Capital gains or losses arising from the transfer of ships that have been acquired by a company, while under the tonnage tax regime, are also deemed to be included in tonnage tax income. Conversely, for capital gains arising from the transfer of a ship acquired prior to election for the tonnage tax regime, the difference between the sale price and the net tax cost as of the last tax period prior to the election for the tonnage tax regime is subject to the ordinary tax regime. Tax losses, in this latter case, are tax deductible.

An election for the tonnage tax regime should be made for all of a company's or group's qualifying vessels. So called 'cherry picking' is not allowed. Election for the tonnage tax regime is on a voluntary basis, but, once elected, it remains in effect for ten years. The election is renewable.

## *Corporate residence*

### *Corporate residence of companies*

Companies having their legal or administrative headquarters or their principal business activity within the Italian territory are considered to be resident companies and are taxable in Italy on their worldwide income.

A foreign company holding one or more Italian subsidiaries is deemed to be resident of Italy for tax purposes if at least one of the following conditions exists:

- The foreign company is, either directly or indirectly, held by Italian tax resident persons.
- The board of directors of the foreign company is made up mainly of Italian resident individuals.

Non-resident companies are subject to IRES and IRAP only on their Italian-source income. Specifically, Italian non-resident companies having a PE in Italy are subject to IRES and IRAP with respect of the taxable income generated from the PE in Italy.

### *Permanent establishment (PE)*
The domestic definition of PE is substantially aligned with the OECD model.

### *Corporate residence of a trust*
Trusts are considered as persons subject to corporate taxation.

Residence is defined on the basis of the location of the place of management and of the main object of the trust. In the first instance, trusts that operate through an appropriate structure are deemed to be tax resident in Italy, if the said structure is located in Italy. In the absence of any such structure, trusts managed by a trustee will be deemed as tax resident in Italy, if the trustee is tax resident in Italy. In addition, trusts that have the largest part of their assets located in Italy are deemed a tax resident in Italy.

Note that there are anti-avoidance rules for Italian non-resident trusts, setting out the specific conditions on which these trusts can become Italian tax resident.

## *Other taxes*

### *Value-added tax (VAT)*
Italian VAT (Imposta sul Valore Aggiunto) applies to the supply of goods and services carried out in Italy by entrepreneurs, professionals, or artists and on importations carried out by anyone. Intra-community acquisitions are also subject to VAT taxation under certain situations.

The Italian standard VAT rate is 20%. Reduced rates are provided for specifically listed supplies of goods and services, such as 4% for listed food, drinks, and agricultural products and 10% for electric power supplies for listed uses and listed drugs. Intra-community supplies and exports are exempt from VAT.

Specific supplies of goods and services expressly listed in the law are exempt from VAT (e.g. public postal services, hospital and medical care, education, insurance services, specific financial services, supply, leasing of particular immovable property). Other specifically listed transactions are also out of the VAT application scope (e.g. transfer of money, transfer of business parts).

Input VAT on purchases of goods and services related to business activity generally is allowed for recovery. Special limitations apply in relation to specific items (e.g. cars, entertainment expenses).

The filing deadline for VAT returns is 30 September.

#### Service supply rules
Services supplied by a taxable person to another taxable person (business to business or B2B) are in the scope of the Italian VAT if the services are supplied to Italian taxable persons or to PEs of an Italian non-resident entity.

The general rules are as follows:

- For services related to immovable property, reference must be made to the place in which the immovable property is located.
- For the transportation of passengers, the place in which the transportation takes place must be identified including the proportion of the distance covered.
- For catering and restaurant services, the place in which the activity will be physically carried out must be identified.
- For short term hiring, leasing, and similar of means of obtaining transport services, the place in which the vehicle is used must be identified (use and enjoyment rule has been implemented on these services).

The general rule for services supplied by a taxable person to a non-taxable person (business to consumer or B2C) identifies the place of taxation with the country of residence of the supplier.

Several rules, in addition to the B2B general rules, exist for the following:

- Brokerage services.
- Goods transport services.
- Services related to movable goods and ancillary activities related to transports.
- Long term hiring/leasing of means of transport services.
- Electronic services supplied by extra-European Union (EU) suppliers.
- Telecommunications and television/radio broadcast services.

In addition, special rules are provided for intangible services provided to final customers established outside the European Union.

In relation to the VAT treatment of cultural, artistic, sporting, scientific, educational, recreational, and similar services, the follow rules apply:

- Before 31 December 2010, these activities were subject to VAT in the country where they were physically carried out (same treatment for B2B and B2C, including the admission to the events).
- After 1 January 2011, the VAT treatment for B2C activities remains unchanged. For B2B activities other than admission, however, VAT is due in the country of the recipient. For B2B services in respect of admission, the place of supply is where the events take place.

### Reporting obligation
As of July 2010, transactions carried out with subjects resident in 'black list' countries (i.e. tax haven jurisdictions) must be disclosed in periodical communications to be electronically filed with the tax authorities.

An electronic communication to the tax authorities has been introduced for VAT transactions exceeding EUR 3,000. Specific transactions are excluded from the communication, regardless of their amount (e.g. importations, exportations, and other transactions which have already been communicated to the Tax Authorities, such as black list, insurance, electricity supply, and telephone services contracts).

### Reverse charge mechanism extension
According to the reverse charge mechanism, the obligations related to supply of goods and provision of services carried out in Italy by non-resident taxable persons towards taxable persons established in Italy are fulfilled by the latter. From a practical point of

view, the recipient of goods and/or services has to issue a self-invoice and record it in the VAT sales register and VAT purchase register.

The reverse charge mechanism obligation has been extended to the supply of all goods and services in the scope of the Italian VAT carried out by non-resident entities to taxable persons resident in Italy. Non-resident entities (including those having an Italian VAT number through indirect or direct registration) cannot charge Italian VAT to an Italian established VAT person.

Note that sales within the Italian territory of:

- mobile telephones, being devices made or adapted for use in connection with a licensed network and operated on specified frequencies, whether or not they have any other use, and
- integrated circuit devices, such as microprocessors and central processing units, in a state prior to integration into end-user products

are subject to the reverse charge in case the recipient of the above goods is a taxable person in Italy. This mechanism is not applicable to retail sales and when the supply of the handset is ancillary to the airtime.

### VAT credit offset with other taxes

From 2010, to offset a VAT credit against other taxes for an amount higher than EUR 10,000, it will be necessary to wait until the 16th day of the month following the filing of the yearly VAT return on which the credit is shown.

Furthermore, in order to avoid abuse, taxpayers intending to offset a VAT credit for an amount greater than EUR 15,000 are required to ask their tax advisors or auditors to affix their signature to the VAT return, which is known as the 'conformity mark'.

## *Registration tax*

Specific deeds and contracts must be filed with the local registration tax office either upon signature or if specific circumstances occur, and the relevant tax must be paid.

Depending on the nature of the contract and on the assets that are the object of the contract, as well as on the form of the contract, registration tax is levied as a fixed amount or as a percentage of the value of the goods and/or rights that are the object of the contract. As a general rule, no proportional registration tax is due in the case of transactions subject to VAT.

## *VAT and registration tax on lease of immovable properties*

Leases, including financial leases, of residential and commercial buildings, or portion thereof, generally are VAT exempt and subject to the registration tax at 2% or 1% rate.

Please refer to the table below for an overview of the tax regime applicable to the leases, including financial leases, of both residential and commercial buildings.

| Type of building | Lessor (VAT status) | Lessee (VAT status) | VAT (%) | Registration tax (%) |
|---|---|---|---|---|
| Residential buildings | Individual or entities not acting in the course of business (not subject to VAT) | Any | Out of scope | 2 |

| Type of building | Lessor (VAT status) | Lessee (VAT status) | VAT (%) | Registration tax (%) |
|---|---|---|---|---|
| Commercial buildings | Individual or entities not acting in the course of business (not subject to VAT) | Any | Out of scope | 2 |
| Residential buildings | Taxable persons acting in the course of business | Any | Exempt (with no right to deduction)* | 2 |
| Commercial buildings | Taxable persons acting in the course of business | Individual or entities not acting in the course of business (not subject to VAT) | 20 | 1 |
| | | VAT taxable persons with a VAT recoverable pro-rata not higher than 25% | 20 | 1 |
| | | Other cases | Exempt (with non-right to deduction) with the possibility for the lessor to opt for the VAT regime (20% rate) | 1 |

* In some specific cases of subsidized housing, VAT is applicable at a 10% reduced rate.

### *Stamp duty taxes*

Stamp duty taxes (Imposta di Bollo) apply on a certain list of deeds or documents provided for by the relevant law provision (e.g. checks, bills of exchange, statements of account, certificates, books of account, deeds of transfer of quotas, and, in some cases, invoices).

According to the kind of deed, stamp duty tax is due at the moment of the deeds' origin or in case of use and can be a fixed amount or an amount proportional to the value of the deed or document.

Stamp duty tax can be paid:

- ordinarily, through a physical stamp attached on the document, or
- virtually, through electronic means (in this case a specific authorization from the Italian Tax Authorities and a specific process are needed).

Stamp duty tax is usually alternative to VAT; however, in case of considerations partially subject to VAT and partially not subject to VAT, the invoice is subject to stamp duty tax if the total amount of the considerations not subject to VAT exceeds EUR 77.46. Moreover, some transactions are stamp duty tax exempted (e.g. inter-community supply of goods). For transactions which are exempted from VAT (with restriction on VAT credit) and for transactions out of scope of VAT, an amount of EUR 1.81 is due as stamp duty tax for every invoice issued.

### *Customs duty*

At the moment of the importation of goods into the EU territory, customs duties are applied. The amount of customs duties to pay depends on the value and nature of the goods imported. In particular, for each kind of good, the Common Customs Tariff provides a tax-rate to be applied to the value of the goods imported.

The correct classification of the goods is one of the most important issues to consider when an economic operator introduces goods in Italy. A wrong classification can give rise to the application of higher customs duties, and the operator could face a tax burden not due, or to the application of lower customs duties, and this situation could lead to a Tax Assessment by Italian Customs Authority.

The value of the goods is represented by the transaction value, hence, the price actually paid or payable for the goods when sold for exportation to the customs territory of the EU, provided that:

- there are no restrictions as to the disposal or use of the goods by the buyer
- the sale or price is not subject to some condition or consideration for which a value cannot be determined with respect to the goods being valued
- part of the profits of any subsequent resale, disposal, or use of the goods by the buyer will not be accrued, directly or indirectly, to the seller, and
- the buyer and seller are not related, or, where the buyer and seller are related, that the transaction value is acceptable for customs purposes.

In determining whether the transaction value is acceptable, the fact that the buyer and the seller are related is not, in itself, sufficient for considering the transaction value as non-acceptable. Where necessary, the circumstances surrounding the sale are examined, and the transaction value is accepted provided that the relationship did not influence the price.

The price actually paid or payable is the total transaction amount paid for the imported goods and includes all payments made as a condition of sale of the imported goods by the buyer to the seller or by the buyer to a third party to satisfy an obligation of the seller.

In determining the customs value, the following items shall be added to the price, to the extent that they are incurred by the buyer and are not included in the price (list not exhaustive):

- Commissions and brokerage.
- Royalties and license fees related to the goods under assessment.
- The cost of transport and insurance of the imported goods.

At the same time, provided that they are shown separately from the price actually paid or payable, the following items shall not be included in to the customs value (list not exhaustive):

- Charges for the transport of goods after their arrival at the place of introduction into the customs territory of the European Community (EC).
- Charges for construction, erection, assembly, maintenance, or technical assistance, undertaken after importation of imported goods such as industrial plant, machinery, or equipment.
- Buying commissions.

A reduced tax-rate at importation can be applied when the goods imported have a preferential origin. The preferential origin depends on the existence of commercial agreements between the European Community and other non-EC states or by facilities provided by European Community to non-EC states unilaterally.

The application of a reduced tax-rate can even depend on the existence of preferential tariff treatment or on the existence of a particular exemption provided by law for some kind of goods.

Any person may appoint a representative in one's dealings with the Customs Authority to perform the activities and formalities laid down by customs rules. Such representation may be direct, in which case the representative shall act in the name and on behalf of another person, or indirect, in which case the representatives shall act in one's own name but on behalf of another person.

For direct representation, a forwarding agent, holder of a particular license, must be appointed.

The representative must be established within the European Community.

### *Excise duty*

The following goods are subject to excise duties:

- Energetic products (e.g. petrol, gas oil, natural gas, coal).
- Alcohol and alcoholic drinks (e.g. wine, beer, ethylic alcohol).
- Processed tobaccos (e.g. cigars, cigarettes, tobacco).
- Electric power.

The subjection of a product to excise duties has to be verified on the basis of its customs combined nomenclature code.

The tax liability, depending on the products, arises:

- at the moment of importation or production (and the excise duties must be paid at the moment in which they are released for consumption in Italy)
- when the excisable goods are used for heating or as fuel, and
- when the excisable goods are released for consumption or used for own use.

As a general rule (with exception from natural gas and coal, coke, and lignite), with reference to excise goods released for consumption during a month, the payment of the relative excise duties has to be done within the 16th day of the following month.

With reference to excise goods imported, customs rules are applied as far as the procedure and terms of payment concern.

The production, processing, and holding of 'excise goods', except from natural gas, coal, coke, lignite, and electric power, are subject to a suspensive regime performed through a fiscal warehouse.

In order to manage a fiscal warehouse, it is necessary to acquire a license issued by the Italian Customs Authority, and there are specific obligations for the owner of a fiscal warehouse (e.g. provide for a particular guarantee, keep a particular accounting system for the goods stored, be subject to controls performed by Italian Customs Authority, where requested).

The Italian legislation provides for many exemptions with regards to the use of 'excise goods'.

Furthermore, under certain circumstances, a tax refund is granted to the operator who released for consumption, if, afterwards, the products are not consumed in Italy.

### *Imposta Comunale sugli Immobili (ICI)*

ICI is the municipal tax on real estate. It is levied either on the owner or on the financial lessee of real estate (i.e. buildings, development land, and agricultural land). The tax rate ranges between 0.4% and 0.7%, depending on the rate set by the municipality where the property is located.

The taxable basis generally is determined on the basis of the so called 'cadastral value' (i.e. capitalisation of the income derived from the real estate).

## *Branch income*

The tax regime for PEs is the same as for corporate Italian entities (e.g. joint-stock companies). Accordingly, a branch is subject to IRES as well as IRAP. Both taxes are determined on the basis of the relevant financial statements related to the business activities carried out by the PE.

Transfer pricing principles apply to transactions between a head office and its Italian tax resident PE.

## *Income determination*

In principle, positive and negative components of a company's income statement are, respectively, taxed or deducted on an accruals basis (under the accrual principle) for tax purposes. Additionally, in order to be taxed/deducted, income items have to be certain under a legal standpoint and either objectively determined or capable of objective determination as to their amount (under the certain and objective determination principle). Income statement items accrued in the statutory accounts not meeting the above criteria are not allowed for tax deduction nor taxed as income in the tax period. Deduction or taxation of income is correspondingly deferred to future tax periods when the criteria are met.

Expenses generally are deductible if they relate to activities generating revenues concurring to the company's taxable income (under the inherence to business principle) and provided they are included in the relevant statutory accounts (under the imputation principle). An exception to this general rule is made for those income statement items accrued in the statutory accounts relating to a tax period different from that in which they become relevant for tax purposes in accordance with the principles of certainty and objective determination as described above. These items are taken into account in determining taxable income in the tax period when the latter conditions are met.

For IRAP purposes, relevant income and expense are those reported in the financial statements.

Specific rules have been released for entities which have adopted International Financial Reporting Standards (IFRS) for Italian statutory financial reporting purposes. These provisions are aimed to align income determination rules with IFRS.

### Inventory valuation

Italian tax law allows the application of all the most commonly used inventory valuation methods: last in first out (LIFO), first in first out (FIFO), average cost. For IRES only, the reference prices used to calculate the written down value of the inventory items cannot be lower than their market prices during the final month of the tax period.

Companies operating in the oil and gas sector are required to adopt either average cost or FIFO for tax purposes.

### Capital gains

Capital gains are taxable in the tax period in which they are realised, as follows:

- Fixed assets: the gain realised on the sale of fixed assets is taxable for both IRES and IRAP purposes. Additionally, for IRES purposes, tax on capital gains can be spread over a maximum of five years. This treatment is allowed provided that the company owns the fixed assets for not less than three years.
- Financial Investments: a specific participation exemption regime (PEX) is applicable. Under this regime, capital gains realized by Italian companies on sales of shareholdings are 95% exempt from IRES.

PEX applies if all of the following conditions are met:

- The shareholding was held uninterruptedly for at least 12 months prior to the sale.
- The investment was classified under financial fixed assets in the financial statements relating to the first tax period of uninterrupted ownership.
- The subsidiary is actually carrying on a commercial activity (e.g. investments in companies mainly performing management of their own real estate are not entitled to the PEX benefits).
- The majority of the subsidiary's income is not generated in a tax haven country or one with a privileged tax regime.

The third and fourth conditions must be met both at the time of the sale of the investment and in the three preceding years. If these conditions are not met, the capital gain realized by the company is ordinarily taxed. Capital losses arising from the sale or write-down of shareholdings meeting PEX conditions are basically not tax deductible. Likewise, the capital losses realized on sales of non-PEX investments are tax deductible. Specific exemptions are provided for those entities adopting IFRS for Italian statutory accounts reporting purposes.

Specific anti-dividend washing rules provide that where capital losses arise from the disposal of shareholdings which are not eligible for PEX, such losses are deductible only for the part exceeding the tax exempt amount of dividends *(see Dividend income discussion below)* received from the shares in question in the 36 months prior to the disposal.

Capital gains on financial investments generally are excluded from the IRAP taxable base.

### Dividend income

Dividends received by Italian resident companies from Italian companies or from companies resident in countries other than tax havens (i.e. not included in the 'black list') are excluded from the IRES taxable base for 95% of their amount. Conversely, no exemption applies to dividends paid by entities that are resident in tax haven jurisdictions (unless those dividends derive from profits that were already taxed under the Italian CFC rules). There are specific rules for entities adopting IFRS for Italian statutory financial reporting purposes. For such entities, dividends from investments in shares and other financial instruments held for trading are fully taxable.

Dividends generally are excluded from the IRAP taxable base.

### *Foreign income*

An Italian resident corporation is taxable on all income whether produced in Italy or abroad. Profits earned by subsidiaries that are resident or located in countries or territories other than tax havens are taxed only on distribution of the relevant profits. Double taxation is, in principle, avoided by means of foreign tax credits.

### *Shell companies*

Resident companies and PEs of non-resident companies can be qualified as non-operating entities if certain tests are not passed. In such a case, these entities will be assessed as having a minimum taxable income for both IRES and IRAP purposes.

For IRES purposes, the average revenues recorded in the current fiscal year and in the prior two must be compared with the amount resulting by applying certain 'deemed return' percentages to the average balance sheet value of specific assets in the current fiscal year and the two previous years.

The main assets to be taken into consideration are shares and shareholdings, financial receivables, owned or leased real estate, and owned or leased tangible and intangible assets. The value of assets acquired or sold during the fiscal year must be adjusted according to the period of ownership.

An entity is deemed to be non-operative if the expected revenues determined on the above basis are higher than the average of actual revenues. As a consequence, the entity is obliged to declare minimum taxable income for IRES, calculated by multiplying fixed percentages of 'deemed return' to the value of the above-mentioned assets.

This condition must be checked every year. Therefore, it is possible for an entity to be 'non-operative' in one year and operative in the following year.

Tax losses generated in a tax period when the company was deemed to be non-operating cannot be carried forward.

For IRAP purposes, labour costs and other non-deductible items have to be added back to the deemed minimum IRES income as outlined above.

These rules are not applicable in the first year of a company's incorporation. Exemptions from these rules can be achieved:

- by means of an advance ruling from the Italian tax authorities aimed at assessing the specific circumstances that caused the company not to earn the minimum amount of income or
- by specific objective situations provided for by Italian law (e.g. company directly or indirectly held by quoted companies).

Shell companies are also subject to limitations in their ability to recover VAT credits.

## Deductions

*The principles outlined in the section on Income determination also apply for deductible costs.*

### Interest expense

Generally, interest expense is fully tax deductible up to the amount of interest income. Thereafter, excess interest expense is deductible up to 30% of the gross operating margin (interest deduction capacity) as reported in the financial statements. Gross operating margin is defined as the difference between operating revenues and expenses excluding depreciation of tangible and intangible assets and charges for leased assets as stated in the profit and loss account for the year.

Net interest expense in excess of the yearly limitation is carried forward indefinitely. Hence, net interest expense not deducted in previous years can be deducted in any future fiscal year as long as total interest in that year does not exceed 30% of gross operating margin. If net interest expense is lower than the annual limit (i.e. 30% of gross operating margin), this difference can be carried over to increase the company's interest deduction capacity in future years. However, this latter rule is only applicable from 2010 onwards.

Where an election is made for the domestic tax consolidation regime, *(as discussed in Group taxation)*, the net interest expense limitation applies to the consolidated tax group. As a consequence, if a company participating in a tax group has an excess interest deduction capacity, this excess may be used against the interest deduction deficit in another company belonging to the same tax consolidation group. Under specific conditions, non-resident subsidiaries can also be 'virtually' included in the tax consolidation for the sole purpose of transferring their excess capacity over 30% of gross operating margin in order to increase the overall interest deduction capacity of the Italian group.

The above-mentioned rules are not applicable for financial institutions, such as banks and insurance companies, where the deductibility of interest expense (for both IRES and IRAP purposes) is limited to a fixed amount of 96% of the interest expense shown in the income statement of these entities.

### Depreciation and amortisation

All fixed assets which are used in the business of the company, except land, are depreciable for tax purposes (for both IRES and IRAP).

For IRES, the maximum depreciation rates for fixed tangible assets are set forth in a ministerial decree. In the event that financial accounting depreciation exceeds the amounts allowed for tax purposes, temporary differences arise. Tax depreciation of fixed tangible assets is allowed from the tax period in which the asset is first used. In the first tax depreciation period, the depreciation rate cannot exceed one-half of the normal rates.

Land is not a depreciable asset. Amortisation of goodwill derived from an acquisition and amortisation of trademarks are deductible for an amount not exceeding one-eighteenth of the cost of the goodwill in any year.

Patents, know-how, and other intellectual property may be amortised over a two-year period.

Concession rights may be depreciated with reference to the utilisation period as determined either by law or in the relevant agreement.

For IRAP purposes only, depreciation and amortisation (other than as related to goodwill and trademarks) are deductible in accordance with the amounts reported in the financial statements, regardless of the limits outlined above.

### *Entertainment expenses*
For IRES purposes, expenses for gifts and entertainment which meet the requirements (both qualitative and quantitative) contained in the specific Ministerial Decree are fully deductible in the tax period in which they are incurred. Entertainment expenses which do not meet these requirements cannot be deducted.

Expenses related to gifts with a value of EUR 50 or less are entirely deductible.

### *Automobile expenses*
For IRES purposes, deduction of the cost of company automobiles is limited to 40% of the total amount of the costs for the automobile. If automobiles are assigned to employees, the company may deduct 90% of the costs associated with the automobile.

Automobile costs may be deducted in their entirety if (i) automobiles are necessary for the company's business or (ii) automobiles are an essential element in the company's activity (i.e. vehicles owned by a car rental company).

### *Telephone expenses*
For IRES purposes, up to 80% of the total expenses related to both mobile and landline telephones are deductible.

### *Travel expenses*
For IRES purposes, the deduction for travel expenses incurred within the municipality is limited to 75% of the amount incurred. However, the VAT related to such costs is fully recoverable.

### *Taxes*
When calculating the IRES base, 10% of IRAP paid is deductible.

ICI, municipal tax on real estate, is not deductible for either IRES or IRAP.

### *Net operating losses (NOLs)*
For IRES purposes, tax losses can be carried forward and used to offset income in future tax periods. The carryforward is limited to the five tax periods following the period in which the loss is incurred. Losses arising in the first three years of activity of the enterprise can be carried forward indefinitely.

For IRAP purposes, tax losses may not be carried forward.

Specific (tax anti-avoidance) rules limit the carryforward of tax losses in the event of:

- change of control and
- an effective change of the main activity (performed by the company carrying forward the losses).

The aforementioned changes must occur together in order for the limitations to be applicable. The change of the main activity is relevant for these purposes if it takes place in the tax period in which the change of control occurs or in the two subsequent or preceding periods.

Specific anti-abuse provisions are also applicable to NOLs in cases of merger or demerger.

In Italy, tax losses may not be carried back.

### *Payments to foreign affiliates*

Transactions with foreign affiliated companies should be at 'fair market value' and, generally, as defined by OECD guidelines.

Italian companies transacting business with related non-resident parties may participate in special tax ruling procedures for the transfer pricing procedures used for intra-group transactions. The agreement executed between the tax authorities and the taxpayer is binding for the fiscal year during which the agreement is executed and for the following two fiscal years, unless significant changes in the circumstances relevant for the conclusion of the agreement executed by the taxpayer take place.

### *Purchases from suppliers resident in tax haven jurisdictions*

The costs of goods and services purchased from entities which are resident in tax haven jurisdictions are deductible on the condition that the taxpayer can, upon request of the tax authorities, provide evidence that the foreign companies carry out a real business activity or that the transactions were carried out for good and sound economic reasons (e.g. better economic conditions, the foreign supplier is the sole distributor for specific products).

An official list of tax haven jurisdictions (known as the 'black list') has been issued by the Ministry of Finance. A list of countries which are not considered to have a privileged tax regime (known as the 'white list') is expected, and countries not on this white list will be deemed tax havens. Specific disclosure is required in a company's income tax return for the expenses arising in tax haven jurisdictions.

## *Group taxation*

### *Domestic tax consolidation*

Companies belonging to the same group can elect domestic tax consolidation. This allows the determination of a single IRES taxable base comprised of the taxable income and losses of each of the participating entities. The tax consolidation does not operate for IRAP purposes.

Where an overall tax loss position arises, this can be carried forward and used against future consolidated taxable income. Conversely, tax losses arising in fiscal years preceding the domestic tax consolidation election can be carried forward and used only by the company to which these losses belong.

The taxable basis determined by each company participating in the tax consolidation arrangement is included in its entirety. No apportionment is made in relation to the percentage of control.

In order to validly elect the Italian domestic tax consolidation regime, the following conditions must be met:

- The consolidating entity must be an Italian tax resident company, and it must hold, directly or indirectly, more than the 50% of the share capital of the consolidated entities (so called 'legal control').
- This control must be in place from the beginning of the tax period for which the tax consolidation is applied for.
- All of the companies participating in the group must have the same year end.

Provided that specific requirements are met, Italian PEs of foreign companies can also participate as controlling entities in a tax consolidation.

The consolidation arrangement operates on an elective basis. Taxpayers may select whether to be included or not, and it is not necessary for all the Italian group/sub-group companies to jointly elect for the tax consolidation.

Once the election is made, it cannot be revoked for three fiscal years.

### *Worldwide tax consolidation group*
A worldwide tax consolidation group is available, allowing the consolidation of foreign subsidiaries.

In addition to the requirements set out for domestic tax group system, the following conditions apply:

- The ultimate parent company must be either owned by individuals who are tax residents of Italy or listed on the Italian Stock Exchange.
- The option must be exercised for all foreign companies (under the 'all in, all out' principle).

Income for each company is apportioned in the tax consolidation based on the actual percentage of control exercised by the ultimate parent company that is an Italian tax resident.

A number of additional requirements need to be fulfilled in order for a worldwide tax consolidation to be operative, including a mandatory audit of the financial statements of all the foreign subsidiaries.

Once the election is made, it cannot be rescinded for five fiscal years.

### *Transfer pricing*
Income derived from operations with non-resident corporations which directly or indirectly control the Italian entity, are controlled by the Italian entity, or are controlled by the same corporation controlling the Italian entity have to be valued on the basis of the normal value of the goods transferred, services rendered, and services and good received, if an increase in taxable income is derived there from. Possible reductions in taxable income as a result of the normal value rule are allowed only on the basis of mutual agreement procedures or the EU Arbitration Convention.

The normal value is the average price or consideration paid for goods and services of the same or similar type, carried on at free market conditions and at the same level of commerce, at the time and place in which the goods and services were purchased or performed. For the determination of the normal value reference should be made, to the extent possible, to the price list of the provider of goods or services, and, in their absence, to the price lists issued by the chamber of commerce and to professional tariffs, taking into account usual discounts.

**Penalty protection regime with transfer pricing documentation support**

New transfer pricing rules has been issued by Italian Tax Authorities in 2010 providing for a penalty protection regime in case of transfer pricing audit provided that the tax payer has prepared proper documentation detailing the compliance of inter-company transaction to the arm's-length principle.

The new regulation applies to transactions incurred between Italian entities and non-resident entities belonging to the same group (transfer pricing rule are not applicable to domestic transactions). No specific methods have been introduced to test the arm's length of transactions; reference is made to the OECD Guidelines.

On the base of new transfer pricing regulation, taxpayers can obtain penalty protection if they provide the Italian tax authorities with:

- documentation to support the inter-company transactions drawn up in the specific format detailed in the Regulation issued by the Italian tax authorities and in Italian language. Tax authority confirmed that information in annexes (inter-company contracts and transactions diagram) can be in the English language.
- notification that documentation has been prepared and available by checking the box in the annual corporate income tax return.

The information required is based on the EU Code of Conduct for Transfer Pricing documentation.

Based on the group structure, Master File and/or Country File have to be prepared.

Italian based groups and Italian sub-groups owning non-Italian subsidiaries must produce both a Master File and a Country File. Italian subsidiaries of multinational groups need to produce a Country File only.

The sub group provisions are onerous, especially so where they relate to branches. Where a foreign entity has an Italian branch but the company itself is also a holding company, a Master File is required for the foreign entity's subgroup, even if there is no holding directly attributed to the branch.

Sub-holding companies based in Italy with at least one non-Italian subsidiary, which need to produce a Master File, may instead produce the Master File for the entire group in English. If it does not contain all the information in the Italian Regulation, they will need to supplement it.

Documentation must be signed by the Legal representative of the company and provided to the authority upon request within ten days. Also, an electronic copy must be provided at authority request.

Small and medium companies (defined as those with an annual turnover of less than EUR 50 million) need to update the economic analysis only every three years, provided that no significant change in the business occurred. Otherwise, it is necessary to update the economic analysis each year.

As the documentation provisions provide a potential benefit for Italian taxpayers (by waiving the automatic tax geared penalties that would otherwise apply to a transfer pricing adjustment), taxpayers have been given the opportunity to take advantage of this penalty protection for all open years if they file a communication that they possess documentation in the required format before they receive notification of any tax audit.

### *Thin capitalisation*

Italy no longer has thin capitalisation rules per se. Instead, net interest expense is deductible only up to an amount equal to 30% of gross operating margin *(see Interest expense in the Deductions section for more information)*.

### *Controlled foreign company (CFC) rules*

An Italian company that controls, either directly or indirectly, an entity located in a tax haven jurisdiction is required to consolidate the taxable income arising in proportion to the percentage of shareholding held, irrespective of whether the profits have been distributed or not.

Income from CFCs is taxed separately from the other taxable income of the business at the standard IRES rate (i.e. other tax losses cannot be used to offset CFC income). Foreign taxes paid by the CFCs are recoverable by way of a corresponding tax credit.

Dividends received by an Italian shareholder from a CFC are excluded from taxable income up to the amount of the taxable income attributed under the above CFC provisions. The excess of any dividends over income already included through the CFC regime is fully taxable in the hands of the shareholder.

Where companies are located in a tax haven, the CFC rules also apply for companies holding not less than the 20% of the company's share capital or entitled to not less than 20% share of the company's profits. In such instances, there are specific rules to determine the taxable income attributable to the Italian resident shareholder. The taxable income is determined by applying specific income ratios to the business assets of the CFC as they appear in the relevant accounts.

Exemption from these CFC rules can be achieved by means of an advance ruling from the Italian tax authorities. To obtain such a ruling, adequate evidence must be provided to demonstrate at least one of the following:

- The foreign company is mainly and effectively engaged in sales and/or industrial activities in the 'market' of the foreign host state or territory. Banks, other financial entities, and insurance companies must demonstrate that most of the financial resources and related proceeds are made in or the result of yields, respectively, from the market of the foreign host state or territory. However, this exemption cannot be requested where more than 50% of the income of the foreign subsidiaries is derived from 'passive income' (e.g. holding or investment in securities, receivables, or other financial assets, transfer or licence of intangible rights) or from intra-group services.
- No less than 75% of all the proceeds of the CFC have been taxed in jurisdictions that are not tax privileged countries (e.g. a company resident in Hong Kong has all of its operations in China mainland and it is subject to ordinary taxation there).

The CFC rules also extend to controlled companies that are located in a jurisdiction with a privileged tax regime that is not a tax haven, if the following conditions exist:

- The effective tax is less than 50% of the tax that would have been charged had the company been resident in Italy.

- More than 50% of revenue is derived from so-called 'passive income' or from intra-group services.

By means of an advance ruling, the Italian parent company is able to obtain an exemption from these rules if it is able to provide proper evidence that the establishment of the company in the privileged tax jurisdiction is not for tax avoidance purposes (unfair tax advantage).

## *Tax credits and incentives*

### *Foreign tax credit*

Where foreign-source income definitively is taxed abroad, a tax credit can be claimed for use against a company's IRES liability. The amount of the tax credit that can be claimed is the lower of the foreign tax incurred and the proportion of the IRES liability related to the foreign-source income. For partially exempt income (e.g. dividends), the foreign tax credit is reduced in proportion to the amount of the income taxable in Italy.

If an Italian company receives foreign income from more than one country, this limitation is applied separately to each country.

Foreign taxes borne by the foreign PE of an Italian resident company are allowed to be offset against the overall consolidated tax liability (IRES).

Any excess of foreign tax credit over the maximum amount allowed for recovery in the same tax period can be carried back or carried forward for eight years and recovered if specific conditions are met (e.g. same source country of the income, occurring because of an excess of the IRES liability related to the foreign-source income).

### *Inward investment, capital investment, and R&D investment incentives*

A number of incentives have been established to attract new industry to southern Italy and certain depressed mountain areas in central and northern Italy.

Tax credits are given to companies that increase the number of their employees and that invest in research and development.

The possibility of taking advantage of these rules, however, depends on the taxpayer fulfilling specific conditions and on the actual availability of financial resources by the Italian state. These financial resources generally are set in the annual state budget.

### *New tax regime for EU investments in Italy*

A special incentive has been introduced for the companies resident in other EU countries starting new economic activities in Italy and for their employees and staff. The possibility is to apply for three years the tax regime of EU countries in alternative to the Italian one.

The new activities need to be carried out starting from 31 May 2010 and need to be effectively performed in Italy.

The possibility to benefit from the new incentive needs to be agreed by means of an international ruling procedure with the Italian tax authorities.

Ministry of Finance shall issue a decree regulating the relevant fulfilments to the application of this new rule.

# Italy

## *Withholding taxes*

### *Withholding tax chart*

Domestic corporations paying certain types of income are required to withhold as shown on the following chart. The numbers in parentheses refer to the notes below.

| Recipient | Dividends (%) | Interest (%) | Royalties (%) |
|---|---|---|---|
| Resident corporations | 0 | 0/12.5/27 (1) | 0 |
| Resident individuals | 0/12.5 (2) | 12.5/27 (1) | 20 (3) |
| EU resident corporations | 0/1.375 (4, 5) | 0 (4) | 0 (4) |
| Swiss resident corporations | 0 (6) | 0 (6) | 0 (6) |
| Non-resident corporations and individuals: | | | |

Notes

1. Rates depend on the nature of the interest and/or of the recipient. The rates on debenture loans depend on the legal instruments adopted and the redemption period, mainly:
   - 0% applies on loan agreements and ordinary notes.
   - 12.5% on bonds if the term of the bond issue is longer than 18 months.
   - 27% if the bond issue period is shorter than 18 months.
2. 0% is applicable on dividends received by shareholders holding no less than the 20% of the sharecapital (2% in the case of listed entities), so called 'qualified investments'.
3. The rate is applicable on 75% of the gross amount of the royalty paid.
4. Pursuant to the EU Directives and provided that the requirements set forth therein are met, payments of dividends, interest, and royalties made by an Italian company to an EU resident group company can be WHT exempt. Specifically for the dividends, the minimum shareholding requirement (to benefit from this exemption) is currently equal to 10%.
5. Should the full WHT exemption not apply, 1.375% is applicable on dividends paid to EU tax residents.
6. Pursuant to the 2004 Swiss EU tax agreement and provided that the requirements contained therein are met, payments of dividends, interest, and royalties made by an Italian company to a Swiss tax resident group company can be WHT exempt.
7. Non-residents persons have the right to obtain reimbursement for up to four-ninths of the withholding effected, upon proof of the actual taxation of the dividends in the foreign country where the recipient is a resident.
8. Provided that all conditions are met, domestic tax legislation is applicable if more favourable for the taxpayer.
9. The 0% rate applies to interest paid to public bodies or any agency or instrumentality (including a financial institution) in relation to loans made in application of an agreement concluded between the governments of the contracting states.
10. The 5% rate applies to royalties arising from the use of any copyright from literary, artistic, or scientific work. The 15% rate applies in all other cases.
11. The 10% rate applies to royalties arising from the use of any copyright of literary, artistic, or scientific work. The 18% rate applies in all other cases.
12. WHT is 5% if the foreign company holds at least 10% of the capital of the Italian company (this share should be at least USD 100,000 or its equivalent in any other currency); otherwise, the rate is 10%.
13. The higher rate applies if the Austrian company directly owns more than 50% of the capital in the Italian company.
14. WHT is 10% if the foreign company holds at least 10% of the capital in the Italian company; otherwise, it is 15%.
15. The 0% rate applies to interest on public bonds. WHT is 10% if the interest is derived by a bank or any other financial institution. The 15% rate applies in all other cases.
16. WHT is 25% on royalties arising from use or the right to use trademarks. The 15% rate applies in all other cases.
17. The 5 % rate applies if the foreign company holds directly at least 25% of the capital of the company paying the dividends. Withholding is 15% in all other cases.
18. The lower rate applies to copyright royalties, excluding films.
19. In force from 1 January 2010.
20. Withholding is 18% on dividends paid by a company which is a resident of the Republic of the Ivory Coast and which is exempt from tax on its income or which is not subject to that tax at the normal rate. The 15% rate in all other cases.
21. The lower rate applies to copyright royalties, including films.
22. The 0% rate applies if the Danish company has owned directly at least 25% of the capital of the company paying the dividends for a 12 month period prior to the date the dividends are declared. Withholding is 15% in all other cases.
23. The Italian domestic rates apply as no reduction is provided under the treaty.
24. The 5% rate applies if the foreign company holds directly at least 10% of the capital of the company paying the dividends. Withholding is 15% in all other cases.

25. The 5% rate applies on royalties paid for the use of industrial, commercial, or scientific equipment. Withholding is 10% in all other cases.
26. 10% of the gross amount of the dividends if the beneficial owner is a company (other than a partnership) which holds directly more than 50% of the capital of the company paying the dividends. Withholding is 15% in all other cases.
27. Non-resident shareholding companies with more (less) than 10% of the capital of the company subject to 5% (15%) WHT.
28. The lower rate applies to interest on public bonds and trade credits, and to interest arising from the sale of equipment.
29. WHT is 5% if the company holds at least 25% of the capital of the Italian company; otherwise, it is 10%.
30. WHT is 10% if the company holds at least 25% of the capital of the Italian company; otherwise, it is 15%.
31. WHT is 5% if the company holds at least 10% of the capital of the Italian company; otherwise, it is 15%.
32. The 5% rate applies to dividends if the beneficial owner is a company which owns at least 10% of the capital of the company paying the dividends for a 12-month period ending on the date the dividend is declared. The 15% rate applies in all other cases.
33. WHT is 15% if the company holds at least 10% of the shares of the Italian company; otherwise, it is 25%.
34. The 10% rate applies on royalties in respect of payments of any kind received as a consideration for the use of, or the right to use industrial, commercial, or scientific equipment, or for information concerning industrial, commercial, or scientific experience. Withholding is 15% in all other cases.
35. WHT is 10% if the foreign company holds at least 25% of the entire voting shares in the Italian company; otherwise, it is 15%.
36. WHT is 5% if the foreign company holds directly at least 10% of the capital in the Italian company; otherwise, it is 15%.
37. The higher rate applies if the Kuwaiti resident holds 75% or more of the capital in the Italian company.
38. The 5% rate applies to royalties paid for the use of industrial, commercial, or scientific equipment. Withholding is 10% in all other cases.
39. Applicable only to companies that are not considered holding companies in Luxembourg.
40. The 5% rate applies if the Netherlands company has owned more than 50% of the voting shares in the Italian company for at least 12 months. The 10% rate applies if it has so owned more than 10%; the 15% rate applies in all other cases.
41. WHT is 5% if the foreign company holds directly at least 15% of the capital in the Italian company; otherwise, it is 10%.
42. WHT is 15% if the company holds at least 25% of the capital of the Italian company; otherwise, it is 25%.
43. The 0% rate applies to interest on public bonds. The 10% rate applies to interest on other bonds. WHT is 15% in all other cases.
44. WHT is 5% if the beneficial owner is a company that owns at least 25 % of the capital of the payer company for a period of at least 12 months preceding the date the dividends were declared; otherwise, it is 15%.
45. The 5% rate applies to dividends in the country of residence of the beneficial owner if the beneficial owner is a (joint stock) company that owned at least 25% of the capital of the distributing company for at least 12 months before the distribution. The 10% rate applies in all other cases.
46. Is applied until new double tax treaties (DTTs) with the following countries are ratified: Azerbaijan, Moldova, Kirghizstan, Tajikistan, and Turkmenistan.
47. Withholding cannot exceed 10% if the Swedish company holds at least 51% of the entire voting rights in the Italian company.
48. The lower rate applies to interest on any loan granted by a bank.
49. WHT is 15% if the company in Thailand holds at least 25% of the entire voting rights of the Italian company; otherwise, it is 20%.
50. The 0% rate applies to interest on public bonds and to interest received by an administrative subdivision or a local authority. The 10% rate applies if the interest is received by a financial institution (including an insurance company) and the enterprise paying the interest engages in an industrial undertaking. In case of a special relationship between the parties, the treaty is not applicable to the part which exceeds the amount which would have been agreed upon by the payer and the recipient in the absence of such relationship. The excess part of the payments shall remain taxable according to the law of each Contracting State.
51. WHT is 10% if the company in Trinidad and Tobago holds at least 25% of the capital of the company paying the dividends; otherwise, it is 20%.
52. The 5% rate applies to copyright royalties on literary, artistic, or scientific work. The 16% rate applies to a trademark, to cinematograph and television films, to industrial, commercial or scientific equipment. The 12% rate applies in other cases.
53. WHT is 5% if the foreign company holds at least 20% of the capital in the Italian company; otherwise, it is 15%.
54. Non-resident shareholding companies with more than 10% of the voting power are subject to 5%WHT. The 15% rate applies in all other cases.
55. The 0% rate applies if the beneficial owner of the dividends is a qualified governmental entity that holds, directly or indirectly, less than 25 % of the voting stock of the company paying the dividends.

The 5% rate applies to dividends if the beneficial owner is a company which owns at least 25% of the voting rights of the company paying the dividends for a 12-month period ending on the date the dividend is declared. The 15% rate applies in all other cases.

56. The 0% rate applies on certain categories of interest that are exempt from taxation in the source state:
    - The beneficial owner is a qualified governmental entity that holds, directly or indirectly, less than 25 % of the capital of the entity paying the interest.
    - Interest is paid with respect to debt obligations guaranteed or insured by a qualified governmental entity of either contracting state, and the recipient is the beneficial owner of the interest.
    - Interest is paid or accrued with respect to outstanding balances between enterprises for the sale of goods, merchandise, or services.
    - Interest is paid or accrued in connection with the sale on credit of industrial, commercial, or scientific equipment.

    The 10% rate is applied in all other cases.
57. The 0% WHT applies for the use of, or right to use, a copyright of literary, artistic, or scientific work (excluding royalties for computer software, motion pictures, films, tapes, or other means of reproduction used for radio or television broadcasting). The 5% rate applies for the use of, or the right to use, computer software or industrial, commercial, or scientific equipment. The 8 % rate applies in all other cases.
58. WHT is 5% if the company holds at least 70% of the capital of the Italian company. It is 10% if the company holds at least 25% of the capital of the Italian company; otherwise, it is 15%.
59. WHT is 7.5% on royalties for technical services.
60. The 0% rate applies to interest paid to the Zambian government or local authority thereof or any agency or instrumentality (including a financial institution) wholly owned by that government or local authority.

The Italian Parliament is expected to ratify tax treaties with Azerbaijan, Belgium, Canada, Cuba, Gabon, Iran, Lebanon, Moldova, Mongolia, and San Marino.

The treaties with Congo and Kenya have been ratified but have not entered into force.

Negotiations and re-negotiations have been initiated with Austria, Jamaica, India, Ireland, Liberia, Mexico, United Kingdom, and Trinidad and Tobago.

## *Tax administration*

### *Returns*

IRES and IRAP returns must be filed by the end of the ninth month following the tax year-end.

The ordinary filing deadline for WHT agent returns is 31 July for both the simplified WHT return and the ordinary WHT return.

### *Payment of taxes*

For IRES and IRAP purposes, the tax law provides for both advance payments and settlement payments. The advance payments are equal to the net tax payable for the previous tax period and are due during the tax period to which they refer. Advance payments are split into two instalments:

- 40% by the 16th day of the sixth month following the tax year-end.
- 60% by the end of the 11th month following the tax year-end.

Settlement payments are due by the 16th day of the sixth month following the tax year-end to which they refer.

Tax payments should be performed through a specific form to be electronically filed to the Tax Authorities (i.e. F24 form).

### *Offsetting of taxes*
Payables and receivables (not claimed for refund) resulting from a return regarding different taxes are allowed for off-setting within a yearly limit of EUR 516,457.90.

Starting as of 1 January 2011, the mentioned offsetting is no longer allowed if taxes definitively assessed by the Tax Authorities and not paid within the deadlines by the taxpayer are higher than EUR 1,500. In case of breach of the above limit, the law provides for a penalty of up to 50% of the undue settled amount.

### *Administrative penalties*
Failure to file a tax return results in a penalty ranging from 120% to 240% of the taxes due. Minimum penalties (ranging from EUR 258 to EUR 1,032) are applicable if no tax liability emerged in the return.

A tax return showing either a taxable income lower than the one assessed or a tax credit higher than those owed to the taxpayer (i.e. an untrue tax return) results in a penalty ranging from 100% to 200% of the higher taxes ultimately due.

Omitted and/or late payments of taxes of whichever kind and nature result in a penalty equal to 30% of the unpaid/late paid tax.

Special rules apply where similar violations are repeated over various years.

### *Software based tax controls (so-called 'Studi di settore')*
The Italian Tax law provides for special tax control procedures for those enterprises whose total turnover does not exceed EUR 7.5m (EUR 5.16m up to fiscal year 2006). The controls, so-called 'Studi di Settore', are based on standardized economic models of the different business fields and are aimed at assessing whether or not a specific subject's taxable income is in line with its own standard model (on statistical basis).

A higher possibility of undergoing tax audit should be considered for entities not meeting such standard model.

### *Statute of limitations*
The Italian tax authorities are entitled to make an assessment in relation to direct taxes (IRES and IRAP), VAT, and WHT returns up to the end of the fourth calendar year following the year in which the tax return was filed. Under certain circumstances (e.g. no return filed or fraud giving rise to criminal law penalties) the above deadlines may be extended.

Tax disputes can be settled by accepting all the issues raised in the tax auditor's report without any challenge and by paying the related tax and reduced penalties. A number of other options to avoid tax litigation are provided for by law.

Administrative checks on tax returns may be carried out within the year following that in which the tax return has been filed for larger companies having a yearly turnover in excess of EUR 300 million (turnover to be progressively decreased to EUR 100 million).

With limited exceptions, corporations that usually are repeatedly in tax loss position should be subject to specific controls.

## Other issues

### Adoption of IFRS and taxation

The Italian tax law provides for two basic principles and some specific rules for taxation of a company adopting International Accounting Standards (IAS)/IFRS in the statutory financial statements:

- Derivation principle ('Principio della Derivazione'): the taxable base of companies is determined starting from the net income arising from the profit and loss, increased or decreased by items directly booked to equity pursuant to the application of IAS/IFRS. To such 'rectified' income the general tax adjustments set forth by the Corporate Income Tax Law apply. In this respect, as exception to the general tax criteria, the accrual principle, and the qualification and classification criteria stated by the IFRS are relevant for the calculation of the taxable base.
- Neutrality principle ('Principio della Neutralità'): such principle aims to neutralise the effects deriving from the movement to IAS/IFRS (First Time Adoption – FTA). Conversely, such principle does not grant an equal treatment for companies adopting or not IAS/IFRS (in fact, specific rules are applicable only to IAS/IFRS adopters, e.g. taxation of dividend on held for trading securities, derivatives).

The following specific rules applicable to IAS adopters must be considered:

- Adjustments or recognitions of transactions made in equity are relevant for tax purposes, to the extent that such items are in compliance with general tax principles.
- For equity instruments, the legal classification is prevailing over the accounting one (debt vs. equity classification).
- Under certain conditions, unrealised profits and losses recognised in the profit and loss become taxable and deductible (e.g. fair value on securities other than available for sale, held to maturity, and participations; on derivatives transactions not concluded for hedging reasons);
- The tax treatment of the transactions between IFRS adopters and non-IFRS adopters, in relation to operations concluded between an IFRS adopter and a non-IFRS adopter, is based on the accounting principle adopted by each company (e.g. financial leasing).
- Depreciation and amortisation are permitted within the rates provided by the tax rules, independently by the amounts booked. In this respect, the abolition of the imperative systematic depreciation of the goodwill and its substitution by the goodwill's review for impairment does not affect the tax deduction of the goodwill amortisation that should be made solely for tax purposes.

## Significant developments

There have been no significant corporate tax developments in the Ivory Coast (Côte d'Ivoire) during the past year.

## Taxes on corporate income

Tax on industrial and commercial profits in Côte d'Ivoire is levied at 25%, subject to a minimum tax. The minimum tax is based on total turnover and is calculated at the rate of 0.5% (banking activities, 0.15%; oil companies, 0.10%), with a minimum of 2 million Communaute Financiere Africaine francs (XOF) and a maximum of XOF 30 million.

## Corporate residence

In Côte d'Ivoire, companies are considered resident in tax jurisdictions where they have a registered fixed establishment.

## Other taxes

### Value-added tax (VAT)

VAT is a non-cumulative tax levied on the sale of goods and services at the rate of 18%. Subject to certain restrictions, VAT is recoverable. The rate is reduced to 9% for milk and pasta products which contain 100% durum wheat semolina.

### Real estate tax

A real estate tax is imposed at the following rates:

- 1.5% for the undeveloped lands.
- 4% on land revenue.
- 11% on the developed land or 15% when the built property is used by the company itself. The rate is reduced to 4% for unoccupied buildings.

In the case of the transfer of property through a direct sale, taxes are assessed at the following rates:

- 10% for lease transfers.
- 10% or 7.5% for the sale of real estate.
- 10% for the sale of businesses.

### Advance payment of property tax
Property owners are required to withhold 15% of rentals, payable on the 15th day of each month to the tax authorities. This is an advance payment on the annual real estate tax by the owner of the estate property.

### Stamp duty
A direct tax is paid for any document subject to a registration procedure, for an acknowledgment of a cash payment, and for bills of exchange.

### Tax on banking operations
A cumulative tax of 10% is levied on bank services rendered.

### Special tax for equipment
A tax of 0.08% is calculated on the total turnover and is paid monthly.

### Business franchise tax
The business franchise tax includes a turnover tax and a proportional tax. The turnover tax is calculated on the turnover at the rate of 0.5% with a maximum of XOF 3 million and a minimum of XOF 300,000. The proportional tax is based on the rental value of the professional office location (based on general office rents). The rate is 18.5%.

### Payroll tax
Taxes are levied at the rates of 2.8% for local employees and 12% for expatriate employees on the total taxable remuneration, including salaries, benefits, and benefits in-kind.

### Registration taxes
Registration of capital contributions is taxed, whether the capital or increase in capital is made in cash or in-kind. The rate is 0.6% for contributions up to XOF 5 billion and 0.2% for contributions over XOF 5 billion, with a minimum of XOF 18,000. Increases in capital by incorporation of reserves are taxed at 6%.

In the event of a capital increase through a merger, the increase in the share capital of the acquiring company is taxed at half the rate, 0.3% for amounts up to XOF 5 billion and 0.1% for amounts over XOF 5 billion.

### Tax on insurance premiums
Insurance premiums are subject to tax as follows:

| Policy type | Rate (%) |
|---|---|
| Marine policies | 7.0 |
| Life policies | Exempted when contract's duration is more than three years |
| Fire policies | 25.0 |
| Health policies | 8.0 |
| Export credit insurance | 0.1 |
| Other (e.g. personal liability, transportation) | 14.5 |

Premiums paid under commercial shipping insurance policies for maritime risks are exempt. The tax may be paid by the insurance company, its agent, or the subscriber, in cases where the subscriber had to pay the premium to a foreign insurance company.

### *Social security contributions*
Employers must contribute to the social security system (CNPS) at the following rates:

| Contribution | Rate (%) | Monthly ceiling (XOF) |
|---|---|---|
| Family allowance | 5.75 | 70,000 |
| Work injury | 2.0 to 5.0 | 70,000 |
| Retirement pension | 4.8 | 1,647,315 |

### *Tax for national reconstruction*
The tax for national reconstruction was eliminated in May 2009.

### *Withholding tax (WHT) on public contracts*
Any payment made by government bodies or public institutions for a contract for goods or services is subject to a 10% WHT, except the companies registered at the Directorate of Large Companies (Direction des Grandes Entreprises), with a minimum turnover over XOF 1 billion. The tax is recoverable and may be applied to VAT and to income taxes due and withheld by employers. Contractors who do not have a permanent establishment in Côte d'Ivoire are not subject to this tax. Surplus tax payments and tax credits are refundable.

### *WHT on small size businesses*
The FY2010 financial law has created a 5% WHT on the remunerations paid to individual service providers registered under the standard tax regimes for small size companies.

### *Contributions for the end of the crisis*
This is a tax enforced by FY2010 fiscal law. It is calculated at a rate of 3% on some expenses of entities which have XOF 1 billion or more in turnover. The annual amount of the tax due is capped at XOF 150 million, as per discussions with the government.

This tax was not renewed.

## *Branch income*

The tax rate for branch income is the same as that for corporate income. After-tax branch earnings are subject to a 12% tax (Impôt sur le revenu des valeurs mobilières or IRVM) calculated on 50% of the taxable profit. This is analogous to the WHT on dividends.

## *Income determination*

### *Inventory valuation*
Inventory is generally stated at the lower of cost or market value. Last in first out (LIFO) and first in first out (FIFO) are permitted. Book and tax conformity is required.

### *Capital gains*
Capital gains are normally taxed at full corporate rates. However, the tax on capital gains, exclusive of recaptured depreciation, can be deferred if the gain is reinvested within three years.

### *Inter-company dividends*
Inter-company dividends are included in taxable income at 50% of the net amount received (after 12% WHT). The exemption is increased to 95% for dividends received from a subsidiary if a parent company domiciled in Côte d'Ivoire owns 10% of the subsidiary.

### *Stock dividends*
Stock dividends are unusual, but in the event they are declared, they are not taxable to the recipient.

### *Other significant items*
Interest from loans and dividends is brought into taxable income at 50% of the net amount earned by the company. Dividends derived from subsidiaries are brought into taxable income at 5% of the net income earned.

### *Foreign income*
Resident corporations are taxed on their worldwide income, except for profits derived from business conducted through a permanent establishment (PE) outside Côte d'Ivoire. Since income derived from business conducted outside Côte d'Ivoire is not taxable, no tax credit is allowed. Interest and dividends from foreign sources are entitled to certain deductions to alleviate instances of double taxation. Subject to provisions of tax treaties, no deductions or tax credits are allowed for revenue from royalties and services.

## *Deductions*

### *Depreciation and depletion*
Depreciation is generally computed on a straight-line basis over the useful life of the asset (buildings, 20 years; automobiles, three years). Accelerated depreciation is sometimes permitted for machinery. The following depreciation rates are generally accepted for tax purposes:

| Assets | Rate (%) |
|---|---|
| Buildings | 5 |
| Machinery, equipment (rate depending on equipment) | 20, 10, 8 |
| Office furniture | 10 |
| Office equipment | 20 |
| Vehicles | 33.3 |
| Computing equipment | 20 to 50 |

A time coefficient is applied to the rate of depreciation to obtain the declining balance. Depreciation rates may be amended, but only after agreement with the tax authorities.

New plants and equipment may be depreciated at twice the normal rate in the first year of use, provided they are depreciated over at least six years. Under certain circumstances, buildings used for staff housing may be depreciated at 40% of cost in the first year. Annual depreciation must be booked to preserve tax deductibility. The whole or any part of the annual charge can then be deferred in annual accounts for fiscal years showing a tax loss. Recaptured depreciation is taxed at full rates. Tax and book conformity is obligatory.

Depletion allowances as such do not exist, but tax incentives are available for exploration to replace depleted natural reserves.

### *Other significant items*
In respect to legal reserves, 10% of net profit must be transferred to a reserve for legal fees until the reserve equals 5% of the paid-up share capital.

To be tax deductible, provisions must relate to existing liability or loss. General reserves are not deductible.

Interest paid to shareholders may be deducted. The maximum interest rate allowed is related to the Banque Central des Etats de l'Afrique de l'Ouest (BCEAO) rate plus three points. The reimbursement of the loan must take place in the five years following the loan.

Fines and third party taxes borne by corporations are not tax deductible.

### *Net operating losses*
Losses may be carried forward five years. Losses derived from depreciation can be carried forward indefinitely.

### *Payments to foreign affiliates*
Reasonable royalties, interest, and management and service fees paid to foreign parent companies are tax deductible. However, the deductions should not exceed 5% of the turnover and 20% of the overhead. Otherwise, the portion exceeding the ceiling is not tax deductible. The onus is on the taxpayer to prove that expenses are justified and reflect real transactions.

## *Group taxation*

Group taxation is not permitted.

## *Tax credits and incentives*

### *Inward investment*
Investment Law No. 95-620 of 3 August 1995 divides the country into two investment zones, offering incentives for up to five or eight years in each area.

The Investment Code provides for 100% tax exemption during the first three or six years (depending on the nature of the activity and the zone), then 50% and 25% progressively for the last two years of exemption. Exemption periods may be extended to complete a scheduled investment program.

Incentives are divided into two programs: 'prior declaration' for investments of less than XOF 500 million that create new activity and 'prior agreement' for investments of XOF 500 million or more that create new activity or develop an existing activity. Both programs are handled by the Centre de Promotion des Investissements en Côte d'Ivoire (CEPICI) and are open to all sectors except trade, public works, building construction, transportation, banking, and insurance.

Prior declaration investments may be exempt from tax on corporate income and the business franchise tax. Prior agreement investments benefit from exemptions varying with the size and nature of the project as follows:

- Creating a new enterprise or a new activity in an existing enterprise:
  - Investments of XOF 500 million to XOF 2 billion may be exempt from tax on corporate income, business franchise tax, import duties, and taxes (with the exception of a 5% tax on machinery, equipment, and spare parts).
  - Investments of more than XOF 2 billion may be exempt from property tax, in addition to the above.
- Developing an existing activity:
  - Investments of at least XOF 500 million may be exempt from import duties and taxes (with the exception of a 5% tax on machinery, equipment, and spare parts).

These incentives may not be combined with sector-specific investment programs, such as those for mining and hydrocarbons.

***Capital investment***
With prior approval of the tax authorities and varying with geographical location, 35% to 40% of the total investment in fixed assets related to commercial, industrial, or agricultural activity may be deducted from taxable income. The deduction is limited to 50% of taxable profits. The balance of deduction of the first year may be carried forward over the three following years.

***Export incentives***
No VAT is levied on export sales.

Sales and provisions of services made to export companies, which process certain farm products (i.e. cocoa, coffee, banana, hevea, and palm tree oil) and realise at least 70% of their turnover from exports, are free from VAT. The exemption is granted for the purpose of avoiding new cases of VAT credits in this line of business.

***Export incentives - mining industry***
During the exploration phase, investments may be exempt from payroll tax, VAT on goods and services, additional tax (on the sale of goods) on imports and purchases, all import taxes and duties including VAT on materials, machines, and equipment used in research activities, and half of the registration duties applicable to in-kind or cash share-capital contributions.

During the production phase, mining activities may have a five-year exemption from corporate income tax and relief from all import duties, including VAT on recovered investments required for exploitation. In addition, they may be granted temporary admission of machines and equipment that facilitate research and exploitation. A tax on profit is levied as soon as investment funds are recovered. Mining enterprises may not combine these incentives with those of the Investment Code.

***Export incentives - petroleum service contractors***
A special and optional tax treatment applies to petroleum service contractors that meet established criteria. Corporate tax, distribution tax, payroll tax, income tax on salaries, and the tax on insurance premiums are calculated on the turnover of the contractor. The total taxes represent 5.636% of turnover. Standard rates apply for business franchise tax and social security contributions for local personnel. The exemption from customs duties and VAT for oil companies is extended to petroleum service contractors.

## *Withholding taxes*

Withholding taxes (WHT) are levied as follows.

- Impôt sur le revenu des valeurs mobilières (IRVM): 12% or 18% on dividends and directors' fees.
- Impôt sur le revenue des créances (IRC): 18% on interest payments, reduced to 13.5% (individuals) and 16.5% (businesses) on bank deposit interest. Foreign banks are subject to 18% tax on loan interest or 9% on equipment loans with minimum three-year terms.
- Impôt sur les benefices non commerciaux (BNC): 25% of 80% of revenues on royalties, license fees, and management and service fees paid by Ivorian companies to foreign companies (effective rate: 20% of net amount paid). Treaties with Belgium, Canada, France, Germany, Italy, Norway, Switzerland, and the United Kingdom provide a maximum BNC rate of 10% on royalties and management fees. The tax treaty between the member states of West African Economic and Monetary Union (UEMOA) provides a maximum BNC rate of 15%.
- Interest on certificates of deposit (bons de caisse): 25%.

## *Tax administration*

### *Returns*

Companies are required by law to have a 31 December fiscal year-end. The corporate income tax due is returned together with annual financial statements according to local generally accepted accounting principles. The deadline for the filing is 30 April for entities with more than XOF 1 billion turnover, 30 May for entities with less than XOF 1 billion turnover, and 30 June for the entities under the Synthetic tax regime.

### *Payment of tax*

Tax withheld must be rendered to the tax authorities by the 15th day of each month. Other taxes are rendered on varying dates.

## Significant developments

### Dividends

Major changes were made to the rules governing the taxation of ordinary and preference dividends. Historically, persons in receipt of dividends (whether ordinary or preference) derived from a company listed on the Jamaica Stock Exchange (JSE) were subject to tax at the rate of 0% on such dividend income. As of 1 January 2009, ordinary dividends paid to Jamaican tax residents from resident companies (whether or not they are listed on the JSE) are also taxed at a zero rate. However, preference dividends that qualify as tax deductible expenses of the paying company *(see below)* are taxable in the hands of the recipient, whether or not the shares on which they are paid are listed on the JSE. This tax-free treatment does not extend to non-resident shareholders in receipt of dividends from resident companies, and, accordingly, all dividends paid to non-resident shareholders are now subject to income tax thereon at the default rate of 33 1/3% in the case of a company and 25% in the case of an individual (subject to any treaty protection or incentive relief available).

Subject to certain conditions being met, a company may claim an income tax deduction in respect of preference dividends paid during the year of assessment. However, to the extent that these preference dividends do not qualify for this income tax deduction, they will be treated in a similar manner to ordinary dividends, as indicated above.

### Increase in special capital allowances

As part of a stimulus package, Jamaica increased the special capital allowances available for capital expenditure on certain machinery procured by the owner/operator of a 'qualifying business' from 50% to 100% of the capital expenditure. This new rate became effective on 1 January 2009, and the operator should secure approval in order to claim allowances at this rate.

### Increase in the general consumption tax (GCT) rate

The GCT rate was increased from 16.5% to 17.5% as of 1 January 2010. This new rate applies generally to all goods and services taxable at the standard rate. The rate of 25% applies to the provision of telephone services and handsets.

### Imposition of GCT on electricity consumption

Prior to 2010, the supply of electricity to the public was exempt from GCT. The following measures now apply to the consumption of electricity both by residential and commercial users:

- Supplies of electricity to residential customers up to 200 KwH per month are zero-rated for GCT purposes.
- Supplies of electricity to residential customers (in excess of 200 KwH per month) and to commercial or industrial consumers are subject to GCT at the rate of 10%.

### *Enhanced benefits under the Urban Renewal (Tax Relief) Act*

Amendments were made to the Urban Renewal (Tax Relief) Act in December 2010, which provide improved benefits to persons approved under the Act. The changes include an increased tax credit of 33 1/3% (up from 25%) of expenditure on capital improvement works in a designated special development area (e.g. Downtown Kingston). In addition, lessees of the improved properties who satisfy certain criteria are now able to claim a tax deduction of double the rental paid.

### *Recent tax policy reform measures*

The following measures were announced by the Minister of Finance & Planning in the 2011/2012 budget speech and became effective in May 2011:

#### Recovery of GCT on capital equipment

GCT registered taxpayers who incur GCT on the acquisition of machinery or equipment costing more than 100,000 Jamaican dollars (JMD) for the purpose of their taxable activity are now able to claim this GCT by way of input tax credit over a three month period instead of over a 24 month period.

#### Carryforward of contractors levy

Previously, contractors who suffered the 2% contractors levy on receipts could claim a credit against their income tax liability only in the year of assessment in which the levy is deducted. As of the financial year 2011/2012, where the levy is deducted from the contract sum and remitted to the Collector of Taxes, any amount not utilised as a credit against income tax for that year of assessment may be carried forward to subsequent years of assessment, not exceeding five years. Previously, there was no provision to carry forward any levy credit not utilized.

#### Revision of import duty structure on motor vehicles

The rates of Common External Tariff applicable to several types of motor vehicles were reduced as of 2 May 2011. This includes sports utility vehicles, vehicles referred to as pick-ups, certain motor cycles, and all-terrain vehicles.

#### Tax administration

A series of administrative reforms aimed at enhancing the efficiency and effectiveness of Jamaica's tax regime have been implemented. As of 1 May 2011, the Inland Revenue Department, the Taxpayer Audit & Assessment Department, and the Tax Administration Services Department were merged into a single department called Tax Administration Jamaica. Jamaica Customs was separated and is being transitioned into an Executive Agency. Additionally, the Taxpayer Appeals Department has become a Revenue Appeals Division of the Ministry of Finance, the objective being to ensure that the reporting structure in relation to assessments and appeals is separated.

#### Other reform measures

Other reform measures included the removal of transfer tax and stamp duty on securities and a reduction in stamp duty on the refinancing and transfer of mortgages.

## *Taxes on corporate income*

Income tax at a rate of 33 1/3% is payable by most corporations, including Jamaican branches of foreign corporations.

Building societies (similar to savings and loans) are taxed at the rate of 30% on their profits.

Life insurance companies are taxed at 15% on their 'investment income' net of 'management expenses' both terms of which are defined by the Income Tax Act. Additionally, 'regionalised' life insurance companies pay income tax on gross premiums at the rate of 3% while others pay at the rate of 4%.

The income of certain organisations is specifically exempt from income tax. These include pension and superannuation funds and charitable organisations approved by the Commissioner General of Tax Administration Jamaica.

There are no other local taxes on corporate income.

## *Corporate residence*

A corporation, wherever incorporated, is resident in Jamaica if the central management and control of its business is exercised in Jamaica. Normally, this is the case if meetings of directors and shareholders are held in Jamaica and major policy decisions of the corporation are made in Jamaica.

## *Other taxes*

### *Consumption taxes, custom duties*

The general consumption tax (GCT) is a value-added tax (VAT). The standard rate is 17.5%. Higher rates are applicable to some goods and services (tobacco products, liquor, motor vehicles, fuels, and telephone charges).

The list of items and services exempt from GCT includes a wide range of basic food items, medical supplies, and other items. Certain specified drugs, as well as other items and services, are zero-rated.

GCT is also charged on imported services. Where a taxable activity consists of imported services from a person who is not resident in Jamaica, the recipient of those services is deemed to be the registered taxpayer and pays the tax chargeable on the service. This may be available as a credit in some cases against the tax payable by the recipient of the service.

Lower rates are applicable to hotels and other businesses in the tourism sector, which are taxed at an effective rate of approximately 10% as of 1 April 2010, rather than the standard rate of 17.5%.

In addition to normal customs duties, a user fee of 2% and an environmental levy of 0.5% are imposed on the value of imports. Also, effective 1 January 2010, an additional 5% GCT is levied on the commercial importation of goods subject to GCT. Certain categories of imports are however excluded from this advance GCT charge.

### *Annual fee*

A fee ranging from JMD 1,000 to JMD 35,000 is payable on or before 1 September, depending on the aggregate value of the company's assets. The minimum fee is payable where the aggregate value of the assets is less than JMD 50,000, and the maximum fee is payable where the aggregate value of the assets is greater than JMD 100 million.

### *Real estate tax*
All land in Jamaica is valued on the 'site value' or 'unimproved value'. Owners of properties valued at JMD 300,000 or less pay a flat rate of JMD 600. Tax is payable at a rate of 0.75% where the property exceeds this value, in addition to the flat rate. These new rates became effective in April 2010.

### *Construction operations levy*
A levy of 2% of the gross amount is payable on contracts relating to construction and tillage operations. The contractors levy is in the nature of tax withheld at source and must be deducted by the taxpayer from the gross payment for the construction or tillage operations and paid to the Collector of Taxes within 14 days of the month in which the gross payments are made.

The levy paid is allowable as a credit against the income tax liability of the contractor.

## *Branch income*

Branch income is taxed at the same rate as that of local corporations and on a similar basis. The transfer of profits to the head office is subject to a withholding tax (WHT) of 33 1/3% or at a lower treaty rate, where applicable.

A branch operation, irrespective of the nature of its business activities, is subject to Jamaican tax on income derived from the island and elsewhere to the extent remitted to the island. In computing the income for tax purposes, expenses incurred outside of Jamaica, wholly and exclusively for the purpose of the branch's trade are deductible, including a reasonable proportion of head office expenses.

Transactions between the branch, its head office, and affiliates should be at arm's-length values.

## *Income determination*

### *Inventory valuation*
Inventories are valued at the lower of cost or market value. The Commissioner General has made no pronouncement, but last in first out (LIFO) is not generally permitted.

Any method of valuation that accords with standard accounting practice is acceptable for tax purposes, provided it is consistently applied at the beginning and end of the accounting period and it is not in contravention of the Income Tax Act.

### *Capital gains*
There is no tax on capital gains. There is, however, a transfer tax of 4% of the market value of the asset transferred (limited to 37.5% of the capital gain payable) on the transfer of land, buildings, securities, and shares. There is also stamp duty of 1% payable on the transfer/disposal of shares, and 3% for real property sold/transferred. Transactions on the Jamaica Stock Exchange are exempt from both transfer tax and stamp duty.

### *Inter-company dividends*
Inter-company (ordinary) dividends paid out of profits of a company resident in Jamaica to a shareholder resident in Jamaica can be paid without further tax.

Income tax is withheld at source on dividends paid to a non-resident shareholder. Such dividends are taxed at the rate of 33 1/3% and 25% if paid to corporations and individuals, respectively. Lower rates of withholding are possible provided that the recipient is resident in a country that has concluded a double taxation agreement with Jamaica.

### *Stock dividends*
Stocks issued by way of the capitalization of retained earnings (referred to as 'bonus issues') do not create a taxable distribution in the hands of the shareholders.

### *Foreign income*
A resident corporation is taxable on its worldwide income. Avoidance of double taxation is achieved by credits under tax treaties or, in the case of most Commonwealth countries, under the general Income Tax Act itself. Where recourse cannot be had to either of these, partial relief is granted by a deduction against income for the foreign tax.

## *Deductions*

### *Depreciation and depletion*
Depreciation is generally computed on the reducing balance basis over the useful life of the asset at specified rates. An election may be made for machinery and equipment to be depreciated at higher rates on the straight-line basis. Provision also exists for increased depreciation on machinery and equipment used for more than one shift in certain qualifying industries.

Capital gains on depreciable property are not taxed. However, a recharge limited to the extent of the depreciation allowed (balancing charge) is taxable.

Machinery and plant acquired by a 'qualifying business' may be depreciated over one year instead of the estimated useful life of the asset. A qualifying business is one so designated by the Ministry of Industry, Investment & Commerce.

Tax depreciation may not conform to book depreciation.

### *Charitable contributions*
Approved donations (not exceeding 5% of taxable income) to certain qualified charities and educational institutions are deductible.

### *Real estate taxes*
Taxes on real estate from which income is derived are deductible.

### *Net operating losses*
Losses incurred may be carried forward indefinitely until fully utilised. There are provisions designed to disallow the deduction of such losses where the company that has accumulated them is sold under certain circumstances.

### *Payments to foreign affiliates*
Royalties, management fees, and interest charges paid to foreign affiliates are deductible to the extent that these payments are made at arm's-length rates. WHT should be paid in respect of such services, normally at 33 1/3% where payment is to a company and 25% in the case of individuals, unless a lower rate is provided for under

a treaty. Furthermore, interest paid to non-residents is not deductible until the WHT is remitted.

## *Group taxation*

Group taxation is not permitted in Jamaica.

## *Tax credits and incentives*

A number of incentive laws grant approved industries relief from taxation for a specified number of years. The capital may be either derived from local or foreign sources. Tax relief is given to resident shareholders on dividends paid out of tax-free profits. Relief to non-resident shareholders is generally limited to the applicable foreign tax rate.

Specific incentives are set out under the following acts:

- The Export Industry (Encouragement) Act.
- The Industrial Incentives Act.
- The Industrial Incentives (Factory Construction) Act.
- The Jamaica Export Free Zones Act.
- The Hotel Incentives Act.
- The Resort Cottages Incentives Act.
- The International Finance Companies (Income Tax Relief) Act.
- The Income Tax Act (Agricultural & Venture Capital Incentives).
- The Urban Renewal (Tax Relief) Act.
- The Motion Picture Encouragement Act.
- The Shipping Act.
- The Factory Construction Act.

The incentives offered under the Industrial Incentives Act, the Export Industry (Encouragement) Act, and those available for the production of goods under the Jamaica Export Free Zones Act are to be phased out, given Jamaica's commitments under the World Trade Organisation (WTO) agreement. This was expected to have been phased out by 1 January 2003. An extension of time has been granted for implementation until the end of 2015, with a two year phase-out period.

The Urban Renewal (Tax Relief) Act provides tax incentives to persons approved under the Act in connection with undertaking programmes of development in areas designated as special development areas, with a view to improving or restoring them. The tax incentive provides certain tax benefits, including relief from income tax on rental income and interest earned by an investor in an Urban Renewal Bond. There is also exemption from stamp duty and transfer tax on the transfers of property.

*See the Deductions section for depreciation incentives available in the Income Tax Act.*
In addition to the aforementioned incentives, certain qualifying industries are able to write off, over a period of time, 120% of the cost of machinery and equipment, excluding private motor vehicles.

Non-residents who place deposits with Jamaican banks can earn interest free of Jamaican tax in certain circumstances. The deposits may be designated in hard currency or Jamaican dollars.

Certain tax benefits accrue to employees and employers in respect of contributions made to an approved Employee Share Ownership Plan (ESOP) as well as the allocation of shares from such plans.

## *Withholding taxes*

The Jamaican Income Tax Act refers to deduction at source and not to withholding. The following references are to deduction at source. If it is proved that this exceeds the tax actually payable, refunds are made.

'Prescribed Persons', primarily financial institutions, are required to withhold tax at source at a rate of 25% on interest income earned on investment instruments (subject to any lower rate as prescribed in a double taxation treaty). The Income Tax Act has been amended to provide a wider definition of the term 'interest'. 'Prescribed persons' as defined, include the Accountant General; banks operating under the Banking Act or the Bank of Jamaica Act; institutions operating under the Financial Institutions Act; building societies; societies registered under the Industrial and Provident Societies Act, unless certain conditions are met; the Ministry of Finance & the Public Service; life insurance companies; companies registered under the Companies Act in which the government or an agency of the government holds more than 50% of the ordinary shares and which issues interest bearing securities; issuers of commercial paper; unit trust management companies; and any person who is connected with any of the persons mentioned above (with the exception of the Accountant General).

Generally, all WHTs, including taxes withheld from dividend, interest, royalties, and fees must be remitted to the Inland Revenue Department within 14 days of the end of the month in which the payment is made.

| | Dividends | | | | |

| Recipient | Dividends: Portfolio (%) | Dividends: Substantial holdings (%) | Interest (%) (1) | Royalties (%) | Management fees (%) |
|---|---|---|---|---|---|
| United States | 15 (5, 6) | 10 (5) | 12.5 | 10 | $33^{1/3}$ (9) |

Notes

1. No WHT is applicable where the interest is paid by a local bank or financial institution to an approved overseas organisation, that is, a foreign bank or financial institution to an approved overseas organisation approved by the Ministry of Finance & the Public Service.
2. Tax is withheld at the rate of 0% as of 1 January 2010 where an ordinary dividend is paid by a company resident in Jamaica to a resident shareholder.
3. Tax is deducted from interest paid to Jamaican residents if payment is made by a prescribed person.
4. Rates apply only to specified member states.
5. The lower treaty rates do not apply if the recipient has a permanent establishment in the other territory that is 'effectively connected' with the company paying the dividend.
6. A rate of 15% applies to an individual regardless of shareholding.
7. Reduced to 10% if received by a bank recognised as a banking institution under the laws of that state.
8. A rate of 22.5% applies to an individual regardless of the shareholding.
9. Nil in the absence of a permanent establishment.

A WHT rate of 25% is required to be applied in respect of interest paid or credited by prescribed persons. However, certain categories of interest income earned on long-term savings accounts (LSAs) were made exempt from tax including:

- Interest paid or credited in respect of investments or deposits made by individuals with prescribed persons if:
  - The deposit remains a minimum of five years without any withdrawal from the principal sum invested.
  - The deposit or investment (other than interest accrued or credited) does not exceed JMD 1 million dollars in any year.
  - The account is not transferable, except on the death or bankruptcy of the depositor or investor.
  - Not more than 75% of the interest accrued in any year is withdrawn during the year.
- Benefits derived from investments in certain life insurance policies may also be exempt from income tax if specified criteria are satisfied.

## *Tax administration*

Jamaica has established the following departments to handle tax administration:

- The recently formed Tax Administration Jamaica (TAJ) integrates the functions which were previously undertaken by a number of different departments. These functions include compliance and tax collection, administrative and legal support, audit and assessment of income tax, general consumption tax, stamp duty, and transfer tax. The Commissioner General has responsibility for the direction, supervision, and administration of TAJ and is supported in undertaking this role by several Deputy Commissioners General.
- The former Taxpayer Appeals Department (TAD), which recently became a Revenue Appeals Division of the Ministry of Finance processes appeals to decisions made by TAJ.
- Jamaica Customs administers taxes at the port of entry.

There is also a Financial Investigations Division in the Ministry of Finance which investigates customs breaches and fraudulent acts in respect of tax legislation.

### Returns

A corporation is subject to tax on its income for a calendar year. However, where the Commissioner General of TAJ is satisfied that a corporation normally prepares financial statements to a date other than 31 December, the company may be permitted to use the profits of its own financial year rather than the calendar year as the basis of assessment.

Income tax returns are due for filing by 15 March in the year following the year of assessment.

### Payment of tax

The balance of income tax payable for a taxation year, after deduction of the instalments of estimated tax, is due on 15 March of the following year. It is the corporation's responsibility to determine the liability and settle it with the tax authorities.

Quarterly instalments are based on an estimate of the year's liability or the actual tax payable for the previous year.

## Other issues

### Corporation tax calculation - Calendar year 2011

| **Net profit before taxation** | | **JMD 10,000,000** |
|---|---|---|
| **Add:** | | |
| Depreciation charged in the financial statements | 500,000 | |
| Interest payable, 2011 – accrued (1) | 20,000 | |
| Donations not approved | 15,000 | |
| Subscriptions disallowable | 5,000 | |
| Interest for late payment of income tax | 4,000 | |
| Legal fees re increase in share capital | 21,000 | |
| Bad debts – increase in general provision (2) | 150,000 | |
| Loss on sale of fixed assets | 5,000 | |
| Balancing charge (3) | 7,500 | |
| Capital expenditure charged in the financial statements | 22,500 | 750,000 |
| | | 10,750,000 |
| **Less:** | | |
| Interest payable, 2010 – now paid (1) | 15,000 | |
| Interest receivable, 2011 – accrued (1) | 7,000 | |
| Losses carried forward from year of assessment 2010 | 40,000 | |
| Capital allowances (4) | 455,000 | 517,000 |
| Taxable income | | 10,233,000 |
| Income tax payable at 33 1/3% | | 3,411,000 |
| **Less:** | | |
| Estimated (advance) tax payments | 2,400,000 | |
| Foreign tax credit | 11,000 | |
| Tax deducted from local bank interest | 25,000 | (2,436,000) |
| Net tax payable by 15 March 2012 | | 975,000 |

Notes

1. Interest paid/received is dealt with on the cash basis, hence the adjustments for the amount receivable/payable.
2. Reserve for specific bad debts is allowed.
3. Recapture of excess tax depreciation is allowed.
4. Tax depreciation is granted in lieu of book depreciation.

## Significant developments

The 2011 tax reform bill was submitted to the Lower House of the Diet on 25 January 2011. However, discussion of the bill is currently suspended. Normally, the tax reform bill is passed by both houses of the Diet by the end of March and the amended tax laws become effective from April 1. As the 2011 tax reform bill was not passed by 31 March 2011, the Transitional Tax Reform Laws (to extend the expiration dates of certain concessions granted under the Special Measures Law and the Local Tax Law from 31 March 2011 to 30 June 2011) was passed on 30 March 2011. Pursuant to the Transitional Tax Reform Laws, the applicable period for certain tax concessions, including the reduced corporation tax rate for small and medium enterprises (SMEs) and additional research and development (R&D) tax credits, are extended.

The main changes in the Japanese corporate tax system for 2010 were as follows:

- A new group taxation regime was introduced for domestic companies which are wholly owned by a domestic company, foreign company, or individual ('group companies'). Under this regime, the recognition of capital gains or losses from the transfer of certain assets between group companies is deferred until the asset is transferred to a non-group company (on or after 1 October 2010). A group company that would otherwise qualify as a SME on a stand-alone basis is not eligible for the aforementioned benefits (e.g. reduced corporate tax rate, preferable allowable ratios for deductible portion of bad debt provisions, partial deductibility of entertainment expenses, carry back of tax losses) if the parent company of the group has paid-in capital of 500 million yen (JPY) or more.
- Several consolidated tax rules were amended. The most significant amendment relates to pre-consolidation tax losses of a subsidiary, which can now be carried forward into a consolidated tax group but may only be offset against taxable income of the subsidiary.
- Anti-tax haven (controlled foreign company or CFC) rules were amended as follows:
  - The minimum effective tax rate for applying this rule was lowered from 25% to 20%.
  - The stock ownership threshold which a taxpayer is required to own in a CFC was increased from 5% to 10%.
  - The holding of equity securities is disregarded for the business purpose test for the application of the active business exemption where the CFC qualifies as a Regional Headquarters Corporation.
  - Some types of non-operating income derived by a CFC that qualifies for the active business exemption are included in the calculation of taxable income.

### Tohoku Earthquake and special tax legislation

On 27 April 2011, special national tax laws to help deal with the Tohoku Earthquake, including associated amendments to the local tax laws, were promulgated and immediately became effective ('Tohoku Legislation'). These tax laws are intended to provide special tax relief for affected individuals or corporations. *See the Tax credits and incentives section for more information.*

### Pending legislation

Please note this information is current as of 1 June 2011. Please visit the WWTS website at www.pwc.com/taxsummaries to see any significant corporate tax developments that occurred after 1 June 2011.

## Taxes on corporate income

A domestic corporation in Japan is taxed on its worldwide income. A foreign corporation is taxed only on its Japan-source income.

The total corporate income tax burden (i.e. effective tax rate) is in the range of 40.87% to 42.05%, depending upon the size of a company's paid-in capital. Since enterprise tax is deductible, the effective tax rate is less than the total of the statutory rates of corporation tax, inhabitant's tax, and enterprise tax.

### Corporation tax

The corporation tax rates are as follows:

| Company size and income | Corporation tax rate (%) |
|---|---|
| Paid-in capital of over JPY 100 million. | 30 |
| Paid-in capital of JPY 100 million or less, except for a company wholly owned by a company which has paid-in capital of JPY 500 million or more: | |
| First JPY 8 million per annum during fiscal year ending before 1 July 2011. This is a temporary rate which, if not extended by legislation, would revert to a 22% rate. | 18 |
| Over JPY 8 million per annum. | 30 |

### Standard enterprise tax (and Special Local Corporate Tax)

Enterprise tax is imposed on a corporation's income allocated to each prefecture. This allocation is generally made on the basis of the number of employees.

The standard rates of enterprise tax, including a Special Local Corporate Tax, are shown below.

| Taxable base | Enterprise tax (%) | Special Local Corporate Tax |
|---|---|---|
| First JPY 4 million per annum | 2.7 | 81% of the current enterprise tax *(see the immediate left column)* |
| Next JPY 4 million per annum | 4.0 | |
| Over JPY 8 million per annum | 5.3 | |

If the paid-in capital of a corporation is JPY 10 million or more and the corporation has places of business in more than two prefectures, the graduated rates above are not applicable.

For utilities and insurance companies, the standard tax rate is shown as follows:

| Taxable base | Enterprise tax (%) | Special Local Corporate Tax |
|---|---|---|
| Net revenue (net utility charges or net insurance premiums) | 0.7 | 81% of the current enterprise tax *(see the immediate left column)* |

### *Size-based enterprise tax (and Special Local Corporate Tax)*
Instead of the above general enterprise tax, a 'size-based' enterprise tax (Gaikei Hyojun Kazei) is applied to a company whose paid-in capital is more than JPY 100 million as of the year end.

Factors such as the size of a corporation's personnel costs and its capital (the amount of paid-in capital) will determine the additional amount of tax payable. The existing profit-based enterprise tax will also continue to apply at the tax rates indicated below. Therefore, a loss company in Japan may be required to pay tax based on value-added activities and the corporation's paid-in capital. The applicable standard rates are shown as follows:

| Taxable base | Tax rate (%) | Special Local Corporate Tax |
|---|---|---|
| Profit-based tax: First JPY 4 million per annum | 1.5 | 148% of the current enterprise tax *(see the immediate left column)* |
| Next JPY 4 million per annum | 2.2 | |
| Over JPY 8 million per annum | 2.9 | |
| Additional value-based tax | 0.48 | N/A |
| Capital-based tax | 0.2 | N/A |

### *Inhabitant's tax*
Inhabitant's tax is imposed on a corporation's income allocated to each prefecture and city (municipal borough). The allocation is generally made on the basis of the number of employees, in the same way as enterprise tax.

The standard tax rate is 5% as prefectural tax and 12.3% as municipal tax. However, the tax rate may be increased up to 6% for prefectural tax and 14.7% for municipal tax, depending upon the determination of each local government.

In addition to the above, inhabitant's tax is imposed on a per capita basis, in the range from JPY 70,000 (in the case that the amount of paid-in capital is JPY 10 million or less, and the number of employees in each prefecture and city is 50 or less) to JPY 3,800,000 (in the case that the amount of paid-in capital is over JPY 5 billion and the number of employees in each prefecture and city is over 50). The inhabitant's tax amount is determined by the local government by the factors of paid-in capital and the number of employees.

## *Corporate residence*

### *Domestic and foreign corporation*
A company incorporated under the laws of Japan is a domestic corporation. The nationality of its shareholders or place of central management is not relevant.

A corporation other than a domestic corporation is regarded as a foreign corporation.

### *Permanent establishment (PE)*
Under domestic tax law, the scope of Japan-source income in respect of which a foreign corporation is taxable depends upon the type of taxable presence that it has in Japan. The types of taxable presence that a foreign corporation may have in Japan include the following:

- Branch, factory and other fixed places in which business is conducted in Japan, mine, quarry, building for rent, etc. but exclude a specified place used only for the business of purchasing assets and for keeping them (Direct PE).
- Construction, installation, assembly project, or supervisory services related thereto for a period of greater than one year.
- Certain agents (Agent PE), as follows:
  - A person in Japan who has an authority to conclude contracts for a foreign corporation (excluding contracts to purchase assets) and exercises such authority continuously (Contracting Agent).
  - A person in Japan who keeps for a foreign corporation a certain quantity of assets sufficient to meet ordinary demand from the foreign corporation's customers and delivers the said assets to the customers according to their requirements (Fills Order Agent).
  - A person in Japan who, solely or principally for or on behalf one foreign corporation, habitually performs an important part of solicitation of orders, negotiations, or other acts leading up to the conclusion of contracts with respect to the business of the foreign person (Secure Order Agent).

As a matter of law, the articles of Japan's tax treaties have precedence over domestic tax law. In general, there are no significant differences between the definitions of PE under domestic tax law and Japan's tax treaties. However, once a PE has been established for a foreign corporation under domestic law, all Japan-source income is taxable to the PE (as opposed to just income 'attributable to' the PE, as is the case under most treaties).

## *Other taxes*

### *Consumption tax*
Consumption tax (value-added tax or VAT) is levied when a business enterprise transfers goods, provides services, or imports goods into Japan. The applicable rate is 5%. Exports and certain services to non-residents are taxed at a zero rate. Specified transactions, such as sales or lease of land, sales of securities, and provision of public services, are not subject to taxation.

Consumption tax paid by the business enterprise shall be refundable by filing the consumption tax return to the extent that such transaction is recorded in the accounting book.

### *Customs duty*
A customs duty is levied on imported goods based on the custom tariff table.

### *Fixed assets tax*
The annual fixed assets tax is levied by the local tax authorities on real property and depreciable fixed assets used for business purposes. Real property is taxed at 1.7% (standard rate including city planning tax) of the value appraised by the local tax authorities. The depreciable fixed assets tax is assessed at 1.4% of cost after statutory depreciation.

### *Stamp duty*
A stamp duty is levied on certain documents prepared in Japan. The tax amount is generally determined based on the amount stated in the document.

### *Registration and license tax*
Registration and license tax is levied where certain property is registered, at a rate from 0.2% to 2% of the taxable basis. The taxable basis depends upon the property being registered (e.g. the amount of paid-in capital registered by a company or the value of real estate as assessed by local tax authorities).

### *Family corporation tax*
If an individual shareholder together with their family members own, either directly or indirectly, more than 50% of the total issued shares or voting rights of a Japanese corporation, the corporation is treated as a family corporation (with the exception of corporations with paid in capital of JPY 100 million or less) and is subject to the family corporation tax in addition to corporation tax.

A family corporation is liable for an additional tax at the rates shown below on its undistributed current earnings in excess of specified limits.

| Taxable undistributed current earnings | Family corporation tax rate (%) |
|---|---|
| First JPY 30 million per annum | 10 |
| Next JPY 70 million per annum | 15 |
| Over JPY 100 million per annum | 20 |

### *Business premises tax*
Business premises tax is levied and designated by each city in Japan, such as Tokyo, Osaka, Nagoya, Fukuoka, and other cities with a population of more than 300,000. A company that uses business premises in excess of 1,000 square metres and/or has more than 100 employees in a designated city is responsible to pay this tax based on the usage of the business (JPY 600 per square metre) and gross payroll (0.25% of gross payroll).

## *Branch income*

Branch profits are taxed in the same manner as corporate profits. However, the family corporation tax does not apply to a branch of a foreign corporation. In addition, no withholding tax (WHT) is imposed on the repatriation of branch profits to the home office.

## *Income determination*

The taxable income of a corporation is the aggregate income from all sources. There is no specific requirement to differentiate between the types of income. In principle, accounting for tax purposes follows generally accepted accounting principles in Japan, and income of a corporation is determined on an accrual basis.

### *Inventory valuation*
Inventory cost should be determined by applying one of the following methods accepted for corporate tax purposes: actual individual cost, first in first out (FIFO), weighted

average, moving average, most recent retail, selling price reduction, and lower of cost or market.

### *Capital gains*

Capital gains and losses are classified as ordinary income and losses respectively.

Under certain circumstances (e.g. qualified reinvestment, exchange property), taxes generally levied on capital gains may be deferred (i.e. provided rollover relief) as long as certain requirements are met. A special relief is available in the case of expropriation of real property by either the national or local government.

As of 1 October 2010, the recognition of capital gains or losses from the transfer of certain assets between group companies will be deferred until the asset is transferred to another group company or a non-group company.

### *Dividend income*

Dividends received from a Japanese corporation are excluded from taxable income for corporate income tax purposes, provided that the recipient corporation owns 25% or more of the shares in the dividend-paying corporation. If a corporation owns less than 25% of the shares in the dividend-paying corporation, 50% of the dividends received from the dividend-paying corporation are excluded from taxable income.

Interest expense which is allocable as an investment cost of the shares that generate the dividend income effectively reduces the amount of dividend income. Note that this rule is not applicable to dividends between 100% group companies.

95% of dividends received by a company from a foreign company in which it has held at least 25% of the outstanding shares for a continuous period of six months or more, ending on the date on which the dividend is declared, can be excluded from the company's taxable income.

If the foreign company is resident in a country with which Japan has concluded a tax treaty for the avoidance of double taxation, and such treaty provides for the allowance of an indirect foreign tax credit for taxes paid by the foreign company on the profits out of which the dividend is paid where the company holds a certain percentage of the foreign company's outstanding shares (e.g. 10% based on the tax treaty between the United States and Japan), that percentage will apply for the purpose of determining the availability of the above exemption to the extent that it is lower than 25%.

The WHT for dividends is applicable at a rate of 7% (15% on and after 1 January 2012) or 20% depending on the type of stock from which the dividends were received, and a tax credit may also be available for such WHT.

### *Foreign income*

A Japanese corporation is subject to Japanese corporate income taxes on its worldwide income. However, to avoid double taxation of foreign-source income, Japanese corporations are allowed to claim a tax credit against corporation and inhabitant's taxes for foreign income taxes paid directly. *See Foreign tax credit in the Tax credits and incentives section for more information.*

Undistributed profits of a foreign subsidiary (i.e. CFC) located in a tax haven are included in the Japanese parent company's taxable income under certain conditions. *See Anti-tax haven (CFC) rules in the Group taxation section for more information.*

## Deductions

### Depreciation and amortisation

Depreciation is deductible in the calculation of taxable income for corporation tax purposes. Depreciable assets include tangible property, such as buildings, attachments to buildings, structures, machinery and equipment, etc. Certain intangible assets are also eligible for amortisation, such as goodwill, patents and trademarks, etc.

With regard to depreciation methods, a taxpayer may adopt one of the allowable methods for each of the types of depreciable property. Tangible property is generally depreciated using either the straight-line method or the declining-balance method. Intangible property is generally amortised under the straight-line method.

### Reserves

Reserves recorded in the books of accounts, except for reserves for doubtful receivables and return of goods not sold, are not deductible for corporate tax purposes.

#### Reserve for doubtful receivables

The deductibility of a reserve for doubtful receivables is limited by the following two components: (i) an estimate of irrecoverable amounts from a debtor and (ii) a calculation of the limit in the aggregate based on either the actual historical bad debt percentage or statutory percentage (reduced for large corporations), excluding the irrecoverable amount of receivable in (i) above.

#### Reserve for return of goods not sold

A deductible reserve for return of goods not sold is available to corporations such as publishers, wholesalers of books, and others, provided that the corporation sells the merchandise under an unconditional repurchase agreement.

### Charitable contributions

Except for certain designated donations, the tax deduction for charitable contributions is limited to the sum of 1.25% of certain taxable income plus 0.125% of paid-in capital and capital surplus. Donations subject to this limitation include economic benefits considered to be given as a subsidy. Donations to foreign affiliates are not fully deductible.

In the case that a donation occurs on after 1 October 2010 between group companies (as defined), there will be no tax implications for either the donor or donee (i.e. no deduction for the donor and no taxation for the donee).

### Directors' remuneration

The remuneration paid to directors is deductible only in the following three cases:

- Fixed monthly payments.
- Fixed payments in accordance with an advance notice to the tax office.
- Performance bonuses paid in proportion to the company's earnings to directors who engage in the operation of the company's business, to the extent that certain requirements are met.

If the amount of remuneration is deemed unreasonable by the tax authority, only the reasonable amount is deductible for tax purposes.

### *Entertainment expenses*

In principle, entertainment expenses are not deductible for tax purposes. However, a small or medium-sized enterprise (SME), defined as a company with paid-in capital of JPY 100 million or less (except for a company wholly owned by a company which has paid-in capital of JPY 500 million or more after the group taxation regime is effective) may take a tax deduction up to the smaller of 90% of the actual disbursement for the entertainment expense or JPY 5.4 million (90% of JPY 6 million). With regard to expenses for eating and drinking, a company may deduct such expenses up to JPY 5,000 per person (excluding expenditures for internal purposes) for tax purposes.

### *Taxes*

Enterprise tax and business premises tax are deductible in the calculation of the taxable income for corporation tax purposes on a cash basis. However, corporation tax and inhabitant's tax are not deductible. Fixed assets tax and other taxes are deductible, when assessed. Foreign income taxes also may be deductible if the Japanese corporation does not elect to claim a foreign tax credit.

### *Net operating losses*

For corporate income tax and enterprise tax purposes (indirectly for inhabitant's tax purposes), a tax loss can be carried forward to offset future income for seven years, in the case that a taxpayer files a 'blue form' tax return *(see Returns in the Tax administration section)* or if the tax loss is incurred as a result of certain disaster events.

Where there is a change in ownership of a corporation followed by certain events, such as the cessation of business or a significant change in its business within a five-year period following a business acquisition, the utilisation of its tax loss is restricted.

Carryback of tax losses is generally available for one year for national corporation tax purposes. Currently, this carryback rule is suspended until the fiscal year ending 31 March 2012 (except in specified circumstances, e.g. year of liquidation). However, a SME can apply a tax loss recognized in a fiscal year ending on or after 1 February 2009.

No carryback of losses is allowed for enterprise tax and inhabitant's tax.

### *Payments to foreign affiliates*

In order to support a deduction in Japan for expenses incurred by a foreign affiliate and charged to a Japanese corporation, in general, it should be demonstrated that the service arrangement between the foreign affiliate and the Japanese corporation satisfies arm's-length criteria for purposes of Japan's transfer pricing laws and regulations.

Generally, fees that are paid by a Japanese subsidiary to a foreign affiliate should be deductible for Japanese tax purposes if the following conditions are met:

- The services should have the same character as services which take place between non-related companies or such services are essential to Japan's activities.
- There is a written service agreement.
- The services were requested by the Japanese corporation.
- The rendering of services is documented with evidence (e.g. requests for services from the Japanese subsidiary, regular invoices sent by the foreign affiliate).
- The service charges are reasonable.

## Group taxation

### Consolidated tax regime

Under the consolidated tax regime, a consolidated group can report and pay national corporate income tax on a consolidated basis. A consolidated group may be formed by a Japanese parent company and its 100% owned (directly or indirectly) Japanese subsidiaries. The taxpayer may file an application to elect a consolidated group filing for tax purposes, but the election must include all of the parent's eligible subsidiaries. Once the election is made, the consolidated filing, in principle, cannot be revoked unless there is a specific event, such as an ownership change that causes the qualifying conditions of a consolidated filing to fail, or an application to discontinue the consolidated group has been approved by the Commissioner of the National Tax Agency (NTA).

The taxable income of the consolidated group is computed on a consolidated basis by aggregating the taxable income or losses of each member of the consolidated group followed by the consolidation adjustments. Profits from intra-group transactions, except for transfer of certain assets as defined, should be included in the aggregate taxable income. Gains or losses from the intra-group transfer of certain assets are deferred.

Pre-consolidation tax losses of a subsidiary can be carried forward into a consolidated tax group but may only be offset against taxable income of the subsidiary for the calculation of a consolidation income on or after 1 October 2010.

The consolidated national corporate income tax liability is determined by applying the corporate income tax rate to the consolidated taxable income and adjusted for consolidated tax credits. The total tax liabilities are allocated back to each member company. The parent company files the consolidated return and pays the national corporate income tax for the group; however, each member company remains jointly and severally liable for the consolidated group's total national corporate income tax liability.

Local corporate income taxes levied on member companies are paid on a separate company basis, but the amount of local tax payable may be affected because of the consolidated filing.

### Group taxation regime

As of 1 October 2010, a new group taxation regime became effective. This new regime is applicable to domestic companies that are wholly owned by a domestic company, foreign company, or individual ('group companies'). Unlike the consolidated tax regime, the group taxation regime automatically applies to group companies.

The key points of this regime are summarized as follows:

- The recognition of capital gains or losses from the transfer of certain assets (including the transfer of assets as a result of a non-qualified or taxable merger) between group companies is deferred until the asset is transferred to another group company or a non-group company. The scope of assets is the same as that under the tax consolidation system (i.e. fixed assets, land, securities, monetary receivables, and deferred expenses (excluding securities for trading purposes and assets with a book value of less than JPY 10 million)).
- Where a donation occurs between group companies, there are no tax implications for either the donor or donee (i.e. no deduction for the donor and no taxation for the donee). Note that this treatment is not applied to a group company owned by an

individual. This is consistent with the treatment of a donation between members of a consolidated tax group.
- A dividend received from a group company can be fully excluded from taxable income without any reduction for allocable interest expense. This is consistent with the treatment of dividends between members of a consolidated tax group.

A group company that would otherwise qualify as a SME on a stand-alone basis is not eligible for SME benefits (e.g. reduced corporate tax rate, preferable allowable ratios for deductible portion of bad debt provisions, partial deductibility of entertainment expenses, carry back of tax losses) if the parent company of the group has paid-in capital of JPY 500 million or more.

### *Transfer pricing system*
If a corporation which is subject to corporation tax sells property to or buys property from a foreign-related person, or provides services or conducts other transactions with a foreign-related person, and consideration is received or paid by the corporation, the transaction is required to be carried out at an arm's-length price for corporation tax purposes.

A foreign-related person is a foreign corporation which maintains certain special relationships with the subject corporation, such as parent-subsidiary, brother-sister, or substantial control relationship.

The arm's-length price for the sales or purchase of inventory may be determined using one of the four following methods:

- Comparable uncontrolled price method.
- Resale price method.
- Cost plus method.
- Other method (it may only be used if the first three methods cannot be applied to the case).

An advanced pricing agreement (APA) system is available to confirm the arm's-length pricing system proposed by a taxpayer. In general, corporations entering into an APA are advised to file a request for mutual agreement procedures (MAP) in order to obtain the agreement of the competent authorities of each country.

### *Thin capitalisation*
Interest paid on debt to controlling foreign shareholders is disallowed to the extent the average balance of debt on which that interest is paid is more than three times the equity of controlling foreign shareholders.

### *Anti-tax haven (controlled foreign company or CFC) rules*
Undistributed profits of a foreign subsidiary (i.e. CFC) located in a tax haven are included in the Japanese parent company's taxable income under certain conditions.

Tax havens are defined as certain countries or territories that do not impose corporate income tax or that tax the income of a foreign subsidiary at a rate of 20% or less. A Japanese corporation owning a 10% or more direct or indirect interest in a CFC is required to include its pro-rata share of the taxable retained earnings of the CFC in its gross income under certain circumstances.

A dividend paid by a CFC is not deductible when calculating its undistributed income.

## Tax credits and incentives

### Foreign tax credit

A Japanese corporation is subject to Japanese corporate income taxes on its worldwide income. However, to avoid double taxation of foreign-source income, Japanese corporations are allowed to claim a tax credit against corporation and inhabitant's taxes for foreign income taxes paid directly.

Creditable foreign taxes are defined as taxes that (i) are incurred directly by the taxpayer; (ii) are levied by foreign governments and local authorities in accordance with local tax laws; (iii) are levied on corporate income; and (iv) have the same characteristics as Japanese income tax, corporation tax, and local income-based taxes. A tax for which refund can be claimed optionally by the taxpayer after the tax payment, or a tax whose payment grace period can be decided by the taxpayer, are not regarded as foreign tax.

In order to prevent the credit from reducing corporation tax on Japan-source income, certain limitations are set on the amount of foreign tax that can actually be credited.

A foreign tax credit is not applicable for enterprise tax purposes, although foreign branch income attributable to a business executed outside Japan is exempt from enterprise tax.

Generally speaking, the foreign tax credit system does not apply to the extent the dividend income from the foreign subsidiary is subject to the dividend exemption system.

### Tax credit for research and development (R&D) cost

The tax credit for R&D cost is calculated based on gross R&D cost. Limitation of the credit is determined based on the corporation tax liability as follows:

- For fiscal years ending on or before 31 March 2009: 20% of the corporation tax liability.
- For fiscal years beginning 1 April 2009 to 30 June 2011: 30% of the corporation tax liability.

In the case that the amount of the credit exceeds 30% of the corporation tax liabilities, the excess amount can be carried forward for one year.

In addition to the R&D credit, for tax years beginning during the period 1 April 2008 to 31 March 2012, a taxpayer may claim an additional tax credit based on its incremental R&D expenditure or excess R&D cost over sales, as follows:

- 5% of the excess R&D costs over the annual average of R&D costs for the last three years.
- Excess R&D costs over 10% of the average sales amount times a tax credit ratio equal to ((R&D costs/average sales) –10%) x 0.2).

### Special tax credit for staff training expenses

SMEs that qualify and have elected to file 'blue form' tax returns *(see Returns in the Tax administration section)* are allowed to claim a tax credit against the corporation's income tax liability for certain staff training expenses for fiscal years beginning 1 April 2008 to 30 June 2011.

The amount of tax credit is calculated using the tax credit rate for staff training expenses. The range of the tax credit rate is between 8% and 12%, depending upon the percentage of training expenses over the total labour costs, subject to the limitation of 20% of the corporation tax liability.

### *Special tax treatment for investment in certain equipment*

SMEs filing 'blue form' tax returns may elect, under certain conditions, to claim accelerated depreciation of 30% of the base acquisition cost or a special tax credit equivalent to 7% of the base acquisition cost on designated equipment to the extent that it is acquired by 31 March 2012. The maximum tax credit is limited to 20% of the taxpayers' corporate tax liability.

### *Tohoku Earthquake and special tax legislation*

On 27 April 2011, special national tax laws to help deal with the Tohoku Earthquake, including associated amendments to the local tax laws, were promulgated and immediately became effective ('Tohoku Legislation'). These tax laws are intended to provide special tax relief for affected individuals or corporations.

### Corporate tax refunds for loss carrybacks

Under current law, one year tax loss carrybacks are allowed for small and medium corporations (SMCs). Other corporations are allowed a one year tax loss carryback in the year of liquidation. In the Tohoku Legislation, corporations which incurred a specified disaster loss from the Tohoku Earthquake (the 'Tohoku Earthquake Disaster Loss') may carry back such loss for two years for national tax purposes. Such carryback may be elected either with the annual corporate tax return or an interim tax return based upon a full interim closing of the corporate books. For local tax purposes, the tax loss carryback is not applicable, although carryforward of all losses (including the Tohoku Earthquake Disaster Loss) is allowed over the normal seven year carryforward period.

| Applicable tax year and tax return | Carryback years | Refundable tax amount |
|---|---|---|
| Final tax return for tax year ending between 11 March 2011 and 10 March 2012 | Tax years beginning within two years from the first date of the tax year when the Tohoku Earthquake Disaster Loss is incurred | Tax liability of carryback year X (Tohoku Earthquake Disaster Loss / Taxable income of carryback year) |
| Closing basis interim tax return for interim period ending between 11 March 2011 and 10 September 2011 | Tax years beginning within two years from the first date of the interim period when the Tohoku Earthquake Disaster Loss is incurred | |

### Special depreciation for newly acquired assets relating to the Tohoku Earthquake

A corporation may claim a special depreciation of certain assets in the year of acquisition in addition to normal depreciation. The qualified assets should be acquired and placed in service between 11 March 2011 and 31 March 2016 and satisfy either (i) or (ii) below:

i. Newly acquired assets to replace Tohoku Earthquake destroyed assets, including
   - Buildings, structures, machinery, or equipment.
   - Registered vessels, aircraft, or vehicles.

ii. Newly acquired assets placed in service in a business carried out at the affected area*, including buildings, structures, machinery, or equipment.

* Areas where destroyed buildings or structures were located and surrounding areas where machinery or equipment were installed.

| Assets | Special depreciation rate applicable to the assets acquired and put into service between 11 March 2011 and 31 March 2014 | | Special depreciation rate applicable to the assets acquired and put into service between 1 April 2014 and 31 March 2016 | |
|---|---|---|---|---|
| | SMCs | Other than SMCs | SMCs | Other than SMCs |
| Buildings, structures | 18% | 15% | 12% | 10% |
| Machinery, equipment; registered vessels, aircraft, vehicles | 36% | 30% | 24% | 20% |

**Rollover relief given to newly acquired assets to replace old assets**
Under the current statutes, up to 80% of the capital gain realized when a corporation acquires an asset to replace an old one may be deferred. Under the Tohoku Legislation, for certain assets acquired between 11 March 2011 and 31 March 2016, the entire amount of capital gain may be deferred. Qualified replacement assets include the following:

- Real estate or depreciable assets located in Japan purchased to replace real estate (including buildings or structures fixed to the land) in the affected area that had been acquired prior to 11 March 2011.
- Real estate or depreciable assets purchased in the affected area to replace real estate, buildings, or structures located other than in the affected area.

When applying the rollover relief rules, the due date for acquiring replacement assets is extended for a further two years if it is difficult to acquire the replacement asset by the normal due date as a result of the Tohoku Earthquake.

| | |
|---|---|
| Applicable transaction | • Acquiring replacement assets due to expropriation.<br>• Acquiring certain other replacement assets. |
| Cases where the extension will be approved | • Difficulty in acquiring replacement assets by the normal due date which falls within a tax year which ends between 11 March 2011 and 31 March 2012. |
| Requirements for applying the extension | • A corporation expects to acquire the replacing asset within the designated period (up to two years).<br>• A corporation expects to place the replacing asset in service within one year from acquisition date (excluding replacement assets due to expropriation).<br>• Extension is approved by the chief of the appropriate tax office. |
| Filing of the application form | • The application form should be filed within two months from the beginning of the tax year following the transferring year. |

## *Withholding taxes*

### *Tax treaty network*
As of 31 March 2011, Japan has entered into 48 tax treaties with 59 countries. Companies making certain payments are required to withhold income taxes using the following rates.

| Recipient | Dividends (%) Portfolio (3) | Substantial holdings (1) | Interest (%) | Royalties (%) (2) |
|---|---|---|---|---|
| Japanese corporations | 7/20 (3) | 20 | 0/20 (4) | 0 |
| Resident individuals | 10/20 (3) | 20 | 0/20 (4) | 0 |

Notes

The applicable treaty rates are effective as of 31 March 2011.

1. The tax treaty rates apply only to corporate shareholders. The applicable treaty should be checked for conditions required to claim the reduced rate.
2. The applicable treaty should be reviewed because certain tax treaties exclude film royalties and/or gain from copyright transfer from taxable income.
3. For certain dividends received from 1 January 2004 through 31 December 2011, the reduced rate of 7% (for resident individuals, an additional 3% will be levied) is applied instead of 20%. Thus, the WHT rate for resident individuals is either 10% or 20%, whereas, the rate for corporations or resident individuals in non-treaty countries is 7% or 20%. For residents in treaty countries, 7% or the treaty rate will be applied. As of 1 January 2012, 20% will be applied without exception.
4. Interest on bank deposits and/or certain designated financial instruments is subject to a 15% national WHT and 5% local inhabitants WHT (20% combined). Taxation of such interest is fully realized by tax withholding, so resident individuals are not required to aggregate such interest income with other income. Interest on loans made by resident individuals is not subject to withholding tax; instead, it is taxed in the aggregate with other income.
5. Dividends, interest, and royalties earned by non-resident individuals and/or foreign corporations are subject to a 20% national WHT under Japanese domestic tax laws in principle. An exception rate of 7% is applied to dividends from certain listed companies. An exceptional rate of 15% is applied to interest on bank deposits and certain designated financial instruments. Interest on loans, however, is taxed at a 20% rate. A special exemption from WHT applies to certain long-term corporate bonds issued to non-residents in foreign countries.
6. Tax treaties with many countries provide reduced tax rates, as indicated. Some treaties, however, provide higher tax rates (e.g. Brazil, Thailand) or do not provide rates (e.g. Egypt, New Zealand). In these instances, rates specified under Japanese domestic tax laws apply. Each treaty should be consulted to see if a reduced rate for dividends (in the case of substantial holdings) is applicable.
7. The tax treaty with Bermuda was concluded mainly for the purpose of information exchange.
8. The tax treaty with Brazil provides a 25% tax rate for certain royalties (trademark). However, the WHT rate cannot exceed 20% on any royalties to be received by a non-resident taxpayer of Japan under Japanese income tax law. Film royalties are taxed at 15%. Any other royalties are taxed at 12.5%.
9. The treaty with the former Czechoslovakia is applied to the Czech Republic and the Slovak Republic. It stipulates that cultural royalties are tax exempt.
10. Film royalties are taxed at 20%, and other royalties are taxed at 15%.
11. Cultural royalties are tax exempt.
12. The rate of 10% for royalties includes consideration for technical services.
13. The rate for royalties is reduced to 5% by Protocol.
14. Dividends received from subsidiaries, by parent companies that have met certain conditions, are exempt from withholding taxes.
15. A 5% rate is applied to a company which has over 50% shares with direct voting rights, and a rate of 7.5% is applied to a company which has over 25% shares with direct voting rights.
16. Film royalties are taxed at 15%. Any other royalties are taxed at 10%.
17. Cultural royalties are tax exempt.
18. Cultural royalties are taxed at 10%.
19. Interest paid to financial institutions is tax exempt, as well as film and copyright royalties. Patent royalties are subject to a 10% rate.
20. If certain conditions for beneficial owners are met, dividends are taxable only in the contracting state of which the beneficial owner is a resident.
21. Dividends paid by a corporation that is engaged in industrial undertakings are taxed at 15%. Interest paid to financial institutions is taxed at 10%.
22. Interest paid to financial institutions is taxed at 10%.

23. The treaty with the former USSR is applied to Armenia, Azerbaijan, Belarus, Georgia, Kyrgyzstan, Moldova, Russia, Tajikistan, Turkmenistan, Ukraine, and Uzbekistan. It stipulates that cultural royalties are tax exempt.

## Tax administration

### Returns

Corporate income tax returns (i.e. the national corporation tax return, enterprise tax return, and local inhabitants' tax return) are self-assessment tax returns.

The tax year is the corporation's annual accounting period specified in its articles of incorporation. A Japan branch of a foreign corporation must use the same accounting period that is adopted by the corporation in its home country.

If a corporation meets certain conditions, such as keeping certain accounting books, and makes an application for it in advance, it is allowed to file a 'blue form' tax return. A blue form filing corporation may benefit from loss carryforward and other benefits.

A corporation (including a branch) is required to file the final tax return within two months after the end of its annual accounting period. If a corporation cannot file the final return because of specific reasons, the due date of final return may be extended for one month with the tax authority's approval.

### Payment of tax

Income taxes payable on the final corporate income tax return should be paid on or before the filing due date of the final tax returns (usually two months after the end of the corporation's accounting period). If an extension of time for filing is granted, the taxes may be paid on or before the extended due date with interest accrued at a rate of 4.3% (for the year 2011) per annum for the period from the day following the original due date (i.e. two months after the end of an accounting period) to the date of the actual payment.

Provisional tax payments are required for a corporation that has a fiscal period longer than six months. Provisional taxes generally are computed as one-half of the tax liabilities for the previous year, but they may be reduced by the filing of interim tax returns that reflect semi-annual results of the operations.

### Consolidated taxation

The parent company will file the consolidated tax return and pay national corporate income tax for the group. The consolidated tax return and payment due dates are the same as previously discussed; however, the due date of the final return may be extended for two months.

For local corporate income taxes, each member of the consolidated group must separately file the returns and pay the taxes.

### Penalties

If the tax return is filed late, a late filing penalty is imposed at 15% to 20% of the tax balance due. In the case that a corporation voluntarily files the tax return after the due date, this penalty may be reduced to 5%.

An under-payment penalty is imposed at 10% to 15% of additional tax due. In the case that a corporation amends a tax return and tax liabilities voluntarily after the due date, this penalty may not be levied.

In addition, interest for the late payment of tax is levied at 4.3% (for the year 2011) per annum for the first two months and increases to 14.6% per annum thereafter.

## Significant developments

Jersey's business tax regime has recently been reviewed by the EU Code of Conduct on Business Taxation Group. The Code Group expressed concerns over Jersey's rules for taxing profits of Jersey companies on Jersey shareholders as deemed dividends or attributed profits. To address these concerns, the Chief Minister announced in February 2011 that these provisions would be removed as of 31 December 2011. Draft legislation removing the deemed dividend and full attribution provisions was lodged in May 2011 and is due to be debated on 5 July 2011.

No changes have been made to corporate income tax rates.

The standard rate of goods and services tax (GST) has been increased to 5% as of 1 June 2011.

## Taxes on corporate income

Companies pay income tax at a rate of 0%, 10%, or 20% on taxable income. The tax rate applies to the company as a whole, the only exception being Jersey-source property income, which is taxed at 20% regardless of the classification of the property holding company.

As of 1 January 2011, certain Collective Investment Funds and Securitisation Vehicles can elect to be exempt from tax on income, other than income from Jersey land or property, for an annual fee of 500 pounds sterling (GBP).

The 20% tax rate applies to Jersey-based utility companies, such as telephone, gas, and electricity companies. Additionally, income from Jersey real estate, including rental and property development, is subject to tax at 20%. From 2011, the 20% rate applies to companies exploiting Jersey land (e.g. quarrying activities), and from 2012, to companies involved in oil importation.

The 10% rate applies to financial services companies. A company is defined as a financial services company if:

- it is registered under the 1998 financial services law to carry out investment business, trust company business, or fund services business as an administrator or custodian in relation to an unclassified or an unregulated fund
- it is registered under the 1991 banking business law, or
- it holds a permit under the collective investment funds law of 1988 as an administrator or custodian.

The 0% rate applies to all entities that are not exempt, financial services entities, or utility companies, including fund managers who do not hold any of the permits mentioned above.

There are provisions in Jersey tax law under which Jersey-resident beneficial owners of Jersey companies are subject to tax on distributed or undistributed profits. These provisions are to be removed as of 31 December 2011.

## Corporate residence

A company is regarded as tax resident in Jersey if it is incorporated in Jersey or if it has its place of central management and control in Jersey. However, a Jersey incorporated company managed and controlled elsewhere will not be regarded as a Jersey resident, provided certain conditions are satisfied.

## Other taxes

### General sales tax (GST)

A 3% GST was introduced in May 2008. This rate has been increased to 5% as of 1 June 2011.

Companies with taxable supplies of more than GBP 300,000 per annum are required to register for GST.

### International service entity (ISE) status

To address the difficulty of irrecoverable input tax in the financial services sector, and to mitigate the administrative cost of GST for exporters in general, Jersey has introduced the concept of an ISE. Where an entity qualifies for this status:

- it will not be required to register for GST
- services to it will be zero-rated (i.e. treated as an export) where the supply exceeds GBP 1,000, and
- input tax on purchases less than GBP 1,000 may be reclaimed.

ISE status will automatically be available to a wide variety of service providers and administered entities based in Jersey, on application and payment of the relevant fee, including licensed banks, licensed trust service providers, licensed fund administrators, fund managers, and managed managers.

Other entities not automatically eligible under one of the categories above, including companies, partnerships, trusts, unrecognised funds, and special purpose vehicles, may still obtain ISE status if they fulfil certain criteria.

The ISE must be included on a list maintained by the comptroller of income tax. The list will refer either to the entity itself or (e.g. for administered entities) a class of entities as submitted by the administrator.

## Branch income

Branch income is taxed at the rate applicable to the company. No further tax is withheld on the transfer of profits abroad.

## Income determination

### Inventory valuation
Inventory is valued at the lower of historical cost or net realisable value. The last in first out (LIFO) method is not permitted. Generally, there are no material differences between accounts prepared on a normal accounting basis and those prepared on a tax basis.

### Capital gains
Capital gains are not subject to tax.

### Dividend income
There is no requirement to withhold tax at source when paying dividends. If a dividend is paid out of profits that have suffered tax at either a 10% or 20% rate, the net dividend will be accompanied by a tax credit at the applicable rate. Repayment of the tax credit can be claimed by Jersey investment companies and financial services companies receiving the dividends, subject to certain restrictions. However, trading companies subject to tax at 0% are not entitled to claim a repayment of any of the tax credit.

### Stock dividends
Stock dividends are taxed as income.

### Foreign income
Income tax is levied on foreign branch income when earned and on foreign dividends, interest, rents, and royalties. Double taxation is mitigated by either the granting of unilateral relief to the extent of taxing foreign income net of foreign taxes or by treaty relief, which gives credit for foreign tax. Concessional credit relief might be granted in certain limited circumstances upon application.

In addition to the long standing Double Tax Arrangements with the United Kingdom and Guernsey, the Island now has Double Tax Arrangements with Australia, Denmark, Estonia, Faroes, Finland, France, Germany, Greenland, Iceland, Malta, New Zealand, Norway, and Sweden. The scope varies from agreement to agreement but most are of limited scope.

Jersey has also signed Tax Information Exchange Agreements with 20 countries.

## Deductions

### Capital allowances
Capital allowances are available using the diminishing-balance method on machinery and equipment, including vehicles, at a rate of 25%. For this purpose, all such assets are pooled, and the allowance is calculated by reference to the value of the pool.

On disposal of an asset, the lower of cost and sale proceeds of the asset is deducted from the pool. A balancing charge is levied if the proceeds exceed the balance of the pool.

Motor vehicles costing more than GBP 21,000 and greenhouses are subject to special rules and are not pooled with other assets.

By concession, an alternative is to claim the full cost of replacement in the year of replacement.

Capital allowances are not applicable to buildings or the depletion of natural resources.

### *Taxes*
Local income tax paid is not deductible in computing taxable income. ISE fees paid are a tax-deductible expense.

### *Other significant items*
Normally, business deductions are allowed if they are incurred wholly and exclusively for the purpose of the trade.

### *Net operating losses*
Under zero/ten legislation, no distinction is drawn between different types of income or losses arising from different trades or sources, apart from Jersey property income which is separately streamed. These should be aggregated in order to arrive at the company's net relevant profits (0% companies) or tax-adjusted profits (financial services companies).

Unrelieved net relevant losses or tax-adjusted losses may be carried forward and used to offset the net relevant profits or tax-adjusted profits in future accounting periods. Alternatively, net relevant losses or tax-adjusted losses can be group relieved to group companies in the same income tax rate band.

There are now only very limited circumstances where a company can obtain relief for carrying back losses under the new zero/ten regime.

### *Payments to foreign affiliates*
Patent royalties are generally subject to taxation at source, and relief is obtained by retention of the tax deducted.

## *Group taxation*

Group taxation is not permitted.

The zero/ten legislation contains provisions for group relief between group companies subject to the same rate of tax. It is not possible to relieve losses between two companies taxed at different rates.

## *Tax credits and incentives*

There are generally no special incentives for locally owned businesses in view of the low rate of tax.

## *Withholding taxes*

Interest and patent royalties paid by Jersey companies to non-residents are exempt from Jersey tax.

## *Tax administration*

### *Returns*

The tax year is the calendar year. Companies are assessed on income earned in respect of the financial year that ends within the applicable calendar year of assessment. The system relies on the filing of a return of information with the Island tax authority, which then raises an assessment (in the case of companies taxed at 10% or 20% on all or part of their income). Companies taxed at 0% are required to submit a tax return but are not required to submit accounts and tax computations.

As of 1 January 2011, there is a filing deadline for the corporate return of 6pm on the last Friday in July and a late filing penalty of GBP 250.

### *Payment of tax*

Tax is payable in arrears during the calendar year following the year of assessment. Tax paid after a prescribed date (usually the first Friday in the December following the year of assessment) incurs a 10% surcharge.

## Significant developments

The Jordanian tax regime was previously based on the application of the Jordanian Income Tax Law No. 57 of 1985 ('Old' Tax Law). The Old Tax Law was repealed and replaced by a temporary income tax law, which became effective as of 1 January 2010. This temporary income tax law was introduced by the newly appointed Jordanian government in the absence of a Parliament (after a royal edict ordering its dissolution). When the new government was sworn in during December 2009, the introduction of a new income tax law was identified on the agenda of items to be addressed. On this basis, the temporary income tax law was introduced by the new government and will be in force until the elected Parliament enacts the final income tax law; however, an exact date for enactment is not yet known. Part of Parliament's tasks will be to review these temporary laws, make amendments, if appropriate, and then pass the laws as final.

## Taxes on corporate income

The corporate tax rates in Jordan are applied based on the industry/business activities from which the taxpayer generates income. The corporate tax rates are as follows:

- 30% for banks.
- 24% for telecommunication, insurance, financial intermediation companies (including exchange and finance leasing companies).
- 14% for other companies.

Jordanian resident corporations are not subjected to income tax on their worldwide income, except for foreign branches of Jordanian resident corporations, whereby 20% of the branch net income after taxes is subject to Jordanian corporate tax.

Non-resident corporations are taxed through withholding tax (WHT*) (see the Withholding taxes section)*.

## Corporate residence

An entity will be deemed to be resident in Jordan if it has been established and registered in accordance with the provisions of the Jordanian legislation in force and (i) has an office or branch practicing management and supervision of its work in Jordan, (ii) whose management head office or actual office is located in Jordan, or (iii) which the government or any official or public institutions own more than 50% of its capital.

## Other taxes

### Sales tax
A general sales tax similar in operation to a value-added tax (VAT) is imposed at the rate of 16% on the following transactions:

- Sales of goods or services or both.
- Importing any service or goods from outside Jordan or from the free zone areas and markets inside Jordan.

Special tax rates are applied on certain items (e.g. tobacco, fuel, alcoholic drinks, and certain cars).

A zero rate is applied to the export sales of goods and services outside Jordan or to the free zone areas and markets. A zero rate is also applied to sales inside Jordan of certain food items, books, magazines, manure, farm tractors, other agricultural tools, and salt.

Goods exempt from sales tax include fish, eggs , animals, bread, water packed in less than 5 litres, trees and plants, fruits, vegetable oils, honey, tea, sugar, gold, money, potash, emergency and fire vehicles, electricity, and pharmaceutical products.

Services exempt from sales tax include the following:

- Air transport.
- Education.
- Disposal of sewage and waste.
- Public health and similar activities.
- Activities of religious organisations.
- Activities of social organisations.

### Property taxes
There is a property tax in Jordan that is paid annually, and the tax rate is determined by the Municipality depending on the location and size of the property and, in case of buildings, depending on annual rental value.

### Transfer property taxes
Transfer of property is subject to tax at a rate of 5%.

### Stamp duty
An *ad valorem* stamp duty of 0.3% or 0.6% is levied.

### Payroll tax
A company should withhold payroll tax from monthly salaries and benefits at rates ranging from 7% to 14%.

### Social security tax
A social security tax is imposed on the employer and the employee by rates of 11% and 5.5% respectively on the monthly salaries and certain allowances in kind. The employer should report and withhold these contributions on a monthly basis.

## *Branch income*

Operating branches of non-resident companies registered in Jordan are taxed based on their activities/business being carried out in Jordan at the prevailing corporate income tax rates. Non-operating branches of non-resident companies registered in Jordan are generally prohibited from carrying on any commercial activity in Jordan.

## *Income determination*

Any income incurred in or from Jordan, regardless of the place of payment even if it was from illegal sources, shall be subject to tax. This includes, but is not limited to, income from:

- Professional services or activities.
- Interest, commissions, discounts, currency differences, deposit profits, and profits from banks and other legal resident persons.
- Royalties.
- Selling goods produced in Jordan whether sold in Jordan or exported.
- Selling or leasing of movable properties located in Jordan.
- Leasing immovable properties located in Jordan and the income from key money.
- Selling or leasing intangible assets in Jordan, including goodwill.
- Insurance premiums due according to insurance and re-insurance agreements for risk in Jordan.
- All forms of telecommunication services, including international telecommunications.
- Transportation between Jordan and any foreign country.
- Service compensation gained by a non-resident person from Jordan for a service provided to any person if the activity or the work related to this compensation was carried out or the output of this service was used in Jordan.
- Any contract in Jordan, such as construction contracting, commercial agencies profits, and any other similar entities whether their source is inside or outside Jordan.
- Any other employment or business activity, or investment, which has not been exempted according to the provisions of the law.

The following shall be exempted from tax:

- The King's allocations.
- Income of public and official institutions and municipalities, excluding its income from rent and key money.
- Income of unions, professional commissions, cooperation societies, and other societies legally registered and licensed from non-profit activities.
- Income of any religious, charity, cultural, educational, sports, or health institutions with a public character, not aiming to achieve profit and the income of charity awqaf (public endowment), and income from the Orphans Development Fund investment.
- Income of exempted registered companies according to the companies' law, which is incurred from activities undertaken outside Jordan, except income derived from income sources subject to tax according to the provision of the law.
- Profits from stocks and dividends distributed by a resident to another resident, except profits of mutual investment funds of banks and financial companies.
- Capital gains incurred inside Jordan, other than profits from assets subject to depreciation.

- Income derived from inside Jordan from trading in dividends and stocks, bonds, equity loan, treasury bonds, mutual investment funds, currencies, commodities in addition to futures and options contracts related to any of them, except that incurred by banks, financial companies, financial intermediation and insurance companies, and legal persons who undertake financial lease activities.
- Income from trading in immovable properties located in Jordan except the following:
  - Income incurred from such trade by a legal person.
  - Income incurred from building and selling real-estate.
- Income derived by non-Jordanian resident investors from sources outside Jordan that are initiated from their investments of their foreign capital, returns, profits, and proceeds from their investments' liquidation, returns, or selling of their projects, shares, or stocks after transferring them outside Jordan in accordance to the enacted Investment Law or any other law that will replace it.
- Compensation paid by insurance entities, other than what is paid as reimbursement for the loss of income from business activity or employment.
- Any income generated by banks and financial companies not operating in Jordan from banks operating in Jordan, such as deposit interest, commissions, and deposit profits from investment in interest-free banks and financial companies.
- Profits gained by re-insurance companies from insurance contracts concluded with insurance companies operating in Jordan.
- Income covered by double-taxation agreements (DTA) concluded by the government, to the extent of that which is covered under these agreements.
- The income of public or private pension funds and savings funds and any other funds approved by the Minister shall not be subject to tax if this income is derived from the employees and employers contributions.
- Certain types of local origin goods and services' exports outside Jordan may be totally or partially exempted from tax as set forth in regulations issued for this purpose.

### *Inventory valuation*
Inventory is generally valued in accordance to the International Financial Reporting Standards (IFRS) accounting framework.

### *Capital gains*
Capital gains are not taxable in Jordan except for capital gains that are generated from depreciable assets.

### *Dividend income*
Dividends are not taxable in Jordan.

### *Foreign income*
Jordanian resident corporations are not subjected to income tax on their foreign income, except for foreign branches of Jordanian resident corporations, whereby 20% of the branch net income after taxes is subject to Jordanian corporate tax.

## *Deductions*

Approved expenses, including the following, are deductible:

- Foreign income tax paid for income earned from sources outside Jordan that was subject to tax under the provisions of the tax law.
- Interest and Murabaha (profit-sharing) paid by banks or financial institutions.

- Interest and Murabaha that are paid by any taxpayer other than banks and financial institutions and finance leasing companies, provided that the deduction shall not exceed the rates that are determined in the thin capitalisation rules *(see Thin capitalisation in the Group taxation section)*.
- Bad debts.
- Insurance premiums.
- Maintenance expenses for assets that were spent within the tax period, provided that such expenses do not exceed 5% of their value.
- Taxes and fees paid on taxable activities.
- Amounts paid as civil compensation under contracts concluded by the taxpayer for the purpose of carrying out taxable activities.
- Amounts paid by the employer for employees to the Social Security Corporation.
- Hospitality and travel expenses incurred by the taxpayer.
- Expenditures for employees' medical treatment, meals during duty, travel, transport, and life insurance against work injuries or death.
- Marketing, scientific research, development, and training expenses.
- Expenses of prior tax periods, which were neither defined nor final.

### *Depreciation and amortisation*
Depreciation and amortisation of fixed assets are determined using the straight-line method, provided that the provisions, procedures, and rates shall be defined by the depreciation regime issued for this purpose. Assets with a cost of less than 100 Jordanian dinars (JOD) shall be totally deducted in the tax period in which they were acquired.

### *Net operating losses*
Losses may be carried forward indefinitely, but the carryback of losses is not permitted.

### *Payments to foreign affiliates*
A resident generally may claim a deduction for royalties, management service fees, and interest charges paid to foreign affiliates taking into account the transfer pricing regime and the applicable WHT.

## *Group taxation*

Group taxation is not permitted in Jordan.

### *Transfer pricing regime*
Any disposition transaction which is not based on arm's length, is with parties that have mutual interests, and leads to decrease the taxable income is ignored, and the real profits are estimated according to the regular market value of the transactions.

Any illusionary or fake disposition transactions are ignored and the tax due is estimated as if there were no transactions.

### *Thin capitalisation*
Interest and Murabaha that are paid by any taxpayer other than banks and financial institutions and finance leasing companies shall be accepted as a deduction provided that the deduction shall not exceed the following rates of relative value (i.e. total debt to the paid capital or average owners' equity, whichever is higher):

| Tax period | Relative value |
|---|---|
| 2010 | 6:1 |
| 2011 | 5:1 |
| 2012 | 4:1 |
| 2013 and following years | 3:1 |

## *Tax credits and incentives*

Jordan has had tax reductions for selective sectors categorised by development zones. Generally, these have required pre-approval.

### *Foreign tax credit*
Foreign tax credit treatment is not available in Jordan.

## *Withholding taxes*

### *Dividends*
Dividends are not taxable in Jordan.

### *Non-resident WHT*
With respect to services performed by a non-resident juristic or natural person, under the Income Tax Law, “Amounts received or earned by the non-resident person from the Kingdom, which are derived from services provided to any person if the work or service related has been performed in the Kingdom or if the outcome of such services has been used in the Kingdom as well, is subject to tax in Jordan.”

The current WHT rate on services performed by a non-resident juristic or natural person is 7% of the payment.

### *Resident WHT*
Resident juristic or natural persons that perform any services in Jordan are subject to a WHT on the services performed. The applicable WHT rate is the rate prevailing at the time the service is performed. The current WHT rate on services performed by a local subcontractor is 5% of the payment.

Services which are excluded from the 5% WHT regime include the following:

- Shipping services and related brokerage services.
- Road transport services and related brokerage services.
- Air transport services.
- Financing lease services.
- Hotels and restaurants services.
- Clearance services.
- Programming services provided by the company.
- Hospital services provided by hospitals.
- Advertising services.
- Cleaning services.
- Security services.
- Training services provided by the company.
- Insurance activities services.

- Banking services provided by banks.
- Communication activities and services provided by primary telecom companies (defined in the tax law as being communications companies individually licensed in accordance with the provisions of the communications law in effect and regulations and instructions issued pursuant thereto).
- Transportation and distribution of electric power services provided by the Electricity Company Plc.
- Contracting services implemented under contractor certified by the Jordanian Contractors Association.
- Public safety services.
- Maintenance services that include value of materials and goods and labour wages.
- Food processing services, correspondence, and transport and laundry provided to hospitals.
- Loading and unloading services.
- Services that are executed by a juristic person, excluding civil companies, and have a tax number (income and sales).
- Any other service approved by the Minister upon the recommendation of the Director General.

### *Tax treaties*

Jordan has entered income tax treaties with Algeria, Bahrain, Canada, Croatia, the Czech Republic, Egypt, France, India, Indonesia, Iraq, South Korea, Kuwait, Lebanon, Libya, Malaysia, the Netherlands, Pakistan, Poland, Qatar, Romania, Sudan, Syria, Tunisia, Turkey, the United Kingdom, and Yemen.

Jordan has transportation agreements with many countries and is negotiating treaties with more countries.

## *Tax administration*

### *Returns*

Taxpayers are obliged to file tax returns before the end of the fourth month following the end of the tax period, including details related to income, expenses, exemptions, and tax due. Tax returns are submitted by any of the following means approved by the department according to terms and procedures to be determined by instructions:

- Registered mail.
- Banks.
- Any licensed company to undertake the tasks of public or private mail post approved by the Council of Ministries upon the recommendation of the Minister.
- Electronic means.

The date of filing is considered to be the earlier of the date of receipt by the department, post seal, or deposit receipt at a bank or licensed company. In the case of sending electronic mail, implementation instructions have not yet been introduced to determine the approved date of submitting the same.

### *Payment of tax*

The tax balance is due before the end of the fourth month following the end of the tax period.

A taxpayer who is carrying out business activities and has gross income in the previous tax period exceeding JOD 500,000 from these activities is required to remit two advance payments on the accrued income tax from these activities using the rates determined for each tax period mentioned in the following schedule. The advance payments are calculated according to the income tax in the financial statements presented to the income tax department for the concerned period. In the absence of the financial statements for this period, the income tax included in the immediate preceding tax declaration will be used to calculate the advance payments.

| Tax period | Rate on accrued income tax (%) |
|---|---|
| 2010 | 7.5 |
| 2011 | 25 |
| 2012 and following years | 37.5 |

The first advance payment is due within a period not exceeding 30 days from the last day of the first half of that income tax period.

The second advance payment is due within a period not exceeding 30 days from the last day of the second half of that income tax period.

### *Fines and penalties*

Failure to pay tax on the assigned dates according to the provisions of the tax law will result in a delay fine at a rate of 0.4% of the value of the tax due or any deductible amounts for each full or partial week of delay.

If a taxpayer submits a tax return and pays the declared tax in a timely manner, but the declared tax is less than the actual amount due, a shortage fee for such differences will be imposed, as follows:

- 15% of the shortage if the difference exceeds 20% but less than 50% of the tax due by law.
- 80% of the shortage if the difference exceeds 50% of the tax due by law.

## Significant developments

In June 2010, the President signed a law introducing changes to the Kazakhstan transfer pricing legislation. The changes introduced a number of clarifications to the law definitions and established quotation periods for commodities.

In July 2010, the President signed a law introducing changes and amendments to the Kazakhstan tax legislation. The most notable amendments included the introduction of new provisions related to transactions within the Customs Union and foreign currency transactions. These amendments also added new definitions such as 'operator' and 'import of goods' to the Kazakhstan Tax Code.

A Government Decree, which was signed and enacted in September 2010, excluded Switzerland from the list of countries with privileged taxation.

According to a law introducing amendments to the Tax Code, which was signed by the President in November 2010, the corporate income tax (CIT) rate and mineral extraction tax rates for 2011-2014 will remain at the current level, and certain transaction with 'investment gold', as defined by the Tax Code, are exempt from value-added tax (VAT).

### Customs union

A series of agreements and legislation effective in the Customs Union member states (i.e. Kazakhstan, Russia, and Belarus) came into force as of 1 July 2010, introducing changes to the customs and tax legislation of Kazakhstan. This includes the Customs Code of the Customs Union, Agreement on levy of indirect taxes within Customs Union territory, etc.

Kazakhstan adopted the new Code of Customs Affairs which is based on the provisions of the Customs Code of the Customs Union. The changes include amendments to the Tax Code with respect to VAT on transactions within the Customs Union.

## Taxes on corporate income

The tax rate for corporations is 20% and is based on a calendar year. All Kazakhstan legal entities and branches of foreign legal entities are subject to CIT. Taxable income is determined as the taxpayer's aggregate annual income less allowable deductions.

Resident companies are taxable in Kazakhstan on their worldwide profits, while non-resident companies operating through a permanent establishment (PE) in Kazakhstan are subject to Kazakhstan CIT only on the profits attributable to that PE.

Non-residents without a PE in Kazakhstan that receive income from sources in Kazakhstan are generally subject to income tax withheld at source of payment on Kazakhstan-source income *(please see the Withholding taxes section for more information)*.

### *Reduced CIT rates*

A reduced CIT rate of 10% applies to the agricultural income of legal entities producing agricultural products.

In addition, taxpayers operating in special economic zones may enjoy full exemption from CIT, land tax, and property tax, if certain statutory requirements established for such benefits are met.

### *Excess profit tax (EPT)*

EPT rates are progressive and range from 0% to 60%. The tax base is comprised of the portion of net income of subsurface users exceeding 25% of deductions for EPT purposes. Subsurface users may include asset acquisition costs, capital costs, and losses (with certain limitations) as deductions.

## *Corporate residence*

Generally, Kazakhstan incorporated companies or other legal entities that have their place of effective management located in Kazakhstan are treated as Kazakhstan tax residents.

### *Permanent establishment (PE)*

Non-resident legal entities having business activities in Kazakhstan may create a PE in the following cases:

- 'Fixed place PE': a non-resident enterprise carries on business activities in Kazakhstan through a fixed place, including, but not limited to, through a place of management.
- 'Services PE': a non-resident enterprise renders services in Kazakhstan through employees or other personnel engaged by the non-resident for such purposes, provided that these activities continue for more than 183 days within any consecutive 12-month period for the same or connected projects.
- 'Construction PE': a construction site, in particular a shop or an assembly facility, performance of projecting work, forms a permanent establishment, notwithstanding the timing of performing operations.
- 'Agency PE': a non-resident enterprise carries on business activities in Kazakhstan through a dependent agent. A dependent agent is an individual or legal entity that meets all of the following criteria simultaneously:
  - Is not an independent agent.
  - Has the contractual authority to represent the non-resident's interests in Kazakhstan and makes use of this authority by acting and signing (negotiating) contracts on behalf of the non-resident.
  - Carries on activities that are not limited to those of preparatory and auxiliary nature.

## Other taxes

### Value-added tax (VAT)

The current VAT rate is 12%. This tax is applicable to the sales value of products, works, and services, as well as imports. Exports of goods are taxed at 0%. There is a list of goods, works, and services exempt from VAT (e.g. financial services provided by financial institutions, financial leasing services, notary and advocacy services, operations with financial securities and investment gold).

Goods and services are subject to VAT if they are deemed to be supplied in Kazakhstan under the place of supply rules.

VAT refunds are generally available with respect to excess input VAT.

The VAT reporting period is the calendar quarter.

### Customs duties

Customs duties apply to goods imported to the Customs Union countries from third countries. The customs duties rates are established either based on a percentage (in general ranging between 0% and 30%; higher rates exist for certain goods) of the customs value of goods or in absolute terms in euros (EUR).

Goods of the Customs Union countries should be generally exempt from Kazakhstan customs duties.

In addition to membership in the Customs Union, Kazakhstan concluded a number of bilateral and multilateral Free Trade Agreements with the Commonwealth of Independent States (CIS), which provides for exemption of goods circulated between the CIS member states from customs duties, if certain conditions are met.

Kazakhstan is not yet a World Trade Organization (WTO) member.

### Customs fees

A customs processing fee is assessed at EUR 50 for the main page of a customs declaration plus EUR 20 for each supplemental page.

### Excise taxes

Excise taxes apply to the sale and import of crude oil, gas condensate, petrol/gasoline (excluding aviation fuel), diesel fuel, spirits and alcoholic beverages, beer, tobacco, and passenger cars.

### Property tax

Property tax is assessed annually at a general rate of 1.5% of the average net book value of immovable property.

### Land tax

Entities and individuals that own land plots (or land share in cases of commonly shared ownership of land plots) must pay land tax annually. Land tax rates vary based on the purpose for which the land is used as well as the size and quality of the land.

### Vehicle tax

The vehicle tax rate is based on monthly calculation indices and determined in accordance with the type of vehicle, engine volume, operation period of the vehicle (aircraft only), and other factors.

### Social tax

Employers must pay social tax at the rate of 11% of gross remuneration (salaries and certain benefits provided) of all employees (local and expatriate). A deduction is available for obligatory pension contributions.

### Mineral extraction tax

The mineral extraction tax applies to the monetary value of extracted volume of crude oil, gas condensate, natural gas, minerals, and groundwater.

The tax is calculated based on the value of the extracted content, which is computed by applying average global prices to the extracted volume (adjusted for content). The determination of average global prices is based on the list of publications that are considered official sources for computation of mineral production tax (Metal Bulletin, Metal Pages, Platts Crude Oil Marketwire, and Petroleum Argus).

Currently, the tax rates for crude oil and gas condensate range from 5% to 18%, depending on the accumulated production volume for the calendar year. For hydrocarbons, rates can be reduced by 50% if they are supplied to domestic refineries on the basis of a sale/purchase agreement or tolling agreement.

The tax rate for natural gas is set at 10%. For domestic sales of natural gas, tax rates range from 0.5% to 1.5%.

Tax rates for minerals which have undergone initial processing (except for widespread minerals) and for coal vary between 0% and 22%.

## Branch income

The net income of branches of foreign legal entities, after CIT at 20%, is subject to a branch profits tax at a rate of 15%, which may be reduced under an applicable double tax treaty (DTT). As such, the effective tax rate for the income of branches of foreign legal entities equals 32% if there is no reduction under a DTT.

## Income determination

Kazakhstan legal entities are taxable on aggregate annual income earned worldwide. Non-resident legal entities, carrying out business activities through a PE in Kazakhstan, are taxable on income attributed to the activities of that PE. All taxpayers must apply the accrual method for recognition of income.

### Inventory valuation

For tax purposes, inventory is valued in accordance with international financial reporting standards (IFRS) and Kazakhstan financial accounting legislation. As such, permitted inventory valuation methods include first in first out (FIFO), weighted average, and specific identification methods.

### Capital gains

Capital gains are subject to ordinary CIT rates. An exemption is available for capital gains realised from the sale of shares and participation interests in Kazakhstan legal entities or consortiums which are not engaged in subsurface activities.

### Inter-company dividends
Inter-company dividends are exempt from CIT in the hands of the recipient, except for dividends paid by certain types of investment funds. This exemption also applies to stock dividends.

### Interest income
Interest income should be included in the aggregate annual income of a taxpayer and taxed at the CIT rate.

### Foreign exchange gain
Foreign exchange gain should be determined in accordance with the provisions of IFRS and Kazakhstan financial accounting legislation. The excess of foreign exchange gain over foreign exchange loss should be included in the aggregate annual income of a taxpayer.

### Foreign income
Foreign income is subject to ordinary CIT. *For additional information, please refer to Controlled foreign company regime in the Group taxation section.*

## Deductions

Allowable deductions generally include expenses associated with activities designed to generate income, unless specifically restricted for deduction by tax legislation. All expenses require supporting documentation.

### Depreciation and depletion
Tax depreciation is calculated using the declining balance method at depreciation rates ranging from 10% to 40%, applied to the balances of four basic categories of assets:

- Buildings and facilities: 10%.
- Machinery and equipment: 25%.
- Computers and equipment for information processing: 40%.
- Fixed assets not included into other groups, including oil and gas wells, transmission equipment, oil and gas machinery and equipment: 15%.

### Interest expense
Interest paid to unrelated third parties and credit partnerships created in Kazakhstan are deducted in full. For information about taxation of interest paid to related parties, *please refer to Thin capitalisation in the Group taxation section.*

### Foreign exchange loss
Foreign exchange loss should be determined in accordance with the provisions of IFRS and Kazakhstan financial accounting legislation. The excess of foreign exchange loss over foreign exchange gain is allowed for deduction.

### Deduction of taxes
Taxes remitted to the state treasury of Kazakhstan are deductible, except for the following:

- Taxes excluded prior to the calculation of the aggregate annual income.
- Income taxes paid in Kazakhstan and other countries.
- Taxes paid in preferential tax jurisdictions.
- Excess profit tax.

### Fines and penalties
Generally, deductions are available for forfeits, fines, and penalties which are not payable to the state budget.

### Net operating losses
Net operating losses accumulated prior to 1 January 2009 may be carried forward for up to three years. Net operating losses generated after 1 January 2009 may be carried forward for up to ten years. Loss carryback is not permitted under Kazakhstan tax legislation.

### Payments to foreign affiliates
Payments to foreign affiliates are deductible for CIT purposes if the payments are intended to generate income, are supported by documentation, and comply with Kazakhstan transfer pricing law.

## Group taxation

Kazakhstan tax law does not permit group taxation.

### Transfer pricing
Under Kazakhstan transfer pricing law, both customs and tax authorities have the right to monitor and adjust prices used in cross-border and certain domestic transactions when prices are perceived to deviate from market prices, even if such transactions are with unrelated parties. If the authorities adjust prices, the re-assessed liability will include taxes, duties, penalty interest, and fines to the state budget.

Transfer pricing rules impact the following transactions:

- International commercial transactions.
- Domestic transactions that directly relate to international commercial operations where:
  - the sale relates to a subsurface use contract
  - one of the parties has tax preferences, or
  - one of the parties has losses for two years prior the year of the transaction.

### Thin capitalisation
Deduction of interest paid to related parties, or to unrelated parties under related parties warranties, or to parties registered in a country with privileged taxation depends on the borrower's capital structure; such that deductible interest will be limited with reference to an 'acceptable' proportion of debt to equity (9:1 for financial institutions, 6:1 for all other entities). The list of jurisdictions with privileged taxation, the so called 'black list' established by the Government, includes 62 jurisdictions *(see the Kazakhstan summary at www.pwc.com/taxsummaries for a current list)*.

### Controlled foreign company (CFC) regime
Under the CFC rules, if a Kazakhstan legal entity has 10% or more of direct or indirect ownership in the share capital or voting rights in a non-resident company, registered or located in a country with privileged taxation *(see above),* the legal entity is subject to Kazakhstan CIT on the portion of the undistributed profits from the non-resident company.

## Tax credits and incentives

### Investment incentives
Investment incentives are available to certain Kazakhstan legal entities that fit certain criteria and possess objects (e.g. certain fixed assets), for which investment incentives may be applied. Generally, the investment incentives allow companies to fully deduct, for CIT purposes, the cost of the investment objects and the cost associated with their reconstruction and modernization either at once or within first three years of their use.

Based on the Investment Law, incentives are granted under an investment contract between the Government and companies and focus on priority sectors of the economy, as determined by the Government.

### Special economic zones
Currently, the following special economic zones have been established in Kazakhstan:

- 'Astana, the New City' in Astana (the expiry date is in 2015).
- 'Aktau Sea Port' in Aktau (the expiry date is on 1 January 2028).
- 'Ontustik' in Sairam district of South-Kazakhstan region (the expiry date is on 1 July 2030).
- 'National Industrial Petrochemical Park' in Atyrau region (the expiry date is on 31 December 2032).
- 'Burabai' in Akmola region (the expiry date is on 1 December 2017).

In order to enjoy the incentives available in special economic zones, a legal entity must meet the following requirements:

- It must be registered by the tax authorities in the territories of special economic zones.
- It must have no structural subdivisions beyond the boundaries of the territories of the special economic zones.
- 90% of aggregate annual income must constitute income earned from activities in the special economic zone consistent with the objectives of the special economic zone's formation.

The general incentives available for legal entities in special economic zones are:

- CIT: 100% reduction.
- Land tax: 0% rate.
- Property tax: 0% rate.

### Foreign tax credit
In general, the Kazakhstan Tax Code allows taxpayers to credit the foreign income taxes paid against the income taxes payable in Kazakhstan provided the documents confirming the payment of such taxes are available. However, a tax credit may not be granted in certain cases (e.g. for taxes paid in countries with privileged taxation).

## Withholding taxes

Kazakhstan-source income of non-residents and the proceeds from the sale of shares in subsurface users are subject to withholding tax (WHT) at the rates shown in the table below.

A non-resident legal entity is exempt from dividend WHT if:

- the holding period of shares or participation interest is greater than or equal to three years, and
- 50% or more of the charter capital value of the entity paying the dividends is not the property of a subsurface user.

| Types of income at a source of payment | Tax rate (%) |
|---|---|
| Dividends, capital gains, interest, royalties | 15 |
| Any income of an entity registered in a tax haven jurisdiction | 20 |
| Insurance premiums under risk insurance agreements | 10 |
| Income from international transportation services; insurance premiums under risk reinsurance agreements | 5 |
| Other income | 20 |

Benefits paid by a company to a shareholder, founder, participant, or related party, falling under the definition of constructive dividends, are taxed at a rate of 15%.

The rate of WHT may be reduced under an applicable DTT. A list of DTTs concluded and ratified by Kazakhstan is detailed below.

K

### *WHT rates between Kazakhstan and treaty countries as of 1 January 2011*

| Recipient | Dividends (%) | Interest (%) | Royalties (%) |
|---|---|---|---|
| No treaty | 15 | 15 | 15 |
| Austria | 5/15 (4) | 10 | 10 |
| Azerbaijan | 10 | 10 | 10 |
| Belarus | 15 | 10 | 15 |
| Belgium | 0/5/15 (8, 4) | 10 | 10 |
| Bulgaria | 10 | 10 | 10 |
| Canada | 5/15 (1) | 10 | 10 |
| China | 10 | 10 | 10 |
| Czech Republic | 10 | 10 | 10 |
| Estonia | 5/15 (2) | 10 | 15 |
| Finland | 5/15 (1) | 10 | 10 |
| France | 5/15 (4) | 10 | 10 |
| Georgia | 15 | 10 | 10 |
| Germany | 5/15 (2) | 10 | 10 |

Notes

1. 5% if the beneficial owner is a company owning, directly (or indirectly in case of Canada and the UK), at least 10% of the voting power of the company paying the dividends.
2. 5% (10% in case of Moldova) if the beneficial owner is a company that directly holds at least 25% of the capital of the paying company.
3. 10% if the beneficial owner is a company, directly or indirectly, holding at least 20% of the capital of the paying company.
4. 5% if the beneficial owner is a company (other than partnership), which owns not less than 10% of the capital of paying company.
5. 5% if the recipient is a company (other than partnership), which directly owns not less than 20% of the capital of paying company.
6. 10% if the actual owner is a legal entity, which owns not less than 30% of the authorized capital of the legal entity paying the dividends.
7. 10 % if the beneficial owner is a company which holds directly at least 30 % of the capital of the company paying the dividends.
8. 0% if dividends are paid in consideration of an investment of at least USD 50 million in the paying company.
9. 0% if the company receiving the dividends holds directly or indirectly at least 50% of the capital of the paying company and has made an investment in the company paying the dividends of at least USD one million, which investment is guaranteed in full or insured in full by the Government of the first Contracting State, the central bank of that State or any agency or instrumentality (including a financial institution) owned or controlled by that Government, and has been approved by the Government of the other Contracting State.
10. 5% (or 12.5% in case of Pakistan) if the beneficial owner is a company which directly owns (or indirectly in case of the Netherlands and Pakistan) at least 10% of the capital of paying company.
11. 5% if the beneficial owner is a company owning directly or indirectly, for the period of six months ending on the date on which entitlement to the dividends is determined, at least 10% of the voting power of the company paying the dividends.

## *Tax administration*

### *Returns*

The tax year in Kazakhstan is the calendar year. Annual CIT declarations are due by 31 March of the year following the tax year-end. However, a taxpayer may be granted a 30 calendar-day extension of the deadline upon request.

Certain taxpayers are required to submit their estimated calculation of monthly advance payments of CIT.

The deadline for other tax returns is the 15th calendar day of the second month following the reporting period. However, a taxpayer may be granted a 30 calendar-day extension of the deadline upon request.

### *Payment of tax*

For CIT, advance payments are due every 25th day of the month. Taxpayers with aggregate annual income during the tax period preceding the previous tax period of less than 325,000 times the amount of the monthly calculation index established for the relevant financial year (approximately USD 3.34 million) are exempt from the obligation to calculate and pay CIT advance payments. Payment of any outstanding CIT liabilities is required within ten calendar days following submission of the annual CIT declaration.

Most other taxes are payable by the 25th day of the second month following the end of reporting period.

### *Fines and interest penalties*

Interest penalties are assessed on late tax payments at 2.5 times the Kazakhstan National Bank refinancing rate. As of 1 November 2010, the National Bank refinancing rate was 7% per annum.

Substantial fines are imposed for understatement of tax liabilities. Generally, the fines amount to 50% of the understated tax.

For advance CIT payments, an administrative fine of 40% applies to understated advance tax payments compared with the final declared CIT, if the understated amount is greater than 20% of the final declared amount.

If a taxpayer is deemed to have concealed taxable income, a fine of 150% of the concealed amount may be assessed.

### *Statute of limitation*

The statute of limitation for tax purposes in Kazakhstan is five years. For taxpayers operating under subsurface use contracts, the tax authorities maintain the right to assess or revise the assessed amount of excess profit tax and other taxes and obligatory payments to the budget, where a methodology of calculation uses one of the following indices: internal rate of return (IRR) or internal revenue rate or R-factor (earning yield) during the effective period of a subsurface use contract and five years after the end of the effective period of a subsurface use contract.

## *Other issues*

### *Accounting system*

Kazakhstan legal entities should maintain accounts and produce financial statements in accordance with IFRS or national accounting standards (depending on the size of the company and other factors). In most cases, tax treatment follows accounting treatment.

## Significant developments

Historically, one of the biggest tax incentives for investors into Kenya was the ability to carry forward tax losses indefinitely. This is now restricted to a maximum of five years, including the year in which the loss arises. This change is applicable to the years of income commencing on or after 1 January 2010 and applies to businesses as well as individuals.

Taxpayers may submit an application to the Minister of Finance to request an extension of the period in which losses may be carried forward where a person has provided evidence of inability to extinguish the deficit within that period.

The 2010 Finance Act introduced a significant change on interest free loans advanced by a related party to a thinly capitalised company resident in Kenya by deeming an interest rate pegged to the average 91-day treasury bill rate.

The 2010 Finance Act also expanded the application of transfer pricing not only to matters dealing with anti-avoidance but also to other matters. In this case, the tax authority just has to prove that the prices or results were not aligned to the market, regardless of the intention of the taxpayer. This allows the revenue authority to expand the tax net by assessing companies based on their inter-company pricing irrespective of whether they are aimed at avoiding tax or not. This move therefore necessitates multinationals to be more careful with intercompany pricing arrangements. In addition, the 2010 Finance Act extended the ambit of transfer pricing to include entities owned by individual persons related by marriage, consanguinity (blood relations), or affinity (an aspect of lifting the veil of incorporation) in the case of companies which were otherwise independent legal persons.

## Taxes on corporate income

Companies (including a branch of an overseas company) are subject to Kenyan corporate income tax at the following rates on all income accrued in or derived from Kenya:

| Entity | Rate (%) |
|---|---|
| Resident companies (including subsidiary companies of foreign parent companies) | 30 |
| Branches of foreign companies | 37.5 |
| Export processing zone (EPZ) enterprises: | |
| First ten years | 0 |
| Next ten years | 25 |

| Entity | Rate (%) |
|---|---|
| Thereafter | 30 |
| Newly listed companies: | |
| 20% of shares listed: for three years | 27 |
| 30% of shares listed: for five years | 25 |
| 40% of shares listed: for five years | 20 |

### *Industry-specific rates*
There are special provisions for non-resident shipping companies and airlines; non-residents providing broadcast, internet, and messaging services; and non-resident petroleum industry subcontractors providing exploration and production services in Kenya.

## *Corporate residence*

A company is considered resident in Kenya if it meets one of the following criteria:

- It is incorporated under Kenyan laws.
- The management and control of company affairs are exercised in Kenya.
- The company has been declared by the minister, by announcement in the gazette, to be resident in Kenya for any year of income.

### *Permanent establishment (PE)*
A business carried on in Kenya through a fixed place of business gives rise to a PE for branch purposes, as does a building site, or a construction or assembly project, that has existed for six months or more.

## *Other taxes*

### *Value-added tax (VAT)*
VAT is levied on the supply of taxable goods and services in Kenya, as well as on the importation of taxable goods and services into Kenya.

The following VAT rates apply in Kenya:

| Activity | VAT rate (%) |
|---|---|
| Standard rate on all goods and services that are neither exempt nor zero-rated | 16 |
| Electricity, diesel oil, and residual fuel oils | 12 |
| Export of goods and services, certain other goods and services | 0 |

Certain goods and services are designated as exempt from VAT. Exempt supplies do not count towards the registration threshold *(see below),* and the related input VAT is not recoverable.

Zero rating applies to the export of goods or services. The supply of goods or services to certain designated persons and projects are also zero rated.

The threshold for VAT registration is taxable supplies of 5 million Kenyan shillings (KES) per year. Registered persons must record their turnover using an approved electronic tax register or signature device. Only registered persons may recover input tax. An input tax credit is not available for several items such as non-commercial vehicles, office furniture, and hospitality and entertainment services. An excess input tax credit may be carried forward or refunded, subject to certain conditions.

Some entities such as central and local governmental entities, state corporations, banks, and insurance companies are required to withhold VAT on supplies received and pay the tax directly to the revenue authority.

Suppliers with turnover of less than KES 5 million in a period of 12 months are required to pay turnover tax at the rate of 3% based on gross sales.

### *Excise duty*

Excise duty is imposed on the manufacture or importation of certain commodities, principally bottled water, soft drinks, cigarettes, alcohol, perfumes, fuels, and motor vehicles at varying rates. There are various classes for each category and commodity where different rates of duty apply. Excise duty is also levied on mobile cellular phone and wireless telephone services at the rate of 10% and gambling services at the rate of 5%.

### *Import (customs) duty*

Import duty is levied under the East African Community Customs Management Act. Imports of goods are generally subject to import duty of 0% for raw materials and capital goods, 10% for intermediate goods, and 25% for finished goods. Enterprises established in an EPZ are exempt from customs duty on machinery and inputs for exported products. Under an import duty remission scheme, import duty may be remitted for raw materials used to manufacture goods for export. This is subject to a requirement for proof of export and execution of a bond.

### *Stamp duty*

Stamp duty is payable on transfer of properties. If real property, stamp duty is payable at the rate of 4% on the value of the land as assessed by a government valuer. For other properties, other rates of stamp duty apply as specified in the Schedule to the Stamp Duty Act. The rates of stamp duty are shown below:

| Activity | Rate (%) |
|---|---|
| Transfer of immovable property - Urban | 4 |
| Transfer of immovable property - Rural | 2 |
| Registration of share capital | 1 |
| Transfer of shares or marketable securities | 1* |
| Registration of a debenture or mortgage | 0.1 |
| Lease - Between one and two years | 1% of annual rent |
| Lease - Any other period | 2% of annual rent |

* Transfer of quoted securities is exempt.

Land purchased for expansion and development of schools is exempt from stamp duty, provided the land does not revert to any other use and approval has been obtained from the relevant authorities.

### *Property rates*

Rates are payable to local authorities on real estate based on the sale value of the property.

### Catering levy
This is a levy which is payable to Catering Levy Trustees by hotels and restaurants at a rate of 2%.

### Compensating tax
Where a company pays dividends out of profits that have not been subject to corporate income tax, the company will be liable to pay a compensating tax. The compensating tax rate is 42.8% of the dividends that have been distributed out of the untaxed profits. This tax effectively ensures that all distributions are paid out of profits that have been subject to corporate income taxes, prior to distribution.

### Advance tax on motor vehicles
Advance tax is payable at varying rates per year on commercial vehicles and is creditable against corporate income tax for the year.

### Fringe benefit tax
The fringe benefit tax is payable by companies at the rate of 30% of the benefit arising from a loan advanced to an employee at an interest rate lower than the rates prescribed by the Commissioner. The directors and employees are not personally taxed on the benefit.

## Branch income

The profit of a PE is taxed at the branch income tax rate of 37.5%, but there is no further taxation on the distribution of branch profits. However, there are certain restrictions with respect to costs paid to the head office.

## Income determination

### Inventory valuation
Inventory is stated at the lower of cost or net realisable value, with the exception of biological assets whose value is prescribed by the Commissioner.

### Capital gains
Taxation of capital gains was suspended in 1985.

### Stock dividends
Stock dividends issued in a ratio not proportionate to shareholding of the existing equity are considered as taxable dividends to the extent of the disproportionate increase in the value of the ownership of the company.

### Foreign income
Income from a business carried on partly in Kenya by a resident company is taxed on a worldwide basis.

## Deductions

The general principle in Kenya is that expenses are deductible if they are incurred wholly and exclusively to generate taxable income.

### *Depreciation and depletion*
No deduction is allowed for accounting depreciation or impairment. However, capital allowances are permitted at varying rates (on a straight-line basis) for certain assets used for business purposes, including buildings and machinery used in manufacturing, industrial buildings and hotels, machinery and plant, agricultural works, and mining.

#### Investment deduction
Expenditure incurred of a capital nature by manufacturers on the construction of an industrial building and/or the installation of machinery qualifies for an investment deduction of 100% irrespective of the location of the investment. For investment outside the municipalities of Nairobi, Mombasa, and Kisumu, subject to certain conditions, for both manufacturers and non-manufacturers, the rate for investment deduction is 150%.

#### Industrial building allowance
Hostels and certified education buildings qualify for an industrial building allowance at a rate of 50%.

Qualifying rental residential or commercial buildings qualify for an industrial building allowance at a rate of 25%.

Other qualifying buildings (including hotels) qualify for an industrial building allowance at a rate of 10%.

#### Wear and tear allowance
Expenditures incurred on heavy earth moving equipment qualify for a wear and tear allowance at a rate of 37.5%, while other self propelling vehicles (including aircraft) qualify for a wear and tear allowance at a rate of 25%.

Computers and peripheral computer hardware qualify for a wear and tear allowance at a rate of 30%.

Capital allowances were introduced, effective 1 January 2010, at a rate of 20% for computer software and 20% for telecommunications equipment not falling within the 12.5% category referred to below, purchased and used by telecommunications operators.

All other machinery (including ships) qualifies for a wear and tear allowance at a rate of 12.5%.

Telecommunications equipment purchased by a telecommunication operator enjoys a wear and tear allowance of 20%.

### *Charitable contributions*
Donations to charities and for certain public works are deductible, subject to certain conditions.

### *Taxes*
Kenyan income taxes are not deductible while computing income tax of a person. However, foreign income taxes incurred are generally deductible as an expense if tax credit relief is not available under a double tax agreement (DTA).

### *Net operating losses*
As of 1 January 2010, losses calculated under the tax rules may be carried forward against income from the same source for a maximum of five years, including the year in which the losses arise. Losses cannot be carried back, except for petroleum companies where losses can be carried back for three years from a year of income which the petroleum company has ceased permanently to produce petroleum.

### *Payments to foreign affiliates*
Transfer pricing rules based on Organisation for Economic Co-operation and Development (OECD) principles apply to transactions with foreign affiliates (both companies and branches/PE). Additionally, there are restrictions on the deductibility of expenses incurred outside of Kenya by non-residents with a Kenyan PE. Amendments in the 2010/2011 Finance Act stated that transfer pricing is no longer limited to anti-avoidance.

## *Group taxation*

Each company in a group is taxed as a separate entity in Kenya.

### *Transfer pricing*
A company that has related party transactions is required to ensure such transactions are at arm's length. The company is therefore required to prepare a transfer pricing policy to justify the pricing arrangements. The Commissioner is allowed to adjust the prices if they do not conform to the arm's-length principle. The policy should be prepared and submitted to the Kenya Revenue Authority (KRA) upon request.

### *Thin capitalisation*
In Kenya, a company is thinly capitalised if all of the following occur:

- The company is in control of a non-resident person alone or together with four or fewer persons.
- The company is not a bank or financial institution.
- The highest amount of all loans held by the company at any time exceeds the sum of three times the revenue reserves (including accumulated losses) and the issued and paid up share capital of all classes of shares of the company.

A company which is thinly capitalised cannot claim a deduction on the interest expense incurred by the company on loans in excess of three times the sum of revenue reserves and issued and paid up capital of all classes of shares of the company. The company also cannot claim a deduction for any foreign exchange loss realised by the company with respect to any loans from its shareholders in the period that the company remains thinly capitalised.

## *Tax credits and incentives*

### *Foreign tax credit*
For business income, there is no relief for foreign tax paid except as provided for by a double tax treaty (if existent) between Kenya and the other country.

### *Investment deduction*
Qualifying investments exceeding KES 200 million incurred outside Nairobi or the municipalities of Mombasa or Kisumu are allowed an investment deduction of 150%.

All other qualifying investments are allowed a 100% investment deduction in the year the asset is put into service.

### *Export processing zone (EPZ)*

Companies located in an approved EPZ, principally to export goods, are taxed at a 0% corporate income tax rate for ten years from its commencement and at a rate of 25% for the next ten years.

### *Listed companies*

Companies listed on the Nairobi Stock Exchange are entitled to reduced rates of income tax for a period, depending on the proportion of share capital listed *(see the Taxes on corporate income section for the rates)*.

## *Withholding taxes*

Withholding tax (WHT) is levied at varying rates (3% to 30%) on a range of payments to residents and non-residents. Resident WHT is either a final tax or creditable against corporate income tax. Non-resident WHT is a final tax.

| | Resident WHT rate (%) | Non-Resident WHT rate (%) |
|---|---|---|
| Dividend > 12.5% voting power | Exempt | 10 |
| Dividend < 12.5% voting power | 5 | 10 |
| Interest: | | |
| Bearer instruments | 25 | 25 |
| Government bearer bonds (maturity ≥ 2 years) | 15 | 15 |
| Bearer bonds (maturity ≥ 10 years) | 10 | N/A |
| Other | 15 | 15 |
| Qualifying interest: | | |
| Housing Bonds | 10 | N/A |
| Bearer instruments | 20 | N/A |
| Other | 15 | N/A |
| Royalty | 5 | 20 |
| Management or professional fees | 5 | 20 |
| Rent/leasing: | | |
| Immovable property | N/A | 30 |
| Others | N/A | 15 |
| Pension/retirement annuity | N/A | 5 |
| Contractual fees | 3 | 20 |

Lower rates may apply to non-residents where there is a double tax agreement in force. The following table shows the double tax treaty rates:

| Recipient | Dividends (%) | Interest (%) | Royalties and management & professional fees (%) |
|---|---|---|---|
| Canada | 15 | 15 | 15 |
| Denmark | 20 | 20 (1) | 20 |
| Germany | 15 | 15 (1) | 15 |

| Recipient | Dividends (%) | Interest (%) | Royalties and management & professional fees (%) |
|---|---|---|---|
| India | 15 | 15 | 20 (4) |
| Norway | 15 | 20 (1) | 20 |
| Sweden | 15 | 15 | 20 |
| United Kingdom | 15 | 15 (1) | 15 (2) |
| Zambia | 0 (3) | 15 | 20 |

Notes

1. Interest paid by the government and the Central Bank of Kenya is tax-exempt.
2. The rate is 12.5% for management and professional fees.
3. No Kenya tax is due if the dividend is subject to tax in Zambia.
4. The rate is 17.5% for management and professional fees.

Where the treaty rate is higher than the non-treaty rate, the lower rate applies.

## *Tax administration*

### *Returns*

Resident companies and PEs of non-resident companies must file a self-assessment tax return accompanied by audited or certified accounts annually. The return is due within six months following a company's year end.

K

### *Payment of tax*

Quarterly payments of tax must be made during the year based on the lower of 110% of the previous year's liability or an estimate of the current year's liability. Agricultural companies are required to pay estimated tax in two instalments of 75% and 25% during the year. Any balance of tax at the end of the year must be paid within four months of the financial year end.

### *Payment of agency taxes*

The tax withheld from payments must be paid by the 20th day of the month following the month in which the deduction is made.

### *Penalties for non-compliance*

If a self-assessment tax return is not submitted by the due date, a penalty of 5% on the unpaid tax for the year may be imposed, subject to a minimum of KES 10,000. Failure or late submission of an EPZ company return will be subject to a penalty of KES 2,000 per day for as long as the failure continues.

A penalty of 20% and interest at 2% per month are imposed on underestimation and late payment of instalment tax and any balance of tax. Interest is charged only on the principal tax due.

Failure to make a deduction or to remit the WHT deducted attracts a penalty equal to 10% of the amount of tax involved (subject to a maximum of KES 1 million) and accrues interest at 2% per month.

## Significant developments

### Tax credits to encourage job-creating investments

The sunset of the temporary tax credit for facility investments has been extended until 31 December 2011 at a reduced rate of 4% to 5%, based on company size and location.

Additionally, a 1% tax credit for job-creating investments can simultaneously be applied to investments made until 31 December 2011. The credit for job-creation may not exceed the ceilings set at 10 million Korean won (KRW) (or KRW15 million per employee aged between 15 and 29) multiplied by net new employment. A carryforward of the credit is allowed as long as there is an increase in employment. Further details, such as conditions and calculation method, on applying the new tax credit will be prescribed in the presidential decree.

### Foreign direct investment (FDI) incentive limitations

The FDI credit has been amended to limit incentives granted to qualified FDIs. The ceiling has been set to encompass both investment amount and job-creation. In terms of investment amount, the level of incentives for FDI has been reduced to 70% of the aggregated FDI amount for companies benefiting from a 7-year incentive period (50% ceiling for companies enjoying a 5-year incentive period). In terms of job-creation, the level of incentives for FDI has been reduced to the lower of either 20% of the aggregated FDI amount or KRW 10 million times the company's net increase in employment.

Companies that have enjoyed tax benefits based on job-creation will be subject to tax assessment in cases where there is a net decrease in employment within the subsequent two years in comparison to the year that the relevant tax credit was obtained.

The amended regulation will be applicable for FDIs made on or after 1 January 2011.

### Tax law changes upon the adoption of International Financial Reporting Standards (IFRS)

#### Depreciation of tangible assets

Under the existing tax law, depreciation is allowed for tax deduction only when expensed for book purposes. The same position would be maintained even after the implementation of IFRS in Korea (K-IFRS); but in order to alleviate any dramatic increase in tax burden due to decreased depreciation expenses, additional expense deduction through tax adjustment may be allowed on a temporary basis. For tax purposes, depreciable assets acquired on or before 2013 may be depreciated at the rate equivalent to the average of three years before the adoption of K-IFRS. Depreciable assets acquired after 2014 may be depreciated using the tax useful lives. This change is applicable as of the fiscal year that includes 31 December 2010.

**Functional currency**
In instances where the taxpayer adopts to use a foreign currency as its functional currency, there will be three ways to calculate the corporate income tax (CIT) base: (i) calculate the tax base using the financial statements in functional currency and translate it into KRW; (ii) prepare the financial statements in KRW and calculate the tax base; or (iii) translate the financial statements into KRW and calculate the tax base. Once elected, the same method shall be consistently used. This change is applicable as of the fiscal year that includes 31 December 2010.

**Bad debt allowance**
Although companies could set aside bad debt allowances based on reasonable estimates under the old generally accepted accounting principles (K-GAAP), the new GAAP for non-K-IFRS users and K-IFRS users requires objective evidence to recognise the allowance. This stricter rule is expected to create disproportionately higher taxable income on the first year of adoption. As K-IFRS is expected to be revised in a way to use the 'estimated loss model' from 2013 and thereafter (in which case the allowance would be increased significantly at the point of first implementation), the tax recognition of the income in the first year of K-IFRS adoption would be deferred for two years until the new model is implemented. This change is applicable as of the fiscal year that includes 31 December 2010.

### *Reporting requirements for foreign bank and financial accounts*

The amendments include a new provision requiring residents and domestic companies to file a report with the National Tax Service (NTS) of their bank and financial accounts in a foreign country if the aggregate value of these accounts exceeds KRW 1 billion at any time during the calendar year.

Foreign account holders must file their concerned overseas account information with the governing tax office for the period from 1 June to 30 June of the following year. For failure to comply with the filing requirements or incorrect filing, the account holder shall be subject to fines equaling 10% of the non-compliance amount or the difference between the amount actually filed and the amount which should have been filed. The new requirement will be applicable to overseas banking accounts owned since January 2010 with a lower penalty rate of 5% on holdings during 2010.

## *Taxes on corporate income*

The basic Korean CIT rates for fiscal year 2010 and fiscal year 2011 are 10% on the first KRW 200 million of the tax base and 22% for the excess. In fiscal year 2012 and thereafter, the respective rates will be 10% and 20%.

Capital gains from the disposal of non-business purpose land or houses may be subject to additional capital gains tax at rates ranging from 10% to 40% after the above CIT.

Resident corporations are taxed on their worldwide income, whereas non-resident corporations with a permanent establishment (PE) in Korea are taxed only to the extent of their Korean-sourced income. Non-resident corporations without a PE in Korea are generally taxed through a withholding tax (WHT) on each separate item of income.

### *Minimum tax*
Corporate taxpayers are liable for the minimum tax, which is defined as the greater of 10% (to the tax base of up to KRW 10 billion, 11% on the excess up to KRW 100 billion, 14% on the excess above KRW 100 billion) of the taxable income before various

deductions and exemptions pursuant to the Special Tax Treatment Control Law (STTCL) applied to arrive at adjusted taxable income or the actual tax after various deductions and exemptions.

For small and medium enterprises (SMEs), the minimum tax is the greater of 7% of adjusted taxable income or actual tax liability.

### Resident tax surcharges

A resident tax surcharge of 10% on CIT liability is assessed each year.

### Agriculture and fishery surtax

When a corporate taxpayer claims certain tax credits or exemptions under the STTCL, a 20% agriculture and fishery surtax is levied on the reduced CIT liability.

## Corporate residence

A corporation having its head office or principal office in Korea is a resident corporation. A corporation with a place of effective management in Korea is also treated as a resident corporation.

### Permanent establishment (PE)

A non-resident corporation is generally deemed to have a tax presence (i.e. PE) in Korea if one of the following applies:

- It has any fixed place of business in Korea, where the business of the entity is wholly or partly carried on.
- It is represented by a dependent agent in Korea, who has the authority to conclude contracts on its behalf and who has repeatedly exercised that authority.
- Its employee(s) provides services in Korea for more than six months within 12 consecutive months.
- Its employee(s) continuously or repeatedly renders similar services in Korea for two or more years, even if each service visit is for less than six months within 12 consecutive months.

Exceptions to a PE in Korea for a non-resident corporation include fixed places of business used only for purchasing or storage of property at which no sales activities, advertising, publicity, collecting, or furnishing of information, or other activities that are preparatory or auxiliary to the conduct of business, occur.

## Other taxes

### Value-added tax (VAT)

VAT is levied at a rate of 10% on sales and transfers of goods and services, except zero-rated goods and services (e.g. goods for exportation, services rendered outside Korea, international transportation service by ships and aircraft, other goods and services supplied for foreign exchange earnings) and exempt goods and services (e.g. basic life necessities and services, such as unprocessed foodstuffs and agricultural products, medical and health service, finance and insurance services, duty-exempt goods).

Electronic VAT invoicing is a compulsory requirement as of 1 January 2011. If a taxpayer fails to issue the electronic VAT invoice or report electronically to tax authorities, the relevant penalties shall be imposed.

### *Acquisition taxes*

Acquisition tax is charged on the price of real estate, motor vehicles, construction equipment, golf membership, boats, etc. The minimum rate is 2%. A 6% tax is charged on acquisitions in the Seoul metropolitan area, and a 10% rate is applied to luxury items, such as villas, golf courses, and yachts.

### *Customs duties*

Customs duties are generally assessed on imported goods. 'Importation' refers to the delivery of goods into Korea (in case of goods passing through a bonded area, delivery of such goods into Korea from such a bonded area) to be consumed or to be used in Korea.

### *Excise taxes*

The individual consumption tax is imposed on specific luxury goods, high-priced durable consumer goods, goods subject to consumption restraints, and certain luxury activities for the purpose of supplementing the VAT single-rate scheme. Tax rates range from 2% to 20%; in certain circumstances, a fixed amount is levied (e.g. KRW 12,000 per person for golf course greens fees).

### *Property taxes*

An annual tax ranging from 0.07% to 5% is charged on the statutory value of land, buildings, houses, vessels, and aircraft. Five times the property tax rate is applied to property that is newly constructed or expanded in the Seoul metropolitan area for five years from its relevant registration date.

### *Stamp taxes*

The stamp tax is levied on a person who prepares a document certifying establishment, transfer, or change of rights to property in Korea. The stamp tax ranges from KRW 100 to KRW 350,000, depending on the type of taxable document.

### *Securities transaction tax*

A securities tax of 0.5% is imposed on the total value of securities at the time of transfer, but the government is authorised to adjust the tax rate in certain circumstances. The flexible tax rate prescribed by the Presidential Decree is 0.3% on transactions in both the Korea Stock Exchange and Korean Securities Dealers Automated Quotations (KOSDAQ).

### *Registration taxes*

Registration tax ranging from 0.1% to 5% is also charged upon the transfer of title and incorporation. Registration upon the transfer of title and incorporation for corporations located in large cities may be subject to three times the rates otherwise applied.

## *Branch income*

In general, a branch office of a foreign corporation is taxed in the same manner as resident companies.

Remittance of retained earnings from a Korean branch to its head office is subject to reporting to a designated foreign exchange bank in Korea under the Foreign Exchange Transaction Act.

If the tax treaty between Korea and the country in which a foreign corporation is residing allows the imposition of a branch profits tax, the tax is imposed on the adjusted taxable income of the Korean branch.

Where applicable, the branch profit tax is levied in addition to the regular CIT, which is imposed at the rate of 20% (or at a reduced rate as provided in a treaty) of the adjusted taxable income of the Korean branch.

## Income determination

Gross income consists of gains, profits, income from trade and commerce, dealings in property, rents, royalties, and income derived from any ordinary transactions carried on for gain or profit. For the purposes of taxation, gross income does not include income derived from gains from capital transactions such as capital surplus, gains on reduction of paid-in capital, gains from merger, divisions, comprehensive share transfer, or comprehensive share exchange. But, gains from treasury stock transactions are taxed, and losses are deductible from taxable income.

### Inventory valuation

Inventories generally are stated at the lower of cost or market (LCM). Any one of seven inventory valuation methods, including LCM, specific identification, first in first out (FIFO), last in first out (LIFO), weighted-average, moving average, and retail method can be elected for tax purposes. The method elected should be applied consistently each year unless an application for change has been submitted before three months from the year-end. Different valuation methods may be used for different categories (i.e. products and merchandise, semi-finished goods and goods in process, raw materials, goods in stock) and different business places.

### Stock valuation

The valuation of securities or bonds shall be made using the cost method. For cost method, the weighted average cost method or moving average cost method shall be applied for the purpose of valuation of securities and individual cost method may be used for valuation of bonds.

### Dividend income

All distributions to shareholders are taxed as dividend income, whether paid in cash or in stock.

However, a qualified domestic holding company that owns more than 80% (40% in case of listed subsidiary) share ownership in its domestic subsidiary will receive a 100% deduction for dividends while an 80% deduction is allowed for share ownership of 80% (40% in case of listed subsidiary) or less. A domestic corporation other than a qualified holding company will also receive a 100% deduction for shared ownership of 100%, 50% for more than 50% (30% in case of listed subsidiary) share ownership, and 30% for share ownership of 50% (30% in case of listed subsidiary) or less.

### Interest income

Except for certain cases, all interest income must be included in taxable income. Generally, interest income is included in taxable income as it is received.

### Rents/royalties income
A company engaged in the business of the rental of real properties is also taxed on the deemed rental income calculated at the financial institutions' interest rate on the lease security money as well as on the recognised rental income. Royalties are considered to be taxable income when earned.

### Gains and losses on foreign currency translation
Non-banking companies are allowed to recognise unrealised gains and losses on foreign currency translation of their monetary assets in a foreign currency. This recognition will also be allowed with respect to currency forward transactions and swaps to hedge foreign exchange risks of such assets. Before fiscal year 2010, only banks were allowed to recognise such gains and losses with respect to foreign currency assets and liabilities as well as currency forwards or swaps.

### Foreign income
Resident corporations are taxed on their worldwide income. A Korean company is taxed on its foreign-sourced income as earned at normal CIT rates. To avoid double taxation, taxes imposed by foreign governments on income recognised by a resident company are allowed as a credit against the income taxes to be paid in Korea or as deductible expenses in computing the taxable income. In general, foreign taxes will generally be applied as credit rather than as a deduction.

Income of foreign subsidiaries incorporated outside Korea is not included in the taxable income of a resident company. Income is recognised by a resident company only upon the declaration of dividends from a foreign subsidiary. Therefore, the Korean tax impact may be delayed through deferring the declaration of dividends unless the anti-tax haven rule under the Law for Coordination of International Tax Affairs (LCITA) is triggered.

Korean anti-tax haven rules state that accumulated earnings (distributable retained earnings) of a resident company's subsidiary located in a low tax jurisdiction (i.e. a tax haven where the effective tax rate on the taxable income for the past three years averages 15% or less) are taxed as deemed dividends to the resident company, which has direct and indirect interest of 20% or more in such subsidiary.

The foreign tax paid by a qualifying subsidiary is eligible for foreign tax credit against the dividend income of a resident company if an existing tax treaty between Korea and the country of which the foreign subsidiary is a resident allows it. A qualifying subsidiary is one in which a resident corporation owns 10% or more of its shares for more than or equal to six consecutive months after the date of dividend declaration. Unused foreign tax credits can be carried forward for five years.

## Deductions

In general, expenses incurred in the ordinary course of business are deductible, subject to the requirements for documentary support.

A corporation's disbursements of more than KRW 30,000 for goods or services provided are required to be supported by corroborating documents, such as credit card sales vouchers, cash receipts, and tax invoices. The corporation is required to maintain these documents for five years. If the corporation fails to maintain proper evidences, a 2% penalty shall be levied on the amount of disbursement.

### Accrued expenses

Accrued expenses are not deductible until the expenses are fixed or paid.

### Contingent liabilities

In general, contingent liabilities are not deductible, except for reserves under the following items, which are counted as losses within the tax limit:

- Reserves for retirement allowance.
- Reserves for bad debts.
- Liability reserves and emergency reserves prescribed in the Insurance Business Law.
- Reserves for non-profit organisations.
- Reserves for the write-off of a compensation claim set aside by trust guarantee funds in each business year.

The amounts enumerated below are also counted as losses in calculating income for the business year:

- The amount of gains from insurance claims used to acquire the same kinds of fixed assets as the lost fixed assets, or to improve the damaged fixed assets within two years after the first day of the business year following the business year in which the gains fall.
- The amount of a beneficiary's share of construction costs received by a domestic corporation engaged in the electricity or gas business, etc., used for the acquisition of fixed assets.
- The amount of the national treasury subsidies actually used for acquisition or improvement of fixed assets for business.

### Depreciation and amortisation

With the exception of land, depreciation of all property, plant, and equipment (PP&E), which includes buildings, machinery, and auto-vehicles, used to generate income is allowed as a deduction for CIT. Generally, interest on debt acquired to purchase, manufacture, or construct PP&E must be capitalized until the PP&E is operational. This does not apply to the interest associated with the expansion or improvement of existing PP&E. A detailed list of fixed assets, gross values (including capitalized interest), the useful lives of the assets, and the current year's depreciation charge must be submitted to the tax authorities when filing the annual CIT return.

The tax law allows the following methods for calculating depreciation:

- Straight-line or declining-balance method for tangible fixed assets, other than plant and buildings.
- Straight-line method for plant, buildings, and intangible assets.
- Service-output or straight-line method for mining rights.
- Service-output, declining-balance, or straight-line method for tangible fixed assets used in mining.

In determining depreciation using a straight-line method, salvage value of the assets is regarded as zero. However, where the declining-balance method is used, 5% salvage value is required. Changes in the depreciation method must be approved by the tax authorities in advance, and such approval may only be obtained in exceptional cases (i.e. merger between two corporations having different depreciation methods). Although the tax law specifies the useful lives of assets, the useful life of a fixed asset can be increased or decreased by 25% of the specified useful life at the taxpayer's election. The selected depreciation method should be consistently applied.

The standard useful life and the scope of useful life for assets are provided in the following table:

| Tangible fixed assets | Standard useful life / Scope of useful life (years) |
|---|---|
| Autos and transportation equipment (excluding those used for transportation businesses, leasing service of machinery, equipment, and consumer goods), tools, equipment, and fixtures | 5 / 4 to 6 |
| Ships and aircraft (excluding those used for fishery, transportation, leasing service of machinery, equipment, and consumer goods) | 12 / 9 to 15 |
| All buildings and constructions of brick structure, block structure, concrete structure, mud structure, mud wall structure, wooden structure, wooden frame mortar structure, and other structures | 20 / 15 to 25 |
| All the buildings and constructions of steel-frame/iron bar concrete structures, stone structures, brick/stone structures, steel-frame structures | 40 / 30 to 50 |

| Intangible fixed assets | Useful life (years) |
|---|---|
| Goodwill, design rights, utility model rights, trademarks | 5 |
| Patents, fishery rights, extraction rights under the law of development of mineral resources at the sea bottom (may elect activity method), right of management for toll roads, water rights, right of use for electricity and gas service facilities, right of use for tap water facilities for industrial use, right of use for general tap water facilities, right of use for heating facilities | 10 |
| Mining rights (may elect activity method), right of use for exclusive telegraph and telephone facilities, right of use for exclusive sidetracks, right of management for sewage disposal, right of management for tap water facilities | 20 |
| Right of use for dams | 50 |

Under the existing tax law, depreciation is allowed for tax deduction only when expensed for book purposes. The same position would be maintained even after the implementation of IFRS in Korea (K-IFRS); but in order to alleviate any dramatic increase in tax burden due to decreased depreciation expenses, additional expense deduction through tax adjustment may be allowed on a temporary basis. For tax purposes, depreciable assets acquired on or before 2013 may be depreciated at the rate equivalent to the average of three years before the adoption of K-IFRS. Depreciable assets acquired after 2014 may be depreciated using the tax useful lives. This change is applicable as of the fiscal year that includes 31 December 2010.

### *Goodwill*

Goodwill for tax purposes is defined as "value transferred with consideration, apart from transferred assets included in business transfer, valuated by taking into account business premium factors of the transferor such as permission/license, legal privileges, geographical advantages, business secrets, credit, reputation, transaction partners, etc." Goodwill may be amortised over five years using the straight-line method for tax purposes.

### *Organisational and start-up expenses*

Start-up expenses such as incorporation expenses, founders' salary, and registration fees and taxes are deductible when the expenses are actually paid.

### *Interest expense*
Interest incurred in the ordinary course of business is deductible as long as the related loan is used for business purposes. There are, however, a number of exceptions to the general rule, as follows:

- If borrowings from a foreign shareholder, or from a third party under a guaranteed payment guarantee by the foreign shareholder, exceed three times the equity of the relevant foreign shareholder, the paid interest and discount fee as to the relevant excessive portion will be treated as a dividend payment and not allowed as a deduction.
- Debenture for which the creditor is unknown.
- Bonds and securities on which recipient of interest is unknown.
- Construction loans and loans for the purchase of land and fixed assets up to the date on which the assets are acquired or completed must be capitalised as a part of the cost of the asset and depreciated over the life of the asset. Interest after the date of completion or acquisition is deductible as incurred.
- Interest on loans related to non-business purpose assets or funds loaned to related parties.

