrial, commercial, or scientific equipment or road-transport vehicles.
51. 0% for copyright royalties for literary, dramatic, musical, artistic, or scientific work (excluding in respect of films for cinema or television).
52. 15% for trademark royalties.
53. The rate is 50% of the rate which would have been imposed but for the treaty provision but not to exceed 12.5% and not to be less than 7.5%.

54. 0% for copyright royalties for the production or reproduction of any literary, dramatic, musical, or artistic work (but not including royalties in respect of motion pictures).
55. For industrial, commercial, and scientific equipment royalties, the 10% rate applies to the adjusted amount of the royalties (70% of the gross amount of the royalties).
56. 0% for copyright royalties for literary, artistic or scientific work (excluding cinematograph films).
57. 0% for copyright royalties for literary, dramatic, musical, or artistic works.
58. 0% for copyright royalties for literary, artistic, or scientific work (excluding cinematograph films or tapes for television or broadcasting).
59. 2% for industrial, commercial, and scientific equipment royalties.
60. 5% for industrial, commercial, and scientific equipment royalties.
61. 10% for royalties for cinematograph films and films or video-tapes for radio or television broadcasting.
62. 5% for industrial, commercial, or scientific equipment royalties.
63. For royalties in respect of cinematograph or television films, the WHT rate shall not exceed tax at the rate applicable to companies on 15% of the gross amount of the royalty.
64. 5% for royalties for copyrights of literary, dramatic, musical, artistic work, or for the use of, or the right to use, industrial, commercial, or scientific equipment.
65. The definition of royalties does not include any royalty or other amount paid in respect of (i) the operation of a mine or quarry or of any other extraction of natural resources or (ii) in respect of cinematograph including television films.
66. 5% for royalties for literary, artistic or scientific work, excluding cinematograph films or films or tapes used for radio, or television broadcasting
67. For royalties in respect of cinematograph or television films, tax may be imposed in Israel, but not to exceed tax at the rate applicable to companies on 15% of the gross amount of the royalty.
68. 10% for copyright or film royalties.
69. 5% of the gross amount of the royalties where such royalties consist of payments of any kind received as a consideration for the use or the right to use any copyright of literary, artistic, or scientific work (excluding cinematograph films).
70. 5% for royalties for any patent, design or model, plan, secret formula or for the use of, or the right to use, industrial, commercial or scientific equipment or for information concerning industrial, commercial or scientific experience; 7.5% for technical fees; 15% for all other royalties.

## *Tax administration*

### *Returns*

The tax year is generally the calendar year. Certain entities may apply to have their tax year-end on different dates, specifically, mutual funds, government companies, quoted companies, and subsidiaries of foreign publicly listed companies.

The Israeli system is based on a combined form of assessment and self-assessment.

The statutory filing date is five months following the end of the tax year, which for a calendar year taxpayer would be 31 May. It is possible, however, to secure extensions of the filing date.

### *Payment of tax*

Generally, 12 monthly advance payments are levied at a fixed ratio of the company's turnover. Alternatively, a company may be required to make ten monthly payments beginning in the second month of its tax year, each payment being a fixed percentage of the previous year's tax assessment.

Penalties are imposed on overdue advance payments and on delays in the submission of tax returns. The balance of any taxes due is payable from the beginning of the following tax year and is linked to the CPI; it bears interest of 4% until paid.

### *Statute of limitations*

The statute of limitation period for corporate tax is three years from the end of the tax year in which the relevant tax return is filed. The Commissioner of the Tax Authorities has the authority to extend this period to four years.

## Other issues

### Choice of business entities

Investments and business operations in Israel may be structured in a variety of ways. The following are the common types of business entities in Israel: (i) Israeli public or private company; (ii) foreign company in Israel (i.e. a branch); (iii) Israeli general or limited partnership; (iv) foreign general or limited partnership; (v) other entities such as cooperative societies; and (vi) other arrangements (e.g. contractual joint ventures).