### *Bad debts*
A doubtful accounts reserve is allowed for tax purposes of up to 1% (2% for certain financial institutions) or the previous year's ratio of actual loss from bad debts to total balance of account receivables at year-end. Actual losses on bad debts are allowed when certain legal proceedings are satisfied or the statute of limitations has lapsed.

Although companies could set aside bad debt allowances based on reasonable estimates under the old generally accepted accounting principles (K-GAAP), the new GAAP for non-K-IFRS users and K-IFRS users requires objective evidence to recognise the allowance. This stricter rule is expected to create disproportionately higher taxable income on the first year of adoption. As K-IFRS is expected to be revised in a way to use the 'estimated loss model' from 2013 and thereafter (in which case the allowance would be increased significantly at the point of first implementation), the tax recognition of the income in the first year of K-IFRS adoption would be deferred for two years until the new model is implemented. This change is applicable as of the fiscal year that includes 31 December 2010.

### *Charitable contribution*
Donations to public interest entities, such as government authorities and social welfare organizations, as well as donations for academic research, technical development, etc., are classified as Bub-jung donations. Bub-jung donations are tax-deductible up to 50% of the total taxable income for the concerned fiscal year after deduction of net operating loss (NOL). Ji-jung donations to public entities prescribed by Corporate Income Tax Law (CITL) are also tax-deductible up to 10% of the total taxable income for the fiscal year after the deduction of deductible Bub-jung donations and NOL.

The amount in excess of such limit may be carried over for one or five years. Donations other than the statutory donations above will not be deductible for tax purposes.

### *Employee remuneration*
There is no statutory limit for employee remuneration, which includes salaries, wages, stipends, bonuses, retirement payments, pensions, and meal and housing allowances as well as all other kinds of subsidies, payments, and compensation. Remuneration of foreign employees is determined according to their engagement contracts.

### *Pension expense*

For tax purposes, severance allowance may be deducted up to 5% of the annual total amount of wages paid. However, the accumulated amount of the severance allowance reserve may not exceed 30% of the actual aggregate liability to employees for fiscal year 2010. This deduction limit will be reduced by 5% every year from 2011 to be entirely eliminated for 2016. If a corporation subscribes to severance insurance with an insurance company to cover future payments of retirement allowances, additional tax deductions beyond the limits described above are available.

As of 2011, employers hiring five or more employees are required to set aside retirement pensions for their employees. Defined contribution (DC) and defined benefits (DB) will be two available schemes for the new retirement pension system. Under the DC scheme, the premiums paid by the employer will be deductible upon payment while the reserve under the DB scheme would be deductible subject to the limit, similar to the existing severance insurance.

### *Payment for directors*

Bonuses paid to directors in excess of the amount determined in the articles of incorporation or at a shareholders' meeting, etc. are not deductible. Also, severance benefits paid to directors in excess of the amount prescribed in the tax law are not deductible.

### *Entertainment expenses*

Entertainment expenses of more than KRW 10,000 on an event basis must be supported by corporate credit card vouchers, cash receipts, or tax invoices in order to be deductible. In addition, the entertainment expenses in excess of the tax limit are not deductible.

The deductible limit for entertainment expenses in a business year is computed as:

- an amount calculated by multiplying KRW 12 million (KRW 18 million for a SME) by the number of months in the respective business year divided by 12, plus
- an amount calculated by multiplying the amount of gross receipts for a business year by the rates listed in the following table (in the case of receipts from transactions between related parties, 20% of the amount calculated by multiplying the receipts by following rates shall be applied).

| Amount of gross receipts (KRW) | Rate |
| --- | --- |
| 10 billion or less | 0.2% |
| 10 billion to 50 billion | KRW 20 million + 0.1% of the excess over KRW 10 billion |
| Greater than 50 billion | KRW 60 million + 0.03% of the excess over KRW 50 billion |

### *Insurance premiums*

Insurance premiums paid to an insurance company are deductible if the business enterprise is the listed beneficiary. Insurance premiums for which the beneficiary is the employee are also deductible; however, they are treated as salaries for the employees and are subject to WHT on earned income (this excludes the severance insurance premium or social security taxes that are borne by the corporations).

### *Fines and penalties*

Fines, penalties, and interest on underpayment of taxes are not deductible.

### *Net operating losses (NOL)*

In general, a NOL carryover is allowed for ten years for fiscal years commencing after 31 December 2008 (five years for the prior years). Along with the extension of the NOL carryforward period from five years to ten years, when a taxpayer uses the NOL incurred more than five years ago, the statute of limitation shall be one year from the filing due date of the fiscal year when the NOL is utilised.

Generally, loss carrybacks are not allowed. However, SMEs can carryback a NOL for one year.

### *Payments to foreign affiliates*

With sufficient supporting documentation, interest, royalty, and management service fees paid to foreign affiliates are deductible for CIT purposes.

Under the LCITA, the following conditions must be met in order for a management service fee to be deductible:

- The services must be provided based on an agreement entered into by the service provider prior to the service transaction.
- The provision of the service can be verified by a schedule of services, description of services, description of the company providing services and its employees, detailed explanation of expenses incurred, and other supporting documentation.
- A company must be able to anticipate the company's additional profit or reduced expense through the services provided by a foreign affiliate.
- Payment for the provided services should be consistent with arm's-length standards.

## *Group taxation*

The consolidated corporate tax filing system can be adopted from the fiscal year commencing on or after 1 January 2010 for a domestic corporation in cases where two or more wholly-owned subsidiaries exist. It is up to the election of the taxpayer, but it cannot be revoked for at least five years after the election of the consolidated tax filing.

### *Transfer pricing regime*

The LCITA authorises the tax authorities to adjust the transfer price based on an arm's-length price (ALP) and to determine or recalculate a resident's taxable income when the transfer price of a Korean company and its foreign counterpart is either below or above an ALP.

The LCITA lists the following methods for determining an ALP: the comparable uncontrolled price (CUP) method, the resale price method, and the cost-plus method. Furthermore, the Decree elaborates upon the profit-split method, the transactional net margin method (TNMM), and the Berry Ratio method as methods for determining an ALP based on profits arising from controlled transactions.

The method used and the reason for adopting that particular one for an ALP determination must be disclosed to the tax authorities by a taxpayer in a report submitted along with his annual tax return.

### *Thin capitalisation rules*

In cases where a Korean company borrows from its controlling shareholders overseas, an amount greater than three times its equity (six times in the case of financial institutions) interest payable on the excess portion of the borrowing is characterised as dividends to which the article on dividends in tax treaty applies and therefore are treated as non-deductible in computing taxable income.

### *Anti-tax haven rules*
In cases where a Korean company invests in a company located in a tax haven, which unreasonably has reserved profits in the controlled foreign company, the profits reserved therein shall be treated as dividends paid out to that Korean company (individual), despite the fact that the reserved profits are not actually distributed.

Anti-tax haven rules are intended to regulate a company that has made overseas investments of an abnormal nature. Thus, these anti-tax haven rules apply to those Korean companies that have invested in a company incorporated in a foreign country with an average effective tax rate of 15% or less on taxable income for the past three years.

However, if a company incorporated in such a tax haven country actively engages in business operations through an office, shop, or a factory, then the anti-tax haven rules will not apply.

### *Related party transactions*
Under the provision of CITL, the tax authorities may recalculate the corporation's taxable income when CIT is unreasonably reduced due to transactions with related parties. Generally, if the discrepancy between the transaction price and fair market value exceeds 5% of the fair market value or KRW 300 million, the transaction will be subject to this provision.

## *Tax credits and incentives*

### *Foreign tax credit*
Taxes imposed by foreign governments on income recognised by a resident taxpayer are allowed as a credit within the limit against the income taxes to be paid in Korea, or as deductible expenses in computing the taxable income. In general, foreign taxes will be applied as credit rather than as a deduction. The excess foreign tax credit can be carried forward five years.

### *Investment incentives*
Tax credits are generally available for qualified investment in facilities for productivity enhancement, safety, job-creating investments, etc.

#### Tax credit for investment in facilities for productivity enhancement
If a resident makes an investment in facilities or equipment to increase productivity by no later than 31 December 2012, then 3% (7% in the case of SMEs) of such investment amount shall be deducted from CIT. The unused tax credit can be carried forward five years.

#### Tax credit for investment in facilities for safety
If a resident or a domestic corporation makes an investment in a facility (excluding any investment in used assets) for safety that is considered necessary for industrial purposes no later than 31 December 2012, then an amount of 3% of such investment shall be deducted from CIT. The unused tax credit can be carried forward five years.

### Tax credits to encourage job-creating investments

The sunset of the temporary tax credit for facility investments has been extended until 31 December 2011 at a reduced rate of 4% to 5%, based on company size and location.

Additionally, a 1% tax credit for job-creating investments can simultaneously be applied to investments made until 31 December 2011. The credit for job-creation may not exceed the ceilings set at KRW10 million (or KRW15 million per employee aged between 15 and 29) multiplied by net new employment. A carryforward of the credit is allowed as long as there is an increase in employment. Further details, such as conditions and calculation method, on applying the new tax credit will be prescribed in the presidential decree.

### *Research and development (R&D) tax incentives*

The STTCL provides various tax incentives to stimulate R&D activities. These include deduction of R&D reserve, tax credit for research, and manpower development expenses.

### Reserves for development of technology and manpower

In cases where a corporation has set aside development of technology and manpower reserves for expenses on development of technology and manpower on or before 31 December 2013, those reserves are considered as deductible expenses up to 3% of annual sales.

### Tax credit for development of technology and manpower

Companies presently claim a tax credit in relation to qualifying R&D expenditure to the extent of either (i) 3% to 6% (25% for SMEs) of the current R&D expenses or (ii) 40% (50% for SMEs) of the incremental portion of the current R&D expenses over the average of the previous four years. The tax credit has been extended to include R&D in relation to core technologies as authorised by government ministries as well as pre designated strategic growth industries until the end of December 2012, and for these industries, the credit rate for the current R&D expenditure is 20% (30% for SMEs).

### Tax credit for investment in facilities for technology and human resources development

A corporation purchasing facilities prescribed in the Presidential Decree with the purpose of R&D and job training is eligible for tax credit up to 10% of such investment. The unused tax credit can be carried forward five years.

### *Energy/environmental incentives*

### Tax credit for investment in energy-economizing facilities

If a resident makes an investment (excluding any investment in used goods) not later than 31 December 2011 in energy-economising facilities, 10% of such investment shall be deducted from CIT. The unused tax credit can be carried forward five years.

### Tax credit for investment in facilities for environmental protection

If a resident makes an investment (excluding any investment in used goods) in any facility for the purpose of environmental conservation no later than 31 December 2013, then 10% of the investment amount shall be deducted from CIT. The unused tax credit can be carried forward five years.

### *Employment incentives*

Under the STTCL, where a SME has regular employees that exceed the prior year's number of regular employees for the period from 1 March 2010 to 30 June 2011, KRW

3 million multiplied by the excess number of employees is deductible from CIT for the year. The unused tax credit can be carried forward five years.

### *Inbound investment incentives*

The Korean government provides various incentives and benefits for inducing foreign investment under the Foreign Investment Promotion Law.

Foreign invested companies that engage in certain qualified high-technology businesses can apply for 100% exemption from CIT for five years, beginning from the first year of profitable operations (from the fifth year, if not profitable until then) and a 50% reduction for the following two years in proportion to the foreign shareholding ratio. An exemption from WHT on dividends is available for foreign investors in the same manner as above during the same grace period. In addition, the taxpayer can apply for 100% exemption from local taxes, such as acquisition tax, registration tax, and property tax on assets acquired for their business for five years after the business commencement date and 50% reduction for the following two years. For local tax exemption, some local governments grant longer exemption periods (up to 15 years) in accordance with their local ordinances. Qualified foreign investment also can be eligible for exemption from customs duties, VAT, and special excise tax on imported capital goods for the first three years.

In addition, foreign investors satisfying specified criteria are provided with tax incentives and other benefits for investment in specially designated areas, including foreign investment zones (FIZ), free economic zones (FEZ), free trade zones (FTZ), and strategic industrial complexes exclusively developed for foreign invested companies. The tax incentives for qualifying foreign investors in FIZ are similar to those of the above foreign invested high-tech companies. Qualifying investors in FEZ, FTZ, and strategic industrial complexes may receive the 100% exemption from corporate or individual income tax as well as local taxes for the first three years and 50% reduction for the next two years. An exemption from WHT on dividends is granted to qualifying foreign investors in FEZs, FTZs, and such industrial complexes in the same manner as above during the same grace period. They also receive exemption from customs duties on imported goods for the first three years.

#### Foreign direct investment (FDI) incentive limitations

The FDI credit has been amended to limit incentives granted to qualified FDIs. The ceiling has been set to encompass both investment amount and job-creation. In terms of investment amount, the level of incentives for FDI has been reduced to 70% of the aggregated FDI amount for companies benefiting from a 7-year incentive period (50% ceiling for companies enjoying a 5-year incentive period). In terms of job-creation, the level of incentives for FDI has been reduced to the lower of either 20% of the aggregated FDI amount or KRW 10 million times the company’s net increase in employment.

Companies that have enjoyed tax benefits based on job-creation will be subject to tax assessment in cases where there is a net decrease in employment within the subsequent two years in comparison to the year that the relevant tax credit was obtained.

The amended regulation will be applicable for FDIs made on or after 1 January 2011.

## *Withholding taxes*

Foreign corporations with income derived from sources in Korea are subject to CIT on such income. If the foreign corporation has no ‘domestic place of business’ in Korea, it will be subject to tax on its Korean-source income on a withholding basis in accordance with the tax laws and the relevant tax treaty, if applicable. Any Korean-source income attributable to a domestic fixed place of business of a foreign corporation will be subject to Korean CIT.

There are various limitations on the WHT rates for residents of countries with a tax treaty with Korea. For dividends, interest, and royalties, the WHT rates are limited as follows:

| Recipient | Dividends (%) | Interest (%) | Royalties (%) |
|---|---|---|---|
| Resident corporations (1) | 0 | 14/25 | 0 |
| Resident individuals (1) | 14 | 14/25/30 | 0 |
| | | | |
| Non-resident corporations and individuals: | | | |
| Non-treaty (2) | 20 | 14/20 (36) | 20 (39) |
| Treaty: | | | |
| Albania | 5/10 (8) | 10 | 10 |
| Algeria | 5/15 (8) | 10 | 2/10 (15) |
| Australia | 15 | 15 | 15 |
| Austria | 5/15 (8) | 10 | 2/10 (15) |
| Azerbaijan | 7 | 10 (37) | 5/10 (22) |
| Bangladesh | 10/15 (3) | 10 | 10 |
| Belarus | 5/15 (8) | 10 | 5 |
| Belgium | 15 | 10 | 10 |
| Brazil | 10 | 10/15 (5) | 10/25 (6) |
| Bulgaria | 5/10 (7) | 10 | 5 |
| Canada | 5/15 (8) | 10 | 10 |
| Chile | 5/10 (8) | 10/15 (31) | 5/15 (33) |
| China, P.R. | 5/10 (8) | 10 | 10 |
| Croatia | 5/15 (8) | 5 | 0 |
| Czech Republic | 5/10 (8) | 10 | 10 |
| Denmark | 15 | 15 | 10/15 (4) |
| Egypt | 10/15 (8) | 10/15 (9) | 15 |
| Fiji | 10/15 (8) | 10 | 10 |
| Finland | 10/15 (8) | 10 | 10 |
| France | 10/15 (3) | 10 | 10 |
| Germany | 5/15 (8) | 10 | 2/10 (15) |
| Greece | 5/15 (8) | 8 | 10 |
| Hungary | 5/10 (8) | 0 | 0 |
| Iceland, Rep. of | 5/15 (8) | 10 | 10 |
| India | 15/20 (11) | 10/15 (12) | 15 |
| Indonesia | 10/15 (8) | 10 | 15 |

Notes

1. Dividends and interest paid to resident individuals by corporations generally are subject to a 14% WHT rate. In addition to this, there is a resident surtax of 10% on the CIT liability.

K

2. In addition to the indicated tax rate, a resident surtax is charged at a rate of 10% of the respective tax rate.
3. Lower rate applies in case of equity ownership of 10% or more.
4. 10% rate applies to royalties paid for the use of or the right associated with industrial activities.
5. 10% rate applies if the loan period extends to seven years or more, the recipient is a financial institution, and the loan is used for certain designated purposes.
6. 25% rate applies to royalties associated with the use of trademarks or trademark rights.
7. 5% rate applies in case of equity ownership of 15% or more.
8. Lower rate applies in case of equity ownership of 25% or more.
9. 10% rate applies if the term of loans exceeds three years.
10. 10% rate applies when a recipient of interest income is a bank and income is connected with a loan with a term in excess of seven years.
11. Lower rate applies in case of equity ownership of 20% or more.
12. 10% rate applies if a recipient is a bank.
13. 5% rate applies if a recipient holds 10% or more ownership in a paying corporation but, even in case of 10% or more ownership, 10% rate applies if the dividends are paid out of profits subject to tax at a lower rate than the normal corporate tax rate of a country where a payer resides. In other cases, 15% rate applies.
14. 7.5% rate applies when a recipient of interest income is a bank or a financial institution.
15. 2% rate applies to royalties paid for use of or the right to use industrial, commercial, or scientific equipment.
16. 10% rate applies if it is for the use of or the right to use industrial, commercial, and scientific equipment or information.
17. 15% rate applies if royalties are for use of or the right to use cinematography films or tapes for radio or television broadcasting or any copyright of literary or artistic work.
18. 0% rate applies in case of equity ownership of 10% or more.
19. 5% rate applies if a recipient is a bank.
20. 5% rate applies to royalties for use of copyrighted literature and music.
21. 10% rate applies if the term of the loans exceeds seven years.
22. Lower rate applies if it is for the use of or the right to use a patent, trademark, design, or secret formula, or industrial, commercial, and scientific equipment or information.
23. 10% rate applies in cases of equity ownership of 25% or more, or dividend paid by a resident company engaged in a preferred pioneer area and registered with the Board of Investment.
24. 10% rate applies in cases where the interest is paid in respect of public offering of bonds, debentures, or similar obligations or interest paid by a company that is a resident of the Philippines, registered with the Board of Investment, and engaged in preferred pioneer areas of investment under the investment incentive laws.
25. 10% rate applies in case of royalties paid by a company that is a resident of the Philippines, registered with the Board of Investment, and engaged in preferred pioneer areas of investment under the investment incentives laws.
26. 5% rate applies if a recipient holds 30% or more of equity interest in the amount of at least USD 100,000.
27. 10% rate applies if a beneficial owner of the income is a financial institution (including insurance company) or resident of Thailand who is paid with respect to indebtedness arising as a consequence of a sale on credit by a resident of Thailand of any equipment, merchandise, or services, except where the sale was between persons not dealing with each other at arm's length.
28. 10% rate applies if the term of the loan exceeds two years.
29. 10% rate applies to royalties for use of copyrighted literature, music, films, and television or radio broadcasts. Otherwise, 15% rate applies.
30. 10% rate applies if equity ownership is 10% or more and not more than 25% of the gross income of a paying corporation for a preceding tax year consists of interest or dividends.
31. 10% rate applies when a recipient of interest income is a bank or an insurance company.
32. 5% rate applies when a recipient holds 25% or more of equity interest, and 10%, when a recipient holds 10% or more of equity interest. In other cases, 15% rate applies.
33. 5% rate applies to royalties paid for the use of or the right associated with industrial, commercial, or scientific equipment.
34. 0% rate applies to royalties paid for the use of academic rights.
35. 5% rate applies to royalties paid for the use of or the right associated with any copyright of literary, artistic, or scientific work, including software, and motion pictures and works on film, tape, or other means of reproduction for use in connection with radio or television broadcasting. 10% rate applies to royalties paid for the use of or the right to use a patent, trademark, design or model, plan, secret formula, or process. 15% rate applies to royalties paid for the use of or the right to use industrial, commercial, or scientific equipment, or for information concerning industrial, commercial, or scientific experience.
36. 14% rate applies if interest arises from bonds issued by a Korean company or government bodies.
37. 0% rate applies if a recipient of interest income is government, central bank, etc.
38. 5% rate applies to royalties paid for the use of industrial, commercial, or scientific equipment.
39. Fees arising from rental of industrial, commercial, scientific equipment, etc. are classified as rental income subject to 2% WHT.

If a foreign company is located in a foreign jurisdiction designated as a tax haven by the Minister of Strategy & Finance, any Korean-source income of such foreign company will be subject to the domestic withholding rate of 20% regardless of whether or not the foreign company is resident of a treaty country. Currently, only Labuan is designated as such a jurisdiction. The foreign company may claim a refund of any excess WHT paid within three years, if it proves to the Korean Tax Office that it is entitled to the reduced treaty rates as the substantive and beneficial owner of the income. Alternatively, a foreign company may attempt to seek a pre-approval in order to have the treaty benefits apply upfront by making an application to the Commissioner of Taxation.

## Tax administration

### Returns

In Korea, the taxable year is on a fiscal-year basis as elected by the taxpayer. However, it cannot exceed 12 months.

A corporation must file an interim tax return with due payment for the first six months of the fiscal year and the filing/payment must be made within two months after the end of the interim six-month period.

A corporation must file an annual tax return with due payment for the fiscal year and the filing/payment must be made within three months from the end of a fiscal year.

### Payment of tax

Where the tax amount to be paid by a resident corporation is in excess of KRW 10 million, part of the tax amount to be paid may be paid in installments within one month of the date of the expiration of the payment period (two months for SMEs).

Where the tax amount to be paid is less than KRW 20 million, the excess of KRW 10 million shall be paid in installments; where the tax amount to be paid exceeds KRW 20 million, 50% or less of the tax amount shall be paid in installments.

### Statute of limitation

The statute of limitation is generally five years from the statutory filing due date of the annual CIT return. However, the statute of limitation is extended further in the following cases:

- Ten years if a taxpayer evades taxes by fraud or unjustifiable means.
- Seven years if a taxpayer does not file its tax base by the statutory due date.

Along with the extension of the NOL carryforward period from five years to ten years, when a taxpayer uses the NOL incurred more than five years ago, the statute of limitation shall be one year from the filing due date of the fiscal year when the NOL is utilised.

### Audit cycle

In March 2010, NTS announced the ‘Plan for Tax Audits’ which is the criteria for selecting a tax audit target company.

For large companies whose sales revenue is KRW 500 billion or more, the tax audit will be conducted every four years. Other companies are selected by certain standards which were announced by NTS.

### Topics of focus for tax authorities

Recently, topics of focus for tax authorities are as follows:

- Increased scrutiny for the prevention of offshore tax evasion through aggressive tax planning.
- Denial of unfair transactions between related parties.
- Entertainment expenses.
- Deductibility of management service fees or allocated expenses incurred by foreign affiliates.
- International inter-company transactions and transfer pricing.

## Other issues

### Reporting requirements for foreign bank and financial accounts

Residents and domestic companies must file a report with the NTS of their bank and financial accounts in a foreign country if the aggregate value of these accounts exceeds KRW 1 billion at any time during the calendar year.

Foreign account holders must file their concerned overseas account information with the governing tax office for the period from 1 June to 30 June of the following year. For failure to comply with the filing requirements or incorrect filing, the account holder shall be subject to fines equaling 10% of the non-compliance amount or the difference between the amount actually filed and the amount which should have been filed. The new requirement will be applicable to overseas banking accounts owned since January 2010 with a lower penalty rate of 5% on holdings during 2010.

### Functional currency

In instances where the taxpayer adopts to use a foreign currency as its functional currency, there will be three ways to calculate the CIT base: (i) calculate the tax base using the financial statements in functional currency and translate it into KRW; (ii) prepare the financial statements in KRW and calculate the tax base; or (iii) translate the financial statements into KRW and calculate the tax base. Once elected, the same method shall be consistently used. This change is applicable as of the fiscal year that includes 31 December 2010.

### Exchange controls

Most transactions involving foreign exchange generally do not require approval or reporting under the Foreign Exchange Trade Act (FETA), with a few exceptions as prescribed by the FETA. Receipt of foreign exchange from outside Korea is freely permitted, and payments to foreign companies are not regulated. Most restrictions on Korean companies' foreign currency transactions with foreigners have been removed. However, the government continues to monitor certain flows of foreign currency in an attempt to minimise incoming speculative currency and outgoing capital flight.

Ever since Korea's currency crisis, most restrictions on short-term as well as mid and long-term borrowings from overseas by corporations have been removed. Most foreign currency loans are allowed and are subject to reporting to a foreign exchange bank. There are no specific regulations, except the reporting requirements, on borrowings from overseas by foreign investment companies in Korea.

### *Choice of business entity*
The following types of commercial entities are permitted in Korea:

- Corporation (Hoesa): There are five classes of corporation, outlined as follows:
  - Limited corporation:
    - Jusik Hoesa (JH): A corporation incorporated by one or more promoters, with each shareholder's liability limited to the amount of contributed capital. This type of entity is the most commonly used in Korea.
    - Yuhan Hoesa (YH): A corporation incorporated by one or more members, with each member's liability limited to the amount of that member's contribution to the corporation.
    - Yuhan Chegim Hoesa (a newly proposed form for legislation): A corporation incorporated by one or more members, with each member's liability limited to the amount of that member's capital contribution. With significantly fewer restrictions for establishment and operation, Yuhan Chegim Hoesa provides more flexibility and self-control than YH.
  - Unlimited corporation:
    - Hapmyong Hoesa: A corporation incorporated jointly by more than two members who are responsible for corporate obligations, if the assets of the corporation are insufficient to fully satisfy those obligations.
    - Hapja Hoesa: A corporation composed of one or more partners who have unlimited liability and one or more partners with limited liability.
- Partnership: Hapja Johap, a newly proposed form, is a legal form of partnership allowed under the Commercial Code.
- Joint venture: A joint venture is generally established as a domestically incorporated corporation whose shareholders have limited liability regarding the obligations of the corporation under the Commercial Code.
- Branch: A foreign corporation can perform its business operation in Korea by setting up a taxable presence in the form of a branch office.
- Liaison office: A foreign corporation can establish a liaison office which is not allowed to execute income-generating business activities in Korea.
- Sole proprietorship: Sole proprietorships are not a legal form of entity in Korea.

## Significant developments

The Tax Authority in Kuwait has recently issued updated Executive Rules and Regulations for implementation of Law No. 2 of 2008.

The Department of Inspection and Tax Claims (DIT) in Kuwait intends, by the issuance of those rules, to update a few of the existing Executive Rules already issued earlier following the publication of Law No. 2 of 2008 and to determine/regulate the tax treatment for fund investment, trading in the Kuwait Stock Exchange (KSE), and dividend distribution for foreign investors operating in Kuwait.

The following are the key changes and updated/new rules issued by the DIT.

### *Executive Rule No. 25 of 2010 - Design and consultancy costs*

Executive Rule No. 25 of 2010 was issued to update Executive Rule No. 22 of 2008 pertaining to design and consultancy services provided outside Kuwait.

In addition to the tax treatment for design cost conducted outside of Kuwait, the DIT has now also determined the allowable profit for consultancy works conducted outside of Kuwait. Under this new rule, consultancy and design cost incurred outside of Kuwait will be allowed as deductible cost. However the allowable costs will be restricted, depending on the party providing the services, as follows.

For design costs incurred outside Kuwait:

| Work conducted by | Percentage of allowed costs of % of revenue |
|---|---|
| Head office | 75% to 80% |
| Affiliated companies | 80% to 85% |
| Third parties | 85% to 90% |

For consultancy costs incurred outside Kuwait:

| Work conducted by | Percentage of allowed costs of % of revenue |
|---|---|
| Head office | 70% to 75% |
| Affiliated companies | 75% to 80% |
| Third parties | 80% to 85% |

In case there is no separate revenue for the consultancy and design work, although the nature of the contract requires the existence of consultancy work, the following formula shall be applied by the DIT:

Consultancy or design revenue = (consultancy or design costs/total direct costs) x contract revenue

### *Executive Rule No. 40 of 2010 - Reimbursable costs*

The DIT has now determined the tax treatment for reimbursable costs claimed by the taxpayer in Kuwait filing tax declarations on a deemed profit basis. Executive Rule No. 40 of 2010 states that reimbursable cost shall be allowed, provided all of the following conditions are met:

- The reimbursable cost must be necessary to perform the operations as per the contract and must be clearly stated in the contract.
- Such costs must not exceed 30% of the annual revenue.
- The reimbursed cost must be substantiated by proper documents in support.

In case the reimbursement costs exceed 30% of the revenue, the company following the deemed profit basis will be required to follow the account basis of filing and shall be assessed on account basis accordingly.

### *Executive Rule No. 49 of 2010 - Disposal of foreign shares*

Executive Rule No. 49 of 2010 states that foreign corporate bodies selling part or all of their share in a Kuwait entity must comply with all of the following requirements:

- Submission of a copy of the selling contract stamped by the Ministry of Justice to the DIT.
- A copy of the amended articles of association.
- Documents in support of the share selling transaction, such as proof of assets acquired and consideration of assets sold. The transaction may also be disclosed in the company's balance sheet and financial closing accounts.

In addition to the above, in case required by the DIT, the company acquiring the shares will be required to submit copies of the following to the DIT, for the year in respect of the selling transaction:

- Balance sheet.
- Closing accounts and balances.
- Books and records.
- Documents in support of the acquisition.

### *Executive Rule No. 36 of 2010 - Foreign currency exchange rates and related profits and losses*

Executive Rule No. 20 of 2008 deals with the tax treatment for realised and unrealised losses and gains related to foreign currency transactions and provides for the following:

- Unrealised foreign exchange gains are required to be reported in the tax declaration. However, unrealised gains may be excluded from taxable income for calculating the tax due for the fiscal year.
- Realised foreign exchange gains are taxable in Kuwait and therefore added to calculate taxable profits.
- Unrealised losses are not considered as tax deductible costs and therefore excluded for calculating taxable profits.
- Realised losses may be claimed as tax deductible costs, provided such losses are supported by adequate supporting information and documents.

### Executive Rule No. 18 to 22 of 2010 - Tax on dividend distribution and registration requirements for funds, portfolio managers, and direct investors trading in the Kuwait Stock Exchange

The DIT has issued Executive Rules No. 18, 19, 20, 21, and 22 of 2010 to regulate and determine the tax treatment for foreign entities' investment in Kuwait. The following are the key updates of such rules:

- Fund managers, investment trustees, and investment companies running the portfolios for organizations are required to register themselves with the DIT, by submitting a registration form and providing information about their operations in Kuwait, among other information as specified in the specified registration forms.
- Companies investing directly in the Kuwait Stock Exchange are also now required to comply with the same registration procedures as above.
- Specific forms and procedures are now required from the fund managers/custodians in order to provide information about the withholding tax (WHT) on dividend distribution to foreign investors and for the settlement of such WHTs to the DIT.
- Fund managers, custodians, and portfolio managers should notify the DIT with any changes or update to the information provided on the registration forms periodically.
- Foreign investors claiming refunds of excess or wrong WHTs should apply for refund in specific forms to claim such taxes within a maximum period of 5 years from the rate on which the tax was collected by the DIT.

### Memorandum of Understanding signed between Kuwait and the United States for tax exemptions on revenue from aircraft operations

Kuwait and the United States signed a Memorandum of Understanding (MoU) for tax exemptions on revenue of aircraft operation during March 2011. The Kuwait Ministry of Finance issued a public statement that the aim of the MoU was to support airlines' operations and activities and boost overall air transport, as well as bring down tax paid in both countries.

## Taxes on corporate income

The taxation on income in Kuwait is governed by the following two enactments, Kuwait Income Tax Decree No. 3 of 1955 and Law No. 23 of 1961, which regulate the income of companies in the neutral zone area. Tax law No. 2 of 2008, which was issued by the Kuwaiti government on 22 January 2008, amended the Kuwait Income Tax Decree No. 3 of 1955 and other corporate and taxation related matters in Kuwait.

One of the major changes of the Law No. 2 of 2008 was the reduction of the tax rates, which previously reached a maximum rate of 55%, to a flat rate of 15%.

Kuwait does not impose income tax on companies wholly owned by the nationals of Kuwait or other Gulf Cooperation Council countries (GCC), including Bahrain, Oman, Qatar, Saudi Arabia, and the United Arab Emirates. However, GCC companies with foreign ownership are subject to taxation to the extent of the foreign ownership. Income tax is imposed only on the profits and capital gains of foreign 'corporate bodies' conducting business or trade in Kuwait, directly or through an agent.

### Governing laws

The taxation on income in Kuwait is governed by the Kuwait Income Tax Decree No. 3 of 1955 and Law No. 2 of 2008, amending the income tax decree. These laws are applicable to business activities carried out in Kuwait, exclusive of the neutral zone.

In addition, Law No. 23 of 1961 is applicable to business activities carried out in the neutral zone. Foreign companies carrying on trade or business in the offshore area of the partitioned neutral zone under the control and administration of Saudi Arabia are subject to tax in Kuwait on 50% of taxable profit under the law.

### *Income subject to tax*

Article 2 of the amended tax law, provides that income earned from the following activities in Kuwait shall be considered subject to tax in Kuwait:

- Any activities or business carried out either entirely or partially in Kuwait, whether the contract has been signed inside or outside Kuwait, as well as any income resulting from supply or sale of goods, or from providing services.
- The amounts collected from the sale, rent, or granting of a franchise to utilise any trademarks, design, patents, copyright, or other moral rights, or those related to intellectual property rights for use of rights to publish literary, arts, or scientific works of any form.
- Commission earned or resulting from agreements of representation or commercial mediation, whether such commissions are in cash or in kind.
- Having permanent office in Kuwait where the sale and purchase contracts are signed and/or where business activities are performed.
- Profits resulting from the following:
  - Any industrial or commercial activity in Kuwait.
  - Disposal of assets, either through the sale of the asset, part of the asset, the transfer of the asset's ownership to others, or any other form of disposal, including the disposal of shares in a company whose assets mainly consist of non-movable capital existing in Kuwait.
  - Granting loans in Kuwait.
  - Purchase and sale of property, goods, or related rights in Kuwait, whether such rights are related to monetary assets or moral rights such as mortgage and franchise rights.
  - Lease of property used in Kuwait.
  - Providing services, including profits from management, technical, and consultancy services.
  - Carrying out trading activities in the Kuwait Stock Exchange, whether directly or through portfolios or investment funds.

### *Tax imposed on Kuwaiti-source income*

In cases where a contract involves the performance of work both inside and outside Kuwait, the entire revenue from the contract must be reported for tax in Kuwait, including the work carried out outside Kuwait.

### *Tax rate*

The current tax rate in Kuwait is a flat tax rate of 15%.

### *Capital gains*

Capital gains on the sale of assets and shares by foreign shareholders are treated as normal business profits and are subject to tax at a 15% rate. Article 1 of Law No. 2 of 2008 provides for a possible tax exemption for profits generated from dealing in securities on the Kuwait Stock Exchange (KSE), whether directly or through investment portfolios.

### *Dividends or distribution of profits*

Treatment of dividends is not specifically addressed in the amended tax law or in its bylaws. The bylaws to the amended tax law, however, require investment companies or banks that manage portfolios, funds, or act as custodians of shares for foreign entities to deduct corporate tax due from payments due to foreign investors. Tax payment should be made within 30 days from the date of the deduction of tax, together with a list showing names of the foreign entities and the amount withheld from each.

Under the original tax law, no tax was imposed on dividends paid to foreign shareholders by Kuwaiti companies.

### *Tax exemption*

The following sources of income are exempt from tax in Kuwait, as per the amended Law No. 2 of 2008:

- Kuwaiti merchants purchasing, transporting, and selling goods imported on their own account where the foreign supplier has not been involved in Kuwait operations.
- Profits of a corporate body generated from dealing in securities listed in the KSE, whether such activities are carried out directly or through investment portfolios or funds.

## *Corporate residence*

A foreign corporate body is any association formed and registered under the law of any country or state other than Kuwait that is registered as having a legal existence entirely separate from that of its individual members. No Kuwait-registered company is subject to income tax. However, any foreign corporate body that is a shareholder in a Kuwait-registered company undertaking business in Kuwait is subject to tax *(see the Taxes on corporate income section)*. For the purposes of this law, GCC residents and entities wholly owned by GCC residents are treated in the same manner as Kuwaiti business entities.

## *Other taxes*

### *National Labour Support Tax (NLST)*

NLST Law No. 19 of 2000 was issued by the Ministry of Finance (MOF) on 21 May 2000 and came into effect a year later on 21 May 2001. The purpose of the law is to encourage the national labour force to work in the private sector by closing the gap in salaries and benefits between public and private sectors.

As per the law, Kuwaiti companies listed in the Kuwait Stock Exchange (KSE) are required to pay an employment tax of 2.5% of the company’s net annual profits.

### *Zakat*

Zakat Law No. 46 of 2006 was issued on 27 November 2006 and came into effect as of 10 December 2007.

Zakat is imposed on all publicly traded and closed Kuwaiti shareholding companies at a rate of 1% of the companies’ net profits.

### *Contribution to the Kuwait Foundation for the Advancement of Sciences (KFAS)*

Closed Kuwaiti shareholding companies are required to pay 1% of their net profits as per their financial statements after their transfer to the statutory reserve and the offset of loss carryforwards, to the KFAS, which supports scientific progress.

### *Social security*
There are no social security obligations for expatriate workers. However, for foreign employees, it is generally necessary to make terminal indemnity payment calculated at 15 days' pay-per-year for the first five years of service and one month's pay-per-year thereafter.

For Kuwaiti employees, contributions are payable monthly by both the employer and employee under the Social Security Law. The employer's contribution is 11% and the employee's is 7.5% of monthly salary, up to a ceiling of 2,500 Kuwaiti dinars (KWD) per month. Benefits provided, include pensions on retirement and allowances for disability, sickness, and death.

## *Branch income*

Tax rates on branch profits are the same as on corporate profits.

## *Income determination*

Income tax is imposed on the profit of a business in Kuwait as calculated by the normal commercial criteria, using generally accepted accounting principles, including the accrual basis. Note that provisions, as opposed to accruals, are not deductible for tax purposes. In addition, for contract accounting, revenue is recognized by applying the percentage of completion method. Work-in-progress carried forward may not exceed 20% of work executed.

## *Deductions*

For expenses to be deductible, they must be incurred in the generation of income in Kuwait. Such expenses must be supported by adequate documentary evidence.

Such expenses include the following:

- Salaries, wages, and end of service benefits.
- Taxes and fees, except income tax.
- Grants, donations, and subsidies paid to licensed Kuwaiti public or private agencies.
- Expenses of head office.

### *Depreciation*
In accordance with Article 4 of Law No. 2 of 2008, depreciation is taken on a straight-line basis at specified rates. However, within 90 days prior to submission of the tax declaration, the taxpayer may request that the tax department calculate the depreciation using a different method than the straight-line method. The tax department shall accept this request provided it is based on a reasonable basis in accordance with the tax accounting principles and rules.

The principal depreciation rates are specified in the law.

### *Net operating losses*
As per the amended tax law, losses may be carried forward for a maximum of three years, provided that the following situations do not arise in the fiscal period following the period in which the loss was recorded:

- The tax declaration does not include any revenue from the business activities of the taxpayer in Kuwait.
- Change in the legal structure of the taxpayer.
- Merger of the taxpayer with another entity.
- Liquidation or ceasing of the activities of the taxpayer in Kuwait.

### *Head office expenses/payments to foreign affiliates*

Head office expenses (e.g. allocations of head office expenses) or payments to a head office may not be deductible in full. The bylaws to the amended tax law contain specific provisions relating to head office administrative expenses, and specialist tax advice should be sought on this subject. This matter is frequently raised during tax audits in Kuwait.

## *Group taxation*

If a foreign company conducts more than one business activity in Kuwait, one tax declaration aggregating the income from all activities is required to be submitted in Kuwait. In addition, in the case where two affiliates are involved in similar lines of business or work on the same project, their taxable results may be aggregated for the assessment of tax.

## *Tax credits and incentives*

### *Leasing and Investment Companies Law No 12 of 1998*

Leasing and Investment Companies Law No 12 of 1998 allows the formation of investment and leasing companies having their principal place of business in Kuwait, with Kuwaiti or foreign shareholders. The law grants a five-year tax holiday to non-Kuwaiti founders and shareholders of such companies, beginning on the date of establishment of the companies.

### *Direct Foreign Capital Investment Law (DIFCL) No 8 of 2001*

Direct Foreign Capital Investment Law (DIFCL) No 8 of 2001 aims to encourage foreign investment participation in Kuwait, allowing up to 100% of foreign ownership in Kuwaiti businesses. It also provides a tax holiday of up to ten years with respect to non-Kuwaiti shareholders shares of the profits from qualifying projects. An additional tax holiday for a similar period is granted for further investment in an already approved project.

### *Kuwait Free Trade Tone*

Businesses set up in the Kuwait Free Trade Zone for carrying on specified operations are exempt from taxes on operations conducted in the zone. Foreign entities can own 100% of such businesses.

### *Build, operate, and transfer*

Kuwait has begun to use the build, operate, and transfer (BOT) method in respect of some large infrastructure projects. Tax and tariff concessions may be built into a BOT contract.

### *Circular No. 50 of 2002*

As per Circular No. 50 of 2002 issued by the Director of Income Taxation (DIT) regarding treatment of exempted companies, the exempted companies shall, however, comply with the provisions of submission of tax declaration, inspection, and assessment procedures like other companies in order to be eligible for exemption.

Some of the privileges under this law include:

- Exemption from income tax or any other taxes for a period of ten years from the commencing of the actual operations of the enterprise.
- Benefits under double taxation agreements.
- Benefits under investment encouragement and protection agreements.
- Total or partial exemption from custom duties on imports.
- Recruitment of required foreign labour.
- Allotment of land and real estate.

## *Withholding taxes*

Apart from the WHT on dividends arising from trading in the KSE, there are no other WHTs. However, under Executive Rule No. 12 of Law No. 2 of 2008, all government bodies and private entities are required to retain the final payment due to a contractor or subcontractor until presentation of a tax clearance certificate from the MOF, confirming that the respective company has settled all of its tax liabilities. The final payment should not be less than 5% of the total contract value.

### *Tax treaties*

Kuwait has entered into tax treaties with several countries for the avoidance of double taxation. Treaties with several other countries are at various stages of negotiation or ratification.

However, little experience has been gained in Kuwait regarding the application of tax treaties. As a result, disputes about the interpretation of various clauses in tax treaties between taxpayers and the DIT are not uncommon. Disputes with the DIT regarding tax treaties normally arise with respect to the following issues:

- Existence of a permanent establishment (PE).
- Income attributable to a PE.
- Tax deductibility of costs incurred outside Kuwait.

The domestic tax law in Kuwait does not provide for WHTs. As a result, it is not yet known how the Kuwaiti government will apply the WHT procedures included in the treaties listed in the table below. The withholding rates listed in the table are for illustrative purposes only.

| Country | Dividends (%) | Interest (%) | Royalties (%) |
|---|---|---|---|
| Non-treaty countries | 0 | 0 | 0 |
| | | | |
| Austria | 0 | 0 | 10 |
| Belarus | 5 (3) | 5 (3) | 10 |
| Belgium | 10 | 0 | 10 |
| Bulgaria | 5 (10) | 5 (6) | 10 |
| Canada | 5/15 (13) | 10 | 10 |
| China | 5 (1) | 5 (1) | 10 |
| Croatia | 5/10 (12) | 10 | 10 |

| Country | Dividends (%) | Interest (%) | Royalties (%) |
|---|---|---|---|
| Cyprus | 10 | 10 (2) | 5 |
| Czech Republic | 5 (10) | 0 | 10 |
| Ethiopia | 5 (3) | 5 (2) | 30 |
| France | 0 | 0 | 0 |
| Germany | 5/15 (5) | 0 | 10 |
| Hungary | 0 | 0 | 10 |

| Turkey | 10 | 10 | 10 |
| Ukraine | 5 (6) | 0 | 10 |
| United Kingdom | 5/15 (5) | 0 | 10 |

Notes

1. The rate is 0% for amounts paid to a company of which the government owns at least 20% of the equity.
2. The rate is 0% for interest paid to the government of the other contracting state. Under the Ethiopia treaty, the rate is also 0% for the interest paid to entities in which the government owns a specified percentage of the equity and for interest paid on loans guaranteed by the government.
3. The rate is 0% for dividends and interest paid to the government of the other contracting state. Under the Ethiopia treaty, the rate is also 0% for dividends paid to entities in which the government owns a specified percentage of the equity.
4. The rate is 10% for dividends paid to the government of Kuwait or any of the institutions or any intergovernmental entities. The rate is 15% for other dividends.
5. The 5% rate applies if the recipient of the dividends owns directly or indirectly at least 10% of the payer. The 15% rate applies to other dividends.
6. The rate is increased to 5% if the beneficial owner of the interest carries on business in the other contracting state through a permanent establishment and the debt on which the interest is paid is connected to such permanent establishment.
7. The rate is 0% for amounts paid to the government of the other contracting state and to entities of which the government owns at least 51% of the paid-up capital.

8. For dividends and interest, the rate is 0% if the payments are made to the government or a governmental institution of the other contracting state, or to a company that is a resident of the other contracting state and is controlled by, or at least 49% of the capital is owned directly or indirectly by, the government or a governmental institution. A 0% rate also applies to interest arising on loans guaranteed by the government of the other contracting state or by a governmental institution or other governmental entity of the other contracting state.
9. A 0% rate applies if the beneficial owner of the dividends is a company that holds directly at least 10% of the capital of the company paying the dividends.
10. The rate is 0% if the payments are made to the government or a governmental institution of the other contracting state, or to a company that is resident of the other contracting state and is controlled by, or at least 25% of the capital is owned directly or indirectly by, the government or a governmental institution of the contracting state.
11. The rate is 0% if the beneficial owner of the interest is a resident in the other contracting state and the loan is secured or financed directly or indirectly by a financial entity or other local body wholly owned by the government of the other contracting state.
12. The 5% rate applies if the recipient of the dividends owns directly or indirectly at least 25% of the payer. The 10% rate applies to other dividends.
13. The rate is 5% if the beneficial owner of the dividends is a company that owns 10% or more of the issued and outstanding voting or 25% or more of the value of all of the issued and outstanding shares. The 15% rate applies to other dividends.
14. Dividends or interest paid by a company that is resident of a contracting state is not taxable in that contracting state if the beneficial owner of the dividends or interest is one of the following:
    - The government.
    - A political subdivision or a local authority of the other contracting state.
    - The Central Bank of the other contracting state.
    - Other governmental agencies or governmental financial institutions as may be specified and agreed to in an exchange of notes between the competent authorities of the contracting state.

In addition to the above existing tax treaties, Kuwait has signed the following tax treaties, but such treaties have not yet been ratified:

| Country | Date of signing | Type of Agreement | Status of the treaty |
|---|---|---|---|
| Cyprus | 7 October 2010 | avoidance of double taxation and income tax evasion | Finally signed |
| Djibouti | 28 March 2010 | avoidance of double taxation and income tax evasion | Finally signed |
| Egypt | 30 December 2010 | avoidance of double taxation and income tax evasion | (initially signed) |
| Goiania | 19 July 2010 | avoidance of double taxation and income tax evasion | Finally signed |
| Indonesia | 22 September 2010 | avoidance of double taxation and income tax evasion | Finally signed |
| Ireland | 23 November 2010 | avoidance of double taxation and income tax evasion | Finally signed |
| Japan | 17 February 2010 | avoidance of double taxation and income tax evasion | Finally signed |
| Kenya | 7 January 2010 | avoidance of double taxation and income tax evasion | (initially signed) |
| Menemar | 16 December 2010 | avoidance of double taxation and income tax evasion | (second round discussion) |
| Nigeria | 1 May 2010 | avoidance of double taxation and income tax evasion | (initially signed) |
| North Korea | 24 March 2010 | avoidance of double taxation and income tax evasion | (initially signed) |
| Syria | 1 May 2010 | avoidance of double taxation and income tax evasion | (initially signed) |

# Kuwait

## Tax administration

### Return

Tax is imposed on profits arising in a taxable period, which is defined as the accounting period of the taxpayer and further assumed to be the calendar year. However, the DIT may agree to a written request from the taxpayer to change the year-end to a date other than December 31. Also, at the taxpayer's request, the DIT may agree to extend the accounting period, provided it does not exceed 18 months.

The taxpayer must submit a tax return, based on the taxpayer's books of account, within three months and 15 days of the end of the taxable period. A foreign entity can request an extension of up to 30 days for filing the tax declaration. Upon application, the DIT may extend the filing period by a maximum of 60 days.

The taxpayer must keep in Kuwait certain accounting records, which are subject to inspection by the tax department's officials. Accounting records may be in English and may be in a computerized system used to prepare financial statements, provided that the system includes the required records and the tax department is previously informed.

The tax return should be supported by the following:

- Audited balance sheet and profit-and-loss account for the period.
- Detailed list of fixed assets (e.g. additions, disposals).
- List of inventory (e.g. quantities and values).
- List of subcontractors and the latest payments to them.
- Copies of current contracts and a statement of income and expenditure for each.
- Trial balance, forming the basis of the accounts.
- Last payment certificate from the client.
- Insurance companies must attach to the Public Budget and the tax declaration a detailed statement with the reinsured documents and the related terms and conditions.

As a general rule, an assessment is finalised only after inspection of records by the tax department. As indicated above, proper documentation must be kept to support expenditure and to avoid disallowances at the time of tax inspection. If support is considered inadequate, the assessment is apt to be made on the basis of deemed profitability. This is computed as a percentage of turnover and is fixed arbitrarily, depending on the nature of the taxpayer's business.

### Payment of tax

Tax is payable in four equal installments on the 15th day of the fourth, sixth, ninth, and 12th months following the end of the tax period. If an extension is approved by the DIT, all of the tax is payable upon the expiration date of the extension. Failure to file or pay the tax on time attracts a penalty of 1% of the tax liability for every 30 days of delay or part thereof.

### Objection

If a company disagrees with an assessment issued by the DIT, the company should submit an objection within 60 days from the date of the assessment. The DIT is required to resolve the objection within 90 days of the filing of the objection, after which a revised tax assessment is issued by the DIT. Upon issuance of a revised tax assessment, any additional tax is payable within 30 days. If the DIT issues no response within 90 days of filing the objection, this implies that the taxpayer's objection has been rejected.

### Appeal

In case the objection is rejected or the taxpayer is still not satisfied with the revised tax assessment, the company may contest the matter further with the Tax Appeals Committee (TAC) by submitting a letter of appeal within 30 days from the date of the objection response or 30 days from the expiry of the 90 days following submission of an objection if no response is provided by the DIT.

The matter is then resolved through appeal hearings, and a final revised assessment is issued based on the decision of the TAC. Tax payable per the revised assessment must then be settled within 30 days from the date of issuance of the revised assessment. Failure to do so results in a delay penalty of 1% of the amount of the tax due per the final assessment for each period of 30 days or part thereof of the delay.

## Other issues

### Offset program

Kuwait has designed a counter-trade offset program to meet the objectives of its economic development plan. The offset program derives from the government's concern that the long-term benefits from job creation and capital accumulation resulting from government contracts with foreign suppliers unfairly accrue to the suppliers, at the expense of Kuwaiti companies and citizens. The objective of the offset program is to remedy this problem by encouraging collaborative business ventures between foreign contractors and the Kuwaiti private sector. Accordingly, the offset program has been established with the following objectives:

- Promote sustainable economic development in Kuwait, by the assimilation of modern technology and know-how in the local economy.
- Support projects that generate high skilled jobs for Kuwaiti nationals.
- Attract foreign investment capital to facilitate economic development in Kuwait.

The MOF initially issued guidelines for the program in 1995. The MOF has also issued Ministerial Order 13 of 2005 reactivating the program. The following are significant aspects of the program:

- All civil contracts with a value of KWD 10 million and more, and defence contracts with a value of KWD 3 million and more, attract the offset obligations for contractors. The obligations become effective on the signing date of the contract.
- The contractors covered by the offset obligation are required to invest 35% of the value of the contract with Kuwaiti government bodies.
- Offset obligators have the following options for fulfilling their offset obligation:
  - Implement investment projects suggested by the Offset Program management.
  - Propose their own investment projects, and seek approval of the Offset Program management.
  - Participate in any of the funds that the Offset Program management may establish.
  - Purchase of commodities and services of Kuwaiti origin. The MOF is, however, still finalising detailed regulations in this regard.
- Contractors covered by the offset obligation must provide unconditional, irrevocable bank guarantees issued by Kuwaiti banks to the MOF equal to 6% of the contract price. The value of the bank guarantee submitted will be reduced gradually based on the actual execution of its work by the foreign contractor/supplier. The MOF has the right to cash in the bank guarantee if the offset obligor fails to respect their offset obligation.

## Significant developments

There have been no significant corporate tax developments in Kyrgyzstan during the past year.

## Taxes on corporate income

Pursuant to the tax code, resident entities are subject to a corporate income tax, called the 'profit tax', on their aggregate annual income earned worldwide. Non-resident legal entities carrying out business activities through a permanent establishment (PE) in Kyrgyzstan are subject to profit tax on the income attributed to the activities of that PE.

Profit tax is calculated at a rate of 10% of aggregate annual income less allowed deductions.

## Corporate residence

There is no concept of corporate residence in the Kyrgyzstan tax legislation.

Legal entities formed under the Kyrgyz law should be taxed in Kyrgyzstan on their worldwide income, whereas foreign legal entities should be taxed only in relation to Kyrgyzstan-sourced income.

### Permanent establishment (PE)

Under Kyrgyzstan tax legislation, a PE is a permanent place of business, through which a non-resident carries out business operations, including activities performed through an authorised person. A PE includes the following:

- Any place of management, department, office, factory, workshop, mining, oil and gas wells, land, construction site or project.
- Any services rendered by non-residents by hiring personnel working in the territory of Kyrgyzstan for a duration of more than 183 calendar days within any consecutive12-month period.

A PE is not created in Kyrgyzstan if a non-resident is limited to the following activities in Kyrgyzstan:

- Use of warehouses or buildings exclusively for storage or demonstration activities.
- Use of a fixed place of business exclusively for preparatory purposes.
- Performance of activities in Kyrgyzstan through an agent in cases where such agent usually performs such activities in the ordinary course of business.

Creation of a PE may be connected with the establishment of a branch or subsidiary. Both branches and subsidiaries are considered appropriate business vehicles for foreign investors and the choice between them is determined by the business the investor is engaged in, along with various other factors.

## *Other taxes*

### *Value-added tax (VAT)*

In Kyrgyzstan, VAT is assessed on taxable supply and taxable imports. Input VAT assessed on purchases used for business purposes is generally offset against output VAT on taxable supplies. The VAT rate is 12%, except for certain zero-rated supplies and certain exempt turnover *(see below)*.

All taxpayers registered for VAT purposes are required to charge VAT on their taxable supply, and calculate and report their VAT liabilities. Taxpayers are required to register for Kyrgyzstan VAT purposes if their taxable supply in the preceding 12 calendar months exceeds 4,000,000 Kyrgyzstani soms (KGS). Even if an entity is not required to register for VAT purposes, it may still do so voluntarily by submitting an application to the appropriate tax committee.

#### Place of supply of goods

Goods and services are subject to VAT if they are deemed to be supplied in Kyrgyzstan under the place of supply rules. According to these rules, transactions are deemed to be made at the place where transport of the goods begins if the goods are transported by the supplier, and in all other cases, at the place where the goods are transferred to the customer. The rules regarding services are more complicated. Services that are not specifically mentioned are deemed to be supplied at the place where the service provider has established his place of business. Certain other services are deemed to be supplied at the place of the purchaser.

#### Import of goods

Generally, imports of goods are subject to VAT.

#### Non-deductible input VAT

The input VAT is not allowed for offset if it is subject to payment in connection with the receipt of goods (work, services) not related to entrepreneurial activity, or if it relates to inputs for VAT exempt supplies.

#### Zero-rated supplies

Certain supplies are zero-rated for VAT purposes. These include exports (except for certain limited types of export) and international transportation. Supply of goods (works, services) for official use of diplomatic and consular representations is taxable, but may be refunded provided that certain conditions are met.

#### Exempt supplies

Certain supplies are VAT-exempt, including supplies and exports of gold alloy and refined gold, supplies of pharmaceuticals, land plots, residual buildings and construction, and financial services. When a taxpayer generates both taxable and exempt supplies, input VAT proportional to the ratio of the exempt supply to the total supply is disallowed for offset.

### VAT incentives
Certain imports are VAT exempt, including imports of technological equipment, if it is used for own production purposes. Recently, a preferential offset method of VAT settlement in respect of certain fixed assets imported to Kyrgyzstan has been introduced, whereby the import VAT does not need to be paid to customs but is reflected simultaneously as input and output VAT in the VAT accounts.

### Reverse-charge VAT
The current tax code does not have any provisions on reverse-charge VAT.

### VAT liability calculation and VAT offset carryforward
In general, the VAT liability of a taxpayer is calculated as output VAT (i.e. VAT charged by a taxpayer) less input VAT (i.e. VAT paid by a taxpayer to its suppliers) in a reporting period. The excess of input VAT over output VAT may generally be carried forward against future VAT liabilities.

### VAT compliance
The tax period for VAT is a calendar month. The submission of the VAT declaration is due by the end of the month following the reporting period. Payment of the VAT liability is due by the 25th day of the month following the reporting period.

## *Sales tax*
Sales tax is assessed on Kyrgyz legal entities or foreign entities operating through a PE in Kyrgyzstan for any sales of goods or rendering of services. The sales tax mechanism differs from VAT, i.e. the sales tax is levied for the whole sales turnover and does not take into account the purchases (input turnover).

Sales tax rates are as follows:

- In case of the sale of goods, works, or services by VAT payers:
  - Trading activities: 1.0%.
  - For other activities: 2.0%.
- In case of the sale of goods, works, or services by non-VAT payers:
  - Trading activities: 2.0%.
  - For other activities: 3.0%.

The Kyrgyz Tax Code further defines trading activities as activities on sale of goods purchased for re-sale purposes.

The tax period of sales tax is a calendar month. Taxpayers have to submit tax returns and make payments of sales tax at the place of tax registration by the 20th day of the month following the reporting month.

## *Customs duties and regimes*
According to the Customs Code, the customs value of goods imported to the customs territory of Kyrgyzstan is determined by applying the following methods:

- Transaction value of imported goods.
- Transaction value of identical goods.
- Transaction value of similar goods.
- Deductive method.
- Computed method.
- Provisional method.

Based on the Kyrgyzstan customs legislation, the rates of customs duties may be:

- *Ad valorem* - charged in percentage to customs value of the taxable goods.
- Specific - charged within established size for unit of the taxable goods.
- Combined - including both abovementioned types.

The rates in percentage range from 0% to 30%; however, the maximum rate of 35% may be charged if the country of origin in unknown.

**Import restrictions**
Generally all entities or persons have equal rights to import and export or transfer goods into the Kyrgyzstan territory, including when carrying out foreign trade activity, except in special cases as stipulated by legislation and international treaties.

Import of certain goods (e.g. weapons, nuclear materials) is subject to licensing.

**Temporary import relief**
There is a temporary import regime under which foreign goods are used in Kyrgyzstan with full or partial conditional exemption from the payment of customs duties and taxes and without application of non-tariff regulatory measures. The term of the 'temporary import' customs regime may not exceed two years.

**Customs duties incentives**
Certain items are exempt from customs payments, including:

- Transportation vehicles used in the international conveyance of passengers and goods and items of material and technical supply in transit.
- Goods imported in the customs territory or imported from the customs territory for official and personal use by official state representatives of foreign states.

Kyrgyzstan provides preferential rates or exemptions on the importation (and export) of certain goods, including goods originating from the states which form free trade zones or a customs union with Kyrgyzstan and goods originating from developing countries, included on a special list provided by the government.

**Documentation and procedures**
Kyrgyzstan pays close attention to formalities/documentation and, thus, it is necessary to furnish the customs authorities with a set of required documents. For import, such documents usually include cargo customs declaration, invoices, contracts, etc.

**Warehousing and storage**
There is a bonded warehouse customs regime in Kyrgyzstan. Under this regime, imports entering into Kyrgyzstan may be stored in special facilities or special areas that have the status of a customs warehouse under the customs legislation of Kyrgyzstan. This regime implies exemption from customs duties and taxes.

Generally, most goods (unless otherwise specifically provided for) can be placed under the bonded warehouse customs regime. The period for storage of goods at a bonded warehouse is determined by the person placing the goods into the customs warehouse but cannot exceed three years from the date when the goods were placed under the bonded warehouse customs regime.

## Re-exports

The re-export regime is similar to that used in international practice. It is defined as a customs regime under which goods previously imported into Kyrgyzstan are exported without payment or with a refund of the paid amounts of import customs duties and taxes and without applying the non-tariff regulatory measures with respect to the goods in compliance with Kyrgyz legislation.

There are certain conditions under which goods can be re-exported. Customs duties and taxes are not charged for goods declared as goods intended for re-export. However, if the goods do not meet the re-export criteria, customs duties and taxes are paid in the amount which would be payable if the goods, at their importation, were declared for release for free circulation, as well as interest on them paid at the National Bank rates, as if deferment was provided with respect to the amounts at placement of the goods under the customs regime of re-export.

### *Excise tax*

Certain goods manufactured in Kyrgyzstan or imported to Kyrgyzstan are subject to excise tax. These include certain alcohol and alcoholic drinks; fortified drinks; tobacco goods; jewellery made of gold, silver, or platinum; and oil products.

The rates of excise tax are adopted annually by the Kyrgyzstan government and range from KGS 5 for 1 litre of alcohol drinks to KGS 3,000 for 1 ton of fuel (approximately USD 64). For certain goods, such as jewellery made of gold, silver, or platinum, excise rate is determined in percentage (for jewellery, it is 5% of the retail sales price).

### *Property tax*

Property tax is a local tax payable quarterly by legal entities owning transport vehicles and immovable property in Kyrgyzstan, including apartment houses, apartments, boarding houses, holiday inns, sanatoria, resorts, production, administrative, industrial, and other buildings or facilities. Certain real estate may not be subject to this tax according to special lists approved by the government.

In respect of immovable property, the tax rate is established by the city or local authorities at a rate not to exceed 0.8% of the estimated value of taxable objects, except for apartment houses and apartments designated solely for residence, for which the rate may not exceed 0.35% of the estimated value. The estimation can be performed by the state competent body and independent appraisers. For transport vehicles, the tax is computed in KGS depending on engine volume.

### *Land tax*

Land tax is paid quarterly by legal entities on the area of owned land. The basic rates are provided in the tax code, depending on the location and purposes of the land. The basic rates may range from KGS 0.9 to KGS 2.9 per square metre (approximately USD 0.02 to USD 0.06).

### *Subsurface use taxes*

The subsurface use taxes consist of separate bonus and royalty taxes on subsurface users, both Kyrgyz legal entities and branches of foreign legal entities. Under Kyrgyz legislation, subsurface users are legal entities and individuals who perform exploration and/or extraction of mineral resources.

The government, depending on the type of mineral resources, establishes the bonus rates.

The royalty rates are estimated either as a percentage of sales turnover (1% to 12%) or in absolute terms in KGS depending on the type of mineral resources.

### *Stamp taxes*
There are no stamp taxes in Kyrgyzstan.

## *Branch income*

Branch income is subject to the profit tax. There is no special branch profits tax in addition to profit tax.

## *Income determination*

Aggregate annual income is comprised of all types of income, including but not limited to the following, in addition to gross revenue from the sale of goods (work, services):

- Interest income (except for income already subject to withholding tax).
- Dividends.
- Royalties.
- Assets received free of charge.
- Rental income.
- Income from the reduction of liabilities.
- Foreign exchange gain.
- Write-off liability.

The tax code envisages some profit tax privileges aimed at developing certain areas of the business economy. Currently, these include privileges/preferences for:

- Charity organisations.
- Associations of invalids of I and II groups, (i.e. persons with disability with different levels of physical disability), associations of blind and deaf persons.
- Agricultural organisations.
- Growing of berries, fruits, and vegetables.
- Credit unions.
- Companies that have been involved in the food industry for less than three years and included in the Kyrgyzstan government's list of exempt companies.

Non-taxable revenues include, inter alia, the following:

- Property received as a charter capital contribution and income from realisation of shares of organisations.
- Property donated to special organisations using such property for development purposes under the government's social culture plan. Despite being designated as property used for social culture purposes, such property may still be used for other purposes (i.e. citizen defence projects, mining equipment, water intakes, heat networks, roads, stations).

### *Inventory valuation*
There are no special provisions on inventory valuation in the Kyrgyzstan Tax Code. Inventory valuation is conducted in accordance with the International Financial Reporting Standards (IFRS).

### *Capital gains*
Capital gains are subject to the ordinary profit tax rate. There is an exemption available for capital gains from selling shares that occur on the date of a given sale in the official lists of the stock exchange in the top two categories of listing.

### *Dividend income*
Dividends from participation in Kyrgyz legal entities are exempt from profit tax. All other dividends are subject to the ordinary profit tax rate.

### *Partnership income*
Simple partnerships are not taxpayers in their own right, and income and expenses flow through to the partners for tax reporting purposes. Kyrgyzstan limited liability partnerships are taxed as corporations.

### *Foreign income*
Generally, Kyrgyz legal entities are taxable on income earned worldwide. Foreign income is subject to the ordinary profit tax rate.

There are no tax deferral provisions in Kyrgyzstan tax legislation.

## *Deductions*

Generally, expenses related to the earning of aggregate annual income are considered deductible for profit tax purposes, including:

- Business trip expenses that were actually incurred and supported by appropriate documentation (per diems during business trips are deductible only within the established statutory limits).
- Commissions on payroll expenses for labour.
- Material and social benefits provided to employees.
- Representational expenses connected with earning income (transportation, hotel, and translator services).
- Training and retraining of employees.
- Scientific development and exploration works (deductions are relevant for fixed assets).
- Any other costs related to earning income, which can be supported by appropriate documentation in terms of their nature and amount (e.g. invoices, payment orders, receipts).

The principal categories of expenses which are not deductible include:

- Capital expenses and expenses connected with the purchase, production and installation of equipment.
- Fines and interest penalties paid to the state budget.
- Taxes paid in accordance with the tax code, except for land tax, property tax, VAT that cannot be offset, and subsurface use taxes.
- Any expenses incurred on behalf of any other third persons, except in cases where documentation proves business needs for such expenses.
- Pricing losses caused by rates, understated below-market prices, and price incentives.
- Expenses connected with purchases of services in entertainment, vacations, and leisure.

### *Depreciation*
The tax code establishes a deduction for depreciation based on the declining balance method. Depreciable fixed assets are divided into several groups, for which maximum depreciation rates range from 10% to 50%.

| Group | Assets | Maximum rate of depreciation (%) |
|---|---|---|
| I | Cars, automobile and tractor equipment for use on roads, special instruments, sundries, and accessories; computers, telephone sets, peripherals, and equipment for data processing | 30 |
| II | Automotive transport rolling stock: trucks, buses, special automobiles, and trailers; construction equipment; machines and equipment for all sectors of industry, including the foundry; smith-pressing equipment; electronic and simple equipment, agricultural machines. Office furniture, intangible assets | 25 |
| III | Depreciable fixed assets not listed in other groups and expenses equated to them | 20 |
| IV | Railroad, sea, and river transport vehicles, power machines, and equipment: thermal-engineering equipment, turbine equipment, electric motors and diesel-generators, electricity transmission and communication facilities, pipelines | 10 |
| V | Buildings and constructions | 10 |
| VI | Taxpayer's costs of geological preparation of deposit reserves, design and engineering-research works, and obtaining the license for the use of deposits, as well as mining-capital and mining pre-works aimed at further extraction of minerals, as well as the fixed assets of the mining and/or mining-processing enterprises put into operation and actually used in deposit exploration | 50 |

Certain expenses are deductible within specified limits, including expenses on repairs, expenses on procuring and producing capital production assets, and certain other expenses.

### *Interest expenses*
Deductions for interest actually paid on debts, where the loan proceeds were used to fund expenses incurred for the taxpayer's business activity, are allowed within limitations provided in the tax code depending on methodology and nature of the debt. For example, interest on loans connected with the purchase of depreciable assets is not deducted, but increases their value.

### *Charitable contributions*
Deductions for donations of assets to charity and budget organisations are limited to 10% of taxable income.

### *Taxes*
The following taxes may be deducted:

- Land tax.
- Property tax.
- VAT not allowed for offset.
- Subsurface use taxes.

### *Net operating losses*
Net operating losses can be carried forward for up to five years. There are no provisions in Kyrgyz legislation allowing carryback of losses.

### *Payments to foreign affiliates*
Payments to foreign affiliates are deductible for profit tax purposes if they are aimed at earning income and supported by documentation.

## *Group taxation*

Group taxation is not permitted in Kyrgyzstan.

### *Transfer pricing*
While there is no special law on transfer pricing in Kyrgyzstan, rules on transfer pricing are found in the tax code. The general transfer pricing provisions set in the tax code do not follow Organisation for Economic Co-operation and Development (OECD) guidelines (thus, no advance pricing agreement (APA) mechanism is provided). According to the Kyrgyz transfer pricing regulations, the tax authorities are empowered to determine the value of the following transactions:

- Transfers between related parties.
- Barter transactions.
- Cross-border transactions.

### *Thin capitalisation*
There are no thin capitalisation limitations under the Kyrgyzstan tax code.

## *Tax credits and incentives*

The legislation currently provides the following tax incentives.

### *Investment incentives*
There are no special tax preferences in the Kyrgyzstan Tax Code; however, Kyrgyz Law on Investments envisages that in case of changes in the tax and customs legislation, investors may apply terms which are more beneficial to them.

### *Special economic zones*
There are four special economic zones in Kyrgyzstan: Naryn, Karakol, Bishkek, and Maimak. The special economic zones generally provide for a tax-neutral regime, exemption from customs duties, and a liberal currency control regime. However, there is a special fee for incentives which varies from 0.1% to 2% of sales (depending on the region).

### *Foreign tax credits*
There is no possibility to offset the amount of tax paid outside Kyrgyzstan against the Kyrgyz tax if there is no double tax treaty (DTT) with this country.

## *Withholding taxes*

Passive income from sources in Kyrgyzstan by a non-resident that is not connected with a PE is taxable at the source of payment, without deductions, at the following rates:

- Dividends and interest: 10%.
- Insurance premiums received under risk insurance or re-insurance agreements: 5%.
- Authorship fee: 10%.

Income obtained by a non-resident from performing activities and services in Kyrgyzstan, not connected with a PE, is taxable at the source of payment, without deductions (with the exception of VAT), at the following rates:

- Income from telecommunication or freight services in international communication and transportation between Kyrgyzstan and other countries: 5%.
- Income from management and consulting services: 10%.
- Other services and activities: 10%.

Withholding tax (WHT) applies to Kyrgyzstan source income regardless of whether the payment is made within or outside of Kyrgyzstan.

The application of DTTs often effectively provides a reduction of WHT rates or, in the case of non-passive income, an income tax exemption. Note that the application of treaty privileges is not necessarily automatic, and taxpayers may need to comply with certain administrative procedures to secure relief.

### *Tax treaties*

According to the tax code, the provisions of international tax agreements and other acts to which Kyrgyzstan is a party and ratified by the president or the parliament (as appropriate) take precedence over the provisions of the tax code.

As of 31 January 2011, Kyrgyzstan has concluded DTTs with the countries listed in the following table, which shows the corresponding WHT rates:

| Recipient | Dividends (%) | Interest (%) | Royalties (%) |
|---|---|---|---|
| No treaty | 10 | 10 | 10 |
| Austria | 5/10 (1) | 10 | 10 |
| Belarus | 15 | 10 | 15 |
| Canada | 15 | 15 | 10 |
| China | 10 | 10 | 10 |
| Finland | 5/10 (1) | 10 | 5 |
| Germany | 5/10 (1) | 5 | 10 |
| India | 10 | 10 | 15 |
| Iran | 5/10 (1) | 10 | 10 |
| Kazakhstan | 10 | 10 | 10 |
| Latvia | 5/10 (1) | 10 | 5 |
| Malaysia | 5/10 (2) | 10 | 10 |
| Moldova | 5/10 (1) | 10 | 10 |
| Mongolia | 10 | 10 | 10 |
| Pakistan | 10 | 10 | 10 |
| Poland | 10 | 10 | 10 |
| Russia | 10 | 10 | 10 |
| Switzerland | 5/10 (1) | 5 | 5 |
| Tajikistan | 5/10 (3) | 10 | 10 |
| Turkey | 10 | 10 | 10 |

| Recipient | Dividends (%) | Interest (%) | Royalties (%) |
|---|---|---|---|
| Ukraine | 5/10 (3) | 10 | 10 |
| Uzbekistan | 5/10 (3) | 10 | 10 |

Notes

1. 5% if the beneficial owner is a company (other than a partnership) that directly holds at least 25% of the capital of the paying company.
2. 5% if the beneficial owner is a company (other than a partnership), which owns not less than 10% of the capital of the paying company.
3. 5% if the beneficial recipient is a company, which owns not less than 50% of the capital of the paying company.

## *Tax administration*

### *Returns*

The tax code stipulates that the following key tax reports must be filed with the tax authorities:

- Aggregate Annual Income Tax Declaration: 1 March of the year following the reporting year.
- VAT reporting: on a monthly basis, by the 25th day (or, on the last day for large taxpayers) of the month following the reporting month.
- Other tax reports: as required according to relevant legislation.

Tax authorities may grant an extension for filing a tax return for up to one month upon application by the taxpayer. Such extension does not relieve or prolong the taxpayer's obligation to pay the tax in a timely manner.

### *Payment of tax*

Tax payments should be made as follows:

- Advance payments on profit tax: quarterly by the 20th day of the second month of the reporting quarter.
- Final payments on profit tax: 1 March of the year following the reporting year.
- Tax withheld at the source of payment by a tax agent: the 15th day of the month following the month when income was paid.
- VAT: on a monthly basis, by the 25th day of the month following the reporting month.
- Other tax payments: as required according to relevant legislation.

### *Tax audits*

The State Tax Inspectorate of the Ministry of Finance of Kyrgyzstan and its local tax authorities are the only state authorities that have the right to perform tax audits. The Kyrgyzstan tax service consists of relevant subdivisions of the revenue committee of the Ministry of Finance of Kyrgyzstan and its local authorities.

A tax audit is performed based on a written notification from the Head of the State Tax Inspectorate, which specifies the name of the company to audit, the scope of the audit, and the terms of the audit. Tax audits may be performed not more than once a year by one of the tax authorities (district, city, region, or the state tax authorities) and should not last more than 30 days. If necessary, however, a tax audit may be extended for 10 additional days with written approval from the State Tax Inspectorate.

## *Significant developments*

On 13 May 2011, the President of Lao People's Democratic Republic (PDR) issued an edict amending Lao PDR corporate tax rates effective from 1 October 2011 onwards, as follows:

- The standard rate of profits tax (PT) will be reduced from 35% to 28%. This rate is applicable to both domestic and foreign investors, in accordance with the Law on Promotion of Foreign Investment.
- A specific PT rate for tobacco producers will be set at 30%.

## *Taxes on corporate income*

L

### *Profits tax (PT)*

The standard rate of PT for companies in Lao PDR is 35%.

Tax holidays and reduced PT rates are applicable to companies that qualify as promoted investment activities *(see the Tax credits and incentives section for more information)*.

### *Minimum tax (MT)*

Companies that operate at a loss or have profits below a certain level are subject to MT. However, if the company's loss or profit is certified by an independent auditing firm recognized by the government and registered with the Ministry of Finance, MT will not be payable.

MT rates are .25% of gross receipts for manufacturing companies and 1% of gross receipts for trade and service companies.

### *Surtaxes*

There are no surtaxes in Lao PDR.

### *Industry-specific rates*

There are no industry-specific tax rates in Lao PDR

### *Provincial/local income tax rates*

There are no provincial or local income taxes in Lao PDR.

## *Corporate residence*

There is no definition of residence or permanent establishment for tax purposes under Lao PDR law. All companies (including all forms of legal entities) that are registered under Lao PDR law are subject to PT on their worldwide income. Companies formed under foreign law, operating a business in Lao PDR, and conducting business in Lao PDR are subject to tax on their income derived in Lao PDR.

## Other taxes

### Valued-added tax (VAT)

Beginning 1 January 2010, a VAT replaced the prior indirect tax, the Business Turnover Tax, in Lao PDR.

VAT is imposed on the final consumer of goods and services. Goods and services used for production, trading, and consumption in Lao PDR, goods imported into Lao PDR, and services rendered by foreigners to Lao PDR customers are subject to VAT.

Certain goods and services are exempt from VAT. Exempted items include unprocessed agricultural products, seeds, fertilizers, textbooks, education services, medical services, banking services, and insurance.

The standard VAT rate is 10%. Exported goods and services are VAT 0% rated. The conventional credit method is used to calculate the VAT payable (i.e. output VAT less input VAT). Excess input VAT can be carried forward for six months (extendable). Input VAT for exports is refundable.

Organisations engaged in production or trading of taxable goods and services must register for VAT if their annual revenue is 400,000,000 Lao kips (LAK) or more. Companies below this threshold may voluntarily register. Only registered VAT taxpayers may claim VAT refunds.

One unique feature of Lao PDR VAT is that VAT is charged on withholding taxes *(see the Withholding taxes section for more information)*.

### Property taxes

Land taxes vary depending on the location and the type of the land (e.g. land for construction, agriculture). The calculation of the land tax is based on both the location and the size of the land and is levied at annual rates per square meter. Land tax is payable in the first quarter of the relevant calendar year.

### Customs duties/Import tariffs

All goods imported into Lao PDR are subject to import duty. Exemptions are available to enterprises operating promoted investment activities *(see the Tax credits and incentives section for more information)*.

Lao PDR has adopted the General Agreement on Tariffs and Trade (GATT) valuation principles. Duty rates are based on the ASEAN harmonized tariff nomenclature. Duty rates range between 0% and 40% depending on whether the goods are ASEAN or other source.

### Excise taxes

Excise tax applies to the import and sale of certain luxury products. Excisable goods include alcohol, beer, cigarettes, perfume, cosmetics, motor vehicles, soft drinks, mineral water, and many types of electrical equipment. Excise tax rates range from 5% to 90%.

### Transfer taxes
There are no transfer taxes in Lao PDR.

### Stamp taxes
There are no stamp taxes in Lao PDR.

### Administrative fees
Under the Tax Law, government sectors can collect fees for issuing fiscal licences, business licences, permits, visas, advertisement boards, broadcasting rights, and other services. The charges and service fees are set periodically by Presidential Decree.

## Branch income

Branches of foreign companies are taxable on their income from carrying on business in Lao PDR.

## Income determination

The PT calculation is based on an entity's actual accounting profits as adjusted for tax purposes. The Lao PDR Tax Regulations are silent on the treatment of a large number of items. Generally, in such cases, the tax treatment will follow the accounting treatment. Some of the more common differences are depreciation, entertainment expenses, and the non-deductibility of reserves and provisions (until actually paid).

### Capital gains
There is no separate tax on capital gains in Lao PDR; however, profits from the sale of shares are subject to tax at a rate of 10%. The buyer of the shares is required to withhold and remit the tax.

### Dividend income
Dividends received from another Lao PDR company or a foreign company are taxed at a flat rate of 10%.

### Interest income
Interest income is taxable in Lao PDR.

### Inventory valuation
Inventory valuation for tax purposes follows the method used for accounting purposes in Lao PDR.

### Rents/royalties income
Rents and royalties income are taxable in Lao PDR.

### Unrealised exchange gains/losses
Unrealised exchange gains are not taxable and losses are not deductible in Lao PDR.

## Deductions

### Accrued expenses
Accrued expenses are deductible in Lao PDR.

### *Bad debt*
Bad debt reserves are not deductible in Lao PDR. However, a deduction is allowed when debt is written off.

### *Charitable contributions*
Charitable contributions in Lao PDR are limited to the smaller of .15% of taxable income or LAK 4,000,000.

### *Entertainment expenses*
Entertainment expenses are capped at .4% of annual revenue.

### *Contingent liabilities*
Reserves and provisions are not deductible until actually settled.

### *Depreciation*
Depreciation rates are prescribed in the tax law and may differ from financial accounting. Prescribed rates are as follows:

| | |
|---|---|
| **Buildings used for industrial purposes** | |
| 20 years old or less | 20 years |
| Over 20 years | 40 years |
| **Buildings used for commercial and residential purposes** | |
| Permanent structures | 20 years |
| Semi permanent structures | 10 years |
| Machinery, equipment, vehicles | 5 years |
| Office equipment | 10 years |
| Ships and passenger aircraft | 20 years |

### *Fines and penalties*
Fines and penalties are not deductible in Lao PDR.

### *Interest expenses*
Interest is deductible on an accrual basis following the accounting treatment. All interest payments must be supported by documents showing that the payments are commercially reasonable. Interest paid to a shareholder is not deductible.

### *Net operating and capital losses*
Tax losses can be carried forward for three years, but no carryback is allowed. A change in control will not impact a company's loss carryforward. Capital losses are treated as ordinary losses.

### *Start-up expenses*
Start-up expenses are amortizable over two years in Lao PDR.

### *Payments to foreign affiliates*
Payments to foreign affiliates are deductible if in ordinary course of business.

### *Pension expenses*
Pension expenses are deductible when paid in Lao PDR.

### *Bribes, kickbacks, and illegal payments*
Bribes, kickbacks, and illegal payments are not deductible in Lao PDR.

## Group taxation

Consolidation or grouping is not permitted, and each entity must file on a separate basis in Lao PDR.

### Transfer pricing regime

There are no specified transfer pricing rules in Lao PDR. However, inter-company transactions should be at arm's length.

### Thin capitalisation rules

There are no thin capitalisation or debt to equity rules in Lao PDR.

## Tax credits and incentives

### Promoted investment activities

The following activities are promoted under the Law on the Promotion of Foreign Investment No. 11/NA, dated 22 October 2004 (Existing Foreign Investment Law):

- Production for export.
- Activities relating to agriculture or forestry and agricultural, forestry, and handicraft processing activities.
- Activities relating to industrial processing, industrial activities using modern techniques and technology, research and development, and activities relating to the protection of the environment and biodiversity.
- Human resource development, skills development, and public health.
- Construction of infrastructure.
- Production of raw materials and equipment to be supplied to key industrial activities.
- Development of the tourism industry and transit services.

The following three zones are promoted under the Existing Foreign Investment Law:

| | |
|---|---|
| Zone 1: | Mountainous, plain, and plateau zones with no economic infrastructure to facilitate investments. |
| Zone 2: | Mountainous, plain, and plateau zones with a moderate level of economic infrastructure suitable to accommodate investments to some extent. |
| Zone 3: | Mountainous, plain, and plateau zones with good infrastructure to support investments. |

The tax incentives are as follows:

- Investment in Zone 1 shall be entitled to a PT exemption for seven years and thereafter shall be subject to PT at the rate of 10%.
- Investment in Zone 2 shall be entitled to a PT exemption for five years, then shall be subject to a reduced PT rate of 7.5% for three years, and thereafter a PT rate of 15%.
- Investment in Zone 3 shall be entitled to a PT exemption for two years, then shall be subject to a reduced PT rate of 10% for two years, and thereafter a PT rate of 20%.

In addition to the incentives as mentioned above, foreign investment enterprises shall be entitled to the following incentives:

- During the tax exemption period and during the tax reduction period, the enterprise shall be entitled to an exemption from MT.

- Profits used for the expansion of licensed business activities shall be exempted from PT during the accounting year.

The Law on the Promotion of Foreign Investment grants incentives to foreign investors investing in activities within the promoted sectors and zones. Raw materials, equipment, machines, and vehicles used directly in production will be exempted from import duties and taxes or will be subject to a combined import duty and VAT (formerly Business Turnover Tax) rate of 1%. An application/request letter for incentives in respect of the importation of raw materials, equipment, machines, and vehicles used directly in production will be considered within 30 working days from the date of receipt of the application/request letter.

## *Withholding taxes*

Withholding taxes (WHT) are applied to various types of payments made to domestic and foreign recipients.

| | |
|---|---|
| Dividends | 10% |
| Profit from the sale of shares | 10% |
| Interest and guarantee fees | 10% |
| Payments for use of trademarks and intellectual property | 5% |

*As mentioned in the Other taxes section, VAT of 10% is charged on the above WHT.*

In the case of a foreign recipient, the WHT is considered a final tax.

Lao PDR has double tax treaties with the following countries, and WHT rates under the treaties are as follows:

| | Dividends | Interest | Royalties |
|---|---|---|---|
| Brunei (not in force) | - | - | - |
| China | 5% | 5% | 5% |
| Kuwait (not in force) | - | - | - |
| North Korea | 5% | 10% | 5% |
| Russia | 10% | 10% | 0% |
| South Korea (not in force) | - | - | - |
| Thailand | 10% | 10% | 5% |
| Vietnam | 10% | 10% | 5% |

### *Foreign contractor withholding tax (FCWT)*

A withholding tax on payments to foreign contractors applies where a Lao PDR contracting party contracts with a foreign party that does not have a licensed presence in Lao PDR regardless of whether the services are provided in Lao PDR or outside Lao PDR. The FCWT comprises both a PT and VAT element and is intended to be a final tax on the foreign company. The FCWT withholding and filing obligation rests with the Lao PDR customer.

For foreign contractors, PT must be withheld at a deemed percentage of taxable turnover. The deemed rates are determined according to the nature of the contract or activity.

| | Deemed profit margin (% of business revenue) | Deemed PT rate |
|---|---|---|
| Commerce | 5% | 1.75% |
| Production | 8% | 2.8% |
| Transportation and construction | 10% | 3.5% |
| Service | 20% | 7% |

These PT rates are then added to the VAT at 10% to determine the total FCWT. For example, a foreign service charge of LAK 1,000 would result in LAK 70 of PT and LAK 100 of VAT for a total FCWT of LAK 170.

## Tax administration

### Tax return due dates

PT is determined on a calendar year basis, and the tax return is due 10 March of the subsequent year. Submission of the final tax return will be followed by an audit by the Tax Department.

### Payment of tax

PT is payable quarterly in advance with a final payment after year end. The first three payments are due 10 April, 10 July, and 10 October of the current tax year. The final payment is due with the submission of the final tax return on 10 March of the subsequent year. The quarterly payments are based on the prior year’s PT (or expected tax for the current year). Any excess PT payment can be carried forward to the subsequent year.

### Audit cycle

Most large companies are audited annually in Lao PDR.

### Statute of limitations

The statue of limitations is generally three years in Lao PDR.

## Significant developments

### Large investment relief (effective as of 1 January 2011)

The government has introduced corporate income tax (CIT) relief for investments over 5 million Latvian lati (LVL) in qualifying industries in new, unused fixed assets (buildings and structures classified as industrial buildings and new plant and technological equipment) which they can use for business purposes. The available tax relief is 25% of the amount of investments made (15% for investments over LVL 35 million). Yet companies have to make their investment decisions quickly, as investment projects must be completed by the end of 2016. Companies have to go through certain procedures in order to receive a Cabinet decision by the end of 2013 in support of a qualifying investment project.

Investments have to enable a company to launch a new line of business or to modernise its existing production, which includes manufacturing new goods, a shift of business activity from producing one type of goods to producing another type of goods, or a complete overhaul of the manufacturing process.

### New Micro-business Tax Act (effective as of 1 September 2010)

The Micro-business Tax Act gives existing and newly-formed businesses the opportunity of acquiring micro-business status and registering for micro-business tax (MBT) if they meet the following criteria:

- The shareholders are individuals who are also concurrently members of the board.
- The turnover does not exceed LVL 70,000 in a calendar year.
- The number of employees does not exceed five at any time. Absent employees or employees suspended from work shall not be included in the number of employees.

The standard MBT rate is 9% of a micro-business's turnover and covers payroll taxes, business risk duties, and CIT. The standard rate may be increased in the following cases:

- If its quarterly staff count exceeds five, then two percentage points per extra employee will be added to the standard rate.
- If the turnover exceeds LVL 70,000 in a calendar year, the excess will attract a rate of 20%.
- If an employee's net income exceeds LVL 500 a month, the excess will also attract a rate of 20%.

### Doubtful debts and debt assignments (effective as of 1 January 2011 for debt assigned after 1 January 2009)

New amendments state that, subject to certain criteria, a loss arising on the assignment of a debt is now deductible for CIT purposes. Additionally, under certain conditions, payment of tax on a provision for doubtful debts may be deferred for three years without increasing taxable income at the time of making that provision.

### Value-added tax (VAT) (effective as of 1 January 2011)

Amendments have raised the standard rate of VAT to 22% and the reduced rate to 12%. In addition, electricity supplies to households have been deleted from the list of goods and services attracting the reduced rate. The zero-rating conditions have been adjusted, among other things, to make imports of gas, electricity, heat energy, and cooling energy zero-rated.

The concept of a fiscal representative has been introduced. The law now defines a fiscal representative, lays down the procedure for their VAT registration and deregistration, prescribes the VAT treatment (i.e. zero-rating, input tax deduction, and tax period), and defines their responsibility for VAT obligations resulting from transactions they represent and for presenting all supporting documents.

There is a new threshold of LVL 35,000 for VAT registration (up from LVL 10,000).

There is also an updated procedure for applying a zero-rating to imported goods that are later supplied to a customer in another member state under a valid VAT registration number.

## Taxes on corporate income

The standard rate of CIT is 15%. The tax is assessed on a company's financial profit (loss) that has been adjusted by certain corrections required by law. There are no other taxes on corporate income.

Resident companies are taxed on their worldwide income.

If the company has been registered as a micro-business taxpayer, it pays 9% of its turnover, and this tax covers CIT, payroll taxes, and business risk duties that are paid by other taxpayers.

Non-resident companies are taxed on their Latvia-source income through permanent establishment (PE) at the standard CIT rate. If no PE is created, non-residents may be taxed with 2% to 15% withholding tax (WHT) for qualifying payments (e.g. royalties, management fees, interest).

## Corporate residence

A company is resident in Latvia if it is incorporated or had to be incorporated in Latvia.

### Permanent establishment (PE)

Under the Latvian Taxes and Duties Act, a non-resident has a PE in Latvia if all three of the following conditions are met simultaneously:

- The non-resident uses a fixed place for activities in Latvia.
- The place for activities is permanently used or is established for the purpose of being used permanently.
- The place for activities is used for the performance of commercial activities.

In addition, it is considered that a non-resident has a PE in Latvia if the non-resident performs in Latvia at least one of the following activities:

- Uses a construction site or performs building or installation activities or supervision or consultative activities related to the construction site or aforementioned activities.
- Uses equipment or installations, drilling platforms and special ships intended for the research or extraction of natural resources, or carries out supervisory or consultative work related thereto.
- Within a time period, which together exceeds 30 days in any six-month period, provides services, including consulting, management, and technical services, utilising one's employees or associated personnel.
- Uses the activity of an individual, legal, or other person for the benefit of one's commercial activities, provided that this person is authorised to enter into contracts in the name of the foreign entity and the person regularly (more than once in a taxation period) exercises such an authority.

Note that the PE risk for entities located in treaty countries should be tested in accordance with the relevant double tax treaty (DTT).

## *Other taxes*

### *Value-added tax (VAT)*

The following VAT rates apply in Latvia:

| Description of goods | VAT (%) |
|---|---|
| The standard rate on supplies of goods and services, commodity imports, certain services rendered by non-residents and treated as supplied in Latvia, intra-community acquisitions of goods, and personal consumption. | 22 |
| A reduced rate on medicines, medical devices and goods, specialised baby food, domestic public transport services, household heating charges, household natural gas supplies* (except gas for vehicles), firewood and wooden heating material to households, textbooks, and original literature publications. | 12 |
| Exemption with credit on supplies of goods within the EU to taxable persons registered for VAT in other EU member states. | 0 |
| Exemption with credit on commodity exports and imports not released for free circulation in the EU, supplies of goods and services to diplomats, supplies of goods and services financed by foreign aid, etc. | 0 |

* Note that the reduced VAT rate will no longer apply to household gas supplies as of 1 July 2011.

A number of services are exempt, including education, financial, medical and insurance services, nursery fees, and the sale of used real estate including land (except for the first sale of unused real estate, which is taxable).

Because of the recent amendments to the EU Council Directive 2006/112/EC (VAT directive) and respective amendments of the VAT Act, the new place-of-supply rules for cross-border services (i.e. transactions involving a supplier and a customer located in different countries) went into force on 1 January 2010.

### *Excise duty*

An excise duty is levied on specific categories of goods, mostly as a fixed amount per unit. Excise duties are applied to the following goods, whether made in Latvia or imported:

| Product | Excise amount |
|---|---|
| Oil and oil products | Up to LVL 320 per 1,000 litres, depending on the type of the product. |

| Product | Excise amount |
|---|---|
| Alcohol | LVL 45 to 940 per 1,000 litres, depending on the type of alcohol. |
| Beer | LVL 2.18 for each percent of absolute alcohol, but not less than LVL 4 per 100 litres of beer (LVL 1.09 on the first 10,000 hectolitres for small breweries). |
| Tobacco products | LVL 32 per 1,000 cigars or cigarillos.<br><br>LVL 32 per 1,000 cigarettes plus 33% of the maximum retail selling price.<br><br>LVL 64 per 1,000 cigarettes plus 33% of the maximum retail selling price for cigarettes 80mm to 110mm in length.<br><br>LVL 96 per 1,000 cigarettes plus 33% of the maximum retail selling price for cigarettes 111mm to 140mm in length.<br><br>LVL 128 per 1,000 cigarettes plus 33% of the maximum retail selling price for cigarettes exceeding 140mm in length.<br><br>LVL 43 per 1,000 grams of fine-cut smoking tobacco intended for the rolling of cigarettes.<br><br>LVL 43 for other smoking tobacco. |
| Coffee | LVL 100 per 100 kg. |
| Certain soft drinks | LVL 5.2 per 100 litres. |

### *Customs duty*

Customs duty is levied on goods imported into Latvia. The rate of customs duty generally is between 0% and 20% of the value of imported goods, depending on the type and origin of such goods. Exports are generally exempt from customs tax.

### *National social insurance contributions (NSIC)*

The company as an employer is liable to pay 24.09% NSIC calculated on employee's gross salary.

### *Real estate tax*

Prior to 2010, the real estate tax was payable only for business properties such as land and buildings used for economic activities. However, as of 2010, real estate tax is also payable for engineering structures such as motorways, streets, roads, bridges, elevated highways, tunnels, pipelines, communication lines and power lines, and buildings that form part of a private dwelling house development.

The following real estate tax rates apply as of 1 January 2011:

- The standard rate of 1.5% on the cadastral value of land, buildings, and engineering structures.
- A progressive rate for dwelling houses, their parts, and any parts of a non-residential building that are functionally used for living and not used in trade or business:
  - 0.2% of cadastral values up to LVL 40,000.
  - 0.4% of cadastral values exceeding 40,000 but not exceeding LVL 75,000.
  - 0.6% of cadastral values exceeding LVL 75,000.
- A double rate of 1.5% for uncultivated land capable of agricultural use, unless it is up to one hectare in area or subject to statutory restrictions on agricultural activity. By law, uncultivated land capable of agricultural use is agricultural land that is not used for making or growing agricultural products (including harvesting, grazing, and

keeping animals for agricultural purposes) or is not kept in good agricultural and environmental condition.

Newly constructed or reconstructed buildings are exempt from real estate tax for one year after completion. Other reliefs are available under the Real Estate Tax Act or determined by municipalities.

### *Natural resource tax*

Any natural resources acquired as a result of economic activities (e.g. surface and underground water, dolomite, and quartz sand), the collection of edible park snails, pollution (waste, emissions, and pollutants), products harmful to the environment (e.g. lubricating oil, electric batteries, oil filters, and tyres), radioactive substances, packaging, disposable tableware, vehicles, the volume of emitted greenhouse gasses, and electrical and electronic equipment and appliances are subject to a natural resource tax in Latvia. The rates are specific for each product and are based on weight, volume, or the amount of the product.

The taxpayer may reduce the natural resource tax by taking part in recycling programs. Taxpayers do not have an obligation to recycle themselves to be entitled to the relief; instead they can conclude an agreement with the recycling company.

For some of the products, the taxpayer must also pay the disposal tax. The rates differ for a large variety of products.

### *Light corporate vehicle tax*

As of 1 January 2011, a new light corporate vehicle tax (LCVT) has been introduced in Latvia. LCVT is paid for vehicle(s) owned or held (e.g. rented) by a business person, which is registered for the first time after 1 January 2005, and with information on the engine volume in the registration certificate. There is fixed rate of LCVT calculated according to the engine volume, as follows:

- Up to 2,000 cc: LVL 19 per month.
- From 2,001 cc to 2,500 cc: LVL 30 per month.
- Over 2,500 cc: LVL 40 per month.

For vehicles not mentioned in the above criteria, the LCVT will be LVL 30 per month.

### *Car and motorcycle tax*

Cars and motorcycles registered for the first time or after modification are subject to a car and motorcycle tax. This is tax payable by any individual or entity registered as the owner of a car or motorcycle.

The applicable tax rates for cars registered in foreign countries are calculated based on the carbon dioxide ($CO_2$) on each kilometre constituted by the car. The rates range from LVL 0.3 to LVL 5 where the carbon dioxide is from 120 grams to 350 grams for each kilometre. The rate for newly registered motorcycles is LVL 0.10 for each cubic-centimetre of the engine's capacity.

For other cars, rates range from LVL 75 to LVL 850, depending on age and capacity. The rate for motorcycles depends on age and is 25% of the rate for cars.

### *Lottery and gambling tax*

A lottery and gambling tax is levied on licensed organisers of games or lotteries. License fees range from LVL 3,000 to LVL 300,000. Game organisers, gambling places, and gambling machines are subject to the gambling tax. The tax rates depend on the number and type of gambling machines or percentage of income for several gambling types.

### *Electricity tax*

This electricity tax is levied on electricity supplied to final consumers or consumed by suppliers. The rate is LVL 0.71 per mega-watt-hour. Exemptions are available to producers of electricity and for electricity used by domestic public transport and households.

### *Stamp duty*

Stamp duties are levied on certain legal and other kinds of services, such as court trials, company formation and registration, licenses for certain types of business activity, provision of information, notary services, operation of bills of exchange, and registration of real estate at the Land Registry (2% of the higher of deal value or cadastral value capped at LVL 30,000 per property).

Stamp duty is not payable if re-registration of real estate in the Land Registry is necessary due to the reorganisation process. The maximum amount of stamp duty payable for re-registration of the title to immovable property in case of contribution in kind to a company's capital is LVL 1,000.

### *Local duties*

Certain activities are subject to local duties (e.g. construction permits).

## *Branch income*

As a general rule, branches and resident companies are taxed alike, with certain adjustments for payments to the head office. Branch income is subject to a 15% CIT.

## *Income determination*

### *Inventory valuation*

Dictated by the matching and prudence concepts, stock should be valued at the lower of cost or net realisable value. Cost must be computed on a first in first out (FIFO) basis. Cost can mean purchase price or production cost. Any unrealised losses from stock revaluation are non-deductible.

### *Capital gains*

A capital gain on the disposal of a capital asset is calculated as the difference between the sale proceeds and cost. This gain is subject to a 15% CIT as ordinary income.

Losses on the sale of shares may be carried forward and offset against future profits. However, profits on trading in securities publicly quoted in the European Union or the European Economic Area (EEA) are not taxable, and losses from these securities are not deductible.

Losses on the sale of public securities traded outside the EU/EEA or non-public securities (private shares, unlisted bonds and shares, claim securities) are not deductible but may be offset chronologically in eight subsequent tax periods against income from the sale of other securities. However, if a company makes a one-off sale of securities that it has held for more than 12 months, then such losses may be offset chronologically against total taxable income from operating activities in eight subsequent tax periods.

### *Dividend income*

Dividends from Latvian companies are exempt from CIT, except for dividends from companies paying CIT at a reduced rate (e.g. companies operating in free ports or special economic zones).

Dividends from companies registered in blacklisted tax havens are taxable (a list of blacklisted tax havens is provided by the Cabinet of Ministers).

Dividends paid by a non-resident company based outside blacklisted tax havens to a Latvian person, directly holding at least 25% of shares in that company at the time the dividends are paid, are exempt.

Dividends from a company resident in another EU or EEA country are also tax exempt.

### *Stock dividends*

The distribution of new shares to a company's shareholders in proportion to their existing shareholdings (after a share capital increase by conversion of accrued capital) is not a taxable event for the shareholders.

### *Foreign income*

Resident companies are taxed on their worldwide income. Income is taxed for the given taxation period; there is no possibility to defer taxation until the profit is repatriated to Latvia. Tax paid abroad on income included in the taxable base is allowed as a credit against the CIT charged for the year. However, the credit must not exceed the Latvian tax attributable to the income taxed abroad. Any unused tax credits may not be carried forward.

## *Deductions*

### *Non-business expenses*

A tax deduction is not allowed for any expense not directly related to business activities. As of 2010, non-deductible expenses have to be increased by coefficient 1.5 (except donations made to qualifying institutions). Effectively, such expenses are taxed at 22.5% (15% x 1.5).

Non-business expenses include costs that are not directly related to commercial activities; all expenses incurred for the pleasure and recreation of owners and employees; entertainment trips taken by owners and employees in company vehicles; any benefits, gifts, credits, and loans turned into gifts to owners and employees; and any other disbursements in cash or in kind to owners or employees that are not part of remuneration or that are not related to the taxpayer's commercial activities.

### *Representation expenses*

Under the Latvian CIT Act, representation expenses are costs that a company incurs in developing and maintaining its prestige at a level acceptable to society. Representation expenses include costs incurred in holding public conferences, receptions, and meals, and the cost of producing items to represent the company (e.g. items bearing its logo). As of 1 January 2010, 40% of representation expenses are deductible for CIT purposes (60% prior to 1 January 2010).

### *Depreciation and amortisation*
Fixed assets may be depreciated for tax purposes according to the reducing-balance method by applying the following rates to tax written-down values:

| Types of property | Depreciation rate (%) |
|---|---|
| Buildings, structures, and perennial plantations | 10 |
| Technology and energy installations, fleet, railway | 20 |
| Computer hardware and software, information systems, electronic equipment | 70 |
| Light passenger cars (except special purpose vehicles), motorcycles, and air transport means | 30 |
| Oil rigs, oil exploration and extraction ships, sea and river transport means | 15 |
| Other fixed assets | 40 |

The value of new technological equipment is multiplied by a coefficient (1.5 from 2009 to 2013) before claiming capital allowances. The effect of applying a coefficient is reversed if the new technological equipment is disposed of within five years from acquisition.

Non-business assets are ineligible for capital allowances.

Intangible assets are eligible for capital allowances on a straight-line basis over the following recovery periods:

- Concessions: 10 years.
- Patents, licences, and trademarks: 5 years.
- Research and development (R&D) expenses: 1 year.

Any intangible assets not fitting into any of these categories (such as goodwill) are ineligible for capital allowances.

The cost of intangible investments is increased by a coefficient of 1.5 if such investments result in a trademark or patent being registered.

### *Luxury vehicles*
Luxury vehicles (i.e. light passenger cars with a value greater than LVL 25,424, excluding VAT) are not eligible for capital allowances. A tax deduction is denied for expenses incurred in using and maintaining luxury vehicles and for lease or hire purchase payments associated with leasing such vehicles. These rules do not, however, apply to special purpose vehicles (such as emergency vehicles and special passenger vehicles).

### *Provisions*
Any increase in general provisions and reserves for the tax period as compared with the previous tax period is non-deductible. These provisions include accruals for accrued benefits, bonuses and commissions, and other expenses.

### *Provision for doubtful debts*
Recent amendments allow taxpayers, under certain conditions, to defer payment of CIT on a provision for doubtful debts for three years, without increasing taxable income at the time of making that provision. A special provision for doubtful debts in a tax period

that does not increase taxable income must not exceed 20% of taxable income. To take this relief, the following conditions must be met:

- The payment became due more than six months ago.
- The income associated with these debts has been added to taxable income.
- The debtor is a legal entity resident in the EU/EEA or in a country that has an effective DTT with Latvia.
- The taxpayer and the debtor are not related companies and neither of them is a person related to the company.
- Dealings with the debtor were stopped at least six months ago and have not been resumed since.
- The taxpayer can prove that steps were taken to recover the doubtful debt.
- The taxpayer has given the debtor written notice by 31 December in the tax year that the debt (with details of the supporting document) is covered by a provision for doubtful debts made in line with this clause.

Unless the provision is reduced within three years by being added to taxable income or through a bad debt being written off, the amount of doubtful debts covered by the special provision will have to be added to taxable income.

The amendments relating to the provision for doubtful debts apply from 2011 to 2013.

### *Amounts unpaid by a debtor*
A taxpayer who has not paid for goods or services within six months after the due date for payment must not deduct the amount of the debt from taxable income if the creditor has notified one that the debt is classified as doubtful and covered by a special provision for doubtful debts. Taxable income can be reduced in the tax period the debt is paid.

The amendments relating to the provision for doubtful debts apply from 2011 to 2013.

### *Bad debts*
Bad debts may only be deducted for CIT purposes if certain conditions are met.

### *Penalties*
Fines, contractual penalties, and statutory interest on arrears (including increase in principal debt) levied under the Taxes and Duties Act and specific tax laws are not deductible.

### *Taxes*
Excise duties, employer's national social insurance contributions, natural resource taxes, customs duties, and real estate taxes are deductible.

### *Net operating losses*
As of 2010, losses may be carried forward eight years (formerly five years). The carryback of losses is not permitted.

A company in which more than 50% of shares (a controlling interest) have changed hands may utilise its tax losses if it continues for five years the same business that it carried on during the two years prior to the change of control. When companies are reorganised by a merger or spin-off, it may be possible to utilise losses accrued.

### *Payments to foreign affiliates*
In general, a Latvian company may deduct the full amount of royalties, service fees, and interest (subject to statutory limits) made to related parties to the extent that such

payments are made at arm's length. Such payments may be subject to a WHT *(see the Withholding taxes section)*. However, if a taxpayer fails to deduct the WHT due, the amounts paid cease to be deductible for tax purposes.

## Group taxation

Group consolidation is not permitted for tax purposes. However, the members of a group of Latvian companies, whose parent owns directly or indirectly 90% of the capital of its subsidiary or subsidiaries, may surrender their current-year tax losses to one another.

### Transfer pricing

The Latvian Regulation governing the application of the CIT Act states that for transfer pricing calculation purposes, use may be made of the Transfer Pricing Guidelines for Multinational Enterprises and Tax Administrations, a document issued by the Organisation for Economic Co-operation and Development (OECD).

Latvian law requires that related-party transactions be in compliance with the arm's-length principle. Under the arm's-length principle, the conditions made or imposed between two related enterprises in their commercial or financial relations must not differ from those that would be agreed between independent enterprises engaging in similar transactions under similar circumstances.

A tax audit may examine and adjust the price of a transaction in the following circumstances:

- The transaction is between related parties.
- Barters and set-offs.
- A price deviation exceeds 20% of prices that the taxpayer has applied to similar goods or services over a short period.
- Exports and imports.

The transfer pricing requirements for the arm's-length price of a related-party transaction primarily apply to transactions between two or more related companies. Latvian legislation has broadened these requirements, and section 12 of the CIT Act requires the taxpayer to adjust one's taxable income for the difference between the price applied to a transaction and the arm's-length value if the transaction involves:

- individuals related to the company
- related foreign companies
- companies exempt from CIT or enjoying CIT relief pursuant to other Latvian laws, or
- a related company with which it forms a single tax group.

This provision may apply to any transaction, including purchases and sales of fixed assets and goods, supplies of services, loans and borrowings, and intellectual property. It should also be pointed out that the traditional view that transfer pricing rules only apply to transactions with foreign related companies is no longer consistent with the law because transfer pricing issues are now also important to companies doing business with Latvian-related companies.

There are no obligatory transfer pricing documentation requirements in Latvia yet. Nevertheless, it is highly advisable to prepare the transfer pricing documentation as it may be of valuable support during tax audits.

### *Thin capitalisation*
Thin capitalisation rules apply when claiming a tax deduction for interest payments on loans and leasing services.

Taxable income should be adjusted for either:

- interest paid in excess of interest calculated by applying to the liability 1.2 times the average short-term interest rate at Latvian banks as determined by the Central Statistical Office for the last month of the tax period, or
- interest in proportion to the excess of the average liability over an amount equal to four times shareholders' equity at the beginning of the tax year less any revaluation reserve.

The higher of these calculations should be added to taxable income.

The following interest payments are fully deductible:

- Interest paid on borrowings from credit institutions resident in Latvia, EEA member states, or countries with which Latvia has an effective DTT.
- Interest paid to the Latvian Treasury, Nordic Investment Bank, European Bank for Reconstruction and Development, European Investment Bank, European Council Development Bank, or the World Bank Group.
- Interest paid on Latvian or EEA debt securities in public trading.
- Interest expenses incurred by credit institutions and insurance institutions, regardless of the lender.

Interest paid on borrowings from a financial institution is deductible up to the amount of interest calculated by applying to the liability 1.2 times the average short-term interest rate at Latvian banks as determined by the Central Statistical Office for the last month of the tax period. The qualifying financial institution must meet the following criteria:

- It is resident in Latvia, the EEA, or a country with which Latvia has an effective DTT.
- It provides lending services or finance lease and is monitored by the controlling institution that supervises credit institutions or the financial sector.

### *Controlled foreign company (CFC) rules*
There is no CFC regime in Latvia.

## *Tax credits and incentives*

### *Foreign tax credit*
Tax paid abroad on income included in the taxable base is allowed as a credit against the CIT charged for the year. However, the credit must not exceed the Latvian tax attributable to the income taxed abroad. Any unused tax credits may not be carried forward.

### *Donations to public benefit organisations*
CIT liability may be reduced by 85% of amounts donated to qualifying state-funded institutions; Latvian-registered societies, establishments, and religious organisations; or to institutions qualifying as public-benefit organisations under the Public Benefit Organisations Act. Such a reduction may not exceed 20% of the total CIT liability. When

making a donation, the donor is not permitted to impose an obligation on the recipient of the donation or carry out any acts that may be classified and treated as consideration.

As of 2011, donation relief is also available for donations to EU/EEA entities that have statuses similar to public-benefit organisations in the country of residence.

### *Large investment relief*

As of 2011, the government has introduced CIT relief for investments over LVL 5 million in qualifying industries in new, unused fixed assets (buildings and structures classified as industrial buildings and new plant and technological equipment) which they can use for business purposes. The available tax relief is 25% of the amount of investments made (15% for investments over LVL 35 million). Yet companies have to make their investment decisions quickly, as investment projects must be completed by the end of 2016. Companies have to go through certain procedures in order to receive a Cabinet decision by the end of 2013 in support of a qualifying investment project.

Investments have to enable a company to launch a new line of business or to modernise its existing production, which includes manufacturing new goods, a shift of business activity from producing one type of goods to producing another type of goods, or a complete overhaul of the manufacturing process.

### *Incentives for shareholders to invest profits in companies*

Recent changes in CIT law encourage shareholders to invest profits in the development of their company rather than take them out as dividends. Businesses may reduce their taxable income by a notional amount of interest that a taxpayer would have to pay on a loan equal to one's prior-year undistributed profit. This adjustment is calculated by multiplying the annual weighted average rate of interest on loans issued to non-financial Latvian businesses as determined by the Bank of Latvia for the tax period by undistributed profits accrued since 31 December 2008.

### *Free ports and special economic zones*

Companies operating in special economic zones are entitled to CIT and real estate tax relief. These areas include the free ports of Ventspils and Riga and the special economic zones of Rezekne and Liepaja.

The qualifying companies may apply CIT relief of 80%, yet the CIT must be calculated at a 25% rate resulting in an effective CIT rate of 5%. The companies may also apply 80% WHT relief for dividends, management services, and payments for intellectual property made to non-resident companies.

Real estate tax relief amounts to 80%, and the municipality may waive the remaining 20%. Therefore, when meeting certain criteria, qualifying companies may decrease real estate tax to zero.

The amount of total CIT and real estate tax relief that may be claimed by the company depends on the amount of qualifying investments made by the company in the free port or SEZ area. Depending on the size of the company, the total tax relief available ranges from 50% to 70% from the amount of investments made.

### *Deferred tax on asset replacements*

Latvia will allow a deferred payment of tax on profits arising on the sale of a replaced asset in order to encourage manufacturing companies to replace inefficient and outdated plant and machinery.

If a company acquires a functionally similar asset within 12 months before or after the old equipment is disposed of, then any income (profit) on the disposal of the old equipment is ignored in this tax period (i.e. the profit is deductible from taxable income). Tax payment is deferred until the new equipment is sold and may be further postponed if the equipment is replaced.

## *Withholding taxes*

The following types of payments to non-residents are subject to WHT.

### *Dividends*

Dividends are generally subject to a 10% WHT. DTTs generally reduce the rate to 5%. However, dividends paid to a company that is a resident of and meets the criteria of parent-subsidiary directive in any EU or EEA member state are exempt.

### *Interest*

Interest payments to related non-resident parties are generally subject to a 10% WHT. Interest payments to non-related creditors are not subject to WHT. If a bank registered in Latvia pays interest to related companies at the bank's normal interest rate level, then a 5% WHT applies.

Through 30 June 2013, Latvian companies will have to comply with transitional rules of the CIT Act, which provide a 5% WHT on interest payments to a related EU company. From 1 July 2013 onwards, WHT no longer will apply to interest paid by a Latvian company to a related EU member state company that holds at least 25% of the share capital or voting power in that Latvian company and meets certain other statutory criteria.

### *Royalties*

Payments for intellectual property (copyright in literary or artistic works, including movies, videos, and sound recordings) are subject to a 15% WHT. A 5% WHT is applied on other intellectual rights, such as patents, royalties, and trademarks. DTTs may reduce the rate.

If the recipient is an EU-related company that holds at least 25% of the share capital or voting power in that Latvian company and meets certain other statutory criteria, the applicable rate for intellectual property is 5% through 30 June 2013 and exempt from 1 July 2013 onwards.

### *Rentals of industrial, commercial, or scientific equipment and real estate*

Rental payments for property in Latvia are subject to a 5% WHT.

### *Management fees*

Management and consulting fees are subject to a 10% WHT. The term 'management and consulting' means activities carried out by a non-resident directly or by outsourced personnel to ensure the management of a Latvian company or to provide necessary advice. DTTs may reduce the rate to 0%.

### *Disposal of real estate*

A 2% WHT applies to proceeds from real estate disposals. This applies to income from disposed shares or other participation in a Latvian or foreign-registered company or other entity, if real estate in Latvia made up (in the period of disposal or the previous period, whether directly or indirectly, through shareholdings in one or more other entities established in Latvia or abroad) more than 50% of the asset value of the company being disposed of.

### *Double tax treaties (DTT)*

A Latvian company can rely on a DTT to reduce the rate of WHT on any payments previously mentioned. To this end, the Latvian company must obtain a valid residence certificate for each type of payment to each recipient prior to making the actual payment. A valid residence certificate is one approved by the foreign tax authority and the Latvian tax authority.

Please see the following table for WHT rates applicable to the payments described above:

| Recipient | Dividends (%) | Interest (%) | Royalties (%) | Rentals of industrial, commercial, or scientific equipment and real estate (%) | Management fees (%) | Disposal of real estate (%) |
|---|---|---|---|---|---|---|
| Related Latvian companies using certain CIT reliefs | 0 | 5/10 | 5/15 | 5 | 10 | 2 |
| Companies in tax havens (1) | 10 | 5/15 | 15 | 15 | 15 | 15 |
| | | | | | | |

| Uzbekistan | 10 | 0/5/10 | 5/10 | 5 | 0 | 2 |

Notes

1. 15% applies to all payments to companies located in tax havens, with the following exceptions:
   - 10% for dividends paid by Latvian residents.
   - 5% for interest on deposits and current accounts paid by Latvian banks at their general rate.
   - Repayments of loan principal are exempt.
   - Goods originating in the tax haven are exempt.
2. A 25% minimum shareholding is required for the lower rate.
3. A 10% minimum shareholding is required for the lower rate.
4. A 25% and USD 75,000 minimum shareholding is required for the lower rate.
5. A 20% minimum shareholding is required for the lower rate.
6. 0%: a 75% minimum shareholding is required; 5%: a 25% minimum shareholding is required.

## *Tax administration*

### *Returns*

The fiscal year may not exceed 12 months and is normally based on the calendar year. However, companies are permitted to choose alternative start and end dates for the tax year. The first year of trading may last up to 18 months. Tax returns are filed annually, together with annual accounts, within one month after they have been approved but not later than four months after the end of financial year. Thus, if the financial year ends on 31 December, the CIT return and annual accounts must be filed not later than by 1 May of the following year. Larger companies may file the CIT return and annual accounts not later than seven months after the end of financial year.

### *Payment of tax*

CIT usually is paid monthly on or before the 15th day of each month, with a final adjustment when the annual tax return is filed. Monthly tax installments are based on the tax liability in the previous fiscal year and adjusted by the consumer price index. A company may choose quarterly installments if its monthly advances in the previous period were less than LVL 500. For a new company, advance payments are voluntary.

## Significant developments

The Ministry of Finance published Decision No. 1216, dated 21 November 2009, containing a list of updated forms and declarations to be used by taxpayers starting in year 2010. A listing and copies of these forms and declarations is found in Official Gazette No. 62 1/2, dated 31 December 2009. Original copies of these forms and declarations may be obtained from the Ministry of Finance.

The Ministry of Finance has introduced new fiscal obligations for Lebanese representative offices, effective for financial year 2010. The major obligation is that representative offices will be required to submit annual tax declarations using specific forms which were published under the above decision.

The Ministry of Finance issued Instructions No.4068 on 23 December 2010 in relation to the accounting system that may be adopted by institutions exempt from income tax (other than companies) and the deadlines of submitting the declarations.

## Taxes on corporate income

Under the income tax law in Lebanon, tax is levied based on income type. Accordingly, the income tax law divides income into the following three categories:

- Chapter I – profits from industrial, commercial, and non-commercial professions.
- Chapter II – salaries and wages and pension salaries.
- Chapter III – revenues from moveable capital (chapter III mainly covers all types of dividend income, board member appropriations from profits, and interest income, including interest on bonds and treasury bills).

The income tax law does not provide for a single tax on income. Accordingly, where a taxpayer has income from different sources, each type of income is taxed according to the tax chapter it falls under. The applicable rates are as follows:

- Corporate income tax (CIT): 15%.
- Dividend distribution tax: 10% (may be reduced to 5% in certain cases).
- Capital gains tax: 10%.
- Non-resident withholding tax (WHT): 7.5% for services and 2.25% for other than services.
- Payroll tax: from 2% to 20%.
- Moveable capital tax: 5% or 10%.

Not all businesses are taxed in the same manner, and, depending on the relative size and structure of a business, the tax method applied is assessed depending on real (or actual) profits or deemed profits.

### *Real profit tax*

In Lebanon, tax is charged on the total income or profits derived in Lebanon. Based on the income tax law and the principle of territoriality, the main premise for considering a profit to have been realized in Lebanon is if it was generated through an effort or activity exerted in Lebanon.

The tax base (the determination of profits) and the tax rates differ between resident and non-resident tax payers.

For resident corporate entities, real profit: tax is computed at 15% based on the taxpayer's accounting profits after adjustments resulting from tax rules through the schedule of accounting-to-tax calculation.

The use of the real profit method is mandatory for the following:

- Corporations (SAL).
- Limited liability companies (SARL).
- Companies of individuals.
- Branches of foreign companies.
- All entities employing more than four employees or importing goods.

Small entities may choose voluntarily to be subject to the real profit method; however, once they choose the real profit method, they cannot revert back to the deemed profit method.

Concerning tax non-residents, WHT applies at 2.25% on payments for goods and 7.5% on payments for services.

### *Deemed profit tax*

A deemed profit tax is imposed on insurance and savings institutions, taxable transport companies, oil refineries, and public work contractors. Taxation is based on deemed profits and is levied at a flat rate of 15%.

The rate of deemed profit for public work contractors, as approved by the Ministry of Finance, is currently set at either 10% or 15% of total amounts collected per year, based on the type of activity performed by the contractor. For insurance companies, the deemed profit rate varies depending on the type of insurance activity (i.e. life, motor, accident, etc.). In addition to the flat rate tax imposed on deemed profits, a distribution tax of 10% is levied on dividends.

## *Corporate residence*

Tax is levied on all corporeal/natural and incorporeal/artificial persons, resident in Lebanon or outside, on all profits that they generate in Lebanon. The main premise for considering profits to have been realised in Lebanon is when such profits have occurred from an effort exerted in Lebanon, irrespective of the identity of the taxpayer or place of residency.

There are no clear provisions in the Lebanese income tax law to define permanent establishments.

Tax is levied on profits generated by two categories of taxpayers: resident taxpayers and non-resident taxpayers.

### *Resident taxpayers*

A person, establishment, or company is considered resident for tax purposes, even if not physically resident in Lebanon, when any of the following two terms are satisfied:

- Have an office or a fixed place of business in their name in Lebanon, even when they are not undertaking their business in a normal and repetitive manner.
- Practising a profession or business activity in a normal or repetitive manner in Lebanon, even if they do not have a known registered place of business in Lebanon. This is because they are considered to have practised their profession from the place in which they contact their customers, even if such place is a hotel or a café.

### *Non-resident taxpayers*

Non-resident taxpayers can consist of persons residing in Lebanon and persons residing outside Lebanon. A corporeal person residing in Lebanon is subject to the non-resident WHT *(see the Withholding taxes section for more information)* if neither of the following two terms are satisfied:

- Practise a certain trade in a normal and repetitive manner in Lebanon, irrespective of whether or not they have a known registered place of business.
- Have a known registered place of business in Lebanon.

A person residing outside Lebanon is subject to the non-resident WHT on the amounts, revenues, profits, or proceeds obtained from Lebanon as a result of undertaking an activity in whole or in part on Lebanese territory or as a result of exploiting rights in Lebanon.

## *Other taxes*

### *Value-added tax (VAT)*

The standard VAT rate in Lebanon is 10%. Unless specifically exempt, VAT is levied on all commercial transactions undertaken by business entities. Export of goods and services and export-related services, international transport, and some of the intermediate operations are zero-rated. Banking, financial services, and insurance operations are exempt from VAT.

### *Built property tax*

The built property tax is an annual progressive tax, ranging between 4% and 14%, on built property.

### *Stamp duty*

Two kinds of stamp duties are levied. A proportionate stamp duty of 0.3% is levied on all deeds and contracts (written or implied) that mention specific payments or other sums of money. A fixed stamp duty ranging between a minimum of 100 Lebanese pounds (LBP) and a maximum of LBP 2 million is applicable on documents in accordance with schedules appended to the stamp duty law.

### Registration taxes

The estimated cost of establishing a company in Lebanon is USD 7,500. This includes lawyer's fees and registration fees. The registration fees will increase if the company is established with capital exceeding the minimum requirement. However, the registration fees should not normally exceed 1% of the value of capital.

For branch offices and representative offices, establishment costs are lower and may be estimated at USD 5,000.

When transferring ownership of real estate, registration fees of approximately 6% are applicable.

### Customs duties

Modern, simple, and efficient assessment means are adopted by the customs authorities (e.g. electronic declarations, declaration in advance, applying international procedures in clearing the goods, selective inspection, auditing the goods after their release, and adopting the unique declaration).

Customs rates are imposed and modified according to decisions from the Lebanese customs authorities. These decisions are adopted based on the need of the Lebanese markets of some goods and the will to protect national production sectors.

Safeguard measures are provided for in relation to imported goods. The purpose behind such measures is to protect the domestic production sectors when an increase of imports is witnessed when compared to the same period during the previous year.

The rates are determined based on a specific schedule created in conformity with the Harmonised System of Nomenclature. This conformity with the unified system allows Lebanon to represent an 'importer friendly' environment for importers.

The normal rates are applied where there is no preferential agreement. When the origin of the good or part of the good is from a country with which Lebanon has a preferential customs treatment, preferential rates apply.

Customs rates in Lebanon are either determined in percentage or paid as a lump sum per unit of imported products.

## Branch income

Net income derived from a branch's operations in Lebanon is subject to Lebanese real profit tax, levied at a rate of 15%. Taxable profits of foreign branch offices are deemed to be distributed and are subject to a dividend distribution tax at the rate of 10%.

### Representative offices

Representative offices do not pay CIT as long as they do not carry out commercial activities. Representative offices are required to submit annual tax declarations along with detailed company information that includes employee information, a balance sheet, an income statement, a non-resident tax schedule, and a schedule of payments to professionals. The declaration, with all relevant documentation, should be submitted as one single set. All the information included should be based on accounting records. The deadline for submitting the declaration depends on the legal form of the parent company (i.e. before 1 June of the following year for SAL or SARL companies and before 1 May of the following year for others).

## Income determination

### Inventory valuation
For tax purposes, inventory is valued using the weighted average cost method.

### Capital gains
Under local legislation, companies are permitted to revalue their fixed assets every five years. Capital gains recognised from such a revaluation, as well as any profits that may be realised from the disposal of fixed assets, are subject to a capital gains tax of 10%.

Income from disposal of shares realised by a company is subject to 10% capital gains tax when the shares are classified as financial assets in the company's balance sheet.

Income from disposal of shares realised by a company whose main activity is the acquisition of investments is subject to 15% CIT.

### Inter-company dividends
Dividends received as a result of a taxable person's activity are deemed trading income and are subject to 15% CIT. Dividends received as passive income are subject to 10% tax in Lebanon. However, dividends received from Lebanese entities are exempt from CIT, as the dividend tax is withheld at source, but are not exempt from further tax upon distribution from the recipient entity.

### Stock dividends
The Lebanese law is silent on the tax implications of stock dividends. However, when share capital is increased by reducing retained earnings, no tax is applicable.

### Interest income
Interest earned by corporations is added to taxable income. Relief is given for the WHT suffered on bank accounts, treasury bills, and bonds issue to the extent of the CIT due.

### Rental income
Rental income should be deducted from the accounting result to reach the taxable result. Moreover, expenses related to property that is rented out should be added back to the accounting result to reach the taxable result.

A built property tax is paid on rental income at progressive rates ranging between 4% and 14%.

### Royalties income
Royalties received by a holding company from Lebanese companies for patents and the like are taxed at a rate of 10%. Royalties received by holding companies from abroad are exempt from tax.

Royalties received by other than holding companies are taxed as ordinary income at 15%.

### Unrealised exchange gains/losses
Unrealised exchange gains and losses are not treated differently from any other gain or loss for tax purposes, i.e. unrealised exchange gains are subject to CIT at 15% and unrealised exchange losses are deductible for CIT purposes.

### Foreign income

Income from any source, domestic or foreign, received by a corporation within Lebanon is subject to CIT. The scope of tax covers the activities carried out inside and outside Lebanon, which are administered or managed from Lebanon.

## Deductions

### Depreciation

Depreciation of property, plant, and equipment (at rates fixed by ministerial decree) is deductible. The depreciation method to be used is the straight line method. If a depreciation rate that is higher than the low rate is adopted, the Ministry of Finance should be notified. The allowable depreciation rates are as follows:

| Assets | Low rate (%) | High rate (%) |
|---|---|---|
| Buildings (commercial, touristic, and services) | 2 | 5 |
| Buildings (industrial and artisanal) | 3 | 10 |
| Buildings and constructions (commercial or industrial) | 6 | 20 |
| Freehold improvements and decorations | 6 | 25 |
| Technical installations and industrial equipments | 8 | 25 |
| Computer hardware and software | 20 | 50 |
| Vehicles (cars) | 10 | 25 |
| Vehicles (transport of goods / buses) | 6 | 20 |
| Sea transport | 5 | 10 |
| Air transport | 20 | 25 |
| Office equipment and furniture | 8 | 25 |
| Glasswares and silverwares (hotels, restaurants, etc.) | Inventory @ Y/E | Inventory @ Y/E |
| Gas cylinders | 8 | 20 |

### Organisation and start-up expenses

Organisation and start-up expenses are amortised over three to five years for tax purposes.

### Bad debts

Bad debts are deductible if all means for collection of the debt have been exhausted.

Provisions for bad debts are deductible if a debtor has been declared bankrupt. Surplus provisions are added to profits.

### Charitable contributions

Charitable contributions are deductible if made to approved charitable, social, cultural, or sporting institutions, within certain limits.

### Gifts

Gifts given by the company in cash are non-deductible.

Gifts given by the company in-kind to customers when the amount of each gift exceeds LBP 1 million per person per year and when the total amount of gifts in-kind exceeds 1% of the turnover are non-deductible.

### *Fines and penalties*
Fines and penalties are not deductible in Lebanon.

### *Taxes*
Taxes and duties incurred in the course of business (except CIT) are deductible.

Taxes due to foreign governments on income earned in Lebanon are non-deductible.

Exceptional taxes and fines are non-deductible.

### *Other significant items*
Other deductible expenses include:

- Cost of goods sold.
- Cost of services rendered.
- Rent of business premises or, if the premises are owned by the taxpayer, their depreciation.
- Salaries, wages, and other employee benefits, including end-of-service indemnities.
- General business expenses, including insurance premiums.
- Interest on business loans, under certain conditions.
- Reserves for severance payments, pensions, and disability payments. Surplus provisions are added to profits.
- Advertising and publicity expenses, within certain limits.
- Travel, telephone, and vehicle expenses, within certain limits.
- Entertainment expenses that are properly supported.
- Board remuneration against services performed.
- Accrued expenses as long as their occurrence is certain.
- Employees' life insurance premiums are deductible as long as they are included in the employees' benefits subject to payroll tax.

Other non-deductible expenses include:

- Interest paid on the taxpayer's capital.
- With the exception of normal maintenance expenses, costs that increase the value of the property, plant, or equipment (such costs should be capitalised and depreciated in accordance with the fiscal depreciation rates).
- Losses or share-in-costs resulting from enterprises, offices, and branches situated outside Lebanon.
- Representation allowances in excess of 10% of an employee's basic salary, as well as unjustifiable and unreasonable salaries.
- Personal expenses, such as payments deducted by an employer or partner for the management of the business and for certain business expenses incurred by the employer or partner.
- Appropriations made to board members that do not comprise remuneration for work done.
- Provisions, other than those specifically allowed by law. Examples of non-deductible provisions include provisions for bad debts, provisions for slow moving items, and provisions for bonuses, contingencies, and charges.

### *Net operating and capital losses*
Tax losses may be carried forward for up to three years after the year in which they were originally incurred. The carryback of losses is not available.

Capital losses may be used to offset taxable profits of the current year but may not be carried forward.

### *Payments to foreign affiliates*
Payments to foreign affiliates are generally subject to WHT.

Based on guidance issued by the Ministry of Finance, recharges from the head office located abroad (including advertising) are deductible up to a certain limit, calculated as follows:

> (Assets of the branch in Lebanon/Consolidated assets) x Central administrative expenses.

However, a ceiling of 3% of the branch's revenues is applied.

## *Group taxation*

There is no group taxation in Lebanon.

### *Transfer pricing*
In Lebanon, there are no clear and detailed transfer pricing or general anti-avoidance rules. However, even in the absence of clear transfer pricing rules, exchanges or transactions made between related parties should be done on an arm's-length basis.

The tax administration has the right to reassess related party transactions and adjust their value in order to reflect the taxable amount related to the period under study.

### *Thin capitalisation*
In Lebanon, there are no clear or detailed thin capitalisation rules.

## *Tax credits and incentives*

### *Holding companies*
Lebanese holding companies are exempt from CIT and from WHT on dividends. However, they are subject to a tax on their paid-up capital and reserves. In any given tax year, total tax payments on paid-up capital and reserves are capped at LBP 5 million.

Interest, management fees, and royalties received by holding companies from abroad are exempt from CIT.

Holding companies are subject to a 10% tax on interest received from loans shorter than three years extended to companies operating in Lebanon. Management fees received by the holding company from companies operating in Lebanon are subject to a 5% tax. Capital gains on financial assets in Lebanese companies held for less than two years are subject to a 10% tax. Royalties received from Lebanese companies for patents and the like are taxed at a rate of 10%.

### *Offshore companies*
Offshore companies are exempt from CIT and from the WHT on dividends, and are instead subject to a lump-sum annual tax of LBP 1 million. Contracts related to offshore activities outside Lebanon are exempt from Lebanese stamp duty.

Offshore companies are required to be registered as SAL companies and, with a few exceptions, are subject to the same regulations as a SAL company. The business objectives of an offshore company are limited.

### *Permanent exemptions from CIT*

Companies and organisations that are granted an indefinite exemption from CIT include the following:

- Educational institutions.
- Hospitals, orphanages, asylums, and other shelters that admit patients free of charge.
- Shipping, sea, and air transport associations (subject to certain restrictions).
- Farmers, provided they do not display farm produce and cattle outlets or sell products and meat after conversion tax.
- Syndicates and other types of professional associations.
- Miscellaneous non-profit organisations and co-operatives.
- Holding companies and offshore companies.
- Public sector bodies that do not compete with private institutions.

### *Reinvestment incentives*

Industrial companies using operating profit to finance certain capital investments are exempt from up to 50% of their CIT liabilities for a period of up to four years, provided that such exemptions do not exceed the original investments made. In areas designated 'development zones', 75% of a company's tax liabilities may be exempt.

In order to take advantage of this regulation, investments should consist of capital expenditures designed to increase a company's manufacturing capacity or of investments in housing facilities for the company's staff and other employees.

## *Withholding taxes*

### *WHT on interest*

The income, revenues, and interest earned from accounts opened at Lebanese banks and from treasury bonds are subject to a 5% WHT that is non-refundable and cannot be carried forward. This WHT is considered as an advance payment on the current CIT due to the extent of that amount and acts as a minimum tax in situations where the tax due is lower than the tax on interest paid.

### *Non-resident WHT*

Revenues earned by non-residents in Lebanon are subject to an effective WHT of 2.25% on revenue from the sale of materials and equipment, and 7.5% on the revenue in the case of sale of services.

### *Movable capital WHT*

A 10% WHT is levied on income derived from movable capital generated in Lebanon. Taxable income is comprised of the following:

- Distributed dividends, interest, and income from shares.
- Directors' and shareholders' fees.
- Distribution of reserves or profits.
- Interest from loans to corporations.

### *WHT on dividends*

Tax is withheld from dividends paid to shareholders/partners at a rate of 10%. The dividend distribution tax rate may be reduced to 5% under specific conditions.

Double taxation treaties (DTT) provide the following WHT benefits. Note that treaty rates do not override lower non-treaty rates. Treaty members may take advantage of the non-treaty rates.

| Recipient | Dividends (%) | Interest (%) | Royalties (%) |
|---|---|---|---|
| Non-treaty | 10 | 10 | 7.5 |
| Treaty: | | | |
| Algeria | 15 | 10 | 10 |
| Armenia | 5/10 (1) | 8 | 5 |
| Bahrain | 0 (2) | 0 (2) | 0 (2) |
| Belarus | 7.5 | 5 | 5 |
| Bulgaria | 5 | 7 | 5 |
| Cyprus | 5 | 5 | 0 (2) |
| Czech Republic | 5 | 0 (2) | 5/10 (3) |
| Egypt | 10 | 10 | 5 |
| France | 0 (2) | 0 (2) | 0 (2) |
| Iran | 5 | 5 | 5 |
| Jordan | 10 | 10 | 10 |
| Kuwait | 0 (2) | 0 (2) | 5 |
| Malaysia | 5 | 10 | 8 |
| Malta | 5 (4) | 0 (2) | 5 |
| Morocco | 5/10 (5) | 10 | 5/10 (7) |
| Pakistan | 10 | 10 | 7.5 |
| Poland | 5 | 5 | 5 |
| Qatar | 0 (2) | 0 (2) | 0 (2) |
| Romania | 5 | 5 | 5 |
| Russia | 10 | 5 | 5 |
| Senegal | 10 | 10 | 10 |
| Sultanate of Oman | 5/10 (6) | 10 | 10 |
| Syria | 5 | 10 | 18 |
| Tunisia | 5 | 5 | 5 |
| Turkey | 10/15 (8) | 10 | 10 |
| UAE | 0 (2) | 0 (2) | 5 |
| Ukraine | 5/15 (9) | 10 | 10 |
| Yemen | 10 | 5 | 7.5 |

Notes

1. Shall not exceed:
   - 5% of the gross amount of the dividends if the beneficial owner is a company (other than a partnership) which holds directly at least 25% of the equity capital of the company paying the dividends.
   - 10% of the gross amount of the dividends in all other cases.
2. Dividends, interest, or royalties arising in a Contracting State and paid to a resident of the other Contracting State shall be taxable only in that other State.
3. Shall not exceed:
   - 5% of the gross amount of royalties paid for the use of, or the right to use, any industrial, commercial, or scientific equipment.

- 10% of the gross amount of royalties paid for the use of, or the right to use, any copyright of literary, artistic, or scientific work, including cinematograph films and films or tapes for radio or television broadcasting any software, patent, trademark, design or model, plan, secret formula, or process, or for information concerning industrial, commercial, or scientific experience.

4. Where the dividends are paid by a company which is:
   - A resident of Lebanon to a resident of Malta who is the beneficial owner thereof, the Lebanese tax so charged shall not exceed 5% of the gross amount of the dividends.
   - A resident of Malta to a resident of Lebanon who is the beneficial owner thereof, the Malta tax on the gross amount of the dividends shall not exceed that chargeable on the profits out of which the dividends are paid.
5. Shall not exceed:
   - 5% of the gross amount of the dividends if the beneficial owner is a company (other than a partnership) which holds directly at least 10% of the equity capital of the company paying the dividends.
   - 10% of the gross amount of the dividends in all other cases.
6. Shall not exceed:
   - 5% of the gross amount of the dividends if the beneficial owner is a company (other than a partnership) which holds directly at least 20% of the equity capital of the company paying the dividends.
   - 10% of the gross amount of the dividends in all other cases.
7. Shall not exceed:
   - 10% of the gross amount of royalties paid for the use of, or the right to use, any copyright of literary, artistic, or scientific work, including cinematograph films and films or tapes for radio or television broadcasting.
   - 5% of the gross amount of royalties paid in other cases.
8. Shall not exceed:
   - 10% of the gross amount of the dividends if the beneficial owner is a company (other than a partnership) which holds directly at least 15% of the equity capital of the company paying the dividends.
   - 15% of the gross amount of the dividends in all other cases.
9. Shall not exceed:
   - 5% of the gross amount of the dividends if the beneficial owner is a company (other than a partnership) which holds directly at least 20% of the equity capital of the company paying the dividends.
   - 15% of the gross amount of the dividends in all other cases.

## *Tax administration*

### *Returns*

Taxes on business income in any given year are based on the profits of the previous financial year. Lebanon's fiscal year runs from January to December and is based on the Gregorian calendar. With the special permission of the local tax authorities, companies may, however, use their own accounting year.

Tax returns by artificial persons (entities) must be filed by 31 March of the year following the year of income. Tax returns by capital companies must be filed by 31 May of the year following the year of income.

Submission deadlines of annual declarations for institutions that are exempt from income tax (other than companies) are as follows:

- Before 1 February for institutions adopting the cash basis accounting.
- Before 1 April for institutions adopting the accrual basis accounting and for representative offices that represent non-corporate entities.
- Before 1 June for representative offices that represent corporations.

If taxpayers fail to submit a tax return, realisation penalties will be due.

### *Payment of tax*

The same deadlines for tax returns apply for tax payments.

If taxpayers fail to make payment, late payment penalties will be due.

### *Topics of focus for tax authorities*

Lately, several topics have been of interest to the tax authorities in Lebanon, including transfer pricing, payments of royalties, and management fees to non-resident parties, provisions, and employee compensation.

### *Audit cycle*

The most common ways for the tax authorities to select companies for tax audits are the size of the company, the type of business, and certain risk assessment measures.

Tax audits typically cover a single type of tax.

In a typical situation, a tax audit is likely to take less than one year from first information request to substantive resolution.

### *Statute of limitations*

The tax administration has four years to collect its rights. The period is calculated from the end of year that follows the current business year.

The taxable person may request the refund of excess tax within four years starting from the end of the year where the refund right was created.

The tax administration can exceed the statute of limitations in cases where a profit or revenue has been proven by a court order, arbitration, or inheritance clearance. The extension is limited till the end of the calendar year following the end of the year in which the tax administration was notified of such event.

Under the statute of limitations, a company should keep its accounting books and documentation for ten years.

## *Other issues*

### *Foreign ownership of real estate restrictions*

- Up to 3,000 square metres does not require Council of Ministers approval.
- Exploitation and normal lease right extending for a period of more than ten years cannot be attained without obtaining approval.
- Real estate owned by foreigners, for which approval has been obtained, cannot exceed, over all of the Lebanese territory, 3% of the total area of Lebanon. In each province, the total area owned should not exceed 3% of its area. With respect to Beirut, the total area owned should not exceed 10% of its area.
- The approval is nullified if not acted upon during a period of one year.
- When approval is granted, the building on the real estate should be constructed within a period of five years (renewable once by the Council of Ministers).

### *Choice of business entity*

Lebanon’s commercial law provides for a range of business entities available to both local and foreign investors. These consist of the following:

- Sole proprietorships.
- General partnerships.
- Limited partnerships.
- Joint-stock companies (SAL).

- Limited liability companies (SARL).
- Holding companies.
- Offshore companies.
- Representative offices.

Legal structures commonly used by foreigners in conducting business in Lebanon are SALs, SARLs, and branch offices.

**Joint-stock companies (Société anonyme libanaise or SAL)**
Lebanese joint-stock companies are permitted to engage in all kinds of business activity. Shareholders of a SAL have no liability beyond their actual capital subscriptions.

With a small number of exceptions (such as real estate companies and banks), there are no limits on the amount of capital that can be held by foreign investors.

The management of a SAL is entrusted to a board of directors with a minimum of three and a maximum of 12 members. The majority of board members must be Lebanese, but the chairman may be a foreign national.

- Certain types of businesses such as banks and insurance companies are required to incorporate as joint-stock corporations. Minimum capital: LBP 30 million.
- Taxation: the applicable real profit tax rate is 15% in addition to a WHT on dividends of 10%, reduced to 5% in certain cases, mainly if the shares are listed.

**Limited liability companies (Société à responsabilité limitée or SARL)**
Members of a limited liability company are partners, and the company's capital is divided into parts rather than shares. Partners are liable only to the extent of their parts, and individual partners' claims on the company's capital are fixed in the partnership deed.

All partners may be foreigners, with the exception of companies seeking to engage in commercial representation.

Limited liability companies may not be active in certain sectors of the economy, such as in insurance, banking, fund management, or air transportation.

The transfer of parts in a limited liability company is subject to the consent of partners representing at least three-quarters of the capital. Existing partners enjoy priority in the purchase of parts offered for transfer.

- A limited liability company is managed by one or several directors (managers) who may or may not be selected from among the partners. Minimum capital: LBP 5 million.
- Taxation: the applicable real profit tax rate is 15% in addition to a WHT on dividends of 10%.

### *Intellectual property*
The law in Lebanon does not contain a clear definition of author's rights. It protects all products of the human intellect whether written, pictorial, sculptural, scriptural, or oral regardless of its value, importance, destination, or form of expression.

The law provides patent protection for inventions and plant varieties and a sui generis protection for layout designs of integrated circuits. Furthermore, the law provides protection for undisclosed information. According to an assessment conducted by the World Intellectual Property Organization (WIPO) in July 2002, the Patent law is in complete conformity with the WTO's Agreement on Trade-Related Aspects of Intellectual Property Rights (TRIPS). It was also pointed out that the provisions of the Plant Varieties exceed the minimum requirements of the TRIPS Agreement.

The law does not explicitly protect notorious trademarks and geographical indications. However, those are provided protection via Lebanon's membership to the Paris Convention. Moreover, Geographical indications are provided protection under the provisions of the new Law on Customs, the Law on Fraud Control, and the Criminal Law.

The copyright protection originally available to literary and artistic works is now extended to computer software, video films, and all kind of audio-visual works. The law provides stiffer penalties for offenders and better compensation to the persons whose rights have been infringed. The manner in which the copyright is breached has also been extended.

## Significant developments

The new Income Tax Law (Law 7 of 2010) became effective on 28 April 2010. The new Executive Regulations, which support the law, are still to be issued, and the previous Executive Regulations (Law 11 of 2004) remain effective. If conflict exists between the new law and the old Executive Regulations, the new law will prevail.

Libya over recent years has been in the process of negotiating and signing a number of double tax treaties. Libya has ratified treaties with Egypt, France, India, Malta, Pakistan, United Kingdom, Sudan, Slovakia, and Maghreb Union. Treaties with Italy, Croatia, Ukraine, Austria, Bosnia, Holland, Spain, Belgium, Russia, Turkey, Syria, Singapore, South Korea, and Belarus are being negotiated.

## Taxes on corporate income

Tax is imposed annually on the same basis for Libyan controlled corporate entities, foreign controlled corporate entities, and branches of foreign companies.

Tax is levied on taxable profits at a flat rate of 20%.

Libya has no provincial income tax laws.

### Surtaxes

There is a flat rate of Jehad Tax assessed at 4% on taxable corporate profits.

Jehad Tax was established by Law 44 of 1970. The purpose of the tax is to further the Muslim cause, in a peaceful manner throughout the world.

## Corporate residence

Corporate residence is not specifically dealt with in the laws of Libya. The tax authorities will seek to assess any income derived from services provided in Libya.

Double tax treaties being signed introduce the concept of permanent establishment. However, general law requires that any foreign entity seeking to provide services in Libya should obtain a business licence which necessitates in registering as a legal entity. Historically unregistered foreign entities have provided services in Libya but this is not in line with the law and is becoming difficult to do so.

## Other taxes

### Value-added tax (VAT)
In Libya, there is no VAT.

### Property taxes
Libya has no specific property taxes.

### Custom duties / Import tariffs
Customs duties were abolished in 2005, except for tobacco and tobacco products. Production and Consumption Taxes were then introduced to protect local industry.

A service fee of 10% on the value on all imports also exists. There are various exemptions to this service fee specifically under Investment Law and within the oil sector.

Other dues and taxes on importation are estimated at 0.5%. Initially a temporary import licence is issued for six months that can be extended to a maximum of three years. A guarantee or a deposit can be provided by the importer to the Customs Department.

### Excise taxes
Libya has no excise taxes.

### Transfer taxes
Libya has no transfer taxes.

### Stamp duty
Stamp Duty Law (Law 12 of 2004, as amended by Law 8 of 2010) levies a schedule of duties and rates on various documents and transactions. The most relevant to corporate entities is Schedule 28, which prescribes the rate of duties on contracts for the provision of services or supply. The duty on main contracts is 1% and on subcontracts 0.1%. Note that there is a duty of 0.5% on all payments to the Tax Department as well.

## Branch income

Tax rates on branch profits are the same as on corporate profits. However, the Income Tax Law allows the Tax Department to assess income tax on branches of foreign companies as a percentage of turnover via the 'deemed profit' basis of assessment. Tax is therefore payable even where tax losses are declared.

The level of deemed profit applied to turnover varies according to the branch's type of business activity. This ranges from 10% - 15% for civil works and contracting (turnkey projects), 15% - 25% for oil service, and between 25% - 40% in the case of design / consulting engineers. A deemed profit of between 5% - 7% is also assessed on local supply. The deemed profit percentage applied to any year will be higher than the profit percentage declared in the annual tax return since the deemed profit basis is applied during the course of a tax audit and is effectively a revenue generating exercise for the tax authorities. Historically tax audits have not resulted in credits or reimbursements.

## Income determination

For any Libyan registered entity, income arising both in Libya and abroad (i.e. worldwide) is assessable in Libya.

No specific rules apply on income determination for the following categories:

- Interest income.
- Partnership income.
- Rent / royalties income.
- Foreign income.

Income Tax Law allows entities to account on an accrual basis.

### Inventory valuation
The Commercial Code allows for inventory to be valued at the lower of cost and net realisable value.

### Capital gains
Any chargeable gains on the sale of capital assets are taxed as ordinary income. For entities assessed on a deemed profit basis, capital gains should be added to the deemed taxable income.

### Inter-company dividends
Libyan taxation laws do not contain any special provisions regarding inter-company dividends.

### Stock dividends
Stock dividends are not specifically dealt with in Libyan taxation laws. The current practice is for dividend distributions not to be taxed.

## Deductions

Taxable income is determined after deducting all expenditure and costs incurred in the realisation of the gross income *(for more details on the deemed profit basis of assessment on branches of foreign companies, see the Branch income section)*.

For any entity (not a foreign branch) seeking to be assessed on an add-back basis, it should ensure, in accordance with Stamp Duty Law, that the majority of its costs can be supported by tax registered documents, i.e. declared payrolls and registered contracts and invoices.

### Depreciation
Depreciation should be calculated in accordance with the Executive Regulations of the law.

| Assets | Depreciation rate (%) |
|---|---|
| **Buildings** | |
| Building in which machines are fixed | 3 |
| Building without fixed machines | 2 |
| **Means of Transport** | |
| Passenger | 20 |

| Assets | Depreciation rate (%) |
|---|---|
| Cargo and freight | 10 |
| Ships | 4 |
| Fishing boats | 4 |
| Aeroplanes | 8 |
| **Furniture** | |
| Office, ship, and domestic furniture | 10 |
| Hotel, restaurant, cafes, and hospital furniture | 20 |
| Work camps outside of cities | 20 |
| Food utensils and furnishings for restaurants, hotels, and the like | 25 |
| **Machines** | |
| Office machines | 10 |
| Electric generators | 20 |
| Computers and accessories | 10 |
| Software | 10 |
| Other machines | 15 |

### *Interest expenses*
No specific rules apply for the deduction of interest expenses.

### *Accrued expenses*
Accrued expenses are permitted if this is the accounting basis chosen.

### *Charitable contributions*
Donations to charities recognised by the state are permitted, up to 2% of net income.

### *Contingent liabilities*
General provisions for contingent liabilities are not permitted and are added back to the accounting profit.

### *Fines and penalties*
No specific rules apply for the deduction of fines and penalties.

### *Goodwill*
Purchased goodwill can be amortised on a straight line basis over five years.

### *Organisation and start-up expenditure*
Organisational and start-up expenditure can be capitalised and amortised over five years on a straight line basis.

### *Net operating losses*
Losses may be carried forward and deducted from future profits, for up to five years. The Income Tax Law has no provision for the carry back of losses.

### *Payments to foreign affiliates*
No specific rules apply for the deduction of payments to foreign affiliates.

## *Group taxation*

There is no recognition of a group for taxation purposes.

No rules exist in general law for the following categories:

- Transfer pricing.
- Treatment of inter-company items.
- Thin capitalisation.
- Related party transactions.

## *Tax credits and incentives*

Exemptions to corporate income tax exist most notably under the Investment Law. The Tourism Investment Law allows a ten year corporate income tax holiday from the commencement of project operations. General projects registered under the Investment Law are permitted a five year corporate income tax holiday with a possibility to extend for a further three years.

Exemptions also exist for strategic infrastructure projects. Such exemptions must be awarded by the General People's Committee (GPC), which is the legislative body, either by ratifying the relevant contract, which includes a tax exemption clause, or by the issuance of a separate law.

Investment law also provides exemptions for customs duties and stamp duty. The exemptions which exist are bestowed on subcontractors to the relevant projects.

Petroleum Law provides exemption to customs duties on oilfield specific equipment and materials which is also provided to oil service companies.

## *Withholding taxes*

Libyan law has no withholding taxes. Generally, for unregistered foreign entities seeking to register a contract with the tax authorities, income tax will be assessed (and must be settled) on a deemed profit basis at the time of registration. It may be possible to negotiate a withholding tax in preference to the aforementioned general procedure for a significant contract where there is greater uncertainty as to the estimated contract value.

## *Tax administration*

### *Returns*

The tax year is generally a calendar year, although assessments can be made on the basis of a company's own year-end, provided permission is granted in advance from the Tax Department, and the company then adheres consistently to the same date. All corporate entities must make an annual filing within four months of its year-end or one month within its audit report, whichever is earlier.

### *Payment of tax*

Corporate income tax is payable on a quarterly basis (10 March, 10 June, 10 September, and 10 December) normally commencing the first quarter date after an assessment has been issued.

### *Statute of limitations*

The statute of limitations for income tax purposes is seven years.

### *Late payment penalties*

A late payment penalty is assessed on the tax due at the rate of 1% to a maximum of 12%. In addition, the remaining quarterly payments are due immediately for failing to make an instalment on time.

The law also imposes the following penalties:

- A fine of not less than three times the amount of unpaid tax due shall be applied to any person who fails to pay tax by the due date.
- Without prejudice to any harsher penalty, a fine of not less than four times the amount of tax due and unpaid will be applied to any person who, with intent to evade all or part of the tax, commits any of the following acts or abets, agrees, or aids a person who commits such an act:
  - the making of false statements in declarations submitted under this law
  - the preparation of false accounts, books and records, reports, or budgets
  - the use of fraudulent means to conceal or attempt to conceal taxable amounts due under this law.

## *Other issues*

### *Statutory Books*

Business entities operating in Libya are required by Libyan Law to maintain a General Ledger and a General Journal (i.e. the Statutory Books).

Before use, these must be stamped as registered with the Revenue Authorities and the Commercial Court. It should be noted that a Ledger or Journal will not be registered if it already contains accounting entries (i.e. one cannot register existing books of account).

Similarly, transactions pre-dating the date the books are registered will be disallowed. In theory, transactions should be entered daily, but in practice, most companies write up their statutory records on the basis of monthly transactions summaries.

The Tax Inspector will always request production of the Statutory Books at the commencement of a tax audit. If these are not available, a perfunctory audit of the English (or other language) books of account will be made, and it is likely that there will be a punitive increase in taxable income as a consequence.

Please note that a new Commercial Code is being considered which may allow approved computer based ledgers to be used instead of the traditional manual ledgers. At this juncture, uncertainty exists as to who would provide such approval and on what basis.

## Significant developments

On 1 January 2011, a completely new tax law entered into force. As a result, the following important changes have been implemented:

- In principal, a profit tax of 12.5% for all corporations, foundations, and establishments.
- A standardized deduction of interest on equity (4% for 2011), which reduces the effective tax rate depending on the equity financing.
- Tax-exemption of dividends arising from participations in domestic or foreign legal persons, irrespective of the capital ownership percentage and the holding period.
- Tax-exemption of capital gains from the sale or liquidation of participations in domestic or legal foreign persons.
- Indefinite loss carryforward period.
- Tax deduction of 80% of the income from intellectual property rights from patents, trademarks, models, and utility models, provided that they are protected by entry in a domestic, foreign, or international register. This is only applicable to intellectual property rights created or acquired as of 1 January 2011.
- Group taxation scheme for subsidiaries directly or indirectly controlled with more than 50% of the voting rights and more than 50% of the rights pertaining to the nominal capital.
- Abolition of old privileged taxation schemes for holding and domicile companies after 2013.
- Low taxation of 1,200 Swiss francs (CHF) for Private Vehicle Solution (PVS), which are corporations, foundations, and establishments finally held by individuals that only engage the administration of their own assets and do not carry out any economic activities.
- Abolition of 4% withholding tax (coupon tax), excluding reserves accumulated prior to 1 January 2011 (old reserves).

*For more detailed information, please refer to the following sections.*

## Taxes on corporate income

In principle, all corporations, foundations, and establishments are subject to a profit tax at a flat rate of 12.5%. Resident companies are subject to unlimited tax liability on worldwide income. Non-resident companies are subject to limited tax liability for income from properties or branches within Liechtenstein.

### Minimum tax

All legal entities are subject to an annual minimum tax of CHF 1,200. This tax can be fully credited to the profit tax.

## Corporate residence

A company is considered to be resident in Liechtenstein if its registered seat (address) or place of effective management is within Liechtenstein.

Companies, who have neither a domicile nor effective place of management in Liechtenstein, as well as special asset dedications without legal personality, are subject to limited tax liability for the following income:

- Corporate income from the cultivation of domestic real estate used for agriculture and forestry.
- Rental and lease income from real estate situated within Liechtenstein.
- Taxable net corporate income of permanent establishments (PEs) situated in Liechtenstein.

### Permanent establishment (PE)

Please note that Liechtenstein has only a few double tax treaties *(see the Withholding taxes section)*. However, Liechtenstein is in the process to negotiate various new double tax treaties and has included PE definitions according to the Organisation for Economic Co-operation and Development (OECD) model treaty.

## Other taxes

### Value-added tax (VAT)

Liechtenstein has adopted the VAT law of Switzerland, having its own administration in Vaduz.

The general VAT rate is 8%. A reduced rate of 2.5% is applicable to deliveries of food, drugs, newspapers, magazines, and books. Furthermore, lodging/accommodation is taxed at a reduced rate of 3.8%. Note that various services are VAT-exempt (e.g. health, social security, education, banking, insurance).

Any person who, irrespective of legal form, carries on a business is liable for VAT. Any person liable for VAT that is involved in domestic entrepreneurial activity with a taxable turnover which is less than CHF 100,000 within a financial year can be exempted from taxation. Special regulations apply for non-profit institutions as well as for non-profit sport or cultures clubs. Reverse charge is applicable for services and certain deliveries from an entity domiciled abroad.

### Stamp duty

According to the customs union treaty of 1923 between Switzerland and Liechtenstein, the Swiss stamp duty tax law of 27 June 1927 is applicable in Liechtenstein. The stamp duty law includes the stamp duty tax and the security transfer tax.

#### Stamp duty tax

Upon the formation of legal entities whose capital is divided into shares (e.g. company limited by shares, limited liability company, establishment with capital divided into shares) the stamp duty amounts to 1% of the nominal value or the higher amount effectively paid (above par). The first CHF 1 million is tax exempt.

The same duty also becomes due when the capital is increased or when the shareholders make contributions without increasing the capital. Stamp duty is also due on bonds (0.6 per million to 1.2 per million) and money market certificates (0.6 per million).

Various exemptions should also be considered.

**Security transfer tax**
Security transfer tax is due on all transactions of qualifying securities, if a security dealer is involved. The tax amounts to 0.15% for domestic securities (Switzerland and Liechtenstein) and 0.3 % for foreign securities.

In particular, banks and financial intermediaries are liable for settlement. Furthermore, legal entities with qualifying securities with a book value of more than CHF 10 million also qualify as security dealers.

### *Formation tax (Gründungsabgabe)*
Unless Swiss stamp duty law applies, a formation tax in the amount of 1% of the statutory nominal capital is levied upon the formation or relocation of legal companies in Liechtenstein (e.g. foundations) as well as for capital increases.

The general tax rate of 1% is reduced to 0.5 % for amounts greater than CHF 5 million and to 0.3 % for amounts greater than CHF 10 million. The first CHF 1 million is tax exempt.

Foundations are subject to the formation tax with a tax rate of 0.2%.

### *Tax on insurance premiums*
Liechtenstein levies a tax on certain insurance premiums. The tax rate amounts to 5% of the cash premium (for life insurance 2.5%). Cash premiums in foreign currency have to be converted to Swiss francs at the time the tax claims arise.

Various exemptions should also be considered.

### *Real estate profit tax*
Capital gains from the sale of real estate, or equivalent actions with the same result, are subject to a separately assessed real estate profit tax. The taxable gain is generally the difference between proceeds of the sale and the original purchase price of the property plus any capital expenditure incurred. The basic tax rate is between approximately 2% and 14%, depending on the amount of taxable real estate gain. The transfer of the economic ownership of real estate (e.g. via the sale of the majority of the shares in a real estate company) triggers real estate tax as well.

### *Capital tax*
As of 1 January 2011, annual capital tax has been abolished.

### *Excise taxes*
Several excise taxes apply in Liechtenstein (e.g. petroleum tax, tobacco tax, car tax, CO2 tax, beer tax, salt tax, taxation of distilled spirits).

## *Branch income*

The same principles applicable to corporations also apply for branch income, provided that transactions with the head office or other branches are at arm’s length.

Liechtenstein taxation is imposed on the profit attributable to branch and on the capital invested in the branch. The minimum tax of CHF 1,200 is also applicable.

There is no withholding tax (WHT) on profit transfer to the head office.

## *Income determination*

### *Inventory valuation*

Inventories must be stated at the lower of cost or market. Cost is generally determined by the first in first out (FIFO) or by the average cost method. The tax authorities permit a general reserve against stock contingencies of up to one-third of the inventory cost or market value at the balance sheet date without inquiry into its justification, provided a detailed record of inventory is available for review by the tax authorities. The need for a reserve in excess of this amount (e.g. for obsolescence, slow-moving-stocks) must be substantiated to the satisfaction of the tax authorities.

### *Dividends/capital gains (from shares)/liquidation proceeds*

Dividend income, capital gains derived from the sale of shares, and liquidation proceeds are tax-exempt.

### *Foreign income*

Resident corporations operating locally are generally taxed on their worldwide income. However, income from foreign real estate and PEs situated abroad is exempt from taxation in Liechtenstein.

## *Deductions*

### *Depreciation and amortisation*

Depreciation of tangible fixed assets and amortisation of intangible assets is allowed to the extent it is 'commercially justified'. For tax purposes, either the straight-line (depreciation based on the acquisition value) or the declining-balance method (depreciation based on the book value) may be used. Depreciation and amortisation not recorded in statutory accounts are not deductible for tax purposes.

A special (higher) rate of depreciation may be allowed for assets used only for short periods or for assets for which a rapid decrease in value can be proved.

The depreciation/amortisation rate per annum of various property types are provided below. Note that these depreciation rates relate to write-downs on the book value. If the write-down is performed on the acquisition value, then the rates enumerated below should be reduced by half.

| Property type | Rate per annum (%) |
|---|---|
| **Immovable assets** | |
| Real estate (dwelling houses, offices, shops, restaurant and hotel buildings, industrial buildings, factories, warehouses, and parking spaces) | 5 |
| **Movable assets** | |
| Mobile structures, technical installations (air conditioning plant, gas and electricity mains for industrial purposes), elevators, investments in foreign real estate, high rack warehouses, and airplanes | 15 |
| Office furniture and machines, workshop, and storeroom equipment | 20 |

| Property type | Rate per annum (%) |
|---|---|
| Furniture used for the hotel and restaurant trade | 25 |
| Machines and accessories for production purposes, vending machines, telephone installations, and operating applications | 30 |
| Machinery used in more than one shift or used under heavy conditions, motor vehicles | 35 |
| Information technology (hardware and software), office furniture and machines, workshop and storeroom equipment, hotel and restaurant cookery, cutlery, and linen | 50 |
| Officially approved installations and equipment against water pollution, energy-saving equipment, and installations using solar energy | 50 |
| **Intangible assets** | |
| Goodwill, patent, licence, and other rights of use | 40 |

### *Equity interest deduction*

The equity interest deduction is a standardised deduction for interest on equity based on the multiplication of the 'modified' equity by the interest rate (according to the annual finance law). For 2011, the equity interest rate is 4 %.

To determine the modified equity, the following terms have to be considered:

- Paid-in capital and open reserves plus taxed hidden reserves:
  - Deduction of own shares.
  - Deduction of participations/shares.
  - Deduction of foreign real estate.
  - Deduction of assets belonging to foreign PEs.
  - Deduction of non-operating related assets.
- Equity increases and decreases, based on the capital at the beginning of the business year.

| | Example 1 | Example 2 | Example 3 | Example 4 | Example 5 | Example 6 |
|---|---|---|---|---|---|---|
| Modified equity | 1,000,000 | 500,000 | 500,000 | 1,000,000 | 1,000,000 | 1,000,000 |
| Loans | 0 | 500,000 | 500,000 | 0 | 0 | 0 |
| Profit | 100,000 | 100,000 | 200,000 | 1,000,000,000 | 30,000 | 60,000 |
| Interest on loans (4%) | 0 | -20,000 | -20,000 | 0 | 0 | 0 |
| | | | | | | |
| Profit | 100,000 | 80,000 | 180,000 | 1,000,000,000 | 30,000 | 60,000 |
| Interest on equity (4%) | -40,000 | -20,000 | -20,000 | -40,000 | -40,000 | -40,000 |
| Taxable profit | 60,000 | 60,000 | 160,000 | 999,960,000 | -10,000 | 20,000 |
| Profit tax rate | 12.50% | 12.50% | 12.50% | 12.50% | 12.50% | 12.50% |
| Tax burden | 7,500 | 7,500 | 20,000 | 124,995,000 | 0 | 2,500 |
| **Effective tax rate** | **7.50%** | **9.38%** | **11.11%** | **12.50%** | **0.00%** | **4.17%** |

### *Deduction for income from intellectual property (IP)*

A deduction of 80% is allowed on the net IP income which was created or acquired after 1 January 2011. IP, in the sense of the tax law, consists of patents, trademarks, models, and utility models. This tax rule was approved by the European Free Trade Association (EFTA) Supervising Authority on 1 June 2011.

***Taxes***
Taxes are not deductable in Liechtenstein.

***Net operating losses***
A loss can be carried forward and offset against the profits for future years. There is no limitation of loss carryforwards as well as loss offsetting. Losses cannot be carried back.

***Payments to foreign affiliates***
Interest, royalties and licenses, and other fees to foreign affiliates are allowed as deductions to the extent that they meet the arm's-length test (i.e. equivalent to charges that would be made by an unrelated third party).

For interest payments between affiliated companies or between shareholders and companies, Liechtenstein tax authorities publish safe harbour rules annually (i.e. generally accepted interest).

## *Group taxation*

Resident and non-resident corporations have the possibility to opt for group taxation if they meet the legal requirements (such as more than 50% of capital and 50% of voting rights). The ultimate group leader must either be a corporation domiciled in Liechtenstein or with the effective place of management in Liechtenstein.

In order to form multi-level group structures, sub-groups may also be built. The same rules are applicable for the group leader of the sup-group as for the primary group leader.

The group leader can decide, for each company which fulfils the conditions, which company will be included in the group or not.

Losses of group members can be offset against profits of the (sub) group leader within the same year. The offsetting is only possible under the following conditions:

- Only losses incurred after the option for group taxation can be considered.
- Losses need to be calculated according to Liechtenstein profit calculation rules.

The losses are allocated to the (sub) group leader according to the direct participation quota of the (sub) group leader to the group member whose losses should be offset. If the losses cannot be used at the level of the (sub) group leader, they can be allocated to other group members. However, the minimum tax is applicable for each group member.

Losses which have been attributed to the (sub) group leader must be adjusted in the following cases:

- Losses can be offset against profits on the level of the group member.
- Exit of group member from the group.
- Reduction of participation quota of a group member.
- Depreciation is made on a participation due to losses.

The (sub) group leader must provide evidence annually that no adjustment needs to be made.

### *Transfer pricing*
Liechtenstein does not have specific transfer pricing rules apart from the rule that intra-group transactions are carried out at arm's-length terms.

### *Thin capitalisation rules*
Liechtenstein does not have thin capitalisation rules.

## *Tax credits and incentives*

As of 1 January 2011, tax privileges for certain legal structures, such as domiciliary and holding companies, have been abolished. Companies which benefited from such privileges will continue to be taxed accordingly thru 2013, unless they opt for the ordinary taxation scheme. These companies also have to pay the minimum tax of CHF 1,200 annually.

The following tax incentives are applicable as of 1 January 2011:

- Profit tax exemption for corporations which have an irrevocable charitable, cultural, or ideal purpose without commercial activity.
- Profit tax exemption of dividend income and capital gains on shares/participations (especially interesting for holding companies).
- Notional interest deduction on equity.
- Private vehicle solution.

### *Private vehicle solution (Privatvermögensstrukturen or PVS)*
The new law of Liechtenstein offers tax privileges for PVSs. A PVS has no economic activity. The purpose of a PVS is to acquire, hold, administrate, and sell financial instruments according to the assets management law as well as cash and bank accounts. Participations may only be held if it can be proved that the shareholders or beneficiaries have no influence on the administration of this company.

The articles of the PVS must contain a clause that the regulations for PVS are applicable. Exemptions of this rule are applicable for legal entities which existed before the introduction of the new tax law as of 1 January 2011.

The investors of a PVS must be individuals who administrate their own assets or structures acting in the interest of individuals.

The company or the audit company needs to confirm, upon formation or after major changes, that the conditions for the PVS structure are fulfilled. This is supervised by the tax authority or a neutral certified accountant.

A PVS only pays the minimum tax of CHF 1,200 annually.

This tax scheme was qualified as in conformity with the provisions on state aid set out in article 61 of the Agreement on the European Economic Area by the EFTA Surveillance Authority (ESA).

## Withholding taxes

### Coupon (withholding) tax

Until the end of 2010, Liechtenstein had a coupon tax of 4% on dividend payments and certain interest payments. The coupon tax was abolished with the new tax law as from the beginning of 2011. This means that no coupon tax is due on new reserves incurred after the end of 2010 or on interest payments. However, the coupon tax still applies with regard to old reserves (reserves existing on 1 January 2011). The tax base for calculation of the coupon tax on old reserves is the taxable capital dated 31 December 2010 (i.e. equity according to commercial balance sheet, adjusted with taxed hidden reserves). With regards to future distributions, old reserves have priority.

#### Transitional rule

Distributions of old reserves in 2011 and 2012 will be taxed at a reduced rate of 2%. Companies can either distribute during this time frame or opt for the taxation of the old reserves without effective distribution.

Distributions of old reserves as of 2013 are taxed at the ordinary rate of 4%.

The transitional rule is not applicable for liquidations of ordinary taxed companies terminated before 30 June 2011.

### Tax treaties

Currently, a comprehensive double taxation treaty on income is in effect with Austria, Luxembourg, and a limited one with Switzerland.

Recently Liechtenstein initiated double taxation treaties with San Marino, Uruguay, and Hong Kong. Furthermore, various tax information exchange agreements (TIEAs) have been concluded.

The Governments of Liechtenstein and the United Kingdom signed a Memorandum of Understanding (MOU) relating to cooperation in tax matters, which includes the Liechtenstein disclosures facility (LDF). According to these regulations, financial intermediaries in Liechtenstein are required to show that their UK costumers have been declaring their Liechtenstein investments to HM Revenue and Customs (HMRC). Disclosure can be made between 1 September 2009 and 31 March 2015 and benefiting from favourable rules. In certain circumstances, even accounts or assets outside of Liechtenstein can be transferred in order to take advantage of the terms of the LDF.

## Tax administration

### Returns

Companies resident in Liechtenstein or with PEs in Liechtenstein must file a tax return by 1 July of the calendar year following the fiscal year-end.

The tax assessment issued by the tax administration is based on the company's tax return, including the attachments and the financial statements filed.

### Payment of tax

Companies must pay tax within 30 days of receipt of the assessment. The defaults charge rate is 5%.

## *Other issues*

### *Restructurings*

Restructurings (e.g. change of corporate form, merger, spin-off) can be carried out tax neutrally, if certain conditions are met.

## Significant developments

The following recent amendments have been made to the Law on Corporate Income Tax (CIT) and the Law on Value-Added Tax (VAT):

- Application of the reduced CIT rate (5%) for profit from agricultural activities was extended for an unlimited period.
- A part of profit attributed to payments for board and supervisory board members was recognised as an allowable deduction for 2010 and later tax periods.
- Expenses for the benefit of employees were recognised as allowable deductions for 2010 and later tax periods, provided that such benefit is subject to personal income tax (the benefit is treated as taxable or non-taxable income).
- The annual CIT return must be submitted to the Tax Authorities by the first day of the sixth month after the end of the financial year. The deadline for CIT payment was not changed (i.e. CIT must be paid by the first day of the tenth month after the end of financial year).
- The application of reduced VAT rates for heating (9%) and medicine compensated by the state (5%) was extended until 31 December 2011.
- The VAT rate of 9% was introduced for hotel and special accommodation services to be applicable until 31 December 2011.
- The application of the reduced VAT rate of 9% for books and non-periodical publications was extended for an unlimited period.

## Taxes on corporate income

The standard corporate income tax (CIT) rate is 15%. It was reduced from 20% to 15% as of 1 January 2010.

Generally, CIT is applied on taxable income received by a Lithuanian tax resident from its local and worldwide activities. Taxable income is calculated by reducing general income of a certain tax period with deductible expenses and non-taxable income.

Income of a tax resident company is not subject to taxation in Lithuania if it was received from activities through a permanent establishment (PE) in a foreign country which is in the European Economic Area (EEA) or which has a double tax treaty (DTT) with Lithuania and if the income was subject to taxation there.

Furthermore, CIT may be reduced or even not applied if foreign-sourced income received not through a PE is taxed with a withholding tax (WHT) in a foreign country and this country has a DTT with Lithuania.

Non-resident companies are generally taxed on Lithuania-sourced income received through a local PE and reduced by deductible expenses or on income subject to WHT in Lithuania.

### *Reduced CIT rate for small companies*
Entities with fewer than ten employees and less than 500,000 Lithuanian litas (LTL) (approximately EUR 145,000) in gross annual revenues can benefit from a reduced CIT rate of 5%.

### *CIT regime for certain maritime activities*
The rate of CIT on certain maritime activities is 15%, with the base set by reference to the functional capacity of the ship. This fixed CIT may be applied to maritime entities that fulfill certain conditions indicated in the law. An election must be made to the tax authorities to apply this regime.

### *Local taxes*
There is no local or municipal CIT.

## *Corporate residence*

A company is resident in Lithuania if it incorporates there or its activities create a PE for tax purposes.

### *Permanent establishment (PE)*
According to local legislation, a foreign company is deemed to have a PE in Lithuania when:

- it permanently carries out commercial activities in Lithuania in whole or in part
- it carries out its activities through a dependent representative (agent)
- it uses a building site or construction, assembly, or equipment objects, or
- it uses equipment, including drilling installations and ships, for exploration or extraction of natural resources.

DTTs may establish different rules of PE recognition. According to domestic law, where there is a DTT, the provisions of the treaty take precedence.

A PE must be registered as a taxpayer with the tax authorities in the territory where its activities are carried out. Its profits are subject to CIT at the rate of 15%.

## *Other taxes*

### *Value-added tax (VAT)*
The standard VAT rate is 21%.

A reduced rate of 9% applies to:

- books and non-periodicals
- supply of heating of residential premises and the supply of hot water to residential premises as well as heating of cold water (applicable thru 31 December 2011), and
- hotel and special accommodation services (applicable thru 31 December 2011).

A reduced rate of 5% applies to compensated pharmaceuticals and medical aid devices (applicable thru 31 December 2011).

The compensational rate for farmers is 6%.

In general, supplies of goods and services made by a taxable person performing its economic activity for a consideration within the territory of Lithuania, as well as imports of goods, are subject to VAT.

**Exempt with credit (zero-rated)**

Goods and services that are exempt with credit (zero-rated) include, but are not limited to, the following:

- Supply of goods exported outside of the European Union.
- Goods acquired by non-EU resident passengers in Lithuania and carried out from the European Union.
- Goods and services for vessels and aircraft.
- Transportation and any directly linked ancillary services related to export of goods and any directly linked ancillary services related to the import of goods when the value of these services shall be included in the customs value of the goods.
- Transportation of imported goods carried to a VAT exemption warehouse or temporarily stored under customs' supervision, placed in a free economic zone or free warehouse, put under customs warehousing procedure, processed under customs' supervision, temporarily imported for processing without levying customs duties, temporarily imported without implicitly levying customs duties, or put under internal or external transit procedure.
- Issuance of International Road Transportation (TIR) and Admission Temporaire/ Temporary Admission (ATA) transportation documents.
- Insurance and certain financial services directly related to export of goods from the European Union.
- Supply of goods to sponsorship or charity recipients registered in Lithuania and listed in the Lithuanian law on charity and sponsorship, if the goods are exported by the recipients as sponsorship or charity to non-EU organisations which may be recipients of sponsorship or charity under the law.
- Supply of maintenance and processing services for movable property supplied to non-taxable persons established outside Lithuania that have no fixed establishment within the country, provided that the property was temporarily imported for maintenance, repair, processing, etc. in the European Union and will be carried out from the European Union after supply of these services.
- Services of disclosed agents participating in certain transactions of supply of goods or services to local taxable and non-taxable persons where zero-rated VAT is applied and transactions of supply of goods or services where the supply of goods or services is considered carried out outside the European Union.
- Supply of goods to VAT payers registered in another EU member state when these goods are carried out from Lithuania to another EU member state.
- Supply of new means of transport supplied to any person when new vehicles are carried out from Lithuania to another EU member state.
- Supply of goods subject to excise duty when they are supplied to a company not registered for VAT purposes and the goods are carried out from Lithuania to another EU member state.
- Supply of goods in certain cases related to international trade.

In order to apply zero-rated VAT on goods carried out from Lithuania, VAT payers must hold supporting documents as evidence that these goods were actually exported from the European Union or carried out from Lithuania to another EU member state.

**Exempt without credit**

Goods and services that are exempt without credit include, but are not limited to, the following:

- Personal or public health care services, under certain conditions.
- Supply of human organs, blood, human milk, and dental prostheses supplied by dentists or dental technicians.
- Transportation of ill, wounded, or other persons requiring medical care by special means of transport.
- Social services supplied by institutions for children and young people, nursing homes for the elderly, and/or by care or guardianship institutions for disabled or by other non-profit entities.
- Education and training services.
- Cultural and sports services rendered by non-profit entities.
- Services provided by political parties, trade unions, and other non-profit membership based legal entities to their members when these services correspond to that set out in the articles of association and are provided free-of-charge, except for membership fees.
- Services provided by religious communities, other communities, and centres to their members if these services correspond to the purposes of these communities set out in their canons, statutes, and other documents and are provided free-of-charge, except for donations.
- Postal services and directly related goods supplied by government-listed universal postal services providers, except for individually negotiated postal services.
- Radio and TV broadcasting services provided by non-profit legal entities.
- All types of insurance and re-insurance services and related services rendered by insurance and re-insurance agents.
- Financial services meeting certain requirements.
- Lotteries and gambling.
- Postage stamps and other government-listed special signs available for sale against their nominal value (this provision shall be applied only to the postage stamps which can be used as a confirmation of payment for postal services in Lithuania).
- Letting of residential premises (except for accommodation services provided by hotels, motels, camping, and other accommodation services or letting of residential premises not indicated above when the letting period does not exceed two months).
- Letting or sale of immovable property, other than residential premises (certain exceptions apply).
- Supply of goods where the VAT payer has not deducted any proportion of the VAT on purchases and/or importation thereof (certain conditions apply).

Intra-Community acquisitions (i.e. acquisitions of goods from other EU member states) are VAT-exempt provided that:

- the supply of such goods in Lithuania would be VAT-exempt or zero-rated or the import of such goods would be VAT-exempt
- the purchaser who is a foreign taxable person would be able to refund this VAT, and
- triangular transactions meet certain criteria.

As of 2010, supply of a business or parts thereof is treated as being out of scope of VAT (under certain conditions). As of 2011, this exemption applies both to sale and to contribution in kind.

**Option to tax**
Option to tax is applicable to:

- lease of immovable property
- sale or other transfer of old immovable property (i.e. used for more than 24 months), and
- financial services meeting certain requirements.

Option to tax may be exercised only if the customer is a taxable person registered for VAT purposes. If a VAT payer decides to use the option to tax, it is valid for at least 24 months.

### *State dues (stamp taxes)*
State dues are payable on activities of state institutions, such as the issuance of documents having legal force and other deeds.

### *Land tax*
Lithuanian and foreign entities are subject to land tax collected by the municipalities for the land they own in Lithuania. Roads for general use and forestland are exempt. The annual tax rate is 1.5% of the taxable value, which is determined according to the rules established by the government. The assessment and payment terms are set forth by the municipalities, which are also entitled to grant land tax incentives.

### *Land lease tax*
State-owned land that is leased for Lithuanian and foreign companies is subject to land lease tax at a rate established by the municipalities. The minimum tax rate set by the government is 0.1%, and the maximum rate is 4% of the value of the land.

### *Real estate tax*
Real estate tax at a rate ranging from 0.3% up to 1% is levied on the value of real estate owned by individuals and used for commercial purposes or owned by legal entities (with certain exemptions). Municipal councils establish a specific tax rate for real estate situated in their territories annually.

### *Excise taxes*
Excise duty is imposed on the following goods produced in or imported into Lithuania: ethyl alcohol and alcoholic drinks, including beer and wine; processed tobacco, including cigarettes, cigars, cigarillos, and smoking tobacco; energy-related products, including petrol, kerosene, gasoline, fuel oil, natural gas, and their substitutes and additives; coal, coke, and lignite; and electricity (as of 1 January 2010). The tax rate depends on the type and quantity of goods.

### *Customs duties*
EU customs law is applicable in full.

EU customs law, also known as the Community Customs Code, compiles the rules, arrangements, and procedures applicable to goods traded between the European Community and non-member countries. The Community Customs Code indicates an obligation on a person to pay the amount of the import or export duties which apply to specific goods under the Community provisions in force. The application of the EU customs law means that:

- trade between Lithuania and other EU countries is customs-free
- imports from non-EU countries are subject to EU customs tariffs, and
- numerous free trade agreements concluded between EU and non-EU countries apply to Lithuania.

### *Environmental tax*
Environmental tax is imposed on pollutants discharged into the environment, a few specified products (e.g. tyres, batteries), and certain types of packaging.

### *Tax on natural resources*
A tax on natural resources is payable on the value of extracted natural resources.

## *Branch income*

A branch of a foreign company is defined as a structural subunit of a foreign company, which has an establishment in Lithuania and is entitled to engage in commercial activities in Lithuania as well as conclude contracts and undertake obligations according to the power of attorney issued to the branch by its founder. A branch does not have the status of a legal person. It is taxed in the same manner as a PE *(see the Taxes on corporate income section).*

## *Income determination*

### *Inventory valuation*
Under domestic accounting legislation, stock used in the production and included in the cost of produced products is valued in the financial statements by the first in first out (FIFO) method. The last in first out (LIFO), weighted-average, progressive-average, actual-price, or another method that corresponds to the stocks' movement can also be used. However, the method used must be disclosed in the notes to the annual accounts, and, among other things, the note must report the profit that would have been calculated if the FIFO method of valuation had been used. For CIT purposes, usage of another method than FIFO should be approved by the tax authorities.

### *Capital gains*
Capital gains are taxed as part of the corporate profit of the enterprise.

Capital gains are treated as non-taxable income when they are derived from the transfer of shares in a company incorporated in the European Economic Area (EEA) or in a country with which Lithuania has a valid DTT and that pays CIT or an equivalent tax. This holds true if the Lithuanian holding company holds more than 25% of voting shares for a continuous period of (i) at least two years or (ii) at least three years when the shares were transferred in one of the established forms of reorganisation. Certain restrictions apply.

### *Dividend income*
The receiving company does not include the dividends received from other entities in its taxable income.

### *Exemptions from taxable income*

The following types of income are exempt from CIT:

- Insurance indemnity not in excess of the value of lost property or other losses or damages, the refunded part of insurance premiums in excess of the premiums deducted from income in accordance with the procedure established, and the part of insurance indemnity in excess of the premiums deducted from income in accordance with the procedure established.
- Proceeds of a bankrupt company received from sale of its property.
- The balance of the formation fund of an insurance company as prescribed by the law on insurance.
- Investment income of investment companies with variable capital and closed-end investment companies acting in accordance with the law on collective investment undertakings, except for dividends and other distributable profits.
- Income derived by health care institutions for their services that are financed from the funds of the Compulsory Health Insurance fund.
- Income derived from revaluation of fixed assets and liabilities as established by laws and regulations, except for income derived from the revaluation of derivative financial instruments acquired for hedging purposes.
- Default interest except for that received from foreign companies registered or otherwise organised in blacklisted territories or residents of such territories *(see Blacklisted territories in the Deductions section)*.
- All or part of the profit gained from legal entities of unlimited civil liability that are payers of CIT and with income that is subject to CIT under the law or to a similar tax under respective statutes of foreign countries, with certain exceptions.
- Fees collected by seaports and airports, charges for air traffic navigation services, and funds collected from the lease of seaport-owned land.
- Results arising from adjustments made for the previous tax periods as prescribed by the law on accounting.
- Indemnification for damages received by the company, with certain exceptions.
- Compensation received according to the Lithuanian programmes of the EU financial support relating to taking fishing ships for scrap.
- Life insurance payments received by insurance companies, provided the term of the life insurance policy is valid for not less than ten years or at the date of the receipt of the insurance benefit the recipient has reached the pension age in accordance with the additional law on pensions. Additionally, insurance investment income of insurance companies, except for dividends and other distributable profit, are exempt along with investment insurance income of insurance companies received according to the contracts of life insurance occupational pensions concluded in accordance with the law on accumulation of occupational pensions.
- Direct and other compensational allowances, which are received by units performing agricultural activities to maintain their level of income, which meet the requirements established in the laws and other legal acts of Lithuania.

### *Foreign income*

Income is not subject to taxation in Lithuania if it was received from activities through a PE in a foreign country which is in the EEA or which has a DTT with Lithuania and if the income was subject to taxation there. Since such income is not subject to taxation in Lithuania, costs related to the income cannot be deducted from income that is subject to taxation in Lithuania.

## *Deductions*

Allowable deductions include all the usual costs that an entity actually incurs for the purpose of earning income or receiving economic benefit unless the law on CIT provides otherwise.

Limited deductible expenses include the following:

- Depreciation or amortisation expenses of fixed assets: for tax purposes assets cannot be depreciated faster than indicated in the CIT law *(see below)*.
- Maintenance, repair, and reconstruction expenses of tangible fixed assets: if the repair or reconstruction increase the service period and improve the qualities (useful characteristics of the fixed assets), the value of repair or reconstruction shall be added to the acquisition value of the tangible fixed assets.
- Business travel expenses: deductible with restrictions.
- Advertising and representation expenses: 75% of representation expenses are deductible.
- Natural losses: deduction limited to not more than 1% of turnover.
- Taxes: deductible with restrictions *(see below)*.
- Bad debts: deductible only if proved and specific criteria met, provisions are non-deductible.
- Contributions and expenses for the benefit of employees: deductible with restrictions.
- Special provisions of credit institutions and insurance companies: calculated according to the methods established by the Bank of Lithuania and the Commission of Insurance Supervision.
- Sponsorship: the double amount deductible (i.e. 200% deduction is available) but only if provided to registered recipients and only up to 40% of taxable result before deduction of sponsorship and utilisation of tax losses carried forward.
- Membership fees, contributions, and premiums: deductible with restrictions.
- Losses of previous tax periods: losses can be carried forward for indefinite period if certain requirements are met *(see below)*.

Non-deductible expenses include the following:

- VAT payable to the budget and CIT *(see below)*.
- Default interest (forfeit), fines, and late interest paid to the state budget as well as other sanctions imposed for violations of laws and regulations of Lithuania.
- Interest or any other indemnity paid due to non-performance of contractual obligations by related parties.
- Amount of the limited deductible expenses in excess of the established limits.
- Expenses attributed to allowable deductions more than 18 months past, although the payments for goods or services supplied by the entities registered or otherwise organised in blacklisted territories *(see below)* have not been made.
- Sponsorship and gifts that do not correspond to the requirements of CIT law.
- Payments to blacklisted territories *(see below)* if they are not verified and payments are not subject to withholding tax (WHT).
- Indemnification for damages inflicted by the entity.
- Dividends or otherwise distributed profits.
- Other expenses not related to the deriving of income and not attributed to operating activities of the entity as well as the expenses that are not considered allowable deductions under the law.
- Amounts resulting from adjustments and corrections of errors of previous tax periods.

- Expenses related to revaluation of fixed assets and securities.
- Deductible or limited deductible expenses attributed to non-taxable income.
- Expenses related to income from certain international maritime activities, if a maritime entity chose to apply a fixed CIT.

### *Depreciation*
Tangible and intangible assets may be depreciated using a directly proportional (straight-line) depreciation method, a production depreciation method, or a double-declining-balance depreciation method. Depreciation may not exceed maximum rates established by the law. For certain typical assets depreciation rates relevant for tax purposes are shown in the chart below:

| Asset | Depreciation period (years) | Annual depreciation rate (%) |
|---|---|---|
| New buildings used for business activities | 8 | 12.5 |
| Residential buildings | 20 | 5 |
| Plant and machinery | 5 | 20 |
| Trucks (not older than 5 years) | 4 | 25 |
| Computer and communications equipment | 3 | 33.3 |
| Software | 3 | 33.3 |

### *Taxes*
All taxes, fees, and other compulsory payments to the state budget are deductible for CIT purposes, except VAT paid to the budget and CIT. Note that VAT can be treated as deductible for CIT purposes if it is input or paid import VAT which is non-refundable for VAT purposes and this input or paid import VAT is calculated on deductible expenses.

### *Net operating losses*
Operating losses may be carried forward for an indefinite period, provided that certain requirements are met.

Current year operating losses incurred after 1 January 2010 can be transferred to another legal entity of the group if certain conditions are met.

Losses incurred due to the transfer of securities and/or derivative financial instruments may be carried forward for five years.

No carryback of losses is available in Lithuania.

### *Payments to foreign affiliates*
Payments to foreign affiliates (e.g. interest, royalties, management fees, fees for other services) are deductible for tax purposes if the payment serves a business purpose, provides a benefit to the payer, is at arm's length, and is substantiated by sufficient documentation. Payments to foreign affiliates may also be subject to various withholding taxes. Certain payments to affiliates located in tax haven (blacklisted) countries are subject to 15% WHT rate.

### *Blacklisted territories*
A blacklisted territory is a foreign country or territory that is included on a list of offshore territories established by the Minister of Finance that meets at least two of the following criteria:

- Similar tax rate in such territory is below 75% of that set in the Lithuanian CIT law.
- In such territory, different rules for levying a similar tax are applied, depending on the country where the parent company (controlling entity) is registered or otherwise organised.
- In such territory, different rules for levying a similar tax are applied, depending on the country where the business is conducted.
- The company (the controlled taxable entity) has entered into agreement with the tax administrator of that territory with regard to the application of a tax rate or tax base.
- There is no effective exchange of information in such territory.
- There is no financial and administrative transparency in such territory, the tax administration rules are not quite clear, and the application thereof is not communicated to tax administrators of other countries.

A list of 58 offshore territories has been published. With certain exceptions specified in the law, all payments to offshore companies or their branches for any work or services, commodities, interest on funding, insurance premiums, guarantees, etc. are non-deductible for CIT purposes unless the Lithuanian entity provides evidence to the state tax authorities that:

- the payments are related to usual activities of the paying and the receiving business entities
- the receiving foreign business entity manages the property necessary to carry out such usual activities, and
- there is a connection between the payment and the economically grounded business operation.

## *Group taxation*

Group taxation legislation and regimes are not available in Lithuania. Each Lithuanian entity is regarded as a separate taxpayer and may not deduct tax losses accumulated from previous tax periods at the level of any other group entity.

However, recent amendments to CIT law allowed transfer of current year operating tax losses incurred as of 1 January 2010 to an entity of the same group of companies if certain requirements are met.

### *Transfer pricing*

All transactions between associated parties must be performed at arm's length. The tax authorities have a right to adjust transaction prices if they do not conform to market prices.

The Lithuanian rules refer to the Transfer Pricing Guidelines for Multinational Enterprises and Tax Administrations established by Organisation for Economic Co-operation and Development (OECD) to the extent that they do not contradict with the domestic rules.

According to the Lithuanian transfer pricing regulations, companies may apply the following methods, although traditional methods should be given preference:

- Comparable uncontrolled price method.
- Resale price method.
- 'Cost plus' method.
- Profit split method.

- Transactional net margin method.

All entities with an annual revenue exceeding LTL 10 million (EUR 2.9 million), as well as all banks, insurance companies, and credit institutions are required to prepare transfer pricing documentation in a specifically prescribed form. The documentation may be in a foreign language, but upon request has to be translated to Lithuanian.

### *Thin capitalisation*

The Lithuanian thin capitalization rules apply in respect to borrowings from related parties as well as borrowings from third parties guaranteed by related parties. The debt to equity ratio is 4:1. The above provisions do not apply if a Lithuanian company can prove that the same loan under the same conditions would have been granted by a non-related entity.

## *Tax credits and incentives*

### *Investment project incentive*

Entities involved in an investment project are able to reduce their taxable profits by up to 50% of the actually incurred acquisition costs of long-term assets meeting certain requirements. Please note that depreciation (amortisation) expenses of such assets shall be deducted in a common manner.

Taxable profits can be reduced by such costs incurred from 2009 to 2013.

The costs exceeding the above mentioned 50% limit can be carried forward for four years.

There are certain criteria defining what could be considered an investment project. The project should be precisely described to meet the criteria allowing it to use the tax relief, and the tax authorities should be properly notified about the project.

### *Tax relief for research and development (R&D)*

Expenses, except for fixed assets’ depreciation (amortisation) expenses, incurred for R&D purposes can be deducted three times in the tax period when they are incurred, provided that R&D works performed are related to ordinary business activities.

A company applying tax relief for R&D has to prepare R&D documentation. This documentation has to cover the performed project, substantiate conformity with certain tax requirements, and specify the amount of expenses for R&D activities.

### *Free economic zones*

Entities that invest in Lithuanian free economic zones are entitled to partial or complete CIT relief (depending on the investment amount), relief of tax on real estate, and 50% relief of land lease tax.

### *Foreign tax credit*

A company may reduce tax payable on certain foreign-sourced income in Lithuania by taxes paid on that income in a foreign country if that Lithuanian company has received appropriate notice from that foreign country. The tax credit may not exceed CIT rate payable in Lithuania.

## Withholding taxes

### Domestic legislation

Income of a foreign entity in Lithuania not derived through a PE is deemed to be Lithuanian-source income and is subject to WHT at the following rates:

- Interest on any type of debt obligations, including securities: 10%.
- Proceeds from the sale, transfer (with title), or lease of immovable property located in Lithuania: 15%.
- Income derived from sports activities or performers' activities: 15%.
- Income from distributed profits: 15%.
- Royalties: 10%.
- Annual payments (tantiems) to the members of the board or supervisory board: 15%.
- Indemnities received for the infringement of copyrights or neighbouring rights: 10%.

WHT on royalties paid to related parties meeting requirements of the EC Interest and Royalty Directive is 10% until 30 June 2011. As of 1 July 2011, the rate will be reduced to 0%.

As of 1 January 2010, Lithuanian WHT on interest paid to the EU entities or DTT tax residents is 0%.

WHT is not applied on government securities issued on international financial markets, interest accumulated and paid on deposits, and interest on subordinated loans which meet the criteria established by legal acts adopted by the Bank of Lithuania.

Dividends distributed by a resident company to another resident company are subject to a 15% CIT, which is withheld by a distributing company.

The dividends are exempt from WHT if the recipient company has held not less than 10% of the voting shares in the distributing company for at least a 12-month period and the distributing entity is subject to 5% or 15% Lithuanian CIT rate. However, this relief is not applied if the foreign entity (recipient) is registered or otherwise organised in blacklisted territories *(see Blacklisted territories in the Deductions section),* as specified by the Ministry of Finance. Please note that the requirement of the 12-month holding period does not necessarily have to be fulfilled on the day of dividend distribution.

The receiving company may reduce its payable CIT for that period when dividends were received by the amount of CIT withheld from the received dividends. Any excess credit may be offset with other taxes payable.

Dividends distributed by a foreign entity are subject to a 15% WHT which is to be paid by the receiving Lithuanian entity.

Dividends are exempt from WHT if the distributing foreign entity is established in the EEA and related profit is properly taxed in the domiciled country.

The dividends are exempt from WHT if the recipient company has held not less than 10% of the voting shares in the distributing company for at least a 12-month period and the receiving entity is subject to 5% or 15% Lithuanian CIT rate. This participation exemption satisfies the requirements of the EC Parent-Subsidiary Directive. The exemption also applies to dividends paid by non-EU foreign companies, except those registered or organised in blacklisted territories.

### *Tax treaties*
Where a treaty for the avoidance of double taxation and prevention of fiscal infringement with the country in question contradicts the local regulations, the treaty provisions prevail. Lithuania has now signed 48 DTTs with foreign countries.

Reduction of, or exemption from, WHT under a DTT may be obtained if a special residence certificate (Form DAS–1) is completed and approved by the tax authorities before a taxable payment is transferred. If a payment that would have been subject to a tax treaty has already been made and WHT at the local rate was withheld, it is possible to obtain an appropriate refund (reduction) by completing a special claim for a refund of the Lithuanian tax withheld at source (Form DAS–2) and obtaining the approval of the tax authorities.

In addition, the tax authorities may require completion of a special certificate giving information about income received and taxes paid in Lithuania (Form DAS–3).

## *Tax administration*

### *Returns*
#### CIT
CIT returns must be submitted by the first day of the tenth month of the following tax period (1 October for companies using the calendar year).

If CIT is calculated based on activity results for the previous year, the advance CIT return for the first nine months of the tax period is to be submitted by the last day of the first month (usually January) of the tax period. The return for the remaining months of the tax period is to be submitted by the last day of the tenth month (usually October) of the tax period. If the taxpayer has chosen to pay the advance amount based on the projected amount of CIT for the current year, the return must be submitted not later than the last day of the first month of the tax period.

#### WHT on payments other than dividends
A tax-withholding entity must submit to the tax authorities a special form of a return reporting the amounts paid and taxes withheld during the calendar month no later than 15 days after the end of the month in which the amounts were paid.

#### WHT on dividends
A tax-withholding entity must submit to the tax authorities a special form of a return reporting the dividends paid and tax withheld within ten calendar days after the end of the month of the dividend payment.

### *Payment of tax*
#### CIT
Based on the activity results for the previous year, the advance amount of CIT for the first nine months of the tax period is calculated based on the actual CIT amount for the tax period before the previous tax period. For example, the CIT for the first nine months of 2011 would be calculated based on the appropriate portion of the actual amount of CIT for 2009. The advance amount for the remainder of the tax period is based on the actual amount of CIT for the previous period, for example, tax for the last three months of 2011 would be based on the appropriate portion of the actual amount of CIT for 2010. Thus, the advance CIT amount for each quarter would be equal to one-fourth of the actual tax amount calculated for the tax periods discussed.

The taxpayer may choose to pay the advance amount based on the projected amount of CIT calculated for the current year. The advance tax (one-fourth of the advance CIT) must be paid no later than the last day of the respective quarter, and for the last quarter by the 25th day of the last month of the quarter.

If the amount of tax indicated in the return exceeds the amount actually paid during the tax period, the taxpayer is obliged to transfer the additional amount no later than the return submission deadline. Overpaid tax is refunded in accordance with the law on tax administration.

### WHT on payments other than dividends

WHT is to be calculated, withheld, and remitted by a Lithuanian company or a PE of a foreign company no later than the return submission deadline.

### WHT on dividends

WHT is to be calculated, withheld, and remitted by a Lithuanian company that pays dividends within ten calendar days after the end of the month of the payment.

## Significant developments

### New tax measures for 2011

On 28 January 2011, the Luxembourg tax authorities issued a Circular (L.I.R. n° 164/2) describing the tax treatment for Luxembourg entities that are mainly engaged in intra-group lending activities financed by borrowings. The Circular prescribes certain conditions which have to be fulfilled by Luxembourg entities to obtain a written confirmation from the income tax authorities. The requirements include a certain level of substance in Luxembourg as well as a minimum level of equity at risk. In addition, the arm's-length margin earned in on-lending activities should be determined and documented by way of a transfer pricing study.

On 8 April 2011, the Luxembourg tax authorities issued a second Circular (L.I.R. n°164/2bis) clarifying the application of Circular L.I.R 164/2 of 28 January 2011. This Circular explains that, as of 1 January 2012, the income tax authorities will no longer be bound by confirmation obtained before 28 January 2011 in relation to existing intra-group lending activities financed with borrowings falling within the scope of Circular L.I.R. 164/2.

On 2 December 2010, the Luxembourg Parliament enacted a new bill that introduced the following tax measures that are applicable as of 1 January 2011:

- The special amortisation applicable to energy-saving investments or environmentally friendly investments has increased by 20% (i.e. 80% instead of 60%).
- The investment tax credit granted on additional investments in depreciable tangible assets other than buildings, livestock, and mineral and fossil deposits has increased to 13% (instead of 12%).
- The investment tax credit on global investments has increased to 7% (instead of 6%) for the first portion of investment not exceeding 150,000 euros (EUR) and to 3% (instead of 2%) for the portion exceeding EUR 150,000.
- The contribution to the employment fund has increased from 4% to 5%. As a result, the corporate income tax (CIT) rate remains unchanged, but the combined tax rate (i.e. the applicable rate for Luxembourg City) increased from 28.59% to 28.80%.
- A EUR 1,500 minimal CIT (increased to EUR 1,575 by the 5% contribution to the employment fund) has been introduced for fully taxable resident entities which (i) do not require a business license or the approval of a supervisory authority and (ii) own financial assets, transferable securities, and cash at bank (i.e. accounts no. 23, 50, or 51 of the Standard Chart of Accounts) exceeding 90% of their total balance sheet. For tax consolidated entities, this measure will only apply once (at the level of the head of the tax consolidation).
- Severance payouts or 'golden handshakes' are deductible for CIT and municipal business tax purposes, up to EUR 300,000.

On 16 December 2010, the Luxembourg Parliament also enacted a new law implementing the Undertakings for Collective Investment of Transferable Securities (UCITS) IV Directive that introduced the following tax measures that are applicable as of 1 January 2011:

- Where a foreign Undertakings for Collective Investment (UCI) is managed by a Luxembourg-based management company (or where the UCI's place of effective management is located in Luxembourg), the UCI will not be deemed to be domiciled in Luxembourg and therefore not be subject to any tax in Luxembourg.
- Non-resident investors are no longer subject to Luxembourg capital gains tax on the disposal of shares in a Luxembourg Société d'Investissement à Capital Variable (SICAV).
- New exemptions from subscription tax are available for exchange traded funds, and an extension of exemption is available for funds dedicated to multi-employer pension vehicles or to several employers providing pension benefits to their employees.

### *Exchange of information*
As of May 2011, Luxembourg has signed 28 double tax treaties (DTTs) or amendments to comply with Organisation for Economic Co-operation and Development (OECD) principles on exchange of information.

The country is on the OECD 'white' list having 'substantially implemented the internationally agreed tax standards'.

### *Value-added tax (VAT)*
As of January 2011, the Luxembourg VAT law has implemented the second phase of the so-called 'VAT package'. The sole change relates to the place of taxation of services in respect of admission to cultural, artistic, sporting, scientific, educational, entertainment, or similar events, such as fairs and exhibitions, and of ancillary services related to the admission, supplied to a taxable person. These services will be deemed to be located at the place where those events actually take place.

As of 2011, a Standard Audit File for Tax (SAF-T), which is a file containing reliable accounting data, has been implemented by the VAT Authorities. This specific file will have to be used by a taxable person to transfer information to Luxembourg VAT Authorities during a VAT audit. Only specific taxable persons having a significant number of transactions and registered under a 'normal filing regime' with a turnover exceeding EUR 112,000 are firstly concerned. On the other hand, some entities, notably those subject to the supervision of the Commission de Surveillance du Secteur Financier (CSSF) and insurance/reinsurance companies, will not be subject to these SAF-T obligations.

A law proposal regarding the creation of VAT suspensive regimes was issued in March 2011. Once adopted, the law should allow the implementation of VAT warehouses in which transactions (e.g. the entry in the regime, the packaging, the warehousing) made on goods placed under this regime would temporally benefit from a VAT exemption. VAT would only become due at the exit of the goods from these regimes. This law, once adopted, should increase the attractiveness of Luxembourg as a strategic logistic place.

## *Taxes on corporate income*

Luxembourg taxes its corporate residents on their worldwide income and non-residents only on Luxembourg-source income.

Businesses with taxable income lower than EUR 15,000 are subject to CIT at a rate of 20%. The CIT rate is currently 21% for companies with taxable income in excess of EUR 15,000.

The CIT does not apply to tax transparent entities (e.g. general or limited partnerships or European Economic Interest Grouping).

As of tax year 2011, EUR 1,500 minimal CIT (increased to EUR 1,575 by the 5% contribution to the employment fund) has been introduced for fully taxable resident entities which (i) do not require a business license or the approval of a supervisory authority and (ii) own financial assets, transferable securities, and cash at bank (i.e. accounts no. 23, 50, or 51 of the Standard Chart of Accounts) exceeding 90% of their total balance sheet. For tax consolidated entities, this measure will only apply once (at the level of the head of the tax consolidation).

### *End of the Holding 1929 tax regime*

The phasing-out period for Holding 1929 companies ended on 31 December 2010. Hence, all remaining Holding 1929 companies (i.e. those not converted by a decision of the Board of Directors) have been automatically converted into fully taxable entities as of 1 January 2011 by effect of the law.

### *Solidarity tax*

A 5% solidarity tax is also imposed on the CIT amount (4% prior to 1 January 2011).

Taking into account the solidarity tax, the aggregate CIT rate in 2011 is 22.05% for companies with taxable income in excess of EUR 15,000.

### *Municipal business tax on income*

Municipal business tax is levied by the communes and varies from municipality to municipality. The municipal business tax for Luxembourg City is 6.75%.

The effective combined CIT rate (i.e. CIT, solidarity tax, and municipal business tax) for Luxembourg City in 2011 is 28.80%.

## *Corporate residence*

Based on domestic law, a company is considered to be resident in Luxembourg if either its registered office or place of central administration is located in Luxembourg. The registered office is designated as such in the company's articles of incorporation.

The place of central administration is generally understood to mean the place where the company is managed and controlled. While this term is not legally defined, the location of the company's major establishment is determined by facts and circumstances, including the following:

- The place where meetings of the board of directors are held.
- The place where shareholders meetings are held.
- The place where the company's officers make their decisions.
- The place where the company's books and records are kept.
- The place where other, similar factors evidencing management control occur.

## Other taxes

### Value-added tax (VAT)

Proceeds of sales and services, which are deemed to take place in Luxembourg, are subject to VAT at the standard rate of 15% (lowest standard VAT rate in the European Union (EU)) or, on certain transactions, at 12% (e.g. wine, advertising pamphlets), 6% (e.g. supply of gas or electricity), or 3% (e.g. food except alcohol beverages, pharmaceutical products, books, radio and television broadcasting services except adult entertainment). Some transactions, such as export and related transport, are zero-rated.

Taxpayers whose activities are subject to VAT are entitled to offset against their VAT payable the amount of such tax charged to them by their suppliers or reverse charged (i.e. self-accounted) by them on import or acquisitions of goods or services from abroad.

Banking, financial, insurance, and reinsurance generally are exempt activities. The VAT paid on costs made for these transactions cannot be recovered except when related to services performed for persons established outside the European Union. VAT on expenses made in the context of 'passive' holding activities, which are considered as outside the scope of VAT, are not recoverable.

### Excise duties

In addition to VAT, some products are subject to specific excise duties. In Luxembourg, these products are electricity, mineral oils, manufactured tobacco, and alcohol.

Excise duties are not based on the sale price of the products but on the quantity. Excise duty becomes chargeable at the time, and in the EU member state, of release for consumption. Release for consumption occurs in any of the following instances:

- The departure of excise goods from a duty suspension arrangement.
- The holding of excise goods outside a duty suspension arrangement where excise duty has not been levied pursuant to the applicable provisions of Community law and national legislation.
- The production of excise goods outside a duty suspension arrangement.
- The importation of excise goods, including irregular importation, unless the excise goods are placed, immediately upon importation, under a duty suspension arrangement.

### Customs duties/import tariffs

Based on a European Regulation, goods entering within the territory of the European Union could be subject to customs duties/import tariffs. Rates applying for determining customs duties/import tariffs are based on the nature and on the quantity of the products.

### Net wealth tax

Both Luxembourg resident companies and Luxembourg branches of non-resident companies are subject to net wealth tax levied at a rate of 0.5% on their net wealth, based on prescribed valuation methods. In general, assets are taken into account at market value (except for real estate, which is subject to a special regime). Shareholdings qualifying for the participation exemption *(see Dividend income in the Income determination section)* generally are exempt from net wealth tax.

Resident companies and Luxembourg branches of non-resident companies may claim a reduction of their net wealth tax liability by making an allocation to a special reserve before the closing of the tax year following the year for which the net wealth tax reduction is claimed. To this end, an amount corresponding to five times the net wealth tax that should have become payable must be kept in this special reserve for the five years following the year in which it was allocated. The reduction, however, may not be higher than the taxpayer's CIT liability, before tax credits, for that same year.

### *Subscription tax*

Investment funds are subject to subscription tax (at various rates) on their total net assets evaluated at the last day of each quarter. Institutional funds and monetary funds are subject to an annual rate of 0.01% and the other funds to an annual rate of 0.05%. Funds of institutional funds and monetary institutional funds are exempt from subscription tax.

As of 1 January 2011, new exemptions from subscription tax are available for exchange traded funds, and an extension of exemption is available for funds dedicated to multi-employer pension vehicles or to several employers providing pension benefits to their employees.

Where a foreign Undertakings for Collective Investment (UCI) is managed by a Luxembourg-based management company (or where the UCI's place of effective management is located in Luxembourg), the UCI will not be deemed to be domiciled in Luxembourg and therefore not be subject to any tax in Luxembourg.

Non-resident investors are no longer subject to Luxembourg capital gains tax on the disposal of shares in a Luxembourg Société d'Investissement à Capital Variable (SICAV).

### *General registration taxes*

General registration taxes (inclusive of the transcription tax described below) are levied at 7% on the market value of real estate purchased or transferred (10% in the commune of Luxembourg City for some categories of properties) and 1% on mortgages on real estate. The taxes are deductible for CIT purposes.

Note that a fixed registration duty of EUR 75 is levied on certain transactions involving Luxembourg entities (i.e. incorporation, amendment to the articles of association, and transfer of seat to Luxembourg).

For Luxembourg real estate assets, contribution made to a company remunerated by shares are subject to a proportional registration duty of 0.6% (0.9% for Luxembourg City for some categories of properties) and a transcription tax of 0.5%. Contribution remunerated by means other than shares remain subject to a proportional registration duty of 6% (9% for some categories of properties located in Luxembourg City) and a transcription tax of 1%. Transfers made within the framework of a corporate reorganisation may be exempt from any proportional registration duty under certain conditions.

### *Commune (municipalities) real estate tax*

Communes (municipalities) levy an annual real estate tax, the basis of which is the unitary value of real estate, which represents its estimated value in 1941. The basic rate varies from 0.7% to 1% of the unitary value, according to the category of property, and is multiplied by a coefficient, which varies with communes and different types of property. For commercial properties, the coefficient in Luxembourg City is 750%, which should be applied to 1% of the unitary value. The real estate tax is deductible for CIT purposes.

## Branch income

Branch income generally is taxed at CIT rates. However, the municipal business tax generally only applies if the branch is carrying on commercial activity within Luxembourg.

## Income determination

### Inventory valuation

Inventories generally are valued at the lower of actual or market cost. There is no statutory specified method. In general, the first in first out (FIFO), the last in first out (LIFO), and the weighted-average costs methods of inventory valuation are acceptable for income tax purposes, provided the method is in accordance with the facts.

### Dividend income

Dividends received by a Luxembourg resident company (or by a domestic permanent establishment (PE) of a non-resident company in certain cases) should, in principle, be subject to CIT.

#### Participation exemption regime

Dividends received may be tax exempt in Luxembourg, according to the so-called 'participation exemption' regime, if the conditions described below are satisfied:

- The distributing company is:
  - a collective entity falling within the scope of article 2 of the amended version of the EU Council directive of 23 July 1990 (90/435/EEC), hereafter the 'Parent Subsidiary Directive'
  - a Luxembourg resident joint-stock company, which is fully taxable and does not take one of the forms listed in the appendix to paragraph 10 of article 166 of the Luxembourg Income Tax Law (LITL), or
  - a non-resident joint-stock company that is fully liable (in its state of residence) to a tax corresponding to the Luxembourg CIT (i.e. as a general rule, it is required that the foreign tax is compulsorily levied at an effective rate of at least 10.5%, on a basis similar to the Luxembourg one).
- The beneficiary company is:
  - a Luxembourg resident collective entity, which is fully taxable and takes one of the forms listed in the appendix to paragraph 10 of article 166 LITL
  - a Luxembourg resident joint-stock company, which is fully taxable and does not take one of the forms listed in the above-mentioned appendix
  - a domestic PE of a collective entity falling within the scope of article 2 of the amended version of the Parent-Subsidiary Directive
  - a domestic PE of a joint-stock company that is resident in a country with which Luxembourg has concluded a DTT, or
  - a domestic PE of a joint-stock company or of a cooperative society, which is a resident of a European Economic Area (EEA) member state (other than an EU member state).
- At the date on which the income is made available, the beneficiary has been holding or undertakes to hold, directly (or through a tax transparent entity - *see Transparent entities below*), for an uninterrupted period of at least 12 months, a participation in

the share capital of the subsidiary of at least 10% or with an acquisition price of at least EUR 1.2 million.

### *Capital gains*

Capital gains (and losses) generally are taxed as ordinary income (or losses). It is possible to defer the taxation of gains on certain fixed assets where the gain is used to acquire replacement items. Under certain conditions, exempted capital gains and hidden reserves may be unrealised in a merger or another form of reorganisation of resident companies or other EU companies.

In general, capital gains on the disposal of qualifying shareholdings held by entities eligible to the participation exemption regime are tax exempt, provided (i) the shareholding constitutes at least 10% of total ownership or an acquisition price of at least EUR 6 million and (ii) the disposing company has held or intends to hold the qualifying shareholding for at least 12 months.

A recapture system exists wherein the capital gain realised will become taxable up to the amount of the aggregate expenses and write-downs in relation to the participation deducted during the year of realisation of the exempt capital gain and in previous years.

The purpose of the system is to avoid a taxation vacuum, which could result if the deductibility of expenses and write-downs connected to the participation was allowed, while the income arising from the participation is tax exempt. This system should, in principle, remain tax neutral as the company should have available carryforward losses for an equivalent amount (unless previously used to offset other taxable income).

#### Taxation of non-resident corporate investors on gains upon disposal of shares

In principle, should a non-resident corporate investor (non-treaty protected) derive income from the disposal of an important participation (i.e. representing at least 10% of the share capital) in a Luxembourg company within six months of its acquisition, said capital gain will be subject to CIT in Luxembourg unless a tax treaty provides otherwise.

As of 1 January 2011, non-resident investors will no longer be subject to the aforementioned capital gains tax upon disposal of shares in a Luxembourg SICAV.

### *Transparent entities*

From a Luxembourg tax perspective, a transparent entity is seen as having no legal personality distinct from that of its partners (those transparent entities are commonly referred to as ‘partnerships’) for CIT and net wealth tax purposes, although it may be regarded as a separate legal entity from a civil/corporate law point of view. Provided that the partnership carries out a commercial activity, however, it will be liable to municipal business tax on its own.

### *Foreign income*

A Luxembourg tax resident company is liable for CIT on its worldwide income, whether derived from Luxembourg or from foreign sources. Luxembourg does not apply a territorial basis for taxation. Foreign-source income is therefore taxable in Luxembourg, unless a DTT provides for an exemption.

Dividends from foreign subsidiaries are taxed when received, except where exempt as mentioned above. Profits of a foreign branch which are not exempt by means of a DTT may, however, benefit from a foreign tax credit. Any foreign taxes paid in excess of the tax credit are deductible as expenses. Luxembourg is, however, using the exemption method in most of its DTTs.

## Deductions

### Depreciation

Depreciation rates must be consistent with economic reality. The depreciation must be calculated on the total acquisition cost, bearing in mind the normal life of the asset and the estimated residual value. Depreciation normally is calculated using the straight-line method. However, the declining-balance method is permitted for fixed assets, other than buildings and intangible assets. The depreciation rate may not, however, exceed three times the rate applicable according to the straight-line method, or 30% (four times the applicable rate in the case of assets used exclusively for scientific and technical research, or 40%).

It is permissible to change from the declining-balance method to the straight-line method, but the converse is not allowed. Tax depreciation must be reflected in the financial accounts prepared for commercial purposes.

In the event of a sale of a depreciated asset, the net book value at the moment of the disposal must be compared with the sale price of that asset. If this comparison indicates a profit, corresponding income tax may be due unless the sale price is reinvested in eligible assets. Capital losses are deductible.

Under certain conditions, fixed assets with a value of less than EUR 870 or an economic life that is not in excess of one year can be expensed fully in the year of acquisition. Special accelerated depreciation on 80% (60% prior to 1 January 2011) of the cost of fixed assets is available for assets that protect the national environment, save energy in Luxembourg, or permit the development of workplaces for handicapped workers, under certain conditions.

### Shareholdings

Expenses linked to a shareholding qualifying for the participation exemption, including write-downs in the value of the shareholding booked as a consequence of a dividend distribution, are not deductible up to the amount of the exempt dividend. Recapture rules may apply in the event of disposal of the shareholding. Basically, the effect of this rule is that capital gains realised will become taxable up to the amount of the aggregate expenses and write-downs in relation to the participation, deducted during the year of disposal and the previous years. The qualifying shareholding is exempt from net wealth tax.

### Charitable contributions

Gifts for scientific, charitable, or public purposes and to institutions in the general interest are deductible, subject to a maximum of 20% of the net income or up to an amount of EUR 1 million (the minimum being EUR 120) with a possibility to spread the deduction over two years.

### Severance payouts or 'golden handshakes'

As of 1 January 2011, severance payouts or 'golden handshakes' are deductible for CIT and municipal business tax purposes, up to EUR 300,000.

### *Taxes*
Several taxes are deductible in determining income subject to CIT, including the registration duties and real estate tax. Also, certain taxes are credited against the computed amount of income tax owed, including taxes withheld from Luxembourg dividend income, tax withheld abroad from dividend and interest income received by a Luxembourg corporation (subject to limitations), and investment tax credits *(see the Tax credits and incentives section)*.

The main non-deductible taxes are CIT, municipal business tax, net wealth tax as well as interest and penalties for late payment of said taxes.

### *Net operating losses*
Net operating losses can be carried forward for an unlimited period but cannot be carried back.

### *Payments to foreign affiliates*
Royalties, management service fees, and interest charges paid to foreign affiliates by a Luxembourg company are deductible items, provided they are equal to what the company would pay an unrelated entity for comparable services.

## *Group taxation*

Luxembourg permits tax unity. Generally, the conditions to qualify for tax unity include that:

- each company is a fully taxable company that is resident in Luxembourg (the top entity may be a Luxembourg PE of a fully taxable non-resident company)
- at least 95% of each subsidiary's capital is directly or indirectly held by the parent company
- each company's fiscal year starts and ends on the same date, and
- tax unity is requested jointly by the top company and each subsidiary that becomes member of the group.

Tax unity lasts for a five-year period, and taxable income/loss is computed on the consolidated result. Tax losses that occurred before the consolidation period may be offset only against tax profits of the company that incurred the loss. Tax losses that are sustained by a group member during the consolidation period are offset against the tax profits of the other group members. Tax losses arising during the consolidation period that exist after the consolidation period are attributed to the parent company.

### *Transfer pricing*
Luxembourg largely follows the transfer pricing guidelines issued by the OECD in the absence of detailed transfer pricing regulations in Luxembourg. LITL has prescribed the general transfer pricing provisions in Article 56 LITL, which requires that transactions between related parties are carried out in line with the arm's-length principle. This article provides that where there is a transfer of profit possibly due to the fact that a Luxembourg taxpayer has a special economic relationship with a non-resident taxpayer, then the tax authorities may determine the financial result regardless of the reported profit. The concept of a special economic relationship can be described as any economic relationship that differs from a regular/commercial economic relationship between two parties. The special economic relationship goes beyond the related party definition as stated in article 9 of the OECD Model Convention.

Furthermore, Article 164(3) LITL characterises certain transactions as a hidden distribution of profits where a direct or indirect shareholder receives an advantage from a company that said shareholder would not have received if there had not been a shareholding relationship. The hidden distribution of profits in Luxembourg is included in the profit of the taxpayer and subject to tax at the prevailing statutory rate of corporation tax. In addition, it may be subject to 15% withholding tax (WHT) on the gross amount received, except in case a reduced rate applies under the provisions of the relevant DTT or the EC Parent-Subsidiary Directive.

Transfer pricing documentation is prepared based on OECD transfer pricing guidelines and EU transfer pricing documentation guidelines. Transfer pricing documentation is neither required at the time of the transaction nor at the filing of the tax return. During the course of a tax assessment, the tax authorities may request documentation from the taxpayer to evidence the reasonableness of an intra-group pricing arrangement. There are no transfer pricing methods prescribed for determining the arm's-length standard, and the taxpayers and the tax authorities largely follow the transfer pricing methods prescribed in the OECD transfer pricing guidelines.

In terms of the burden of proof, the tax authorities have to prove that there is an erosion of the taxable base in Luxembourg, whereas the taxpayer has to prove that the inter-company transactions did not result in a reduction or cancellation of taxes. The statute of limitations is generally five years from the end of the year in which the tax liability arises. This period may be extended if a deferred payment is granted. In case of tax evasion or fraud, the statute of limitations can be extended up to ten years. There are no specific penalties in relation to transfer pricing in Luxembourg, but the penalty regime under the corporate tax will be applicable.

Although Luxembourg has no formal procedure for applying Advance Pricing Arrangements (APA), the income tax authorities are quite flexible in this area. There have been a few cases in Luxembourg where bilateral APAs have been concluded, although in general, unilateral advanced tax agreements are obtained on an individual basis. Recently, the tax authorities have increased their focus on transfer pricing. As a result, two Circulars describing the tax treatment for intra-group financing transactions have been issued by the Luxembourg tax authorities.

According to the Circular of 28 January 2011 (L.I.R. n° 164/2), the internationally acceptable arm's-length principle should be applied for the determination of the compensation for Luxembourg companies which are principally engaged in on-lending transactions. The remuneration of the related entities should be determined based on the functions performed, assets utilized, and risks born by the Luxembourg company. A written confirmation from the tax authorities can be obtained if the Luxembourg company meets the substance and equity at risk requirements with regard to the on-lending activity. In respect of the equity at risk requirement, the Luxembourg company must be at risk for an amount equal to the lesser of 1% of the nominal value of the loan or EUR 2 million. In addition, the arm's-length price has to be determined by way of a transfer pricing analysis.

On 8 April 2011, the Luxembourg tax authorities issued a second Circular (L.I.R. n°164/2bis) clarifying the application of Circular L.I.R 164/2 of 28 January 2011. This Circular explains that, as of 1 January 2012, the income tax authorities will no longer be bound by confirmation obtained before 28 January 2011 in relation to existing intra-group lending activities financed with borrowings falling within the scope of Circular L.I.R. 164/2.

### Thin capitalisation
No thin capitalisation ratio is specifically provided by the Luxembourg tax law.

In practice, the tax authorities apply an 85:15 debt-to-equity ratio for the intra-group financing of participations. Should the 85:15 ratio not be complied with by the taxpayer, the surplus of interest could be requalified by the tax authorities as a hidden distribution of profits which would be non-deductible and potentially subject to a 15% WHT.

## Tax credits and incentives

### Inbound and capital investment incentives
Luxembourg tax law provides for various incentives, with specific requirements, in the areas of risk-capital, audiovisual activities, and environmental protection as well as for research and development (R&D), professional training, and recruitment of unemployed persons.

The most commonly used incentives are the investment tax credits. Luxembourg tax law provides for two types of investment tax credits.

First, a tax credit is available which amounts to 13% of the increase in investment in tangible depreciable assets made during the tax year. The increase in investment over a given tax year is computed as the difference between the current value of all qualifying assets and the reference value allocated to the same type of assets.

Independently, the company may benefit from a 7% tax credit on the first EUR 150,000 of qualifying new investments, and a 3% tax credit on the amount of new investments exceeding EUR 150,000 in tangible depreciable assets as well as investments in sanitary and central heating installation in hotel buildings and investments in buildings used for social activities. The above 7% and 3% rates are increased to 8% and 4% for investments eligible for special depreciation (i.e. investments favouring the protection of the environment, the realisation of energy savings, or the creation of employment for handicapped workers). However, certain investments are excluded from the credit calculation, including investments in real property, intangible assets, and vehicles (unless specifically stated by the law).

Domestic law requires that investments be physically operated in Luxembourg in order to be eligible for the incentive, unless the investment consists in shipping vessels operating in international waters. In addition, the tax benefit of the tax credit is limited to investments that are made within a Luxembourg business establishment and that are intended to be used permanently in Luxembourg.

Further to the European Court of Justice’s decision dated 22 December 2010 (Tankredeerei, C-287/10), the Luxembourg Tax Authorities issued a Circular letter dated 31 March 2011, confirming that the investment tax credit must be granted to any investment used within the EU and EEA member states. Although Luxembourg domestic tax law has not yet been amended accordingly, the application of investment tax credit may be requested for the current tax year, as well as for tax years already assessed but still subject to the introduction of a claim.

### Intellectual property (IP) regime

An IP regime is applicable to qualifying IP rights acquired or developed after 31 December 2007. This regime provides for an 80% tax exemption of the net income deriving from the use and the right to use qualifying IP rights, under certain conditions. Qualifying IP rights include patents, trademarks, design, domain names, models, and software copyrights.

An 80% deduction of net deemed income is available also under certain conditions for self-developed patents, which are used internally by the taxpayer.

The net capital gain realised upon disposal of the qualifying IP rights also benefits from the 80% exemption.

Finally, qualifying IP rights may be fully tax exempt for net wealth tax purposes under certain conditions.

### R&D incentives

Luxembourg entities involved in innovative and R&D activities can benefit from financial support in addition to the specific IP tax regime and general tax incentives.

Innovation loans may be granted by the Société Nationale de Crédit et d'Investissement and may carry a fixed interest rate lower than the market rate. Financial support may also be granted in the form of cash grants or interest subsidies.

R&D projects or programmes receive financial support up to a maximum eligibility (percentage of costs eligible for the incentives) depending on the size of the beneficiary (private research companies or organisations) as follows:

- Large (25% to 100% depending on the investment).
- Mid-size (35% to 100%).
- Small (45% to 100%).

These incentives are available for:

- experimental development
- experimental development and cooperation
- industrial research
- industrial research and cooperation, or
- fundamental research.

Innovation in process and organisation and investment in innovation pools can benefit from financial support of between 15% and 35% (50% for public research companies).

Promotion and development of innovation pools can benefit from financial support of up to 50% for private organizations or 75% for public research companies.

Research regarding technical feasibility can benefit from financial support of up to 40% or 50% if prior to experimental development and up to 65% or 75% if prior to experimental research.

### *Other incentives by entity*

#### Investment funds

Investment funds resident in Luxembourg generally are exempt from CIT, municipal business tax, and WHT on dividends. These investment funds are subject to the previously described subscription tax and to the general registration duty regime.

#### Financial participation company (Soparfi)

A Soparfi (Société de Participation Financière) is neither a specific type of company nor a special tax regime. It is rather used to refer to resident companies that hold and manage the shareholdings of subsidiaries. A Soparfi is subject to CIT, municipal business tax, and net wealth tax, but it does benefit from Luxembourg's DTTs, EU Directives (e.g. Parent-Subsidiary directive), the domestic participation exemption on dividends received, and capital gains on qualifying participations.

#### Private wealth management company (Société de gestion du Patrimoine Familial or SPF)

The SPF has been tailored to enter the private sphere of individuals for the purpose of wealth management. Its corporate objective is restricted to the acquisition, holding, management, and disposal of financial assets, to the exclusion of any commercial activity. As a general rule, an SPF is exempt from Luxembourg taxation on income and wealth tax in Luxembourg. A yearly subscription tax of 0.25% is due on the basis of paid-up capital, share premium, and excessive debts. Subscription tax, however, is capped at EUR 125,000. No WHT applies on dividends distributed by an SPF. Non-resident investors are not taxed in Luxembourg on dividends paid by a SPF or on capital gains realised on shares in a SPF.

#### Securitisation companies (SC)

SCs are subject to normal corporate taxation. A securitisation company is a company which carries out securitisation activities or which participates in securitisation transactions. Securitisation companies are taxed based on their net accounting profit (i.e. gross accounting profits minus expenses). However, the commitment to remunerate the security holders (both capital and debt) issued by the securitisation company qualifies as interest on debt even if paid as return on equity. Securitisation companies are not subject to net wealth tax in Luxembourg.

#### Venture capital vehicle (Société d'Investissement en Capital à Risques or SICAR)

The SICAR benefits from an attractive tax regime. SICARs are notably exempt from net wealth tax. Incorporated under a corporate form, the SICAR is subject to income tax at the normal rate with the benefit of an exemption on income and gains (e.g. dividends, capital gains, liquidation proceeds, interest) from transferable securities qualifying as risk capital as well as income arising from investments in liquid assets pending their investment in risk capital for a maximum of 12 months. In addition, it can benefit from the European directives and DTTs. Under the form of a limited partnership, the SICAR is treated as a tax transparent entity, and investors are taxed according to the rules of their country of residence. SICARs treated as tax transparent entities do not benefit from the European directives and DTTs. The SICAR mainly targets qualified or informed investors (i.e. 'professional' investors).

#### Financial services companies

Banks, securities depositaries, insurance, and reinsurance companies as well as other financial service companies may benefit from preferential regulations when establishing their taxable basis for CIT (e.g. provision for the neutralisation of unrealised exchange gains, general banking risk provision, provision for guarantee of deposits, mathematical reserves, and/or catastrophe reserves).

**Shipping companies**
Luxembourg-resident shipping companies are not subject to municipal business tax and can benefit from investment tax credits and accelerated depreciation (even for used assets).

## *Withholding taxes*

Dividends paid by a Luxembourg fully taxable company to its 'corporate' shareholders resident in a treaty country, which hold or commit themselves to hold a participation of at least 10% in the Luxembourg company (or shares with an acquisition price of at least EUR 1.2 million) for an uninterrupted period of at least 12 months, may be exempt from WHT *(see Note 1 below for more details)*.

The following taxes are withheld on payments made. The WHT due on dividends paid to residents of a treaty country cannot exceed the non-treaty rate.

| | Dividends (%) | | | |
|---|---|---|---|---|
| **Recipient** | **Portfolio** | **Substantial holdings (1)** | **Interest (%) (2)** | **Royalties (%) (3)** |

Notes

These notes are not extensive. The full text of the DTT should be checked for a comprehensive view on the conditions of application of reduced rates.

1. Under Luxembourg domestic law, no WHT is levied on dividends paid by a Luxembourg qualifying subsidiary to an entity which is:

- a collective entity falling within the scope of article 2 of the amended version of the Parent - Subsidiary Directive
- a Luxembourg resident joint-stock company, which is fully taxable and does not take one of the forms listed in the appendix to paragraph 10 of article 166 of the Luxembourg income tax law
- a PE of a collective entity falling under the previous categories
- a collective entity that is resident in a country with which Luxembourg has concluded a DTT and which is fully liable to a tax corresponding to the Luxembourg CIT, or a domestic PE of such an entity
- a Swiss resident joint-stock company that is subject to Swiss CIT without benefiting from any exemption
- a joint-stock company or a cooperative society which is resident in a EEA member state (other than a EU member state) and is fully liable to a tax corresponding to the Luxembourg CIT, or
- a PE of a joint-stock company or of a cooperative society which is resident in a EEA member state (other than a EU member state), and
- at the date on which the income is made available, the beneficiary has been holding or undertakes to hold, directly, for an uninterrupted period of at least 12 months, a participation of at least 10%, or with an acquisition price of at least EUR 1.2 million in the share capital of the income debtor.

Qualifying shareholders need to be fully taxable collective entities subject in their country of residence to a tax similar to that imposed by Luxembourg. As a general rule, this requirement is met if the foreign tax is compulsorily levied at an effective rate of at least 10.5%, on a basis similar to the Luxembourg one.

2. Interest paid to non-residents generally is not subject to WHT in Luxembourg. However, interest that represents a right to profit participation on a bond may be assimilated t a dividend and subject to WHT. Further analysis should be made to determine the applicable reduced rate on the basis of the treaty (i.e. pursuant to dividend or interest clause). The WHT that may be due as a consequence of the EU Savings Directive (Council Directive 2003/48/EC dated 3 June 2003) is not mentioned.
3. Royalties paid to non-residents are not subject to WHT in Luxembourg, whether the companies are associated or not.
4. A WHT of 10% is withheld on defined interest income paid by a Luxembourg paying agent to resident individuals. Interest indirectly cashed through investment funds are out of the scope of this WHT.
5. DTTs have been concluded with Albania, Argentina (limited scope), Barbados, Cyprus, Kazakhstan, Kuwait, Kirghizstan, Lebanon, Macedonia, Pakistan, Panama, Serbia and Montenegro, Syria, and Ukraine, but are not yet in force.
6. The recipient company holds at least 25% of the Luxembourg company's capital. In some rare cases, a holding period requirement may have to be met as well (e.g. Spain, Switzerland).
7. The recipient company owns at least 30% of the company's capital and the equivalent of an acquisition price of USD 300,000.
8. The recipient company owns a 25% investment or the equivalent of an acquisition price of EUR 6,197,338. The investments may be held by several Belgian companies, provided one owns at least 50% of the shares of each of the others. The investment must be held since the beginning of the financial year of the recipient of the dividends.
9. The recipient company holds at least 10% of the Luxembourg company's capital.
10. No WHT is levied if the recipient company holds at least 10% of the Luxembourg company's capital or a participation with an acquisition price of a least EUR 1.2 million.
11. The rate of 5% of WHT on the gross amount of the dividends applies where the effective recipient company owns directly or indirectly at least 50% of the share capital of the paying company or has contributed more than USD 10 million or the equivalent in Luxembourg or in Vietnamese currency, in the capital of the company paying the dividends; the rate of 10% of WHT on the gross amount of the dividends applies where the beneficial owner is a company which holds directly or indirectly at least 25% but less than 50% of the capital of the company paying the dividends and has contributed not more than USD 10 million, or the equivalent in Luxembourg or Vietnamese currency, in the capital of the company paying the dividends.
12. The recipient company owns directly or indirectly 25% of the company's capital. Indirect participation includes the holding through several treaty resident companies located in the same country provided one owns more than 50% of the shares of each of the others.
13. A 5% WHT is levied on dividend distributions where the beneficial owner is a company which holds at least 10% of the voting rights of the paying company. No WHT is levied when the US company has held, during an uninterrupted period of two years, a direct shareholding of at least 25% of the voting power of the paying company and certain conditions regarding the nature of activities performed by the distributing company are met.
14. The recipient company owns directly or indirectly 25% of the company's voting rights. Indirect participation includes the holding through several treaty resident companies located in the same country provided one owns more than 50% of the voting rights of each of the others.
15. The recipient company holds at least 25% of the Luxembourg company's voting shares during the period of six months immediately before the end of the accounting period in which the distribution of profits takes place.
16. The dividends are taxable at a rate of 5% if the beneficial owner is a company that holds directly at least 10% of the capital of the company paying the dividends. No WHT is levied when the beneficiary company has held during the 12 preceding months a direct shareholding of at least 25% of the capital of the paying company. The holding period must be met before the date of distribution of the dividend. Furthermore, certain conditions regarding the nature of activities performed by the company must be met.

17. The recipient company holds at least 30% of the Luxembourg company's capital and the acquisition price reaches at least EUR 75,000 (or equivalent).
18. The recipient company holds at least 10% of the Luxembourg company's capital. Dividends paid to the government of Singapore are exempt.
19. The beneficial owner is a company (other than a partnership) which controls directly or indirectly at least 10% of the voting power in the company paying the dividends.
20. The recipient company holds at least 25% of the Luxembourg company's voting shares (Germany/Luxembourg) or company's voting power (Ireland/Luxembourg).
21. The rate of 5% of WHT on the gross amount of dividends applies where the recipient company holds at least 10% of the Luxembourg company's capital.
22. The rate of WHT is 5% if the beneficial owner is a company that holds directly at least 10% of the capital of the company paying the dividends and made an investment in the capital of the paying company of more than EUR 100,000 or the equivalent in Georgian currency. No WHT is levied when the beneficiary company holds directly at least 50% of the capital of the company paying the dividends and made an investment in the capital of the paying company of more than EUR 2 million or the equivalent in Georgian currency.
23. The recipient company holds at least 20% of the Luxembourg company's capital.
24. No WHT is levied when the beneficiary company holds at least 10% of the company paying the dividends. The rate of 5% of WHT on the gross amount of dividends applies where the beneficial owner is an individual who holds directly at least 10% of the company paying the dividends and was a resident of the other contracting state for the 48-month period immediately preceding the year in which the dividends are paid.
25. No WHT is levied when the beneficiary of the dividend is a joint stock company, which has held directly a participation of at least 10% (or with an acquisition price of at least EUR 1.2 million) of the distributing company's share capital, for an uninterrupted period of at least 12 months. The rate of 5% of WHT applies if said participation has been held for less than 12 months.
26. No WHT is levied when the recipient company holds at least 10% of the Luxembourg company's capital. A holding period requirement has to be met for Sweden and San Marino.

## *Tax administration*

### *Returns*

Companies must file their tax returns by 31 May of each year following the calendar year during which the income was earned.

Assessments are issued after the end of the tax year and normally can be finalised within five years, although the delay may extend to ten years if the declaration is found to be incomplete or inexact, with or without the intention of fraud. Once issued, the tax assessment notice is in principle final (unless new facts come to light).

A self-assessment procedure applies to Luxembourg resident companies. Tax assessments are issued by the tax authorities immediately upon receipt of the tax return, based on the taxable profit reported by the company. The tax authorities may then reassess or request more information on the return within the period of five years that follows the reception of the tax return.

### *Payment of tax*

Quarterly tax advances must be paid. These payments are fixed by the tax administration on the basis of the tax assessed for the preceding year or on the basis of the estimate for the first year. This estimate is given by the company pursuant to the request of the Luxembourg tax authorities.

Tax must be paid by the end of the month that follows the month of reception by the company of its tax assessment.

## Significant developments

### Tax incentives for the tax year 2011

On 15 December 2010, the Legislative Assembly approved certain tax incentives proposed in the Budget for the financial year 2011. The key tax incentives include the following:

- The tax free income threshold for complementary (corporate) tax will continue to be increased from 32,000 Macanese patacas (MOP) to MOP 200,000 for income derived in the tax year 2010. Taxable income between MOP 200,000 and MOP 300,000 is taxed at 9%, and taxable income over MOP 300,000 is taxed at 12%.
- The standard MOP 3,500 reduction in property tax liabilities will continue to be available in the tax year 2011 for both self-use and rental properties.
- Restaurants will continue to be exempt from tourism tax in the tax year 2011.
- Insurance policies written or renewed in the tax year 2011 and banking transactions in the tax year 2011 will continue to be exempt from stamp duty.
- Admission tickets for performances, exhibitions, and entertainment programs will continue to be exempt from stamp duty in the tax year 2011.
- Commercial and industrial operations will continue to be exempt from the annual industrial tax in the tax year 2011.

### Revision of the Macau Property Tax Law

The Legislative Assembly approved certain amendments to the Macau Property Tax Law on 16 February 2011. The amendments became effective on 8 March 2011 and are applicable to benefits derived from properties for the tax year 2010 retrospectively.

Under the revised Law, the property tax rate for leased properties has been reduced from 16% to 10% on the actual rental income. For self-use properties, the property tax rate has been reduced from 10% to 6% on the official rateable value. The surcharge of 5% that was previously levied on the property tax payable on such properties has been abolished.

The annual deduction of 10% of the official rateable value to cover repair and maintenance expenses is automatically available for self-use properties under the revised Law. However, approval by the Macau Finance Bureau (MFB) is still required for a maximum deduction of 10% of the rental income derived for leased properties.

### Revision of the Macau Stamp Duty Law

Effective as of 4 May 2011, the 0.5% stamp duty on intermediate transfer of immovable properties, so called ‘confirmor sale’, has been annulled.

The revision of the Macau Stamp Duty Law was intended to curb speculation activities in the real estate market. Under the revised Law, all property transfer, whether it be intermediate, final, or sale of uncompleted properties, will be subject to Macau Stamp Duty at a progressive rate scale ranging from 1% to 3%, thereby increasing the transactional costs of speculative property activities.

### *First Protocol to the People's Republic of China/Macau avoidance of double taxation arrangement (DTA)*

The Central Government of the People's Republic of China (the PRC) and the Government of the Macau Special Administrative Region (SAR) signed the Protocol (Protocol) to the PRC/Macau DTA on 15 July 2009. The Protocol became effective on 15 September 2010 and is applicable to income arising as of 1 January 2011.

The PRC/Macau DTA was signed in 2003. Some of the provisions of the PRC/Macau DTA are less favourable than those of the PRC/Hong Kong DTA. Under the Protocol, the treaty-based rates for withholding tax (WHT) on dividends, interest, and royalty have been reduced. Further, the criteria for determination of a service permanent establishment (PE) and certain criteria for capital gains exemption under the PRC/Macau DTA have been clarified. In summary, the Protocol has brought the PRC/Macau DTA broadly in line with the PRC/Hong Kong DTA. This has no doubt increased the competitiveness of the Macau SAR and provided added incentives for Macau companies to do business or invest in the People's Republic of China. Nevertheless, as Macau adopts a worldwide taxation system in its domestic tax regime, consideration should be given as to whether the use of a Macau company as a holding company for investments in the People's Republic of China is favourable from a tax perspective.

### *Second Protocol to the PRC/Macau DTA*

The Central Government of the PRC and the Government of the Macau SAR signed the Second Protocol (Second Protocol) to the PRC/Macau DTA on 26 April 2011. The Second Protocol is aimed at amending Article 26 of the PRC/Macau DTA to implement the standards on transparency and exchange of information developed by the Organisation for Economic Co-operation and Development (OECD), which are endorsed by the G20 members.

### *The Republic of Cape Verde/Macau DTA*

The Government of the Macau SAR and the Government of the Republic of Cape Verde signed a DTA on 15 November 2010 to promote trade relations between the two jurisdictions. The DTA will become effective upon completion of the necessary ratification procedures by the respective jurisdictions. The DTA includes a tax information exchange clause that implements the internationally agreed standards developed by the OECD.

### *The Republic of Mozambique/Macau DTA*

The ratification procedures for the DTA signed between the Government of the Macau SAR and the Government of the Republic of Mozambique have been completed, and the DTA became effective on 11 January 2011.

### *Tax information exchange agreements signed with the Nordic countries*

On 29 April 2011, the Government of the Macau SAR signed tax information exchange agreements (TIEAs) with the Nordic countries, which include the Kingdom of Denmark, the Faroe Islands, the Republic of Finland, Greenland, Iceland, the Kingdom of Norway, and the Kingdom of Sweden. Together with the five comprehensive tax arrangement/agreements that Macau has signed with the PRC, Portugal, the Republic of Mozambique, Belgium, and the Republic of Cape Verde respectively, Macau has enlarged the network of agreements to implement the internationally agreed standards on transparency and exchange of information for tax purposes through the signing of a total of 12 DTAs or TIEAs to date.

The TIEAs will become effective upon completion of the necessary ratification procedures by the respective jurisdictions.

### *Pending legislation*

Please note this information is current as of 1 June 2011. Typically, pending legislation is announced in June or July. Please visit the WWTS website at www.pwc.com/taxsummaries to see any significant corporate tax developments that occurred after 1 June 2011.

## *Taxes on corporate income*

Complementary tax is imposed on the worldwide income earned by Macau registered entities, irrespective of where their residence or headquarters are situated and irrespective of the nature of the income. The exception to the foregoing is rental income from leasing of immovable properties located in Macau, which is taxed separately under the Property Tax Regime.

Generally, if a foreign entity is engaged in commercial/industrial activities and/or rendering services in Macau, the resultant gain from such commercial/industrial activities and/or services rendered will be subject to complementary tax.

According to the Macau Complementary Tax Law, complementary tax is imposed on a progressive rate scale ranging from 3% to 9% for taxable profits below or equal to MOP 300,000 and 12% for taxable profits over MOP 300,000. Taxable profits below MOP 32,000 are exempt from tax.

According to the Budget for the financial year 2011, which has already been approved by the Legislative Assembly (2011 Approved Budget), the tax-free income threshold for complementary tax has been increased from MOP 32,000 to MOP 200,000 for income derived in the tax year 2010 (the next MOP 100,000 of taxable income is taxed at 9%, and taxable income in excess of MOP 300,000 is taxed at 12%). Such increase in the tax-free income threshold has been granted since the tax year 2007. While it is generally believed that the direction of the Macau government policy will remain stable at least for several years, the changes in tax-free income threshold and the tax brackets beyond the tax year 2010 are subject to approval by the Legislative Assembly on an annual basis, unless such amendments are written into the relevant tax laws.

### *Types of taxpayers and associated tax bases*

#### Group A taxpayers

Taxpayer entities whose registered capital reached MOP 1 million, or whose average taxable profits reached MOP 500,000, per year in three consecutive years will automatically become Group A taxpayers in the tax year following the year in which the notification is issued by the Macau Finance Bureau. A taxpayer entity can also elect to become a Group A taxpayer by filing a Group A declaration form. Profits of Group A taxpayers are assessed based on the actual accounting income after making necessary tax adjustments.

#### Group B taxpayers

Group B taxpayers refer to any individual or any other form of companies not mentioned above and those taxpayers that do not keep detailed accounting records.

Profits of Group B taxpayers are assessed on a deemed basis if the reported income is below the internal parameters set by the MFB for taxpayers in similar industries.

## Corporate residence

Corporate residence is generally determined by reference to the place of establishment. The exception to the foregoing is a Macau offshore company or a Macau offshore financial institution that is established under Law 58/99/M. Such a Macau offshore company or financial institution is not considered as a Macau tax resident in the context of the comprehensive tax arrangement/agreements entered into between the Macau SAR and the PRC, Portugal, and the Republic of Mozambique respectively. A Macau tax resident entity is subject to complementary tax on its worldwide income.

### Permanent establishment (PE)

There is no specific definition of PE in the Macau Complementary Tax Law. Technically speaking, there are two major criteria for determining whether a foreign entity should be subject to complementary tax, and the key phrases are 'engaging in commercial/industrial activities' and/or 'rendering services in Macau'. These phrases are again not defined. Generally, if a foreign entity is engaged in commercial/industrial activities and/or rendering services in Macau, the resultant gain from such commercial/industrial activities and/or services rendered will be subject to complementary tax.

## Other taxes

### Value-added tax (VAT)

There is no VAT regime in Macau.

### Property tax

Property tax is imposed annually on the owner of buildings situated in Macau. This is first payable after acquiring a property or upon the expiry of the property tax exemption period, if applicable. Different exemption periods are granted, depending on the location of the property. Additional exemption periods may apply in special cases.

For leased properties, property tax is charged at 10% (16% prior to the tax year 2010) on the actual rental income, and by application, a maximum deduction based on 10% of the rental income derived to cover repair and maintenance expenses incurred will be granted, if approved by the MFB.

For self-use properties, property tax is charged at 6% (10% prior to the tax year 2010) on the official rateable value as established by the appointed committee of the MFB. A deduction of 10% of the official rateable value to cover repair and maintenance expenses will be automatically granted for self-use property. If the property is not occupied, the owner can apply for an exemption from property tax, the approval of which is entirely at the discretion of the MFB.

According to the 2011 Approved Budget, there is a standard MOP 3,500 reduction in the property tax liabilities assessed in the tax year 2011 for both self-used and rental properties.

Effective from 8 March 2011, the surcharge of 5% that was previously levied on property tax payable has been abolished.

# Macau

### *Annual industrial tax*
The annual industrial tax has been exempted for the tax year 2011 and has been exempted on an annual basis by the Macau Government since 2002.

Under the Industrial Tax Code, all commercial or industrial operations carried out in Macau are subject to industrial tax at the beginning of each year. The amount of the tax is dependent upon the nature of the business. The table below is an illustration of the tax amounts applicable to certain types of businesses in Macau.

| Type of business | Tax (MOP) |
|---|---|
| Commercial banks | 80,000 |
| Construction companies | 500 |
| Hotels | 500 |
| Insurance companies | 500 |
| Textile companies | 500 |

### *Special gaming tax*
Special gaming tax is levied at 35% on the gross gaming revenue derived by gaming concessionaires authorised to carry on the operation of games of chance in the Macau SAR under Law 16/2001.

### *Tourism tax*
Tourism tax is imposed at the rate of 5% on bill of services, excluding telecommunication and laundry services, and service charges of up to 10%, rendered in Macau by establishments such as hotels, guest houses, dancing halls, night clubs, massage/sauna parlours, gymnasium, karaoke, and the like. Such tax is generally borne by consumers.

Restaurants are exempt from tourism tax in the tax year 2011 and have been exempt, via an exemption published on an annual basis by the Macau Government, since 2002.

### *Consumption tax (excise duty)*
Consumption tax is imposed only on tobacco and spirits entering into Macau.

There are two methods for determining the amount of consumption tax payable, by quantity or by value. The former method of assessment is based on the weight or volume of goods and the latter is based on the price of the goods imported into Macau. The rate of consumption tax varies depending on the classification of the imported goods.

### *Customs duties/import tariffs*
Apart from consumption tax imposed on tobacco and spirits entering into Macau, there are no customs duties/import tariffs in Macau.

### *Motor vehicle tax*
Motor vehicle tax is imposed on the sale of new motor vehicles to consumers and the importation of new motor vehicles for self-use. Exemptions are available to certain persons and organisations and for certain specific usages. Generally, motor vehicle tax is levied based on the listed selling prices as registered with the MFB. The rate of motor vehicle tax varies depending on the type of motor vehicle and its value.

### Stamp duty
Stamp duty is payable on certain types of documents and stampable transactions at a small fixed amount or at rates ranging from 0.1% to 10% on the value represented by the documents and transactions.

The charge to stamp duty has been extended to property transfers and the irrevocable transfer of certain assets. Stamp duty at progressive rates ranging from 1% to 3% is payable on transfer of immovable property with a surcharge of 5% on the duty payable, resulting in effective stamp duty rates of 1.05% to 3.15%. The irrevocable transfer of certain assets without consideration is subject to a 5% stamp duty.

Insurance policies written or renewed and banking transactions have been exempt from stamp duty since 2005. This exemption will continue to be available in the tax year 2011.

Admission tickets for performances, exhibitions, and any kind of entertainment programmes has been exempted from stamp tax for the tax year 2011. This exemption, if extended, will be published by the Macau Government on an annual basis.

### Land rent
According to the 2011 Approved Budget, land rent below MOP 100 shall not be collected by the MFB in the tax year 2011. However, any such amount already collected shall not be refunded.

## Branch income

Branch income is subject to tax at the same rate as that for corporations. The taxable income is ascertained based on branch accounts.

## Income determination

The paragraphs below describe the tax acceptable treatments under the prevailing Complementary Tax Law and are for reference only.

### Inventory valuation
Inventory should be stated at actual cost, and conformity between book and tax reporting is required. Market selling price or replacement cost is allowed only in special circumstances, and prior approval of the Director of the MFB is required for adoption of such inventory valuation methods. The write-down of inventory values is not permitted.

### Capital gains
Gains or losses from the realisation of capital assets of a corporate taxpayer are treated as current revenue or expense items for complementary tax purposes.

### Dividend income
Dividends from all sources are subject to complementary tax in the hands of a recipient incorporated in Macau unless the dividends were paid out of profits that have been taxed at the corporate level in Macau. Where dividend to shareholders is paid out of profits of a Macau entity that have not been taxed in Macau, complementary tax will technically be charged on the dividend distribution to the shareholders, except for distribution of tax exempt profits of approved offshore institutions, where complementary tax, in practice, has not been charged by the MFB to date.

### *Foreign income*
Companies incorporated in Macau are subject to complementary tax on worldwide income, wherever received or credited. Currently, double taxation relief is available under the respective avoidance of double taxation agreements/arrangement that Macau has with Portugal, the People's Republic of China, and the Republic of Mozambique.

## *Deductions*

Please note that the assessor is empowered to disallow any business expenses (e.g. entertainment, travelling) where the amount incurred is considered to be excessive.

### *Depreciation*
An initial allowance of 20% is granted on buildings. The rates of tax depreciation are detailed in Decree-Law No.4/90/M, dated 5 March 1990. The Decree-Law prescribes the maximum annual tax depreciation rates and the number of years of asset life for different asset classes under the straight-line method. For illustration, the maximum depreciation rates and the maximum useful life currently applicable to the general types of assets are set out below.

| Assets | Maximum annual percentage rate (%) | Maximum number of years |
|---|---|---|
| Industrial buildings | 4 | 50 |
| Office and residential buildings | 2 | 100 |
| Machinery and installations, air conditioning, elevators, equipment | 10 to 20 | 20 to 10 |
| Tools | 20 to 33.3 | 10 to 6 |
| Laboratory, telex and interior telephone equipment, furniture, filing systems, typewriters, and accounting machines | 16.66 to 25 | 12 to 8 |
| Computer hardware | 25 | 8 |
| Office installations | 14.29 | 14 |
| Trucks | 14.29 | 14 |
| Automobiles | 20 | 10 |
| Intangible assets, pre-operating expenses incurred prior to commencement of business | 33.33 | 6 |
| Deferred expenses arising in connection with increases in share capital, changes in form of business enterprises, issuance of debentures, marketing and other studies, and financial expenses incurred for the acquisition or own production of fixed assets prior to completion | 33.33 | 6 |
| Patents | 10 | 20 |
| Manufacturing licences, concessionary agreements, and similar rights | * | * |
| Trademark | * | * |

* At the discretion of the authorities.

In the case of commercial and industrial buildings, depreciation is not allowed for the value attributable to the cost of the freehold land. Where the value of the freehold land cannot be determined from the total cost of land and buildings, a portion equal to 20%

is deemed to be attributable to the land value for the purpose of determining the value of buildings to be depreciated.

Depreciation can be claimed either on a prorated basis in accordance with the prescribed annual rates for assets that are not acquired at the beginning of the financial year or on an annual basis.

The cost of repairs and maintenance exceeding 10% of the acquisition cost of the asset in a given year is deemed to be an expense of a capital nature and should be capitalised and depreciated over the remaining life of the asset.

### *Bad debts*
The amount provided against doubtful trade receivables is an allowable tax deduction, but the provision cannot exceed 2% of the total receivables, except in the case of banks, where the minimum provisions required under the local banking regulations are fully tax-deductible.

Debts considered uncollectible may be written off only when adequate proof can be shown, usually by way of bankruptcy court proceedings.

### *Charitable contributions*
A deduction of up to 0.2% of the company's turnover is allowable for donations to charitable organisations recognised by the tax authority.

### *Pension expenses*
The employer's contribution to the staff provident fund legally registered in Macau is fully tax-deductible up to 15% of the employees' basic salary.

### *Fine and penalties*
Tax fines are not deductible.

### *Other significant items*
- An amount provided against stock obsolescence of up to 3% of the total stock value at year-end is allowed as a tax deduction.
- Losses arising from insurable risks are not allowable as a tax deduction.
- Staff social welfare expenses paid for the benefit of employees, for example canteens and libraries, are fully tax-deductible.

### *Net operating losses*
Agreed tax losses can be carried forward for three consecutive years for Group A taxpayers. Group B taxpayers are not allowed to carry their tax losses forward to future years. Tax losses cannot be carried back in Macau.

### *Payments to foreign affiliates*
The regulations make no specific mention of royalties, interest, and service fees paid to foreign affiliates. The MFB generally monitors the deductibility of such payments. Payments to foreign service providers for consulting services or construction-related services are not deductible if such consulting contracts are not properly registered in Macau.

## *Group taxation*

There is no provision for group taxation in Macau.

### Transfer pricing
There is no transfer pricing provision in the Macau tax regime.

### Thin capitalisation
There is no thin capitalisation provision in the Macau tax regime.

## Tax credits and incentives

### Capital investment incentives
A 50% reduction in complementary tax and stamp duty on certain transactions, as well as exemptions from annual industrial tax and property tax (up to periods prescribed by the MFB), are allowable for taxpayers in the manufacturing industry (as defined in the Decree Law) whose capital investment is aimed at the introduction of new products or high technology, improvement of productivity, and increase in exports of goods to new markets.

Where profits are retained in reserves and reinvested in installation of new equipment within the following three financial years, the reinvested reserves can be deducted from taxable profits, provided that the reinvested reserves are attributable to profits earned from normal business operations and the investment is considered to be beneficial for the economic development of Macau.

### Offshore services business incentives
Profits derived by approved offshore institutions from prescribed offshore service-related activities are exempt from all forms of taxes, such as complementary tax, annual industrial tax (currently exempt for all taxpayers), and stamp duties. By application, the executives, staff at a supervisory level, and/or specialised technicians who have obtained a residency permit in Macau are exempt from professional tax for three calendar years from the date the exemption application is approved.

### Incentives for owners of touristic facilities
Additional incentives such as an extended property tax exemption period, exemption from annual industrial tax, reduction in stamp duty, as well as acceleration of depreciation for complementary tax purposes are available to owners of facilities that qualify as touristic facilities.

### Foreign tax credit
There is no foreign tax credit provision in the Macau Complementary Tax Law. Foreign tax credit is only available under the relevant provisions of the comprehensive tax arrangement/agreements that the Macau SAR has entered into with the PRC, Portugal, and the Republic of Mozambique respectively.

## Withholding taxes

Currently, there is no provision in the Macau Complementary Tax Law for the withholding of taxes from payments made by domestic corporations to overseas companies.

## Tax administration

### Returns

The Macau tax year is on a calendar-year basis.

Assessments are made by the MFB upon review of the tax returns, which must be lodged before 31 March or 30 June of each year for Group B or Group A taxpayers, respectively.

### Payment of tax

A provisional tax payment calculated based on the declared taxable profit for a Group A taxpayer or final assessed profits for a Group B taxpayer is payable in two equal instalments in September and November. However, if the amount is not greater than MOP 3,000, payment will be requested in one lump sum amount in September. For Group A taxpayers, a final tax assessment will be issued upon the completion of tax assessment by the MFB.

### Statute of limitation

The statute of limitation period is five assessment years from the relevant year of assessment for both Group A and Group B taxpayers.

### Exchange of information

Law 20/2009 is the legislation that governs the exchange of information by the Macau SAR with other tax jurisdictions within the scope of bilateral tax treaties or arrangements. Its objective is to promote the transparency of the Macau tax administration and to demonstrate the Macau SAR's willingness to cooperate with treaty partners in combating tax avoidance or tax evasion activities.

The information to be exchanged under Law 20/2009 is strictly confined to information collected for tax purposes only, and includes the following:

- Information collected within the jurisdiction of the MFB.
- Information collected by the MFB from financial institutions that are governed by the Macau Financial System Act and offshore institutions that are governed by the Macau Offshore Law (the Institutions).

At present, the only bilateral tax arrangements/treaties entered into by the Macau SAR which have come into effect are with the PRC, Portugal, and the Republic of Mozambique. The bilateral tax treaties/tax information exchange agreements (TIEAs) entered into by the Macau SAR with Belgium, the Republic of Cape Verde, the Kingdom of Denmark, the Faroe Islands, the Republic of Finland, Greenland, Iceland, the Kingdom of Norway, and the Kingdom of Sweden will be effective upon completion of the necessary ratification procedures by the respective parties.

In response to the OECD's request for cooperation in combating tax avoidance or evasion activities, and to prevent the Macau SAR from being viewed as a tax haven, it is believed that more comprehensive tax arrangements/treaties or TIEAs will be signed between the Macau SAR and other tax jurisdictions in the near future.

As the information of a Macau taxpayer is becoming more transparent under comprehensive tax arrangements/treaties or TIEAs, it is important for Macau companies with cross-border transactions to perform periodic tax health checks to ensure that tax planning arrangements, if any, that have been put in place in the past, remain technically defensible. As Macau offshore companies continue to be a focus of investigations for many tax jurisdictions, it is important to ensure that such companies have adequate commercial substance in Macau and the companies' transfer pricing policies are supported by appropriate transfer pricing documentation and transfer pricing studies.

## *Other issues*

### *Choice of business entity*

An investor conducting business in Macau is obligated to set up a legal establishment, which could be in the form of a company or a branch.

There are two types of Macau companies: companies limited by shares and companies limited by quotas. The capital and corporate governance requirements for a company limited by shares are higher than a company limited by quotas, and in general, a company limited by quotas is used by investors that are not in regulated industries.

## Significant developments

The amendments of the Corporate Income Tax Law in 2010 and 2011 introduced significant developments in respect of corporate income tax (CIT). As of July 2010, the distribution of profit to resident legal persons is exempted from CIT. As of 16 April 2011, the understated revenues and 'hidden profit distributions' are subject to CIT on an annual basis. Most of the previous temporary differences for tax purposes, such as depreciation and long-term provisions, are not taxable. Thin capitalisation and transfer pricing regulations were amended as well.

The period for submission of VAT returns and payment of VAT was extended from the 15th day after the end of the VAT period to the 25th day. Furthermore, the new cap for mandatory VAT registration was set at 2 million denari (MKD) instead of MKD 1.3 million.

Under the amendments to the Customs Act, taxpayers may engage in customs procedures only as approved or licensed agents by the Customs Administration.

A procedure for education of the taxpayer was introduced in the Tax Administration Law as a transitory phase prior to imposing certain tax penalties by the Public Revenue Office.

## Taxes on corporate income

Generally, all resident and non-resident companies operating through a permanent establishment (PE) are liable to pay CIT in Macedonia.

Macedonian resident entities are taxed on their worldwide income. Non-resident entities are taxed on their Macedonian-source income. Non-business organisations (including governmental bodies) are taxed on income from their business activities.

The CIT rate is 10%.

There are two separate tax bases for CIT which are subject to filing of two separate tax returns.

The first tax base is the sum of taxable expenses and understated revenues decreased by any available tax credits and tax reliefs. In this case, tax is payable on an annual basis regardless of whether the corporate taxpayer incurs profit or loss.

The second tax base is the amount of dividends or other type of profit distributions by the taxpayer in monetary or non-monetary form. Under recent amendments, the definition of 'other type of profit distributions' was extended to cover also the increase of registered capital as a result of asset revaluation as well as payments from profit to shareholders, members of managing bodies, and employees, based on the taxpayer's decision.

As of July 2010, distribution of profit to resident legal persons is exempted from CIT. Therefore, only distributed profit to individuals (foreign or domestic residents) or to non-resident legal entities is taxable.

Taxpayers are obliged to cover the losses from previous years prior profit distribution. The distributed amount is taxed at the moment of payment. Upon each profit distribution, a corporate taxpayer is obliged to submit a tax return containing information for the dividend beneficiary and the year from which the profit to be distributed arises. If the profit arises prior to 2009, CIT is not payable.

Undistributed profit is tax exempt. Undistributed profit is determined in accordance with the accounting regulations and standards decreased by the amount of CIT paid on taxable expenses and understated revenue.

## *Corporate residence*

A company is resident in Macedonia for tax purposes if it is established or maintains its headquarters in the territory of Macedonia. Foreign legal entities with headquarters abroad are non-residents for tax purposes, but their Macedonian branches are liable for tax on any profit generated in the territory of Macedonia.

### *Permanent establishment (PE)*

Generally, a PE is a fixed place of business through which the business of an enterprise is wholly or partly carried on, either directly or through a dependent agent.

More specifically, the domestic law provides that a PE may include a place of management, a branch office, an office, a factory, a workshop, mining activities, or any other place of extraction of natural resources.

A building site or construction or installation project, as well as related supervision activities, may constitute a PE if it lasts longer than six months.

Furthermore, the provision of services, including consulting services with regard to one or several related projects, is deemed to give rise to a PE if such activities last longer than 90 continuous days within any 12-month period. According to recent amendments effective as of April 2011, if one or several persons establish a PE as per above, any other non-related project on which they are working on becomes part of the PE irrespective of its duration.

The amendments also prescribe that the PE should be registered as a corporate tax payer at the beginning of its activity in the country for the purposes of obtaining a tax number. However, this provision seems to contradict the Companies Law requirement, which states that if operating in Macedonia, the foreign companies are obliged to establish at least a branch in the country. Therefore, it should be further clarified whether tax registration of a PE shall be possible without establishment of a legal form as per the Macedonian Companies Law.

## Other taxes

### Value-added tax (VAT)

In general, the VAT regulations are in line with the provisions of the sixth European Union (EU) VAT directive.

The standard VAT rate is 18%. This rate applies to overall turnover and imports of goods and services. A lower rate of 5% applies to supplies of certain goods, including food, drinking water from public supply systems, computers and software, agricultural material and equipment, pharmaceutics and medical equipment, and publications such as books, pamphlets, newspapers, and other printed material, except for publications mainly used for advertising purposes.

As per recent amendments, all taxpayers whose total turnover exceeded MKD 2 million or whose total supplies, as projected at the beginning of the business activity, will exceed this amount, are liable to register for VAT purposes.

Residents that do not meet the criteria above may voluntarily register for VAT purposes at the beginning of each calendar year.

The standard VAT period is one calendar month. However, if the total turnover in the previous calendar year did not exceed MKD 25 million, the tax period is the calendar quarter. The tax period for voluntarily VAT registered taxpayers is the calendar year.

A taxpayer is obliged to submit a VAT return for each tax period within 25 days following the end of the relevant tax period.

### Customs duties

Customs duties generally apply to most products imported into Macedonia. The customs rates under the most favoured nation treatment for agricultural products in 2011 are up to 31%, whereas the customs rates for industrial products are below 23%.

Macedonia has signed trade agreements with Turkey, Ukraine, and European Free Trade Association (EFTA) member states. The country is a member state to the Central European Free Trade Agreement (CEFTA) and has signed a Stabilisation and Association Agreement with the European Community.

The import of industrial products with preferential origin is custom duty exempt as of 2011.

According to the Stabilization and Association Agreement 2001 between Macedonia and the European Union, generally, products with Macedonian origin can be exported into EU countries free of customs duties.

### Stamp taxes

Stamp taxes are not payable in Macedonia.

### Excise duties

Excise duties are levied with respect to a limited number of goods produced or imported in Macedonia. Petroleum products, alcohol and alcoholic beverages, tobacco products, and passenger motor vehicles are subject to an excise duty at a flat or percentage rate. The excise period is one calendar month, and excise duty is payable within 15 days as of the end of the calendar month. The excise duty for alcohol beverages and tobacco goods is levied by way of purchasing excise stamps.

The excise duty for petroleum products is payable per kilo/litre and ranges between MKD 0.1 and MKD 24.

Alcohol and alcoholic beverages are taxable per litre/percentage of alcohol. Some categories of alcoholic beverages (e.g. wine) are subject to no excise duty. Maximum excise duty payable is up to MKD 300 per litre pure alcohol.

The excise duty for tobacco products is combined and is calculated both per peace/kilo and as a percentage from the retail price as follows:

- MKD 1.35 per cigar and 0% from its retail price.
- MKD 0.10 per cigarette and 35% of from its retail price.
- MKD 1,350 per kilo smoking tobacco and 0% from its retail price.

The excise duty for passenger motor vehicles is calculated as a percentage of the market value or the custom value of the vehicle. It ranges from o% for vehicles valued up to EUR 3,000 to 18% for vehicles valued above EUR 30,000.

### *Property tax*
Property tax is paid on the ownership of real estate, including land (agricultural, construction, forest, and pastures) and buildings (residential buildings or flats, business buildings and business premises, administrative buildings and administrative premises, buildings and flats for rest and recreation, and other construction facilities, as well as installations constructed on the buildings or below and permanently attached to the buildings).

The person liable for property tax is the legal entity or the individual owner of the property. If the owner is not known or cannot be reached, the person liable for property tax is the user of the property. A property taxpayer may also be the taxpayer who usufructs the property; and if the property is owned by several persons, each of them is a property taxpayer proportionately for the portion owned. A property taxpayer is also the legal entity who uses real estate owned by the state and the municipality.

The property tax base is the market value of the real estate. The market value of the real estate is determined by a special municipal commission in accordance with the methodology prescribed by the Government.

Property tax rates are proportional and range from 0.10% to 0.20%. The rates may be determined on the basis of the type of the property. As an exception, property tax rates on agricultural land not used for agricultural production may be increased outside the above range (i.e. from three to five times in relation to the basic rates).

The amount of the rates is decided by the Municipal Councils.

### *Transfer tax*
The transfer of the right to ownership of real estate for or without compensation, as well as other means of acquiring real estate for or without compensation, between legal entities is subject to transfer tax.

The person liable for transfer tax is the seller of the real estate. As an exception, a taxpayer may also be the buyer of the real estate, if agreed in the sale and purchase agreement. When replacing real estate, the taxpayer is the party that replaces the real estate of greater value.

When selling real estate in bankruptcy and executive procedure, as well as when realising agreements on mortgage, the taxpayer may be the buyer of the real estate.

In the case of transfer of ownership of an ideal share in real estate, taxpayers are each of the owners separately.

The tax base is the market value of the real estate at the moment the tax liability arises.

When replacing real estate, the tax base is the difference between the market values of the real estate being replaced.

When selling real estate in bankruptcy and executive procedure, the tax base is the attained selling price.

The market value is determined by a special municipal commission in accordance to the methodology prescribed by the Government.

Tax rates are proportional and range from 2% to 4%. The tax rates are determined by the municipal councils by way of decision.

### *Garbage collection fee*

A garbage collection fee is payable for immovable property depending on the type of property and on the surface area used. It is calculated on the basis of a tariff. It is collected together with the bills for water usage.

Companies and individuals are liable for paying communal taxes for usage of certain rights and services (mainly for usage of the urban space in the municipalities, posting commercials, etc.).

## *Branch income*

Branch offices are registered in the Trade Registry. Branches are subject to CIT in accordance with the general statutory provisions. The foreign parent company is fully liable for the obligations of its established branch office in Macedonia.

A foreign company that is entitled to carry out commercial activities pursuant to its national legislation may establish a commercial representative office in Macedonia. Representative offices are not legal entities and may not carry out any commercial activities. Representative offices are not subject to CIT.

## *Income determination*

Capital gains, as well as income from dividends, interest, rent, and royalties are treated as ordinary income of the taxpayer and are included in its general taxable base in accordance with accounting rules and standards. Since the accounting profits of a company are not taxable until distributed to individuals and non-resident legal entities, such income is not subject to CIT before that time.

### *Inventory valuation*

As of 16 April 2011, the provisions in the tax legislation regarding inventory valuation were abolished. Prior to 16 April 2011, corporate taxpayers were restricted to value inventories for tax purposes in accordance to the weighted average price method.

## Deductions

### Tax base on taxable expenses and understated revenues
The CIT Law exhaustively lists the expenses which are not recognised for tax purposes and are part of the tax base on taxable expenses and understated revenues.

### Hidden profit distribution
Under the new amendments to the CIT Law effective as of 16 April 2011, hidden profit distributions are taxable as part of the tax base on taxable expenses and understated revenues. The following transactions with shareholders or their related parties are considered as hidden profit distribution subject to CIT:

- Sales of goods/services on terms below the market price.
- Purchase of goods/services on terms above the market price.
- Providing loans with an interest lower than the market one.
- Arrangements under which gains are realized by the shareholders or their related parties.

Unjustified shortages are also taxed as hidden profit distribution if not reimbursed from the salary of the authorised person.

Some of the transactions as per above may be regulated under the transfer pricing provisions in the CIT Law as well. It seems that the purpose of this provision was to tax the non-fair transactions with shareholders and their related parties which do not fall under the 'related-party' definition as per the CIT Law.

### Non-business-related expenses
Expenses which are not related to the business activity of the taxpayer are taxable.

### Depreciation
As of April 2011, corporate taxpayers can apply depreciation methods and rates as well as perform impairment of their fixed assets under applicable accounting standards without any tax consequences.

Prior to the amendments, the depreciation of intangible and tangible assets was not taxable up to the amount calculated on the acquisition value of such assets, by applying depreciation rates within the limits set by the law. Once determined, the depreciation method was used until the final depreciation of the asset or group of assets.

### Interest expenses
Interest paid on non-business related credits of the taxpayer as well as interest on credits for purchase of passenger vehicles, furniture, carpets, works of art, and decorative objects is a taxable expense. Interest on business-related credit is also taxable provided it falls under the thin capitalisation or transfer pricing rules *(see Thin capitalisation or Transfer pricing in the Group taxation section for more information)*.

### Compensation expenses
Employees' related expenditures (e.g. organised transportation to/from work, organised food (cantina), business trip allowance, field allowance, family separation allowance, one-off severance payment, retirement allowance, annual holiday allowance, anniversary awards) are taxable if paid over the amount prescribed by law and collective agreement.

Voluntary pension insurance contributions are taxable if their annual amount per employee exceeds four average monthly gross salaries paid out in the previous calendar year.

The monthly allowances and expenses to the managing board members are tax-deductible up to 50% of the average gross monthly salary paid out in the country in the previous year.

### Insurance expenses

Personal insurance premiums paid for members of the management board and the employees (if not paid out of their salary) are taxable expenses. Only the collective insurance of the employees for work related injuries is a non-taxable expense for corporate taxpayers.

### Representation expenses

Expenses for gifts, business dinners, recreation, and entertainment are taxable expense up to 90% of the annual amount borne by the taxpayer.

### Shortages and scrapping

Expenses for shortages and scrapping exceeding the standards for the particular industry or the particular taxpayer are taxable if not caused by vis major or an uncontrollable event.

### Impairment and write-off of receivables

Impairment of receivables is not taxable for banks, saving institutions, and insurance companies if impaired in accordance to the methods prescribed by law. As to other corporate taxpayers, impairment of receivables is a taxable expense if not based on an effective court decision or reported and confirmed as debts in liquidation or bankruptcy procedure. The taxpayers are entitled to a tax credit for the tax paid on collected impaired receivables in the year of collection.

Write-off of receivables is a taxable expense for all corporate taxpayers.

### Charitable contributions

Donations and sponsorships expenses are taxable if not pursuant to the manner, the conditions, and the procedure set forth in the Law on Donations and Sponsorships in Public Activities. If compliant with the law requirements as per above, donations are taxable if the annual amount borne by the taxpayer exceeds 5% of its overall revenue, whereas sponsorship expenses are taxable if above 3% of the overall revenue of the taxpayer.

### Fines, penalties, and taxes

Fines and tax penalties, penalty interest paid for public duties, expenses for enforced payments, and withholding tax (WHT) borne by the taxpayer on behalf of third parties are taxable.

### Net operating losses

Loss carryforwards are not specifically regulated in the Macedonian tax legislation. However, due to the concept of corporate income taxation of distributed profit, in essence, accounting losses could be carried forward indefinitely. This is because of the fact that profit can be distributed only if losses from previous years are covered.

Loss carrybacks are not allowed under the Macedonian tax legislation.

M

### *Tax losses on taxable expenses and understated revenues*
According to the new amendments introduced in April 2011, tax losses arising from taxation of taxable expenses and understated revenues could be carried forward in the next consecutive five years. Such tax losses are recognised when the tax credit and reliefs exceed the amount of taxable expenses in the tax return on taxable expenses and understated revenues.

### *Payments to foreign affiliates*
There are no specific provisions in the tax legislation with regard to payments towards foreign affiliates.

## *Group taxation*

Tax consolidation provisions were abolished in Macedonia as of 1 January 2009.

### *Transfer pricing*
According to the amendments effective as of 16 April 2011, the transfer pricing provisions are extended to cover not only the expenses but also the revenues resulting from related party transactions.

The difference between the market price and the transfer price is a taxable expense in the tax return on taxable expenses and understated revenues. As of April 2011, the cost plus method in addition to the comparable uncontrolled price method would be applicable. No reference is made to other methods accepted by the Organisation for Economic Co-operation and Development (OECD).

The part of the interest paid on loans to related parties which exceeds or is below the interest payable between unrelated parties is considered taxable.

Penalty interest imposed between related parties shall be considered as a taxable expense.

Transfer pricing rules do not apply on expenses for interest under credits and penalty interest paid to related parties which are banks or financial institutions.

### *Thin capitalisation*
Significant changes were introduced in the thin capitalisation rules as of April 2011. According to the amendments, interest is taxable if the credit received from a non-resident shareholder who directly holds at least 25% of the capital in the company exceeds the amount of three times its share in the equity in the company during a tax period. Thin capitalisation rules will not apply to loans received from banks or other financial organisations. Also, thin capitalisation rules will not apply for newly established companies within the first three years of operation.

Prior the amendments, thin capitalisation rules applied to all taxpayers irrespective of the years of business operation and with regard to all shareholders who held at least 25% of the taxpayer's capital irrespective of their residence or type of business activity.

## Tax credits and incentives

### Foreign tax credit
The taxpayer is allowed a tax credit for the tax paid on foreign income abroad up to the amount of tax payable for that income in Macedonia. The WHT on dividends and CIT paid abroad could be credited against the corporate tax liability on profit distribution. The foreign WHT paid on other types of income except dividends could be credited against the corporate tax liability on taxable expenses and understated revenues.

### Technological industrial development zones
A taxpayer that is a registered user within a technological industrial development zone is exempt from profit tax payment for a period of ten years from the commencement of the performance of the activity in the zone under terms and conditions and according to a procedure determined with the Law on Technological Industrial Development Zones.

### Simplified tax regime for small companies
Companies that perform economic activity (except banking, financial, and insurance activities, and games of chance and entertainment games) and have not earned overall revenue from any source exceeding MKD 3 million on an annual level in any of the previous three years (including the year of assessment) may calculate and pay annual tax on total revenue in the amount of 1% of the amount of earned total revenue presented in the annual income statement for the calendar year.

## Withholding taxes

All domestic legal entities and domestic physical persons that are registered for carrying out an activity, as well as foreign legal entities or physical persons that are non-residents but have a PE in Macedonia, are obliged to withhold tax when paying certain types of income to a foreign legal person and to pay the tax withheld to a respective suspense account simultaneously with the payment of the income.

The WHT rate is 10% and is applied on the following forms of incomes payable abroad:

- Dividends.
- Interest.
- Royalties.
- Income from entertainment or sporting activities in Macedonia.
- Income from management, consulting, financial services, or services related to R&D.
- Income from insurance or reinsurance premiums.
- Income from telecommunications services between Macedonia and a foreign country.
- Income from the lease of immovable property in Macedonia.

As an exception, WHT is not applicable to the following forms of income:

- The after-tax profit of a PE transferred to its foreign headquarters.
- Interest from bonds issued or guaranteed by the government.
- Interest on deposits in banks located in Macedonia.
- Income from transactions in state securities on the international financial markets.

If a double taxation avoidance agreement is in place, WHT shall be payable in accordance with the treaty provisions. Taxpayers are obliged to obtain approval from the Macedonian tax authorities prior to applying the tax rates from the double tax treaty (DTT).

Macedonia has signed DTTs with the 37 countries listed in the chart below:

| Recipient | Dividend (%) | Interest (%) | Royalties (%) | Other income (%) |
|---|---|---|---|---|
| Albania | 10 | 10 | 10 | 0 |
| Austria (1) | 0/15 | 0 | 0 | 0 |
| Belgium (2, 9) | 10/15 | 15 | 10 | 0 |
| Belgium (1,4) | 5/15 | 10 | 10 | 0 |
| Belarus (2) | 5/15 | 10 | 10 | 0 |
| Bulgaria (2) | 5/15 | 10 | 10 | 0 |
| China | 10 | 10 | 10 | 0 |
| Croatia (2) | 5/15 | 10 | 10 | 0 |
| Czech Republic (2) | 5/15 | 0 | 10 | 0 |
| Denmark (2, 3) | 0/5/15 | 0 | 10 | 0 |
| Egypt (4) | 10 | 10 | 10 | 0 |
| Estonia (2) | 0/5 | 5 | 5 | 0 |
| Federal Republic of Yugoslavia (2, 5) | 5/15 | 10 | 10 | 0 |
| Finland (1) | 0/15 | 10 | 0 | 0 |
| France (1) | 0/15 | 0 | 0 | 0 |
| Germany (1) | 5/15 | 5 | 5 | 0 |
| Hungary (2) | 5/15 | 0 | 0 | 0 |
| Ireland ( 6) | 0/5/10 | 0 | 0 | 0 |

Notes

1. The lower rate applies to dividends paid out to a foreign company, which controls at least 10% of the share capital of the payer of the dividends.

2. The lower rate applies to dividends paid out to a foreign company, which controls at least 25% of the share capital of the payer of the dividends.
3. The zero rate applies to dividends paid out to pension funds.
4. These DTTs are still not in force.
5. The DTT with Federal Republic of Yugoslavia now applies both to Serbia and Montenegro.
6. The zero rate applies to dividends paid out to recognised pension funds and to foreign companies which continuously control at least 25% of the share capital of the payer of the dividends for 12 months before the dividends payment. The 5% rate applies to dividends paid out to foreign company which controls at least 10% of the share capital of the payer of the dividends. The 10% rate applies to dividends paid out in all other cases.
7. Interest arising in the contracting state, borne and paid by its government or its central bank to the government or to the central bank of the other contracting state, shall be exempt from tax in the first mentioned state.
8. The tax rate of 10% for royalties payments applies only for utilisation or right to utilise cinematographic films and films or tapes for radio and television transmission. The 5% rate applies on all other cases.
9. The DTT concluded between the Socialist Federal Republic of Yugoslavia (SFRY) and Belgium is still applicable for Macedonia.
10. The zero rate applies to dividends paid out to pension schemes and to foreign companies which continuously control at least 25% of the share capital of the payer of the dividends for 12 months before the dividends payment. The 5% rate applies to dividends paid out to foreign company which controls at least 10% of the share capital of the payer of the dividends. The 15% rate applies to dividends paid out in all other cases.

## *Tax administration*

### *Returns*

The taxable period for which CIT is determined covers one calendar year.

Taxpayers are obligated to calculate and pay CIT on taxable expenses and understated revenues on the basis of a tax return on taxable expenses and understated revenues which must be submitted to the Public Revenue Office by the end of February the following year.

Taxpayers who distribute profit are obliged to calculate and pay CIT on the basis of a tax return on profit distribution, which should be submitted to the tax authorities up to the date of profit distribution.

Small taxpayers who fall under the simplified tax regime are obliged to calculate and pay the tax due on the basis of a tax return on overall income which should be submitted to the tax authorities up to 31 May the following year.

### *Payment of tax*

Corporate taxpayers are obliged to pay monthly CIT advance payments during the year within 15 days of the end of each month.

Monthly CIT advance payments are calculated as one-twelfth of the tax obligation on taxable expenses and understated revenues for the previous calendar year increased by the index of cumulative retail price growth as determined by the State Statistical Bureau.

The difference between the advance payments and the final CIT liability as determined in the tax return on taxable expenses and understated revenues should be paid within 30 days as of the dead-line for submission of the tax return on taxable expenses and understated revenues. Daily penalty interest of 0.03% is due on late tax payments.

In case the sum of monthly advance payments exceeds the final tax liability in the tax return on taxable expenses and understated revenues, the taxpayer may request for a refund of overpaid tax. The tax should be refunded within 60 days as of the date of submitting the request. If the taxpayer does not ask for a tax refund, the overpaid amounts will be considered as advance payment for the following period.

## *Other issues*

### *Choice of business entity*

The Macedonian Trade Companies Law provides for the following types of entities:

- General partnerships.
- Limited partnerships.
- Limited liability companies.
- Joint stock companies.
- Limited partnerships by shares.
- Foreign business entities may register a branch office or a representative office in Macedonia.

## Significant developments

The corporate tax rate decreased from 23% in 2010 to 22% in 2011.

## Taxes on corporate income

A corporate entity registered in Madagascar and having an annual turnover exceeding 20,000,000 Malagasy ariary (MGA) is subject to corporate income tax (CIT) at a rate of 22%. Note that the CIT rate was 23% in 2010.

The tax payable cannot be less than 5/1,000 of turnover plus a fixed amount of MGA 100,000 for taxable persons carrying on agricultural, artisan, transportation, industrial, hotel, or mining activities. The minimum tax cannot be less than 5/1,000 of turnover plus MGA 320,000 for other activities.

Revenue of foreign businesses that do not have a permanent establishment in Madagascar is subject to withholding income tax at a rate of 10% of any income realised in Madagascar.

## Corporate residence

Companies are considered resident in Madagascar if they are registered in Madagascar or have a legal existence in Madagascar. While there is no definition of permanent establishment in the Madagascar tax law, companies usually are required to have a legal existence when they carry out business in Madagascar or have revenue from ownership of assets in Madagascar.

## Other taxes

### Value-added tax (VAT)

VAT is applicable to all transactions realised in Madagascar by a VAT vendor. Services are considered to be performed in Madagascar if such services are used in Madagascar or invoiced to a taxpayer established in Madagascar.

Any corporate entity or individual person who realises an annual turnover exceeding MGA 200,000,000 is a VAT vendor. For a business realising annual revenue less than MGA 200,000,000, VAT vendor registration is an option.

A foreign company that has no PE in Madagascar but renders services to a Madagascar taxpayer must appoint a tax representative to collect and pay VAT on its behalf.

Otherwise, the beneficiary of the services must collect and pay VAT on behalf of the foreign supplier.

The VAT rate is 20%, and the VAT rate on export is 0%. VAT input is recoverable under certain conditions.

### *Registration fees*
Registration fees are applicable to transfers of title ownership (e.g. sales, donations) of movable and immovable assets, to transfers of interests, to share capital increases, and to lease agreements.

Registration fee rates are 0.5% to 6%, depending on the nature of the transaction.

### *Payroll tax*
Salary income taxes, called Impôt sur les Revenus Salariaux et Assimilés (IRSA), are levied at a rate of 22% on the total taxable remuneration of employees, including salaries, allowances, and benefits in kind. Employers are responsible for withholding and paying salary income taxes on behalf of employees.

### *Real estate ownership tax*
Real estate ownership tax is imposed annually at the rate of 5% to 10% on the rental value of the property. Land ownership is also taxable at a rate depending on the nature of the land.

### *Tax on insurance contracts*
All insurance or life annuity conventions concluded with a company, insurance firm, or with any other Madagascan or other insurer are subject to an annual tax on insurance contracts at a rate of 3% to 20% levied on the insurance premiums.

### *Social security contributions*
Employers must contribute to Caisse Nationale de Prévoyance Sociale, Madagascar's national social security fund, which includes pensions and accident insurance. The contribution is capped at 13% of eight times the legal minimum salary per employee.

### *Health contributions*
Employers must contribute to the health system assessment at a rate of 5% of the total amount of taxable remuneration of its employees.

### *Custom and import tax*
The importation of goods is subject to payment of custom and import tax payable to the custom office.

## *Branch income*

The tax on branch income is the same as for corporate income.

## *Income determination*

### *Inventory valuation*
There are no provisions for valuing inventories or determining inventory flows. The tax treatment will follow the accounting treatment.

### Capital gains
There is no provision for capital gains in Madagascar except for capital gains on the sale of real estate by an individual. Capital gains made by a company on the sale of assets and interests are considered as normal business income that is subject to normal income taxes.

### Inter-company dividends
Dividends received by a company are considered as business income subject to income tax. No withholding tax applies on payment of dividends.

### Stock dividend
Stock dividends are unusual, but they are considered as business income that is subject to income tax.

### Foreign income
Foreign income is considered as normal business income subject to income tax unless a tax treaty is established and indicates otherwise.

## Deductions

### Contingent liabilities
To be tax-deductible, provisions for doubtful debt must be subject to justification of existence of amicable or judicial settlement.

### Deductible wages
Salaries and wages that are not included in salary income taxes or not declared to Caisse Nationale de Prévoyance Sociale are not deductible.

### Depreciation
The amount of deductible depreciation should not exceed the amount that is calculated according to the rates of depreciation provided by the law:

- Industrial buildings: 5%.
- Plant and machinery: 10%.
- Mining exploration and development (licence): 33%.
- Transportation (car): 20%.
- Transportation (utility cars, vans, trucks): 25%.
- Computers: 25%.
- Electricity generators: 10%.

With the exception of buildings, it is also possible to practise a graduated depreciation. In this case, the annual depreciation corresponds to 30% of the net book value of the asset.

In case of loss, depreciation of assets can be deferred and carried forward to the next financial years until absorption.

### Fines and penalties
Fines and penalties are not deductible for income tax purposes.

### *Net operating losses*
Accumulated loss can be carried forward for the next five financial years following the period in which the loss occurs.

### *Payments to foreign affiliates*
For branches, the deductible amount of overhead that the head office can charge to the branch is limited to 1% of the turnover of the branch.

For interest on inter-company loans, only interest calculated on twice the amount of the share capital, at a rate practised by the Central Bank plus two points, is deductible.

### *Other significant items*
Third-party taxes borne by the company are not tax-deductible.

## *Group taxation*

There is no provision regarding group taxation in Madagascar.

## *Tax credits and incentives*

The following activities benefit from a special tax and /or customs regime.

### *Microfinance activity*
Microfinance benefits are available for entities specializing in lending money on the basis of small or medium scale value. Entities duly licensed to practise microfinance activities are exempt from income tax during the first five years. After this period, the microfinance company is subject to income tax at a rate of 22%.

### *Free zone (free trade zone)*
Free-zone law is available for industrial and other service providers that export all of their products. If eligible under the free-zone law, an income tax exemption is provided during the first two to five years and a reduced income tax of 10% thereafter. Exemption from customs duties on importation is also provided.

### *Big investment mining*
A mining company committing to invest more than USD 50,000,000 is considered a big investment mining company. The big investment mining law provides a minimum income tax exemption, a reduced income tax rate for the transformation entity (i.e. the entity in charge of processing the extracted minerals), exemption from custom and importation duties, and VAT reimbursement on locally purchased equipment and investments.

### *Petroleum code*
The petroleum code provides a custom and importation duties exemption for hydrocarbon research, exploration, and exploitation activities.

### *Leasing law*
The leasing law provides that leasing activities can benefit from income tax exemption and reduction of tax rate during the first four years.

## *Withholding taxes*

Withholding taxes (WHT) are levied as follow:

- Impôt sur les revenues des capitaux mobiliers (IRCM): WHT on interest of 22% is applicable on financial loan interest. However, interest paid to banks, financial institution, and foreign financial organisation is exempt.
- WHT of 22% is applicable on remuneration of a member of a board of directors or a single director.
- Income tax for non-resident entity: Management fees, royalties, technical and assistance fees, licence fees, equipment rental fees, and any income realised by foreign suppliers is subject to withholding income tax at a rate of 10%.

Madagascar has signed two tax treaties.

| Recipient | Loan interest | Royalties, management fees, services fees | Dividend |
|---|---|---|---|
| No tax treaty | 22% | 10% | 0% |
| France | 15% | 15% (max) | 15% (max) |
| Mauritius | 10% | 5% | 10% (max) |

## *Tax administration*

Corporate income tax is payable bi-monthly in provisional instalments. The balance is payable before 15 May each year for companies whose financial year ends at 31 December, and before 15 November each year for companies whose financial year ends at 30 June.

Withholding tax on foreign services is payable to the tax authorities within one month of the date of payment.

Withholding tax on interest and on payments to members of boards of directors are payable at 15 May or 15 November, depending on the financial year-end.

# Malawi

## PwC contact

Misheck Msiska
PricewaterhouseCoopers
1st House
Corner Glyn Jones Road and Chilembwe Avenue
Blantyre, Malawi
Tel: +265 1 820 322
Email: misheck.msiska@mw.pwc.com

## Significant developments

As of 1 July 2010, the date for payment of provisional tax changed; provisional tax for each quarter should be paid within 25 days after the end of the quarter. Previously, the tax was payable 30 days after the end of the quarter.

As of 1 July 2011, the following developments will go into effect:

- Minimum tax based on turnover has been introduced on loss making companies and companies with low profits as follows: 1% of turnover for annual turnover of 50 million Malawian kwachas (MWK) or less; 2% of turnover for annual turnover of more than MWK 50 million.
- Investment allowances for manufacturers has been reduced from 100% to 40% of the cost for new and unused plant and machinery and industrial buildings and from 40% to 20% for used assets.
- Additional 50% training allowance has been abolished. Previously, the cost of training a Malawian employee to obtain a degree, diploma, or a certificate in the field relevant to the employee's job would attract a 50% additional training allowance.
- The rate of transport allowance for transportation of exports has been reduced from 25% of the cost to 15%.
- Corporate tax at 30% has been introduced on income of companies operating in Export Processing Zones. Previously, these companies would enjoy both income tax and import duty exemption.

## Taxes on corporate income

Malawi does not have separate legislation for the determination of taxable income of different types of legal persons. Taxation of all income is included in the Taxation Act.

Section 11 of the Taxation Act defines income as the total amount in cash or otherwise, including any capital gain, received by or accrued to in any year or period of assessment from a source within or deemed to be within Malawi. The taxpayer's assessable income excludes any amount exempt from tax under this act.

### Income deemed to arise in Malawi

The liability for Malawi tax is based on the source of the income rather than residence of the person. Certain transactions may be deemed to be from a source within Malawi even if effected outside Malawi. Section 27 of the Taxation Act limits the income that may be deemed to have arisen in Malawi to the following:

- Remuneration for services rendered or work performed in Malawi.

- Remuneration for services rendered or work performed in or out of Malawi where the amount may be claimed as a tax-deductible expense by a permanent establishment (PE) in Malawi.
- Amounts incurred, claimed, or claimable in connection with a PE in Malawi.
- Realised exchange gains and losses arising in connection with a PE in Malawi or foreign exchange assets and liabilities held in Malawi.
- Capital gains and losses realised with respect to tangible property located in Malawi and interests in companies incorporated in Malawi.

### *Summary of tax rates*

| Entity | Income tax rate (%) |
|---|---|
| Locally incorporated companies (1) | 30 |
| Branches of companies not incorporated in Malawi | 35 |
| Companies in export processing zones (2) | 30 |
| Companies in priority industries (3) | |
| For a period not exceeding ten years | 0 |
| In all other cases for companies incorporated in Malawi | 15 |
| In all other cases for Malawi branches of external companies | 20 |

Notes

1. In the case of a mining company, an additional resource rent tax of 10% is levied on profits after tax if the company's rate of return exceeds 20%. The basis for calculating rate of return has not been defined.
2. Prior to 1 July 2011, these companies enjoyed an income tax exemption.
3. Priority industries have not been defined.

## *Corporate residence*

A corporate entity is considered a resident for tax purposes in Malawi if it has a PE in Malawi.

### *Permanent establishment (PE)*

The Taxation Act defines a PE as 'an office or other fixed place of business through which business activity is carried on'. This short definition is wide in scope. Care must be exercised when considering this definition in situations that may be affected by a double tax agreement (DTA). Each DTA contains a specific and far more detailed definition of what constitutes a PE.

## *Other taxes*

### *Value-added tax (VAT)*

VAT is applicable on taxable goods and services. There are three classes of supplies for VAT: taxable supplies (at the rate of 16.5%), zero-rated supplies, and exempt supplies. A taxable person can claim input VAT on inputs used in making taxable supplies. A taxable person should complete VAT returns and make VAT payment, where applicable, on a monthly basis within 25 days after the end of the month.

### *Customs duties/Import tariffs*

Customs duty is applicable on goods imported into Malawi. The basis for calculating duty is cost, insurance, and freight (CIF). There are three types of import duties:

Customs duty, import excise, and import VAT. The rate of custom duty varies from product to product.

### *Excise duties*
Domestic excise is chargeable on certain goods manufactured in Malawi and on certain services such as alcoholic drinks, tobacco, and cell phone airtime. The rate of excise varies depending on the goods and services.

### *Turnover tax*
Turnover tax is applicable for businesses with a turnover between MWK 2 million and MWK 6 million. The turnover tax rate is 2% of turnover.

### *Resource rent tax for miners*
Miners pay resource rent tax of 10% on after tax profits if the rate of return exceeds 20%. This kind of tax has been introduced recently and details of operation are not clear. For example, no formula has been provided for calculating the rate of return.

### *Non-resident tax*
Non-resident tax is payable on income due to a non-resident at the rate of 15% of the gross income.

Any income payable to a person who is not resident in Malawi (who has not been in Malawi for an aggregate period of 183 days) arising from a source within Malawi is liable to a final tax of 15% of the gross of such income. Non-resident tax is applicable where the recipient of the income does not have a PE in Malawi from which the income emanated.

Non-resident tax should not be charged on income of residents of countries that have a standing DTA with Malawi. Currently, the following countries have a DTA with Malawi: United Kingdom, Denmark, The Netherlands, France, Norway, South Africa, Switzerland, and Sweden.

### *Fringe benefits tax (FBT)*
A fringe benefit is defined as any asset, service, or other benefit in kind provided by or on behalf of an employer to an employee, if such benefit includes an element of personal benefit to the employee. And, the employer providing such benefits is liable for payment of FBT. FBT is charged at the rate of 30% of the taxable figure.

Take note that a benefit need not be wholly for personal use in order to be considered for FBT.

Note as well that no benefit in cash, no matter what it is termed as, can be treated as a fringe benefit. All monies paid in cash (rather than in kind) should be considered for PAYE deduction.

However, subsistence allowances, given to employees working out of their duty station for instance, presumably to cater wholly, exclusively, and necessarily for the needs such as accommodation, meals, transport, etc. ought not be taxed. This applies also for reimbursement of expenses incurred in business.

Every employer shall register for FBT within the month in which one begins to provide fringe benefits.

The sums due as FBT shall be remitted to the Malawi Revenue Authority (MRA) in quarterly instalments not later than 14 days after the end of each quarter of a period of 12 months ending 30 June, and remittance should be accompanied with a duly completed FBT return in Form FBT 2.

Note that the value for FBT should not be included in the employee's certificate of gross emoluments.

**Assessment of housing fringe benefits**
The taxable value of a housing fringe benefit is the greatest of (i) 10% of salary where the house is unfurnished, (ii) 12% of salary if furnished, or (iii) the rental value.

Where the house occupied by the employee is owned by the employer, the taxable value is reduced by 50%.

**Motor vehicles**
FBT is applicable on motor vehicles allocated for use by members of staff and does not include pool cars or cars that are strictly commercial in nature.

The taxable value is 15% of the original cost of the vehicle.

**School fees (for children/dependants)**
50% of the cost to the employer for school fees is a taxable benefit, where payment is made directly to the educational institution. Education allowances payable to employees are not subject to FBT as the allowance is considered part of normal salary and taxable as such.

**Utilities, household items, vacations, travel, and domestic services**
The taxable value of utilities (e.g. electricity, water, and telephone expenses), household items, vacations, travel, and domestic services (e.g. gardener, cook, house boy, guard, nanny) is the entire cost to the employer. Except that for a house owned by the employer, the cost of gardener, security guard, and watchman shall not constitute a taxable benefit.

**Interest free loans and loans given at interest lower than the commercial rate**
Where an employer gives a loan to an employee, which is interest free or bears interest that is lower than the predetermined commercial rate, the difference between the interest offered and the commercial rate is a taxable benefit.

## *Branch income*

There is a 35% tax on taxable income of a branch of a foreign company. Locally incorporated companies pay tax at the rate of 30%.

No dividend withholding tax (WHT) is applicable on repatriation of profits.

## *Income determination*

### *Inventory valuation*
Inventory is stated at cost for tax purposes.

### Capital gains
The tax basis for capital gains is the cost of the asset adjusted by the applicable consumer price index (inflation index). Once determined, the taxable gain is subject to corporate tax at the rate applicable to the particular entity.

Capital gains arising from the disposal of personal and domestic assets not used in connection with trade are exempt from corporate tax.

Capital gains arising from the sale of shares traded on the Malawi Stock Exchange where they have been held for at least one year are also exempt from corporate tax.

### Rollover relief
If a business asset is sold and the taxpayer acquires a qualifying replacement asset, the taxpayer may claim rollover relief. This means that the taxpayer does not immediately pay the tax on the gain. Instead, the cost of the replacement asset is reduced by the amount of the gain. The taxpayer must declare this in the tax return.

A qualifying replacement asset is an asset similar to, or related in service or use to, the asset disposed of. The replacement asset must be acquired within 18 months of the disposal giving rise to the gain.

### Dividend income
Dividend income is exempt from corporate tax; however, dividends received from Malawi sources are subject to a 10% dividend WHT, which is a final tax. Note that although the word ‘final’ has not been defined, it is applied as meaning that dividend WHT suffered may not be offset against an income tax liability.

### Foreign exchange gains and losses
Foreign exchange gains realised on foreign currency assets or liabilities are taxable.

Foreign exchange losses realised on foreign currency assets or liabilities are tax deductible.

Unrealised gains and losses are carried forward until realised and then included in income or allowable expenditures. The maintenance of records that accurately track unrealised exchange rate adjustments from year to year is necessary to ensure correct tax computations.

### Tax-exempt income
The following are common examples of other tax-exempt income:

- The income of agricultural, mining, and commercial institutions or societies not operating for private pecuniary profit or gain of the members.
- The income of clubs, societies, and associations formed, organised, and operated solely or principally for social welfare or civic improvement or other similar purpose provided that the income of such bodies may not be divided among or used for the benefit of the members or shareholders.
- The income of ecclesiastical, charitable, and educational institutions of a public character.

### Foreign income
Generally, income whose source is not Malawi is not taxable in Malawi.

### Commissioner General's power to increase taxable income

The Commissioner General is empowered to increase the taxable income and liability of a taxpayer when of the opinion that the main purpose or one of the main purposes of a transaction was the avoidance or reduction of tax or where the main benefit that might have been expected to accrue from a transaction was the avoidance or reduction of tax.

## Deductions

Taxable income is calculated by deducting allowable items from assessable income. Section 28 of the Taxation Act defines tax-allowable deductions as any expenditures and losses (not being of a capital nature) wholly, exclusively, and necessarily incurred by the taxpayer for the purpose of trade or in the production of income.

### Capital allowances

Capital allowances (i.e. depreciation allowances) are applicable as stipulated in the Taxation Act at various rates.

Capital allowances, which are available to companies and individuals in business, are allowed as follows:

| | Allowances (%) | | |
|---|---|---|---|
| **Asset** | **Initial** | **Investment** | **Annual** |
| Industrial and farm buildings, hotels, and docks (1/2/3) | 10 | 40/20 | 5 |
| Staff housing (3) | 10 | – | 5 |
| Plant, machinery, and equipment (1/2/3/4) | 20 | 40/20 | 20/10 |
| Furniture and fittings (3) | 20 | – | 10 |
| Motor vehicles (3/4/5/6) | 20 | – | 20 |
| Commercial buildings (7) | – | – | 2.5 |
| Computers | 20 | | 40 |

Notes

1. The 40% investment allowance is available only on new and unused qualifying assets as indicated above, belonging to and used by a manufacturer or farmer (prior to 1 July 2011, the investment allowance was 100%). The rate for used qualifying assets is 20% (40% prior to 1 July 2011). The investment allowance is claimable only in the first year of use.
2. Where an investment allowance is claimed, the initial allowance is not allowed to be claimed on the same asset. The initial allowance is claimable only in the first year of use.
3. Annual allowances at the above rates are based on cost less investment and initial and annual allowances previously granted.
4. Investment allowance on plant and machinery excludes motor vehicles intended or adapted for use on roads.
5. A 20% annual allowance is standard, but the Commissioner General may vary the amount.
6. No initial allowance is granted on private motor vehicles. These include saloons, sedans, station wagons, and double cabin pickups. However, the restriction does not apply where the motor vehicle is used for hiring purposes.
7. The building must be newly constructed at a cost of no less than MWK 100 million.

On disposal, assets are subject to balancing charges (capital gains) or balancing allowances.

If an asset is subject to extensive use, such as machinery working double shifts, so that its expected economic life is reduced, the commissioner general may agree to increase the rates of annual allowances.

### Lease, patent, trademark, and copyright premium
The tax-deductible amount of a premium paid for the right of use or occupation of land or buildings, plant or machinery, patent design, trademark, copyright, or any other property of a similar nature is one of the following:

- The amount of premium or consideration divided by the number of years for which the right of occupation or use is granted.
- Where the period for which the right of occupation or use is granted exceeds 25 years, the deduction is one-twenty-fifth of the premium or consideration.

The premium is tax deductible only where the asset or right with respect to which the premium or consideration is paid is used for the generation of income. If a taxpayer acquires ownership of the asset or right, no further deduction of the premium or consideration is allowed from the date ownership is acquired.

### Pre-operating expenditures
A manufacturer may claim as a deduction any expenditure incurred in the course of establishing the business, provided that the following are true:

- The expenditure was incurred not more than 18 months before commencing business.
- The expenditure would have been allowed as a deduction if it had been incurred after commencing business.

### Research and development expenditures
Research expenditures are fully allowable as a deduction if they are for ‘experiments and research relating to trade’.

### Charitable contributions
Donations to approved charities and approved non-profit institutions formed for the purpose of social welfare, civic improvement, educational development, or other similar purposes are deductible. The minimum individual donation allowable is MWK 500. The minimum donation for other approved charities is MWK 250. In both cases, there is no maximum donation.

### Pension contributions
The tax-allowable amount of ordinary pension contributions made by an employer to an approved pension fund is subject to limitations. The limit with respect to each employee is the lowest of one of the following per annum:

- The actual contribution.
- 24% of the employee’s compensation.
- MWK 9,000.

No allowance is available if an employee is entitled to a tax-free gratuity.

### Net operating losses
Current taxable income may be offset against net operating losses brought forward and current operating losses may be increased by net unexhausted trading losses brought forward. Manufacturers and taxpayers in the agricultural industry may carry losses forward indefinitely, while other taxpayers may carry losses forward for only six years. Net operating losses may not be carried back.

### *Payments to foreign affiliates*
A deduction is allowed for payments to foreign affiliates if such payments are expended wholly, exclusively, and necessarily for the production of income or for the purposes of trade, and it can be demonstrated that the transaction is at arm's length.

## *Group taxation*

Group taxation is not permitted in Malawi.

### *Transfer pricing*
The transfer pricing regulations have not been fully introduced in Malawi. However, the tax anti-avoidance provision is used to check transactions between related parties. If transactions between related parties result in profits that are lower than what would be expected if the company was trading with an independent party, then the tax authorities can challenge the transaction.

### *Thin capitalisation*
There are no thin capitalisation rules in Malawi.

There are no restrictions on the level of external borrowings. If a Malawi company wants to borrow money from a foreign entity (whether or not a bank), it will require exchange control approval. In such instances, Reserve Bank does not consider the debt-to-equity ratio. It looks at the terms and conditions to see that they are what would be commonly available on the open market between unrelated parties. As you can see, this is an anti-transfer pricing measure.

If a new application is made for exchange control approval of foreign ownership (normally this is when there is a new business/investment into Malawi), Reserve Bank will look at the external debt to local equity ratio. There are no fixed rules, but Reserve Bank does not normally like external debt to be more than twice equity (i.e. 1:2 equity to external debt). It does give approval for external ownership where the proportion of external debt is higher than this as it looks at each proposal on its own merits. The applicant would have to justify the higher level of external debt in such a case.

### *Controlled foreign company (CFC) regime*
There is no CFC regime in Malawi.

## *Tax credits and incentives*

### *Export allowances*
Exporters, including those manufacturing in bond, are entitled to claim additional tax allowances for non-traditional exports:

- On the export of non-traditional products, there is a 15% tax allowance on taxable income derived from exports (prior to 1 July 2011, the allowance was 25%).
- There is a 15% transport tax allowance on international transport costs for non-traditional exports (prior to 1 July 2011, the allowance was 25%). Traditional exports are tea, coffee, cane sugar, and unmanufactured tobacco and tobacco refuse.

Export allowances may not be claimed in respect of exports from mining operations.

### *Investment allowance*

There is a 40% investment allowance on plant and machinery and industrial buildings for taxpayers in the manufacturing industry (prior to 1 July 2011, the investment allowance was 100%).

### *Farming operations*

Farming operations receive a 100% allowance with respect to expenditures incurred during any year of assessment on the following:

- Stumping, leveling, and clearing of land.
- Work in connection with the prevention of soil erosion.
- Boreholes.
- Wells.
- Aerial and geophysical surveys.
- Water control work, including any canal, channel, dyke, furrow, and any flood control structure, whether or not of a permanent nature.
- Water conservation work, meaning any reservoir, water dam, or embankment constructed for the impounding of water. In the case of water conservation work, the Taxation Act limits the amount deductible to amounts actually paid, where the farmer incurs a liability in terms of any law relating to natural resources.

Where a farmer derives taxable income from growing timber, the farmer may elect that the taxable income is determined in accordance with the following rules:

- Carryforward the cost of planting the timber until the timber reaches maturity.
- Add annually to the cost of planting the timber an amount calculated as 5% of the cost of planting the timber until the timber reaches maturity.
- When the timber is sold, a proportionate amount of the total of the carryforward cost and annual added cost is deducted from the proceeds.
- In each year of assessment, the annual added cost is treated as taxable income in the hands of the farmer.

A farmer may not deduct any expenditures that have been recovered through a subsidy or claim a capital allowance on any assets where the expenditures have been recovered through a subsidy.

### *Mining operations*

Mining operations receive a 100% allowance with respect to mining expenditures incurred during any year of assessment. Mining expenditures are defined as capital expenditures incurred in Malawi by a person carrying on or about to carry on mining operations in Malawi:

- In searching for or in discovering and testing or in winning access to deposits of minerals.
- In the acquisition of or of rights in or over such deposits, other than the acquisition from a person who has carried on mining operations in relation to such deposits.
- In the provision of plant and machinery and industrial buildings that would have little or no value to such person if the mine ceased to work.
- On the construction of any buildings or works that would have little or no value if the mine ceased to be worked.
- On development, general administration, and management prior to the commencement of mining operations.

Persons engaged in mining operations are not entitled to claim the export tax allowance on non-traditional exports or the 15% transport tax allowance on international transport costs for non-traditional exports.

## Withholding taxes

| Nature of payment | WHT rate (%) |
|---|---|
| Royalties | 20 |
| Rents | 15 |
| Payment of more than MWK 60,000 per annum for any supplies to traders and institutions | 3 |
| Commission | 20 |
| Payment for carriage and haulage | 10 |
| Payment to contractors and subcontractors in the building and construction industries | 4 |
| Payment for public entertainment | 20 |
| Payment of more than MWK 12,000 for casual labour | 20 |
| Services | 20 |
| Bank interest in excess of MWK 10,000 | 20 |
| Fees | 10 |

### Dividend WHT

Dividend WHT is a final tax and is charged at 10%. The dividend is not included in the taxpayer's taxable income and the WHT is not deducted from the taxpayer's tax liability.

## Tax administration

### Returns

Income tax returns are due within 180 days after the end of the financial year.

### Payment of tax

Tax is payable in two instalments at 30 November and 30 January, with the balance of the tax being paid on 30 April.

### Penalties

A penalty for late submission of returns is MWK 200,000.

## Significant developments

To encourage Malaysians working abroad to return to Malaysia and contribute to the country's economic transformation with their experience and expertise, the Prime Minister recently announced at Invest Malaysia 2011 that returning Malaysian professionals will be eligible for a reduced income tax rate of 15%. This new incentive is for a period of five years and only applies to employment income.

## Taxes on corporate income

For both resident and non-resident companies, the income tax is imposed on income accruing in or derived from Malaysia at a flat rate of 25%.

As a concessionary treatment for resident companies with paid-up capital from ordinary shares of 2.5 million Malaysian ringgit (MYR) or less, the rate of tax is 20% on the first MYR 500,000 of chargeable income and 25% on any income in excess of MYR 500,000. If a company meets the above capital requirement, but controls or is being controlled directly or indirectly by another company which has a paid-up capital of more than MYR 2.5 million in respect of ordinary shares, it is not eligible for the concessionary tax rate.

### Petroleum income tax

Petroleum income tax is imposed at the rate of 38% on profits from petroleum operations in Malaysia. No other taxes are imposed on income from petroleum operations.

## Corporate residence

A company is tax resident in Malaysia in a basis year if, at any time during the basis year, the management and control of its affairs are exercised in Malaysia. Generally, a company is regarded as resident in Malaysia if at any time during the basis period for a year of assessment, at least one meeting of the Board of Directors is held in Malaysia concerning the management and control of the company.

### Permanent establishment (PE)

Generally, a non-resident entity is regarded as having a PE in Malaysia if it has a fixed place of business in Malaysia, where the business of the entity is wholly or partly carried on. A non-resident company may also be deemed to have a PE in Malaysia under certain circumstances, such as the following:

- It is represented by a dependent agent in Malaysia, who has the authority to conclude contracts on its behalf and who has repeatedly exercised that authority.
- It carries on supervisory activities in Malaysia for six/nine months in connection with a construction, installation, or assembly project.

## Other taxes

### Sales tax and service tax

A single-stage *ad valorem* tax (sales tax), at rates ranging from 5% to 10%, is imposed on all goods imported into or manufactured in Malaysia, unless specifically exempted.

As of 1 January 2011, service tax is imposed at the rate of 6% on the value of taxable services sold or provided by taxable persons. Prior to 1 January 2011, the rate was 5%. A list of 'taxable services' and 'taxable persons' is found in the Service Tax Regulations, 1975.

### Goods and services tax (GST)

A GST of 4% was originally expected to be implemented in mid 2011, but its implementation is now delayed indefinitely. The reason reported for the delay is to allow the government more time to engage with the public in order to gather feedback on the implementation of the GST. Nevertheless, the introduction of the GST is included in the New Economic Model unveiled by the Prime Minister on 30 March 2010, as a key component of fiscal reforms aimed at transforming Malaysia into a high income nation.

GST, when implemented, will replace the sales tax and service tax currently imposed and collected under the Sales Tax Act 1972 and the Service Tax Act 1975. Companies with revenue below a certain threshold (to be gazetted separately and expected to be MYR 500,000) will be exempted from imposing GST.

### Import duties

Import duties are levied on goods that are subject to import duties and imported into the country. Import duties are generally levied on an *ad valorem* basis but may also be imposed on a specific basis. The *ad valorem* rates of import duties range from 2% to 60%. Raw materials, machinery, essential foodstuffs, and pharmaceutical products are generally non-dutiable or subject to duties at lower rates.

### Excise duties

Excise duties are imposed on a selected range of goods manufacture and imported into Malaysia. Goods which are subject to excise duty include beer/stout, cider and perry, rice wine, mead, un-denatured ethyl alcohol, brandy, whisky, rum and tafia, gin, cigarettes containing tobacco, motor vehicles, motorcycles, playing cards, and mahjong tiles.

The rate of excise duties vary from a composite rate of MYR 0.1 per litre and 15% of the value for certain types of spirituous beverages, to as much as 105% of the value of motorcars (depending on engine capacity).

### Stamp duty

Malaysia imposes stamp duty on chargeable instruments executed in certain transactions. In a stock deal, Malaysian stamp duty is payable at the rate of 0.3% on the consideration paid or market value of the shares (whichever is higher). In an asset deal, stamp duty ranging from 1% to 3% is payable on the market value of the dutiable properties transferred under the instrument. Stamp duty is payable by the buyer.

### Real property gains tax

Real property gains tax (RPGT) is charged upon gains from disposals of real properties (referred to as 'chargeable assets') situated in Malaysia, including shares of a real-property company (RPC). A RPC is a controlled company that owns real property or RPC shares with a defined value of not less than 75% of its total tangible assets.

As of 1 January 2010, RPGT is imposed at the rate of 5% on gains arising from disposals of chargeable assets in respect of real properties within five years of their acquisition.

### Property tax

Property tax is levied on the gross annual value of property as determined by the local state authorities.

### Windfall profit levy

A levy is imposed on crude palm oil and crude palm kernel oil at a maximum of MYR 50 per ton where the price exceeds MYR 2,500 per ton in Peninsula Malaysia, and MYR 3,000 per ton in the states of Sabah and Sarawak.

### Contract levy

A levy of 0.125% on contract works having a contract sum above MYR 500,000 is imposed on every registered contractor by the Construction Industry Development Board.

### Human resource development levy

Employers engaged in the manufacturing and services sectors that employ more than a specified number of employees must contribute to the Human Resource Development Fund (HRDF). The levy required to be paid is at the rate of 1% of the employees' monthly wages on a monthly basis.

## Branch income

Tax rates on branch profits of a company are the same as those on corporate profits. No tax is withheld on transfer of profits to a foreign head office.

## Income determination

### Inventory valuation

Inventories are generally stated at the lower of cost or net realisable value. Cost for this purpose may be determined by using one of several possible bases, such as unit cost, average cost, or the first in first out (FIFO) method, as long as the basis used is consistent from one year to another.

### Capital gains

Generally, gains on capital assets are not subject to tax, except for gains arising from the disposal of real properties. Gains arising from the disposal of real property (which include the disposal of shares in a RPC) situated in Malaysia is subject to RPGT *(see the Other taxes section for more information)*.

### Dividend income

A single-tier system of taxation came into force on 1 January 2008 which replaced the previous full imputation system. There is a six-year transitional period (until 31 December 2013) for all companies to migrate into the single-tier system.

Under the previous (full-imputation) system, dividends received from Malaysian companies are taxed at gross in the hands of shareholders (whether corporate or individuals). Companies distributing dividends are required to deduct tax at source at the prevailing corporate tax rate, from gross dividends payable, but the income tax deducted or deemed deducted from the dividends is available as a credit (deducted) against the income tax liability of the shareholder. If a dividend is paid by a company which was subjected to tax at the rate of 20% *(see Taxes on corporate income),* tax is to be deducted or is deemed to be deducted from the dividend at the normal 25% corporate tax rate.

Under the single-tier tax system, dividends are exempt in the hands of shareholders. Companies are not required to deduct tax from dividends paid to shareholders, and no tax credits will be available for offset against the recipient's tax liability. Corporate shareholders receiving exempt one-tier dividends can, in turn, distribute such dividends to their own shareholders, who are also exempt on such receipts.

### Stock dividends

A Malaysian corporation may distribute bonus shares tax-free to shareholders.

### Foreign income

Under the Income Tax Act, 1967 (ITA) a Malaysian tax-resident corporation and a unit trust are not taxed on their foreign-sourced income, regardless of whether such income is received in Malaysia. However, income of a resident company from the businesses of banking, insurance, and air or sea transport is assessable on a global basis, except for income attributable to a Labuan business activity of the branch or subsidiary of a Malaysian bank in Labuan which is subject to tax under the legislation applicable to Labuan entities in Labuan (Labuan Business Activity Tax Act 1990). A Labuan entity may also make an irrevocable election to be taxed under the ITA in respect of its Labuan business activity.

In respect of Malaysian-owned banks, insurance companies, and takaful (Islamic insurance) companies, the profits of newly established branches overseas or remittances of new overseas subsidiaries are tax exempt for five years, provided that the applications to establish overseas branches or subsidiaries are received by the Central Bank of Malaysia no later than 31 December 2015.

Relief from double taxation is available by means of a bilateral credit if there is a governing tax treaty or unilateral relief where there is no treaty. The relief is restricted to the lower of Malaysian tax payable or foreign tax paid if there is a treaty, or one-half of the foreign tax paid if there is no treaty.

Undistributed income of foreign subsidiaries is not taxable.

## Deductions

### Depreciation and depletion

Tax depreciation (called capital allowance) on machinery, equipment, and industrial buildings is available at specific rates for all types of businesses. Locally acquired machinery and equipment qualify for an initial allowance of 20%, while imported heavy machinery (used in building and construction, mines, plantation, and timber industries) qualifies for 10% when the expenditure is incurred and the asset is in use.

An annual allowance ranging from 10% to 20% is calculated on cost for every year during which the asset is in use for the purposes of the business.

An accelerated capital allowance is available for certain types of plant and machinery, such as computers, information technology equipment, environmental protection equipment, waste recycling equipment, and plant and machinery used in the business of plantation companies. Small-value assets costing less than MYR 1,000 each are entitled to 100% capital allowance, subject to a maximum total cost of MYR 10,000.

Depreciation recapture on the sale of plant and machinery is taxable as ordinary income. Tax depreciation is not required to conform to book depreciation.

A depletion allowance is available on natural-resource properties.

### *Taxes*
Taxes on income are generally not deductible, whereas indirect taxes, such as sales tax and service tax, are deductible.

### *Net operating losses*
The carryforward of business losses and capital allowances is not available for deduction in subsequent years of assessment if the company does not meet the conditions of a shareholders' continuity test. However, a recent guideline issued by the Ministry of Finance states that the rule restricting the carryforward of losses and capital allowances based on the shareholder continuity test applies only to dormant companies. Carryforward of business losses and capital allowances is unlimited in time for non-dormant companies.

Current-year business losses may be utilised against all sources of income. Set-off of unutilised carried-forward losses is restricted to income from business sources only. Utilisation of tax depreciation is also restricted to income from the same underlying business source.

There is hitherto no provision for loss or tax depreciation carryback to previous tax years. However, under the Economic Stimulus Package presented on 10 March 2009, a taxpayer (including a company) may make an irrevocable election for the current-year loss for year of assessment (YA) 2009 or YA 2010 to be carried back for offset against income of the immediately preceding year, up to a maximum loss of MYR 100,000.

### *Payments to foreign affiliates*
A Malaysian corporation can claim a deduction for royalties, management service fees, and interest charges paid to affiliates, provided that these are made at arm's length (i.e. the amounts it would pay if it was dealing with an unrelated entity).

## *Group taxation*

Group relief is available to locally incorporated, resident companies. A company that qualifies may surrender a maximum of 70% of its adjusted loss for a year of assessment to one or more related companies, if the following conditions are met:

- Both the claimant and surrendering companies must each have paid-up capital of ordinary shares exceeding MYR 2.5 million at the beginning of the basis period for that particular year of assessment, and must have the same (12-month) accounting period.

- The companies must be 'related' throughout the period that forms the basis period for a particular year of assessment as well as the 12 months preceding that basis period. 'Related company' is defined by law and involves the application of a two-tier test. The first test relates to the proportion of one company's ownership in the ordinary share capital of the other company (at least 70%), or at least 70% ownership of the surrendering and claimant companies' shares by a third company. The other test is based on the proportion of distributable profits and assets on winding up to which the holding company is entitled (at least 70%).

Companies that wish to avail themselves of group relief must make an irrevocable election to surrender or claim the tax loss in the return to be filed with the Inland Revenue Board for that year of assessment.

### *Transfer pricing*
A new provision was introduced, effective as of 1 January 2009, which empowers the Director General of Inland Revenue (DGIR) to make adjustments on transactions of goods and services if the DGIR is of the opinion that the transactions were not entered into on an arm's-length basis.

### *Thin capitalisation*
A new provision for thin capitalisation was also introduced, effective as of 1 January 2009. With regard to this, the portion of the interest charge that relates to the amount of financial assistance which is excessive will be disallowed as a deduction. However, the implementation of specific rules relating to this provision has been deferred to the end of December 2012.

## *Tax credits and incentives*

### *Inbound investment incentives*
#### Pioneer status (PS)
Corporations in the manufacturing, agricultural, hotel and tourism sectors, or any other industrial or commercial sector that participate in a promoted activity or produce a promoted product may be eligible for PS. This incentive is given by way of exemption from income tax on 70% of the annual profits for five years. The remaining 30% of the profits is taxed at the prevailing corporate income tax rate. The profits exempted from tax are available for distribution as tax-free dividends.

In the following cases, the general rule of tax exemption and period of incentive is varied:

- Corporations undertaking a project of national and strategic importance involving heavy capital investment and high technology will be granted full exemption on its profits. The tax-relief period may be extended for a further five years. Projects recognised to be of national and strategic importance include forest plantation activities, projects with Multimedia Super Corridor (MSC) status, and production of electronic wafers.
- High-technology companies engaging in a promoted activity or in the production of a promoted product in areas of new and emerging technologies, as well as companies participating in an industrial linkage programme, may be granted PS, which entitles them to full exemption on profits for a period of five years.
- Corporations with projects eligible for PS (applications must have been made before 31 December 2010) that are located in the eastern corridor states of Peninsular Malaysia, Sabah, and Sarawak will be granted exemption on 100% of their profits

for five years. An existing pioneer or ex-pioneer corporation that undertakes an expansion programme through a subsidiary or controlled company in the eastern corridor states of Peninsular Malaysia, Sabah, Sarawak, and Labuan, and the state of Perlis, that involves the same promoted activities or promoted products is eligible for a second round of PS or investment tax allowances if certain conditions are satisfied. The eastern corridor states include Kelantan, Trengganu, and Pahang, and the district of Mersing in Johor.
- Existing locally owned companies reinvesting in production of heavy machinery, machinery, and equipment are to be granted exemption on 70% of the increased statutory income arising from reinvestment for five years.
- New and existing companies utilising oil palm biomass and reinvesting to produce value-added products are to be entitled to full exemption on profits for a period of ten years.
- Small companies that meet with specified conditions are entitled to full exemption on profits for a period of five years.
- A second round of PS is available for hotel and tourism companies which invest in expansion, modernising, and renovation, as well as for companies providing cold-chain facilities and services for perishable agricultural produce.
- Companies engaged in generating energy from renewable sources or in providing energy efficiency services will be given a full exemption for ten years for applications received before 31 December 2015.

A company granted PS which intends to reinvest before the expiry of its PS is eligible for reinvestment allowance provided that it surrenders its PS *(see section on Reinvestment allowance below)*.

**Deduction for export expenses**
Resident corporations in the manufacturing, hotel, tourism, and service sectors are entitled to double deduction for expenditures incurred on the promotion of exports, such as overseas advertising, free samples, export market research, participation in trade exhibitions, preparation of tenders, travel, participation in virtual trade shows, participation in trade portals for promotion of local products, and maintenance of overseas sales offices and warehouses. For promotion of export of services, expenses such as feasibility studies for overseas tender projects, participation in a trade or industrial exhibition in Malaysia or overseas, airfares, and sustenance are entitled to double deduction. Expenses incurred by pioneer companies are aggregated and offset against post-pioneer (taxable) profits.

**Investment tax allowance (ITA)**
A corporation may be granted an ITA of 60% of capital expenditure incurred on a factory or plant and machinery used for purposes of an approved manufacturing, agricultural, hotel, tourist, knowledge-intensive, or other industrial or commercial activity (other than one granted PS). ITA is granted on capital expenditure incurred for a period of five years. For an integrated agricultural activity, ITA may be granted for both the agricultural and the processing activities for five years each.

The amount of ITA to be utilised for each year of assessment is restricted to a maximum of 70% of the profits, while the balance of 30% of the profits is taxed at the prevailing corporate income tax rate. Unutilised allowances may be carried forward indefinitely for offset against future profits of the business. Dividends paid out of exempt profits are exempt from tax in the hands of shareholders.

The ITA incentive is enhanced for the following types of projects:

- A corporation undertaking a project of national and strategic importance may be granted ITA at a rate of 100% and would be able to utilise the amount of ITA granted for offset against 100% of profits each year, without restriction.
- A high-technology company may be granted ITA at the rate of 60%, and the amount of ITA would be available for offset against 100% of profits. This incentive is an alternative to PS.
- A company granted ITA in respect of a project located in the eastern corridor states of Peninsular Malaysia, Sabah, Sarawak, and Labuan, and the state of Perlis, will be granted ITA at a rate of 100%, and the amount of allowance can be offset against 100% of its profits for each year. An existing ITA or ex-ITA company that undertakes an expansion programme through a subsidiary or controlled company in the eastern corridor states of Peninsular Malaysia, Sabah, Sarawak, and Labuan involving the same promoted activities or promoted products is eligible for a second round of ITA if certain conditions are satisfied (applications must have been made before 31 December 2010).
- A company that provides technical and vocational training or science courses in biotechnology, medical and health, molecular biology, material sciences, and food sciences in Malaysia may be granted ITA of 100% of qualifying capital expenditures incurred within a period of ten years, and the maximum amount of ITA that could be utilised each year would be restricted to 70% of profits.
- Existing locally owned companies reinvesting in production of heavy machinery, machinery, and equipment are granted ITA at the rate of 60% on additional qualifying expenditure incurred for a period of five years.
- New and existing companies utilising oil palm biomass and reinvesting to produce value-added products are granted ITA at a rate of 100%, and will be able to utilise the amount of ITA granted for set-off against 100% of profits each year, without restriction.
- A second round of ITA is available for hotel and tourism companies which invest in expansion, modernising, and renovation, as well as companies providing cold-chain facilities and services for perishable agricultural produce.
- Companies investing in or upgrading an existing testing laboratory for testing medical devices may be granted ITA of 60% on qualifying expenditures incurred within a period of five years to be offset against 100% of profit for each year of assessment.
- Companies investing in certain equipment used to generate energy from renewable sources or investing in energy conservation equipment will be given ITA at a rate of 100% for five years and will be able to utilise the amount of ITA granted for offset against 100% of profits each year, without restriction. This is in respect of applications received before 31 December 2015.

### Reinvestment allowance
A corporation that embarks on a programme to expand, modernise, automate, or diversify its existing manufacturing business is entitled to a reinvestment allowance. The amount of reinvestment allowance is 60% of qualifying capital expenditure incurred within a period of 15 years on a factory or plant and used for expansion, modernisation, automation, or diversification activity. The reinvestment allowance will be withdrawn if the asset for which the reinvestment allowance is granted is disposed of within five years.

The amount of reinvestment allowance that can be utilised each year is limited to 70% of profits after deduction of capital allowances. The remaining 30% is taxed at the normal corporate income tax rate. Unutilised reinvestment allowances may be carried forward indefinitely for offset against future profits of the business. The 70% restriction does not apply to projects that achieved the level of productivity as prescribed by the

Minister of Finance and to projects located in the eastern corridor states of Peninsular Malaysia, Sabah, Sarawak, and Labuan and the state of Perlis.

A reinvestment allowance is also extended to a tax-resident company undertaking an approved agricultural project that incurs qualifying capital expenditure for the purposes of expanding, modernising, or diversifying its cultivation and farm businesses.

Dividends paid out of exempt profits are not taxable in the hands of shareholders.

### Venture capital company

A company investing in approved venture companies in the form of start-up or seed capital is given a deduction equivalent to the value of the investment. To qualify for the deduction, the investment must not be in a company that is listed on a stock exchange, and it should not be in a company related to the investing company at the point of first investment. Where this deduction is not claimed, the venture capital company may be eligible for tax exemption for a period of ten years or the life of the fund established for the purpose of investing in a venture company, whichever is the lesser, on income from all sources, other than interest income from savings or fixed deposits and profits from syariah-based deposits, if at least 50% of its funds are invested in venture companies (reduced to 30% in respect of applications received by the Securities Commission from 30 August 2008 to 31 December 2013).

### *Development corridors*

As part of the Malaysian government's plan for national economic advancement through regional development and growth acceleration in various strategic locations by promotion of domestic and foreign investments, the following 'development corridors' were launched during the period from the end of 2006 to early 2008:

| Economic region | Location | Year of launch |
|---|---|---|
| Iskandar Malaysia (renamed in April 2008 and formerly known as 'Iskandar Development Region') www.iskandarmalaysia.com.my | Southern Johor | 2006 |
| Northern Corridor Economic Region www.ncer.com.my | States of Perlis, Kedah, Penang, and northern Perak | 2007 |
| East Coast Economic Region www.ecerdc.com | States of Kelantan, Terengganu, Pahang, and district of Mersing in Johor | 2007 |
| Sabah Development Corridor www.sdc.gov.my | Western, central, and eastern regions of Sabah | 2008 |
| Sarawak Corridor of Renewable Energy www.sarawakscore.com.my | Central Sarawak | 2008 |

Basic to the strategy for promotion of investments in these development corridors is the provision of all necessary infrastructure (financial and non-financial) for the creation of a business-friendly environment, including tax and other financial incentives. Apart from existing incentives which are available for promoted activities and products provided under the Promotion of Investments Act 1986 (PS, ITA ,etc.) and the Income Tax Act 1967 (outlined above), special incentives customised for the purpose of each development corridor have been (or will be) developed. So far, however, special legislation has been enacted only in respect of Iskandar Malaysia (IDR) to grant the following exemptions/incentive:

- Income tax exemption for an approved IDR-status company in respect of income from the provision of qualifying services to a person situated within designated nodes in the IDR or outside Malaysia, for ten years, provided that these operations commence before 31 December 2015.
- Income tax exemption for non-residents in respect of income from technical fees, interest, or royalties received from approved developers in designated nodes in the IDR, or IDR-status companies. Withholding tax (WHT) requirements are also waived in respect of such payments.
- Income tax exemption for an approved developer on income from the disposal of rights over land or buildings in designated nodes in the IDR or rental from such buildings until 2020. Exemption is also granted to an approved development manager on income from the provision of management, supervisory, and marketing services to such developers until 2020.
- A qualified person (defined) who is a knowledge worker residing in Iskandar Malaysia is taxed at the rate of 15% on chargeable income from an employment with a designated company (defined by legislation) engaged in a qualified activity (e.g. green technology, educational services, healthcare services, creative industries, financial advisory and consulting services, logistics services, tourism) in that specified region. The employment must have commenced on or after 24 October 2009 but not later than 31 December 2015.

Information pertaining to each development corridor, including incentives available, may be obtained from the corridor's website, the address of which is provided above.

### *Other tax incentives*

#### Operational headquarters company (OHQ)

An OHQ company that provides qualifying services to its offices and related companies may be granted approved OHQ status.

The income (business income, interest, and royalties) derived by an approved OHQ from the provision of qualifying services is exempt from income tax for a period of ten years. This includes income from services provided to related companies in Malaysia, provided such income does not exceed 20% of the OHQ income. Dividends distributed from exempt income are exempt in the hands of shareholders. Expatriates working in an OHQ are taxed only on the portion of chargeable income attributable to the number of days they are in Malaysia. An OHQ is also granted special facilities, including the following:

- Approvals for expatriate posts are based on the requirements of the OHQ.
- Credit facilities in foreign currency can be obtained from licensed commercial banks in Malaysia, without approval of the Central Bank of Malaysia.
- There is no restriction on investments in foreign securities and lending to related companies outside Malaysia.
- A single or foreign currency account may be opened with licensed commercial banks in Malaysia or banks in Labuan.

#### International procurement centre (IPC)

An IPC is a company incorporated in Malaysia, whether local or foreign owned, that is engaged in the procurement and sale of raw materials, components, and finished products to related or unrelated companies in Malaysia or abroad.

Tax incentives include:

- Exemption for ten years on income from qualifying activities in respect of export sales after deduction of tax-depreciation allowance (subject to conditions).
- Dividends paid from exempt income are exempt from tax in the hands of shareholders.
- Goods brought into free zones, bonded warehouses, or licensed manufacturing warehouses for repackaging or cargo consolidation and integration before distribution to final consumers are exempt from customs duties.

To qualify, an IPC must serve as a collection and consolidation centre for finished goods, components, and spare parts from overseas or within the country to be distributed to the dealer, importer, or its subsidiary or associated company within or outside the country.

In addition, other available non-tax incentives include:

- Approval for expatriate posts based on the requirements of the IPC.
- Ability to maintain more than one foreign currency account for the retention of export proceeds with any licensed commercial bank and without any limit on the balance in the accounts.
- Permission to enter into foreign exchange forward contracts with a licensed commercial bank to sell forward export proceeds based on projected sales.
- Exemption from foreign equity ownership restrictions.

### International trading companies
Companies that obtained approval as 'international trading companies' are exempt for five years on income equivalent to 20% of increased export value, up to a maximum of 70% of statutory income. To qualify for the incentive, the company must meet the following three conditions:

- Be incorporated in Malaysia, with 60% Malaysian ownership.
- Achieve minimum annual sales of MYR 10 million, not more than 20% of which may be derived from the trading of commodities.
- Use local services (banking, finance, and insurance) and infrastructure (local ports and airports) in its operations.

### Regional distribution centre
A regional distribution centre (RDC) is a collection and consolidation centre for finished goods, components, and spare parts produced by its related company for its own brand, from overseas or within the country to be distributed to the dealer, importer, or its subsidiary or associated company within or outside the country. Among the activities involved are bulk breaking, repackaging, and labelling. Incentives accorded to an RDC include:

- Exemption for ten years on income from qualifying activities in respect of export sales, after deduction of tax depreciation allowance (subject to conditions).
- Dividends paid from exempt income are exempt from tax in the hands of shareholders.
- Import duty and sales tax on goods for distribution are tax exempt.

Other non-tax incentives include:

- Exemption from foreign equity ownership restrictions.

- Approval for expatriate posts based on requirement of the RDC.
- Eligibility to open one or more foreign currency accounts with any licensed commercial bank to retain their export proceeds, without any limit imposed.
- Permission to enter into foreign exchange forward contracts with any licensed commercial bank to sell forward export proceeds, based on projected sales.

**MSC Malaysia status companies**

MSC Malaysia is Malaysia's initiative for the global information technology industry and is designed to be the research and development (R&D) centre for industries based on information technology (IT). Conceptualised in 1996, MSC Malaysia has grown into a thriving information communication technology (ICT) hub, hosting multinational corporations, foreign-owned, and home-grown Malaysian companies focused on multimedia communications products, solutions services, and R&D. The Malaysian government has equipped core areas in MSC Malaysia with high-capacity global telecommunications and logistics networks. MSC Malaysia is also supported by secure cyber laws, strategic policies, and a range of financial and non-financial incentives for investors.

The Multimedia Development Corporation (MDeC) was established to develop and manage MSC Malaysia. The MDeC is a fully empowered 'one-stop shop' that acts as approving authority for companies applying for MSC Malaysia status.

MSC Malaysia status is awarded to both local and foreign companies that develop or use multimedia technologies to produce or enhance their products and services as well as for process development. Companies awarded MSC Malaysia status are eligible for incentives which include the following:

- PS for five years (extendable up to five additional years) or investment tax allowance of 100% for five years for a new company or an existing company on its additional income.
- Eligibility for R&D grants (for majority Malaysian-owned, MSC Malaysia status companies).
- Exemption from indirect taxes on multimedia equipment.
- Unrestricted employment of local and foreign knowledge workers.
- Freedom to source funds globally for investments.
- Protection of intellectual property and cyber laws.
- No censorship of the Internet.
- MSC Malaysia status companies located within this area will enjoy globally competitive telecommunication tariffs and services guarantees, world-class physical and IT infrastructure, and excellent R&D facilities, including the region's first Multimedia University.

**Biotechnology industry**

Companies undertaking biotechnology activity with approved bionexus status from Malaysian Biotechnology Corporation Sdn Bhd are eligible for 100% income tax exemption for ten years from the first year in which the company derives profit or ITA of 100% on qualifying capital expenditures incurred for a period of five years. Dividends distributed from exempt income are tax exempt for the recipient. Double deduction is available for expenditures incurred on R&D and on promotion of exports.

The following incentives are also available:

- A company or individual investing in a bionexus company is given a tax deduction of an amount (approved by the Minister of Finance) equal to the value of investment for the purpose of financing activities at seed capital stage or early stage of a new business.

- Stamp duty and real property gains tax exemption is granted to a bionexus company undertaking a merger and acquisition with a biotechnology company within a period of five years until 31 December 2011.
- Accelerated industrial building allowance is given (over ten years) on qualifying building expenditures for buildings used by a bionexus-status company for the sole purpose of its new business or expansion project.
- Concessionary tax rate of 20% of statutory income from qualifying activities to be applied for ten years upon expiry of the tax exempt period.
- Exemption of import duty and sales tax on import of raw materials and machinery.

### Unit trusts

Gains from the realisation of investments are not regarded as taxable income of a unit trust. Interest received by unit trusts from certain bonds and securities, as well as interest credited by banks and other financial institutions licensed under the Banking and Financial Institutions Act 1989 or the Islamic Banking Act 1983, are exempt from tax. Distributions from such gains are tax exempt to the unit holders.

Capital allowance in respect of plant and machinery used for the purpose of the letting of properties is allowed at the rate of 10% per annum against the rental income of a property unit trust.

### Research and development (R&D)

Companies that provide R&D services to third parties are eligible for PS with full exemption of their profits for a period of five years. A second round of PS incentive is available for another five years. As an alternative, such companies may be granted ITA at the rate of 100% of qualifying capital expenditure incurred within a period of ten years and a further ten years for a second round of ITA. The ITA incentive may also be granted to companies undertaking R&D for their group.

Companies undertaking in-house R&D projects are eligible for ITA at the rate of 50% of the qualifying capital expenditure incurred within a period of ten years.

A company that has made an investment for the sole purpose of financing a project on commercialisation of R&D findings (which must be R&D findings in the resource-based industry, wholly owned by a public research institute or public institute of higher learning in Malaysia) is given a deduction equivalent to the value of that investment.

Double deduction is granted for expenses incurred on approved R&D projects, as well as for payments made to defined R&D companies. Local universities are recognised as approved research institutes for the purposes of claims for the double-deduction incentive by companies making cash contributions or payments for the use of the services of such universities for R&D activities.

Buildings used for approved R&D activities qualify for the industrial building allowance at the normal rate.

### Training

There is a double deduction for approved training expenditures incurred to train employees under an approved training programme. Manufacturing corporations with 50 or more Malaysian employees registered with the HRDF are not eligible for this incentive. These corporations are, however, eligible to seek financial assistance from the fund for training their employees.

Preoperating training expenses are also available as a double deduction to small and medium-scale manufacturing companies that are not registered with the HRDF. The normal deduction for preoperating training expenses may also be available to certain resident companies.

Training expenses incurred by employers for employees who complete certain courses, including aircraft maintenance engineering courses and post-graduate courses in ICT, are given double deduction (for YA 2009–2012).

### Approved service projects

A resident company undertaking a project in the service sector in relation to transport, communications, utilities, or other approved subsectors may elect to apply for an investment allowance or for an income tax exemption for a period of five years. The mechanisms for tax exemption and investment allowance are similar to those for PS and ITA, respectively.

Dividends paid out of exempt profits are exempt in the hands of shareholders.

Buildings used solely for the purposes of approved service projects qualify for an industrial building allowance.

### Foreign fund management company

A foreign fund management company providing fund management services to foreign clients is taxed at a concessionary rate of 10% in respect of the income derived from the management of foreign funds, while income arising from services rendered to clients in Malaysia is taxed at the prevailing corporate tax rate. Its income after deduction of tax at 10% may be distributed as tax-exempt dividends to its shareholders.

A foreign fund management company is a Malaysian incorporated company licensed under the Capital Markets and Services Act 2007. Its activities are regulated by the Securities Commission.

### Shipping

Tax-resident corporations and individuals carrying on shipping business are exempt from tax on income derived from the operation of Malaysian ships. Dividends distributed by a company qualifying for this incentive are exempt from tax in the hands of the shareholders.

### Export incentives

Partial tax exemption is granted at various rates for export-oriented companies. Manufacturing companies are eligible for exemption on profits after deduction of tax depreciation allowances on 10% (or 15%) of the value of the increase in the company's exports, provided it attains at least 30% (or 50%) value added. Companies exporting fruits and cut flowers or exporting selected services also enjoy an exemption on profits, after deduction of tax depreciation allowances, equivalent to 10% of the value of the increase in exports. Companies engaged in export of selected services are eligible for exemption on profits on 50% of the value of increased exports.

A Malaysian-owned manufacturing company may be granted exemption on profits, after deduction of tax depreciation allowance of an amount equal to 30% of the value of increased export value, provided it achieves a significant increase in exports. The rate is increased to 50% of the value of increased export for a company that succeeds in penetrating new markets. Full exemption on increased export value is granted if the company achieves the highest increase in export.

### Resource-based industries

Malaysian companies that are engaged in the manufacture of rubber, oil palm, and wood-based products that are of export potential may be granted the following tax incentives when they incur capital expenditures for the purpose of an expansion:

- Companies located outside promoted areas:
  - PS for five years (exemption is restricted to 70% of statutory income) or
  - ITA of 60% of qualifying capital expenditure incurred within five years (ITA is restricted to 70% of statutory income).
- Companies located within promoted areas (applications must have been made before 31 December 2010):
  - PS for five years (exemption of 100% of statutory income) or
  - ITA for five years (ITA of 100% of statutory income).

### Manufacturing-related services

Companies providing integrated logistics, marketing support, and utility services may be given the following incentives:

- Income tax exemption of 70% of statutory income for five years. The rate of exemption is increased to 100% of statutory income for projects located in areas designated as the eastern corridor of Peninsula Malaysia, Sabah, and Sarawak; or ITA of 60% of qualifying capital expenditure (QCE) incurred within five years of the date upon which QCE was first incurred, to be offset against 70% of statutory income. This ITA incentive is enhanced to 100% of QCE, to be offset against 100% of statutory income for projects in the eastern corridor of Peninsula Malaysia, Sabah, and Sarawak.
- Exemption from import duty and sales tax on equipment in the related projects.

### Offshore trading through websites in Malaysia

Income received by companies undertaking offshore trading (comprised of the buying and selling of foreign goods to non-residents) via websites in Malaysia is to be taxed at a reduced rate of 10% for a period of five years. The approval of the Minister of Finance must be obtained.

### Islamic banking and other Islamic financing activities

To further the government's objective of developing Malaysia into a leading international Islamic financial centre, the following incentives are available:

- Tax deduction is allowed for expenses incurred in the issuance of Islamic securities approved by the Securities Commission or by the Labuan Financial Services Authority until YA 2015 only.
- Full income tax exemption for ten years is granted to Islamic banks licensed under the Islamic Banking Act 1983 on income from Islamic banking business conducted in international currencies, and to takaful (Islamic insurance) companies on income from the takaful business conducted in international currencies. (Effective from YA 2007 until YA 2016.)
- Full income tax exemption on management fees received by local and foreign companies for managing funds of foreign and local investors established under Syariah principles is granted (effective from YA 2008 until YA 2016). Such funds must be approved by the Securities Commission.
- A special-purpose vehicle (SPV) established solely for the purpose of Islamic financing approved by the Securities Commission or one established under the Offshore Companies Act 1990 is not subject to income tax and is not required to comply with administrative procedures under the tax law. Deduction for the

cost of issuance of Islamic bonds is allowed for the company that established the SPV, which is also deemed to be the recipient of income received by the SPV and taxed accordingly.
- Expenses incurred prior to the commencement of an Islamic stock-broking company are allowed to be deducted, provided the company commences business within two years from the date of approval. (Available for applications to establish such a company that is received by the Securities Commission before 31 December 2015.)
- Double-tax deduction is granted for specified expenses incurred for the purpose of its business in promoting Malaysia as an international Islamic financial centre for YA 2008 until YA 2015.

### Real estate investment trusts (REITs)

REITs or property trust funds (PTFs) approved by the Securities Commission are exempted from income tax on chargeable income distributed to unit holders whereas its undistributed chargeable income is taxed at 25%. However, REITs/ PTFs are exempted from tax on all income, provided that at least 90% of their total income is distributed to unit holders. If the 90% distribution condition is not complied with, all income is taxed at the prevailing income tax rate and tax credit is claimed by the unit holders. Unit holders are taxed as follows:

| Unit holders | Income tax |
|---|---|
| Individuals (whether resident or non-resident), body of persons, or other unincorporated persons | Withholding tax (WHT) of 10% from 1 January 2009 to 31 December 2011. |
| Non-resident company | WHT at 25%. |
| Resident company | No WHT (income to be included in annual tax return) |
| Institutional investor (pension fund, collective investment scheme, or other person approved by the Minister of Finance) | WHT at 10% from 1 January 2009 to 31 December 2011. |

Other incentives available are:

- Real property gains tax exemption on disposal of real property to a REIT/PTF.
- Stamp duty exemption on transfer of real property to REIT/PTF.
- Tax deduction given for consultancy, legal, and valuation service fees incurred on the establishment of a REIT.

### Healthcare service providers

A tax exemption is granted to healthcare service providers on statutory income equivalent to 100% of the value of increased services (defined by legislation), but limited to 70% of statutory income (YA 2010 to 2014 only). Any unutilised allowance can be carried forward indefinitely for deduction in the future. Export income is income derived from providing healthcare services to foreign clients. ‘Foreign clients’ include entities such as a corporation or partnership registered outside Malaysia, or a non-Malaysian citizen (excluding those holding a Malaysian student pass or work permit and their dependents).

### Buildings awarded Green Building Index (GBI) Certificate

A person (resident in Malaysia) awarded a GBI certificate by the Board of Architects Malaysia from 24 October 2009 until 31 December 2014 is granted 100% allowance on qualifying expenditure incurred for the purpose of obtaining the GBI certificate, to be offset against 100% of statutory income.

### Forest plantations

The following incentives for forest plantations are available only for applications received no later than 31 December 2011.

- A company undertaking a new forest plantation project or an expansion forest plantation project which is an approved project is eligible for tax exemption of 100% of statutory income. The exemption period is ten years commencing from the first year of assessment (YA) in which the company derives income from the new forest plantation project, or five years in respect of an expansion project, commencing from the first YA in which the company derives income from the expansion project, and that first YA shall not be earlier than the YA in which the date of approval falls. Losses incurred before and during the exemption period are allowed to be carried forward for deduction in the post-exempt year and subsequently until fully utilised.
- A company undertaking its first forest plantation project for specified species of trees and has surrendered the losses from that project to one or more related companies (as defined by legislation) which is/are resident in Malaysia, is eligible for exemption from income tax on 100% of statutory income for ten years commencing from the first YA in which the company derived income from that project. Losses surrendered are allowed to be deducted from income of the related/claimant company, but any losses not surrendered in that YA will not be available to any claimant company for any subsequent YA.

### Export of financial services

Income tax exemption is granted to Malaysian banks, insurance companies, and takaful companies on profits of newly established branches overseas or income remitted by new overseas subsidiaries. The exemption period, which is five years, may commence from a date to be determined by the company but should not be later than the third year of operations. Applications to establish new branches or subsidiaries overseas should be received not later than 31 December 2015.

### Small and medium enterprises (SMEs)

Expenses incurred by SMEs on the registration of patents and trademarks are allowed as deduction against business income. The term SME must come within the definitions provided in specified legislation.

## *Withholding taxes*

Corporations making payments of the following types of income are required to withhold tax at the rates shown in the table below. *See Note 7 for other types of income.*

| Recipient | Dividends (%) (1) | Interest (%) (2) | Royalties and certain rentals (%) [--] (3, 4, 5) |

Notes

Rate for certain rentals is shown in parenthesis […] if different from royalty rate.

* Treaties pending ratification

Restricted tax treaties dealing with taxation of specific transport operations in international traffic have also been signed with Argentina and the United States.

1. A single-tier system of taxation came into force on 1 January 2008 which replaced the previous full imputation system. There is a six-year transitional period (until 31 December, 2013) for all companies to migrate to the single-tier system.
   Under the previous imputation system, dividends are franked with (deemed to be paid net of) the tax paid by corporations. If any dividend-paying corporation has not paid sufficient tax to cover the total tax deemed deducted from dividends, it must pay the balance of the tax to the tax authorities.
   Under the single-tier system, dividends are exempt in the hands of shareholders.
   Malaysia, at present, has no WHT on dividends in addition to tax on the profits out of which the dividends are declared. Some treaties provide for a maximum WHT on dividends should Malaysia impose such a WHT in the future.
2. Interest on loans given to or guaranteed by the Malaysian government is exempt from tax. Interest paid to a non-resident by a commercial or merchant bank operating in Malaysia is also exempt from tax.
3. Approved royalty payments under certain treaty provisions are exempt from WHT.
4. Other income:
   - Contract payments made by a person (including a partnership) to non-resident contractors (including professionals) in respect of services under a contract project are subject to a 13% deduction of tax (10% on account of the contractors' tax liability and 3% on account of their employees' tax liability). This deduction of tax at source does not represent a final tax, which is determined upon the filing of the tax return.
   - Payments made to non-residents in respect of the provision of technical services performed in Malaysia and rental of movable properties are subject to a 10% WHT (unless exempted under statutory provisions for purpose of granting incentives).

5. Royalty income received by non-resident franchisors under franchised education scheme programmes approved by the Ministry of Education is exempted from tax.
6. Royalty income does not include royalty paid in respect of motion picture films or tapes for television or broadcasting or of the operation of a mine, oil well, quarry, or any other place of extraction of natural resources or of timber or other forest products.
7. WHT is also applied in respect of income of a non-resident from sources other than the following:
   - Sources shown in the preceding table.
   - A business source.
   - An employment source.

   The rate of WHT on such income is 10%. This is applicable on payments made to residents of all the treaty partners previously listed, except for certain countries (including Germany, Turkmenistan, Bosnia & Hezegovinia, Senegal, and Jordan) where the respective double taxation agreements (DTA) have provided for such type of income to be taxed only in the contracting state in which the recipient is resident.

## *Tax administration*

Assessment of income is on a current-year basis. A company is taxed on income from all sources (whether business or non-business) arising in its financial year ending in the calendar year which coincides with that particular year of assessment. For example, a company that closes its accounts on 30 June of each year is taxed on income earned during the financial year ending on 30 June 2011 for the year of assessment 2011.

### *Returns*

Self-assessment for companies was implemented from the year 2001. Under the self-assessment system, companies are required to submit a return of income within seven months from the date of closing of accounts. Particulars required to be specified in the return include the amount of chargeable income and tax payable by the company. An assessment is deemed to have been made on the company upon submission of the return. The return is deemed to be a notice of assessment that is deemed to be served on the company upon the date the return is submitted.

'E-filing' or online filing of tax returns via the Internet is available. E-filing is encouraged by the Inland Revenue Board.

### *Payment of tax*

Tax payable under an assessment upon submission of a return is due and payable by the 'due date.' The 'due date' is defined as the last day on expiry of seven months from the date upon which the accounts are closed.

Companies are required to furnish estimates of their tax payable for a year of assessment no later than 30 days before the beginning of the basis period. However, from the year of assessment 2008, a newly established company with paid-up capital of MYR 2.5 million or less that meets with certain specified conditions is exempted from this requirement for two years, beginning from the year of assessment in which the company commences operation. A revised estimate can be submitted in the sixth and ninth months of the basis period for a year of assessment.

Companies are then required to pay tax by monthly instalments (based on the estimates submitted) commencing from the second month of the company's basis period (financial year).

From year of assessment 2011, a company commencing operations in a year of assessment is not required to furnish estimates of tax payable or to make instalment payments if the basis period for the year of assessment in which the company commences operations is less than six months.

## Significant developments

A number of changes to Maltese tax legislation were published in 2010.

In a Maltese domestic context, the new tax provisions introduce a number of anti-abuse provisions as well as some new taxing provisions. While many of these provisions target transactions in immovable property situated in Malta and companies owning such property, the new amendments also cover a number of other important aspects from a Maltese domestic tax perspective.

Some other rules dealing with international tax matters have also been introduced. The main purpose of these rules is to further facilitate the use of Malta as a financial services centre, thus demonstrating Malta's continuing commitment to remaining an attractive jurisdiction of choice for investors.

The new innovative provisions include, among others, the following:

- An option for a step-up in the cost of acquisition of assets situated outside Malta owned by persons (including companies) effecting a change in domicile or residence or becoming Maltese companies as a result of cross-border mergers.
- An exemption for royalties derived from qualifying patents with respect to inventions and which satisfy the applicable conditions.
- Provisions that any income derived from the ownership, use, or lease of aircraft when such aircraft is employed for international transport shall be deemed to arise outside Malta and hence outside the Maltese tax base, irrespective of the country of incorporation of the aircraft or whether the aircraft calls or operates from Malta. Such new provisions are intended to facilitate the use of Malta for international aviation activities.
- Extension of the Maltese tonnage tax regime to cover qualifying non-Maltese-flagged vessels and ship management activities.
- Legislation providing for the taxation of private foundations that complements the Private Foundation Law embodied within Maltese Civil law.

The exchange of information provisions under Maltese tax law have been extended in order to be more in line with those contained in the Organisation for Economic Co-operation and Development (OECD) Model Tax Convention.

The Value-added Tax (VAT) Act has been amended in line with the provisions of Council Directive 2008/8/EC (i.e. bringing into force new place of supply rules). Such amendments became effective as of 1 January 2010.

## Taxes on corporate income

Companies are subject to income tax at a flat rate of 35%. There is no corporation tax structure separate from income tax.

A company incorporated in Malta is considered as both domiciled and resident in Malta and consequently taxable on a worldwide basis. A non-Maltese incorporated company which is resident in Malta through management and control is subject to Maltese tax on income arising in Malta and on income received in/ remitted to Malta.

### Petroleum profits tax

Petroleum profits tax is levied as income tax with similar deductions being allowed in respect of incurred expenditure. In the case of a Production Sharing Contract signed after 1 January 1996, any petroleum profits are taxed at the standard corporate tax rate of 35%. However, all other petroleum profits are subject to a 50% tax rate.

### Insurance profits tax

Insurance profits tax is levied as income tax and subject to the normal standard tax rate of 35% as other corporate profits; however, the manner in which such profits are ascertained is subject to a number of detailed rules which take into account the special nature of the insurance industry. In the case of non-resident companies, the computation is applied with reference only to business carried on in or from Malta.

## Corporate residence

All companies incorporated in Malta are considered to be both domiciled and resident in Malta. Other bodies of persons (including companies incorporated overseas) are considered to be resident in Malta when the control and management of their business are exercised in the country.

## Other taxes

### Value-added tax (VAT)

Supplies of goods and services in Malta are subject to VAT at the standard rate of 18% (5% on accommodations in hotels and licensed premises, supply of electricity, works of art, collector's items and antiques, certain confectionery, medical accessories, printed matter, and items for exclusive use by the disabled). Exports to countries outside the European Union, food, and certain other goods and services are exempt from VAT and provide a right to credit of VAT remitted.

### Customs and excise duties

Goods imported from outside the European Union may be subject to customs duties. A Customs Code provides for customs procedures and concepts, which are based on European Community requirements.

Excise duties are chargeable on certain energy products, certain alcoholic drinks, certain manufactured tobacco products, and mobile telephony services at a 5% rate (although other rates may apply in different circumstances).

### Employer’s social security contributions

Employers are obliged to pay social security contributions at the rate of 10% of the individual employee’s salary and at fixed rates of 35.39 euros (EUR) per week for annual salaries exceeding EUR 18,400, provided the employee is born on or after 1 January 1962.

### Stamp duty

Stamp duty is charged on, among other transactions, transfers of immovable property (5% for both residents and non-residents) and marketable securities (2%; 5% in the case of transfers of shares in property companies). Furthermore, in the event that the market value of shares held by a person is reduced following a change in the company’s issued share capital or voting rights and the value shifts onto the other shareholders, the transferor would be deemed to have transferred the said value to the transferee(s) and such value shifting may be subject to a stamp duty liability (although certain exceptions/exemptions may apply).

Maltese legislation also provides for the possibility of a stamp duty exemption in a number of instances, subject to the satisfaction of certain conditions. Some of the more commonly availed of exemptions include the acquisition or disposal of marketable securities by or in the following: (i) licensed collective investment schemes; (ii) licensed persons providing management, administration, safekeeping or investment advice to collective investment schemes; (iii) companies being owned as to more than 50% by non-Maltese residents and satisfying certain other conditions; and (iv) a company that carries on or intends to carry on more than 90% of its business outside of Malta.

## Branch income

The tax rate on branch income is the same as that for resident companies. Other than the tax charged on a branch’s income, no tax is withheld on transfers of profits to the head office.

## Income determination

### Inventory valuation

Inventory valuations are generally made at the lower of cost or market value. In general, the book and tax methods of inventory valuation will conform. However, the last in first out (LIFO) method is not accepted for taxation purposes. Obsolescence is accepted where proven, but there are no provisions to take into account the effects of monetary inflation on the inventory valuation.

### Capital gains

Tax is chargeable on capital gains realised on the transfer of immovable property (real estate), shares and other securities, business goodwill, business permits, copyrights, patents, trade names, trademarks, interests in a partnership, and beneficial interests in a trust. In the case of transfers of immovable property, a final withholding tax of 12% on the transfer value applies. Note that there are certain cases where the 12% final withholding tax on the transfer value may not apply, and the transfers would be subject to the normal tax on capital gains regime with the chargeable profit being taxed at the taxpayer’s applicable rate(s).

No tax is levied on investments that yield a fixed rate of return. A tax exemption applies in certain instances and subject to the satisfaction of certain conditions on the capital gain arising on the transfer of shares in a company listed on a recognised stock exchange other than shares held in certain collective investment schemes. If the capital gain arising on the transfer of listed shares is subject to tax, then special rules apply with respect to the calculation of the gain and such gain would be subject to tax separately at the rate of 15%.

Subject to the satisfaction of certain conditions, if the asset is transferred between group companies, no loss or gain is deemed to arise from the transfer. Note that a provision has been enacted to bring to charge the transfer of shares in property companies (as specifically defined) that were originally subject to intra-group tax deferral when the transferor and the transferee cease to be members of the original group within six years from the date of such intra-group transfer.

Gains realised from the transfer of other assets fall outside the scope of the tax. Gains arising outside Malta and derived by a company that is either not domiciled or not ordinarily resident in Malta are not subject to tax. There are also a number of exemptions provided in the law. For example, capital gains realised by non-residents on transfers of units in Maltese collective investment schemes, similar investments relating to linked long-term insurance business and shares, or securities in Maltese companies (except for companies holding certain Maltese immovable property) are exempt from tax.

### *Rollover relief*

Rollover relief is granted with respect to capital assets used in a business for a period of at least three years and which are transferred and replaced within one year by an asset used solely for similar business purposes (i.e. no tax is chargeable on the capital gain). In such instances the cost of acquisition of the new asset is reduced by the gain on the transfer of the previous asset which would otherwise have been taxable.

Maltese tax law also provides for the surrendering and claiming of allowable losses between companies that form part of the same group *(see Group taxation for more information)* as well as for reorganisation relief, subject to certain specific conditions.

### *Dividend income*

Dividends received by one resident company from another, whether or not a subsidiary, are taxable on the gross amount in the recipient's hands. If the distributed profits have been taxed, no further tax should be chargeable to the recipient company. However, for resident shareholders, if the corporate rate of tax in the year in which the profits are earned is lower than that in the year in which they are distributed, an amount equivalent to the difference in rates (topping up) is payable. If the distribution is made from untaxed income, the dividend would be tax-free in the hands of the recipient company.

Dividends and gains on disposal of shares received by a corporate investor from a non-resident company (or from a non-resident limited partnership) may qualify for a participation exemption in Malta, subject to the satisfaction of certain statutory conditions.

The participation exemption may also apply to gains upon the disposal of equity holdings in Maltese-resident entities. Distributions of taxed income by Maltese-resident companies are not subject to further tax under the full imputation system.

### Stock dividends

A Maltese company may distribute bonus shares from profits, whether of an income or capital nature, and from share premium and capital redemption reserves. When bonus shares represent a capitalisation of profits, they are deemed to be dividends for tax purposes. Such bonus shares are subject to tax in the recipients' hands, gross of any tax paid at the corporate level on the relative profits, but tax credits equivalent to the gross-up of tax are available to stockholders.

### Foreign income

A company is taxable on its worldwide income when it is ordinarily resident and domiciled in Malta. A company that is either not ordinarily resident or not domiciled in Malta is taxable on its foreign income only insofar as such income is remitted to / received in Malta. Foreign tax is relieved by way of tax credits. This may occur under the terms of a double taxation treaty. Where no treaty exists, the foreign tax can be relieved through a system of unilateral relief. Relief for underlying tax is also granted with respect to dividend income, either in terms of a double taxation treaty or as unilateral relief. Such relief may be available if, among other things, evidence of tax paid abroad is produced.

Profits of Malta resident companies are subdivided for Maltese tax purposes into five accounts: the Immovable Property Account, the Final Tax Account, the Maltese Taxed Account, the Untaxed Account, and the Foreign Income Account. The last of these includes, among other things, taxable profits of Maltese-resident companies resulting from foreign investments; profits of a foreign permanent establishment; and profits resulting from foreign investments, assets, or liabilities of an onshore bank licensed in Malta. Income allocated to the Foreign Income Account for which no evidence of tax paid abroad is available can qualify for a flat-rate foreign tax credit of 25%.

The Immovable Property Account would include profits and income derived directly or indirectly from immovable property situated in Malta. The Final Tax Account would include, among other items, profits that have been subject to a final tax at source or were exempt from tax and such exemption is extended to shareholders upon a distribution of such profits. The Maltese Taxed Account would include any other taxed profits while the Untaxed Account would represent the difference between the distributable profits and the profits allocated to the other taxed accounts.

Under Malta's system of taxation of dividends, shareholders receiving distributions from the Maltese Taxed Account and/or the Foreign Income Account may be entitled to a tax refund of part or the full tax paid by the distributing Maltese company on such profits being distributed. The tax refund may be either a six-sevenths refund, a five-sevenths refund, a two-thirds refund, or a full refund of the tax suffered by the Maltese distributing company on the distributed profits. The type of the tax refund depends on the nature of the income to be distributed.

No anti-controlled foreign company rules or legislation are applicable in Malta.

## Deductions

The basic condition for deductibility of expenses is that deductions are allowable only with respect to expenditures which are wholly and exclusively incurred in the production of income.

The Income Tax (Deductions) Rules of 2001 provide for specific conditions on deductions with respect to the use of cars and the payment of employee compensation. The cost on which capital allowances on certain motor vehicles may be claimed is restricted to EUR 7,000 (increased to EUR 14,000 for year of assessment 2011). Deductions for lease payments on cars are restricted in a manner that corresponds with the stated restriction of EUR 7,000 (increased to EUR 14,000 for year of assessment 2011) that applies to capital allowances on owned cars. With respect to payment of employee compensation, the Deduction Rules require that in order for employee compensation to be allowed as a deduction for tax purposes in the hands of the employing company, it must have been duly accounted for. In particular, the employee compensation must have been reported on the appropriate forms and within the statutory time limit to the Office of Inland Revenue. The rules also provide for restrictions on deductibility of emoluments with respect to the payment of certain fringe benefits to employees.

### *Depreciation and depletion*

Tax depreciation is computed on the straight-line method. The rate of depreciation on plant and machinery varies according to the category of the plant and machinery in question.

Maltese tax law prescribes the minimum number of years over which items of plant and machinery are to be depreciated as follows:

| Category | Years |
|---|---|
| Computers and electronic equipment | 4 |
| Computer software | 4 |
| Motor vehicles | 5 |
| Furniture, fixtures, fittings, and soft furnishings | 10 |
| Equipment used for constructions of buildings and excavation | 6 |
| Catering equipment | 6 |
| Aircraft – aircraft airframe | 6 |
| Aircraft – engines | 6 |
| Aircraft – engine or airframe overhaul | 6 |
| Aircraft – interiors and other parts | 4 |
| Ships and vessels | 10 |
| Electrical and plumbing installations and sanitary fittings | 15 |
| Cable infrastructure | 20 |
| Pipeline infrastructure | 20 |
| Communications and broadcasting equipment | 6 |
| Medical equipment | 6 |
| Lifts and escalators | 10 |
| Air-conditioners | 6 |
| Equipment mainly designed or used for the production of water or electricity | 6 |
| Other machinery | 5 |
| Other plant | 10 |

The wear and tear rate on industrial buildings and structures (including hotels) may not exceed 2% per annum. New acquisitions of industrial buildings and structures are entitled to a concurrent extra 10% allowance in the year of acquisition. Tax depreciation is not required to conform to book depreciation.

The total allowances over the asset's useful life may not exceed 100% of its cost. If a surplus arises on disposal of a tax-depreciated asset, it is either added to the year's income or utilised to reduce the cost of any replacement. If the asset has been under-depreciated, a balancing allowance is granted.

No deduction is available for the depletion of natural resources.

The rules on tax deductions for wear and tear of plant and machinery provide for certain specific treatment in particular situations including, among other things, the following:

- To establish the cost of an asset when it is transferred between related companies, the lower of the actual cost of the asset or the tax written-down value adjusted by any balancing charge or allowance incurred by the transferring company should be applied.
- Deductions for wear and tear are allowed only where proper records and documentation have been kept that support the cost of the respective assets.
- A proportional deduction is allowed where an asset is used partly in the production of income and partly for other purposes.

### *Other significant items*
Capital expenditures on scientific research, patents, and intellectual property rights are written off over a number of years. In the case of scientific research, a deduction may be granted at 150% of the expenditure. Certain pre-trading expenses are also allowed as a deduction, subject to the satisfaction of certain statutory conditions.

### *Net operating losses*
Net operating losses may be carried forward indefinitely until absorbed. There is no carryback of losses, not even in terminal years. Unabsorbed capital allowances may be carried forward only against the same underlying source of income. Where the source ceases to exist, any remaining balance of unabsorbed capital allowances is lost.

### *Payments to foreign affiliates*
There are no restrictions on the deductibility of royalties, interest (except for interest, discount, or premium which are in any manner connected to Maltese immovable property and subject to the satisfaction of certain other statutory conditions, in which case, the interest/discount/premium should not be tax deductible in Malta), and service fees paid to foreign affiliates as long as the particular expenses are considered to be incurred in the production of the particular income and satisfy the applicable statutory conditions. Interest, discount, premium, or royalties derived by non-residents are exempt from tax, subject to the applicable statutory requirements.

## *Group taxation*

Two companies that for tax purposes are resident exclusively in Malta, where one company is a 50% plus subsidiary of the other or both are 50% plus subsidiaries of a third Malta-resident company, qualify as members of a group of companies. Allowable losses may be surrendered by a company to another company within the group where both companies have concurrent accounting periods and form part of such group throughout the entire basis year for which this relief is claimed; however, such surrendering of losses may not occur where the surrendering or claimant company is carrying on the business of insurance. Each company must file a separate tax return, and no combined grouping or consolidated returns are permitted.

## Tax credits and incentives

### Foreign tax credit

A credit for foreign taxes may be applied against the Maltese tax charge *(see Foreign income in the Income determination section for more information).*

### Inbound investment

Investments by foreigners may be readily repatriated together with profits.

The Malta Enterprise Act and other related legislation provide a comprehensive package of incentives for inbound investment. These incentives are reserved for enterprises carrying on certain activities in Malta, mainly manufacturing activities. The focus is on high-value-added activities, and approval of a project's eligibility for benefits by the Malta Enterprise may be required. In general, eligibility does not depend on whether the company produces for the local or for export markets. The main tax incentives include the following:

- Enterprises carrying out qualifying activities, which mainly include manufacturing activities, qualify for investment tax credits whereby a percentage of up to 30% (50% in the case of small-sized enterprises and 40% in the case of medium-sized enterprises) of qualifying expenditures are off-set against the tax charge (not against taxable income). Any unused credits are carried forward and added to the credits for subsequent years. The amount carried forward is increased by a percentage rate which is based on EU parameters as updated from time to time.
- Certain tax credits and special incentives may be available, subject to certain conditions. These tax credits are calculated on the basis of specific expenditures incurred by a company while the special incentives grant tax exemptions on all or part of the chargeable income in specified circumstances.
- No further tax is charged on distributions from profits that had previously been taxed at a reduced rate. This benefit is also extended to amounts that were not subject to tax on account of the investment allowance, investment tax credits, and specific tax credits/special incentives.
- A 15.75% tax rate is applicable to profits reinvested in the enterprise, pursuant to a project approved by the Malta Enterprise.
- The combination of certain tax treaties and Maltese domestic law lowers the Maltese tax rate on certain companies receiving certain industrial assistance (i.e. mainly assistance in terms of the Business Promotion Act and Business Promotion Regulations) to 15%.

### Capital investment

In the case of qualifying companies, an investment allowance of 50% on plant and machinery and of 20% on industrial buildings and structures may be available (subject to certain capping rules), bringing the total allowances granted during the lifetime of the assets up to 150% and 120%, respectively. Apart from the investment allowances, normal allowances for wear and tear are also available on such assets *(as set out under the heading Depreciation and depletion in the Deductions section).*

### Shipping profits

A beneficial tonnage tax regime is applicable under Maltese law. Such regime covers profits from shipping activities as defined under the applicable regulations which are derived by qualifying Maltese-flagged and EU / EEA vessels as well as non-EU / EEA vessels satisfying certain additional rules. Furthermore, qualifying ship management activities are also entitled to the benefits of the tonnage tax regime. Profits qualifying under the tonnage tax regime may also be distributed tax-free. The related company shares are exempt from the provisions of the Duty on Documents and Transfers Act (stamp duties).

### *International business profits*

Tax benefits are available for shareholders with respect to distributions by such companies of specified types of income. A beneficial tax regime is also available in respect of collective investment schemes.

The Maltese fiscal implications relative to trusts vary, depending on a number of circumstances including: (i) the particulars of the parties involved (e.g. domicile or residence of the trustees or beneficiaries); (ii) the act or event under review (e.g. the settlement of property, transfers of beneficial interests, distributions of trust assets); and (iii) the nature of the trust assets. Furthermore, in certain circumstances, tax transparency provisions are set out in the law, particularly so as to allow, among other things, the application of tax exemptions that would have applied to beneficiaries if there was no trust relationship.

## *Withholding taxes*

Domestic corporations paying certain types of income are subject to deduction of tax-at-source obligations as follows:

| Recipient | Dividends (1) (%) | Interest (%) | Royalties (%) |
|---|---|---|---|
| Resident corporations | 35 | 35 (2) | 0 |
| Resident individuals | 35 | 25 (2) | 0 |
| Non-resident corporations: | | | |
| Non-treaty | 35 | 0 (3) | 0 (3) |
| Non-resident individuals: | | | |
| Non-treaty | 35 | 0 (3) | 0 (3) |
| Non-resident corporations and individuals: | | | |
| Treaty | (4) | 0 (3) | 0 (3) |
| Albania | 35 | | |
| Australia | 35 | | |
| Austria | 32.5 | | |
| Barbados | 35 | | |
| Belgium | 35 | | |
| Bulgaria | 30 | | |
| Canada | 35 | | |
| China, P.R. | 35 | | |
| Croatia | 35 | | |
| Cyprus | 35 | | |
| Czech Republic | 35 | | |
| Denmark | 35 | | |
| Egypt | 35 | | |
| Estonia | 35 | | |
| Finland | 35 | | |
| France | 35 | | |
| Germany | 35 | | |
| Georgia | 35 | | |

| Recipient | Dividends (1) (%) | Interest (%) | Royalties (%) |
|---|---|---|---|
| Greece | 35 | | |
| Hungary | 35 | | |
| Iceland | 35 | | |
| India | 35 | | |
| Ireland | 35 | | |
| Isle of Man | 35 | | |
| Italy | 35 | | |
| Jersey | 35 | | |
| Jordan | 35 | | |
| Korea, Rep. of | 35 | | |
| Kuwait | 10/15 | | |
| Latvia | 35 | | |
| Lebanon | 35 | | |
| Libya | 15 | | |
| Lithuania | 35 | | |
| Luxembourg | 35 | | |
| Malaysia | 35 | | |
| Montenegro | 35 | | |
| Morocco | 35 | | |
| Netherlands | 35 | | |
| Norway | 35 | | |
| Pakistan | 35 | | |
| Poland | 35 | | |
| Portugal | 35 | | |

| Romania | 30 | | |
| San Marino | 35 | | |
| Serbia | 35 | | |
| Singapore | 35 | | |
| Slovakia | 35 | | |
| Slovenia | 35 | | |
| South Africa | 35 | | |
| Spain | 35 | | |
| Sweden | 35 | | |
| Syria | 35 | | |
| Tunisia | 35 | | |
| United Arab Emirates | 35 | | |
| United Kingdom | 35 | | |
| United States | 35 | | |

Notes

Treaties relating to international air and shipping traffic are in force with Switzerland and the United States. The numbers in parentheses refer to the following notes:

1. Malta makes no distinction between portfolio and substantial holdings. The tax at source is not a withholding tax because no additional tax is imposed on distributions other than the tax charged on the company with respect to distributed profits. Under Malta's full-imputation system of taxation of dividends, the corporate tax is assimilated with the personal income tax of the shareholder with respect to the dividend. In the shareholder's hands, the dividend is taxed at the gross amount, and the relevant amount of corporate tax offsets the shareholder's tax liability on income from all taxable

sources. Special provisions exist for taxation of distributions from income that would not have suffered tax at the corporate level.
2. Withholding of tax may be required only where the interest is debenture interest or interest on any other loan advanced to a corporation for capital purposes. The withholding tax is in effect a prepayment of the recipient's final liability because a reassessment on income is made upon the submission of returns. Any resulting overpayment is refunded.
3. Interest and royalty income derived by non-residents is exempt from tax in Malta as long as certain conditions are complied with (e.g. they are not effectively connected to a permanent establishment of the recipient situated in Malta).
4. Under its treaties, Malta retains the right to tax dividends at a rate not exceeding that paid by the company in question on the profits out of which the dividends are distributed. This rate is currently 35% (in certain treaties, for example those with Austria, Bulgaria, Kuwait, Libya, and Romania, the maximum tax is set at a lower rate). In a number of treaties, the rate of deduction and of tax is reduced to 15% in the case of companies enjoying certain tax incentives. *See also Note 1 with respect to Malta's full-imputation system of taxation of dividends.*

## *Tax administration*

### *Returns*

An income tax return for income earned during the previous year must be filed for every year of assessment. The year of assessment is a calendar year, but a company may obtain authorisation from the Maltese Revenue to have a different year end (i.e. other than 31 December). Companies pay tax in the currency in which their share capital is denominated. The tax return for a company must be submitted by the later of nine months following the end of the financial year or by 31 March following the year of assessment (however, in recent years the Commissioner of Inland Revenue has provided concessionary extensions to such statutory deadlines in the case where the tax return is submitted electronically). Penalties are incurred on late filing of returns. The tax return submitted by the company is a self-assessment, and the Commissioner of Inland Revenue will not raise an assessment unless there is not agreement with the self-assessment.

### *Payment of tax*

During the basis tax year, a company is generally required to make provisional tax (PT) payments every four months. In general, the PT payments are based on the last self-assessment filed by the company, and payments are divided into three instalments of 20%, 30%, and 50%, respectively. Any tax liability that is still due at the tax return date after deducting all tax credits must be settled immediately with the submission of the return. Interest at 0.75% per month is charged on any unpaid tax.

In certain instances, especially for companies with mostly international operations, PT may not be payable, and the tax payment is normally paid on the earlier of the date profits are distributed or 18 months after the end of the relative accounting period.

The employer is required to withhold income tax and social security contributions from employees' salaries and pass on such tax / contributions to the Office of Inland Revenue. This system of withholding tax at source is referred to as the Final Settlement System (FSS), and the employer is legally required to operate such a system. The salary from which the withholding is to be effected should also include the value of any taxable fringe benefits. There are three main categories of fringe benefits: (i) use of motor vehicles; (ii) use of other assets including accommodation; and (iii) other benefits. The method of valuation in each case varies, and the employer is required to refer to the Fringe Benefits Regulations (and also to the fringe benefits guidelines) so as to calculate the correct value of any fringe benefits being provided to the employees and to deduct the right amount of tax accordingly.

## Significant developments

### Gains on immovable property

As of 1 January 2011, a company or trust shall be taxable at the rate of 15% and 10% respectively on any gains from the sale or transfer of immovable property exceeding 2 million Mauritian rupees (MUR).

An entity will be taxable at 15% on any income derived from property business forming part of its non-current assets.

*See Tax on gains from the sale or transfer of immovable property in the Other taxes section for more information.*

### Special levy on banks

The increased rates of the special levy on banks have been extended by a further two years. These rates are as follows:

| Year of assessment commencing | Rates |
|---|---|
| 1 January 2011 | 3.4% on book profit<br>1.0% on operating income |
| 1 January 2012 | 3.4% on book profit<br>1.0% on operating income |
| 1 January 2013 and subsequent years | 1.7% on book profit<br>0.5% on operating income |

### One-off charge on banks

Every bank, except the Development Bank of Mauritius, shall create a one-off charge in the year preceding the year of assessment 2012, where the basis of calculation is:

- 0.5 % of the turnover and
- 1.25% of the book profit relating to the banking transactions with persons, other than non-residents and companies holding a Global Business Licence.

The fund created shall be used to finance the new equity fund referred to in the Ministry's document entitled 'Facing the Euro Zone Crisis and Restructuring for Long Term Resilience' during the year immediately preceding the year of assessment 2012.

Where the amount used to finance the private equity fund is less than the one-off charge, the difference shall be remitted to the Mauritius Revenue Authority (MRA) on submission of the return for the year of assessment 2012.

### *Global Business Category 1 (GBC1) companies*
A GBC1 company shall be allowed to conduct business in Mauritius, and the local source income shall be subject to income tax at 15%.

Where a GBC1 company derives both local and foreign source income, it shall submit together with its annual return a certificate from the auditor certifying that such expenditure or loss has been apportioned in a fair and reasonable manner with respect to the local and foreign source income.

### *Capital Allowances*
Effective from the income year commencing on 1 January 2011, capital allowances on motor cars, except for a person carrying on the business of tour operator and car rental, shall not exceed MUR 3 million.

### *Royalty withholding tax (WHT)*
From the year of assessment commencing 1 January 2011, Mauritius-source royalties payable to a non-resident will be subject to a tax deduction at the rate that is the lower of 15% or the rate specified in the double taxation convention in place between Mauritius and the foreign country where the payee is resident. The WHT will be deemed to be the final tax payable in Mauritius. This does not apply to GBC1 companies paying royalties out of foreign source income.

### *Submission date*
The submission date for companies with a due date of 31 December for advance payment system statements or final tax returns has now been brought forward by two working days prior to 31 December.

## *Taxes on corporate income*

Resident companies are taxed on their worldwide income whereas non-resident companies are taxed only on income derived from Mauritius.

Income tax is payable on total net income before distribution at the following rates:

| Entity | Rate (%) |
|---|---|
| Global Business Category 1 (GBC1) companies and offshore trusts | 15 |
| Private freeport developers and operators carrying on activities other than processing | Exempt (until 31 December 2013)* |
| Third-party Freeport developers and operators carrying on processing activities | 15 |
| All other companies | 15 |

* The normal tax rate will then apply after the exemption period.

Global Business Category 2 (GBC2) companies incorporated under the laws of Mauritius are exempt from income tax. *See the Tax credits and incentives section for more information on GBC1 companies, GBC2 companies, and freeport developers.*

Companies paying or declaring dividends must either pay tax computed in accordance with normal rules or pay an alternative minimum tax (AMT), whichever is higher.