### Mergers and acquisitions

Israeli tax law allows for non-taxable reorganisations in situations in which the ownership and business enterprise of the original parties is continued after the reorganisation takes place, allowing for the deferral of the tax liability until the shares or assets transferred in such reorganisations are actually sold. Different qualifying requirements and conditions apply (e.g. obtaining a ruling from the ITA in certain cases), depending upon the tax residency of the parties and the type of transfer.

## Significant developments

The major recent changes in the Italian tax rules enacted in 2010/2011 are as follows:

- Penalty protection regime with transfer pricing documentation support.
- Changes to the controlled foreign companies (CFC) rules.
- Offsetting of taxes.
- Changes to value-added tax (VAT).
- New tax incentives.

Please note that Italy tax updates are generally expected from June to September in connection with the finance bill and related laws approval. In this respect, we suggest visiting the Worldwide Tax Summaries website at www.pwc.com/taxsummaries after September each year in order to check whether or not relevant changes affect your business.

### Penalty protection regime with transfer pricing documentation support

Transfer pricing adjustments will no longer be subject to administrative penalties if proper documentation is drawn up and kept available in order to be provided during a tax audit.

Documentation content guidelines have been issued by tax authorities.

Starting from fiscal year 2010, the possession of the documentation must be notified with the tax authorities by filing the annual corporate income tax return. A notification mechanism is provided for previous fiscal years.

### CFC rules modification

Conditions for the applicability of CFC rules have been modified. In addition, CFC rules may also be applicable to certain controlled companies that are not resident in tax havens.

### Offsetting of taxes

As of 1 January 2011, there is a new prohibition of tax credits' offsetting tax debts amounting to more than 1,500 euros (EUR) which have been definitively assessed by the tax authorities and not paid by the taxpayer on time.

### VAT changes

As of 1 April 2011, the supply of mobile telephones and micro processors within the Italian Territory are subjected to the reverse charge mechanism.

As of 1 January 2011, changes regarding the VAT treatment of cultural, artistic, sporting, scientific, educational, recreational, and similar activities and their access, comprised herein of fairs and exhibitions, provision of services of organisers of said activities, and provision of services incidental to the foregoing have entered into force.

As of July 2010, transactions carried out with subjects resident in 'black list' countries must be disclosed in periodical communications to be electronically filed with the tax authorities. An electronic communication to the tax authorities has been introduced for VAT transactions exceeding EUR 3,000.

### *New tax incentives*

#### Tax credits for research and development (R&D) investments

A tax credit for financing R&D projects carried out by universities and other qualified organisations may be obtained for 2011 and 2012.

#### Tax credits for new permanent employment in the south regions

A tax credit is available in the case of new employment of specific categories of workers in the south Italian regions (i.e. Abruzzo, Basilicata, Calabria, Campania, Puglia, Molise, Sardegna, Sicilia).

## *Taxes on corporate income*

Italian corporate entities are subject to a 27.5% corporate income tax, known as Imposta sul REddito delle Società (IRES) and to a 3.9% regional production tax, known as Imposta Regionale sulle Attività Produttive (IRAP).

A 6.5% increase (surtax) to the IRES rate is applied to companies operating in the areas of oil and gas refining, production, or trade and in electrical energy (production or trade) whose turnover exceeded EUR 25 million in the prior fiscal year.

IRES taxable base is determined according to the worldwide taxation principle, providing that, regardless of the location/jurisdiction where the income is produced, to the extent that the income is legally attributable to an Italian resident entity, the income is taxed in Italy. IRES is charged on the total net income reported in the financial statements of the company as adjusted for specific tax rules. Non-resident companies are taxed only on Italian-source income.

There are different methods of computation for the IRAP taxable base, depending on the nature of the business carried out by the taxpayer. Labour costs (with limited exceptions), provisions for liabilities and risks, and extraordinary items cannot be taken into account in determining the IRAP taxable base.

For sales and manufacturing companies, the IRAP taxable base is broadly represented by the company's gross margin in its financial statements. In addition to the non-deductible items mentioned above, interest income and expense and provisions for bad debts are excluded for the purposes of the IRAP taxable base.

For banks, the IRAP taxable base is broadly defined as follows:

- Intermediation margin reduced by 50% of dividends.
- 90% of amortisation costs relating to fixed tangible and intangible assets.
- 90% of other administrative expenses.