### *Alternative minimum tax (AMT)*
AMT is calculated where the normal tax payable for an income year by a company is less than 7.5% of its book profit. The AMT is the lesser of 7.5% of its book profit or 10% of dividends declared in respect of that year.

Book profit is the profit computed in accordance with internationally accepted accounting practices, excluding:

- dividends received from resident companies
- profits or loss on disposal of fixed assets, and
- profits or gains or loss from sale of securities.

AMT does not apply to the following:

- Companies which have not declared any dividend.
- Companies which are exempt from payment of tax.
- GBC 1 companies.
- Where the amount representing 10% of dividends declared does not exceed the normal tax payable.

### *Special levy on banks*
The increased rates of the special levy on banks have been extended by a further two years. These rates are as follows:

| Year of assessment commencing | Rates |
|---|---|
| 1 January 2011 | 3.4% on book profit<br>1.0% on operating income |
| 1 January 2012 | 3.4% on book profit<br>1.0% on operating income |
| 1 January 2013 and subsequent years | 1.7% on book profit<br>0.5% on operating income |

### *One-off charge on banks*
Every bank, except the Development Bank of Mauritius, shall create a one-off charge in the year preceding the year of assessment 2012, where the basis of calculation is:

- 0.5 % of the turnover and
- 1.25% of the book profit relating to the banking transactions with persons, other than non-residents and companies holding a Global Business Licence.

The fund created shall be used to finance the new equity fund referred to in the Ministry's document entitled 'Facing the Euro Zone Crisis and Restructuring for Long Term Resilience' during the year immediately preceding the year of assessment 2012.

Where the amount used to finance the private equity fund is less than the one-off charge, the difference shall be remitted to MRA on submission of the return for the year of assessment 2012.

### *Local income taxes*
Local income taxes levied by local administration, such as urban councils, do not exist in Mauritius.

## Corporate residence

A company incorporated in Mauritius is resident in Mauritius for tax purposes.

A company not incorporated in Mauritius is resident in Mauritius only if it is centrally managed and controlled in Mauritius. A GBC2 company is not considered a resident in Mauritius for the purposes of double taxation treaties (DTTs).

## Other taxes

### Value-added tax (VAT)

VAT is charged by VAT-registered entities at the standard rate of 15% on all goods and services supplied by them, other than the following exempt supplies:

- Rice, bread, butter.
- Medical, hospital, and dental services, including clinical laboratory services, services provided in a health institution other than cosmetic surgery services, and veterinary services.
- Educational and training services provided by institutions approved by the Mauritius Qualification Authority.
- Construction of building for residential purpose, provided letter of intent relating to an Integrated Resort Scheme was issued prior to 1 October 2006.
- Sale or transfer of an immovable property, a building or part of a building, apartment, flat, or tenement.
- Banking services except:
  - services provided to merchants accepting credit/ debit card
  - services in respect of safe deposit locker, issue and renewal of credit/debit cards
  - services for keeping and maintaining customer's accounts, and
  - services supplied by a bank holding a banking licence under Banking Act 2004 in respect of its banking transactions with non-residents and corporations holding a Global Business Licence.

An entity should register for VAT if turnover exceeds MUR 2 million a year. However, certain service providers (e.g. accountants and auditors, attorneys and solicitors, consultants, surveyors, valuers) should register for VAT irrespective of their turnover.

### Tax on gains from the sale or transfer of immovable property

As of 1 January 2011, a company or trust shall be taxable at the rate of 15% and 10% respectively on any gains from the sale or transfer of immovable property exceeding MUR 2 million.

An entity will be taxable at 15% on any income derived from property business forming part of its non-current assets.

The tax on gains will be payable at the time the income tax return of the company is being filed with the MRA. The gains are computed by deducting the following from the proceeds:

- Cost of the acquisition.
- Any capital expenditure incurred on the immovable property.
- Any land transfer tax paid under the Land (Duties and Taxes) Act (LDTA) on the sale.
- Any cost in connection with the sale.

If immovable property was acquired before 1 January 1988 and a building was constructed thereon before 1988, the original cost of the building will be increased in accordance to the table below:

| Year of acquisition | Cost increased by a multiplying factor of |
|---|---|
| Up to 1963 | 7.5 |
| 1964 to 1968 | 7.0 |
| 1969 to 1973 | 6.0 |
| 1974 to 1978 | 3.0 |
| 1979 to 1983 | 1.5 |
| 1984 to 1987 | 1.1 |

In cases where the acquisition cost of land or any other immovable property is not known and that property is now being sold or transferred, the proceeds from the sale or transfer will be discounted according to the following table:

| Year of acquisition | Discount the proceeds by a multiple of |
|---|---|
| Up to 1988 | 0.25 |
| 1989 to 1993 | 0.30 |
| 1994 to 1998 | 0.45 |
| 1999 to 2003 | 0.60 |
| 2004 to 2010 | 0.85 |

If a company owns immovable property, the value of which exceeds 95% of the value of its total assets and who transfers its shares resulting in a change of control of that company or any increase in the shareholding of the controlling shareholder within a period of 12 months from the date of change of control, then the gains derived from the transfer of those shares will be subject to tax as per the following formula:

(Number of shares transferred / Total number of shares issued) x Gains

The value of the immovable property at the time of the transfer of shares are normally deemed to be the value disclosed in the statement of financial position of the company immediately preceding the transfer.

It is specified in the law that the gains derived from the transfer of shares will apply only where the value of the immovable property exceeds 95% of its total assets. In cases where the company owns immovable property not exceeding 95% of the value of its total assets, the gains on the transfer of shares will not be subject to tax.

'Total assets' has not been defined in the laws and therefore has the same meaning as per International Financial Reporting Standards. As per Statement of Financial Position (presented as per IAS 1), total assets is determined according to the following formula:

Total assets = Non-current assets + Current assets

It should be highlighted that the provision applies in case of a company dealing in immovable property. It does not apply to transfer of shares in a company whose subsidiary owns immoveable property.

Any gains derived from the sale or transfer of property between groups of companies and gains derived by a bank from the sale or transfer of an immovable property pursuant to an arrangement entered into between the bank and the person, whereby the bank initially purchased the property with a view to selling to the same person, are exempt from capital gains tax.

### *Customs duties/import tariffs*
There is import duty on all dutiable goods landed in Mauritius. The duty payable on any dutiable goods will be according to the Customs Tariff Act (CTA) at the time the bill is validated at the Customs. The Mauritius customs tariff schedule is comprised of only nine bands of tariff ranging from 0% to 80%.

### *Excise taxes*
An excise duty is chargeable on all excisable goods. Excisable goods are specific goods which are listed in Schedule 1 of Excise Act 1994 (e.g. spirits, vehicles, petroleum products).

### *Stamp duty*
Stamp duty is levied and paid to the Registrar General on every document at the time of registration, transcription, inscription, or erasure of inscription. Stamp duty varies from MUR 25 to MUR 500.

### *Morcellement tax*
A capital gains (morcellement) tax is payable by every landowner who parcels out land. The tax is calculated on the excess, if any, of the sale price over the aggregate of the amounts of purchase price and the cost of infrastructure works.

### *Land development tax*
Land development tax is payable by every person who parcels out land.

## *Branch income*

Tax rates on branch income are the same as on corporate profits. No tax is withheld on the remittance of profits to a head office.

## *Income determination*

### *Inventory valuation*
Inventories should be valued at the lower of historical cost or net realisable value. The last in first out (LIFO) basis of valuation is not allowed for tax purposes.

Conformity is required between book and tax reporting. Where the revenue authority is not satisfied that the basis of valuation is acceptable (e.g. where the LIFO basis has been applied) it will make such adjustment as it believes is appropriate to determine the profits arising from the business carried on.

### *Capital gains*
There is no tax on capital gains in Mauritius. Therefore, any gains from dealings in units and securities are not taxable. Any gains derived from the sale of shares held for more than six months are classified as capital gains and therefore not taxed in Mauritius

However, gains realised from the sale of any property or interest in property acquired in the course of a business, the main purpose of which is the acquisition and sale of property as part of a profit-making undertaking or scheme, are taxable as ordinary income. Where a transaction is in the nature of trade, the revenue authority may take the view that it is an ordinary trading transaction and assess the gains derived as income.

*See Tax on gains from the sale or transfer of immovable property and Morcellement tax in the Other taxes section for other exceptions to the capital gains exemption.*

### *Dividend income*
Companies, whether resident or not, are exempt from tax on dividends received from resident companies.

### *Stock dividends*
A resident company can distribute stock dividends (bonus shares) proportionately to all its shareholders. Stock dividends per se or convertible into cash are not taxable in the hands of the recipient. Dividends in kind are treated as taxable benefits.

### *Foreign income*
Resident corporations are taxed on their worldwide income, but tax credit and treaty relief is generally available in order to avoid double taxation *(see Foreign tax credits in the Tax credits and incentives section for more information)*.

Undistributed income of foreign subsidiaries is not subject to any special taxation as long as the income of the foreign subsidiary before distribution is not included in the accounts of the local parent company. Dividends paid by the foreign subsidiary to the local parent company will, however, be taxable to the latter, whether or not such dividends are actually received in Mauritius.

## *Deductions*

### *Depreciation*
Annual allowance rates vary between 5% and 100% of base value (unless stated otherwise), as follows:

- 5% on industrial and commercial buildings and buildings used for education and training (on cost).
- 20% on ships and aircraft, furniture, and fittings.
- 35% on plant or machinery generally, 25% on motor vehicles (up to MUR 3 million as of 1 January 2011), 30% on hotel buildings, and 25% on agricultural improvements and scientific research.
- 50% on electronic and high-precision machinery, computer hardware and peripherals, and computer software.
- 100% on aircraft leased by a company engaged in aircraft leasing (on cost).
- 100% in respect of plant or machinery costing MUR 30,000 or less.

Tax depreciation need not conform to book depreciation. Depreciation is generally recaptured on disposal or sale when balancing charges or allowances are computed.

### *Taxes*
Taxes paid are not normally deductible; however, some taxes (e.g. municipal taxes relating to buildings, land transfer tax, irrecoverable input VAT) are deductible.

### Other significant items
A bank or an approved financial institution may claim as deductions any irrecoverable loans due by a company in liquidation in respect of which winding-up procedures have started or by a company in receivership.

### Net operating losses
Losses made in an accounting year are carried forward for a maximum of five years, provided the corporation can demonstrate a 50% continuity of shareholding between the year of loss and the year of claim. Losses resulting from capital allowances can be carried forward indefinitely. Loss carrybacks are not permitted.

Where a sugar factory operator that is not also a sugar cane planter incurs a loss, such loss, to the extent it is unrelieved, may be transferred in the income year in which it is incurred to a planter related to the operator.

Where a company takes over another company engaged in manufacturing activities, any unrelieved loss of the acquiree may be transferred to the acquirer in the income year in which the takeover takes place, on such conditions relating to safeguard of employment as may be approved by the Minister of Finance.

### Payments to foreign affiliates
Royalties, interest, and service fees payable to foreign affiliates are allowed as expenses, provided they correspond to actual expenses incurred, are reasonable, and do not exceed what would be paid under an arm's-length agreement. There are certain limitations if the recipient of the interest is not liable to Mauritius tax. Royalties paid to non-residents by GBC1 companies, banks out of their foreign-source income as defined in the Income Tax Act, and trusts are tax-exempt.

## Group taxation

There are no group taxation provisions in the Mauritius tax legislation other than the transfer of losses by tax incentive companies, sugar factory operators, subsidiaries located in the Island of Rodrigues, and manufacturing companies upon their take-over *(see Net operating losses in the Deductions section for more information)*.

### Transfer pricing
Mauritius does not have any specific transfer pricing legislation. However, it does contain an arm's-length provisions requiring transactions between related parties to reflect a commercially objective value which would be the amount charged for the services were the parties not connected.

### Thin capitalisation
Mauritius does not have specific thin capitalisation legislation; however, it does have other anti-avoidance provisions.

## Tax credits and incentives

### Global Business Category 1 and 2 companies
A GBC1 company is a limited liability company incorporated in Mauritius.

A GBC2 company is a limited liability company incorporated in Mauritius and which is tax resident in Mauritius. GBC2 companies are therefore not able to access the tax treaty network of Mauritius. However, GBC2 companies are exempt from Mauritius tax and are not required to file tax returns.

Since January 2011, a GBC1 company can now trade with a Mauritian resident as well as non-residents. Transactions made with a Mauritian resident will be taxed at the rate of 15% whereas transactions with non-residents are taxed at an effective tax rate of 3%.

The registration and application of GBC1 companies should be submitted to the Financial Services Commission (FSC) through a duly licensed Management Company on a prescribed form accompanied by the following:

- Law Practitioner's certificate certifying that the application complies with the laws of Mauritius.
- Any other information which the Chief Executive may request.

As for the application for a GBC2 licence, it should be submitted to the FSC on a prescribed form accompanied by the following:

- Law Practitioner's certificate certifying that the application complies with the laws of Mauritius.
- The incorporation document.

The Commission shall within 15 days of an application (both for GBC1 and GBC2 companies):

- approve the application
- reject the application, or
- request further information on the application.

Where the Registrar of Companies is satisfied that the application is in accordance with the Companies Act, the Registrar shall:

- enter the particulars of the company on a register
- assign a unique number to the company, and
- issue the certificate of incorporation.

The fees payable to the FSC for registering a GBC1 and a GBC2 company are as follows:

| Fee | GBC1 (USD) | GBC2 (USD) |
|---|---|---|
| Processing | 500 | 0 |
| Annual Licensing | 1,500 | 135 |

The GBC1 company shall meet the following legal operational requirements:

- The company should at all times have a local management company.
- The company should have a company secretary.
- The accounts of the company should be audited by local auditors.
- The company should have a registered office in Mauritius.
- All records and books of the company should be kept in Mauritius.
- The company should open and maintain, with a Mauritian bank, an account in foreign currencies.

A GBC1 company can apply for a Tax Residency Certificate (TRC) to show substance in Mauritius. The requirements for the GBC1 company to obtain a TRC are listed as follows:

- The company shall, at all times, have at least two directors resident in Mauritius, being of appropriate caliber and able to exercise independence of mind and judgment.
- All meetings of the Board of Directors shall be chaired and minuted in Mauritius. Board meetings can be held via conference calls as long as they are chaired from Mauritius.
- The company shall, at all times, keep all its accounting records at its registered office in Mauritius.
- The company shall ensure that all its main banking transactions are channelled through a bank account in Mauritius.
- The company's financial statements should be prepared in Mauritius and audited by Mauritian resident auditors.

The TRC is renewable on an annual basis and issued in respect of a particular country.

### *Freeport developers and operators*

A freeport operator is defined as a person who is duly licensed to carry out one or more of the following freeport activities:

- Warehousing and storage.
- Breaking bulk.
- Sorting, grading, cleaning, and mixing.
- Labelling, packing, repacking, and repackaging.
- Light assembly.
- Minor processing.
- Ship building, repairs and maintenance of ships and aircrafts.
- Storage, maintenance, and repairs of empty containers.
- Freight forwarding services.
- Quality control and inspection services.
- Export and re-export oriented airport and seaport based activities.

An occasional operator is defined as being only for the organisation and holding of international exhibitions and trade fairs.

A freeport developer is a private freeport developer or a third party freeport developer. A private freeport developer is a person licensed to carry out the following freeport activities according to the Freeport Act 2004 (FA 2004):

"Build, develop, and manage its own infrastructural facilities for use exclusively for the licensee's own business authorised freeport activities including warehouses, cold storage facilities, offices, exhibition centres, processing units and open storage facilities, provision of its own logistics services, and the carrying out of marketing activities and organising international exhibitions and international trade fairs."

However, a third party freeport developer can carry out the following activities according to FA 2004:

"Build, develop, and manage infrastructures to be rented to licensees in order to facilitate the authorised freeport activities including warehouses, cold storage facilities, offices, exhibition centres, processing units and open storage facilities, provision of third party logistics services to licensees, and the carrying out of marketing activities and organising international exhibitions and international trade fairs."

**Registration**

No freeport activity can be carried out unless the person applies for the appropriate freeport certificate and is duly licensed. No freeport certificate is required for an occasional operator.

A private freeport developer or a freeport operator can apply to the Managing Director to carry out activities relating to paper trading. As per FA 2004, paper trading is defined as the international buying and selling of tradable commodities either in the person's own name or as an agent, whereby the shipment of such commodities is made directly by the shipper in the original exporting country to the final importer in the importing country, without the commodities being physically landed in Mauritius.

A licence fee is payable by a freeport operator and a freeport developer of MUR 10,000 and MUR 150,000 respectively.

## *Foreign tax credits*

Generally, double taxation is avoided by means of a unilateral credit relief for foreign tax paid. The net amount of foreign income that has borne tax is grossed up at the foreign rate of tax, and the foreign tax paid is allowed as a credit against the Mauritius tax payable. However, the tax credit cannot exceed the Mauritius tax referable to the relevant foreign income. Unused credit is not refunded.

Regarding foreign income derived from countries with which Mauritius has treaties for the avoidance of double taxation, a tax credit is given for foreign tax in accordance with the treaties. There are clauses in the double taxation conventions which provide that income arising from certain specified foreign sources is to be exempt from Mauritius tax.

Mauritius has signed double taxation conventions with Barbados, Belgium, Botswana, the People's Republic of China, Croatia, Congo, Cyprus, France, Germany, India, Italy, Kuwait, Lesotho, Luxembourg, Madagascar, Malaysia, Mozambique, Namibia, Nepal, Oman, Pakistan, Rwanda, Seychelles, Singapore, South Africa, Sri Lanka, Swaziland, Sweden, Thailand, Uganda, the United Kingdom, Tunisia, United Arab Emirates, Senegal, and Zimbabwe. Double taxation treaties with Bangladesh, Malawi, Nigeria, Qatar, Russia, Vietnam, and Zambia have been signed and are awaiting ratification. Treaties with Canada, Czech Republic, Greece, Portugal, Egypt, and the Republic of Iran are under negotiation.

A GBC1 company may, in the absence of evidence of payment of foreign tax, claim as tax credit (presumed tax credit) an amount equal to 80% of the Mauritius tax chargeable on the foreign-source income. The presumed tax credit may also be claimed by a bank against the tax payable on income derived from banking transactions with non-residents and with GBC1 and GBC2 companies.

In the case of foreign dividends, the general tax credit includes foreign tax imposed on the profits out of which the dividends are paid (underlying tax), provided that the shareholding in the foreign company is at least 5%.

Mauritius also allows a tax-sparing credit under its local tax legislation.

### Income tax exemption for vessel owners
Owners of foreign vessels registered in Mauritius are exempt from income tax on income derived from such vessels. Owners of local vessels registered in Mauritius are also exempt to the extent that the income is derived from deep-sea international trade.

## Withholding taxes

There is no WHT in Mauritius for payments made by GBC companies to non-residents not carrying out any business in Mauritius. A non-resident company receiving service fees or interest from Mauritius is liable to tax thereon at the corporate rate of 15% through a self-assessment system.

Interest WHT of 15% (to be withheld by banks and deposit taking financial institutions only and for individual accounts only) may be exempt from WHT or taxed at reduced rates under certain tax treaties.

There is no WHT on dividends received from resident companies.

WHT at source is also applicable for the following:

- Royalties payable to residents: 10%.
- Royalties payable to non-residents: 15%.
- Rent: 5%.
- Payments to providers of specified services: 3% (in the construction industry).
- Payments to contractors and sub-contractors: 0.75% (in the construction industry).

## Tax administration

### Returns
Companies are assessed for a year beginning 1 January and ending 31 December on their income for the preceding year ending 31 December. Where a company closes its accounts at a date other than 31 December, it may elect to adopt as a basis year the accounting year ending in the 12-month period preceding the year of assessment.

Every company, both taxpayer and non-taxpayer, must file a return of its income on the basis of the income year preceding the year of assessment. The return must be filed within six months of the financial year-end.

### Payment of tax
Any tax due should be paid when the return is filed and within the six months deadline. If timely payment is not made, a penalty representing 5% of the amount of tax due is payable. In addition, interest at the rate of 1% of the tax unpaid for each month or part of a month is payable until the tax is paid. A penalty of MUR 2,000 for each month or part of a month is also prescribed for failure to file a return, subject to a maximum of MUR 20,000.

## Significant developments

The Mexican Congress approved significant changes in the tax laws for 2010, mainly dealing with temporary income tax rate increases, a reduced timing benefit under the tax consolidation regime, and a 1% increase in Mexican value-added tax (VAT).

On 24 December 2010, the Mexican Government amended the regulatory framework for Maquiladoras (which is currently included as part of the Decree for the Promotion of the Manufacturing Industry, Maquiladora and Exportation Services Program, or 'IMMEX' program). These amendments importantly include a new definition of Maquiladoras operating in Mexico under the IMMEX regime.

The primary changes are focused on increasing control of certain sectors, providing legal certainty, and simplifying existing procedures.

It is envisioned that as of 30 June 2011, the Mexican Tax Authorities (Hacienda) will issue a comprehensive study on the performance of the flat tax (IETU) and the possible repeal of certain chapters of the Income Tax Law to include them in the IETU Law with the purpose of having a unified tax law on net income. Based on this, the Mexican Congress might propose certain changes in the 2012 Tax reform Act that will be discussed during the last quarter of 2011.

## Taxes on corporate income

### Federal income tax

The federal corporate income tax (CIT) rate for the period 2011 to 2012 is 30%. Beginning in 2013, the rate will drop to 29% and then back to 28% (as was in force until 2009) in 2014.

All corporate entities, including associations of a civil nature, branches, etc. are subject to the tax rules applicable to Mexican corporations (unless specifically ruled out, such as not-for-profit organisations).

The CIT rate applicable to taxpayers engaged exclusively in agriculture, livestock, fishing, and forestry activities is currently 21%.

Provisions to recognise the effects of inflation for tax purposes in the areas of monetary assets and liabilities (annual monetary adjustment) and depreciable assets are provided in the income tax law, even though recent inflation rates have been decreasing.

Once a corporation has paid its income tax, after-tax earnings (i.e. earnings arising from the after-tax earnings account, Cuenta de Utilidad Fiscal Neta or CUFIN) may be distributed to the shareholders with no tax charge at the corporate level and without income tax withholding regardless of the tax residence of the recipient.

Nonetheless, if a corporation makes a distribution out of earnings that for any reason have not been subject to CIT, such as distributions of book earnings (i.e. not yet recognised for tax purposes in Mexico), the corporation will be subject CIT on the grossed-up distributed earnings (gross-up factors are: 1.4286 from 2011 to 2012, 1.4085 in 2013, and 1.3889 as from 2014).

Tax paid on dividends distributed in excess of CUFIN can be credited against the CIT of the year or in the two fiscal years following the year in which the tax on the non-CUFIN distributions was paid. The CUFIN of the tax years in which the credit is applied must be reduced by an amount equal to the grossed-up dividend distribution.

### *Federal flat tax*

The flat tax applies to Mexican resident taxpayers' income from worldwide sources, as well as to foreign residents on the income attributed to their permanent establishments (PE) located in Mexico. The current flat tax rate is 17.5% and is applied to the flat tax base.

In general, the flat tax base is the excess of income actually collected relating to: (i) the sale or disposal of property, (ii) the provision of independent services, and (iii) the granting of temporary use or enjoyment of assets (i.e. rental income and unrelated party royalty income) over amounts actually paid for: (i) the acquisition of assets, (ii) the receipt of independent services, and (iii) the temporary use or enjoyment of assets, as well as certain (iv) other cash expenses, with the exceptions noted below. Even though there are no tax losses for flat tax purposes, a tax credit (with similar results to the application of net operating losses) may be available where flat tax deductions exceed income in a fiscal year, provided certain conditions are met. This credit may be used against flat tax liabilities for the subsequent ten years.

Salaries and wages, employer contributions to the social security system, non-taxable employee benefits, most interest income, and royalties received from related parties for the temporary use or enjoyment of intangible assets are not included within taxable income under the flat tax legislation. Accordingly, payments in respect of these types of expenses are non-deductible items. Nevertheless, the employer can obtain a flat tax credit on 'taxable' wages paid and social security contributions made, which is generally equivalent to deducting these two items.

Certain taxpayers are exempt from flat tax, principally those that are not considered taxpayers under the Mexican income tax law.

The flat tax operates as a supplemental tax to CIT, to the extent the flat tax due is higher than the income tax due for the fiscal year. Hence, the initial flat tax triggered is reduced by a 'credit' for an amount equal to CIT of the fiscal year plus any CIT on distributions exceeding the balance of the after-tax earnings account (i.e. non-CUFIN distributions).

Flat tax is computed on a cash-flow basis (with certain exceptions) and determined per calendar year. Nevertheless, advanced monthly flat tax payments are made based on the year-to-date flat tax gross income, minus the authorised deductions in that same period.

Depreciation and amortisation are not deductible for flat tax purposes.

Maquiladoras (factories importing duty free materials for processing and re-exporting) are subject to specific provisions that can significantly reduce their effective flat tax rates, to the extent certain conditions are satisfied.

Financial sector entities are subject to flat tax on their financing intermediation margin, less certain cash expenses paid, pursuant to specific rules applicable to these entities in the flat tax law.

### *State taxes*

There are no state taxes on corporate net income.

## *Corporate residence*

The federal tax code provides that corporations are deemed residents in Mexico if the principal centre of administration or the effective place of management is located in Mexico. A specific definition of 'tax resident' in any tax treaty overrides domestic law definitions, if the taxpayer is eligible to apply the treaty.

When a company ceases to be a Mexican resident in terms of the Mexican federal tax code or any tax treaty, it is deemed to be liquidated for tax purposes. In such cases, a notification is required at least 15 days before the change, and the CIT return must be filed with the Mexican tax authorities within 15 working days following the date on which the change of tax residency takes place.

### *Permanent establishment (PE)*

The income tax law considers a PE to be any place in Mexico where business activities or services are carried out or rendered by non-residents, such as agencies, offices, mining exploration sites, or any other place of exploration, extraction, or exploitation of natural resources, regardless of the length of time involved.

A foreign insurance company could also be considered as having a PE when it engages in activities consisting of insuring risk or collecting premiums (with the exception of reinsurance activities) in Mexico through a party other than an independent agent.

Sites used for display, storage, or purchasing facilities; inventories imported in-bond to be processed by a third party; short-term construction services; and offices to carry out auxiliary or preliminary activities and information gathering or scientific research are not considered to create a PE in Mexico. Non-residents may also keep merchandise in bonded warehouses (including merchandise delivered for importation into Mexico) without being considered as having a PE.

A non-resident is not considered to have a PE in Mexico as a result of the legal or economic relationships maintained with companies carrying out certain inventory processing activities (i.e. Maquiladoras) which normally process goods or merchandise maintained in Mexico by the non-resident by using assets provided by the non-resident or any related party, as long as certain requirements are met. The requirements include the conditions that the non-resident be resident in a tax treaty country and that the Maquiladora complies with the transfer pricing (TP) provisions provided in the law as well as the revised definition of Maquiladora that entered into force on 1 January 2011.

Maquila operations ('revised definition') are generally defined as those with the following characteristics:

- Raw materials are supplied by a foreign resident (with which a Maquila contract is in place) and are temporarily imported to be processed, transformed, or repaired and are subsequently exported, including for these purposes virtual import-export operations.
- The Maquila is also permitted to import goods in accordance with the permanent importation regime. Additionally, local purchases are allowed, as long as such goods are consumed in production and/or exported with the temporarily-imported inventory.
- The processing, transformation, or repair of goods must be performed with temporarily-imported machinery and equipment (M&E) which is the property of the foreign principal. In this regard, the foreign principal must own at least 30% of such M&E. It is important to mention that this M&E may not have been previously owned by the Maquila or by any other Mexican related party.

The limits for M&E will not apply to companies that were operating under an IMMEX program prior to 31 December 2009, if such companies have fulfilled all of their tax obligations, including those related to the TP safe harbour options under the Income Tax Law.

Maquiladoras under shelter programmes may not be considered as creating a PE in Mexico when assets of foreign residents are involved and certain information is provided to the Mexican Tax Administration in relation to the gross revenues earned and income taxes paid by its non-Mexican related party. This duration of benefit (in force until 2011) is expected to be extended by the Mexican Tax Administration.

A definition of PE in any tax treaty overrides domestic law definitions where the taxpayer is eligible to apply the corresponding tax treaty.

## *Other taxes*

### *Value-added tax (VAT)*

VAT is payable at the general rate of 16% on sales of goods and services, as well as on lease payments and imports of goods and services, except in the border zones, where a 11% VAT rate generally applies (except on the sale of construction and developed real estate, which is subject to the general rate). The sale of medicines, as well as the sale of most food products, is zero-rated. The principal VAT-exempt transactions are the sale of land, credit instruments (including equity shares), residential construction, interest paid by banks, medical services, education, salaries and wages, rentals of residential property, and the sale of non-amortisable participation certificates on real estate investment trusts, provided specific requirements are satisfied.

The sale in Mexico of temporarily imported goods by non-residents to (i) other non-residents, (ii) Maquiladoras, or (iii) companies in the automotive industry is also VAT-exempt under certain circumstances.

The 0% VAT rate, which generally means that no VAT is payable, is applicable to a substantial number of transactions, including the sale of books, magazines, and newspapers published by the taxpayer, the exportation of goods and certain services (including some Maquiladora activities intended for exportation), the sale of certain basic foodstuffs, agricultural goods and services, sales and rentals of farm machinery and equipment, and other specified transactions.

Taxes paid by business enterprises on their purchases and expenses related to VAT taxable activities (including activities subject to the 0% VAT rate), may usually be credited against their liability for VAT they collect from customers on their own sales, services rendered, etc. The input VAT credit on goods or services of a general nature, or those not specially identified with either taxable or exempt activities for VAT purposes, is computed based on a VAT ratio proportional to the VAT taxable versus VAT exempt activities carried out by the taxpayer. Creditable VAT paid on purchases and expenses in excess of VAT collected from customers is recoverable via either a refund or a credit against subsequent VAT liabilities.

VAT is a 'cash basis' tax, with few exceptions (e.g. VAT on some types of interest must be paid on an accrued basis), therefore only the receipt of payment for goods or services triggers the output VAT liability, and an input VAT credit may be claimed only when the taxpayer pays VAT to its providers of goods and services. VAT is calculated for each calendar month as a final tax. In addition, VAT overpayments may be used to offset the tax liabilities arising from other federal taxes.

VAT must generally be withheld by Mexican residents acquiring or leasing tangible goods from non-residents if such foreign residents do not have a PE in the country to which income is attributed. Mexican business entities are required to withhold VAT on payments to individuals or entities for services consisting of ground transportation of goods. Mexican corporations must also withhold VAT on commissions paid to individuals, as well as on independent services rendered by Mexican individuals, and on tangible goods leased from individuals.

### *Compulsory profit sharing*
Although not a tax, every business unit with employees (irrespective of the type of organisation) is required to distribute a portion of its annual profits among all employees, except directors and the general manager. The amount distributable to the employees in most cases is 10% of taxable income, adjusted to eliminate income or deductions that relate to the recognition of inflation and include dividend income. Special rules apply to a limited number of specific businesses.

No profit sharing is paid during the first year of operations. Also, special rules apply for personal service entities and for entities deriving their income from rental activities, both of which can limit their profit sharing payment to the equivalent of one month of regular salary.

The profit sharing amount paid out is a deductible item for CIT purposes, provided certain requirements are met.

### *Excise tax*
The excise tax law (Impuesto Especial Sobre Producción y Servicios or IEPS) levies substantial federal excise rates on the importation and/or sale of certain taxable items, such as gasoline (% variable), beer (26.5%), wine (26.5% to 30%), spirits (53%), and cigarettes and other tobacco products (160% plus an additional quota), and on certain services related to these activities, such as commission, mediation, and distribution of excise taxable items as well as services for raffles and gambling (30%). Additionally, as of 2010, excise tax is also applicable to certain telecommunications services (3%).

In general terms, goods are exempt from IEPS when exported. However, since the input IEPS paid by exporters on their purchases is not creditable, that tax becomes an additional cost.

IEPS is payable (output tax) and creditable (input tax) on a cash basis. It is payable on the date that the charge invoiced is collected from the client and can be credited when the respective payment is made to the supplier. On imports, IEPS is creditable when paid at the customs offices.

In certain cases, the IEPS legislation allows taxpayers that are not subject to this tax to credit IEPS paid on the acquisition and/or the importation of certain goods, such as alcohol and semi-processed and fluid syrups (as a raw material), against CIT payable.

There is a specific procedure to calculate the tax for beer producers, bottlers, and importers; however, the tax can never be lower than 26.5%.

Among other obligations, IEPS taxpayers must file information regarding their 50 main clients and suppliers before the Mexican Tax Administration on a quarterly basis.

### *Customs duties/import tariffs*
Mexico's commercial conditions provide an excellent business and investment opportunity. Mexico is a member of the World Trade Organization (WTO), the Asia-Pacific Economic Cooperation Mechanism (APEC), and the Organisation for Economic Co-operation and Development (OECD).

Mexico lies in a strategic geographical location for international trade, sharing borders with the United States of America, while facing Europe and Asia, and representing an easy entry to the rest of Latin America.

Mexico has signed twelve Free Trade Agreements (FTAs), which provide for preferential duty rates on foreign trade operations with 43 countries. FTAs signed by Mexico include NAFTA; Colombia; Costa Rica; Bolivia; Nicaragua; Chile; the European Union; Israel; Honduras, Guatemala and El Salvador (the Northern Triangle FTA), the European Free Trade Association, Uruguay, and Japan.

General Import Duty rates range from 0% to 35%, but most imports fall within the range of 3% to 20% (exceptionally, certain food products, shoes, and textiles pay higher duties).

Temporary imports are exempt from customs duties (except for fixed assets) and VAT payments.

### *Property taxes*
Annual taxes on real property are levied by the Federal District and all the states at widely varying rates applied to values shown in the property tax records, which in some cases are based on rental income from land and buildings held for rent to third parties. Assessed values have been increased substantially recently in the Federal District and some other areas.

### *Vehicle taxes*
Taxes are levied yearly on the ownership of motor vehicles as well as on the acquisition of new vehicles. These two taxes are payable in addition to the VAT on the purchase. Note that some vehicles considered as 'hybrid' (e.g. battery assisted vehicles) are not subject to the new vehicle acquisition tax, and ownership tax will be levied at a 0% rate.

### Title transfer taxes
The transfer of real estate is almost without exception subject to a variable transfer tax at rates averaging 3% to 4%. The tax is levied by most states and the Federal District.

### Tax on cash deposits (IDE)
As of 2010, IDE is applicable at 3% on monthly cash bank deposits exceeding 15,000 Mexican pesos (MXN) or its equivalent in foreign currency. This tax can be credited against certain taxes, including CIT.

### Stamp taxes
There are no stamp taxes in Mexico.

## Branch income

Mexican branches of foreign corporations (i.e. PEs) are generally subject to the same tax rules as Mexican corporations, with some exceptions. Such exceptions include that branches may deduct pro rata allocations of home office expenses, provided certain requirements are complied with (such as the existence of an applicable tax treaty and a comprehensive agreement for the exchange of tax information between the relevant territory and Mexico), but may not deduct remittances to their home offices, even when such remittances are classified as royalties, fees, commissions, services, or interest.

In general terms, distributions to the head office (other than those regarded as a return to the head office of the capital invested into the branch) either in cash or in kind from branches or other PEs are subject to the statutory corporate tax rate on the grossed-up distribution, unless the remittance is made from the CUFIN account balance (i.e. the after-tax earnings account).

## Income determination

### Recognition of income
Income is generally recognised on an accrual basis. However, the service revenues of civil entities that render professional services (e.g. law and accounting firms) are reported on a cash basis.

### Inventory valuation
The costing system to be used will be the incurred cost system, based on historic costs or pre-determined costs. If the requirements provided on the regulations of the income tax law are met, the direct cost system (based on historical costs) may be used.

Inventory may be determined by any of the following methods:

- First in first out (FIFO).
- Last in first out (LIFO).
- Identifiable costs.
- Average cost.
- Retail.

The FIFO and LIFO methods must be applied to each type of merchandise and each movement. The monetary FIFO and LIFO methods may not be used. Taxpayers selling goods that are identifiable by serial numbers, at a cost exceeding MXN 50,000, must determine their inventory by the identifiable cost method.

Once elected, a method is compulsory for five years and can be changed only if the requirements established in the regulations of the income tax law are fulfilled. The monetary results of the change in method are amortised over the following five years.

For accounting purposes, different methods and certain variations can be adopted. However, a record of the differences must be maintained, and such difference will not be taxable or deductible.

The cost of imported goods may be deducted (and included in the cost of goods sold) only if it can be supported that the goods were legally imported into the country.

### *Capital gains*

Capital gains are taxed as follows.

#### Securities

Gains on securities are included in regular taxable income. There are two different procedures for computing the tax basis of a Mexican company's shares, depending on the period for which the shares are held (i.e. whether less or more than 12 months).

The tax basis of shares of Mexican corporations sold may be increased by the inflation adjustment applicable for the holding period.

In the case of shares with a holding period of more than 12 months, there are certain items to be considered when computing the tax basis, such as: (i) the movement in the after-tax earnings account (CUFIN) of the issuing company (including the possible negative CUFIN effects), as adjusted for inflation, (ii) the unamortised prior years' tax losses at the date of the sale, (iii) tax losses arising prior to the date on which the shares were acquired and amortised during the holding period, and (iv) any capital reductions of the issuing company.

When the sum of: (i) the CUFIN balance at the date of acquisition of the shares, (ii) the capital reductions paid, (iii) the unamortised prior years' tax losses at the date of the sale, and (iv) the negative CUFIN balance of the issuing corporation is higher than the sum of: (i) the CUFIN balance at the date of the sale and (ii) the tax losses arising prior to the date on which the shares were acquired, and amortised during the shares' holding period, the difference must be subtracted from the tax basis of the shares to be disposed (potentially resulting in the shares' tax basis being equal to zero).

When the aforementioned difference exceeds the tax basis of the shares disposed, this excess (restated by inflation) must be subtracted from the tax basis of the shares in any subsequent share sale by the same taxpayer, even if the shares are issued by a different company.

The aforementioned procedure allows the average cost (tax basis) of the shares to be determined, which is then updated and considered as the acquisition cost for future sales.

A different but simpler procedure applies for computing the tax basis of shares held during a period of 12 months or less.

Deduction of losses arising from the sale of shares is limited to the value of gains from similar transactions in the same or the following five fiscal years. Losses may not be deducted by non-residents selling shares.

A gain from the sale of shares is considered Mexican-source income when the transferred shares are issued by a Mexican resident or when more than 50% of their book value arises directly or indirectly from immovable property located in Mexico, including cases where the shareholding is structured in different levels.

In general terms, the sale by non-residents of shares issued by a Mexican company is subject to a 25% withholding tax (WHT) applicable to the gross amount of the transaction (i.e. without deductions). However, there may be the option for gains realised by non-residents on the sale of shares issued by a Mexican company to be taxed by applying the statutory 30% rate to the net gain (i.e. the value of the transfer less the tax basis of the shares). The tax rate for these purposes is the same as that applicable to corporate taxpayers in each year, as mentioned above. Hence, in 2013 the rate will be reduced to 29% and to 28% in 2014.

This net income election is available only if the foreign shareholder is resident of a country that is not considered a 'preferred tax regime jurisdiction' (tax haven) or a country with a territorial tax system. The non-resident seller must have previously appointed a representative in Mexico and have a public accountant assigned to issue a statutory tax audit report on the transfer of shares. The public accountant issuing the respective report must specify the accounting value of the shares sold and explain the factors used in determining the sales price and the market value of the shares if shares are sold between related parties.

The representative is jointly liable for the tax on the sale of shares, even when the statutory report is issued by a public accountant.

The tax authorities may authorise the deferral of taxes that would otherwise be triggered by the transfer of shares in a group reorganisation (the authorisation must be obtained prior to the share transfer). The price used on the transaction must be at arm's length. The tax deferred, adjusted for inflation, is due upon the sale of the originally transferred shares outside the same interest group. An interest group consists of shareholders that have over 50% common voting stock of the companies.

In principle, authorisations for tax deferral are not granted if the party acquiring or selling the shares is resident in a tax haven or is a resident of a country that has not signed a broad exchange of information agreement with Mexico. However, in the latter case, an authorisation may still be granted if the taxpayer provides documentation to the Mexican tax authorities stating that the taxpayer has authorised the foreign tax authorities to provide information to the Mexican authorities regarding the operation in question.

If the share sale qualifies as an exempt reorganisation under tax treaty rules, the non-resident must appoint a legal representative in Mexico prior to the sale and file a notice with the Mexican Tax Administration informing them of such appointment and the details of the reorganisation process intended to be carried out. Additionally, certain formal requirements are established in the regulations of the Mexican income tax law that must be satisfied when carrying out this type of transaction.

Tax treaty rules (optionally) override domestic law rules when the seller resides in a tax treaty country.

### Shares sold through the stock market
In certain specific cases, the sale of shares is exempt from CIT when such shares are disposed of by individuals and residents abroad through authorised stock markets to the extent that certain requirements are met.

### Real estate
In determining the taxable gain of real estate, the cost basis of land and buildings may be adjusted (i.e. increased) for tax purposes on the basis of the period of time for which the assets have been held. This adjustment is performed by applying inflation adjustment factors to the net undepreciated balance. Similar rules apply to non-residents electing to pay tax on net income by appointing a legal representative in Mexico. The rate of tax on the net gain is 30% (in 2013 the rate will be reduced to 29% and to 28% in 2014). Otherwise, the 25% final WHT on gross income applies to non-residents.

### Machinery and equipment
Gains or losses from the disposal of machinery, equipment, and other fixed assets are also calculated after adjusting the basis in these assets, by applying inflation factors to the net undepreciated balance.

## *Inflationary gain or loss*
Taxpayers are required to calculate an adjustment for inflation (resulting in additional taxable income or deductible expense) on an annual basis by applying the percentage increases in the National Consumer Price Index (NCPI) to the value of essentially all liabilities, reduced by monetary assets, including bank balances, investments (except in shares), and some debt and receivables.

## *Dividend income*
Dividends received by Mexican corporations from other Mexican corporations need not be included in gross income. However, dividend income is subject to the 10% compulsory profit sharing and must be included within the recipient corporation's CUFIN.

No further taxes apply on dividends distributed out of the CUFIN. However, non-CUFIN distributions (i.e. distributions that for any reason have not been subject to CIT) are generally subject to tax at the level of the distributing company at the general income tax rate on the grossed-up distribution.

## *Foreign income*
A Mexican corporation is taxed on foreign-source income when earned. Double taxation is reduced, or possibly avoided, by means of foreign tax credits. However, the undistributed profits of a foreign subsidiary are not subject to Mexican tax until dividends are paid, with the exception of companies with investments in entities located in a tax haven ('income subject to preferred tax regimes'), in which case income is generally taxable even if no distributions are received from those entities.

## *Investments in tax havens (income subject to preferred tax regime)*
Investments in tax havens include those made directly or indirectly in entities, branches, real property, shares, bank accounts, or investment accounts, and any kind of participation in entities, trusts, joint ventures, or investment funds, as well as in any other similar legal entities created or incorporated in accordance with foreign law and located in a tax haven, and including those that are carried out through an intermediary.

A business, entity, trust, or joint venture is considered to be located in a tax haven when it has a physical presence, an address, a post office box, or effective management in a tax haven, or when its bank account is held in or through financing entities located in a tax haven.

Unless it can be demonstrated that the taxpayer does not have management control of the foreign investments, the taxpayer must include the income generated through such entities or foreign vehicles in the proportion that corresponds to their direct or indirect participation in the capital of the entity or vehicle.

Income and profits subject to preferred tax regimes (PTR) are taxed separately. This income cannot be combined with other taxable income or losses and it is not considered for purposes of making advance income tax payments. Tax applicable to this type of income is payable together with the annual CIT return.

The classification of a PTR is not based on the location of the investment but on the tax effectively paid on the income generated abroad. An investment is considered subject to a PTR if the income tax paid abroad is less than 75% of the income tax that would have been incurred and paid in Mexico, if the income had been taxed under Mexican rules.

In general, interest income and the annual inflationary adjustment made to liabilities of the investment in the tax haven are included in taxable income without subtracting the annual inflationary adjustment on receivables.

However, the annual inflationary adjustment on receivables may be subtracted from interest income earned, provided an information return is filed.

Tax on investments in a PTR is determined by applying the general CIT rate to taxable income. Additionally, net operating loss carryforwards associated with an investment in a PTR may be amortised against the tax profit of the following tax years arising from investments in PTR, and tax deductions related to the investment may also be applied, as long as accounting records pertaining to those investments are available and the annual information return on the investments is filed on time.

Undistributed income from investments in entities located in a PTR need not be immediately included in taxable income (under the provisions discussed above) in certain particular cases (e.g. income arising from qualified active business activities in accordance with the applicable legislation and in the case of indirect investments in a tax haven when certain strict conditions are met).

Income earned in a PTR will be exempted where the PTR income arises from a business activity. This exemption will not be applicable, however, if income such as interest, dividends, royalties, certain capital gains, and rents (i.e. passive income) represent more than 20% of the total income generated.

Other specific exemptions may remain applicable in the case of share transfers within the same group and for income derived from royalties and interest that do not represent a tax deduction for Mexican tax residents to the extent that certain specific requirements are fulfilled.

### *Maquiladoras*

As discussed in the Corporate residence section, companies operating under an IMMEX programme (Maquiladoras/In bond processing companies) are considered to not have a PE in Mexico. This is the case for the non-resident principal which owns the M&E and inventory, to the extent it is a resident of a country that has a tax treaty in force with Mexico, complies with all the terms and requirements of the treaty, satisfies any mutual agreements between Mexico and its treaty partner, and complies with the TP provisions provided in the law as well as the revised definition of Maquiladora that entered into force on 1 January 2011. This relief applies only if the Maquiladora complies with any of the following options stated under the domestic law:

- Maintenance of documentation on TP in accordance with the applicable legislation, adding to the Maquila fee 1% of the net book value of the M&E owned by the foreign related company and used by the Maquiladora in its activities.
- Reporting of a taxable income margin of a minimum of the higher of:
  - 6.9% of the value of assets used in the Maquila activity (including the inventories and fixed assets owned by the foreign related party), or
  - 6.5% of the value of the operating costs and expenses of the Maquiladora.
- Maintenance of documentation on TP using the transactional net margin method (TNMM) and considering a return on the net book value of M&E owned by the foreign related company used by the Maquiladora in its activities, adjusted by financing terms.

Maquiladoras that apply the first or third option may request an advanced pricing agreement (APA) from the Mexican tax authorities. However, this APA is not mandatory in order to obtain the PE exemption.

Maquiladoras that apply any of the three options above are not required to file an annual information return on transactions with foreign related parties. This exemption is only available in respect of the Maquila activity.

If the Maquiladora renders services other than exported Maquila services (including domestic sales), specific TP requirements apply and potential PE issues must be evaluated.

In general terms, the Maquiladoras receive a significant reduction on their effective income tax and flat tax rates to the extent certain conditions are satisfied.

The Mexican Tax Administration has recently initiated a detailed review of the Maquiladora programme, hence it is expected that significant tax reforms will be approved in the coming years.

## *Deductions*

The applicable deduction requirements must be complied with no later than the last day of the tax year to which the deduction applies, although the invoice supporting the expense may be provided up to the date on which the tax return for the period in question is filed (or comes due). An expense invoice must contain a date within the year for which the deduction is claimed.

Deductions for certain business expenses are limited in the case of business meals and use of company owned cars.

### *Depreciation, amortisation, and depletion*

Straight-line depreciation is permitted at the rates specified in the law (i.e. estimated lives for assets are 20 years for buildings, 3.3 years for computers, 4 years for cars, 10 years for certain machinery and equipment, etc.), and the deduction may be increased by applying the percentage increases in the NCPI from the month in which the asset was originally acquired. When an asset is disposed of or becomes useless, the remaining undepreciated historical cost may also be deducted, after application of the appropriate inflation adjustment factor to the undepreciated historical cost.

Mining exploration and development expenses incurred prior to the commencement of operations and the cost of mining claims may be amortised at 10% per year, after applying inflation adjustment factors, unless the taxpayer elects to deduct these costs as incurred.

Intangible assets for the exploitation of goods that are in the public domain, or for rendering public services under concession, are considered deferred assets (i.e. not deducted as incurred). Therefore, these assets are subject to amortisation for income tax purposes.

Specific annual depreciation rates are established for goods used in certain industries.

### *Charitable contributions*
The maximum amount for deductible donations is limited to 7% of the taxable income of the previous year.

### *Taxes*
In general, all federal, state, and local taxes levied on a company (not including those required to be withheld from other parties) represent deductible expenses for CIT purposes, with the following exceptions:

- CIT.
- Flat tax.
- Federal VAT and excise tax when the company is entitled to credit the tax.
- Taxes on acquisitions of fixed assets and real estate, which must be capitalised and deducted as part of the total cost of such assets to be depreciated.

### *Net operating losses*
Subject to certain limitations, losses incurred in prior years by a business may be carried forward and deducted from income earned over a subsequent ten-year period. Net operating loss carrybacks are not allowed.

Losses carried forward may be increased by the percentage increase in the NCPI between the seventh and 12th months of the fiscal year in which they are incurred and thereafter up to the sixth month of the fiscal year in which they are applied.

Tax loss carryforwards are non-transferable; however, they can be used by the surviving entity, in a merger with certain restrictions. In the case of a spin-off, tax loss carryforwards can be divided between the surviving entity and the spun-off entities in proportion to the following:

- Inventories and accounts receivable transferred in the case of commercial entities.
- Fixed assets transferred, in all other cases.

Current tax legislation limits the utilisation of tax losses in changes in ownership. The rule provides that changes in ownership representing more than 50% of the voting shares prevents the utilisation of tax losses against income obtained in the same trade of business (‘giro’), with certain exceptions.

### *Payments to foreign affiliates*

Taxable income and authorised deductions must be determined on the basis of prices that would be agreed with independent parties in comparable transactions (arm's-length values).

For this purpose, taxpayers must secure and maintain contemporaneous documentation supporting transactions with related parties residing abroad, demonstrating that income and deductions are based on market values. This documentation must be prepared per type of transaction and must include all operations carried out with related parties.

Domestic transactions must also be supported by the application of a recognised TP method selected in accordance with the preferred ordering methods determined in the legislation.

Payments made to residents of tax havens (or PTRs) are considered non-deductible, unless it can be demonstrated that the price of the transaction is the same that would have been set between or among unrelated parties in comparable transactions. Unless the contrary is demonstrated, it is assumed that operations with companies, entities, or trusts resident in a PTR are carried out between or among related parties and that prices are not set as they would be in comparable operations between or among independent parties.

The sales price of shares (other than publicly traded shares) sold to a related party must be set at market value and the transaction must be supported by the corresponding contemporaneous TP documentation.

In order to be deductible, payments of technical assistance fees and for the transfer of technology or royalties must be made directly to companies with the required technical capabilities to provide the corresponding service and should correspond to services actually received.

Payments to non-residents of a prorated portion of expenses (i.e. allocations of expenses) are not deductible for Mexican corporations.

## *Group taxation*

The income tax law contains a chapter that allows certain holding companies to file a consolidated income tax return with their majority-owned subsidiaries. Tax consolidation is applicable for CIT purposes but not for other taxes (e.g. flat tax and VAT) or compulsory employee profit sharing.

The principal requirements for a company to qualify as a holding company for fiscal consolidation are that it must be a Mexican tax resident with no more than 50% of its shares owned by other companies, regardless of their country of residence. Shares that qualify as placed among the general investing public and non-voting shares are not considered for this purpose.

Where more than 50% of the holding company's shares are held by a foreign corporation, the above qualifying rule precludes the possibility of filing a consolidated return for a Mexican group, for companies that would otherwise qualify. However, there is an exception in cases where the foreign corporation that owns the shares of the

Mexican holding company is a resident in a country that has executed a comprehensive agreement for the exchange of tax information with Mexico.

As of 4 February 2011, Australia, Austria, Bahamas, Barbados, Bermudas, Brazil, Canada, Chile, China, the Czech Republic, Denmark, Ecuador, Finland, France, Germany, Greece, Iceland, India, Italy, Japan, New Zealand, the Republic of Korea, the Netherlands, the Netherlands Antilles, Norway, Panama, Poland, Portugal, Romania, Russia, Singapore, Slovak Republic, South Africa, Spain, Sweden, Switzerland, the United Kingdom, Uruguay, and the United States have agreements of this nature with Mexico, and other agreements or tax treaties that might contain such an agreement are awaiting ratification or being negotiated.

The Mexican Tax Administration must authorise the application of the consolidation regime, and financial statements and written consent of the legal representative must be filed before 15 August of the year prior to the first year of consolidation. There is a minimum five-year period of fiscal consolidation, and special consolidated tax accounts should be prepared by the consolidated group.

There are some entities that are non-qualifying entities for inclusion in the consolidation regime, such as non-profit entities, credit institutions, insurance corporations, trusts, auxiliary credit institutions, stock exchange entities, foreign exchange houses and capital investment companies, non-resident companies, companies in liquidation, civil or social associations, and cooperatives.

In general terms, the consolidation regime allows certain benefits, such as:

- Individual company loss offset against profits of other companies in the same group during a deferral period.
- Deferral of tax on dividends in excess of the individual CUFIN, to the extent that the dividend flow remains within the consolidation group.
- Capital losses in the holding company from the sale of subsidiaries deducted as an ordinary loss in the year.

Prior to 2010, these deferral benefits were subject to recapture, and could generally be triggered if:

- A member leaves the consolidated group.
- The ownership percentage is reduced.
- The group is deconsolidated.
- Certain carryforward limitations expire (i.e. tax loss and capital loss recapture is required if any of the above three events occur during the ten-year period).

The significant 2010 tax reforms introduced important modifications to the consolidation regime, including a reduction of the recapture period from ten to five years in the case of tax losses and capital losses. Moreover, the introduction of new rules now trigger excess dividends over the CUFIN balance and other recapture items after five years while these deferrals were often considered indefinite before the reform, as long as the same group remained in the consolidation with the same ownership percentages.

As a result, most of the consolidated benefits will be reversed in five years, and the deferred income tax will be payable with the submission of the tax return starting from 'Year six', as follows:

- 25% in each of years six and seven.
- 20% in year eight.
- 15% in each of years nine and ten.

Similar transition rules have also been implemented for the recapture and repayment of certain consolidated benefits obtained in years prior to 2010.

### *Transfer pricing*

Mexican TP legislation has significantly developed as a result of Mexico's admission to the Organisation for Economic Co-operation and Development (OECD) in 1994. This development has resulted in the implementation of TP guidelines that are in line with the global economy and market liberalisation.

In general terms, from a Mexican TP perspective, all related party transactions (including certain Joint-Venture relationships) must be reported at arm's length.

Local legislation allows the selection of both traditional methods and profit-based methods consistent with the OECD guidelines. However the legislation requires a strict ordering for the application of a method.

Mexican legislation is generally 'form over substance' oriented; therefore contractual terms remain relevant when defining the economic substance of the transactions subject to the TP analysis.

Limited reliable financial information is not always publicly available for Mexican entities. Hence, reliance is often placed on foreign information, which is then adjusted to properly reflect local market conditions and render the transactions in question more comparable.

### *Thin capitalisation*

Interest generated by excess debt lent by a related party is non-deductible for CIT purposes. Excess debt is defined as more than three times the value of shareholders' equity (i.e. a 3-to-1 debt-to-equity ratio) as per the taxpayer's Mexican generally accepted accounting principles (GAAP) balance sheet.

In principle, all liabilities are considered in determining the annual average liabilities for purposes of calculating the ratio and thereby the disallowed interest expense amount. However, certain liabilities incurred for construction, operation, or maintenance of the productive infrastructure associated with the strategic areas of Mexico may be excluded from this computation.

Taxpayers may also be able to obtain a ruling from the Mexican Tax Administration in order to apply a higher financial leverage (i.e. not the 3-to-1 debt-to-equity ratio), owing to the characteristics of their activities. Also, the thin capitalisation rules do not apply to the financial sector.

In addition, taxpayers are entitled to use the sum of the average balances of the capital contributions account (CUCA) and the after-tax earnings account (CUFIN) to determine the 3-to-1 debt-to-equity ratio instead of shareholders' equity. Taxpayers that opt for this tax equity computation must continue to use it for at least five years. This alternative computation is mandatory for those taxpayers that do not account for capital following Mexican GAAP.

Specific provisions dealing with the disallowance of interest expenses for debt financing structured though back-to-back loans should also be closely observed.

## Tax credits and incentives

### Foreign tax credit

The income tax law allows Mexican corporations and individuals a foreign tax credit on income from foreign sources. The law provides that taxpayers may credit against their Mexican income tax liability the amount of income tax paid in foreign countries on their foreign-source income, as long as such income is subject to income tax in Mexico.

In general, credit is available in respect of foreign income taxes directly withheld from foreign-source income or paid with a tax return filed in the foreign country in the name of the Mexican resident or by a foreign branch of a Mexican corporation. However, in the case of dividends or distributions of profits received from corporations resident in a foreign country, when a

Mexican corporation owns at least 10% of the capital of the foreign corporation for six months prior to the dividend, a deemed-paid credit can also be taken for the proportionate part of the underlying foreign corporate income tax paid by that corporation, corresponding to the dividend or distribution of profits received. In calculating the amount of income subject to Mexican tax in these cases, the dividend or distribution must be grossed up to include the proportionate amount of tax paid by the foreign corporation. This credit is allowed also on tax paid on a second holding tier, provided certain requirements are met.

The foreign tax credit will be allowed up to the effective Mexican rate of tax on the taxable income (tax result) shown by the annual return under an 'overall' type limitation. Taxpayers who are not in a position to take full credit for the taxes paid to a foreign country on foreign-source income are allowed a ten-year carryforward of such excess foreign taxes, provided certain compliance requirements are met and the credit is limited to the corporate tax rate of 30%.

### Duty-deferral programmes

A deferral programme is an authorisation provided by the Mexican Ministry of Economy to those companies importing raw materials and fixed assets on a temporary basis to manufacture finished products within Mexico that will be exported.

In addition to the benefits described for CIT purposes in the Income determination section, IMMEX companies (known as Maquiladoras - i.e. entities with a Manufacturing, Maquila, and Export Service Program in force) are entitled to the following customs benefits:

- No payment of import duties and VAT for temporarily imported raw materials, as long as they are exported.
- Sales of temporarily imported goods to other Maquila companies at a 0% VAT rate.
- Temporary import of fixed assets without paying VAT.

Another programme allowing preferential duty rates is the Program of Sectoral Promotion (known as PROSEC) which allows manufacturers to apply lower duty rates on the permanent import of raw materials and machinery required for its productive processes, regardless of their country of origin and regardless if they are for the Mexican market or for export. These programmes were created by the federal government in order to establish competitive tariff conditions for Mexican manufacturers needing to import raw materials and fixed assets from non-NAFTA countries due to the changes made in 2001, where non-originating merchandise exported to NAFTA countries must pay duties.

The Ministry of Economy also provides a Registry for High Export Companies (known as ALTEX) which provides the following benefits:

- A company can obtain refunds of its favourable VAT balances in a shorter period of time.
- A company is exempted from the second customs review of its exports which expedites the customs clearance process.

Companies in Mexico which had formerly performed import operations with values from MXN 200 million to MXN 400 million per semester could take advantage of significant customs and administrative benefits if registered into the 'Certified Company Registry' (authorised by the Ministry of Finance).

In general terms, the main benefits provided by the Certified Company Registry are as follows:

- Permission to perform import customs clearance through any customs office.
- Reduction in time and number of reviews when clearing goods at customs facilities.
- Permission to perform clearance of goods for export at the company's own facilities.
- Possibility to amend information contained within the import-export documents (including origin), fines reductions, and self-correction.
- In the event of an 'Administrative Customs Process Review', the obligation to comply with non-tariff regulations can be met within 60 days of receiving notification from the Customs Authority, without the seizure of the imported goods. For 2010, 58.15% of 10,900 tariff items were exempt from import duties, and for the remaining tariff items the average import duty rate was 5.34%.

### *Accelerated depreciation*
Investments in certain new fixed assets outside Mexico City, Guadalajara, and Monterrey are entitled to an accelerated depreciation deduction considering a present value discounted rate of the future stream of depreciation. Some taxpayers may benefit from this deduction in the aforementioned cities if they can show that their business operations do not contribute to pollution and do not require the intensive use of water.

### *R&D incentives*
An income tax incentive for taxpayers involved in certain technological research and development projects carried out during the year allows a cash subsidy to be yearly determined by the tax authorities, based on a budget to be approved by the Mexican Congress.

### *Employment incentives*
An incentive offers a credit equivalent to 100% of the income tax corresponding to the salary paid to workers/employees with certain types of disabilities.

An additional deduction is available for employers who hire first-job employees for newly-created positions, which is calculated using a specified method.

### Incentives for investments in movie production

A limited credit is applicable for investments in movie production activities through an immediate tax credit which is capped at 10% of the total income tax of the prior year, provided certain requirements are met.

### Incentives for investments in national theatre production

Income taxpayers can benefit from a tax credit (applicable to both the annual tax calculation and the estimated monthly payments ) equal to the amount they have invested in national theatre production, while not exceeding 10% of the income tax liability of the previous tax period.

### Marginal scarcely inhabited zones

Taxpayers investing in specific regions of Mexico considered to be 'marginal scarcely inhabited zones' (less than 50,000 inhabitants) can receive certain tax benefits, such as a 100% exemption on Social Security contributions to the extent certain requirements are met and financing benefits for the development of industrial facilities according to the guidelines and limitations provided by the Ministry of Economic Affairs in Mexico.

### Real estate investment incentives

Several tax benefits exist for qualifying real estate investments (i.e. Mexican REITs such as FIBRAS, SIBRAS, etc.) in Mexico.

### Capital investment

There are certain incentives to encourage risk capital investments in Mexico.

### Other incentives

Certain other specific and limited tax incentives are available for taxpayers engaged in certain activities (e.g. those engaged in air or sea transportation of goods or passengers with respect to aircraft and ships with a federal government commercial concession or permit; in the agricultural and forestry sectors; and in bond warehouses with respect to real property used for the storage, safeguarding, or conservation of goods or merchandise).

## Withholding taxes

### Payments to Mexican residents

Payments to resident corporations and PEs in Mexico are generally not subject to WHT.

Payments by resident corporations to resident individuals are subject to WHT as follows:

| Payment | WHT (%) |
|---|---|
| Wages, salaries, and other remuneration | 0 to 30 |
| Fees: | |
| Members of boards of directors and advisory boards | 30 |
| Other professional fees | 10 |
| Lease payments on real property | 10 |
| Interest on securities (1) | 0.6 |
| Interest on non-qualified securities | 20 |
| Dividends | 0 |
| Miscellaneous types of income of individuals, usually sporadic payments | 20 |

Note

1. WHT on interest paid by financial institutions to Mexican resident investors is generally set at 0.6% of the invested capital.

   To simplify the calculation of interest income from loans entered into with financial institutions, a new procedure has been proposed based on cash flow, which would enter into force on 1 January 2012.

   Through this procedure, financial services taxpayers would be relieved from the requirement to withhold the corresponding income tax on the principal of the loan. Income tax withheld would be considered as a final payment for individuals and an advance payment for corporations.

### *Payments to non-residents*

Income tax must usually be withheld from payments to non-resident corporations and individuals. In the case of non-tax treaty countries, the statutory withholding rates are as noted below.

Income tax of 40%, with no deductions, must be withheld on most payments made to foreign related parties located in tax havens, in lieu of the tax provided in the domestic law for non-tax haven residents. This is not applicable in certain cases, such as on income not subject to Mexican taxation in accordance with the regular provisions for income earned by non-residents from a source of wealth located in Mexico, income from dividends, and certain types of interest, including interest payments made to foreign banks. In these cases, the regular provisions of the domestic law should be applied to determine the income tax withholding.

Additionally, revenues for intermediation services, including commissions for brokerage, agents, distribution, and assignment, and generally all income from the negotiation of third-party interests, are also subject to 40% WHT when paid to tax haven residents.

Non-residents' wages and salaries are taxed on the basis of a 12-month earnings period at the following income tax withholding rates:

| Taxable income | | WHT (%) |
|---|---|---|
| From | To | |
| 0 | MXN 125,900 | 0 |
| MXN 125,901 | MXN 1,000,000 | 15 |
| MXN 1,000,001 | and above | 30 |

The above mentioned rates are also applicable to retirement fund payouts.

However, no tax arises on compensation (wages, salaries, or fees other than board fees) paid by a non-resident with no establishment in Mexico (even if not subject to tax) to which the services relate, provided the individual remains in Mexico for fewer than 183 days (consecutive or not) in any 12-month period.

The tax, when applicable, is withheld if the income is paid by a resident (or a non-resident with a PE in Mexico). Otherwise, the tax is generally payable within 15 working days of the associated payment, by the party earning the Mexican-sourced income.

Statutory withholding rates (not mentioned above) under local legislation are as follows:

| Payment | WHT (%) |
|---|---|
| Professional fees for services rendered in Mexico | 25 |
| Lease payments: | |
| Lease of real property | 25 |
| Lease of containers, airplanes, and ships authorised by the Mexican Government to be commercially exploited in the transportation of goods or persons | 5 |
| Lease of personal property | 25 |
| Time-sharing services (1) | 25 |
| Charter agreements | 10 |
| Sales: | |
| Real property located in Mexico (1) | 25 |
| Shares of Mexican companies (1, 2) | 25 |
| Transfers of ownership of Mexican public debt by other than the original creditors (intended to cover debt-for-equity swaps) (1) | 25 |
| Derivative transactions: | |
| On capital (1) | 25 |
| On debt (3) | Same rates applicable to interest |
| Interest (4): | |
| Paid to foreign government financing entities, to duly registered foreign banks and other entities that provide financing with funds obtained by issuing publicly traded debt instruments abroad, registered with the Ministry of Finance (5) | 10 |
| Interest on debt instruments placed abroad (6) | 4.9 |
| Interest payments to specific foreign financial institutions (7) | 4.9 |
| Other interest payments (not otherwise included above) paid by Mexican financial institutions to residents abroad | 21 |
| Paid to foreign suppliers of M&E, to others to finance purchases of such assets or inventory or working capital loans, if the lender is duly registered | 21 |
| Paid to reinsurance entities | 15 |
| Other interest payments (11) | 30 |
| Financial leases (on the portion deemed to qualify as interest or finance charge) | 15 |
| Dividends | 0 |
| Royalties (8): | |
| For the use of railroad cars | 5 |
| For the use of copyrights on scientific, literary, or art works, including motion pictures and radio and television recordings, as well as software and payments for the transmission of video and audio signals via satellite, cable, optic fibre, and similar media | 25 |
| On patents, invention or improvement certificates, trademarks, brand names, and advertising (11) | 30 |
| For the use of drawings or models, plans, formulas, or procedures, and of scientific, commercial, and industrial equipment; on amounts paid for information regarding scientific, commercial, and industrial experience; and for technical assistance | 25 |
| Short-term construction and the respective installation, maintenance, technical direction, or supervision (9) | 25 |
| Reinsurance premiums | 2 |

| Payment | WHT (%) |
|---|---|
| Income obtained by athletes and artists (1) | 25 |
| Income derived from prizes (e.g. lottery tickets or raffles) (10) | 1/21 |
| Other income (forgiven debts, indemnifications, rights to participate in business, investments, etc.) (11) | 30 |

Notes

1. The non-resident may elect to pay tax at a rate of 30% in 2011 *(see note 11 below for the rate applicable thereafter)* on the net taxable profit in the case of (i) time-sharing services, (ii) share sales, (iii) sales of real property, (iv) activities of sportsmen/artists, and (v) derivative stock and debt transactions provided that the non-resident recipient of the income has a legal representative resident in Mexico and to the extent that the following specific requirements are met:
    - For time-sharing services, the resident legal representative must keep the audited financial statements of the taxpayer available for inspection by the Mexican Tax Administration.
    - For share sales, a tax opinion issued by a registered public accountant is required.
    - For shares and debt-for-equity swap transactions, this election is available only where the foreign taxpayer is not a resident of a country classified as a tax haven or a country with a territorial tax system. It should be noted that there is an option to defer Mexican income tax arising from the sale of shares within the same group due to a corporate reorganisation provided certain conditions are met and that no legal representative is required for sales of real property by public deed.
2. The sale of shares through the Mexican Stock Exchange and government securities are exempt from income tax withholding provided certain rules are satisfied.
3. The applicable WHT rate (based on the WHT rates for interest) for debt-derivative transactions is applied on a net basis, that is, gross income less authorised deductions. However, if the transaction is liquidated in kind, the applicable WHT rate (on the same net basis) is 10%.
4. Interest payments to non-residents are exempt from Mexican income tax when they are paid on the following:
    - Loans to the federal government or to the Bank of Mexico (Central Bank) or bonds issued by the latter organisation to be acquired and paid abroad.
    - Loans for three or more years granted or guaranteed by duly registered financial entities that promote exports through special financing.
    - Preferential loans granted or guaranteed by foreign financial entities to institutions authorised to receive tax-deductible donations in Mexico, provided these institutions are properly registered and use the funds for purposes consistent with their status.
    - Loans derived from bonds issued by the Federal government or the Bank of Mexico placed on a recognised national stock exchange, to the extent the beneficial owner is a foreign resident.
5. In 2011, a 4.9% WHT rate (the rate has been extended for another year) is applicable when the interest is paid to registered banks resident in countries with which Mexico has signed a tax treaty.
6. The 4.9% WHT rate applies, provided the placement is handled through banks or brokerage firms resident in a country with which Mexico has signed a tax treaty if there is compliance with the information requirements established in the general rules issued by the Ministry of Finance. If there is failure to comply with these requirements, the 10% WHT rate applies. The 4.9% and 10% WHT rates mentioned in the preceding paragraphs do not apply, and instead a 30% *(see note 11 below for the rate applicable thereafter)* WHT rate is applicable to interest, when the direct or indirect beneficiaries of the interest, either individually or jointly with related parties, receive more than 5% of the interest arising from the instrument in question, and are either (i) holders of more than 10% of the voting shares of the issuing company, either directly or indirectly, either individually or jointly with related parties or (ii) business entities holding more than 20% of their shares, either directly or indirectly, either individually or jointly with parties related to the issuer.
7. The 4.9% WHT rate is applicable to interest payments made to foreign financial institutions in which the Mexican federal government or the Mexican Central Bank has an equity participation.
8. The WHT rate is applied to the gross amount of the payment.
9. The non-resident taxpayer may elect to pay 30% *(see note 11 below for the rate applicable thereafter)* tax on the net profit in 2011 and 2012 if the taxpayer has a resident legal representative and so advises the customer, who then makes no withholding. When business activities last for more than 183 days, the foreign taxpayer is deemed to have a PE in Mexico for tax purposes and is taxed in the same manner as a local resident corporation or branch.
10. The 21% federal rate is applied only in the case of non-qualifying prizes (i.e. income derived from prizes that is subject to a state tax that exceeds a rate of 6%).
11. A 30% WHT rate is applicable for the period 2011 to 2012. Beginning in 2013, the rate will reduce to 29% and then back to 28% in 2014. The statutory WHT rates mentioned above may be reduced by applying tax treaty provisions. During the last decade, Mexico has embarked on a policy of negotiating a network of tax treaties with its principal trading and investment partners.

As of 1 January 2011, the treaties with the following countries are pending ratification while waiting for the completion of specific formalities by the respective governments in order to become effective, have not been published yet in the Official Gazette, or are under negotiation: Bahrain, Colombia, Hungary, Kuwait, Latvia, Lebanon, Lithuania, Malaysia, Morocco, Nicaragua, Pakistan, Slovenia, Thailand, Ukraine, and Venezuela.

Note that the tax treaties in force with Austria, Luxembourg, and the United Kingdom are being renegotiated. Although, they have not been published yet in the Official Gazette, they are expected to be applicable as of 2012 (subject to certain formalities), in which case some of the rates displayed below may have to be updated.

Tax treaties with Australia, Austria, Barbados, Belgium, Brazil, Canada, Chile, China, the Czech Republic, Denmark, Ecuador, Finland, France, Germany, Greece, Iceland, India, Indonesia, Ireland, Israel, Italy, Japan, the Republic of Korea, Luxembourg, the Netherlands, New Zealand, Norway, Panama, Poland, Portugal, Romania, Russia, Singapore, the Slovak Republic, South Africa, Spain, Sweden, Switzerland, the United Kingdom, the United States, and Uruguay have been published in the Official Gazette and are in force.

The WHT rates negotiated under the tax treaties are as follows:

| | Dividends (%) | | | |
|---|---|---|---|---|
| **Recipient** | **Portfolio** | **Substantial holdings** | **Interest (%)** | **Royalties (%)** |
| Australia | 15 | 0 (1) | 10/15 (25) | 10 |
| Austria | 10 | 5 (4) | 10 | 10 |
| Barbados | 10 | 5 (1) | 10 | 10 |
| Belgium | 15 | 5 (2) | 10/15 (16) | 10 |
| Brazil | 15 | 10 (6) | 15 | 10/15 (27, 29) |
| Canada | 15 | 5 (4) | 10 | 10 |
| Chile | 10 | 5 (6) | 5/15 (26) | 5/10 (29, 30) |
| China | 5 (7) | 5 (7) | 10 | 10 |
| Czech Republic | 10 (7) | 10 (7) | 10 | 10 |
| Denmark | 15 | 0 (3) | 5/15 (17) | 10 |
| Ecuador | 5 (7) | 5 (7) | 10/15 (16) | 10 |
| Finland | 0 | 0 | 10/15 (24) | 10 |
| France | 0/5 (9) | 0/5 (9) | 5/10 (29, 17) | 10 (29) |
| Germany | 15 | 5 (1) | 5/10 (18) | 10 |
| Greece | 10 (7) | 10 (7) | 10 | 10 |
| Iceland | 15 | 5 (1) | 10 | 10 |
| India | 10 (7) | 10 (7) | 10 | 10 (31) |
| Indonesia | 10 (7) | 10 (7) | 10 | 10 |
| Ireland, Rep. of | 10 | 5 (4) | 5/10 (17, 29) | 10 |
| Israel | 10 | 5 (10) | 10 | 10 |
| Italy | 15 (7) | 15 (7) | 10 (29) | 15 |
| Japan | 15 | 5 (8) | 10/15 (25) | 10 |
| Korea, Rep. of | 15 | 0 (1) | 5/15 (17) | 10 |
| Luxembourg | 15 | 8 (11) | 10 | 10 |
| Netherlands | 15 | 0 (12) | 5/10 (21) | 10 (28) |
| New Zealand | 15 (7, 13) | 15 (7, 13) | 10 | 10 |
| Norway | 15 | 0 (3) | 10/15 (16) | 10 |
| Panama | 7.5 | 5 (32) | 5/10 (17) | 10 (33) |
| Poland | 15 | 5 (3) | 10/15 (19) | 10 |

# Mexico

| Recipient | Dividends (%) Portfolio | Dividends (%) Substantial holdings | Interest (%) | Royalties (%) |
|---|---|---|---|---|
| Portugal | 10 (7) | 10 (7) | 10 | 10 |
| Romania | 10 (7) | 10 (7) | 15 | 15 |
| Russia | 10 (7) | 10 (7) | 10 | 10 |

| Slovak Republic | 0 (14) | 0 (14) | 10 | 10 |
| South Africa | 10 | 5 (1) | 10 | 10 |
| Spain | 15 | 5 (3) | 5/10/15 (21, 22, 29) | 10 |
| Sweden | 15 | 5 (5) | 10/15 (16) | 10 |
| Switzerland | 15 | 0 (34) | 5/10 (35) | 10 |
| United Kingdom | 0 | 0 | 5/10/15 (21, 23) | 10 |
| United States | 10 | 5 (4, 15) | 4.9/10/15 (23, 20) | 10 |
| Uruguay | 5 (7) | 5 (7) | 10 | 10 |

Notes

The applicable tax rates on dividends paid abroad in accordance with the tax treaties executed by Mexico are detailed below; however, no withholding is applied on dividend distributions under domestic law.

There are certain specific cases of interest paid to parties resident abroad that might be exempted by certain tax treaties (e.g. interest paid to a pension fund or paid by a bank, interest paid on certain loans granted or guaranteed by certain entities for exports under preferable conditions), which are not detailed in the information below.

1. This rate applies when the recipient corporation that is the beneficial owner of the dividend (except for civil partnerships) directly owns at least 10% of the capital of the distributing corporation. In the case of Barbados and South Africa, the specific exclusion of civil partnerships is not included.
2. This rate applies where the company that is the beneficial owner of the dividends directly or indirectly owns at least 25% of the capital of the distributing company.
3. This rate applies where the company that is the beneficial owner of the dividends (except for civil partnerships) directly owns at least 25% of the capital of the company distributing the dividends. In the case of Norway, taxation is limited to the country of residence of the party receiving the dividends, provided the aforementioned substantial holding rule is satisfied.
4. This rate applies where the recipient corporation that is the beneficial owner of the dividend owns at least 10% of the voting shares of the paying corporation. The Mexico-US tax treaty contains a most favoured nation clause.
5. This rate applies where a company that is the beneficial owner of the dividends (except for civil partnerships, although limited liability partnerships are included) directly owns at least 10% of the voting shares of the company distributing the dividends.
6. This rate applies where a company that is the beneficial owner of the dividends owns at least 20% of the voting shares of the company paying the dividends.
7. This is the maximum WHT rate for dividends, with no distinction for substantial holdings. In the case of Ecuador and India, the tax payable on dividends paid to residents in Mexico must not exceed a limit established in the treaty.
8. The 5% rate applies when a company that is the beneficial owner of the dividends owns at least 25% of the voting shares of the company paying dividends during the six months prior to the end of the tax period in which dividends are paid. Under certain particular rules and provided this ownership requirement is complied with, dividend payments are only subject to tax in the country of residence of the recipient of the dividends.
9. No withholding applies when more than 50% of the shares of the recipient corporation are owned by residents of France or Mexico or when the beneficial owner of the dividend is a resident individual. Accordingly, the WHT applies to dividends when more than 50% of the recipient corporation's shares are owned by residents of other countries. However, the WHT must not exceed 5% when the party receiving the dividend is the effective beneficiary of said dividend. Dividends paid by a company resident in France to a resident of Mexico, other than a company which directly or indirectly holds at least 10% of the capital stock of the first-mentioned company, may also be taxed in France, in accordance with the law of France, but if the recipient of the dividends is the beneficial owner, the tax thus charged must not exceed 15% of the gross amount of the dividends.
10. The 5% rate applies where the company that is the beneficial owner of dividends directly or indirectly owns at least 10% of the capital of the company distributing the dividends. There is a 10% tax rate that applies when these same ownership requirements are complied with, but the company paying

dividends is a resident of Israel (provided dividends are paid from earnings taxed in Israel at a tax rate lower than the regular corporate tax rate in Israel).
11. The applicable tax rate on the gross amount of the dividends when the recipient company (beneficial owner) (except for civil partnerships) directly holds at least 10% of the capital of the corporation paying the dividend must not exceed 5% in the case of Luxembourg and 8% in the case of Mexico. The protocol of the Mexico-Luxembourg tax treaty states that this rate might be reviewed in the future by the contracting states if the WHT is not fully creditable, and can be adjusted under the principle of avoiding double taxation, provided the adjusted WHT rate is not lower than 5%.
12. Dividends paid by a company resident in Mexico to a company resident in the Netherlands (which is the beneficiary of said dividends) are subject to a maximum tax of 5% on the gross amount of the dividends if the beneficial owner is a company that directly or indirectly owns at least 10% of the capital of the company paying said dividends. However, as long as a company resident in the Netherlands is not subject to Dutch income tax on dividends received from a company resident in Mexico under the terms of the Dutch income tax law and any future amendments thereto, the dividends mentioned in the preceding paragraph may only be taxed in the Netherlands (not in Mexico).
13. The Mexico-New Zealand tax treaty contains a most favoured nation clause that may be applicable in the future.
14. The exemption on dividend WHT is not applicable in the case of deemed dividends.
15. To the extent certain requirements provided in the Protocol are met, the WHT may be reduced to 0%.
16. The 10% rate applies to loans from banks.
17. The 5% WHT rate is applicable to interest paid to banks.
18. The 5% rate applies to interest on loans from banks, insurance companies, and retirement and pension plans.
19. The 10% rate applies to interest on loans from banks, insurance companies, and securities regularly and substantially traded on a recognised national stock exchange.
20. The 4.9% rate applies to interest on loans from banks and insurance companies and to interest on securities regularly and substantially traded on a recognised national stock exchange.
21. In the case of the Netherlands, the 5% rate applies to interest on loans from banks and to interest on securities regularly and substantially traded on a recognised national stock exchange. In the case of Spain and the United Kingdom, the 5% rate extends to interest paid to insurance companies.
22. The 10% rate applies to interest paid by financial institutions and interest paid to the original seller of M&E.
23. The 10% rate on interest applies in the case of interest paid to the original seller of M&E and interest paid by banks.
24. The 10% rate applies to interest on loans from banks and to interest derived from bonds or securities that are regularly and substantially traded on a recognised securities market, as well as to interest paid by the purchaser of M&E to a beneficial owner that is the seller of the M&E.
25. The 10% rate applies to interest on loans from banks and insurance companies, to interest on securities regularly and substantially traded on a recognised national stock exchange, to interest paid to the original seller of M&E in a sale on credit and to interest paid by banks.
26. The 5% rate is applicable to interest on loans granted by banks and insurance companies, securities traded on a recognised securities market, and the sale on credit of M&E.
27. It is understood that the definition of royalties applies to any type of payment received for the provision of technical assistance services. The 15% rate applies to royalties arising from the use of, or the right to use, trademarks.
28. The original rate is 15% but has been reduced to 10% as long as the Netherlands does not impose a WHT.
29. Reduced WHT rate results from the application of the most favoured nation clause.
30. The 5% rate applies to industrial, commercial, and scientific equipment.
31. The 10% rate also applies to fees for technical assistance which are payments of any kind, other than those mentioned in Articles 14 and 15 of the Treaty as consideration for managerial or technical or consultancy services, including the provision of services of technical or other personnel.
32. This rate applies where the company that is the beneficial owner of the dividends directly owns at least 25% of the capital of the distributing company.
33. The treaty broadly defines royalties and includes payments related to certain software.
34. This rate applies where the company that is the beneficial owner of the dividends directly or indirectly owns at least 10% of the capital of the distributing company.
35. The 5% rate applies on the gross amount of the interest paid to, among others, banks and insurance institutions.

## Tax administration

### Returns

Corporate taxpayers are required to file annual income and flat tax returns for the preceding calendar year by 31 March. Holding companies in the tax consolidation regime are required to file an annual consolidated tax return within four months of the end of the tax period (i.e. usually by 30 April).

Thereafter, the taxpayer is generally required to obtain a certification of tax compliance by an independent auditor and to file the related tax compliance opinion by the end of June. This certification process covers all federal taxes other than customs duties. This certification may become optional for certain taxpayers under a simplification measure recently introduced.

Business taxpayers meeting certain size criteria or belonging to a group that as a whole meets these criteria must also file a tax-compliance audit report on an annual basis with the Mexican Audit Administration. This report consists of audited financial statements and detailed schedules, together with a report by the auditor stating that no irregularities were observed in respect of the taxpayer's compliance with its federal tax liabilities. These reports must be filled electronically, and the auditor must be an independent CPA registered with the Mexican Audit Administration. From 2008 onwards, the amount of detailed information required to be filed, and the auditor's responsibility in connection therewith, has increased significantly. This obligation is now becoming elective for most companies and certain application rules will apply.

Employees' profit sharing payments are generally due by 31 May of the year following that in which the corresponding profit was obtained.

Information returns must also be filed no later than 15 February each year, reporting on, amongst others, the following activities performed in the immediately preceding year:

- Payments made to parties resident abroad.
- Loans received from or guaranteed by non-residents.
- Transactions conducted through a business trust.
- Parties to which the taxpayer makes payments and withholds income tax.
- Parties to which the taxpayer has made donations.
- Parties to which the taxpayer has paid dividends, and the value of such payments.
- Transactions carried out with suppliers and clients, either local or overseas.

Taxpayers making salary payments are also required to file information returns reporting salaries paid and salary credit paid in the immediately preceding calendar year.

An annual information return must be filed on investments made or held in a tax haven. This must be filed in February of the immediately following year.

An information return on transactions carried out with non-resident related parties must be filed together with the annual CIT return (no later than March of the following year).

An information return related to the VAT taxable activities carried out by the taxpayer, must be filed on a monthly basis.

Monthly informative returns must also be filed disclosing items used in the flat tax computation.

### *Payment of tax*

Corporate taxpayers are required to make estimated payments of CIT by the 17th day of each month based on their estimated taxable income at the end of the previous month and calculated principally by applying the profit factor to the cumulative monthly gross income. The profit factor is determined by dividing the taxable profit by gross income shown in the annual return for the preceding year, or, if no profit factor is to be found in that annual return, the factor appearing in the year preceding that and so on, up to five years, with certain adjustments. For this purpose, gross income includes nominal income, excluding inflationary adjustments. The balance of CIT for the year is due at the same time as the annual return.

Definitive monthly VAT payments and flat tax advance payments are also required by the 17th day of the immediately following month. The balance of flat tax for the year is due at the same time as the annual return.

Special procedures are provided for computing advance CIT payments and for obtaining authorisation to reduce the amounts of monthly advances after the sixth month of the year. No advance payments or adjustments thereto are required in the first year of operations.

### *Statute of limitations*

In general, the right of the tax authorities to collect taxes, review tax returns, or claim additional tax expires five years after the date the respective return is filed. However, in cases where the taxpayer has not secured a federal tax registration number, has no accounting records, has failed to keep accounting records for the required five-year period, or has not filed a tax return, the statute of limitations expires in ten years. Similarly, the period for claiming a refund of overpaid tax expires after five years.

## *Other issues*

### *International Financial Reporting Standards (IFRS) adoption*

All companies listed on the Mexican Stock Exchange are required to submit annual consolidated financial statements accompanied by the opinion of a Mexican independent CPA. Commencing in the year ending 31 December 2012, these financial statements must be prepared in conformity with IFRS and cover three years. Financial institutions and insurance companies must file audited financial statements with the appropriate regulatory agency.

The adoption of IFRS in Mexico presents companies with great challenges and opportunities. Changing from Mexican Financial Reporting Standards (MFRS) to IFRS requires companies to review their financial reporting procedures. Major changes in the requirements often have a ripple effect, impacting many aspects of a company's information reporting organisation.

Nevertheless, the benefits to Mexican companies in reporting under IFRS are numerous. Among the greatest of these is the opening up of the Mexican Stock Market to overseas investors. By adopting IFRS, investors are able to compare two companies on different sides of the world with greater ease, and thus it is hoped that the change will encourage investment in Mexican companies.

Adoption of IFRS is not a straightforward process, and it will require time and effort on the part of the adopting entities to be able to ensure a smooth transition from MFRS to IFRS and ensure that the changes and benefits from this transition are duly implemented.

## Significant developments

The corporate income tax (CIT) rate applicable in 2011 is 0%. At the time of writing, there is a proposal of a 12% CIT rate to be introduced starting in 2012.

The timing of payment of VAT on imported services (i.e. services provided by non-residents to Moldovan residents with a place of supply in Moldova) has changed; it is now to be paid at the earlier of the date of advance payment or the date the final invoice is settled (previously it was due at the date of the service supply).

Legal entities registered as VAT payers will be liable to submit tax returns using automated methods of electronic reporting starting with:

- 1 January 2012: VAT payers which are administered by the Main State Tax Inspectorate and State Tax Inspectorates of the main cities (i.e. Chisinau, Balti, Comrat).
- 1 January 2013: all other VAT payers.

The excise duties rates were amended for a series of excisable goods (e.g. alcoholic beverages, cigarettes, vehicles). Also, some types of goods were excluded from the list of goods subject to excise duties (e.g. colouring substances, presented in shapes or wrappings for retail sale).

## Taxes on corporate income

The corporate income tax (CIT) rate applicable in 2011 is 0%. At the time of writing, there is a proposal of a 12% CIT rate to be introduced starting in 2012.

Taxpayers are still liable to calculate the taxable base for CIT purposes and to submit CIT returns. Moreover, the Moldovan Tax Authorities (MTA) are entitled to apply a fine of 15% to the amount by which a taxpayer under-reported its taxable income.

Individual entrepreneurs and farming enterprises are also subject to the 0% CIT rate in 2011. CIT deductibility rules applicable for individual entrepreneurs and farming enterprises generally follow the same rules as are applicable for legal entities.

If an MTA tax inspection, applying indirect methods, re-assesses the income amount compared to the declared gross income, a 15% CIT rate may be applied to the excess amount.

In addition, taxpayers that apply the 0% CIT rate have to compute and pay a 15% tax on the value of both of the following:

- Free of charge payments to parties and other social political organisations.
- Donations to individuals which are tax exempt for the individual and are treated as non-deductible expenses for the taxpayer from the perspective of CIT.

In addition, the application of this tax is maintained on any amount exceeding the deductibility limit for charity and sponsorship expenses.

## *Corporate residence*

Resident companies generally must calculate their taxable base for CIT purposes on their worldwide income. According to Moldovan tax law, a tax resident is a legal entity organised or managed in Moldova or that has its main place of business in Moldova. In practice, tax residency is determined by the place of incorporation.

Permanent establishments (PEs), unlike resident companies, are only required to calculate their taxable base for CIT purposes on income sourced in Moldova. Based on the Moldovan tax law, a PE is a fixed place of business through which a non-resident carries out, wholly or partly, either directly or through a dependent agent, entrepreneurial activity in the territory of Moldova (e.g. other services and activities, if the period during which such services/activities are carried out exceeds three months).

## *Other taxes*

### *Value-added tax (VAT)*

The standard VAT rate in Moldova is currently 20%. It is generally applied to local supplies of goods and services as well as to goods subject to import and services subject to the reverse charge mechanism.

The last case above refers to services rendered by a non-resident supplier to a Moldovan company, in which the place of supply is deemed to be in Moldova (e.g. consulting services, supply of information, supply of staff) and where the services do not fall under any specific VAT exemption. Such import VAT is due and payable to the Moldovan budget at the date of the service supply, duly confirmed under the correspondent documentation.

Apart from the above, certain types of supplies are subject to reduced VAT rates. For instance, local supplies of bread, bakery products, milk, and dairy products; the import and local supplies of sugar produced from sugar beet; and the import and local supply of drugs and certain pharmaceutical products are subject to a reduced 8% VAT rate. Natural and liquefied gas imported into or supplied in the territory of Moldova are subject to a 6% VAT rate.

A number of supplies are subject to a 0% VAT rate (i.e. VAT exempt with the right to exercise the input VAT deduction), including exports of goods or services and international transportation. Certain supplies are subject to VAT exemptions (i.e. without the input VAT right), including financial services and the sale or rental of dwellings and land.

It should be mentioned that input VAT incurred on acquisitions of goods and/or services may be deducted, provided it is incurred by a VAT registered payer to perform VAT-able supplies within its business activity.

A company is liable to register for VAT purposes if the total turnover within the last 12 consecutive months reached the threshold of 600,000 Moldovan lei (DML) (approximately EUR 36,200).

If input VAT is incurred by a business not registered for VAT purposes, if input VAT relates to acquisitions used for supplying VAT exempt supplies, or if input VAT relates to purchases performed not for business purposes, such input VAT may not be deducted and shall be treated as a cost/expense.

If input VAT relates to acquisitions destined to perform mixed supplies (i.e. both VAT-able and VAT-exempt ones), the input VAT deduction right is exercised on a pro-rata basis.

Should a company register a deductible input VAT exceeding its output VAT, this balance could be partially refunded, provided the company only carries out any of a range of specific business activities (e.g. export supplies, international transportation services, production of bakery and dairy products, leasing activity). Otherwise, such VAT amount may be carried forward only to the following months, offsetting against the company's future output VAT liabilities.

Additionally, VAT payers performing capital investments in Moldova, except in the cities of Chisinau and Balti, are entitled to refund the recoverable VAT related to these kinds of capital investments, provided they were performed after 1 January 2008. Note that specific conditions must be met, and there are few exceptions to this rule. At the time of writing, there is a proposal that the VAT refund for capital investments would be extended under certain condition for Chisinau and Balti for the year 2012.

The fiscal period for VAT purposes is considered the calendar month.

Every VAT payer (sometimes also non-registered entities for VAT purposes) must submit VAT returns and must settle related payable VAT liabilities by the end of the month following the reporting one (except for VAT on services supplied by non-residents, which are VAT-able in Moldova).

Generally, VAT payers are required to issue VAT invoices for the VAT-able supplies performed, as well as to keep detailed records of their acquisitions and supplies in the correspondent VAT ledgers, according to a set of specific rules.

### *Customs duties*

Moldova's current customs framework is regulated by the Customs Code, Law on Customs Tariff, International Agreements concluded by Moldova to date, and by other legal acts.

In general, any kind of goods and means of transport may enter and leave the territory of Moldova without any restriction. However, certain limitations specifically provided by the legislation are in force, which cover goods and means of transport crossing the border by breaching state security, public order, environment, etc.

#### Customs regimes

Definitive and suspensive customs regimes are provided under Moldovan law.

Definitive customs regimes refer to import and export, while suspensive customs regimes are comprised of transit, bonded warehouse, inward processing relief (with suspension), processing under customs control, temporary admission, and outward processing relief.

Of these customs regimes, the following are deemed to have economic impact: bonded warehouse, inward processing relief, processing under customs control, temporary admission, and outward processing relief.

The suspensive customs regimes allow for suspension of import duties payment, usually for a specific (limited) period and provided that certain conditions are fulfilled, whilst a customs regimes having economic impact triggers a specific economic advantage to the benefit of the company applying it (e.g. repayment of customs duties paid upon importation, application of lower customs duty rates or customs duties exemption).

Citizens of Moldova, as well as foreigners, are allowed to move any goods in or out of Moldova under a simplified customs regime, provided these goods are not intended for business or commercial purposes. Individuals are exempt from the payment of customs duties on goods whose customs value does not exceed EUR 200 and which are not used for entrepreneurial or commercial purposes.

Note that there are also some environmental pollution tax related to specific packaging that importers should pay.

### Customs tariff and duties

The Law on Customs Tariff establishes standard customs duty rates applicable upon import of goods into Moldova, depending on their specific customs tariff classification code. The Moldovan Customs Tariff is based on the Harmonised Commodity Description and Coding System.

Customs duty rates are generally indicated as percentages to be applied to the customs value (i.e. ad valorem duty rates) of goods imported into Moldova. The maximum ad valorem standard customs duty rate is 25%. There are also specific customs duty rates established, as well as combined rates.

### Customs valuation

Under Moldovan customs legislation, the customs valuation is generally performed in accordance with the customs valuation principles in the General Agreement on Tariffs and Trade (GATT).

The customs value is determined based on one of the six provided valuation methods (i.e. transaction value, transaction value of identical goods, transaction value of similar goods, deductive value, computed value, and reserve method). If the first method is not applicable, then the second method should be applied and so forth.

### Preferential tariff treatment

A preferential tariff treatment presumes a reduction of or exemption from customs duty, which may also be applied within a specific quota (settled either as value or quantity).

A preferential tariff treatment is granted for specific categories of goods depending on their origin and in accordance with the free trade arrangements (FTAs) to which Moldova is a party.

Moldova has concluded FTAs to date with most of the Commonwealth of Independent States (CIS) countries and is also a Central European Free Trade Agreement (CEFTA) contracting state.

From 1 March 2008 until 31 December 2012, Moldova benefits from Autonomous Trade Preferences (ATP) from the European Union (EU), which allows unlimited duty-free access to the EU market for all products originating in Moldova, except for certain agricultural products. Such agricultural products are accepted for import into the European Union either with exemptions from customs duties within the limits of specific tariff quotas (e.g. fresh, chilled, and frozen meat of bovine animals, dairy products, common wheat, barley, maize, white sugar) or with exemption of the ad valorem component of the import duty (e.g. tomatoes, grapes, apples).

To benefit from these preferential terms for imports of goods into the European Union, compliance with origin and certification requirements has to be observed.

### Favourable tariff treatment
A favourable tariff treatment presumes a reduction or an exemption from customs duty upon import of specific goods into Moldova, depending on their type or final destination, according to domestic customs law or international agreements to which Moldova is a party.

Moldovan customs law provides the following exemptions, among others, from customs duty:

- Goods imported by individuals for personal use, not exceeding a specific threshold.
- Fixed assets aimed at being contributed in kind to a company's statutory capital.
- Goods released in Moldova under transit, bonded warehouse regimes.
- Moldovan goods previously exported and released back within a three-year term in the same status, as well as compensatory products obtained under outward processing relief.
- Certain movable goods imported by legal entities carrying out leasing activities for the purpose of paying off their contractual liabilities derived from lease agreements concluded with Moldovan individuals or legal entities.
- Goods imported by legal entities for non-commercial purposes whose customs value does not exceed EUR 50.

### *Excise taxes*
Excise taxes apply to the production and import of cars, tobacco, alcohol, petrol and lubricants, and other goods. Special excise rates for each type of excisable goods are established in the tax code. The rates are widely variable and are based on multiple factors.

The following are liable for excise duties:

- Any individual or legal entity producing and/or processing excisable goods in the territory of Moldova.
- Any individual or legal entity importing excisable goods, unless there is no specific exemption provided.

Businesses or individuals that produce and/or process excisable goods in the territory of Moldova (or intend to do so) must possess excise duty certificates, which must be granted by the tax authorities before these operations are actually carried out. It is mandatory for individuals or businesses, upon submitting the relevant applications to the tax authorities, to attach the details of the excise premises.

Under certain circumstances, excise duty exemptions may apply. Some excise-liable goods are subject to mandatory excise stamp marking and labelling.

### *Local taxes*

Local taxation in Moldova refers to the application of the following types of taxes and duties:

- Tax on the following natural resources:
  - Water.
  - Mineral exploration.
  - Geological exploration.
  - Mining operations.
  - Usage of underground areas for the construction of underground structures not related to mining operations.
  - Exploitation of underground structures within the performance of entrepreneurial activity, not related to mining operations.
  - Standing wood.
- Tax on immovable property.
- Duty for the right to perform local auctions and lotteries.
- Tax on advertising placement.
- Fee for the right to use local symbols.
- Parking tax.
- Hotel room occupancy tax.
- Resort fee.

New amendments to the legislation provide that local authorities are now authorised to establish the list and the levels of tax rates for local taxes (i.e. previously it was the competence of the Moldovan Parliament to establish the maximum rates in this respect). Additionally,

- the publicity tax is no longer to be applied for placement of advertisements by means of broadcasting via TV, internet, radio, press, and printed media, and
- the terms of payment and submission of tax returns for some local taxes were amended (e.g. tax on organisation of auctions and lotteries in the territory of the administrative territorial unit, tax on passengers’ transportation services within municipalities, cities, and villages).

#### Road taxes

Road taxes are fees collected for the use of roads and/or protection zones of the roads outside the locality limits.

The system of road taxes includes the following:

- Tax for the use of roads by vehicles registered in the Republic of Moldova.
- Tax for the use of roads of the Republic of Moldova by vehicles not registered in the Republic of Moldova.
- Tax for the use of roads by the vehicles with total mass, axle loads, or dimensions exceeding the admitted limits.
- Tax for the use of road protection zones outside the localities for carrying out construction or installation works.
- Tax for the use of road protection zones outside the locality limits for placing outdoor advertisements.
- Tax for the use of road protection zones outside the locality limits for placing roadside service objects.

Depending on the type of road tax, the tax law establishes the taxable person, deadlines for payment of the road tax, tax rates, exemptions (e.g. a legal entity or an individual shall pay road tax on vehicles registered in Moldova (i) on the date of state registration of vehicle, (ii) on the date of the vehicle inspection/annual technical testing of the vehicle).

Recently, road tax rates have been increased.

**Tax on immovable property**
Tax on immovable property is a local tax paid on real estate (i.e. land and/or construction on the land) by the proprietor or owner of material rights. Residents and non-residents owning real estate located in the territory of Moldova have similar obligations.

The 0.1% rate on immovable property used for entrepreneurial activity (i.e. due by legal entities) is applied either on the property's estimated value (if such exists) or its book value. The 0.1% rate on property used for agricultural activities is applied on the property's book value.

The actual tax rate on immovable property for a legal entity is established in monetary value (i.e. MDL), depending on its destination (e.g. land for agriculture usage) and location.

The tax on immovable property is paid by legal entities on the estimated value once per year by 1 July, while the tax on the book value is paid quarterly.

## *Branch income*

### *Branches*
Moldovan tax law does not distinguish between branches of non-resident companies and local companies established by a foreign investor. As such, a non-resident's branch is registered in Moldova as an enterprise fully owned by the foreign investor and is subject to the same tax regime as local incorporated companies.

### *Representative offices*
Representative offices are often established as a first step to operating in Moldova. According to the tax law, a representative office can engage only in auxiliary or preparatory activities. A representative office can perform only a limited range of activities without being considered a permanent establishment of the non-resident.

All representative offices must submit by 31 March of the year following the reporting year the required Tax Reporting Statement on the activity conducted during the year concerned.

## *Income determination*

### *General provisions*
Resident legal entities are taxed on their worldwide income, while non-resident entities are taxed on their Moldovan-source income. Taxable income is computed as accounting income adjusted in accordance with tax legislation.

### *Inventory valuation*
Moldovan law provides for the following inventory valuation methods: standard cost method, retail method, weighted average cost, first in first out (FIFO), and last in first out (LIFO).

Assets are generally valued at their acquisition cost, production cost, or market value.

### *Capital gains*
The capital gains rule applies to Moldovan companies selling capital assets on an occasional basis and whose ordinary activity does not include transactions with land, buildings, and shares. Shares and other investment assets (e.g. land, property) are treated under the tax law as capital assets (i.e. property not used in the ordinary course of business).

The income earned from the sale, exchange, or disposal of capital assets is deemed to be a capital gain in the amount of 50% of the difference between the purchase price (i.e. all costs related to the acquisition of capital assets) and the sale price. This capital gain must be included in the total gross amount of income for the year in which the shares were sold. This amount is subject to CIT. For 2011, the CIT rate is set at 0%.

Capital gains may be decreased by capital losses registered in previous years.

### *Dividends*
Dividends received by Moldovan legal entities both from Moldovan or foreign legal entities are taxed in Moldova with the applicable CIT rate (i.e. in 2011, the 0% CIT rate is in force).

### *Exchange gains and losses*
Foreign exchange losses are CIT deductible in the period they are incurred. Revenues obtained from foreign exchange differences are to be included in the taxable income.

In certain circumstances (e.g. high depreciation of the national currency), foreign exchange differences should be capitalised to the value of assets in relation to which the expenses were incurred.

### *Non-taxable revenues*
Moldovan tax law provides for the following main types of non-taxable revenues:

- Contributions to the capital of an entity.
- Income earned while benefiting from an income tax exemption.
- Money received from special funds and which are used in accordance with fund destination.
- Interest derived by legal entities on bank deposits with a period exceeding three years, as well as the interest derived from corporate securities issued in the form of bonds for a period exceeding three years, is tax exempted until 1 January 2015.
- Interest derived from state bonds, until 1 January 2015.

## *Deductions*

### *Deductible expenses*
As a general rule, expenses incurred by a company are deductible for CIT purposes only if these expenses are deemed as ordinary and necessary, aimed at deriving taxable income, and justified with adequate supporting documentation.

Among others, the following expenses are CIT deductible:

- Depreciation of fixed assets calculated under the diminishing balance method.
- Amortisation of intangible assets computed under the straight-line method.
- Research and development expenses incurred during the fiscal year as current expenses, should certain conditions be met.
- Business trip expenses, representation expenses, and expenses on insurance of business entities, within the limits approved by the government.
- Waste, spoilage, and expiration expenses, within the annual limitation established by the company's manager.
- Bad debts, under certain conditions.
- Charity and sponsorship expenses borne for the benefit of specific beneficiaries, up to 10% of taxable income.
- Interest payable, in specific cases.

### *Depreciation*

Fixed assets are subject to CIT depreciation under the diminishing-balance method if their useful economic life exceeds one year and acquisition costs exceed MDL 3,000.

According to the fiscal law, fixed assets are divided into five categories. These categories are set out according to specific rules, mainly on the assets' useful life (i.e. the number of years during which the assets' utilisation generates economic advantages; the useful life for each type of depreciating asset is regulated by governmental decision). The depreciation rates vary as follows:

- First category: 5%.
- Second category: 8%.
- Third category: 10%.
- Fourth category: 20%.
- Fifth category: 30%.

Intangible assets are subject to CIT depreciation according to the straight-line method.

### *Interest expense*

Different CIT deductibility rules apply for interest on loans used for carrying out operational activities and for loans used for investment activities performed on an occasional basis.

As a general rule, deductions for interest and foreign exchange losses are allowed for CIT purposes provided such expenses are deemed as ordinary and necessary for carrying out the activities of the business. Expenses should also be incurred for the purposes of obtaining taxable income and justified by adequate backup documentation.

If the interest paid by a Moldovan company relates to its operational or day-to-day activities, the related expenses are CIT-deductible. A few other provisions should also be considered, namely the following:

- Interest expenses incurred, for the benefit of individuals and legal entities (except financial institutions and micro-financing organisations), by businesses are CIT-deductible limited to the base rate (rounded to the next whole percentage) established by the National Bank of Moldova in November of the previous fiscal year and applied to short-term monetary policy transactions (i.e. the limit for 2011 is 7%). At the time of this writing, there is a proposal that certain changes will occur starting in 2012 for such interest expenses.

- If the loan is obtained to acquire / build fixed assets, the related interest expense should be capitalised to the initial fiscal value of assets until they are commissioned. The deductibility of this expense would be capped at the above limit. The excess difference is treated as a CIT non-deductible expense for that fiscal year.
- If interest relates to an investment activity, the interest expense is CIT-deductible within the limit of the income derived from the investment.

### *Net operating losses*

Fiscal losses may only be carried forward in five equal instalments for five consecutive years following the year the losses were incurred, provided the company records taxable income. If the company recorded fiscal losses for more than one year, such losses are carried forward in the order in which they arose. Fiscal losses are recorded on off-balance-sheet accounts.

The carry forward of the fiscal losses of previous years does not represent a tax advantage in the view of the current 0% CIT rate applicability.

Losses may not be carried back.

## *Group taxation*

Moldovan tax law does not provide for group consolidation of gains or losses. No group taxation is envisaged under Moldovan tax law.

### *Transfer pricing*

Transfer pricing regulations are currently at the initial stage of development, as the law does not list any specific transfer pricing methods. Moreover, taking into account that Moldova is not currently an Organisation for Economic Co-operation and Development (OECD) member country, there is no possibility of applying the OECD Transfer Pricing Guidelines.

According to the law in force, transactions carried out between related parties should observe the arms-length principle. Transactions that do not follow this rule are disregarded for tax purposes.

In accordance with Moldovan tax law, a company is considered the taxpayer's related party if it controls the taxpayer, is controlled by the taxpayer, or both the company and the taxpayer are under the common control of a third party.

From a tax perspective, control is the ownership (either directly or through one or more related parties) of 50% or more in value of the capital or voting power of one of the companies. In this case, an individual is treated as owning all equity interest owned directly or indirectly by members of one's family. Two individuals are related parties if they are spouses or relatives up to the fourth degree.

Losses incurred in dealing between related parties carried out directly or through intermediaries are treated as non-deductible for CIT purposes.

According to current Moldovan tax law, there are no formal transfer pricing documentation requirements. However, at the time of writing, there is a proposal that formal transfer pricing documentation requirements will be introduced in the Moldovan tax law starting in 2014.

## *Tax credits and incentives*

### *Investment related CIT incentives*
CIT incentives provided under the tax law are suspended during the period of applicability of the 0% CIT rate. The CIT incentives below refer to provisions of tax law applicable in 2011, while at the time of writing, there is an intention that starting in 2012 the extension of some of them will be abolished.

### *Tax incentives for information technology (IT) companies*
CIT incentives are available to legal entities performing certain software development activities up to 1 January 2012. In addition, their employees may also benefit from a personal income tax exemption for employment salaries earned from such companies, if certain conditions are met.

IT companies performing certain specific software activities in Moldova may apply for the CIT exemption. Even though the 2011 CIT rate is 0%, it is worth applying for IT incentives since obtaining such approval also provides for the personal income tax (PIT) exemption and social contributions reduction related to the qualified employees in Moldova.

The PIT exemption for these employees is simultaneously applicable provided:

- the Company benefits from the CIT incentive in 2011 and
- the specific requirements mentioned below are met.

Based on the Moldovan law on social security contributions, a special incentive is to be granted to Moldovan employers that qualify for the above mentioned IT incentives. In such cases, the social security liability of the employers is limited only to a fixed monthly contribution amounting to MDL 1,518 (approximately EUR 90) for each employee who corresponds to the occupation specified in the law.

PIT exemption is applicable only for salary income and not for other non-salary remuneration income (e.g. benefits in kind, material aids).

### *Free entrepreneurial zones (FEZ)*
FEZ are territories where domestic and foreign investors can carry out entrepreneurial activities on preferential terms (i.e. favourable tax, customs, visa, and other regimes). There are currently nine FEZ in Moldova.

The following types of activities may be carried out in a FEZ:

- Production of goods preferentially for export (i.e. supply of goods in the territory of Moldova does not exceed 30% of the total amount of goods and services supplied within one year).
- Sorting, packing, marking, and other similar operations of goods transiting the customs territory of Moldova.
- Other supportive activities.

#### FEZ incentives
The CIT currently in Moldova is 0%, and the CIT incentives for FEZ are not applicable. However, there is an objective to introduce the 12% rate starting in 2012 and maintain the following CIT incentives for FEZ investors:

- Entities that are established in FEZ and export goods and services from FEZ outside the customs territory of the Republic of Moldova will be entitled to apply only 50% of the applicable CIT rate on such gains; for other cases, the CIT rate will be 75% of the established one.
- The income obtained from export of goods (services) originating from FEZ outside the customs territory of the Republic of Moldova is CIT exempted for a period of three years, provided that the FEZ residents invested in the fixed assets of their enterprises and/or in development of the infrastructure of the FEZ a capital equivalent to at least USD 1 million.
- The income obtained from export of goods (services) originating from FEZ outside the customs territory of the Republic of Moldova is CIT exempted for a period of five years, provided that the FEZ residents invested in the fixed assets of their enterprises and/or in development of the infrastructure of the FEZ a capital equivalent to at least USD 5 million.

From a VAT standpoint, goods and services supplied in FEZ from abroad, from FEZ outside the customs territory of the Republic of Moldova, in FEZ from other areas of Moldova, and those supplied to residents of other FEZ are subject to 0% VAT.

According to the customs provisions, goods are introduced into FEZ with no VAT or customs duty and are not subject to economic policy measures, according to specific criteria. However, certain taxes in specific situations might be incurred by residents of FEZ. Investors in FEZ are guaranteed and protected from changes in legislation for a general period of up to ten years, while under certain conditions this period may be extended to 20 years.

## *Withholding taxes*

### *Residents*

Resident legal entities making payments to individuals must withhold and pay withholding tax (WHT) to the MTA at the following rates:

- 5% preliminary withholding of payments made for the benefit of resident individuals, unless such payments are tax exempt or are computed as employment salaries. The beneficiary deducts (i.e. recovers) the 5% WHT from annual income tax due. At the time of writing, there is an intention that a 7% preliminary WHT on the above payments to resident individuals will be introduced starting in 2012.
- 10% final withholding of an individual's income derived from leasing, rent, usufruct of movable and immovable property, advertising campaign (according to certain specific rules).
- 15% final withholding of dividends paid out to individuals. At the time of writing, there is a proposal that a 6% WHT on dividends will be introduced starting in 2012.
- 15% preliminary withholding from royalties and interests. The beneficiary deducts (i.e. recovers) the 15% WHT from annual income tax due. At the time of writing, there is an objective that a 12% WHT on royalties and interests will be introduced starting in 2012.
- 18% final withholding from gambling revenues.

Further to the applicability of the 0% CIT rate in 2011, the WHT is not applied to payments between resident legal entities.

### *Non-residents*

Under the 2011 domestic tax provisions, the following WHT rates apply upon payments to non-residents:

- 15% for dividend payouts (a 6% rate might be introduced starting in 2012).
- 15% for (non)monetary payments whose amount is non-deductible for CIT purposes for the payer thereof (a 12% rate might be introduced starting in 2012).
- 15% for other revenues (a 12% rate might be introduced starting in 2012).

### *Double tax treaties (DTT)*

The DTTs in force between Moldova and other countries may provide for more favourable tax rates than those provided by the local provisions. For their application, the foreign beneficiary of such income should provide the paying entity with its fiscal residency certificate before the payments are actually made.

Operational DTTs to which Moldova is a party are outlined below:

| Recipient | Dividends (%) | Interest (%) | Royalties (%) |
|---|---|---|---|
| Albania | 5/10 | 5 | 10 |
| Armenia | 5/15 | 10 | 10 |
| Austria | 5/15 | 5 | 5 |
| Azerbaijan | 8/15 | 10 | 10 |
| Byelorussia | 15 | 10 | 15 |
| Belgium | 15 | 15 | 0 |
| Bosnia & Herzegovina | 5/10 | 10 | 10 |
| Bulgaria | 5/15 | 10 | 10 |
| Canada | 5/15 | 10 | 10 |
| China | 5/10 | 10 | 10 |
| Croatia | 5/10 | 5 | 10 |
| Czech Republic | 5/15 | 5 | 10 |
| Cyprus | 5/10 | 5 | 5 |
| Estonia | 10 | 10 | 10 |
| Finland | 5/15 | 5 | 3/7 |
| Germany | 15 | 5 | 0 |
| Greece | 5/15 | 10 | 8 |
| Hungary | 5/15 | 10 | 0 |
| Ireland | 5/10 | 5 | 5 |
| Israel | 5/10 | 5 | 5 |
| Japan | 15 | 10 | 0/10 |
| Kazakhstan | 10/15 | 10 | 10 |
| Kyrgyzstan | 5/15 | 10 | 10 |
| Latvia | 10 | 10 | 10 |
| Lithuania | 10 | 10 | 10 |
| Luxembourg | 5/10 | 5 | 5 |
| Macedonia | 5/10 | 5 | 10 |
| Montenegro | 5/15 | 10 | 10 |
| The Netherlands | 0/5/15 | 5 | 2 |
| Oman | 5 | 5 | 10 |
| Poland | 5/15 | 10 | 10 |

M

| Recipient | Dividends (%) | Interest (%) | Royalties (%) |
|---|---|---|---|
| Portugal | 5/10 | 10 | 8 |
| Romania | 10 | 10 | 10/15 |
| Russian Federation | 10 | 0 | 10 |
| Serbia | 5/15 | 10 | 10 |
| Slovakia | 5/15 | 10 | 10 |
| Slovenia | 5/10 | 5 | 5 |
| Spain | 0/5/10 | 5 | 8 |
| Switzerland | 5/15 | 10 | 0 |
| Turkey | 10/15 | 10 | 10 |
| Tajikistan | 5/10 | 5 | 10 |
| Ukraine | 5/15 | 10 | 10 |
| Uzbekistan | 5/15 | 10 | 15 |
| United Kingdom | 0/5/10 | 0/5 | 5 |

## *Tax administration*

### *Returns*

An annual CIT return must be submitted to the MTA by 31 March of the year following the reporting year. For new business entities, the fiscal year is considered the period beginning with the registration date until the end of the calendar year.

The law also provides for various reporting deadlines for payments of WHT and VAT.

For WHT and VAT purposes, the fiscal period is the calendar month starting the first day of the month. WHT and VAT liabilities must be declared and settled monthly by the end of the month following the reporting month.

Individual entrepreneurs and farming enterprises with an annual average number of employees not exceeding three and not registered as VAT payers must submit a unified tax return, if certain conditions are met.

Moldovan tax law provides for a specific procedure for taxpayers submitting adjusted tax returns (after the taxpayer identifies previous errors) within a limited period of time. There is a proposal that starting in 2012 the only limitation for submitting the adjusted tax return will refer to initiation of tax inspection.

### *Payment of tax*

Taking into account that a 0% CIT is applied in Moldova, no income tax needs to be paid.

Still, legal entities that exceed the legally allowable limit on sponsorship and charity, as well as those who made payments to parties and other social political organizations or donations to individuals which are tax exempt for the individual and are treated as non-deductible expenses for the taxpayer, must declare and pay the applicable CIT by 31 March of the year following the reporting year. At the time of writing, there is an intention that starting in 2012 interim quarterly CIT payments will be reintroduced.

### Fines and penalties

In 2011, the MTA is entitled to apply a fine of 15% to the amount by which a taxpayer under-reported its taxable income for CIT purposes.

Taxpayers who settle amounts as assessed by the MTA within three business days and have no other outstanding liabilities qualify for certain tax incentives (i.e. 50% reduction of fines).

In addition, certain special provisions regarding tax evasion apply. Tax evasion is assessed on a case-by-case basis but usually assumes the insertion into financial statements, tax returns, and accounting documents of false information on revenues and expenses. In addition, hiding other taxable income may also be considered tax evasion.

Under tax law, the MTA is entitled to apply a fine in the amount of the undeclared tax if this is a result of tax evasion.

Should the amount of the tax due exceed MDL 50,000 (approximately EUR 3,000), the tax evasion is regarded as a criminal offence. According to the Moldovan Criminal Code, legal entities can be punished for tax evasion with a fine up to MDL 120,000 (approximately EUR 7,200) and preclusion from performing certain activities or winding-up.

At present time and until other amendments to the legislation enter into force, the daily penalty for failing to pay social security contributions is 0.1%, the daily penalty for failing to pay health insurance contributions is 0.1%, and the annual penalty for failing to pay other taxes is 12%.

### Rulings

The law does not provide for the possibility of obtaining binding rulings. However, taxpayers that inadequately computed tax liabilities due to incorrect written explanations issued by the MTA may not be subject to sanctions (i.e. fines and late-payment penalties). Tax liabilities may still be recomputed by the MTA. Written explanations are issued by the MTA free of charge and may remain valid for an indefinite period of time, unless cancelled by new legislation or other rulings. Such explanations are generally issued by the Moldovan competent authorities during a period of up to one month.

## Other issues

The legislation and the approach of the state authorities in Moldova related to corporate taxation have been and are expected to be subject to certain significant changes.

It is not possible to obtain binding rulings from the MTA. However, comfort letters can be obtained. As such, taxpayers should seek professional advice over specific issues, given that only limited interpretations have been issued by the MTA.

## Significant developments

Some of the significant developments in Mongolian Tax Law of 2010 are as follows:

- The windfall profits tax of 68% imposed on the marginal prices of gold and copper ore and concentrate was cancelled with effect from 1 January 2011.
- New, higher rates for mineral royalties have been introduced to reflect increased international prices, but further processing of the raw materials in Mongolia will reduce the rates.
- Final mining products (i.e. processed rather than raw materials) for export are zero-rated for VAT purposes. Raw mining materials are exempt from VAT.
- The new Law on Air Pollution fees came into effect in July 2010. Produced raw coal, used or imported organic solvents, and vehicles are subject to these fees.
- The new law on stamp duty is newly drafted and effective from 1 January 2011 *(see Stamp duty in the Other taxes section)*.

## Taxes on corporate income

Mongolian corporate income tax (CIT) is levied at the following rates, using a progressive-rate scale that ranges from 10% to 25%, as follows:

- 10% applies to the first 3 billion Mongolian tugriks (MNT) of annual taxable income.
- 25% applies to any excess of MNT 3 billion of annual taxable income.

However, the income described in the chart below is excluded when determining the annual taxable income and is taxed at different tax rates on a gross basis:

| Source of income | Applicable tax rate (%) |
|---|---|
| Dividends | 10 |
| Royalties | 10 |
| Interest | 10 |
| Gambling, betting games, and lotteries (net) | 40 |
| Sale of immovable property | 2 |
| Sale of rights (e.g. mining licenses, special activity licences, and other rights granted by the authorised organisations for conducting specific activities) | 30 |

## *Corporate residence*

A resident legal entity is an economic entity formed under the laws of Mongolia or a foreign economic entity that has its headquarter office in Mongolia. There has not been further development of this concept, so it cannot be assumed that the standard place of effective management or control test will apply.

A non-resident company is a foreign economic entity that conducts its business for Mongolian clients.

### *Permanent establishment (PE)*

The concept of a PE is not well developed, and it is no longer possible to register a branch of a foreign legal entity in Mongolia. Therefore, non-resident companies will suffer a 20% withholding tax (WHT) on a range of payments unless treaty protection is available.

## *Other taxes*

### *Value-added tax (VAT)*

A VAT at the rate of 10% is imposed on the supply of taxable goods and services in Mongolia and on imports into Mongolia.

VAT is specifically levied on the following:

- Goods sold in Mongolia.
- Work performed and services rendered in Mongolia.
- All goods imported into Mongolia to be sold or used.
- Goods exported from Mongolia for use or consumption outside Mongolia.

### *Excise tax*

Excise tax is levied on goods manufactured in or imported into Mongolia, such as tobacco, alcohol, gasoline and diesel fuel, and passenger vehicles. Excise tax is also levied on the physical units of special-purpose technical devices and equipment used for betting games and gambling and on the activities of individuals and legal entities that conduct such activities. The excise tax rates vary according to the origin, type, and place of entrance of the goods.

### *Immovable property tax*

Immovable property tax is an annual tax levied at 0.6% (this will vary from 0.6% to 1% depending on the decisions made by the local representatives' committee beginning 1 January 2013) of the value of the immovable property that is owned. For tax purposes, the value used is the value registered with the government registration authority. If the property is unregistered, the insured value is used. In the absence of either a registered or insured value, the accounting value is used.

This tax does not apply to property owned by persons and financed through the state budget, to any dwelling houses, or to any buildings and construction for public use.

### *Stamp duty*

Under the Law of Mongolia on State Stamp Duties, there are 43 types of activities subject to stamp duties, including the following:

- Settlement of a legal dispute by a court.
- Court involvement in arbitration.
- Notary services.
- Consulate services.
- State registration services for legal entities.
- Registration services for foreign invested economic entities and representative offices of foreign organisations.
- Other specific activities that need permissions and rights from the state authorities.

The amount of duty varies depending on the types of services or activities involved.

### *Customs duty*

A flat customs tariff of 5% applies with respect to most goods imported into Mongolia, except for information technology and medical equipment and pure-bred livestock, which are zero rated.

Equipment and spares imported by small and medium-size companies for the purposes of creating employment, replacing import goods, and supporting export goods are exempt from the customs tariff.

Export duties apply to certain exported goods, such as unprocessed camel wool, wood, and wooden materials.

### *Windfall profits tax*

There is currently no windfall profits tax in Mongolia. Prior to 1 January 2011, a windfall profits tax was imposed on the sale of gold and copper ore and concentrate if the prices exceeded a certain base price. The tax was levied at the rate of 68% on gold when profits reach USD 850 per ounce and on copper when profits reached USD 2,600 per ton.

### *Fees and taxes applicable to the extractive industry*

A range of fees and other taxes are payable for activities in the extractive industry. The primary ones include the following:

- Mining License Fee, which is agreed up front and stated in the mining license.
- Royalties, which are paid on the sale of mining products. The rate depends on the product being mined and the level of processing being performed in Mongolia.
- Air Pollution Fees.
- Land Use Fee.

## *Branch income*

The repatriation of profits from branches of foreign legal entities is subject to branch profits tax at a rate of 20%.

Please note that it appears it is no longer possible for foreign legal entities to establish a branch in Mongolia. However, the above provision remains in place for branches that were previously established in Mongolia.

## Income determination

Mongolian resident economic entities are taxable on aggregate annual income earned worldwide. Non-resident economic entities carrying out business activities in Mongolia are taxable only on the income earned in the territory of Mongolia.

### Inventory valuation

There is no specific provision in the tax law for inventory valuation.

### Capital gains

Capital and ordinary transactions are treated the same for tax purposes (i.e. included in annual taxable income). An exception is provided for income from sales of immovable property which is subject to tax of 2% on gross sales proceeds.

### Dividend income

Dividend income earned by a Mongolian resident entity is subject to WHT of 10%. Dividend income to be remitted out of the country to a foreign tax resident is subject to WHT at 20% but may be reduced by an applicable double taxation treaty (DTT).

### Interest income

Interest income is subject to a special income tax of 10%.

### Partnership income

Partnership income is treated as ordinary income to the partner.

### Rents/royalties income

Rent income is included in taxable income for tax determination whereas royalty income is taxed at a special rate of 10%.

### Unrealised currency exchange gains/losses

Unrealised currency exchange gains are not considered as taxable income, and, at the same time, losses are not deductible from taxable income.

### Foreign investment

Tax stability is available for foreign investments of a certain level.

### Foreign income

Unremitted earnings are taxed the same as ordinary earnings.

## Deductions

Expenses mostly associated with generating aggregate annual income are deductible for corporate income tax purposes (provided proper documentation is in place), and a list of these is provided in the legislation. Expenses not on this list are not deductable.

The corporate income tax law stipulates that finance lease payments (except interest) and fines and penalties are not deductible for tax purposes.

### Accrued expenses

Accrued expenses are tax-deductible.

### Contingent liabilities

Contingent liabilities are not tax-deductible.

### *Depreciation and amortisation*
Depreciation of fixed assets and amortisation of intangibles are tax-deductible. A straight-line method is used and the years of usage are determined for tax purposes.

### *Goodwill*
There is no specific provision in the tax law regarding the deductibility of goodwill.

### *Organisational and start-up expenses*
Organisational and start-up expenses are tax-deductible.

### *Interest expense*
Interest expenses are deductible. However, there are limits with respect to the deductibility of interest expense. *See Thin capitalisation in the Group taxation section for more information.*

### *Bad debt*
Bad debt is not tax-deductible.

### *Charitable contributions*
Charitable contributions are not tax-deductible except for donations to the fund of vocational training.

### *Pension expenses*
Compulsory pension insurance premiums paid to the Social Security Authority of Mongolia are deductible. Additional voluntary insurance premiums are tax-deductible but shall not exceed 15% of taxable income. Pension provisions or internal pension fund expenses are not deductible.

### *Payment for directors*
If a payment for directors is a salary payment on which social insurance and personal income tax is levied, it is considered as deductible.

### *Bribes, kickbacks, and illegal payments*
Bribes, kickbacks, and illegal payments are not in the list of permitted deductions. Per anti-corruption law, monetary amounts involved with respect to such payments will be confiscated and criminal proceedings will be instituted.

### *Net operating losses*
Net operating losses generally may be carried forward for up to two years. However, the annual amount of carried forward losses deductible from taxable income may not exceed 50% of the taxable income in the tax year.

Legal entities involved in the infrastructure and mining industries may carry forward 100% of their losses for up to four to eight years, depending on their investment period and based on government regulations.

There is no provision for the carryback of losses.

### *Payments to foreign affiliates*
Deductibility of payments to foreign affiliates depends on the nature of the payment:

- Interest payments are deductible but with restrictions (i.e. thin capitalisation rule may apply, interest paid on loan for construction of building and installation of equipments need to be capitalised during that period).

- Dividend payments are not deductible.
- Technical assistance service payments are deductible.
- Payments for other services are deductible.

## *Group taxation*

There are no rules permitting grouping for tax purposes in Mongolia.

### *Thin capitalisation*

A thin capitalisation rule (debt to equity ratio is 3:1) applies, and interest paid in excess of this ratio is not deductible and is treated as a dividend. This is applied on a shareholder by shareholder basis as opposed to the company as a whole; no restriction applies to interest that is not paid to a shareholder.

## *Tax credits and incentives*

A 50% tax credit is available for an economic entity that produces or grows the following products:

- Cereal, potatoes, and vegetables.
- Milk.
- Fruits and berries.
- Fodder plants.

## *Withholding taxes*

Dividends, interest, and royalties paid; goods sold; and work/services provided to non-residents are subject to WHT at a 20% rate. Dividends, interest, and royalties paid to resident companies are all subject to WHT at 10%. Dividends, interest, and royalties paid to resident individuals are subject to WHT at a 10% rate, but WHT on dividends and interest to individuals will only be effective as of 1 January 2013.

### *Current double taxation treaties (DTTs)*

| | Beneficial WHT rates (%) | | | |
|---|---|---|---|---|
| **Recipient** | **Dividends** | **Interest** | **Royalties** | **Technical fees** |
| Austria | 5/10 | 10 | 10 | N/A |

### *Pending DTTs*

- Belarus – Mongolia
- Egypt – Mongolia
- Italy – Mongolia
- North Korea – Mongolia
- Thailand – Mongolia

## *Tax administration*

### *Tax returns and assessment*

The tax year is the calendar year. Companies must submit a quarterly return by the twentieth day of the month following the end of each quarter.

An economic entity or organisation that has withheld tax from a payment of dividends, royalties, sale of rights, or a payment of income to a taxpayer should transfer the WHT to the tax authorities within seven working days. Tax withheld relating to the sale of immovable property should be transferred to the tax authorities within ten working days. A withholder must prepare and submit a quarterly return of the tax deducted by the twentieth day of the first month of the following quarter and an annual return by 10 February after the end of the tax year.

### *Payment of tax*

Tax is paid in advance by the 25th day of each month based on the estimated schedule of the current year provided by the tax authorities towards the end of the prior year. In practice, the Mongolian tax authorities allow concessions as follows:

Where total tax paid exceeds the tax liability, the excess may be credited against other taxes due or credited against future tax payments. The overpayment also may, theoretically, be refunded; however, the practice of refunding in Mongolia is not clear or consistent.

# Montenegro

## PwC contact

Krzysztof Lipka

## Significant developments

The last changes to the corporate profit tax (CPT) law, effective beginning 1 January 2010, introduced taxation of 100% rather than 50% of capital gains. The amendments also reduced a number of tax incentives, including abolishing tax deductions for newly employed staff and tax incentives for investment in efficient production of energy.

## Taxes on corporate income

Entities operating in Montenegro are subject to a 9% tax on profits. No local corporate income taxes exist.

Resident taxpayers are taxed on their worldwide profit, while non-resident taxpayers are taxed on their Montenegrin sourced income, or income attributed to their Montenegrin permanent establishment (PE). Non-residents are also subject to withholding tax (WHT) on income sourced in Montenegro. *See the Withholding taxes section for more information.*

## Corporate residence

The Montenegrin Corporate Tax Law prescribes that taxpayers are considered to be:

- entities established in Montenegro, or effectively managed and controlled in Montenegro (resident taxpayers), and
- entities with a place of effective management outside of Montenegro, which conduct business through a permanent establishment (non-resident taxpayers).

A legal entity is considered to be a tax resident if it is incorporated in Montenegro. In addition, a foreign corporation may also be deemed a Montenegrin tax resident if the corporation has a place of effective management in Montenegro. No explicit rules exist for determination of effective management. In practice, it usually is the place where key managerial decisions are made or where the board of directors sit.

### Permanent establishment (PE)

Montenegrin tax legislation contains very basic PE rules following, in main features, the guidelines set out in the Commentary to the Organisation for Economic Co-operation and Development (OECD) Model Tax Treaty. PE is defined as a fixed place of business through which a non-resident carries out business in Montenegro. PE is deemed to exist in case of a non-resident having one of the following in Montenegro: place of management, branch office, office, factory, workshop, mine, gas or oil site, stone pit, or any other place of natural resources exploitation in Montenegro. A construction site constitutes a PE only if construction activities last longer than six months.

PE is not deemed to exist in case of a non-resident having storage of inventory in Montenegro only for the purpose of delivery of goods or having operations in Montenegro that are of a preparatory or auxiliary nature.

## *Other taxes*

### *Value-added tax (VAT)*

The main principles of the Montenegrin VAT are in line with the European Union Sixth Directive guidelines. Taxable supplies are subject to a general 17% VAT rate; however, certain supplies are taxed at a reduced 7% rate (e.g. bread, milk, books, medicines, computers) and 0% rate (e.g. export of goods, supply of gasoline for vessels in international traffic).

In principle, the VAT base is comprised of consideration (in cash, goods, or services) received for supplies, including taxes except VAT (e.g. customs, excise duty) and direct costs (e.g. commissions, cost of packing, transport). If the consideration is not paid in cash, or if an exchange of goods for services takes place, the tax base will be the market value of the goods or services received at the time of supply.

Registration for VAT in Montenegro may be either as voluntary or mandatory. Voluntary VAT registration is possible for small taxpayers who have not realised turnover exceeding 18,000 euros (EUR) in the last 12-month period. Once registered, a company may not apply for deregistration for at least three years. VAT registration is mandatory for an entity that realises turnover exceeding the EUR 18,000 threshold in any 12-month period.

VAT is calculated and paid on a calendar-month basis (i.e. a VAT return must be submitted and VAT liability cleared monthly). VAT calculated on imports is paid along with custom duties.

### *Payroll tax*

Employment income includes all receipts paid or given to an individual based on employment (salaries, pensions, benefits in kind, insurance premiums, benefits, and awards above the non-taxable thresholds). Income generated through other types of personal engagements similar to employment (e.g. temporary jobs) is also considered employment income.

While employees are the taxpayers, the employer is responsible for calculating and withholding personal income tax on behalf of its employees.

Employment income is subject to WHT at a flat rate of 9% beginning 1 January 2010.

### *Social security contributions*

Social security contributions for pension and disability insurance, health insurance, and unemployment insurance are calculated and withheld by an employer from the salary paid to an employee. Unlike the other two types of social security contributions, pension and disability insurance contributions are subject to a specific annual cap (EUR 31,015.60 for 2010).

Social security contributions are payable by the employer and employee at different rates. The amount borne by the employer is treated as an operating cost while the portion payable by the employee is taken from the gross salary.

The rates paid by the employer are as follows:

- Pension and disability insurance 5.5%.
- Health insurance 3.8%.
- Unemployment insurance 0.5%.

The rates paid by the employee are as follows:

- Pension and disability insurance 15%.
- Health insurance 8.5%.
- Unemployment insurance 0.5%.

### *Excise duty*
Legal entities that are importers or producers of the following products are subject to the excise duty:

- Alcohol and alcohol beverages.
- Tobacco products.
- Mineral oils, their derivatives, and substitutes.

When excise duty is paid for these products, no distinction is made with respect to the origin of the product (i.e. whether it is local or imported). Excise duty can be prescribed as a fixed amount and/or as a certain percentage *(ad valorem)*.

### *Environmental charges*
Legal entities are subject to environmental charges for the following:

- Use of firing or electrical feed equipment with power greater than 1MW.
- Import of substances harmful to the atmosphere.
- Production or deposit of dangerous waste.
- Tax for use of road vehicles (Vignettes).

### *Property tax*
Property tax is payable by legal entities who own or have user rights over real estate located in Montenegro. The tax is levied at proportional rates, ranging from 0.1% to 1% on the market value of assets as of 1 January of the current year. A taxpayer is obliged to submit a tax return to the tax authorities within 30 days from the acquisition date. Tax is payable in two instalments, based on decisions issued by the tax authorities.

### *Property transfer tax*
Transfer tax of 3% is payable on the acquisition of ownership rights over immovable property.

The taxable base is the market value of the immovable property at the time of the acquisition. A taxpayer (i.e. the acquirer of immovable property) is obliged to submit a tax return within 15 days from the contract date. The liability is payable within 15 days from the receipt of the tax administration decision.

## *Branch income*

Non-residents carrying out business in Montenegro through a PE are taxed on their Montenegrin source income at a rate of 9%. A branch is considered to be a PE.

## Income determination

Taxable profit is calculated by adjusting the accounting profit (determined in accordance with IFRS and accounting legislation) in accordance with the provisions of the CPT law.

### Inventory valuation

Inventory is valued by applying the average-weighted-cost method or the first in first out (FIFO) method. If another method is used for book purposes, an adjustment for tax purposes should be made.

### Capital gains

Capital gains realised by the sale or transfer of real estate or other property rights, as well as shares and other securities, are subject to the 9% CPT rate. As of 1 January 2010, the tax is levied on 100% of the capital gains amount. Prior to 1 January 2010, the tax was levied on 50% of the capital gains amount.

Capital gains may be offset against capital losses occurring in the same period. A capital loss may be carried forward for five years.

### Dividend income

Dividend income of the recipient is exempt from corporate taxation in Montenegro if the distributor is a Montenegrin corporate taxpayer.

## Deductions

The following expenditures are recognised for CPT purposes, up to the prescribed threshold:

- Depreciation computed in accordance with tax legislation.
- Expenses for health care, scientific, educational, humanitarian, religious, environmental protection, and sports-related purposes, up to 3.5% of total revenue.
- Entertaining expenses, up to 1% of total revenue.
- Membership fees paid to chambers of commerce and other associations (except political parties), up to 0.1% of gross revenue.
- Provisions for redundancy payments and jubilee awards recognised as expenditures, up to the amount prescribed by the labour law.
- Provisions made by banks and insurance companies, in an amount not exceeding the amount prescribed by the legislation that regulates operation of these entities.
- Provisions for special risks of brokers and dealers, up to amount prescribed by the securities law.
- Provisions for renewable natural resources, warranties for the sale of goods and services (guarantee period), and the expected loss from court process (delicate agreements) if accounted for in accordance with the accounting legislation.

### Bad debts

Write-offs and provisions for doubtful debts are considered deductible, provided that:

- written-off/provided receivables were previously included in taxpayer's revenues
- doubtful debts were written-off/provided as uncollectible, and
- proof of unsuccessful collection of these debts exists.

### *Depreciation and depletion*
Depreciable assets are tangible and intangible assets with a useful life of at least one year and an individual acquisition value of at least EUR 300.

Intangible and fixed assets are divided into five depreciation groups, with depreciation rates prescribed for each group (I – 5%, II – 15%, III – 20%, IV – 25%, and V – 30%). A straight-line depreciation method is prescribed for assets classified in the first group (real estate), while a declining-balance method is applicable for assets classified in the other groups.

### *Net operating losses*
The taxpayer is entitled to carry forward losses incurred in an accounting period over the following five years. Carryback of losses is not allowed.

### *Payments to foreign affiliates*
Supplies of goods or services from a foreign group entity not established in Montenegro to a Montenegrin entity must be valued at arm's length. Excess expenses recorded over market value are treated as non-deductible expenses.

With respect to payment of charges of a PE, CPT law provides that administrative costs charged by the non-resident head office are non-deductible for CPT at the level of PE.

### *Taxes*
The basic deductibility rule is that business expenses incurred for business purposes are CPT deductible. Following that rule, CPT law provides for full deductibility of taxes. However, penalty interest for late payment of taxes is not CPT deductible.

## *Group taxation*

Tax consolidation is permitted for a group of companies in which all of the members are Montenegrin residents and the parent company directly or indirectly controls at least 75% of the shares in the other companies. Each company files its own tax return and the parent company files a consolidated tax return for the entire group.

Each company is taxed based on its contribution to the consolidated taxable profit (or loss) of the group.

Tax consolidation is binding for at least five years.

## *Tax credits and incentives*

The CPT law provides only three tax incentives related to businesses: one for newly established businesses in non-developed municipalities, one for non-governmental organisations, and a foreign tax credit. The 2010 amendments to the CPT law greatly reduced the incentives available, including abolishing the tax incentives for newly employed staff and energy-efficient production.

### *Tax exemption / tax credit for newly established business in non-developed municipalities*
Newly established production companies located in non-developed municipalities are entitled to a three-year tax exemption on the profits attributable to operations in these municipalities. The exemption period starts from the year in which production began.

### *Tax exemption for non-governmental organisations*
Non-governmental organisations (NGO) registered for business activity are permitted to decrease the corporate tax base by EUR 4,000 with the condition that this money is used for realisation of the main goals of an NGO.

### *Foreign tax credit*
Resident taxpayers are entitled to a tax credit up to the amount of corporate tax paid in another country on income realised in that country. This tax credit is equal to the tax paid in another country but may not exceed the amount of the tax that would have been paid in Montenegro.

## *Withholding taxes*

Montenegrin CPT law imposes WHT on income realised from a Montenegrin source and distributed to a non-resident. The scope of the WHT applies to dividends and profit distribution, capital gains, interest, royalties, intellectual property rights fees, and rental income, as well as fees for consulting, marketing, and audit services.

Distributions of dividends and share of profits are also subject to WHT if the recipient is a Montenegrin resident (either individual or legal entity).

The general WHT rate is 9%.

Application of a double-tax treaty may reduce or eliminate Montenegrin WHT. To qualify for the beneficial rates prescribed by the treaty, a non-resident must prove tax residency of a relevant treaty country and beneficial ownership over the income. No further guidance has been issued up to date.

Although Serbia is regarded as the legal successor of the Serbia and Montenegro State Union which ceased to exist in June 2006, the Republic of Montenegro, upon its Decision on Independence (dated 3 June 2006), continues to honour international treaties which were applicable in the State Union, including those executed by State Union's legal predecessors (Federal Republic of Yugoslavia and Socialist Federal Republic of Yugoslavia, i.e. former Yugoslavia). However, a quite low statutory WHT rate of 9%, which was enacted after the most of the treaties had been introduced, is usually more beneficial than treaty rates.

The list of the treaties is provided below:

| Recipient | Dividends (1) (%) | Interest (%) | Royalties (%) | Applicable from |
|---|---:|---:|---:|---:|
| Non-treaty | 9 | 9 | 9 | |
| Albania | 15/5 | 10 | 10 | 2006 |
| Belgium | 15/10 | 15 | 10 | 1982 |
| Belorussia | 15/5 | 8 | 10 | 1999 |
| Bosnia and Herzegovina | 10/5 | 10 | 10 | 2006 |
| Bulgaria | 15/5 | 10 | 10 | 2001 |
| China | 5 | 10 | 10 | 1998 |
| Croatia | 10/5 | 10 | 10 | 2005 |

| Recipient | Dividends (1) (%) | Interest (%) | Royalties (%) | Applicable from |
|---|---|---|---|---|
| Cyprus | 10 | 10 | 10 | 1987 |
| Czech Republic | 10 | 10 | 10/5 | 2006 |
| Korea | 10 | 10 | 10 | 2002 |
| Denmark | 15/5 | 0 | 10 | 1983 |
| Egypt (2) | 15/5 | 15 | 15 | 1989 |
| Finland | 15/5 | 0 | 10 | 1988 |

Notes

1. If the recipient company owns/controls at least 25% of the equity of the paying company, the lower of the two rates applies.
2. A new double taxation treaty was signed with Egypt in 2005, but it is not applicable yet. Meanwhile, the old treaty is still applicable.
3. Instruments of ratification have not been exchanged between the two countries.
4. The contract was signed, ratified, and should become applicable after the exchange of ratification instruments by the signatories.
5. A tax rate of 5% will be applicable to literary, scientific, and work of art, films and works created like films, or other sources of reproduction tone or picture. A tax rate of 10% will be applicable to patents, petty patents, brands, models and samples, technical innovations, secret formulas, or technical procedure.
6. Only in cases when dividends are to be paid to Montenegrin residents. If paid to Malaysian residents, they are taxable at 20% in Montenegro.
7. A 5% rate is applicable for intellectual property and 10% rate for industrial property.
8. A 0% rate is applicable in cases when the income recipient is the government or government owned banks.

M

## *Tax administration*

### *Returns*

The tax year in Montenegro is the calendar year. Tax returns and supplementary documents (e.g. tax depreciation form) must be filed with the tax authorities by the end of March of the following year.

### *Payment of tax*

Amendments to the CPT applicable beginning 1 January 2010 abolished monthly advance payments of the CPT and introduced the annual payment of taxes. CPT is paid by the end of March of the following year for the previous year. Alternatively, CPT may be paid in six annual instalments at the taxpayer's request.

## Significant developments

### Casablanca Finance City (CFC)

Law No. 44-10 has been enacted and published in the official Bulletin number 5904. The Law sets the rules for the setting up of a finance area in Casablanca and the conditions for companies to benefit from the CFC statute.

Finance Law 2011 has provided several corporate tax incentives for companies having CFC statute.

Entities established in Casablanca Finance City are exempt, for their export turnover, from corporate income tax (CIT) during the first five years following the date they obtain CFC statute. These companies benefit, for the export turnover, from a reduced rate of 8.75% in subsequent years.

### Small companies

The dispositions of Finance Law 2011 have set a reduced rate of 15% for small companies realizing a turnover equal to or less than 3 million Moroccan dirhams (MAD).

### Capital increase

Finance Law 2011 has extended the dispositions of Finance Law 2009, which granted a reduction of CIT equal to 20% of the amount of the capital increase, until 31 December 2012.

### Publication of tax guidelines

The tax authorities have published a tax guideline describing their interpretation of the Moroccan tax code.

The guideline is legally enforceable against tax authorities.

## Taxes on corporate income

In general, the Moroccan tax code considers that all revenues and capital gains generated in Morocco are subject to Moroccan taxation.

Companies are taxed on the difference between their trading income and expenditure. Business expenses incurred in the operation of the business are generally deductible unless specifically excluded.

The standard CIT rate is 30%. A higher rate of 37% applies to leasing companies and credit institutions.

A reduced rate of 15% applies to small companies realizing a turnover equal to or less than MAD 3 million.

Non-resident companies can, under certain conditions, opt for an alternative tax at the rate of 8% of the amount of their contract, whatever the taxable income is.

### *Minimum contribution*

CIT cannot be lower than a minimum contribution of 0.5% (or 0.25% for specific products) levied on the turnover and other specific revenues. The minimum contribution is not due during the first 36 months following the beginning of activities.

The minimum contribution paid in case of loss or the portion of minimum contribution that exceeds the amount of CIT may be offset against the portion of CIT that exceeds the minimum contribution until the third year.

## *Corporate residence*

Companies, whether or not established in Morocco, will be subject to CIT on all profits or income relating to property which they own, activities which they carry on, and profit-making transactions which they carry out in Morocco, even when these are of an occasional nature.

### *Permanent establishment (PE)*

The notion of PE is not explicitly defined under Moroccan tax law.

However, the Moroccan tax authorities apply this concept for non-resident companies according to some determined criteria that are inspired from the various tax treaties that Morocco has signed with other countries.

Indeed, the question of whether an entity will be deemed to have a PE in Morocco is a question of fact, in particular, subject to having, in Morocco, any fixed place of business through which a foreign entity conducts industrial or commercial activity for an indefinite or substantial period of time.

The term fixed place of business includes, for instance, a place of management or operations, a branch, an agency, a premises used as a sales outlet, a construction of assembly project, or a purchasing office. Also, in some specific cases, a non-resident company may be deemed as having a PE if it operates in Morocco through a dependant agent.

## *Other taxes*

### *Valued-added tax (VAT)*

VAT is levied under the Moroccan Tax Code and is due on all industrial, commercial, and handicraft transactions taking place in Morocco as well as on importation operations.

The standard rate of VAT is 20%. Lower rates of 7%, 10%, and 14% apply to specifically designated operations.

The sale of goods is considered as taking place in Morocco, and thus subject to VAT, if the goods sold are delivered in Morocco.

The sale of services is considered as taking place in Morocco, and thus subject to VAT, if the services sold are consumed or used in Morocco.

Two types of exemptions from VAT are provided. The first is an exemption with credit, equivalent to the zero tax concept. The second is an exemption without credit.

### *Customs duties/import tariffs*

Importation of goods in Morocco gives rise to payment of importation duties, the VAT on importation, and the special tax on importation called Taxe Parafiscale à l'Importation (TPI).

Customs duties are computed on the basis of the *ad valorem* value of the goods at the time of their entrance into Morocco.

Customs duties can be reduced if the imported products are covered by free trade agreements signed by Morocco or other specific regulatory dispositions.

Under Moroccan tax law, the importation operations are subject to VAT at the rate of 20%. Lower rates of 7%, 10% and 14% apply to specifically designated importations.

The Moroccan tax law also offers some economical customs regimes that provide VAT exemptions with credit (equivalent to zero rate).

The TPI rate is 0.25% levied on the value of the imported goods.

### *Excise taxes*

Excise taxes apply to specific products imported or produced in Morocco, such as tobacco, alcohol, and lubricants.

### *Registration duties*

Registration duties are due on all written or verbal conventions, such as property transfer of real estate, shares, or rights; company set up; equity increase; and goodwill transfer.

The rates of registration duties range from 1% to 6%. A flat rate of MAD 200 is also applicable to specific operations and conventions.

For information purpose, the company set up and the capital increase are subject to registration duties at the rate of 1%.

The transfer of non-listed shares is subject to registration duties at the rate of 3%. However, a 6% rate is applicable to the transfer of shares of real estate companies.

The applicable rate for the transfer of goodwill is 6%.

### *Professional tax*

A professional tax is levied on individuals and enterprises that carry out a professional activity in Morocco.

The tax consists of a tax on the rental value of business premises (rented or owned) and fixed assets. The tax rates range from 10% to 30% with exemption for the five first years of activity.

The rental value is exempted for the portion of cost exceeding MAD 50 million.

## Branch income

Non-resident entities will be subject to income tax at normal corporate rates derived from all profits or income relating to property which they own, activities which they carry on, and profit-making transactions which they carry out in Morocco.

The taxation is levied to the portion of income allocable to the branch located in Morocco.

In addition, a 10% 'branch tax' applies to a non-resident's after-tax profits. The rate at which the branch tax is levied may be reduced to the withholding tax (WHT) rate on dividends prescribed in the relevant tax treaty.

For resident entities having branches in Morocco, the income is taxable in the hands of the head office at normal corporate rates.

## Income determination

### Inventory valuation
Cost of inventory must be determined in accordance with the first in first out (FIFO) or the average cost method. The last in first out (LIFO) method is prohibited.

### Capital gains
Capital gains are taxable as a part of ordinary business income.

### Dividend income
Dividends received by corporate shareholders from Moroccan-resident entities subject to CIT must be included in business profits of the recipient company, but the dividends are 100% deductible in the computation of taxable income.

Participation exemption in Morocco is also applicable to dividends derived from foreign subsidiaries.

### Interest income
Interest income is subject to a WHT at the rate of 20%. The WHT is deductible from CIT.

### Rents/royalties income
Rents and royalties income are taxable as a part of ordinary business income.

### Foreign income
The income derived from activities carried out in a foreign country is not subject to taxation in Morocco unless the taxation is granted by treaty dispositions.

Note that the participation exemption in Morocco is also applicable to dividends derived from foreign subsidiaries.

## Deductions

### Depreciation
Fixed assets are normally depreciated according to their economical life duration according to the provision of the accounting regulation.

Depreciation is computed according to two methods: the straight-line method and the declining balance method.

The tax regulation (through administrative guidelines) has provided indicative depreciation rates applicable when the company activity or the asset to be depreciated is specific or particular.

### *Goodwill*
Under Moroccan tax law, goodwill cannot be subject to amortisation. However, a decrease of the value of goodwill is allowed to be recorded through provisions.

### *Start-up expenses*
The development as well as incorporation expenses shall be capitalized and be tax depreciated over a period of five years.

The carryforward of any loss due to the above expenses is limited to a period of four years.

### *Bad debt*
Bad debts which are definitively non-recoverable (after all recovery procedures have been undertaken) are treated, from a tax point of view, as deductible losses.

### *Charitable contributions*
Charitable contributions made by companies are deductible only if they are granted to foundations and societies explicitly provided by law.

The contributions made to the community enterprise are deductible up to 0.2% of the company turnover.

### *Fines and penalties*
Fines and penalties are not tax deductible expenses if they relate to infringements to legal and regulatory dispositions.

Tax penalties provided under Moroccan law include penalties for late return submission as well as for late payment.

### *Taxes*
Taxes constitute deductible expenses, except CIT itself and recoverable taxes.

### *Net operating losses*
Tax losses may be carried forward for a period of four years from the end of the loss-making accounting period.

However, the portion of a loss that relates to depreciation may be carried forward indefinitely.

Carryback mechanism is not allowed under Moroccan law.

### *Payments to foreign affiliates*
Payments to foreign affiliates are allowed under Moroccan law. However, such payments should respect the arm’s-length principle and foreign exchange regulations.

## Group taxation

Under Moroccan law, consolidation or group taxation is not allowed.

### Transfer pricing regime
Morocco has a general provision within its tax legislation requiring transactions between related parties to be at arm's length.

Where a Moroccan company is directly or indirectly connected with enterprises situated inside or outside Morocco, profits transferred indirectly to such enterprises, by means of increases or decreases in buying or selling prices or by any other means, must be included among taxable profits on the tax return.

In order to determine the amount to be included among taxable profits, Moroccan tax authorities will make comparisons with other similar companies carrying on normal business activities or by mean of direct assessment based on information available to the tax authorities.

### Thin capitalisation rules
No specific thin capitalisation rules exist in Morocco.

However, the tax law restricts the interest rate on debts issued by shareholders and the basis of calculating deductible interests.

Interest incurred is tax deductible if the shareholder's capital is fully paid. Additionally, the sum of the shareholder loans generating deductible interests should not exceed the equity capital subscribed, and the applicable interest rate should not exceed the official rate calculated annually on the basis of six months T-bills.

## Tax credits and incentives

The Moroccan tax law provides several tax incentives for specific sectors of activities.

### Export companies
Export companies are exempt from CIT on their profits related to their export turnover during the first five years following their first export transaction. These companies benefit from a reduced rate of 17.5% in subsequent years.

### Hotel companies
Hotel companies are fully exempt from tax on profits relating to foreign currency turnover for the first five years following their first accommodation operation in foreign currency. They also benefit from a reduced rate of 17.5% on such profits for subsequent years.

### Mining companies
Exporting mining companies, including those that sell products to export companies, benefit from a reduced CIT rate of 17.5%.

### Agricultural enterprises
Agricultural enterprises are exempt from all taxes until the year 2013.

### *Capital risk companies*
Capital risk companies are exempt from CIT on profits derived within the scope of their activities (these are profits related to purchases of companies' shares that support such companies' development and the sales of such shares thereafter).

### *Hydrocarbon companies*
Companies holding hydrocarbon exploration and exploitation permits are exempt from CIT for ten years from the beginning of hydrocarbon regular production.

### *Banks and holding companies located in offshore zones*
Banks and holding companies located in offshore zones benefit from a reduction in CIT for the first 15 years of operation.

Banks may opt for a minimum CIT of USD 25,000 or pay the tax at a reduced rate of 10%.

Holding companies pay a flat tax of USD 500 during the first 15 years.

### *Casablanca Finance City (CFC)*
A law was enacted in 2010 for the setting up of a finance area in Casablanca, called, Casablanca Finance City.

The CFC statute may be granted to specific financial institutions as well as non-financial institutions that offer such services as auditing, fiscal, legal, financial, actuarial, and human resources management advisory.

The above statute may also be granted to regional and international headquarters.

Entities established in Casablanca Finance City are exempt, for their export turnover, from CIT during the first five years following the date they obtain CFC statute. These companies benefit, for the export turnover, from a reduced rate of 8.75% in subsequent years.

### *Free trade zones (FTZs)*
The activities which must be necessarily performed by the companies established in the export free zones are mainly the followings (the activities may vary for each FTZ):

- Food processing industries.
- Textile and leather industries.
- Metallurgic, mechanic, electric, and electronic industries.
- Chemical and special chemical industries.
- Services connected with the aforementioned activities.

Entities established in FTZs are exempt, for their export turnover, from CIT during the first five years. These companies benefit, for the export turnover, from a reduced rate of 8.75% for the following 20 years.

Moreover, for entities established in FTZs, the dividends paid to non-residents relating to activities performed in the export free zone are totally exempted from the WHT on dividends.

### *Listed shares*
Non-resident entities are exempted from capital gains derived from the sale of stocks listed on the Casablanca stock exchange, excluding the shares of real estate entities.

## Withholding taxes

### WHT on interests

The standard WHT on interest paid to non-resident entities is set at 10% as provided by the Moroccan law (unless reduced by treaty).

However, the Moroccan law provides that interests on loans granted in foreign currency with a maturity exceeding ten years are exempted from WHT.

### WHT on dividends

The standard WHT rate on dividends is set at 10% according to the Moroccan law (unless reduced by treaty).

WHT does not apply to dividends paid to Moroccan companies subject to Moroccan corporate tax, subject to the delivery of a property attestation.

A branch tax of 10% applies to the net income transferred by the Moroccan branch to the foreign entities (maybe reduced by the tax treaty).

### WHT on services paid to non-resident entities

According to the Moroccan tax code, all payments of all kind of services rendered by non-resident entities are subject to WHT at the rate of 10%.

However, it shall be noted that treaties dispositions limit the scope of application of WHT only to remunerations that constitute royalties. Such dispositions overrule the domestic tax law provided by the Moroccan law.

### Treaty WHT rates

Payments to non-resident corporations and individuals are subject to WHT, as shown below.

| | Dividends (%) | | | |
|---|---|---|---|---|
| **Recipient** | **Individuals and non-qualified companies** | **Qualifying companies** | **Interest (%) (1)** | **Royalties (%)** |
| Arab Maghreb Union (2) | (3) | (3) | (3) | (3) |
| Austria | 10 | 5 | 10 | 10 |
| Bahrain | 10 | 5 | 10 | 10 |

| United Kingdom** | 10 | 10 | 10 | 10 |
| United States** | 10 | 10 | 10 | 10 |

Notes

** In case the rate provided by the double tax treaty (DTT) is higher than the one provided by the Moroccan Tax Code, the rate provided by the Moroccan Tax Code (10%) should apply.

1. Some treaties provide for an exemption for certain types of interest (e.g. interest paid to public bodies and institutions). Such exemptions are not dealt with in this treaty chart.
2. Arab Maghreb Union, the member states of which are Algeria, Libya, Mauritania, Morocco, and Tunisia.
3. There is no limitation on WHT under the treaty.
4. The lower rate (i.e. 5%) usually applies to copyright royalties and other similar payments in respect of the production or reproduction of any literary, artistic, or dramatic work (excluding cinematographic and television films), while the 10% rate applies to other types of royalties.
5. The reduced rate applies when dividends are paid to the government of the other state.

## *Tax administration*

### *Returns*

CIT returns must be filed within three months following the closing of the fiscal year.

### *Payment of tax*
Payment of tax is made during the fiscal year by way of four instalments of 25% each based on the CIT of the previous year.

In case the CIT of the year exceeds the sum of the four instalments, the company should proceed to tax regularisation after three months following the closing of the fiscal year.

Otherwise, the exceeding tax amount can be imputed on the four following instalments. Any remaining excess is reimbursed by the tax authorities.

### *Statute of limitations*
The statute of limitations runs until the end of the following fourth year. This period may be extended in case of deficits or credits.

## *Other issues*

### *Exchange controls*
Foreign investors are allowed, following the accomplishment of some formalities, to freely transfer abroad the whole proceeds of their investments in Morocco (i.e. dividends, shares sale price, and liquidation income at the condition that the initial investment is realized in one of the foreign currencies listed by the Moroccan Central Bank).

However, some specific transfers of funds into and out of Morocco are subject to prior authorizations from the exchange control office.

### *Choice of business entity*
The legal vehicles used by foreign companies for the purpose of setting up a business in Morocco are the branch and the subsidiary.

Under subsidiary form, the foreign entities generally opt for the corporation (SA) or the limited liability company (SARL).

The SARL is most adequate for companies with low investment capital while the SA is most appropriate for companies that are investing an important amount of capital. In general, the rules relating to the organisation and functioning of an SARL are more flexible than those required for an SA.

## Significant developments

Mozambique has been undergoing major tax reform since the beginning of 2003, which has consisted of replacing the existing corporate income tax (CIT) and strengthening the tax administration by improving collection procedures and increasing enforcement capacity. Effective as of 1 January 2003, a new Corporate Income Tax Code (Código do Imposto Sobre o Rendimento das Pessoas Colectivas, or CIRPC) came into force and was further amended on 1 January 2008. In September 2009, the CIRPC was further amended again to accommodate the introduction of International Financial Reporting Standards (IFRS) rules in Mozambique.

Mozambique also introduced, with effect from 1 July 2002, a new Code of Fiscal Benefits, replacing the general tax benefits conceded under the previous Code as well as sectarian incentives granted under specific legal diplomas. In January 2009, the referred Code was amended by changing and, in some situations reducing, some of the customs and tax incentives granted under the previous Code.

## Taxes on corporate income

CIT is payable on general corporate income at a tax rate of 32%. For tax years ending prior to 1 January 2010, income arising from agricultural or cattle breeding activities was subject to a reduced rate of 10%.

CIT is levied on taxable profits, defined as accounting profits adjusted to comply with tax law rules.

Corporate entities and other entities with headquarters or permanent establishment (PE) in Mozambique are subject to CIT based on their worldwide income. On the other hand, corporate entities and other entities without headquarters or PE in Mozambique (i.e. non-resident entities) are only subject to CIT on the income earned in Mozambique.

## Corporate residence

Corporate residence is determined on the basis of a company's place of incorporation or effective management. Thus, all companies with headquarters in Mozambique, as well as any PE of non-resident entities, are considered tax residents and are liable for CIT on their worldwide income.

### *Permanent establishment (PE)*
Under the relevant internal legislation, a non-resident entity is deemed to have a PE in Mozambique whenever any of the following circumstances exists:

- It has premises or other fixed places of business through which industrial, trading, agricultural, rendering of services, or similar activities are totally or partially carried out.
- It has an office, branch, plant, workshop, mines, quarries, oil or natural gas wells, or other places of extraction of natural resources.
- It has a construction, installation, or assembly site when the duration of works exceed six months, including the activities of coordination, inspection, and supervision connected to these sites.
- It has persons or hired personnel, acting and dealing in Mozambique, who are not independent agents in the terms of the law but rather acting on behalf of the company with legal capacity to conclude contracts on its behalf and its name within the scope of the company's activities.

## *Other taxes*

### *Value-added tax (VAT)*
VAT is chargeable on the sale of most goods and services as well as on imports. The standard rate is 17%. Usually, VAT is recoverable by corporate entities, except for those engaged in special business activities (e.g. financial and insurance operations, leasing (exemption with restrictions), sale of immovable property, some exempt activities).

### *Property transfer taxes (SISA)*
In Mozambique, a property transfer tax is charged on transfers of real estate excluding the land, which is owned by the State. The rate of tax is 2% of the selling price of the building.

### *Gifts and inheritance tax*
A gifts and inheritance tax is payable on transfers of all movable and immovable property by way of gift or bequest to persons resident in Mozambique or with respect to possessions situated in Mozambique. The tax is payable by the beneficiary and the rates vary from 0% to 15%, depending on the extent of the relationship between the donor and donee and the value of goods or rights transferred.

### *Stamp taxes and service charges*
Various documents require the payment of stamp duties. Service charges are payable for the performance of certain services for official purposes, such as those rendered by public notaries. These duties have been recently amended and vary generally from 0.03% to 50% on the amount of the transaction supported by the document to be stamped. In some other cases, the stamp tax comprises fixed amounts, ranging from 0.50 Mozambican meticals (MZN) to MZN 5,000.

### *Municipality taxes*
Municipality taxes that should be considered for corporate purposes include the following:

#### Municipality tax on real estate
The municipality tax on real estate is levied on the value of immovable assets situated within the municipality and owned or possessed by corporate entities. Effective tax rates range from 0.2% to 1% of the building value, depending on the municipality.

### Municipality tax on economic activities
The municipality tax on economic activities is levied on commercial or industrial activities carried out within a municipal territory. The tax depends on the activity being carried out, adjusted by coefficients, which are based on the zone and total area of the premises in square metres. In Maputo, this tax is calculated based on the following formula:

Maputo tax on economic activities = Basis rate x Index of category x Index of location x Index of area occupied

Where the basis rate is the applicable maximum amount of the national minimum salary (MZN 3,500, approximately USD 110).

Where the index of the location varies from 1.3 to 1.5 depending on the location of the premises within the municipality.

Where the index of the area occupied varies from 1.2 to 1.5 depending on the nature of the activities and the space occupied by the premises.

### Municipal surtax
The local surtax (called Derrama) may be imposed by the municipalities at a rate of up to 15% of the following taxes: (i) CIT or (ii) tax on real estate.

The local surtax is levied in relation to profits derived from activities carried out in the territory of each municipality.

When the municipalities decide to impose the surtax, the final CIT will be increased by adding the surtax (at a rate of up to a maximum of 15%) to direct taxes (i.e. CIT). For example, 32% normal CIT plus 15% municipal surtax equals 36.8% (32% + 4.8%) final CIT rate.

## *Branch income*

From a tax perspective, branches are liable for Mozambican CIT as a separate entity; therefore, the regime is the same that would apply to a Mozambican resident company. However, on the grounds that branches do not distribute dividends, the 20% withholding tax (WHT) does not apply to the after-tax profits arising in Mozambique.

## *Income determination*

### *Inventory valuation*
Special rules regarding valuation of inventories are waiting for approval from the Minister of Finance. In the meantime, all inventory valuation methods generally accepted and according to international accounting principles are permitted for tax purposes, provided that the method is:

- used by the taxpayer consistently and
- based on arm's-length prices duly documented and effectively exercised.

Based on the above assumptions, last in first out (LIFO) and first in first out (FIFO) methods are allowed. Write-downs and depreciation of inventories are not allowed. Conformity between book and tax reporting is required.

In principle, large companies began adopting IFRS in 2010.

### *Capital gains*

Capital gains less any capital losses derived from the sale or disposal of tangible fixed assets, including insurance indemnities received in case of accident, are taxed as part of normal income. If a taxpayer reinvests the sale proceeds within three tax years following the year of sale, the gain may be deferred until the end of the third year. A four-year reinvestment period may be accepted provided a prior application is submitted to the Minister of Finance. However, if the taxpayer does not realise the reinvestment, the CIT that was not assessed during the three-year period will be assessed, along with compensatory interest.

### *Inter-company dividends*

In the case of resident companies, income arising from dividends is excluded from taxable income, provided that the shares that a resident company holds in another resident company represents at least 25% of the total capital and are held for at least two consecutive years (or with an undertaking to hold the shares for this period). The same applies to income arising from risk capital companies and holding companies (Sociedade Gestora de Participações Sociais or SGPSs) or from subsidiaries as a result of the application of technical reserves in insurance companies. However, in the case of holdings, the percentage of share capital decreases to 10% and shares should be held for at least one year.

If the shareholding falls outside the parameters indicated above, the tax withheld (20%) constitutes a payment on account. A tax credit corresponding to 62.5% of the CIT is attributable to the gross-up dividend.

### *Foreign income*

Mozambican resident companies are taxed on the total income earned on a worldwide basis. Double taxation treaties allow tax paid abroad to offset Mozambican CIT. Mozambique has signed double tax treaties (DTT) with Portugal, Mauritius, Italy, the United Arab Emirates, South Africa, and Macau. A DTT with Vietnam was also signed; however, it is not yet in force.

## *Deductions*

### *Depreciation and depletion*

Depreciation is a deductible cost for CIT purposes, according to the regulations of the Corporate Income Tax Code, subject to restrictive and specific rules. Depreciation rules are contained in a specific legal diploma, which is Portaria nº 20 817, of 27 January 1968, which established the rates and limits legally allowed for depreciation purposes.

The main legal principles regarding depreciation are as follows:

- The establishment of the applicable rates falls under the competence of the Ministry of Finance.
- The calculation is carried out on a straight-line basis in accordance with the rates applicable.

The main depreciation rates are:

| Assets | Rate (%) |
|---|---|
| Tangible assets: | |
| Industrial buildings | 4 |
| Office and residential buildings | 2 |
| Machinery and installations, air conditioning, and telephone equipment | 10 |
| Lifts | 8.33 |
| Tools | 25 |
| Laboratory equipment | 12.5 |
| Telex and interior equipment | 10 |
| Furniture and filing systems | 10 |
| Typewriters and accounting machines | 14.28 |
| Computer hardware | 16.66 |
| Warehouse and filing installations: | |
| Of concrete | 5 |
| Of wood | 6.66 |
| Of steel | 8.33 |
| Trucks | 20 |
| Automobiles | 25 |
| Intangible assets: | |
| Pre-operating expenses incurred prior to the commencement of business | 33.33 |
| Deferred expenses arising in connection with increases in share capital, changes in form of business enterprises, issuance of debentures, marketing and other studies, and financial expenses incurred for the acquisition or own production of fixed assets prior to completion | 33.33 |
| Patents | 10 |
| Manufacturing licenses, concessionaire agreements, and similar rights | 5 (1) |
| Trademark or premium of taking over leases of real estate (2) | |

Notes

1. Subject to certain conditions set forth by the tax authorities.
2. Depreciation is only allowed in cases of effective reduction of value within the limits regarded as reasonable by the tax authorities.

### *Accelerated depreciation*

New immovable assets, used for the furtherance of the business, may be depreciated by increasing to 50% the normal depreciation rates approved by law. This benefit is also granted to rehabilitated immovable assets, machinery, and equipment used in agro-industrial activities.

### *Taxes*

Taxes paid in relation to the activities of a company are tax-deductible, excluding CIT itself.

### *Net operating losses*

Carryback of losses is not allowed in Mozambique. On the other hand, losses may be carried forward for a period of five consecutive years.

### *Payments to foreign affiliates*

Any payments to non-residents are allowed as deductible expenses provided that the amount does not exceed normal rates and that the taxpayer is able to prove that a business transaction was carried out with the non-resident company. The tax authorities may redetermine taxable income if, due to a special relationship between the Mozambican and non-resident companies, certain conditions existed that allowed a calculation of profit that differed from the profit that would have been calculated without the existence of such relationship (i.e. the arm's-length principle).

## Group taxation

There are no group taxation provisions available in Mozambique. Each member of a group of companies preparing consolidated accounts for accounting purposes must file separate tax returns in order to be taxed on its profits on a stand-alone basis.

### Thin capitalisation

Where loans from related foreign corporations exceed twice the corresponding equity in the borrowing Mozambican corporation, the interest on the excess borrowing is not tax-deductible. Thin capitalisation rules are in force.

According to the Mozambican thin capitalisation rules, subsidiaries are considered and treated as thinly capitalised companies if and to the extent that, as at any date of the tax period, any of their relevant debt to equity ratios exceeds a factor of two.

'Relevant debt to equity ratio', within the context of the law, means the ratio between, on one hand, the amount of direct and indirect indebtedness of a Mozambican company towards a specially related non-resident, and on the other, the amount of equity that this non-resident holds in the Mozambican company.

A 'specially related non-resident', for these purposes, is an entity with special links with another, which includes any entity that:

- holds, either directly or indirectly, at least 25% of the share capital of the Mozambican company
- though holding less than 25%, has a significant influence on its management, or
- both taxpayer and non-resident entity are under control of the same entity, which has participation in their share capital, either directly or indirectly.

Under any of these circumstances, interest paid to such specially related non-residents is not allowed as a tax deductible cost for the Mozambican company in the part that corresponds to the excessive indebtedness, unless the company can prove that it could have obtained the same level of indebtedness at comparable conditions from unrelated parties, taking into account the nature of its business, its sector of activity, dimension, and other relevant criteria.

## Tax credits and incentives

### Inbound investment incentives

In addition to the guarantees of ownership and remittance of funds abroad, the Mozambican government also guarantees the concession of tax and customs incentives. The incentives vary depending on whether a company is starting a new venture or rehabilitating one and also on the nature of the project to be developed. The incentives discussed in this section are the generic benefits applicable to standard projects. Certain specific benefits also may be applicable depending on the activities of the industry for the investment project (e.g. agriculture, tourism, science and technology).

### *Exemption from import duties*
An exemption from customs duties and VAT applies upon the importation of capital equipment, listed in Section K of the Customs Tariff Schedule.

### *Tax credit for investment*
Investments in new fixed tangible assets used in the operations of an enterprise within the Mozambican territory may benefit from an investment tax credit equal to 5% of the total investment realised, for a period of five years. This investment tax credit is offset against CIT, up to the total amount of the tax assessment. This incentive does not apply when the investment in tangible fixed assets is with respect to the construction, acquisition, restoration, or extension of buildings, passenger vehicles, furnishings, and articles of comfort and decoration, leisure equipment, advanced technology, or other assets not directly associated with the production activity carried out by the enterprise. When the project is located outside Maputo City, this tax credit is increased to 10%.

### *Advanced technology incentive*
The amount invested in specialised equipment classified as advanced technology, during the first five years from the date of commencement of activity, may be deducted from taxable income for purposes of calculating CIT, up to a maximum of 10% of taxable income.

### *Professional training incentive*
Investment expenditures for professional training of Mozambican workers shall, up to a maximum amount of 5% of the taxable income (10% in case of professional training related to new/high technology equipment), be deductible from taxable income for the purposes of calculating CIT during the first five years from the date of the commencement of such activities.

### *Exploration incentives*
During a period of five years counting from the date of exploration (i.e. the date the implementing company starts the activities approved under the investment project terms of authorization), the following expenditure may be treated as deductible expenditures for purposes of calculating CIT:

- In the case of undertakings carried out in the City of Maputo, 110% of the value of expenditures for the construction and rehabilitation of roads, railways, airports, telecommunications, water supply, electric energy, and other works of public utility is deductible for tax purposes.
- In the case of undertakings carried out in the rest of the Provinces, an amount equal to 120% of the expenditures referred to in the paragraph above is deductible for tax purposes.
- In the case of expenditures for the acquisition for personal ownership of works of art and other objects that are representative of Mozambican culture, as well as activities that contribute to the development of such works, 50% of the expenditures are deductible for tax purposes.

## *Withholding taxes*

Any non-resident entity carrying out economic activities in Mozambique, without being registered as a taxpayer, is liable to a final and definitive 20% withholding tax (WHT) that is applied on all income earned. An exception exists for telecommunications and international transport as well as the respective installation and assembly of equipment made by those same entities, which are subject to a 10% WHT rate.

Both Mozambican resident and non-resident recipients are liable to tax on dividends at a tax rate of 20%.

### Tax treaties

Mozambique has double tax treaties (DTT) in force with Portugal, Mauritius, Italy, the United Arab Emirates, South Africa, and Macau. In accordance with these DTTs, the following tax rates will be applicable to dividends, royalties, and interest:

| Recipient | Dividends (%) | Interest (%) | Royalties (%) | Capital gains on shares (%) |
|---|---|---|---|---|
| Dubai | 0 | 0 | 5 | 0 |
| Italy | 15 | 10 | 10 | 0 |
| Macau | 10 | 10 | 10 | 0 |
| Mauritius | 8/10/15 (1, 2, 3) | 8 | 5 | 0 |
| Portugal | 15 | 10 | 10 | 10 |
| South Africa | 8/15 (1, 3) | 8 | 5 | 0 |

Notes

1. The 8% rate applies if the recipient of the dividends is a company which has more than 25% of the share capital in the company that distributes the dividends.
2. The 10% rate applies if the recipient of the dividends is a company which has less than 25% of the share capital in the company that distributes the dividends.
3. The 15% rate applies in all other cases.

## Tax administration

### Returns

The tax year is, as a general rule, the calendar year. A different tax year may be applied (if previously authorised by the Ministry of Finance) for companies that carry out activities that justify a different year or non-resident companies with a PE in Mozambique.

CIT assessment must be prepared by the companies on annual returns, based on the accounting records and on adjustments prescribed by the tax regulations.

The submission of the annual tax return is due by the last working day of May for companies using the calendar year as their tax year. For companies with a tax year that is not coincident with the calendar year, the presentation of the tax return is due by the last day of the fifth month subsequent to the respective year-end.

### Payments

Mozambican companies and non-resident companies with a PE in Mozambique must pay CIT in one of the two following ways:

- In three advance payments (based on 80% of the preceding tax year's CIT), due in May, July, and September of the respective tax year; or if the tax year chosen is not coincident with the calendar year, on the fifth, seventh, and ninth months of the respective tax year.
- In three special advance payments (based on 0.5% of the preceding year's turnover less the advance payments made in previous years, which cannot be less than MZN 30,000 or more than MZN 100,000) due in June, August, and October of the respective tax year; or if the tax year chosen is not coincident with the calendar year, on the sixth, eighth, and tenth months of the respective year.

## *Significant developments*

Namibia's Minister of Finance Mrs. Saara Kuugongelwa-Amadhila presented her 9th budget to the National Assembly on 9 March 2011.

The Minister announced no tax changes in her speech, apart from excise duties. She indicated that tax law amendments will be tabled during the course of the year.

In the budget speech, Mrs. Kuugongelwa-Amadhila said the government is currently undertaking tax policy reviews, including a review of tax administration, 'with the view to optimise revenue collection with emphasis on finding alternative sources of revenue'. She also said the process to introduce an environmental tax, based on the 'polluter pays principle', has advanced.

The excise duty increased as previously announced by the SA Minister of Finance. The increased duties took effect midnight, 23 February 2011.

### *Integrated tax system*

The Ministry of Finance is engaged in a process to improve the administration of taxes. As part of the process, technical assistance was sought. The information technology system used to support tax administration is being upgraded in order to develop a fully integrated tax administration system. Once completed, the system is expected to simplify tax administration, improve services to the taxpayer, and also improve compliance and collections.

## *Taxes on corporate income*

Namibia has a source-based tax system, which means that income from a source within Namibia or deemed to be within Namibia will be subject to tax in Namibia, unless a specific exemption is available.

Income earned by foreign companies from a source within or deemed to be within Namibia will be subject to tax in Namibia. In such cases, the foreign entity must determine whether it is obliged to register a local entity or branch. A company is required to register a branch if it has established a place of business in Namibia. A local subsidiary company may be registered as an alternative to a branch.

In the event that Namibia has entered into a double tax agreement with the country where the foreign company resides, such entity will only be taxable in Namibia if it has established a permanent establishment (PE) in Namibia. If a PE exists, only the portion of income attributable to the PE will be subject to tax in Namibia.

Non-residents who do not have a place of business in Namibia may, however, be subject to withholding tax. *See the Withholding taxes section for additional details.*

No capital gains tax is payable in Namibia.

## *Calculation of taxable income*

| | |
|---|---|
| Gross income | The total amount, in cash or otherwise, received by or accrued to any person from a source within, or deemed to be within, Namibia, excluding receipts of a capital nature (provisions for specific inclusions in gross income and amounts deemed to be from a Namibian source exist). |
| Less: Exemptions | The Act provides for certain amounts to be specifically exempt from tax. |
| Equals: Income | |
| Less: Deductions | Expenditures and losses actually incurred to generate income may be deducted, provided that these expenses are not of a capital nature. |
| | The Act specifically provides for certain expenditures to be deductible and allows a deduction for capital allowances. |
| | Only expenses incurred to generate 'income' may be deducted. Expenses incurred to generate income exempt from tax are not deductible. Apportionment should be considered when expenses are incurred to generate both income and exempt income. |
| Equals: Taxable income | Taxable income is taxed at the corporate tax rate as set out under the tax rate section below. |

## *Tax rates*

The corporate tax rates are summarised below:

| Entity | Current tax rate (%) |
|---|---|
| Domestic companies and close corporations (excluding entities mentioned below) | 34 |
| Branches of foreign companies | 34 |
| Registered manufacturers (only applicable for the first ten years of registration) | 18 |
| Diamond mining companies and companies that render services to such companies in connection with diamond mining | 55 |
| Mining companies (other than diamond mining companies) and companies that render services to such companies in connection with mining | 37.5 |
| Long-term insurers (the rate is applied to gross investment income) | 13.6 |
| Petroleum income tax rate | 35 |

## *Treaty relief*

Namibia has entered into double tax agreements with the following countries:

- Botswana
- France
- Germany
- India
- Malaysia
- Mauritius
- Romania
- Russian Federation
- South Africa

- Sweden
- United Kingdom

## *Corporate residence*

The Namibian tax system is based on source and not on residency. Income derived or deemed to be derived from sources within Namibia are subject to tax.

The source is determined as the place where income originates or is earned, not the place of payment. If goods are sold pursuant to a contract entered into within Namibia, the source of income is deemed to arise in Namibia, regardless of the place of delivery or transfer of title.

Certain types of income arising outside Namibia may, in the hands of a domestic company, be deemed to arise in Namibia and be taxed as such. Examples are interest and certain copyright royalties arising outside Namibia.

### *Permanent establishment (PE)*

A PE includes, in most cases, a fixed place of business. The establishment of a local entity or branch will usually create a PE, although the provisions of the related tax treaty should be considered.

Except for the PE concept embodied in the tax treaties, corporate residence is of little tax significance.

## *Other taxes*

### *Value-added tax (VAT)*

VAT is a transaction tax, and the implications will vary for different transactions. Some transactions are taxed at a rate of 15% or 0% while other transactions are exempt from VAT. Input tax deductions may be claimed, subject to certain provisions.

VAT is levied on every taxable supply by a registered person. A taxable supply means any supply of goods or services in the course or furtherance of a taxable activity. A taxable activity means any activity that is carried on continuously or regularly in Namibia which involves the supply of goods or services for consideration.

VAT is payable on all imports for home consumption in Namibia, subject to certain exemptions (e.g. in terms of a technical assistance agreement, donations to the State, goods of which the local supply is zero-rated).

Import VAT is payable on the greater of the free on board (FOB) value plus 10%, or the market value. The payment may be deferred in terms of an import VAT account registered with the Directorate of Inland Revenue to the twentieth day of the month following the month of importation. Penalties of 10% per month or part of a month and 20% interest on outstanding import VAT, according to the Customs Asycuda reports on import VAT account numbers, are levied by the Directorate of Inland Revenue.

A company/branch is required to register for VAT if it supplies goods or services on a regular basis for consideration and if its taxable supplies (standard rated and zero-rated supplies) exceed 200,000 Namibian dollars (NAD) in any 12-month period.

A registered VAT vendor is entitled to deduct input tax credits paid in the course of taxable supplies made to such person, provided that a tax invoice is available to support the input tax deduction. It is also important to take note of deemed input tax deductions and prohibited input deductions. Import VAT paid may be deducted only as input tax if the import was in furtherance of a taxable activity and the required documentation (e.g. stamped customs entries) is held by the importer.

### *Customs and excise duties*
Namibia is a member of the Southern African Customs Union (SACU), and customs duties are not levied on intra SACU trade (i.e. between Botswana, Lesotho, Namibia, South Africa, and Swaziland).

Customs duties are payable according to the Common Customs Tariff of SACU on imports from outside SACU. Preferential duty rates apply on imports from Southern African Development Community (SADC) countries, while goods may be imported free of customs duties from Zimbabwe in terms of the Namibia-Zimbabwe Free Trade Agreement.

Excise duties are levied on local production of excisable products (e.g. cigarettes, liquor, fuel) and are included on most excisable products imported from another SACU country in terms of the duty at source procedures. Identical excise duty rates are applied throughout the SACU. Importation of excisable products from outside the SACU is subject to customs duties and specific customs duties. *Ad valorem* duties are levied on certain products (e.g. motor vehicles, perfumes) in addition to the normal customs duties.

Fuel levies are payable on petrol, diesel, and illuminating kerosene and may be claimed back for certain non-road operations (e.g. mining, farming, and construction).

Surety in the form of a provisional payment, bank, or insurance guarantee is required by Customs on all temporary importations to cover import VAT and customs duties (if applicable).

It is possible to import goods that are subject to customs duties into registered Customs' bonded warehouses, where goods are kept for later use. In this case, the payment of duties may be deferred until the goods are taken out of the bonded warehouse for home consumption or acquitted if the goods are subsequently exported.

### *Annual duty*
Annual duty is levied in terms of the Companies Act at an amount of NAD 4.00 for every NAD 10,000 (or part thereof) of the issued share capital of a company, with a minimum duty of NAD 80.00 per annum. Issued share capital includes ordinary shares, share premium, and preference shares.

Since a branch does not issue share capital, the issued share capital of the head office will be used to calculate the annual duty payable in Namibia.

### *Stamp duty*
Certain transactions may attract stamp duty. The amount of stamp duty payable differs and is based on the nature of every individual transaction.

The basic transactions can be summarised as follows:

| Transaction | Stamp duty |
|---|---|
| Agreements or contracts (other than those where duty is specifically provided for in the Act) | NAD 5 |
| Lease agreement or lease | The stamp duty will be based on lease payments, together with additional considerations specified in the lease agreement |
| Transfer or issue of marketable securities and other share transactions | Between NAD 2 and NAD 5 for every NAD 1,000 or part thereof of the value/consideration, depending on the specific transaction |

### *Transfer duty*
Transfer duty is payable at 12% of the acquisition value of real property acquired. While it is normally payable by the buyer, the agreement for the sale of the property may determine the person liable to pay these costs.

## *Branch income*

Branch income that is received or accrued from a source within, or deemed to be within, Namibia is taxable in Namibia based on the normal corporate tax rules.

A branch is regarded as an extension of its foreign head office. A branch may, therefore, not deduct fees paid to its foreign head office (unless a tax treaty provides for such a deduction), as it is argued that a branch cannot transact with itself. Reimbursement of actual expenses may, however, be deducted, subject to the normal deduction rules.

*N*

Transfer pricing rules apply between a branch and its foreign head office or other cross-border related parties.

## *Income determination*

### *Inventory valuation*
Inventory is valued at cost for tax purposes in Namibia.

### *Capital gains*
No capital gains tax is payable in Namibia.

### *Dividend income*
Dividends received from sources within Namibia or outside Namibia are included in the gross income of the taxpayer. Where non-resident shareholders tax (NRST) is payable, however, dividends are exempt in terms of the Income Tax Act. *For more information about NRST, see the Withholding taxes section.*

### *Interest income*
Namibian companies are taxed on interest received from a Namibian source. Persons other than a Namibian company, however, are subject to a WHT. *For more information, see the Withholding taxes section.*

### Partnership income

The relevant partners of a partnership are regarded as the responsible taxpayers and not the partnership itself.

In practice, the assessment of a partnership is treated like that of a private business. The partnership is first treated as a business entity on its own in terms of income and expenditure. The profit or loss at the end of the year is then allocated to the individual partners. If they derived a profit from the partnership, it is added to their other non-partnership income; or if the partnership made a loss, the partners have the right to deduct it from their non-partnership income.

### Rent/royalties income

Companies are taxed on rent and royalty income received from a Namibian source.

### Foreign income

Corporate tax in Namibia is determined on the source basis, therefore, only income from a Namibian source or deemed Namibian source is subject to corporate tax.

## Deductions

### Capital allowances

The cost (including finance charges) of machinery, equipment, and other articles used by the taxpayer to generate income is deductible in three equal annual allowances. No apportionment is required where an asset is held for less than 12 months.

Buildings used by the taxpayer to generate income qualify for an initial allowance of 20% of erection costs in the year they are first brought into use. Thereafter, an annual allowance of 4% is deductible for each year following the year of erection. Additions to existing buildings (not alterations or repairs) qualify for the same 20% and 4% deductions. Note that the allowance is calculated on the cost of erection and not the cost of acquisition. The allowance is also only calculated for a period of 21 years from the date of erection.

Mining exploration expenditures incurred before commencement of production are deductible in full in the first year that income is generated from the mine. Subsequent developmental expenditures are written off in three equal annual allowances.

Capital allowances may also be deducted with respect to patents, trademarks, leasehold improvements, etc.

A recovery or recapture of allowances previously claimed should be included in the gross income of a taxpayer in the event that the allowance is recovered or recaptured by way of disposal, withdrawal from trade for non-trade purposes, or removal from Namibia. The recapture is calculated at the market value of the asset.

### Net operating losses

Assessed tax losses may be carried forward indefinitely provided the company continues to trade. Tax laws do not allow losses to be transferred to other members of a group, and anti-avoidance provisions may be triggered by transactions designed to transfer or exploit assessed losses.

If a company ceases to trade for a full fiscal year, its assessed losses are forfeited, regardless of subsequent activities. Assessed losses are also reduced in the event of a compromise agreement with creditors.

## Group taxation

No taxation of combined operations is allowed in Namibia where operations are conducted by more than one company.

### Transfer pricing

Namibia introduced transfer pricing legislation on 14 May 2005. The legislation was aimed at enforcing the arm's-length principle in cross-border transactions carried out between connected persons. On 5 September 2006, the Directorate of Inland Revenue issued Income Tax Practice Note 2 of 2006 that contains guidance on the application of the transfer pricing legislation. The Practice Note is based on guidance set out by the Organisation for Economic Co-operation and Development (OECD) Transfer Pricing Guidelines for multinational enterprises and tax administrations.

The objective of this Practice Note is to provide taxpayers with guidelines regarding the procedures to be followed in the determination of arm's length prices, taking into account the Namibian business environment. It also sets out the Minister of Finance's views on documentation and other practical issues that are relevant in setting and reviewing transfer pricing in international agreements.

Transfer pricing legislation is essentially aimed at ensuring that cross-border transactions between companies operating in a multinational group are fairly priced and that profits are not stripped out of Namibia and taxed in lower tax jurisdictions. The legislation achieves this by giving the Minister of Finance (who essentially delegates to the Directorate of Inland Revenue) the power to adjust any non-market related prices charged or paid by Namibian entities in cross-border transactions with related parties to arm's length prices and to tax the Namibian entity as if the transactions had been carried out at market-related prices.

In terms of the normal penalty provisions of the Income Tax Act, the Directorate of Inland Revenue may levy penalties of up to 200% on any amount of underpaid tax. Consequently, the Inland Revenue may invoke such provisions in the event that a taxpayer's taxable income is understated as a result of prices that were charged in affected transactions, which were not carried out at arm's length. Further, interest will be charged on the unpaid amounts at 20% per annum.

### Thin capitalisation

The Minister may, if any amount of financial assistance provided by a foreign connected person is excessive in relation to a company's fixed capital (being share capital, share premium, accumulated profits, whether capital or not), disallow the deduction for income tax purposes of any interest or other charges payable by the Namibian person on the 'excessive portion' of the financial assistance provided by the foreigner.

There is no guidance that provides a definition for 'excessive'. Therefore, each case should be considered on the basis of the facts provided. The 3:1 ratio is applied by the Bank of Namibia for exchange control purposes and this guideline is therefore deemed suitable, until otherwise determined by Inland Revenue.

## *Tax credits and incentives*

### *Manufacturing*

The following is a high-level comparison of the different tax treatments for companies and registered manufacturing companies. This table does not consider the specific conditions that should be met in order for these incentives to be utilised.

| Tax benefit | Tax treatment for normal taxpayers | Tax incentive for manufacturers |
|---|---|---|
| Building allowance<br>A building allowance is deductible with respect to buildings used for purposes of trade. | The allowance is calculated as 20% of the cost of construction in the year in which the building enters service and 4% during the 20 years that follow the year of construction. | The allowance is calculated as 20% of the cost of construction in the year in which the building enters service and 8% during the ten years that follow the year of construction. |
| Employee allowances | Expenditures for remuneration and training of employees are deductible for tax purposes. | An additional allowance of 25% of remuneration and training of employees that are directly engaged in the manufacturing process are deductible. |
| Export expenditure allowance | Export expenditures incurred are deductible for tax purposes. | An additional allowance of 25% of costs incurred in an export country, in order to export Namibian manufactured goods to such country, may be deducted. |
| Export allowance<br>Any taxpayer that derives income from the export of manufactured goods, excluding meat or fish, may deduct an export allowance equal to 80% of the taxable income derived from the export of manufactured goods. | Gross profit derived from the export of manufactured goods as a percentage of total gross profit should be used to determine the percentage of taxable income that is used to calculate the export allowance. | |
| Transport allowance | Land-based transport costs (i.e. transport by road or rail) are deductible for tax purposes. | An additional allowance of 25% of land based transport cost in respect of material and components used in the manufacturing process or equipment imported for direct use in the manufacturing process may be deducted. |
| Preferential tax rate | The normal tax rate for companies other than mining companies or registered manufacturers is 34%. | The tax rate for a registered manufacturer for taxable income with respect to the manufacturing activity for which they are registered is 18%. This preferential rate is applicable for a period of ten years from registration as a manufacturer. |

Note that only the building allowance and preferential tax rate (as set out above) may create or increase a tax loss.

### Export Processing Zones (EPZ)

In order to become an export processing zone company, a particular entity must register with the EPZ governing body and obtain approval from Inland Revenue.

An EPZ company qualifies for the following benefits:

- The company is exempt from corporate tax.
- No VAT is payable on the sale of goods or services rendered in a zone.
- No VAT is payable on goods imported or manufactured in the zone.
- No customs or excise duty is payable on goods imported into the zone.
- No stamp duty or transfer duty is payable in relation to the transfer of movable or immovable property in a zone.
- A 75% refund of expenditures incurred in training Namibian citizens.
- Some of the provisions in the Labour Relations Act do not apply in a zone.

Enterprises must comply with the following requirements in order to qualify for EPZ status:

- Goods must be exported to countries other than countries in the SACU.
- Industrial employment must be created or increased.
- Namibia's export earnings must be increased as a result of manufactured goods exported.

EPZ companies may not be involved in retail business operations.

## Withholding taxes

Withholding taxes (WHT) are applicable where dividends and royalties or similar payments are declared or distributed to non-Namibian residents.

### Dividends

Dividends declared by a Namibian company to a non-resident holding company are subject to non-resident shareholders tax (NRST), a WHT. NRST is payable at a rate of 10% unless treaty relief is available. NRST is payable within 30 days after declaration of a dividend.

### Royalties or similar payments

WHT on royalties are payable when a Namibian company pays a royalty to a non-resident. WHT is levied at a rate of 10.2% (30% of the corporate tax rate of 34%) and is payable within 14 days after the end of the month during which the liability for payment is incurred.

A royalty includes payment for the use or right to use any patent or design, trademark, copyright, model, pattern, plan, formula or process or any other property or right of a similar nature. A royalty also includes the imparting of any scientific, technical, industrial, or commercial knowledge or information for use in Namibia. The nature of fees payable should therefore be carefully considered in order to determine whether the relevant amount represents a royalty.

### Interest

A WHT of 10%, calculated on the gross amount of interest, is payable on interest accruing to any person, other than a Namibian company, from a registered Namibian banking institution or unit trust scheme. The tax withheld is a final tax, and the financial institution is responsible to withhold the tax.

Namibian companies, however, are taxed on interest at the corporate tax rate.

It is the obligation of the financial institution to withhold the tax and pay such tax to the revenue authorities.

### *Summary of WHT payable*

The WHT rates and treaty relief for Namibian double tax agreements can be summarised as follows. Note that the tax treaties contain certain requirements that should be met before the reduced tax rate may be applied.

The definitions of dividends, royalties, and interest in the various treaties should also be considered.

| Recipient | Dividends (%) | Royalties (%) | Interest (%) |
|---|---|---|---|
| Non-treaty | 10 | 10.2 | 10* |
| Botswana | 10 | 10 | 10 |
| France | 5 | 10 | 10 |
| Germany | 10 | 10 | 0 |
| India | 10 | 10 | 10 |
| Malaysia | 5 | 5 | 10 |
| Mauritius | 5 | 5 | 10 |
| Romania | N/A | 5 | 10 |
| Russian Federation | 5 | 5 | 10 |
| South Africa | 5 | 10 | 10 |
| Sweden | 5 | 5 | 10 |
| United Kingdom | 5 | 5 | N/A |

* Namibian companies are taxed at the corporate tax rate on interest received

'N/A' means that the provisions of the tax treaty limited the rate to a rate that is higher than the local Namibian rate. It should be noted that a treaty may only provide tax relief and cannot impose a higher tax rate

### *Mining royalties*

The Minerals (Prospecting and Mining) Act levies a royalty on minerals won or mined by a licence holder in Namibia, based on the table below:

| Group of minerals | Percentage of market value of minerals leviable as a royalty (%) |
|---|---|
| Precious metals | 3 |
| Base and rare metals | 3 |
| Semi-precious stones | 2 |
| Nuclear fuel minerals | 3* |
| Industrial minerals | 2 |
| Non-nuclear fuel minerals | 2 |

* Applicable to all licence holders on nuclear fuel minerals, except Rössing Uranium Mine Ltd where a 6% royalty is applicable

## *Tax administration*

The due date for filing of returns can be summarised as follows:

| Return | Due date |
|---|---|
| Income tax return | Within seven months after the financial year-end of the company. |
| Provisional tax return – first payment | Within six months from the commencement of the respective tax year. |
| Provisional tax return – second payment | On/before the last day of the respective tax year. |
| Provisional tax return – top-up payment | Within seven months after the financial year-end of the company. |
| Employees' tax return (PAYE return) | Within 20 days following the month to which the PAYE relates. |
| PAYE reconciliation return | Within 30 days from the tax year-end for individuals (i.e. 30 March each year). |
| VAT return | Within 25 days following the month to which the VAT relates. |
| Import VAT | Within 20 days following the month to which the VAT relates. |
| WHT on dividends | Within 30 days after declaration of the dividend. |
| WHT on royalties or similar payments | Within 14 days after the end of the month during which the liability for payment of the royalty was incurred. |

### *Penalties and interest*

The penalties and interest due for late submissions and payments can be summarised as follows:

| Tax area | Reason | Penalty (%) | Interest (%) |
|---|---|---:|---:|
| 1st provisional tax | Late submission | None | None |
| | Late payment | 10 | 20 |
| 2nd provisional tax | Late submission | 20 | 20 |
| | Late payment | 10 | 20 |
| | Under-estimation | 20 | 20 |
| Income tax return | Late submission | 10 | 20 |
| | Late payment | None | 20 |
| | Omission/incorrect statement | Up to 200 | 20 |
| WHT | Late payment | 10 | 20 |
| VAT & Import VAT | Late submission | NAD 100 per day | 20 |
| | Late payment | 10 | 20 |

### *Anti-avoidance*

Note that the Income Tax Act, Act 24 of 1981, contains an anti-avoidance section, Section 95, which enables the Receiver of Revenue to disregard the implications of a transaction or scheme if it can be proven that:

- such transaction or scheme had been entered into to avoid or postpone the payment of any duty or levy imposed by the Act
- such transaction or scheme was entered into or carried out by means or in a manner that would not normally be employed in the entering into or carrying out of a transaction, operation or scheme of the nature of the transaction, operation or scheme in question, or has created rights or obligations that would not normally be

N

created between persons dealing at arm's length under a transaction, operation or scheme of nature of the transaction, operation or scheme in question, and
- such transaction or scheme was entered into or carried out solely or mainly for the purposes of the avoidance or the postponement of liability for the payment of any tax duty or levy.

The Receiver of Revenue can, at its sole discretion, impose Section 95 on any transaction or scheme, which will place the onus on the taxpayer to prove that any/all of the requirements noted above will not be applicable to the transaction or scheme.

## Significant developments

One of the most important aspects of the 2011 Dutch Tax Package was a further reduction of the standard corporate income tax (CIT) rate to 25% as of 1 January 2011. Furthermore, several important temporary tax reliefs that were introduced in previous years are now extended to also apply to 2011.

The Ministry of Finance announced its latest plans to amend the Corporate Income Tax Act on several occasions during the last few years. Recently, on 14 April 2011, the Fiscal Agenda was published with the tax plans of the State Secretary of Finance. With regard to corporate taxes, the most relevant plans include a broadening of the CIT base by dealing with the interest deduction regime for takeover companies and the import of losses of foreign permanent establishments (PEs). If these measures are proposed in the autumn of 2011, they could lead to a lowering of the main CIT rate from 25% to 24% and could take effect as of 1 January 2012. Furthermore, an amendment of the tax treatment of interest for participations will be considered.

The 2010 Tax Package already provided for an important liberalisation of the participation exemption regime in CIT and a further expansion of the patent box (now 'innovation box') as of 1 January 2010.

Since 2008, the government has taken several measures, including tax measures, in order to deal with the consequences caused by the worldwide economic crisis. New temporary provisions provide for accelerated depreciation of up to 50% a year of the value of qualifying assets bought and investments made in 2009, 2010, and 2011, under certain conditions. Furthermore, for the years 2009, 2010, and 2011, the first CIT bracket has been extended substantially. Finally, corporate taxpayers may opt for a temporary extension of the carryback period of losses.

The Netherlands pursue an active tax treaty policy in order to maintain and extend its wide tax treaty network. With respect to the avoidance of double taxation on income and capital, the Netherlands has concluded bilateral tax treaties with about 90 other countries worldwide. In 2010, the tax treaties with Azerbaijan, Bahrain, and Qatar came into force. In 2011, the new (or revised) tax treaties with the United Kingdom, the United Arab Emirates, Saudi Arabia, and Slovakia have taken effect.

Please note this information is current as of 1 June 2011. Typically, pending legislation is announced in September. Please visit the Worldwide Tax Summaries website at www.pwc.com/taxsummaries to see any significant corporate tax developments that occurred after 1 June 2011.

# The Netherlands

## *Taxes on corporate income*

In general, a Dutch resident company is subject to CIT on its total worldwide income. However, certain income can be exempted or excluded from the tax base. Non-resident entities only have a limited tax liability with regard to income from Dutch sources.

### *Standard corporate income tax (CIT) rate*

The Dutch standard CIT rate has been reduced significantly over the past years. As of 1 January 2011, the standard CIT rate is 25% (25.5% prior to 1 January 2011). There are two taxable income brackets. A lower rate of 20% applies to the first income bracket, for taxable income up to 200,000 euros (EUR).

Prior to 2011, the standard CIT rate was 25.5% (for the years 2007 to 2010), 29.6% (2006), and 31.5% (2005). In 2010, 2009, and 2008 there were two taxable income brackets, with a lower rate of 20% applicable to the first bracket. The upper limit of the first bracket was EUR 200,000 (2009 and 2010), and EUR 275,000 (2008). In 2007, there were three tax brackets. Profits in the first bracket (up to EUR 25,000) were taxable at a 20% rate and in the second bracket (between EUR 25,000 and EUR 60,000) at a rate of 23.5%. Taxable income above EUR 60,000 was taxed at the standard rate of 25.5%.

### *Fiscal investment fund regime*

In general terms, under the existing fiscal investment fund regime, the CIT rate for fiscal investment funds is 0%, provided that their profit is made available to the shareholders and holders of certificates of participation no later than eight months after year end.

Since 2007, fiscal investment funds may also invest in real estate development (or redevelopment) activities, provided that these activities take place through a subsidiary subject to Dutch CIT and the development (or redevelopment) activities are exercised for the benefit of real estate that is (or will be) forming part of the fund's own portfolio, an affiliated fiscal investment fund's portfolio, the portfolio of a company in which the fund or the affiliated fund has a substantial interest, or for the benefit of the subsidiary's own portfolio.

### *Exempt investment fund regime*

The exempt investment fund regime exists next to the fiscal investment fund regime described above. In accordance with the exempt investment fund regime, investment funds as defined in the Dutch Financial Supervision Act ('Wet op het financieel toezicht') that meet certain conditions can request an exemption from CIT. Apart from the exempt status for CIT purposes, the exempt investment fund is not obliged to withhold dividend withholding tax (WHT) with regard to profit distributions to its shareholders.

### *Innovation box regime*

A special regime applies with respect to profits, including royalties, derived from a self-developed intangible asset (developed after 31 December 2006). In this so-called innovation box (prior to 2010 called 'patent box'), the taxpayer may opt, under certain conditions, for the application of a lower effective rate on taxable profits derived from these intangible assets. As of 1 January 2010, the effective tax rate of the innovation box is 5%. Prior to 2010, the effective tax rate was 10%.

The patent box is applicable provided that at least 30% of the profits have been originated by the patent. As of 1 January 2008, the regime has been expanded in a substantial way. Companies which have incurred certain qualified research and development (R&D) costs for the development of intellectual property for which no patent was granted are also entitled to the favourable effective tax rate. The extension of the scope is subject to the condition that these qualified R&D assets become part of the company's assets after 31 December 2007.

As of 1 January 2010, the patent box is further expanded and renamed as 'innovation box'. The effective tax rate is lowered to 5%. Furthermore, the different limits that apply to patented assets and R&D assets are cancelled, resulting in a widening of the scope of the regime and an equal treatment of all innovative activities. Prior to 2010, the low rate applied only to a maximum of four times the production costs of the patented assets (or EUR 400,000 in case of R&D assets) included in the patent box. In addition, the lower effective tax rate of 5% only applies to positive income, allowing innovation losses to be taken into account in full. Based upon a favourable decree, the latter has also been approved for innovation losses arising in 2009. As of 1 January 2011, it is also possible to include profits from an intangible asset derived in the period between the patent application and the granting of the patent in the innovation box regime (not for R&D assets).

### *Tonnage tax regime*

In order to stimulate entrepreneurs engaged in ocean shipping, a favourable regime (known as the Dutch tonnage tax regime) may be available to certain shipping companies. Under this regime, the taxable profit of a sea-going vessel is based on its registered net tonnage multiplied by a fixed amount of deemed profit per ton instead of the actual profits from the exploitation. The regime only applies to the calculation of the profit related to the qualifying shipping activities. These activities include operating vessels in international traffic (including transportation for the purpose of the exploitation of natural resources at sea), cable and pipe-laying activities at the bottom of the sea, and towing and dredging and connected activities. The profits from the qualifying activities are taxed at a deemed tonnage profit according to a five bracket regressive scale system. The tonnage tax regime applies upon request and for a fixed period of ten years or multiples of the ten-year period.

### *Provincial/municipal income taxes*

There are no provincial or municipal corporate income taxes in the Netherlands.

## *Corporate residence*

In the Netherlands, corporate residence is determined by each corporation's circumstances. Management and control are important factors in this respect. Companies incorporated under Dutch law are deemed to be residents of the Netherlands (although not with respect to certain provisions, such as the participation exemption and fiscal unity).

## *Other taxes*

### *Value-added tax (VAT)*

VAT, known in Dutch as the Belasting over de Toegevoegde Waarde or BTW, is payable on sales of goods and on services rendered in the Netherlands as well as on the importation of goods and on the 'intra-European' acquisition of goods. There are three VAT rates, which are 19%, 6%, and 0%.

The main VAT rate remains at 19%.

The reduced 6% VAT rate is applicable on certain prime necessities (and also on certain energy-saving insulation activities on houses).

The special 0% VAT rate is applicable mainly to intra-European Union (EU) supplies, exports, imports stored in bonded warehouses, services rendered in connection with the above, and certain other services.

The following are exempt from VAT:

- The supply of immovable property two years after putting it into use and lease. However, if the lessee's use of the immovable property is 90% or more for input VAT-deductible purposes, the lessor and lessee may opt to be subject to VAT on rent, in which case the lessor may deduct the VAT charged in respect of the property.
- Medical, cultural, social, and educational services.
- Services provided by banks and other financial institutions in connection with payment transactions and the granting of credit facilities.
- Insurance transactions.
- Transactions in shares.

### *Capital tax*
The Netherlands do not levy capital tax on capital transactions (e.g. issue or increase capital). The capital tax has been abolished since 1 January 2006.

### *Stamp duty*
There are no stamp duties in the Netherlands.

### *Transfer tax on immovable property*
Acquisition of economic or legal ownership of immovable property in the Netherlands is subject to a 6% transfer tax on market value. Some exemptions are available.

### *Transfer tax on acquisition of shares in a real estate entity*
The acquisition of shares in an entity that owns real estate may also be subject to transfer tax, if that entity is characterised as a so-called real estate entity. The threshold for qualifying as a real estate entity has been lowered as of 1 January 2011. In short, the threshold is met if more than 50% of the assets of the entity consist of real estate and at least 30% of Dutch immovable property. Prior to 2011, the threshold was met if more than 70% of the assets consisted of Dutch real estate.

### *Insurance tax*
An insurance tax of 9.7% is payable on insurance premiums if the insured is a resident of the Netherlands or if the insured object is in the Netherlands. Several exemptions are available.

### *Immovable property tax*
Municipalities impose an annual immovable property tax on the owners of immovable property. The rates depend on the municipality. The taxable basis is the market value of the immovable property. Please note that the (assessment of the) value is also of importance for CIT, as depreciation might be limited based on this *value (see Limited depreciation of immovable property in the Deductions section)*.

### *Customs and excise tax*
Many goods imported to the Netherlands from outside the European Union are subject to customs and excise duties. The tariffs and rates that apply to the different goods vary widely and change regularly.

An excise tax is levied on certain consumer goods (e.g. cigarettes, cigars, mineral oils, alcoholic products). If the goods are used solely as raw materials, no excise tax is levied. The excise tax is refundable if the article is exported.

### *Environmental charges on packaging*

Producers or importers have to pay taxes on packaging. The tariff depends on the type and method of packaging. An exemption is granted to companies that bring less than 50,000 kilograms of packaging materials a year on the market. A refund of the packaging tax for indirect export also is available to foreign entrepreneurs.

## *Branch income*

Rates for branch profits are the same as for other corporate profits, but no tax is withheld on transfers of profits to the head office. The tax base is, in principle, calculated on the same rules as for Dutch-resident companies.

## *Income determination*

### *Inventory valuation*

In general, stock/inventory is stated at the lower of cost or market value. Cost may be determined on the basis of first in first out (FIFO), last in first out (LIFO), base stock, or average cost. The LIFO system may be used for commercial/financial and tax purposes.

There is no requirement of conformity between commercial/financial and tax reporting.

### *Capital gains*

Capital gains are taxed as ordinary income. However, capital gains realised on disposal of shares qualifying for the participation exemption are tax exempt *(see Dividend income below)*.

The gain on disposal of depreciable assets may be carried over to a special tax deferral reinvestment reserve but must then be deducted from the acquisition cost of the later acquired assets. Except in special circumstances, the reserve cannot be maintained for more than three consecutive years. If the reserve has not been fully applied after three years, the remainder will be liable to taxation.

Capital losses are deductible, unless attributable to the disposal of a shareholding qualifying for the participation exemption.

### *Dividend income*

Subject to meeting the conditions for the participation exemption, a Dutch company or branch of a foreign company is exempt from Dutch tax on all benefits connected with a qualifying shareholding, including cash dividends, dividends in kind, bonus shares, hidden profit distributions, and capital gains.

#### Participation exemption

In general, the participation exemption will apply to a shareholding in a Dutch company, if the holding is at least 5% of the investee's capital. When the shareholder's interest is a portfolio investment in a company that is not subject to a tax rate that is considered adequate (meaning subject to a profit tax that equals at least an effective tax rate of 10% over a taxable base according to Dutch tax standards), the exemption cannot be applied.

Whether or not a shareholder's interest in a company is a portfolio investment is determined solely by the assets of that company (participation exemption regime 2007-2009). If the company's assets consist predominantly (more than 50%) of portfolio investments, the interest in the company is considered a passive participation. A distinction in this respect is made between portfolio investments held by a company in its line of business and free portfolio investments. Only the presence of free portfolio investments can lead to the qualification of a portfolio investment participation. Portfolio investments held by a company in its line of business are qualified as good assets. Assets that are used for more than 50% for intra-group financing activities are deemed to be held as free portfolio investments. This applies, unless credible evidence to the contrary can be given. In that case, the participation exemption could apply. Furthermore, participations whose assets consist of at least 90% real estate (real estate participation) are not considered low taxed portfolio investment participations, which means that the participation exemption applies.

In February 2008, the Ministry of Finance issued an important decree stating, among other things, several commitments regarding the asset test, the subject-to-tax requirement and the real estate participation.

As of 1 January 2010, the participation exemption regime has been further liberalised. As a general rule, the participation exemption is applicable as long as the participation is not held as a portfolio investment. The intention of the parent company, which can be based on particular facts and circumstances, is decisive as of 1 January 2010. Regardless of the company's intention, the participation exemption also is applicable if the new sufficient tax test, which is if the income is subject to a real profit tax of at least 10%, or the revised asset test, which has been relaxed in comparison to the asset test of the participation exemption regime 2007-2009, as discussed above, is met.

For portfolio investment participations not qualifying for the participation exemption, double taxation will be avoided by applying the tax credit method, unless the portfolio investment shareholding effectively is not subject to tax at all. For EU shareholdings, it is optional to credit the actual underlying tax.

Dividends not qualifying under the participation exemption are taxable in full at the ordinary CIT rate.

Interests of 25% or more in a company of which the assets consist (nearly) exclusively of portfolio investments should be annually valued, as an asset, at the fair market value.

Costs related to the acquisition and disposal of a participation (e.g. legal fees, compensations, notary fees) are not deductible for corporate tax.

Losses arising from the liquidation of a (foreign) subsidiary are deductible for CIT, subject to certain conditions.

Profits derived from a company that was created by converting a foreign permanent establishment (PE) only qualify for the participation exemption after they exceed the losses from the PE during the previous years insofar as those losses reduced the taxable profits in the Netherlands. Under certain circumstances, such as the alienation of (part of) the shares of the company, all non-recaptured losses will be added to the profits of the Dutch parent company at once. Note that the scope of these anti-abuse provisions has been extended by including situations in which a foreign intermediate holding company is interposed.

### *Stock dividends*

Stock dividends are taxed as dividend income to the extent that they are paid out of earned surplus. They are not taxable if paid out of share premium ('agio'), provided the share premium account was not created pursuant to a share-for-share merger, in which only Dutch companies were involved. In the case of a share-for-share merger, in which shares in foreign subsidiaries were contributed to a Dutch company, the Dutch company can distribute the difference between the fair market value and the paid-in capital of the subsidiaries being contributed as a stock dividend without triggering Dutch dividend WHT (step-up in basis), provided certain requirements are met.

### *Foreign income*

In general, a Dutch resident company is subject to corporate tax on its total worldwide income. However, certain income can be exempted (e.g. due to the application of the participation exemption described above) or excluded from the tax base.

Double taxation of certain foreign-source income, including foreign branch income, is avoided by reducing Dutch tax by the ratio of foreign income (subject to a foreign income tax and/or covered by certain tax treaty provisions) to total income, the so-called exemption method. Currency exchange profits or losses on the head office's investment in its foreign branch are not considered 'foreign income' for the purposes of these relief provisions.

Unilateral relief from double taxation for income from foreign financing branches is provided by means of a credit of 17.5% of the passive financing income for foreign taxes deemed paid or the foreign tax actually paid. However, the exemption method will apply only if the taxpayer can demonstrate that the foreign branch is actively engaged in intra-group financing activities.

Double taxation of foreign dividends, interest, and royalties is relieved by a tax credit provided by Dutch tax treaties or unilaterally, if the payer of the income streams is a resident of a developing country, designated by Ministerial Order. If no treaty or unilateral relief applies, a deduction of the foreign tax paid is allowed in computing the net taxable income.

However, relief by exemption is given for dividends from foreign investments qualifying for the participation exemption, as discussed above. In that case, there is no Dutch tax to credit against taxes withheld in the subsidiary's country of residence.

In most circumstances the foreign dividend is exempt for Dutch CIT under the participation exemption, as previously discussed. As a consequence, foreign WHT cannot be credited, and thus, WHT constitute a real cost for the companies concerned. A credit of the foreign WHT is granted against Dutch dividend WHT due on the distribution to foreign parents of the Dutch company. The credit amounts to a maximum of 3% of the gross dividend paid, to the extent that it can be paid out of foreign-source dividends received that have been subject to at least a 5% WHT and the foreign company is liable for CIT. This tax credit does not result in taxable income for CIT purposes.

### *Work in progress*

Since 2007, profits with regard to work in progress should be accounted before actual completion, to the extent that the work is completed. Prior to 2007, for tax purposes, one was allowed to postpone the realisation of taxable profit until a project was fully completed ('completed contract method'). Moreover as of 2007, all project costs should be recognised as opposed to the previous rules that allowed certain costs to be deducted in the year the costs occurred.

## *Deductions*

### *Depreciation and depletion*

Generally, depreciation may be computed by a straight-line or a reducing-balance method or, in accordance with any other sound business practice, on the basis of historical cost. Depreciation is applied from the date the asset comes into use. Dutch tax law includes specific rules *(see below)* that potentially limit the depreciation of assets (e.g. immovable property, goodwill, and other fixed assets).

To meet companies' urgent need for cash due to the worldwide credit crunch, a temporary provision has been introduced, allowing accelerated depreciation *(see below)* of new investments in certain assets in 2009, 2010, and 2011.

#### Limited depreciation of immovable property

There are special provisions for depreciation of immovable property. A distinction is made between immovable property held for investment purposes and buildings used in a trade or business.

Investment property cannot be depreciated to an amount lower than the official property's fair market value for tax purposes, which is known as WOZ-waarde. In other words, a property will not be subject to depreciation unless the carrying amount of the building and the land on which it is located is higher than its value for tax purposes. This value is determined by the municipal tax authorities annually. As this value is based on the assumption that the property is free of lease, the value for tax purposes of commercial real estate may be lower than fair market value.

Alternatively, the depreciation of buildings employed in a trade or business is limited to 50% of the property's value for tax purposes. It should still be possible to value immovable property at fair market value if this is demonstrably lower than the current book value. In addition, anti-abuse measures apply to prevent the division of land and buildings into separate legal entities or to related individuals.

Note that maintenance costs continue to qualify for tax relief and any maintenance-related value increase does not lead to a compulsory upward revaluation of the property. Moreover, a property is not required to be revaluated as its value increases due to market developments.

Depreciation of land is not permitted.

The sale of depreciated assets triggers tax on the difference between the sale price and the depreciated book value unless a reinvestment reserve is set *up (see Capital gains in the Income determination section)*.

#### Limited depreciation of goodwill and other fixed assets

With regard to goodwill, the period of depreciation must be at least ten years. Furthermore, the depreciation period of other fixed assets (i.e. inventory, equipment) must be at least five years.

### Accelerated depreciation

The law provides accelerated depreciation of several specific assets. Accelerated depreciation applies to investments in assets that are in the interest of the protection of the environment in the Netherlands and that appear on the so-called VAMIL ('Vervroegde Afschrijving Milieu-investeringen') list. In 2011, 2012, and 2013, the accelerated depreciation facility for investments in environment-improving assets is temporary limited to 75% of the total (investment) costs.

Accelerated depreciation also is available for certain other designated assets, for example, investments of starting entrepreneurs.

Investment costs minus residual value of sea-vessels that are operated mainly from the Netherlands may be depreciated straight-line over five years. Instead of accelerated depreciation, these taxpayers may choose immediate taxation *(see Tonnage tax regime in the Taxes on corporate income section)*.

As a temporary provision to stimulate the economy, companies may depreciate, under certain conditions, the value of assets bought and investments made in 2009, 2010, and 2011 in two years (or more), provided that the assets are not used formerly and the assets are not meant to be mainly put at the disposal of third parties, directly or indirectly. Further, the asset has to be brought into use before 1 January 2012, 1 January 2013, or 1 January 2014, respectively.

The temporary possibility for accelerated depreciation, however, is prohibited for, among other things, buildings; ground, road, and hydraulic works; cars (except environmentally very clean and efficient cars); and intangible fixed assets. It is possible to depreciate up to 50% of the asset's value in the year of investment. The remainder may be depreciated, without the 50% limitation, in subsequent year(s). The annual amount to be depreciated before the asset has come into use is limited to the actual payments or investments made.

A depletion allowance for natural resources may be granted for tax purposes, when it conforms to sound business practice and is appropriate for accounting purposes.

### *Taxes*

Certain taxes, such as the tax on insurance transactions, are deductible. Tax paid on the transfer of immovable property must be included in the cost price and taken into account in the course of normal depreciation.

### *Anti-abuse rules regarding interest and loans*

Due to existing anti-abuse rules, the deduction for interest paid on intra-group debts relating to certain transactions is disallowed. However, if the taxpayer provides credible evidence of overriding commercial reasons for the transaction as well as the loan, or of taxation of the interest in the hands of the recipient at an effective tax rate that is considered adequate by Dutch standards, the interest may be deductible.

Furthermore, interest paid on certain profit participating loans will be qualified as a dividend and will not be tax deductible. Interest received upon these loans may meet the definitions for the participation exemption if the creditor also holds a qualifying participation in the debtor. Intra-group conduits may be denied a credit of foreign WHT with respect to royalties or interest received if no economic risk is deployed.

Until 2007, interest due on a loan from a group company related to an acquisition of a company from outside the group, which was included in a fiscal unity, was deductible only as far as the acquiring company had its own profits. Full deductibility was granted only eight years after the acquisition. This 2007 interest provision is replaced by the regular inter-company interest deduction limitations. If the interest payment to a group company relates to a loan, which is directly or indirectly, granted by a group company in order to finance an acquisition or capital contribution, the interest will be deductible only if the loan and the underlying transaction are based predominantly on sound business considerations or if the interest received is effectively and sufficiently taxed.

When the debt ultimately is financed externally (outside the group) and a direct relationship exists between the internal debt and the ultimate external financing, it can be substantiated that there are sound business reasons for the loan. Furthermore, the use of tax losses or similar relief claims by the recipient of the inter-company interest, may affect adversely the deductibility of the interest paid. Also the law states that the interest deduction related to indebted dividend distributions, paid back capital and capital contributions is not only possible in case of sound business reasons but also if the interest is taxed in the hands of the creditor at an effective tax rate that is considered adequate by Dutch standards. The latter requirement means that the interest needs to be subject to an effective tax rate of at least 10% over taxable profits determined according to Dutch standards. For the determination of 'a taxable base according to Dutch tax standards' the tax base limitation for the innovation box is not taken into account.

Since 2008, the rules for limitation of deduction of intra-group interest payments are tightened. If the taxpayer makes a reasonable case that the interest is taxable at an effective tax rate of at least 10%, the tax authorities, nevertheless, have the option to substantiate that either the liability or the corresponding transaction is not based on sound business reasons. The tax authorities also have the option to substantiate that the liability is incurred in order to compensate losses or other rights that were formed in that year or that will be formed shortly thereafter. This is also applicable to existing loans.

### *Limited deductibility of costs relating to remuneration by way of shares*

Any remunerations by way of shares, profit-sharing certificates, option rights on shares, or similar rights are not deductible. However, grandfathering rules exist for situations where option rights have been granted to employees before 24 May 2006.

Costs related to so called stock appreciation rights for employees that earn an income which exceeds EUR 500,000 are not deductible, as a result of tax legislation on 'excessive' remuneration.

### *Other deductions*

Deduction of certain expenses (e.g. costs for food, drink, and entertainment) paid by employers for employees are not deductible, in part. The non-deductable portion is 0.4% of the total taxable wages of all employees but never less than EUR 4,300 per year. Alternatively, the employer may choose to deduct only 73.5% of the actual expenses.

### *Net operating losses*

Tax losses can be carried back one year and carried forward to nine years. This also applies to start-up losses.

With regard to losses arising in the years 2009, 2010, and 2011, corporate taxpayers may opt for a temporary extension of the carryback period for losses from one to three years. This option, however, also means that the maximum period for loss carryforward will be limited to six years (instead of nine). Furthermore, the extended measure is limited to EUR 10 million loss carryback per extra year.

Complex rules may prohibit the utilisation of net operating losses after a change of 30% or more of the ultimate control in a company. Furthermore, limitations exist on loss utilisation for holding/finance companies. Based on these rules, losses incurred by a mere holding or group finance company can be offset only against holding or finance income in preceding and following years, provided that certain strict conditions are met. These conditions are meant to counter tax planning, whereby, the Dutch company concerned acquires (e.g. by way of equity contribution or exchange) other assets that enhance its income streams and its capacity to make use of the losses. Companies carrying out significant other activities (with 25 or more full-time employees) are, in principle, unaffected by these loss relief restrictions.

### *Payments to foreign affiliates*
A Dutch corporation generally can claim a deduction for royalties, management service fees, and interest charges paid to foreign affiliates, to the extent that the amounts are not in excess of what it would pay an unrelated entity (i.e. arm's-length principle). Dutch companies are obliged to produce transfer pricing documentation describing the calculation of the transfer price and the comparability of the transfer price with third party prices.

## *Group taxation*

### *Fiscal unity regime*
A parent company and its Dutch-resident subsidiaries (if the parent owns at least 95% of the shares) may, under certain conditions, file a tax return as one entity (fiscal unity). Group taxation is available for companies having their place of effective management in the Netherlands, both for Dutch tax and treaty purposes.

The main feature of the fiscal unity is that profits of one company can be offset against losses of another company forming part of that fiscal unity. Furthermore, inter-company transactions are eliminated.

In February 2010, the European Court of Justice (ECJ) decided that the Dutch fiscal unity regime does not violate EU law (the freedom of establishment), insofar as it disallows a cross-border fiscal unity. However, the ECJ has not yet explicitly dealt with the effects of the fiscal unity regime, other than cross-border loss utilisation, such as the transfer of assets between group companies without immediate taxation and the use of 'final losses'. The Dutch Supreme Court will possibly deal with those issues at a later stage.

### *Transfer pricing rules*
Based on a general transfer pricing provision in the corporation tax law, all transactions between related parties must be at arm's length. Furthermore, a specific transfer pricing provision exists with respect to the transactions of an interest and royalty conduit company. Dutch companies are obliged to produce transfer pricing documentation describing the calculation of the transfer price and the comparability of the transfer price with third party prices. If a transaction between related parties is not at arm's length, the taxable income may be corrected by the tax authorities. Moreover, transactions that do not meet the arm's-length test may constitute a contribution of informal capital or a hidden profit distribution.

On the basis of a decree of the State Secretary for Finance regarding transfer pricing, companies may request an advance tax ruling (ATR) and an advance pricing agreement (APA). An ATR may be requested on the classification of activities and an APA may be required on the classification of activities and the arm's-length character of the transfer price.

### *Thin capitalisation rules*

Thin capitalisation rules, which limit the deductibility of interest paid on intra-group debts, were introduced as of January 2004. These rules apply to all Dutch companies that are part of a domestic or international group of companies. The allowed debt-to-equity ratio is 3:1, based on the average of the tax equity at the beginning and at the end of the year. A higher ratio may apply at the request of the taxpayer if the group to which the Dutch company belongs has, according to the financial statements, a higher, worldwide debt-to-equity ratio. Interest paid on loans exceeding the 3:1 ratio is disallowed only to the extent it exceeds inter-company interest received. The deduction of interest paid on genuine third party loans is not limited by the thin capitalisation rules.

## *Tax credits and incentives*

### *Small investments*

There is a system of deductions for small investments, the so-called small scale investment deduction. To calculate this annual deduction, investments of more than EUR 450 each are totalled to determine the percentage of the deduction.

| Total of investments (EUR) | Deduction |
|---|---|
| 2,200 to 54,324 | 28% of the value of the total of small investments |
| 54,325 to 100,600 | EUR 15,211 |
| 100,601 to 301,800 | EUR 15,211 minus 7.56% of the amount exceeding EUR 100,600. |
| Above 301,800 | No deduction |

### *Investments in energy-efficient assets*

For investments in energy-efficient assets, there is a deduction from corporate income of 41.5% of the value of the total annual amount of investments exceeding EUR 2,200, up to and including EUR 116 million. From 1 June 2009 until 1 December 2010, this deduction was also possible in case of certain energy-saving investments in existing rental houses limited to a total investment of EUR 15,000.

### *Investments in environmental assets*

For investments in certain new environmental improving assets exceeding EUR 2,200 per calendar year (with a maximum of EUR 25 million per asset), a deduction from corporate income of 36%, 27%, or 13.5% exists (in 2011, 2012, and 2013), depending on the ministerial classification of the assets. Prior to 2011 and as of 2014, the deduction was/will be 40%, 30%, or 15%, depending on the type of investment.

### *New technology*

Conducting certain research and development (R&D) activities on applied new technology is subsidised by a reduction of wage tax to be paid on wages of employees engaged in R&D of technologically new products. The subsidy accrues to the employer when the employee is credited for the normal amount of wage tax. The benefit for each employer (or group of companies) may not exceed EUR 14 million per year. This amount was substantially raised for the years 2009 (retroactively), 2010, and 2011 to stimulate the economy.

To obtain the relief under the R&D incentive programme, taxpayers must file an application with the Ministry of Economic Affairs. The budget for this subsidy is fixed, so the amount of the subsidy is dependent on budget availability. Note that self-developed and utilised software falls within the scope of the R&D incentive under certain conditions.

## *Withholding taxes*

Dividends from Dutch corporations are generally subject to a 15% Dutch dividend WHT. However, this does not apply to the Dutch cooperative (i.e. 'co-op'), a widely used vehicle for holding and financing activities.

The Netherlands does not levy a WHT on interest and royalty payments.

Domestic corporations are required to withhold taxes as follows:

| Recipient | Dividends (%) (1) |
|---|---|
| Resident corporations | 0/15 |
| Resident individuals | 15 |
| Non-resident corporations and individuals: | |
| Non-treaty situations | 15 |
| Treaty: | |
| Albania | 0/5/15 (30) |
| Argentina | 10/15 (2) |
| Armenia | 0/5/15 (3) |
| Aruba | 5/7.5/8.3/15 (5, 21, 40) |
| Australia | 15 (5) |
| Austria | 0 (6) or 5/15 (3, 7) |
| Azerbaijan | 5/10 (38) |
| Bahrain | 0/10 (8) |
| Bangladesh | 10/15 (8) |
| Barbados | 0/15 (8) |
| Belarus | 0/5/15 (2, 9) |
| Belgium | 0 (6) or 5/15 (8) |
| Bosnia Herzegovina | 5/15 (2, 4) |
| Brazil | 15 (5) |
| Bulgaria | 0 (6)/5/15 (2) |
| Canada | 5/15 (10) |
| Caribbean Netherlands (Bonaire, Saint Eustatius, and Saba) | 0/15 (41) |
| China, P.R. | 10 (5, 11) |
| Croatia | 0/15 (8) |
| Curaçao | 15, 5, 7.5, or 8.3 (21, 40) |
| Czech Republic | 0 (6) or 0/10 (2) |
| Denmark | 0 (6) or 0/15 (8) |
| Egypt | 0/15 (2) |

| Recipient | Dividends (%) (1) |
|---|---|
| Estonia | 0 (6) or 5/15 (2) |
| Finland | 0 (6) or 0/15 (37) |
| France | 0 (6) or 5/15 (2, 5) |
| Georgia | 0/5/15 (31) |
| Germany | 0 (6) or 10/15 (5, 12) |
| Ghana | 10 or 5 (8) |
| Greece | 0 (6) or 5/15 (2) |
| Hungary | 0 (6) or 5/15 (2) |
| Iceland | 0/15 (8) |
| India | 10/15 (5, 32) |
| Indonesia | 10 (2) |
| Ireland, Rep. of | 0 (6) or 0/15 (13) |
| Israel | 5/15 (2) |
| Italy | 0 (6) or 5/10/15 (14) |

| Vietnam | 5/7/15 (29) |
| Zambia | 5/15 (2) |
| Zimbabwe | 10/15 (2) |

Notes

1. A 0% WHT rate applies to payments to a resident corporation when its shareholding qualifies for the participation exemption and the shares form part of a company whose activities are carried on in the Netherlands. However, dividend WHT may be levied on certain profit participating loans.
2. The lower rate applies if the foreign company owns directly at least 25% of the capital of the Dutch company.
3. The 5% rate is applicable if the foreign company directly owns 10% of capital of the Dutch company. The 0% rate is applicable if the dividend originates from ordinary taxed profits and the dividend is tax exempt in the hands of the recipient.
4. Based upon the treaty concluded with former Yugoslavia.
5. Negotiations on (revisions of) tax treaties are currently pending with Angola, Aruba Australia, Belgium, Brazil, Chile, China, Colombia, Costa Rica, Curaçao, Germany, India, Indonesia, Kenya, and Saint Martin. Revised (new) tax treaties or protocols with Barbados (27 November 2009), Japan (25 August 2010), and Switzerland (26 February 2010) have been signed, but are not yet in force. New tax treaties (with new countries) that have been signed but not yet effective: Hong Kong (22 March 2010), Oman (5 October 2009), and Panama (6 October 2010).
6. Indicates that this country is a member state of the European Union. The EU Parent/Subsidiary Directive applies from 1 January 1992. According to the Directive, dividends paid by a Dutch company (BV or NV) to a qualifying parent company resident in another EU member state must be exempt from Dutch WHT, provided certain conditions are met. Among other things, the EU parent company must hold at least 15% (from 2009, the EU parent must hold 10%) of the Dutch dividend-paying company's capital (or, in certain cases, voting rights) for a continuous period of at least one year. A provisional exemption from dividend WHT will apply from the start of the one-year holding period. The exemption will be cancelled retroactively if, following the dividend distribution, the one-year holding requirement is not actually met. The Dutch dividend-distributing company must provide to the Dutch tax authorities a satisfactory guarantee for the payment of dividend WHT that, but for the provisional exemption, would be due. The exemption is also applicable if the parent company is a resident of a EU member state and owns at least 10% of the (voting) shares in the Dutch company but only on the basis of reciprocity (Finland, Germany, Greece, Luxembourg, Spain, and United Kingdom). Should the WHT exemption not be available under the EU Parent/Subsidiary Directive, the treaty rate(s) set out in the right-hand side of the same column (following 'or') will apply.

7. The lower rate applies if the foreign company owns, directly or indirectly, at least 25% of the capital of the Dutch company.
8. The lower rate applies if the foreign company directly owns at least 10% of the capital of the Dutch company.
9. The 0% rate applies if the foreign company directly owns at least 50% of the capital of the Dutch company, or invested more than EUR 250,000 in the Dutch company or owns directly 25% of the capital of the Dutch company and has a statement indicating that the investment in Dutch capital is, directly or indirectly, guaranteed by the government of Belarus.
10. The 5% rate applies if the foreign company owns, directly or indirectly, at least 25% of the capital or at least 10% of the voting rights in the Dutch company.
11. The treaty is not applicable for Hong Kong and Taiwan.
12. The lower rate applies if the foreign company owns at least 25% of the voting shares of the Dutch company.
13. The lower rate applies if the foreign company owns at least 25% of the voting rights in the Dutch company.
14. The 5% rate is applicable if the Italian company owns at least 50% of the voting shares in the Dutch company for a continuous period of at least 12 months prior to the date chosen for distribution of a dividend. The 10% rate is applicable if the Italian company owns at least 10% of the voting shares in the Dutch company for the continuous period mentioned above. In other cases, the dividend WHT rate is 15%.
15. The lower rate applies if the foreign company owns at least 25% of the voting shares of the Dutch company for a continuous period of at least six months immediately before the end of the book year to which the dividend distribution relates.
16. The lower rate applies if the foreign company owns, directly or indirectly, at least 10% of the capital of the Dutch company.
17. The 0% rate is applicable if the foreign company owns, directly or indirectly, at least 50% of the capital of the Dutch company or if it has invested more than USD 1 million in the Dutch company, insofar as the government of Kazakhstan has guaranteed the investment; the 5% rate applies if the recipient company owns at least 10% of the capital of the paying company.
18. These rates do not apply to dividend payments to Luxembourg ‘1929’ holding companies.
19. The dividend article of the treaty is not applicable anymore. The national WHT rate is applicable.
20. The 0% rate is applicable if the foreign company owns, directly or indirectly, at least 50% of the capital of the Dutch company and invested more than USD 300,000 in the Dutch company. The 5% rate is applicable if the foreign company owns directly 25% or more of the capital of the Dutch company. The 15% rate is applicable on portfolio investments.
21. The rate is 15% unless the dividend is paid to a company holding at least 25% of the paid-up capital in the Dutch company. In this latter case, the WHT rate will be reduced to: (i) 5% if the dividends received are subject to a profits tax in the other state of at least 5.5% on the dividend or (ii) 7.5% if the profits tax is less than 5.5%. The combined CIT of the other state and Dutch dividend WHT for participations of at least 25% must not exceed 8.3%. Depending on the tax percentage levied in the other state, the Dutch dividend WHT will be restituted accordingly.
22. The 5% rate is applicable if the recipient of the dividend is the beneficial owner and directly owns 10% of the capital of the Dutch company. The 0% rate is applicable if the recipient of the dividend is the beneficial owner and directly owns at least 25% of the capital of the Dutch company.
23. The 5% rate is applicable if the recipient of the dividend is the beneficial owner and directly owns at least 25% in the capital of the Dutch company with a minimum investment of at least EUR 75,000.
24. The Netherlands applies the treaty with the former Soviet Union unilaterally to Kyrgyzstan, Tajikistan, and Turkmenistan.
25. The lower treaty rate applies if the Spanish company owns 50% or more of the capital of the Dutch company or if the Spanish company owns 25% or more of the capital of the Dutch company and another Spanish company also owns 25% or more of that capital.
26. The 0% rate is applicable if the foreign company owns, directly or indirectly, at least 50% of the capital of the Dutch company or invested more than USD 300,000 in the Dutch company. The 5% rate is applicable if the foreign company owns directly 20% or more of the capital of the Dutch company.
27. The lower rate applies if the foreign company owns directly at least 10% of the voting rights in the Dutch company. On 8 March 2004, the Netherlands and the United States signed a protocol amending the applicable tax treaty. Based on this protocol, the WHT on dividends will be reduced to 0% if the receiving company owns 80% or more of the voting power of the distributing company, provided that certain other conditions are also met. This reduction of the dividend WHT has taken effect as of 1 January 2005.
28. The 5% rate is applicable if the foreign company owns directly 25% or more of the capital of the Dutch company. The 0% rate is applicable if the dividend for that company qualifies for the participation exemption in the Netherlands. The 15% rate is applicable to portfolio dividends.
29. The 5% rate is applicable if the foreign company owns, directly or indirectly, at least 50% of the capital of the Dutch company or invested more than USD 10 million in the Dutch company. The 7% rate applies to the foreign company owning, directly or indirectly, at least 25% of the capital of the Dutch company.
30. No dividend WHT is due provided the share in the participation is at least 50% and at least USD 250,000 capital is paid in, in the participation. A dividend WHT of 5% is due if the share in the participation is at least 25%.

31. A dividend WHT of 5% is due if the share in the participation is at least 10%. No dividend WHT is due provided the share in the participation is at least 50% and at least USD 2,000,000 capital is paid in, in the participation.
32. Based upon most-favoured nation principle.
33. The 0% rate applies if a company controls at least 10% of the voting power of the Dutch company paying the dividends. The 15% rate applies to dividends arising from income from immovable property, distributed by certain tax exempt real estate investment vehicles (e.g. REITs or FBIs).
34. In case a Thai company holds at least a 25% share in a Thai company, the Dutch dividend WHT rate is 5%.
35. If a share of at least 50% is held by a company, no dividend WHT is due. If the share the company holds is less than 50%, 5% dividend WHT is due.
36. As of 29 December 2004, Switzerland and the European Union concluded a treaty in the light of the EU savings directive. The treaty, amongst others, contains a clause that no dividend tax is withheld if certain requirements are met. The main requirements are that a shareholding of at least 25% is held directly for a period of at least two years and both corporations are not subjected to a special tax regime. Please note that even though the treatment of dividend appears to be equal to the treatment on the basis of the EU-parent subsidiary directive, the directive is in fact not applicable to Switzerland.
37. The 0% rate applies if the foreign company owns directly at least 5% of the capital of the Dutch company.
38. The 5% rate applies if the foreign company owns directly at least 25% of the capital of the Dutch company with a minimum investment of at least EUR 200,000 in the Dutch company.
39. The 0% rate applies if the foreign company directly owns at least 7.5% of the capital of the Dutch company.
40. The WHT rates are based on the Dutch ‘Belastingregeling voor het Koninkrijk’.
41. The WHT rates for the Caribbean Netherlands are based on the Dutch ‘Belastingregeling voor het land Nederland’.

## Tax administration

### Returns

Tax returns must be filed either every calendar year or every financial year. The Dutch tax authorities generally make a provisional assessment before issuing the final assessment after a full examination of the return.

### Payment of tax

The CIT assessed must be paid within two months of the date of the assessment. In addition, provisional assessments are issued for the current tax year on the basis of the prior year’s taxable income.

## Significant developments

### Corporate tax rate reduced

The recently enacted Taxation (Budget Measures) Act 2010 reduced the company tax rate from 30% to 28% with effect from the beginning of the 2011/2012 income year, which, for most companies, is 1 April 2011. The reduced rate applies to all resident and non-resident companies, including branches.

There will be a two year transition period to allow tax paid at 30% to be imputed to dividends at a rate of 30%.

### Portfolio Investment Entity (PIE) tax rates reduced

As of 1 October 2010, the top PIE tax rate was also reduced to 28%.

### Increase in Goods and Services Tax (GST)

As of 1 October 2010, the GST rate increased from 12.5% to 15%.

For transactions spanning 1 October 2010, the GST rate which applies is the rate applicable at the 'time of supply'. The 'time of supply' is generally the earlier of an invoice being issued or any payment being received. For recurring or successive supplies, the time of supply may be triggered upon each payment being made or falling due. The government has also introduced a number of amendments to the GST legislation to help businesses make the transition to the new GST rate.

### Gift duty to be abolished

The Taxation (Tax Administration and Remedial Matters) Bill introduced on 23 November 2010 repeals gift duty with effect from 1 October 2011.

### Changes to the thin capitalisation threshold

The safe harbour threshold for the inbound thin capitalisation rules has been reduced from 75% to 60% effective from the beginning of the 2011/2012 income year.

Broadly, New Zealand's inbound thin capitalisation rules limit the scope for non-residents to fund debt against their New Zealand operations and thereby reduce tax paid in New Zealand. Under the previous rules, New Zealand taxpayers controlled by non-residents were denied an interest deduction in New Zealand to the extent that their debt percentage (total group debt/total group assets) exceeded both 75% (now 60%) and 110% of the worldwide group's debt percentage.

As of 1 April 2012, the minimum prescribed percentage of equity for tax purposes for foreign owned banks will increase from 4% to 6%.

**Additional changes proposed to the thin capitalisation rules**
The Taxation (International Investment and Remedial Matters) Bill introduced to Parliament on 26 October 2010 and very likely to be enacted by September 2011 proposes several additional changes to the thin capitalisation rules, including:

- Extending the thin capitalisation rules to New Zealand residents with foreign investment fund (FIF) interests that use the attributable FIF income method (i.e. the active income exemption) or the exemption for Australian resident FIFs. The proposed changes will apply to income years beginning on or after 1 July 2011;
- Introducing a new test for low-asset companies to give certain New Zealand-based groups with high levels of arm's length debt the option of using a ratio of interest expense to pre-tax cash flows, rather than a debt-to-asset ratio under the current test. The test will apply retrospectively for income years beginning on or after 1 July 2009 so that companies that may have experienced difficulties immediately after the extension of the thin capitalisation rules can obtain relief.
- Removing the application of the thin capitalisation rules for non-resident companies that do not carry on a business through a fixed establishment in New Zealand, if all their New Zealand-sourced income that is not relieved under a double tax agreement (DTA) is non-resident passive income (i.e. dividends, royalties, or interest). The proposed changes will apply for income years beginning on or after 1 July 2011.

### *Removal of depreciation (on certain buildings and loading rates)*
The Taxation (Budget Measures) Act 2010 removed the 20% depreciation loading on new plant and equipment for assets purchased after 20 May 2010.

The depreciation rate for buildings with an estimated useful life of 50 years or more has been reduced to 0% from the 2011/2012 income year.

### *Changes to the tax treatment of qualifying companies and new 'look through companies'*
New legislation took effect, as of 1 April 2011, that does the following:

- Creates a new entity, the 'look-through company' (LTC), which is treated as a partnership for tax purposes. Income, expenses, tax credits, and losses of an LTC are able to be passed on to shareholders, subject to the application of a loss limitation rule.
- Allows existing qualifying companies (QC) and loss attributing qualifying companies (LAQCs) to continue to use the current QC rules but without the ability to attribute losses to shareholders until a review of the dividend rules for closely held companies has been completed.
- Allows existing QCs and LAQCs to elect to be subject to the new LTC rules, or to transition to a new structure such as a partnership, limited partnership, or sole trader, without incurring a tax cost.

### *GST and land*
The Taxation (GST and Remedial Matters) Bill enacted in December 2010 provides that compulsory zero-rating (GST at 0%) applies to any supply involving land between two GST-registered parties as of 1 April 2011, if:

- the purchaser acquires the land with the intention of using it to make taxable supplies, and
- the land is not intended to be used as a principal place of residence for either the purchaser or an associate.

The Bill also clarifies the change-in-use rules and the GST boundary between commercial and residential accommodation as well as the GST treatment of transactions involving nominee situations (e.g. where a named purchaser under a sale and purchase agreement directs a third party to take title).

These rules also apply as of 1 April 2011.

### *International tax rules - changes to the FIF regime*

The Taxation (International Investment and Remedial Matters) Bill, which was introduced to Parliament in October 2010 and will be enacted in 2011, proposes to align the FIF rules with the controlled foreign company (CFC) rules where a New Zealand resident has an interest of 10% or more in a FIF. If enacted, the changes will apply to income starting on or after 1 July 2011.

The Bill also proposes to repeal the availability of the branch equivalent and accounting profits methods for calculating FIF income. Taxpayers that can access the information to prepare a branch equivalent calculation will be forced into being taxed on a notional income amount, even if the FIF is making losses.

#### Proposed tax treatment of interests of 10% or more in a FIF

The Bill repeals the current grey list exemption and replaces it with an Australian exemption.

The active business test currently available for CFCs will be extended to apply to FIFs. This means that no income will be taxable for FIFs that have passive income of less than 5% of their total gross income.

If a FIF fails the active business test, only its passive income will be taxable.

The active business test may be applied to a group of foreign companies using consolidated accounting information where a FIF holds 50% or more of the voting interests in lower tier FIFs, regardless of jurisdiction. This differs from the CFC rules, which only allow CFCs in the same jurisdiction to be grouped and requires minority interests to be removed.

Investors who do not have enough information to perform the required calculations will be able to use one of the attribution methods available for FIF interests of less than 10%, subject to certain restrictions.

#### Tax treatment of interests of less than 10% in a FIF

The active income exemption will not be available. The default income attribution method will continue to be the fair dividend rate (FDR) method or the cost method if no market value is available for the FIF interest.

The comparative value (CV) method is also available for individuals and trustees. The CV method must be used for non-ordinary shares. If the CV method cannot be applied, the deemed rate of return method must be applied.

#### Revaluation of inherited FIF interests

The Bill also proposes to revalue interests in grey list companies inherited before 1 April 2007 (i.e. when the grey list was abolished) to market value at the date the Bill is enacted. The change is intended to prevent situations where a person has inherited investments in a FIF with a significant market value but is not required to attribute any

FIF income as the investments fall under the de minimis threshold because the cost to the investor was nil or less than 50,000 New Zealand dollars (NZD).

***Hong Kong - New Zealand DTA***
On 1 December 2010, a new DTA between Hong Kong and New Zealand was signed.

The agreement will bring withholding tax (WHT) rates into line with rates currently in operation with the United States and Australia. The agreement will come into effect after both governments have formally notified each other that they have completed their ratification procedures.

***Australia - New Zealand DTA***
On 19 March 2010, a new DTA between Australia and New Zealand came into force.

The new DTA lowers WHT rates on dividends, interest, and royalties.

The standard WHT rate on dividends is reduced to 5% for an investing company that has at least a 10% shareholding in the company paying the dividend. The rate reduces to 0% if the investing company holds 80% or more of the shares in the other company and meets other criteria.

The WHT rate on interest stays at 10% in the new agreement but is reduced to 0% if it is payable to eligible financial institutions.

The WHT rate on royalties is reduced from 10% to 5%.

The DTA provides that pensions exempt in the person's home country are exempt in the other country. Lump sum payments are to be taxed only in the country where the pension is sourced and not in the country in which the pensioner has retired.

For WHT, the new DTA applies from 1 May 2010. For other taxes, it applies in New Zealand to income years commencing on or after 1 April 2010.

***Singapore - New Zealand DTA***
A new DTA between Singapore and New Zealand came into force on 12 August 2010.

The new DTA lowers WHT rates on dividends, interest, and royalties.

The standard WHT rate on dividends is reduced to 5% for an investing company that has at least a 10% shareholding in the company paying the dividend.

The WHT rate on interest is reduced from the current 15% to 10%.

The WHT rate on royalties is reduced from 10% to 5%.

Other changes include the following:

- Revising the treatment of interest paid between associated persons. The interest Article in the 1973 DTA does not limit the rate of tax applicable to interest paid to an associate. The 15% rate is a minimum rate of tax, which means that the net income (after deducting expenses) must be included in the non-resident's New Zealand tax return along with all other New Zealand sourced income. The new DTA removes the associated persons restriction. Consequently, all interest paid will benefit from the 10% rate.

- Amending the definition of a 'permanent establishment'(PE) to include a building site, construction, installation, or assembly project if the project lasts more than 12 months, instead of six months as found under the prior DTA.
- Incorporating the new internationally agreed standard for the exchange of information between tax authorities.

In New Zealand, the DTA applies for WHT on interest, profits, or gains paid or credited from 1 October 2010. In respect of all other taxes, the DTA applies in New Zealand for any income year beginning on or after 1 April 2011.

### *United States - New Zealand DTA*

A protocol updating the DTA between the United States and New Zealand came into force on 12 November 2010.

The key changes include a reduction in WHT rates on dividends, interest, and royalties.

The Protocol also makes changes to the Business Profits article and Limitation of Benefits article.

The new WHT rates apply as of 1 January 2011.

### *Research and development (R&D) funding*

New R&D funding measures were announced in the 2010 Budget. Broadly, NZD 321 million of targeted funding has been allocated to research, science, and technology activities over the next four years.

The most significant measure is NZD 189.5 million of funding for technology development grants. These grants are available to medium to large research-intensive businesses that can show that their activities result in wider benefits for New Zealand. The government will contribute 20% of these businesses' expected R&D expenditure for three years, up to a set maximum. The grants are not administered through the tax system.

### *Approved issuer levy and bonds*

A Bill introduced to Parliament on 26 October 2010 and expected to be enacted by September 2011 introduces an approved issuer levy (AIL) rate of zero (instead of the usual 2%) which will apply to interest paid on qualifying bonds that meet certain requirements, including that the securities have been offered to the public, are not asset-backed securities, and are either listed on an exchange registered under the Securities Market Act 1988 or were issued to a group of at least 100 persons with no person (or group of associated persons) receiving 10% or more of the total securities.

Approved issuers may pay interest to non-residents without having to deduct non-resident withholding tax (NRWT). Generally AIL is 2% of the interest paid.

The proposed changes will apply to interest payments made on or after the date the Bill is enacted. This means the zero rate could be used in respect of future interest payments on bonds issued prior to the Bill's enactment.

### *Tax Information Exchange Agreements (TIEAs)*

New Zealand has signed TIEAs with countries such as Samoa, Vanuatu, Cook Islands, Guernsey, Jersey, Isle of Man, Cayman Islands, British Virgin Islands, Gibraltar, and the Bahamas.

The new TIEAs come into force once the countries involved in each agreement have given legal effect to them.

### *Repeal of superannuation fund withdrawal tax*
Superannuation fund withdrawal tax has been repealed as of 1 April 2011.

Broadly, the superannuation fund withdrawal tax provisions applied to make superannuation funds liable to income tax at the rate of 5% on amounts withdrawn from a superannuation fund prior to retirement to the extent they include employer contributions since 1 April 2000 (and earnings thereon).

## *Taxes on corporate income*

New Zealand resident companies are taxed on their worldwide income, and non-resident companies (including branches) are taxed on New Zealand-sourced income.

From the beginning of the 2011/2012 income year, the tax rate is 28%. Prior to the 2011/2012 income year, the income tax rate was 30%.

There are no state and municipal income taxes in New Zealand.

## *Corporate residence*

Residence is determined by place of incorporation, location of head office or centre of management, or by directors' exercising control of the company in New Zealand. As a general rule, a New Zealand resident company is taxed on their worldwide income, and a non-New Zealand resident company is taxed on their New Zealand sourced income.

### *Permanent establishment (PE)*
Generally, DTAs to which New Zealand is a party define a PE by reference to a fixed place of business through which the company's business is carried on. A PE can also exist without a fixed place of business if the employees of the overseas company habitually exercise an authority to conclude contracts in New Zealand.

## *Other taxes*

### *Goods and services tax (GST)*
GST is a form of value-added tax (VAT) that applies to most supplies of goods and services. The narrow category of exempt supplies includes financial services. As of 1 October 2010, the rate applied to taxable supplies is currently 15% (previously 12.5%) or 0%. The 0% rate applies to a few supplies only, including exports and financial services supplied to other registered businesses. As of 1 April 2011, the 0% rate also applies to the sale of land between two registered parties if the purchaser acquires the land with the intention of using it to make taxable supplies and the land is not intended to be used as a principal place of residence for the purchaser or an associate.

There is also a 'reverse charge' mechanism that requires the self assessment of GST on the value of certain services imported by GST registered persons.

### *Accident compensation levy*
A statutory-based scheme of accident insurance is funded in part by premiums payable by employers and employees.

Premiums paid by employers (including the self-employed) fund insurance for work-related accidents. Employers are liable to pay a residual claims levy and an employer levy. The employer levy payable is determined according to the industry or risk classification of the employer and the level of earnings of employees.

### *Customs duties*
Customs duty is levied on some imported goods at rates generally ranging from 1% to 10%.

### *Excise duty*
Excise duty is levied on petroleum products, tobacco, and alcohol. The excise duties are levied item by item at rates that vary considerably.

### *Fringe benefit tax (FBT)*
Employers are subject to a tax-deductible FBT on the value of non-cash fringe benefits provided to their employees. Employers can elect to pay FBT at flat rates (for the 2010/2011 income year, 55% on attributed benefits and 46% on pool benefits, i.e. those benefits which cannot be attributed to a particular employee) applied against the value of the benefit or can attribute fringe benefits to individual employees and pay FBT based on each employee's marginal tax rate. Under the attribution option, the applicable FBT rate depends on the net remuneration (including fringe benefits) paid to the employee. The attribution calculation treats the fringe benefit as if it was paid in cash and calculates FBT as the notional increase in income that otherwise would have arisen.

As of 1 April 2011, the 55% and 46% FBT rates are respectively reduced to 49% and 43%.

The multi rates for the 2011/2012 income tax year are:

| Net remuneration (NZD) | FBT rate (%) |
|---|---|
| 12,250 or less | 11.73 |
| 12,251 to 39,110 | 21.21 |
| 39,111 to 52,850 | 42.86 |
| Greater than 53,851 | 49.25 |

Fringe benefits include motor vehicles available for private use, loans at below prescribed interest rates, contributions to medical insurance schemes, and employer contributions to superannuation schemes.

In relation to motor vehicles, employers can value a vehicle on an annual basis either using 20% of the cost price or market value (GST inclusive) of the vehicle (depending on whether the vehicle is owned or leased by the employer) or 36% of the vehicle's tax written down value (GST inclusive). In each case, the FBT value must be reduced proportionately for whole days when the vehicle is not available for private use at any time.

FBT is also applicable to benefits received by an employee from a third party where there is an arrangement between the employer and the third party and where the benefit would be subject to FBT if it had been provided by the employer.

### *Stamp duty*

Stamp duty has been abolished in respect of instruments executed after 20 May 1999.

### *Gift duty*

Gift duty is payable by donors (including companies) on gifts which exceed NZD 27,000 in aggregate in any 12-month period. A gift statement must be filed when the value of the gifts exceeding NZD 12,000 in aggregate in any 12-month period. Some relief is granted from the imposition of gift duty when income tax is payable on the gift. Exemptions from gift duty include gifts to local or central government and to approved organisations.

Under draft legislation expected to be enacted by September 2011, gift duty will not be imposed on gifts made on or after 1 October 2011.

### *Property taxes*

Local authorities levy tax known as 'rates' on land within their territorial boundaries. Rates are levied on properties based on the properties' rateable value.

### *Employer superannuation contribution tax (ESCT)*

Employers' contributions to an approved superannuation fund (excludes foreign schemes) are subject to ESCT, formerly known as 'specified superannuation contribution withholding tax'. As of 1 April 2012, employer contributions of up to 2% of the employee's gross salary or wages made to a KiwiSaver scheme or a superannuation scheme will no longer be exempt from ESCT.

### *Fund withdrawal tax (FWT)*

FWT has been repealed as of 1 April 2011.

Prior to 1 April 2011, the FWT provisions made the superannuation fund liable to income tax at the rate of 5% on amounts withdrawn from a superannuation fund prior to retirement, to the extent they included employer contributions since 1 April 2000 (and earnings thereon). FWT applied where the superannuation fund member's income was above NZD 70,000.

## *Branch income*

A non-resident company is taxed on income generated by business wholly or partially carried on in New Zealand. Branch profits are subject to ordinary corporate rates of taxation, and there is no WHT on repatriated profits.

## *Income determination*

### *Inventory valuation*

Inventory must be valued by a cost-valuation method or, where market-selling value is lower than cost, may be valued at market-selling value. If the inventory is shares, it must be valued at cost. Cost is determined under generally accepted accounting principles. Acceptable cost flow methods are first in first out (FIFO) or weighted-average cost. Some valuation concessions are available to small taxpayers.

### *Capital gains*
There is no separate capital gains tax. However, the income tax legislation specifically includes various forms of gain that would otherwise be considered a capital gain within the definition of 'income'. Taxable income includes gains on the sale of real estate in certain circumstances and on personal property where the taxpayer acquired the property for resale or deals in such property or where a profit-making purpose or scheme can be deemed or imputed.

### *Dividend income*
Dividends derived from resident companies are exempt where there is 100% common ownership and the companies have the same balance date.

#### Dividends from a foreign company
For income years starting on or after 1 July 2009, a dividend derived by a company resident in New Zealand from a foreign company is treated as exempt income, unless it is:

- a dividend on a fixed rate share or a dividend for which the foreign company has received a tax deduction in its home jurisdiction, or
- a dividend from a portfolio FIF (i.e. interests under 10%) that is exempt from FIF rules (e.g. an interest in an Australian listed company).

Dividends from foreign companies derived by taxpayers other than companies are taxable (generally with a credit for any foreign withholding taxes).

#### Branch equivalent tax account (BETA)
Previously, taxpayers who were subject to tax on attributed foreign income under the CFC or FIF regimes and also taxed or liable to pay foreign dividend payments on dividends could elect to maintain a BETA. A BETA operates in a similar manner to an Imputation Credit Account and helps avoid the double taxation of attributed foreign income and foreign dividend income.

As most foreign dividends received by New Zealand companies are exempt from tax, most companies therefore no longer need to maintain BETAs. The Taxation (International Investment and Remedial Matters) Bill 2010 proposes to abolish BETAs from the income year beginning on or after 1 July 2012.

#### Other
The Taxation (Consequential Rate Alignment and Remedial Matters) Act 2009 brought an end to the general availability of supplementary dividend tax credits under the foreign investor tax credit (FITC) regime.

The FITC regime effectively eliminates NRWT on fully imputed dividends. The FITC regime provided that total New Zealand tax paid on a non-resident investor's earnings through a New Zealand company could be limited to 30%. It does not operate by exemption from NRWT. Rather, where a dividend is imputed, the paying company qualifies for a reduction in its income tax if it pays a supplementary dividend. The amount of reduced company income tax is equal to the supplementary dividend. The combination of reduced income tax plus non-resident WHT on both dividends can result in total New Zealand tax on the earnings of 30%. Deemed dividends may arise from transactions between related companies where the transactions are not at market value.

Following the new DTAs with the United States, Australia, and Singapore, which all reduce the NRWT rate on dividends paid to corporate shareholders that hold 10% or more of a New Zealand company from 15% to 5% or 0%, there is no longer a need for the FITC regime in certain circumstances.

Broadly therefore:

- only portfolio investors (i.e. those with less than 10% holdings) with NRWT rates of at least 15% and supplementary dividend holding companies will qualify for relief under the supplementary dividend rules and
- a zero rate of NRWT applies to dividends paid to non-portfolio shareholders (i.e. shareholders with more than 10% holdings) and to any other dividends subject to lower tax rates, to the extent they are fully imputed.

The changes affect provisional tax calculations for taxpayers who take into account their anticipated FITC in calculating their provisional tax. Taxpayers should also consider the need to impute dividends where a tax treaty applies to reduce the NRWT rate.

The supplementary dividend regime will cease to apply to holding companies from the 2013/14 income tax year.

### *Stock dividends*
Bonus issues can be taxable or non-taxable. With a taxable bonus issue, the amount capitalised becomes available for tax-free distribution upon a subsequent share cancellation. With a non-taxable bonus issue, the amount capitalised is not available for tax-free distribution upon a subsequent share cancellation.

The government may legislate to ensure that bonus issues of shares distributed under profit distribution plans (PDPs) are taxed in the same way as shares issued under other dividend reinvestment plans.

### *Offshore portfolio equity investments*
The key features of the taxation of offshore portfolio equity investments are:

- The ‘grey list’ does not apply to investments that fall within the new regime.
- Corporate investors are generally taxable on 5% (the ‘fair dividend rate’ or ‘FDR’) of the opening market value of the investments each year.
- Shares in certain Australian resident listed companies are excluded from the rules.
- Distributions from all investments excluded from the rules (either permanently or temporarily) are taxed on a receipts basis in accordance with ordinary principles.

These rules affect investors with a shareholding or interest of less than 10% in a foreign company, unit trust, certain foreign superannuation schemes and all life insurance policies.

### *Other significant items*
The taxation of debt and debt instruments is governed by the financial arrangements rules, a specific set of timing rules. Income or expenditure (including foreign exchange gains and losses) from financial arrangements must be recognised on an accrual basis (generally, yield to maturity or other commercially acceptable method). These rules do not apply to the income or expenditure of a non-resident if the financial arrangement does not relate to a business carried on in New Zealand.

### *Foreign income*
A New Zealand corporation is taxed on foreign passive income as earned. Double taxation with respect to all types of taxable income, including interest, rents, and royalties, is avoided by the recognition of foreign tax credits. Foreign dividends received are exempt from income tax but are subject to the foreign dividend withholding payment. However, new rules exempt most foreign dividends received by New Zealand companies from domestic tax and repeals the FDP and underlying foreign tax credit rules.

New Zealand does not offer specific tax deferral rules.

## *Deductions*

### *Depreciation and depletion*
For tax purposes, depreciation of property can be computed under the diminishing value method, the straight-line method, or a pooling method. The rates of depreciation depend on the following factors:

- Type of asset.
- Whether the asset is acquired new or second-hand (i.e. used).

Taxpayers must use the economic depreciation rates prescribed by Inland Revenue, together with a 20% uplift in the case of new assets (other than buildings and imported motor vehicles) purchased on or before 20 May 2010 (the 20% uplift has been removed for assets purchased after this date). Fixed-life intangible property (including the right to use land and resource consents) is depreciable on a straight-line basis over its legal life. Any depreciation recovered on the sale of an asset (up to its original cost) is taxable in the year of sale.

The double-declining-balance (accelerated) method applies to most plant and equipment. Under the double declining balance method, equipment with an estimated useful life of ten years results in diminishing value depreciation deductions of 20% per annum (i.e. double the straight-line rate of 10% over the equipment's 10-year life). Buildings, certain motor vehicles, high-residual-value property, fixed-life intangible property, and property acquired prior to the introduction of the new rules cannot be depreciated under the double-declining-balance method.

The depreciation rate for buildings with an estimated useful life of 50 years or more is reduced to 0% as of the 2011/2012 income year pursuant to the Taxation (Budget Measures) Act 2010.

### *Interest expense*
Generally, interest incurred by most companies is deductible, subject to thin capitalisation rules *(see the Group taxation section)*.

### *Research and development (R&D)*
R&D costs are tax deductible. Expenses written off as immaterial and not tested against certain asset-recognition criteria are not automatically deductible for tax purposes.

### *Entertainment expenditure*
Entertainment expenditure is generally only 50% deductible. However, entertainment expenditure incurred overseas is 100% deductible.

### *Legal expenditure*
Legal expenditure is deductible if the expenditure is:

- incurred in deriving assessable or excluded income or
- incurred in the course of carrying on a business for the purpose of deriving assessable or excluded income.

However, the expenditure is not deductible if it is of a capital, private, or domestic nature.

The Taxation (Business Tax Measures) Act 2009 provides that from the 2009/2010 income tax years, taxpayers with business-related legal expenditure of NZD 10,000 or less are able to deduct the full amount of the expenditure in the year it is incurred, whether or not it is capital in nature.

### *Taxes*
FBT is deductible, as is GST payable on the value of a fringe benefit.

### *Net operating losses*
Losses may be carried forward indefinitely for offset against future profits, subject to the company maintaining 49% continuity of ownership. There is no loss carryback. A legislative amendment in 2002 ensures that losses of a subsidiary are preserved on a spinout (i.e. when shares in the subsidiary are transferred to shareholders of its parent company).

### *Payments to foreign affiliates*
A New Zealand corporation can claim a deduction for royalties, management service fees, and interest charges paid to non-resident associates, provided the charges satisfy the 'arm's-length principle', which forms the basis of New Zealand's transfer pricing regime.

## *Group taxation*

Companies that are 66% or more commonly owned constitute a 'group'. Group companies are able to offset losses by election as well as by subvention payment. A subvention payment is a payment made by the profit company to the loss company and is equal to the amount of loss to be offset. The payment is deductible to the profit company and assessable to the loss company. Certain companies subject to special bases of assessment (e.g. mining companies other than petroleum extraction companies) are excluded from the grouping provisions. Branches of non-resident companies may be included, provided they continue to carry on business in New Zealand through a fixed establishment.

Groups of resident companies that have 100% common ownership may elect to be subject to the consolidated group regime. The group is effectively treated as a single company and transfers of assets, dividends, interest, and management fees among members of the group are generally disregarded for tax purposes. The group files a single return and is issued a single assessment. Group members are jointly and severally liable for tax purposes.

Losses incurred by a dual-resident company are not available for offset by election or subvention payment.

### *Transfer pricing*
The transfer pricing rules are based on Organisation for Economic Co-operation and Development (OECD) principles and require taxpayers to value for tax purposes all cross-border transactions with associates on an arm's-length basis.

The transfer pricing rules apply to arrangements for the acquisition or supply of goods, services, money, intangible property, and anything else (other than non-fixed rate shares), where the supplier and acquirer are associated persons. Similar rules apply to the apportionment of branch profits.

Various methods are available for determining the 'arm's-length consideration'. The taxpayer is required to use the method that produces the most reliable measure of the amount that independent parties would have paid or received in respect of the same or similar transactions. Inland Revenue has published guidelines that make it clear that documentation is required to support a taxpayer's transfer prices.

### *Thin capitalisation*
'Inbound' thin capitalisation rules apply to New Zealand taxpayers controlled by non-residents, including branches of non-residents. The aim of the rules is to ensure that New Zealand entities or branches do not deduct a disproportionately high amount of the worldwide group's interest expense. This is achieved by deeming income in New Zealand when, and to the extent that, the New Zealand entities in the group are thinly capitalised (i.e. excessively debt funded).

The 'outbound' thin capitalisation rules are intended to operate as a base protection measure to prevent New Zealand residents with CFC investments from allocating an excessive portion of their interest cost against the New Zealand tax base.

To reduce taxpayer compliance costs, the outbound thin capitalisation rules do not apply when the New Zealand taxpayer has:

- 90% or more of their assets in New Zealand or
- less than NZD 250,000 of interest deductions.

Further concessions are available to taxpayers who do not fall below the above thresholds. If the taxpayer's interest deduction and dividends paid for fixed rate shares (the finance cost) is below NZD 1 million, no apportionment of deductible interest is required. If the finance cost is above NZD 1 million, but below NZD 2 million, the apportionment is an adjustment.

An apportionment of deductible interest is required under the thin capitalisation rules when the debt percentage (calculated as the total group debt/total group assets of a New Zealand entity or group) exceeds both:

- 75% (for 'inbound' thin capitalisation, the 75% threshold is reduced to 60% from the beginning of the 2011/2012 income year) and
- 110% of the worldwide group's debt percentage.

The use of the debt-to-asset ratio differs from most thin capitalisation models, which apply to an entity's debt-to-equity ratio. All interest (both related and unrelated party) is subject to apportionment.

Foreign-owned banks operating in New Zealand are subject to specific thin capitalisation rules that deem income if the bank does not hold a level of equity equivalent to 4% (6% as of 1 April 2012) of their New Zealand banking risk-weighted assets. In addition, banks are required to have sufficient equity to equity fund offshore investments that do not give rise to New Zealand taxable income in full.

### *Controlled foreign companies (CFCs)*

New CFC rules apply for income years beginning on or after 1 July 2009.

A key feature of the new rules is the exemption from New Zealand income tax for active income derived by New Zealand residents from interests in controlled foreign companies (CFCs). Passive income (such as dividends, interest, royalties, and rents) is taxed on an attribution basis.

For CFCs that pass an 'active business' test, no income from the CFC is attributable to the New Zealand shareholders. A CFC passes the active business test if its passive income is less than 5% of gross income. The active business test replaces the current grey list exemption. However, an exemption from attribution of income is retained for CFCs in Australia.

### *Foreign investment funds (FIFs)*

The FIF regime is an extension of the CFC regime, which subjects persons with interests in certain foreign entities (which are not CFCs) to New Zealand tax. It also applies where the investor does not have a sufficient interest in a CFC to be taxed under that regime.

Examples of investment vehicles that are commonly classified as FIFs include foreign companies (including unit trusts), foreign superannuation schemes, and life insurance policies issued by foreign entities not subject to New Zealand tax.

Generally, however, a New Zealand resident does not have an interest in a FIF when:

- the foreign entity in which the interest is held is a company or unit trust resident in a 'grey list' country (this exemption does not apply to portfolio FIF interests or interests in foreign superannuation schemes or life insurance policies)
- the total cost of FIF-type interests held by an individual does not exceed NZD 50,000
- the interest is an 'employment-related foreign superannuation scheme'
- the interest is a 'qualifying foreign private annuity', or
- a natural person acquired interests in foreign life insurance policies or foreign superannuation schemes before first becoming resident in New Zealand (these interests will be exempt from the FIF regime for the rest of the income year in which the individual first became resident and for the following three income years) and
- certain other limited exceptions apply.

The exemption includes interests in foreign employment-related superannuation schemes, interests held by returning residents, as well as new migrants arriving in New Zealand from 1 April 2006. A permanent exemption is provided for interests that a person acquired before one becomes a New Zealand resident and interests acquired within the first five years of New Zealand residence.

The choice of method is restricted by the nature of the interest held and the availability of information.

Interests in FIFs must be disclosed by taxpayers in their annual tax returns. Failure to disclose gives rise to potentially stringent penalties.

## Tax credits and incentives

### Inbound investment incentives
There are limited specific tax incentives designed to encourage the flow of investment funds into New Zealand.

Legislation enacted in 2004 encourages foreign venture capital investment into unlisted New Zealand companies. Gains derived by certain non-residents from the sale of shares (held on revenue account and owned for at least 12 months) in New Zealand unlisted companies that do not have certain prohibited activities as their main activity, are exempt from income tax. The rules apply to foreign investors who are resident in all of the countries with which New Zealand has a DTA (except Switzerland) and who invest into New Zealand venture capital opportunities.

### Capital investment incentives
Investment allowances on fixed assets are not available.

### R&D incentives
New R&D funding measures were announced in the 2010 Budget. Broadly, NZD 321 million of targeted funding has been allocated to research, science, and technology activities over the next four years.

The most significant measure is NZD 189.5 million of funding for technology development grants. These grants are available to medium to large research-intensive businesses that can show that their activities result in wider benefits for New Zealand. The government will contribute 20% of these businesses' expected R&D expenditure for three years, up to a set maximum. The grants are not administered through the tax system.

### Trans-Tasman imputation
Elective rules allow trans-Tasman groups of companies to attach both imputation credits (representing New Zealand tax paid) and franking credits (representing Australian tax paid) to dividends paid to shareholders.

### Foreign tax credits
If a New Zealand resident company derives overseas income which is subject to New Zealand income tax, generally the company is allowed a credit for the foreign income tax paid in respect of that income. Generally the credit is limited to the lesser of the actual overseas tax paid on the overseas income or the New Zealand tax applicable to the overseas income.

## Withholding taxes

Resident corporations paying certain types of income are required to withhold tax on gross income, as shown in the table below.

| Recipient | Dividends (%) | Interest (%) | Royalties (%) |
|---|---|---|---|
| Resident corporations | 28 (1) | 28 (1) | 0 |
| Resident individuals | 33 | max 33 | - |
| | | | |
| Non-resident corporations and individuals | (2) | (3) | |

| Recipient | Dividends (%) | Interest (%) | Royalties (%) |
|---|---|---|---|
| No treaty | 30 (4) | 15 (5) | 15 |
| Treaty: | | | |
| Australia | 0/5/15 (10) | 0/10 (10) | 5 (10) |
| Austria | 15 | 10 | 10 |
| Belgium (13) | 15 | 10 | 10 |
| Canada (12) | 15 | 15 | 15 |
| Chile | 15 | 10/15 (6) | 10 |
| China, P.R. | 15 | 10 | 10 |
| Czech Republic | 15 | 10 | 10 |
| Denmark | 15 | 10 | 10 |
| Fiji | 15 | 10 (5) | 15 |

Notes

1. Resident WHT applies to both interest and dividends. Unless the recipient corporation holds an exemption certificate, and if the recipient provides a tax file number, the default rate of the interest WHT is 28% (33% prior to 1 April 2011). Recipients can elect for the rate of interest withholding to be 38%. The rate of interest WHT is 38% where the recipient does not provide a tax file number. The rate of WHT on dividends paid is 28%, but the tax is reduced by the aggregate imputation and withholding payment credits attached to the dividend or taxable bonus share. Interest and dividends paid between group companies and in certain other limited circumstances are exempt from the WHT.
2. The foreign investor tax credit and conduit tax relief regimes previously provided relief to companies paying dividends to non-resident investors. However, these regimes have now largely been abolished.

3. Resident corporations paying interest to non-associated, non-resident corporations and individuals need not withhold tax if they have approved-issuer status and the security under which interest is payable is registered with Inland Revenue. In this case, the resident corporation pays a 2% levy (tax deductible) on the interest payments instead of the WHT otherwise applicable.
4. Non-resident WHT is imposed on dividends at the following rates regardless of the jurisdiction to which the dividends are paid:
   - 0% for fully imputed dividends paid to a shareholder holding 10% or more of the direct voting interests in the company and fully imputed non-cash dividends.
   - 15% for fully imputed cash dividends paid to a shareholder holding less than 10%.
   - 30% in most other cases, subject to any relief available under a DTA.
5. Net interest income is subject to reassessment at the company tax rate where the payer and the recipient are 'associated persons', but WHT is the minimum liability. Non-resident WHT is not imposed where the recipient of the interest has a fixed establishment in New Zealand.
6. 10% if the interest received is derived from loans granted by banks or insurance companies. In all other cases, 15%.
7. 10% or 15%, depending on the type of royalty.
8. The Government has announced that it is re-negotiating New Zealand's DTA with the United Kingdom.
9. A Protocol to update the DTA between the United States and New Zealand came into force on 12 November 2010. The key changes include amendments to the WHT rates on dividends, interest, and royalties. The new WHT rates apply as of 1 January 2011.
   The WHT rate on dividends is reduced from 15% to a maximum of 5% for an investor who holds at least 10% of the shares in the company that pays the dividend and to 0% if the investor holds 80% or more of the shares in the company and meets other criteria.
   The WHT on royalties is reduced from 10% to 5% and the definition of 'royalties' will be revised to exclude payments for leased equipment.
   The rate on interest generally remains at 10%, although it will drop to 0% for interest paid to lending or finance businesses, provided that the 2% approved issuer levy is paid on New Zealand-sourced interest.
10. The new DTA that applies to WHT from 1 May 2010 lowers WHT rates on dividends, interest and royalties. The standard WHT on dividends is reduced to 5% for an investing company that has at least a 10% shareholding in the company paying the dividend. The rate reduces to 0% if the investing company holds 80% or more of the shares in the other company and meets other criteria. The WHT rates on interest stays at 10% in the new agreement but is reduced to 0% if it is payable to eligible financial institutions. The WHT on royalties is reduced from 10% to 5%.
11. These rates apply from 1 October 2010. The key changes to the DTA include amendments to the WHT rates on dividends, interest, and royalties. The standard WHT rate on dividends reduces to 5% for an investing company that has at least a 10% shareholding in the company paying the dividend. The WHT rate on interest is reduced from the current 15% to 10%. The WHT rate on royalties is reduced from 10% to 5%.
12. The Government has announced that the DTA with Canada will be re-negotiated.
13. The Government has signed an amending Protocol which updates the 1981 DTA between New Zealand and Belgium.

## *Tax administration*

### *Returns*

Tax returns are based on the fiscal year ending 31 March, although other fiscal year-ends are possible if permission is obtained. The system is one of self-assessment, under which the corporation files an income tax return each year. For those not linked to a tax agent, returns must be filed by 7 July for March balance dates, or by the seventh day of the fourth month following a substituted balance date. The terminal tax due date is extended by two months for taxpayers linked to a tax agent.

### *Payment of tax*

Where provisional tax paid is less than the amount of income tax deemed due on that instalment date, interest is imposed. If provisional tax is overpaid, interest is payable to the taxpayer. Interest is deductible for tax purposes by business taxpayers, and interest earned on overpaid provisional tax is gross income for tax purposes. The interest rate for unpaid tax is 8.89%, while the rate for overpaid tax is 2.18%.

The final assessed tax (terminal tax) is generally payable on the seventh day of the 11th month following the end of that income year or the13th month following if the taxpayer has a tax agent with an 'extension of time' arrangement. For a standard (31 March) balance date, this means either 7 February or 7 April of the following year.

### *Calculating provisional tax*

For the 2011/2012 income year (i.e. year ending 31 March 2012), provisional taxpayers have the following four options:

- Where the 2010/2011 return of income has been filed, 2011/2012 provisional tax can be based on 100% of the 2010/2011 residual income tax.
- Where the 2010/2011 return of income has not been filed, due to an extension of time for filing, 2011/2012 provisional tax can be based on 105% (previously 110%) of the 2009/2010 residual income tax, but only for the first two instalments. The final instalment must be calculated based on the first option above.
- Provisional tax can be based on a fair and reasonable estimate of 2011/2012 residual income tax.
- The GST ratio option.

The GST ratio method has been introduced to enable smaller taxpayers to align their provisional tax payments with their cash flow and reduce their exposure to use of money interest. The option is intended to benefit those taxpayers with declining, seasonal, or fluctuating income. This option calculates provisional tax by reference to the taxpayer's GST taxable supplies in the relevant provisional tax instalment period.

Taxpayers can also make voluntary payments. Such payments can be made to minimise exposure to use of money interest. A taxpayer choosing to estimate residual income tax is required to take reasonable care when estimating.

When the taxpayer's return of income for the year is furnished, the provisional tax paid for that year is credited against the tax assessed. This results in either a refund or further tax to pay by way of terminal tax.

### *Tax pooling*

Taxpayers are able to pool their provisional tax payments with those of other taxpayers through an arrangement with a commercial intermediary. Tax pooling allows underpayments to be offset by overpayments within the same pool and vice versa.

### *Tax penalties*

An initial late payment penalty of 1% applies if a tax payment is not made on the due date. A further 4% late payment penalty applies if the payment is not made within seven days of the due date. An incremental late payment penalty of 1% is then imposed monthly until payment is made.

Inland Revenue is required to notify a taxpayer the first time their payment is late rather than imposing an immediate late payment penalty. If payment is not made by a certain date, a late payment penalty will be imposed. Taxpayers will be entitled to one notification every two years. After receiving a first warning, the Inland Revenue will not send further notifications for two years, and an initial late payment penalty will be imposed in the normal manner.

### *Shortfall penalties*

Shortfall penalties, calculated as a percentage of the tax shortfall resulting from the action or position taken by the taxpayer in a tax return, may also apply.

There is a 50% discount on certain penalties where the taxpayer has a past record of 'good behaviour' and, in certain circumstances, a cap of NZD 50,000 on shortfall penalties for not taking reasonable care or for taking an unacceptable tax position.

## *Other issues*

### *International Financial Reporting Standards (IFRS)*

The relationship between statutory accounting and taxable income is quasi-dependent. The year of final adoption for IFRS was 2007, and the impact on significant areas of tax law is as follows.

#### Comments on tax regime

New Zealand's determination of taxable income starts with the statutory accounts' accounting profit and then specific tax adjustments are made based on rules for revenue recognition and deductible expenditure in the tax legislation. Changes have been made to the tax treatment of 'financial arrangements' (a defined tax legislative term) to allow for the alignment to the accounting recognition of fair values on such arrangements in specific cases.

#### Year of adoption cash impact

Mandatory adoption of NZ IFRS accounting standards for most entities (except for small & medium enterprises) applied for balance dates beginning 1 January 2007. Depending on the specific IFRS adoption adjustment, the resulting income or expenditure is taken into taxable income based on the ordinary statutory tax provisions. The key areas which were changed for tax under IFRS adoption are the trading stock provisions (which align tax with accounting standards subject to some provisions) and the financial arrangement rules. These rules are very broad and deal with the tax treatment of accrual income or expenditure on debt instruments, debt type instruments, derivatives, etc.

#### Thin capitalisation

The thin capitalisation rules work on a debt over assets percentage. It relies mostly on the tax legislative definition for debt and the amount disclosed in the financial statements under generally accepted accounting practice as assets (although there are some other measurement alternatives).

#### Debt versus equity classifications

The classification of debt and equity instruments for tax is dependent on the tax legislative definitions for specific purposes (such as the spreading of any deductions or income where the financial arrangement rules apply, thin capitalisation, etc). Tax applies legal form and does not strictly rely upon the classification applied under IFRS.

#### Lease versus sale determinations

There are specific tax provisions dealing with finance leases.

#### Distributable reserves

The level of distributable reserves is based on the company law requirements of solvency and not specifically on the amounts shown as reserves in the financial statements.

#### Transfer pricing determination

There have been no specific comments released yet by the New Zealand Revenue Authority on the adoption of IFRS impact for transfer pricing.

**Financial arrangements**
Specific timing rules apply to the recognition for income tax purposes of income and expenditure in relation to financial arrangements, which apply to New Zealand residents or entities carrying on business in New Zealand.

A number of changes to the financial arrangements rules have been enacted to ensure that taxpayers who adopt IFRS can continue to use tax rules that rely on accounting practice. For other taxpayers, the existing tax spreading methodologies continue to apply but without the option of using the financial reporting method.

The new rules include a combination of compulsory methods and elective methods that are available subject to the taxpayer meeting certain qualification criteria. Two new methods (the expected value method and the equity-free fair value method) have been introduced to assist in reducing exposure to volatility that might otherwise arise under IFRS fair value accounting.

## Significant developments

Equity Tax Law Reform No. 712 and Decree No. 93-2009 on Regulation of Equity Tax Law Reform became effective as of 1 January 2010.

The main amendments introduced by the law reform and its regulations include:

- Dividend and profit remittance abroad are subject to a 10% withholding tax (WHT). Interest payments generated by loans that are provided by non-resident financial institutions are also subject to a 10% WHT.
- Interest earned on government bonds and securities is considered taxable income subject to a 10% WHT.
- A 1% definitive minimum tax is applied to gross taxable income.
- A non-creditable excise tax on tobacco cigarettes now applies on imports.

## Taxes on corporate income

Nicaragua has a territorial income tax system under which only income generated in, or that causes effects in, Nicaragua is generally subject to income tax. The corporate income tax is imposed on a corporation's profits, which consist of business/trading income, passive income, and capital gains. General business expenses are allowed as a deduction in computing taxable income.

### Income tax rates

Income tax is levied only on domestic-sourced income at a flat rate of the higher of:

- 30% of net taxable income (i.e. gross taxable income less allowed deductions) or
- A definitive minimum tax of 1% on gross income obtained during the fiscal year. If the company does not have net income, 30% of net income will not be greater than 1% of gross income.

The law establishes the following exceptions to the 1% definitive minimum tax:

- First three fiscal periods of recently incorporated entities.
- Taxpayers whose sales prices are controlled by the government.
- Taxpayers that ceased operations on account of force majeure.

## Corporate residence

Corporate residence is determined by the place of incorporation.

Residents and non-residents are taxed only on Nicaraguan-source income.

## Other taxes

### Value-added tax (VAT)

VAT is imposed at a 15% rate on the:

- sale of goods
- rendering of services
- grant of use of assets, and
- import of goods.

VAT exemptions include:

- medicine
- real estate transfer
- sale of used goods
- basic food products
- credit instruments
- tuition, and
- textbooks and educational supplies.

Taxpayers may recover VAT paid for the purchase of goods and services used to generate other goods and services subject to VAT. This is known as VAT liquidation, which is determined by subtracting VAT credits paid on transactions needed to generate taxable income for VAT purposes from VAT collected on the sales of goods or the rendering of services. Note that VAT paid on transactions to generate non-taxable income for VAT purposes are not allowed as VAT credits.

VAT returns must be filed on a monthly basis with payment due in full on the same day. Taxpayers registered as high-taxpayers (with annual income greater than 6 million Nicaraguan córdobas (NIO)) must present an advanced bi-weekly VAT return in the first five days after the 15th day of each month and a definite return in the first five days of the following month.

### Selective consumption tax

A selective consumption tax is applied to goods that are considered to be non-essential. The tax base is the cost, insurance, and freight (CIF) price for imported items, and the tax is levied and paid only at that stage (based on the list of products published as an appendix to the Fiscal Equity Law and its reforms).

### Excise taxes

A non-creditable excise tax on tobacco cigarettes applies on imports.

### Municipal sales and services tax

A monthly 1% tax is levied on all sales of goods and rendering of services in each of the municipalities of the country.

### Municipal registration tax
An annual 2% tax is levied by each municipality on the average of income received in the months of October, November, and December of the previous year. In the case of the incorporation of a new establishment or enterprise, the municipal registration tax is 1% of the capital invested.

### Real estate municipal tax
The real estate municipal tax is an annual tax that is levied at a rate of 1% on 80% of cadastral value, as recorded by the government. If the cadastral value is not available, the cost or fiscal appraisal value may be used.

### Stamp taxes
Stamp duty is levied on certain types of documents issued in Nicaragua.

## Branch income

Branch income received is subject to the general corporate income tax.

## Income determination

Taxable income is determined by the sum of all income or gains derived from Nicaraguan sources, less allowable deductions, which generally include all expenses necessary to generate taxable income. Taxable income is computed according to International Financial Reporting Standards (IFRS) and modified as required by Nicaraguan income tax law.

### Inventory valuation
Last in first out (LIFO), first in first out (FIFO), and the average cost methods are accepted for inventory valuation purposes. Tax Authorities shall authorise the change of a valuation method.

### Capital gains and losses
Capital gains and losses are treated as ordinary taxable corporate income. Capital gain transactions that require any annotation in the public registry (e.g. real estate, vehicles) will be subject to a WHT based on the amount of the transaction, as follows:

| Good value (USD) | | Rate (%) |
|---|---|---|
| From | Through | |
| 0.01 | 50,000.00 | 1 |
| 50,000.01 | 100,000.00 | 2 |
| More than 100,000.01 | | 3 |

### Foreign income
Business enterprises are subject to income tax only on Nicaraguan-source income.

### Stock dividends
Stock dividends paid by Nicaraguan entities to resident or non-resident shareholders are subject to 10% WHT.

The Equity Tax Law Reform regulations define “stock dividends” as stock dividends paid as well as the remittance of net income after income tax made by branches to headquarters and any payments considered as advance net income remittance abroad or locally.

### *Interest income*

Interest received from Nicaraguan source by residents or non-residents of Nicaragua, as well as the interest gained by resident from deposits placed in the national financial system, is subject to a 10% WHT.

Interest earned on government bonds and securities is considered taxable income subject to a 10% WHT.

## *Deductions*

### *Depreciation*

Depreciation must be computed using the straight-line method. Depending on the type of construction and the estimated life of fixed assets, annual rates for depreciation are as follows:

| Assets | Rate (%) |
|---|---|
| Buildings | 3, 5, 10 |
| Vehicles | 12.5, 20 |
| Plant and equipment | 10, 15, 20 |
| Other assets | 10, 20 |

### Alternative method of depreciation

Taxpayers under the Temporary Admission for Active Processing (TAP) regime may, at their convenience, request a different depreciation rate (i.e. accelerated depreciation) from tax authorities. Used fixed assets acquired abroad could also be subject to a different depreciation rate.

### *Interest expenses*

A deduction is allowed for any interest paid on loans with national and foreign financial institutions.

In order for interest paid to a non-resident to be deductible, the corresponding 10% WHT must be withheld and paid.

### *Bad debt*

Corporations are allowed a deduction for receivables as an allowance for doubtful accounts as long as there is supporting documentation of the credit, identification documents of the debtor and creditor, and administrative and judicial collection proof.

### *Charitable contributions*

A deduction is allowed, up to 10 % of the corporation’s income, for charitable contributions made to the government and its institutions, Red Cross, and other organisations.

### Compensation
A deduction is allowed for payments made to employees as bonuses or in addition to their salaries or wages.

### Life insurance
A deduction is allowed for employee insurance payments made.

### Fines and penalties
Penalties or charges made by tax, customs, Social Security, or municipal authorities are not deductible for income tax purposes.

### Taxes
In principle, income tax expense is not deductible for income tax purposes. Municipal or local taxes (i.e., real estate tax, monthly income tax, annual registration tax) are deductible from income taxes.

### Net operating losses
Losses may be carried forward and deducted from future profits, for up to three years. The carryback of losses is not allowed.

### Payments to foreign affiliates
Payments made from affiliates to foreign related parties are deductible for income tax purposes provided the following requirements are met:

- The expenses (i.e. royalties, interest, and services) are needed to generate taxable income.
- The expenses are duly supported (e.g. agreements, invoices, payment receipts).
- The expenses are incurred within the fiscal period.
- The WHT is applied and paid to the Tax Authorities.

## Group taxation

Section 3 of the Equity Tax Law recognises 'economic units' as a taxpayer formed by many entities of one group. However, group taxation is not permitted. Each entity is required to file a separate return.

## Tax credits and incentives

### Tourism incentives
Under present law, and on a case-by-case basis, new companies with tourist activities may request and the government may grant, during the facilities' construction phase, total exemption of customs duties and partial or total income tax exemption for a maximum period of ten years.

### Renewable energy incentives
The renewable energy sector is covered by a special law with tax benefits or exemptions in corporate income tax, VAT, customs duties, and municipal tax.

### Free trade zones
Free trade zone industries have a special law with tax benefits or exemptions in corporate income tax, VAT, customs duties, and municipal taxes.

An industrial export zone decree provides a 15 year exemption from income tax to those taxpayers located in certain free trade zones. There is a 100% exemption for the first ten years and 60% exemption for the following five years. Additional requirements and provisions apply.

In accordance with the Agreement on Subsidies and Countervailing Measures issued by the World Trade Organization (WTO), by the end of year 2015 all tax exemptions granted to free trade zones shall be eliminated. However, Nicaragua falls under the exception of section 27 of this agreement and qualifies as a country listed in Annex VII (for being a developing economy) as a country with per capita GNP of less than USD 1,000, based on World Bank estimates. Due to this exception, it is foreseen that the tax holiday will still apply to free trade zone industries in Nicaragua past 2015.

## *Withholding taxes*

### *Payments to residents*

Dividend payments to resident shareholders (corporations or individuals) are subject to 10% WHT.

Payments of royalties to resident individuals or corporations are subject to 2% WHT.

Interest paid to a resident individual or legal entity is subject to 10% WHT.

Professional services provided by an individual are subject to 10% WHT.

Payments on the local acquisition of goods and services are subject to 1% WHT.

### *Payments to non-residents*

Payments of royalties, interest, dividends, and service fees to non-resident corporations are subject to WHT, as follows:

| | Taxable income (%) | Tax rate (%) |
|---|---|---|
| Royalties | 70 | 21 |
| Dividends | – | 10 |
| Services provided in general | 35 | 10.5 |
| Interest: | | |
| Non-financial companies | – | 10 |
| Financial companies | 0 | 10 |
| TV and Radio programming or subscription | 30 | 9 |

Payments of any kind of income to non-resident individuals are subject to WHT of 20%.

## *Tax administration*

### *Returns*

Without exception, all corporations and individuals are required to file tax returns for a fiscal year within the following three months after the fiscal year end, which commonly ends on 30 June; however, companies can obtain authorisation from tax authorities in order to change or have a different year-end: 31 March, 30 September, or 31 December.

### *Payment of tax*

Corporations shall pay fiscal-year income tax in monthly advance payments. The monthly payable amount is calculated as 1% of gross income.

## Significant developments

The tax regime in Nigeria is relatively stable. The last major changes to the tax legislation came into effect in 2007; however, there is ongoing tax reform with a new National Tax Policy, a gradual move towards electronic tax filing and payments, as well as re-writing of the tax laws in plain English for ease of understanding, interpretation, and application.

Below are some of the recent developments in the tax environment and significant potential changes under consideration.

### Nigerian Content Development Act

The Nigerian Content Development Act was introduced to increase the level of Nigerian participation in the oil and gas industry. The Act introduces a levy of 1% on every contract awarded in the upstream oil and gas sector of the economy. Any violation of the Act is liable for a fine of 5% of the contract value and may result in outright cancellation of the contract.

### Petroleum Industry Bill

There is an ongoing legislative process to combine 16 different national petroleum laws into a single document called the Petroleum Industry Bill. The bill aims to ensure transparency, make industry participation more equitable, and maximise government revenue. Once enacted, a two-tier tax system consisting of a corporate income tax (CIT) and hydrocarbon tax will apply to exploration and production companies. Each tax will not be deductible for calculation of profits liable to the other tax.

### Employee Compensation Act

A new Employee Compensation Act was enacted on 18 January 2011 to replace the old Workmen Compensation Act. Under the new Act, all employers are required to contribute 1% of their payroll cost in the first two years of commencement of the Act. Subsequently, assessments will be issued by the Nigeria Social Insurance Trust Fund, the body empowered to administer and implement the Act.

### Tax exemption for all bonds

The Federal Government has issued a proposal to grant a tax waiver on interest on all bonds, including corporate and sub-national bonds. The waiver is designed to encourage more activities in the bond market and ensure cheaper and stable long-term source of funds for project finance and economic development. Currently, tax exemption is only applicable on Federal Government bonds.

### New Value-added Tax (VAT) Act

A new VAT Act is currently being drafted and is expected to be enacted into law by 2012. Some of the major changes to be introduced include enhanced input VAT claim compared to the current system where claimable input VAT is restricted to raw materials and trading stock. Also the rate of tax will increase from 5% to 10%.

### *Transfer pricing guidelines*

The Federal Inland Revenue Service (FIRS) is currently working on the introduction of formal transfer pricing guidelines which are expected to be published not later than the first quarter of 2012. The guidelines are expected to be in conformity with the Organisation for Economic Co-operation and Development (OECD) guidelines. Nigeria currently does not have specific transfer pricing guidelines.

## *Taxes on corporate income*

The corporate income tax (CIT) rate is 30%, assessed on a preceding year basis (i.e. tax is charged on profits for the accounting year ending in the year preceding assessment).

Resident companies are liable for CIT on their worldwide income while non-residents are subject to CIT on their Nigeria-source income. Investment income paid by a Nigerian resident to a non-resident is sourced in Nigeria and subject to withholding tax (WHT) at source, which serves as the final tax.

In respect of business profits, a non-resident company which has a fixed base or a permanent establishment (PE) in Nigeria is taxable on the profits attributable to that fixed based. As such, it is required to register for CIT and file its tax returns. Any WHT deducted at source from its Nigeria-source income is available as offset against the CIT liability.

### *Small company rates*

For small companies in the manufacturing industry and wholly export-oriented companies with turnover not exceeding 1 million Nigerian naira (NGN) (about USD 6,700), the CIT rate is reduced to 20% in the first five calendar years of operation.

### *Petroleum profit tax (PPT)*

PPT is a tax on the income of companies engaged in upstream petroleum operations in lieu of CIT.

The PPT rates vary as follows:

- 50% for petroleum operations under production sharing contracts (PSC) with the Nigerian National Petroleum Corporation (NNPC).
- 65.75% for non-PSC operations, including joint ventures (JVs), in the first five years during which the company has not fully amortised all pre-production capitalised expenditure.
- 85% for non-PSC operations after the first five years.

### *Education tax*

An education tax is levied on every Nigerian resident company at the rate of 2% of the assessable profit for each year of assessment. The tax is payable within two months of an assessment notice from the FIRS. In practice, many companies pay the tax on a self assessment basis along with their CIT.

For companies subject to PPT, education tax is to be treated as an allowable deduction. For other companies, income/profit taxes are not deductible in arriving at taxable income. Non-resident companies and unincorporated entities are exempt from education tax.

### *Minimum tax*
Minimum tax is payable by companies having no taxable profits for the year or where the tax on profits is below the minimum tax. However, companies in the first four calendar years of business, companies engaged in the agriculture business, or companies that have foreign equity capital of at least 25% are exempt from minimum tax.

Minimum tax payable is calculated as follows:

- Where the turnover of the company is NGN 500,000 or below, minimum tax is the highest of:
  - 0.5% of gross profits
  - 0.5% of net assets
  - 0.25% of paid up capital, or
  - 0.25% of turnover of the company for the year.
- Where the turnover is higher than NGN 500,000, minimum tax is the highest of the calculations listed above plus 0.125% of turnover in excess of NGN 500,000.

### *Alternative tax on distribution*
There is a tax on distribution where a company pays a dividend in excess of its taxable profit. Such a company will be charged tax on the dividend paid as if the dividend is the taxable profit of the company for that year of assessment.

### *Alternative tax on deemed income*
Non-resident companies are subject to tax on the income or profit derived from Nigeria. The FIRS often assesses non-resident companies on a deemed income basis. This is done by applying 20% of turnover as deemed profit and then charging CIT at 30%, resulting in an effective tax rate of 6% on turnover.

## *Corporate residence*

A company is considered resident in Nigeria if such a company is registered or incorporated under the Companies and Allied Matters Act. This means that a company formed outside Nigeria under the laws in force in the foreign territory will be considered as a non-resident company for tax purposes.

### *Permanent establishment (PE)*
Fixed base is not defined but is generally considered to be a location with a degree of permanence. The following would generally not be considered to be a fixed base:

- The use of facilities solely for the purpose of storage or display of goods or merchandise.
- The use of facilities solely for the collection of information.

Other activities that could trigger a tax presence in Nigeria include a dependent agency arrangement, execution of a turnkey project, or artificial arrangements between related parties.

## Other taxes

### Value-added tax (VAT)

The standard VAT rate is 5%, but there is a proposal to increase the rate to 10%. Zero-rated items include non-oil exports, goods and services purchased by diplomats, and goods and services purchased for use in humanitarian donor funded projects. Exempt items include plants and machinery for use in export processing zones or free trade zones, basic food items, medical products and services, pharmaceutical products, books and educational materials, and exported services.

As of 1 September 2007, oil and gas companies are required to deduct VAT at source and remit to the tax authority.

### Custom duties/Import tariffs

Customs duties in Nigeria are levied only on imports. Rates vary for different items, typically from 5% to 35%, and are assessed with reference to the prevailing Harmonized Commodity and Coding System (HS code).

### Excise taxes

Excise duty is applicable on beer and stout, wines, spirits, cigarettes, and tobacco manufactured and sold in Nigeria at rates ranging from 5% to 20%.

### Property taxes

Property taxes in Nigeria are usually levied by the state government with varying rates depending on the state and the location of the property within the state. The two major property taxes are governor's consent fee and land registration fee. In Lagos (which is the economic hub of Nigeria), governor's consent fee, land registration fees, and other levies payable to the state give rise to a total levy of 15% of the transfer value of the land. Also, Right of Occupancy fee and tenement rates are chargeable by state and local government authorities.

### Stamp taxes

Under the Stamp Duty Act, stamp duty is payable on any agreement executed in Nigeria, or relating, whatsoever, to any property situated in or to any matter or thing done in Nigeria. Instruments which are required to be stamped under the Stamp Duties Act must be stamped within 40 days of first execution.

Stamp duty is chargeable either at fixed rates or *ad valorem* (i.e. in proportion to the value of the consideration) depending on the class of instrument. Stamp duty is imposed at the rate of 0.75% on the authorised share capital at incorporation of a company or on registration of new shares.

### Capital gains tax (CGT)

Gains accruing to a chargeable person (individual or company) on the disposal of chargeable assets shall be subject to tax under the Capital Gains Tax Act at the rate of 10%. There is no distinction between long-term and short-term gains and no inflation adjustment to cost for CGT purposes.

All forms of assets, including options, debts, and foreign currency, other than those specifically exempt, are liable for CGT. The gains on the disposal of shares are exempt from CGT.

CGT is applicable on the chargeable gains received or brought into Nigeria in respect of assets situated outside Nigeria.

Capital losses are not allowed as an offset against chargeable gains accruing to a person from the disposal of any assets.

### *Information technology levy*
The National Information Technology Development Agency (NITDA) Act No. 27 was introduced in 2007 and took effect beginning from the 2008 year of assessment. The act stipulates that a company with an annual turnover of NGN 100 million or more is required to pay 1% of its profit before tax as information technology tax. This levy is tax deductible when paid (typically in the year of assessment following that in which the payment was made).

This tax is applicable to:

- Banking and other financial activities, including capital and money market operators, mortgage institutions, and micro-finance banks.
- Insurance activities, including brokerage.
- Pension fund administration, pension management, and related services.
- GSM services providers and telecommunication companies.
- Cyber and internet services providers.

### *Levy on contracts awarded in the upstream oil and gas sector*
The Nigerian Content Development Act was introduced to increase the level of Nigerian participation in the oil and gas industry. The Act introduces a levy of 1% on every contract awarded in the upstream oil and gas sector of the economy. Any violation of the Act is liable for a fine of 5% of the contract value and may result in outright cancellation of the contract.

### *Payroll contribution*
A new Employee Compensation Act was enacted on 18 January 2011 to replace the old Workmen Compensation Act. Under the new Act, all employers are required to contribute 1% of their payroll cost in the first two years of commencement of the Act. Subsequently, assessments will be issued by the Nigeria Social Insurance Trust Fund, the body empowered to administer and implement the Act.

## *Branch income*

Except in rare circumstances, it is illegal for a non-resident company to operate through a branch in Nigeria. The Nigeria-source income of a non-resident company is taxable at the CIT rate of 30% or via the alternative tax on deemed income *(see the Taxes on corporate income section for more information).*

## *Income determination*

The following income is subject to CIT in Nigeria:

- Profits accruing in, derived from, brought into, or received in Nigeria in respect of any trade or business.
- Dividends, interest, royalties, discounts, charges, or annuities.
- Rent or any premium arising from the right granted to any person for the use or occupation of any property, where applicable.
- Any source of annual profits or gain not falling within the preceding categories.
- Fees, dues, and allowances (wherever paid) for services rendered.

- Any amount of profits or gains arising from the acquisition or disposal of short-term money instruments like federal government securities, treasury bills, treasury or savings certificates, debenture certificates, and treasury bonds.

### *Inventory valuation*
The first in first out (FIFO) valuation method is commonly used. Average and standard cost methods are also allowed, but last in first out (LIFO) is not permitted. Other than the accounting requirement in the local generally accepted accounting principles (GAAP), there are no special statutory provisions for inventory valuation.

### *Capital gains*
Capital gains are not subject to CIT, but may be subject to CGT. *See Capital gains tax in the Other taxes section for more information.*

### *Dividend income*
Dividends received by a Nigerian resident company from another Nigerian resident company are taxable at source *(see Withholding taxes section for more information)* and not subject to further tax.

Dividends received from non-resident companies are taxable except if repatriated into Nigeria through government approved channels (i.e. any financial institution authorised by the Central Bank of Nigeria to deal in foreign currency transactions).

### *Stock dividends*
Stock dividends (bonus shares) are not taxable at source or included in the taxable income of the recipient company.

### *Foreign income*
A Nigerian resident company is taxable on its worldwide income. On the other hand, a non-resident company is subject to tax only on income derived from Nigeria.

Dividends, interest, rents, and royalties earned abroad and brought into Nigeria through Government approved channels are exempt from Nigerian tax; otherwise, the income is taxable at the CIT rate of 30% and education tax at 2%. Government approved channels means the Central Bank of Nigeria and any bank or financial institution authorised to carry out foreign exchange transactions.

## *Deductions*

Expenses are deductible for tax purposes if they are wholly, reasonably, exclusively, and necessarily incurred for the business or trade. Examples of such expenses are:

- Sum payable by way of interest on capital borrowed.
- Rent for the period.
- Expenses incurred in respect of salary and wages.
- Expenses incurred for repair of assets.
- Bad debt incurred in the course of trade.
- Liability incurred for purpose of trade.
- Research and development costs.
- Donations subject to the provisions of the law.

### *Depreciation*
Capital allowances are calculated on a straight-line basis. Capital allowances claimable in any year are restricted to two-third of assessable profits for all companies, except companies in the manufacturing and agricultural sectors which are excluded from this restriction.

The following are the capital allowance rates on fixed assets (qualifying expenditures):

| Qualifying expenditure | Initial allowance (%) | Annual allowance (%) |
|---|---|---|
| Building (industrial and non-industrial) | 15 | 10 |
| Furniture and fittings | 25 | 20 |
| Plant expenditure (1) | 50/95 | 0/25 |
| Mining expenditure | 95 | 0 |
| Plantation equipment | 95 | 0 |
| Motor vehicle (2) | 50/95 | 0/25 |
| Ranching and plantation expenditure | 30 | 50 |
| Housing estate expenditure | 50 | 25 |
| Research and development | 95 | 0 |

Notes

1. 95% initial allowance for plant used in agricultural production; others 50%.
2. 95% initial allowance is granted for motor vehicles used for public transportation if the company has a fleet of at least three buses; all other motor vehicles 50%.

The initial allowance is first deducted, and the balance is written off on a straight-line basis over a fixed period, depending on the rates of annual allowance. There is a requirement that assets not yet disposed of cannot be fully written off in the books. A nominal amount of NGN 10 per asset must be retained in the books till the assets are disposed of. However, where 95% has been claimed as an initial allowance, the 5% balance is the value that must be maintained in the books until the final disposal of the asset.

When assets are sold, the proceeds over the tax written-down value are taxed at 30% to the extent of the allowances already claimed.

### *Net operating losses*
Losses can be carried forward indefinitely, except for insurance companies where losses can only be carried forward for four years. Losses made from one line of business cannot be relieved against another line of business. Losses cannot be carried back.

### *Payments to foreign affiliates*
Payments considered to be artificial are not deductible for tax purposes. Royalties, management, and technical fees require the approval of the National Office for Technology Acquisition and Promotion (NOTAP) for exchange control purposes and for tax deduction. NOTAP approved royalties and technical fees are limited to a range of 1% to 5% of net sales, while management fees are limited to a range of 2% to 5% of profit before tax, and consultancy fees are limited to 5% of total project cost. Technical fees are limited to approved man-hour rates.

Trademark fees are disallowed where the trademark owner has more than 75% equity participation in the local company.

## Group taxation

There are currently no provisions for group taxation, group relief, or group filing of tax returns in Nigeria. Each legal entity within a group is treated as distinct and separate for tax purposes.

### Transfer pricing

There are no specific transfer pricing rules in Nigeria. However, the tax laws have a general anti-avoidance provision which requires transactions between related entities to be at arm's length.

The FIRS is currently working on the introduction of formal transfer pricing guidelines which are expected to be published not later than the first quarter of 2012. The guidelines are expected to be in conformity with the OECD guidelines.

### Thin capitalisation

Nigeria has no thin capitalisation rules. However, interest charged between related parties is expected to reflect arm's-length transactions. The tax authority may disallow any related party interest considered to be excessive.

## Tax credits and incentives

Nigeria has various tax incentives intended to encourage investment in key sectors of the economy as follows.

### Tax holidays

Pioneer companies investing in specified industrial activities may, on application, be granted a tax holiday for a maximum period of five years. Examples of economic activities that may be granted a tax holiday include glass and glassware manufacturing, manufacturing of fertilisers, and steel manufacturing.

A new company that engages in the mining of solid minerals is exempt from tax for the first three years of its operation.

### Rural location incentives

Certain incentives are available to companies located in rural areas. The incentives take the form of tax reductions at graduated rates for enterprises located at least 20 kilometres from available electricity, water, and tarred roads.

### Export incentives

A company that is engaged in an approved manufacturing activity in an export processing zone (EPZ) and incurs expenditures in its qualifying building and plant equipment is entitled to 100% capital allowance in that year of assessment.

In addition, a company that is 100% export oriented but located outside an EPZ will enjoy a three year tax holiday, provided the company is not formed by splitting up or reconstruction of an already existing business and the export proceeds form at least 75% of its turnover.

Profits of companies whose supplies are exclusively inputs to the manufacture of products for export are exempt from tax. Such companies are expected to obtain a certificate of purchase of the input from the exporter in order to claim tax exemption.

Where plant and machinery are transferred to a new company, the tax written down value of the asset transferred must not exceed 25% of the total value of plant and machinery in the new company. The company should also repatriate at least 75% of the export earnings to Nigeria and place it in a Nigerian domiciliary account in order to qualify for a tax holiday.

Profits of any Nigerian company in respect of goods exported from Nigeria are exempt from tax, provided that the proceeds from such exports are repatriated to Nigeria and are used exclusively for the purchase of raw materials, plant, equipments, and spare parts.

### *Gas utilisation incentives*
Companies engaged in gas utilisation are entitled to:

- A tax free period for up to five years.
- Accelerated capital allowance after the tax free period.
- Tax free dividends during the tax free period.

### *Tourism incentives*
25% of the income derived from tourism by hotels in convertible currencies is exempt from tax if such income is put in a reserve fund to be utilised within five years for expansion or construction of new hotels and other facilities for tourism development.

### *Interest incentives*
Interest accruing on deposit accounts of a non-resident company is tax-exempt, provided the deposits are made by transfer of funds to Nigeria on or after 1 January 1990 and the depositor does not become non-resident after making the deposit while in Nigeria.

Interest on foreign-currency domiciliary accounts is also tax-exempt.

Interest on any foreign loans, and interest on any loan granted by a bank for the purpose of manufacturing goods for export, is exempt from tax as follows:

| Repayment period | Moratorium | Exemption (%) |
|---|---|---|
| Over 7 years | Not less than 2 years | 100 |
| 5 to 7 years | Not less than 1.5 years | 70 |
| 2 to 4 years | Not less than 1 year | 40 |

Interest on any loan granted by a bank to a company engaged in agricultural trade, fabrication of local plant and machinery, or as working capital to any cottage industry is 100% tax free if the loan has a moratorium of not less than 18 months and the rate of interest is not more than the base lending rate.

### *Investment allowances*
An investment allowance of 10% on the cost of qualifying expenditures in respect of plant and machinery is available as a deduction from assessable profits in the year of purchase. There is no restriction to the full claim of capital allowance in any year of assessment for companies in the mining, manufacturing, and agricultural sectors.

### *Foreign tax credit*

Nigeria does not grant automatic tax credits to Nigerian companies for foreign tax on income derived from other countries. The Nigerian tax laws already provides for tax exemption for dividends, interest, and royalties.

Foreign tax credits are only granted based on the provisions of existing double taxation treaties (DTTs) and partial credits as applicable to Commonwealth countries. In this regard, full tax credits are usually provided for in the DTTs. Tax credit for members of Commonwealth countries is granted up to half the Nigerian CIT rate.

## *Withholding taxes*

WHT is applicable on specified transactions as indicated below. There is no distinction between the WHT rates for resident companies or individuals and non-resident companies or individuals.

| Types of payment | WHT for companies (%) | WHT for individuals (%) |
|---|---|---|
| Dividends, interest, and rents | 10 | 10 |
| Directors fees | N/A | 10 |
| Hire of equipment | 10 | 10 |
| Royalties | 10 | 5 |
| Commission, consultancy, technical, service fees | 10 | 5 |
| Management fees | 10 | 5 |
| Construction/building | 5 | 5 |
| Contracts other than sales in the ordinary course of business | 5 | 5 |

The period for filing WHT is 21 days after the duty to deduct arose (previously 30 days) for deductions from companies.

The penalty for failure to deduct or remit tax is now 10% (previously 200%) of the amount not deducted/remitted.

Note that companies are required to submit, in electronic form, a schedule of all their suppliers for the month showing the tax identification number (TIN), address of the suppliers, the nature of the transaction, WHT deducted, and invoice number.

### *Double tax treaties (DTTs)*

Nigeria has DTTs with Belgium, Canada, China, Czech Republic, France, the Netherlands, Pakistan, Philippines, Romania, Slovak Republic, South Africa, and the United Kingdom.

The provisions of Nigeria's DTTs allow a reduced WHT rate of 7.5% on dividends, royalties, and interest payable to a beneficiary resident in a treaty country, compared to 10% for non-treaty residents.

## Tax administration

### Returns

Companies are required to register for tax and file their audited accounts and tax computations with the FIRS within six months of their financial year end on a self-assessment basis or 18 months after incorporation (whichever comes first). A company may file an application for extension of filing tax returns for up to two months at the discretion of the FIRS.

Upon registration, a company is issued a TIN which will serve as the company's file number for all federal taxes and future correspondence with the FIRS.

The company must file the following documents with the tax authority on an annual basis:

- Tax computation for the relevant year of assessment.
- The audited financial statements for the respective period; this should be in conformity with the local GAAP.
- A duly completed and signed self-assessment form for CIT
- Evidence of remittance of the income tax liability (partly or in full).

PPT is payable on an actual year basis. Estimated tax returns must be filed within two months of the fiscal year (which runs from 1 January to 31 December). Actual tax returns should be filed within five months after the end of the accounting period, that is, not later than 31 May.

### Assessment

Nigerian companies file their tax returns based on a self-assessment system where the taxpayer prepares its annual returns and determines its tax liability. However, the FIRS may apply a best of judgment (BOJ) assessment where it is of the opinion that the tax returns filed are deliberately misstated or where no returns are filed within the stipulated period.

### Payment of tax

**CIT**

A company that files its self assessment within six months after the accounting year-end could apply to the FIRS in writing to pay its income tax in instalments. The maximum number of instalments the FIRS may approve is six. Evidence of the first instalment has to accompany the tax returns filed in order to qualify for the instalmental payment. However, all payments have to be made on or before 30 November of the year of assessment.

Assessments are made on a preceding year basis. This means that the financial statements for a period ended in 2010 will form the basis for the 2011 year of assessment.

**PPT**

Payments with respect to PPT in any accounting period of 12 months are made in 12 instalments, with a final thirteenth instalment (if there is an underpayment). The first instalment for the year is due by the end of March.

### Penalty for non-compliance

Late payment of taxes attracts a 10% penalty and interest at commercial rate.

A company that files its annual tax return late or fails to submit its accounts by the due date is liable for a nominal penalty.

Late submission of PPT returns attracts an initial penalty of NGN 10,000 and NGN 2,000 for each day such failure continues, while late payment of tax attracts a penalty of 5% of the tax not paid.

## Significant developments

In March 2011, the Norwegian government released a proposal for legislative amendments that would increase the opportunities for cross border reorganisations.

### Cross border share for share exchanges

According to the proposal, Norwegian shareholders may, under certain conditions, exchange their shares in a limited liability company for shares in a limited liability company on a roll-over basis. This does not relate to companies in low-tax jurisdictions outside the European Economic Area (EEA).

### Cross border mergers and demergers

The Ministry of Finance proposes that a Norwegian limited liability company may merge with a limited liability company within the EEA. A demerger of a Norwegian limited liability company may also be carried out on a tax neutral basis. Concerning a merger and demerger, any Norwegian business operations must be continued in a Norwegian branch. Companies outside Norway may merge or demerge without triggering any Norwegian tax consequences. Assets in a Norwegian branch would get a carryover tax basis if the assets are not transferred out of Norwegian tax jurisdiction.

This does not apply to companies resident in a low-tax jurisdiction outside the EEA. Companies resident in a low-tax jurisdiction within the EEA must actually be established and conduct genuine economic activity within the EEA. The government also proposes tax deferral on transfer of branch assets under certain conditions.

### Exit tax

The government proposes an exemption to the exit charge when companies are moved to another jurisdiction within the EEA. In the event the company is transferred to a low-tax jurisdiction within the EEA, the exemption is contingent on the company being actually established and conducting genuine economic activity in the new resident state after the transfer. To the extent any assets or liabilities are transferred out of Norwegian tax jurisdiction, these will be subject to a gain or loss recognition under the exit tax regime.

## Taxes on corporate income

### Corporate income tax (CIT)

A Norwegian resident company is, as a starting point, subject to CIT on its worldwide income. Non-resident companies are, as a starting point, liable for CIT in Norway when engaged in a business that is either conducted in or managed from Norway.

CIT is assessed at a rate of 28%.

As a general rule, income is taxable when the right to the benefit is earned and costs are deductible when the liability to cover the costs arises. The actual payment is not relevant.

### *Petroleum tax regime*
All upstream petroleum activity on the Norwegian Continental Shelf (NCS) is taxable to Norway.

Taxation is based on net income at a marginal tax rate of 78%, which is composed of the ordinary 28% CIT rate and a 50% special tax. All income is subject to the 28% CIT, while only income from offshore production and pipeline transportation of petroleum from the NCS (offshore tax regime) is subject to the additional 50% special tax.

All upstream activity on the NCS must be consolidated within the company. There is no ring fence per oil field, and tax consolidation against other activity is limited. Crude oil sales from most of the fields are taxed at a predetermined market price set by an official board (i.e. the norm price). A norm price may be imposed on gas sales, but this has not been implemented. Investments in installations for exploitation and production of petroleum as well as investments in pipelines are depreciated linearly over six years.

An investment-based 'supplementary depreciation' (uplift) of 30% (7.5% per year for four years) is granted on investments in installations for exploitation and production of petroleum as well as investments in pipelines. The uplift is deducted against the special tax base. Loss and unused uplift may be carried forward indefinitely with an annual interest. Both depreciation and uplift may be claimed from the year of the investment, regardless of whether title has passed or the asset has been taken into use. If the upstream activity on the NCS ceases, the tax value of loss carryforward and unused uplift may either be sold or compensated by the Norwegian state. Exploration costs are tax deductible as incurred. If a loss is created due to exploration cost, the taxpayer may claim the tax value of such loss repaid in the year following the income year in which the loss was created.

Special rules apply as to the deductibility of net interest cost in the special tax basis (50%).

A special regime ensures that transfer of licenses on NCS are tax exempt, there is no step up in basis.

Note that income taxed under the special tax is not subject to dividend WHT.

### *Hydro power tax regime*
The hydro power tax regime is applicable on taxation of income derived from production, sales, transfer, or distribution of hydro power.

Taxation is based on net income at a marginal tax rate of 58%, which is comprised of the ordinary 28% CIT rate and a 30% resource rent tax. All income is subject to the 28% CIT, while only income from hydro power production is subject to the additional 30% resource rent tax.

The resource rent is calculated per hydro power plant. The gross income is, with some exceptions, calculated based on spot market price per hour multiplied with actual production. In addition, actual income from green certificates is included in the gross income. Deductible costs will be the same as for the CIT; that is, expenses related to the power plant except for interest expenses, which are not deductible. Uplift is granted. Special rules apply to depreciations of investments in hydro power plants. Rent expenditure and depreciations related to waterfalls are not deductible, and waterfalls are not included in the basis for uplift. Tax consolidation is mandatory within the company and, provided the conditions for group taxation are fulfilled, available on a group level. Losses (negative resource rent) on a company (eventually on a group) level will be compensated by the Norwegian state.

### *Shipping tonnage tax regime*

A new tonnage tax model was introduced from the income year 2007 onwards. The new rules are in line with the tonnage tax rules found in other European Union (EU)/ EEA countries and imply that shipping income will be tax-exempt on a permanent basis, while the previous model was based on deferral of the tax liability.

Norwegian tonnage-taxed companies are allowed to keep only certain kinds of assets inside the model (legal assets) and are not allowed to have income from non-tonnage-taxed activities except financial income. If the requirements are not fulfilled, the company would fall outside the scope of the model and be taxed at ordinary rates (28%).

#### Qualifying assets

A tonnage-taxed company must own at least one qualifying asset (i.e. a vessel, for example bulk, tankers, container vessels, car carriers, tugboats, and entrepreneurial vessels and auxiliary vessels for use in the petroleum industry) new building contracts, a 3% share in another tonnage-taxed limited company, or a 3% ownership interest in a partnership or CFC company.

#### Qualifying and legal business activities/income

Qualifying business income is income from operation of the company’s own and chartered vessels. A tonnage-taxed company may, for example, charter vessels in and out on bareboat and time charter terms without limitations. Furthermore, gains upon disposal of vessels and new building contracts are exempt from taxation.

Income from related activities such as sales of goods and services onboard vessels, loading and discharging vessels or leasing out containers and operations of ticket offices is also exempt from taxation. The exemption also applies to income from the strategic and commercial management of the company’s owned and chartered vessels, as well as vessels owned or operated by group companies (more than 50% joint ownership), and vessels operated according to a pool agreement. Pure management companies are not included (i.e. all companies must have at least one qualifying asset).

Financial income is permitted except for income from shares in unlisted companies and ownership interests in partnerships that are not taxed under the tonnage tax system. The condition is that financial activities do not constitute a separate business. Net financial income is subject to ordinary taxation (28 %). Currency gains and losses are partly taxable/ deductible, and interest costs partly deductible corresponding to the proportion between the company’s finance capital and total book capital.

#### Entrance into the tonnage tax system

Entry into the new tonnage tax system is, as a starting point, optional and may take place with effect from 1 January every year, provided that the company has fulfilled the conditions for application of the tonnage tax system from the beginning of the year. Newly established companies will have direct entry and may enter into the tonnage tax system from the date of incorporation. All qualifying companies within the same group should be obliged to make the same election (tonnage taxation or ordinary taxation) with effect from the income year 2009.

Companies that enter into the tonnage tax system are subject to a formal ten-year lock-in period. If a company exits the tonnage tax system before the lock-in period expires, it will be excluded from the tonnage tax system until after the initial lock-in period has ended.

Upon entry into the tonnage tax system, the difference between market value and tax value of the company's assets (including vessels, new building contracts, ownership interests in partnerships, and shares in CFC companies/tax exempt assets) is taxed as a capital gain (28%) that can be offset to the gain and loss account and entered as income with 20 % of the balance each year (balance method). There is continuity for financial assets and assets covered by the tax-exemption rules (qualifying shares and derivatives).

**Exit from the tonnage tax system**
A shipping company may exit the regime on a voluntary basis or may be obliged to do so after breaching specific requirements for companies within the tonnage tax system. As a starting point, there is no exit charge when leaving the regime, and the tax value on the company's assets will be adjusted to market value at the time of exit. However, a possible exit while the company has untaxed gain calculated upon entry into the tonnage tax system could result in tax liability upon exit.

## *Corporate residence*

Companies incorporated in Norway in accordance with Norwegian company law and registered in Norway are, as a general rule, regarded as a tax resident in Norway and taxable for their worldwide income. If management at the board/director level is carried out outside Norway, residency in Norway for tax purposes may cease, and the company may be subject to liquidation for tax purposes. Note that several factors should be considered in order to determine whether tax residency has been moved (e.g. other management functions and the overall nexus to Norway).

Foreign corporations will be regarded as resident in Norway if the place of effective management is in Norway. The place of effective management will, for example, be deemed to be in Norway if the board of directors makes its decisions in Norway.

From a general treaty perspective, residence is determined to be the place where the company has its effective management.

## *Other taxes*

### *Value-added tax (VAT)*
The general VAT rate is 25% and applies to all supplies of goods and services not qualifying for another rate or an exemption. A reduced rate of 14% applies to supply of food and beverages, excluding tobacco, alcohol, medication, and water from waterworks. The reduced rate is not applicable to the supply of food and beverages consumed in restaurants and other food establishments.

A reduced rate of 8% applies to the television licence fee charged for broadcasting services provided by the Norwegian Broadcasting Company (NRK), domestic passenger transport services and procurement of such services, domestic ferry services related to transport of vehicles, accommodation services, and cinema tickets.

Exemptions with credit (zero-rated) include, but are not limited to, the following:

- Export of goods and services.
- Goods and services for Norwegian offshore and non-resident ships.
- Transfer of a going concern.
- Supply of newspapers and books to recipients.
- International transport services.
- Sale of vessels and aircrafts for use in taxable activity.

Exemptions without credit include, but are not limited to, the following:

- Supply of works of art owned by the artist.
- Health services.
- Social services.
- Financial services including banking, insurance, and the sale of shares.
- Educational services.
- Sale and lease of real estate (accommodation and lease of parking lots are taxable).
- Services supplied by cultural and entertainment institutions.
- Upstream activity on the NCS.

Exemptions, whereby an option to tax is available, include the letting of immovable property to VAT liable lessees following a specific VAT registration with the VAT authorities.

The registration threshold is met when VAT taxable supplies, as comprised by the Norwegian VAT legislation (including self-supplies), exceed 50,000 Norwegian kroner (NOK) during a 12-month period. For charitable and public utility institutions and organisations, the threshold is set at NOK 140,000.

### *Customs duties*
There are quite extensive customs duties on agricultural products, which must be paid upon importation. However, it is often possible to avoid customs duties on these products partly or completely by applying for an exemption from the agricultural authorities in advance. Some of these exemptions are subject to tariff quotas.

Clothes are also subject to customs duties upon importation to Norway, but imports comprised by free trade agreements (such as the EEA with the European Union) and the General System of Preferences (for developing countries) are exempt. As a result, clothes will, as a general rule, not be subject to customs duties as long as the importer presents the necessary certificates of origin.

There are no customs duties on other products than agricultural products and clothes.

### *Excise taxes*
Excise taxes are calculated on import and domestic production of the following:

- Petroleum products, including gas.
- Alcoholic beverages.
- Non-alcoholic beverages.
- Ethanol for technical purposes.
- Tobacco.

- Chocolate, candy, sugar etc.
- Maritime engines.
- Products containing the chemicals TRI/PER.
- Products containing the propellant gases HFK/PFK.

There are also excise taxes related to the following:

- Registration of vehicles.
- Use of vehicles (annual tax).
- Emissions of NOx.
- Waste treatment.
- Sale of electricity.

### *Stamp taxes*
A tax is levied on registration of change of ownership to real estate. The tax is calculated as 2.5% of the assessment value.

### *Property taxes*
Hydro power producers must pay a 0.2% to 0.7% (decided by the local municipality, usually 0.7%) property tax on the hydro power plant's capitalised value.

Real estate may, under certain conditions, be subject to property tax. It is up to the different municipalities to choose if it wants to impose property tax or not on real estate. Not all municipalities impose property tax on real estate. The applicable rate varies between 0.2% and 0.7%, which is decided by the municipality. The tax base will normally be market value with some adjustments.

### *Net wealth taxes*
There is no net wealth tax or other capital taxes for limited liability companies, investment funds, state-owned enterprises according to the state-owned enterprise act, inter-municipal companies, and companies in which somebody owns a part in or receives income from, when the responsibility for the companies' liabilities are limited to the companies' capital.

Some institutional holders (e.g. mutual insurance companies, savings banks, co operatives, taxable pension funds, self-owned finance institutions, mortgage credit associations) pay 0.30% (state) net wealth tax. Otherwise, the maximum net wealth tax rate for a corporate body is 1.00% (state and municipal tax).

Shares in limited liability companies and equity funds are valued at 100% of quoted value for net wealth tax purposes as of 1 January of the year after the relevant income year. If quoted both on Norwegian and foreign stock exchange, the Norwegian value will be applicable. If not quoted, the basis for taxation is the company's net assets for wealth tax purposes as per 1 January of the income year in question.

### *Exit tax*
The exit rules levy taxes upon the migration of assets or liabilities. The tax is calculated by reference to the accrued but unrealised gains at the time of migration at a rate of 28%. Exit charges are levied if a company:

- transfers its operational headquarters to another country
- has assets or liabilities that are transferred to a permanent establishment (PE) that is tax-exempt pursuant to a double tax treaty (DTT), or

- has assets or liabilities that are transferred from a Norwegian PE of a foreign company to the head office or a foreign PE of the same company.

Transfer of operational equipment to a PE in a country where the DTT in question is based on the credit method is, however, not regarded as a taxable event.

According to the rules, the tax treatment is different depending on the type of assets being transferred. Business-related operational equipment and financial assets being transferred out of Norwegian taxing jurisdiction are considered as taxable events, but the tax charges may be deferred if certain conditions are met. In addition, the tax charges may be completely avoided if the assets are not sold within five years after they are transferred out of Norway. Transfer of intangible assets and inventory would trigger immediate and unconditional exit charges.

Threshold rules apply when determining whether the exit tax may be levied. Exit tax on the transfer of tangible assets is applicable only if the unrealised capital gains exceed NOK 5 million. Exit tax on the transfer of other assets and liabilities is applicable only if the unrealised capital gains exceed NOK 1 million.

Exit charges at both the corporate and shareholder level will be triggered when companies migrate from Norway because these companies will be deemed to have liquidated.

Note that the exit tax regulations are currently under alteration. *Please see the Significant developments section for more information.*

### *Carbon dioxide (CO2) tax*

A CO2 tax is calculated on petroleum that is flared and natural gas emitted into the air, as well as on CO2 that is separated from petroleum and emitted into the air, on installations used for production or transportation of petroleum. The CO2 tax is regarded as a normal operating cost for CIT purposes and is a fully deductible cost both for corporate and special tax calculations.

| Type of Petroleum | NOK per l/ Sm3/kg | NOK per tonne CO2 |
|---|---|---|
| Petrol | 0.88 | 380 |
| Petroleum, high rate | 0.69 | |
| Aviation turbine kerosine | | 270 |
| Petroleum | 0.59 | |
| Light oil, diesel oil | | 222 |
| Residue | | 188 |
| Petroleum reduced rate | 0.31 | |
| Light oil, diesel oil | | 116 |
| Residue | | 99 |
| Domestic used gas | | |
| Natural gas | 0.44 | 221 |
| LPG | 0.66 | 220 |
| Continental shelf | 0.48 | |
| Light oil, diesel oil | | 180 |
| Residue | | 153 |
| Natural gas | | 205 |

### Natural resource tax

A NOK 0.013 per kWh natural resource tax applies to hydro power activities, based on 1/7 of the produced kWh for the income year in question and the six previous years. The natural resource tax is creditable against the standard CIT.

## Branch income

Branch income is taxed at the corporate rate of 28% (the same as Norwegian companies). The basis for taxation is gross income less deductible costs. Both direct and indirect costs related to the activities carried out in Norway may be deductible. In general, the same tax rules which apply for tax resident companies also apply for branches save for the 3 % rule on qualifying share income, which does not apply for branches.

There is no branch profit tax or other repatriation taxes. However, if assets and/or liabilities are transferred from a PE in Norway to the head office or another foreign PE of the same company, this may trigger exit taxation. The transfer of assets to another corporate entity is subject to regular taxation.

## Income determination

### Inventory valuation

Inventory is valued at cost. Cost is normally determined using the first in first out (FIFO) method. The last in first out (LIFO) method is not acceptable for tax purposes. Conformity between book and tax reporting is not required.

### Capital gains

Capital gains realised in the course of a business activity are almost always regarded as taxable income. Gains resulting from real estate transactions are taxed, regardless of whether they are incurred in connection with business activity. Losses may be offset against the taxpayer's other income.

Capital gains realised on both business-related and non-business-related securities are, in principle, taxable. In general, any capital gains realised on bonds at maturity are regarded as taxable income. Correspondingly, realised losses will be eligible for deductions.

### Tax exemption rules for corporate shareholders

Under the tax-exemption rules, corporate shareholders are generally exempt from tax on dividends received and capital gains on shares and on derivatives where the underlying object is qualifying shares. Correspondingly, losses on shares may, in general, only be offset against other share income and capital gains as comprised of by the said tax rules the year when the losses are incurred. All expenses related to exempt income from shares are fully tax-deductible. In order to limit the benefit of these deductions, the tax-exemption method is limited to 97% of the relevant income, and the remaining 3% is taxable for Norwegian corporate shareholders (at a 0.84% effective tax rate). The 3% taxable income is calculated on dividends and net gains/losses in the income year. Unused losses may not be carried forward.

Note that an investment in a company resident in a low-tax country in the European Economic Area (EEA) has to fulfil certain substance requirements to qualify for the tax-exemption rules. These requirements are intended to be in line with the substance requirements of the European Court of Justice's (ECJ's) decision in the Cadbury Schweppes case. A country is considered a low-tax country if the level of effective taxation is less than two-thirds of the tax that would have been due had the foreign company been resident in Norway. This is the same test used for the controlled foreign company (CFC) regime *(see the Group taxation section for more information).* The Directorate of Taxes has published a non-exhaustive list of low tax jurisdictions (black list) and non-low tax jurisdictions (white list).

However, for investments outside the EEA, the exemption applies only if a shareholder holds 10% or more of the share capital and the voting rights of the foreign company for a consecutive period of two years or more. To be able to deduct losses on realisation of shareholdings outside the EEA, the shareholder and/or a related party may not hold 10% or more of the share capital and the voting rights of the foreign company in a two-year period prior to the realisation. For dividends, the holding period of two years would not have to be met when dividends are distributed but may be met after the ex-dividend date.

Shareholdings in low-tax countries outside of the EEA do not qualify for the tax-exemption rules.

Acquisition and sales-related costs (e.g. broker fees) must be activated (i.e. added to the cost price of the shares for tax purposes). Costs incurred to manage acquired tax-exempt shares are, however, tax-deductible.

Norway's internal tax rules do not allow taxation of a non-resident's capital gain on disposal of financial instruments including, among others, shares in Norwegian companies, unless the non-resident has a PE to which the financial instrument may be allocated.

### Stock dividends

Stock dividends (bonus shares) are not taxable on receipt, provided that the dividends have been distributed in accordance with the Limited Liability Company Acts and distributed in proportion with the ownership level of the shares.

### Foreign income

A Norwegian resident company is subject to CIT on its worldwide income. Double taxation of foreign-source income, including foreign branch income and CFC income, is avoided either through tax treaties or domestic tax provisions. A deduction for foreign tax may either be claimed as an expense or as a credit against Norwegian tax payable on that income. In most circumstances, foreign dividends are exempt according to the tax-exemption rules. As a consequence, foreign withholding taxes (WHT) may not be credited and constitute a real cost for the companies concerned.

## Deductions

### Depreciation

For depreciation, the declining-balance method is mandatory. The depreciation rates given below are the maximum rates.

There is a duty to capitalise if the value of an asset subject to declining-balance method of depreciation is NOK 15,000 or higher and has an economic life of at least three years.

| Asset | Rate (%) |
|---|---|
| Office machines, etc. | 30 |
| Acquired goodwill/business value | 20 |
| Trucks, lorries, buses, taxicabs, vehicles for persons with disabilities | 20 |
| Cars, tractors, other vehicular machinery, instruments, fixtures and furniture, etc. | 20 |
| Ships, vessels, offshore rigs, etc. | 14 |
| Aircraft, helicopters | 12 |
| Construction for transmission and distribution of electric power and electronic equipment in a power company | 5 |
| Buildings and construction, hotels, hostels, inns, etc. | 4 (8)* |
| Office buildings | 2 |
| Fixed technical installations in buildings, including heating plant, cooling and freezing plant, electrical installation, sanitary installation, elevator, etc. | 10 |

* The applicable rate is 8% if, from the date of its erection, the structure has an economic life of 20 years or less.

Special depreciation rules apply to assets moved in and out of Norwegian jurisdiction to and from companies resident outside the EEA.

### *Goodwill*

Acquired goodwill may be depreciated according to the declining-balance method at a maximum of 20% per annum. The tax authorities have, however, on several occasions recently questioned the allocation to goodwill and claimed that a part of the purchase price should be allocated to brand and firm names, etc. (which may, as a rule, not be depreciated unless it is of a time-limited nature). Other intangibles are depreciable on condition that they are subject to an evident loss in value or if they are time-limited.

### *Taxes*

Real estate tax, as well as foreign income and capital taxes paid by the taxpayer, is deductible in determining corporate income. Foreign taxes are deductible only if they have not been credited against Norwegian payable tax.

### *Net operating losses*

Losses may be carried forward indefinitely. Losses incurred in the year of ceasing business may be carried back for a period of two years. If a loss is incurred in the next to last year, it may be carried back to the preceding year.

### *Payments to foreign affiliates*

Royalties and service fees paid to related foreign companies are fully deductible, provided they meet the arm's-length standard. There are no formal thin-capitalisation or income-stripping rules in Norway. In practice, the tax authorities require that the entity in question is able to service its debts. In addition, any loan terms should be comparable to those that would have been agreed upon by unrelated parties. Interest on financing, to the extent that these rules are not satisfied, may be regarded as dividends and thus non-deductible and, in addition, may be subject to Norwegian WHT.

## *Group taxation*

Income taxes are assessed on companies individually, not on a consolidated basis. This may be avoided through group contributions between Norwegian companies, provided common direct or indirect (including foreign) ownership and voting rights is more than 90%. Furthermore, the Norwegian group contribution rules are, under certain conditions, also applicable to branches of companies that are resident within the EEA. Note that group contributions are not deductible for companies engaged in oil and gas-producing activities subject to the Petroleum Tax Act.

Assets may be transferred tax-free between group companies at tax book value for tax purposes and at market value for financial book purposes. Payment in this respect must equal market value of the assets transferred for tax and financial book purposes. The same applies to payment in shares. If the transferee loses the affiliation with the tax group while still owning the transferred assets, the transferor will be taxed for the difference between the tax book value and the market value of the assets.

### *Transfer pricing*

In Norway, the arm's-length standard for related party transactions is incorporated into the Tax Act. The transfer pricing provision of the Tax Act makes reference to the Organisation for Economic Co-operation and Development (OECD) Guidelines; it is stated that the OECD Guidelines 'shall be taken into account' when addressing transfer pricing issues under Norwegian law.

Until recently, the resources of the Norwegian tax authorities were limited, and their interest tended to focus on intra-group services and the financing of operations. However, this has changed considerably as transfer pricing has increasingly become the focus of revenue attentions, and the resource issues have been addressed. Through extensive hiring and knowledge investments, the Norwegian tax authorities are rapidly becoming more sophisticated on transfer pricing issues. It is fairly common for the Norwegian tax authorities to pick test cases that are subject to substantial investment. Such cases may easily end up in court, as settlements are uncommon. During the most recent years, focus has been inter alia on business restructuring and commissionaire arrangements.

Norway does not yet have an advance pricing agreement regime. Nevertheless, it is becoming more common to discuss complex cases with the tax authorities in advance of implementation or before assessment. Furthermore, there are no safe harbour rules or any other official guidance of how to price specific transactions, etc. save for the arm's length principle.

### *Thin capitalisation*

There is no fixed debt to equity ratio requirement in Norwegian tax law. However, if Norwegian income from a subsidiary is reduced due to the affiliation between the Norwegian company and a foreign company, adjustments may be made under the arm's-length provisions. Generally, these provisions apply only if the company has obtained a larger loan from a group company than an independent credit institution would have granted, or if the agreed level of interest is higher than an independent credit institution would have required. As a rule of thumb, 25% to 30% equity is feasible. Naturally, this analysis will vary based on the actual company's credit worthiness, which would consist of several elements such as the nature of the business, financial status, future income possibilities, and group relationship. The company must also be able to service its debts.

If a Norwegian entity is regarded as being thinly capitalised, part of the entity's interest and debts will be reclassified to dividend and equity. Such dividend will not be covered by the participation exemption rules as they are not distributed in accordance with the rules and regulations of the Limited Liability Companies Acts.

### Controlled foreign company (CFC) regime
Norwegian residents are taxed directly for their allocable part of the profits from a CFC's income if the company is resident in a low-tax country, irrespective of whether income is distributed to the Norwegian investor. A low-tax country in this respect is a country where the assessed foreign income tax on the company's profits is less than two-thirds of assessed taxes calculated according to Norwegian tax rules as if the company had been a resident in Norway. A condition for such taxation is that 50% or more of the foreign company's shares or capital is held or controlled, directly or indirectly, by Norwegian taxpayers (alone or together), based on ownership status at the beginning and end of the income year in question.

Note that if Norwegian taxpayers own or control more than 60% of the shares or capital at the end of the income year, Norwegian control exists irrespective of the level of control at the beginning of the year. Norwegian control ceases to exist if Norwegian taxpayers own or control less than 50% of the shares or capital at both the beginning and end of the income year or less than 40% of the shares or capital at the end of the income year.

On condition that Norway has signed a tax treaty with the country involved and the company in question is covered by the treaty, the CFC rules will be applicable only if the income of the entity in question is mainly of a passive nature. Furthermore, CFC taxation may also be prohibited if the company in question is resident within the EEA and cannot be deemed as a wholly artificial arrangement as outlined in the ECJ's decision in the Cadbury Schweppes case. Hence, CFC taxation will be avoided for EEA companies that fulfil certain substance requirements.

## Tax credits and incentives

### Foreign tax credit
Norwegian limited liability companies that have paid taxes on foreign source income and wealth may offset the Norwegian tax against the tax paid on the same income or wealth in the source state. The Norwegian tax credit is limited to the tax paid on the same income and period in the other state. It is possible to carry forward credit for five years. Credit claimed in accordance with the regulations stated above, may not be used in addition with other rules and regulations. If credit is claimed in accordance with a tax treaty, it is not possible to claim credit according to the tax credit regulations stated above. These rules are very technical, and it should be noted that there are three different 'baskets' of income.

### Roll-over regulations
The Ministry of Finance has the authority to grant a tax relief in case of transfer of assets within a corporation upon application. The transfer may be carried out between group companies or partnerships with mainly the same owners. If a tax relief is granted, the transfer would not trigger any taxation at the time of the transfer, but all tax positions, including tax basis of the transferred assets, will be transferred to the acquiring company. A condition for the tax relief is normally that the companies remain within the group.

The Ministry of Finance also has the authority to grant a tax relief in case of reorganisation. The reorganisation must improve the efficiency of the business to qualify for tax relief; accordingly, administrative effects would not be sufficient. The tax relief must also ease the reorganisation. In addition, the tax relief must not erode the Norwegian tax base; the tax positions would be transferred to the new taxpayer.

Please note that the Norwegian government released a proposal for legislative changes in March 2011 suggesting a liberalisation of the roll-over regimes.

## *Withholding taxes*

Norway does not levy WHT on payments of royalties and interest except interest derived from primary capital certificates ('No. Egenkapitalbevis').

The internal WHT rate is 25%, which either may be reduced under the tax-exemption rules or an applicable tax treaty. To qualify for the tax-exemption rule, the recipient of the dividends has to be a corporate investor resident in an EEA country and also fulfil certain substance requirements. If these requirements are met, no dividend WHT is imposed.

### *Dividends*

| Recipient | Regular rate (%) | Parent/subsidiary rate (%) |
|---|---|---|
| Non-treaty | 25 | 25 |
| Treaty: | | |

8. Internal Norwegian WHT rate (i.e. 25%).
9. 15% of the capital.

## *Tax administration*

### *Returns*

The income tax year normally runs from 1 January to 31 December, with assessments being issued in early autumn of the following calendar year. Companies are liable for both advance payments and final settlements in the calendar year of assessment. Companies with a financial year other than the calendar year may, if they belong to a foreign group with a deviating accounting year, use the financial year of the group for tax purposes.

Companies are required to file their tax returns by the end of March in the year following their financial year. If filed electronically, the return must be filed by the end of May. Upon application, an extension of the time limit to file normally will be granted. The tax returns and the basic attachments are obligatory for all corporate taxpayers. Additional requirements might apply for specific business sectors, such as hydro power production. Under the petroleum tax regime, the filing deadline is end of April, regardless of whether filed electronically or not.

The annual assessment is made by five regional departments of tax authorities and independent, locally elected boards, which notify the taxpayer if taxable income is determined to deviate from what was submitted in the tax return.

### *Payment of tax*

Companies are required to make advance payments of tax on 15 February and 15 April in the year following the income year. The two payments should together cover all of the expected CIT to be assessed. Any balance must be paid three weeks after the assessment has been made public (i.e. in early autumn of the year following the relevant accounting year).

The above applies to all corporate taxpayers, except for taxpayers under the petroleum tax regime, where tax shall be paid in six instalments.

## Significant developments

There have been no significant corporate tax developments in Oman during the past year.

## Taxes on corporate income

As of 1 January 2010, the rate of income tax has been made uniform for all types of business entities, regardless of whether it is a corporate entity and/or whether it is registered or not.

The Income Tax Law seeks to tax worldwide income of entities formed in Oman and the Oman-source income of branches and other forms of permanent establishment (PE).

The income tax rate is as follows:

| Taxable profits (OMR*) | Rate (%) |
|---|---|
| First 30,000 | 0 |
| Over 30,000 | 12 |

* Oman rial

### Petroleum income tax

Special provisions are applicable to the taxation of income derived from the sale of petroleum. The tax rate specified for such companies is 55%. However, the tax rates are applied on income as determined by the individual Exploration and Production Sharing Agreement entered into between the government of Oman and the company engaged in the sale of petroleum. Under these agreements, the government pays the company's share of income tax from amounts withheld from the government's share of production. Therefore, the income tax is not actually borne by the company.

## Corporate residence

The term 'resident' is not defined in the tax law.

### Permanent establishment (PE)

PE is defined in very broad terms and includes places of sale, places of management, branches, offices, factories, workshops, mines, quarries, and building sites for construction. However, the mere use of storage or display facilities does not constitute a PE. The definition of PE references carrying on business in Oman, either directly or through a dependent agent.

Additionally, the definition stipulates that a total stay of 90 days during a 12-month period creates a PE in Oman. However, this 90 day period applies to rendering of consultancy services or other services only. Under this definition, while the sale of goods into Oman will not be deemed to be a taxable activity, a contract for the supply and installation of equipment is likely to attract tax. By the same criterion, services rendered by personnel visiting Oman will be treated as taxable activities, applying the 90 day rule.

## Other taxes

### Value-added tax (VAT)
There is no VAT or sales tax in Oman.

### Customs duty
Customs duty of 5% of cost, insurance, and freight (CIF) value applies to most non-GCC source goods. Exemptions apply for certain food items, medical supplies, etc.

### Excise taxes
There are no excise taxes in Oman.

### Property taxes
There are no property taxes in Oman.

### Transfer taxes
There are no transfer taxes in Oman.

### Municipal taxes
Municipal taxes apply to the following items:

- Property rents: 3%.
- Hotel occupancy: 5%.
- Leisure and cinema houses: 10%.

## Branch income

Branches of foreign entities (regardless of country) are subject to tax at the rate of 12% on income over OMR 30,000.

Rules for the deduction of head office expenses for branches are expected to be changed. New executive regulations providing guidance are expected.

## Income determination

### Inventory valuation
Inventory should be valued using a method that complies with International Accounting Standards.

### *Capital gains*
Gains on sales of securities listed on the Muscat Securities Market are exempt from taxation. A recent Supreme Court ruling held that gains on transfers of other assets are taxable as ordinary income.

### *Dividend income*
Dividends received from Omani entities are exempt from taxation. Foreign source dividends are taxable. Foreign source dividends are taxed as the same rates as corporate income.

### *Stock dividends*
There are no provisions in the tax law which address stock dividends.

### *Interest income*
Interest income is taxable as business income.

### *Rent/royalty income*
Rental income and royalties are taxed as business income.

### *Unrealised exchange gains/losses*
Unrealised exchange gains are not taxable. Similarly, any unrealised loss is not deductible from the total taxable income.

### *Foreign income*
Worldwide income of an entity formed in Oman is taxed in Oman. Credit for foreign taxes paid is given under the law; however, this may not exceed the amount of Omani tax payable on such income.

The Oman tax law does not contain rules on deferral of foreign income.

## *Deductions*

### *Depreciation*
Depreciation is taken on a straight-line basis on the following classes of assets at the annual rates shown.

| Asset | Rate (%) |
|---|---|
| Permanent buildings | 4 |
| Semi-permanent buildings | 15 |
| Docks, sea barriers in ports, pipelines, roads, and railway lines | 10 |
| Aircraft and ships | 15 |
| Hospital buildings, educational establishments, and equipment for scientific research | 100 |

The rate of depreciation allowed is doubled in the case of buildings used for industrial purposes.

The tax law now provides for calculation of depreciation on a net book value basis for the following class of assets. A ‘pooling’ concept has been introduced, whereby assets subject to same rate of depreciation may be pooled together for purposes of depreciation.

| Pool | Rate (%) |
|---|---|
| First pool is comprised of machinery and equipment, including computer software installations, furniture and fixtures, and vehicles | 33.33 |
| Second pool is comprised of drilling equipment | 10 |
| Third pool is comprised of 'other machinery and equipment' not included above | 15 |

### *Social security payments*
Social security contributions paid by employers in respect of employees may also be deducted.

### *Start-up expenses*
Expenses incurred before the commencement of business are allowed as a deduction in the first taxable year (or period).

### *Interest expenses*
Deduction of expenses incurred for the purpose of earning income is generally allowed. Interest expense is allowed for loans from unrelated parties or on loans from banks. Interest paid to related parties is allowed only to the extent the loan terms are at arm's length.

### *Charitable contributions*
Charitable donations are limited to specified institutions and organisations and are subject to an overall limitation of 5% of total income.

### *Meals, entertainment, officers compensation, etc*
All expenses incurred for the generation of gross total income are allowed. There are no specific restrictions on deduction for expenses like meals and entertainment, compensation for officers, and life insurance payments for employees. There are limits on the deductibility of directors' fees.

### *Illegal payments*
Payments of bribes or kickbacks, and other illegal payments, are not deductible.

### *Pension payments*
The law provides a deduction for contributions towards pension funds, subject to the executive regulations that are expected to be issued.

### *Fines and penalties*
Civil fines and penalties are not deductible.

### *Other significant items/restrictions on allowable expenses*
The tax law has imposed restrictions on the deductibility of certain expenses. The principal items affected are the following:

- Sponsorship fees paid to Omani sponsors are restricted to 5% of net taxable income before sponsorship fees. Net taxable income is determined after offsetting any losses carried forward.
- Charges or expenses allocated from the head office or other group companies are currently restricted to the lower of the following:
  - Expenses allocated to Oman operations.
  - Average of such expenses approved for the Oman operations during the three years immediately preceding the most recent taxable year subject to assessment.

  - 3% of the total income derived from Oman operations during the year subject to assessment. This percentage is increased to 5% in respect of branches of foreign banks and insurance companies and to 10% in respect of operations of major industrial companies that use the latest and most advanced production techniques, pursue scientific research, provide technical assistance, or use patents that require exchange of information and technical assistance with their associates. The Minister of Finance has discretionary authority to increase this percentage above 10%, but such authority is exercised very rarely.

  Executive regulations on head office expenses are expected to be issued. These regulations may change the treatment and percentages described above.
- Commissions paid by insurance companies are restricted to 25% of net premiums collected.
- Amounts charged to the profit and loss account for creating provisions in respect of bad debts, stock obsolescence, warranties, and similar types of contingencies are not tax deductible. Deduction is allowed only at the time of write-off. However, provisions created by licensed banks in respect of bad debts are allowable within the limits approved/required by the Central Bank of Oman.
- Leasing companies are treated at par with banks as far as deduction for loan loss provision is concerned. Leasing companies are allowed deductions for loan loss provisions subject to the limits or recommendations of the Central Bank of Oman.
- Losses arising on sale of investments listed on the Muscat Security Market are not allowed as a deduction from taxable income.
- Any expense or costs which have been incurred to generate income exempted from tax are not allowed as a deduction from taxable income.
- Amounts paid as tax consultancy or advisory fees are disallowed.

### Net operating losses
Carryforward of losses is limited to five years, except in the case of companies that incurred losses during a mandatory tax-exempt period, where the losses may be carried forward indefinitely for offset against future profits.

Carryback of losses is not allowed.

### Payments to foreign affiliates
Payments to foreign affiliates normally receive in-depth scrutiny from the tax authorities. Accordingly, proper documentation should be obtained in order to establish that these transactions are made at an arm's-length basis.

## Group taxation

Businesses are taxed as separate entities, and the tax law does not recognise group taxation.

### Transfer pricing regime
Transaction between related parties must be valued at arm's length. The tax law proposes to issue executive regulations that will define the transfer pricing policies.

### Inter-company payments
All inter-company payments are scrutinised in detail to ensure that the profits are not transferred to avoid payment of tax.

### Thin capitalisation
The tax law proposes to issue executive regulations that will define the thin capitalisation rules. Although there are no defined policies on thin capitalisation, the tax authorities review the terms of loans and interest payments in most cases.

### Controlled foreign company (CFC) regime
There is no CFC regime in Oman.

## Tax credits and incentives

### Foreign tax credit
Foreign taxes paid to a country with whom Oman has a double tax treaty (DTT) are eligible for a credit to the maximum of the Oman tax that would have been payable on such income. The tax payer is required to submit an application to the Secretariat General for Taxation to claim such credit.

### Exempt activities
Income from the principal activities listed below is exempt from tax, if an exemption is applied for and obtained.

- Industry and mining.
- Export of products manufactured or processed locally.
- Operation of hotels or tourist villages.
- Agriculture and animal husbandry and the processing of agricultural produce.
- Fishing and fish processing and aquaculture.
- University education, college or institutes of higher studies, private schools, nurseries, training colleges, and institutes.

The exemption is valid for a period of five years from the date of commencement of production or the practice of activities and may be made subject to such conditions as the Minister of Commerce and industry may specify. The exemption is renewable for a period not exceeding five years, subject to approval by the Financial Affairs and Energy Resources Council.

### Exempt incomes
The following income is exempt from income tax in Oman:

- Dividends received from an Omani company.
- Profits or gains on disposal of securities listed on Muscat Security Market.
- Omani marine companies, whether wholly owned by Omanis or with foreign and Omani ownership and registered in Oman, are exempt from tax. Foreign marine companies conducting activities in Oman through an authorised agent are exempted from tax with effect from the date of commencement of activity, provided that reciprocal treatment is afforded by the country of the foreign company.
- Income realised by foreign airlines carrying on business through establishments in Oman is exempt from tax. This exemption is limited to the extent of the income from operating airplanes for international transport, provided reciprocal treatment is accorded in the airline’s home country.
- Income realised by investment funds established in Oman under the Capital Market Authority Law or established overseas for dealing in shares and securities listed on Muscat Security Market is exempt.

- Foreign companies engaged in oil and gas exploration activities, while taxable under the law, normally have their tax obligations discharged by the government under the terms of the Exploration and Production Sharing Agreement.
- Foreign companies working for the government in projects deemed to be of national importance may be able to negotiate a tax protection clause whereby any tax paid by them is reimbursed by the government.

## *Withholding taxes*

As of 1 January 2010, certain changes to the categories that attract WHT were made.

Foreign companies that do not have a PE in Oman for tax purposes and that derive income from Oman in the nature of the following are subject to WHT at 10% of gross income from such sources:

- Royalty.
- Consideration for research and development (R&D).
- Consideration for use of or right to use computer software.
- Management fees.

Such WHT is required to be withheld by the Omani-based company and paid to the tax department within 14 days of the end of the month in which tax is deducted or payments are due or made to the foreign company.

There is no WHT on dividends and interest payments.

The term royalty has been defined under the law to include consideration for the use of intellectual property, including computer software, cinematography films, tapes, discs, or any other media, patents, trademarks, drawings, etc. The term further includes consideration for using industrial, commercial, or scientific equipment and consideration for information concerning industrial, commercial, or scientific experience or consideration for granting rights to exploit mining or other natural resources.

### *Double tax treaties (DTTs)*

The maximum withholding tax rates provided by the Oman DTTs are shown in the table below. The protocol to the DTT with the United Kingdom and the DTT with Croatia will enter into force in 2012. There are also agreements with various countries which are not yet in force.

| Recipient | Dividends (%) | Interest (%) | Royalties (%) |
|---|---|---|---|
| Algeria | 5 (3)/10 | 5 | 10 |
| Belarus | 5 | 5 | 10 |
| Brunei | - | - | - |
| Canada | 5 (1)/15 | 10 | 10 |
| China | 5 | 10 | 10 |
| Croatia | 0 | 5 | 10 |
| France | 0 | 0 | 0 |
| India | 10 (1)/12.5 | 10 | 15 |
| Iran | 10 | 10 | 10 |
| Italy | 5 (3)/10 | 5 | 10 |

| Recipient | Dividends (%) | Interest (%) | Royalties (%) |
|---|---|---|---|
| Korea | 5 (1)/10 | 5 | 8 |
| Lebanon | 5 (4)/10 | 10 | 10 |
| Mauritius | 0 | 0 | 0 |
| Moldova | 5 | 5 | 10 |
| Morocco | 5 (1)/10 | 10 | 10 |
| Pakistan | 10 (1)/12.5 | 10 | 12.5 |
| Seychelles | 5 | 5 | 10 |
| Singapore | 5 | 7 | 8 |
| South Africa | 0 | 0 | 8 |
| Sudan | - | - | - |
| Syria | - | - | - |
| Thailand | 10 | 10 (5)/15 | 15 |
| Tunisia | 0 | 10 | 5 |
| Turkey | 10 (3)/15 | 10 | 10 |
| United Kingdom | 5 (1)/10 | 0 | 0 |
| United Kingdom (protocol) | 0/15 (2) | 0 | 8 |
| Uzbekistan | 7 | 7 | 10 |
| Vietnam | 5 (6)/10 (7)/15 | 10 | 10 |
| Yemen | 5 | 10 | 10 |

Notes

1. 10% minimum shareholding required.
2. Distributions by Real Estate Investment Company/Fund.
3. 15% minimum shareholding required.
4. 20% minimum shareholding required.
5. Interest received by financial institutions (including insurance companies) or loans/debt claims guaranteed by the government of the source state.
6. 60% minimum shareholding required.
7. 25% to 60% minimum shareholding required.

## *Tax administration*

### *Returns*

The tax year is the calendar year. Assessments can be made on the basis of a year-end other than 31 December, provided permission is granted in advance by the Omani tax authorities and the company then adheres to the year-end on a consistent basis.

A provisional declaration of tax must be submitted in the prescribed form within three months from the end of the accounting period to which it relates. The final annual return of income should be submitted in the prescribed format within six months from the end of the accounting period to which it relates. Reasonable time extensions can be sought and are normally provided for filing the provisional and annual returns of income, but these do not defer payment of tax, which will be subject to additional tax at 1% per month from the due date to the actual date of payment.

In the case of companies having a paid-up capital in excess of OMR 20,000, the annual return of income should be accompanied by audited accounts signed by an auditor registered in Oman. The law requires accounts to be drawn up in accordance with the International Financial Reporting Standards (IFRS) consistently applied. It specifically provides for accrual accounting unless prior permission of the Secretary General of

Taxation (the Secretary General) has been obtained. The accounts must be submitted in local currency unless prior approval of the Secretary General has been obtained for submitting them in foreign currency.

Delay or failure in submitting the provisional or annual returns may attract a penalty of not less than OMR 100 and not more than OMR 1,000.

Failure to file the provisional or annual returns of income may result in an estimated profit assessment by the Secretary General.

Failure to submit audited accounts as required under the Law is deemed to result in an incomplete annual return of income and may attract an estimated profit assessment.

The law confers wide powers on the Secretary General for requesting information. Experience has shown that, notwithstanding the presentation of audited accounts, the tax department requests very detailed information and supporting documentation relating to revenue and expenses. Failure to provide such information or the provision of incorrect information can result in an additional assessment by the Secretary General and/or various penalties on the company and/or the officer responsible for providing the information.

### *Payment of tax*

Any tax estimated to be payable in respect of an accounting period should be paid with the provisional assessment and 'topped up' for any additional amount computed as payable following submission of the annual return of income. Failure to pay taxes by the due date attracts interest at the rate of 1% per month from the date on which such tax was due to the date of payment.

The difference between the amount paid and the amount assessed, subject to filing of an objection, should be paid within one month from the date of the assessment. The additional amount assessed attracts interest at the rate of 1% per month from the date on which such tax was due to the date of payment.

Under the Law, the Secretary General has the authority, with the approval of the Minister and the Tax Committee, to sequester and sell the assets of a taxable entity to recover the taxes due.

If decisive proof is presented to the Secretary General that any person has paid tax for any year exceeding the tax due and payable for such tax year as finally settled, such person has the right to recover the tax. However, if any tax has become payable by such person in respect of another tax year, the excess amount will be adjusted against the future tax liability. Any request for recovery must be presented within five years from the end of the tax year to which it relates.

Where the taxpayer fails to declare correct income in the tax return for any tax year, the Secretary General may impose a fine not exceeding 25% of the difference between the amount on the basis of the correct taxable income and the amount of tax as per the return submitted.

### *Statute of limitation*

The tax authorities have a period of up to five years from the end of the year in which a tax return is submitted to complete the assessment for that tax year. However where the entity has not submitted any tax return, the tax authorities have a period of ten years to complete the assessments.

### *Maintenance of records*
The Law requires accounting records and supporting documentation to be maintained for ten years after the end of the accounting period to which these records relate.

### *Objections and appeals*
A company has a right to object to any assessment issued by the Secretary General. The objection document should be prepared in writing (in English and in Arabic) and filed with the office of the Secretary General for Taxation within 45 days from the date of assessment. The Secretary General is required to give a judgment within five months, extendable up to another five months at the Secretary General's discretion, from the date of receiving the objection. The tax demanded may be kept in abeyance on request. No additional tax is payable until the Secretary General issues the judgment.

## Significant developments

The following significant developments in corporate taxation have recently occurred in Pakistan:

- The exemption of gain on the sale of listed securities has been withdrawn.
- Records are now required to be maintained for six years instead of five years.
- The rate of corporate tax for small companies has increased to 25% from 20%.
- Banks are now required to collect tax on certain other cash transactions, in addition to those already identified.

## Taxes on corporate income

A resident company is taxed on its worldwide income. The federal corporate tax rates on taxable income are as follows:

| Company type | Tax rate (%) |
|---|---|
| Banking company | 35 |
| Public company other than a banking company | 35 |
| Any other company | 35 |
| Small company *(see the Tax credits and incentives section for more information)* | 25 |

The term 'public company' implies a company listed on any stock exchange in Pakistan or one in which not less than 50% of the shares are held by the federal government or a public trust.

In the case of a modaraba (*see the Income determination section for a definition*), income, except relating to trading activities, is exempt from tax, provided that 90% of its profit is distributed to the certificate holders as cash dividends.

The final tax regime (FTR) for resident taxpayers, a presumptive tax scheme where taxes are withheld at the source on the sale of goods and execution of contracts or collected at the time of import (for other than industrial raw materials), is considered a final tax liability in respect of income arising from the sale, contract, or import.

In the case of exports, tax collected at the time of realisation of foreign-exchange proceeds is treated as final tax for that income.

The FTR is also applicable to non-resident taxpayers, at their option. However, it is only applicable in cases of receipts on account of the execution of a contract for construction, assembly, or installation, including a contract for the supply of management activities in relation to such project as well as certain contracts for services and contract for advertisement services rendered by TV satellite channels.

## *Corporate residence*

A company is resident in Pakistan if it is incorporated or formed by or under the law of Pakistan or if the control and management of its affairs is situated wholly in Pakistan in that year.

The term 'company' includes a trust, a cooperative society, a finance society, or any other society established or constituted by or under any law; a corporate body incorporated outside Pakistan; and any foreign association, incorporated or unincorporated, which the Central Revenue authorities may declare to be a company.

## *Other taxes*

### *Value-added tax (VAT)*

VAT (locally termed as 'sales tax') is ordinarily levied at 17% on the value of goods, unless specifically exempt, after allowing related input credits. Telecommunication services are levied VAT at the rate of 19.5%.

Significant zero-rated goods are as follows:

- Supplies and repair and maintenance of certain ships and aircrafts.
- Supplies to diplomatic missions and diplomats.
- Supplies against international tenders.
- Supplies of raw materials, components, and goods for export processing zones.
- Supplies of locally manufactured plant and machinery to export processing zones and supplies of certain specified machinery to exploration and production sector.
- Supplies to exporters.

Significant exemptions are as follows:

- Live animals and poultry.
- Live plants.
- Vegetables, pulses, fruits, certain spices, sugar cane, edible oils, etc.
- Milk preparations.
- Newsprints, newspapers, journals, periodicals, and books.
- Computer software.
- Certain special purpose vehicles.
- Aircrafts.
- Specified ships.
- Certain specified machinery.
- Agricultural produce not subjected to any process.

### *Excise duty*

Federal excise duty is levied on certain types of manufacturing, import of goods, and rendering of services.

### Customs and import duties
Custom and certain other duties are collected at import stage at varying rates classified under Harmonized System (HS) Code.

### Property taxes
Property owners are required to pay property tax levied and collected by provincial governments at varying rates.

### Stamp duty
In the case of sale or transfer of immovable property, stamp duty is payable (with varying rates on the basis of location of the property) on the value of the property.

## Branch income

The rates of tax for a branch of a company incorporated outside Pakistan are the same as those applicable on resident companies, other than public and banking companies. Tax at the rate of 10% is levied on the transfer of profits to the head office, with an exception for companies engaged in oil and gas exploration and production business.

Payments to a branch in Pakistan of a non-resident are subject to deduction of tax at the source, on the same basis as a resident in the case of sale of goods, rendering of professional services, and execution of contracts. In other circumstances, a reduced/0% withholding rate certificate can be obtained from the Commissioner of Income Tax.

Pakistan has signed agreements for avoidance of double taxation with over 60 countries.

## Income determination

### Inventory valuation
Inventories are to be stated at the lower of cost or market. The first in first out (FIFO) and average methods are accepted. Conformity of methods used for book and tax reporting is desirable, and the method used should be consistently applied.

### Capital gain
Capital gain on the sale of immovable property, on which depreciation is not allowed, is not taxable.

Gain on the disposal of shares of a resident company or a non-resident company, whose assets wholly or principally consist of immovable property situated in Pakistan or rights to explore/exploit natural resources in Pakistan, shall be Pakistan-source income.

Capital gains on the sale of shares of public companies or modaraba (profit sharing) certificates are exempt from tax if held for a period of more than 12 months. Capital gains on shares and modaraba, if held for less than 12 months, are taxable under two categories, (i) held for less than six months and (ii) held for more than six months but less than 12 months at 7.5% and 10% to be gradually enhanced to 17.5% and 10% by 2015.

Capital gain, other than on statutory depreciable assets, realised within one year of acquisition is fully taxed; after one year, 75% of such gains are taxed and 25% are exempt.

Capital gains on statutory depreciable assets (other than immovable property) are chargeable to tax as normal business income in the year of sale. They are measured as the difference between the sale proceeds and the tax written-down value of the relevant asset sold.

In the case of an asset disposal transaction that is on a non-arm's length basis, fair market value of the asset shall be taken to be the consideration received by the seller, as well as the cost for the buyer.

Where assets are transferred outside Pakistan, the original cost is treated as the sale price, which means that the entire depreciation is recaptured at the time of export, except if the assets are used in oil or gas exploration, in which case only the initial depreciation is recaptured.

No gain or loss shall be taken to arise on disposal of an asset by a resident company to another resident company, if certain conditions are met. The required conditions include, inter alia, that the transferor is 100% owned by the transferee or vice versa or both companies are 100% owned by a third company, and the transferee income is not exempt in the year of transfer. The scheme of arrangement is approved by the Securities and Exchange Commission of Pakistan or State Bank of Pakistan.

Any distribution to the shareholders of a company to the extent that it relates to undistributed profits is treated as a dividend.

Capital loss can be offset only against capital gains. Unabsorbed capital loss can be carried forward for adjustment against capital gains for six years.

### *Dividend income*
Dividend income is subject to tax withholding of 10% or a lower tax treaty rate.

The deduction at source shall be the full and final discharge of tax liability on dividend income.

### *Stock dividends*
Stock dividends declared by resident companies are exempt from tax.

### *Income from royalties and fees for technical services (FTS)*
Royalties received by non-residents are deemed to accrue or arise in Pakistan and are taxable if paid by a resident in Pakistan or borne by a permanent establishment (PE) of a non-resident in Pakistan.

Income from 'fees for technical services' (FTS) is deemed to accrue or arise in Pakistan if paid by a resident in Pakistan or borne by a PE of a non-resident in Pakistan. FTS means any consideration for the rendering of any managerial, technical, or consultancy services (including the provision of the services of technical or other personnel), but does not include consideration for any construction, assembly, or like project undertaken by the recipient or consideration that would be income of the recipient chargeable under the head salary.

### *Other significant items*
Liabilities allowed as a tax deduction in a tax year and remaining unpaid for three subsequent years are deemed to be income in the first tax year following the said three years. Such items are then allowed as a deduction in the year the liability is discharged.

Agricultural income is exempt from income tax.

### *Foreign income*

A resident company is taxed on its worldwide income and on its foreign income as earned. Double taxation of foreign income is avoided by means of foreign tax credits; this relief is allowed to the resident company on the doubly taxed income at the lower of the Pakistan or foreign tax rate. Undistributed income of a non-resident subsidiary is not subject to tax.

Foreign loss can only be offset against foreign income and can be carried forward for six years.

### *Modaraba*

Modaraba (profit sharing) is a financing vehicle which enables a management company to control and manage the business of a modaraba company with a minimum of 10% equity participation. The management company is entitled to remuneration based on an agreed percentage (but not exceeding 10%) of annual profits of the modaraba business. A modaraba can be for a specific purpose or many purposes and for a limited or unlimited period. The income of a modaraba not relating to trading activity is free from tax if 90% of its profits are distributed as cash dividend.

## *Deductions*

### *Depreciation*

Normal depreciation is allowed at the following prescribed rates by applying the reducing-balance method.

| Assets | Rate (%) |
|---|---|
| Buildings | 10 |
| Furniture | 15 |
| Machinery and equipment, including motor vehicles and ships | 15 |
| Computer hardware, including monitors and printers | 30 |
| Aircraft and aero engines | 30 |
| Below-ground installations in mineral oil concerns | 100 |
| Offshore platform | 20 |

All depreciable assets put into service for the first time in Pakistan during a tax year, other than road transport vehicles not plying for hire, furniture including fixtures, plant, and machinery used previously in Pakistan, or plant and machinery for which a deduction has been allowed under another section of this ordinance, for the entire cost of the asset, shall be entitled to an initial allowance at 50% of the cost of the asset.

Book depreciation need not conform to tax depreciation. Unabsorbed tax depreciation not set off against the income of the year is carried forward and added to depreciation of the assets of the same business in the following year. Tax depreciation can be carried forward without limit until fully absorbed.

### *Organisational and start-up expenses*

Expenditure incurred before the commencement of a business wholly and exclusively to derive income chargeable to tax can be deducted over a period of five years.

### Intangibles

The cost incurred on acquisition of a patent, invention, design or model, secret formula or process, copyright, software, quota, license, intellectual property or other like property or right and any expenditure that provides an advantage or benefit for a period of more than one year is allowed as deduction on a straight-line basis over the useful life of the asset, but not exceeding a period of ten years.

### Taxes

Taxes on income are not deductible. Sales tax and excise tax are tax deductible where these are to be absorbed by the business; otherwise, these are passed on to the consumer.

### Other significant items

The deductibility of a head office expenditure of a non-resident taxpayer is limited to the same proportion of total head office expenditure as the Pakistan turnover has with the total world turnover. However, such domestic rules are overridden if the branch is a tax resident of a country having an agreement for avoidance of double taxation (treaty) and that treaty provides a different basis.

Expenditure on scientific research incurred in Pakistan wholly and exclusively for the purpose of deriving income chargeable to tax is an allowable expenditure.

Exchange gains and loss on foreign currency loans specifically obtained for acquiring an asset are adjusted against the depreciable cost of the asset.

Any lease rental incurred by a person in the tax year to a scheduled bank, financial institution, approved modaraba, or approved leasing company shall be a deductible expense. However, financial charges paid for the above-mentioned leases are added back into the taxable income of the company.

### Net operating losses

Operating loss may be carried forward and set off against the profits of the succeeding six years of the same business in which the loss was incurred. Unabsorbed depreciation can be carried forward indefinitely.

Carried forward loss of an entity in the case of group relief cannot be utilised if the ownership of the holding company is reduced to less than 55% and 75% if one of the companies is a listed company or none of the companies is a listed company, respectively.

Business loss can be carried forward up to a period of six years in the case of the amalgamation of two companies, with the condition that the same business is continued for a minimum period of five years.

Carryback of loss is not permitted.

## Group taxation

A locally incorporated holding company and subsidiary of a 100% owned group may be taxed as one group by giving an irrevocable option for taxation as one fiscal unit. The relief is not available for losses prior to formation of the group. The group is available if the companies are designated as entitled to avail group relief by the Securities and Exchange Commission of Pakistan.

Any company that is the subsidiary of a holding company may surrender its loss for the year to its holding company or its subsidiary, or between another subsidiary of the holding company, provided that the holding company holds directly 55% or more capital of the subsidiary, if one of the companies is a listed company. However, if none of the companies is a listed company, the holding requirement is 75% or more. The loss can be surrendered for a maximum of three years, and the required holding is for at least five years.

### Transfer pricing
The tax authorities have the power in respect of a transaction between associates to distribute, apportion, or allocate income, deductions, or tax credits between such associates to reflect the income that would have been realized in an arm's-length transaction.

### Thin capitalisation
Where a foreign-controlled resident company (other than a financial institution or a banking company) or a branch of a foreign company operating in Pakistan has a foreign debt to foreign equity ratio in excess of three to one at any time during a year, a deduction shall be disallowed for the profit on debt (interest) paid by the company in that year on that part of the debt which exceeds the three to one ratio.

## Tax credits and incentives

Any relief from Pakistani income tax which is provided in any other law and not provided for in the Income Tax Ordinance or a treaty is not valid.

### Tax exemptions
Profits and gains derived from an electric power generation project set up in Pakistan are exempt from tax.

Profits and gains derived by a company from the export of computer software, information technology (IT) services, or IT enabled services are exempt from tax through 30 June 2016.

### Small companies
Activities of small companies are encouraged with a reduced income tax rate of 25%.

A small company has been defined to mean a company which:

- is registered on or after 1 July 2005 under the Companies Ordinance, 1984
- has a paid up capital plus undistributed reserves not exceeding 25 million Pakistani rupees (PKR) (USD 0.298 million)
- has an annual turnover not exceeding PKR 250 million (USD 2.976 million), and
- is not formed by splitting up or the reconstitution of business already in existence.

### Foreign tax credit
Where a resident taxpayer derives foreign source income on which foreign income tax is paid within two years from the year in which it is derived, the taxpayer is allowed tax credit equal to the lower of (i) the foreign income tax paid or (ii) the Pakistan tax payable in respect of that income. However, foreign tax paid is not refundable.

## *Withholding taxes*

Withholding tax (WHT) on payments of royalty and FTS, when royalty or FTS is not attributable to a PE in Pakistan, is 15% or a lower treaty rate, of royalty or gross fees. The tax withheld would be deemed to be the final tax liability of the non-resident. In the case of a non-resident where royalty or FTS is attributable to a PE in Pakistan, the amount of royalty/FTS shall be chargeable to tax as normal income, and withholding on payments can be avoided subject to approval of the commissioner. If a reduced rate is available in a tax treaty, such rate would be applicable.

Resident corporations making certain types of payments must withhold tax as follows:

| **Recipient (1, 2, 3)** | **Dividends (%)** | **Interest (%)** | **Royalties (%)** |
|---|---|---|---|
| Resident individuals | 10 | 10 | N/A |
| Resident corporations | 10 | 10 | 0 |
| | | | |
| Non-resident individuals: | | | |
| Non-treaty | 10 (10) | 10 | 15 |
| Treaty | 10 (10) | (4) | (4) |
| Non-resident corporations: | | | |
| Non-treaty | 10 | (5) | 15 |
| Treaty: | (6) | (7) | |
| Austria | 10 | (8) | 20 |
| Azerbaijan | 10 | 10 | 10 |
| Bahrain | 10 | 10 | 10 |
| Bangladesh | 10 | 15 | 15 |
| Belarus | 10/15 | 10 | 15 |
| Belgium | 10 | 15 | 15/20 |
| Bosnia and Herzegovina | 10 | 20 | 15 |
| Canada | 10 | 25 | 15/20 |
| China | 10 | 10 | 12.5 |
| Denmark | 10 | 15 | 12 |
| Egypt | 15/30 | 15 | 15 |
| Finland | 12/15/20 | 10/15 | 10 |
| France | 10 | 30 | (9) |
| Germany | 10 | 10/20 | 10 |
| Hungary | 10 | 15 | 15 |
| Indonesia | 10 | 15 | 15 |
| Iran | 5 | 10 | 10 |
| Ireland, Rep. Of | 10 | (8) | (9) |
| Italy | (8) | 30 | 30 |
| Japan | 3.75 | 0/30 | (9) |
| Jordan | 10 | 10 | 10 |
| Kazakhstan | 10 | 12.5 | 15 |
| Korea, Rep. Of | 10 | 12.5 | 10 |
| Kuwait | 10 | 0/10 | 10 |
| Lebanon | 10 | 10 | 7.5 |
| Libya | (8) | (8) | (8) |

Notes

1. This table is a summary only and does not reproduce all the provisions that may be relevant in determining the application of WHT in each tax treaty.
2. Resident and non-resident imply tax status.
3. Individuals and companies are required to render annual returns of income and pay tax at the applicable rates. Credit is given for WHT deducted.
4. WHT rates for interest and royalties given to non-resident corporations (treaty countries) also apply to non-resident individuals.
5. The WHT rate for companies would be 30%.
6. The following remarks for dividends should be noted:
   - The intercorporate rate of tax on dividends received by a foreign corporation is 10%; corresponding treaty WHT rates in excess of 10% have been specified.
   - The rates given in the table for treaty countries relate to recipient corporations. The maximum rate, as stated above, in respect of intercorporate dividends is 10%. The lower rates are expressly provided in respect of dividends paid to a parent/associated corporation that has a certain minimum holding in a Pakistan industrial undertaking. The level of holding are noted:
     - Japan: 33.33%
     - United States: 50%
7. Certain treaties provide for tax exemption of interest paid to the government or the central bank of the contracting state and on foreign loans specifically approved by the federal government.
8. No concession is provided under the treaty.

9. A fair and reasonable consideration for royalties is exempt from tax, provided the recipient does not have a PE in Pakistan.
10. Intercorporate dividend where companies are entitled to group relief is exempt.

## Tax administration

### Returns and assessment

All companies are required to file an income tax return each year by 31 December for the preceding financial year (1 July through 30 June) by accounting for business income on an accrual basis. Tax authorities are empowered to approve a special year-end. If the special year ends on 31 December, then the tax return is required to be filed by 30 September following the year-end.

An across-the-board self-assessment scheme is in place whereby assessment is taken to be finalised upon filing of the return. The Commissioner, however, has powers to amend the assessment if it is believed that the ordinance has been incorrectly applied or there is definite information that the assessment made is incorrect. These powers are to be exercised within a prescribed time frame. In the case of transactions between associates, the Commissioner can substitute the transaction value with the fair market consideration. The Commissioner is also empowered to determine tax liability according to the substance of the transaction, disregarding formal arrangements between the parties.

### Payment of tax

Companies are required to pay advance tax on the basis of tax liability of the immediately preceding tax year in respect of their income (excluding capital gains and presumptive income). The advance tax is to be paid after adjusting the taxes withheld at source (other than the tax withheld relating to final tax regime).

Advance tax is required to be paid in four quarterly instalments on or before 15 September, 15 December, 15 March, and 15 June in each financial year. Credit for tax paid in a tax year shall be allowed against tax liability of that year.

The total tax liability is to be discharged at the time of filing the return of income.

Advance taxes and taxes withheld are adjustable against the tax payable with the return of income.

## Other issues

Special rules are applicable for computation of income from exploration and production of petroleum, mineral deposits, insurance business, and banking business.

## Significant developments

Significant developments on taxation issues, mostly initiated after the second quarter of 2009, have taken place under the Administration of Panama's President Martinelli.

As of May 2011, Panama has in force two double taxation treaties to avoid double taxation: with Mexico and Barbados. A treaty to exchange information with the United States has also entered into force this year. There are several other tax treaties to avoid double taxation approved by the National Deputies Assembly, which may come into force in the near future. These tax treaties have been signed with Italy, Luxembourg, The Netherlands, Portugal, Qatar, Singapore, South Korea, and Spain.

As of April 2011, loans to shareholders are deemed dividend distributions subject to a 10% withholding tax (WHT).

## Taxes on corporate income

Panamanian income tax is levied based on the territoriality principle.

As of 1 January 2011, corporations are subject to income tax at a fixed rate of 25%. Certain businesses and the related parties that render services to them will be subject to a 30% tax rate until 31 December 2011. Beginning on 1 January 2012, this tax rate will be reduced to 27.5%; and on 1 January 2014, it will be reduced even further to 25%.

The higher tax rate (i.e. the 30% rate) applies to either the generation or distribution of energy, telecommunication services in general, insurance, reinsurance, financial institutions regulated by Law No. 42 of 2001, cement industries, the operation and management of gambling games, mining in general, and entities dedicated to banking activities in Panama.

For companies in which the state owns more than 40% of the stock, the tax rate will remain at 30%.

The tax base (i.e. amount to which the tax rate will apply) for companies whose taxable income is greater than 1,500,000 US dollars (USD) is the greater of:

- net taxable income calculated on the normal basis
- 4.67% of the gross taxable income (excluding exempted and non-taxable income and foreign-source income) – this is called the alternate calculation of income tax (Calculo Alternativo del Impuesto sobre la Renta or CAIR).

If the entity's tax year results in a loss due to the alternative calculation, the taxpayer may request to the Tax Administration (the General Directorate of Revenues, i.e. Dirección General de Ingresos or DGI) not to be subject to the CAIR.

The taxpayer may also request not to apply the CAIR if its effective income tax rate is higher than the applicable income tax rate (25% since January 2011). Here is an example of such an instance:

| | | |
|---|---|---|
| **Net taxable income** | | |
| a | Total revenues | 2,000.00 |
| b | Deductible costs and expenses | 1,950.00 |
| c | Net taxable income | 50.00 |
| **CAIR** | | |
| d | Presumptive net taxable income (4.67*a) | 93.40 |
| e | Income tax (25%*d) | 23.35 |
| **CAIR effective tax rate** | | |
| f | Presumptive income tax (e) | 23.35 |
| g | Net taxable income (c) | 50.00 |
| h | Effective tax rate (f/g) | 46.70% |

The DGI has a six-month period within which to reach a decision on such requests, otherwise the petition will be considered as granted.