Special rules apply to financial institutions, other than banks.

IRAP is levied on a regional basis, and regions are allowed to increase or decrease the standard IRAP rate up to 0.9176%. Companies with facilities in different regions must allocate their overall taxable base to the different regions on the basis of the employment costs of personnel located at the various sites. Facilities become relevant to the calculation of IRAP if they have been established for more than three months. Italian companies with permanent establishments (PEs) abroad, as well as shipping companies qualifying for the tonnage tax regime *(see Tonnage tax below)*, are not subject to IRAP on the income earned through these PEs.

Some Italian regions (Abruzzo, Basilicata, Calabria, Campania, Molise, Puglia, Sardegna, and Sicilia) may reduce/set the rates of IRAP to zero. Terms and conditions for the applicability of IRAP will be set out in a specific Decree to be issued by the President of Council of Ministers in agreement with each region.

Note that for 2010, there was a 0.15% increase in the IRAP rates for the regions of Lazio, Campania, Molise, and Calabria.

### *Substitutive tax on reorganizations (mergers, demergers, contribution in kind)*

Corporate restructurings such as contributions in kind, (assets vs shares transactions) mergers, and demergers are, in principle, tax neutral even if, for financial accounting purposes, the transaction results in the recognition of higher values of the assets or of a goodwill. Companies may elect to obtain partial or full recognition for tax purposes of the step-up in the financial accounting values of assets or of the goodwill arising from the corporate restructurings provided they pay a substitutive tax.

The substitutive tax is calculated on the step-up in tax basis and is based on progressive rates of 12% to 16%. The first EUR 5 million is taxed at 12%, the tranche above EUR 5 million but less than EUR 10 million is taxed at 14%, and the amount in excess of EUR 10 million is taxed at 16%. The substitutive tax may also be paid in three annual instalments of 30% in the year of election, 40% in year two, and 30% in year three plus interest at the rate of 2.5% per year on the deferred amounts. The substitutive tax is not deductible for the purposes of IRES or IRAP.

In addition, stepped-up values of goodwill and trademarks may be depreciated for tax purposes over ten tax years instead of the normally allowed 18 years by paying a substitutive tax of 16%. The higher tax depreciation arising from this election is effective from the tax period subsequent to the one in which the substitutive tax is paid. For example, if a merger transaction occurred in year one and the substitutive tax was paid in year two, the increased tax depreciation would begin in year three.

### *Tonnage tax*

Italian tax resident shipping companies, as well as non-resident shipping companies operating in Italy through a PE, can qualify for and then elect to be subject to the Italian tonnage tax regime. The regime basically allows for the determination of presumptive income based on the net tonnage of the qualifying ships apportioned to the effective shipping days (tonnage income). The tonnage income is subject to IRES only.

To qualify for the tonnage tax, ships must: (i) have a net tonnage of more than 100 net tons (NT); (ii) be used for goods transportation, passenger transportation, salvage, towing, and other services; and (iii) operate in international shipping as defined by the rules disciplining Italian International Registry. Ships chartered out on a bare boat charter are excluded. Chartered in ships with crew are included in the tonnage tax regime if their global net tonnage is less than 50% of the total net tonnage.

Tonnage income is calculated on the basis of the ship's net tonnage. The daily income is determined according to the following rate system:

| Ship's net tonnage (NT) | Daily income in EUR per NT |
|---|---|
| 0 to 1,000 | 0.0090 |
| 1,001 to 10,000 | 0.0070 |
| 10,001 to 25,000 | 0.0040 |
| above 25,001 | 0.0020 |

No deductions are allowed from tonnage tax income.

Income and expenses from the following activities are all deemed to be covered by the tonnage income determined as previously discussed:

- Transport of goods.
- Transport of passengers.
- Salvage and towing.
- Other services that need to be performed on the high seas.
- Charges related to the above mentioned activities (e.g. administrative and commercial expenses, insurances fees).
- Other operations performed in close connection with the transportation operations (e.g. loading and unloading).
- Other minor activities.