## *Corporate residence*

A company is considered as a tax resident when it has been incorporated in Panama, regardless of where the main office is located or whether central management is exercised in Panama or abroad. Entities incorporated abroad may also be registered with the Tax Administration in order to avoid WHT.

Since the Panamanian income tax is levied based on the territoriality principle, Panamanian-source income is subject to taxation whether it is received by a resident or non-resident entity. Residency is only relevant to determine if the entity is subject to WHT or not.

### *Permanent establishment (PE)*

Panama does not have formal PE rules. Under tax treaties signed, Organisation for Economic Co-operation and Development (OECD) rules will be applicable once treaties are in force.

## *Other taxes*

### *Franchise tax*

Franchise income tax must be paid by all corporations on an annual basis (USD 300 per year). The deadline for payment depends on the date of incorporation of the company. If the company was incorporated on any date during the first six months of the year, the due date for payment will be on 15 July of each year. If it was incorporated in the last six months, the due date will be 15 January of each year.

Non-profit organisations, cooperatives, and civil partnerships are not subject to franchise tax.

### *Movable goods and services transfer tax (ITBMS)*
The movable goods and services transfer tax (ITBMS) is the Panamanian value-added tax (VAT).

The general tax rate is currently 7%.

Alcoholic beverages are taxed at 10%, and tobacco and tobacco-derived products are taxed at 15%.

ITBMS is calculated on the value-added through a method of tax credits (i.e. ITBMS paid on transactions to produce taxable transactions) and tax debits (i.e. ITBMS collected on transactions).

Exports are not taxed, and the ITBMS paid to generate the exports may be refunded. The sale of goods such as medicines, foods, and certain products for babies are not taxed and may allow the supplier to recover the ITBMS as an exporter if certain criteria is met.

Medical services and transportation among other services are not taxed but do not produce ITBMS credit for the supplier.

### *Excise tax (selective consumption tax)*
The selective consumption tax is applied to goods (e.g. jewellery, expensive automobiles, guns, tobacco, alcoholic beverages) and services (e.g. mobile, cable TV, satellite TV) that are considered as non-essential. The tax base is the cost, insurance, and freight (CIF) price plus import duties for imported items and sales price for all other activities. The tax is levied at only one stage: on the importation of the taxed products; the sale of taxed goods produced in Panama; and for services, when the service is invoiced, the service is completely rendered, or upon receipt of advance payments, whichever first occurs.

Different tax rates apply depending on the type of service or good, with a minimum of 5% on sodas and 100% on tobacco products.

### *Customs duties*
All goods introduced into the Panamanian territory from another country are subject to customs duties. The duty rates are provided by the Panamanian Customs and Tariffs Office.

Customs duties may only be assessed by authorised customs brokers.

### *Local municipal tax*
Local municipal tax is charged based on the gross income generated by the business through the corresponding accounting period; it also depends on the type of activity being conducted by the corporation. In most cases, it cannot exceed USD 1,000 per month for each activity performed.

### *Operations notice tax*
The notice of operations is an annual tax on equity at a rate of 2%, with a minimum tax amount of USD 100 and a maximum tax amount of USD 60,000. In the case of free

zones or special trade areas, the tax will be calculated at a rate of 1% up to a maximum tax amount of USD 50,000.

The tax base is the outcome from total assets less total liabilities (excluding liabilities with related parties abroad).

### *Stamp duty*
Stamp duty is charged at a rate of USD 0.10 per USD 100 (or fraction thereof) of value on non-ITBMS taxed transactions.

## *Branch income*

For tax purposes, branches are considered separate entities from the head office and must therefore keep accounts separately and will have separate tax liability.

Branches located within the Panamanian territory must pay dividend tax through definitive WHT of 10% of net taxable income generated by the Panamanian branch, less all income taxes paid by the same corporation in Panama. This amount will be paid jointly on filing the corresponding income tax return.

## *Income determination*

Under the territoriality principle, the following will not be considered as taxable income: all income produced outside Panama, all income generated from operations or services performed outside the Panamanian territory, distribution of dividends from income not generated within the Panamanian territory.

### *Inventory valuation*
Inventory should be valued at the start of any business and subsequently at least once every accounting period. All assets must be put together, depending on their nature, and indicate different aspects such as: the unit of measurement, the name of the asset, the price of the unit, and the total value of units. Reference to the accounting records should also be included.

Inventories are generally stated at cost and can be valued using the compound average cost method, first in first out (FIFO) method, retailer method, or specific identification method. Since all entities must keep legal records, any adjustment resulting from using different methods of inventory valuation for tax purposes and financial purposes should be recorded and must be reported to the proper authorities. Once a taxpayer adopts a method, they must maintain it for at least five years.

### *Capital gains*
The transfer of real estate property and securities is subject to WHT on the gross transactions amount, but the taxpayer may make a special income tax assessment to pay the capital gain and may request a rebate of the difference between the WHT and the capital gain.

In the case of the transfer of real estate property, a 2% real estate transfer tax plus a 3% income tax advance payment must be remitted (done over the gross transaction amount or the cadastral value, whichever is greater). The 3% may be deemed definitive; contrariwise, the tax will be assessed at 10% of the gain and the 3% of the advance payment will be credited. Any amount in excess may be subject to rebate.

The rates as described in the table below will be applicable to the transfer of real estate if:

- the transferor's core business is the sale of real estate with new constructions
- it is the first transfer of the real estate after the new construction is built
- the construction permit was issued after 1 January 2011, and
- the land value was appraised within the last two years prior to the transfer.

| New housing construction | Rate (%) |
|---|---|
| Up to USD 35,000 | 0.50 |
| From USD 35,000 up to USD 80,000 | 1.50 |
| Greater than USD 80,000 | 2.50 |
| New commercial construction | 4.50 |

When transferring new housing real estate with new constructions, the real estate transfer tax (2%) does not apply.

If the first criterion is met but any of the other criteria needed to apply for the special tax rate table are not met, then the income tax will have to be assessed under the ordinary regime.

The transfer of securities is subject to a 5% WHT, and the tax rate on capital gain is 10%. The law establishes the application of a 5% WHT that will be applied by the buyer. The seller may accept the WHT as definitive or perform the calculation of the gain, apply the rate of 10%, and deduce the applied WHT. In case the WHT is superior, the taxpayer can choose to claim the return of payments made in excess.

Example:

| | |
|---|---|
| Sales price (a) | 1,000 |
| Cost (b) | 900 |
| Benefit (c) | 100 |
| WHT at 5% of (a) | 50 |
| Tax at 10% of (c) | 10 |
| Payment in excess | 40 |

The sale of fixed assets is subject to 10% on the capital gain, and there is no WHT.

### *Dividend income*

Panamanian legislation establishes that distribution of dividends is subject to definitive WHT, applied at the moment of distribution. Generally, dividends are subject to income tax at a rate of 10% without taking into consideration the form of payment, types of stock, assets, or money.

Dividend tax applies at a 5% rate on dividends paid from foreign source income, from income derived from exports, as well as exempt income from banking account interests and interests and earnings derived from securities issued by the government.

Free zone users are taxed at a 5% rate as well for local source income.

Loans to shareholders are deemed a dividend distribution, subject to a 10% withholding even in the cases where the 5% tax rate applies.

Notwithstanding the aforementioned, if the entity's shares are issued to bearer, they will be subject to dividend tax at a rate of 20%.

Dividend tax is levied if the entity meets one of the following criteria: (i) requires an operation permit to operate in Panama, (ii) requires an operation key to operate at the Colon Free Zone; (iii) is established in a Fuel Free Zone; (iv) is established in a free zone or special zone; (v) produces Panamanian-source taxable income. Dividend tax also does not apply to dividends paid on income received as a dividend if the entity is not required to withhold dividend tax or if the entity withheld the tax.

A complementary tax applies each tax year that the entity distributes less than 40% of the net profits after income tax. The complementary tax is an advance payment of the dividend tax, calculated on the difference of the distributed dividends and 40% of the net profits after income tax and applies the corresponding tax rate. If complementary tax is paid, then the entity may offset the paid complementary tax with the dividend tax when the corresponding dividend is decreed.

### *Inter-company dividends*

The distribution of dividends derived from income received as dividends from other entities is not subject to income tax or dividend tax as long as the entity that paid the dividend in the first instance was exempt from withholding any dividend tax, or if it was required to, made the corresponding withholding.

### *Foreign income*

Panamanian resident companies are taxed on their income generated within the Panamanian territory. Any other income generated abroad will be exempt from income tax payment but may be subject to dividend tax.

## *Deductions*

Taxable income is determined by deducting from the Panamanian source income all costs, expenses, and non-taxable income applicable and permitted by law. The deductibility of costs and expenses depend on the relation of such costs and expenses with the generation or preservation of income source. Special restrictions apply to the following:

- Bad debts.
- Depreciation.
- Donations.

Costs and expenses related to non-taxable income are not considered as deductible. Thus, the taxpayer must split the expenses and costs related to taxable transactions from those related to non-taxable transactions. As of 1 July 2010, the expenses and costs allocated to taxed transactions may not exceed the amount from multiplying the portion of taxable income from the total income by the total costs and expenses. The following deductions are not subject to the deductions cap: deductions on bad debts, donations to the State and non-profit organisations and education institutions (limited to 1% of the taxable income).

### *Depreciation and depletion*
The straight-line and sum-of-the-years-digits methods of depreciation are allowed.

| Assets | Straight-line (%) |
|---|---|
| Buildings | $3^{1/3}$ as maximum |
| Machinery and equipment | 33 as maximum |
| Furniture and fixtures | 33 as maximum |
| Vehicles | 33 as maximum |

In the case of mines, depletion will be deductible during its useful life or depending on the state contract methodology

### *Net operating losses*
Losses incurred by common taxpayers may be carried forward and deducted from the taxable profits for the following five years, at a rate of 20% each year, but limited to 50% of taxable income. Loss carrybacks are not allowed, and losses are not allowed for estimated income tax purposes.

### *Payments to foreign affiliates*
A payment to a foreign entity (including affiliates) in a foreign country will be subject to WHT anytime it represents a cost or expense for the payer. The tax base will be 50% of the remittance, and the income tax rate applicable is 25% as of 1 January 2011.

## *Group taxation*

In Panama there are no group taxation rules.

### *Transfer pricing*
Transfer pricing rules are applicable only if a tax treaty to avoid double taxation is in use.

### *Thin capitalisation*
There are currently no thin capitalisation rules in Panama.

## *Tax credits and incentives*

### *Free zones*
Entities established in free zones may enjoy exemption from import duties on goods, income tax, sales tax, export tax, and selective consumption tax derived from royalties on exportation and re-exportation activities. Aside from trading activities, the following businesses may also apply for the regime: higher education centres, scientific research centres, specialized centres for health services, high technology businesses, ensembling businesses, semi processed or finished products processing businesses, services businesses, environmental service businesses, general services, logistics services businesses, and manufacturing businesses.

### *Tourism, industry, and agriculture allowances*
The Incentive Law for Tourism Development grants several tax benefits, such as exemption from import duties on certain tourism services, related goods, and from property tax for companies dedicated to tourism, but only for those corporations with a

signed tourism agreement with the government. Income tax exemptions may apply in special cases.

In general, income from individuals or corporations that engage in agricultural production activities will be exempted from income tax if annual gross income is lower than USD 250,000.

Forestry plantations are totally exempted from income tax payment until 2018 if the lot planted has been duly registered at the Forestry Registry of the Environmental National Authority and resolution with approval from this authority has been issued.

### *Special laws*

The Panamanian government has enacted special laws regarding tax exemptions for certain activities performed in Panama such as call centres (Law No. 54 of 2001) and tax exemptions for certain appointed areas such as the Panama Pacific Economic Zone (Law No. 41 of 2004) and Law No. 41 of 2007, which creates a special regime for the establishment and operation of Regional Headquarters in Panama.

By means of Law No. 8 of 2010, Real Estate Investment Societies may deduct the profits distributed to their shareholders, provided that these Real Estate Investment Societies

- raise long term funds in a securities market
- are registered in the National Securities Commission
- distribute no less than 90% of their free cash flow
- register in the General Direction of Revenues, and
- withhold 20% of the profits distributed as an income tax advance payment on behalf of the shareholder, which may be deemed the definitive tax to be paid by the shareholder.

## *Withholding taxes*

Royalties and commissions on services paid to foreign entities are taxed through the application of the corresponding tax rate (25% as of 1 January 2011) over 50% of remittance under the concept of WHT (effective tax rate is 12.5%). The taxpayer may decide not to withhold taxes and consequently not deduct the expense.

Payment of interest is also subject to income tax on 50% of the interest paid to a beneficiary abroad on loans invested in Panama, but the payer must proceed with the WHT even if one does not deduct the interest.

If the beneficiary is registered as a taxpayer in Panama before the Tax Administration, no WHT may be required.

| Recipient | Dividends (%) | Interest (%) | Royalties (%) |
|---|---|---|---|
| Foreign corporations | 5/10/20 | 12.5 | 12.5 |

In case of treaties, special rules are applicable in order to avoid double taxation.

## Tax administration

### Returns

The accounting period is the period for which the company makes its accounts. Returns shall be made upon completion of the accounting period and may not exceed 12 months. For most companies it is usually from 1 January to 31 December.

The due date for filing is three months after the end of the fiscal year, with the possibility for an extension of up to two additional months.

### Payment of tax

Income tax payment shall be made depending on the income tax return and shall be made no longer than three months after closing of the corresponding accounting period.

Taxpayers must make income tax advance payments based on 1% of monthly gross income. The taxpayer will have to file monthly income tax returns assessing the advance payment within the next 15 days following the end of the month. VAT on purchases may be offset against this advance payment if the taxpayer is a seller in the local market of pharmaceutical products or food and meets certain criteria.

### Statutes of limitation

The statute of limitation depends on the type of tax. The Tax Administration may audit the income tax returns filed within the last three years from the last day of the year on which the tax return was filed. The statute of limitation for the ITBMS is five years.

## Significant developments

Unlike the 2010 National Budget, there were a number of amendments to existing tax law announced when the 2011 National Budget was handed down on 16 November 2010. The majority of those changes are effective as of 1 January 2011. In summary, the key taxation developments announced in the 2011 National Budget included the following:

- There has been no change to the general corporate income tax rates of 30% for residents and 48% for non-residents.
- As of 1 January 2011, a new Division 2AB will create personal liability for unpaid salary or wages tax for the directors of a company. This is intended as a further lever to ensure a higher standard of group tax compliance. Where a notice demanding payment has been served and where the required amount of group tax is not paid, each director of that company is jointly and severally liable to the extent of the shortfall.
- One of the more substantive technical amendments to the Income Tax Act 1959 is the introduction of two new provisions which operate to provide specific deductions for environmental protection and clean-up costs.
- The method by which a taxpayer may elect to pool exploration expenditure under Section 155N of the Income Tax Act was clarified, and it is now clear that a written election must be made and lodged with the Commissioner General prior to the due date for lodgement of the income tax return for the year of income in which the exploration expenditure was incurred (or within any such further period as the Commissioner General may allow).
- The Goods and Services Tax (GST) Act was amended to confirm that supplies could be made to holders of a "mining lease", as well as to holders of either a special mining lease or an exploration licence, on a GST zero-rated basis.

It has been reported that Papua New Guinea (PNG) is in the process of entering into a double taxation treaty (DTT) with Indonesia, although the terms of the DTT are currently unknown.

## Taxes on corporate income

PNG resident companies are liable for income tax on their worldwide income. Companies that are not resident in Papua New Guinea are only required to remit tax on income sourced in Papua New Guinea. A non-resident's PNG sourced passive income, including dividends, interest, and royalties, is generally only subject to withholding tax. It is ordinarily the case that the payer of the dividend, interest, or royalty must withhold the relevant amount of the tax and remit this to PNG's Internal Revenue Commission (IRC).

Papua New Guinea levies income tax on companies on a flat rate basis. The operations of a company, rather than the company's taxable income level, will dictate the rate applied to the company's taxable income.

Generally, trading profits and other income (except income which is specifically exempt) of resident companies in Papua New Guinea are assessed tax at a rate of 30%, whereas non-resident companies operating in Papua New Guinea are assessed tax at a rate of 48%. There are, however, different tax rates for income derived from mining, petroleum, and gas operations.

Specifically, trading profits and other income from operations in Papua New Guinea are liable for PNG income tax at the following rates:

| | |
|---|---|
| Income other than income from mining, petroleum, or gas operations – resident company | 30% |
| Income other than income from mining, petroleum, or gas operations – non-resident company | 48% |
| Income from petroleum operations – existing projects | 50% |
| Income from petroleum operations – new projects | 45% |
| Income from petroleum operations – incentive rate projects | 30% |
| Income from mining operations – resident company | 30% |
| Income from mining operations – non-resident company | 40% |
| Income from gas operations | 30% |

## ***Corporate residence***

A company is deemed a resident for income tax purposes if it is incorporated in Papua New Guinea. A company incorporated outside Papua New Guinea that trades in Papua New Guinea and has its voting power controlled by resident shareholders or has its central management and control in Papua New Guinea is also considered a resident. What constitutes central management and control is a question of degree and fact, and it exists where the directors meet to do the business of the company. This may be divided between two places, in which case the company will be resident in both places.

### ***Incorporation test***

A company incorporated in Papua New Guinea is automatically regarded as a PNG tax resident. However, the operation of the law of another country and a relevant tax treaty may result in a company also being treated as resident in another country.

### ***Management and control test***

A company is a PNG tax resident if it is managed and controlled in Papua New Guinea, regardless of where it is incorporated. Generally, a company is managed and controlled in Papua New Guinea if key decisions affecting the company are made at directors' meetings held in Papua New Guinea.

An entity may be a tax resident of both Papua New Guinea and another country by application of domestic legislation. A DTT entered into between Papua New Guinea and another country may contain a tiebreaker test to determine the country of residence for the purposes of the DTT.

## Other taxes

### Goods and services tax (GST)

The GST rate is 10% and applies to most goods and services supplied in Papua New Guinea. Exported goods and services attract a zero rate of GST. Goods and services, other than motor cars, supplied to mining, petroleum, or gas companies are also zero-rated. Some goods and services are exempt, including medical, educational, and financial services. Land is excluded from GST, but buildings and other improvements are subject to the tax.

### Land tax

Land tax is imposed by provincial governments on the unimproved value of the land, and the power to levy land tax is vested exclusively with the provincial governments. In Papua New Guinea, land tax is difficult to implement and faces major geographical and social problems.

### Customs duties / Import tariffs

The majority of manufacturing inputs (including plant and machinery) attract no custom duties, and other custom duty rates are being progressively reduced. The remaining rates for custom duties vary depending on the nature of the good being imported and are assessed on the total value of the goods imported, including cost, insurance, and freight. Customs bonds may be issued for the temporary importation of goods that are to be re-exported within 12 months.

### Excise taxes

Although customs duties are now minimal in many cases, some goods – most notably motor vehicles – now attract excise tax. Private motor vehicles generally attract excise at the rate of 60%, whereas work vehicles attract excise tax of 10%. Excise taxes can also apply to some domestically produced goods, including refined fuel products, alcohol, and tobacco.

### Stamp duties

Stamp duty applies at varying rates on documents and certain transactions. Of particular note is duty charged on the conveyance of property, which rises to a maximum of 5% where the value of the property being transferred exceeds 100,000 Papua New Guinea kinas (PGK). The duty is payable by the purchaser, and a 5% duty on the unencumbered value of land may also be payable where there is a transfer of shares in certain landholding companies.

Other dutiable transactions include share transfers (including some share buy-backs) which are subject to a rate of 1%. The Collector of Stamp Duties has the power to amend assessments and refund overpayments of stamp duty.

Stamp duty is payable on documents executed outside Papua New Guinea which relate to property or matters done or to be done in Papua New Guinea.

### Export duty

Export duty on timber logs (not sawn timber or plantation logs) is calculated with reference to the FOB value per cubic meter of exported logs and rates that increase as the value of the exported logs increase.

### *Contributions to employee superannuation funds*

Contributions to employee superannuation funds are compulsory for entities with 15 or more permanent employees. The employer's compulsory contribution is 8.4% of each employee's gross basic salary. The employee's minimum contribution is 6.0%.

Membership is generally compulsory for citizens. Non-citizens are currently exempt; however, this is under continuing review.

Contributions must be paid to an authorised superannuation fund. Contributions paid to an authorised fund are tax-deductible to the extent that they do not exceed 15% of the relevant employee's gross taxable salary. Contributions to non-resident funds are not tax-deductible.

### *Training levy*

All businesses whose annual payroll exceeds PGK 200,000 are subject to a 2% training levy, calculated on the sum of the taxable salaries, including benefits, of all personnel. Qualifying expenses incurred in training PNG citizen employees are creditable up to the actual amount of the levy. The training levy, if payable, is not tax-deductible.

### *Departure tax*

A departure tax is collected by airlines issuing tickets for persons departing Papua New Guinea.

### *Gaming machine tax*

Papua New Guinea imposes a 74% tax on gross revenue from gaming machines.

### *Spice export levy*

Levies are imposed from time to time on the export of specified spices (e.g. vanilla).

### *Resource project production levies*

Production royalties of 2% are payable to the national government on the net smelter return from mining operations. These royalties are tax-deductible. A royalty, at the rate of 2% of the wellhead value, is also payable from the production of petroleum and gas operations. Holders of new petroleum development licences are entitled to treat royalties as income tax paid. However, new petroleum projects will also pay a tax-deductible development levy calculated at the same rate of 2% of the wellhead value.

Mining projects are also required to pay a production levy to the Mineral Resources Authority calculated at a rate between 0.25% and 0.5% of the assessable income from production.

## *Branch income*

Income derived by a non-resident contractor for services in Papua New Guinea is usually subject to a withholding tax at the rate of 12% of gross income. This amount is calculated on deemed taxable income of 25% of the gross contract income, which is taxed at the foreign contractor tax rate of 48% (subject to tax treaties). The provisions extend to payments for the following:

- The installation, maintenance, and use in Papua New Guinea of substantial equipment or machinery.
- Construction projects.

- For the lease or charter of any industrial, commercial, or scientific equipment or any machinery or vehicle.
- Consultancy or management services.

Where the non-resident contractor rules do not apply, the non-resident company will be subject to income tax at the foreign contractor tax rate of 48% on its PNG sourced taxable income.

PNG branch remittances are not liable for dividends withholding tax (DWT) or any branch profits or similar tax.

## *Income determination*

Taxable income is defined as the sum of assessable income minus the allowable deductions. In practice, profits are calculated for tax purposes by reference to the profits reported in the financial accounts. Accounts must be prepared in accordance with PNG accounting principles, which follow the International Financial Reporting Standards.

### *Inventory valuation*

There is no form of stock relief or trading stock valuation adjustment to recognise the effects of inflation in Papua New Guinea. There is a once-only option to adopt the lowest of the cost amount, the market selling value, or the replacement value. Where the option is not exercised, the value of the stock is deemed to be the cost price. However, in special circumstances, the Commissioner General of Internal Revenue may accept a lower valuation.

### *Capital gains*

There is no general capital gains tax in Papua New Guinea. However, profits arising on the sale of property acquired for the purpose of resale at a profit, or from the carrying out of a profit-making scheme, are taxable as ordinary income.

### *Dividends*

Unless otherwise exempt from income tax, dividends are included in the assessable income of a shareholder.

Dividends received by a resident company from other companies, whether resident or non-resident, while being assessable to tax, are generally subject to a full tax rebate and are effectively received tax-free. However, where a company has losses on other activities or losses carried over from earlier years, those losses are applied against dividend income before the calculation of the dividend rebate.

### *Foreign income*

PNG resident companies are liable for income tax on their income from all sources (i.e. including foreign sourced income). A foreign tax credit may be available to offset foreign tax paid against PNG tax payable. The foreign tax credit is limited to the lesser of the foreign tax paid or the average PNG tax payable on that foreign income.

### *Stock dividends*

In most cases, the payment of a dividend by way of the issue of shares is subject to the same taxation treatment as the payment of a dividend by way of cash or the distribution of other property. However, dividends paid by the issues of shares wholly and exclusively out of profits arising from the sale or revaluation of assets not acquired for the purpose of resale at a profit are exempt from income tax and DWT.

### *Interest income*
Unless exempt under specific provisions, interest paid or credited by a financial institution, the Central Bank, or a company to a person resident in Papua New Guinea, is includable in income, and the person making the payment of or crediting interest in the account is liable to withhold and pay tax upon the amount.

### *Partnership income*
A partner's share of the assessable income of the partnership less all allowable deductions to the partnership is includable in the partner's assessable income for the year of income. Likewise, the partner's individual interest in a partnership loss incurred in the year of income is an allowable deduction. Further, if income is exempt income to the partnership, this income will be exempt income to the individual partner relative to their individual interest.

### *Unrealised exchange gains / losses*
Generally, foreign exchange gains realised and derived from debts made on or after 11 November 1986 or denominated in a currency other than the Papua New Guinea kina are included in assessable income.

## *Deductions*

General deduction provisions provide that all losses and expenditures, to the extent incurred in gaining or producing the assessable income or are necessarily incurred in carrying on a business for the purpose of gaining or producing that income, are allowable deductions. However, the general deduction provisions do not allow a deduction to the extent a loss or expenditure is an outgoing of capital, or of a capital, private, or domestic nature, or incurred in relation to the gaining or production of exempt income.

### *Depreciation and depletion*
Depreciation is allowed for equipment and other assets at prescribed rates. A taxpayer must use the diminishing value method unless an election is made to use the prime cost method. The applicable diminishing value rates are 150% of the prime cost rates.

#### Plant, machinery, and equipment
Plant, machinery, and equipment (including buildings) are depreciable at rates according to their estimated lives. A taxpayer other than a taxpayer who derives income from mining, petroleum, or gas operations may elect to claim special accelerated depreciation rates for certain capital items. For example, flexible depreciation rates (up to 100%) may be claimed on new industrial plant with a life exceeding five years that is used for manufacturing purposes. Other new plant and articles used in manufacturing, construction, transport, storage, communication, and agricultural production are eligible for an accelerated deduction equal to 20% of cost in the year of purchase. New plant and articles used for tourism are eligible for an accelerated deduction equal to 55% of cost in the year of purchase.

#### Motor vehicles
Motor vehicles are generally depreciable at 20% of prime cost. There is no upper limit in value for depreciation purposes.

#### Buildings
Buildings forming an integral part of plant, machinery, and equipment are depreciable at a prime cost rate of up to 7.5% depending on the construction materials. Buildings

housing plants eligible for the one-year write-off deduction *(see comments on new industrial plant under Plant, machinery, and equipment above)* can be written off in the year of construction. Other income producing buildings may qualify for the accelerated deduction of 20% in the year of purchase.

**Agricultural and fishing plants**
Most items of new agricultural and commercial fishing plants qualify for 100% depreciation as do boats and ships, including ancillary equipment, used solely as dive boats or for scuba diving by accredited tour operators. Other new items having a life exceeding five years used by a person carrying on agricultural operations are eligible for accelerated depreciation in the initial year of use.

### *Net operating losses - domestic*
Trading losses may be offset against all income received in the same accounting period or carried forward and offset against future trading profits. The limitation period on the carryforward of losses is generally 20 years. Losses may not be carried back against prior years' profits. Primary production losses and resource project losses may be carried forward without a time limitation, although again they may not be carried back *(see the Tax credits and incentives section for more information)*.

Note that the carryforward of losses is subject to a 50% or more continuity of shareholding and control test, or a continuity of business test where there is a breach of the ownership test.

### *Net operating losses – foreign*
Losses incurred by a resident taxpayer from a source outside Papua New Guinea (other than in relation to export market development) are not deductible against assessable income derived within Papua New Guinea. In practice, overseas losses can be carried forward and offset against overseas income for up to 20 years.

### *Payments to foreign affiliates*
The deduction available to a taxpayer for management fees paid to an associated person is limited to the greater of:

- 2% of assessable income derived from PNG sources by the taxpayer.
- 2% of the total allowable deductions, excluding management fees incurred by the taxpayer in Papua New Guinea.

The limitation applies to both resident and non-resident taxpayers. Special rules apply to mining, petroleum, and gas companies. These limits may not apply where the recipient of the management fee is resident in a country with which Papua New Guinea has a DTT or where it can be demonstrated that the management fee arrangements do not have the purposes or effect of avoiding or altering the income tax payable in Papua New Guinea.

Papua New Guinea also has transfer pricing provisions that require transactions with foreign affiliates to be conducted on an arm's-length basis.

### *Taxes*
A deduction is not allowable in respect of payments of income tax or training levy. Other taxes may be deductible subject to meeting the general principles for deductibility.

### *Double deductions*
An additional amount equal to the actual amount of expenditure incurred is deductible in respect of certain expenditures (e.g. export market development costs, some staff training costs, and certain donations). In other words, a "double deduction" is available with respect to these items.

### *Bad debt*
Bad debts are deductible if they have previously been included in assessable income and written off by year end or if the bad debt was in respect of money lent in the ordinary course of the taxpayer's business of money lending.

### *Pension expenses*
Contributions paid to an authorised superannuation fund are tax-deductible to the extent that they do not exceed 15% of the relevant employee's gross taxable salary. Contributions to non-resident funds are not tax-deductible. *See the Other taxes section for more information.*

## *Group taxation*

Companies are assessed for income tax separately regardless of whether they are part of a group of associated or related companies. Losses of one company within a group cannot be offset for tax purposes against the profits of another company within that group.

The Companies Act allows two or more companies to amalgamate and continue as one, and provisions are in place to allow this to occur without any adverse income tax consequences.

## *Tax credits and incentives*

### *Foreign tax credit*
A foreign tax credit may be available to offset foreign tax paid against PNG tax payable. The foreign tax credit is limited to either the foreign tax paid or the average PNG tax payable on that foreign income, whichever is less.

### *Manufacturers' wage subsidy*
Certain companies manufacturing new products are eligible for a subsidy based on a percentage of the relevant minimum wage of full-time citizen employees. The subsidy is taxable and available over a five-year period with a reduction in the relevant percentage each year.

### *Research & development (R&D) deduction*
A 150% deduction is available for expenditures on R&D. The deduction is available to all sectors of the economy. Broadly, R&D expenditures are defined as systematic, investigative, and experimental activities that involve innovation or a high degree of technical risk carried out for the purpose of acquiring new knowledge, or creating new or improved materials, products, devices, processes, or services.

### *Primary production deduction*
Outright deductions are allowed for certain capital expenditures including clearing, preparing, or conserving land for agriculture, eradicating pests, providing labourers' accommodation, and for the conservation and conveyance of water.

In addition, a 100% deduction is available for a new plant used directly for the purposes of agricultural production, and an initial 20% accelerated depreciation deduction is allowed for a new plant with a life exceeding five years.

Losses incurred in carrying on a primary production business can be carried forward indefinitely; they are not restricted to the 20-year limit that generally applies to company tax losses.

### *Investment in primary production*
Agricultural companies may transfer to their shareholders the benefit of the outright tax deduction available for many types of capital expenditures. The total deduction available to shareholders may not exceed the amounts paid on their shares.

### *Incentive rate for new primary production projects*
As part of promoting investment in primary production, a 20% tax rate is prescribed in respect of 'incentive rate primary production income' derived by a company (as opposed to the normal 30% tax rate for a resident company or 48% for a non-resident company). The 20% rate of income tax applies during the period commencing on the date that construction, clearing, or planting was started and ending at the end of the tenth full tax year after the date of commencement.

The 'incentive rate primary production income' is income from primary production derived by a company from a new primary production development project that is:

- a project with a capital cost not less than PGK 1 million
- located in an area in which primary production of the crop or the livestock proposed was not previously carried out, or not previously carried out on a large scale
- not an extension or development of an existing primary production project, and
- a project that commenced construction, clearing, or planting during the period 1 January 2004 to 31 December 2011.

### *Solar heating deduction*
Expenditures on the acquisition and installation of a solar heating plant for use in deriving income are allowable as an outright deduction.

### *Agricultural production extension services deduction*
A 150% deduction is available for expenditures on services provided free of charge to smallholder growers, including the provision of advice, training, and technical assistance in relation to primary production to assist growers with production, processing, packaging, and marketing issues.

### *Rural development incentive*
Qualifying new businesses located in certain specified remote areas of the country are exempt from income tax on their income for ten years after the commencing year. Any loss from this exempt activity is deductible against taxable income from another activity.

### *Incentive rate for large scale tourist accommodation facilities*
A 20% tax rate applies to income derived by a taxpayer from the operation of a large scale tourist accommodation facility or a substantially improved large scale tourist accommodation facility. The rate applies for 14 years after the end of the year of income in which the taxpayer first derives income from the facility. There are four main requirements which must all be satisfied:

- The taxpayer must derive all its income from the operation of the tourist accommodation facility.
- Construction of the facility or improvements thereto must be commenced between 1 January 2007 and 31 December 2011.
- The amount expended on the construction or improvement must exceed USD 7,000,000.
- There must be 100 rooms or more for the purpose of temporary accommodation of people.

### *Double deduction for staff training costs*

Certain staff training costs, including the cost of full-time training officers and tourism training, are eligible for a double deduction. The total tax saving is limited to 75% of the expenditure incurred.

### *Double deduction for export market development costs*

Expenditures incurred in the promotion for sale outside Papua New Guinea of goods manufactured in Papua New Guinea or tourism promotion is eligible for double deduction. The total tax saving cannot exceed 75% of the expenditures incurred.

### *Export incentives*

The net export income from the export sale of certain types of goods is exempt for the first four years of income, with a partial exemption in the following three years.

### *Deductions for environmental protection and clean-up costs*

Beginning 1 January 2011, new provisions came into effect which operate to provide specific deductions for environmental protection and clean-up costs.

Section 72D operates to provide a deduction for expenses incurred for the purpose of 'environmental protection activities'. This is an exhaustively defined term and refers to the prevention or clean-up of:

- pollution that has been caused (or is likely to be caused) by a taxpayer, or
- pollution that is present on a site that a taxpayer has or will be entitled to use.

This provision includes a number of specific exclusions, which are more in the nature of integrity measures than substantive limitations. Specifically excluded is expenditure of a capital nature that relates to the construction of a building and expenditures that relate to the acquisition of land. Where a taxpayer has deducted an amount under Section 72D, the subsequent recoupment of all or part of that expenditure will be assessable income. In addition, where a site is subsequently sold, the sale consideration will be deemed to be a recoupment of deductible environment protection costs to the extent that a deduction has or could be claimed.

Section 72E operates to permit an allowable deduction for the costs associated with preparing an environmental impact study. These costs will be deductible over the anticipated life of the project, or ten years. Like Section 72D, this deduction will only be available where costs are incurred for the sole or dominant purpose of preparing an environmental impact study. Amounts that represent a recoupment of prior expenditure will be assessable.

The depreciation provisions ensure that plant or equipment used in the course of environmental protection activities or conducting an environmental impact study is depreciable.

### *Tax credit for infrastructure development by agricultural, mining, petroleum, and gas companies*

A tax credit is available to agricultural, mining, petroleum, gas, and certain tourism companies that incur expenditures on a prescribed infrastructure development. In the case of taxpayers engaged in mining, petroleum, and gas operations, the credit is limited to 0.75% of the assessable income or the amount of tax payable for the year (in respect of that mining, petroleum, or gas project), whichever is less. Excess expenditures over the 0.75% or tax payable may be included in the following year's rebate claim.

Unutilised credits or excess expenditures can generally only be carried forward for two years. In the case of taxpayers engaged in agricultural production, the credit is limited to 1.5% of the assessable income or the amount of tax payable for the year, whichever is less.

A prescribed infrastructure development includes a school, aid post, hospital road, and other capital assets that have been approved as such by the Department of National Planning and the IRC. It cannot be an expenditure required under the Mining Act or the Oil and Gas Act.

### *Incentives for petroleum, mining, and gas operations*

Special incentives and rules apply to mining, petroleum, and gas exploration, extraction, and production activities. The main aspects are as follows:

#### Project basis of assessment

A project basis of assessment (ring-fencing) is adopted for all resource projects. This means losses from other operations, regardless of whether or not they are resource related cannot generally be offset against resource project income from a particular ring-fenced project. However, there are some concessions to the ring-fencing principle in respect of exploration expenditures and expenditures in respect of discontinued projects.

In general, all costs incurred in the exploration and development phases of the project are accumulated and amortised over the life of the project. Once production starts, an immediate deduction is allowed for 'normal' operating and administration expenses. Capital expenditures incurred after the start of production are capitalised and amortised over the life of the project.

#### Rate of tax

The rates of tax in respect of income from a resource project are:

| | Non-resident companies | Resident companies |
|---|---|---|
| Mining | 30% | 40% |
| Petroleum – existing projects | 50% | 50% |
| Petroleum – new projects | 45% | 45% |
| Petroleum – incentive rate | 30% | 40% |
| Gas | 30% | 30% |

#### Interest deductions

Interest is not deductible prior to the commencement of a resource project. Following the issue of a resource development licence, a person carrying on a resource project or exploration in relation to a resource project may claim a deduction against resource income for interest on money borrowed for carrying on the relevant operations or exploration. This is subject to a number of conditions including maintaining a debt-to-equity ratio of 3:1.

### Capital allowances

Allowable exploration expenditures (AEE) are amortised over the life of the resource project. The deduction is calculated by dividing the unamortised balance by either the remaining life of the project or four, whichever is less. The amount of the deduction is limited to the amount of income remaining after deducting all other deductions, other than deductions for allowable capital expenditure. In other words, the deduction cannot create a tax loss.

Allowable capital expenditures (ACE) are amortised over the life of the resource project. The ACE is split into two categories: capital expenditures with an estimated effective life of more than ten years (long-life ACE) and capital expenditures with an estimated effective life of less than ten years (short-life ACE).

The annual deduction for long-life ACE is claimed on a straight-line basis over ten years.

Where the remaining life of the project is less than ten years, the rate at which the deduction is allowed is calculated by referring to the remaining life of the project. For short-life ACE, the annual deduction is calculated by dividing the unamortised balance by either the remaining life of the project or four, whichever is less. For new mining projects, the deductions for both long-life ACE and short-life ACE are calculated by dividing the unamortised balance by either the remaining life of the project or four, whichever is less.

The amount of the deduction for ACE is limited to the amount of income remaining after deducting all other deductions. In other words, the deduction cannot create a tax loss.

### Off licence exploration expenditure

A major easing of the ring-fencing principle applies to taxpayers, which are involved in a producing project, where the taxpayer or a related party incurs exploration expenditures outside the area of the productive project. In this situation, the taxpayer can elect (whether or not it is currently involved in a producing project) to add such exploration expenditures to an exploration pool that can be amortised against income from the producing project.

The amount allowable as a deduction from this exploration pool in respect of resource operations carried on by the taxpayer or a related corporation is the lesser of:

- 25% of the total undeducted balance of expenditures in the exploration pool or
- such amount as reduces the income tax (other than additional profits tax) which would, but for this deduction, be payable by the taxpayer and its related corporations in respect of those resource operations for that year of income, by 10% (or 25% for mining projects).

### Management fees

Once a resource project derives assessable income, the deduction for management fees is restricted to 2% of operating expenses other than management fees. During the exploration phase of a project, the amount of management fees which can be treated as allowable exploration expenditure is limited to 2% of the exploration expenditure other than management fees. Furthermore, during the development phase the amount of management fees which can be treated as allowable capital expenditure is limited to 2% of the allowable capital expenditure other than management fees.

**Transfer of expenditures**

When interests are transferred from one taxpayer to another, the vendor and purchaser can agree to transfer deduction entitlements for the unamortised balances of allowable exploration expenditure and allowable capital expenditure to the purchaser.

**Liquefied natural gas (LNG) project**

A number of provisions with specific application to the PNG LNG project have been included in the Income Tax Act, Stamp Duties Act, Goods and Services Tax Act, Customs Act, and Excise Act.

Other provisions were added or amended at the same time as the PNG LNG project-specific provisions, the most notable being the re-introduction of additional profits tax for all designated gas projects.

## *Withholding taxes*

### *Interest, dividend, royalties, and technical/management fees*

The following withholding tax (WHT) rates apply to interest, royalties, technical fees, and dividends under PNG domestic law and tax treaties. PNG domestic legislation provides an exemption from WHT for interest and dividends in certain circumstances. The higher rates quoted are the maximum rates allowable under the treaties.

| Recipient | Interest (%) | Dividends (%) (1) | Royalties (%) | Technical fees (%) |
|---|---|---|---|---|
| Domestic law (non-treaty) | | | | |
| Non-resident corporations and individuals | 15 | 17 | 10/30 | 17 |
| Treaty | | | | |
| Australia | 10 | 17 | 10 | 0 |
| Canada | 10 | 17 | 10 | 0 |
| China | 10 | 15 | 10 | 0 |
| Fiji | 10 | 17 | 15 | 15 |
| Germany (2) | 10 | 15 | 10 | 10 |
| Korea, Republic of | 10 | 15 | 10 | 0 |
| Malaysia | 15 | 15 | 10 | 10 |
| Singapore | 10 | 15 | 10 | 0 |
| United Kingdom | 10 | 17 | 10 | 10 |

Notes

1. The rate of WHT on dividends paid by mining companies is 10%. Dividends paid to a resident or a non-resident out of income from petroleum or gas operations are exempt from income tax and are not subject to WHT.
2. The treaty with Germany has not yet been ratified by Germany.

### *Business income withholding tax*

Income derived by local contractors in certain industries is covered by the business income withholding tax regime. The industries affected include:

- Building and construction

- Motor vehicle repairs
- Advertising
- Joinery and cabinet making
- Entertainment
- Architecture
- Consultancy
- Engineering
- Equipment hire
- Surveying
- Security
- Road transport
- Cleaning and maintenance

Businesses affected are required to have a certificate of compliance and to produce it when entering into contracts with their customers. Payers are required to file an annual income reporting statement where either they make an eligible payment of PGK 500 or more in relation to one contract or eligible payments for several contracts exceeding PGK 3,000 in the year of income in relation to a single payee. Payers are required to deduct a 10% WHT if payees do not produce a certificate of compliance.

### *Non-resident insurer withholding tax*
Premiums paid to non-resident insurers in respect of insurance contracts on property situated in Papua New Guinea or insured events which can only occur in Papua New Guinea are subject to tax in Papua New Guinea. The tax is calculated on a deemed taxable income equal to 10% of the gross premium, which is taxed at the non-resident tax rates of 48% (companies) or 30% (unincorporated associations). Tax treaties may limit the rate of tax applied.

### *Overseas shippers*
Income derived by overseas shippers or charterers carrying passengers, livestock, mail, or goods out of Papua New Guinea is taxable in Papua New Guinea. The tax is calculated on a deemed taxable income equal to 5% of the gross income which is taxable at the non-resident rate of 48% in the case of companies. The IRC may exempt the overseas shipper from tax if the shipper's home country exempts PNG shippers from a similar tax.

## *Tax administration*

### *Returns*
Papua New Guinea operates on a full assessment basis, and companies are required to lodge an annual income tax return showing the calculation of taxable income for the year. In addition, the return must provide detailed disclosures in relation to income derived and expenses incurred during the year of income.

The tax year is generally the period 1 January to 31 December; however, application may be made for a substituted tax year end. These will normally be granted where the substituted tax year end coincides with the accounting year end of an overseas holding company. A company's tax year does not need to be the same as its accounting period.

A company must file a tax return by 28 February in the year following the year of income to which the return relates. However, an automatic extension to 30 June applies where the company lodges its return through a registered tax agent.

### *Payment of tax*

Corporate income tax is collected under a provisional tax system. Under this system, tax is paid in respect of a company's current year profits (i.e. payments made in the year of income are in respect of income derived in the same year as the payment is due).

Provisional tax is assessed by the IRC based on the last return lodged. In the event that no tax was payable on the previous year's return, the Commissioner General has the right to estimate the amount of tax based on any other information available.

Provisional tax is payable in three equal instalments by 30 April, 31 July, and 31 October.

Applications may be made to reduce provisional tax assessed if the tax due for the year in question is expected to be lower than the provisional tax assessed. Where estimated provisional tax is less than 75% of the income tax ultimately assessed, additional tax may be levied. Additional tax at a rate of 20% will be assessed, based on the difference between the estimate lodged and the provisional tax originally determined, or the actual tax payable, whichever is less. The Commissioner General has the discretion to require payment of additional tax.

Mining, petroleum, and gas companies are subject to advance payments tax, a system that broadly mirrors the provisional tax system in place for non-resource companies. The main difference for resource companies is they have the option to lodge an estimate of their taxable income for the year prior to 30 April, 31 July, and 31 October each year, which the IRC uses to assess each advance payments tax instalment.

Following the lodgement of the income tax return, the IRC will serve a notice of assessment on the company. The balance of tax payable for a year of income, after the application of provisional tax (or advance payments tax in the case of a resource company) and other tax credits or rebates, is due to be paid within 30 days of the date of service of the notice of assessment.

## Significant developments

There have been no significant corporate tax developments in Paraguay during the past year.

## Taxes on corporate income

Income is taxed in Paraguay according to the resource principle (i.e. the territorial system of taxation).

There are three tax systems in Paraguay, depending on the type of taxpayer, as follows:

- For income from commercial, industrial, and service activities, the general income tax rate of 10% applies.
- For income from agricultural and cattle activities, the rate ranges from 2.5% to 10% (determined by annual income).
- For those taxpayers with annual income of less than 100 million Paraguayan guaraní (PYG), a single tax at a rate of 10% applies.

## Corporate residence

Corporate legal residence is determined as the place where direction or central management takes place, unless the corporation's charter states otherwise.

## Other taxes

### Value-added tax (VAT)

VAT applies to all corporations and to individuals or associations of individuals rendering personal services.

The general VAT rate is 10%, but a special VAT rate of 5% applies for selling real state, basic groceries, farming products, pharmaceutical products, and loans interest.

### Real estate tax

Real estate tax is levied annually at 1% of the fiscal value of the property, which is generally less than actual value. A tax rate of 0.5% applies if the area of rural property is smaller than five hectares and is used for agricultural or cattle ranching. In certain areas, an additional tax is levied on the fiscal value of vacant and semi-vacant land when the area of the built-up portion falls within certain determined percentage limits. Large tracts of land in rural areas are subject to an additional tax determined on a percentage basis and to a proportional tax of 0.5% to 1% on the fiscal value of tracts with areas ranging from 10,000 to 60,000 or more hectares.

The 1992 Paraguayan Constitution established that municipalities and departments are entitled to the tax revenues directly related to real estate. Collection of these taxes is the responsibility of municipal governments.

### Tax on acts and documents

There is no longer a tax on acts and documents in Paraguay since fiscal year 2007.

## Branch income

Branches are taxed at the same rate as domestic corporations. Profits transferred or credited to the head office are subject to a 15% withholding tax (WHT) when remitted to the head office abroad.

Additionally, the payment of dividends (by the head office's instructions) is subject to a 5% WHT to be paid at the time of the remittance and charged to the local entity.

## Income determination

### Inventory valuation

Taxpayers may adopt any method of inventory valuation, provided it is technically acceptable, according to Tax Administration criteria (e.g. first in first out (FIFO), average cost). The valuation must be applied consistently and may be changed only with the prior approval of the treasury minister.

Damaged, deteriorated, and obsolete inventories may be written down to fixed values by the taxpayer. The tax administration can reject valuations that are not realistic.

### Capital gains

Gains on all assets, tangible and intangible, are taxable as part of profits and subject to income tax at a rate of 10%.

### Dividend income

Dividends are not taxable income except when the recipient (or shareholder) is a non-resident, in which case a 15% WHT applies. An additional 5% tax is charged to local entities when the income or dividend is distributed to a local or foreign (non-resident) shareholder.

### Stock dividends

Stock dividends are not taxable income, except when dividends represent more than 30% of the taxable income of an investor. In the case when dividends represent more than 30% of an investor's taxable income, a tax rate of 15% and an additional tax rate of 5% apply *(see Dividend income above)*.

### Foreign income

Foreign-source income is not taxable. Interest, commissions, and capital gains are considered Paraguayan source when the investor is resident in Paraguay.

## Deductions

General provisions for expenses or other potential losses are not deductible.

Other specific non-deductible items include:

- Interest on capital, loans, or any other investment by an owner, partner, or shareholder in a business.
- Personal expenses of an owner, partner, or shareholder.
- Money drawn on account of future earnings.
- Amortisation of goodwill.
- Direct expenses incurred in earning non-taxable income.
- Earnings from any fiscal period that are retained in the business as capital increases or reserve accounts.

### Depreciation and depletion

The maximum allowable depreciation rates range from 2.5% for urban buildings to 25% for computer equipment. Depreciation is calculated by the straight-line method based on the useful life of assets, as determined by the Treasurer. The Treasurer may also authorise the use of other depreciation or depletion methods that are deemed to be technically justified and generally accepted.

Fixed assets must be revalued annually based on the increase of the price index. Capital gains derived from the revaluation of fixed assets are not taxable income.

### Extraordinary losses/bad debts

The deduction of extraordinary losses and bad debts require the meeting of certain conditions (e.g. communication to Tax Authority, evaluation of the actual loss in monetary terms, audit review).

### Charitable contributions

The deduction of a donation is subject to a formal registration of the beneficiary entity as a public benefactor before the Treasury Ministry.

### Executive remuneration

The deduction of executive remuneration is limited to a percentage defined according to the enterprise's profits.

### Taxes

*In general, all taxes mentioned in the Other taxes section are deductible.* Income tax and any fiscal surcharges or fines are not deductible.

### Net operating losses

Net operating losses are not permitted to be carried forward and applied against future years. However, Congress is considering amending the law to permit carrying forward of losses for three years.

Losses may not be carried back in Paraguay. However, a taxpayer may modify one's tax returns at a later date.

### Payments to foreign affiliates

There are no limits on the deductibility of payments to foreign affiliates, including management fees, research and development (R&D), and general and administrative expenses, provided that the taxpayer maintains corresponding legal documentation that includes the country of origin and applies appropriate WHT. *See the Withholding taxes section for the applicable WHT rates.*

## Group taxation

Group taxation is not permitted in Paraguay.

### Transfer pricing

Paraguay does not have transfer pricing rules.

## Tax credits and incentives

### Investment incentives

The framework of economic investment was established in the Law No. 60/90, which offers some special tax exemption benefits to foreign and local investors.

The benefits of the Law No. 60/90 may be available for the following investments:

- Cash, financing, provision of credit, or other financial instruments, under the conditions established by the administration of the President of Paraguay and the corresponding ministries.
- Capital goods, raw materials, and inputs for local industry for the fabrication of capital goods.
- Transfers of licensing rights with respect to trademarks, industrial processes and models, and other technologies.
- Technically specialised services.
- Capital leases.
- Other forms that the administration of the President of Paraguay and the corresponding ministries determined by law.

The investment incentives included in Law 60/90 that remain enacted after tax law modification (Law No. 2421/04) are the exemptions from certain fiscal, municipal, and customs duties taxes.

When the amount of financing for an investment is greater than USD 5 million, it will be exempt from WHTs on interest, commissions, and capital that have to be paid to financial or banking entities abroad. This benefit is for five years.

If the investment is at least USD 5 million and the project is approved for a term of at least ten years, the dividends and profits derived from the project are tax exempt. In this case, the taxes on those dividends and profits are not creditable in the country of origin.

### Other incentives

Exports are exempt from certain customs duties and from VAT.

A Capital Market Law (No. 1284/98) established incentives for companies listed on the Asunción Stock Exchange.

In addition, Law 536/95 established incentives for forestry activities.

## Withholding taxes

### WHT on payments made by a domestic corporation

| Recipient | Dividends (%) (1) Portfolio | Dividends (%) (1) Substantial holdings | Interest (%) (2, 3) | Royalties (%) (3, 4) | Fees (%) (3, 5, 6) |
|---|---|---|---|---|---|
| Non-resident corporations | 15 | 15 | 30 | 30 | 30 |
| Non-resident individuals | 10 | 10 | 30 | 10 | 10 |
| Tax treaty with Chile | | | | | |
| Non-resident corporations | 10 | 10 | 10/15 (7) | | |
| Non-resident individuals | 10 | 10 | | | |

Notes

1. Since 2006, local entities are required to pay an additional 5% WHT when the income or dividend is distributed.
2. The WHT on interest is based on 100% of the amount paid when remitted to the head office abroad. In other cases, when the payment is not directly made to the head office or shareholders that have control of the local subsidiary, the WHT is based on 50% of the amount paid. The tax rate is 30%.
3. VAT is withheld on interest, royalties, and other services provided for non-resident corporations or individuals at a rate of 9.09%, except on fees for financing, which are withheld at a rate of 4.76%.
4. The WHT on royalties is based on 100% of the amount paid when remitted to the head office abroad. In other cases, when the payment is not directly made to the head office or shareholders that have control of the local subsidiary, the WHT is based on 50% of the amount paid. The tax rate is 30%.
5. The WHT on fees is based on 100% of the amount paid when remitted to the head office abroad. In other cases, it is based on 50% of the amount paid. The tax rate is 30%.
6. Fees for personal services rendered by non-resident corporations are subject to withholding income tax at a rate of 50% on the amount paid. The tax rate is 30% (effective tax rate of 15%). Fees for personal services rendered by non-resident individuals are subject to withholding of the personal income tax at a rate of 50% on the amount paid. The tax rate is 20% (effective tax rate of 10%). Congress is considering suspending this tax.
7. In case of a loan to Chile, the WHT on the interest is 15% if the loan is from a bank or insurance company. On the other hand, if the loan is from an associated company or head office, the tax rate is 10%. Regarding VAT WHT, *see Note 3.*

## Tax administration

### Returns

Income tax returns are submitted on a fiscal-year basis as a self-assessment and must be filed by the fourth month following the end of the fiscal year.

### Payment of tax

Income tax is due on varying days in the fourth month following the end of the fiscal year, depending on the taxpayer ID number, according to a calendar established by the treasury ministry. Four equal advance payments are made throughout the year, calculated based on 100% of the tax due in the previous year. Payments must be made in May, July, September, and November of each year after the due date for filing the income tax return, according to the calendar established by the tax authorities.

## Significant developments

Several changes to corporate taxation legislation in Peru were incorporated during 2011, including the following:

- The financial transactions tax (FTT) rate for fiscal year (FY) 2011 has been established at 0.005% as of 1 April 2011.
- As of 1 April 2011, the value-added tax (VAT) rate is 18%.
- The tax exemption on income from bank deposits in local banks remains in force until 31 December 2011.
- A recent proposal to modify Peruvian income tax law in order to include as a taxable event the indirect disposal of shares of Peruvian entities was approved in the Congress. Even though approved, the bill has not been published yet (and thus is not in force yet). Specifically, the proposal establishes that an indirect disposition will take place when there is a sale of shares from a non-domiciled company which owns directly, or through another company, shares of a domiciled entity, and (i) in any of the 12 months prior the sale, the market value of the shares of the domiciled entity owned by the non-domiciled company (directly or through other company) is equivalent to 50% or more of the market value of all the shares of the non-domiciled company or (ii) the non-domiciled company is resident in a black listed territory (tax haven), unless it can prove that it is not included in the situation describe in (i).
- There is a special depreciation regime applicable for years 2010 and 2011 for buildings and constructions that allows for depreciation at a 20% rate, provided certain requirements are met.

## Taxes on corporate income

Companies incorporated in Peru are considered resident in Peru for tax purposes and thus subject to an income tax rate of 30% on worldwide net income.

For purpose of determining taxable income, such entities are allowed to deduct expenses to the extent that they are necessary to generate or maintain the source of taxable income. Requirements, limitations and/or caps may apply to the deduction of certain expenses (thin capitalisation rules), bad debt provisions, salaries, travel expenses, gifts, etc.

The Peruvian income tax law allows crediting for various payments against income tax, including income taxes paid in advance, amounts paid for certain other taxes, and income taxes paid in foreign tax jurisdictions, provided that the foreign country's tax rate is not higher than the Peruvian corporate tax rate.

Dividends and any other types of profit distributions are taxed at a 4.1% rate, upon distribution, whether the distributions are made to resident companies or non-resident companies (either individuals or legal entities). The entity distributing dividends or profits is liable for withholding tax (WHT) at a rate of 4.1%. Nevertheless, enterprises are subject to an additional tax rate of 4.1% on every amount or payment in kind that, as result of a tax audit, is construed as taxable income to the extent that it is an indirect distribution of such income that is not susceptible to further tax control, including income that has not been declared.

## *Corporate residence*

For income tax purposes, the following entities, among others, are considered as resident entities in Peru:

- Corporations duly incorporated in Peru.
- Branches, agencies, and permanent establishments (PE) in Peru of non-resident individuals or entities (the Regulations of the Peruvian income tax law provide the cases in which a PE is deemed to be established in Peru).
- Partnerships and limited liability companies.

## *Other taxes*

### *Value-added tax (VAT)*

As of 1 April 2011, the general rate of VAT is 18% (19% prior to 1 April 2011) and is applicable to the following operations:

- Sale of goods within the country.
- Rendering or first use of services within the country.
- Construction contracts.
- The first sale of real estate made by construction firms.
- Import of goods.

For all transactions, the vendor is subject to VAT, except in the case of importation of goods or services rendered abroad, but economically used within Peru, for which VAT is self-assessed by the importers and users, respectively.

The VAT law follows a debit/credit system, and input VAT may be offset by output VAT. Should excess input VAT be obtained in a particular month, it shall offset output VAT obtained during the following months, until it is exhausted. Cash refunds of excess input VAT may be made only if it is not possible to offset the excess input VAT related to the exportation of goods and services, as explained below, but not to domestic transactions.

The export of movable goods (including the sale of goods in the international zone of ports and airports) is not subject to VAT, nor is the exportation of certain services. Thus, VAT paid upon the acquisition of goods, performance of services, construction agreements, and the importation of goods related to exported goods or services creates a positive VAT export balance.

The positive balance may offset output VAT, income tax, or any other outstanding tax debt in favour of the central government. If the positive balance is not completely offset, as the amount of the aforementioned tax obligations is insufficient, the taxpayer may apply for a refund (which may be made in cash or by cheque).

### *Excise tax*
The sale of specific goods, including fuel, cigarettes, beer, liquor, and vehicles, is subject to excise tax.

Excise tax rates depend on the type of goods or services.

### *Financial transactions tax (FTT)*
As of 1 April 2011, FTT is applied at a rate of 0.005% (0.05% prior to 1 April 2011) on all debits and/or credits on bank accounts held by the taxpayers.

The following operations, among others, are exempted from the FTT:

- Operations made between accounts of the same holder.
- Credits to bank accounts for payment of salaries.
- Credits and debits to bank accounts of diplomatic representations and international organisations recognised in Peru.

Payments of FTT are deductible as expenses for income tax purposes.

### *Temporary net assets tax (TNAT)*
Companies subject to income tax are obliged to pay TNAT, except companies that are in preoperative stages or that commenced business on 1 January of the fiscal year in which TNAT must be paid.

The taxable basis is the value of the assets set forth in the taxpayer's balance sheet as of 31 December of the year prior to that of the tax payment, adjusted for deductions and amortisations accepted by the Peruvian law.

The amount of TNAT is determined by applying the following rates on the taxable basis:

- Up to 1 million Peruvian nuevos soles (PEN): 0%.
- Excess of PEN 1 million: 0.4%.

The amount paid for TNAT may be credited against the taxpayer's income tax.

## *Branch income*

Branches, agencies, and PEs of non-resident companies or entities incorporated in Peru are subject to income tax at a 30% rate on their Peruvian-source income.

For tax purposes, branches or subsidiaries are subject to the same obligations applicable to all companies in Peru, including income tax, VAT, FTT, filing of the corresponding income tax and VAT returns, issuance of invoices, etc.

Nevertheless, the following important differences between subsidiaries and branches resident in Peru must be taken into account:

- Branches are subject to income tax only for their Peruvian-source income, while subsidiaries are subject to income tax on their global-source income (both Peruvian and foreign income).

- For branches, the 4.1% rate for distribution of dividends is applied from the date the annual income tax return is submitted. Subsidiaries are subject to the 4.1% rate on the earlier of the date in which the corresponding shareholders agreement took place or the date when the beneficiary has the right to use the dividends distributed by the subsidiary.

## Income determination

### Inventory valuation
The first in first out (FIFO), average, specific-identification, retail, and normal or base-stock methods are allowed for inventory valuation. The last in first out (LIFO) method is not permitted.

### Capital gains
Capital gains are taxed as ordinary income.

### Dividend income
Cash dividends distributed to resident corporations are not subject to any taxes.

### Foreign income
A Peruvian corporation is taxed on foreign-source income. Foreign-source income is recognized upon accrual. No tax deferral is allowed on this type of income. Double taxation may be avoided by means of foreign tax credits.

## Deductions

### Acceptable payment methods
Obligations that are fulfilled through cash payments exceeding PEN 3,500 must be made via bank account deposits, wire transfers, payment orders, credit cards, non-negotiable cheques, or other means of payment provided by entities of the Peruvian financial system. Failure to use one of these payment methods when such an obligation exists will result in the disallowance of deductions for any expenses or costs for income tax purposes and the disallowance of a credit for the corresponding VAT.

### Expenses derived from transactions entered into with entities resident in tax havens
Certain expenses are not tax-deductible, including expenses incurred with respect to transactions with (i) entities resident in tax havens on the list attached to the Peruvian Income Tax Law regulations, (ii) PEs located in tax havens, or (iii) entities that generate revenues or income through tax havens.

Nonetheless, expenses incurred from the following transactions are excluded from the above-mentioned limitations:

- Interest on loans.
- Insurance premiums.
- Leases of aircraft or ships.
- Maritime freight.
- Fees for passing through the Panama Canal.

### Depreciation
Assets may be depreciated for tax purposes, via the straight-line method, at the following rates:

| Assets | Rate (%) |
|---|---|
| Buildings | 5 |
| Cattle (both labour and reproduction) and fishing nets | 25 |
| Vehicles (except trains) and any kind of ovens | 20 |
| Machines and equipment used for mining, oil and construction activities, excluding furniture, household, and office goods | 20 |
| Equipment for data processing | 25 |
| Machines and equipment acquired as of 1 January 1991 | 10 |
| Other fixed assets | 10 |

There is a special depreciation regime applicable for years 2010 and 2011 for buildings and constructions that, provided certain requirements are met, allows for depreciation at a 20% rate.

### Organisational and start-up expenses
Organisation expenses, pre-operating expenses (including initial operations and further expansion of operations), and interest accrued during the pre-operating period may be expensed in the first period of operation or amortised using the straight-line method over a maximum of ten years. However, once a company has elected to recover start-up costs via the straight-line method, it may revoke such election only upon receiving approval of the tax authorities.

### Profit sharing
Entities with more than 20 employees, provided they obtain taxable income during the fiscal year, must distribute a percentage (5%, 8%, or 10% depending on the industry) of their profits (the basis is the tax profit of the fiscal year) among their employees. The amount of distribution for each employee depends on the effective working days during the year and annual remuneration.

### Employee's retributions and health insurance premiums
Employee's retributions paid during a fiscal year may be deducted in such year, provided the payments are made by the employer before the term to file its annual income tax return expires. Likewise, health insurance premiums for employees, their spouses, and children are deductible.

### Vehicle expenses deductions
Vehicle expenses may be deducted, provided the vehicles are essential to a company's business activities and are continually used for such purpose. There is a limitation on the tax deductibility of car expenses, depending on the amount of income generated by the company. The number of company cars assigned to directors, managers, and representatives of a company may not exceed five under any circumstances.

Vehicles subject to these limitations are those classified in categories as A2, A3, and A4, pursuant to the provisions of the Ministry of Transport.

### Taxes
Other taxes assessable on properties and activities generating taxable income are deductible for income tax purposes.

### Net operating losses
Tax losses may be offset according to either of the following systems:

- Against net income generated within the following four fiscal years after the year in which the loss was generated. Any losses that are not offset within such period may not be carried forward to any later years.
- Against 50% of the net income generated in the following fiscal years after the year in which the loss was generated. Under this system, there is no time limitation for carrying forward the losses.

After choosing one of the aforementioned systems, the taxpayers may not change the system until any accumulated tax losses from prior fiscal years are exhausted. Losses may not be carried back to years prior to the year in which the loss was generated.

### Payments to foreign affiliates
Payment of royalties to non-resident affiliates is permitted and deductible from gross income.

## Group taxation

Group taxation is not permitted in Peru.

## Tax credits and incentives

### Early recovery of VAT
Companies in a preoperative stage with large projects in process may apply for early recovery of VAT prior to commencing operations. An investment agreement with the government (the Ministry of its sector) is required.

### Stability agreement
Investors may enter into stability agreements with the government, either under the general regime or specific regimes (i.e. mining and petroleum).

Under the general regime, investors may enter into Juridical Stability Agreements that guarantee the following advantages for a ten-year period:

- Stability of the income tax regime in force at the time the agreement is entered into with respect to dividends and profit distribution.
- Stability of the Peruvian government monetary policy, according to which there is a complete absence of exchange controls, foreign currency can be freely acquired or sold at whatever exchange rate the market offers, and funds can be remitted abroad without any previous authorisation.
- Right of non-discrimination between foreign and local investors.

Under the mining regime, local mining companies may enter into stability agreements of guarantees and investment promotion measures that guarantee the following for ten or 15 years:

- Stability of the overall tax regime.
- Stability of the overall administrative regime.
- Free disposition of funds (foreign currency) arising from export operations.
- No exchange rate discrimination.

- Free trade of products.
- Stability of special regimes for tax refunds, temporary importation, etc.

Oil companies may enter into stability agreements that guarantee the following for the term of the contract:

- Stability of the overall tax regime.
- Free disposition of funds (foreign currency) arising from export operations.
- Free convertibility of its funds.
- Free trade of products.

### *Investment promotion in the Amazon*
Certain tax benefits with regard to VAT and income tax have been established for taxpayers located in the area designated by the law as the 'Amazon' and that are engaged in the following activities:

- Agriculture and livestock enterprises.
- Aquaculture.
- Fishing.
- Tourism.
- Manufacturing activities linked to the processing, transformation, and commercialisation of primary products originating in the activities listed above and in forest transformation, provided these products are produced in the area.

### *Special zones – Centres of Export, Transformation, Industry, Commercialisation, and Services (CETICOS)*
CETICOS are geographical areas duly delimited with custom primary zone status and special treatment, destined to generate development poles through industrial, maquila, assembling, or storage activities. CETICOS are located in Paita, Ilo, and Matarani cities.

Agribusiness and agro-exporting activities may be performed within a CETICOS. Agribusiness activity is primarily the transformation of agro-farming products produced in the country. Such transformation must be carried out at CETICOS.

Companies engaged in industrial, maquila, or assembling activities, established or set up in the CETICOS, until 31 December 2012, are exempt from income tax, VAT, excise tax, municipal promotion tax, as well as from any other taxes, fees, contributions levied by the Central Administration, and even taxes that require express exempt regulation.

## *Withholding taxes*

Domestic corporations are required to withhold income tax with respect to income paid to non-resident entities at the following rates:

| Type of payment | WHT (%) |
|---|---|
| Interest on non-related party loans, provided certain requirements are fulfilled | 4.99 |
| Interest on related party loans | 30 |
| Interest paid by Peruvian financial entities or banks to foreign beneficiaries for credit lines used in Peru | 4.99 |
| Royalties | 30 |
| Digital services | 30 |

| Type of payment | WHT (%) |
|---|---|
| Technical assistance, provided that certain requirements are met (otherwise 30%) | 15 |
| Lease of vessels or aircraft | 10 |
| Dividends or profit distributions | 4.1 |
| Other income | 30 |

Note that resident taxpayers may not deduct the WHT of a third party, except in the case of loans provided by non-resident creditors, to the extent that the debtor has contractually assumed the obligation of bearing the WHT.

Capital gains derived from the sale of stocks through the stock exchange paid to a non-resident company have an income tax rate of 5% and are not subject to any withholding. In these cases, the income tax must be paid directly by the non-domiciled company.

Capital gains derived from the sale of stocks paid to resident individuals are subject to a 5% income tax rate, even though they are not sold through the stock exchange.

In the case of the services mentioned below that entail the execution of activities both in Peru and abroad, non-resident entities are only subject to tax on a percentage of gross income at the following rates:

| Type of payment | WHT (%) |
|---|---|
| Insurance | 7 |
| Lease of vessels | 80 |
| Lease of aircraft | 60 |
| Air transport | 1 |
| Maritime transport | 2 |
| Telecom services | 5 |
| International news services | 10 |
| Distribution of movies, records, and similar products | 20 |
| Rights for broadcasting live foreign TV shows within Peru | 20 |

### *Tax treaties*

Peru has entered into treaties with Canada, Chile, and Brazil regarding double taxation on income tax (the last three entered into in accordance with the Organisation for Economic Co-operation and Development (OECD) Model). Recently, Peru has entered into a double-taxation treaty (DTT) with Spain and Mexico (also entered into pursuant to the OECD Model), but the treaties have not yet entered into force, as the Peruvian Congress ratification required for such purpose is still pending. In addition, Peru is a member of the Andean Community of Nations (ACN), which also includes Bolivia, Colombia, and Ecuador.

Pursuant to the provisions of the tax treaties entered into in accordance with the OECD Model, income is taxable in the country of the service provider's residence, unless a PE is configured, in which case both countries are entitled to levy tax on income and the country of residence allows a credit for taxes paid in the other country.

On the other hand, according to the treaties with the ACN, income is taxable in the country in which its source is located, unless a PE is configured, in which case income tax is levied in the country where the PE is located. Thus, in transactions with entities resident from one of the member countries of the ACN, in certain cases income is taxable in Peru if the source of such income is located within Peru. For such purpose, the term 'source' is defined as the place where the activity, right, or goods that generates or will generate income is located.

## *Tax administration*

### *Returns*

According to law, the fiscal year must coincide with the calendar year. The filing deadline for the income tax return is generally the first week of April. The system is one of self-assessment, but the tax return filed with the tax authorities is subject to review.

### *Payment of taxes*

Income tax is paid in advanced instalments calculated based on monthly revenue, either by applying a 2% rate or by a factor equivalent to the effective tax rate on net revenue of the prior year. Income tax is paid in 13 instalments (12 monthly payments and the annual income tax return). As noted, the first 12 payments must be made on a monthly basis and the last payment is due at the time that the annual tax return is filed. Late payment of interim or final instalments is subject to moratorium interest. Excess payments are subject to indexation up to the date of reimbursement or application to future taxes.

### *Tax authority*

The tax authority in Peru is called 'Superintendencia Nacional de Administración Tributaria' (SUNAT). SUNAT is responsible for administering all of the aforementioned taxes (income tax, VAT, etc.). Companies resident in Peru must be registered with the tax administration (Taxpayer's Registry).

The Tax Court (Tribunal Fiscal) is a specialised court of law that is given an administrative level from the Economics and Finances Ministry, but is otherwise autonomous regarding its specific functions. Its mission is to rule over tax contingencies that may arise between the Tax Administration and the taxpayers, by interpreting and applying the corresponding tax legislation, issuing mandatory observance jurisprudence, establishing homogenous criteria, and providing legislation that continues to support the progress of the tax system.

## Significant developments

### Exchange of information on tax matters

The Exchange of Information on Tax Matters Act of 2009 (Republic Act (RA) No. 10021) became effective in 2010. The law was passed in order for the Philippine government to be compliant with the internationally-agreed tax standards required for the exchange of tax information with its tax-treaty partners. Among its salient features are the following:

- Among others, the Commissioner of Internal Revenue has the authority to inquire into bank deposit accounts and related information held by financial institutions if a specific taxpayer or taxpayers is/are subject of a request for the supply of tax information from a foreign tax authority pursuant to an international convention or agreement on tax matters to which the Philippines is a signatory or party of. The information obtained from the banks and other financial institutions may be used by the Bureau of Internal Revenue (BIR) for tax assessment, verification, audit, and enforcement purposes.
- A taxpayer subject of a request for the supply of tax information held by financial institutions from a foreign tax authority shall be duly notified in writing by the Commissioner of the request.
- Income tax returns of a specific taxpayer subject of a request for exchange of information by a foreign tax authority shall be open to inspection upon the order of the President of the Philippines, under rules and regulations as may be prescribed by the Secretary of Finance, upon recommendation of the Commissioner.
- The Commissioner has the authority to supply information which is at his disposal to a Foreign Tax Authority.
- The information received pursuant to the request for the supply of tax information from a foreign tax authority shall be kept confidential.

### Tax on life insurance policies

RA No. 10001 made several amendments to the taxation of life insurance policies in 2010. The rate of percentage tax on life insurance policies was reduced from 5% to 2% of the total premiums collected. Moreover, documentary stamp taxes (DST) rates on life insurance policies were also revised, as follows:

- Exempted if the amount of insurance does not exceed 100,000 Philippine pesos (PHP).
- PHP 10 for amounts exceeding PHP 100,000 but not exceeding PHP 300,000.
- PHP 25 for amounts exceeding PHP 300,000 but not exceeding PHP 500,000.
- PHP 50 for amounts exceeding PHP 500,000 but not exceeding PHP 750,000.
- PHP 75 for amounts exceeding PHP 750,000 but not exceeding PHP 1 million.
- PHP 100 for amounts exceeding PHP 1 million.

### *Value-added tax (VAT) exemption of certain expenses by senior citizens*
Congress passed 'The Expanded Senior Citizens Act of 2010' (RA No. 9994) which gives additional benefits and privileges to the elderly. Among the benefits is a 20% discount and exemption from the VAT on the sale of goods and services (medicines, medical and dental fees, transport fares, services in hotels and restaurants, admission fees in theatres and other places of leisure). The BIR has released a revenue regulation to clarify how the VAT exemption will be put in effect by affected establishments.

### *Excise tax on alcohol and tobacco products*
Pursuant to the provision of RA No. 9334, the excise tax on the following alcohol and tobacco products are increased effective 1 January 2011:

- Excise tax rates on alcohol products are increased by 8%.
- Excise tax on tobacco is increased from PHP 1.12 per kilogram to PHP 1.19 per kilogram.
- Excise tax on cigarettes packed by hand is increased from PHP 2.47 per pack to PHP 2.72 per pack.
- Excise tax on cigarettes packed by machines is increased from PHP 2.47 to PHP 27.16 per pack depending on net retail price to PHP 2.72 to PHP 28.30 per pack depending on net retail price.

## *Taxes on corporate income*

A domestic corporation is subject to tax on its worldwide income. On the other hand, a foreign corporation is subject to tax only on income from Philippine sources *(see the sub-sections on Resident foreign corporations and Non-resident foreign corporations below)*.

### *Domestic corporations*
The following corporate income tax (CIT) rates apply to domestic corporations:

| Income | CIT rate (%) |
|---|---|
| In general, on net income from all sources | 30 |
| Minimum corporate income tax (MCIT) on gross income, beginning in the fourth taxable year following the year in which business operations commence. MCIT is imposed where the CIT at 35% is less than 2% MCIT on gross income. | 2 |
| **Proprietary educational institutions and non-profit hospitals:** | |
| On net taxable income if gross income from unrelated trade, business, and other activities does not exceed 50% of the total gross income from all sources | 10 |
| On total net taxable income if gross income from unrelated activities exceeds 50% of income | 30 |
| Non-stock, non-profit educational institutions (all assets and revenues used actually, directly, and exclusively for educational purposes) | Exempt |

Certain passive income from domestic sources is subject to final tax rather than ordinary income tax *(see the Income determination section)*.

### *Improperly accumulated earnings tax*
An improperly accumulated earnings tax of 10% is imposed on improperly accumulated income. The tax applies to every corporation formed or used for the purpose of avoiding income tax with respect to its shareholders, or the shareholders of any other corporation, by permitting earnings and profits to accumulate instead of being divided

or distributed. Exceptions are made for publicly held corporations, banks and non-bank financial intermediaries, and insurance companies.

### *Resident foreign corporations*
Resident foreign corporations are taxed in the same manner as domestic corporations (except on capital gains on the sale of buildings not used in business, which are taxable as ordinary income), but only on Philippine-source income. International carriers are subject to an income tax of 2.5% on their gross Philippine billings. Where there is a tax treaty, the preferential rate provided in it applies.

Income of offshore banking units (OBUs) and foreign currency deposit units (FCDUs) of depository banks from foreign currency transactions with non-residents, other OBUs, or FCDUs and local commercial banks (including branches of foreign banks) authorised by the Bangko Sentral ng Pilipinas (central bank) to transact business with OBUs and FCDUs are exempt from all taxes except net income specified by the Secretary of Finance upon recommendation of the Monetary Board. Interest income from foreign currency loans granted to residents other than OBUs or local commercial banks shall be subject to a 10% final income tax.

### *Non-resident foreign corporations*
In general, non-resident foreign corporations are taxed on gross income received from sources within the Philippines at 30%, except for reinsurance premiums, which are exempt, and on interest on foreign loans, which is taxed at 20%. Dividends from domestic corporations are subject to a final withholding tax (WHT) at the rate of 15% if the country in which the corporation is domiciled does not impose income tax on such dividends or allows a tax deemed paid credit of 15%. If the recipient is a resident of a country with which the Philippines has a tax treaty, the treaty rate applies, if lower. Otherwise, the normal corporate rates apply.

Rentals and charter fees payable to non-resident owners of vessels chartered by Philippine nationals on leases or charters approved by the Maritime Industry Authority are subject to a final tax of 4.5%. Rentals, charter fees, and other fees payable to non-resident lessors of aircraft, machinery, and other equipment are subject to a final tax of 7.5%.

Regional or area headquarters of multinational corporations that do not earn or derive income from the Philippines, and that act as supervisory, communications, and coordinating centres for their affiliates, subsidiaries, or branches in the Asia-Pacific region and other foreign markets are not subject to CIT.

## *Corporate residence*

A domestic corporation is a corporation that is created or organized under Philippine laws. A foreign corporation that is duly licensed to engage in trade or business within the Philippines is referred to as a 'resident foreign corporation'.

### *Permanent establishment (PE)*
The business profits in most Philippine treaties permits Philippines to tax only those profits attributable to a PE. While Philippine treaties adopt the United Nations (UN) Model Convention, Organisation for Economic Co-operation and Development (OECD) commentaries have often been cited by tax authorities to support their interpretation of treaty provisions. The main implication is that most Philippine treaties contain a rule

deeming a PE to arise when services are performed in the Philippines for a specified period of time.

## Other taxes

### Value-added tax (VAT)

VAT applies to practically all sales of services and imports, as well as to sales, barter, exchange, or lease of goods or properties (tangible or intangible). The tax is equivalent to a uniform rate of 12%, based on the gross selling price of goods or properties sold, or gross receipts from the sale of services. On importation of goods, the basis of the tax is the value used by the Bureau of Customs in determining tariff and customs duties plus customs duties, excise taxes, if any, and other charges. Where the valuation used by the Bureau of Customs is by volume or quantity, the VAT basis is the landed cost plus excise taxes, if any.

Certain transactions are zero-rated or exempt from VAT. Export sales by VAT-registered persons are zero-rated.

Certain sales of services exempt from VAT, including services provided by financial intermediaries, are subject to percentage taxes based on gross sales, receipts, or income. A 3% percentage tax also applies to persons who are not VAT-registered because their annual sales or receipts do not exceed PHP 1.5 million.

### Fringe benefits tax

A final tax of 32%, payable by the employer, is imposed on the grossed-up monetary value of fringe benefits (e.g. housing, expense accounts, vehicles of any kind, household personnel, interest on loans at lower than market rates (the current benchmark rate is 12%), membership dues for social and athletic clubs, foreign travel expenses, holiday and vacation expenses, educational assistance, insurance) furnished or granted to managerial or supervisory personnel by the employer. An exception is for fringe benefits required by the nature of or necessary to the trade, business, or profession of the employer, or when the fringe benefit is for the convenience or advantage of the employer.

The following fringe benefits are not subject to the tax:

- Those authorised and exempted from tax under special laws.
- Contributions of the employer for the benefit of the employee to retirement, insurance, and hospitalisation benefit plans.
- Those granted to rank-and-file employees (however, the employees may be subject to WHT on compensation).
- Those of relatively small value or de minimis benefits.

The fringe benefits tax is payable on the calendar quarter basis and is an additional deductible expense for the employer. Fringe benefits already subjected to fringe benefits tax will no longer be included in the employee’s taxable income.

The grossed-up monetary value of the fringe benefit is generally computed by dividing the actual monetary value of the benefit by 68%.

### Excise taxes

Excise tax is payable at varying rates on alcohol products, tobacco products, petroleum products, mineral products, and automobiles. Excise tax is also payable on all goods commonly or commercially known as jewelry, whether real or imitation; perfumes and toilet waters; and yachts and other vessels intended for pleasure or sport at 20% of the wholesale price or value of the importation used by the Bureau of Customs in determining tariff and custom duties.

### *Documentary stamp tax (DST)*

DST is payable at varying rates on various documents and transactions. The following table contains selected examples:

| Taxable document/transaction (tax base) | Rate |
|---|---|
| Original issue of shares | PHP 1.00 for every PHP 200 or fractional part of par value |
| Sale, barter or exchange of shares of stock listed and traded through the local stock exchange | Exempt |
| Other sales agreement, agreement to sell, memoranda of sales, delivery or transfer of shares or certificates of stock | PHP 0.75 for every PHP 200 or fractional part of par value |
| Certificate of profits, interest in property or accumulations | PHP 0.50 for every PHP 200 or fractional part of face value |
| Non-exempt debt instruments | PHP 1.00 for every PHP 200 or fractional value of the issue price. |
| Bank check, draft, certificate of deposit not bearing interest, other instruments | PHP 1.50 for each instrument |
| Life insurance policy | PHP 10 to PHP 100 depending upon the amount of insurance |
| Lease/hiring agreement | PHP 3.00 for the first PHP 2,000 or fractional part of amount stipulated in contract, and PHP 1.00 for every PHP 1,000 or fractional part in excess of PHP 2,000 for each year of contract term |
| Mortgage, pledge, deed of trust | PHP 20.00 for the first PHP 5,000 of amount secured, and P 10.00 for every PHP 5,000 or fractional part in excess of PHP 5,000 |
| Deed of sale, conveyance of real property | PHP 15.00 for each PHP 1,000 of consideration/value or fractional part thereof |

### *Local government taxes*

Local government units impose local (business) taxes and permit fees, which are generally based on the prior year's gross sales or gross receipts, and real property taxes, which are levied on the basis of a fixed proportion of the value of the real property (taxable value). Real property located in a province may be subject to real property tax of not more than 1% of its taxable value, while real property in a city (or municipality in Metro Manila) may be subject to real property tax of not more 2% of its taxable value.

## *Branch income*

The income tax rate on branch profits is the same as on corporate profits. In general, profits remitted abroad by a branch office are subject to a 15% tax rate, based on the total profits applied or earmarked for remittance, without any deduction for the tax component thereof. A lower rate may apply under certain tax treaties. Profits from qualified activities remitted by a branch registered with the Philippine Economic Zone Authority (PEZA) are exempt.

Regional operating headquarters (ROHQ) pay a tax of 10% of their taxable income. A ROHQ is a branch established in the Philippines by a multinational company that is engaged in any of the following services: general administration and planning, business planning and coordination, sourcing and procurement of raw materials and components, corporate finance advisory services, marketing control and sales promotion, training and personnel management, logistic services, research and development services and product development, technical support and maintenance, data processing and communication, or business development.

## *Income determination*

### *Inventory valuation*

Inventories are generally stated at cost or at the lower of cost or market. Last in first out (LIFO) is not allowed for tax purposes. Generally, the inventory valuation method for tax purposes must conform to that used for book purposes.

### *Capital gains*

Capital gains arise from the sale or exchange of ‘capital assets’. Capital assets are property held by the taxpayer (whether or not connected with its trade) other than the following:

- Inventories or property held primarily for sale to customers in the ordinary course of business.
- Real property or depreciable property used in trade or business.
- Property of a kind that would be included in the inventory of the taxpayer if on hand at the close of the taxable year.

Capital losses are deductible only to the extent of capital gains.

There are no holding period requirements for capital assets of corporations.

A 6% final tax is imposed on the higher of the gross selling price or fair market value upon the sale, exchange, or disposition of land or buildings not actually used in the business of a corporation. The tax is withheld by the buyer at the time of sale.

Net capital gains derived from the sale, exchange, transfer, or similar transactions of shares of stock not traded through a local stock exchange are taxed at 5% of gains not over PHP 100,000, and 10% of gains in excess of PHP 100,000. Sales of shares of stock listed and traded on a local stock exchange, other than the sale by a dealer in securities, are subject to a stock transaction tax of 0.5%, based on the gross selling price.

Capital gains from the sale of bonds, debentures, or other certificates of indebtedness with a maturity of more than five years are exempt from tax.

A tax is levied on every sale, barter, exchange, or other disposition through an initial public offering (IPO) of shares of stock in closely held corporations. A ‘close corporation’ is any corporation of which at least 50% in value of the total outstanding capital stock, or at least 50% of the total combined voting power of all classes of stock entitled to vote, is owned directly or indirectly by, or for, not more than 20 individuals. The tax rates provided hereunder are based on the proportion of the gross selling price, or gross value in money, of the shares of stock sold, bartered, exchanged, or otherwise disposed of to the total outstanding shares of stock after listing on the local stock exchange.

| Proportion of sale to total shares | Tax rate (%) |
|---|---|
| 25% or less | 4 |
| Over 25% but not over 33.33% | 2 |
| Over 33.33% | 1 |

### *Dividend income*
Dividends received by a domestic or resident foreign corporation from another domestic corporation are not subject to tax. These dividends are excluded from the taxable income of the recipient.

Dividends received by a non-resident foreign corporation from a domestic corporation are subject to a final WHT at the rate of 15% if the country in which the corporation is domiciled either does not impose income tax on such dividends or allows tax deemed paid credit of 15%. If the recipient is a resident of a country with which the Philippines has a tax treaty, the treaty rate applies if lower. Otherwise, the normal CIT rate of 30% applies.

### *Stock dividends*
A Philippine corporation can distribute stock dividends tax-free, proportionately to all shareholders.

### *Interest income*
Interest on bank savings, time deposits, and money market placements received by domestic or resident foreign corporations from a domestic corporation are subject to a final tax of 20%.

Interest income of domestic or resident foreign corporations from FCDU deposits is subject to a final tax of 7.5%. Such income is excluded from gross income reportable in CIT returns.

Interest income of OBUs and FCDUs from foreign currency loans granted to residents other than OBUs or local commercial banks shall be subject to 10% tax.

### *Royalty income*
Royalties received by domestic or resident foreign corporations from a domestic corporation are subject to a final tax of 20%.

### *Other significant items*
Other items exempt from CIT include the following:

- Proceeds of life insurance policies.
- Return of policy premium.
- Gifts, bequests, and devises.
- Interest on certain government securities.
- Income exempt under a treaty.
- Gains from sale, exchange, or retirement of bonds.
- Gains from redemption of shares of stock in mutual fund companies.

### *Foreign income*
A Philippine (domestic) corporation is taxed on its worldwide income. A domestic corporation is taxed on income from foreign sources when earned or received, depending on the accounting method used by the taxpayer.

Income earned through foreign subsidiary is taxed only when paid to a Philippine resident shareholder as dividend. Meanwhile, income earned through a foreign branch is taxed as it accrues. The losses incurred by the foreign branch are deductible against other income earned by the Philippine corporation.

Double taxation is generally relieved through a credit for foreign taxes. However, a taxpayer can take a deduction for foreign taxes instead, if that leads to a more favourable outcome.

## *Deductions*

Note that corporate taxpayers are given the option to avail themselves of the optional standard deduction computed at 40% of gross income. The optional standard deduction is in lieu of the itemised operating expenses.

### *Depreciation and depletion*
Depreciation is generally computed on a straight-line basis, although any reasonable method may be elected if the aggregate amount of depreciation, plus salvage value at the end of the useful life of the property, will equal the cost of the property. Gain on the sale of depreciated property is taxable as ordinary income. Generally, book depreciation should conform to tax depreciation, unless the latter includes incentives.

Properties used in petroleum operations may be depreciated over a period of ten years using the straight-line or declining-balance method, at the option of the service contractor. Properties used in mining operations with expected life of more than ten years may be depreciated over any number of years between five years and their expected life.

A cost depletion allowance is available as follows:

- For oil and gas wells, depletion is based on actual reduction in flow and production ascertained, not by flush flow, but by the settled production or regular flow.
- For mines, depletion is allowable up to an amount not to exceed the market value, as used for purposes of imposing the mining *ad valorem* taxes, of the products mined and sold during the year.

### *Interest expenses*
The allowable deduction for interest expense is reduced by an amount equal to 33% of interest income that is subject to final tax.

### *Charitable contributions*
The deduction for charitable contributions ordinarily may not exceed 5% of taxable income. However, contributions to certain institutions are 100% deductible, subject to certain conditions.

### Entertainment expenses

Entertainment, amusement, and recreation expenses should not exceed 0.5% of net sales for taxpayers engaged in sale of goods or properties, or 1% of net revenue for taxpayers engaged in sale of services, including professionals and lessors of properties.

### Special deductions

Special deductions are allowed for certain businesses (e.g. insurance, mining, petroleum, and real estate investment trust).

### Taxes

Corporate taxpayers can claim a deduction for all taxes paid or accrued within the taxable year in connection with their trade or business, except for the following:

- Philippine CIT.
- Income taxes imposed by authority of any foreign country, unless the taxpayer elects to take a deduction in lieu of a foreign tax credit.
- Estate and donor's taxes.
- Taxes assessed against local benefits of a kind tending to increase the value of the property assessed.

In the case of a foreign corporation, deductions for taxes are allowed only if they are connected with income from sources within the Philippines.

### Net operating losses

A net operating loss for any taxable year immediately preceding the current taxable year, which had not been previously offset as a deduction from gross income, may be carried over as a deduction from gross income for the next three consecutive taxable years immediately following the year of this loss (except losses during the period when the taxpayer was tax-exempt), provided there has been no substantial change in the ownership of the business or enterprise.

For mines, other than oil and gas wells, a net operating loss calculated without the benefit of incentives provided for under Executive Order (EO) No. 226, or the Omnibus Investments Code of 1987, as amended, incurred in any of the first ten years of operation may be carried over as a deduction from taxable income for the next five years immediately following the year of such loss.

Loss carrybacks are not allowed.

### Payments to foreign affiliates

A Philippine corporation can claim a deduction for royalties, management service fees, and interest charges paid to foreign affiliates, provided such amounts are equal to what it would pay an unrelated entity, and the appropriate WHTs are withheld and remitted.

The registration of licensing and management agreements, now known as technology transfer arrangements (TTAs), has been liberalised. Only TTAs not conforming to certain provisions of the Intellectual Property Code require approval by, and registration with, the Documentation, Information, and Technology Transfer Bureau of the Intellectual Property Office (formerly Bureau of Patents, Trademarks, and Technology Transfer) to render the contracts enforceable.

### Head office expense allocations
A resident foreign corporation is allowed to claim allocated head office expenses as a deduction, subject to compliance with certain requirements.

## Group taxation

Group taxation is not permitted in the Philippines.

### Transfer pricing
There are no specific consolidated transfer pricing rules in the Philippines, but the OECD transfer pricing guidelines are being used until the tax authorities issue transfer pricing regulations.

### Thin capitalisation
There are no thin capitalisation rules in the Philippines.

### Controlled foreign company (CFC) regime
There are no CFC rules in the Philippines.

## Tax credits and incentives

### Export incentives
Tax incentives available to export enterprises registered with the Board of Investments (BOI) are as follows:

- Income tax holiday (ITH) giving full exemption from CIT for six years for pioneer firms and those locating in less-developed areas and four years for non-pioneer firms from the date of commercial operation, or target date of operation, whichever is earlier. Expanding export-oriented firms are given three years. If prescribed conditions are met, an income tax holiday may be extended by up to three years. In no case, however, can an income tax holiday exceed eight years. Subject to certain exceptions, new and expansion projects located in the National Capital Region (NCR) or Metro Manila are no longer entitled to the income tax holiday.
- Tax and duty exemption on imported spare parts and supplies for export producers with a customs bonded manufacturing warehouse exporting at least 70% of annual production, if foreign-owned or 50%, if Filipino-owned.
- Full deduction of the cost of major infrastructure undertaken by enterprises in less-developed areas.
- Additional deduction of 50% of the incremental labour expense if the prescribed ratio of capital assets to annual labour is met and 100% of the incremental labour if located in less-developed areas within five years from date of registration (this incentive cannot be availed of simultaneously with the income tax holiday).
- Ten-year exemption from taxes and duties on importation of breeding stock and genetic materials.
- Tax credit on domestic breeding stocks and genetic materials (ten years).
- Exemption from wharfage, any export tax, duty, impost, or fees.
- Tax credits equivalent to taxes and duties paid on purchases of raw materials, supplies, and semi-manufactured products forming part of the products for export.

### Other incentives
Export and free-trade enterprises, information technology (IT) enterprises, and special economic zone developers/operators (including IT buildings located in Metro Manila

P

and IT parks) registered with PEZA are entitled to an income tax holiday of six years for pioneer firms and four years for non-pioneer firms. Foreign articles brought into the zones will be exempt from import duties and taxes. Local purchases of goods from VAT-registered suppliers outside the economic zones are zero-rated. After the lapse of the income tax holiday incentives, enterprises registered and operating within special economic zones/export processing zones (EPZ) will pay only 5% final tax on gross income earned, in lieu of paying all local and national taxes.

A regional or area headquarters established in the country as a supervisory, communications, and coordination centre for a corporation's subsidiaries, affiliates, and branches in the Asia-Pacific region, and whose headquarters do not derive income from the Philippines, are not subject to any CIT nor VAT and are entitled to certain non-tax incentives.

ROHQ that are allowed to derive income in the Philippines by performing qualifying business services to its affiliates, subsidiaries, or branches in the Philippines, in the Asia-Pacific Region, and other foreign markets may avail itself of the following incentives:

- Income tax at the preferential rate of 10% of its taxable income.
- Exemption from all kinds of local taxes, fees, or charges imposed by a local government unit, except real property tax on land improvements and equipment.
- Tax and duty-free importation of equipment and materials for training and conferences which are needed and used solely for its functions as ROHQ and which are not locally available, subject to the prior approval of the BOI.
- Importation of new motor vehicles, subject to the payment of corresponding duties and taxes.
- Exemption from travel tax, specific immigration fees, and requirements, subject to certain conditions.

The following are the incentives granted to exporters under the Export Development Act (Republic Act No. 7844):

- Exemption from Presidential Decree No. 1853 (requiring 100% of Letter of Credit), provided that the importation shall be used for the production of goods and services of export.
- Tax credit for incremental export performance. The tax credit for increase in current export revenues shall be computed as a percentage to be applied on the incremental export revenue converted to pesos at the current rate. The percentages or rates are as follows:
  - For the first 5% increase in annual export revenues over the previous year: 2.5%.
  - For the next 5% increase: 5.0%.
  - For the next 5% increase: 7.5%.
  - In excess: 10.0%.

  Note that this incentive is not available for exporters enjoying ITH or VAT exemption or whose local VAT is below 10%.

In addition to the above incentive, all existing incentives being enjoyed by the enterprise if registered with the BOI, PEZA, Subic Bay Metropolitan Authority (SBMA), Clark Development Corporation (CDC), or other ecozone regulating agencies.

### *Foreign tax credit*
Domestic corporations are allowed to claim a credit for any income taxes paid to a foreign country, provided that the taxes are not claimed as deductions. Foreign corporations are not allowed foreign tax credits.

Credits for foreign taxes are determined on a country by country basis. The amount of foreign tax credit in respect to the tax paid in a country shall not exceed the same proportion of the tax against which the tax credit is taken, which the taxpayer's income from the country bears to its entire taxable income. There is, however, a further limitation based on the total amount of foreign-sourced income that the taxpayer earns. The total amount of foreign tax credits shall not exceed the same proportion of the tax against which the tax credit is taken, which the taxpayer's foreign-sourced income bears to its entire taxable income.

## *Withholding taxes*

Corporations and individuals engaged in business and paying certain types of income to non-residents are required to withhold the appropriate tax, which generally is 30% in the case of payments to non-resident foreign corporations or 25% for non-resident aliens not engaged in trade or business. *For WHT on resident corporations, see the discussions in the Income determination section.*

### *Tax treaty rates*
For countries with which the Philippines has concluded tax treaties, the taxes to be withheld are as follows:

As of April 2011:

| Recipient | Dividends (%) (1) | Interest (%) (2) | Royalties (%) |
|---|---|---|---|
| Australia | 15/25 (3, 4) | 10/15 (5) | 15/25 (6) |
| Austria | 10/25 (37) | 10/15 (5, 8) | 10/15 (6, 9) |
| Bahrain | 10/15 (7) | 10 | 10/15 (10) |
| Bangladesh | 10/15 (11) | 15 | 15 |
| Belgium | 10/15 (7) | 10 | 15 |
| Brazil | 15 /30 | 10/15 (5) | 15/25 (12) |
| Canada | 15/25 (3, 7) | 10/15 (5) | 25 (9) |
| China, P.R | 10/15 (7) | 10 | 10/15 (13) |
| Czech Republic | 10/15 (7) | 10 | 10/15 (14) |
| Denmark | 10/15 (11) | 10 | 15 |
| Finland | 15/30 (3, 7) | 10/15 (5) | 15/25 (15) |
| France | 10/15 (3, 7) | 10/15 (5) | 15 |
| Germany | 10/15 (11) | 10/15 (5, 16, 17) | 10/15 (13) |
| Hungary | 15/20 (3, 11) | 15 | 15 (9) |
| India | 15/20 (3, 7) | 10/15 (5, 17) | 15/30 (6) |
| Indonesia | 15/20 (3, 11) | 10/15 (5) | 15/25 (6) |
| Israel | 10/15 (7) | 10 | 15 (9) |
| Italy | 15 | 10/15 (5) | 15/25 (6, 18) |
| Japan | 10/15 (3, 7) | 10 | 10/15 (20) |
| Korea, Rep. of | 10/25 (3, 11) | 10/15 (5) | 10/15 (6) |

P

# Philippines

| Recipient | Dividends (%) (1) | Interest (%) (2) | Royalties (%) |
|---|---|---|---|
| Malaysia | 15/25 | 15 | 15/25 (6, 18) |
| Netherlands | 10/15 (7) | 10/15 (5, 16, 17) | 10/15 (6) |
| New Zealand | 15/25 | 10 | 15/25 (6) |

| Switzerland | 10/15 (7) | 10 | 15 |
| Thailand | 15/30 | 10/15 (5) | 15/25 (6, 18) |
| United Arab Emirates | 10/15 (7) | 10 | 10 |
| United Kingdom | 15/25 (3, 7) | 10/15 (5) | 15/25 (6, 20) |
| United States | 20/25 (3, 7) | 10/15 (5) | 15/25 (6, 9) |
| Vietnam | 10/15 (11) | 15 | 15 |

Notes

1. The lower rate generally applies if the beneficial owner of the dividends is a company with a substantial ownership in the dividend paying company.
2. Interest derived by a foreign government or its agencies is typically exempt from Philippine tax. Many treaties also contain special rules for both Philippine and home country taxation of interest paid on instruments secured by a government agency of one of the countries. Such provisions have been excluded from the analysis.
3. A 15% rate applies under domestic law if the home country exempts the dividend from tax or permits a 15% or greater credit for corporate taxes paid by the company paying the dividend.
4. Entitlement to the lower rate depends on how the dividend will be taxed in Australia.
5. The 10% rate applies to interest paid in respect of the public issues of bonds, debentures, or similar obligations.
6. The lower rate applies to royalties paid by an enterprise registered with the Philippine BOI and engaged in preferred areas of activity.
7. The threshold for substantial ownership is 10%.
8. The 10% rate also applies to interest paid by a company registered with the BOI and engaged in preferred pioneer areas of investment in the Philippines.
9. The treaty also contains a most-favoured-nation rule, limiting the Philippine tax on royalties to the lowest rate of Philippine tax that may be imposed on royalties of the same kind paid in similar circumstances to a resident of a third state.
10. The 15% rate applies to royalties arising from the use of, or the right to use, any copyright of literary, artistic, or scientific work including cinematograph films or tapes for television or broadcasting.
11. The threshold for substantial ownership is 25%.
12. The 25% rate applies to royalties arising from the use or the right to use trademarks and cinematographic films, films or tapes for television or radio broadcasting. The 15% applies to any other royalties.
13. The 10% rate applies to the use of, or the right to use, any patent, trademark, design or model, plan, secret formula or process, or from the use of, or the right to use, industrial, commercial, or scientific equipment, or for information concerning industrial, commercial, or scientific experience. Strictly, application of the rate is generally at the discretion of the Philippine Competent Authorities, but the Bureau of Internal Revenue (BIR) has never raised this as an issue.
14. The 10% rate applies to royalties arising from the use of, or the right to use, any copyright of literary, artistic, or scientific work (other than copyright of cinematograph films), any patent, trademark, design or model, plan, secret formula or process, or from the use of, or the right to use, industrial, commercial, or scientific equipment, or for information concerning industrial, commercial, or scientific experience.
15. The 15% rate applies to royalties paid by an enterprise registered and engaged in preferred areas of activities, and to royalties in respect of cinematographic films or tapes for television or broadcasting, and for the use of, or the right to use, any copyright. The 25% rate applies to other royalties.
16. The 10% rate also applies to interest paid in connection with the sale on credit of any industrial, commercial, or scientific equipment.
17. The 10% rate also applies to interest paid on any loans granted by a bank.

18. The 15% rate also applies to royalties in respect of cinematographic films or tapes for television or broadcasting.
19. The 10% rate applies to interest paid on government securities, or bonds or debentures. The 15% rate applies to any other interest income.
20. The 15% rate applies to royalties paid for the use of, or the right to use, cinematographic films and films or tapes for radio or television broadcasting.
21. The 7.5% rate applies to the lease of containers. The 10% rate applies to royalties paid by an enterprise registered with the BOI. The 25% rate applies to other royalties.
22. The 10% rate applies to royalties paid by an enterprise registered with the BOI and engaged in preferred pioneer areas of activity. The 15% rate applies to rentals from cinematographic films and tapes for television or broadcasting. The 25% rate applies to all other royalties.
23. The threshold for substantial ownership is 15%.
24. The 10% rate applies to royalties paid by an enterprise registered with the BOI and engaged in preferred pioneer areas of activity. The 20% rate applies to rentals from cinematographic films and tapes for television or broadcasting. The 15% rate applies to all other royalties.

## *Tax administration*

### *Returns*

Corporations should file their returns and compute their income on the basis of an accounting period of 12 months. This accounting period may be either a calendar year or a fiscal year. With prior approval of the Commissioner of Internal Revenue, corporations may change their accounting period from calendar year to fiscal year, or vice versa.

Corporate taxpayers file self-assessing returns. Electronic filing and payment of taxes are available under the Electronic Filing and Payment System (EFPS) of the BIR.

A domestic or resident foreign corporation is required to file income tax return on a quarterly basis. Within 60 days from the close of the first three quarters in its taxable year, the corporation must file in duplicate a return summarizing its gross income and deductions for the year to date. A final annual income tax return must be filed on or before the 15th day of the fourth month following the close of the tax year.

### *Payment of tax*

Every corporation files cumulative quarterly income tax returns for the first three quarters and pays the tax due thereon within 60 days after each quarter. A final adjustment return covering the total net taxable income of the preceding taxable year must be filed on the 15th day of the fourth month following the close of the taxable year. The balance of the tax due after deducting the quarterly payments must be paid, while the excess may be claimed as refund or tax credit. Excess estimated quarterly income taxes paid may be carried over and credited against estimated quarterly income tax liabilities for succeeding taxable years. Once the option to carry over has been made, such option is irrevocable for that taxable period, and no cash refund or tax credit certificate (TCC) is allowed.

## Significant developments

### Amendments to the corporate income tax (CIT) regulations

The most important amendments to the CIT regulations, which came into force as of 1 January 2011, affect the taxation of the following:

- Redemption of shares. Under the amended regulation, sale of shares (stocks) for the purpose of redemption are no longer subject to taxation as dividend income, but general taxation rules apply.
- EU/EEA seated investment and pension funds by ending the tax discriminatory treatment. Since 1 January 2011, investment and pension funds seated in EU/EEA may benefit from exemption on income derived from Poland if certain conditions are met.

### New value-added tax (VAT) rates

As of 1 January 2011, the standard VAT rate increased from 22% to 23%, the 7% reduced rate increased to 8%, and a separate 5% reduced rate was added. *See Value-added tax in the Other taxes section for more information.*

As of 1 January 2012, the standard VAT rate will apply to supplies of children's clothing and footwear. Prior to 1 January 2012, the 8% reduced VAT rate is applicable for those goods.

### New excise duty rates and rules

As of 1 September 2010, some excise duty rates increased and various new rules came into force. *See Excise duties in the Other taxes section for more information.*

## Taxes on corporate income

CIT is the only tax levied on corporate income. The CIT rate is 19%.

Polish residents are subject to tax on their worldwide income. Non-residents are taxed only on their Polish-sourced income. The tax authorities' right to tax a non-resident is further limited if the non-resident's home country concluded a double-tax treaty (DTT) with Poland. In this case, the Polish tax authorities are entitled to tax only the portion of the non-resident's income that is derived through a permanent establishment (PE) located in Poland. The exceptions relate to specific types of income such as royalties, interest, dividends, and capital gains that are taxed based on special treaty rules.

Further to these rules, the CIT applies to companies with foreign participation. Such companies may be set up as either limited liability companies or joint-stock companies. There is no limitation on the percentage of foreign participation. Both types are subject to the general CIT rules, including the 19% tax rate. The same rate applies to branches of foreign companies *(see the Branch income section for more information)*.

## Corporate residence

A company is considered to be a resident in Poland if its registered office or management is located in Poland.

From the group of taxpayers, certain entities are explicitly excluded in the CIT Law (e.g. Treasury, National Bank of Poland). As of 1 January 2011, EU/EEA based investment funds are also exempted on the grounds of such provision (before this date, only Polish investment funds enjoyed the exemption).

### Permanent establishment (PE) in Polish CIT Law

According to Polish CIT Law, a PE should be understood as:

- a permanent place of business through which a non-Polish tax resident conducts its business activities, in whole or in part, within the territory of Poland, in particular a branch, agency, office, factory, workshop, or place of extraction of natural resources
- a construction site, construction, assembly, or installation works carried on within the territory of Poland by non-Polish tax resident, or
- a person who, on behalf and for the benefit of non-Polish tax resident, operates in Poland, if such person holds and exercises a power of attorney to enter into agreements on one's behalf.

We note that Polish CIT Law:

- does not encompass any provisions concerning the period required for construction works to create a PE
- does not include provisions indicating that an independent agent does not create a PE, and
- does not include provisions indicating that actions of an auxiliary or preparatory character do not lead to creation of a PE in Poland.

### Permanente establishment (PE) from a DTT perspective

In general, the provisions of DTTs concluded by Poland are based on the Organisation for Economic Co-operation and Development (OECD) Model Tax Convention on Income and on Capital (OECD Model), except for provisions related to taxation of royalties, which are based on the United Nations (UN) Model Double Taxation Convention.

As a principle, treaties based on the OECD Model provide for the following concepts, which determine whether activities of a foreign entrepreneur constitute a PE (usually in Article 5):

- Fixed place of business concept.
- Dependant agent concept.
- Construction PE concept.

Note that some DTTs concluded by Poland also encompass other PE concepts (e.g. service PE concept or offshore PE concept).

## Other taxes

### Value added tax (VAT)

Polish VAT applies to the following activities:

- Supplies of goods and services within the territory of Poland.
- Exports of goods outside the territory of the European Union.
- Imports of goods from countries that do not belong to the European Union.
- Intra-community acquisitions of goods (imports from countries belonging to the European Union).
- Intra-community supplies of goods (exports to the countries belonging to the European Union).

#### VAT rates

As of 1 January 2011, the VAT rates are 23% (standard rate), 8%, 5%, 0%, and exemption.

The standard 23% VAT rate generally applies to the supply of all goods and services, except for those that are covered by special VAT provisions that provide other rates or treatments. Prior to 1 January 2011, the standard VAT rate was 22%.

Supplies covered by a reduced rate of 8% include, among others, supplies of pharmaceutical products and passenger transport services and also supply of goods for the Social Housing Programme (no greater than 150 square metres). Prior to 1 January 2011, this reduced rate was 7%.

Supplies covered by a reduced rate of 5% include books and journals, unprocessed food, and basic food. This reduced rate was not available prior to 1 January 2011.

Zero-rated activities include, among others, exports of goods to countries outside the European Union.

VAT-exempt supplies include, among others, certain financial, insurance, and educational services.

As of 1 January 2012, the standard VAT rate will apply to supplies of children's clothing and footwear. Prior to 1 January 2012, the 8% reduced VAT rate is applicable for those goods.

#### Basic calculation rules

In general, the VAT due equals the VAT on outputs decreased by the VAT on inputs (in other words, input VAT is deducted from output VAT). Input VAT may be deducted from output VAT when a business (with a VAT payer status) receives an invoice for goods or services purchased. Input VAT may not be deducted unless a purchased supply is linked to the VAT-able activities. Furthermore, the deductibility of input VAT is restricted by the VAT law with respect to the purchase of certain goods and services. In addition, subject to numerous conditions, output VAT may be reduced when receivables, resulting from VAT-able sales, become uncollectible.

#### VAT refunds

The Polish VAT law allows direct refunds when input VAT (available for deduction) exceeds output VAT.

A Polish business may also be entitled to the VAT refund owed by another country under certain circumstances. Likewise, a foreign business not registered for VAT purposes in Poland may be, in most cases, entitled to the refund of Polish VAT. If the respective countries belong to the European Union, the procedure is substantially simplified due to the EU Directive which provides favourable rules for businesses based in EU countries that are seeking VAT refunds in other EU countries (i.e. electronic VAT refunds are possible).

### Reporting rules

Generally, the VAT reporting period is one month. VAT returns should be submitted by the 25th day of the month following the VAT reporting period. All taxpayers may opt for a quarterly, instead of monthly, reporting period. Note that businesses involved in intra-community acquisitions or supplies of goods are obliged to submit additional VAT returns with respect to these particular transactions.

### International services

The treatment of international services largely depends on the place of supply, since it is determinative of whether particular services are subject to the Polish VAT. The Polish VAT applies only to those services that are supplied within Poland.

Generally, the place of supply depends on the recipient of services. If the recipient is a business entity, the place of supply is determined to be the recipient's country; if the recipient is a private person, the place of supply is determined to be the service provider's country. Thus, according to general rules, if a Polish entity supplies services to a foreign business entity, the place of supply is outside Poland (these services are not subject to Polish VAT); if a foreign company supplies services to a Polish business entity, the place of supply (taxation) is in Poland. However, these general rules are subject to several exceptions.

If services are supplied by a taxpayer without seat or fixed place of business in Poland and the place of supply (taxation) is Poland, the purchaser who is the Polish VAT taxpayer has to apply the reverse-charge mechanism. Since 1 April 2011, the reverse charge is mandatory (i.e. the foreign supplier cannot voluntarily register and settle the Polish VAT).

As of 1 April 2011, an obligatory reverse-charge mechanism also applies to a domestic supply of goods performed by a taxpayer not having seat or fixed place of business in Poland to a purchaser who is a taxpayer and has seat or fixed place of business in Poland or is a legal entity (and is not taxpayer) and has a seat in Poland.

## *Excise duties*

Excise duties are levied on the production, sale, import, and intra-community acquisition of 'excise goods', which are listed in the excise duty law and include (among others) alcohol, cigarettes, energy products (e.g. petrol, oils, gas), passenger cars, and electricity.

Depending on the excise goods in question, one of four methods of calculating excise tax may be applicable:

- A percentage of the taxable base.
- An amount per unit.
- A percentage of the maximum retail price.
- An amount per unit and a percentage of the maximum retail price.

The excise rate for car petrol is 1,565 Polish złoty (PLN) per 1,000 litres.

Passenger cars are subject to the following excise rates:

- 3.1% for cars with engine cubic capacity that does not exceed 2,000 cc.
- 18.6% for cars with engine cubic capacity that exceeds 2,000 cc.

Notwithstanding the above, Polish excise duty law provides for a wide system of excise duty exemptions as well as 0% taxation. Under specified circumstances, such preferential treatment may apply to specified goods that are otherwise taxed based on general rules. This concerns, for example, specific energy products used for other purposes than as a fuel or for heating.

On 1 September 2010, changes in excise came into force and set new rules related to the following areas:

- Taxation of illegal consumption of electricity.
- Changes in taxation of passenger vehicles.
- Movement of excise goods under suspension regime (EMCS).
- Importation of excise goods from non-EU countries and sending them forward with use of duty suspension arrangements.
- Changes in scope and conditions of certain excise duty exemptions.

### *Property tax*
Property tax rates are fixed by municipalities within limits set in the Law on Local Taxes and Fees. In 2011, land used for business purposes is subject to a rate limit of PLN 0.80 per square metre. Buildings used for business purposes are subject to a rate limit of PLN 21.05 per square metre.

### *Capital tax*
A share capital increase is subject to a 0.5% capital tax, payable by a company that receives a capital contribution. This tax applies equally to limited liability companies as well as joint-stock companies. A merger, division, or transformation of a company into another company is no longer subject to capital tax, even if the transaction results in a share capital increase for any party. A similar exemption applies to a capital increase resulting from an in-kind contribution, including a whole business or a branch thereof.

### *Custom duty*
As a member of the European Union, Poland belongs to a customs union, thus only goods imported from non-EU countries or exported from Poland to the non-EU countries are subject to customs duties and formalities. Moreover, all the Community customs regulations are directly applicable in Poland. The most important act is the Community Customs Code and its implementing provisions, as well as the Community Customs Tariff.

These regulations are supplemented with certain Polish national rules, especially in respect to procedures and specific areas which are not defined in the Community customs law (e.g. strict regulations concerning the export of works of art and animals, limits on the amount of cash that may be brought from Poland to non-EU countries).

## Branch income

Foreign businesses are allowed, under certain conditions, to establish their branch offices (exclusively within the scope of their 'foreign' business activity) and representative offices (exclusively with regard to promotion and advertising) in Poland.

A branch office almost always has PE status in Poland. Once a branch is established, the foreign company pays CIT at the standard rate of 19%, based on the income attributable to the operations of the Polish branch. For this purpose, as well as for accounting purposes, a branch is obliged to keep accounting books that include all the data necessary to establish the taxable base. In this respect, general income determination rules relevant to Polish companies apply to branches as well. In the few cases in which a branch can demonstrate, based on a DTT, that its business presence in Poland does not amount to a PE, its profits are not subject to Polish CIT.

## Income determination

The tax base is the overall income, which is the difference between aggregated taxable revenue and aggregated tax-deductible costs. A tax-deductible cost is defined as a 'cost incurred in order to generate revenue' as well as the cost incurred to 'protect a source of revenue'.

Subject to numerous exemptions, the tax base includes all sources of income. Consequently, there is no special treatment for income such as capital gains or interest.

In practice, taxable income is calculated by adjusting the profit reported for accounting purposes. The relevant adjustments are necessary due to differences between tax and accounting treatment of numerous revenue and cost items. As a result, the taxable base is usually higher than the accounting profit.

### Inventory valuation

Generally, the value of inventory shortages may be included as a tax-deductible cost. Other write-offs in the value of inventory are not recognised for tax purposes until the inventory in question is sold.

When inventory is lost or sold, a tax deduction is allowed for the costs incurred when the inventory was purchased. The methods acceptable for inventory valuation for tax (and accounting) purposes are standard cost, average (weighted) cost, first in first out (FIFO), and last in first out (LIFO).

### Capital gains

There is no separate capital gains tax. Capital gains or losses are aggregated with an entity's other taxable income or losses. Capital losses are tax-deductible.

### Domestic dividend income

Dividends received from Polish residents (domestic dividends) are excluded from overall income. Instead, such dividends are subject to a 19% WHT, which is withheld and remitted to the tax office by the payer of dividends. Based on a participation exemption, however, domestic dividends are not subject to the 19% WHT if the Polish beneficiary holds at least a 10% share in the paying company for at least two years.

As of 1 January 2011, the revenue arising from voluntary redemption of shares is no longer treated as a dividend for tax purposes and does not enjoy the benefits of the participation exemption (i.e. the method of redemption, whether voluntary or automatic, will matter).

### *Dividend income from abroad*

Generally, dividends collected by a Polish corporate tax resident, if paid by a non-resident, are treated as regular income and taxed at the standard CIT rate. CIT on such dividends paid in other countries may be credited proportionately against Polish CIT. The CIT law also provides for an 'underlying tax credit', which is related to the CIT paid by a foreign subsidiary under a foreign tax jurisdiction, subject to a number of conditions. Specifically, a DTT between Poland and the subsidiary's country of residence should be in place and the Polish recipient of the dividend should hold at least 75% of the shares in the foreign subsidiary.

Additionally, dividends received from entities seated in the European Union (including Poland), EEA member states, or Switzerland can benefit from CIT exemption, if the Polish company owns respectively at least 10% (in respect to companies seated in the EU/EEA member states) or 25% (in respect to companies seated in Switzerland) in the share capital of the payer for two consecutive years (and certain other conditions are met).

Dividends received from non-EU/non-EEA member states may benefit from underlying tax credit. If a Polish company or a PE of a company from a EU/EEA member state located in Poland receives a dividend from a company seated in a non-EU/non-EEA country, it may deduct the tax paid by the payer on profits out of which the dividend was paid. The deduction is only possible provided that the Polish company/company from EU/EEA, which PE is located in Poland, holds (for two consecutive works) at least 75% of shares of the dividend payer. The tax may be deducted in an appropriate proportion. Furthermore, the deduction is possible provided that there is a DTT. Based on the provisions of the relevant DTT or other agreement concluded by Poland, the Polish tax authority may exchange tax information with its counterparty.

### *Foreign income*

Resident corporations are taxed on their worldwide income unless there is an applicable DTT in place between Poland and the relevant country that provides that the foreign income shall be exempt from taxation in Poland *(see Foreign tax credit in the Tax credits and incentives section)*.

## *Deductions*

Generally, a tax-deductible cost is defined as a cost incurred in order to generate taxable revenue or to 'protect a source of income'. The last element of the definition of a tax-deductible cost was added a few years ago to reduce uncertainties surrounding the deductibility of business expenses that do not directly generate revenue.

The CIT law provides a list of items that are not deductible for tax purposes, even if the items meet the general conditions described above. This list contains over 60 items including, among others, the following:

- Written-off, lapsed accounts receivable.
- Entertainment costs.
- Accrued but unpaid interest.
- Accounting and comparable provisions.
- Tax penalties and penalty interest.

- A portion of the insurance premium paid on a passenger car (i.e. the portion calculated on the excess of the car value over EUR 20,000).
- A portion of the depreciation write-offs made on a passenger car (i.e. the portion calculated on the excess of the car value over EUR 20,000).

Furthermore, expenses incurred in connection with the acquisition of fixed and intangible assets (e.g. licenses, trademarks, know-how) are not deductible directly. Instead, the acquired assets are subject to depreciation. If such assets are sold, a business is entitled to deduct the net value (cost of acquisition reduced by the overall value of the tax depreciation allowances made). Similar treatment relates to the acquisition of shares or land, except that these particular assets are not depreciable. Therefore, the full cost of an acquisition of shares or land may be deducted when such assets are sold.

### *Depreciation*
Depreciation is treated as a tax-deductible cost. Generally, depreciation allowances are calculated based on the straight-line method and the maximum rates provided in the CIT law. If this is the case, a taxpayer deducts equal annual write-offs, calculated by multiplying the maximum rate of depreciation by the asset's initial value until the total value of write-offs equals the initial value (typically, the initial value equals the purchase price).

For certain categories of machinery and vehicles (but not passenger cars), the reducing-balance depreciation method may be applied. Under this method, the tax depreciation may be accelerated during the initial period of the asset's use by multiplying the statutory maximum rate by two. The rate is then applied to the net value of fixed assets (i.e. initial value reduced by earlier annual write-offs). The reducing-balance method is applied until the annual depreciation write-off equals the hypothetical write-off that would be made under the straight-line method. From this point, the depreciation allowance is taken based on the straight-line method for its remaining useful life.

The main categories of assets and the related statutory annual tax depreciation rate are as follows:

| Assets | Rate (%) |
|---|---|
| Various buildings and constructions | 1.5 to 10 |
| Machinery and equipment (general) | 7 to 20 |
| Machinery for road building and construction | 18 to 20 |
| Machinery for paper industry | 14 |
| Office equipment | 14 |
| Computers | 30 |

Apart from the above, the Polish CIT law includes provisions for accelerated depreciation (within specified limits) for assets used in deteriorated conditions and for second-hand assets.

### *Taxes*
Income tax and, in most cases, VAT are not deductible. However, VAT is deductible for CIT purposes if it cannot be offset against the company's output VAT. Other taxes, if paid in the course of business activities, are generally deductible in full.

### Net operating losses
A tax loss reported in a tax year may be carried forward over the next five consecutive tax years; however, in any particular tax year, the taxpayer may not deduct more than 50% of the loss incurred in the year in which it was reported. For example, a taxpayer that incurred PLN 100 annual loss in 2010 may carry it forward to 2011-2015. However, the maximum loss deduction in any of these years may not exceed PLN 50 (assuming that there are no other losses available for deduction).

Currently, there is no possibility to carry back tax losses in Poland.

### Payments to foreign affiliates
Deductions may be claimed for royalties, management services, and interest charges paid to foreign affiliates. However, note that interest expenses are subject to the thin capitalisation restrictions *(see Thin capitalisation in the Group taxation section for more information)*. Furthermore, note that transactions with related companies should be made according to the market conditions. Where a company shifts income to another entity (especially a foreign entity), the tax authorities may adjust the taxable base upward *(see Transfer pricing in the Group taxation section for more information)*.

## Group taxation

The CIT law includes provisions on group taxation (i.e. in theory, a group of companies) if it meets certain conditions and can be treated as a single taxpayer. However, the required conditions are extremely demanding and very few taxpayers of this type exist.

### Transfer pricing
Transactions between related parties should be conducted in accordance with the arm's-length principle. The tax authorities may increase the taxable base if the pricing used between related parties differs from what would have been used between unrelated parties in a similar business transaction and the difference results in income being shifted from a Polish taxpayer to another entity (whether a Polish resident or not). Similar rules apply to transactions between Polish residents and the residents of tax haven countries. These transactions may be subject to the transfer pricing principles even if the parties thereto are not related. The CIT law also contains detailed requirements for transfer pricing documentation.

Taxpayers can reduce the transfer pricing risk by applying for an advance pricing arrangement (APA). An APA decision shall be issued by the Minister of Finance in response to a taxpayer's application. An APA will oblige a taxpayer to follow a specified methodology when calculating the transfer prices applicable to transactions between related entities. In exchange, the tax authorities may not challenge the agreed upon methodology.

### Thin capitalisation
A portion of the interest paid by a Polish company on a loan granted by a qualified lender (a qualified shareholder or a qualified sister company) will not be considered a tax-deductible cost if the value of the Polish company's overall debt from the shareholders and other affiliates mentioned in the tax law exceeds three times the value of the Polish company's share capital (3:1 debt-to-equity ratio). A qualified shareholder is defined as a holder of 25% or more of the voting power of a Polish company. A qualified sister company is a company of which a shareholder holds at least 25% of the value of the shares.

## Tax credits and incentives

### Special Economic Zones (SEZs)

Polish legislation provides investment incentives related to business activities carried out in 14 zones defined as SEZs. A business entity can benefit from tax incentives, provided that the entity obtains a permit from the Ministry of the Economy to conduct business activities there and meets other legal requirements. Note that a CIT exemption applies only to income earned on activity conducted with an SEZ.

In general, the amount of the tax incentive depends on project location. For large enterprises, it can be 30%, 40%, or 50% of eligible expenditures (i.e. investment expenditures or two-year labour costs). In other words, the CIT exemption allows the investor to avoid paying tax up to the limit calculated on the basis of eligible expenditures and state aid intensity. In case of investment valued PLN 20 million and intensity aid of 40%, the investor would be entitled not to pay tax due up to PLN 8 million. If the available limit of the tax exemption exceeds the annual tax due generated on SEZ activity, the excess may be utilised in the following tax years. Consequently, in the case of significant investments, it is possible for businesses that run activities in the SEZs to enjoy exemption from income tax for a considerable period. The deadline for utilising available tax exemption is the end of 2020.

Note that in the case of small enterprises, the limit of the tax exemption may be increased by 20%. In the case of medium-sized enterprises, the limit of the tax exemption may be increased by 10%.

### Foreign tax credit

Resident corporations are taxed on their worldwide income unless there is an applicable DTT in place between Poland and the relevant country that provides that the foreign income shall be exempt from taxation in Poland. In all other cases (in particular, when the income is not covered by any treaty), Poland uses the ordinary credit method to avoid double taxation. Therefore, a Polish resident is liable for income tax imposed on its worldwide income, but the tax is proportionately reduced by the income tax paid abroad.

## Withholding taxes

### Domestic provisions: General rules

The general domestic WHT rate for dividends is 19%. Dividends encompass also income from liquidation of a company and the income from the redemption of shares (with the exception of gain from voluntary redemption, which is treated as a capital gain subject to 19% CIT rate in Poland if the gain is realised by a taxpayer from non-treaty country or the treaty includes a so-called real estate clause).

The general WHT rate on interest and royalties paid to non-residents is 20% (10% regarding services of sea or air transportation). These WHT rates may be reduced by DTTs.

There is also a 20% WHT on payments made to non-residents for intangible services (such as consulting services). However, if a payment is made to a country that has a DTT with Poland, this tax may be avoided with the completion of certain minimal administrative formalities. Few treaties treat payments for technical services as royalties (e.g. India).

### Special treatment: EU directives

The CIT law provisions and certain EU directives provide special treatment for dividends, royalties, and interest paid to numerous European countries.

When joining the European Union, Poland was granted a transitional period to phase out the WHT on interest and royalty payments paid by Polish corporate residents to associated EU or EEA companies. As of 1 July 2009, the WHT rate on these payments is 5%. Starting on 1 July 2013, a full exemption will apply. In general, the transitional rules, as well as the full exemption after 1 July 2013, only apply to interest and royalty payments between associated companies (parent-subsidiary relationships or sister-sister relationships) in which capital involvements are significant.

Dividends paid to corporate residents of EU and EEA countries are exempt from WHT, subject to certain conditions specified in the CIT law. The basic requirement is that the foreign beneficiary holds at least 10% of the shares in the Polish company for a minimum of two years. This condition is also fulfilled if the required period passes after the day of payment of the dividend. If the period is interrupted afterwards, the company is obliged to pay the tax with standard rate with interest.

Note that as of 1 January 2011, several additional conditions which have to be met to apply the reduced rate/exemption from the WHT based on the Directive were introduced (e.g. the company receiving the dividend/interest/royalty cannot be exempt from tax on all its income, regardless of its source; the recipient has to have ownership title to the shares in the Polish company).

Additionally, the amendments state that in order to enjoy the exemption from WHT on dividends and decreased WHT rate on interest and royalties, based on the Directives' provisions, the relevant DTT or other agreement concluded by Poland should allow exchange of tax information between the tax authorities of Poland and the country of the payment recipient. Currently, a binding treaty between Poland and Switzerland does not encompass such a provision. Hence, the Directive does not apply to payments made to tax residents of Switzerland. Given the fact that Poland did not conclude a DTT with Liechtenstein, payments made to tax residents of Liechtenstein should not benefit from the Directive.

### Treaty rates

If EU special rules do not apply, the domestic WHT rates can be decreased by a DTT concluded between Poland and the payment recipient's country of residence if certain administrative conditions are met (i.e. the payer obtains a valid certificate of a fiscal residence of the payment recipient/beneficial owner).

The following table lists the WHT rates as provided in the treaties concluded by Poland. Notably, the following table shows only rates that result from general treaty provisions; the treaties themselves occasionally include special provisions (applicable in special circumstances or to special entities) that provide lower WHT rates than the ones listed.

Furthermore, if a treaty rate is higher than a domestic one, the latter should apply.

| Recipient | Dividends (%) | Interest (%) | Royalties (%) |
|---|---|---|---|
| Non-Treaty | 19 | 20 | 20 |
| Treaty: | | | |
| Albania | 5 (1)/10 | 10 | 5 |

| Recipient | Dividends (%) | Interest (%) | Royalties (%) |
|---|---|---|---|
| Armenia | 10 | 5 | 10 |
| Australia | 15 | 10 | 10 |
| Azerbajian | 10 | 0 (2)/10 | 10 |
| Austria | 5 (3)/15 | 0 (4)/5 | 5 |
| Bangladesh | 10 (5)/15 | 0 (6)/10 | 10 |
| Belarus | 10 (7)/15 | 0 (79)/10 | 0 |
| Belgium | 5 (8)/15 | 0 (9)/5 | 5 |
| Bosnia & Herzegovina (Yugoslavian Treaty) | 5 (1)/15 | 10 | 10 |
| Bulgaria | 10 | 0 (10)/10 | 5 |
| Canada | 15 | 0 (11)/15 | 0 (12)/10 |
| Chile | 5 (13)/15 | 0 (74)/15 | 0 (75)/5 (14)/10 |
| China, P.R. | 10 | 0 (15)/10 | 10 (16)/10 of 70 (14) |
| Croatia | 5 (1)/15 | 0 (15)/10 | 10 |
| Cyprus | 10 | 0 (17)/10 | 5 |
| Czech Republic | 5 (18)/10 | 0 (10)/10 | 5 |
| Denmark | 0 (19)/5 (20)/15 | 0 (21)/5 | 5 |
| Egypt | 12 | 0 (22)/12 | 12 |
| Estonia | 5 (23)/15 | 0 (24)/10 | 10 |
| Finland | 5 (23)/15 | 5 | 5 |
| France | 5 (3)/15 | 0 | 0 (25)/10 |
| Georgia | 10 | 0 (26)/8 | 8 |
| Germany | 5 (3)/15 | 0 (27)/5 | 5 |

Notes

1. When the beneficial owner is a company which holds directly at least 25% of the capital of the company paying the dividends.
2. When interest is paid to the government, the central bank of the state, including local authorities or other government bodies.
3. When the beneficial owner is a company (other than a partnership) which holds directly at least 10% of the capital of the company paying the dividends.
4. When interest is paid to the government, a political subdivision, or a local authority in connection with:
   - a loan granted, insured, or guaranteed by a governmental institution for the purposes of promoting exports
   - a sale on credit of any industrial, commercial, or scientific equipment, or
   - any loan granted by a bank.
5. When the beneficial owner is a company which holds directly at least 10% of the capital of the company paying the dividends.
6. When the interest is paid:
   - to the Central Bank of Poland
   - to the Central Bank of Bangladesh
   - to the Government of the Republic of Poland or the Government of the Republic of Bangladesh, or

- in respect of a loan made or guaranteed or insured by the government of the other state, or any agency including a financial institution owned or controlled by the government.

7. When the beneficial owner is a company (other than a partnership) which holds directly at least 30% of the capital of the company paying the dividends.
8. When the beneficial owner is a company (other than a partnership):
   - which holds directly at least 25% of the capital of the company paying the dividends or
   - which holds directly at least 10% of the capital of the company paying the dividends, and the value of investments in the company is at least EUR 500,000 or is equal to the amount in the other currency.
9. When interest is paid:
   - on loan granted, guaranteed, or insured, or a credit granted, guaranteed, or insured, by a general system organized by the state, including political subdivisions or local authorities for purposes of promoting exports
   - on loan of whatever kind, except in the form of bearer securities, granted by a banking company, or
   - to other states, including political subdivisions and local authorities.
10. When interest is paid to the government, including local authorities, to the central bank or any financial institution controlled by that government, or on loans guaranteed by that government.
11. When interest is paid in respect of a loan made, guaranteed, or insured by the state or agreed public body.
12. Copyright royalties and other similar payments in respect of the production or reproduction of any literary, dramatic, musical, or artistic work (not including royalties in respect of motion picture films and works on film or videotape for use in connection with television).
13. When the beneficial owner is a company which controls directly 20% of the voting stock of the company paying the dividends.
14. For the use of, or the right to use any industrial, commercial, or scientific equipment.
15. When interest is paid:
   - to the government, a local authority, and the central bank or any financial institution wholly owned by that government or
   - to the other resident of the other state with respect to debt-claims indirectly financed by the government of the other state, a local authority, and the central bank or any financial institution wholly owned by the government.
16. For the use of, or the right to use, any copyright of literary, artistic, or scientific work, including cinematograph films, and films or tapes for radio or television broadcasting, or any patent, know-how, trademark, design or model, plan, secret formula, or process.
17. When interest is paid to the government, including political sub-divisions and local authorities, the central bank or any statutory body of the state with respect to loans or credits made or guaranteed by the government of the other state, including political sub-divisions and local authorities, the central Bank, or any statutory body of the other state.
18. When the beneficial owner is a company (other than a partnership) which holds directly at least 20% of the capital of the company paying the dividends.
19. When the beneficial owner is a company (other than a partnership) which holds directly at least 25% of the capital of the company paying the dividends, where such holding is being possessed for an uninterrupted period of no less than one year and the dividends are declared within that period
20. When the beneficial owner is a pension fund or other similar institution providing pension schemes in which individuals may participate in order to secure retirement benefits, when such pension fund or other similar institution is established, recognized for tax purposes and controlled in accordance with the laws of the other state.
21. When interest is paid:
   - on loan whatever kind granted, insured, or guaranteed by a financial institution owned or controlled by the state
   - in connection with the sale on credit of any industrial, commercial, or scientific equipment
   - in respect of a bond, debenture, or other similar obligations of the government of the state, or of a political subdivision or local authority, or
   - to the other state, or to a political subdivision or local authority.
22. When interest is paid to the government of the other state, including local authorities and the central bank.
23. When the beneficial owner is a company (other than a partnership) which holds directly at least 25% of the capital of the company paying the dividends.
24. When interest is paid to the government of the other state, including political subdivisions and local authorities, the central bank, or any financial institution owned by the government or on loans guaranteed by the government.
25. From copyright of literary, artistic, or scientific work.
26. When the beneficial owner is the government of the other state or central bank.
27. When the interest, subject to certain exceptions related to silent shareholders, is paid:
   - to the Government of Poland or Germany on a loan of whatever kind granted, insured, or guaranteed by a public institution for purposes of promoting exports
   - in connection with the sale on credit of any industrial, commercial, or scientific equipment
   - in connection with the sale on credit goods between companies, or
   - on any loan of whatever kind granted by a bank.
28. If the following conditions are met:
   - Interests paid to

P

    - the government, a political sub-division, or a local authority of the other contracting state or
    - the central bank of other contracting state.
  - When the beneficial owner is a resident of the other contracting state and is derived in connection with a loan or credit extended or endorsed by
    - Bank Handlowy (in scope of financing export and import) – for Poland
    - the Export-Import Bank of India (in scope of financing export and import) – for India
    - any institution in the other contracting state in charge of public financing of external trade, or
    - any other person, provided that the loan or credit is approved by the government of the first mentioned contracting state.
29. When the beneficial owner is the government, ministry, other governmental institution, municipality, central bank or any other bank wholly owned by the government of the other contracting state.
30. When the beneficial owner is a resident of the other contracting state and holds directly at least 25% of the voting power of the company paying the dividends.
31. Interest paid in connection with:
    - the sale on credit of any industrial, commercial, or scientific equipment
    - the sale on credit of any merchandise by one enterprise to another, or
    - on any loan of whatever kind granted by the bank.
32. When the beneficial owner is a company which holds directly at least 15% of the capital of the company paying the dividends.
33. If the following conditions are met:
    - When the payer of interests is the government or contracting state or a local authority of thereof.
    - Interest is paid to the government of other contracting state or local authority thereof (incl. financing institutions) wholly owned by other contracting state or local authority thereof.
    - Interest is paid to any other entity, including financial institutions, in relation to loans made in application of an agreement concluded between governments of contracting states.
34. When beneficial owner is the government of other contracting state, including local authorities thereof, the central bank, any financial institutions controlled by that government or any resident of the other contracting state with respect to debt-claims, guaranteed or indirectly financed by institutions mentioned above.
35. For payments connected with copyrights, literary, artistic, and scientific activity, including payments connected with films for cinemas and films and tapes for TV.
36. When the beneficial owner is a company which holds directly or indirectly, at least 20% of the capital of the company paying the dividends.
37. When interest is paid to the government or local authorities.
38. When interest
    - arising in contracting state and received by the government of the other contracting state, including political subdivision or a local authority thereof or the central bank of that other contracting state
    - arising in contracting state is paid in respect of loans and credits made or guaranteed:
      - by the Bank Handlowy – for Poland
      - by the Export-Import Bank of Korea and Korea Development Bank – for Korea
    - is paid in connection with the sale on credit of any industrial, commercial, or scientific equipment, or
    - is paid in connection with the sale on credit of any merchandise by one enterprise to another.
39. Interest paid to government or central bank.
40. When the beneficial owner is
    - the government of the other contracting state, entity, or any governmental institution or
    - a company which is a resident of the other contracting state and at least 25% of its capital is owned directly or indirectly by the entities mentioned above.
41. If the following conditions are met:
    - When the beneficial owner is:
      - the government of the other contracting state, entity, or governmental institution or
      - a company which is a resident of the other contracting state and at least 25% of its capital is owned directly or indirectly by the entities mentioned above
    - When interest is paid in connection with loans guaranteed by the entities mentioned above.
42. When interest is paid:
    - to the government, including the local authorities, to the central bank or any financial institution controlled by that government, or on loans guaranteed by that government or
    - to the resident in the other contracting state.
43. If the following conditions are met:
    - When the beneficial owner is other contracting state.
    - When interest is paid in connection with loans and credits granted by bank.
44. Dividends paid by:
    - a resident of Poland to a resident of Malaysia who is subject to Malaysian tax in respect thereof or
    - a resident of Malaysia to a resident of Poland who is subject to Polish tax in respect thereof.
45. Interest paid to resident of Poland on an approved loan or a long-term loan.
46. Royalties paid to resident of Poland by resident of Malaysia and approved by the competent authority of Malaysia.
47. If the following conditions are met:
    - When the beneficial owner is
      - a contracting state, a political subdivision, or a local authority, or The National Bank of Poland or Banko de Mexico or

- a recognized pension or retirement fund provided that its income is generally exempt from tax in this state.
- When interest
  - is paid by any of entities mentioned above
  - arises in Poland and is paid in respect of a loan for a period not less than three years granted, guaranteed, or insured by Banco de Comercio Exterior, S.N.C., Nacional Financiera, S.N.C. or Banco National de Obras y Servicios Publicos S.N.C., or
  - arises in Mexico and is paid in respect of a loan for a period not less than three years granted, guaranteed, or insured by PKO S.A., Corporation of Credit Insurance, and Bank Handlowy in Warsaw.

48. If the following conditions are met:
    - When the beneficial owner is a bank or insurance company.
    - When interest is derived from bonds and securities that are regularly and substantially traded on a recognized securities market.
49. When dividends are paid to the company which holds directly at least 10% of the capital paying the dividends on the day they are paid and has done (or will do) so for an interrupted 24–month period from which that date falls.
50. When interests is paid:
    - by a resident of Pakistan to a Polish company or enterprise on loans approved by the Ministry of Finance of the Government of Pakistan
    - to the State Bank of Pakistan from sources in Poland, or
    - to Bank Handlowy in Poland from the sources in Pakistan.
51. For payments of any kind received in consideration for the use of, or the right to use:
    - any copyright, patent, trademark, design or model, plan, secret formula, or process
    - an industrial, commercial, or scientific equipment or
    - motion picture films, and works on films and videotapes for use in connection with television.
52. For payments received in consideration of technical know-how concerning industrial, commercial, or scientific experience.
53. Interests paid in respect of:
    - a bond, debenture, or other similar obligations of the government,  state, political subdivision, or local authority thereof or
    - a loan or credit extended, guaranteed, insured, or refinanced by:
      - Central Bank of Philippines – for Philippines
      - Central Bank of Poland – for Poland or
      - other lending institutions as specified and agreed in letters of exchange between competent authorities of the contracting states.
54. When dividends are paid to the company which holds directly at least 25% of the capital stock of the company paying the dividends for an uninterrupted 24 month period prior to the payment.
55. If the following conditions are met:
    - When the debtor of such interests is the government, a political subdivision, or local authority.
    - When the interest is paid to the government of other contracting state, a political subdivision, or local authority thereof, or an institution or body in connection with any financing granted by them under an agreement between the governments of the contracting states.
    - Loans or credit made on central banks of contracting states and any other financial institution controlled by the state and financing external business which may be agreed upon between the competent authorities of the contracting states.
56. Interests paid to government, administrative, territorial, or the central bank.
57. Dividends paid by:
    - the company which is a resident of Singapore to a resident of Poland (as long as Singapore does not impose a tax on dividends in addition to the tax chargeable on the profits or income of a company) or
    - to government of either contracting state with respect to shares in joint stock companies of that other state.
58. Interest paid to government.
59. Interests paid to government, local authorities, or the central bank.
60. Exempt income tax in Sri Lanka, not exceeding 33 1/3% on the company which pays dividends and other than the additional tax not exceeding 6% on companies whose shares are not movable property situated in Sri Lanka for the purpose of the law of Sri Lanka relating to Estate duty.
61. Interests:
    - received by any banking institution which is a resident of contracting state
    - derived from contracting state of the other contracting state either directly or through any agency or
    - accruing to any company, partnership, or other body of persons resident in the contracting state for any loans in money, goods, and services or in any other form, granted by them to the government of the other contracting state, or to a state corporation, or to any state institution, or to any other institution, to the capital of which, the other contracting state has made any contribution, or to a credit agency, or an undertaking in that other contracting state with the approval of the government of the same state.
62. For payment in consideration, for the use of, or the right to use, any copyrights or cinematograph films.
63. As long as Switzerland will not tax royalties paid to foreign recipients, the payments are taxed only in the country of residence of the recipient (currently there is no WHT in Switzerland).

P

64. If the following conditions are met:
    - When recipient is a contracting state, or one of its local authorities, or the statutory body of either, including the central bank; or when interests are paid by a contracting state, or one of its local authorities, or the statutory body of either.
    - Such interest is paid in respect of any debt-claim or loan guaranteed, insured, or supported by a contracting state or another person acting on state's behalf.
65. Payments payable to contracting state or a state owned company in respect of tape or films.
66. Royalties made as consideration, for the alienation, or the use of, or the right to use, any copyright of literary, artistic, or scientific work, excluding cinematographic films or tapes for television or broadcasting.
67. When the beneficial owner is the government or a government institution.
68. When dividends are paid to a company which is the resident of the other contracting state and which holds directly at least 10% of the capital, paying the dividends on the day they are paid and has done (or will do so) for an uninterrupted 24–month period from which that date falls.
69. When interests are paid to the government, a political subdivision, or a local authority in connection with:
    - a loan granted, insured, or guaranteed by a governmental institution for the purposes of promoting exports
    - the sale on credit of any industrial, commercial, or scientific equipment, or
    - any loan granted by a bank.
70. When the beneficial owner is a company which holds directly at least 10% of the outstanding shares of the voting stock of the company paying the dividends.
71. When the beneficial owner is a company which holds directly at least 20% of the capital of the company paying the dividends.
72. When the beneficial owner is:
    - the government or a local authority or
    - the National Bank of Poland or the Central Bank of Uzbekistan Republic.
73. For payment of any kind, received in consideration, for the use of, or the right to use:
    - any patent, design or model, plan, secret formula, or process or
    - any information concerning industrial or scientific experience.
74. When interest is paid in respect of a loan made, guaranteed, or insured by the state or agreed public body.
75. Provided that Chile introduces a tax exemption on royalties in a DTT with another OECD country.
76. Treaty allows application of the domestic tax rate.
77. As long as Iceland does not levy tax at source of income, interest is taxable only in the contracting state of which the beneficial owner of the interest is a resident.
78. When interest is paid to the government, a political subdivision, or a local authority in connection with:
    - a loan granted, insured, or guaranteed by a governmental institution for the purposes of promoting exports
    - a sale on credit of any industrial, commercial, or scientific equipment
    - any loan granted by a bank
    - in respect of a bond, debenture, or other similar obligations of the government of a contracting state, or of a political subdivision or local authority thereof, or
    - to the other contracting state, or to a political subdivision or local authority thereof.
79. The interest arising in one contracting state might be exempt from tax in this contracting state in the amount agreed to by this contracting state provided that the transaction the interest arises from was permitted by this contracting state.
80. Provided that any new contribution is made to the capital of a company resident in Sri Lanka by a company resident in Poland.

## *Tax administration*

### *Returns*

The annual CIT return should be submitted to the tax office within three months following the end of the tax year.

### *Payment of tax*

The same deadline as the CIT return applies to the settlement of the annual CIT liability. In financial terms, the final settlement is not significant, since most of the annual liability is paid by CIT advances throughout the tax year.

The CIT advances should be paid for each month by the 20th day of the following month. Entities that started business activities (except for companies organised as a result of certain transformations) and entities whose gross sales revenue (including VAT) in the prior tax year did not exceed EUR 1,200,000 are entitled to opt to make advance settlements on a quarterly basis (instead of a monthly basis).

## Significant developments

2011 is a year of significant changes in the Portuguese tax regime.

### Memorandum of Understanding / Financial aid by the European Fund for Financial Stability

A Memorandum of Understanding (MoU) has been concluded between the Portuguese Republic and the European Commission, the European Central Bank, and the International Monetary Fund (IMF), within the scope of the Council Regulation (EU) No. 407/2010 of 11 May 2010, which establishes a European Financial Stabilisation Mechanism.

The MoU includes the measures agreed upon and to be implemented under the financial assistance to be granted to Portugal by the European Fund for Financial Stability. These measures should be introduced between 2011 and 2014. Technical memorandums with more detail on the measures announced are still expected.

These following measures impacting corporate tax have been announced:

**Corporate income tax (CIT)**

- Elimination of all reduced CIT rates.
- Limitation of deductions of losses in previous years according to the taxable matter,
- Reduction to three years of the carryforward period for tax losses.
- Revocation of subjective tax exemptions.
- Curbing of tax benefits, namely those subject to the sunset clause, as foreseen in the Tax Benefits Code.
- Strengthen of company car taxation rules.
- Limitation to 20% (currently 30%) of the reduction of the tax rates applicable in the Autonomous Regions of Madeira and Azores, in comparison to the ones applicable in the mainland (the CIT rate applied in Azores should increase from 17.5% to 20%).

**Value-added tax (VAT)**

- Reduction of VAT exemptions (including the current exemption on postal services).
- Increase of the VAT rate on electricity and gas, currently subject to the reduced VAT rate of 6%.
- Reorganisation of the VAT schedules, with transfers of categories of goods and services from the reduced and intermediate VAT tax rates to the standard (and higher) one.
- Introduction of amendments to the regional finance law to limit the reduction of VAT in Autonomous Regions of Madeira and Azores to a maximum reduction of 20% (currently 30%), in comparison to the rates applicable in the mainland (meaning an increase of the higher VAT rate applicable in Madeira and Azores from 16% to 18%).

**Excise duties**

- Increase of car sales tax.
- Reduction of car tax exemptions.
- Increase of taxes on tobacco products.
- Indexation of excise taxes to core inflation.
- Introduction of electricity excise taxes.

**Property taxes**

- Reassessment of the property values for the purpose of property transfer tax.
- Substantial reduction of the temporary exemptions for owner-occupied dwellings.
- Regular revaluation of real estate for tax purposes (annually, for commercial establishments and every three years in case of housing).

**Fight against tax evasion, fraud, and shadow economy**

- Reallocation of staff within the Tax Administration to increase the audit teams.
- Strengthen the auditing powers of the Central Tax Administration to exercise control over the whole Portuguese territory, including tax exemption regimes (e.g. Madeira International Business Centre).
- Reserve to the Central Tax Administration the power to issue interpretative rulings on taxes with national scope, in order to assure its uniform application.

**Tax courts and litigation**

- Implementation of tax arbitration until the third quarter of 2011.
- Setting up of a temporary task force of judges to clear cases worth above 1 million euros (EUR).
- Establishment of an integrated information technology system between the revenue administration and the tax courts.
- Establishment of special chambers within the tax tribunals, specialised to handle large cases and assisted by a specialised technical staff pool.
- Charging interest on the outstanding debt over the whole appeal period using an interest rate above market levels.
- Impose a special statutory interest on non-compliance with a tax court decision.

### *2011 State Budget*

The 2011 State Budget Law was published in the Portuguese Official Gazette of 31 December 2010, and the most significant amendments introduced on matters of corporate income tax (CIT) are summarized below:

- Mechanism for the elimination of economic double taxation on distributed dividends:
  - The partial tax relief of 50% on dividends received by Portuguese resident parent companies from European Union (EU)(including Portugal) and European Economic Area (EEA) subsidiaries was revoked (this applied in case the minimum shareholding/acquisition cost or the ownership period were not verified).
  - The full deduction by a Portuguese parent company of dividends received from EU (including Portugal) and EEA subsidiaries will now depend on a minimum shareholding of 10% (now also applicable for holding companies), irrespective of the acquisition value (formerly, if the acquisition value was of at least EUR 20 million, the minimum percentage was not required).
  - Holding companies (SGPS) can no longer eliminate economic double taxation on dividends received from subsidiaries when the underlying profits were not subject to effective taxation (formerly, this rule only applied for operational parent companies; SGPS were excluded).

- Dividends paid by Portuguese subsidiaries to EU, EEA, or Swiss parent companies are exempt from domestic withholding tax (WHT) under the EU Parent/Subsidiary Directive to the extent that the parent company owns a minimum shareholding of 10%, irrespectively of the acquisition costs (formerly, if the acquisition value was of at least EUR 20 million, the minimum percentage was not required).
- Capital losses and other losses related to shareholdings are no longer tax deductible to the extent that the reduction in value results from a tax-free dividend distribution (i.e. where the mechanism for elimination of economic double taxation was applied) made in the previous four years.
- The domestic WHT rate applicable to capital income earned by non-resident companies is increased from 20% to 21.5%.
- Companies in a tax loss situation for two consecutive years can only deduct those tax losses in the third upon legal certification of accounts issued by a statutory auditor.
- Special Tax Regime for Group Taxation: when determining the group's taxable profit (or tax loss), the individual group member's taxable profits (or tax loss) can no longer be adjusted for profits distributed between group entities.
- General increase of the rates of autonomous taxation (additional taxation) applicable to expenses incurred on the acquisition of light passenger vehicles and motorcycles, excluding vehicles that are solely powered by electrical energy.
- All other autonomous taxation rates are increased by 10%, if the taxpayer has tax losses in the same fiscal year.
- The amount of CIT assessed cannot be lower than 90% (formerly 75%) of the amount that would have been assessed in the absence of tax benefits/special tax regimes.
- The banking sector is subject to a new contribution regime ('Contribuição sobre o Sector Bancário' or Bank Levy).

### *The Stability and Growth Program for 2010-2013*

In March 2010, the Portuguese Government presented to the Parliament the Stability and Growth Program for 2010-2013 ('Programa de Estabilidade e Crescimento' or PEC). PEC is the Portuguese Government's strategy to reduce public deficit, reducing tax benefits and increasing tax revenues, while at the same time aiming a structural reform towards modernisation and competitiveness of the Portuguese economy.

On 30 June 2010, a set of measures was approved within the PEC, entering into force on 1 July 2010. The relevant tax measures approved were as follows:

- Implementation of a State surtax ('Derrama Estadual') of 2.5% levied on the income subject to and not exempt from CIT, exceeding EUR 2 million, assessed by resident taxpayers carrying out a commercial, industrial, or agricultural activity and by non-residents with a permanent establishment (PE) in Portugal.
- Increase of the stamp duty rate in the case of consumer's credit. It may now reach 1% of the funds granted, in the case of credit granted for five years or more.

On 26 July 2010, the introduction of a 20% tax on capital gains obtained on the sale of shares, corporate bonds, and other debt securities realised by mixed and closed investment funds (formerly exempt from taxation) was approved under the PEC. An exemption from taxation on capital gains still applies to open investment funds that hold the securities for more than 12 months.

## *Taxes on corporate income*

Two thresholds of taxable income determine the application of the following tax rates:

- Taxable income up to EUR 12,500 is subject to CIT at the rate of 12.5%.
- Taxable income in excess of EUR 12,500 is subject to CIT at the rate of 25%.

Entities that do not carry out a commercial, industrial, or agricultural activity as their main activity are subject to a 21.5% CIT rate on the global amount of their taxable income.

Lower CIT rates apply in the Autonomous Regions of Madeira and Azores, respectively 20% (10% reduced CIT rate), and 17.5% (8.75% reduced CIT rate).

It is expected that the lower CIT rate applicable to taxable income up to EUR 12,500 is abolished, following the Memorandum of Understanding between the Portuguese Republic and the European Commission, the European Central Bank, and the IMF, which covers the financial assistance to be granted to Portugal by the European Fund for Financial Stability.

Resident companies in Portugal are taxed on their worldwide income. Tax is also applicable to Portugal-source income attributable to a PE of a non-resident company in Portugal. Special WHT rates apply to income generated in Portugal that is attributable to non-residents without a PE in Portugal *(see the Withholding taxes section for more information)*.

### *Surtaxes*

The following surtaxes may also apply:

- A local surtax ('Derrama') of up to 1.5% of taxable income, prior to the deduction of any available carryforward tax losses, is levied in certain municipalities. The local surcharge is assessed and paid when filing the CIT return.
- A state surtax ('Derrama Estadual') at the rate of 2.5% of the taxable income exceeding EUR 2 million, prior to the deduction of any available carryforward tax losses, is levied on resident taxpayers carrying on commercial, industrial, or agricultural activity and by non-residents with a PE in Portugal. This is paid in several instalments.

## *Corporate residence*

A resident company is one whose head office or effective management is located in Portugal.

### *Permanent establishment (PE)*

Under Portuguese tax law, any fixed place of business in Portugal through which the business of an enterprise is wholly or partly carried on is deemed to constitute a PE in Portugal.

A fixed place of business comprises, among others, a place of management, a branch, an office, a factory, a workshop, a mine, an oil or gas well, a quarry, or any other place of extraction of natural resources, and also building site or a construction or installation project if it lasts more than six months (time period may differ considering the applicable tax treaty).

A PE may also be deemed to exist in case of a person (a dependent agent), which is not an independent agent, acting, in the Portuguese territory on behalf of a company, with powers to intermediate and conclude binding contracts for that company, within the scope of its business activity.

No PE should exist where a fixed place of business in Portugal is used solely for carrying out ancillary or preparatory activities, or, in case a company carries out its activities in Portugal through a broker, general commission agent, or other agent of an independent status, acting in the normal course of its business, bearing all related business risks.

Additionally, the term PE shall be deemed not to include the following actions:

- Use of facilities solely for the purpose of storage, display, or delivery of goods or merchandise belonging to the enterprise.
- Maintenance of a stock of goods or merchandise belonging to the enterprise solely for the purpose of storage, display, or delivery.
- Maintenance of a stock of goods or merchandise belonging to the enterprise solely for the purpose of processing by another enterprise.
- Maintenance of a fixed place of business solely for the purpose of purchasing goods or merchandise or of collecting information, for the enterprise.
- Maintenance of a fixed place of business solely for the purpose of carrying on, for the enterprise, any other activity of a preparatory or auxiliary character.
- Maintenance of a fixed place of business solely for any combination of activities mentioned above, provided that the overall activity of the fixed place of business resulting from this combination is of a preparatory or auxiliary character.

## *Other taxes*

### *Value-added tax (VAT)*

Portuguese VAT is applicable at the standard rate of 23% (16% in the self-governing regions of Madeira and the Azores), at an intermediate rate of 13%, and at a reduced rate of 6% (8% and 4% in Madeira and the Azores). An increase of the standard rate in Madeira and Azores (to 18%) is expected, following the Memorandum of Understanding (MoU) between the Portuguese Republic and the European Commission, the European Central Bank, and the IMF, which covers the financial assistance to be granted to Portugal by the European Fund for Financial Stability.

Following a revision of the respective reduced rates lists, several goods and services that in 2010 were subject to the reduced or intermediate VAT rates are now subject to the standard VAT rate, namely gyms, flowers and ornamental plants, as well as some legal services. Further changes are expected following the MoU.

Restaurant services, basic canned foods, fruit jellies, fats, honey, coffee, natural water, fruit juices, decorative flowers, petroleum for heating and marked diesel fuel for agriculture and fishing activities, and certain ecological equipment are subject to the intermediate VAT rate of 13%. Basic food, some pharmaceutical products, milk products, and certain services are subject to the reduced VAT rate of 6%. Exports and intra-EU supplies of goods are zero-rated.

The implementation of Council Directive 2008/8/EC led to significant changes of the national VAT legislation on the deemed place of supply of services, defining two general rules as of 1 January 2010.

The general rule for taxation of business-to-business ('B2B') services is the place where the customer is established or has a PE, has a permanent address, or usually resides.

For business-to-consumer ('B2C') services, the general rule remains the place where the supplier is established. As of 1 January 2011 the place of supply of organisations of cultural, artistic, sporting, scientific, educational, entertainment, or similar events is determined according to the general rule; on 1 January 2013 and 1 January 2015, additional adjustments to the VAT rules will become effective.

The existing proceeding for obtaining a VAT refund in another EU member state other than the member state of establishment has been replaced by a new electronic proceeding, with a four month average payment term.

### *Surcharges*
The following surcharges (autonomous taxes), self-assessed with the corporate tax, are levied at the rates provided:

- Representation and entertainment expenses: 10%.
- Company car expenses: 10%.
- Mileage allowance: 5%.
- Per diem allowance: 5%.
- Non-documented payments: 50% (70% for partially or fully exempted taxpayers).
- Company car expenses for which acquisition cost exceeds certain limits as established in the law: 20%.
- Dividends distributed to exempt taxpayers regarding participations held for less than one year: 20%.
- The total amount of the expenses incurred with any compensation paid as a result of the termination of functions of managers or board members, if not related to the productivity targets previously established under the existing labour relation; or the amount that exceeds the remuneration that would be received by the manager or the board member until the term of the labour agreement, in case of redundancy prior to that term; or in all cases, if the liability for the payment is shifted to another entity: 35%.
- The total amount of the expenses incurred with bonuses paid to managers or board members if the respective amount corresponds to more than 25% of the annual salary and exceeds EUR 27,500: 35%.

All the above-mentioned surcharges are increased by 10% if the taxpayer has tax losses in the same tax year.

### *Customs duties*
Custom duties are regulated by the Community Customs Code. Therefore, the rules foreseen for the import and export of goods in Portugal are similar to the rules applicable in other EU member states.

The custom duties' rates applied in Portugal vary according to the origin of the goods. There are several origin agreements which exempt from custom duties the importation of goods from certain countries or that determine reduced rates.

### *Excise duties*
There are different types of excise duties, such as:

- petroleum and energy products tax
- alcohol and alcoholic beverages tax
- tobacco tax, and
- vehicle tax.

The tax applicable to petroleum and energetic products depends on the goods supplied, namely it varies between EUR 650/1,000 l for leaded petrol and EUR 2.78/gJ for natural gas used as fuel.

The tax applicable to alcohol and alcoholic beverages also depends on the type of good supplied, varying between EUR 7.11/hl for a certain type of beer and EUR 1,031.57/hl for spirits.

The tax applicable to tobacco also varies in accordance with the type of product supplied, namely it varies between 60% of the sale price for fine-cut tobacco for the rolling of cigarettes and 13% of the sale price for cigars and cigarillos.

The tax applicable to vehicles varies in accordance with the type of vehicle, the fuel used, and the cylinder of the vehicle. The higher taxation is applicable for cars used for the transport of passengers using petrol as fuel and the lower taxation is applicable for motorcycles.

Furthermore, the introduction in consumption of the products subject to excise duties is simplified, considering that as from 1 April 2010 the arrival of these goods from other EU member states is supported through an electronic document (e-DA).

As from 1 January 2011, the electronic document (e-DA) may also be issued by Portuguese entities to export the above goods and certify winery products. It is also possible to change or cancel an electronic document received.

### *Stamp duty*

Stamp duty is payable on a wide variety of transactions and documents, at rates that may be set in specific amounts or on a percentage basis. Important examples include the following:

| Item | Stamp duty (%) |
|---|---|
| **Loans (on the principal)** | |
| With determined term, over 1 year | 0.5 to 0.6 |
| Current account/overdraft/credit with undetermined term or determined term under 1 year | 0.04 per month or fraction |
| **Credit to consumers** | |
| With a term up to 1 year/current account, overdraft, or other form of credit with undetermined term | 0.07 per month or fraction |
| With a term equal to or higher than 1 year | 0.9 |
| With a term equal to or higher than 5 years | 1 |
| **Guarantees** | |
| Undetermined / 5 or more years | 0.6 |
| Over 1 year | 0.5 |
| Under 1 year or with undetermined term | 0.04 per month or fraction |
| Bank interest and fees | 4 |
| Insurance premiums | 3 to 9 |
| Real estate purchases and sales | 0.8 |
| Donations and inheritances | 10 |
| Sale of business as a going concern | 5 |

### *Property tax (IMI)*

Imposto Municipal sobre Imóveis (IMI) is a municipal property tax upon which the taxable basis is calculated by reference to a formula based on objective criteria, such as the construction cost per square meter, area, age, construction quality, and comfort indexes.

Following the Memorandum of Understanding between the Portuguese Republic and the European Commission, the European Central Bank, and the IMF, which covers the financial assistance to be granted to Portugal by the European Fund for Financial Stability, reassessments of the tax value of real estate are expected (increase to close the market value).

IMI is levied at the following rates, in addition to corporate or individual tax assessed on actual income generated by real estate:

| Property type | IMI (%) |
|---|---|
| Urban real estate | 0.4 to 0.7 |
| Urban real estate (valued under the new rules) | 0.2 to 0.4 |
| Rural real estate | 0.8 |

Note that the tax rate of IMI on properties owned by entities resident for tax purposes in a blacklisted territory is 5%.

The list of countries, territories, and regions that provide a more favourable tax regime is presented below:

| | | | |
|---|---|---|---|
| Andorra | United Arab Emirates | Isle of Man (5) | Saint Helena |
| Anguilha | Falkland Islands or Malvinas | Marianas | Saint Lucia |
| Antígua and Barbuda | Fiji Islands | Marshall Islands | Saint Kitts and Nevis |
| Netherlands Antilles | Gambia | Mauritius | San Marino |
| Aruba | Grenada | Monaco | Saint Pierre and Miquelon |
| Ascension Island | Gibraltar (5) | Montserrat | St. Vicente and the Grenadines |
| Bahamas | Guam | Nauru | Seychelles |
| Bahrain | Guyana | Christmas Island | Swaziland |
| Barbados | Honduras | Niue Island | Svalbard (4) |
| Belize | Hong Kong | Norfolk Island | Tokelau |
| Bermuda (5) | Jamaica | Sultanate of Oman | Kingdom of Tonga |
| Bolívia | Jordan | Pacific Islands (3) | Trinidad and Tobago |
| Brunei | Queshm Island | Palau Islands | Tristan da Cunha |
| Channel Islands (1) | Kiribati | Panama | Turks and Caicos |
| Cayman Islands (5) | Kuwait | Pitcairn Island | Tuvalu |
| Cocos (Keeling) | Labuan | French Polynesia | Uruguay |
| Cyprus | Lebanon | Porto Rico | Vanuatu |
| Cook Islands | Liberia | Qatar | British Virgin Islands (5) |
| Costa Rica | Liechtenstein | Solomon Islands | United States Virgin Islands |
| Djibouti | Luxembourg (2) | American Samoa | Yemen Arab Republic |
| Dominica | The Maldives | Western Samoa | |

P

Notes

1. Alderney, Guernesey (5), Jersey (5), Great Stark, Herm, Little Sark, Brechou, Jethou e Lihou.
2. Just for Luxembourg holdings (Law of 31/7/1929 and Grand-Duchy Decision of 17/12/1938).
3. Not included in the remaining numbers.
4. Spitsbergen Archipelago and Bjornoya Island.
5. The Portuguese Authorities have signed several Agreements on Exchange of Information for tax purposes that will allow the identification of applications outside of Portuguese territory and any facts non-declared. The Portuguese Authorities will ask to each jurisdiction elements that are considered relevant to the accurate assessment of the tax situation of a specific taxpayer, including information on the movement of funds as well as ownership of companies, foundations, trusts, funds or other entities (Jurisdictions Covered: Andorra; Antigua and Barbuda; Belize; Bermuda; British Virgin Islands; Cayman Islands; Dominica; Gibraltar, Guernsey; Isle of Man; Jersey; Liberia; Santa Lucia; St. Kitts and Nevis; Turks and Caicos).). The Portuguese Parliament has approved the Agreements with Bermuda, Cayman Islands, Andorra, and Gibraltar.

### *Property transfer tax (IMT)*

Imposto Municipal sobre as Transmissões Onerosas de Imóveis (IMT) is a municipal tax payable in Portugal on the onerous transfer of local real estate. The tax is levied on the purchaser, and the taxable basis is the same as for IMI or the price agreed upon by the contracting parties, whichever is higher.

The IMT rates are set at 5% for rural real estate and 6.5% for urban real estate and land for construction. For non-residents located in blacklisted jurisdictions, the rate is 8%.

### *Bank Levy*

Credit institutions whose head office and place of effective management is in Portugal, local subsidiaries of credit institutions whose head office and place of effective management are outside Portugal, and branches of credit institutions whose head office and place of effective management are outside the European Union, are subject to the Bank Levy ('Contribuição sobre o Sector Bancário').

The Bank Levy It is levied on (i) the liabilities, according to the approved accounts, reduced by Tier 1 and Tier 2 capital and by the guaranteed client deposits, at rates ranging from 0.01% to 0.05% and (ii) the notional amount of the off balance financial derivative instruments.

The taxable base to consider is the following:

- Base I - Liabilities, which are defined as the set of elements accounted for in the balance sheet which represent liabilities towards third parties, irrespective of their form or nature. Excluded from the taxable base are, amongst others, items that are accounted for as equity, liabilities for defined benefit retirement plans, provisions, and liabilities concerning the revaluation of financial derivatives.
- Base II - The notional amount of off-balance sheet financial derivatives, excluding hedging derivatives and back to back derivatives.

The taxable base is calculated by reference to annual average of the monthly balances of the qualifying items, as reflected in the accounts approved regarding the year to which the bank levy relates to.

A tax rate of 0.05% applies on Base I and a rate ranging from 0.0001% to 0.0002% applies on Base II.

The computation and payment of this contribution must be made by the last day of June, through an official form.

The Bank Levy is not deductible for CIT purposes.

## *Branch income*

Branch profits are taxed on the same basis as corporate profits. Income remitted by a branch to the head office is not subject to taxation.

## *Income determination*

Taxable income is based on the accounting income adjusted according to the specific provisions of the tax legislation, when applicable.

### *Inventory valuation*

Inventories are valued at the lower of the following values: cost or net realisable value. The first in first out (FIFO) and average-cost methods of valuation are accepted. The last in first out (LIFO) method is not allowed.

Inventory adjustments are deductible for tax purposes on the amount accounted for in the tax year, capped at the difference between the acquisition or production value and, if lower, the net realisable value (duly documented) with reference to the balance sheet.

### *Capital gains*

The positive net difference between capital gains and capital losses arising from the disposal of fixed assets or shares, held for more than one year, is taxed as part of normal income.

Capital gains and capital losses are determined by the difference between the sales proceeds, deducting any related cost, and the acquisition value, deducing impairment losses and tax deductible depreciation or amortisation, adjusted by the inflation index (in the case of at least two years of ownership).

Only half the amount of the negative difference between capital gains and capital losses arising from the disposal of shares or other negative net worth variations related to participations or other parts of the equity of a company, such as supplementary capital contributions, are considered for purposes of assessing the taxable income.

In certain circumstances, only 50% of the net gains on disposal of tangible fixed assets or shares are taxed, provided the sales proceeds are reinvested.

Capital losses regarding shares owned for less than three years when acquired from related companies, from blacklisted entities or from Portuguese companies subject to a special tax regime are not deductible. Capital losses are also not tax deductible if the shares are transferred to related parties to blacklisted entities or to Portuguese resident entities subject to a more favourable tax regime.

Capital gains/losses realised by holding companies (‘Sociedade Gestora de Participações Sociais’ or SGPS) are not taxed/deductible, if the underlying shares have been held for more than one year (or three years if the shares were acquired from related parties, offshore companies, or Portuguese resident entities subject to a special tax regime).

### Dividend income

For Portuguese-resident companies holding shares in other Portuguese companies, or in companies resident in Portuguese African Speaking countries, or in companies resident in the EU or the EEA (meeting the EU Parent /Subsidiary Directive 90/435/CEE), 100% of the dividends distributed are excluded from the taxable income. In case of Portuguese, EU, and EEA subsidiaries, the shares should represent at least 10% of total capital and have been held for at least one year (this minimum holding period should be met before or after distribution).

This also applies to regional development corporations (Sociedades de desenvolvimento regional), investment companies, securities dealers, and insurance companies (where technical reserves are concerned).

The deduction of the dividends, when distributed by Portuguese, EU, or EEA subsidiaries only applies if the underlying income has been subject to effective taxation.

### Foreign income

A Portuguese company is taxed on all its foreign income. Taxes paid abroad can be offset against corresponding Portuguese tax *(see Foreign tax credit in the Tax credits and incentives section for more information)*.

## Deductions

### Depreciation, amortization, and depletion

The qualifying cost of an asset for tax purposes is the acquisition or production cost.

Depreciation must be computed by using the straight-line method or the declining-balance method. The latter cannot be applied to buildings, passenger vehicles, furniture, social welfare equipment, or second-hand assets. Straight-line rates of depreciation are normally consistent with rates privately used by business and industry and are increased, for the purposes of applying the declining-balance method, by coefficients of:

- 1.5 if assets have a useful life of less than five years.
- 2 if useful life is five or six years.
- 2.5 for useful lives in excess of six years.

Different depreciation methods may be applied without previous approval from the Tax Authorities (annual depreciation cannot, however, exceed the depreciation resulting from using either the straight-line or declining-balance methods).

Some examples relating to the maximum straight-line depreciation rate are as follows:

| Type of asset | Rate (%) |
|---|---|
| Office building | 2 |
| Industrial building | 5 |
| Electronic equipment | 20 |
| Computers | 33.33 |
| Ordinary tool & paintings | 25 |
| Engines & machine tools | 12.5 |
| Office equipment | 20 |

| Type of asset | Rate (%) |
|---|---|
| Furniture | 12.5 |
| Software | 33.33 |
| Light passenger vehicles | 25 |

Rates can be reduced by 50% in any one year at the taxpayer's option. If the reduction is more than 50%, the difference is allowed for tax purposes at a future date. Any depreciation in excess of the maximum allowed must be subsequently adjusted in the accounting records to be allowed for tax purposes in future years. A total of 60% of additional depreciation on revaluation of fixed assets, as permitted by law from time to time, is allowed for tax purposes.

Depreciation rates of tangible assets may be increased by 25% in the case of companies with a schedule of two shifts (for three shifts, 50%), given the faster deterioration of those assets.

Assets with an acquisition value lower than EUR 1,000 can be depreciated in the acquisition year, unless the assets are part of a set of elements that should be depreciated as a whole.

Depreciation of yachts and airplanes that are not essential for business activities is not allowed as a cost for tax purposes.

Depreciation of passenger cars and certain other vehicles on the part of their cost of acquisition that exceeds certain amounts (as defined by law), with reference to their acquisition value, is also disallowed as a cost for tax purposes. The following caps apply (i.e. disallowed cost above the values below):

- EUR 40,000 of acquisition cost, in the case of vehicles acquired until 31 December 2010.
- EUR 30,000 of acquisition cost, in the case of vehicles acquired from 1 January 2011 onwards.
- EUR 45,000 of acquisition cost, in the case of electric vehicles acquired from 1 January 2011 onwards.
- EUR 25,000 of acquisition cost, in the case of vehicles acquired from 1 January 2012 onwards.
- EUR 50,000 of acquisition cost, in the case of electric vehicles acquired from 1 January 2012 onwards.

Development expenses, patents, trademarks, licenses, and similar rights may be amortised for tax purposes if acquired for a limited period of time.

Expenses relating to assets generated internally are deductible for tax purposes in the tax year in which the cost is incurred.

Goodwill cannot be amortised for tax purposes (unless subject to an effective economic amortisation approved by the Portuguese tax authorities).

### *Interest on shareholder loans*

If the rate applicable to interest and other compensation regarding loans provided by the shareholders to the company is higher than the Euro Interbank Offered Rate (EURIBOR) 12-month rate rounded up with a spread of 1.5% (at the date the loan was granted), the amount paid in excess is not tax deductible. This rule does not apply when the shareholder is a resident of a tax treaty country or when the interest rate is at arm's length under the transfer pricing provisions.

According to the 2011 State Budget, in the case of small and medium-sized companies, shareholders' loans with an interest rate of EURIBOR 12 M plus a spread up to 6% is tax deductible.

### *Bad debts*
Impairment losses on doubtful debts are deductible for tax purposes when an insolvency or recovery has been requested or the credits have been claimed in court.

The annual amount of accumulated impairment losses on doubtful debts due for more than six months, with evidence that measures towards its perception were taken, is capped at the following percentages of the debts:

- More than 6 and less than 12 months: 25%
- More than 12 and less than 18 months: 50%
- More than 18 and less than 24 months: 75%
- More than 24 months: 100%

Amounts guaranteed by insurance or mortgage, or due or secured by the state, autonomous regions, or municipalities, or due by related parties (e.g. 10% shareholding) are not considered as doubtful debts, and the respective impairment loss is disallowed for tax purposes.

The ageing of bills of exchange is calculated from the date when the respective payment is due.

Uncollectable debts are allowed as tax deductible costs if supported under insolvency, recovery enforcement, or in an out-of-court conciliation procedure for the viability of insolvent companies or companies in difficult economic situation (mediated by the Institute for the Support of Small and Medium-Sized Enterprises or IAPMEI). This rule applies to the amount of the uncollectable debts which were not deducted for tax purposes as impairment losses (or for which the amount was insufficient).

### *Organisational and start-up expenses*
Start-up and research expenses are deductible for tax purposes in the respective tax year. Transitional adjustments of remaining start-up expenses incurred prior to the adoption of the new accounting system ('Sistema de Normalização Contabilística' or SNC) should be written off the balance sheet against equity and are deductible over a five-year period.

### *Charitable contributions*
Donations to authorised charitable institutions are allowable up to 0.8% of turnover, with the possibility of the cost being raised up to 150%. Donations to authorised cultural institutions are allowable up to 0.6% of turnover, with the possibility of the cost being raised up to 130%.

Donations to the state, municipalities, and foundations where the state or municipalities participate in the initial capital are fully deductible, with the possibility of the cost being raised up to 140%. Special application may be made by certain entities in order to be included under the referred regime.

Donations of computers, software equipment, training, and consultancy in the area of computers granted to the state, municipalities, foundations, museums as well as to authorised charitable and cultural institutions are allowable up to 0.8% of turnover, with the possibility of the cost being raised up to 140%.

### *Vacation accrual*

Vacation pay and vacations subsidies are tax deductible in the year in which the benefit accrues, regardless of the year in which payment is made.

### *Pension expenses*

Pension, invalidity, and health schemes are tax deductible up to a rate of 15% of annual staff expenses, provided they are available to all employees and the management and disposition of the benefits are outside the control of the taxpayer, such as under an insured scheme with vested benefits.

A specific regime applies for deduction of the additional (mandatory) contributions made to pension funds by insurance companies as a result of the adoption of the new accounting system (SNC). These contributions are not considered for purposes of computing the maximum annual amount accepted as a cost, but are considered as a cost in accordance with an annual instalment plan, during a term of five years that began in 2008.

### *Taxes*

All taxes other than corporate tax, state surtax, and municipal surtax constitute a normal business expense.

### *Other significant items*

The costs borne from the acquisition of social passes are regarded as tax-deductible costs to the extent the employer attributes them on a general basis.

Uninsured losses, including indemnities to third parties, are disallowed unless the risk could not be insured.

Non-documented expenses are not tax deductible and are subject to a 50% tax surcharge for fully taxable entities.

In the course of 2011, exceptional write-downs arising from the substitution of invoicing programs or equipments, replaced due to software certification requirements, are considered as impairment losses, without the need of obtaining an approval by the tax authorities.

In the course of 2011, expenses on the acquisition of certified invoicing programs and hardware will be accepted as a cost for tax purposes in the relevant fiscal year.

### *Net operating losses*

Tax losses can be carried forward for four years. Carryback of losses is not allowed. The tax losses carried forward are lost if one of the following situations occurs:

- Change in direct ownership of the company of at least 50% shareholding or voting rights.
- Change in the scope of the business as stated in the articles of association or, regardless of any formal change, if the nature of the activity carried out by the company is substantially modified.

In special cases of economical merits, the Ministry of Finance may authorise the use of tax losses upon a request filed by the taxpayer before those changes occur.

Companies intending to deduct tax losses for the third consecutive year are required to request a legal certification of accounts by a Statutory Auditor (if their accounts are not audited).

### *Payments to foreign affiliates*
A Portuguese corporation is allowed to deduct royalties, interest, and other costs paid to foreign affiliates, provided the amounts are at arm's length. Service fees paid are allowed if there is adequate proof that the service was effectively rendered, has economic substance, and qualifies as indispensable for the generation of taxable revenue, as well as if the amount is at arm's length.

## *Group taxation*

The taxation of group income can be obtained by presenting a special form to the tax authorities for companies with a head office and effective management in Portugal. Such group taxation may apply, provided one of the companies, directly or indirectly, holds 90% or more of the statutory capital of the others and more than 50% of the voting rights. Tax grouping generally enables the group companies to offset losses incurred by one company against profits of another company. Tax losses obtained prior to the beginning of the tax grouping can be carried forward only against the particular company's taxable income.

To be taxed under this regime, the group companies must meet the following conditions:

- Must be tax resident in Portugal.
- Must be subject to the normal regime of taxation at the highest corporate tax rate.
- Must maintain a minimum holding participation of 90%.
- All companies must be held by the parent company for more than one year (excluding newly incorporated companies).
- Cannot be dormant for more than one year.
- Cannot be dissolved or insolvent.
- Cannot have tax losses in the three years prior to the regime application, unless the companies have been held by the parent company for more than two years.
- Cannot have a tax period different from that of the parent company.

Additionally, the parent company:

- Should not be controlled by any other Portuguese-resident company that fulfils the requirements to be the parent company.
- Should not have renounced to the application of this regime in the three previous years.

When the regime comes to an end or when one company ceases to qualify for this regime, the tax losses obtained during the regime cannot be carried forward and deducted against future individual taxable income of the companies.

### *Transfer pricing*
The tax authorities are entitled to adjust taxable income if the taxpayer and another individual or entity, due to their special relationship, have established particular

conditions which diverge from the conditions normally agreed upon between independent entities and distort the results that would arise if those relations were at arm's length. For tax years starting on or after 1 January 2002, Portugal has implemented detailed transfer pricing legislation which broadly follows the Organisation for Economic Cooperation and Development (OECD) guidelines.

An Advance Pricing Agreement (APA) mechanism has been introduced for taxpayers and Portuguese Tax Authorities (PTA) to establish agreements on a taxpayers' future transfer pricing policy. This aims to guarantee compliance with the arm's-length principle (ALP). This regime applies to transactions carried out with related parties and between a PE and the respective head office.

The conclusion of an APA implies the payment of a charge calculated with reference to the taxpayers' turnover, capped at EUR 35,000. This charge is reduced by 50% in the case of a renewal or revision of an existing APA.

The assessment of an APA procedure takes 180 days for unilateral APAs, and 360 days for bilateral or multilateral APAs. This period is reduced to 100 business days for APAs concluded in connection with a relevant investment project in Portugal, as foreseen in the Tax Investment Code ('Código Fiscal do Investimento').

For the Portuguese Tax Authority PTA to confirm compliance of the transfer pricing method(s) with the terms and conditions set out in the APA, the taxpayer must prepare an annual report. The report must be made available to PTA before the last business day of May in the year following that in which the transactions took place (i.e. when the tax year corresponds to the calendar year). Failure to comply invalidates the APA.

### *Thin capitalisation*

Where loans from non-EU-resident related parties exceed twice the parties' capital in the borrowing Portuguese entity, the interest on the excess borrowing is not tax deductible. This rule may not apply if the company (as long as it is not resident in a blacklisted territory) proves under a safeguard clause, that takes into account the type of activity, the sector in which it operates, the dimensions, and other relevant criteria, that it would be possible to obtain the same loan on similar terms from an independent entity.

### *Controlled foreign company (CFC) regime*

Profits derived by an affiliate resident in a blacklisted offshore jurisdiction or in a jurisdiction where it is subject to an effective tax rate equal to or lower than 60% of the Portuguese standard CIT rate, are imputed to the Portuguese shareholder, provided it holds, directly or indirectly, a minimum holding participation of 25% (10% if more than 50% of the capital is held by Portuguese shareholders). Upon distribution of the profits, a deduction is available for previously imputed income.

## *Tax credits and incentives*

### *Foreign tax credit*

Taxes paid abroad can be offset against corresponding Portuguese tax capped at the lower of (i) the tax liability corresponding to the foreign income, net of costs directly or indirectly incurred, or (ii) the foreign tax paid. In both cases, it is limited to the foreign tax as foreseen in the applicable double-taxation treaty. No carryforward of foreign tax is allowed.

### *General tax benefits and incentives*
Following the Memorandum of Understanding between the Portuguese Republic and the European Commission, the European Central Bank, and the IMF, which covers the financial assistance to be granted to Portugal by the European Fund for Financial Stability, it is expected in general a curb of the existing tax benefits. Details of the measures are still expected.

### Contractual tax incentives
Relevant investment projects up to 2020 (minimum investment of EUR 5,000,000) that qualify for strategic economic interest and promote the creation of jobs are eligible for tax incentives, as foreseen in the Tax Benefits Code and the Investment Tax Code.

These are granted on a case-by-case basis under a government contract for a period not exceeding ten years and include a tax credit of 10% to 20% of the investment and exemptions or reductions from property transfer tax, property tax, and stamp duty.

### Investment funds
Portfolio investment funds are taxable at the following final rates:

| Portfolio investment fund activity | CIT Rate (%) |
|---|---|
| Capital gains (net of capital losses) on shares held less than 12 months, realised by closed or mixed investment funds | 20 |
| Capital gains (net of capital losses) on shares held greater than 12 months, realised by open investment funds | 0 |
| Other income: | |
| Earned in Portugal | 20/25 |
| Earned abroad | 20/25 |

Real estate investment funds are subject to corporate tax at the following rates:

| Real estate investment fund activity | CIT Rate (%) |
|---|---|
| Rents (net of expenses) | 20 |
| Real estate capital gains (net of capital losses) | 12.5 |
| Capital gains (net of capital losses) on shares held less than 12 months, realised by closed or mixed real estate investment funds | 20 |
| Capital gains (net of capital losses) on shares held greater than 12 months, realised by open real estate investment funds | 0 |
| Other income: | |
| Earned in Portugal | 20/25 |
| Earned abroad | 20/25 |

Income paid by portfolio and real estate investment funds to individuals is not subject to taxation. Income paid to companies is taxed as normal income, and taxes paid by the fund are considered as payment on account against the final CIT due.

### Funds of funds
Income paid by investment funds of funds is exempt from CIT. Other income is subject to the same taxation as investment funds. Income received by individuals is not subject to further taxation. Income received by companies is taxed at the standard CIT rate on 40% of the respective amount as normal income.

### Pension funds
Pension funds are exempt from CIT and real estate transfer tax.

### Contractors for NATO infrastructures
Contractors for NATO infrastructures are exempt from CIT.

### Net young employment creation
150% of the costs related to net increase job creation, under labour contracts without term, for employees up to 35 years (including) of age and for long-term unemployed individuals may be deducted from taxable income. For this purpose, the fixed remunerations paid and the contributions made by the employer to social security should be considered. The maximum amount of annual increase on deductible costs for each eligible employee is 14 times the national minimum retribution (EUR 485 in 2011).

As of 2011, the increase in 50% of the expenses incurred with the same employer is applicable to more than one employee provided that there are no special relations.

This tax benefit is not cumulative with any tax benefits or other incentives (e.g. social security) concerning the same employee.

This deduction applies for a period of five years for each employee.

### Inland region investment
Companies pursuing an economic activity of industrial or service rendering nature in inland regions have the following tax benefits:

- A reduced CIT rate of 15%.
- In case of establishment of new entities in the referred regions, the CIT rate is reduced to 10% during the first five years of activity.
- Tax losses can be carried forward for seven years.
- Depreciation and amortization concerning investment expenses up to EUR 500,000 (excluding land acquisition and passenger cars), can be deducted, with an increase of 30%.
- Social security costs, concerning net employment creation, can have an increase of 50%.

### Research and development (R&D) (Sistema de Incentivos Fiscais em Investigação e Desenvolvimento Empresarial or SIFIDE)
Portuguese tax resident companies carrying out commercial, industrial, or agricultural activities, and non-resident companies with a PE in the Portuguese territory, are allowed to deduct from the CIT due, up to the respective amount, the value of eligible expenses incurred with R&D, in a double percentage as follows:

- Base rate: 32.5% of the R&D expenses incurred; this rate is increased by 10% in case of small and medium-sized companies that do not benefit from the incremental rate of 50% (applicable to entities that had completed two years of activity).
- Incremental rate: 50% of the difference between the R&D expenses made in the tax year and the average amount of the R&D expenses made in the previous two years, up to the limit of EUR 1,500,000.
- The incremental rate is increased to 70% and the deduction limit is increased to EUR 1,800,000 with respect to expenses incurred with the employment of people with a doctorate degree.

The expenses that, due to insufficient tax due, cannot be deducted in the tax year they were incurred can be carried forward for six years.

### Tax regime aimed at fostering investment (Regime Fiscal de Apoio Ao Investimento or RFAI)

The tax regime aimed at fostering investment, which establishes several tax incentives to investment realized within specific business sectors, will remain in force during 2011.

Among other incentives, companies will still benefit from a deduction against CIT otherwise payable (capped at 25% of the CIT due) of 20% (for qualified investments lower than EUR 5 million) or 10% (for qualified investments higher than EUR 5 million) of the qualified investment; from being able to carry forward any unused credit for four years; and from an exemption from property transfer tax, property tax (IMI), and stamp duty on the acquisition of real estate for investment purposes. The property transfer tax exemptions are subject to the approval of the municipality where the real estate is located and where the investment is made.

### Dividends from entities resident in the Portuguese Speaking African countries (Países Africanos de Língua Oficial Portuguesa or PALOP) and in East Timor

The payment of dividends from entities resident in Portuguese Speaking African countries (Angola, Cape Verde, Guinea-Bissau, Mozambique, and São Tomé e Príncipe) and in East Timor, are not subject to CIT at the level of the Portuguese parent provided that:

- The entity in Portugal is subject and not exempt to CIT.
- The entities in the PALOP and in East-Timor are subject to and not exempt from a corporate tax.
- The entity in Portugal holds a direct participation in the share capital of the subsidiary of not less than 25% for at least two years.
- Dividends distributed have been taxed at a rate of at least 10% and do not arise from a determined type of income expressly mentioned in the law.

### Loan interest and lease rentals on imported equipment

When paid by the State, regional authorities, and public services, loan interest and lease rentals on imported equipment can qualify for partial or full exemption from tax upon an appropriate application.

### Real Estate Investment Fund for Residential Lease (REIFRL)

A regime is applicable: (i) both to REIFRL and to Real Estate Investment Companies for Residential Lease (REICRL) incorporated in accordance with the Portuguese law within a term of five years following the entering into force of the State Budget for 2009; and (ii) to the real estate properties acquired by those entities during that same term, i.e. from 1 January 2009 until 31 December 2014.

The incorporation of the REIFRL will be done in accordance with the provisions applicable to the REIFs (Real Estate Investment Funds) laid down in the Portuguese law. The REIFRL portfolio is required to be comprised of at least 75% real estate properties located in Portugal destined for the lease of permanent residences.

The following benefits are established for this tax regime:

- CIT exemption on income obtained by REIFRLs.

- CIT exemption for the income obtained by participation unit holders, except for the capital gains arising from the sale of such participation units.
- Local property tax exemption established for the real estate properties destined for the lease of permanent residences that integrate the REIFRL.
- Municipal property transfer tax exemption on real estate property acquisition made within this regime by the REIFRL, as well as the acquisitions arising from the option for the acquisition by the lessees, until 2020, of the real estate properties that integrate the assets of the REIFRL.
- Stamp duty exemption is established for the acts arising from the transfer of the real estate properties by means of the conversion of holdings rights in real estate properties into a lease right with the option of acquisition in respect of the same real estate property by the lessee.

The above-referred tax regime and respective exemptions will not be applicable to entities resident in a country or jurisdiction with a more favourable taxable regime included in the Decree-Ruling published by the Ministry of Finance.

### Incentives to urban rehabilitation

Incentives are applicable to real estate property covered by rehabilitation projects undertaken between 1 January 2008 and 2020.

Real estate investment funds incorporated between 2008 and 31 December 2012 may benefit from:

- CIT: the income obtained by real estate investment funds is tax exempt when the funds are incorporated in accordance with the Portuguese law, and respective assets are comprised of at least 75% real estate subject to rehabilitation projects in qualifying areas.
- Property transfer tax: urban property (buildings or autonomous units) destined for permanent residence and located in a rehabilitation area may benefit from an IMT exemption on the first transfer of such urban property upon undertaking of rehabilitation works. The granting of this exemption depends on a decision in this respect of the municipality of the area of the real estate property.
- Property tax: the IMI exemption granted in respect of urban properties subject to rehabilitation works is extended from eight to ten years (it is granted for a five years term and renewable for an additional five-year period). Again, the granting of this exemption depends on a decision in this respect of the municipality of the area of the real estate property.

## *Tax benefits and incentives for non-resident corporate entities*

### Capital gains

Capital gains on the sale of shares and quotas held in a Portuguese company by a non-resident company may be tax exempt. However, there are some important exceptions, such as:

- Where the non-resident shareholder is owned more than 25%, directly or indirectly, by a Portuguese resident company.
- Where the non-resident shareholder is located in a country that is included in a blacklist from the Ministry of Finance.
- Where the assets of the company sold consist mainly of immovable property.

### Government and corporate bonds

Interest and capital gains on government and corporate bonds are tax exempt (where held by entities not located in blacklisted offshore jurisdictions) under certain conditions.

### Interest paid by resident credit institutions

Interest paid by resident credit institutions to non-resident financial companies deriving from loans as well as gains arising from swap transactions are tax exempt.

### Interest obtained by resident credit institutions

Interest obtained by non-resident credit institutions derived from term deposits held on resident entities authorised to receive such deposits are tax exempt.

### *Madeira and Azores international business centre*

Qualifying industrial, shipping, international services (e.g. holding and trusts) and financial entities licensed in Madeira or in the Santa Maria Island (Azores) international business centres before 31 December 2000 are eligible for a CIT exemption until 31 December 2011.

The European Commission extended the existing regime and approved a new regime for entities licensed to operate in the Madeira International Business Centre (MIBC) in the period 2007-2013, which is applicable until 31 December 2020.

The 2007 MIBC special tax regime applies to companies licensed until 31 December 2013 and provides, besides full exemptions from taxation to non-resident shareholders and service providers, for the following reduced CIT rates for these entities, on their qualifying foreign source income, based on thresholds of income and subject to job creation requirements:

- 4% between 2011 and 2012.
- 5% from 2013 to 2020.

Azores and Madeira international business centre based companies generally benefit from Portugal's network of double taxation agreements (DTA). EU laws and regulations apply to Azores and Madeira.

Companies licensed under the previous regime will have the same benefits, but will not be tax exempt on their qualifying foreign source income, being subject to the reduced rates mentioned above (and subject to the same requirements).

## *Withholding taxes*

### *General withholding tax rates*

| Recipient | Residents (%) (1) | Non-residents (%) (1) |
|---|---|---|
| Dividends | 21.5 (2) | 21.5 (3) |
| Interest | 21.5 | 21.5 |
| Royalties | 16.5 | 15 |
| Interest & royalties EU Directive | N/A | 5 (4) |
| Banks deposits | 21.5 | 21.5 |
| Property income | 16.5 | 15 (1) |
| Service charges | 0 | 15 (5) |

| Recipient | Residents (%) (1) | Non-residents (%) (1) |
|---|---|---|
| Other | 16.5 | 20 |

Notes

1. For residents, tax withheld constitutes a payment on account of final corporate or individual income tax due. For non-residents, tax withheld is the final tax unless in case of property income, in which case it is a payment on account.
2. Not subject to WHT in the case of holdings of at least 10%.
3. Not subject to WHT if the EU Parent /Subsidiary Directive 90/435/EC applies.
4. From 1 July 2009 until 30 June 2013, the applicable rate will be reduced to 5% and will be 0% from 1 July 2013 onwards.
5. Not subject to WHT if a tax treaty is applicable.

### *Tax treaty rates*

Tax treaties reduce the above-mentioned rates as follows:

| Recipient | Dividends (%) | Interest (%) | Royalties (%) |
|---|---|---|---|
| Algeria (3) | 10/15 | 15 | 10 |
| Austria (1, 2) | 15 | 10 | 10/15 |
| Belgium (2) | 15 | 15 | 10 |
| Brazil (3) | 10/15 | 15 | 15 |
| Bulgaria (3) | 10/15 | 10 | 10 |
| Canada (3) | 10/15 | 10 | 10 |
| Cape Verde | 10 | 10 | 10 |
| Chile (3, 9, 10) | 10/15 | 5/10/15 | 5/10 |
| China, P.R. | 10 | 10 | 10 |
| Colombia (12) | - | - | - |
| Cuba (3) | 5/10 | 10 | 5 |
| Czech Republic (3) | 10/15 | 10 | 10 |
| Denmark (2) | 10 | 10 | 10 |
| Estonia | 10 | 10 | 10 |
| Finland (2, 3) | 10/15 | 15 | 10 |
| France (2, 4, 5) | 15 | 10/12 | 5 |
| Germany (2, 6) | 15 | 10/15 | 10 |
| Greece (2) | 15 | 15 | 10 |
| Guinea Bissau (12) | - | - | - |
| Hong Kong (13) | 5/10 | 10 | 5 |
| Hungary (3) | 10/15 | 10 | 10 |
| Iceland (3) | 10/15 | 10 | 10 |
| India (3) | 10/15 | 10 | 10 |
| Indonesia | 10 | 10 | 10 |
| Ireland, Rep. of (2) | 15 | 15 | 10 |
| Israel (11) | 5/10/15 | 10 | 10 |
| Italy (2) | 15 | 15 | 12 |
| Korea, Rep. of (3) | 10/15 | 15 | 10 |
| Kuwait (12) | - | - | - |
| Latvia | 10 | 10 | 10 |
| Lithuania | 10 | 10 | 10 |
| Luxembourg (2, 6) | 15 | 10/15 | 10 |

| United Kingdom (2, 3) | 10/15 | 10 | 5 |
| United States (3) | 5/15 | 10 | 10 |
| Venezuela (7) | 10 | 10 | 10/12 |

Notes

1. The lower of the listed rates applies to royalties when the beneficiary holds 50% or less of the paying company's share capital.
2. There is no WHT on dividends if the EU Parent/Subsidiary Directive applies.
3. The lower of the listed rates applies to dividends when the beneficiary directly holds 25% or more of share capital. Depending on each DTT, a two year holding period may be required.
4. The lower of the listed rates applies to interest on debentures raised in France after 1 January 1965 or on significant loans or debentures raised in Portugal or abroad under major development projects listed in the treaty annex.
5. The lower of the listed rates applies to bank loans, but if interest is payable from Portugal, the bank loans must qualify as being of economic or social interest or fall under an approved development plan.
6. The lower of the listed rates applies to interest received by financial institutions.
7. The lower of the listed rates applies to technical assistance.
8. The lower of the listed rates applies on interest related to loans with a minimum maturity of two years.
9. The rate of 5% regarding interest applies to bonds interest or other securities transacted in the stock market. The rate of 10% applies to loans from banks or insurance companies or credit selling of equipment.
10. The rate of 5% regarding royalties applies to equipment lease.
11. The rate of 10% applies if the company which is paying the dividends is a resident of Israel and the dividends derive from profits which are subject to tax in Israel at a rate which is lower than the normal rate of Israel company tax. The rate of 5% applies if the beneficial owner is a company which holds directly at least 25% of the capital of the company paying the dividends.
12. Treaty signed, not yet in force; wording of the treaty not yet known.
13. The rate of 5% on dividends applies if the beneficial owner is a company (other than a partnership) which holds directly at least 10 % of the capital of the company paying the dividends.

## Tax administration

### Returns

The tax year is, as a general rule, the calendar year, and the annual corporate tax return must be submitted by electronic data transmission by the last day of May of the year following the year of income.

A different tax year is allowed in the case of companies obliged to the accounting consolidation and of PEs of non-resident entities, which can adopt the tax period of the non-resident company. If this option is taken, the new tax period must be maintained for a minimum of five years.

Other entities may apply for a different tax period based on economic grounds. In these situations (i.e. whenever the tax year ends on a date other than 31 December), the annual corporate tax return shall be submitted by electronic data transmission by the last day of the fifth month following the year end.

The system is one of self-assessment.

### Payment of tax

Tax is paid in instalments. Three payments on account due on 15 July, 15 September, and 15 December of the year in which taxable income arises correspond to 90% of the previous year's corporate tax assessment (for taxpayers with a turnover above EUR 498,797; 70% if below this amount). A last instalment is paid (or received) through self-assessment upon filing the annual tax return in May of the following year.

If the tax year ends on a date other than 31 December, interim payments take place in the seventh, ninth, and twelfth months of the tax year. Filing of the annual tax return together with the final payment is in the fifth month following the close of the tax year.

Given the introduction within PEC (in 2010) of a state surtax of 2.5% on the excess of taxable income above EUR 2,000,000, three additional payments on account are due on the same dates as the interim payments. The additional payments on account correspond to 2% of taxable income above EUR 2,000,000, assessed in the previous year.

Payments on account are not required if the previous year's corporate tax assessment is less than EUR 199.52 and may be suspended upon declaring that no further tax is due in respect of the current year. However, interest is assessed at a rate of 4% if this results in postponing more than 20% of the tax that would otherwise have been paid.

In particular situations, a special payment on account is due of a minimum of EUR 1,000 up to EUR 70,000, paid in March, or in March and October (the third or the third and tenth month of the tax year if it ends on a date other than 31 December).

### Statute of limitations

The statute of limitation period is four years, but this period can be extended in case of tax losses.

### Anti-avoidance

A general anti-avoidance provision is in force, pursuant to which contracts and other acts are ineffective whenever it is demonstrated that they were tax driven to reduce taxation that would be due under contracts bearing a similar economic effect, in which case taxation would be based on the latter.

## Significant developments

### Act 1 of 31 January 2011 (Act 1) - Internal Revenue Code for a New Puerto Rico

As part of the anticipated tax reform of the Puerto Rico government, Act 1 of 31 January 2011, known as the Internal Revenue Code for a New Puerto Rico (Act 1 or the New Tax Code), represents the second phase of what has been described by the Executive Branch of the Puerto Rico government as one of the most comprehensive pieces of Puerto Rico tax legislation since the Puerto Rico Internal Revenue Code of 1994, as amended (the 1994 Code). Act 1 is effective on 1 January 2011, for taxable years beginning after 31 December 2010 (unless otherwise provided).

The normal tax introduced by Act 1 is 20%, applicable only to corporations and certain partnerships and limited liability companies (LLCs) treated for income tax purposes as corporations (corporate taxpayers). Act 1 has also eliminated or adjusted some corporate tax deductions. In addition, corporate taxpayers are now subject to simplified and lower tax rates. For example, the surtax credit of 25,000 US dollars (USD) established by the 1994 Code was changed by Act 1 for a deduction of USD 750,000, the 5% recapture or recovery of tax for differences in tax rates has been eliminated, resulting in an effective tax rate of nearly 30%.

Notwithstanding the above-mentioned changes introduced by Act 1, corporate taxpayers may elect to be taxed based on the provisions of the 1994 Code. The election should be made with the return for the taxable year 2011 and will be final and irrevocable for said year as well as the next four taxable years (i.e. five years in total).

Act 1 changes the definition of what constitutes a brother-sister relationship in a controlled group of entities and also further expands and standardises the definition of related parties and related group of entities through the interplay of three definitions (i.e. controlled group, related group of entities, and related parties). Act 1 also provides for changes in the reorganisations area, a broader definition of a Type D tax-free reorganisation, and new guidelines similar to those in Section 382 are introduced, among others.

Different than in the 1994 Code, partnerships no longer are subject to tax at the entity level, unless they elect to be treated as a corporate taxpayer, an election that is available only for partnerships in existence as of 1 January 2011. Instead, the partners are now subject to tax on their distributive share of the partnership's income. In the case of LLCs, these continue to be taxed as corporate taxpayers unless they elect to be treated as partnerships (i.e. pass-through entities). Said election is automatically made (i.e. pass-through treatment in Puerto Rico) to the extent the LLC is treated as a pass-through entity in the United States or other foreign jurisdiction. Partners and members of a partnership and LLC, respectively, will be deemed to be engaged in a

Puerto Rico trade or business as it relates to their distributive share of income or loss on the partnership and LLC in Puerto Rico. Accordingly, their distributive share of income will be subject to estimated payment requirements.

### *Regulations 7970 of 29 December 2010 (Regulations)*

Regulations 7970 were issued on 29 December 2010, expanding various areas covered under Act 154 *(see below),* such as the definition of tangible property that has been manufactured in Puerto Rico, the definition of value of personal property and services, the definition of acquisition, the application of the 10% tests, the application of the anti-abuse rule, and transfer pricing adjustments, among others. Also, the Regulations to Act 154 brought new tax credits against the 4% excise tax.

The tax credits available to offset the excise tax liability are the following:

- General credit.
- Alternative credit based on gross receipts.
- Alternative credit when taxable acquisitions exceed certain thresholds.
- Additional credit for incremental increase in employees.
- Credit for controlled groups with facilities in multiple municipalities.
- Credit for economically disadvantaged or critical industrial suppliers.
- Knowledge corridor and research and development investment credit.

If the credits totally offset the 4% tax, the offshore entity needs to calculate the tax based on the sourcing rules as provided by Act 154.

### *Act 171 of 15 November 2010 (Act 171)*

Act 171 represents phase one of the anticipated tax reform of the Puerto Rico government. This Act is effective for tax years beginning after 31 December 2009, unless otherwise provided. Significant developments this Act brought include the increase in the net operating loss (NOL) carryforward period, some sales and use tax (SUT) amendments, and special rules for the determination of the useful life when using the straight-line depreciation method for property used in a trade or business, among others.

In addition, for taxable year 2010, Act 171 provides a tax credit (dollar for dollar) for corporations, partnerships, and individuals. For corporations and partnerships the credit is 7% of the tax due, provided the entities have complied with the Christmas Bonus requirements, including applicable payments to their employees. This credit is against the regular tax, surtax, and recapture amounts but is not allowed against the alternative minimum tax. Furthermore, this credit is neither refundable nor carried forward.

### *Act 154 of 25 October 2010 (Act 154) - Offshore Income*

Companies with manufacturing operations in Puerto Rico may be subject to an excise tax on goods or services provided to offshore-related entities under a new provision signed into law 25 October 2010. Without much fanfare, nor public hearing, lawmakers met over a rare weekend session to formulate the basis of Act 154, which modifies the 1994 Code by:

- adopting a new source-of-income rule (source rule) and
- imposing a temporary (i.e. six-year) excise tax, scaled down from 4% to 1% over its lifespan, on purchases by offshore companies from related Puerto Rico sellers whose gross receipts exceed USD 75 million for any of the three preceding tax years. The

excise tax is imposed in lieu of the Puerto Rico income tax that otherwise would arise from application of the new source rule.

Enacted primarily to finance a tax reform initiative, which is intended to stimulate the struggling Puerto Rico economy, the new excise tax took effect 1 January 2011, and will affect many multinational corporations currently doing business in Puerto Rico. The effect of the new source rule will be to treat income from the resale of purchases from Puerto Rico affiliates by a foreign corporation or partnership (or non-resident alien), in part, as Puerto Rico-source income effectively connected with the conduct of a Puerto Rico trade or business. To the extent a related Puerto Rico subsidiary has gross receipts in excess of USD 75 million, the foreign corporation is subject to the new excise tax in lieu of income tax otherwise due under the new source rule, and the Puerto Rico entity will pay the tax on the parent's behalf.

Entities currently operating in Puerto Rico that enjoy a tax exemption should not see their tax benefits affected, given that the new excise tax and sourcing rules apply only to related foreign corporations. However, at the consolidated level, this tax could represent a significant increase in effective tax rate for the Puerto Rico jurisdiction if (i) it is ultimately concluded that this excise tax is not creditable at the United States or foreign country level or (ii) the foreign corporation, due to its tax circumstances, cannot be benefited with a foreign tax credit in the United States or elsewhere.

Act 154 does not address the effect and treatment of transfer pricing adjustments introduced at year-end as they relate to the imposition of the excise tax. Act 154 also does not specifically address the compliance requirements applicable to foreign corporations deemed to be engaged in a trade or business in Puerto Rico by virtue of the amended provisions related to sources of income. Furthermore, the effect that Act 154 might have on other Puerto Rico filing requirements is yet to be determined.

Because there were no hearings or opportunity for debate with respect to the Act, there are many unanswered questions and issues associated with the new rules.

## *Taxes on corporate income*

A domestic corporation is taxable in Puerto Rico on its worldwide income. A foreign corporation engaged in trade or business in Puerto Rico is taxed at the regular corporate tax rates on income from Puerto Rico sources that is effectively connected income and at a 29% WHT rate on its Puerto Rico-source gross income not effectively connected with that business.

The current corporate income tax (CIT) rate is comprised of a 20% normal tax and a graduated surtax (computed on the 'surtax net income') up to a maximum combined and effective tax rate of 39%. The 'surtax net income' is basically the net taxable income subject to regular tax less a surtax credit in the amount of USD 25,000.

| Net income subject to surtax (USD) | Surtax (USD) |
|---|---|
| Not over 75,000 | 5% |
| Over 75,000 but not over 125,000 | 3,750 plus 15% of the excess over 75,000 |
| Over 125,000 but not over 175,000 | 11,250 plus 16% of the excess over 125,000 |
| Over 175,000 but not over 225,000 | 19,250 plus 17% of the excess over 175,000 |
| Over 225,000 but not over 275,000 | 27,750 plus 18% of the excess over 225,000 |

| Net income subject to surtax (USD) | Surtax (USD) |
|---|---|
| Over 275,000 | 36,750 plus 19% of the excess over 275,000 |

If the net income subject to regular tax exceeds USD 500,000, a 5% tax will be imposed over the excess. Nevertheless, the total tax determined shall not exceed 39%.

Act 1 was enacted into law on 31 January 2011 and is effective for tax years beginning after 1 January 2011. This Act simplified the surtax rates, as follows: (i) 5% for income up to USD 1,750,000 and (ii) USD 87,500 plus 10% of income in excess of USD 1,750,000 for a maximum nominal tax rate of nearly 30%. This latter 10% surtax might only be applicable up to 2013, leaving the maximum nominal tax rate at nearly 25% from 2014 thereafter, provided certain fiscal and economical conditions are met. The determination of the applicable surtax rate is now made on a consolidated basis for controlled groups and related companies, whereas the net taxable income of all the entities subject to tax in Puerto Rico within said groups has to be combined for the determination of the 5% or 10% applicable surtax rate. The surtax credit of USD 25,000 established by the 1994 Code has been changed by Act 1 for a deduction of USD 750,000.

The 5% recapture or recovery of tax for income in excess of USD 500,000 has been eliminated by Act 1.

### *Temporary provision – 5% surtax over the tax liability*
A 5% additional tax will be imposed on the income tax liability determined (not on the taxable income) for corporations, partnerships, and trusts whose gross income exceeds USD 100,000. This provision is effective for taxable years commenced after 31 December 2008 and before 1 January 2012. This 5% surtax, which is not creditable against the tax liability of future years, is treated as a separate tax. The special surtax also applies to the tax on capital gains. For those corporate taxpayers in the maximum tax bracket, this special surtax will increase effective tax rate from 39% to 40.95%.

The 5% above-mentioned temporary special surtax applicable up to 2012 has been eliminated by Act 1 for tax years beginning after 1 January 2011.

### *Alternative minimum tax (AMT)*
In regards to AMT, the tax rate has been reduced by Act 1 from 22% to 20%. In addition, for certain companies purchasing personal property from related parties, the tentative AMT will now be the greatest of the above-mentioned 20% or 1% of said purchases of personal property. For AMT purposes, expenses paid or incurred for services performed by a related party outside Puerto Rico are considered a permanent adjustment in the determination of the alternative minimum net income (i.e. non-deductible for AMT purposes).

### *Tax on improper accumulation of income*
A surtax of 50% is imposed on corporations that improperly accumulate earnings to prevent the imposition of tax on shareholders or partners, rather than paying the earnings out as dividends. The tax is not imposed on accumulated earnings and profits but is imposed on the net income for the year computed without taking capital loss carryover or NOL carryover deductions, and reduced by the following items: Puerto Rico income taxes paid or accrued, disallowed net capital losses, and charitable contributions in excess of the deductible amount. The net income does not include industrial income exempted from income taxes under Industrial Incentives Acts. However, an exempt business can be subject to the penalty tax on non-exempt income.

# Puerto Rico

## *Corporate residence*

A corporation organised or created under the laws of Puerto Rico is a domestic corporation. A domestic corporation is a resident corporation even if it does not conduct business operations in Puerto Rico. A corporation created elsewhere is considered a foreign corporation.

### *Permanent establishment (PE)*

The Puerto Rico tax codes do not provide specific guidance on PE. Facts and circumstances need to be analysed in order to determine if a corporation has created a PE in Puerto Rico or not. However, having an office or fixed place of business in Puerto Rico may deem the corporation to be engaged in a trade or business in Puerto Rico (i.e. having a PE).

### *New source rules pursuant to Act 154*

Act 154 introduced new source rules, which are segregated into two parts. The first part treats a non-Puerto Rico resident manufacturing entity as having an office or fixed place of business in Puerto Rico merely as a result of engaging in transactions above a certain threshold with a related Puerto Rico entity. The second part treats a portion of the income earned by a non-Puerto Rico resident entity as Puerto Rico-source income.

The new source rule applies where a non-Puerto Rico resident purchases goods and services from a related company that manufactures personal property or performs services in Puerto Rico that account for 10% or more of the total gross receipts of the seller from sales of such property or services in Puerto Rico, or at least 10% of the purchase cost of personal property and services acquired by the purchaser, for the taxable year or any of the three prior taxable years.

Where the new source rule applies, a portion of the income of the non-Puerto Rico resident purchaser from the sale outside of Puerto Rico of personal property manufactured or produced in whole or part in Puerto Rico by the related Puerto Rico seller will be treated as Puerto Rico-source income that is effectively connected with the conduct of a Puerto Rico trade or business. The portion of the non-Puerto Rico resident's income that is treated as Puerto Rico source is determined under an equally weighted, four-factor (i.e. purchases, sales, property, and payroll) formulary apportionment method. Where the purchaser fails to provide adequate documentation regarding the formulary apportionment factors, 50% of the income of the non-Puerto Rico resident purchaser from the sale outside of Puerto Rico of personal property manufactured or produced in whole or part in Puerto Rico by the related Puerto Rico seller will be treated as sourced where the property is manufactured or produced (i.e. Puerto Rico). The source rule also will apply to agency and commissionaire arrangements, in addition to buy-sell transactions involving related parties. In addition, the source rule contains an anti-abuse provision that disregards a transaction, for purposes of the source rule, where one of the principal purposes of the transaction is avoidance of the source rule.

The source rule is effective for income accruing after 31 December 2010 and is intended to be a permanent change to Puerto Rico law.

## Other taxes

### Sales and use tax (SUT)

SUT was introduced in Puerto Rico on November 2006, eliminating, for the most part, the general excise tax regime. As a general rule, the SUT shall be applied, collected, and paid on all transactions of taxable items in Puerto Rico. Taxable items consist of tangible personal property, taxable services, admissions, and what is known as bundled transactions. Excluded from this definition are professional associations and certain membership fees; stamps issued by professional associations, the Commonwealth of Puerto Rico, or the federal government; human blood, tissue, and organs; maintenance fees paid to resident associations; air and maritime tickets; real property; and bingos, raffles, and lottery. Other transactions that are exempt from SUT include export transactions; duty-free stores located at airport or maritime ports; prescription medicines; insulin; taxable items acquired for certain manufacturing operations (e.g. raw materials); and food and ingredients for food (except for prepared food, diet supplements, sweets, and carbonated beverages).

SUT is imposed at the state level at a 5.5% and an additional 1.5% at the municipal level, for an aggregate tax of 7%. The 7% tax should be remitted to the Puerto Rico government as follows: 6% to the Puerto Rico Treasury Department (PRTD) and the remaining 1% to the corresponding municipality. However, there are some municipalities that have entered into an administration agreement with the PRTD by which the PRTD will collect the entire 7% of the sales and use tax from merchants and remit the 1% to the municipality (collected on the municipality's behalf).

Every natural or juridical person who does or wishes to do business of any kind in Puerto Rico shall request registration in the Merchant's Registry of the PRTD at least 30 days before starting operations. Once the registration application is filled out and approved, the Secretary of Treasury will grant a Merchant's Registration Certificate. This certificate constitutes the merchant's authorisation to do business in Puerto Rico, and confirms the merchant's obligation as a withholding agent. The Merchant's Registration Certificate shall be displayed, at all times, in a visible place for the general public in the commercial establishment for which it was issued. Please note that if a merchant is doing business in one or more of the 78 municipalities in Puerto Rico, the merchant only needs to register with the PRTD.

Unless specifically exempted, all persons selling taxable items are required to file a monthly tax return. This return shall be delivered to the PRTD no later that the tenth day of the calendar month following the month during which the sales occurred. If the merchant wishes to claim any exemption corresponding to taxable items, the merchant needs to file the monthly return and claim the exemption in it.

Prior to the approval of Act 171, merchants whose SUT deposits exceeded USD 30,000 were required to file the monthly SUT return and remit the payment electronically. This Act reduces this threshold to USD 12,000 for transactions that occur after 31 December 2010. In addition, the 1994 Code provides that merchants with volume of business of USD 500,000 or more should remit the SUT withheld electronically. This Act amends this section to decrease the threshold to USD 200,000 for transactions that occur after 31 December 2010.

Act 1 provides for a credit for purchases of products manufactured in Puerto Rico for purposes of SUT. In general, the credit will be 10% of the excess of the purchases of eligible products over the average of the purchases of eligible products for three out of 10 prior taxable years. This credit could be carried forward until exhausted. Is important to note that the credit used will be considered taxable income for income tax purposes of the year the credit is taken.

### *Excise taxes*

Although the SUT replaced the excise tax system, there are certain articles that continue to be subject to a special excise tax, such as cigarettes, fuels, crude oils, vehicles, alcoholic beverages, cement, sugar, plastic products, among others.

#### New source rules pursuant to Act 154

Companies with manufacturing operations in Puerto Rico may be subject to an excise tax on goods or services provided to offshore-related entities under Act 154 of 2010. This Act created a new excise tax that works in tandem with the new source rules provided by this Act as well. Where the excise tax applies, it is in lieu of the tax that otherwise would arise from the application of the new source rule. Under the new excise tax rule, offshore purchasers that acquire goods from Puerto Rico sellers with gross receipts in excess of USD 75 million for any of the three preceding taxable years and that otherwise meet the source-of-income rule thresholds (set forth above) are subject to a new excise tax equal to the 'applicable percentage of the value' of such personal property or services, which is essentially a scaled-back percentage. The excise tax rate phases out over a six-year period as follows:

- 4.00% between 1 January 2011 and 31 December 2011.
- 3.75% between 1 January 2012 and 31 December 2012.
- 2.75% between 1 January 2013 and 31 December 2013.
- 2.50% between 1 January 2014 and 31 December 2014.
- 2.25% between 1 January 2015 and 31 December 2015.
- 1.00% between 1 January 2016 and 31 December 2016.

Regulations 7970, issued in December 2010, provide the following tax credits to offset the excise tax mentioned above:

1. General credit: up to USD 4 million for 2011 and a reduced amount going forward on the same proportion that the excise rate is reduced.
2. Alternative credit based on gross receipts: in lieu of the above-mentioned credit, and provided the gross receipts per average monthly number of employees in Puerto Rico is less than USD 550,000, a credit of up to USD 7 million for 2011 and a reduced amount going forward on the same proportion that the excise rate is reduced.
3. Alternative credit when taxable acquisitions exceed certain thresholds: in lieu of the above-mentioned credits, if taxable acquisitions equals or exceed USD 4 billion, average monthly employees engaged in manufacturing or production in Puerto Rico is at least 400, and payroll equals or exceeds USD 20 million, then the credit for 2011 could be between USD 20 million and USD 80 million.
4. Additional credit for incremental increase in employees: for taxpayers meeting the requirements established in credit 3 above, an additional credit of USD 187,500 for each additional 25 employees over the employee baseline, up to a maximum of USD 3,750 million, will be available. A reduced credit will be available for years after 2011 on the same proportion that the excise rate is reduced.
5. Credit for controlled groups with facilities in multiple municipalities: in addition to credits 1 and 2 above but in lieu of credits 3 and 4 above, in the case of a controlled group that has one or more members that are engaged in manufacturing and production or manufacturing services in facilities located in three or more different municipalities in Puerto Rico as of 24 October 2010, a credit of USD 5 million per each municipality shall be allowed for each facility that has a monthly average of more than 30 employees, up to a maximum credit of USD 20 million. A reduced

credit will be available for years after 2011 on the same proportion that the excise rate is reduced.

6. Credit for economically disadvantaged or critical industrial suppliers: additional credit of 100% or 150% of increase in purchases from economically disadvantaged or critical industrial suppliers over the average purchases for the last two years.
7. Knowledge corridor and research and development (R&D) investment credit: additional credit of 100% of direct contributions to the Puerto Rico Science, Technology, and Research Trust or Special Economic Development Fund and of the excess R&D invested in Puerto Rico over the average investment for the two last years, subject to certain limitations.

The excise tax is collected by the Puerto Rico seller on receipts from the sale of personal property or services rendered to a related offshore purchaser. The tax has to be deposited with the Secretary of the Treasury on or before the 15th day of the month following the sale. Each person required to collect the excise tax must file a quarterly excise tax return on 30 April, 31 July, 31 October, and 1 January and pay any remaining tax liability not deposited on a monthly basis, as outlined above.

Act 154 sets forth the process for which a credit may be claimed for (i) taxes paid to any of the states of the United States on the acquisition of personal property and services and (ii) taxes paid to Puerto Rico by another member of the taxpayer's controlled group on a series of purchases.

### *Personal property taxes*

Every corporation engaged in a trade or business in Puerto Rico which on 1 January of each year owns personal property used in its trade or business within Puerto Rico, whether it is leased to another entity, is subject to tax on such property. The tax is self-assessed by the corporation and it is paid together with the filing of an annual return. The tax ranges between 5.08% and 8.23%, depending on the municipality. A 5% statutory discount is available if payment is made in full on the return due date (15 May of each year).

In general, all personal property not specifically exempted, including cash, finished goods inventory, supplies, and depreciable property, is subject to the tax. The personal property tax is generally based on the book value of the asset as of 1 January. Finished goods inventory, however, is assessed on the average of the monthly balances for the 12-month period preceding 1 January of each year.

The valuation of the personal property subject to tax is determined by multiplying the book value of such property by the applicable tax rate determined by the municipality in which the property is located. If the book value of depreciable property is below its estimated residual value, the property should be assessed at its estimated residual value.

### *Real property taxes*

The property tax system is administered by the Municipal Revenue Collection Center (MRCC). The tax on real property is directly assessed by the MRCC and may be paid in two instalments. The tax, (which varies from a minimum of 7.80% to a maximum of 10.23%, depending on the municipality) is applied to an amount based on the hypothetical fair market value (FMV) of the relevant property in the year 1957. In general terms, this hypothetical FMV normally ranges between 40% and 50% of the cost of the property.

### Municipal license tax

Every corporation is required to file an annual volume-of-business declaration with each of the municipalities in which it establishes or conducts business operations during the year. The declaration must indicate the actual volume of business (i.e. net sales, gross income from any service rendered, and other gross receipts) attributable to each municipality. When a business operates in more than one municipality but does not receive income in all of them, the license tax shall be computed based on a distribution of sales apportioned to each municipality by square feet of the building used in each municipality.

For a non-financial business, the license tax payment varies from a minimum of 0.20% to a maximum of 0.50%, depending on each municipality. The payment must be made in two equal instalments on or before 15 July and 15 January on the basis of the volume of business generated by the entity during its accounting year ended within the immediately preceding calendar year before the due date of the declaration. A 5% discount its available when the tax is fully paid on the declaration due date (on or before five working days after 15 April of each year).

For the first six months after a new business is established, the new company is generally exempt from the municipal license tax, provided that the business informs the municipality that it has established a new business in the municipality within the first 30 days of operations and request the provisional license tax as established in each municipality. A copy of the municipal license is generally requested as a perquisite for obtaining other licenses and permits in Puerto Rico.

## Branch income

Corporations operating in Puerto Rico as a branch may be subject to a 10% tax on the dividend equivalent amount (commonly known as the branch profit tax or BPT). The BPT should be determined and paid along with the CIT return. There would not be an income tax withholding at source at the time cash transfers are made by the Puerto Rico branch to its home office outside of Puerto Rico.

## Income determination

The gross income of a corporation generally includes business income, profits from the sale of property, interest, dividends, and income derived from any source unless specifically exempted by law.

A corporation’s net income is generally calculated in accordance with the method used for financial statement purposes, except for various items of income and expenses, which are treated differently. For example, the cash method of accounting may not be used by a corporation with inventory or with an average annual gross income in excess of USD 1 million. Long-term contract methods and the installment method can be used for regular tax calculations.

The annual accounting period may be on the basis of the calendar year, a fiscal year ending on the last day of a month or a 52/53 week year.

### Inventory valuation

In general, inventory is valued at the lower of cost or market. Retail merchants can use the retail method of accounting.

### *Capital gains*
Tax-advantaged treatment is provided for net long-term gains (holding period of more than six months) from the sale of capital assets. For corporations, net long-term capital gains, reduced by any short-term capital losses, are subject to an alternative (preferential) tax of 15% in lieu of the regular CIT rates.

### *Dividend income*
Dividends from a corporation that derives 20% or more of its profits from sources within Puerto Rico are taxable in Puerto Rico. However, a dividend-received deduction may apply.

### *Interest income*
Interest income is generally taxable, except interest from obligations of the federal government or any state, or territory, or political subdivisions; the District of Columbia; and the Commonwealth of Puerto Rico or any of its instrumentalities or political subdivisions.

### *Royalty income*
Royalties from property located in Puerto Rico or from any interest in such property are included in gross income.

### *Other income*
Service fees are generally taxable as ordinary income.

## *Deductions*

All ordinary and necessary expenses paid or incurred during the taxable year in carrying on any trade or business are deductible by corporations operating in Puerto Rico.

### *Depreciation*
A reasonable depreciation allowance is deductible for the exhaustion, wear and tear, and obsolescence of property used in business. The most common depreciation method used by corporations is the straight-line method. Nevertheless, any other consistent method may be used in lieu of the straight-line method as long as it is in accordance with the recognised trade practice. In addition, a corporation (other than one that is exempt under an Industrial Incentives Act) can elect an accelerated depreciation method for new or used tangible property acquired by purchase, on taxable years commencing after 30 June 1995.

For property acquired after 31 December 2009, when using the straight-line depreciation method, the useful life has to be determined based on the same rules of accelerated depreciation.

| Assets | Useful life (years) |
|---|---|
| 3 year property (e.g. computers, electronic equipment) | 3 |
| 5 year property (e.g. automobiles, transportation equipment) | 5 |
| 10 year property (e.g. furniture and fixtures, printing equipment) | 10 |
| 15 year property (e.g. air transportation equipment, natural gas plants) | 15 |
| 20 year property (e.g. vessels, land improvements) | 20 |
| Real property leased for residential purposes | 30 |

| Assets | Useful life (years) |
|---|---|
| Other real property | 35 |

In addition, Act 171 provides that for intangibles (other than goodwill) acquired or created after 1 September 2010, the deduction is calculated using the straight-line method over the lower of a useful life of 15 years or the intangible useful life.

### *Dividends-received deduction*
All corporations engaged in trade or business in Puerto Rico are entitled to an 85% deduction on dividends received from a domestic corporation but not in excess of 85% of the net income of the corporation. A 100% dividend-received deduction applies for dividends received from taxable controlled domestic corporations (if ownership in a corporation is 80% or more).

### *Employee remuneration*
Corporations may deduct payments of reasonable salaries or other compensation for services actually rendered.

### *Insurance premiums*
Insurance premiums paid or accrued on risks related to a trade or business are deductible as well as premiums on group life policies covering employees, where the beneficiary is not the corporation. No deduction is allowed for premiums paid to an insurance company not authorised to provide insurance in Puerto Rico or through an agent or broker not authorised to operate in Puerto Rico.

### *Charitable contributions*
For tax years beginning after 31 December 2010, deductions for allowed charitable contributions are limited to 10% of net income, computed regardless of the contributions. Prior to 1 January 2011, charitable contributions were limited to 5% of net income.

### *Rent expense*
Corporations are entitled to a rent expense deduction if the rented property is used in the business.

### *Meals and entertainment*
Meals and entertainment expenses are deductible, subject to a 50% limitation. Travelling expenses are fully deductible if the trip is for business purposes.

### *Automobiles expenses*
A corporation is allowed to depreciate non-cargo automobiles used in trade or business over a five year useful life (three years in the case of sales persons) up to a maximum base of USD 25,000 for a maximum annual depreciation of USD 5,000. However, Act 1 increased the maximum base to USD 30,000, allowing a maximum annual depreciation of USD 6,000 for taxable years beginning after 31 December 2010.

On the other hand, pursuant to Act 1, non-cargo automobile maintenance expenses (e.g. gas, repairs, insurance) are no longer deductible for taxable years beginning after 31 December 2010. Instead, a deduction based on mileage, not yet determined by the Secretary of the Treasury, will be allowed.

### *Taxes*
A corporation is allowed a deduction for taxes paid (except for Puerto Rico CIT), including income tax paid to the United States, its other possessions, and any foreign country. The deduction is in lieu of claiming a foreign tax credit.

### *Other significant items*
The cost of incidental repairs (not adding value to the property) is deductible as business expenses.

Subject to certain limitations, savings and retirement plans for the benefit of the employees are deductible, if qualified by the Secretary of the Treasury.

### *Net operating losses (NOLs)*
All corporations are generally entitled to the NOL deduction in computing their tax. NOLs may be carried over for seven years (there are no carryback provisions). Also, losses from sales or exchanges of capital assets are allowed only to the extent of gains from such sales or exchanges. The carryforward period in this instance is, however, five years.

Act 171 increases the NOL carryforward period from seven taxable years to ten taxable years for NOLs generated from taxable years beginning after 31 December 2004 and before 31 December 2012.

### *Payments to foreign affiliates*
Management fees paid to a foreign affiliate are deductible to the extent that they are reasonable compensation for the services rendered. However, the Secretary of the Treasury has the authority to reallocate items of income and expense to properly reflect the Puerto Rico taxable income.

## *Group taxation*

Puerto Rico does not have group taxation rules. In other words, corporations can not file a consolidated return for Puerto Rico CIT purposes.

### *Transfer pricing*
There are no specific transfer pricing rules in Puerto Rico.

### *Thin capitalisation*
There are no specific thin capitalisation rules in Puerto Rico.

## *Tax credits and incentives*

A corporation engaged in specific eligible activities may apply for a reduced CIT rate through the request of a Tax Exemption Grant to the Puerto Rico Office of Industrial Tax Exemption pursuant to Act 73 of 28 May 2008.

### *Tax rate incentives*
Exempt entities may elect one of the following two scenarios:

- General scenario: 4% CIT rate with a WHT rate on royalty payments of 12%. Under this scenario, the amount of WHT on the royalty payments is creditable against the 4% CIT.

- Alternate scenario: 8% CIT rate with a WHT rate on royalty payments of 2%. Under this scenario, the WHT on royalty payments is creditable against the 8% CIT.

Companies may elect one of these scenarios at the time of applying for the benefits under the act. However, there are other possibilities:

- 4% fixed income tax rate on IDI, excluding income from certain investments provided by section 2(j).
- Existing exempt businesses currently taxed at a rate of 2% to 4% under the 1998 Act may continue to enjoy the same tax rate under the new act when it is determined by the Secretary of the Puerto Rico Economic Development (the Secretary) that said tax rate is in the best interest of Puerto Rico and the existing business complies with an employment commitment of at least 80% of its average employment during the three preceding years before the application of exemption under the new act. Note that the secretary could require a minimum income tax payment equal to the average income tax paid during said period.
- Pioneer industries are eligible for a 1% CIT rate.
- Activities for the development in Puerto Rico of intangible property are eligible for a 0% CIT rate.
- Any exempt business having operations at a municipality located in a 'low or intermediate development zone' may reduce its CIT rate by an additional 5%.
- Any exempt business having operations in Vieques and Culebra may be totally exempt from income taxes during the first ten years of operations as established in the new act. The remaining years covered by its tax decree may qualify for a 2% CIT rate.

### *Special deductions*
Special deductions are eliminated, except for capital investment in buildings, structure, machinery and equipment, and the NOLs carryforward.

### *Credits*
#### Credit for purchases of Puerto Rico manufactured product
Subject to certain limitations, the credit for purchases of products manufactured in Puerto Rico will remain at 25% (35% in the case of recycled products).

#### Job creation credit
There is a credit for every incremental job applicable to exempt business starting operations after 1 July 2008. The amount of the credit (maximum of USD 5,000 per each employment) depends upon the location of the industrial development zone.

#### Research and development investment credit
A 50% credit is granted for the eligible investment in research and investment activities, including operational expenditures, clinical trials, infrastructure, renewable energy, or intellectual property.

#### Energy investment credit
A 50% credit is granted for the eligible investment in the acquisition of machinery and equipment for the creation of energy.

#### Energy cost credit
There is also a 3% credit (which could be increased up to 10% if certain employment requirements are met) for payments made to the Puerto Rico Power Authority during the corresponding taxable year. This credit is available for a ten-year period starting as

of 1 July 2008. Additional credits (for the purpose of reducing the cost of energy) may be available to industrial units subject to certain limitations.

### Technology transfer credit

A 12% credit (2% in the case of exempt businesses that opted for the alternate tax) is available for payments made to resident entities for the use or privilege of using intangible property in Puerto Rico.

### Strategic projects investment credit

There is a 50% credit for eligible investment in strategic projects, including activities for the design, development, and construction of dams.

### Industrial investment credit

There is a 50% credit, up to a maximum of USD 8 million, for cash invested in the purchase of 50% or more of the stock or operating assets of an exempt business that is in the process of shutting down operations, amount used to start-up small or medium-exempt business, or amounts used for a substantial expansion of an exempt business.

Several of the above-mentioned credits were also made available to entities operating under prior tax incentives acts.

On 3 January 2011, the PRTD issued Circular Letter 11-01 and Informative Bulletin 11-01 to introduce the new electronic system for integrated tax credits (CCI System, for its name in Spanish). Also, these communications introduced new processes to claim such credits against the income tax, notify of the sale of such credits, and to request the vouchers for the utilisation of these credits against the corporation's utilities, if applicable.

The CCI System will allow the PRTD to maintain an updated registry of the tax credits already granted.

### *Property tax incentives*

Similar to the previous incentives laws, the current act allows for a 90% property tax exemption on personal and real property. However, the current act introduced a methodology for the classification and assessment of real property owned by the exempt businesses. Under the provisions of the current act, a taxpayer can self-assess one's real property tax responsibility (similar to the current personal property tax system) and remit the related tax liability due along with a real property tax return (to be issued by the MRCC) by 15 May of each year. The self-appraisal method is only applicable to real property that has not been appraised by the MRCC and is mainly limited to machinery and equipment classified as real property. Note that this method is not available for assets such as land, building, and building equipment.

### *Municipal license tax and other municipal tax incentives*

The current act did not introduce many changes regarding treatment of exempted businesses for municipal license tax purposes. The tax exemption remains at the same 60% as it was under the 1998 Act. Exempt businesses operating in Vieques or Culebra are 90% exempt; small or medium-exempt businesses are 75% exempt; and central or regional corporate headquarters providing managerial services to affiliated companies are 100% exempt during the first five years after becoming eligible for the exemption.

## Withholding taxes

Corporations not engaged in a trade or business in Puerto Rico are subject to a 29% WHT at source on certain gross income items (considered fixed or determinable, annual or periodical (FDAP)) from Puerto Rico sources.

FDAP income may include interests received from a related person, rents, royalties, salaries, annuities, compensation, remuneration, and net capital gains. However, if the payment received is from dividends and partnership profits, a 10% WHT should apply.

The payer, as a withholding agent, is responsible for the deduction and remittance of the 29% (10% in the case of dividends) to the Puerto Rico Treasury Department. Such tax is due on or before the 15th day of the month following the receipt of the income by the non-resident corporation and it is reported in Form 480.31 'Deposit Slip of Non-residents Income Tax Withheld at Source'. An annual informative return is also required to be filed (Form 480.30 'Non-residents Annual Return of Income Tax Withheld at Source') no later than 15 April of the following year.

### Tax treaties

There are no tax treaties between foreign countries and Puerto Rico. However, the Puerto Rico Supreme Court has recognised that, although Puerto Rico is generally not a signatory party to a treaty entered into by the United States, if an international treaty does not explicitly exclude Puerto Rico, the treaty would be applicable to Puerto Rico.

## Tax administration

### Annual report

Every corporation is required to file an annual corporation report with the Puerto Rico Department of State. This annual report must be filed by the 15th day of April along with a USD 100 annual fee and a balance sheet as of the close of operations of the prior year. The report should be filed through the Puerto Rico Department of State's website. If the volume of business exceeds USD 3 million, the annual report must be accompanied by a balance sheet certified by a certified public accountant (CPA) licensed in Puerto Rico. In the event that the volume of business does not exceed USD 3 million, a balance sheet prepared under generally accepted accounting principles (GAAP) by a person with a general knowledge in accounting has to be submitted along with the corporate annual report. An extension of 60 days, an additional 30 day period may be requested, for filing the annual report can be obtained if timely requested. The Secretary of State is authorised to impose penalty for failure to timely or accurately file the annual corporate report that would be between USD 100 and USD 1,000 if a non-profit corporation, and between USD 500 and USD 2,000 if a for-profit corporation.

### Returns

The Puerto Rico tax system is based on the principle of self-assessment. A corporate taxpayer is required to file an annual income tax return (generally Form 480.20) by the 15th day of the fourth month following the close of its tax year. In general terms, a taxpayer can obtain an additional extension of three months to file its income tax return. Failure to timely file can result in penalties. Any tax not covered with the estimated tax payments should be paid along with this return.

A corporate taxpayer may also be subject to file a personal property tax return by 15 May and/or a volume of business declaration by the 5th business day after 15 April.

### *Payment of tax*

A corporation must substantially satisfy its annual income tax liability, if any, through estimated income tax payments. The amount of estimated income taxes should be paid on equal instalments on the 15th day of the fourth, sixth, ninth, and 12th month of the taxable year of the corporation. The estimated payments should equal or exceed 90% of the actual tax for the year or, in the case a CIT return was filed by the corporation in the preceding year, 100% of such tax liability. Failure to pay the tax by the due dates indicated above may result in a penalty of 10% of the instalment due.

### *Audited financial statements*

Accounting records must be prepared in accordance with the general accepted accounting principles (GAAP) followed in the United States. Domestic corporations (i.e. incorporated in Puerto Rico) with volume of business of more than USD 3 million must include, with their CIT return, audited financial statements of the Puerto Rico operations for the accounting year ended on or before the preceding 31 December. The financial statements should be submitted with an audit report issued by a CPA licensed in Puerto Rico. Nevertheless, foreign corporations with volume of business of more than USD 1 million must include, with their CIT return, audited financial statements of the Puerto Rico operations.

Act 1 increases the threshold requirement for foreign corporations to USD 3 million. Also, qualified and disclaimer opinions are now allowed to the extent that the qualification or disclaimer does not result from a restriction in scope. However, no adverse opinions are allowed. All groups of related entities engaged in a trade or business in Puerto Rico are required to file consolidated financial statements (CFS), which should contain a consolidating schedule, also subject to audit procedures, with columns showing the financial position and the result of operations of the parent company and each of the subsidiaries. Said schedule should also contain the eliminating entries and the consolidated balance sheet. The determination of the gross income threshold for purposes of the audited financial statement requirement should be made taking into consideration the volume of business of all the entities within a controlled group. In the case of foreign entities, these will be able to submit audited financial statements with their Puerto Rico operations on a stand-alone basis; in other words, the CFS will not be required. The requirement for audited financial statements will not apply to non-for-profit organisations.

With respect to the municipal license and personal property tax filings, the threshold amount for the audited financial statements requirement is gross revenues of more than USD 3 million regardless the corporate residency (i.e. foreign or domestic).

## Significant developments

### Publication of Final Executive Regulations

The executive regulations related to the Qatar tax law, which contain guidance on how the Qatar tax authorities will interpret and apply the provisions of the Qatar tax law in practice, were published in the official gazette on 1 June 2011. These regulations provide greater clarity in respect of matters that were previously uncertain. The regulations will enter into effect as of 1 July 2011.

### Qatar Financial Centre (QFC)

The QFC tax law became effective as of 1 January 2010. QFC entities are subject to tax in respect of activities undertaken pursuant to their QFC licence at the rate of 10%.

## Taxes on corporate income

Income Tax Law No. 21 of 2009 came into force with effect from 1 January 2010 and replaced the previous tax law, Law No. 11 of 1993. Key highlights of the law include the reduction of the tax rate to a flat tax rate of 10%, the elimination of progressive tax rates (with the top rate of 35% under the previous tax law), a shift to 'source based taxation' from an 'activity based test', and the introduction of withholding tax (WHT).

Note that the information provided in this section is directed towards non-QFC entities with Qatar source income.

An entity that is wholly or partially foreign owned and that derives income from sources in Qatar is taxable in Qatar. In the case of a joint venture, the tax liability of the joint venture is dependent upon the foreign partners' share of the joint venture's profit. Currently, no corporate income tax is levied on a corporate entity that is wholly owned by Qatari nationals and Gulf Cooperation Council (GCC) nationals.

Unless specifically exempt from tax, an entity will be taxable in Qatar if it has generated Qatar-source income, regardless of the place of its incorporation. Even if an entity has been granted an exemption from Qatar tax, the entity may be required to submit a tax return.

Taxable income generally is subject to a flat corporate income tax rate of 10%, with certain exceptions available. In prior periods, tax was levied at differing rates on different portions of income, with the first 5 million Qatari riyals (QAR) of income being taxed at an appropriate effective tax rate of 24% and any income in excess of QAR 5 million being taxed at 35%.

Since 1 January 2010, the following tax rates apply in the specific circumstances noted:

- If a special agreement has been reached with the government of the State of Qatar prior to 1 January 2010, the rate specified in the agreement continues to apply. If no rate is specified in the agreement, a rate of 35% will be used.
- The rate applied with respect to oil operations, as defined in Law No. 3 of 2007, may not be less than 35%.
- Payments made to non-residents with respect to certain service activities not connected with a permanent establishment (PE) in Qatar are subject to withholding tax *(see the Withholding taxes section)*.

The amount of tax payable is reduced for companies that are partly foreign owned, depending on the extent of local ownership.

## *Corporate residence*

It is important to recognise that residence is not the basis used to determine whether an entity is taxable in Qatar. Accordingly, a tax exposure in Qatar may arise even if a company is not resident in Qatar. Residence is therefore primarily relevant when considering whether WHT will apply on payments received rather than the typical form of corporate taxation on taxable income.

A company is resident in Qatar if it is incorporated in accordance with Qatari laws, its head office is situated in Qatar, or its place of effective management and control is in Qatar.

## *Other taxes*

### *Value-added tax (VAT)*
Qatar currently imposes no sales tax or value-added tax (VAT) on operations in Qatar.

### *Customs duties*
Customs duties are applied to goods with an origin outside the GCC countries, normally at a rate of 5%. Higher rates sometimes apply for specific types of goods, such as tobacco products. Temporary import exemptions are sometimes available.

## *Branch income*

The profits of a branch owned by a foreign parent entity are subject to the same tax rules as apply to other forms of taxable entities.

## *Income determination*

Corporate income tax is levied on a company's Qatar source income. Some examples of Qatar source income include:

- Income derived from an activity carried on in Qatar.
- Income derived from contracts wholly or partially performed in Qatar.
- Income from real estate situated in Qatar, including income from the sale of shares of companies with assets consisting of mainly real estate situated in Qatar.
- Income from shares in companies resident in Qatar or listed on Qatar's stock market.
- Interest arising in Qatar.

- Bank interest realised outside Qatar if it results from the taxpayer's activity in Qatar.

### *Capital gains*
Any chargeable gains on the sale of capital assets are taxed as ordinary income.

### *Exemptions*
Certain types of income are exempt from Qatar tax, such as the income generated by Qatar-based companies that are wholly owned by Qatari nationals.

### *Self-employed contractors*
Any Qatar-sourced income generated by self-employed contractors is subject to taxation in Qatar. However, employment income is outside the scope of Qatar tax.

## *Deductions*

Taxable income is determined after deducting all expenditures, costs, and losses incurred to generate gross income, particularly the following:

- Interest on loans used in the activity.
- Employee costs (including salaries, wages, gratuities, and other end of service benefits).
- Tax depreciation of fixed assets.
- Losses resulting from the sale of assets.
- Bad debts approved by the tax authorities in accordance with the criteria set out in the tax law.
- Donations, gift aid, and subscriptions to charitable, humanitarian, scientific, cultural, or sporting activities paid in Qatar to government authorities or public bodies, provided the value does not exceed 5% of net profit in the year in which the deduction is claimed.
- A deduction is usually available for expenses that are considered ordinary rather than 'capital' in nature and incurred in generating Qatar-source revenue.
- Rents.
- Insurance premiums.
- Taxes and duties other than the income tax provided for in the law.

### *Depreciation and depletion*
Depreciation should be calculated in accordance with rates specified by the Qatar tax law and the related regulations.

### *Net operating losses*
Losses may be deducted from net income during the year. Losses can be carried forward for three years after the year in which they were incurred. Losses cannot be carried back.

### *Allocations of overheads to branches*
The branch's share of the head office expenses (i.e. indirect or allocated overheads) generally is deductible only up to a certain limit. The deduction is capped at 3% (1% for banks) of the total revenue less certain other costs under the previous tax law.

## Group taxation

There is no definition of a 'group' for Qatar tax purposes; therefore, there is no concept of group taxation.

An anti-avoidance provision was introduced by the Qatar tax law, and the executive regulations have made it clear that this provision will be applied to related-party transactions.

### Anti-avoidance provision

The anti-avoidance provision gives the Qatar tax authorities wide powers to counteract transactions that have been carried out with a tax avoidance purpose. These powers include substituting an arm's-length value or recharacterising transactions.

## Tax credits and incentives

### Qatar Science and Technology Park

Qatar has established the Qatar Science & Technology Park (QSTP), which is aimed at entities with research and development activities. QSTP entities can be fully exempt from Qatar tax; however, tax exempt entities are required to file tax returns.

### Other tax exemptions

An application for a tax exemption may be made for certain projects that are considered to be strategically significant to the Qatar economy. The exemptions are generally granted for a period of three or six years (reduced from five or ten years under the previous tax law). Applications for an exemption are assessed based on certain criteria set out in the Qatar tax law.

Notwithstanding the fact that an exemption is granted, an entity that is exempt is still required to file a tax return under the Qatar tax law.

## Withholding taxes

### Mechanics of the WHT system

WHT was introduced in Qatar for the first time on 1 January 2010. WHT is levied on certain payments made to non-residents in relation to royalties and technical services (the applicable rate is 5%) and on interest, commissions, brokerage fees, directors' fees, attendance fees, and any other payments for services carried out wholly or partly in Qatar (the applicable rate is 7%). WHT on interest is currently suspended until further notice; however, this is expected to be a temporary measure. This suspension is expected to be lifted once the final executive regulations are issued. It is understood that the final executive regulations will clarify the circumstances in which WHT would apply going forward to payments of interest.

The company that makes the payment to its foreign supplier is required to withhold the tax and remit to the tax department the funds that were withheld by the 16th day of the following month. In the event that the company does not make a payment to the tax department, the company will be liable for a penalty equal to the amount of unpaid tax due, in addition to the WHT.

# Qatar

### *Retention system*

Pursuant to circulars issued by the tax department, a retention system is in place whereby certain final contract amounts are required to be retained from payments made by Qatari entities to foreign entities in connection with work performed in Qatar. However, a practice has developed over time whereby 5% to 10% of each payment is retained rather than the final contract payment. All ministries, government departments, public, semi-public, and private establishments and Qatar taxpayers are required to retain these amounts until the recipient entity provides a final tax clearance, which is obtained from the Qatar tax authorities. Where WHT is not deducted, the retention system currently continues to apply. We understand that the Qatar tax authorities will issue further guidance on the retention rules under the new tax law in due course.

### *Tax treaties*

Qatar has a growing network of double tax treaties with over 30 double tax treaties currently in force. The withholding tax rates under these treaties in respect of dividends, interest, and royalties are as follows:

| Recipient | Dividends (%) | Interest (%) | Royalties (%) | Effective date |
|---|---|---|---|---|
| Armenia | 5/10 (1) | 5 | 5 | 1 Jan 2008 |
| Azerbaijan | 7 | 7 | 5 | 1 Jan 2009 |
| Belarus | 0/5/10 (2) | 5 | 5 | 1 Jan 2008 |
| China (PRC) | 10 | 10 | 10 | 1 Jan 2009 |
| Cuba | 5/10 (3) | 10 | 5 | 1 Jan 2009 |
| Cyprus | 0 | 0 | 5 | 1 Jan 2010 |
| France | 0 | 0 | 0 | 1 Jan 2007 |
| India | 5/10 (4) | 10 | 10 | 1 Jan 2001 |
| Indonesia | 10 | 10 | 5 | 1 Jan 2008 |
| Italy | 5/10 (3) | 5 | 5 | 1 Jan 2010 |
| Korea, Republic of | 10 | 0/10 (11) | 5 | 1 Jan 2010 |
| Lebanon | 0 | 0 | 0 | 1 Jan 2010 |
| Luxembourg | 0/5/10 (2) | 0 | 5 | 1 Jan 2011 |
| Macedonia | | | | 1 Jan 2009 |
| Malaysia | 5/10 (4) | 5 | 8 | 1 Jan 2010 |
| Malta | 0 | 0 | 5 | 1 Jan 2010 |
| Nepal | 10 | 10 | 15 | 1 Jan 2010 |
| Netherlands | 0/10 (5) | 0 | 5 | 1 Jan 2010 |
| Norway | 5/15 (6) | 0 | 5 | 1 Jan 2010 |
| Pakistan | 5/10 (4) | 10 | 10 | 1 Jan 2001 |
| Poland | 5 | 0/5 (10) | 5 | 1 Jan 2010 |
| Romania | 3 | 3 | 5 | 1 Jan 2004 |
| Russia | 5 | 5 | 0 | 1 Jan 2001 |
| Serbia | 5/10 (4) | 10 | 10 | 1 Jan 2011 |
| Seychelles | 0 | 0 | 5 | 1 Jan 2008 |
| Singapore | 0 | 5 | 10 | 1 Jan 2008 |
| Slovenia | 5 | 5 | 5 | 1 Jan 2011 |
| Sri Lanka | 10 | 10 | 10 | 1 Jan 2008 |
| Switzerland | 5/10/15 (7) | 0 | 0 | 1 Jan 2011 |
| Turkey | 10/15 (8) | 10 | 10 | 1 Jan 2009 |

| Recipient | Dividends (%) | Interest (%) | Royalties (%) | Effective date |
|---|---|---|---|---|
| United Kingdom | 0/15 | 0 | 5 | 1 Jan 2011 |
| Venezuela | 5/10 (4) | 0/5 (9) | 5 | 1 Jan 2008 |

Notes

1. 5% if capital exceeds USD 100,000, and 10% in all other cases.
2. 0% if the beneficial owner is a company which owns at least 10%, 5% if 10% direct participation is held by an individual who has resided in the relevant state for a period of at least 48 month, and 10% in all other cases.
3. 5% if the beneficial owner is a company which has owned directly or indirectly at least 25%, and 10% if participation is less than 25%.
4. 5% if the beneficial owner is a company which owns at least 10%, and 10% in all other cases (i.e. less than 10% shareholding).
5. 0% if the beneficial owner is a company which owns at least 7.5%, and 10% in all other cases (i.e. less than 7.5% shareholding).
6. 5% if the beneficial owner is a company which owns at least 10%, and 15% in all other cases (i.e. less than 10% shareholding).
7. 5% if the beneficial owner is a company which holds directly at least 10%, 10% if the beneficial owner is an individual which holds directly at least 10%, and 15% in all other cases.
8. 10% if the beneficial owner is a company which has owned at least 25%, and 15% in all other cases (i.e. less than 25% shareholding).
9. 10% if income is derived from immovable property, and 0% in all other cases.
10. 0% where the beneficial owner of the interest carries on business in the other contracting state where the interest arises (i.e. through a PE therein), and 5% if the contracting company does not have a PE.
11. 0% if interest arising in contracting state is derived from government debt, and 10% if the contracting company does not have a PE.

## *Tax administration*

### *Returns*

The tax year is generally the same as the calendar year, although advance approval may be sought from the Qatar tax authorities to use a company's accounting year end.

The tax return is due within four months from the date of a company's tax filing period.

### *Payment of tax*

The tax payable is based on the tax declaration and should be paid on the same day that the tax return is due.

### *Late filing penalties*

The Qatar tax law contains a penalty regime, which imposes a penalty for the late filing of a tax return. In addition, a penalty applies where there is there is a late payment of tax.

### *Objection and appeals process*

It is possible for a taxpayer to initially object directly to the tax department regarding a decision related to a tax position. If the objection is unsuccessful with respect to altering the tax department's decision, an appeal may be made by the taxpayer to the Tax Appeals Committee. Based on the Tax Appeals Committee's decision with respect to the appeal, a final appeal may be made by either the tax department or the taxpayer to the administrative chamber of the court. The law prescribes time limits for each stage of the appeal process.

### *Accounting and audit requirements*

A company's corporate income tax return is required to be accompanied by audited financial statements if the company's capital or profit exceeds QAR 100,000, or the head office is situated outside Qatar. The audit report must be signed by a Qatar registered auditor.

Qatar tax law requires accounts to be prepared in accordance with International Financial Reporting Standards (IFRS).

### *Accounting record retention*

All accounting books, registers, and documents relating to activity in Qatar are required to be retained in Qatar for a ten-year period.

## Significant developments

### Corporate taxation

The minimum tax was repealed as of 1 October 2010. As a result, for taxpayers subject to the minimum tax for the first part of 2010, the year 2010 was split into two different fiscal periods, which also affected the periods available for carryforward of fiscal losses.

The withholding tax (WHT) on dividend payments made both to residents and non-residents (European Union (EU) or European Free Trade Area (EFTA)) has been increased from 10% to 16% *(see the Withholding taxes section for more information)*.

As of 1 January 2011, Romania-sourced interest and royalty payments of an affiliated company, resident in a EU or EFTA member state, are exempt from WHT, provided certain conditions are met (stated by the Interest-Royalties Directive) *(see the Withholding taxes section for more information)*.

The Romanian Fiscal Code reintroduced the 3% income tax for micro-companies, with restrictive conditions for application. The tax is optional in the sense that qualifying taxpayers may apply for the micro-company tax regime or continue to be profit taxpayers.

Large and medium size taxpayers have to submit fiscal forms electronically for returns with a submission deadline of 25 November 2010 onwards. For other categories of taxpayers, electronic submission is still optional.

### Value-added tax (VAT)

As of 1 July 2010, the standard VAT rate was increased from 19% to 24%.

Supplies of cereals and industrial crops performed on the Romanian territory between companies registered for VAT purposes will be subject to the reverse charge mechanism. The measure applies until 31 May 2013.

A taxable person who does not exceed the exemption threshold of EUR 35,000 during a calendar year may request, by 20 January of the following year, deregistration from the records of the persons registered for VAT purposes in order to apply the special exemption regime.

The threshold for importers wishing to obtain a VAT deferment certificate has been reduced to 100 million Romanian lei (RON) (formerly the threshold was RON 150 million). In addition, the time period which is taken into consideration for qualifying is now either the past calendar year or the last 12 consecutive months.

### Excise duties
There have been substantial changes to the duty-free and tax warehouse regimes and the related authorisations.

Excise duty rates for alcoholic beverages and related intermediate products have been increased. (i.e., the level of excise duties has risen for fermented still beverages, other than beer and wines, from EUR 0/hl to EUR 100/hl of product, and for intermediary products from EUR 65/hl to EUR 165/hl) .

Mandatory guarantees should be established for the production, processing, and storage, as well as for the movement, of excise goods under the excise duty suspension regime. The total level of excise duty on cigarettes was increased from EUR 74/1,000 cigarettes to EUR 76.60/1,000 cigarettes. The minimum excise duty payable was also increased from EUR 67.34/1,000 cigarettes to EUR 73.54/1,000 cigarettes, and it will be further increased to EUR 74/1000 cigarettes from 1 July 2011. Also, as of 1 July 2011, the method for computation of the specific excise duty for cigarettes will change.

The level of excise duties on gasoline increased from EUR 452/tonne to EUR 467/tonne and on diesel from EUR 347/tonne to EUR 358/tonne.

## Taxes on corporate income

The standard profit tax rate is 16% for Romanian companies and foreign companies operating through a permanent establishment (PE) in Romania. Resident companies are taxed on worldwide income, unless a double tax treaty (DTT) stipulates otherwise.

The profit tax liability due from nightclubs and gambling operations cannot be less than 5% of the revenue obtained from such activities.

The 3% income tax for micro-companies has been reintroduced as of 1 January 2011, with restrictive conditions for application. The tax is optional in the sense that qualifying taxpayers may apply for the micro-company tax regime or continue to be profit tax payers.

## Corporate residence

A company is considered resident in Romania if it was set-up under Romanian law or has its place of effective management in Romania.

Starting in 2010, the tax code introduced the concept of 'legal person set-up in accordance with European legislation'. Such legal persons become tax residents if they establish (or transfer) their registered office in Romania. As a result, such entities are subject to the same tax treatment as Romanian legal persons for taxation of profits and dividends.

### Permanent establishment (PE)
PE is defined as being the place through which the activity of a non-resident is conducted, fully or partially, directly or through a dependent agent.

Once a PE is created, Romania has the right to tax the profits of the foreign enterprise derived from the activity performed on its territory.

The Romanian legislation explicitly states three conditions that should be met simultaneously in order to trigger a PE:

- A place of business must exist (e.g. premises, machinery, or equipment).
- The place of business must be fixed (i.e. must be established at a distinct place with a certain degree of permanence).
- The activity should be carried out through this fixed place of business (i.e. there are people dependent on the enterprise and conducting its business in the country where it is located).

The registration, filing, and payment requirements for a PE are similar to those for a Romanian company.

## Other taxes

### Value-added tax (VAT)

As of 1 July 2010, the standard rate of VAT has been increased from 19% to 24% and is applied to all supplies of goods and services (including imports) that do not qualify for an exemption (with or without credit) or for the VAT reduced rate.

The reduced VAT rate is 9% and is applicable to admission fees at museums, historical monuments, architecture and archaeological monuments, zoos and botanical gardens, fairs and exhibitions, cinema tickets, supply of school manuals, books, newspapers and periodicals, supply of prostheses and orthopaedic products (except for dentures), medicine for human and veterinarian use, and accommodation in hotels or in areas with a similar function.

Some operations are exempt with credit (i.e. right to deduction) for input VAT, including: export of goods; transport and related services; intra-community supply of goods; international transport of passengers; certain operations performed in free-trade zones and free warehouses; supply of goods to a bonded warehouse, a VAT warehouse, and related services; supply of foreign goods which are placed under suspensive customs regimes; supply of services in connection with goods placed under customs suspensive regimes; supply of goods and services to diplomatic missions, international organisations, and North Atlantic Treaty Organisation (NATO) forces.

VAT exemption without credit applies to a range of activities, including banking, finance, and insurance. However, some financial services are also subject to a 24% VAT (e.g. factoring, debt collection, managing, and depositing certain equity papers).

There are also operations that are exempt with credit (i.e. deduction right) for input VAT, such as the following:

- Export of goods, transport, and related services.
- Intra-community supply of goods.
- International transport of passengers.
- Goods placed in free trade zones and free warehouses.
- Supply of goods to a bonded warehouse, a VAT warehouse, and related services.
- Supply of goods, which are placed under suspensive customs regimes.
- Supply of services in connection with goods placed under suspensive customs regimes.
- Supply of goods and services to diplomatic missions, international organisations, and NATO forces.

VAT on imported goods continues to be paid at customs, except for taxable persons registered for VAT purposes that obtain an import VAT deferment certificate from the customs authorities. For these taxpayers, the VAT is not paid at customs but is shown in the VAT return as both input and output VAT. The import VAT deferment is available only to companies for which the value of the imports performed in the previous year/ previous 12 months has reached the threshold of minimum RON 100 million.

The rules for establishing the place of supply of goods and services (and therefore the place of VAT taxation) are fully aligned with the Recast of the EU Sixth VAT Directive. Services provided by offshore entities to Romanian companies with deemed place of supply in Romania are subject to Romanian VAT.

### Reduced VAT at the rate of 5% for sale of buildings

Companies selling buildings can apply for a reduced VAT, at the rate of 5%, in the following cases:

- The buildings are part of a social policy, such as homes for the elderly, retirement homes, orphanages, or rehabilitation centres for children with disabilities.
- The building is supplied as housing to an individual or family and has a maximum useful surface of 120 square metres and a value of less than RON 380,000 (exclusive of VAT).

### Reverse charge mechanism

Under the VAT reverse charge mechanism, VAT is not actually paid, but only shown in the VAT return as both input and output tax, provided the beneficiary is registered for VAT purposes.

The reverse charge mechanism applies for services performed by offshore entities, and the place of supply is where the beneficiary is established or has a fixed establishment (e.g. consultancy, marketing services, telecommunications, and electronically supplied services). This is possible provided the suppliers are not established in Romania for VAT purposes.

Supplies of cereals and industrial crops performed on the Romanian territory between companies registered for VAT purposes will be subject to the reverse charge mechanism. The measure applies until 31 May 2013.

### VAT compliance

As a general rule, the fiscal period is the calendar month. For taxable persons registered for VAT purposes whose previous year-end turnover did not exceed EUR 100,000, the fiscal period is the calendar quarter.

Taxable persons must keep complete and detailed records for calculation of VAT liabilities.

VAT returns should be submitted to the tax authorities by the 25th day of the month following the end of the fiscal period; the VAT is due by the same date. The VAT return should be submitted using an electronic carrier.

Taxable persons not registered for VAT purposes are required to pay VAT and to submit a special VAT return on services rendered by non-residents, which have a deemed place of supply in Romania. These obligations must be fulfilled by the 25th day of the month following that in which the services are performed.

Taxable persons are required to file twice yearly for acquisitions and supplies of goods and services performed on Romanian territory, based on the existence of invoices.

### *Customs regulations*

Customs values are determined and declared by importers in accordance with the provisions of the World Trade Organisation (WTO) Customs Valuation Agreement (i.e. the Agreement pertaining to the implementation of Article VII of the General Agreement on Trade and Tariffs (GATT)).

For chain transactions with goods intended for import, the customs value may be determined, under certain conditions, based on the price in any of the transactions in the chain ('first sale principle'). This way, the customs value can be determined based on a price lower than that paid or payable by the importer (e.g. based on the price of the first transaction in the chain).

The customs value can be modified within 12 months of the acceptance of the customs declaration for the release of the goods for free circulation, in specific cases (e.g. in the case of defective goods).

Under specific conditions, determining customs value upon import is possible, even if certain elements that need to be added to the customs value are not quantifiable on the importation date (e.g. licence fees, royalties) or are missing.

The customs authorities may inspect the customs value either during the customs clearance or during a post-import audit (the customs authorities are entitled to perform such an audit during a five-year period following the date of import).

It is also possible to amend or invalidate the customs declaration, as follows:

- Amendment of the customs declaration before the customs clearance is obtained.
- Invalidation of the customs declaration within 90 days of the customs clearance being obtained.
- Amendment after the customs clearance is obtained, which can be performed at the request of the traders within five years of the customs clearance date.

#### Customs duties

The customs duties are those specified in the EU Common Customs Tariff and are expressed as a percentage applied to the customs value (i.e. *ad valorem* taxes) or as a fixed amount applied to a specific quantity (i.e. specific taxes).

Agricultural products (i.e. products from chapters 1–24 of the EU Common Customs Tariff) are subject to specific taxation.

In certain cases (e.g. meat), the customs duty rate is established with regard to the cost, insurance, and freight (CIF) or the entry price of the products. In other cases, the customs duty rate is established by adding additional duties, such as agricultural components, to the *ad valorem* tax.

#### Customs representation

Legal entities established in non-EU states can declare goods by indirect representation. The indirect representation can be used for customs regimes such as transit or temporary importation.

Moreover, legal entities established in non-EU states can occasionally declare goods on their own or through direct representation, provided that the customs authorities consider this to be justified.

Customs brokers can be authorised to use the local customs clearance procedure or to submit simplified customs declarations for the companies they represent (either directly or indirectly). Any Romanian legal person can act as an indirect representative for a sole person using the simplified customs clearance procedures.

#### Authorised Economic Operator (AEO) status

Operators that obtain AEO status benefit from simplifications regarding customs inspection, obtaining customs authorisations, and performing customs formalities.

Moreover, through the AEO certificate, the holder is recognised by the customs authorities as a reliable person, giving comfort as regards observance of the safety and security standards.

#### Customs rulings

Companies can obtain rulings ('binding tariff information' or BTI) from Romanian customs authorities regarding the tariff classification of imported goods that are binding for the customs authorities for a six-year period, whenever goods identical to those described in the BTI are imported.

A similar type of ruling can also be obtained regarding the origin of goods (binding origin information or BOI). The BOI is valid for a three-year period.

### *Environmental taxes*

As of 1 January 2011, all producers of electric and electronic equipment (EEE) have to provide a guarantee to the Environmental Fund for the EEE placed on the market. The guarantee consists either in a bank guarantee letter or collateral, a waste recovery insurance policy, or adhering to one of the authorised collective organisations with attributions regarding EEE waste management, which acts on behalf of the producers.

As of 1 January 2011, a new tax of RON 2/litre is levied on any shortfall of targeted waste recovery for industrial oils and lubricants placed on the market.

### *Property taxes*

#### Building tax

For buildings owned by companies, the building tax rate is set by the Local Council at between 0.25% and 1.5% of the entry value of the building, adjusted by the value of reconstruction, consolidation, modification and extension works, and the revaluation, if applicable. If the building has not been revaluated in the previous three years, the tax rate is increased by the Local Council by 5% to 10%. The taxable value of fully depreciated buildings is reduced by 15%.

Building tax is paid twice a year, by 31 March and 30 September, in equal instalments. As a general rule, if the building tax due for the entire year is paid in advance by 31 March, a reduction of up to 10% may be granted by the Local Council.

#### Land tax

Owners of land are subject to land tax established at a fixed amount per square metre, depending on the rank of the locality where the land is located and the area or category of land use, in accordance with the classification made by the Local Council.

Companies are not subject to land tax on land where buildings are sited.

Similar to building tax, land tax is paid twice a year, in equal instalments, by 31 March and 30 September. A 10% reduction is granted for full advance payment of this tax by 31 March.

### *Excise duties*

#### Harmonised excisable products

The following products are subject to harmonised excise duties: ethyl alcohol and alcoholic beverages, tobacco products, energy products (e.g. unleaded petrol, diesel oil, gas, coal), and electricity.

Excise duties are due when excise goods are released for consumption (e.g. imported into Romania, taken out of an excise duty suspension regime).

Excisable products can be produced, transformed, held, and received under a duty suspension arrangement only in a tax warehouse, which should have prior approval from the tax authorities. Such excisable products can also be received from within the European Union under excise duty suspension arrangements by registered consignees.

Ethyl alcohol and other alcoholic products are exempt from the payment of excise duties if they are denatured and used in the nutritional, pharmaceuticals, or cosmetics industry. There are also exemptions for ethyl alcohol and other alcoholic beverages when used in a manufacturing process, provided that the final product does not contain alcohol, or as samples for analysis, for necessary production tests, or for scientific purposes.

Some energy products, subject to movement control, can be purchased to be used for purposes excepted from excise duty, provided that an end-user authorisation is obtained and the payment of excise duties is secured.

In some cases, traders can claim a refund of the excise duties paid (e.g. excise duty paid for goods released for consumption in Romania, but intended for consumption in other EU Member States; excise duties paid for goods released for consumption and then returned to the production tax warehouse for recycling, reprocessing, or destruction; excise duties paid for goods acquired from the European Union or imported and then returned to the suppliers).

Before being released for consumption in Romania, spirit-based beverages and tobacco products have to be marked with duty stamps. The responsibility for such marking lies with the tax warehouse keepers, registered consignees, and importers releasing such goods for consumption.

For cigarettes, the excise duty owed is equal to the sum of the specific excise duty and the ad-valorem excise duty. The specific excise duty expressed in EUR/1,000 cigarettes is annually determined based on the ponderate medium retail price, the legal percentage related to the ad-valorem excise duty and the total excise duty.

As of 1 July 2010, the level of the minimum excise duty for cigarettes has risen from 91% to 96%.

The current level of excise duties on gasoline and diesel are EUR 467/tonne, and EUR 358/tonne, respectively.

Companies selling fuel in gas stations have to register with the tax authorities.

### Other excisable products

Other excisable products are green coffee, roasted coffee (including coffee with substitutes), and soluble coffee (including blends with soluble coffee).

Companies performing exports or intra-community supplies of coffee may benefit from the refund of the excise duty paid for the coffee used as raw materials.

Traders purchasing coffee are entitled to a refund of the excise duties paid, if the products are exported, supplied to another EU Member State, or returned unchanged to the supplier.

### *Social contributions*

Employers must pay social security contributions, calculated on the gross salary costs, as follows: 20.8%, 25.8%, or 30.8%, depending on working conditions. The monthly contribution is capped at five average gross salaries multiplied by the number of insured individuals.

Other contributions payable by employers for employees, calculated on gross salary costs, are as follows:

- Contribution for medical leaves: 0.85%
- Health fund: 5.2%
- Unemployment fund: 0.5%
- Guarantee fund: 0.25%
- Work accidents insurance fund: 0.15% to 0.85%

## *Branch income*

### *Branch*

A foreign company can set up a branch in Romania, as long as the branch only operates in the same field of activity as the parent company.

Profits derived by the branch are taxed at the standard profit tax rate of 16%.

### *Representative offices*

Representative offices are often established as a first step to operating in Romania. A representative office can undertake only auxiliary or preparatory activities, cannot trade in its own name, and cannot engage in any contractual activity. A representative office can perform only a limited range of activities without being considered a PE for profit tax purposes.

Representative offices are subject to a yearly flat tax of EUR 4,000 (payable in local currency, i.e. RON). It has to be paid in two instalments, by 25 June and 25 December. If a representative office is set up or closed down during a year, the tax due for that year is prorated on the basis of the number of months the representative office operated in that fiscal year.

## Income determination

The taxable profit of a company is calculated as the difference between the revenue derived from any source and the expenses incurred for the purpose of obtaining taxable income during a fiscal year, out of which non-taxable income is deducted and non-deductible expenses are added.

### *Inventory valuation*

The methods permitted for inventory valuation under Romanian law are standard cost, detailed sale price, average (weighted) cost, first in first out (FIFO), and last in first out (LIFO).

Assets are generally valuated at their acquisition cost, production cost, or market value. Fixed assets may be revaluated at certain points in time for various purposes.

### *Capital gains*

Capital gains earned by a Romanian resident company are included in ordinary profits and are taxed at 16%. Capital losses related to sale of shares are, in general, tax-deductible. Capital gains obtained by non-residents from real estate property located in Romania or the sale of shares held in a Romanian company is also taxable in Romania. However, the income may be subject to treaty protection.

### *Dividends, interest, and royalties*

Dividends received by a Romanian company from another Romanian company are not subject to the profit tax, but are subject to a final WHT of 16%.

Dividends received by a Romanian company from a foreign company are taxed at the normal profit tax rate in Romania. Credit is available for tax paid abroad.

Dividends received from a foreign or Romanian legal person from all member countries of the European Economic Area (EEA) are not taxable if the Romanian legal person has held a minimum of 10% of the shares in the foreign legal person for an uninterrupted period of at least two years on the date when the dividend is paid.

Interest and royalty payments by Romanian companies to other Romanian companies are taxable income in the hands of the beneficiary.

### *Foreign income*

Resident companies are taxed on worldwide income, unless a DTT stipulates otherwise. However, in case of foreign subsidiaries of Romanian companies, income is not taxed in Romania until remitted back. Otherwise, there is no specific tax deferral regime in place.

## Deductions

From the deductibility standpoint, expenses fall into three categories in Romania: deductible expenses, limited deductibility expenses, and non-deductible expenses.

### *Deductible expenses*

As a general rule, expenses are deductible only if incurred for the purpose of generating taxable income. The following expenses are considered as being incurred for the purpose of generating taxable income:

- Expenses incurred for marketing, market research, promotion within existing or new markets, participation in fairs and exhibitions, business missions, and publishing of own brochures.
- Advertising expenses incurred in promoting the company, products, or services, based on written contracts, as well as costs associated with the production of the materials necessary for broadcasting advertisements, including goods granted as samples, for product testing at selling units, as well as other goods and services granted to stimulate sales.
- Research and development expenses that do not meet the requirements to be recognised as intangible assets for accounting purposes.
- Expenses incurred for environmental protection and resource conservation.
- Expenses incurred for improvement of management; information technology (IT); the introduction, maintenance, and development of quality management systems; and obtaining quality compliance confirmation.
- Bad debts expenses in any of the following cases: the bankruptcy procedure of the debtor was closed based on a court decision; the debtor is deceased, and the receivable cannot be recovered from the heirs; the debtor is dissolved or liquidated; the debtor has major financial difficulties affecting its entire patrimony.
- Travel and accommodation expenses related to business trips in Romania or abroad by employees and directors, and also individuals assimilated to these positions (directors based on mandate and secondees whose costs are covered by the Romanian company); this also includes transport of personnel to/from the workplace.
- Expenses incurred from professional training and development of employees.
- Expenses incurred in relation to work safety, prevention of work accidents and occupational diseases, the related insurance contributions, and professional risk insurance premiums.
- Expenses incurred from acquisition of packaging during their useful life.
- Fines, interest, penalties, and other increased payments due under commercial contracts.
- Expenses incurred from services aimed at enhancing efficiency, optimising the restructuring of the operational and/or financial activity of taxpayers, are now explicitly provided as deductible expenses.

### *Limited deductibility expenses*
The deductibility of certain expenses is limited as follows:

- Interest and foreign exchange losses under thin capitalisation rules *(see the Group taxation section for more information)*.
- Depreciation of assets under fiscal depreciation rules *(see below)*.
- Perishable goods capped as set by the relevant central administration bodies.
- Protocol expenses, up to the limit of 2% of the difference between total taxable revenue and total expenses related to taxable revenue, except for protocol and profit tax expenses.
- Daily allowances for expenses from domestic and foreign travel by employees, up to the level of two and a half times the ceiling set for public institutions.
- Social expenses up to 2% of salary expenses, including maternity allowances, expenses for nursery tickets, funeral benefits, and allowances for serious or incurable diseases and prostheses, as well as expenses for the proper operation of certain activities or units under taxpayers' administration (e.g. kindergartens, nurseries, health services supplied for occupational diseases and work accidents prior to admission to health establishments, canteens, sports clubs, clubs); expenses incurred under a collective labour agreement.

- Health insurance premiums for employers, up to the limit of EUR 250 per year, per person; private pension insurance premiums, up to the limit of EUR 400 per year, per person.
- Taxes and contributions paid to non-governmental organisations and professional associations related to the taxpayer's activity, up to the limit of EUR 4,000 per year.
- Expenses from operation, maintenance, and repair of vehicles used by individuals in company leadership and management positions, within the limits of one vehicle per person.

### *Non-deductible expenses*
Expenses which are specifically non-deductible include, among others, the following:

- Domestic profit tax and profit tax paid in foreign countries.
- Expenses related to non-taxable revenues (note that revenues from dividends have no corresponding expenses).
- Expenses related to WHT supported by Romanian taxpayers on behalf of non-residents.
- Interest, fines, and penalties due to Romanian or foreign authorities.
- Expenses incurred from management, consultancy, assistance, or other supply of services if no contracts or any other lawful agreements are entered into and the beneficiary cannot justify the supply of such services for the activities performed and their necessity.
- Sponsorship and patronage expenses and expenses for private scholarships; however, taxpayers are granted a fiscal credit up to 0.3% of turnover and 20% of the profit tax due, whichever is lower.
- Other salary and/or similar expenses (if not taxed at the level of the individual), except for those specifically exempted from individual income taxation.
- Expenses incurred from insurance premiums unrelated to company assets or business, save for those regarding goods which are bank collateral on loans used to conduct the activity for which the taxpayer is authorised or those used under rental or leasing contracts.
- Bad debt expenses in excess of the deductible provision *(see below)*.
- Expenses recorded without 'justifying' documents.
- Expenses in favour of shareholders, other than those related to goods, or services provided by the shareholders at market value.
- Expenses incurred from fixed assets impairments (i.e. losses in value defined as provisory adjustments by the accounting regulations transposing European Accounting Directives).
- During the period 1 January 2011 to 31 December 2011, fuel expenses for company vehicles weighing under 3,500kg and with fewer than nine passenger seats (including the driver's seat) and used exclusively for passenger transport. Exceptions are vehicles used in the following activities:
  - Intervention, repair, safety and security, courier services, transporting staff to and from the work place, TV vans, cars used by sales agents and recruitment agents.
  - Paid transportation services and taxi activities.
  - Rental.
  - Driver schools.

### *Depreciation*
Romanian law distinguishes between fiscal and accounting depreciation. Companies should maintain a separate record to reflect the separate computation of the fiscal and the accounting depreciation. Any accounting revaluations of fixed assets are not taken into account in computing the tax depreciation.

Assets are generally depreciated using the straight-line method. However, accelerated or digressive depreciation methods may be used to determine fiscal depreciation, while the accounting depreciation method may be different.

Accelerated depreciation (50% deduction from the book value in the first year of operation) can be used for technological equipment and other tools, installations, computers and related peripherals.

The useful lives to be used for tax purposes are the ones stated in the Official Fixed Assets Catalogue, published under government decision. Ranges are provided for classes of fixed assets, from which the taxpayers can choose the useful life (e.g. office and housing buildings: 40–60 years, commercial buildings: 32–48 years, commercial furnishings: 9–15 years, automobiles: 4–6 years).

Land cannot be depreciated.

### *Fiscal losses*

Profit tax is not deductible, nor are late payment interest and fines related to tax liabilities or social security obligations.

### *Provisions and reserves*

Amounts used for setting up or increasing reserves or provisions are deductible as follows:

- Setting up or increasing the legal reserve fund to a limit of 5% of the yearly accounting profit before tax (with adjustments) until it reaches 20% of the share capital.
- Provisions for doubtful debts recorded after 1 January 2006, up to the limit of 30% if the related receivables meet the following conditions simultaneously:
  - Booked after 1 January 2004.
  - Not collected for a period exceeding 270 days from the due date.
  - Not guaranteed by another person.
  - Due by a person not affiliated with the taxpayer.
  - Included in the taxable income of the taxpayer.
- Bad debt provisions, if all the following conditions are met:
  - Receivables are booked after 1 January 2007.
  - The debtor is a company declared bankrupt by a court ruling.
  - Receivables are not guaranteed by another person.
  - The debtor is not a related party.
  - Receivables were included in the taxable income of the taxpayer.
- Specific provisions established by credit institutions, non-banking financial institutions, and other similar entities.
- Technical reserves set up by insurance and reinsurance companies, in accordance with their regulatory legal framework, except for the equalisation reserve.
- Risk provisions for transactions carried out on financial markets, in accordance with the rules issued by the National Commission of Movable Assets.

The reduction or cancellation of any provision or reserve deducted from the taxable profit, due to changing the destination of the provision or reserve, distribution towards shareholders in any form, liquidation, spin-off, merger or any other reason, is included in the taxable revenues and taxed accordingly. The reconstruction of the legal reserve is also non-deductible.

### *Net operating losses*

Companies are allowed to carry forward fiscal losses as declared in the yearly profit tax returns for a period of five years (for losses incurred prior to 2009) or seven years, based on a FIFO method. No related adjustment for inflation is allowed.

For foreign legal persons, this rule (i.e. carry forward of losses) applies only to revenues and expenses attributable to their PE in Romania.

Any loss incurred by a PE of a Romanian company located in a non-EU/EFTA member state or in a country which does not have a DTT in place with Romania is only deductible for tax purposes from the revenues derived by that PE, and losses can be carried forward only for a period of five years.

Carryback of losses is not available in Romania.

## *Group taxation*

There is no tax consolidation or group taxation in Romania. Members of a group must file separate returns and are therefore taxed separately. No provision exists for offsetting the losses of group members against the profits of other group members.

### *Transfer pricing*

Transfer pricing requirements are applicable to transactions between Romanian related parties as well as foreign related parties.

Transactions between related parties should observe the arm's-length principle. If transfer prices are not set at arm's length, the Romanian Tax Authorities have the right to adjust the taxpayer's revenues or expenses so as to reflect the market value.

Traditional transfer pricing methods (i.e. comparable uncontrolled prices, cost plus, and resale price methods), as well as any other methods that are in line with the Organisation for Economic Co-operation and Development (OECD) Transfer Pricing Guidelines (i.e. transactional net margin and profit split methods), may be used for setting transfer prices.

#### Transfer pricing documentation

Taxpayers engaged in related party transactions have to prepare and make their transfer pricing documentation file available upon the written request of the Romanian Tax Authorities.

Transfer pricing audit activity has significantly increased during the past year, and requests for presenting the transfer pricing documentation file have started to become common practice. We are aware of recent cases where the Romanian tax authorities adjusted the taxable result of a local taxpayer in accordance with the applicable regulations.

The content of the transfer pricing documentation file has been approved by order of the president of the National Agency for Tax Administration. The Order is supplemented by the Transfer Pricing Guidelines issued by the OECD Transfer Pricing Guidelines and the Code of Conduct on transfer pricing documentation for associated enterprises in the European Union Transfer Pricing Document (EUTPD).

The deadline for presenting the transfer pricing documentation file will not exceed three calendar months, with the possibility of a single extension equal to the period initially established.

Failure to present the transfer pricing documentation file or presenting an incomplete file following two consecutive requests may trigger estimation of transfer prices by the tax authorities, based on generally available information, as the arithmetic mean of three transactions considered similar.

**Advance pricing agreement (APA)**
Taxpayers engaged in transactions with related parties can request that the National Agency for Tax Administration issue an APA. These taxpayers can also schedule a pre-filing meeting to discuss the feasibility of the APA.

The request for an APA is filed together with the relevant documentation and payment evidence of the fee (ranging between EUR 10,000 and EUR 20,000). The required documentation is based on the EUTPD and suggests up-front the content of the APA.

The term provided by the Fiscal Procedural Code for issuance of an APA is 12 months for unilateral APAs and 18 months for bilateral and multilateral APAs. The APA is issued for a period of up to five years. In exceptional cases, such as long-term agreements, it may be issued for a longer period.

APAs are opposable and binding on the tax authorities as long as there are no material changes in the critical assumptions. In this view, the beneficiaries are obliged to submit an annual report on compliance with the terms and conditions of the agreement.

If taxpayers do not agree with the content of the APA, they can notify the National Agency for Tax Administration within 15 days. In this case, the agreement does not produce any legal effects.

### *Thin capitalisation*
If the company's equity is negative or the debt-to-equity ratio is higher than 3:1, all the interest expenses and the net losses from foreign exchange differences related to credits or loans with a reimbursement period longer than 12 months are non-deductible in the year in which they are booked. These expenses are carried forward to the following fiscal years, and they will become deductible when the debt-to-equity ratio becomes lower than 3:1.

The interest expenses and the net losses from foreign exchange differences related to loans from Romanian or foreign banks, leasing companies, and other entities expressly mentioned by law are fully deductible, without being limited by the debt-to-equity ratio.

Loans contracted directly or indirectly from Romanian or foreign banks, leasing companies, mortgage companies, and other entities expressly mentioned by the law are no longer taken into account when computing the debt-to-equity ratio.

The tax deductibility threshold for interest on foreign currency loans from non-financial institutions is 6%.

## Tax credits and incentives

### Foreign tax credits

Tax credits may be obtained in Romania for foreign taxes only if the DTT concluded between Romania and the foreign state applies and proper documentation confirming the tax was paid is available.

### Research and development (R&D) incentives

Companies can benefit from an additional deduction of 20% from the eligible expenses in respect of their research and development activities. Moreover, accelerated depreciation may be applied for devices and equipment used in the research and development activity.

### Dividend tax exemption for reinvestments

Distributed dividends are exempted from taxation as of 1 January 2009 if they are invested in the same or in another Romanian company's share capital.

To benefit from this exemption, dividends must be reinvested to preserve and increase the number of employees and to boost existing lines of business.

### Local tax exemptions for business located in industrial parks, and scientific and technological parks

**Industrial parks**

No property tax is due for buildings and constructions located in an industrial park. Also, land within industrial parks is exempt from land tax.

**Scientific and technological parks**

The incentives granted for the set-up and development of scientific and technological parks include:

- Lower taxes on tangible assets and land used by the park.
- Exemption of specific taxes on land.
- Deferred payment of VAT for materials, equipment, and connection to the public utilities networks during the investment period, until the park is put into operation.
- Development programmes for infrastructure, investments, and equipment endowments granted by the local and central public administration companies, and foreign financial assistance.
- Donations, concessions, and structural funds for development.

R

## Withholding taxes

### Domestic dividend tax

Dividend payments by a Romanian company to another Romanian company are subject to 16% dividend tax.

Dividends received by a Romanian company from another Romanian company are not taxed if the beneficiary has held at least 10% of the Romanian company's shares for a continuous period of at least two years by the date of dividends payment.

### WHT for non-residents

Non-resident companies are subject to WHT at 16% on other revenues derived from Romania, such as interest, royalties, revenues from services performed in Romania, dividends, revenues obtained from management and consultancy, services (irrespective of where the services are performed), commissions, and revenues derived from liquidation of a Romanian legal entity.

A 25% WHT applies on gambling proceeds obtained by non-residents.

Certain specific provisions and exceptions apply to non-resident WHT, as follows:

- As Romania is an EU Member State, the provisions of the Parent-Subsidiary Directive are applied. Thus, dividends paid by Romanian companies to companies resident in one of the EU/EEA Member States are exempt from WHT if the dividend beneficiary has held a minimum of 10% of the shares of the Romanian company for a continuous period of at least two years by the date of dividends payment.
- Dividend and interest income obtained from Romania by EEA registered pension funds is exempt from WHT.
- Romania has implemented the Interest and Royalties Directive. As of 1 January 2011, payments of interest and royalties made by Romanian companies to companies resident in EU/EEA Member States and holding at least 25% of the share capital of the Romanian company for a continuous period of at least two years prior to the date of payment of interest or royalties are exempt from WHT.

To comply with European legislation, non-residents are required to present the certificate of tax residence and a declaration stating compliance with the necessary requirements, including that they are the beneficial owner of the income.

The following categories of income derived from Romania by non-residents are exempt from WHT:

- Bonds issued and/or guaranteed by the Romanian government.
- Revenues from consultancy services under free-financing agreements signed between the Romanian Government/public authorities and foreign Governments/public authorities or international governmental/non-governmental organisations.
- Revenues from international transportation and accessory services.
- Prizes paid from public funds.
- Income obtained from a partnership constituted in Romania by a non-resident company. Such income is to be taxed under title II of the Fiscal Code, with corporate profit tax.

### *WHT rates for companies, and rates under some DTTs*

| Recipient | Dividends (%) | Interest (%) | Royalties (%) | Commissions (%) |

*If certain conditions are met.

## Tax administration

### Returns

In Romania, the fiscal year is the calendar year. Annual profit tax returns have to be filed with the Romanian tax authorities by 25 April of the following year. Certain returns should be submitted monthly (e.g. the return on tax liabilities due to the consolidated general budget, the VAT return and social security contribution returns).

Large and medium sized taxpayers are obliged to file tax returns electronically for returns with a submission deadline of 25 November 2010 onwards. Other categories of taxpayers can also voluntarily file tax returns online as an alternative way of complying.

Taxpayers who during the period 1 January 2010 through 30 September 2010 were liable to pay profit tax will submit a single profit tax form for the entire year 2010.

The requirement to submit two fiscal forms, one for each fiscal period of 2010, lies only with those taxpayers who were required to actually pay minimum tax for at least one of the first three quarters.

- For 1 January 2010 through 30 September 2010, the submission and payment of the profit tax is to be made until 25 February 2011.
- For 1 October 2010 through 31 December 2010, the form will be submitted and the profit tax paid by:
  - 25 February 2011, for taxpayers who finalise their financial statements for the period 1 October 2010 through 31 December 2010 before this date.
  - 25 April 2011, for taxpayers who finalise their financial statements before this date. In this case, taxpayers will declare by 25 January 2011, using Form 100, the profit tax for Q4, at the level of the profit tax computed for Q3 2010.

### *Payment of tax*

Fiscal statements must be submitted quarterly, together with the related amount of tax, by the 25th day of the month following the end of the quarter.

Romanian banks and Romanian branches of foreign banks have to make quarterly advance profit tax payments of 25% of the total profit tax due for the previous year, adjusted by the inflation rate. For 2011, the inflation rate is 3.2%.

From 2012, regular corporate taxpayers will also have the obligation to make quarterly advance profit tax payments The payments are calculated as a quarter of the previous year's profit tax increased by the inflation rate, and the payments are due by the 25th day of the month following the end of the quarter.

Newly established companies (e.g. without a previous year history) or those which incurred fiscal losses in the previous year make quarterly advance payments at the level of the amount resulted from applying the profit tax rate on the accounting profit of the period for which the anticipated payment is made.

Annual profit tax returns have to be filed by 25 April the following year.

Non-profit organisations, taxpayers that obtain income mainly from crop production, have to declare and pay annual profit tax by 25 February.

### *Non-resident companies*

Non-resident companies deriving income from real estate property located in Romania or the sales of shares held in a Romanian company are obliged to declare and pay the related profit tax. Non-residents may appoint a tax agent to fulfil this requirement. However, if the payer of the income is a Romanian company or a PE, the non-resident companies have the obligation to pay and declare the profit tax.

For capital gains tax declaration and payment, the Romanian legislation requires the following tax returns to be submitted as follows:

- Quarterly statements, starting the 25th day of the month following the quarter in which the non-resident first earned capital gains taxable in Romania.
- An annual profit tax return.

The quarterly statements and annual return must be submitted during the entire period of time the non-resident is registered with the Romanian tax authorities, even if it no longer carries out transactions generating taxable revenues in Romania.

### *Late-payment penalty*
As of 1 October 2010, the late-payment interest is reduced from 0.05% to 0.04% for each day of delay, and the following late-payment penalties are due:

- 5% of the fiscal liabilities, if the payment is made after 30 days but before the expiry of the 90 days from the due date.
- 15% of the remaining unpaid fiscal liabilities, if the payment is made after 90 days from the due date.

Late-payment penalties for the fiscal claims due to local budgets are owed in the amount of 2% of the fiscal claims, calculated for each month or part thereof.

## *Other issues*

### *Mergers and acquisitions*
Mergers, spin-offs, transfers of assets, and exchanges of shares between two Romanian companies should not trigger capital gains tax.

In the case of a relocation of the registered office of a European Company (SE) and European Cooperative Society (SCE) from Romania to another EU Member State, there is no tax on the difference between the market value of the transferred assets and liabilities and their fiscal value, if certain conditions are met. There will also be no tax on such movements at the shareholder level. Therefore, a tax basis step-up may be achieved in the case of Romanian shareholders.

If a Romanian company has a PE in another EU Member State, and the Romanian company is dissolved as a result of a cross-border reorganisation, the Romanian tax authorities will not have the right to tax the former PE.

## *Significant developments*

### *Recent significant changes in tax legislation*

#### Changes in dividend exemption rules and exemption of capital gains

Beginning in 2011, the requirement to invest at least 500 million Russian rubles (RUB) to be able to apply dividend exemption was abolished. In other words, starting from 2011, Russian companies will be able to apply a 0% profits tax rate on dividends received from their investments, provided that all of the following conditions are met:

- The owner (recipient of dividends) owns at least 50% of the capital of the payer of dividends or owns depository receipts entitling it to receive at least 50% of the total amount of paid dividends.
- The share or depository receipts have been owned for at least 365 calendar days on the day dividends are declared.
- The company-payer of dividends is not residing in 'offshore' zones with preferential tax regimes, the list of which is established by the Ministry of Finance.

Another significant exemption was introduced for capital gains from the sale or other disposal (including redemption) of shares in Russian entities (interests in Russian entities' charter capital), provided that, as of the date of sale, they have been continuously held by the taxpayer on the basis of a right of ownership or another proprietary right for more than five years. One of the following conditions must be met in order to apply a 0% tax:

- The shares have been non-listed securities over the entire period of the taxpayer's ownership of such shares.
- The shares are listed securities, and the company issuing shares has belonged to the technology/innovative sector of the economy over the entire period of the taxpayer's ownership of such shares.
- As of the date of acquisition by the taxpayer, the shares qualified as non-listed securities and, as of the date of their sale by this taxpayer or of another disposal (including redemption) by this taxpayer, they are listed securities of the high technology/innovative sector of the economy.

The beneficial tax treatment will only apply to shares and interests in charter capital acquired by taxpayers after 1 January 2011 (it means that the exemption may be first used in 2016).

As of 31 May 2011, both chambers of the Russian Parliament have approved a draft bill introducing a further exemption. According to the bill, income of foreign organisations (not performing activity in Russia through a PE) from the sale of certain listed securities of Russian entities (and their derivatives) would not be regarded as income derived from sources in Russia subject to withholding tax (WHT). The exemption would apply from 1 January 2011. The bill is yet to be signed by the President, but it likely will be soon. Please visit the Worldwide Tax Summaries website at www.pwc.com/taxsummaries to see any significant corporate tax developments that occurred after 1 June 2011.

### Deduction of interest incurred under loan agreements in foreign currency

In 2011-2012, interest incurred under loan agreements denominated in a foreign currency are deductable for profits tax purposes within the threshold of the refinancing rate of the Central Bank of Russia (the rate was established as 8.25% starting from 3 May 2011) multiplied by 0.8.

### Innovation centre in Skolkovo

In September 2010, the Law on the Skolkovo Innovation Centre was adopted. Participants in the project will enjoy significant benefits, including tax benefits. The primary tax benefits are:

- Exemption from profits tax, VAT, and property tax.
- Reduced rates for employer's mandatory insurance contributions to the Russian Pension Fund (14%), the Social Insurance Fund (0%), the Federal Mandatory Medical Insurance Fund (0%), and the Regional Mandatory Medical Insurance Fund (0%).

### New Protocol to the Russia-Cyprus Double Tax Treaty (DTT)

Cyprus has historically been considered as one of the most popular jurisdictions for the acquisition and holding of Russian companies.

The Protocol, which amends the Russia – Cyprus DTT, was signed on 7 October 2010. The Protocol will enter into force in the year following the year in which it is ratified both by Russia and Cyprus.

Some of the principal changes to the DTT are as follows:

- Any interest reclassified by the Russian tax authorities as dividends (e.g. due to Russian thin capitalisation rules) will be subject to withholding tax rates for dividends.
- The meaning of the term 'dividends' will be extended.
- Income of mutual equity funds investing only in immovable property will be taxed as income from immovable property.

The following two amendments come into effect at different times:

- Capital gains of a resident of a contracting state from the sale of shares deriving more than 50% of their value from immovable property situated in the other contracting state can be taxed in that other contracting state (this provision will have effect as from the calendar year following the expiration of a period of four years from the date on which the Protocol enters into force).
- New version of Article 27 'Assistance in collection' will take effect upon the introduction by Cyprus of the necessary legal basis.

### Recent changes to customs legislation

The foundation of the Customs Union and deeper integration processes amongst Russia, Belarus, and Kazakhstan (hereinafter 'the CU') has resulted in some unification of the customs legislation of the members of the CU. The CU legislation introduces the united customs territory, within which no customs duties or economic restrictions will be applied (i.e. for trade between member countries of the CU). Members of the CU should apply unified customs tariffs and customs valuation methodology, general rules of non-tariff regulation, uniform technical regulations, etc.

Certain provisions of the legislation on the CU took effect on 1 January 2010, in particular the Common Customs Tariff (CCT) and the legislation on licensing/permissions. However, most of the legislation, which constitutes the legal framework for the Customs Union, including the Customs Code of the Customs Union (the CU Customs Code) took effect from July 2010.

Russian Law on customs regulation (issued in accordance with the CU Customs Code) came into force on 29 December 2010 and introduced further changes into customs legislation.

Starting from 1 January 2011, importers and exporters from members of the CU should use uniform templates of customs documents such as customs declaration, declaration of the customs value, etc. In accordance with Decision of the CU Commission, the new procedures for customs valuation came into force from 1 January 2011. However, the formation of the new customs legislation of the CU is not yet finished. Therefore, we expect that a significant number of new regulatory documents governing imports, exports, and customs clearance of goods will be adopted during 2011 and later.

## *Significant changes expected in 2012*

### Transfer pricing legislation

The preparation of the draft transfer pricing law for the 2nd hearing is currently being performed by the State Duma (the lower chamber of the Russian Parliament). It is possible that the Draft Laws will be enacted as of 1 January 2012. The new version of transfer pricing legislation contains the following provisions:

- A significant reduction in the list of transactions for which the Russian tax authorities may control prices for tax purposes.
- Expansion of the list of related parties.
- The introduction of the arm's-length principle as the fundamental principle of Russian transfer pricing rules.
- Formally introducing functional analysis as one of the comparability factors.
- The introduction of new profit based transfer pricing methods for determining market prices.
- The introduction of reporting and transfer pricing documentation requirements.
- The introduction of advance pricing agreements (APAs) for companies registered as 'large' taxpayers.

### Draft law on consolidated taxpayers

The law on consolidated taxpayers is expected to be adopted and come into force together with the new transfer pricing legislation. The consolidated taxpayer regime will only apply to profits tax. The draft law contains certain conditions for creating a consolidated taxpayer (including the total revenue and the total assets of a group). The thresholds are rather high; and as a result, only a limited number of Russian companies are expected to be able to satisfy them.

## *Taxes on corporate income*

### *Profits tax*

Corporations and their shareholders are taxed separately. The maximum profits tax rate for all taxpayers in the Russian Federation was established at 20% from 1 January 2009 (2% is paid to the federal budget and 18% is paid to the budgets of constituent regions). The amount payable to the budgets of constituent regions may be reduced by such regions, so the total minimum tax rate may be 15.5% (e.g. the rate of 15.5% is established for certain categories of taxpayers located in the Smolensk region, the Arkhangelsk region, the Samara region, the Kaluga region, the Ulyanovsk region).

Russian legal entities pay tax on their worldwide income (credit relief is available for foreign tax paid up to the amount of the Russian tax liability that would have been due on the same amount under Russian rules).

Foreign legal entities pay tax on Russia-source income derived through a permanent establishment (PE) (at the rate of 20%) and are also subject to WHT on income from Russian sources not related to a PE (at rates varying from 10% to 20%, depending on the type of income and the method used to calculate it).

## *Corporate residence*

The effective Russian tax legislation does not contain terminology of corporate residence. The tax system in Russia distinguishes between Russian and foreign legal entities on the basis of their incorporation.

### *Permanent establishment (PE)*

A PE is broadly defined as 'a branch, division, office, bureau, agency, or any other place through which a foreign legal entity regularly carries out its business activities in Russia'. Russia's various DTTs may define a PE differently. Conducting business through an agent also may create a taxable PE in Russia.

## *Other taxes*

### *Value-added tax (VAT)*

The VAT system, while not originally based on the European Union (EU) model, gradually is moving towards it. VAT applies to the value added by each element in the chain of production, from producer to consumer. The standard rate is 18% (with a lower rate of 10% for certain basic foodstuffs, children's clothing, medicines and medical goods, and printed publications). The same VAT rates are applied for the import of goods into Russia. Exports and related services are taxed at a zero rate of VAT.

The list of exempt goods and services includes basic banking and insurance services, educational services by certified establishments, the sale of certain essential medical equipment, passenger transport, and certain other socially important services. Most accredited offices of foreign legal entities (as well as the accredited employees of these offices) may be exempt from VAT on property rental payments. The exemptions from VAT carry no right to input credit in Russia; instead, input VAT is, in most cases, deducted for profits tax purposes.

Taxpayers are on an EU-type input-output VAT system, whereby, a VAT payer accounts for VAT on its full sales price, and deducts VAT incurred on inventory costs and other related expenses. VAT should be calculated on an accrual basis only.

The export of goods to destinations outside Russia, including the Commonwealth of Independent States (CIS) countries, transport and other services related to the export of goods from and import of goods into Russia, international passenger transport, sales to diplomatic functions, and certain other transactions are zero-rated with a right to offset input VAT. To apply the 0% rate and achieve input credit for exported goods, proof of the actual export must be available. A significant number of documents must be submitted to the tax authorities.

Under the reverse-charge mechanism, a Russian company must account for VAT on any payment it makes to a non-tax registered foreign company, if the payment is connected to the sale of goods or services in Russia. The VAT withheld is eligible for normal input VAT credit by Russian payers.

Russian VAT law contains EU-type place-of-supply rules for determining where services are supplied for VAT purposes. These rules divide all services into different categories for determining where they are deemed to be supplied for VAT purposes. For example, certain services are deemed to be supplied where they are performed, some where the ‘buyer’ of the services is located, and others where certain property is located.

Uniform invoicing for VAT purposes applies to all Russian-registered taxpayers that provide goods and services. Standard invoices are to be issued within five days after a supply of goods or services. A duplicate copy of the invoice is registered in a sales journal, and incoming invoices are recorded in a purchase book. Compliance with invoicing procedures is critical to the supplier’s ability to recover input VAT.

VAT returns are due on a quarterly basis. VAT must be paid to the Russian government after the end of each quarter in three instalments not later than the 20th day of each of the three consecutive months following the quarter.

### *Import VAT*
A limited range of goods is eligible for exemption from import VAT. The list of such goods includes, for example, humanitarian aid and goods designated for diplomatic corps. Relief from import VAT is available on certain machinery and equipment and their components and spare parts.

### *Import duties*
In addition to VAT, customs duties are levied on assets imported into the Russian Federation. The rate varies according to the tariff code of the goods imported and the country of origin (generally the rate varies from 0% to 20% of the customs value of imported goods). There is special relief from customs duties for qualifying goods contributed to the charter capital of Russian companies with foreign investments.

The foundation of the Customs Union and deeper integration processes amongst Russia, Belarus, and Kazakhstan (hereinafter ‘the CU’) has resulted in some unification of the customs legislation of the members of the CU. The CU legislation proposed the united customs territory, within which no customs duties or economic restrictions will be applied (i.e. for trade between member countries of the CU). Members of the CU should apply unified customs tariffs and customs valuation methodology, general rules of non-tariff regulation, uniform technical regulations, etc *(please refer to the Significant developments section for more details)*.

### *Customs processing fee*

Goods transported across the Russian Federation customs border are subject to a customs processing fee with a flat rate. The fee depends on a customs value of transported goods. Generally the fee is not significant.

### *Excise duty*

Excise taxes apply to the production and import of cars, tobacco, alcohol, petrol, and lubricants. Special excise rates for each type of excisable goods are established in the tax code. The rates are widely variable and are based on multiple factors.

### *Property tax*

The maximum property tax rate is 2.2%, and regional legislative bodies have the right to reduce this rate. The property tax base includes only the annual book value of fixed assets recorded on the taxpayer's balance sheet (including property leased out). Intangible assets, inventories, work-in-progress, and financial assets are not subject to property tax in Russia.

Certain types of property are exempt from the tax. Relief is also available to a limited number of categories of taxpayers.

### *Transport tax*

A transport tax is imposed on certain types of land, water, and air transport registered in Russia. Fixed rates apply (per unit of horsepower, gross tonnage, or unit of transport), which are differentiated based on engine capacity, gross tonnage, and type of transport. The actual rates in the regions may be subject to a maximum ten-fold increase/decrease by the legislative bodies of Russian Federation constituent subjects. Reporting and payment rules are established by regional legislative authorities.

## *Branch income*

Foreign legal entities pay tax on profits attributable to a PE. A PE's profits are computed on substantially the same basis as Russian legal entities, including the composition of tax-deductible expenses. The tax code does not provide specifically for the deductibility of expenses incurred abroad by a head office with respect to its PE in Russia (including a reasonable allocation of administration costs), although most DTTs provide for such an option.

If a foreign legal entity conducts free-of-charge preparatory and/or auxiliary services for the benefit of third parties, a PE is considered to have been formed, and the tax base is calculated as 20% of its expenses relating to such activities.

Foreign legal entities operating in Russia through a PE are to follow the filing and payment schedules established for Russian legal entities, although they do not make monthly advance payments, but pay profits tax on a quarterly and annual basis only.

## *Income determination*

The accounting period in Russia is a calendar year. Different periods are not permitted. The taxable base is calculated on an accrual basis (only small-scale taxpayers are still allowed to use the cash basis).

Taxable income is to be computed following the rules and principles established in the tax code. Taxpayers must maintain tax accounting registers. Statutory accounts may be used for computing tax items for which accounting methods are the same. In practice, most taxpayers use statutory accounts as a basis and apply adjustments to arrive at the taxable income.

### *Inventory valuation*

Inventory can be valued using one of the following methods: first in first out (FIFO), last in first out (LIFO), average cost, and individual unit cost.

### *Capital gains*

Capital gains are subject to the same 20% profits tax rate and are added to ordinary income to arrive at the taxable income.

Four separate tax baskets are calculated for tax purposes: (i) results from general operations, (ii) results from operations with listed securities, (iii) results from operations with non-listed securities, and (iv) results from operations with non-listed derivatives. A loss in one basket cannot be offset with income in another basket. Results from operations with listed derivatives are included into the general tax basket.

Gains from the sale of fixed assets and other property equal the difference between the sale price and their net book value for tax purposes. Losses resulting from the sale of fixed assets should be deducted in equal monthly instalments during the period, defined as the difference between their normative useful life and the actual time of use.

### *Dividend income*

Dividends received by Russian legal entities from Russian or foreign legal entities are taxed in Russia at a 9% flat rate.

Dividends received from ‘strategic investments’ are exempt from Russian income tax. An investment is considered strategic when:

- the owner (recipient of dividends) owns at least 50% of the capital of the payer of dividends or owns depository receipts entitling it to receive at least 50% of the total amount of paid dividends and
- the share or depository receipts have been owned for at least 365 calendar days on the day dividends are declared.

Dividends from companies residing in ‘offshore’ zones with preferential tax regimes are not eligible for the tax exemption. The list of offshore zones is established by the Ministry of Finance.

Tax on dividends from abroad withheld in the source country may be credited against Russian tax.

The standard 15% tax rate is applicable to dividends paid by Russian legal entities to foreign legal entities. The tax should be withheld by the Russian legal entity paying dividends. The tax may be reduced based on a relevant DTT, typically to 10% or 5% *(please see the Withholding taxes section for more details)*.

### *Interest income*

Interest income is taxed on the accrual basis. A standard tax rate of 20% is applied to interest income, except for interest on state and municipal securities, which is taxed at

0%, 9%, or 15%, depending on the type of security. The rate may be reduced (typically to zero) based on a relevant tax treaty.

### *Exchange gains and losses*

Foreign exchange gains and losses are recognised for tax purposes on the accrual basis. However, gains and losses from settlements in a local currency of amounts denominated in (tied to) a foreign currency are taxable (deductible) on payment.

### *Foreign income*

Russian legal entities pay tax on their worldwide income. Credit relief is available for foreign taxes paid up to the amount of the Russian tax liability that would have been due on the same amount under Russian rules.

The effective tax legislation does not contain provisions that allow tax deferral in respect to foreign income.

## *Deductions*

Expenses are deducted on the accrual basis. The main criteria for deductibility of expenses is that the expense is (i) incurred in the course of an income-generating activity, (ii) properly documented, and (iii) not mentioned in the tax code as non-deductible for tax purposes.

### *Depreciation and amortisation*

Two methods of depreciation are allowed: the straight-line method and the declining balance method. The ranges of useful life of assets for tax purposes are established in the Classification of Fixed Assets adopted by the Russian Government, for example:

| Fixed asset | Useful life (years) |
|---|---|
| Personal computer | 2 to 3 |
| Motor-car | 3 to 5 |
| Truck (capacity more than 5 tonnes) | 7 to 10 |
| Aircraft | 10 to 15 |
| Blast furnace | 20 to 25 |

Accelerated depreciation is permitted for leased property, where a special ratio of up to three may be applied (with some exceptions).

An upfront premium is allowed, which means that a taxpayer has the right to deduct 10% (from 1 January 2009: 30% for certain categories of fixed assets) of the cost of fixed assets purchased (or constructed) in the month when the depreciation started. The balance is depreciated over the useful life of the asset. A premium must be recaptured if a relevant asset is sold within five years of its acquisition.

Intangible assets are amortised over their useful life (or over ten years if their useful life cannot be established).

### *Interest expense*

From 1 January 2011 till 31 December 2012, interest expenses are deductible within the following limits:

- The average interest rate on similar loans obtained within one quarter from Russian lenders multiplied by 1.2.
- If there are no similar loans or at the taxpayer's discretion, the following limits are applied:
  - For loans denominated in a foreign currency: the refinancing rate of the Central Bank of Russia multiplied by 0.8 (the rate was established as 8.25% starting from 3 May 2011).
  - For loans denominated in rubles: the refinancing rate of the Central Bank of Russia multiplied by 1.8.

### *Bad debts*
Generally, losses in the form of bad debts written off are deductible. Companies may create a bad debt reserve. The method of accrual for a bad debt reserve for tax purposes may differ from that in financial accounting because it is based only on the overdue payment period (i.e. if the delay exceeds 90 days, the full amount of the account receivable is included into the reserve).

### *Research and development (R&D) expenses*
Generally, R&D expenses (including R&D with a negative result) are deductible within one year after completion. Certain R&D expenses may be deducted using a coefficient of 1.5. The list of such types of R&D is established by the government.

Significant changes to the tax treatment of R&D would be introduced by a bill that, as of 31 May 2011, has been approved by Russian Parliament and is waiting to be signed by the President.

### *Insurance premiums*
Expenses related to all types of obligatory insurance are deductible subject to state tariff limitations, where established. Voluntary insurance expenses are deductible to the extent that they relate to the insurance of damage and losses related to certain classes of assets, and the insurance of construction activity risks. Contract liability insurance expenses are deductible to the extent that such insurance is required by an international treaty to which Russia is a party or a generally accepted international trade custom.

Long-term life and pension insurance is deductible within a limit of 12% of the payroll fund. Voluntary medical insurance is deductible within a limit of 6% of the payroll fund.

### *Net operating and capital losses*
Tax losses may be carried forward ten years without limitation (i.e. they can be used to offset the entire taxable profit before a loss carryforward deduction). Carryback of losses, however, is not allowed.

Losses from the sale of fixed assets are recognised evenly during the remaining useful life.

Losses and income from different tax baskets can't be offset *(please see Capital gains in the Income determination section for more details)*.

### *Payments to foreign affiliates*
There are no special tax provisions regarding deducibility of payments to foreign affiliates for services provided. They may be deducted in full if the general deductibility criteria are met. Charges with respect to administrative support provided by foreign affiliates may be deductible, but due care should be taken with regard to documentary support of the nature and actual receipt of the service.

## Group taxation

At present, Russia does not allow any group relief.

A draft law introducing the option to file a consolidated profits tax return was approved in the first reading and is expected to be adopted together with new transfer-pricing legislation. According to the draft law, a consolidated taxpayer (CT) regime may be established provided that all companies-participants of the consolidated group meet a number of conditions, the most important of which are the following:

- The total amount of federal taxes accrued and recorded in the tax return for the calendar year preceding the year in which the CT is created exceeds RUB 15 billion.
- The total revenue from the sale of goods, products, work and services, and operating income in the financial reports of the calendar year preceding the year in which the CT is created exceeds RUB 100 billion.
- The total assets value reported as of the first day of the calendar year in which the CT is created exceeds RUB 1 trillion.
- The limit on a share in a direct or indirect holding in CT companies is 90%.
- The holding company must be a Russian legal entity.
- CT participants cannot have foreign representative offices.

The thresholds are rather high, and it is expected that only a few groups of companies will be able to apply the CT regime and, accordingly, the provisions in the law to exempt intra-group transactions from transfer pricing control from the tax authorities.

### Transfer pricing

Currently the tax authorities may examine the prices applied in ‘controlled’ transactions, including the following:

- Transactions between related parties.
- Barter transactions.
- Foreign trade transactions.
- Transactions in which the prices fluctuated by more than 20% within a short period of time.

The prices used in these transactions may only be adjusted for tax purposes if they differ from the market price by more than 20%. The three methods available to determine market price are: (i) comparable uncontrolled price (CUP) method, (ii) resale-minus method, and (iii) cost-plus method, which are applied in a strict hierarchy.

The preparation of a new transfer pricing law for the second hearing is currently being performed by the State Duma (the lower chamber of the Russian Parliament). It is possible that the Draft Laws will be enacted as of 1 January 2012 *(please see the Significant developments section for more details)*.

### Thin capitalisation rules

Under the Russian Tax Code, interest on loans received from foreign shareholders (as well as their Russian affiliates, or loans guaranteed by foreign shareholders or their Russian affiliates) owning more than 20% of capital is deductible, provided the loans do not exceed by three times the amount of equity (12.5 times for banks and leasing companies). If the loans exceed this limit, the excess interest on the loans will be reclassified for taxation purposes as dividends paid to foreign shareholders. Such dividends are not deductible for profit tax purposes and are subject to WHT at the rate of 15% (treaty benefits may apply to reduce the rate).

## Tax credits and incentives

At present, the following types of incentives exist in Russia:

- Regional incentives granted by regional or local authorities with respect to taxes paid to their budgets.
- Special tax regimes in special economic zones (SEZ).
- Incentives related to certain activities (e.g. activities related to R&D, information technology).
- Incentives related to particular projects (e.g. Skolkovo, Olympic Winter Games in Sochi).

The incentives are briefly described below.

It is also worth mentioning that the Russian tax legislation provides for special tax regimes to support small and medium-size businesses. Such regimes include a unified tax regime, simplified tax regime, and unified agricultural tax.

### Regional incentives

Regional incentives in the form of reduced tax rates for taxes payable to regional budgets (primarily profits tax and property tax) are granted to certain classes of taxpayers (typically large investors or entities operating in specific industries). The extent of regional incentives and the willingness of regional authorities to grant them have been diminishing over time.

### Special economic zones (SEZ)

The following types of SEZ are established in Russia:

- Technical research and implementation zones for scientific projects.
- Industrial production zones to develop industrial production.
- Tourism-recreation zones for the development and effective use of Russian tourist resources.
- Port zones.

SEZ residents may take advantage of different combinations of benefits, such as reduced profits tax, exemption from property tax and land tax, and, in some cases, exemption from customs duty and VAT.

### Activities incentives

The following ‘activities’ incentives are available to taxpayers in Russia:

- Certain R&D services are exempt from VAT.
- Certain R&D service-related expenses, as listed by the government, are deductible using a coefficient of 1.5.
- Fixed assets used in the sphere of science and technology may be amortised with an accelerated coefficient up to 3.
- Reduced rates for contribution payments to social funds are established for IT companies from 2010 to 2019.

### Special project incentives

The following ‘special project’ incentives are established in Russia:

- Participants in the Skolkovo innovation centre will enjoy a number of benefits, the primary of which are the following: exemption from profits and property taxes,

exemption from VAT obligations, and reduced rates for mandatory contributions to social funds.
- Olympic Winter Games (Sochi 2014). The Russian tax legislation provides certain tax exemptions for foreign and Russian organizers of the Games, marketing partners of International Olympic Committee, and official broadcasting companies in relation to their activity on the Games, as well as exemption from personal income tax for income received by sportsmen for participation in the Games.

### *Foreign tax credit*

Credit relief is available for foreign taxes paid up to the amount of the Russian tax liability that would have been due on the same amount under Russian rules.

## *Withholding taxes*

In accordance with the general provisions of the tax code, income received by a foreign legal entity and not attributed to a PE in Russia is subject to WHT in Russia (to be withheld at source). WHT rates are as follows:

- 15% on dividends and income from participation in Russian enterprises with foreign investments.
- 10% on freight income.
- 20% on some other income from Russian sources, including royalties and interest.
- 20% of revenue or 20% of the margin on capital gains (from the sale of immovable property located in Russia or shares in Russian subsidiaries where the immovable property located in Russia represents more than 50% of assets).

Taxation of the margin (rather than the gross amount of income received from the above sales) may be applied only if proper documentary support of expenses is available.

Tax should be withheld by the tax agent and paid to the Russian budget. WHT rates may be reduced under a relevant DTT, whose provisions may be applied based on confirmation of tax residence, to be provided by a foreign company to the Russian tax agent prior to the date of payment (no advance permission from the Russian tax authorities is required) and also provided general conditions are fulfilled (proof of beneficial ownership, etc.)

The Russian tax authorities recognise the terms of former USSR treaties until they are renegotiated by the Russian government, and the tax treaty network is continuously updated.

Cyprus has historically been considered as one of the most popular jurisdictions for the acquisition and holding of Russian companies. The Protocol, which amends the Russia – Cyprus DTT, was signed on 7 October 2010 and will enter into force after ratification by Russia and Cyprus. The most significant amendments deal with the term ‘dividends’ and taxation of capital gains from the sale of shares *(please see the Significant developments section for more details).*

The list below is current as of 20 May 2011, and indicates the WHT rates stipulated in the treaties.

# Russian Federation

| Recipient | Treaty benefits available from | Dividends (%) | Interest (%) (1) | Royalties (%) | Construction site duration before creation of PE (months) |
|---|---|---|---|---|---|
| Albania/RF | 1 January 1998 | 10 | 10 | 10 | 12 |

Notes

1. In general, a 0% tax rate applies to interest payments to the governments of contracting states and to payments guaranteed by the government.
2. If the resident of the other contracting state holds directly at least 25% of the capital of the company paying the dividends.
3. If the resident of the other contracting state contributed at least USD 40,000 (or an equivalent amount in the domestic currency of either of the contracting states) to the authorized capital of the enterprise paying the dividends.
4. If the following conditions are met:
   a. Dividends are paid to a company (other than a partnership) which holds directly at least 10% of the capital of the company paying the dividends.
   b. The resident of the other contracting state has invested a minimum of 700,000 Australian dollars, or an equivalent amount in Russian rubles, in the capital of that company.
   c. If the dividends are paid by a company that is resident in Russia, the dividends are exempt from Australian tax.
5. If the beneficial owner of the dividends is a company (other than a partnership) which holds directly at least 10% of the capital of the company paying the dividends and the participation exceeds USD 100,000 or an equivalent amount in any other currency.
6. If the resident of the other contracting state holds directly at least 25% of the capital of the company paying the dividends.
7. If the beneficial owner of the dividends holds directly at least 20% of the total capital of the company paying the dividends.
8. If the beneficial owner of the dividends is a company which owns at least 10% of the voting stock (or in the case of Russia, if there is no voting stock, at least 10% of the statutory capital) of the company paying the dividends.
9. If the following conditions are met:
   a. In respect of the production or reproduction of any literary, dramatic, musical, or other artistic work (but not including royalties in respect of motion picture films nor royalties in respect of works on film or videotape or other means of reproduction for use in connection with television broadcasting).
   b. Royalties for the use of, or the right to use, computer software.
   c. Where the payer and the beneficial owner of the royalties are not related persons, royalties for the use of, or the right to use, any patent or any information concerning industrial, commercial, or scientific experience (but not including any such information provided under a rental or franchise agreement).
10. If the beneficial owner of the dividends is a company which holds directly at least 25% of the capital of the company paying the dividends (this share should be at least USD 100,000 or its equivalent in other currency).
11. If the beneficial owner of the dividends is a company (excluding partnerships) which holds directly at least 25% of the capital of the company paying the dividends.
12. The Protocol to the DTT between Russia and Cyprus was signed on 7 October 2010. However, it is not yet ratified by the Russian State Duma, which is expected to be finalised by the end of 2011. It should enter into force the next year after ratification. The Protocol does not change general WHT rates; however, it introduces changes to the information exchange clause and taxation of capital gains upon sale of shares in land-rich companies (becomes effective after four years from DTT entering into force), and other significant changes. As a result, Cyprus is likely to be removed from the Russian ‘Black List’.
13. If the beneficial owner of the dividends has directly invested in the capital of the company not less than the equivalent of USD 100,000 (EUR, when the signed Protocol will be ratified).
14. If the beneficial owner of the dividends is a company (other than a partnership) which holds directly at least 30% of the capital of the company paying the dividends, and the foreign capital invested exceeds USD 100,000 or its equivalent in the national currencies of the contracting states at the moment when the dividends become due and payable.

15. If the following conditions are met:
    a. Where the beneficial owner of the dividends has invested in the company paying the dividends, irrespective of the form or the nature of such investments, a total value of at least FF 500,000 or the equivalent in another currency; as the value of each investment is appreciated as of the date it is made.
    b. Where such beneficial owner is a company which is liable to tax on profits under the general tax laws of the contracting state of which it is a resident and which is exempt from such tax in respect of such dividends.
16. If only one of the conditions of 15 (a) or 15 (b) are met.
17. If the beneficial owner of the dividends is a company which holds directly at least 10% of the basic or common stock of the company paying the dividends and such capital share amounts to at least EUR 80,000 or the equivalent value in rubles.
18. If the beneficial owner of the dividends is a company (other than partnership) which holds directly at least 25% of the capital of the company paying the dividends.
19. If the beneficial owner of the dividends is a company (other than a partnership) which holds directly at least 25% of the capital of the company paying the dividends and the foreign capital invested exceeds USD 100,000 or its equivalent in national currency of the first-mentioned contracting state.
20. If the recipient of the dividends is a company (excluding partnership) which holds directly at least 25% of the capital of the company paying the dividends.
21. If the beneficial owner of the dividends is a company which holds directly at least 10% of the capital of the company paying the dividends (this share should to be at least USD 100,000 or its equivalent in other currency).
22. Literary, artistic, or scientific work including cinematograph films and films or tapes for radio or television broadcasting.
23. If the beneficial owner of the dividends is a company (other than a partnership) which holds directly at least 30% of the capital of the company paying the dividends and invests not less than USD 100,000 or equivalent amount of local currencies to the company paying the dividends.
24. 0% rate applies to dividends paid to governmental agencies or financial institutions.
25. If the beneficial owner of the dividends is a company (other than a partnership) which holds directly at least 25% of the capital of the company paying the dividends and the capital directly invested by this beneficial owner is not less than USD 100,000 or the equivalent amount in the national currency of a contracting state.
26. For the use of industrial, commercial, or scientific equipment.
27. If the beneficial owner of the dividends holds directly at least 30% of the capital of the company paying the dividends and of an acquisition price of at least ECU 75,000 or its equivalent in national currency.
28. 15% rate applies to profits received from joint-venture by resident of Malaysia.
29. Any patent, trademark, design or model, plan, secret formula or process, or any copyright of scientific work, or for the use of, or the right to use, industrial, commercial, or scientific equipment, or for information concerning industrial, commercial, or scientific experience.
30. Cinematograph films, or tapes for radio or television broadcasting, any copyright of literary or artistic work.
31. If the invested amount equals or exceeds FRF 1 million.
32. If the beneficial owner of the dividends is a company (other than a partnership) which holds directly at least 25% of the capital of the company paying the dividends and has invested in it at least USD 100,000 or equivalent amount in the national currencies of the contracting states.
33. If the beneficial owner of the dividends has invested in the capital of the company paying the dividends more than USD 500,000.
34. If the beneficial owner of the dividends is a company (other than a partnership) which holds directly at least 25% of the share capital of the company paying the dividends and have directly invested in the equity share capital of that company not less that the equivalent of USD 100,000.
35. If the beneficial owner of the dividends is a company (other than a partnership) which holds directly at least 25% of the capital of the company paying the dividends and has invested in it at least ECU 75,000 or its equivalent in the national currencies.
36. If the beneficial owner of the dividends is a company that, for an uninterrupted period of two years prior to the payment of the dividends, owns directly at least 25% of the capital of the company paying the dividends.
37. 0% rate applies to dividends paid to governmental agencies or financial institutions.
38. If the beneficial owner of the dividends is a company (other than a partnership) which holds directly at least 25% of the capital of the company paying the dividends and has invested in it at least USD 100,000 or equivalent amount in the national currencies of the contracting states.
39. If the beneficial owner of the dividends is the government of the other contracting state or if the beneficial owner of the dividends is a company which holds directly at least 15% of the capital of the company paying the dividends and has invested in it at least USD 100,000 or its equivalent in other currencies.
40. If residents of the other contracting state hold at least 30% of the capital of the company paying the dividends and have directly invested in the equity share capital (authorised fund) of that company an amount of not less than USD 100,000 or the equivalent thereof in the currency of the first-mentioned state.
41. If the following conditions are met:

   a. The beneficial owner of the dividends is a company (other than a partnership) which has invested at least ECU 100,000 ECU or the equivalent amount in any other currency in the capital of the company paying the dividends.
   b. Those dividends are exempt from tax in the other contracting state.
42. If only one of the conditions of 41 (a) or 41 (b) are met.
43. If the beneficial owner of the dividends is a company (other than a partnership) which holds directly at least 25% of the capital of the company paying the dividends.
44. If the beneficial owner of the dividends is a company (other than a partnership) which holds directly 100% of the capital of the company paying the dividends; or in the case of a joint venture not less than 30% of the capital of such joint venture; and in either case the foreign capital invested exceeds USD 100,000 or an equivalent amount in the national currencies of the contracting states at the moment of the actual distribution of the dividends.
45. If the beneficial owner of the dividends is a company (other than a partnership) which holds directly at least 20% of the capital of the company paying the dividends and the foreign capital invested exceeds 200,000 Swiss francs or its equivalent in any other currency at the moment when the dividends become due.
46. A 0% tax rate may be applied provided such interest is paid:
    a. in connection with the sale on credit of any industrial, commercial, or scientific equipment or
    b. in connection with the sale on credit of any merchandise by one enterprise to another.
47. In the case of any loan of whatever kind granted by a bank.
48. Cinematography films, programs, and recordings for radio or television broadcasting.
49. Any copyright of literary, artistic, or scientific work.
50. Any patent, trademark, design or model, plan, secret formula or process, any computer software program, or for information concerning industrial, commercial, or scientific experience.
51. If the beneficial owner of the dividends holds directly at least 25% of the capital of the company paying the dividends.
52. If a resident of the other contracting state has invested in its joint-stock capital (registered fund) at least USD 50,000 or an equivalent amount in the national currencies of the contracting states.
53. If the beneficial owner of the dividends is a company which owns at least 10%of the voting stock (or, in the case of Russia, if there is no voting stock, at least 10% of the statutory capital) of the company paying the dividends.
54. If the beneficial owner of the dividends is a company (other than a partnership) which holds directly at least 10% of the capital of the company paying the dividends and has invested in this company not less than the equivalent of USD 100,000.
55. In the case of banks.
56. In the case of fees for technical assistance.
57. If the residents of the other contracting state have directly invested in the equity share capital of that company not less than USD 10 million.

## *Tax administration*

All taxpayers are required to obtain tax registration and be assigned a taxpayer identification number, irrespective of whether their activities are subject to Russian taxation.

### *Returns*

An annual profits tax return must be filed by 28 March of the year following the end of the reporting year.

### *Payments*

Companies pay advance profits tax payments on a monthly basis. The final payment for the year is due by 28 March of the following year.

## Significant developments

On 24 August 2010, the Government of the Federation of Saint Kitts and Nevis (St. Kitts-Nevis) passed the Value Added Tax (VAT) Act and introduced VAT on 1 November 2010. The standard VAT rate is 17%, while hotel accommodation, tour operators, and restaurants carry a reduced rate of 10%.

The VAT replaced the Traders Tax, Consumption Tax, Hotel Accommodation and Restaurant Tax, Telecommunication Tax, Cable TV Tax, Vehicle Rental Levy, Parcels Tax, Export Duty, Public Entertainment and Lotteries Tax, and Gaming Machine Tax.

On 26 October 2010, the Excise Tax Act was passed by the Government, making provision for the taxation of certain imports and locally manufactured goods. The excise tax is not a new tax but has been reformed to support the implementation of VAT. The excise tax rate ranges between 5% and 25%.

## Taxes on corporate income

Companies incorporated in St. Kitts and Nevis pay corporate income tax (CIT) on their worldwide income with relief available under existing double taxation agreements (DTAs). Non-resident companies deriving income from St. Kitts and Nevis are liable for CIT and should be registered if they have a physical presence in St. Kitts and Nevis.

St. Kitts and Nevis imposes corporate income tax (CIT) at a flat rate of 35%.

Taxable income or assessable income is ascertained by deducting from income all expenses that are wholly and exclusively incurred during the year in the production of the income. Assessable income is normally arrived at by adjusting the net profit per the financial statements for non-taxable income, non-deductible expenses, and prior period losses up to 50% of chargeable income.

Where a person resident in St. Kitts and Nevis makes to another person not resident in St. Kitts and Nevis a payment *as noted in the Withholding taxes section*, then a withholding tax (WHT) at a rate of 10% must be deducted and remitted to the Inland Revenue within 15 days.

A company which carries on business exclusively with persons who are not resident in St. Kitts and Nevis is exempt from all income, capital gains, and withholding taxes.

Companies registered under the Condominium Act are governed by that act and are not required to pay CIT.

## Corporate residence

A corporation is deemed to be resident if it is incorporated in St. Kitts-Nevis or if it is registered as an external company doing business in St. Kitts-Nevis under the Companies Act.

### Permanent establishment (PE)

A permanent establishment (PE) is not defined in the Income Tax Act; however, any company which would meet the general definition of a PE must be registered.

## Other taxes

### Value-added tax (VAT)

On 24 August 2010, the Government passed the Value Added Tax Act and introduced VAT on 1 November 2010. The standard VAT rate is 17%, while hotel accommodation, tour operators, and restaurants carry a reduced rate of 10%.

The VAT replaced the Traders Tax, Consumption Tax, Hotel Accommodation and Restaurant Tax, Telecommunication Tax, Cable TV Tax, Vehicle Rental Levy, Parcels Tax, Export Duty, Public Entertainment and Lotteries Tax, and Gaming Machine Tax.

Persons who have made or are likely to make taxable supplies in excess of 96,000 East Caribbean dollars (XCD) for certain professional services and XCD 150,000 for other business activities in a continuous period of 12 calendar months are required to register for VAT.

### Excise tax

On 26 October 2010, the Excise Tax Act was passed by the Government making provision for the taxation of certain imports and locally manufactured goods. The excise tax is not a new tax but has been reformed to support the implementation of VAT and will apply to a small range of goods, such as alcoholic beverages, tobacco products, petroleum products, motor cycles, aerated beverages, and firearms. The excise tax rate ranges between 5% and 25%.

### Property tax

#### Saint Kitts

Property tax in Saint Kitts is levied at varied rates on the basis of the market value of the real property (including land and building as assessed by the Chief Valuation Officer) and its class.

Property classes and rates of tax are as follows:

- Residential use property: 0.2%
- Commercial use property: 0.3%

Annual allowances and tax rebates are available as follows:

- Residential use property and condominium allowance of XCD 80,000 from the taxable value.
- No property tax will be assessed on any buildings, condominiums, etc. that are under construction.
- New residential use property and condominiums are exempt from tax for one year from the date certified by the valuation officer.

S

Note that residential use properties located in the South East Peninsula are assigned values based on fixed rates for land (XCD 20 per square ft) and building (XCD 300 per square ft). Property tax is then applied at a rate of 0.2%.

Where property situated in the South East Peninsula area is not developed within five years, a surcharge can be assessed at the rate of 1% of the assessed market value per annum, and increased annually at the rate of 1% thereafter until it reaches a maximum rate of 5% of the assessed market value while the property remains undeveloped. If property is less than one acre, undeveloped, and owned by a resident for the purpose of erecting a house, such property shall be exempt from the surcharge upon application in writing to the Comptroller of Inland Revenue.

Property tax is payable on or before 30 June of each year and is deemed to be in default if not paid within 30 days of becoming due. Interest is charged at a rate of 12% per annum on the unpaid taxes.

**Nevis**

Property tax in Nevis is levied at varied rates on the basis of the market value of the real property (including land and building as assessed by the Chief Valuation Officer) and its class.

Property class and rates are as follows:

| Property class | Building tax rate (%) | Land tax rate (%) |
|---|---|---|
| Residential | 0.156 | 0.075 |
| Commercial | 0.3 | 0.2 |
| Accommodation | 0.3 | 0.2 |
| Certified farming | 0 | 0.01 |
| Institutional | 0.2 | 0.15 |

Commercial use property is defined as property which does not include accommodation use property or property used for certified farming operations.

Accommodation use property is defined as property for short term accommodation and includes a guest house.

Annual allowances and tax rebates are available as follows:

- Residential use property and condominium allowance of XCD 80,000 from the taxable value.
- No property tax will be assessed on any buildings, condominiums, etc. that are under construction.

Property tax is payable on or before 30 June of each year and is deemed to be in default if not paid within 30 days of becoming due. Interest is charged at a rate of 12% per annum on the unpaid taxes.

### *Alien land holding licences*

To hold land as an owner, a non-citizen must first obtain an alien land holding license and pay 10% of the market value of property or XCD 750, whichever is greater.

A non-citizen is required to obtain a license to hold shares in a company which owns land, to vote at shareholders meetings of the company, and to be a director of the company. Each license costs XCD 250.

If a non-citizen purchases land in the Frigate Bay area, then there is no requirement to obtain a licence and only a minimal fee of XCD 50 is payable.

If a non-citizen wishes to purchase land in the South East Peninsula, the non-citizen is required to obtain a licence prior to purchasing the property; however, the payment of the 10% license fee will be waived.

### *Stamp duty*

Stamp duty applies to a very wide range of transactions (e.g. bill of sale, leases, mortgages, contract, bill of lading). Stamp duty on transfer of real property, transfer of shares, mortgages, and bank loans to aliens are specifically covered below.

#### Transfer of real property

Stamp duty is levied on the consideration for the sale or the value of property as assessed by the Chief Valuation Officer, whichever is higher.

The vendor is responsible for the payment of all stamp duty on property transfers on the following basis:

| Type of property transfer | | Rate |
|---|---|---|
| a | Transfer of property for consideration in money or value in kind of not less than the value of the property | 12% |
| b | Transfer of property for consideration in money or value in kind of less than the value of the property | 12% |
| c | Transfer of property without consideration in money or value in kind | 6% |
| d | Transfer of property in any Special Development Area other than the South East Peninsula | 14% |
| e | Transfer of property situated in the South East Peninsula | 18.5% |
| f | Transfer of property other than stock or debenture stock or funded debt or land | 2% |
| g | Transfer of property between husband and wife and between parents and children and vice versa | XCD 100 |
| h | Transfer of land by will or by similar instrument | XCD 100 |
| i | Transfer of registered condominium units | 5% |

Where a developer has obtained concessions in connection with a house or building constructed on the land being transferred, the developer is required to pay stamp duty on the same basis as noted in a, b, and c above.

Where a developer has obtained concessions in connection with a house or building to be constructed on the land being transferred, then the developer will be required to pay stamp duty initially on the land on the same basis as noted in a, b, and c above. However, when the house or building is subsequently constructed on the land with the aid of the concession, the owner of the building shall pay stamp duty on the house or building as provided in a, b, and c above as if the concessions or any part thereof had not been utilised.

Where a developer has not obtained concessions in connection with a house or building constructed on the land being transferred, the developer will be required to pay stamp duty on the same basis as noted in a, b, and c in respect of the land only.

**Transfer of shares**
Stamp duty is levied on the value of the consideration for the sale of shares or debentures issued by or on behalf of a company or at the value assessed by the Chief Valuation Officer, whichever is higher. The stamp duty is levied at a rate of 2%. If the company owns property and its value exceeds 50% of the value of the company's assets, then the stamp duty is calculated using the applicable rate on the transfer of real property *(see above)*.

**Mortgages**
Stamp duty is levied on the total amount secured and is applicable to both the registration and discharge of the mortgage. The standard rate is 1%. For amounts secured in relation to a Special Development Area, the rate is 2%.

**Bank loans to aliens**
Stamp duty is levied on the total amount of a bank loan to aliens. The standard rate is 2.5%. For loans to finance development in a Special Development Area, the rate is 5%.

### *Life insurance premium tax*
A premium tax of 5% is levied on the premium income of all life insurance companies, whether resident or non-resident. In addition, a registration fee of XCD 2 per XCD 1,000 of income or XCD 30, whichever is less, must be paid to the Comptroller of Inland Revenue.

### *General insurance premium tax*
A premium tax of 5% is levied on the premium income (net of agent's commission) of all general insurance companies, whether resident or non-resident.

## *Branch income*

Branch income is taxed on the same basis and at the same rate as the income of a corporation. A resident branch of a foreign company shall be regarded as a separate company and shall be taxed on the same basis as that of a locally registered corporation.

Recharges of expenses from head office to the branch will be subject to WHT at a rate of 10%; however, the recharges have to be justified and cannot be based on a percentage allocation.

## *Income determination*

### *Inventory valuation*
Inventories are generally stated at the lower of cost or net realisable value. The first in first out (FIFO) and average cost methods of valuation are generally used for book and tax purposes. However, the Comptroller of Inland Revenue will normally accept a method of valuation that conforms to standard accounting practice in the trade concerned. The last in first out (LIFO) method is not permitted for tax or book purposes.

### Capital gains
Capital gains tax will be imposed if an asset is sold within one year of the date of acquisition. The maximum rate of tax will be one half the CIT rate. Assets sold after one year will not attract capital gains tax.

### Dividend income
Dividends received by a company resident in St. Kitts-Nevis from another company resident in St. Kitts-Nevis are taxed at source at the CIT rate of 35%. Credit is given to the recipient for the tax on the dividend in computing the tax liability.

### Foreign income
A St. Kitts-Nevis corporation is taxed on foreign branch income when earned and on foreign dividends when received. Double taxation is avoided by means of foreign tax credits where active tax treaties exist and through deduction of foreign income taxes in other cases (the United Kingdom (UK) and the Caribbean Community (CARICOM)). There is also relief from Commonwealth taxes. *See Foreign tax credit in the Tax credits and incentives section for more information.*

## Deductions

### Depreciation
Depreciation allowed for tax purposes is computed by the diminishing-balance method at prescribed rates. An initial allowance of 20% is granted on industrial buildings or structures and in respect of capital expenditure incurred on plant and machinery by a person carrying on a trade or undertaking, as defined. In addition, an annual allowance of between 2% and 5% is allowed on all buildings constructed after 1 March 1994. Concrete buildings are depreciated at a rate of 2%, while the rate varies for other buildings depending on the type of material used in construction. Conformity between book and tax depreciation is not required.

Any gain on the sale of depreciated assets is taxable as ordinary income up to the amount of tax depreciation recaptured.

Initial allowances and annual allowances cannot reduce the tax that would have been otherwise payable by more than 50%. Any initial allowance or annual allowance not utilised may be carried forward indefinitely.

### Contributions to a pension fund
Contributions made by an employer to a pension fund (approved by the Comptroller) on behalf of its employees are deductible, up to a maximum of 5% of annual earnings of the employee or a maximum of XCD 2,000. Application should be made to the Ministry of Finance or to the Pension Fund Committee.

### Restriction on compensation expenses
Salaries, wages, leave pay, fee, commission, bonus, gratuity, or any other perquisite or such other payment which an employee of a company receives in the course of one's employment or the value of any benefit to such employee or to any member of an employee's family in excess of XCD 60,000 per annum will not be allowed as a deduction from chargeable profit.

### Restriction on bad debts
Specific bad or doubtful debts in excess of 5% of total trade receivables will not be allowed as a deduction.

### Net operating losses

Income tax losses may be carried forward for five years following the year in which the loss was incurred. However, the chargeable income of a company after deducting initial and annual capital allowances in any one income year may not be reduced by more than 50% by losses brought forward. No carryback of losses is permitted.

### Payments to foreign affiliates

A company incorporated in St. Kitts-Nevis may claim a deduction for royalties, management fees, and interest charges paid to foreign affiliates, provided the payments are equal to or less than what the corporation would pay to an unrelated entity. The deductibility of any payments to a foreign affiliate will be subject to an arm's-length test, and WHT will be payable at a rate of 10%.

## Group taxation

Group taxation is not permitted in St. Kitts-Nevis.

### Transfer pricing

There are no provisions for transfer pricing in the tax laws of St. Kitts-Nevis.

### Thin capitalisation

There are no provisions for thin capitalisation in the tax laws of St. Kitts-Nevis.

## Tax credits and incentives

Tax incentives are currently available under the following legislation.

### Income Tax Act, No. 17 of 1966

The Income Tax Act provides that if a company is licensed under the Hotel Aids Ordinance and constructs a hotel with more than 30 bedrooms, the hotel will receive an exemption from CIT for a period of ten years beginning on the day it is first open for business. If the hotel has less than 30 rooms, then it will be entitled to a five year tax holiday. During the tax holiday period, no initial deductions or annual capital allowance deductions shall be allowed. Thereafter, only the annual allowance will be allowed and will be computed on the total capital expenditure incurred during the holiday period less any assets sold. The net losses arising during the tax holiday period (i.e. the excess of accumulated tax losses over total profits) may be carried forward and reduced against profits following the expiration of the tax holiday in accordance with the normal rules for set-off of losses.

The Income Tax Act also provides that if a licence is granted to a pioneer manufacturer under the Pioneer Industries Act, the manufacturer is entitled to a five year tax holiday (or up to ten years, at the discretion of the government) as provided in the licence.

### Hotel Aids Act

The Hotel Aids Act provides that a licence may be granted to any person who desires to construct or extend an existing hotel to import building material and equipment free from import duties as specified in the licence for use in the construction of the hotel and to furnish and equip the hotel. The holder of a licence may not dispose of any hotel equipment within three years of being imported free of duties and taxes. Permission must be received from the Comptroller of Customs to dispose of any building material and hotel equipment within the three year period.

### *Fiscal Incentives Act*
The Fiscal Incentives Act provides that if a company is declared to be an approved enterprise to manufacture certain 'approved products', then the manufacturer is entitled to a tax holiday period of between ten and 15 years depending on the classification of the approved enterprise. The net losses arising during the tax holiday period (i.e. excess of all losses over all profits) may be carried forward and set off against profits of the approved enterprise for the five year period following the tax holiday period.

### *Small Business Development Act, 2009*
The Small Business Development Act provides the framework for the promotion of investment opportunities in St. Kitts-Nevis by introducing a system of registration of small businesses and a range of incentives which are available to locals. The available incentives and concessions to any small business that would be entitled for consideration are as follows:

- Concession on consumption tax applicable to professionals (e.g. engineers, doctors).
- Reduction on CIT for a minimum of three years to a maximum of five years.
- Relief on CIT by way of an allowable deduction on any monies borrowed from any financial institution including any bank, non-bank, or credit union.
- Export incentives.
- Rebate on CIT.
- Exemption from or reduction in customs duty on inputs imported for use in the small business.
- Exemption from or reduction in customs duty on any plant, machinery, equipment, or motor vehicle imported for use in the small business.
- Reduction of property tax of up to 75%.

A small business to which this Act applies must meet all of the following criteria:

- No more than 25 employees.
- Net assets or paid up capital does not exceed XCD 1 million.
- Annual sales that do not exceed XCD 2 million.
- Owned by citizens of St. Kitts and Nevis.
- Not more than 25% owned or controlled by a company whose annual turnover or net assets exceed the limits noted above or by a subsidiary of a larger company.
- The composition of the board of directors is not controlled by a company whose annual turnover exceeds the criteria above.
- Has no agreement for managerial or other services to persons who are not citizens of St. Kitts and Nevis or other CARICOM territories.

The registration fee for an approved small business status is XCD 100. Each approved small business must, within six months after the end of its financial year, submit to the Registrar (person designated by the Minister to perform the functions of Registrar of Small Businesses) audited financial statements of its accounts audited by an auditor in accordance with generally accepted international auditing standards.

### *Other incentives*
Approved manufacturing, agricultural, and tourist ventures are permitted to import building material and equipment free of customs duties.

A Memorandum of Understanding (MOU) between the government and small hotel operators provides for certain conditions under which small hotel operators will be eligible for duty free concessions on the refurbishment of their facilities every seven years, and on food and wine for their restaurant facilities where applicable. For the purposes of this new incentive package, a small hotel is defined as a hotel consisting of at least ten rooms and not exceeding 99 rooms.

### *Foreign tax credit*

Double taxation is avoided by means of foreign tax credits where active tax treaties exist and through deduction of foreign income taxes in other cases (the United Kingdom and CARICOM). A foreign tax credit is also available to persons in St. Kitts and Nevis who have paid or are liable to pay Commonwealth income tax.

#### Residents

The relief available from tax in St. Kitts and Nevis for a person resident in St. Kitts and Nevis from tax paid in St. Kitts and Nevis is the Commonwealth income tax rate if that rate does not exceed one-half the tax rate in St. Kitts and Nevis. If the Commonwealth income tax rate exceeds the St. Kitts and Nevis tax rate, then the relief will be limited to one-half the tax rate in St. Kitts and Nevis.

#### Non-resident

The relief available from tax in St. Kitts and Nevis for a person not resident in St. Kitts and Nevis from tax paid in St. Kitts and Nevis is one-half the Commonwealth income tax rate if that rate does not exceed the tax rate in St. Kitts and Nevis. In any other case, the relief will be limited to the amount by which the St. Kitts and Nevis tax rate exceeded one-half the rate of Commonwealth income tax.

## *Withholding taxes*

A WHT at the rate of 10% should be withheld from payments made to non-residents in respect of the following:

- Dividends.
- Interest, annuity, premium, and discount.
- Rent, lease, contract, and royalty payments.
- A natural resource payment.
- Commissions, remuneration, fees, and licences.
- Charges for the provision of personal services, commercial advice, and managerial skills.
- Administration, management, or head office expenses.
- Profit.
- Technical, professional, vocational, and any other service fees.
- Accounting, actuarial, legal, and audit expenses.
- Non-life insurance premiums.
- Any other annual or periodic payment or distribution.

### *Tax treaties*

There is a tax treaty with the United Kingdom and a DTA between member states of CARICOM.

## *Tax administration*

### *Returns*

Taxes are assessed on a fiscal-year basis. The taxpayer must file an information return on Form CIT–01 by the fifteenth day of the fourth month after the fiscal year end along with the financial statements. The authorities either accept the self-assessment or issue a revised assessment. If a return is not filed on a timely basis, the authorities have the power to issue estimated assessments. There is a 2.5% penalty for late filing (minimum of XCD 1).

The taxpayer can object to assessments raised within one month and ask the Comptroller of Inland Revenue to review and revise. In the event that the objection is unsuccessful, the taxpayer may appeal to the Commissioners of Income Tax.

### *Payment of tax*

Advance tax is payable in quarterly instalments on 15 March, 15 June, 15 September, and 15 December of each year and is ordinarily based on the tax chargeable and assessed in the previous fiscal year. The standard amount of each instalment is determined as one-fourth of the tax chargeable in the previous fiscal year. If the assessment for the prior year has not been finalised, the Comptroller of Inland Revenue can raise an assessment based on best judgment.

The balance of tax due after the final assessment is issued, as notified in the assessment, is payable on or before the fifteenth day of the fourth month after the fiscal year end. If the Comptroller of Inland Revenue revises the assessment, then payment of the balance of taxes due is due one month after the date of issue of the revised assessment.

Tax is deemed to be in default if not paid by the fifteenth day of the fourth month after the fiscal year end or within one month of the date of the notice of assessment, whichever is later. Interest of 1% per month or 12% per annum is charged on unpaid taxes in default.

### *Statute of limitations*

Assessments may be reviewed and revised by the Comptroller of Inland Revenue within the year of assessment or within six years of the expiration of the assessment year.

## Significant developments

Saint Lucia's 2011 Budget Address was delivered by the Prime Minister and Minister of Finance on 14 April 2011. No corporate taxation changes were announced; however, the following new tax measures were introduced:

- A National Security Levy of 1% of the cost, insurance, and freight (CIF) value of selected imported items into Saint Lucia. This is effective only for the fiscal year 2011.
- A 50% increase in the excise tax on cigarettes.
- Radio and television broadcast application license which will range from 25 East Caribbean dollars (XCD) to XCD 2,000 per license depending on the type of operation and the class of license. Further, there is an initial license fee from XCD 100 to XCD 2,000 per license.

Additionally, the following changes to income tax and property tax legislation began 14 March 2011:

- Any income accrued to a company on bonds is no longer exempt income; however, income earned on bonds issued by member governments of the Eastern Caribbean Central Bank and income accruing from bonds to any citizen or resident of any member state of the Organisation of Eastern Caribbean States or to any company incorporated in and registered in any member state of the Organisation of Eastern Caribbean States are tax exempt.
- The property tax rate for commercial property increased from 0.25% to 0.4% of the open market value.
- The property tax rate for residential property is now 0.25% of the open market value instead of 5% of the annual rental value.

## Taxes on corporate income

Resident companies are taxed on gains or profits accrued directly or indirectly from all sources, whether in and out of Saint Lucia, and are subject to tax at a flat rate of 30%. The 30% tax rate is only applicable to companies who prior to income year 2003 have no tax arrears and have complied with the requirements of any enactment administered by the Inland Revenue Department. The tax rate of 33.33% will still apply to those companies who have tax arrears and have not complied with the requirement.

Non-resident companies are taxed on Saint Lucia-source income. The gross amount of such income is liable to 25% withholding tax (WHT) while WHT of 15% applies to interest.

Associations of underwriters are taxed at 30% on 10% of the gross premium arising in Saint Lucia, and life insurance companies are taxed at 30% on 10% of the gross investment income arising in Saint Lucia.

## Corporate residence

Companies are regarded as resident if they are incorporated in Saint Lucia or managed and controlled through a permanent establishment (PE) in Saint Lucia.

### Permanent establishment (PE)

A PE is defined in Saint Lucia as a fixed place or premises through which the business is wholly or partly carried on.

## Other taxes

### Value-added tax (VAT)

VAT will be implemented in Saint Lucia in April 2012. VAT is designed to streamline the tax system in Saint Lucia. Upon implementation, the consumption tax will be replaced.

### Consumption tax

Consumption tax is levied on goods manufactured in Saint Lucia and on a wide range of imported goods. Rates range between 5% and 15%. For manufactured goods, the tax is charged on their open market value. For imported articles, consumption tax is charged as a percentage of the cost, insurance, and freight (CIF) value plus customs duty.

### Stamp tax

Stamp tax is charged on any document that evidences a legal or contractual relationship between two or more parties. Additionally, many types of commercial and legal documents must be stamped, denoting the payment of taxes, which may be either at a fixed rate or at an *ad valorem* rate, depending, for example, on the value of the property transferred.

The current rate of stamp tax under the stamp duty regulations for the conveyance or transfer on sale of the debenture, stock, debt, or shares of a company and the release, renunciation, or reassignment of any shares or interest in any shares of a company or corporation is the greatest of the following:

- 0.5% of the net value of the assets of the company or corporation.
- XCD 10.
- Provided that at least 75% of the open market value of the assets of the company or corporation is comprised of immovable property, the stamp duty (including vendor's tax) based on the stamp duty on the sale of immovable property that would be payable on a conveyance or transfer on sale of such immovable property, as indicated below:
  - Conveyance or transfer on sale of any immovable property such duty to be paid by the purchaser: 2% *ad valorem*.
  - Conveyance or transfer on sale of any immovable property such duty to be paid by the vendor:
    - where the vendor is not a citizen of Saint Lucia or is a foreign company: 10% *ad valorem*.

S

- where the vendor is a citizen of Saint Lucia or is a local company: 2.5% *ad valorem* from XCD 50,000 to XCD 75,000; 3.5% *ad valorem* from XCD 75,001 to XCD 150,000; 5% *ad valorem* from XCD 150,001 and over.

### *Commercial property tax*
Commercial property tax is currently assessed annually at 0.4% of the open market value of the property. The owner is required to obtain a commercial valuation assessing the open market value of the property. All new commercial properties completed after 1 April 2001 can benefit from a three-year tax exemption from commercial property tax.

### *Residential property tax*
The property tax rate for residential property is now 0.25% of the open market value instead of 5% of the annual rental value.

### *Custom duties*
Customs duties are charged on a wide range of imported goods. Exemptions are granted for raw materials and plant and machinery used in manufacturing and for certain items imported by hotels under construction, extension, or refurbishing projects.

### *Excise tax*
Excise taxes are imposed on home-produced goods, mainly liquor, beer, and cigarettes. XCD 1.44 per litre of liquid applies to beer in glass bottles and XCD 3.50 per liquid gallon applies to beers in metal cans.

There is also an excise tax on fuel when fuel is imported by a wholesaler. Tax is included on the price of fuel paid at the gas pump. The tax rate formula is based on the current price provided by the supplier and regulated price at the gas pump.

## *Branch income*

The tax rate on branch income is the same as that on income earned by resident companies. No additional tax is withheld on transfers of profits to the head office.

## *Income determination*

### *Inventory valuation*
Stocks generally are valued at the lower of cost or market value. Obsolescence is permitted where it occurs, but there are no provisions to account for monetary inflation on inventory valuation.

### *Capital gains*
There is no tax on capital gains except in instances where such gains comprise a portion of the income-earning activities of the business. In such instances, the corporate tax rate applies.

### *Dividend income*
Inter-company dividends are not subject to tax in Saint Lucia.

### *Interest income*
The corporate tax rate applies to interest income. However, income earned on securities issued by member governments of the Eastern Caribbean Central Bank and income accruing from trading in securities under the Securities Act to any citizen or resident of

any member state of the Organisation of Eastern Caribbean States or to any company incorporated in and registered in any member state of the Organisation of Eastern Caribbean States is tax exempt.

Any expenditure incurred for the purpose of producing exempt income is not deductible.

### *Royalty and rental income*

The corporate tax rate applies to royalty and rental income. However, rental income from a residential accommodation shall be exempt from tax if certain requirements, as defined by regulations, are met.

### *Foreign exchange gains/losses*

Foreign exchange gains or losses arising from foreign exchange transactions on trading items are assessable or deductible as realised gains or losses, if settled within normal credit terms. Gains or losses on other instruments, including inter-company loans, are recognised only when actually realised.

Unrealised exchange gains/losses are not taxable/deductible.

### *Bribes, kickbacks, illegal payments*

Bribes, kickbacks, and illegal payments received by a company are includible in taxable income.

### *Foreign income*

Resident companies are taxed in Saint Lucia on income earned outside Saint Lucia. Reciprocal understandings exist with some countries for the avoidance of double taxation, and foreign tax is allowed as a credit against tax charged in Saint Lucia. Saint Lucia has no tax treaties with other countries, except for the member states that make up the Caribbean Community (CARICOM). There is an agreement among the governments of CARICOM for the avoidance of double taxation. Where no agreement exists, the foreign tax offset is the lesser of the foreign tax paid or the tax payable on that income in Saint Lucia.

Tax deferral is not permitted in Saint Lucia.

## *Deductions*

### *Depreciation*

The following capital allowances are available in Saint Lucia:

- An initial allowance of 20% is granted on the acquisition of industrial, agricultural, and commercial buildings (except for hotels and rental properties); on plant and machinery, including motor vehicles and furniture; and on fixtures and equipment.
- Thereafter, annual allowances for wear and tear, ranging from 10% to 33.33%, are granted on the reducing-balance method, except for industrial and agricultural buildings, which are allowed an annual rate of 5% and commercial buildings (except for hotels and rental properties), which are allowed an annual rate of 2.5%.

The Comptroller of Inland Revenue may also grant, on application, a higher rate for annual allowance for assets that have higher or abnormal wear and tear.

Gains on disposal are taxable as ordinary income to the extent of depreciation recovered, and any proceeds in excess of the cost of the asset are treated as a capital gain, which is not subject to tax. Where the proceeds on disposal are lower than the tax written-down value of the asset, a balancing allowance is granted for the shortfall.

### *Goodwill*
Neither the amortisation of impaired goodwill nor the related write-off of it is an allowable deduction.

### *Accrued expenses*
Accrued expenses are deductible as long as they are business related.

### *Contingent liabilities*
Contingent liabilities are deductible expenses once they are recognised in the book of accounts.

### *Interest expense*
Interest on any loan, including interest payable on debentures, is an allowable deduction to the extent that the amount of such loan was used for the purpose of producing assessable income.

### *Bad debt*
Bad debt expense is deductible provided it has been brought to account in generating the company's assessable income for any income year.

### *Charitable contributions*
Charitable contributions are an allowable deduction when the contributions are made under a deed of covenant for a period of not less than three years to any religious, charitable, medical, or educational institution; sporting body; or fund of a public character, approved by Cabinet, if such contributions are made to the Saint Lucia National Trust. However, the deduction with respect to such contributions shall not exceed 25% of the assessable income of the company for that income year.

### *Organisational and start-up expenses*
All expenditures incurred in connection with incorporation costs for the establishment of a new small business enterprise are allowable deductions. A small business enterprise is an enterprise incorporated during the year of income and

- is wholly owned by citizens of Saint Lucia who have not been owners of previously incorporated businesses in Saint Lucia
- employs not more than 50 persons
- has gross income that does not exceed XCD 1 million
- engages in an activity on the listing of preferred business activities as approved by the Minister of Finance, and
- satisfies the provision of any law in force with respect to micro or small scale business.

### *Pension expense*
Current annual contributions to an approved pension fund are deductible expenses. However, where a special payment is made to an approved pension fund, in relation to a period of service by an employee prior to the setting up of the approved pension fund, or to meet any actuarially ascertained insufficiency in the resources of the approved pension fund to meet its obligations to its employees, such amount shall be deductible as follows:

i. Where the special payment does not exceed the current annual contribution, such amount is wholly deductible.
ii. Where the special payment exceeds the current annual contribution, the special payment is an allowable deduction in such years of income, not exceeding five in number, as in the opinion of the Comptroller is reasonable in the circumstances.
iii. Where under (ii) above, annual deductions are allowable over a number of years of income, the first such deduction is allowable for the income year for which the special payment is made.

### *Taxes*
Consumption taxes paid on goods imported or purchased, and sold in the ordinary course of business, are deductible for tax purposes. Property taxes are deductible where the property is used in producing assessable income. Income taxes, penalties, and interest on tax in arrears are not deductible.

### *Other deductions*
Meals and entertainment, officer's compensation/life insurance, and payment to directors are deductible expenses, provided they are wholly and exclusively incurred by a company during that year of income for the purpose of producing its assessable income.

### *Net operating losses*
Net operating losses may be carried forward for up to six years if the losses have not been fully absorbed earlier. In carrying losses forward, the amount that can be claimed in any subsequent year is restricted to one-half of the assessable income of that year. Losses may not be carried back.

### *Payments to foreign affiliates*
There are no restrictions on the deductibility of interest paid to foreign affiliates if the transaction is carried out at arm's length and at commercial rates. However, deductions for management charges, allocations of head office expenses, royalties, and other charges that are subject to 25% WHT are restricted to the lesser of the aggregate of those charges or 10% of all allowable business deductions, excluding cost of sales and capital allowances.

## *Group taxation*

Group tax filing is not allowed in Saint Lucia; however, group tax relief is available under certain circumstances to allow the trading losses, excluding the current loss, of a resident company within a group to offset the profits of another resident company within the same group. A claim for group relief requires the consent of the Comptroller of the Inland Revenue Department and is only available to resident companies.

### *Transfer pricing*
Related party transactions are accepted if they are made on an arm's-length basis. The Inland Revenue has the power under the Income Tax Act to make any adjustment deemed necessary to place such transactions at arm's length.

### *Thin capitalisation*
No provision exists for thin capitalisation in Saint Lucia.

# Saint Lucia

## Tax credits and incentives

### Foreign taxes credit

Where income has accrued to a resident and has been taxed in a foreign country with which there is no double tax agreement (DTA), or is income to which a DTA, if there is one, does not relate, credit for tax on such income is allowed for the lesser of: the tax payable in the foreign country or the tax charged under Saint Lucia tax law.

### Tax holidays

Tax holidays are available for manufacturing companies. The incentives are aimed at increasing the manufacturing base of Saint Lucia, the level of exports, and the use of local materials and labour in production. An approved manufacturing enterprise will be granted a tax holiday up to a maximum of 15 years. In determining the length of the tax holiday, the extent of the local value added to approved products is taken into account.

### Investment incentives

Income tax incentives and other fiscal concessions are provided under the Fiscal Incentives Act, the Tourism Incentives Act, the Special Development Areas Act, and other concessions granted by the Cabinet of Ministers. The extent of the incentives and concessions granted are specific to the legislation or Cabinet conclusions and depend on the impact that the investment would have on local employment, exports, and the generation of foreign exchange earnings. The incentives granted include the following:

- Duty-free importation of raw materials, machinery, components, and spare parts and other inputs used in manufacturing, and the duty-free importation of construction materials, equipment, and other inputs used in the construction and operation of hotels and other hospitality products.
- Income tax waivers of up to 100% of the taxable income of companies engaged in manufacturing, tourism, and agriculture and other employment generating activities, for periods of up to 15 years.
- Whole or partial waivers of property tax, stamp duties, Alien Landholding License fees, WHT, and consumption taxes with respect to investments in specific areas, or in specific industries and activities.
- Guaranteed repatriation of capital and dividends. Remittance of profits and dividends are tax-free as they are not subject to WHT.
- Export allowances for goods manufactured in Saint Lucia and exported. Companies who engage in such activity are given tax exemption on the export of such goods up to a maximum of 10 to 15 years.

### Employment incentives

Employment incentives are available in the Income Tax Act for the following:

- Hiring university graduates: an additional deduction of 25% of salaries for a maximum period of three years.
- Hiring persons in the offshore financial services industry with skills not available in Saint Lucia. A special tax concession is given to such persons that allows a prescribed percentage of an employee's or contractor's salary or fees to be exempt from income tax.

### Other incentives

Complete or partial waivers of income tax are available on the taxable profits of companies engaged in providing services to the offshore financial services industry.

Special tax concessions are also available for capital construction in the hotel industry. Capital expenditures on the construction of a hotel may offset profits for up to 15 years.

## *Withholding taxes*

Resident corporations and persons that make certain payments of an income nature to residents or non-residents are required to withhold tax on these payments as follows:

| Recipient | WHT (%) |
|---|---|
| Resident corporations: | |
| Payments to contractors | 10 |
| Equipment hire | 10 |
| | |
| Non-resident corporations: | |
| Interest | 15 |
| Royalties | 25 |
| Management fees | 25 |
| Commissions or fees (not by way of employment) | 25 |
| Income of a trust | 25 |
| Premiums, including insurance premiums | 25 |
| Any other payment of an income nature | 25 |

## *Tax administration*

### *Returns*

Tax returns must be filed within three months of the company's fiscal year-end. An extension of the filing date may be obtained. Returns must cover a 12-month period, which may be changed only with the Comptroller's permission.

Financial statements must be submitted with the returns, together with a schedule reconciling taxable income with book income and various other schedules of additional information.

The system is one of self-assessment. Upon receipt of the returns, the Inland Revenue Department examines the information provided and issues a notice of assessment at any time, subject to the statute of limitations. The Revenue Department may also issue assessments in the absence of returns.

S

### *Payment of tax*

Tax is payable in instalments on 25 March, 25 June, and 25 September in each year of income, based on the preceding year's income. Any remainder is payable within three months of the end of the financial year.

### *Appeals*

Within 30 days after the date of service of a notice of assessment or reassessment, the taxpayer may submit a written objection to the Revenue Department on any matters in such assessment or reassessment. If the Revenue Department confirms its assessment, the taxpayer may file an appeal with the Appeal Commission, which comprises seven persons appointed by the Minister of Finance. A decision by that body may be further appealed to the Saint Lucia High Court within 30 days. An appeal against an order from this Court may be made to the Court of Appeal.

### *Tax audits*

The Inland Revenue Department carries out audits of a selection of tax returns, usually at the taxpayer's place of business. Audits may be carried out at any time prior to the expiration of the statute of limitations, whether or not notices of assessment have been issued. The Revenue Department has wide powers in determining the information it requires for these audits.

### *Penalties and interest*

The following civil penalties and interest, which are non-deductible, are imposed:

- For late filing or for failure to file: 5% of the tax charge at filing date.
- For late payment: 10% of the unpaid tax at the due date.
- On tax and penalties unpaid: monthly interest at a rate of 1.04%.
- Tax knowingly evaded or sought to be evaded: 100% of the tax.

### *Statute of limitations*

Assessments are not final until six years after the end of the income year, within which period assessments may be made at any time. In cases of misrepresentation or failure to disclose any material fact, a reassessment can be made at any time.

## *Significant developments*

### *Double taxation treaties (DTTs)*

Saudi Arabia has signed DTTs with more than 30 countries, most of which are in force in 2010 and 2011 while the others are still being finalised or awaiting ratification process. In addition, and to encourage foreign capital investments, there are plans for negotiations for DTTs with several other countries.

### *System automation*

The Department of Zakat and Income Tax (DZIT) is in the process of automating its systems, and tax payments can currently be made automatically through the SADAD system.

### *Double taxation of subsidiary income*

A significant change in the Saudi tax regulations took place in 2010 relating to the double taxation imposed on foreigners who are investing in a resident company that is investing in another resident company. This change could have a major impact on how investors structure investments in Saudi Arabia and included an amendment to the by-laws to avoid double taxation on foreign investors provided that the required conditions are met.

### *Application of DTTs with regard to withholding taxes (WHT)*

With a growing network of DTTs, combined with increasing cross-border trade, there has been a significant increase in the number of claims to reduce or eliminate WHTs under such treaties.

There had been no specific procedures to follow under the Income Tax Law where the terms of a DTT should be applied. This issue was addressed recently by the following procedures to be followed where a treaty protection is sought:

- The resident party should deduct WHT from payments in accordance with the domestic law.
- Where a relevant DTT provides for a reduced or 0% rate of WHT, the resident party should write a letter to the DZIT requesting them to refund the overpaid WHT.
- The letter should include the following documents:
  - A letter from the beneficiary who is a resident of the other contracting state claiming the overpaid WHT.
  - A certificate from that other contracting state's tax authority confirming that the beneficiary is a tax resident of that state, in accordance with the provisions of Article 4 of the relevant tax treaty, and that the amount paid is subject to tax in that contracting state.
  - A copy of the relevant submitted WHT form, and receipt of payment of the WHT, that evidences the amount being claimed.

- On receipt of the aforementioned documents, and on ensuring that the treaty conditions have been satisfied, the DZIT will refund the overpaid WHT in accordance with the procedures laid down for the refund process.

We understand that the above procedures are currently being evaluated by the tax authority, and certain changes may be made to the above.

## *Taxes on corporate income*

The rate of income tax is 20% of the net adjusted profits. Withholding tax (WHT) rates are between 5% and 20%. Zakat, an Islamic assessment, is charged on the company's Zakat base at 2.5%. Zakat base represents the net worth of the entity as calculated for Zakat purposes.

Only non-Saudi investors are liable for income tax in Saudi Arabia. In most cases, Saudi citizen investors (and citizens of the Gulf Cooperation Council (GCC) countries, who are considered to be Saudi citizens for Saudi tax purposes) are liable for Zakat. Where a company is owned by both Saudi and non-Saudi interests, the portion of taxable income attributable to the non-Saudi interest is subject to income tax, and the Saudi share goes into the basis on which Zakat is assessed.

According to the income tax law, the following persons are subject to income tax:

- A resident capital company to the extent of its non-Saudi shareholding.
- A resident non-Saudi natural person who carries on activities in Saudi Arabia.
- A non-resident person who carries out activities in Saudi Arabia through a permanent establishment (PE).
- A non-resident person who has other income subject to tax from sources within Saudi Arabia.
- A person engaged in natural gas investment fields.
- A person engaged in oil and other hydrocarbon production.

It should be noted that although the income tax rate is 20%, income from the following two activities is subject to different rates:

- Natural Gas Investment Tax (NGIT) shall be determined on the basis of the internal rate of return (IRR) on the cumulative annual cash flows of the taxpayer derived from natural gas investment activities. The rate applicable will be 30% if the IRR is 8% or less. The rate increases progressively up to 85% if the IRR equals or exceeds 20%.
- Income from oil and hydrocarbon production is subject to tax at the rate of 85%.

## *Corporate residence*

A company is considered a resident company if it is formed under the Saudi Arabian Regulations for Companies or if its central management is located in Saudi Arabia.

### *Permanent establishment (PE)*

According to the Saudi tax regulations, the following are the requirements for considering a non-resident party to have a PE:

- A PE of a non-resident in the Kingdom, unless otherwise provided below, consists of the permanent place of activity of the non-resident through which one carries out business, in full or in part, including business carried out through an agent.
- The following are considered a PE:
  - Construction sites, assembly facilities, and the exercise of its related supervisory activities.
  - Installations or sites used for surveying for natural resources, drilling equipment, or ships used for surveying for natural resources, and the exercise of its related supervisory activities.
  - A fixed location where a non-resident natural person carries out business.
  - A branch of a non-resident company which is licensed to carry out business in the Kingdom.
- A place is not considered a PE of a non-resident in the Kingdom if it is used in the Kingdom only to do the following:
  - Store, display, or deliver goods or products belonging to the non-resident.
  - Keep an inventory of goods or products belonging to the non-resident only for the purposes of processing by another person.
  - Purchase of goods or products only for the collection of information for the non-resident.
  - Perform any other activities that are preparatory or auxiliary in nature for the interests of the non-resident.
  - Prepare contracts relating to loans, supply of products or perform technical services for signature.
  - Executing any group of the activities mentioned above.
- A non-resident partner in a resident personal company is considered an owner to a PE in the Kingdom in the form of a share in a personal company.

Furthermore, the agent mentioned in the above article is identified as a dependent agent who has any of the following authorities:

- Negotiate on behalf of a non-resident.
- Conclude contracts on behalf of a non-resident.
- Has a stock of goods, owned by a non-resident, on hand in the Kingdom to supply the clients' demands regularly on behalf of the non-resident.

A place from which a non-resident carries out insurance and/or reinsurance activity in the Kingdom through an agent is considered a PE of the non-resident even though the agent is not authorised to negotiate and conclude contracts on behalf of the non-resident.

## Other taxes

### Value-added tax (VAT)
There is currently no VAT system in Saudi Arabia.

### Customs duties
Customs duties are imposed on imports according to tariffs rates that are effective on the payment date in accordance with the Saudi Customs regulations. Customs duties are imposed on the price of the imported goods. This price is assessed based on the actual cost paid or on the agreed upon cost denominated in the currency of the exporting country. The price consists of the price of the imported goods as packed for shipping from the port of export plus freight and insurance cost to the Saudi port which is converted to Saudi riyals at the exchange rates published by Saudi Arabian Monetary

Agency (SAMA) on the date of the declaration. In case this procedure is not achievable, the imported goods will be priced based on the most proximate comparable value that could be ascertained. Imported goods that are subject to customs duties based on weight are assessed based on the gross weight or the net weight as shown in the tariff schedules. The gross weight of the goods includes the goods weight including all internal and external packing materials. Net weight of the goods excludes all internal and external packing materials including the items used for separating and arranging the goods.

To encourage joint ventures in manufacturing, the government grants tariff protection from competing imports to locally produced, quality goods. Rates can be as high as 20%.

Penalties on smuggling goods vary from confiscation, to collections of customs duties and penalties, to imprisonment.

### *Social insurance tax*

Social insurance tax is paid monthly based on the monthly basic salary plus housing with an upper limit of 45,000 Saudi riyals (SAR), is computed at 2% for non-Saudi employees, and is paid by the employer. For Saudi employees, the rate is 20% and is paid by both the employee (9%) and the employer (11%).

### *Other taxes*

There is no form of stamp duty, transfer, excise, sales, turnover, production, real estate, or property taxation except in so far as they may fall within the scope of Zakat, which is applicable only to Saudi nationals.

## *Branch income*

Taxable income from a branch of a non-Saudi based corporation is taxed at 20%. Certain charges incurred by the headquarters are not deductible on the branch tax return.

## *Income determination*

### *Inventory valuation*

The weighted average-cost method is used for valuing inventory under Saudi tax law.

### *Capital gains*

Capital gains are subject to income tax or Zakat, as appropriate, at the normal income tax or Zakat rate. However, capital gains realised from the disposal of shares in Saudi stock companies listed in the Saudi market are tax exempt, subject to certain conditions.

### *Stock dividends*

Stock dividends distributed to non-resident recipient shareholders are subject to a 5% WHT.

### *Foreign income*

The gross income derived by a capital company resident in the Kingdom from its operations and of its branches inside and outside the kingdom is subject to tax in Saudi Arabia. However, in order to avoid double taxation on the same income, the following exceptions and clarifications are to be considered:

- With respect to the income realised from investments in other resident capital companies and in order to avoid double taxation, such income is to be excluded from being subject to tax under the following conditions:
  - That such income was subjected to tax in the Kingdom.
  - The percentage of ownership in the company invested in is not less than 10%.
  - The period of ownership of shares is not less than one year.
- With respect to the income realised from investments and operations outside the Kingdom, it will be subject to tax in the Kingdom unless an effective double tax treaty between the Kingdom and the country invested in stipulates different provisions.

### *Other significant items – imports and supply contracts*

Saudi tax law provides that no profit will be considered to arise from a contract for the supply of goods to Saudi Arabia, provided delivery of the goods is either free on board (FOB) or cost, insurance, and freight (CIF) to a Saudi port. However, should the contract provide for the delivery and/or installation of materials at a point inside Saudi Arabia, the supplier may be considered to be carrying on business within Saudi Arabia, and, as a consequence, the contract may be subject to Saudi income taxation as follows:

- If the material cost was identified in the supply contract separately from the cost of work performed in Saudi Arabia, then, in the absence of a PE, a WHT on the work that will be performed in Saudi Arabia may be assessed, based on the type of services. However, if the contract qualifies the supplier to have a PE in Saudi, then income tax will be applied according to the Saudi tax regulations as for a normal taxpayer.
- If the supply contract indicates a total cost without segregation in the value of supply and the value of the other activities in Saudi Arabia, then the work performed in Saudi Arabia will be assigned a value equal to 10% of the contract value for each type of activity.

## *Deductions*

All expenses that are necessary and normal to the business, paid or accrued, are allowable deductions, provided the expense meets the following conditions:

- It is an actual expense, supported by a verifiable document or other qualifying evidence.
- It is related to the generation of taxable income.
- It is related to the subject tax year.
- It is of a non-capital nature.

S

### *Depreciation*

A depreciation deduction is allowed under the following limitations as stipulated by the law:

- The asset is not intended for resale and is to be used, in full or in part, for the entity's purposes.
- The asset is of a depreciable nature that loses value because of use or because of wear and tear and obsolescence and which has a value extending beyond the end of the taxable year.
- The asset is owned by the business, as per the ownership document for buildings and contracts and invoices for other assets.

- The asset depreciation is allowed even if the asset becomes inactive during the tax year.

Depreciation for tax purposes is calculated as follows, based on the following five categories of depreciable tangible or intangible assets, other than land:

| Asset category | Depreciation rate (%) |
|---|---|
| Fixed buildings | 5 |
| Industrial and agricultural movable buildings | 10 |
| Factories, machines and equipment, computer application programs, passenger cars, and cargo vehicles | 25 |
| Expenditures for geological surveying, drilling, exploration, and other preliminary work to exploit and develop natural resources and their fields | 20 |
| All other tangible or intangible assets not included in previous categories, such as furniture, planes, ships and trains, and goodwill | 10 |

The declining balance method of depreciation, according to the above rates, should be followed for tax purposes.

There are also rules for depreciation relating to assets either acquired or disposed. Essentially, 50% of the allowable acquisition price or disposal proceeds is added to or subtracted from the asset pool in the first year, and the remaining 50% in the following year.

Assets under build, own, and transfer (BOT) and build, own, operate, and transfer (BOOT) are allowed to be depreciated over the contract period. This presumes, although it is not clear, that assets under the BOT and BOOT schemes actually will have a separate grouping in addition to the above prescribed groups.

### *Loan charges (interest expenses)*

An interest deduction is limited to the lower of the loan charge incurred during the tax year, if related to income that is subject to tax, or the result of the following formula, whichever is less.

The taxpayer's total income from loan charges, plus 50% of (A minus B) as below:

A = income subject to tax other than income from loan charges.

B = expenses allowed under the law other than loan charge expenses.

Note that banks are not subject to this formula.

### *Bad debt*

Bad debts are deductable, provided they meet all of the following conditions:

- The bad debt was previously declared in the appropriate year's income.
- The debt resulted from sale of goods or services.
- The company holds a certificate from the taxpayer's certified public accountant certifying that the debt has been written off in the taxpayer's books and records, based on a decision by the taxpayer at the appropriate management level.

- Serious efforts have been exerted by the taxpayer to collect the debt with no success and the inability of the debtor to pay has been proved based on a judicial ruling or bankruptcy.
- The debt is not from a related party.
- There is a commitment by the taxpayer to reinstate, as income, any written-off debt whenever collected.

### *Allocations and reserves*
Allocations and reserves formed during the year are deductible as follows:

- Bank allocations to a reserve fund for doubtful debts are allowable deductions. However, a bank must submit a certificate from the Saudi Arabian Monetary Agency (SAMA) stating the amount of doubtful debts and the amount of doubtful debts collected during the year, which should be reinstated in the tax base of the year of collection.
- Insurance/reinsurance companies may deduct, based on industry standards, a reserve for unearned premiums and for unexpired risks, provided that it is reported in the tax base of the following year.

  A reserve for unearned premiums means a part of premium amounts collected or stated in books that covers risks related to the future tax year(s). A reserve for unexpired risks means the amount of compensation claimed or reported, but for which the payment process falls short of completion during the tax year.

- A taxpayer may reduce its book profit by the amount of reserves used during the year that had been readjusted when made, to increase income or decrease expenses in the year of formation. Examples of such reserves are end-of-service awards, doubtful debt, and drops in prices. Such amounts are deductible, provided the following conditions are met:
  - The used amount was paid or accrued during the year, and it is supported by documentation.
  - The reserve had been adjusted in the year of formation to increase the tax base.

### *School fees*
School fees paid by taxpayers for their employees' children are deductible expenses, provided they meet the following conditions:

- They are paid to a local licensed school.
- This benefit is stated in the employment contract.

### *Pension fund*
Employers' contributions to employees' pension funds or savings funds established under Saudi Arabia's rules and regulations are deductible, provided that such contribution, one payment or in aggregate, is not in excess of 25% of the employee's income before the employer's contributions and that the fund meets the following criteria:

- The fund is established according to special provisions that clearly stipulate conditions of subscription and rights of subscribers.
- Such obligation is stated in the employment contract or in the Articles of Association of the establishment.
- The fund has a character independent of the establishment and has separate accounts audited by an independent certified public accountant.

### *Research and development (R&D)*

A deduction is allowed for R&D expenditure incurred during the tax year in connection with the generation of income that is subject to tax. Such expenditure relates to technical, scientific, and engineering experiments; computer systems; or similar research. This provision does not apply to the acquisition of land and facilities, or to equipment used for research. Such facilities and equipment are subject to depreciation under the law.

### *Fines and penalties*

Fines and penalties related to income tax, paid or payable in Saudi Arabia or to other countries, are not deductible.

Financial fines or penalties paid or payable to any party in Saudi Arabia, such as traffic fines or fines for causing damage to public utilities are also not deductible.

Fines or penalties paid for breach of contractual obligations, such as fines on delayed or defaulted completion of contracts, are deductible, provided they are documented by the contracting party and the income from such penalties is reported in the year of recovery.

### *Non-deductible expenses*

The following expenses are non-deductible:

- Wages, salaries, and whatever is so deemed, in cash or in kind, paid to an owner, partner, or shareholder or to a member of their families, being a parent, spouse, sons/daughters, and siblings (this provision does not apply to stockholders in a stock company).
- Compensation in cash or in kind paid to a partner, shareholder, or to a family member including a parent, spouse, sons/daughters, and siblings for a property or service to the extent that the compensation is higher than the fair market value of such property or service at time of transaction.
- Entertainment expenses incurred for events such as parties, sports competitions, entertainment trips and activities, etc.
- Expenses of a natural person for personal consumption, such as personal withdrawals, dependents' cost of living, or education.
- Income tax.
- Any bribe or similar payment which is considered an illegal practice in Saudi Arabia, even if paid abroad.
- Insurance commission in excess of 3% of total premiums collected in Saudi Arabia through an agent or others and regardless of whether or not the agent is a partner.
- Employer contributions to their employees' legal pension fund, social insurance, or savings funds.

### *Net operating losses*

A taxpayer may carry forward operational losses as adjusted, to the years following the loss year until the cumulative loss is fully offset. The maximum profit percentage of any year that could be used to offset cumulative losses should not exceed 25% of the year's profit as reported in the taxpayer's return. Carryback of losses is not allowed.

### *Payments to foreign affiliates*

Payments made to headquarter offices located abroad by wholly owned local subsidiaries or branches are not deductible. Such payments include:

- royalties or commissions
- loan charges (interest expense) or any other financial fees, and
- indirect administrative and general expenses allocated on an estimated basis.

The value of goods or services delivered to the taxpayer by related parties is not deductible to the extent that it is in excess of an arm's-length value.

## *Group taxation*

A recent change took place in October 2010 with the intention of eliminating double taxation on the income of foreign investors realised from their investments in other resident companies. According to this recent change, such income is to be excluded from being subject to tax under the following conditions:

- That such income was subjected to tax in Saudi Arabia.
- The percentage of ownership in the company invested in is not less than 10%.
- The period of ownership of shares is not less than one year.

With respect to the income realised by a resident capital company from its investments and operations outside Saudi Arabia, it will be subject to tax in Saudi Arabia (unless an effective double tax treaty between Saudi Arabia and the country invested in stipulates different provisions).

However, for Zakat purposes, the concept of consolidation is acceptable and relief may be obtained for wholly owned subsidiaries by Saudi/Gulf Cooperation Council companies that are subject to Zakat.

Note that an entity operating in Saudi Arabia that has undertaken more than one project under the same commercial registration is required to consolidate the results of such projects into the financial statements of that entity and subject them to taxation as a single operation.

### *Transfer pricing*

There are no specific transfer pricing rules in Saudi Arabia that impose or deem a charge to arise where the DZIT have reason to believe that a transaction has taken place at a value other than on an arm's-length basis. However, there is a generic provision that allows the DZIT to re-characterise or re-allocate income or expenses arising from a transaction if it is undertaken for the purposes of avoiding or reducing a tax liability in Saudi Arabia.

### *Thin capitalisation*

There is no special legislation governing thin capitalisation for tax purposes. A Saudi company may deduct interest payments to affiliates, but not the head office, provided that the amount of debt and rate of interest are at arm's length and that interest deductibility formula is met. A Saudi company may be financed with minimum capital, and there is no limit to the amount of debt that may be used.

## *Tax credits and incentives*

### *Repatriation*

There are no restrictions on repatriation of profits, fees, capital, salaries, or other monies.

### *Incentives for investment in less-developed regions*
The government of Saudi Arabia has granted tax concessions to the following six less-developed regions in Saudi Arabia, with the intention of attracting more investment:

- Ha'il.
- Jazan.
- Najran.
- Al-Baha.
- Al-Jouf.
- Northern territory.

These tax privileges are granted for a period of ten years from the start of any project.

The qualifying investing company's annual tax bill may be reduced by:

- Half the annual training expenditure on Saudis.
- Half the annual salaries paid to Saudis.

More deductions are granted if investment capital for any project exceeds SAR 1 million and if more than five employees of Saudi nationality have jobs of a technical or administrative nature with contracts of at least one year.

### *Customs incentives*
An exemption from customs duties is available on machinery and raw materials that are required for approved projects, provided that they are not available in the local market. Such exemptions should be applied for prior to their importation and are subject to certain terms.

## *Withholding taxes*

Payments made from a resident party or a PE to a non-resident party for services performed are subject to WHT. The rates vary between 5%, 15%, and 20% based on the type of service and whether the beneficiary is a related party.

The WHT should be paid within the first ten days of the month following the month during which the payment was made.

The domestic rate for WHT is 5% on dividends, 15% on royalties, and 5% on interest.

### *Tax treaties*
Saudi Arabia has entered into tax treaties with several countries. Treaties currently or about to be in force are listed below. A number of other treaties are at various stages of negotiation.

DTTs have not yet been effectively tested in Saudi Arabia. However, they generally follow the Organisation for Economic Co-operation and Development (OECD) model treaty and may provide certain relief, including WHT on dividends, interest, and royalties.

The following are the treaty WHT rates for payments made from Saudi Arabia to treaty country recipients. Each tax treaty should be studied carefully because there could be exceptions to the general rules:

| Recipient | Dividends (%) | Interest (%) | Royalties (%) |
|---|---|---|---|
| Non-treaty country | 5 | 5 | 15 |
| Treaty country: | | | |
| Austria | 5 | 5 | 10 |
| Belarus | 5/10 | 5 | 10 |
| China (P.R.C.) | 5 | 10 | 10 |
| France | 0 | 0 | 0 |
| Greece | 5 | 5 | 10 |
| India | 5 | 10 | 10 |
| Italy | 5/10 | 5 | 10 |
| Malaysia | 5 | 5 | 8 |
| Netherlands | 5/10 | 5 | 7 |
| Pakistan | 5/10 | 10 | 10 |
| Russia | 5 | 5 | 10 |
| South Africa | 5/10 | 5 | 10 |
| South Korea (R.O.K.) | 5/10 | 5 | 5/10 |
| Spain | 0/5 | 5 | 8 |
| Syria | 0 | 7.5 | 15 |
| Turkey | 5/10 | 10 | 10 |
| United Kingdom | 5/15 | 0 | 5/8 |
| Uzbakistan | 7 | 7 | 10 |
| Vietnam | 5/12.5 | 10 | 7.5/10 |

## *Tax administration*

### *Returns*

Tax filings are based on the company's fiscal-year. Returns are due to be filed with the DZIT, and tax due must be paid within 120 days after the taxpayer's year-end. The system is one of self-assessment.

### *Payment of tax*

Three equal advance tax payments are required to be made on the last day of the sixth, ninth, and 12th months for a current tax year, provided that the taxpayer has earned income during the year. Each advance payment is equal to 25% of the amount resulting from the taxpayer's tax liability based on the previous year return minus the withheld tax on reported income, if any. The taxpayer is not required to make advance tax payments if the result of the said formula is less than SAR 500,000. Late payment of an advance payment is subject to a delay penalty of 1% of the amount due for every 30 days of delay.

## Significant developments

In 2011, the following two new special taxes to help financing the energy sector have been introduced:

- A Special Contribution for the Development of the Energy Sector amounting to 50,000 Communaute Financiere Africaine francs (XOF) per ton of diesel oil, high-octane petrol, fuel oil 380, naphtha, and light gasoline exported or re-exported.
- A Special Contribution of Support for the Energy Sector which amounts to XOF 15,000 per ton of diesel oil, fuel oil 180, as well as fuel oil 380 imported or sold in Senegal, unless those products are intended for the production of electricity, in which case they are exempt.

The 2% tax on telecommunication use and access that was introduced in 2009 has been increased to 5%. To offset the tax, the purchase of mobile telephones (and other types of telephones) remains exempt from value-added tax (VAT) and customs duty.

A reduction of the VAT rate for tourism activities from 18% to 10% became effective as of 1 January 2011.

## Taxes on corporate income

Branches and companies are liable for 25% corporate income tax (CIT).

A minimum CIT is due in case of lack of profits, and the amount depends on the annual turnover as follows:

- XOF 500,000 in case of an annual turnover up to XOF 250 million.
- XOF 750,000 if the annual turnover ranges from XOF 250 million to XOF 500 million.
- XOF 1 million in case of an annual turnover over XOF 500 million.

## Corporate residence

Companies are considered as Senegalese residents if they have a registered fixed establishment. Nonetheless, foreign companies that are not registered locally may be deemed to have a permanent establishment (PE) in Senegal in relation to their local activity, and will then be subject to tax liabilities.

### Permanent establishment (PE)

The criteria for a PE were derived from the General Tax Code and are close to the Organisation for Economic Co-operation and Development (OECD) standards. Double tax treaties (DTTs) can be applicable and can provide specific definitions. These DTTs are based on the OECD model in most cases.

Senegal has concluded such treaties with Belgium, Canada, France, Italy, Morocco, Mauritania, Norway, Qatar, Tunisia, and member states of the West African Economic and Monetary Union (UEMOA), including Benin, Burkina-Faso, Côte d'Ivoire, Guinea-Bissau, Mali, Niger, and Togo.

## Other taxes

### Value-added tax (VAT)

Subject to certain exclusions, most commercial operations are subject to an 18% VAT duty. A 17% special tax on banking operations is applicable instead of the VAT.

### Business licence tax

Business license tax is an annual duty consisting of a fixed annual payment (fixed duty) and a proportional duty calculated in most cases on the basis of the rental value of the premises used. The amounts and rates of these taxes are fixed according to the type and size of the activity carried out.

### Tax on built real estate (land with buildings and/or industrial equipment fixed thereon)

The tax on built real estate applies to owners of buildings, factories, industrial premises, or equipment fixed on the land. The tax rate is 5% for common buildings and 7.5% for factories and industrial premises. It is applied on the basis of the rental value of the lands, buildings, etc.

### Tax on non-built real estate

The tax on non-built real estate applies to owners of land without buildings, factories, industrial premises, or equipment fixed on the land. The tax rate is fixed at 5%. It is applied on the basis of the rental value of the land.

### Stamp/registration duties

There are many stamp and/or registration duties depending on the operations, such as the following:

- 1% registration duty applicable to the incorporation of a company and the increase in cash of the share capital.
- 1% registration duty applicable to transfer of stocks.
- 1% registration duty applicable to transfer of debts.
- 15% registration duty applicable to sale of business.
- 15% registration duty applicable to transfer of real estate.
- 5% registration duty applicable to rent agreements.

### Tax on vehicles

An owner of a motor vehicle (car, truck, or motorbike) must pay an annual registration tax ranging from XOF 18,000 to XOF 200,000 per vehicle, depending on its nature and horsepower.

### Company tax on vehicles

In addition to the tax on vehicles, companies owning or renting vehicles (more than 15 days a year) must pay a specific annual tax on them. Rates range from XOF 50,000 to XOF 200,000, depending on the type and horsepower of the vehicle.

## Branch income

In general, the tax on branch income is similar to that of corporate income. Nonetheless, a 10% duty is automatically applied to profits generated after corporate income tax. It corresponds to an automatic application of the 10% tax on payment on dividends applicable to a company.

## Income determination

### Inventory valuation

Inventory is generally stated at the lower of cost or market value. Last in first out (LIFO) and first in first out (FIFO) are permitted. Book and tax conformity is required.

### Capital gains

Regarding companies, capital gains derived from the transfer of assets are subject to the 25% corporate income tax. There is no basket system. The taxable base will be reduced to one-third if the transfer of assets arises due to a cessation of activity. However, if the transfer of assets is made less than five years after the start of the business, a one-half reduction of the taxable base will be applicable.

Sales of stocks by a non-resident are liable to the 25% corporate income tax, subject to the application of a DTT.

### Inter-company dividends

If a parent company domiciled in Senegal owns 20% of the subsidiary (main condition for the application of the parent-subsidiary corporation special taxation status), a 95% reduction on the dividends received is applicable for corporate income tax purposes.

### Stock dividends

Stock dividends are unusual in Senegal. However, this kind of distribution would be taxable at the general withholding tax (WHT) rate of 10% on the basis of its real value.

### Foreign income

In general, profits generated in Senegal are taxed under Senegal’s income tax law. Profits generated outside Senegal and constituting a PE in the relevant country are not taxed in Senegal. A DTT can provide different rules.

## Deductions

### Depreciation and depletion

The rates of depreciation are not provided by the law. The rate is determined on the normal and predictable duration of use of the asset by taking into account normal wear and tear. In practice, there are standard rates for common assets. Accelerated depreciation can be applicable, subject to conditions.

### Other significant items
Interest paid to shareholders may be deducted when it relates to loans with an amount lower or equal to the amount of the share capital and whose rate is lower or equal to the base rate of the Central Bank of West African States plus two points.

Provisions are deductible if they correspond to a risk or a probable cost that is more than possible and leads to a decrease in the assets. Provisions for paid holidays and retirement compensation are not deductible.

Payments made to specific chartered organisations are deductible at a rate of up to 0.2% of turnover.

Headquarter expenses, which are a proration of the worldwide office expenses, may be allocated to the Senegal branch. This proration is based upon a ratio of the local turnover of the branch and the worldwide turnover of the parent company. It applies to the total amount of headquarters' expenses incurred by the company. In addition, the deductibility of headquarters expenses is limited to 20% of the accounting profits before the deduction. This limitation does not apply to other types of services provided by headquarters such as technical assistance.

Fines, penalties, and foreign taxes are not deductible.

### Net operating losses
Tax losses may be carried forward to the next three years. The carryback of losses does not exist. Losses corresponding to the depreciation of assets can be forwarded indefinitely.

### Payments to foreign affiliates
Reasonable royalties, interest, and management service fees paid to foreign parent companies are tax-deductible. Supporting documents (e.g. invoices, contracts) will be necessary to prove that these expenses are justified. Transfer pricing issues are rare.

## Group taxation

Group taxation is not permitted in Senegal.

## Tax credits and incentives

### The Investment Code
The Investment Code applies to investments over XOF 100 million (mainly production, processing, industrial, tourism, agricultural, and complex trade). The benefits of the Investment Code include exemption from customs duties, suspension of VAT payment for three years, corporate income tax limitation, etc.

### The status of the free export company
Agriculture, industry, and telecommunications companies that have an exporting potential amounting to at least 80% of their turnover may qualify for the free export company status. There are several advantages for companies that qualify, including a corporate income tax rate of 15%, exemption from dividend tax, exemption from business license tax, exemption from taxes on real estate, and exemption from registration duty for incorporation or bylaws change purposes.

### Miscellaneous incentives
There are a wide range of investment laws for investments greater than XOF 250 billion (negotiation of a derogatory tax regime), including the mining code and the petroleum code, among others.

## Withholding taxes

Senegal has various WHTs. The primary ones are as follows:

- 20% WHT on remuneration paid for services rendered by a foreign individual or foreign company.
- 10% WHT on dividends distributed.
- 13% WHT on bond interest.
- 8% WHT on deposits or guaranteed interest on accounts with a bank.
- 16% WHT on other revenues, notably interest on loans.

These WHTs may be limited by DTTs.

## Tax administration

### Returns
Companies must file corporate income tax returns by 30 April of the year following the tax year (calendar year) for corporate income tax purposes.

VAT returns must be filed monthly.

Business license tax and taxes on real estate are due annually.

### Payment of tax
Corporate tax must be paid in two instalments (each equal to one-third of the previous year's tax) by 15 February and 30 April. The outstanding balance payment amount of the tax due must be paid by 15 June.

For the first financial year of a newly incorporated company, no instalment is due; the new company pays the whole corporate income tax before 15 June of the following year.

# Serbia

## PwC contact

## Significant developments

Amendments to the corporate income tax (CIT) law were enacted on 27 March 2010 and apply to determination of the CIT liability for fiscal years 2010 and 2011.

At the end of December 2010, the Ministry of Finance adopted new bylaws regulating methods of determining and declaring CIT liability.

A new customs law has been adopted and is effective as of 4 May 2010. This law represents a significant step forward in the process of aligning Serbian customs legislation with the European Union (EU) Community Customs Code.

## Taxes on corporate income

Residents are taxed on their income generated in Serbia, as well as on their worldwide income. Non-residents are taxed only on their income sourced through a permanent establishment (PE) in Serbian territory.

The CIT rate is 10%.

## Corporate residence

A legal entity is considered to be a resident of Serbia if it is established or has its place of effective management and control in Serbia.

### Permanent establishment (PE)

A PE is any permanent place of business through which a non-resident conducts its business.

## Other taxes

### Value-added tax (VAT)

The VAT was introduced on 1 January 2005 and generally follows the EU's Sixth Directive.

The standard VAT rate is 18% for most taxable supplies. A reduced VAT rate of 8% applies for basic food stuffs, daily newspapers, utilities, etc.

In addition to these tax rates, there is a 0% tax rate with the right of deduction of the input VAT which applies to the export of goods, transport and other services directly related to exports, international air transport, etc.

A 0% tax rate without the right of deduction of the input VAT applies to trading in shares and other securities, insurance and reinsurance, and the lease of apartments, business premises, etc.

A taxpayer for VAT purposes is a person who independently, and in the course of its business activities, undertakes the supply of goods and services or import of goods. Business activity is defined as the permanent activity of a manufacturer, salesperson, or service provider for the purpose of gaining income. A branch or other operating unit can be a taxpayer.

A non-resident without a head office or PE within Serbia cannot register for VAT purposes.

The VAT law requires taxpayers to file VAT returns and pay VAT within ten days of the end of each taxable period. The usual taxable period is a calendar month; however, if a taxpayer's total turnover (for the last 12 months) is less than 20 million Serbian dinara (RSD) or is forecast (for the next 12 months) to be so, the taxable period is three calendar months.

### *Customs duties*
Goods imported into Serbia are subject to customs duty rates provided in the Law on Customs Tariff. These rates are *ad valorem* (the only exception is related to the importation of other cigarettes containing tobacco, where a combined *ad valorem* and specific customs duty rate is prescribed) and applies to goods originating in countries which have a most favoured nation (MFN) status in trading with Serbia. Goods originating in other countries are subject to MFN duty rates increased by 70%.

At the moment, the only trading partner with Serbia that does not have MFN status is Taiwan.

Customs duty rates in Serbia range from 0% to 57.6%, with most being under 30%. At the moment, the 57.6% rate only applies to cigarettes containing tobacco.

### *Excise duties*
Excise duties are levied on producers and importers of the following goods:

- Oil derivatives.
- Tobacco products.
- Alcoholic beverages.
- Coffee (green, roasted, ground, and coffee extracts).

Excise duty in Serbia is specific (for oil derivatives, alcoholic beverages, cigars, and cigarillos), *ad valorem* (for coffee and pipe tobacco), and combined (specific + *ad valorem* on retail price for cigarettes).

Excise duties stated in Serbian currency are adjusted on a half-year basis according to variations of the consumer price index (CPI) declared by relevant government bodies in charge of statistics. For oil derivatives, the government can modify the specific excise duty amounts during the year according to changes in prices of crude oil on the market.

### *Property tax*
Property tax is payable annually in Serbia by all legal entities and individuals who own or have rights over real estate located in the Republic of Serbia, such as:

- Ownership rights.
- Right of occupancy.
- Tenancy rights over an apartment or a building for a period longer than one year or for an indefinite period.
- Urban land usage right (municipal, public, and other state-owned land) larger than ten acres in area.

Where the taxpayer keeps books, the property tax on real estate is levied at a flat rate which cannot exceed 0.40%.

## *Branch income*

Non-residents carrying on business in Serbia through a branch are taxed on their Serbian-sourced income at the CIT rate of 10%. A branch is considered to be a PE.

## *Income determination*

Taxable profit is determined by adjusting the accounting profit as stated in the profit and loss statement (determined in accordance with International Financial Reporting Standards (IFRS) and local accounting and audit legislation) and in accordance with the provisions of the CIT Law.

For taxpayers who, according to local legislation, are not obliged to apply IFRS, taxable profit is determined according to the special guidelines prescribed by the Ministry of Finance.

### *Inventory valuation*

Cost of materials and the purchase value of merchandise are tax-deductible up to an amount calculated by applying the average weighted cost method or the first in first out (FIFO) method. If another method is used, an adjustment for tax purposes should be made.

### *Capital gains*

Capital gains are generated by the sale or other transfer of real estate, rights related to industrial property, as well as shares, stocks, securities, certain bonds, and investment units. A capital gain is determined as the difference between the sale and purchase price of the asset concerned, determined in accordance with the provisions of the Law. If the amount is negative, a capital loss is realised.

Capital gains and operational profit are disclosed in the same tax return, but they are taxed separately. Consequently, capital gains/losses cannot be used to offset business losses/gains.

However, capital gains can be offset with capital losses occurring in the same period. A capital loss can be carried forward for five years.

The capital gains tax rate is 10%.

### *Dividend income*

Dividends received by a Serbian company from another Serbian company are not subject to CIT.

Dividends received from a non-resident will be treated as taxable income of a Serbian company and subject to 10% CIT. However, a Serbian entity will have the right to decrease its tax liability by taking tax credit for the withholding tax (WHT) and underlying CIT paid in a subsidiary's country *(see the Tax credits and incentives section for more information)*.

### *Interest income*
Interest income will be included in accounting profit determined in accordance with IFRS and will be taxable at the CIT rate of 10%. A Serbian resident has the right to decrease its CIT liability for WHT on interest paid abroad by its non-resident subsidiary.

### *Royalties*
Royalty income will be treated as business income and subject to the general CIT rate.

A resident taxpayer also has the right to decrease its CIT liability for WHT on royalties paid abroad by its non-resident subsidiary.

### *Unrealised currency exchange gains*
Unrealised currency exchange gains will be included in accounting profits under IFRS rules. Serbian legislation does not provide any exception of taxation of this income. CIT rate is 10%.

### *Foreign income*
Companies resident in Serbia are taxed on their worldwide income.

When profit generated in another country is taxed in the foreign country, a company has the right to decrease its tax liability by claiming a tax credit from the tax authorities in Serbia *(see the Tax credits and incentives section for more information)*.

There are no provisions which provide for the possibility that taxation of income earned abroad may be deferred.

## *Deductions*

The following expenses are not recognised for CIT purposes:

- Non-documented expenses.
- Provisions for receivables from entities that are creditors at the same time.
- Presents provided to political organisations.
- Presents provided to related parties.
- Penalty interest for late payment of taxes.
- Expenses related to forced collection of taxes and other liabilities.
- Fines and penalties (both commercial and the one charged by the authorities).
- Contractual fines and penalties.
- Non-business related expense.
- Calculated but unpaid redundancy payments (deductible when paid).
- Impairment of assets (deductible in tax period in which asset is disposed of or used).
- Direct write-off of receivables (under certain conditions).
- Long-term provisions (except those for renewal of natural resources, expenses within warranty period, and other mandatory long-term provisions).

The following expenses are recognised for CIT purposes only up to a certain limit:

- Depreciation, in the amount computed in accordance with the tax legislation.
- Advertising and promotional expenses, up to 5% of total revenues.
- Representation expenses, up to 0.5% of total revenues.
- Expenses for health care, scientific, educational, humanitarian, religious, ecological, cultural, and sport related purposes, up to 3.5% of total revenues.
- Membership fees paid to chambers of commerce and other associations (except political parties), up to 0.1% of gross revenue.

### *Depreciation*

Fixed and intangible assets are divided into five groups, with depreciation rates prescribed for each (Group I: 2.5%; II: 10%; III: 15%; IV: 20%; and V: 30%). A straight-line depreciation method is prescribed for the first group, which includes real estate, while a declining balance method is applicable for assets in the other groups.

Assets subject to tax depreciation are all tangible and intangible (except goodwill) assets with useful life longer than one year and acquisition value above the average monthly gross salary published in Serbia at the moment of acquisition.

### *Net operating losses*

The taxpayer has the right to carry forward and utilise tax losses incurred over the following five years.

Carryback rules do not exist in Serbia.

### *Payments to foreign affiliates*

Generally, there are no restrictions on the deductibility of royalties and service fees paid to foreign affiliates, provided they are at arm's length, appropriately documented (by agreements, contracts, calculation sheets, etc.), and incurred for business purpose only.

Payment of interest to foreign affiliates is restricted and regulated by thin capitalisation rules and transfer pricing rules *(see the Group taxation section)*.

## *Group taxation*

Tax grouping/consolidation is allowed to a group of companies where all members are Serbian residents and one company directly or indirectly controls at least 75% of the shares in another company. Each company files its own tax balance sheet, and the parent company files a consolidated tax balance sheet for the whole group.

In the consolidated tax balance sheet, losses of one or more companies are offset by the profits of other related companies. Each company is liable for the portion of tax attributable to its share of the group's taxable profit.

Once approved by the Ministry of Finance, tax grouping/consolidation applies for at least five years.

### *Transfer pricing*

A transfer price is the price of transactions between related parties. Related parties exist if there is a possibility of control or influence over business decisions between them. Ownership of 50% or more, or a majority of shares, is considered as potential control. Influence over business decisions exists when an associated party holds 50% or more, or individually holds the greatest portion, of votes in the taxpayer's management bodies. If the same persons participate in management or control of both companies, a connection between them will be deemed to exist.

A company should disclose transactions with related parties separately at transfer prices and at arm's length prices in its corporate tax calculation. Positive difference between these prices (adjustments of expenses) and negative difference (adjustments of revenues) is included in taxable profit.

### *Transfer pricing rules for intra-group loans*

Any interest incurred on related party loans exceeding the arm's-length interest rate is not tax deductible. Arm's-length interest is deemed to be the:

- weighted average key policy rate for the tax period, for loans denominated in dinars, and
- weighted average interest rate at which domestic banks borrowed from foreign lenders in related tax period, for foreign currency loans.

These indicators are determined by National Bank of Serbia and published by the Ministry of Finance.

Transfer pricing rules in this respect are applied up to the amount of tax deductible interest determined in accordance with the thin capitalisation threshold.

### *Thin capitalisation*

The interest and related costs will be fully deductible provided that the loans from related parties do not exceed four times the taxpayer's net equity (ten times for banks). The amount of a taxpayer's net equity for this purpose is calculated as the average of the total assets less total liabilities on the beginning and the end of the year, while the amount of loan from related parties is calculated as a daily average for the year.

In cases where the loans from related parties exceed the prescribed threshold, the amount of non-deductible interest will be calculated as proportional to the amount of loans exceeding the 4:1 (10:1) threshold.

## *Tax credits and incentives*

Profit earned on the basis of a concession is tax exempt for a period of five years.

### *Foreign tax credit*

A Serbian entity is entitled to a tax credit for the WHT paid on distributed dividends and underlying CIT paid abroad (by its non-resident subsidiary). The tax credit cannot exceed the amount of corporate tax that would have been paid in Serbia. Non-utilised tax credit can be carried forward by the parent company for five years. The parent company is required to own not less than 25% of a non-resident subsidiary for at least one year before filing the tax return.

A resident taxpayer also has the right to decrease its tax liability for WHT paid abroad by its non-resident subsidiary on interest and authorship fees up to Serbian CIT due. Carryforward of unused tax credit is not allowed.

### *Tax holidays*

A ten-year tax holiday is available for companies with a minimum investment in property, plant, and equipment (PPE) of RSD 800 million. To qualify for the credit, a taxpayer must employ at least 100 new workers for an indefinite period. The tax holiday is available for the ten-year period in proportion to the investment made. The number of employees employed in the tax period in which the taxpayer qualified for the tax holiday must be retained throughout the whole tax holiday period.

A five-year tax holiday is available for companies conducting business in undeveloped regions that invest at least RSD 8 million in fixed assets. In addition, the company is obliged to employ at least five new workers for an indefinite period. The tax holiday is available for the five year period in proportion to the investment made.

### *Other tax credits*

A tax credit of 20% (40% for small enterprises) is available for qualifying investments in fixed assets. The credit is limited to 50% (70% for small enterprises) of the assessed CIT liability in the current tax period. Unused tax credits can be carried forward for ten years.

Taxpayers generating profit in a newly established operating unit in an underdeveloped region may claim tax credits for a period of two years in an amount proportional to the profit generated by that unit.

Taxpayers classified into one of the following industries: agriculture, fishing, production of textile yarn and fabrics, garments, leather, base metals, standard metal products, machines, office machines, electrical machines, radio, TV and communication equipment, medical instruments, motor vehicles, recycling, and video production are entitled to receive a tax credit in the amount of 80% of investments made in fixed assets which were not previously in use in Serbia. Unused tax credits can be carried forward up to ten years.

## *Withholding taxes*

WHT is calculated and paid at the rate of 20% on payments such as dividends/share in profit, royalties (including neighbouring authorship rights, intellectual property rights, and related rights), interest income, and lease payments for real estate and other assets made to a non-resident, unless a double tax treaty (DTT) applies to provide a reduced rate.

WHT is also payable on a non-resident's income realised on the basis of performing entertaining, artistic, sports, and similar programs in Serbia, which is not taxed as income of an individual (performer, musician, sportsman etc.).

In order to benefit from application of a relevant DTT, non-residents (i.e. the income recipient) must provide a tax residency certificate on the form prescribed by the Serbian Ministry of Finance stamped by the relevant body from the non-resident's country of residence.

WHT rates envisaged by applicable DTTs are provided in the following table.

| Recipient | Dividends (%) (1) | Interest (%) | Royalties (%) (4) | Applicable from |
|---|---|---|---|---|
| Albania | 5/15 | 10 | 10 | 2006 |
| Austria | 5/15 | 10 | 5/10 | 2011 |
| Azerbaijan | 10 | 10 | 10 | 2011 |
| Belgium | 10/15 | 15 | 10 | 1982 |

# Serbia

| Recipient | Dividends (%) (1) | Interest (%) | Royalties (%) (4) | Applicable from |
|---|---|---|---|---|
| Belorussia | 5/15 | 8 | 10 | 1999 |

| Sri Lanka | 12.5 | 10 | 10 | 1987 |
| Sweden | 5/15 | 0 | 0 | 1982 |
| Switzerland | 5/15 | 10 | 10 | 2007 |
| Turkey | 5/15 | 10 | 10 | 2008 |
| Ukraine | 5/10 | 0/10 (6) | 10 | 2002 |
| United Kingdom | 5/15 | 10 | 10 | 1983 |
| Zimbabwe (3) | 5/15 | 10 | 10 | N/A |

Notes

1. If the recipient company owns/controls at least 25% of the equity of the paying company, the lower of the two rates applies.
2. A new DTT was signed with Denmark in 2009, but it is not applicable jet. Meanwhile, the old treaty is still applicable.
3. The treaty has not been ratified by one of the parties.
4. A tax rate of 5% will be applicable to literary, scientific, and work of art; films and works created like films; or other source of reproduction tone or picture. A tax rate of 10% will be applicable to patents, petty patents, brands, models and samples, technical innovations, secret formulas, or technical procedures.
5. Only in cases when dividends are to be paid to Serbian residents. If paid to Malaysian residents, they are taxable at 20% in Serbia.
6. A 0% rate is applicable in cases when the income recipient is the government or government owned banks.
7. Withholding rate refers solely to dividends distributed from Serbia. In Malta, WHT cannot be higher than corporate tax on profit before dividend distribution.

### *Taxation of capital gains of non-residents*

Capital gains realised by non-residents from both residents or other non-residents are subject to 20% capital gain tax. Non-residents should appoint a fiscal representative in Serbia who should submit a tax return within 15 days from the realisation of capital gain. Based on the tax return, Tax Authorities will issue a decision assessing tax liability (if any).

In order to benefit from application of a relevant DTT, the same rules are applicable as for WHT. Non-residents (i.e. the income recipient) must provide a tax residency certificate on the form prescribed by the Serbian Ministry of Finance stamped by the relevant body from the non-resident's country of residence, and the income recipient must be the beneficial owner of income.

## *Tax administration*

### *Returns*

The tax period in Serbia is the calendar year. However, entities have a possibility to opt for a different tax period other than the calendar year (subject to the approval of the Ministry of Finance), but still 12 months long. Once approved, such tax period must be applied for at least five years.

CIT returns, together with all supporting documents (e.g. tax depreciation and tax credit forms), must be filed with the tax authorities by 10 March of the following year.

A newly established company needs to register with the tax authorities within 15 days of registration with the court.

### *Payment of tax*

CIT is payable monthly in advance installments by the 15th day of the following month for the prior calendar month. The amount of payable advances is determined on the basis of a company's CIT calculation for the previous year.

The due date for final settlement of CIT liability for the previous year is 10 March of the current year.

## Significant developments

The 2011 Budget was announced on 18 February 2011. Corporate tax changes include the following:

- A one-off 20% corporate tax rebate (capped at 10,000 Singapore dollars (SGD)) or a cash grant of 5% of the taxpayer's revenue (capped at SGD 5,000), whichever is higher, for the year of assessment 2011 (i.e. income year 2010).
- Enhancements to the Productivity and Innovation Credit scheme.
- The introduction of a pooling system for foreign tax credits.
- Liberalisation of the deduction rules for pre-commencement expenses and expenses incurred in respect of equity-based remuneration schemes.
- Extension of the 250% deduction for qualifying donations.
- Changes to the incentives for the maritime sector, global trading companies, and the financial sector.

Indirect tax changes include the following:

- Goods and services tax (GST) relief for the biomedical, maritime, and logistics industries.
- Stamp duty relief for companies converting to a limited liability partnership structure.
- An increase in the foreign workers' levy.

For details of the 2011 Budget proposals, refer to our 2011 Budget Commentary at http://www.pwc.com/sg/en/budget-commentary/index.jhtml

## Taxes on corporate income

Companies (resident and non-resident) which carry on a business in Singapore are taxed on their Singapore-sourced income when it arises and on foreign-sourced income when it is remitted or deemed remitted to Singapore. Non-residents are subject to withholding tax (WHT) on certain types of income (e.g. interest, royalties, technical service fees, rental of movable property) where these are deemed to arise in Singapore *(for details, see the Withholding taxes section)*.

Tax on corporate income is imposed at a flat rate of 17% for the year of assessment 2011 (i.e. income year 2010). There is an exemption of up to SGD 152,500 out of the first SGD 300,000 of chargeable/taxable income.

For qualifying start-up companies, a three-year tax exemption on the first SGD 100,000 and a further exemption of up to SGD 100,000 on the next SGD 200,000 of chargeable/taxable income are available.

In addition, for the year of assessment 2011 (i.e. income year 2010), there is a one-off tax rebate of 20% of the corporate tax payable (capped at SGD 10,000) or a cash grant of 5% of the company's revenue (capped at SGD 5,000), whichever is higher. The cash grant is available only to companies who have made contributions to the Central Provident Fund in 2010, which means they must have had at least one Singaporean or permanent resident employee in that year.

Singapore adopts a one-tier taxation system, under which all dividends are tax exempt in the shareholder's hands.

## *Corporate residence*

In Singapore, the tax residence of a corporation is determined by the place where the central management and control of its business is exercised. This is taken generally to mean the place where the directors meet to exercise de facto control, although the Inland Revenue Authority of Singapore (IRAS) has recently set out further qualifying criteria.

## *Other taxes*

### *Goods and services tax (GST)*

GST is charged at 7% on the supply of goods and services made in Singapore by a taxable person in the course or furtherance of business.

The only exemptions from GST are prescribed financial services (including life insurance) and the sale or rental of residential properties. Zero-rating only applies to the export of goods and international services.

GST is also levied on imports of goods, at the time of importation. However, there are reliefs available to ease the cash-flow burden of import-export traders by suspending GST at the time of importation. GST is not currently charged on imports of services.

A taxable person is one who is, or is required to be, registered for GST. GST registration is required if one's taxable turnover exceeds SGD 1 million per year. Voluntary registration is permitted if the taxable turnover is below the registration limit, subject to conditions.

A supply of goods is made in Singapore if the goods are in Singapore at the time of supply, and a supply of services is made in Singapore if the supplier belongs in Singapore. Generally, a person belongs in Singapore if the business (including carrying on a business through a branch or agency) or fixed establishment is in Singapore.

A taxable person is allowed to offset the input GST paid on taxable purchases against the output GST chargeable on supplies made. However, certain purchases are specifically denied an input GST deduction. These include supplies of goods and services such as non-business expenses, club subscription fees, family benefits, car rental expenses, motor vehicle expenses, medical expenses, and transactions involving betting, sweepstakes, lotteries, fruit machines, or games of chance.

A non-resident is not entitled to GST refunds except by appointing a resident tax agent to act on one's behalf. The resident tax agent can then recover import GST paid on behalf of the non-resident business but will be required to account for output GST on any subsequent supply of the non-resident's goods in Singapore.

### *Customs and excise duties*

Singapore is essentially a free port with minimal import restrictions. Customs and excise duties are imposed on intoxicating liquors, tobacco products, motor vehicles, and petroleum products.

### *Foreign workers' levy*

A levy, not exceeding SGD 500 per month, is assessed for each foreign employee. It was announced in the 2010 Budget that levy rates will be gradually increased over the next three years. In the 2011 Budget, it was announced that the levy rates will be further increased for one more year beyond the initial three. Details of the increased rates have yet to be announced.

### *Property tax*

Property tax is levied annually at 10% on the annual value of houses, land, buildings, or tenements other than owner-occupied residential property.

### *Stamp duties*

Stamp duties are levied on written documents relating to stocks and shares at 0.2% and relating to immovable property in Singapore at graduated rates of up to 3%.

Leases with annual rents not exceeding SGD 1,000 are exempt from stamp duty.

Seller's stamp duty is levied on the sale of residential property (this excludes sales by property developers) if the sale takes place within four years of the purchase date. Stamp duty rates of 4% to 16% apply, depending on the holding period.

## *Branch income*

Tax rates on branch profits are the same as on corporate profits. There is no branch profits remittance tax on the repatriation of profits to the head office.

## *Income determination*

### *Inventory valuation*

There are no special rules as to which valuation basis should be adopted for inventories (stock-in-trade) in the case of a continuing business, as long as the basis is consistent from one year to another. However, the last in first out (LIFO) basis of valuation is not permitted for tax purposes. Generally, tax reporting conforms to book reporting.

### *Capital gains*

There is no tax on capital gains. Where there is a series of transactions or where the holding period of an asset is relatively short, the tax authorities may take the view that a business is being carried on and attempt to assess the gains as trading profits of the corporation. The UK Badges of Trade, which are used in judicial decisions to distinguish capital and revenue transactions, are generally applied in determining this issue. They include the existence of a profit seeking motive, the number of transactions, the nature of the asset, the existence of similar trading transactions or interests, changes to the asset, the way the sale was carried out, the source of finance, the interval of time between purchase and sale, and the method of acquisition.

### *Dividend income*
Singapore dividends are exempt in the hands of the recipient.

### *Stock dividends*
Stock dividends generally are not taxable. However, certain distributions could be treated as deemed dividends in certain circumstances.

### *Deemed dividends*
Certain distributions to shareholders under a capital-reduction scheme, a share buy-back, or a share redemption exercise may be treated as dividends paid by the company. Under the one-tier taxation system, this is not a significant issue unless the transaction is not correspondingly treated as a dividend in the hands of the shareholder. In which case, the gain may be taxable if it is in respect of a trade or business.

### *Foreign income*
A corporation, whether resident in Singapore or not, is taxed on foreign income when it is received in Singapore. Legislative provisions govern the basis of treating foreign income as received in Singapore. There are no special rules for taxing the undistributed income of foreign subsidiaries.

Where income is earned from treaty countries, double taxation is avoided by means of foreign tax credit granted under those treaties. For non-treaty countries, unilateral tax credit is given in respect of foreign tax on all foreign-sourced income, effective as of the year of assessment 2009 (i.e. income year 2008). These foreign tax credits may be pooled with effect from the year of assessment 2012 (i.e. income year 2011), subject to certain conditions.

Foreign dividends, foreign branch profits, and foreign service fee income remitted to Singapore are exempt from tax, subject to certain conditions. A temporary tax amnesty was introduced in the 2009 Budget for all foreign-sourced income, but this expired on 21 January 2010.

## *Deductions*

### *Depreciation and depletion*
Tax depreciation is allowable at specified rates on buildings used in qualifying industry sectors, subject to conditions. However, during the 2010 Budget, industrial building allowances were replaced by a Land Intensification Allowance. The latter provides for faster depreciation but is subject to approval as it is allowed as a tax incentive. Transitional provisions for industrial building allowances are available for taxpayers who committed to qualifying capital expenditure before 22 February 2010.

Tax depreciation is available on machinery and equipment on a straight-line basis over their specified working life for all types of business. In lieu of the straight-line basis, accelerated tax depreciation allowances can be claimed by all businesses on all machinery and equipment in equal instalments over three years.

For machinery and equipment purchased during the accounting periods that ended in 2009 and 2010 (i.e. years of assessment 2010 and 2011), tax depreciation could be claimed over two years instead of three, with 75% of the claim allowed in the first year of assessment and the remainder allowed in the second.

A 100% depreciation allowance is available on capital expenditure incurred on computers, robots, standby generators, pollution control and energy-efficient equipment, certain diesel-driven vehicles, and prescribed automation equipment.

Writing down allowances on a straight-line basis over five years is allowable on the cost of acquisition of intellectual property, subject to certain conditions, while a 100% writing down allowance is allowed for capital expenditure on approved research and development (R&D) cost-sharing arrangements entered into on or after 17 February 2006.

In addition, enhanced allowances may be available for the acquisition of automation equipment and intellectual *property (see Productivity and Innovation Credit in the Tax credits and incentives section)*.

Gains on tax depreciable property (i.e. the excess of proceeds over tax base) are taxed as ordinary income to the extent that tax depreciation has been allowed; that is, any clawback of tax depreciation on the disposal of the asset is taxed.

### *R&D expenses*
Expenses incurred in respect of R&D carried out in Singapore qualify for a tax deduction of 150% of the R&D expenses incurred. Enhanced deductions may also be available under the Productivity and Innovation Credit scheme *(see Productivity and Innovation Credit in the Tax credits and incentives section)*.

### *Charitable contributions*
Donations are deductible only if they are made in cash or another prescribed form and to an approved recipient. The deduction allowed for qualifying donations is generally 250% of the value of the donation.

### *Taxes*
Income taxes are generally not deductible in determining corporate income. However, irrecoverable GST is deductible under certain circumstances. The foreign workers' levy and property taxes are deductible to the extent they are incurred wholly and exclusively in the production of income.

### *Other significant items*
Private automobile expenses are not deductible.

The tax deduction for medical expenses is limited to 2% of total payroll if the employer implements certain portable medical insurance or benefit schemes. Otherwise, the amount deductible will be limited to 1% of total payroll. Where the company is exempt or taxed at a reduced rate, the expenses disallowed are taxed at the prevailing corporate rate.

A tax deduction for employee share-based remuneration (stock award or stock option schemes) is allowed only if treasury shares are purchased to fulfill such obligations. The deduction is restricted generally to the actual outlay incurred.

Borrowing costs incurred on capital employed in the production of income will be allowed as a tax deduction if the costs are incurred as a substitute for interest or to reduce interest costs.

### Net operating losses
Loss carryover, including unutilised tax depreciation allowance, is unlimited, provided shareholdings in the loss-making corporation have not changed beyond 50% of the issued and paid-up capital. Additionally, for tax depreciation allowances to be carried forward, the same trade needs to be continued. The tax authorities may exercise discretion to allow carryover of tax losses and unutilised tax depreciation even when there has been a change in shareholding beyond 50%, absent any tax avoidance motives. Losses of up to SGD 100,000 incurred by the company in the current year can be carried back for one year.

### Payments to foreign affiliates
Payments to non-residents, including foreign affiliates, are deductible, provided they are fair and reasonable, are revenue in nature, and can be seen to be relevant to earning the payer's income.

## Group taxation

A company is allowed to transfer excess current year trade losses, current year tax depreciation, and current year approved donations to another company within the same group if certain conditions are satisfied.

Broadly, to qualify for group relief, companies must be incorporated in Singapore, belong to the same '75%' group of companies such that there must be at least a 75% ownership relationship between claimant and transferor, and have the same accounting year-end. In addition, a group must comply with certain prescribed offset and apportionment rules.

### Transfer pricing
The Income Tax Act contains provisions that may be used in a transfer pricing context to effectively allow IRAS to challenge and revise inter-company transactions. Additionally, specific transfer pricing provisions were introduced in 2009 which define the arm's-length principle (ALP) and provide the IRAS with a right to make transfer pricing adjustments in cases where taxpayers do not comply with the ALP.

The IRAS has also issued transfer pricing guidelines to supplement the provisions in the Income Tax Act and the various treaties signed by Singapore. The guidelines cover the application of the ALP and documentation requirements relating to all related party transactions, including local related party transactions. The intention of the guidelines is to help taxpayers substantiate their transfer prices with their related entities by maintaining adequate documentation to mitigate the risk of tax adjustment by the IRAS and to safeguard them from potential economic double taxation. The IRAS has also provided guidance on matters relating to Mutual Agreement Procedures (MAP) and Advance Pricing Arrangements (APA).

In 2009, the IRAS also issued guidance on the application of the ALP to related party loans and services.

Although Singapore's income tax rates are traditionally lower than the majority of its trading partners, the IRAS is increasing its focus on transfer pricing issues.

### Thin capitalisation
There are no formal thin capitalisation rules in Singapore. However, general anti-avoidance and transfer pricing provisions may operate in cases of blatant abuse.

## Tax credits and incentives

There are various tax incentives available to taxpayers involved in specified activities or industries identified as being beneficial to Singapore's economic development.

### Pioneer tax incentive

Corporations manufacturing approved products with high technological content, providing qualifying services, or engaging in countertrade activities may apply for tax exemption for five to 15 years under the pioneer tax incentive. Corporations may apply for their post-pioneer profits to be taxed at a reduced rate under the Development and Expansion Incentive, as discussed below.

### Development and Expansion Incentive

Under the Development and Expansion Incentive, corporations engaging in new high-value-added projects, expanding or upgrading their operations, or undertaking incremental activities after their pioneer or post-pioneer period may apply for their profits to be taxed at a reduced rate of not less than 5% for an initial period of up to ten years. The total tax relief period is subject to a maximum of 20 years (inclusive of the post-pioneer relief period previously granted, if applicable).

### Investment allowance

Under the investment allowance, a tax exemption is granted on an amount of profits based on a specified percentage (of up to 100%) of the capital expenditure incurred for qualifying projects or activities within a period of up to five years (up to eight years for assets acquired on hire-purchase on or after 15 February 2007).

### Productivity and Innovation Credit (PIC)

The PIC scheme provides for an enhanced 400% deduction for qualifying expenditure incurred in respect of six qualifying activities during the accounting periods that end between 2010 and 2014 (i.e. years of assessment 2011 to 2015). The six qualifying activities are:

- The acquisition or leasing of prescribed automation equipment.
- Staff training.
- The acquisition of intellectual property.
- The registration of intellectual property rights.
- R&D.
- Design.

The enhanced deduction is available only on the first SGD 400,000 of qualifying expenditure incurred each year on each of the qualifying activities although this cap may be combined for certain years of assessment. Certain activities are subject to approval or minimum ownership requirements.

### Merger and acquisition allowance

The merger and acquisition allowance allows a write-off, over five years, of 5% of the value of qualifying merger or acquisition deals executed between 1 April 2010 and 31 March 2015, subject to a cap of SGD 5 million per year of assessment. This incentive is available only to companies that are incorporated, tax resident, and carrying on a business in Singapore.

### *Financial services incentives*

#### Financial sector incentive (FSI) scheme

The FSI scheme covers approved bond intermediaries, Asian currency units, approved derivative traders, approved fund managers, equity capital market intermediaries, operational headquarters, syndicated offshore credit and underwriting facilities, providers of high-value-added processing services supporting financial activities, futures members of the Singapore Exchange Limited, and members of the Singapore Commodity Exchange Limited.

High growth, high-value-added activities such as services and transactions relating to the bond market, derivatives market, equity market (i.e. futures, securities trading, which includes sale of stocks, shares, bonds and other securities, and extends to brokerage, nominee, and custodian services in relation to securities trading), credit facilities syndication, and Islamic finance will be exempt from tax or taxed at 5%, whilst other broader range financial activities will only qualify for a 12% tax rate. The tax incentive period may last for five, seven, or ten years, subject to certain conditions being met.

#### Finance and treasury centre (FTC)

Income derived by an FTC from approved finance and treasury centre activities is taxed at a reduced rate of 10%. Approved activities include regional and international treasury and fund management activities, corporate finance and advisory services, economic and investment research and analysis, and credit control and administration.

#### Debt securities incentives

A package of tax exemptions and reduced tax rates is available to various players in the Singapore bond market, including certain Islamic financing arrangements.

#### Offshore insurance incentives

Approved insurance companies engaged in the business of insuring and reinsuring offshore risks are taxed at a rate of 10% on qualifying income arising from offshore risks business and at a rate of 5% on qualifying income arising from writing offshore Islamic insurance (takaful) and reinsurance (retakaful) business. Tax exemption is available for qualifying income from the writing of both onshore and offshore marine hull and liability risk insurance and offshore specialised risk insurance and for qualifying income of approved offshore captive insurance companies. In addition, a concessionary tax rate of 10% is available to qualifying insurance and reinsurance brokers on income derived from the provision of insurance broking and advisory services to non-Singapore based clients.

#### Real Estate Investment Trusts (REITs)

Distributions made to foreign non-individual investors by a listed REIT out of rental from Singapore real estate are subject to a reduced tax rate of 10%, subject to certain conditions. Listed REITs investing in foreign properties can apply for tax exemption for certain foreign income received in Singapore. Distributions out of this income similarly are exempt. Stamp duty relief is available upon the transfer of immovable Singapore property to a REIT, and GST concessions are available with respect of overseas non-residential properties and special purpose vehicles or sub-trusts.

#### Islamic financing arrangements

The income tax, stamp duty, and GST treatment of (a) Islamic financing arrangements based on (i) the cost-plus (Murabaha) concept, (ii) the investment-partnership (Mudaraba) concept, (iii) the leasing-with-option-to-purchase (Ijara Wa Igtina) concept for mortgage financing; and (b) Islamic debt securities (Sukuk) are aligned with conventional financing contracts that they are economically equivalent to, subject to certain conditions. In addition, concessionary tax rates are available for certain activities relating to Islamic financing *(see FSI scheme and Offshore insurance incentives above)*.

**Infrastructure project finance incentives**
Tax exemption is available for interest income earned from qualifying investments in qualifying infrastructure projects/assets. FSI companies that provide project finance advisory services related to qualifying projects/assets pay tax at 5% on their qualifying income, and companies that provide management services to qualifying business trusts and funds pay tax at 10% on their qualifying income. Stamp duty relief is available also on the transfer of such projects/assets to listed companies.

**Sovereign wealth funds**
Tax exemption is available for income derived by a sovereign fund entity and an approved foreign government-owned entity from funds managed in Singapore.

***Headquarters (HQ) schemes***
Approved regional headquarters in Singapore are taxed at a concessionary rate of tax of 15% on qualifying overseas income. Approved international headquarters can negotiate for various tax incentives, including tax exemption or concessionary tax rates on qualifying income.

***Maritime Sector Incentive (MSI) scheme***
The MSI scheme consolidates all existing incentives for the maritime sector with effect from 1 June 2011. These include the tax exemption for shipping companies, the 10% concessionary tax rate for international freight and logistics operators, and the existing Maritime Finance Incentive (MFI) under which approved ship investment managers are taxed at 10% on their qualifying management-related income. It also includes approved ship investment vehicles which are tax exempt on their qualifying vessel lease income, approved container investment enterprises which are taxed at 5% or 10% on qualifying income from container-leasing, and approved container investment management companies which are taxed at 10% on qualifying management fees.

***Other incentives***
Incentives for not-for-profit organisations, international arbitration, investment holding companies, oil traders, international traders, general insurance companies, leasing companies, trust companies, cyber traders, and the provision of international legal services include tax exemptions or concessionary tax rates of 10% for qualifying income. The concessionary tax rate for liquefied natural gas (LNG) trading, aircraft leasing, qualifying oil traders, and international traders is further reduced to 5%.

## *Withholding taxes*

Domestic corporations paying certain types of income to non-residents are required to withhold tax.

Unless a lower treaty rate applies, interest on loans and rentals from movable property are subject to WHT at the rate of 15%. Royalty payments are subject to WHT at the rate of 10%. The tax withheld represents a final tax, and applies only to non-residents who are not carrying on any business in Singapore or who have no permanent establishment in Singapore. Technical assistance and management fees for services rendered in Singapore are taxed at the prevailing corporate rate. However, this is not a final tax.

Royalties, interest, rental of movable property, technical assistance, and management fees can be exempt from WHT in certain situations or subject to reduction in tax rates applicable, usually under fiscal incentives, or double taxation agreements.

Payments made to public entertainers and non-resident professionals who perform services in Singapore also are subject to a final tax of 15% on the gross income. For public entertainers, this appears to be a final tax unless they qualify to be taxed as Singapore tax residents. However, non-resident professionals may elect to be taxed at the prevailing tax rate for non-resident individuals of 20% on net income if this results in a lower tax cost. The WHT rate on payments to non-resident entertainers has been reduced to 10% from 22 February 2010 to 31 March 2015.

The WHT rates are shown in the following table.

| Recipient | Dividends (%) (1) | Interest (%) (2) | Royalties (%) (2) |
|---|---|---|---|
| Resident individuals | 0 | 0 | o |
| Resident corporations | 0 | 0 | 0 |

Notes

1. Singapore has no WHT on dividends over and above the tax on the profits out of which the dividends are declared. However, some treaties provide for a maximum WHT on dividends should Singapore impose such a WHT in the future.
2. The non-treaty rates (a final tax) apply only to non-residents who do not carry on business in Singapore or have a PE in Singapore. This rate may be further reduced by tax incentives.
3. Interest:
   a. Lower rate or exemption if received by a financial institution.
   b. Exempt if paid to the government.
   c. Lower rate or exemption if paid by an approved industrial undertaking.
   d. Exempt if paid by a bank and received by a bank.
   e. Exempt if paid to a bank but linked to a government loan agreement or paid to specific financial institutions/banks.
   f. Exempt if paid in respect of an approved loan or indebtedness.
4. Royalties:
   a. Royalties on literary or artistic copyrights, including film royalties, are taxed at the non-treaty rate.
   b. Lower rate for payments in connection with industrial, commercial, or scientific equipment.
   c. Lower rate for payments in connection with patents, designs, secret formulas/processes, or industrial, commercial, or scientific equipment/experience.
   d. Exempt if paid to the government.
   e. Exempt for approved royalties.
5. Treaties:
   a. Comprehensive treaty with Saudi Arabia applies from 1 January 2012. Prior to that, the treaty covers only international air transport.
   b. Treaty with Chile covers only international ship operations.
   c. Treaties with Hong Kong and the United States cover only shipping and air transport activities.
   d. Treaty applies from 1 January 2011.

## *Tax administration*

### *Returns*

Tax is computed for each tax year based on the income earned in the preceding year (the tax basis period). The tax basis period is the calendar year; however, for business profits, the accounting year would be adopted generally. The corporation files a return of income by 30 November, and the tax is assessed by the Comptroller of Income Tax. There is no fixed date for the issue of assessments.

### *Payment of tax*

Assessed tax is payable within one month after the service of the notice of assessment, whether or not a notice of objection to the assessment has been lodged with the tax authorities. Application may be made to the Comptroller to pay estimated tax liabilities on a monthly basis. However, the Comptroller is under no obligation to grant such an application.

Late payment of tax will attract penalties up to a maximum of 17% of the outstanding tax.

## *Other issues*

### *Adoption of International Financial Reporting Standards (IFRS)*

Companies incorporated in Singapore and Singapore branches of foreign companies are required by the Companies Act to prepare and present financial statements that comply with the Singapore Financial Reporting Standards (SFRS). In Singapore, the Accounting Standards Council (ASC) has the statutory authority to issue SFRS for adoption.

The SFRS is principally based on and substantially similar to the International Financial Reporting Standards (IFRS) that are issued by the International Accounting Standards Board (IASB). The SFRS will converge with IFRS by 2012 for use by listed companies. For unlisted companies, the development of IFRS for small and medium-sized entities is being observed and evaluated.

Companies are required to submit financial statements as part of their tax return filing. The IRAS generally accepts financial statements prepared for statutory filing, although companies that have been allowed to prepare their financial statements using standards other than SFRS, such as IFRS or the Generally Accepted Accounting Principles (GAAP) adopted by the United States, may be required to explain and/or account for any differences and make the necessary tax adjustments, if any.

In relation to financial instruments, the Income Tax Act was amended to align the tax treatment with the accounting treatment prescribed by SFRS 39 (Financial Instruments: Recognition and Measurement).

### *Sample corporate tax calculation*

Accounting period ended 31 December 2010 (year of assessment 2011).

| | SGD | SGD |
|---|---|---|
| Net profit before tax per accounts | | 5,857,500 |
| | | |

## Significant developments

### Recent political developments

On 10 October 2010, the Netherlands Antilles dissolved, and St. Maarten became an autonomous country within the Kingdom of the Netherlands. Prior to dissolution, the Netherland Antilles consisted of five islands: St. Maarten, Curaçao, Bonaire, Saba, and St. Eustatius.

While each of the islands will remain within the Kingdom of the Netherlands structure, the ties between the islands will be loosened. Defence and foreign affairs will remain within the province of the government of the Kingdom of the Netherlands. Also, the judiciary system will remain an integral part of the Kingdom of the Netherlands.

### Compliance with sound international fiscal standards

In recent years, St. Maarten, as part of the former Netherlands Antilles, has complied with international standards as set forth by the Organisation for Economic Co-operation and Development (OECD) and the European Union (EU). There is, for example, no distinction in the fiscal treatment of offshore and onshore taxpayers. Well-known incentives such as a participation exemption comparable to that applied in the Netherlands and Luxemburg apply to all taxpayers, as well. St. Maarten does not have bank secrecy laws, and the tax information exchange agreements (TIEAs) that in recent years have been concluded with several countries remain applicable to St. Maarten.

### Tax treaties

St. Maarten currently has tax treaties in effect with the Netherlands (including the Caribbean Netherlands), Aruba, Curaçao, and Norway. A double tax agreement (DTA) has been negotiated with Jamaica but has not yet entered into force.

Furthermore, TIEAs have been signed with several countries, including Australia, Canada, Denmark, Mexico, Spain, Sweden, New Zealand, and the United States. As a result, St. Maarten, as part of the former Netherlands Antilles, has been moved to the white list of the OECD Global Forum.

### Transitional legislation

While the offshore tax regime was abolished in 2001, qualifying offshore companies incorporated before 1 January 2002 may continue to apply the old regime until 2019, provided that certain conditions are met under transitional legislation.

## Taxes on corporate income

Resident corporations are taxed on worldwide income. Non-resident companies are taxed on the following St. Maarten-source income:

- Income attributable to a permanent establishment (PE).
- Income from real property situated in St. Maarten.
- Interest on loans secured by a mortgage on property situated in St. Maarten.

Capital gains are not differentiated from operating income and are subject to the same applicable rates. Corporations are taxed on their income as reflected in their profit and loss account, less certain deductible items.

Companies are generally taxed at a flat rate of 34.5%. Special minimum rates apply to the taxable income of certain companies:

| Type of company | Rate (%) |
|---|---|
| New industries and hotels | 2 |
| Land development companies | 2 |

### *Shipping business*

Shipping companies are subject to the general profit tax rate of 34.5% but may apply for the tonnage regime. If applicable, their profit is calculated based on the rates in the table below. If a shipping company applies the tonnage regime, the actual profits or losses are not taken into account, regardless of whether they are regular profits or capital gains.

The calculated profit based on the table below is subject to the general tax rate of 34.5%.

| Over (tons) | Not over (tons) | Profit per net ton (ANG*) |
|---|---|---|
| 0 | 10,000 | 2.00 |
| 10,000 | 25,000 | 1.35 |
| 25,000 | | 0.60 |

* Antilles guilders

### *Exempt companies*

*Please see the Tax incentives section for more information on tax exempt companies.*

### *Companies under transitional offshore rules*

Transitional rules distinguish three types of offshore companies.

- Offshore companies which, on the last day of the financial year that ended before 1 January 2002, had all (or almost all) investments in or revenues from portfolio investments, royalties, holding companies, finance companies, or technical support subject to tax rates of 2.4% to 3% (while capital gains and losses were not taken into account) will be grandfathered through the last day of the financial year of the company that starts before 1 July 2019.
- Offshore companies which, on the last day of the financial year that ended before 1 January 2002, had all (or almost all) their profit subject to tax rates of 4.8% to 6% or, under certain circumstances, 2.4% to 3% and which had a valid ruling with the tax inspector (e.g. trading companies, banks, captives commissions, and fee-earning companies) on the aforementioned date or for which a request for (extension of) such a ruling had been filed on that date will be grandfathered through the last day of the financial year of the company that starts before 1 July 2019.

- Offshore companies that, on the last day of the financial year that ended before 1 January 2002, had invested all (or almost all) investments in or revenues from real estate property or rights connected thereto, located outside the Netherlands Antilles. These revenues were, under the old offshore regime, exempt from tax. For profit tax purposes, these companies will be grandfathered through the last day of the financial year of the company that starts before 1 July 2019.

Specific rules are applicable to companies that were incorporated after 30 June 1999 but before 31 December 2001. These companies may also qualify for the aforementioned transitional rules provided that these companies have been active in a meaningful way. In principle, a company will not be considered to have been active in a meaningful way if the assets of the companies consist predominantly of deposits or receivables on shareholders or affiliated parties.

The grandfathering period continues until 2019.

## Corporate residence

Corporate residence is, in principle, determined by the place of incorporation. However, other factors may also determine residence. For example, a foreign company with effective management in St. Maarten is considered to be a resident. A company that has been established in St. Maarten will always be considered a resident of St. Maarten.

Offshore entities in St. Maarten must have a local managing director. This function is easily provided by one of the many trust companies established in St. Maarten.

### Permanent establishment (PE)

The definition of a PE in St. Maarten is generally in line with the OECD model.

### Transfer of legal seat

Legislation has been enacted under which a St. Maarten company is allowed to transfer its legal seat to another jurisdiction (if permitted under the laws of the outside jurisdiction) and a foreign company is allowed to migrate to St. Maarten.

## Other taxes

### Turnover tax

A 5% turnover/sales tax is levied on the revenue derived from services and deliveries rendered by an entrepreneur or company in St. Maarten. Note that non-resident service providers are also subject to this tax as of 11 February 2011.

A limited number of services and deliveries are exempt, such as:

- Exports.
- Certain basic food and other products.
- Electricity and water.
- Medical services.
- Services at the airport or in the harbour regarding imported or exported goods or goods in transit.
- Advisory and management services provided to or by offshore companies and offshore banks.

An entrepreneur liable to turnover/sales tax must file a declaration, with the Tax Inspectorate before the 16th day of the month following the month concerned, at the Tax Collector's office.

### *Property taxes*
There is no property tax in St. Maarten.

### *Transfer tax*
The transfer of immovable property located in St. Maarten is subject to a 4% transfer duty.

## *Branch income*

### *Branches operating in St. Maarten*
Tax rates on the profits of PEs are the same as for resident corporations.

There are specific rules for the PE of an insurance company. In that case, the company may elect to declare profit based on a percentage of premiums received by the PE, as well as premiums the company has received from insured residents and from insured risks in St. Maarten. The insurance company may also elect to declare a profit that is in the same proportion to total profit of the company as the aforementioned premiums to total premiums.

No tax is withheld on transfers of profits to the head office.

### *Branches of St. Maarten-based companies*
St. Maarten has adopted a definition of a branch (permanent establishment/permanent representatives) that is in line with the definition in the OECD Model Double Taxation Convention on Income and Capital.

The profits of a PE on Aruba, Curaçao or the Netherlands, including the Caribbean Netherlands, are tax exempt in St. Maarten based on the tax arrangement with the Kingdom of the Netherlands. In the case of a PE outside the Kingdom of the Netherlands (i.e. the Netherlands, Aruba, Curaçao, and St. Maarten), the income realised through the PE, after deduction of foreign taxes, is tax exempt. In the case of a foreign loss, this is not deductible.

Foreign real estate is always deemed to be part of a permanent establishment and, as such, is fully tax exempt.

## *Income determination*

### *Inventory valuation*
Both the last in first out (LIFO) and first in first-out (FIFO) methods of inventory valuation are permitted, provided the chosen method conforms to sound commercial practice. Conformity of book and tax reporting is not required. However, occasions or situations for differences are very rare.

### *Capital gains*
Capital gains or losses are, in principle, considered ordinary income and subject to standard corporate rates. An exemption from profit tax is granted for advantages

(dividends and capital gains) from a qualifying participation *(see Dividend income below)*.

Under the transitional regime for offshore companies (investment, holding, finance, and patent holding companies), capital gains and losses are tax exempt.

### *Dividend income*

In general, a full participation exemption applies to all local as well as foreign participations for dividends as well as for capital gains. However, it is now required that dividends be derived from an active participation (non-portfolio investment) or a participation that is subject to tax.

Expenses incurred in connection with a qualifying participation (including capital losses) are not deductible, unless it can be demonstrated that these are indirectly incurred to realise profits that are subject to tax in St. Maarten.

#### Non-portfolio investment clause

A participation is deemed to be active if the gross income of that participation consists of not more than 50% of dividends, interest, or royalties received other than from an enterprise of that participation.

#### Subject-to-tax clause

A participation is deemed to be subject to tax if it is subject to a tax rate of at least 10%.

If at least one of these clauses has been met, the 100% participation exemption will apply. If none of these clauses are met, the participation exemption is limited to 70% of dividends. Consequently, the dividends would be subject to an effective tax rate of 10.35% (30% x 34.5% regular tax rate).

The 100% exemption also applies to income other than dividends, such as capital gains derived from qualifying participations.

#### Immovable property

The aforementioned clauses do not apply to dividends from a participation that (almost) exclusively (directly or indirectly) holds immovable property. The 100% participation exemption applies to these dividends.

#### Definition of dividend

A dividend is defined as a distribution of profits on shares or profit-sharing notes, paid from statutory profits or profit reserves. Dividends shall not be considered payments for the purchase of own shares or profit-sharing notes, distributions on shares upon liquidation, repayment of paid-up capital, or the distribution of bonus shares.

#### Minimum cost-price threshold for participations

The minimum cost-price threshold for shareholdings, profit-sharing notes, or voting rights of less than 5% is ANG 890,000.

### *Foreign income*

A St. Maarten corporation is taxed on foreign interest and other income as earned, and on foreign dividends when received. Undistributed income of foreign subsidiaries is not taxable.

The profit of a PE is tax exempt, and foreign losses are not deductible.

## Deductions

### Depreciation and amortisation
Depreciation of tangible fixed assets, excluding land, is taken over the estimated useful life of the asset. The depreciable base includes purchase price, customs duties, shipping costs, and installation costs, less residual value, if any. The straight-line method is customary, but the declining-balance method is also acceptable. In addition, an accelerated deduction of one-third of the assets' depreciable basis may be taken. The assets' remaining cost basis (two-thirds) is depreciated using one of the acceptable methods.

The cost basis of certain intangible assets, such as patents, trademarks, and copyrights, can be amortised over their expected useful lives. Goodwill and other intangibles resulting from the excess of purchase price over the cost basis of assets purchased are amortised over three to five years.

### Charitable donations
Charitable donations to qualifying entities within the Kingdom of the Netherlands may be deducted to the extent that they exceed 1% of net income and ANG 100 after utilisation of tax loss carryforwards. The maximum deduction is 3% of net income.

### Taxes
Taxes, other than the corporate tax itself, incurred in the course of doing business are deductible.

### Fines and penalties
Fines and penalties are not deductible in cases where they have been imposed by a criminal court in St. Maarten, or have been paid to avoid prosecution, and in cases of administrative fines imposed by a Government agency in St. Maarten.

### Bribes, kickbacks, and illegal payments
Expenses that are connected to a criminal offence for which a taxpayer has been convicted are not deductible. Bribes paid to public servants and politicians are not deductible.

### Net operating losses
Losses may be carried forward for a period of ten years. Start-up losses during the first four years for companies having tax holidays may be carried forward indefinitely. Carrybacks are not permitted.

### Payments to foreign affiliates
The Corporate Tax Act provides for specific limitations for deduction of interest in certain cases of restructuring and refinancing involving the creation of artificial flows of interest payments to persons who are tax exempt or subject to lower taxes in their jurisdiction.

## Group taxation

### Fiscal unity
The Corporate Tax Act provides for fiscal unity treatment for corporate profit tax purposes. Resident companies with wholly owned resident subsidiaries could qualify for this regime. The parent company is entitled to submit one consolidated income tax

return on behalf of the entire fiscal unity group. As a result, only the parent company is assessed.

Within certain limitations, losses of one company can be offset against the profits made by another company in the fiscal unity group. No profits need to be recognised on inter-company transactions, as these are disregarded for tax purposes. The fiscal unity applies for profit tax purposes only; the participating entities remain separate and identifiable under civil law.

Fiscal unity relief is confined to companies organised under the laws of St. Maarten, the Netherlands, Aruba, or Curaçao. The companies which invoke this relief must have their place of management in St. Maarten.

On the basis of the non-discrimination provision of a relevant tax treaty, entities established under the laws of a tax treaty party may also be admitted to the fiscal unity regime provided that they are resident in St. Maarten.

### *Transfer pricing*

There are no specific regulations with regard to transfer pricing. However, based on case law, businesses can be required to show that in case of intra-company transactions, these transactions have been made at arm’s length.

### *Thin capitalisation*

In cases where a company receives a loan from an associated exempt private limited liability company (Besloten Vennootschap or BV), and the amount of the loan is more than three times the net equity of the company, the interest on the loan is not deductible for the part that is more than three times the net equity.

## *Tax credits and incentives*

### *Foreign tax credit*

A tax credit applies to income from abroad that has been subject to tax at source or to another tax on income. The tax credit is allowed for the income tax levied abroad, but shall not exceed the St. Maarten profit tax that is attributable to that foreign income.

### *Inward investment and capital investment*

There are tax incentives or holidays for the establishment of new economic enterprises and hotels with a predetermined minimum employment and capital investment. Special provisions relate to the taxation of shipping and insurance companies.

### *Investment allowance*

For a minimum investment of ANG 5,000, an 8% investment allowance on acquisitions and improvements (for new buildings, 12%) is permitted as a deduction from taxable profit in the year of investment and in the subsequent year, for businesses operating in St. Maarten.

### *Accelerated depreciation and tax rollover reserve*

An accelerated deduction of one-third of the assets’ depreciable basis may be taken. If a profit results at the time of sale of capital assets with the intention to replace that asset, the profit may be placed in a tax rollover account.

### *Tax exempt company*
It is possible to elect tax-exempt status for a BV. To qualify for the exemption, a number of conditions must be met, including (but not limited to) the disclosure of beneficiaries, management, financials, and the activities (only investment and financing activities) of the company. Recently, the licensing of intellectual and industrial property rights and other comparable property and usage rights have been added to the list of allowed activities.

Another condition has been added that requires that no more than 5% of the revenues of the exempt company consist of dividends from subsidiaries that are not subject to a tax regime comparable to that of St. Maarten. A profit tax regime is comparable to that of St. Maarten if the foreign tax regime provides for a profit tax rate of at least 15% (50% of the old Netherlands Antillean rate, excluding island surcharges).

The subject-to-tax requirement is also met if the foreign tax regime appears on a list of comparable tax regimes. The list that has been issued includes all EU and OECD member states and all jurisdictions with which St. Maarten has a tax treaty. According to the list, the subject-to-tax requirement is also met in the case of a jurisdiction that is included in the white list issued by the OECD, provided that no special tax regime is applicable.

#### Independent expert
Currently, an independent expert is required to certify that the exempt company meets the requirements for exempt status. If more than 5% of the revenues of the exempt company consist of dividends from subsidiaries that are not subject to a tax comparable to that of St. Maarten, the independent expert must inform the Inspectorate of Taxes. The inspector notifies the company that it no longer meets the requirements for exempt status. The exempt status is then terminated starting the first day of the year following the year in which the notification becomes final.

### *Ocean shipping companies*
Ocean shipping companies are taxed on a fixed profit per net ton of ANG 0.60 up to ANG 2.00 (or per 10 net ton in case of management and control). International aviation companies may apply a reduced tax rate against 80% of their profit, as their profits are deemed to be gained outside of St. Maarten. As a result, the overall effective tax rate is 9.66%.

### *New industries and hotels*
New industries and hotels are granted partial exemption from profit tax and a minimum 2% tax rate for a period of five to 11 years. A minimum investment is required. Losses incurred during the first four years of operations may be used to offset taxable income for an indefinite period of time.

### *Land development companies*
Land development companies are granted a tax holiday. They are exempt from tax on profits realised on the sale of the developed land. A minimum investment of ANG 1 million is required. Activities should be expected to enhance the economic development of St. Maarten.

### *Private foundations*
Private foundations are exempt from St. Maarten profit tax, and their distributions are exempt from St. Maarten gift tax, as are contributions of assets to the foundation by a non-resident. Gift tax in the contributor's country may be applicable.

The ‘private’ foundation is a variant of the long-existing ‘common’ foundation. The most important difference is that the purposes of a common foundation may not include making distributions (other than distributions of an idealistic or social nature). This restriction does not apply to private foundations, whose purpose may include making distributions to the founders and others. A private foundation may not run a business or enterprise for profit. Acting as a holding company or investment company is not considered running a business. The private foundation is intended to be an alternative to the Anglo-Saxon trust, especially in civil law jurisdictions.

### Mergers, split-ups, and re-incorporations

In cases of a business merger, relief is granted under certain circumstances. Although there is no specific provision in the Corporate Tax Act with regard to legal mergers, legal split-ups, and re-incorporations, the Tax Inspectorate has announced that when certain conditions are met, a tax facility also applies in these cases.

## Withholding taxes

Although a dividend withholding tax (WHT) was approved in 1999, it has been decided that for the foreseeable future this tax will not enter into force. If it is decided that the tax will enter into force, there is a mandatory transitional period during which the tax will not be applicable to legal entities resident at that time in St. Maarten.

### Tax treaties

St. Maarten currently has tax treaties in effect with the Netherlands, Aruba, Curaçao, and Norway. A DTA has been negotiated with Jamaica, but this has not entered into force yet. Furthermore, TIEAs have been signed with several countries including Australia, Canada, Denmark, Mexico, Spain, Sweden, New Zealand, and the United States. As a result, St. Maarten, as part of the former Netherlands Antilles, has been moved to the white list of the OECD Global Forum.

### Tax arrangement for the Kingdom of the Netherlands (TAK)

As part of the Kingdom of the Netherlands (TAK), St. Maarten is party to a federal tax agreement with the Netherlands, Aruba, and St. Maarten. Subject to this treaty, dividends, interest, and royalties paid out to a St. Maarten company may qualify for reduced rates of WHT in the subject countries.

Dutch dividend WHT is 15% if the St. Maarten company owns less than 25% of the Dutch company. In St. Maarten, only 5% of these dividends are taxed, at a rate of 34.5%, which results in an effective profit tax rate of 1.725%.

If the St. Maarten company’s interest is 25% or more, Dutch WHT can be reduced to 8.3%. This tax is then paid, under a special procedure, to the St. Maarten tax authorities. These dividends are fully exempt from profit tax in St. Maarten.

Capital gains derived from shareholdings in Netherlands’ corporations are fully exempt from profit tax in St. Maarten, provided that the shareholding amounts to at least 25% interest in the corporation. If the shareholding amounts to less than 25%, the capital gain is tax exempt for 95%.

The WHT regime in the TAK also applies to the old St. Maarten offshore companies.

The TAK is to be revised.

## Tax administration

### Returns

Profit tax is levied by way of a self-assessment system. Returns are to be filed on a calendar-year basis. Non-resident corporations may file their returns based on a calendar year basis or on a different book-year. On request, this may also apply, for example, when a resident company is the subsidiary of a foreign parent company (i.e. only a local company must request for a different tax year end).

A provisional return must be filed within three months after the end of the book-year. A final return must be filed within six months after the end of the book-year.

### Payment of tax

Payment is to be made at the time of filing and in a lump sum on the basis of the self-assessment.

In general, at the time of filing the provisional return, an amount equal to the profit tax of the previous year must be paid; the remaining balance due for the year for which the return is filed must be paid at the time of filing the final return.

For example, if the tax due for the year 2009 was 100, then at the time of filing the provisional return for 2010, that same amount must be declared and paid. If there is reason to believe that the amount for the year 2010 will be lower than for 2009, the estimated lower amount may be paid at the time of filing the provisional return, upon request.

At the time of filing the final return for the year 2010, the balance due must be paid; or if the total amount is less than the amount already paid up, a repayment will follow.

### Statute of limitations

A reassessment can be imposed until five years after the tax year. In cases where the tax payer is considered to be in bad faith, a reassessment can be imposed until ten years after the tax year.

## Other issues

### Mergers

The Corporate Tax Act provides for a tax facility for business mergers. In a business merger, a company acquires all or a substantial part of the trade or business of another company with a view towards combining the business operations of the two companies into a permanent financial and economic organisation. If the business is transferred as part of a business merger, the gains realised by the transferor are not subject to profit tax if certain conditions are met.

Although there is no specific provision in the Corporate Tax Act with regard to legal mergers, legal split-ups, and re-incorporations, the Tax Inspectorate has announced that when certain conditions are met, a tax facility also applies in these cases.

### *Exchange controls*

In general, exchange control regulations are very liberal for offshore companies. Offshore companies established in St. Maarten can obtain non-resident status for exchange control purposes, which basically provides for total exemption from exchange controls. Onshore companies are subject to slightly stricter rules. These companies are subject to a licence fee of 1%.

# *Slovak Republic*

## *Significant developments*

The tax legislation in the Slovak Republic (Slovakia) has not been significantly amended recently. Nevertheless, the legislation is subject to frequent amendments and new official interpretations. Therefore, it is advisable to contact PwC Bratislava for up-to-date information. The latest amendment recently approved by the Slovak Parliament is effective from 1 January 2011. Thus, the information included in this summary applies from 1 January 2011 unless otherwise stated.

## *Taxes on corporate income*

As a member state of the Organisation for Economic Cooperation and Development (OECD), the Slovak Republic's system of corporate taxation generally follows OECD guidelines and principles.

Slovakia has a flat corporate income tax (CIT) rate of 19%, and does not have local, state, or provincial CIT.

## *Corporate residence*

A company is a resident in the Slovak Republic if it has its registered seat or effective place of management in the Slovak Republic.

### *Permanent establishment (PE)*

A foreign company may create a PE if (i) its employees (or persons working for it) are present and providing services in the Slovak Republic on behalf of the foreign company where this activity is carried out through a permanent place of business, (ii) the employees conclude and negotiate agreements on the foreign entity's behalf, or (iii) the foreign entity establishes a building site within the territory of the Slovak Republic.

## *Other taxes*

### *Value-added tax (VAT)*

A basic VAT rate of 20% applies to all taxable supplies, with certain exceptions. Medical products and printed materials have a VAT rate of 10%. Exempt supplies without credit entitlement include postal services, financial and insurance services, education, public radio and TV broadcasting services, health and social services, the transfer and leasing of real estate (with exceptions), and lottery services. There are also other VAT-exempt transactions without credit entitlement, as well as exempt taxable supplies with credit entitlement.

VAT grouping is possible if certain conditions are met.

### *Stamp taxes*
There are no special stamp taxes in Slovakia.

### *Excise tax*
Excise tax is charged on the release to free tax circulation or import of tobacco products, wine, spirits, beer, and mineral oil. In addition, effective 1 July 2008, excise tax is also charged on electric energy, coal, and natural gas.

### *Immovable property tax*
Immovable property tax, which is divided into land tax, building tax, and tax on apartments, is governed by the Act on Local Taxes. Immovable property tax is calculated based on the area of the real estate, its location, and its type, as well as the tax rate of each self-governing region.

Real estate transfer tax was abolished effective 1 January 2005, and there are no stamp duties or similar taxes on share or other property transfers, although small administrative fees are payable to register such transactions.

### *Transfer taxes*
Transfer taxes are not applicable for Slovakia.

### *Turnover taxes*
Turnover taxes are not applicable for Slovakia.

### *Registration taxes*
Registration taxes are not applicable for Slovakia.

### *Customs duties*
- Goods imported from non-EU countries are subject to import customs clearance.
- Goods exported from the EU customs territory have to be declared for export customs clearance.
- The person responsible for paying the customs debt is the declarant.
- The declarant is the person making the customs declaration in his own name, or the person in whose name the customs declaration is made.
- The custom declaration should be made in the prescribed form and manner (in writing or by another action).
- Import or export duties are customs duties and other charges payable on the import or export of goods (import VAT, excise duties, and charges under the common agricultural policy).
- The customs authorities require declarants to provide a deposit to cover the customs debt in the event that a customs debt arises. Such a deposit may be in cash, or may be provided by a guarantor.

To communicate with the customs offices, each person must have an Economic Operator Registration and Identification Number (EORI), which is registered by the customs authorities on request. EORI registration is mandatory for customs clearance.

The European customs rate, customs nomenclature and customs tariffs are set by EU legislation.

### Motor vehicle tax
Vehicle tax applies to vehicles that are used for business purposes in the Slovak Republic, regardless of where they may be registered. The taxpayer is the entity that uses the vehicle for business purposes. The tax rate depends on engine capacity, vehicle size, and the decision of each self-governing region.

### Inheritance tax and gift tax
Inheritance tax and gift tax were abolished as of 1 January 2004.

## Branch income

A foreign company may trade through a Slovak branch, which must be registered in the Slovak Commercial Register. The taxable income of the branch may not be lower than that which an independent entity (e.g. a Slovak company) would achieve from carrying out similar activities under similar conditions. If the branch's taxable income cannot be assessed based on its income less costs, as adjusted for tax purposes, certain other methods may be used. A taxpayer may ask the tax authorities in writing to approve such a method. A Slovak tax resident entity is able to deduct from its tax base a tax loss made by its taxable PE (e.g. branch) outside Slovakia.

## Income determination

The tax base is generally the accounting result as determined under Slovak statutory accounting rules, adjusted for tax purposes. Under the transfer pricing rules, the tax base should be increased by the difference in prices charged between a Slovak entity and its foreign related parties compared with those that would be charged between independent parties. Slovak tax law generally reflects OECD rules with respect to transfer-pricing methods.

### Capital gains
Capital gains from the disposal of assets are included in the CIT base. The tax treatment of capital losses depends on the type of asset on which they arose.

### Dividend income
Dividends paid out of profits earned on or after 1 January 2004, and liquidation surpluses and settlement amounts to which shareholders became entitled on or after 1 January 2004, are not subject to tax. Income received by inheritance or donation, and income from acquiring new shares due to an increase in share capital from retained profits or mergers and demergers within Slovakia or the European Union (EU), is also not subject to tax.

### Interest and royalty income
Slovak-source interest income earned by taxpayers with limited as well as unlimited tax liability is subject to withholding at a flat tax rate of 19%, except where the recipient of the interest or the yield is an investment fund, supplementary pension fund, bank or the branch of a foreign bank, or the Slovak Export-Import Bank.

Royalty income is subject to the 19% corporate flat tax rate.

Interest and royalty income is also exempt if it is paid by a Slovak payer to a recipient who is a tax resident in the European Union and is a beneficial owner of this income, provided that for 24 months before the payment:

- the payer owns at least 25% direct shareholding of the recipient of the income
- the recipient owns at least 25% direct shareholding of the payer of the income, or
- a third entity resident in European Union owns at least 25% direct shareholding on both the payer and the recipient of the income.

### *Unrealised foreign exchange gains/losses*
The taxpayer may decide whether to include unrealised foreign exchange differences relating to unsettled payables and receivables in the tax base in the tax period when they are accounted for or in the tax period when they are realised. However, the decision to include these differences when they are realised must be made in writing to the Tax Office before the start of the tax period. Any subsequent decision to revert back to including these differences must be made before the end of the tax period concerned.

### *Foreign income*
Companies resident in the Slovak Republic are taxed on their worldwide income, including income of its foreign branches. Credit relief is available for foreign tax paid under most of Slovakia's double tax treaties (DTTs). Alternatively, exemption of foreign income taxed abroad from taxation in Slovakia may apply.

## *Deductions*

### *Depreciation and amortisation*
Tax depreciation is calculated on an asset-by-asset basis using a straight-line or reducing-balance method at statutory rates, and is generally available for expenditure incurred on tangible fixed assets. Some types of assets are excluded from depreciation (i.e. land, artwork, and national monuments).

Tangible fixed assets are classified into tax depreciation groups to which different depreciation periods apply, as follows:

| Depreciation group | Assets | Depreciation (years) |
|---|---|---|
| 1 | Motor vehicles, office machines and computers, and tools and implements | 4 |
| 2 | Engines, most production line equipment, furniture | 6 |
| 3 | Buildings made of metal, turbines, air-conditioning systems, and ships | 12 |
| 4 | Buildings of a permanent nature | 20 |

Taxpayers do not have to depreciate an asset every year. Tax depreciation may be interrupted in any year and continued in a later year without a loss of the total tax depreciation available.

A lessee can depreciate a tangible fixed asset held under a financial lease. For tax purposes, the depreciation period equals the leasing period, and the tax depreciation base equals the acquisition value of the leased asset without VAT and financing costs, plus expenses related to acquisition of the leased asset that the lessee incurred before the asset was put into use.

The value to be used as the basis for tax depreciation depends on how the asset is acquired and is usually based on one of the following:

- Acquisition costs (i.e. the price for which the asset was acquired).
- The taxpayer's own costs incurred, if the asset is acquired or produced internally.

Intangibles are amortised for tax purposes in line with their accounting amortisation (i.e. over the useful life of the intangible asset).

### *Goodwill*

Amortisation of purchase goodwill, including the goodwill on purchase of a business as a going concern, is tax deductible. Other goodwill is not tax deductible.

For goodwill created at the contribution of business as a going concern or goodwill created at a merger, the tax deductibility of the goodwill depends on the method of tax treatment of this reorganization. If the reorganization is performed for tax purposes in fair market values, the goodwill created will be tax effective. On the other hand, if the reorganizations are made in original values, the goodwill created is not tax effective.

### *Bad debt provisions*

Provisions for unsecured receivables from loans created by banks, and bad debts of regular commercial companies, are fully tax deductible (subject to certain conditions) once the debt has been overdue for more than 1,080 days (20% of the bad debt is tax deductible when it has been overdue for more than 360 days, and 50% after 720 days), provided certain conditions are met.

### *Charitable contributions*

Charitable contributions are treated as gifts which are not tax deductible.

### *Pension expenses*

Contributions to supplementary pension savings made by the Slovak employer on behalf of the employee, up to 6% of the gross salary of the employee participating in these plans, are tax deductible.

### *Start-up expenses*

Start-up expenses are tax deductible in the period when incurred.

### *Fines and penalties*

Contractual penalties and late payment interests are generally tax deductible on a cash basis.

### *Non-deductible expenses*

Expenses are generally tax deductible if incurred to generate, secure, and maintain the entity's taxable income. However, certain costs are specifically not tax deductible. These include entertainment costs, statutory penalties and fines, various provisions, and certain expenses in excess of statutory limits (e.g. employee travel expenses and meal allowances).

### *Net operating losses*

A company or branch may carry forward and utilise a tax loss for a period of up to five years following the year in which the loss arose, and for up to seven years for tax losses reported after 31 December 2009. Each year's tax loss should be considered separately, and can be utilised over its own five or seven-year period.

Carryback of losses is not available in Slovakia.

## Group taxation

There is no concept of group CIT in the Slovak Republic. Each company in a group is taxed individually.

### Treatment of inter-company items

Dividends are not treated as taxable costs if they are paid out of the profit after tax earned since 2004.

Royalties, commissions, and other payments paid to foreign related parties are tax-deductible, provided they would be taxable if paid to a third party and if the charges are in line with transfer pricing rules.

### Transfer pricing

Under the transfer pricing rules, prices in transactions between a Slovak company and its foreign-related parties should be at arm's length, which means the prices should be at rates similar to those that would be charged between unrelated parties for the same or similar transactions under comparable conditions. Although the OECD Transfer Pricing Guidelines were formally not implemented, these are usually followed for determination of arm's-length prices.

If transactions between the related parties are not made at arm's length, and this results in a reduction in the Slovak entity's corporate tax base, then the tax authorities can adjust the corporate tax base to that which it would have been achieved if arm's-length prices had been used.

#### Transfer pricing documentation

All Slovak taxpayers must keep sufficient transfer pricing documentation to justify prices charged by or to their foreign related parties. The Slovak Ministry of Finance has issued a guideline setting out detailed requirements for transfer pricing documentation (the Guideline) for entities which are obliged to prepare their financial statements under IFRS.

The EU code of conduct was formally not implemented. However, the Guideline requires maintaining transfer pricing documentation in a form generally in line with the EU standards.

Slovak tax inspectors may require transfer pricing documentation during a tax inspection. Without such documentation, transfer pricing adjustments (increased tax base) are much more likely to be imposed. In addition, entities reporting under IFRS may be specifically penalised for not keeping transfer pricing documentation or for non-compliance of their documentation within the Guideline requirements.

### Thin capitalisation rules

There are no thin capitalisation rules in the Slovak Republic.

### Controlled foreign company (CFC) regime

There is no CFC regime in place in the Slovak Republic.

## Tax credits and incentives

There are several types of investment incentives potentially available, including corporate tax credits, discounts on the price of publicly owned real estate, and financial support for creating jobs or for training employees. All of these are treated as state aid.

Various conditions must be met in order for a company to qualify for state aid. These include a minimum amount of investment in fixed assets, the amount depends mainly on the type of project and where it is located.

### Investment incentives

Investment incentives (including tax credits) are potentially available for projects in the following areas:

- Industry.
- Technology centres.
- Shared services centres.
- Tourism.

The granting of a tax relief is subject to approval of the Slovak authorities. If certain conditions are met, a taxpayer may apply tax relief in the five subsequent years following the tax period in which the relief was granted.

### Research and development (R&D) incentives

R&D incentives currently available under Slovak law are:

- Subsidies for research and development projects from the state budget.
- Income tax relief at the amount incurred for R&D.

Types of projects which can be granted investment incentives include:

- Fundamental research projects.
- Experimental development projects.
- Applied research projects.
- Feasibility studies.
- Protection of intellectual and industrial property.
- Staffing of research and development functions.

## Withholding taxes

Mainly, the following payments are subject to withholding tax (WHT) when made by Slovak companies to foreign parties. However, a DTT may reduce or eliminate the rate:

| Payments | WHT (%) |
|---|---|
| Management fees for services provided in the Slovak Republic | 19 |
| Royalties* | 19 |
| Interest on loans and deposits** | 19 |

* Royalties paid to related EU-resident companies are not subject to WHT if certain conditions are met.

** Interest paid to related EU-resident companies is not subject to WHT if certain conditions are met.

# Slovak Republic

Dividends paid out of profits arising in 2004 and later years are not subject to Slovak WHT.

WHT should be paid to the Tax Office no later than 15 days from the end of the calendar month following that in which the payment was made. The withholding obligation lies with the Slovak resident taxpayer. The taxpayer must also notify the tax administrator of the tax withheld and transferred. If the tax is not properly withheld, the unpaid tax becomes the Slovak tax resident's tax liability, and a penalty may be assessed.

### *Double tax treaties*

This table highlights countries with which Slovakia has entered into DTT.

| Recipient | Interest (%) | Royalties (%) |
|---|---|---|
| Australia | 10 | 10 |
| Austria | 0 | 0/5 (1) |
| Belarus | 0/10 (3) | 5/10 (1) |
| Belgium | 0/10 (2a) | 5 |
| Bosnia and Herzegovina | 0 | 10 |
| Brazil | 0/10/15 (2, 3) | 15/25 (1b) |
| Bulgaria | 0/10 (3) | 10 (6) |
| Canada | 0/10 (14) | 0/10 (1) |
| China, P.R. | 0/10 (4) | 10 |
| Croatia | 10 | 10 |
| Cyprus | 0/10 (3) | 0/5 (1) |
| Czech Republic | 0 | 0/10 (1) |
| Denmark | 0 | 0/5 (1) |
| Egypt (17) | N/A | N/A |
| Estonia | 0/10 (15) | 10 |
| Finland | 0 | 0/1/5/10 (8) |
| France | 0 | 0/5 (1) |
| Germany | 0 | 5 |
| Greece | 0/10 (3) | 0/10 (1) |
| Hungary | 0 | 10 |
| Iceland | 0 | 10 |
| India | 0/15 (4) | 30 |
| Indonesia | 0/10 (3) | 10/15 (5) |

| United Kingdom & North Ireland | 0 | 0/10 (1) |
| United States | 0 | 0/10 (1) |
| Uzbekistan | 10 | 10 |
| Vietnam | 0/10 (3) | 5/10/15 (16) |

Notes

1. The lower rate applies to cultural royalties.
   a. In the case of Romania, the rate of 10% applies to royalties in respect of the use of trademarks, patents, or know-how. The higher rate applies in any other cases.
   b. In the case of Brazil, the rate of 25% applies to royalties for the use of trademarks. The lower applies in other cases.
2. The lower rate applies to interest on loans and credits granted by a bank for at least ten years in connection with the sale of industrial equipment; with the study, installation, or furnishing of industrial or scientific units; or with public works.
   a. The zero-rate applies to interest on certain commercial debt-claims, loans guaranteed by public entities for export promotion, accounts/loans between banks/public institutions of the two states, and interest paid to another state or political subdivision of a local authority.
3. The zero-rate applies if the interest is received by the government/the central bank/other state institutions *(see the respective treaty for exact wording)*.
4. The zero-rate applies if the interest is received by the government or the central bank or other state institutions, or if the receivables on which the interest is paid are guaranteed/financed/indirectly financed by the government/governmental institutions *(see treaty for exact wording)*.
5. The rate of 10% applies to royalties for cinematography, TV broadcasting, and radio broadcasting, and to giving up rights related to royalties. The higher rate applies in other cases.
6. This rate also applies to payment for services.
7. Withholding tax is 0% on bank loans.
8. The zero-rate applies to copyrights, 1% applies to finance lease of equipment, 5% applies to equipment rental and royalties for software, cinematography, and TV and radio broadcasting, 10% applies to payments for the use of trademarks and know-how.

S

9. The rate of 2% applies to state bonds, obligations, and loans insured or guaranteed by the National Bank of Slovakia/Israel, Slovak Society for Insurance of Foreign Credits and Loans, or Israel Society for Insurance of Foreign Trade; 5% applies if interest is received by a financial institution; and 10% applies in all other cases.
10. Slovakia can apply the rate of 5% to royalties for the use of trademarks, patents, or know-how paid from Switzerland to Slovakia, if Switzerland does not apply the 10% rate.
11. The zero-rate applies to interest on loans and credits in connection with the sale of industrial, business or scientific equipment, or the sale of goods.
12. The zero-rate applies if the interest received is related to loans (monetary or non-monetary) provided to the government of the other contracting state corporation or any other institution with state shareholding or to loans provided to a bank institution under a governmental approval.
13. The zero-rate applies to copyrights.
14. The zero-rate applies to interest received by a resident of one state in respect of indebtedness of the other state government or political subdivision/local authority, or in respect of a loan made/ guaranteed by the other state government in respect of imports/exports.
15. The zero-rate applies if the interest is received by the government, the central bank, or other state institutions, or if the receivables on which the interest is paid are guaranteed/financed/indirectly financed by the government/governmental institutions *(see treaty for exact wording).*
16. The rate of 5% applies to royalties for the use or the right to use of patent, draft or model, plan, confidential formula or procedure, for information related to industrial or scientific experience and for the use or the right to use of an industrial, business or scientific device. The rate of 10% applies to royalties for the use or the right to use of trademark or for information related to business experience. The rate of 15% applies to royalties, other than those stated above.
17. Slovakia is waiting for Egypt to announce its approval of DTT.
18. DTT between Slovakia and Libya is effective as of 21 June 2010.
19. Slovakia and Switzerland signed the Protocol to a DTT on 8 February 2011, which is not ratified yet. Based on this Protocol, the interest rate will be maximum 5%. Industrial royalties are subject to 10%, but the potential reduction of the rate is in case the royalties are paid within European Union, and entities are considered to be related companies with direct share exceeding 25% for more than 24 months, which is in accordance with the EU Directive on interest and royalty payments made between associated companies.

## *Tax administration*

### *Returns*

The standard fiscal year is a calendar year, but a Slovak entity may opt to change this to a different 12-month period. A corporate tax return must be filed together with the entity's financial statements within three months following the fiscal year-end. A three-month extension to the filing deadline may be used. Also, if part of the income to be reported in the tax return is from sources abroad, the taxpayer may extend the filing deadline by up to six months. To extend the filing deadline, the taxpayer has to notify the Tax Office before the normal filing deadline. After notification, the deadline is automatically extended.

### *Payment of taxes*

The balance of tax due for a fiscal year is payable by the filing deadline.

Advance payments of corporate tax must be paid monthly or quarterly during the current tax period. Installments are usually based on the last known tax liability of the entity. It is not necessary to pay tax advances if the last tax liability did not exceed 1,659.70 euros (EUR). When the tax return for the preceding tax period is filed, and the final tax liability is known, any outstanding tax is paid, and a new schedule for paying advances for the current year is made.

### *Statute of limitations*

A tax may not normally be assessed or additionally assessed more than five years (ten years when DTT treaty was applied, including transactions with foreign related parties) after the end of the year during which the obligation to file a tax return arose, or during which the taxpayer was obliged to pay the tax. If a tax inspection is undertaken within this five-year period, another five-year period commences from the end of the year in which the taxpayer was notified of this action.

If a taxpayer utilises a tax loss reported as of 2010, a tax or additional tax cannot be assessed more than seven years after the end of the year in which the obligation to file a tax return in which a taxpayer reported the tax loss arose.

However, tax may be assessed, or additionally assessed, no later than ten years after the end of the year during which the obligation to file a tax return arose, or during which the taxpayer was obliged to pay the tax.

## *Other issues*

### *Reserve fund*

When a joint-stock company is incorporated, it must create a reserve fund of at least 10% of its share capital. The statutory reserve fund must be increased annually by an amount set out in the company's Articles of Association, but not less than 10% of its net profit, up to a total of 20% of the share capital.

A limited liability company must create a reserve fund following the first year in which it reports a profit, at the latest. The minimum contribution is then 5% of the net profit each year (or more if specified in the company's Articles of Association) up to a total of at least 10% of the company's share capital.

A branch of a foreign company is not required to set up a reserve fund.

A reserve fund may be used to cover prior year losses of the company, and, in certain other limited situations, but it is not distributable.

### *Business combinations*

Two alternative tax treatments may be used for business combinations, including in-kind contributions to a company's share capital, mergers, and demergers.

Under the first alternative, the taxpayer should value assets for tax purposes using their current market values, and the revaluation difference must be reflected in the appropriate company's tax returns within seven years of the transaction.

Under the second alternative, the taxpayer should continue to use the original tax book values of the assets, and revaluation difference is not taxable/tax deductible.

When selling a business, the purchaser must include goodwill or negative goodwill, acquired as part of the purchase, in its tax base within seven tax periods.

### *International Financial Reporting Standards (IFRS) adoption*

Slovakia has adopted most of the principles of IFRS in its accounting law. However, there are still some differences between IFRS and Slovak accounting standards.

### *Obligation to prepare statutory financial statements according to IFRS*

Financial institutions (banks, insurance companies, etc.) must prepare their statutory financial statements according to IFRS. In addition, a company which fulfils two or more of the following conditions, in two consecutive accounting periods, must prepare its statutory financial statements according to IFRS:

- The total value of assets is more than EUR 165,969,594.
- Net turnover exceeds EUR 165,969,594.
- The average number of employees in the individual accounting period exceeds 2,000.

If the Slovak taxpayer is obliged to prepare its financial statements under IFRS, the tax base is derived from either:

- the profit before tax under IFRS, adjusted for tax purposes using the 'IFRS Tax Bridge' issued by the Slovak Ministry of Finance or
- the profit before tax under Slovak statutory accounting standards.

## Significant developments

### Amendments to corporate taxation

The Slovene Corporate Income Tax (CIT) Act, which became effective on 1 January 2007, was amended once during 2010.

The amendments, which are summarised below, aim to reduce the tax burden on businesses during the global economic downturn, to encourage employment of certain categories of people, and to facilitate investments in research and development (R&D).

**Tax relief for investments in the Pomurje region**

In 2010, a new decree came into effect that enables entities based in the Pomurje region of Slovenia to benefit from additional employment incentives and additional tax relief for investments. These extra benefits are available from 2010 to 2015. As a result, provided certain conditions are met, entities with their seat in Pomurje are entitled to a 70% tax allowance for investments in equipment and intangible assets as well as to certain employment allowances.

**Tax relief for employment of hard-to-place workers**

A taxpayer who employs a hard-to place worker may be able to benefit from a tax allowance for both corporate tax and tax on activity. A hard-to-place worker is a person younger than 26 or older than 55 who has been registered as unemployed for at least six months and who has not been employed by the taxpayer or a related party in the past 24 months. The tax allowance equates to 45% of the salary paid to the person during the first 24 months of their employment, up to the amount of the tax base.

**Increase in R&D allowances**

There have been changes with respect to the relief for investment in R&D. The relief has been doubled from 20% to 40% of the cost of investments into R&D. Correspondingly, additional regional tax reliefs were increased to 50% or 60%.

### Changes to double tax treaties (DTT)

Slovenia has recently ratified four new DTTs which will come into force after both contracting countries finalise all their internal procedures. These treaties are between Slovenia and

- Kuwait
- Egypt
- Qatar, and
- Singapore.

As of 1 January 2011, a new DTT between Slovenia and Italy entered into force.

## Taxes on corporate income

Slovenian tax residents are liable to pay corporate income tax (CIT) on their worldwide income. Slovenian tax non-residents are taxed only on income from sources in Slovenia, including income earned through permanent establishments (PE) in Slovenia.

The CIT rate for 2010 and subsequent years is a flat rate of 20%.

A special tax regime is granted for certain economic zones where additional tax allowances for investment and employment may be available *(see the Tax credits and incentives section)*.

Taxpayers, such as non-profit or charitable organisations, associations, foundations, etc., are exempt from CIT on their non-profit-making activities.

Investment funds as well as pension funds, pension insurance companies, and venture capital companies may be taxed at a rate of 0% if certain conditions are met.

There are no state or local taxes on income.

### Tonnage tax

A company may request to be subject to tonnage tax instead of CIT if it meets certain conditions (i.e. it operates in maritime transport in international shipping) and notifies the tax authorities in advance.

The tax base for tonnage tax is the sum of the tax bases for each of an entity's ships that are included in the tonnage tax regime. The tax base for a particular ship is calculated by multiplying the number of ship operating days by the daily tax base shown in the following table:

| Net tonnage (NT) | EUR*/day for 100 net tonnes |
|---|---|
| For the first 1,000 tonnes | 0.90 |
| For the next 1,001 to 10,000 tonnes | 0.67 |
| For the next 10,001 to 25,000 tonnes | 0.40 |
| Above 25,001 tonnes | 0.20 |

*Euros

## Corporate residence

A legal entity is considered to be a Slovenian tax resident if the entity has its statutory (registered) seat or place of effective management located in Slovenia. These conditions, however, do not exclude a society or any association of persons, including an association under civil or foreign law that does not have legal identity, from also being considered to be a Slovene tax resident.

### Permanent establishment (PE)

The Slovene definition of a PE is generally in line with the definition set out in the Organisation for Economic Co-operation and Development (OECD) model tax treaty. Thus, it is a place of business in Slovenia in or through which the non-resident's activities are conducted in whole or in part. The following, in particular, are considered to constitute a PE:

- An office, branch, factory, workshop, mine, quarry, or other place where natural resources are obtained or exploited.
- A building site, construction, assembly, or installation site, or the supervision thereof, if the duration of the activities concerned exceeds 12 months.

A place of business is not considered a non-resident's PE if the non-resident:

- only uses the premises in question for storage, display, or delivery of goods belonging to oneself
- only maintains inventories of goods belonging to oneself for the purpose of storage, display, or delivery
- only maintains inventories of goods belonging to oneself for the purpose of processing by third parties
- only maintains the place of business in question for the purpose of purchasing goods or collecting information for oneself
- only maintains the place of business for the purpose of engaging in any other preparatory or auxiliary activity for oneself, or
- only maintains the place of business in question for the purpose of any combination of activities referred to above, provided that the overall activity of the fixed place of business resulting from this combination is of a preparatory or auxiliary character.

## Other taxes

### Value-added tax (VAT)

A basic VAT rate of 20% applies to all taxable supplies.

A lower VAT rate of 8.5% generally applies to foodstuffs, live animals, seeds, plants, water supplies, medicines, medical equipment, transport of passengers, books, admission fees, royalties for writers and performers, certain works of art, certain residential properties, hotel accommodation, use of sport facilities, burial and cremation services, public hygiene services, minor repairs of bicycles, shoes and clothing, domestic care services, and hairdressing services.

Exempt supplies without credit entitlement include financial and insurance/reinsurance services, rent and lease of immovable goods (with exceptions), tax and court stamps, lottery services, trade of land, health and social services, etc. There are also other VAT-exempt transactions without a credit entitlement as well as exempt taxable supplies with a credit entitlement.

VAT grouping is not possible within Slovenia.

### Excise tax

Excise tax is charged on the release into free tax circulation or import of tobacco products, alcohol and alcoholic drinks, fuel and mineral oils, and electricity.

### Real estate tax

Real estate tax of 2% is charged on real estate transfers and leases, unless VAT has been charged on the transaction.

### Customs duties

Goods imported from non-European Union (EU) countries are subject to import customs clearance, and goods being exported from the EU customs territory must be declared for export customs clearance. The person responsible for paying the customs debt is the declarant. The declarant is the person making the customs declaration in its own name, or the person in whose name the customs declaration is made. The customs declaration should be made in the prescribed form and manner (in writing or by another action specified by law). Import or export duties are customs duties and other charges payable on the import or export of goods (import VAT, excise duties, environmental tax, and motor vehicle tax).

For purposes of communication with the customs offices, each person has to be identified by an EORI number (Economic Operator Registration and Identification Number), which is registered by the customs authorities on request. EORI registration is mandatory for customs clearance.

### *Environmental tax*
Environmental tax is charged on carbon dioxide emissions, waste disposal, lubricating oils and fluids, and used motor vehicles.

### *Motor vehicle tax*
Motor vehicle tax applies to all vehicles that are registered for the first time in Slovenia. The taxpayer is the entity that imports the vehicle from EU or non-EU countries. The tax rate depends on fuel range and emission of $CO_2$ and ranges from 0.5% to 31%.

### *Insurance premium tax*
Insurance premium tax is levied on insurance premiums at the rate of 6.5% and paid by insurance companies.

### *Property tax*
Slovenia has not yet introduced property tax.

### *Stamp tax*
There is no stamp duty in Slovenia.

## *Branch income*

If a branch meets the conditions, as set out in the tax legislation and relevant DTT, to be treated as a PE, then it will be liable to pay tax in Slovenia on profits that are attributable to the PE.

The profit that is attributed to a PE is determined broadly in line with OECD principles. Generally, the attributable profit is the profit that would be expected to be earned by the PE if it were an independent taxpayer performing the same or similar activities and/or business.

A branch whose activities do not create a PE is not subject to CIT in Slovenia.

## *Income determination*

Taxable profits are assessed in accordance with Slovenian Accounting Standards 2006 or International Financial Reporting Standards (IFRS) and modified for certain revenues and certain expenses, which are partly or wholly tax non-deductible.

### *Inventory valuation*
Slovenian law allows the application of all the most commonly used inventory valuation methods, including the first in first out (FIFO), weighted average cost, and floating average prices methods.

### *Capital gains*
Under certain circumstances, the gains made by a Slovenian taxpayer on the disposal of an equity shareholding are effectively 47.5% exempt from taxation. Similarly, 50% of a loss arising on the disposal of such a shareholding would not be deductible for CIT. This treatment applies to the disposal of shareholdings of at least 8% that have been held for at least six months and where the taxpayer disposing of the holding employed at least one person during the six-month holding period.

The above treatment is not available for the disposal of a shareholding of a company which is resident in a country that:

- is outside the EU
- has a corporate tax rate less than 12.5%, and
- is included in a list published by the Ministry of Finance.

### *Dividend income*
Dividends and similar income received by a Slovenian taxpayer are generally 95% exempt from taxation as long as the distributor was subject to Slovenian CIT or to a comparable profits tax. The exceptions to this are where dividends represent untaxed reserves of the distributor or where the distributor is tax resident in a country that:

- is outside the EU
- has a corporate tax rate less than 12.5%, and
- is included in a list published by the Ministry of Finance.

### *Foreign income*
Foreign income, except dividends, received by a Slovenian entity from foreign sources is included in taxable income for CIT purposes unless a tax treaty provides for exemption.

## *Deductions*

In general, business expenses which are necessary to generate taxable revenues are fully tax-deductible. The following expenses are considered unnecessary for the generation of taxable revenues and are not deductible for tax purposes:

- Expenses which are not directly necessary for performing business activities or are not incurred as a consequence of a business activity.
- Expenses of a private character.
- Expenses which do not correspond to standard business practice.

Some of the most common non-deductible expenses include:

- Penalties and the cost of bribes.
- Input VAT that could have been reclaimed in accordance with the VAT act.
- Entertainment costs, which are only 50% tax-deductible.
- Costs relating to the supervisory board, which are only 50% tax-deductible.
- Legal and other costs of incorporation, which may be deductible for the parent company but not for the entity being incorporated.

### *Depreciation and amortisation*

Depreciation of tangible fixed assets, amortisation of intangible assets, and depreciation of investment property are recognised as expenditures in line with the accounting treatment, up to a maximum of the amount calculated using the straight-line depreciation method and the maximum tax depreciation rates listed below. Any accounting depreciation in excess of these rates is not tax-deductible in the period concerned, but may be deductible in subsequent tax periods, until the asset is fully depreciated or disposed of.

The maximum annual depreciation rates are as follows:

| Depreciation category | Types of assets | Annual depreciation rate (%) |
|---|---|---|
| 1 | Buildings, including investment property | 3 |
| 2 | Parts of buildings, including investment property | 6 |
| 3 | Equipment, vehicles, and machinery | 20 |
| 4 | Parts of equipment, and equipment for research activities | 33.3 |
| 5 | Computer equipment, hardware, and software | 50 |
| 6 | Crops lasting several years | 10 |
| 7 | Breeding animals | 20 |
| 8 | Other fixed assets | 10 |

### *Goodwill*

In general, if goodwill is impaired for accounting purposes, then the impairment cost may be treated as tax-deductible. The amount that may be treated as tax-deductible in any one tax period is limited to 20% of the initial value of the goodwill.

### *Provisions*

Certain provisions are only 50% tax-deductible when accrued, with the remaining 50% being treated as tax-deductible when the provision is utilised. The provisions which are subject to this treatment are provisions for warranties granted when selling products or providing services, reorganisations/redundancies, anticipated losses from onerous contracts, pensions, long-service bonuses, and severance payments on retirement.

### *Bad debt*

Bad debt provisions are only tax-deductible if the amount does not exceed the lower of:

- the arithmetic mean of the bad debts written-off in the past three tax periods, under certain conditions specified in the tax law, and
- the amount corresponding to 1% of taxable revenues of the tax period.

In order to take advantage of this deduction, a company must be able to calculate amounts for both tests and then take the lower of the two amounts so calculated. If the company is not able to determine the amount for either, the cost of the bad debt provision is not tax-deductible until the provision is utilised.

Costs of bad debts are tax-deductible when the debt is finally written-off, provided there is a finalised court procedure, the creditor can demonstrate that it would cost more to pursue the debtor than the debt is worth, or the creditor can demonstrate that it has done everything required by good business practice to try to recover the debt.

### *Related-party interest*
Companies may deduct interest expense on loans from their owners or other associated parties up to a maximum of the amount calculated by using the prescribed interest rate published by the Ministry of Finance. Taxpayers must increase taxable profits by the amount of any excess interest expense, unless they can prove that they could have received the loan on comparable terms from an unrelated party.

### *Compensation*
Salaries and other payments relating to employment (e.g. wage compensation, holiday allowances, employer's social security contributions, long-service awards, severance benefits paid upon retirement, solidarity assistance, and reimbursement of business related expenses) are generally fully tax-deductible.

The costs of benefits in kind are also tax-deductible if such benefits are taxed for the individual under the Personal Income Tax Act.

### *Pension allowances*
Under certain conditions, a tax-deductible allowance for voluntary supplementary pension insurance may apply, of up to 24% of compulsory contributions for pension and disability insurance for insured employees, but may not exceed EUR 2,390 annually per employee.

### *Charitable contributions*
A taxpayer may claim a reduction of its taxable profits for donations made for humanitarian, disabled, charitable, scientific, educational, medical, sports, cultural, ecological, and religious purposes to residents of Slovenia or of EU or European Economic Area (EEA) member states, up to 0.3% of the taxable person's taxable revenues. An additional allowance of 0.2% of the taxpayers' taxable revenues is available for payments made for cultural purposes and to voluntary organisations that work for the public interest to protect the public from natural and other disasters.

A taxpayer may decrease its taxable base for payments made to political parties and representative trade unions, up to an amount equal to three times the average monthly salary per employee of the taxpayer.

### *Net operating losses*
Tax losses may be carried forward to reduce taxable profits indefinitely, but loss carrybacks are not permitted. Loss relief may not exceed the amount of current taxable income. Generally, losses that are generated in multiple tax years are absorbed chronologically. The right to carry losses forward may be forfeited if the ownership of the capital or voting power of the taxpayer claiming the loss carry forward changes by more than 50% within the tax period and the taxpayer either has not performed business activities for two years prior to the change of ownership or substantially changes its business activity two years prior to or after the change in ownership.

Treatment of tax losses mentioned in the preceding paragraph does not apply for those losses that are generated in the year of the change of ownership or prior tax periods.

## *Group taxation*

Group tax returns were abolished with the introduction of the CIT Act on 1 January 2007. However, special transitional provisions allow a group of taxable persons to continue to file a group tax return, until the period for which approval was granted to file a group tax return expires.

### *Transfer pricing*
Prices between a Slovenian entity and its related parties must be set, for tax purposes, at fair market value using the arm's-length principle. Broadly speaking, taxpayers are related by direct, indirect, or common shareholdings of over 25%; through a participation in management; or by control through other means, including through contractual terms.

For transactions between two related Slovenian tax residents, provided neither is in an 'advantaged' position (advantaged usually means having unutilised tax losses), there is no actual requirement for the companies to adjust their tax returns to reflect an arm's-length price.

Taxable persons must prepare transfer pricing documentation. The Slovenian rules regarding such documentation follow the EU Code of Conduct on transfer pricing documentation for associated enterprises in the EU (EU TPD).

### *Thin capitalisation*
Interest payments on loans granted, or guaranteed, by a related party (a party which directly or indirectly owns at least 25% of the shares or voting rights in the taxpayer) are not tax-deductible to the extent that the loan amount exceeds the thin capitalisation threshold specified in law. This does not apply to loan recipients who are banks or insurance companies.

Generally speaking, the thin capitalisation threshold is exceeded if the debt-to-equity ratio exceeds 5:1. Note that the debt-to-equity threshold ratio will decrease to 4:1 in 2012.

## *Tax credits and incentives*

### *Investment allowances*
A tax allowance for investment in equipment and intangible assets is available for investments made after 1 January 2008. The tax allowance is limited to the lesser of 30% of the value of the assets acquired or EUR 30,000.

### *Research and development (R&D) allowances*
A 40% investment allowance is granted for investments in R&D within the tax period. Such an investment tax allowance may be obtained for expenditures on:

- internal R&D activities within the company and
- the purchase of R&D equipment from related or unrelated parties or from a private research institution.

In addition, the following higher investment allowances may be available for companies that are established in certain regions in Slovenia, which have lower gross domestic product (GDP) rates than the state average:

- 50% investment allowance for investments in locations where the average regional GDP rate ranges between the state average and 15% lower than the state average.
- 60% investment allowance for investments in locations where the average regional GDP rate is more than 15% below the state average.

### *Allowances for employing certain individuals*

A taxpayer that employs trainees or students to undertake practical work may reduce its taxable profits by an additional 20% of the average monthly payment paid to such persons, for every month the person carries out the work.

A taxpayer that employs disabled persons may decrease its taxable profits by an additional 50% of the salary paid to such persons (in addition to the deduction for their actual salary cost). A taxpayer that employs a severely disabled person or a person with a combination of total hearing loss and speech impairment may reduce its taxable base by an additional 70% of the salary paid to such a person (in addition to the deduction for their actual salary cost).

### *Tax relief for investments in the Pomurje region*

Entities based in the Pomurje region of Slovenia may claim additional employment incentives and additional tax relief for investments. These extra benefits are available from 2010 to 2015. As a result, provided certain conditions are met, entities with their seat in Pomurje are entitled to a 70% tax allowance for investments in equipment and intangible assets as well as to certain employment allowances.

### *Tax relief for employment of hard-to-place workers*

A taxpayer who employs a hard-to-place worker may be able to benefit from a tax allowance for both CIT and tax on activity. A hard-to-place worker is a person younger than 26 or older than 55 who has been registered as unemployed for at least six months and who has not been employed by the taxpayer or a related party in the past 24 months. The tax allowance equates to 45 % of the salary paid to the person during the first 24 months of their employment, up to the amount of the tax base.

## *Withholding taxes*

In Slovenia, tax must be calculated and withheld on the payments made by residents and non-residents on Slovenian-sourced income to recipients outside Slovenia.

Payments to which the withholding tax (WHT) rules apply include payments for dividends, interest, copyrights, patents, licenses, leases on real estate situated in Slovenia, services of performing artists, and services charged from low-tax jurisdictions. As of 1 January 2007, a rate of 15% of WHT applies.

If a DTT exists, the WHT rate may be reduced in line with the provisions of the treaty. Similarly for payments of interest, royalties, and dividends within Europe, the Interest and Royalties directive and the Parent Subsidiary directive, respectively, may also reduce this WHT rate to zero.

Furthermore, WHT is not deducted on dividends paid to a parent company in another EU member state if those dividends are subject to an exemption from tax in the hands of the recipient, provided certain conditions are met.

Since the 2010 amendment of the CIT Act, and subject to certain conditions, tax is no longer required to be withheld on interest on non-exchangeable debt securities issued outside Slovenia by a Slovenian tax resident corporation through a public placement on an international clearing system (i.e. Euroclear).

### *Treaties in force*

| Recipient | Dividends (%) (1) | Interest (%) (2) | Royalties (%) |
|---|---|---|---|
| Austria | 5/15 | 5 | 5 |
| Belgium | 5/15 | 10 | 5 |
| Bosnia and Herzegovina | 5/10 | 7 | 5 |
| Bulgaria | 5/10 | 5 | 5/10 (6) |
| Canada | 5/15 | 10 | 10 |
| Croatia | 5 | 5 | 5 |
| Cyprus | 10 | 10 | 10 |
| Czech Republic | 5/15 | 5 | 10 |
| Denmark | 5/15 | 5 | 5 |
| Estonia | 5/15 | 10 | 10 |
| Finland | 5/15 | 5 | 5 |
| France | 0/15 | 5 | 5 |
| Germany | 5/15 | 5 | 5 |
| Greece | 10 | 10 | 10 |
| Hungary | 5/15 | 5 | 5 |
| India | 5/15 | 10 | 10 |
| Ireland | 5/15 | 5 | 5 |
| Israel | 5/10/15 (5) | 5 | 5 |
| Italy (3) | 5/15 | 10 | 5 |
| Korea | 5/15 | 5 | 5 |
| Latvia | 5/15 | 10 | 10 |
| Lithuania | 5/15 | 10 | 10 |
| Luxembourg | 5/15 | 5 | 5 |
| Macedonia | 5/15 | 10 | 10 |
| Malta | 5/15 | 5 | 5 |
| Moldova | 5/10 | 5 | 5 |
| Netherlands | 5/15 | 5 | 5 |
| Norway | 0/15 | 5 | 5 |
| People's Republic of China | 5 | 10 | 10 |
| Poland | 5/15 | 10 | 10 |
| Portugal | 5/15 | 10 | 5 |
| Romania | 5 | 5 | 5 |
| Russian Federation | 10 | 10 | 10 |
| Serbia/Montenegro | 5/10 | 10 | 5/10 (7) |
| Slovakia | 5/15 | 10 | 10 |
| Spain | 5/15 | 5 | 5 |
| Sweden | 5/15 | 0 | 0 |
| Switzerland | 5/15 | 5 | 5 |
| Thailand | 10 | 10/15 | 10/15 (8) |
| Turkey | 10 | 10 | 10 |
| Ukraine | 5/15 | 5 | 5/10 (9) |
| United Kingdom and Northern Ireland | 0/15 | 5 | 5 |
| United States | 5/15 | 5 | 5 |

### *Treaties not yet in force (4)*

| Recipient | Dividends (%) (1) | Interest (%) (2) | Royalties (%) |
|---|---|---|---|
| Kuwait | 5 | 5 | 10 |
| Egypt | 8/13 | 13 | 15 |
| Qatar | 5 | 5 | 5 |
| Singapore | 5 | 5 | 5 |

Notes

1. Under certain treaties, the WHT rate depends on whether, and to what extent, the recipient participates in the capital of the distributor. Generally, if the recipient holds a participation of more than 25% in the distributing company, the dividends are subject to a lower 5% WHT rate. The higher WHT rate is, however, normally due when the participation is less than 25%.
2. Some DTTs include specific provisions whereby interest payments are subject to a 0% WHT rate, if certain conditions are met.
3. The rates shown apply from 1 January 2011, when the new treaty with Italy came into effect.
4. These treaties have yet to be ratified by both parties.
5. 5% rate if the beneficial owner is a company (other than a partnership) which holds directly at least 10% of the capital of the company paying the dividend; 10% rate if the beneficial owner is a company which holds directly at least 10% of the capital of the company paying the dividends and the dividends are paid out of profits which by virtue of the law of the state in which the payer is a resident, are exempt from company tax or subject to company tax at a rate that is lower than the normal rate in that state; 15% rate applicable in all other cases.
6. 5% rate applicable to the gross amount of: (i) royalties paid for the use of, or the right to use, any copyright of literary, artistic, or scientific work (but not including cinematograph films) and (ii) royalties paid for the use of, or the right to use, industrial, commercial, or scientific equipment, 10% rate applicable in all other cases.
7. 5% rate applicable to royalties for the use of, or the right to use, any copyright of literary, artistic, or scientific work, including cinematograph films or films or tapes used for radio or television broadcasting; 10% rate applicable to royalties for the use of, or the right to use, any patent, trade mark, design or model, plan, secret formula or process, or for the use of, or the right to use, industrial, commercial, or scientific equipment, or for information concerning industrial, commercial, or scientific experience.
8. 10% rate applicable to royalties for the use of, or the right to use, any copyright of literary or artistic work including motion pictures, live broadcasting, film, tape, or other means of the use or reproduction in connection with radio and television broadcasting, and for the use of, or the right to use industrial, commercial, or scientific equipment; 15% rate applicable to royalties in all other cases.
9. 5% rate applicable to royalties for the use of, or the right to use, any copyright of literary or artistic work (including cinematograph films, and films or tapes for radio or television broadcasting); 10% rate applicable to royalties for the use of, or the right to use, any copyright of scientific work, any patent, trade mark, design or model, plan, secret formula or process, or any industrial, commercial, or scientific equipment, or for information concerning industrial, commercial, or scientific experience.

## *Tax administration*

### *Returns*

The tax period should be the calendar year. However, a tax period may differ from the calendar year, but may not exceed a period of 12 months. In this case, the tax authorities must be informed about the chosen tax period, and the taxable entity will not be allowed to change its tax period for the following three years.

A tax return must be submitted to the tax authorities by the end of the third month following the end of the tax year.

### *Payment of tax*

Tax is paid in advance in monthly instalments (if the amount of prepayment exceeds EUR 400 per month) or in quarterly instalments (if the amount of prepayment is less than EUR 400 per month) determined on the basis of the previous year's assessment.

## Significant developments

After the switch from the source-based taxation to the worldwide taxation of South African (SA) residents in 2000, and the introduction of capital gains tax in 2001, the SA tax system has not undergone fundamental changes. Smaller reforms, however, are ongoing. In 2010, the most significant changes emanating from the budget speech were:

- the introduction of a withholding tax (WHT) on interest (effective as of 1 January 2013)
- the introduction of a headquarter company regime
- a new dividend definition
- further refinements to the proposed dividend tax
- the introduction of rules governing Islamic financing products, and
- refinements to the transfer pricing and thin capitalisation rules.

Please note this information is current as of 1 June 2011. Typically, pending legislation is announced in June or July. Please visit the Worldwide Tax Summaries website at www.pwc.com/taxsummaries to see any significant corporate tax developments that occurred after 1 June 2011.

### Secondary tax on companies reform

The Secondary Tax on Companies (STC) is a tax borne by the company on any dividends declared and paid to shareholders. A reform of STC was launched in 2007 and will culminate with effect on 1 April 2012 with the introduction of a WHT on dividends. This tax will replace the current STC in an attempt to align the SA system of taxing corporate profits with worldwide practice.

### Administrative developments

A voluntary disclosure programme was introduced in November 2010 and will remain open until 31 October 2011. This provides individuals and/or corporate entities with a window of opportunity to disclose and regularise their tax affairs.

## Taxes on corporate income

An SA-resident company is subject to normal corporate income tax (CIT) on its worldwide income, irrespective of source. Non-residents are taxable on SA actual or deemed source income.

In South Africa, the normal CIT rate applicable for corporate income of companies for tax years ending between 1 April 2008 and 31 March 2012 is a flat 28%.

Close corporations, which are essentially a simplified form of company, are taxed at the same rate as companies and are subject to the same taxation rules.

Small business corporations (i.e. companies with only natural persons as members/owners and with gross income of not more than 14 million South African rand (ZAR)) are taxed at 0% on the first ZAR 59,750 of taxable income earned, 10% on the amount above ZAR 59,750 but not exceeding ZAR 300,000, and 28% on the amount exceeding ZAR 300,000.

A personal service provider company (i.e. a company that provides certain services that are performed by persons who have an interest in the company) is taxed at 33% of its taxable income. Similarly, a branch of a company with its effective place of management outside South Africa (i.e. a non-resident company) is taxed at 33%.

Special CIT rates apply in certain industries, such as mining and insurance *(see below)*.

### *Alternative turnover-based tax for very small companies*

To reduce the compliance costs for very small companies, a turnover-based presumptive tax is available. Companies with a turnover of less than ZAR 1 million per year can elect to pay this tax instead of normal CIT, at a rate ranging from 0% to 7%, depending on the turnover.

### *Secondary tax on companies (STC)*

STC is levied at a rate of 10% on the net dividends declared by SA-resident companies. The net dividend amount is calculated by deducting dividends accrued from dividends declared during the dividend cycle. The company declaring the dividend, not the recipient, is liable for payment of the tax. Branches of foreign companies are exempt from STC but subject to a higher statutory income tax rate.

STC is in the process of being replaced with a WHT on dividends, which will be charged at the rate of 10%. In the case of foreign shareholders, the rate may be reduced by an applicable double taxation agreement (DTA). The switch from STC to a WHT will become effective 0n 1 April 2012.

### *CIT for mining companies*

There are two formulae for determining CIT for mining companies: one for gold-mining companies that are subject to STC and the other for such companies that have elected to be exempt from STC. The formula for gold-mining companies subject to STC will, as of the 12-month period ending 31 March 2010, be Y = 34 – 170/x, and for those exempt from STC, Y = 43 – 215/x. For these formulae, the following applies.

x = the ratio, expressed as a percentage, is calculated as follows:

(Taxable income from gold mining) / (Total revenue (turnover) from gold mining)

Y = calculated percentage which represents the rate of tax to be levied

The maximum tax rate, which applies only to companies' income from specified oil and gas activities, is capped at 28%, and the companies are entitled to enter into so-called fiscal stabilisation agreements with the SA government to 'lock in' this rate. The agreement will not prevent the company from benefiting from any possible rate reduction in the future.

S

The rate of STC for the companies engaged in SA oil and gas activities is 5%. Where, however, a company is engaged in oil and gas activities under the so-called OP 26 right (a right to mine oil and gas), it is completely exempt from STC. The normal STC rate of 10% will apply if the company is engaged in refining.

The branches of foreign companies engaged in SA oil and gas activities are taxed at a maximum rate of 31%.

### *CIT for long-term insurance companies*

Life insurance companies are obliged to follow the 'four-fund approach', with policies divided into four funds, depending on the nature of the beneficiary. Each fund is then allocated assets according to the risk carried by the fund. Funds are treated as separate taxpayers and taxed at four separate rates. These rates are 30% for individual policyholder funds, 0% for untaxed policyholder funds, 28% for company policyholder funds, and 28% for corporate funds.

## *Corporate residence*

A company is resident in South Africa if it is incorporated, established, or formed in South Africa or has its place of effective management in South Africa. However, a company that is deemed to be exclusively resident in another country by the terms of a DTA is excluded from SA residency.

The place of effective management is, in terms of an Interpretation Note issued by the South African Revenue Service (SARS), interpreted as the place where the strategic decisions of the directors are implemented. However, this approach has not yet been tested by the South African courts. Where international precedent applies a different meaning to the term, it is expected that the South African courts would interpret the term in accordance with international precedent for both domestic law and treaty purposes.

### *Permanent establishment (PE)*

South Africa does not, as a general rule, tax non-residents on the basis of having a PE in South Africa. Rather, non-residents are subject to income tax in South Africa on income derived or deemed to have been derived from a South African source. The primary exception to this rule is in relation to capital gains where non-residents are subject to tax on assets attributable to a PE in South Africa. A PE is defined by reference to the definition thereof in the Organisation for Economic Co-operation and Development (OECD) Model Tax Convention.

## *Other taxes*

### *Value-added tax (VAT)*

VAT is an indirect tax, which is largely directed at the domestic consumption of goods and services and at goods imported into South Africa. The tax is designed to be paid mainly by the ultimate consumer or purchaser in South Africa. It is levied at two rates, namely a standard 14% rate and a zero rate (0%).

Very few business transactions carried out in South Africa are not subject to VAT. The tax is collected by businesses which are registered as vendors with SARS on all taxable supplies throughout the production and distribution chain. Sales or supplies by non-vendors are not subject to VAT.

### VAT registration and administration
All suppliers of goods and services having an annual turnover currently exceeding ZAR 1 million are obliged to register as VAT vendors and to charge output VAT. Other vendors may elect to register as VAT vendors, provided their annual turnover exceeds ZAR 50,000. If they do not register, they are prohibited from charging VAT on goods or services they supply and claiming an input tax (rebate of VAT paid) on goods and services which they acquire.

Under the VAT system, vendors normally pay VAT on expenses (input tax) and charge VAT on supplies made (output tax). This mechanism, therefore, ensures that only the so-called 'added-value' is taxed. Due to VAT being a self-assessment system, the output tax collected may be reduced by input tax paid. Thereafter, the net amount is payable to, or refundable by, the SARS. The self-assessment returns are due regularly within prescribed periods (tax periods).

### Taxable supplies
Standard rated and zero-rated supplies are known as taxable supplies. Other supplies are known as exempt and non-supplies.

### Goods and services
For a liability for VAT to exist, there must be a supply or importation of goods or services. Goods are corporeal movable things, fixed property, and real rights in such things and property. The meaning of 'services' is very broad and includes the granting, assignment, cession, or surrender of any right or the making available of any facility or advantage.

### Imports
Services imported by a vendor and utilised or consumed by the vendor for the making of taxable supplies are not subject to VAT. In addition, the VAT Act has a schedule that lists goods that are exempt from VAT on importation, whether by a vendor or an unregistered person.

### Zero-rated supplies
The VAT Act contains a list of the supplies of goods or services that are taxed at the zero rate. Most of the items refer to exports and international transport, but other specified goods utilised for farming purposes, the sale of an enterprise as a going concern, fuel subject to the fuel levy, and deemed supplies by welfare organisations are also zero-rated.

A zero-rated supply made by a vendor is subject to VAT but at a rate of 0%. Under a zero-rated supply, a vendor does not charge VAT on the consideration for the supply and obtains a refund or credit for the VAT paid on taxable supplies utilised in the making of the zero-rated supplies.

### Exempt supplies
In addition to zero-rated supplies, the VAT Act contains a list of the supplies of goods or services that are exempt from VAT. While all fee-based financial services are subject to VAT, the charging of interest is exempt. Other exempt supplies include residential rentals, basic foodstuffs, non-international passenger transport by road or rail, and educational services.

Under exempt supplies by vendors, the vendors do not charge VAT on the supply, and they are not entitled to a deduction or credit for the VAT paid by them on goods and services supplied to them for the making of the exempt supply. Accordingly, vendors treat the VAT paid by them, and for which they do not obtain a deduction or credit, as another cost and recover it in the consideration they charge for the making of the exempt supply.

### *Skills Development Levy (SDL)*
SDL is a compulsory levy to fund the education and training as envisaged by the Skills Development Act. It is payable by an employer and cannot be deducted from the remuneration payable to an employee. Small employers with an annual payroll of less than ZAR 500,000 are exempt from the levy. SDL is levied at the rate of 1% of payroll. It is payable monthly, together with income tax that the employer has withheld on its employees' salaries.

### *Unemployment Insurance Fund (UIF) contributions*
Employers are required to contribute on behalf of their employees on a personalised basis to the UIF. The rate of contributions is 1% of gross remuneration payable to an employee; however, the monthly cap of ZAR 124.78 applies. Another 1%, subject to the same cap, is payable by the employee and withheld by the employer.

### *Compensation for Occupational Injuries and Diseases Act (COIDA) fund*
Employers are liable for making annual contributions to the COIDA fund. COIDA contributions are a payroll cost that cannot be deducted from the employee's salary. The rates vary depending on the employer's industry (e.g. a rate of 1.62% is applied to the salaries of employees involved in the manufacture of pottery up to a maximum salary band of ZAR 214,305 per annum).

### *Donations tax*
Disposals of assets below their market value are a donation and, at least theoretically, subject to donations tax. Donations tax is payable by resident companies at a flat rate of 20% on donations made. An annual exemption of ZAR 10,000 is available.

Public companies, comprised of mostly listed companies, are exempt from donations tax. An exemption is also available for donations made to certain charities and other non-profit organisations.

### *Securities transfer tax (STT)*
Stamp duty and uncertified securities tax were abolished on 1 July 2008 and replaced by STT, which applies to the transfer of listed and unlisted securities. The tax rate is 0.25%, which is applied to the taxable amount in respect of the transfer of a security. The taxable amount is usually the consideration for which the security is purchased or the market value of the security, if the consideration declared is less than the market value or if no consideration was paid. STT is payable by the company that issued the securities in question. However, the company can recover the tax from the person acquiring the shares. Slightly different rules apply in the case of listed securities.

### *Property taxes*
Local municipalities levy rates on land. These rates are based on a percentage of the municipal valuation of land and improvements and vary from municipality to municipality. Generally, a higher rate is levied on properties zoned for business use.

### *Transfer duty*
Transfer duty levied on the sale of immovable property has been revised in the 2011 budget. The revised rate structure applies to properties acquired under purchase agreements concluded on or after 23 February 2011. The duty is payable by the

person acquiring the property within six months from the date of acquisition at the following rates:

| Purchase price (ZAR) | Transfer duty rate (%) |
|---|---|
| Not exceeding 600,000 | 0 |
| 600,000 to 1 million | 3 |
| 1 million to 1.5 million | 5 |
| Exceeding 1.5 million | 8 |

Prior to 23 February 2011, the rate applicable to companies was 8% calculated on the higher of the purchase price or market value. Transfers of immovable property subject to VAT are exempt from transfer duty.

### *Customs duties*
Customs duties are charged on importation of goods into South Africa which range between 3% and 20%, excluding clothing and apparel which may be as high as 45%. The import duties may also include anti-dumping and countervailing duties of up to 150%. No customs duties are charged on trade between South Africa and Botswana, Lesotho, Namibia, and Swaziland, as these five countries constitute a Southern African Customs Union.

### *Excise duties*
Excise duty is levied on certain locally manufactured goods as well as their imported equivalents. A specific duty at a pre-determined amount is levied on tobacco (52% including excise & VAT ) and liquor (23% to 43%), and an *ad valorem* duty (calculated as a percentage of price) on monitors (7%) cosmetics, televisions, audio equipment, and luxury automobiles (marginal rate of 25%). Relief from excise duty is available for exported products and for certain products produced in the course of specified farming, forestry, and (limited) manufacturing activities.

### *Vehicle emissions tax*
An environmental levy is levied on new motor vehicles based on gram per kilometre of CO2 emissions of the vehicle over a stated level. The levy is currently ZAR 75 to ZAR 100 per gram per kilometre over the CO2 threshold level.

### *Fuel levy*
A fuel levy is charged on petroleum fuel sold. As of 6 April 2011, the levy is 177.5 cents per litre of petrol and 162.5 cents per litre of diesel.

### *Electricity levy*
To support energy efficiency, the government has implemented a levy on electricity generated from non-renewable sources at 2.5 cents/kWh (2 cents/kWh prior to 1 April 2011). The levy is collected at source by the electricity producer.

### *Air passenger tax*
As of 1 October 2011, passengers departing on international flights must pay air passenger tax at the rate of ZAR 100 on flights to Botswana, Lesotho, Namibia, and Swaziland, and ZAR 190 on other flights. The tax is added to the price of the ticket. Departure prior to 1 October 2011 is subject to air passenger tax at the rate of ZAR 80 and ZAR 150 respectively.

## Branch income

SA branches of foreign companies are not considered to be separate legal entities for tax purposes, and no tax is withheld on transfers of profits to the head office. Branches of foreign companies are taxed at a rate of 33% and exempted from STC.

Note that a branch must register as a taxpayer and submit tax returns. Separate financial statements must be drawn up for the SA-trading operations. For all practical purposes, the SARS will treat the branch as a separate entity. For example, inter-branch cost recoveries levied by the head office incurred in the production of SA income normally will be allowed as a deduction by the branch.

In terms of DTAs, the taxation of branches is limited to cases where the branch constitutes a PE.

## Income determination

### Inventory valuation

Inventories generally are stated at the lower of cost or net realisable value. Write-downs of inventory for slow-moving and obsolete items must be justified, and a general policy on a percentage basis is not permitted. Last in first out (LIFO) is not accepted for tax purposes.

### Capital gains

Although the capital gains tax forms part of income tax, the two taxes are not fully integrated. Gains realised by companies are taxed at the normal CIT rate; however, only 50% of gains are included in taxable income.

### Dividend income

Dividends, other than foreign dividends, are generally not subject to tax in the hands of companies, but the company declaring the dividend is liable for STC (as of 1 April 2012, the shareholders will be liable for WHT on dividends). Qualifying foreign dividends are also generally not subject to tax where they are received by resident shareholders holding in excess of 20% of the equity shares and voting rights of the company declaring the dividend. Dividends received by residents holding less than 20% of such shares will generally be taxable in South Africa, subject to a tax credit for foreign WHT payable by the recipient shareholder.

### Stock dividends

Stock dividends (capitalisation issues of shares) are not subject to tax or STC.

### Foreign income

Foreign income of an SA-resident company is subject to tax in South Africa on an earliest of receipt or accrual basis. However, income that may not be remitted to South Africa in terms of the laws of the country where the amount arose is deferred until the income can be remitted. Double taxation may be avoided under certain DTAs or by way of unilateral credit or deduction for foreign tax payable on foreign income *(see Foreign tax credit in the Tax credits and incentives section)*.

## Deductions

### Depreciation and depletion

A depreciation (wear and tear) allowance may be deducted on movable assets used for the purpose of trade. There are no statutory provisions relating to rates of wear and tear, but SARS has published a table of periods over which the assets may be written off, in the absence of evidence to support a different write off period. The rates of wear and tear, based on the cash cost, are calculated either according to the straight-line or diminishing balance method.

New and unused machinery used in the process of manufacture or in a similar process is depreciable at the rate of 40% in the first year of use and 20% in the three following years. If the machinery is not new and unused, an allowance of 20% per year over five years is available.

An accelerated depreciation schedule (50% in the first year of use, 30% in the second, and 20% in the third year) applies to the machinery and articles used in farming, production of biodiesel or bio-ethanol, and production of energy from renewable sources.

Buildings and other permanent structures may not be depreciated, apart from an annual allowance for each of the following:

- Buildings used in a process of manufacture or a process similar to a process of manufacture: For buildings erected before 1 January 1989, a 2% rate applies per year. For buildings erected after 1 January 1989, a 5% rate applies. However, buildings erected between 1 July 1996 and 30 September 1999 are subject to an accelerated depreciation rate of 10% per year.
- Hotel buildings: For buildings built prior to 4 June 1988, a 2% rate applies per year. For hotel buildings erected after 4 June 1988, a 5% rate applies. Improvements within the existing building framework that commenced on or after 17 March 1993 are depreciated at the rate of 20%.
- Agricultural cooperative storage buildings: For buildings built prior to 1 January 1989, a 2% rate applies per year. For buildings erected on or after 1 January 1989, a 5% rate applies.
- Housing projects of not less than five units: Housing projects of not less than five units of residential accommodation, which consist of more than one room and the erection of which commenced on or after 1 April 1982 and before 21 October 2008, are subject to a 2% rate of depreciation. After 21 October 2008, an allowance of 5% is available on this type of property. The 5% depreciation rate is available to the taxpayer provided that the unit is used by the taxpayer solely for trade purposes, the unit is situated in South Africa, and the taxpayer owns at least five units in South Africa used for the purposes of trade. An additional allowance is available for a low-cost residential unit. Additionally, from 21 October 2008, taxpayers are granted relief for the transfer of ownership on a contract for deed basis of employer provided low cost residential units to employees.
- Buildings in urban development zones: Improvements to an existing building in an urban development zone, here the existing structural or exterior framework is preserved and brought into before 31 March 2014, qualify for an accelerated allowance of 20% per year. Buildings that are erected, extended, or added to in an urban development zone on or after 21 October 2008 and which are not covered by the first mentioned allowance qualify for a 20% allowance in the first year and a 8% allowance in the following ten years. As of 21 October 2008, new and unused low-income residential units located in urban development zone demarcations

S

are subject to an additional annual depreciation allowance. The rate is 25% in the first year, 13% in the succeeding five years, and 10% in the year following the last year. Improvements are subject to a depreciation allowance of 25% over a period of four years.
- Specific allowances are also provided for pipelines, transmission lines, railway lines, airport property, ships, mining operations, and other qualifying industrial assets.
- Buildings used and specifically equipped for certain research and development (R&D) activities can be depreciated 50% in the first year of use, 30% in the second, and 20% in the third year.
- Commercial buildings: The cost to the taxpayer of any new and unused building owned by the taxpayer, or any new and unused improvement to any building owned by the taxpayer, if that building or improvement wholly or mainly is used by the taxpayer for trade purposes, other than the provision of residential accommodation, is subject to a 5% rate of depreciation. This allowance is applicable to any building or improvement contracted for on or after 1 April 2007 and the construction of which commenced on or after 1 April 2007.

An allowance for assets disposed of or scrapped during a year of assessment is determined by reference to the cost less allowances already granted and the proceeds on disposal (if any). Recoupments of allowances granted are taxable where disposal proceeds exceed the tax basis at the time of sale. Such recoupments cannot exceed the cost of the asset. Proceeds above cost will be taxed as a capital gain.

Book depreciation does not need to be consistent with tax depreciation.

No cost or percentage depletion is available for natural resources.

### *Cost of inventory*
The cost of inventory is, in principle, deductible as soon as the inventory is acquired. However, at the end of each year, the cost of the inventory still on hand has to be added to the company's income. Then in the next year, it can be deducted again. This has the effect of timing the deduction of the cost of inventory to match the time of its realisation.

### *Assets acquired for shares issued*
When current assets are acquired by a company in return for the shares or debt instruments issued to the seller, the purchaser of the assets may deduct the lesser of the market value of the assets immediately after acquisition or the market value of the shares immediately after acquisition.

### *Taxes*
Payroll taxes are deductible from taxable income for the corporation.

### *Net operating losses*
Losses may be carried forward indefinitely, provided an active trade or business of a similar nature is carried on without interruption. There is no loss carryback in South Africa.

### *Payments to foreign affiliates*
Deductions may be claimed for royalties, managerial service fees, and interest charges paid to foreign affiliates, provided such amounts approximate those that would be paid to an unrelated entity in an arm's-length transaction.

Interest deductions may be limited where the paying company is thinly capitalised *(see Thin capitalisation rules in the Group taxation section)*.

Specific provisions apply for 'bullet interest' (i.e. a one-off, upfront lump sum payment of interest). Any interest expenditure must be spread over the life of the interest-bearing arrangement on the compounding accrual basis.

## Group taxation

Group taxation generally is not permitted in South Africa. However, relief is given for transactions between group companies to allow for reorganisations, provided certain requirements are met.

In general, the relief will only apply to transactions between companies within the same group. A group of companies is defined as a controlling company and one or more controlled companies in relation to that controlling company. A controlling company means a company holding directly or indirectly at least 70% of the equity of any other company. Foreign-incorporated companies do not form part of a group of companies for the purposes of this relief.

Corporate rollover relief is available for asset-for-share transactions, amalgamation transactions, intra-group transactions, unbundling transactions, and transactions relating to liquidation, winding-up, and deregistration.

The relief may cover the capital gains tax arising from the disposal of capital assets, income tax arising from the disposal of a depreciable asset, income tax arising from the disposal of trading stock, donations tax arising from the disposal of an asset, STC, and transaction taxes.

### Transfer pricing

Transfer pricing legislation has been in SA law since 1995; however, it has only been in recent years that SARS has focused on this area of taxation. The rules require those liable to tax in South Africa to follow arm's-length principles in their dealings with inter alia connected persons that are not tax residents of South Africa.

Section 31 of the Income Tax Act combines transfer pricing and thin capitalisation (explained below) measures. Section 31(2) provides the commissioner with the power to adjust the consideration of a transaction to an arm's-length price for the purposes of computing the South African taxable income of a taxpayer. This rule applies to both goods and services as well as to direct and indirect financial assistance.

Section 31 is a discretionary section which means that whilst the taxpayer can place some comfort on the fact that the commissioner must have applied due care and reasonableness in raising a transfer pricing adjustment, the onus of proof for rebutting such adjustments rests squarely with the taxpayer.

### Thin capitalisation rules

The thin capitalisation rules may be applied by SARS where financial assistance, such as a loan, advance, or debt, or the provision of any security, is granted by a non-resident investor to a resident investee who is either a connected person or a corporate entity in which the investor has a direct or indirect interest entitling it to participate in not less than 25% of the dividends, profits, capital, or votes.

The thin capitalisation rules, when applied, disallow the deductibility of interest paid by the SA resident to the foreign lender, to the extent that such interest is considered to be excessive by the SARS.

In broad terms, the rules will not be applied if the debt-to-equity ratio falls within a safe haven ratio of 3:1. In other words, where the financial assistance granted by the non-resident investor does not exceed three times the fixed capital (being essentially share capital, share premium, and accumulated profits) of the resident investee and the interest rate does not exceed the weighted average of prime plus 2% for SA rand-denominated loans, or the relevant weighted average interbank rate plus 2% for loans denominated in other currencies.

These rules do not apply to financial assistance granted by a 'parent' company to its branch operating as an external company in South Africa.

### *Amendments to transfer pricing and thin capitalisation rules as of 1 October 2011*

In 2010, significant amendments were made to section 31, but these refinements are only effective as of 1 October 2011 (it should be noted that draft legislation published for comment postpones the refinement to 1 April 2012). The amendments serve to modernise the transfer pricing and thin capitalisation rules in line with the OECD and international tax principles; to remove structural problems caused by a literal translation which focuses on isolated transactions rather than the overall arrangements; and to narrow focus which leads to the application of artificial arguments supporting certain arrangements, rather than focusing on the true economic substance.

Section 31 will no longer separately address transfer pricing and thin capitalisation. Rather, thin capitalisation will be treated as simply a breach of the general arm's-length standard.

The previous section 31 departure points of resident and non-resident, and who are 'connected', are retained.

The most critical difference from the current rules is the broadening and generalisation of the application concepts. Specifically, the combination of:

- the rules apply if any of the parties derive a 'tax benefit'
- the transactional concepts of 'goods and services' in section 31(2) are removed and replaced with a much broader 'transaction, operation, scheme, agreement, or understanding'
- the use of 'directly or indirectly' in referring to the transactions (etc.) entered into between the taxpayer and any connected person, and
- the general 'arm's-length' standard.

Regarding 'financial assistance', the generalisation of the concepts discussed above make them broad enough to catch both excessive debt amounts as well as excessive interest rates. The current concept of 'financial assistance' will be retained, i.e. including the provision of any loan, advance or debt, or any security or guarantee.

Importantly, the discretion given to SARS to adjust the price is removed, as the taxpayer is obliged in terms of the ITA to apply the arm's-length standard, i.e. "… the taxable income must be calculated as if the transaction (etc) … had been entered into … had those persons been independent persons dealing at arm's length". This therefore removes uncertainty that taxpayers had in respect of performing self adjustments on the tax return.

The much broader concept of 'connected persons' that currently exists in section 31 (1A) in respect of intellectual property will be retained (new section 31(3)) but extended to apply in respect of financial assistance, in addition to intellectual property).

### *Controlled foreign company (CFC) regime*
If one or more residents together hold more than 50% of the voting or participation rights in a foreign company, then it is a CFC in relation to those residents. The income of a CFC is imputed to the controlling holders in proportion to their holdings, subject to certain exclusions and tax credits, where applicable.

## *Tax credits and incentives*

### *Foreign tax credit*
The South African Income Tax Act makes provision for a rebate against normal CIT tax in respect of foreign taxes paid on foreign sourced income or a deduction against income of foreign taxes paid on SA-sourced income. In both instances, the taxpayer must be an SA resident, the income must be included in taxable income and is not exempt, and that income was subject to a foreign tax which is not recoverable. The rebate is limited to the total normal tax payable calculated by applying the ratio of the total taxable income attributable to the foreign tax to the total taxable income. The deduction, however, may not exceed the income on which the foreign tax was levied.

### *Tax exempt grants*
Cash grants received within the terms of a Government Incentive Scheme by taxpayers with manufacturing operations or similar processes are exempt from CIT on such grants.

### *Research and development (R&D)*
To encourage innovation, the current costs related to certain R&D activities carried on in South Africa are 150% deductible. The cost of machinery and other capital assets acquired for the purposes of R&D may be depreciated 50% in the first year of use, 30% in the second, and 20% in the third year.

### *Headquarter company regime*
For years of assessment commencing on or after 1 January 2011, a 'headquarter company' regime is introduced to encourage the use of South Africa as a location for intermediate holding companies.

The benefits on offer to a headquarter company are:

- Exemption from South Africa's CFC rules.
- Exemptions on the headquarter company's dividend distributions.
- Exemption from South African's thin capitalisation and transfer pricing rules on back-to-back loans.
- Capital gains tax exemption upon the disposal of shares in the headquarter company.

The requirements for a headquarter company are as follows:

- The headquarter company must be SA resident.

- Each shareholder in the headquarter company must hold at least 20% of the headquarter company's equity shares and voting rights. This means that a headquarter company can never have more than five shareholders.
- At least 80% of the headquarter company's assets (measured on a 'cost' basis) must be comprised of certain assets related to the foreign companies in which the headquarter company holds at least 20% of the equity shares voting rights. Specifically, these assets must be:
  - the equity shares in those companies'
  - loans to those companies, and
  - intellectual property licensed to those companies.
- At least 80% of the headquarter company's receipts and accruals must be comprised of dividends, interest, royalties, or fees from its 20%-plus holdings, or proceeds from the disposal of the equity shares or intellectual property.

The requirements regarding the headquarter company's shareholders must be fulfilled from the incorporation of the headquarter company. The requirements regarding the headquarter company's assets and its receipts accruals are tested only at year-end but must, in the case of assets, be fulfilled every year over the lifetime of the headquarter company. If a company does not meet the receipts/accruals requirements in any year, it will not be a headquarter company for that year, but will not be permanently excluded on this ground.

### *Industrial policy projects*
In 2008, a ZAR 20 billion incentive package for investors in energy efficient projects was announced. The incentive is available for industrial projects participating in the manufacturing sector (other than alcohol or alcohol related products, tobacco or tobacco related products, arms and ammunition, and bio-fuels, which have a negative impact on food security). Companies are divided into those with a qualifying status and those with a preferred status. The status is determined in terms of a point system.

The proposed project must either be a 'brownfield project' (expansion or upgrade of an existing industrial project) or a 'greenfield project' (a wholly new industrial project, which uses new and unused manufacturing assets). Approved projects may be granted a tax allowance known as an additional investment allowance equal to 55% of the cost of any manufacturing asset used in an industrial policy project with preferred status or 35% of the cost of any manufacturing asset used in any other approved industrial policy project.

Note that the additional investment allowance may not exceed ZAR 900 million in the case of any greenfield project with a preferred status, ZAR 550 million in the case of any other greenfield project, ZAR 550 million in the case of any brownfield project with a preferred status, or ZAR 350 million in the case of any other brownfield project.

In addition to the above, a company may also claim a deduction known as an additional training allowance.

### *Venture capital companies*
In order to assist small and medium-sized businesses to raise capital to finance businesses, a tax incentive for investors in small and medium-sized enterprises through venture capital companies has been introduced. This incentive became effective on 1 July 2009 and will last for 12 years.

A deduction is allowed from the income of an individual or a listed company (or a controlled group company in relation to a listed company) in respect of expenditures actually incurred by that person in respect of shares issued to that person by a venture capital company. A company may deduct its entire expenditures in respect of shares, provided that the shares held by that company and other companies within the same group do not constitute more than 10% of the equity shares of the venture capital company. The deduction available to an individual is capped at ZAR 750,000. A venture capital company is essentially a holding company deriving its income from equity investments in small and medium companies that, in turn, derive their income from active trade within South Africa. A venture capital company has to be specifically approved by SARS.

## *Withholding taxes*

### *Payments to residents*

No WHT, other than payroll taxes, are currently levied on payments to resident corporations.

### *Royalties payable to non-residents*

Royalties and know-how payments made to non-residents for the use of or right to use intellectual property rights in South Africa are deemed to be from an SA source. The payer of the royalty or know-how payment is obliged to deduct a WHT of 12% of this payment, which is a final tax payable by the recipient of such income. The treaty rate is only the maximum allowable rate to be charged by the treaty countries; where this rate is higher than the domestic tax rate, the latter will apply. The 12% WHT may be reduced by the terms of the relevant tax treaty, as follows:

| Recipient | Royalty WHT (%) |
|---|---|
| Non-treaty | 12 |
| Algeria (1) | 10 |
| Australia (1, 2) | 5 |
| Austria | 0 |
| Belarus (1, 2, 6) | 10 |
| Belgium (1) | 0 |
| Botswana (1, 2) | 10 |
| Brazil (1, 2, 7) | 10 |
| Bulgaria (1, 2, 6, 8) | 10 |
| Canada (1,4) | 10, 6 |
| China, People's Republic of (5) | 10 |
| Croatia | 5 |
| Cyprus (1) | 0 |
| Czech Republic (1) | 10 |
| Denmark (1) | 0 |
| Egypt (1) | 15 |
| Ethiopia (1, 2) | 20 |
| Finland (1) | 0 |
| France (1, 2) | 0 |
| Germany (2) | 0 |
| Ghana (1, 2) | 10 |
| Greece (1, 2) | 5 |
| Hungary (1) | 0 |

S

| Recipient | Royalty WHT (%) |
|---|---|
| India (1) | 10 |
| Indonesia (1) | 10 |
| Iran (1) | 10 |
| Ireland (1) | 0 |
| Israel (2, 3) | 0 |

| United Kingdom (2) | 0 |
| United States (1) | 0 |

| Recipient | Royalty WHT (%) |
|---|---|
| Zambia (2) | 0 |
| Zimbabwe (2) | 0 |

Notes

1. Recipient is the beneficial owner of the royalty.
2. Royalty is subject to tax in recipient country.
3. 15% is levied on royalties for cinematographic or television films.
4. The maximum rate for copyright royalties, royalties for use of computer software, and patents concerning industrial, commercial, and scientific experience is 6% of the royalties paid, otherwise 10%.
5. Maximum rate of 10% of the adjusted amount (being 70% of the gross royalties) for use of industrial, commercial, or scientific equipment.
6. The 5% rate applies to royalties for the use of a copyright. A 7% rate applies to royalties for the use of patents, trademarks, designs, models, etc.
7. In respect of right to use industrial, commercial, or scientific equipment and transport vehicles, a 10% rate applies.
8. Maximum rate of 15% on royalties arising from the use of, or the right to use, trademarks.

### *Non-resident entertainers and sportspersons*

A WHT at the rate of 15% applies to all payments made to non-resident entertainers and sports persons in respect of their activities exercised in South Africa.

### *Disposal of immovable property by non-residents*

Any person who pays an amount to a non-resident in respect of the sale of immovable property in South Africa must withhold from the amount payable an amount equal to:

- 5% if the non-resident seller is an individual
- 7.5% if the non-resident seller is a company, or
- 10% if the non-resident seller is a trust.

The amount so withheld is not a final tax for the non-resident seller. Instead, this amount is regarded as an advance payment of the non-resident seller's normal tax liability for the year of assessment during which the property is disposed of. The non-resident seller is still obliged to submit an income tax return for that year.

### *Dividends tax*

From 1 April 2012, a WHT at the rate of 10% will apply to any dividends paid by a resident company or non-resident company in respect of shares listed on a SA exchange. This WHT will replace STC.

### *Interest payable to non-residents*

As of 1 January 2013, a WHT at the rate of 10% will apply to any amount of interest (subject to certain exemptions) received by or accrued to a non-resident that is not a CFC.

### *WHT for gambling winnings*

A withholding tax on gambling winnings is proposed with effect from 1 April 2012, and all gambling winnings above ZAR 25,000, including National Lottery winnings, will be subject to a final 15% WHT.

## *Tax administration*

### *Returns*

The corporate fiscal year is the same as the company's financial year. It may be changed upon application showing reasonable cause. Annual income tax returns must be submitted within one year from the end of the company's fiscal year.

### *Payments*

Payments are made with provisional returns filed at six-month intervals from the fiscal year-end based on an estimate of taxable income for the year. Interest is charged on any underpayment outstanding for more than six months after the fiscal year-end except in the case of February year-ends, in which case it is seven months. Any balance (together with interest) is then paid following assessment.

### *Voluntary disclosure programme*

In a drive to encourage defaulting taxpayers to come forward and regularise their affairs, SARS has introduced a voluntary disclosure programme which became effective between 5 November 2010 and 31 October 2011. The voluntary disclosure programme does not result in the waiver of any tax payable, but rather SARS will:

- not pursue criminal prosecution
- waive 100% of penalties and additional tax, and
- waive either 100% or 50% of interest payable.

## Significant developments

Over the past 12 months, the following significant amendments have been made to Spanish law on direct taxation of companies.

Law on Sustainable Economy, passed on 4 March 2011 (Law 2/2011), increases the following tax credits for tax periods commencing on or after 6 March 2011:

- Tax credit for technological innovation is increased from 8% to 12%.
- Tax credit for environmental investments in installations is increased to 8%. No tax credit will be available for investments made in tax periods commencing between 1 January 2011 and 5 March 2011. For investments made in tax periods commencing between 1 January 2010 and 31 December 2010, the tax credit is 2%.
- The maximum limit for tax credit application in one tax year is also increased if certain requirements are met.

State Budget Bill, passed on 22 December 2010 (Law 39/2010) introduces, among others, the following tax reforms:

- Section 12.5 of the Spanish Corporate Income Tax Law is amended to eliminate the possibility of amortising financial goodwill arising from the acquisition of an interest in a company resident in another European Union (EU) member state carried out after 21 December 2007, for tax purposes. This amendment is made as a result of the European Commission's decision passed on 27 October 2009, which concludes that the Spanish regulations that allow amortisation of financial goodwill arising from acquisitions of interests in EU companies distorts competition and constitutes unlawful state aid. In addition, the European Commission's decision passed on 12 January 2011 in relation to the amortisation of financial goodwill arising from the acquisition of an interest in a company resident outside the European Union has recently been published in the Official Journal of the European Union. The decision considers this tax relief to be unlawful state aid, and its scope is similar to that of the European Commission's decision of 27 October 2009.
- The time period for the application of the tax credit for training (1%/2%) is extended exclusively for expenses incurred and investments made in 2011 to train staff in the use of new communication and information technologies which can only be used outside the workplace and working hours.

A Royal Decree-Law passed on 3 December 2010 (RDL 13/2010) approved certain measures to boost investments and employment. The measures laid down in this legislation include, most notably:

- Extension until 2015 of free depreciation for new tangible fixed assets and investments in real estate used for business activities. Free depreciation was first introduced by Law 4/2008 for tax years commencing in 2009 and 2010, and it was extended to tax years 2011 and 2012 by Royal Decree-Law 6/2010. In both cases, such tax relief is conditional on the maintenance of or increase in staff levels. RDL 13/2010 eliminated the requirement to maintain or increase staff levels for investments made in taxable years beginning on or after 1 January 2011 and extended the application period of this tax incentive to tax year 2015.

- Increase in the threshold for a company to be considered a small company. Until tax year 2010, a company was considered as small (and thus could be taxed under the special tax regime for small companies) when its turnover in the preceding tax year was under 8 million euros (EUR). For tax years commencing on or after 1 January 2011, this threshold is fixed at EUR 10 million.
- Tax relief which may be availed of by small and medium-sized companies may continue to be applied by these companies if they exceed the EUR 10 million threshold. In this case, the tax relief may be availed of during the three tax periods following the tax period when they exceed the EUR 10 million threshold, provided that they have met the requirements to be considered small or medium-sized companies in the tax period when they exceed the EUR 10 million threshold and in the two previous tax periods.
- Increase in the first tranche of the tax scale under which small companies are taxed.
  - For tax periods starting on or after 1 January 2011, the rates are the following:
    - Taxable income up to EUR 300,000 is taxed at a 25% tax rate.
    - The part of the taxable income which exceeds this threshold is taxed at the general rate of 30%.
  - Until tax year 2010, small companies were taxed at the following rates:
    - Taxable income up to EUR 120,202 was taxed at a 25% tax rate.
    - The part of the taxable income which exceeded this threshold was taxed at the general rate of 30%.
- Increase in the first tranche of the tax scale under which micro companies are taxed.
  - For tax periods commencing in 2011 (the last year in which this reduced rate is applicable), entities with a net turnover under EUR 5 million and a total maximum staff of 25 employees which maintain or increase their staff levels are taxed at the following rates:
    - Taxable income up to EUR 300,000 is taxed at a 20% tax rate.
    - The part of the taxable income which exceeds this threshold is taxed at the tax rate of 25%.
  - For tax periods commencing in 2009 and 2010, the applicable tax rates were the following:
    - Taxable income up to EUR 120,202 was taxed at a 20% tax rate.
    - The part of the taxable income which exceeded this threshold was taxed at the tax rate of 25%.

## *Taxes on corporate income*

The general corporate income tax (CIT) rate in Spain is currently 30%. Other tax rates (ranging from 25% to 35%) may apply depending on the type of company which is taxed and the type of business carried out.

Resident companies are taxed on their worldwide income.

For permanent establishments (PEs) in Spain of foreign companies, non-residents' income tax is chargeable on their Spain-source taxable income at a 30% tax rate.

Non-residents' income tax is also chargeable on non-established foreign companies/individuals which obtain income in Spain *(see the Withholding taxes section)*.

### *Small companies*
For tax years commencing on or after 1 January 2011, companies with a turnover under EUR 10 million in the preceding tax year are considered small companies for CIT purposes and are taxed at the following rates:

- Taxable income up to EUR 300,000 is taxed at a 25% tax rate.
- The part of the taxable income which exceeds this threshold is taxed at the general tax rate of 30%.

For tax years commencing prior to 1 January 2011, companies with a turnover under EUR 8 million in the preceding tax year were considered small companies for CIT purposes and were taxed at the following rates:

- Taxable income up to EUR 120,202 was taxed at a 25% tax rate.
- The part of the taxable income which exceeded this threshold was taxed at the general tax rate of 30%.

The tax rate levied on companies forming part of a group depends on the total amount of the group companies' turnovers. The general 30% tax rate is levied when the sum of the group companies' turnovers exceeds EUR 10 million (EUR 8 million for tax years commencing prior to 1 January 2011).

### *Micro companies*
A new regulation came into force in Spain in December 2009 which established lower tax rates for companies which maintain or increase their staff levels in tax years 2009, 2010, and 2011.

The rates for tax year 2011 are as follows:

- Taxable income up to EUR 300,000 is taxed at a 20% tax rate.
- The part of the taxable income which exceeds this threshold is taxed at the general tax rate of 25%.

The rates for tax years 2009 and 2010 are as follows:

- Taxable income up to Euros 120,202 was taxed at a 20% tax rate.
- The part of the taxable income which exceeded this threshold was taxed at the general tax rate of 25%.

These lower rates of 20% and 25% are applicable subject to compliance with, amongst others, the following requirements:

- The income generated by all of the company's business activities does not exceed EUR 5 million.
- The company's total staff does not exceed 25 employees.
- The company's average number of employees during the 12-month period following the commencement of the tax year in question is not less than one employee and not less than the company's average number of employees during the 12-month period prior to the commencement of the tax year in question.

### *Business and professional activities tax*
The business and professional activities tax is a local direct tax levied annually on the performance in Spain of business, professional, or artistic activities, regardless of whether or not they are carried out in a particular premises. The tax payable depends

on different factors such as the type of activity carried out and the location and size of the premises where the activity is carried out. As regards limits, it may not exceed 15% of the presumed average profits of the professional/economical activity.

CIT-payers and non-resident companies carrying on an activity in Spain through a PE are exempt from this tax if their net turnover for the tax year of the last corporate/non-residents' income tax return filed prior to the date of accrual of the local tax (1 January) was less than EUR 1 million.

## *Corporate residence*

A company is resident in Spain and subject to CIT on its worldwide income when:

- it has been incorporated in accordance with Spanish law
- its registered office is in Spain, and/or
- its 'effective' head office is in Spain.

Under Spanish law, a company's 'effective', head office is in Spain when its business activities are managed and controlled from Spain.

Companies established in a country or territory where no tax is levied or which is a tax haven are deemed to be tax resident in Spain in the following cases:

- When the company's main assets consist, directly or indirectly, of property located or rights fulfilled or exercised in Spain.
- When the company's core business activity is carried on in Spain.

This presumption may be refuted by the company if it can prove that it is effectively administered and managed in the country or territory in which it is established and that it was incorporated and operates for valid economic and business reasons and not merely for the purpose of managing securities or other assets.

### *Permanent establishment (PE)*
Taxpayers operating in Spain through a PE are subject to non-residents' income tax.

Most Spanish tax conventions for the avoidance of double taxation contain a definition of PE in line with Organisation for Economic Co-operation and Development (OECD) criteria.

In the absence of a tax convention, internal law states that an individual or company is considered to operate through a PE when, by any legal means, one has continuous or habitual work facilities in Spain or a place to do any kind of work where one performs all or part of one's activity, or when one acts in Spain through an agent with powers to enter into an agreement in the name and on behalf of the non-resident individual or company, provided said powers are exercised on a regular basis.

In particular, management offices, branches, offices, factories, workshops, warehouses, shops or other establishments; mines, oil or gas wells, quarries, farms, forestry facilities, livestock farms, or any other site where natural resources are collected; and construction, installation, or assembly sites whose duration lasts more than six months will be considered PE.

## Other taxes

### Value-added tax (VAT)

Spanish VAT is payable on supplies of goods and services carried out in Spanish VAT territory and on imports/intra-European Union acquisitions of goods and services. There are three rates for the different types of goods and services, which are as follows:

- Ordinary rate of 18%, applied on regular supplies of goods and services.
- Reduced rate of 8%, applied on basic necessities (e.g. food and agricultural products not included in the 'super reduced' 4% rate, dwellings, and other qualifying services).
- Super reduced rate of 4%, applied on basic necessities other than those classified under the reduced rate (e.g. bread, milk, books, medicine).

In the Canary Islands, a specific tax is applied in lieu of VAT, called the Canary Island General Indirect Tax (IGIC). The ordinary IGIC rate is 5%, and the other IGIC rates are 0%, 2%, 9%, and 13% (20% for tobacco). IGIC is similar to VAT but it has some significant differences, such as the exemption established for telecommunications services. Imports of tangible goods into the Canary Islands are subject to this tax. In Ceuta and Melilla, sales tax is applied instead of VAT.

### Customs duties

Many goods imported into Spain from outside the European Union are subject to customs duties. The rates of duty are provided by the EU's Common Customs Tariff and vary widely.

### Excise duties

Excise duties are chargeable on most hydrocarbon oil products, alcoholic drinks, and tobacco products imported into or produced in Spain. Purely as examples, most road fuels carry a duty of about EUR 0.31 per litre, cigarettes carry a duty of about EUR 12.7 per thousand (plus 57% of the maximum retail sale price), tobacco of about EUR 8 per thousand (plus 41.5% of the maximum retail sale price), most wines of EUR 0 per litre, and spirits of about EUR 8.3 per litre of pure alcohol included.

### Transfer tax

A transfer tax of 6% or, more frequently, 7%, depending upon the region, is generally levied on inter vivo transfers, including real estate transfers and real estate leases that are exempt from VAT.

Second and ulterior transfers of buildings are exempt from VAT and thus, they are in principle, subject to transfer tax.

Residential leases are exempt from VAT and therefore subject to transfer tax.

Transfers of quoted or unquoted (listed or unlisted) securities are, in principle, exempt from both transfer tax and VAT, except in the following cases:

- Transfers of securities of a company whose real estate assets in Spain represent more than 50% of its total assets or whose assets include securities in another company whose real estate assets in Spain represent at least 50% of its total assets are subject to and not exempt from transfer tax if the acquirer gains control of the real estate company as a result of the transfer.

- Transfers of securities received in exchange for real estate contributions carried out on the incorporation of a company or on the execution of a subsequent capital increase are also subject to and not exempt from transfer tax provided that not more than three years have elapsed between the date on which the contribution was made and the date on which the securities are transferred.

In addition, acquisitions of assets by new businesses in the Canary Islands are exempt from transfer tax, subject to compliance with certain requirements.

Restructuring transactions are exempt from transfer tax. For these purposes, mergers, spin-offs, exchanges of shares, and in kind contributions defined in section 83 comma 1, 2, 3, and 5 and section 94 of the Spanish Corporate Income Tax Law are considered to be restructuring transactions.

### *Capital duty*
As of 3 December 2010, incorporations of companies, capital increases, contributions by shareholders, and the transfer to Spain of the place of effective management or the registered office of a company where neither one nor the other were previously located in a member state of the European Union are exempt from capital duty.

Restructuring transactions are not subject to capital duty. For these purposes, mergers, spin-offs, exchanges of shares, and in kind contributions defined in section 83 comma 1, 2, 3 and 5 and section 94 of the Spanish Corporate Income Tax Law are considered to be restructuring transactions.

The transfer of the place of effective management or the registered office between EU member states is not subject to capital duty. 1% capital duty is levied on capital reductions and company dissolution, to be paid by the shareholders.

Capital duty is incompatible with transfer tax and stamp duty in certain cases, but it is compatible with VAT.

### *Stamp duty*
A stamp duty is mostly levied on notarial instruments and records documenting transactions which have an economic value and need to be registered in public registries (e.g. company, land, and industrial property registries). Stamp duty is incompatible with transfer tax and capital duty, but compatible with VAT. The general rate is between 0.75% and 2% depending on the region of Spain and the taxable event.

Stamp duty is also levied on certain commercial documents (e.g. bills of exchange, promissory notes), court, and administrative documents.

### *Tax on non-resident companies owning real estate in Spain*
Non-resident companies which own real estate or hold real property rights in Spain are subject to a special levy accrued on 31 December and declared and paid in January of the following year in the place and manner established by law. The tax is equal to 3% of the assessed value of the real estate. This special levy is not applicable to companies resident in a country which has signed a convention for the avoidance of double taxation with Spain, including an exchange-of-information provision, if the ultimate shareholders of such companies are individuals resident in Spain or individuals that may benefit from the application of a convention for the avoidance of double taxation.

In addition, some other exceptions are established for this levy.

### Other local taxes
In addition to the taxes stated above, the following other local taxes may be charged on companies:

- Real estate tax, levied annually by local authorities on the ownership of real estate.
- Local tax levied on the increase in the value of urban land, chargeable when urban real estate is sold.
- Motor vehicle tax, charged on the ownership of vehicles.
- Tax on constructions, installations, and building works, charged on the cost of certain works which require town planning licences.
- Waste collection fees.

## Branch income

### Branches of Spain-based companies
Income obtained by a company resident in Spain through a branch located outside Spain is treated as income generated by the head office and is taxed accordingly. A tax exemption regime is applicable in this case, subject to compliance with certain requirements.

### Branches operating in Spain
Income obtained by a branch in Spain of a non-resident company is taxed at the standard CIT rate of 30% and, in most cases, the regulations established by tax law for resident companies are applicable.

Payments made by a branch to its head office or a PE of its head office for royalties, interest, commissions, or technical assistance fees are not tax deductible. Management and general administrative expenses incurred by the foreign head office which can be allocated to the branch are tax deductible if the payments for these expenses are made following a criteria of continuity and rationality and provided that certain documentary requirements and other formalities are fulfilled.

Under Spanish law, income obtained by a branch which is repatriated to its head office is taxed at source at the general withholding tax (WHT) rate of 19%. This tax is not chargeable in the case of a PE of a company resident in the European Union (unless the company is resident in a tax haven). Most tax treaties signed by Spain do not establish any provisions on this matter, and, in such cases, no tax is chargeable on income repatriated by branches. Some tax treaties, such as the treaties with the US, Canada, and Indonesia, expressly establish a tax on income repatriated by branches. For example, US head offices are taxed at a 10% rate on the repatriated profits of a Spanish branch under the US/Spanish tax treaty.

## Income determination

The general rule for determining income for CIT purposes is that accounting rules must be followed unless tax law establishes otherwise. In order to maintain this consistency, CIT/PE Non-residents' income tax returns include pages in which the company's accounting/commercial balance sheet and profit and loss account figures must be entered.

In Spain, the tax authorities are authorised to modify accounting results exclusively for the purpose of determining tax results if they observe that a company's accounting results have not been calculated in accordance with Spanish Generally Accepted Accounting Principles (GAAP).

### *Inventory valuation*

Inventory is valued at acquisition price or production cost under the average and first in first out (FIFO) valuation methods (the replacement and base stock valuation methods may only be used in exceptional cases). Again, since there are no specific tax rules for determining taxable income, accounting rules are also applicable for calculating valuation and obsolescence provisions for inventory.

### *Capital gains*

Capital gains are taxable in the tax year in which they arise. They are treated as normal income and taxed at the standard CIT rate of 30% (in the case of gains from real estate after taking into consideration an increase in the cost base for tax indexation purposes). *Please see the Tax credits and incentives section for a description of a tax credit for reinvestment of capital gains.*

### *Dividend income*

The amount of dividends included in the calculation of taxable income must be the gross amount.

Upon meeting certain requirements, companies may be eligible for a tax credit for dividends equal to the tax rate applied by the company on the dividends received. This tax credit is generally allowed for the total dividends received from taxable domestic companies when the interest of the company receiving the dividend in the other company is 5% or more and such interest has been held for at least one year. This one-year holding period is deemed to be complied with if it is completed after the dividend is distributed.

This tax regime is to some extent the same as a tax exemption regime. When an interest in a company is less than 5% or is held for less than one year, the tax credit is 30% of half of the amount of the dividends received.

In addition, taxation on capital gains arising from the sale of shares by a company with at least a 5% interest in the subsidiary held for at least one year prior to the sale can be reduced by means of a tax credit at the tax rate applicable on the undistributed part of the subsidiary's profits generated during the company's holding period. The reason for this tax relief is that this capital gain is understood to be an underlying dividend.

### *Stock dividends*

CIT is not levied on bonus shares (i.e. shares partially or totally given to shareholders in a capital increase charged against distributable reserves), although they must be taken into account when calculating the average cost of shares held for the levying of tax when the shares are sold.

### *Foreign income*

Resident companies are taxed on their worldwide income. For foreign-source income, total or partial tax relief in the form of tax credits or exemptions is given if tax is levied on the income in both Spain and the foreign country where the income has been generated.

This tax relief may be available for the following:

- Economic double taxation, which is when the same income is taxed in the hands of two different taxpayers. For example, another government taxes a foreign company on the income earned in that country and a Spanish resident shareholder is taxed on the dividends that it receives from the foreign company or the capital gains from transfers of its shares.
- Juridical double taxation, which is when the same income is taxed in two countries in the hands of the same taxpayer. For example, the income is taxed (via a WHT) in the country where the income is generated and again in the other country where the recipient is resident.

The main characteristics of double tax relief are discussed below.

Dividends or profit-sharing income received by a Spanish company from a foreign company are tax exempt, subject to compliance with the following requirements:

- The Spanish company has at least a 5% interest in the foreign company during the entire tax year prior to the tax year in which the dividend is paid. This one-year holding period is deemed to be complied with if it is completed after the dividend is distributed.
- The foreign company is subject to a similar tax to Spanish CIT and is not resident in a tax haven. The foreign tax is deemed to be similar to Spanish CIT if the foreign company is resident in a country with which Spain has signed a tax treaty containing an exchange-of-information provision.
- The income out of which the dividend is paid is generated from the business activities of the foreign company carried out abroad stipulated in CIT law.

Capital gains arising from the sale of shares in foreign companies also qualify for a tax exemption provided that the requirements stated above are complied with during the holding period and the acquiring company is not resident in a tax haven. Tax exemption is limited in certain cases.

As an alternative to this 'tax exemption' regime and applicable to dividend distributions only, a tax credit based on imputation is established. This tax credit allows the crediting of the foreign tax paid abroad on the income from which the dividends are paid and the foreign WHT paid on the profit distribution, up to the limit of the tax that would have been paid on the gross amount in Spain. The only requirement for the application of this 'tax imputation' regime is that the Spanish company has at least a 5% interest in the foreign company during the 12 months prior to the date on which the dividend is due and payable. This one-year holding period is deemed to be complied with if it is completed after the dividend is distributed. This tax relief may be carried forward for up to ten years.

Spanish international legislation provides for CIT relief on 'juridical' double taxation by applying the 'tax imputation' regime. Under this regime, gross foreign income (including foreign WHT paid) is included for Spanish tax calculation purposes, and a tax credit for the foreign WHT paid is applicable up to the amount of the CIT that the company would have paid if such gross income had been obtained in Spain. The tax credit can be carried forward for up to ten years, but the rate will be the rate applicable at the moment when the tax credit is applied.

Under Spanish tax treaties and implemented EU tax directives, several methods have been established to avoid double taxation. The main one is the traditional deduction of a tax credit from tax effectively paid. However, some treaties establish a tax exemption or the exclusive right to tax. Also, a tax-sparing clause is included in some treaties which allows for the deduction of not only the tax actually paid but a higher amount of tax.

### Other significant items
The following items, amongst others, are excluded or deferred from taxable income:

- Distributed dividends corresponding to profits obtained by companies in tax years in which the flow-through tax regime (internal and international) has been applied.
- Assets written up in accordance with revaluation laws and tax-protected restructuring transactions involving accounting capital gains.

## Deductions

### Depreciation, amortisation, and depletion
All assets, except land, are depreciable for tax purposes. Guideline tables of tax depreciation rates are established which state maximum per annum rates and maximum years of useful life for each asset type, classified by business sector. Please see the table below as an example of the maximum per annum rates and maximum years of useful life of some assets that are typically depreciated:

| Asset | Maximum per annum depreciation rate (%) | Maximum useful life (years) |
|---|---|---|
| Industrial buildings and warehouses | 3 | 68 |
| Administrative and commercial buildings | 2 | 100 |
| Passenger cars | 16 | 14 |
| Furniture and office equipment (excluded computers) | 10 | 20 |
| Computers | 25 | 8 |
| Software | 33 | 6 |
| Tools | 30 | 8 |

The straight-line depreciation method is normally used, calculated over the asset's useful life and applied on the asset's cost or written-up value (if such a write-up is acceptable for tax purposes). Off-book adjustments must be included in tax assessments if accounting depreciation exceeds tax depreciation.

Qualifying assets with a useful life of more than one year can also be depreciated using one of the following declining-balance methods:

- By applying a constant percentage on the carrying amount of the asset multiplied by 1.5, 2, or 2.5 depending on the useful life of the asset (below five years, between five and eight years, and over eight years, respectively).
- By using the sum-of-digits method, whereby the asset's acquisition price is multiplied by the ratio between the number of the years in which it is depreciated in a descending order (e.g. in a three-year useful life, three for the first year, two for the second, and one for the third) and the total numbers for the years of the asset's useful life (1 + 2 + 3 = 6 for 3 years of useful life).

Buildings, furniture, and fittings cannot be depreciated using the declining-balance methods.

Special depreciation plans for new assets can be approved by the tax authorities upon request, when they are subject to wear-and-tear at a higher rate than the normal rate applicable.

Recorded depreciation is fully tax deductible, even when it is higher than the depreciation which would arise by applying any of the tax depreciation methods stated above, if the taxpayer is able to justify that the depreciation is real.

Mining assets and assets used for research and development (R&D), amongst others, but not including buildings, can be freely depreciated/amortised for tax purposes.

### Free depreciation

Unrestricted depreciation of investments in new tangible fixed assets and real estate used in business activities is regulated for investments made by taxpayers in tax periods commencing in 2011, 2012, 2013, 2014, and 2015.

Unrestricted depreciation tax relief was also available for tax periods commencing in 2009 and 2010, but it could only be availed of if the requirement that the taxpayer's staff levels are maintained or increased was met. This requirement is eliminated for the application of the tax relief for tax periods commencing in 2011, 2012, 2013, 2014, and 2015. However, taxpayers that applied accelerated depreciation for their investments in 2009 and 2010 will have to meet the staff maintenance or increase requirement established for such tax periods.

In both cases, depreciation is fully tax deductible in this case, even if it is not recorded in the company's profit and loss account.

Provided that certain requirements are met and that the call option is exercised, free depreciation relief is also applicable to investments carried out in tax years 2009 to 2015 in new tangible fixed assets and property investments used for business activities which are carried out through leasing agreements. As explained above, for tax years 2009 and 2010 such tax relief is conditional on the maintenance of or increase in staff levels.

### Amortisation of intangibles

A 50% reduction may be applied for income obtained from licensing certain intangible assets, subject to compliance with certain requirements (the effective tax on this income would be 15%).

Goodwill cannot be amortised under Spanish GAAP. However, it can be amortised for tax purposes at an annual rate of 5%, subject to compliance with certain requirements (e.g. it is acquired for consideration from an unrelated party in accordance with the provisions of Section 42 of the Spanish Commercial Code and an obligatory non-distributable reserve is established).

Intangible assets with a specific useful life may be amortised and such amortisation is tax deductible even if it is not recorded in the company's profit and loss account, when the company complies with the following requirements:

- The assets are acquired for consideration.
- The company does not form part of a group as defined in Section 42 of the Spanish Commercial Code. The tax deduction of the amortisation is up to 10% per annum, unless a lower useful life can be evidenced.

If the two requirements stated above are complied with, amortisation on intangible assets which do not have a specific useful life is also tax deductible up to the 10% annual limit, regardless of whether they are amortised under Spanish GAAP or not.

**Depletion**
Depletion is allowed for mining companies and companies involved in exploring/ investigating natural oil resources as established in applicable legislation.

### *Taxes*
Taxes, other than CIT, that are recorded as an expense due to their nature (e.g. business and professional activities tax, but not withholdings) are tax deductible expenses. In some cases, indirect taxes such as non-deductible VAT or transfer tax could be added to the value of assets for depreciation purposes.

### *Fines and penalties*
Penalties imposed due to the failure to pay taxes and surcharges for late filing/payment or for other tax infringements are not tax deductible.

Late-payment interest recorded as an expense is, in principle, tax deductible.

### *Net operation losses*
Tax losses may be carried forward for 15 years, but they cannot be carried back. There are no tax loss 'baskets' (operating/capital) under Spanish law.

Complex rules may limit the use of tax losses of a company dissolved as a result of a restructuring operation and, in certain circumstances, when it has a change of shareholders.

### *Payments to foreign affiliates*
Supplies of goods or services by a company not established in Spain to a Spanish group company must be valued at arm's length. If recorded expenses for such goods/ services exceed arm's-length price, the tax deductibility of the excess amounts could be challenged in a tax inspection. The tax deductibility of expense charges received from tax havens is fully disallowed unless proper evidence of an actual service valued at arm's length can be provided.

Management services received from outside Spain and recorded as distributions of costs of a group centre do not have to be documented in a written agreement entered into before the commencement of the services to ensure the tax deductibility of the expenses (as previously was the case), although it would be recommendable to have such an agreement. For any other types of services, an agreement recorded before a notary public is not obligatory under Spanish law, but it is advisable.

As regards the taxation in Spain of the foreign company which supplies the services, the WHT rate to be applied on the gross income obtained by the company is 24%. Dividends, interest, and capital gains generated as a result of a transfer of assets are taxed at a 19% WHT rate. If management services, technical assistance, or the performance of studies are solely used outside Spain and are linked to business carried on abroad, then no WHT is applicable. In addition, under most tax treaties signed by Spain, 'business profits' obtained in Spain by non-residents are exempt from WHT. However, 'business profits' is a miscellaneous residual category. For instance, if the amount obtained qualifies as a royalty payment, WHT is applicable at the reduced tax treaty rates if the foreign company can obtain a document from the tax authorities of its country of residence certifying its tax residence. If no tax treaty applies, then the above 24% WHT rate is applicable *(see the Withholding taxes section for more information)*.

## Group taxation

### Tax groupings for CIT purposes

Under Spanish tax law, companies can form a group and apply a special tax consolidation regime for CIT purposes. Companies forming a tax group must formally pass a resolution agreeing to do so before the beginning of the first tax year in which the tax consolidation regime will be applied.

To apply the tax consolidation regime, the controlling company of the tax group must hold a 75% or higher interest, either directly or indirectly, in the companies forming the tax group at the beginning of the first tax year in which the tax consolidation regime is applied, and this interest must be maintained during the year unless the dependent company is dissolved. For tax years commencing after 1 January 2010, the interest requirement is 70% for companies listed on the Stock Exchange.

The main characteristics of the tax consolidation regime are as follows:

- The taxable income of the tax group is the sum of the taxable incomes of each of the companies forming the group.
- The tax losses of any of the companies forming the group can be offset against the tax profits of any of the other group companies.
- For the calculation of consolidated taxable income, the tax profits (losses) generated from transactions carried out between group companies are eliminated and only included in consolidated taxable income when:
  - they are carried out with third parties
  - a group company participating in the internal operation ceases to form part of the tax group, and
  - the tax consolidation regime is no longer applied by the group for whatever reason.
- Specific limitations apply regarding the offsetting of tax losses or the application of tax credits generated by the group companies before they formed part of the tax group. Such tax losses/credits may be offset (applied) by the tax group up to the limit of the tax profits/tax liability of the company which generated the losses/credits.
- No WHT is chargeable on payments made between companies of the tax group (e.g. interest, dividends).

### Tax groupings for VAT purposes

Groups of companies may also choose to be taxed under a special tax consolidation regime for VAT purposes. This special regime is optional, but once it has been opted for, it must be applied for a minimum of three years which is extendible unless it is expressly waived by the companies.

The VAT consolidation regime may only be applied by groups resident in Spanish VAT territory which do not form part of any other VAT grouping.

The controlling company of the group must be a legal entity or PE which is not dependent on any other entity established in Spanish VAT territory, and it must hold at least a 50% interest in the subsidiary companies of the group for the entire calendar year.

With the application of the VAT consolidation regime, there are two different options for taxation:

- The aggregation system, where the balances of the VAT returns of the individual companies of the group are totalled. The right to a tax deduction is exercised by the individual companies.
- The consolidation system, where an individual company can opt to reduce VAT taxable income for inter-company operations which is limited to the 'external' cost.

### *Transfer pricing*

All related-party transactions must be valued at market price, following the arm's-length standard (e.g. the value which in normal market conditions would have been established between unrelated parties).

For this purposes, related persons or entities shall be:

- A company and its shareholders or members.
- A company and its board members or directors.
- A company and the spouses of or persons related to its shareholders or members, board members, or directors, either in a direct line or collaterally, by consanguinity or affinity up to the third degree.
- Two companies of a group.
- A company and the shareholders or members of another company, when both companies form part of a group.
- A company and the board members or directors of another company, when both companies form part of a group.
- A company and the spouses of or persons related to the shareholders or members of another company, either in a direct line or collaterally, by consanguinity or affinity up to the third degree, when both companies form part of a group.
- A company and another company in which the former company has at least a 25% holding, held indirectly, in its share capital or shareholders' equity.
- Two companies in which the same shareholders or members or their spouses, or persons related to them either in a direct line or collaterally, by consanguinity or affinity up to the third degree, have at least a 25% holding, whether directly or indirectly, in their share capital or shareholders' equity.
- A company resident in Spanish territory and its PEs abroad.
- A company not resident in Spanish territory and its PEs in Spanish territory.
- Two companies forming part of a group taxed under the tax regime for groups of cooperative companies.

For cases where association exists as a result of a shareholder/member-company relationship, the shareholding must be 5% or more, or 1% if the shares are quoted on a regulated stock exchange. The reference to directors shall include *de facto* and *de jure* directors.

The determination of the market value by taxpayers must be done through the application of one of the following transfer pricing methodologies, in order of preference as follows: Comparable Uncontrolled Price (CUP) method, Cost Plus (CP) method, or Resale Price Method (RPM), usually referred to as traditional transaction methods.

If the application of any of the above methods is not possible, the Profit Split Method (PSM) or Transactional Net Margin Method (TNMM) could be applied, usually referred to as transactional profit methods.

Documentation is also a requirement, with taxpayers required to produce group-level and taxpayer-specific documentation for each tax year. Related persons or entities must keep such documentation available for the tax authorities as from the end of the voluntary return or assessment period in question. Exceptionally, no documentation requirements will be applied in the following cases, among others:

- With some exceptions, transactions carried out within a tax period with one related person or entity will not be subject to documentation requirements when the sum of the considerations of all these transactions does not exceed EUR 250,000.
- Transactions carried out within a group of companies taxed under the Spanish special tax consolidation regime.
- Transactions carried out by economic interest groups and temporary business associations.
- Transactions involving the purchase or sale of publicly traded shares.

Documentation is always required for transactions with entities, whether related parties or otherwise, which are resident in tax havens.

Please note that specific penalties may be imposed in the event of the absence of documentation or where data are omitted, inaccurate, or false.

### *Thin capitalisation rules*

When the net remunerated direct or indirect borrowing of an entity from other individuals or entities which are not resident in Spanish territory, excluding banking institutions, to which it is related exceeds the result of applying the coefficient of 3 to the entity's fiscal capital (equity), the interest accrued on the excess will be treated as a dividend for tax purposes.

Taxpayers may submit to the Tax Administration a proposal for the application of a different coefficient based on the arm's-length borrowings that the taxpayer would have been able to obtain from unrelated individuals or entities, provided that the transaction is not carried out with individuals or entities resident for tax purposes in territories listed as tax havens by tax regulations.

Thin capitalisation rules will not apply when the related entity which is not resident in Spain for tax purposes is resident in another EU member state, unless it is resident in a territory listed as a tax haven by tax regulations.

Please note that thin capitalisation rules are additional to, and not a substitute for, the transfer pricing requirement that related-party finance be at arm's length.

### *Controlled foreign company (CFC) regime*

Spanish CFC rules seek to avoid the effects produced when Spanish tax resident entities or individuals place their capital in low-taxed foreign entities to avoid including passive income generated by such capital in their taxable bases.

Under this regime, Spanish tax resident entities are subject to Spanish CIT on certain kinds of positive passive income obtained by entities which are not resident in the European Union for tax purposes in which they own, individually or together with tax related entities or persons, more than 50% of the share capital, equity, profits, or voting rights, provided that the CIT due by the non-resident entity is below 75% of the tax that would have been due in Spain.

The types of passive income to which CFC rules apply are as follows: (i) income from immovable property not used for business activities; (ii) income derived from equity in other entities or from capital assigned to third parties (interest and dividends); (iii) transfer of the above mentioned immovable property and financial assets; and (iv) income arising from credit, financial, insurance, and service activities carried out directly or indirectly with related Spanish tax resident entities in which a tax deductible expense is generated.

Passive income mentioned in numbers (i) to (iii) above obtained by the non-resident entity will not be considered taxable income of the Spanish tax resident entity when it arises from entities in which the latter holds a direct or indirect interest of over 5%, provided that the non-resident entity controls and manages the interest using the relevant human and material resources and provided at least 85% of the income obtained from such participated entities comes from business activities.

Moreover, the passive income mentioned in numbers (i) to (iii) above will not be included in the Spanish entity's taxable base when it amounts in total to less than 15% of the total profits obtained by the CFC or less than 4% of its total turnover.

## *Tax credits and incentives*

### *CIT relief*

No specific tax relief is established in Spanish law for foreign investors. Relief may be availed of by Spanish and foreign-owned companies alike. The tax relief available under CIT law in Spain is as follows:

Current tax credits for promoting certain investments must be reduced and finally eliminated. However, the largest tax credits are maintained (tax credit to prevent internal and international double taxation, tax credit for the reinvestment of extraordinary profits, and tax credit for R&D).

### Tax relief for business activity/place of business activity

- 50% tax credit on CIT levied on income obtained in Ceuta and Melilla through companies established and carrying on activities during a full business cycle in these enclaves.
- 99% tax credit on the CIT levied on income obtained from the supply of local public services, except when the state company in question is owned, partially or wholly, by a quoted/non-quoted company or individual.
- 38% tax credit (50% prior to 2011) on the CIT levied on income obtained from exports of films, books, and similar cultural items if profits are reinvested in the acquisition of assets used for such activities. This tax credit will be gradually reduced over the coming years and eliminated in 2014.

### R&D credits

A 25% tax credit can be availed of for expenses incurred from R&D activities. If the expenses are higher than the average R&D expenses incurred by the company during the previous two years, the tax credit is 42% for the excess amount.

An additional tax credit of 17% can be availed of for staff expenses incurred for staff exclusively carrying out and qualified to carry out R&D activities.

An 8% tax credit can be availed of for investments made in tangible fixed assets (excluding buildings) and intangible assets which are exclusively assigned to R&D activities.

### Technological innovation credits

An 8% tax credit can be availed of for technological innovation activities. For tax periods commencing on or after 6 March 2011, such tax credit is increased to 12%.

### Tax credit for environmental investments

Tax credit for environmental investments in installations is increased for tax periods commencing on or after 6 March 2011. Depending on when the investment is made, the tax credit for these investments is as follows:

- For investments made in tax periods commencing between 1 January 2010 and 31 December 2010, the tax credit is 2%.
- No tax credit may be availed of for investments made in tax periods commencing between 1 January 2011 and 5 March 2011.
- For investments made in tax periods commencing on or after 6 March 2011, the tax credit is 8%.

Finally, the tax credit for environmental investments in vehicles and the tax credit for environmental investments in assets to promote the exploitation of renewable energies are eliminated for tax periods commencing on or after 1 January 2011.

### Reinvestment of extraordinary income

A 12% tax credit can be availed of for sales of assets which are used for the company's business activities when the amount obtained from the sale is reinvested in similar types of assets during a four-year period (as from one year prior to the sale up to three years after the sale). This tax credit therefore reduces the effective tax levied on sales of certain assets to 18%.

In the case of a sale of company shares, to be eligible for this tax credit, the interest in the company must be a minimum of 5% and must have been held for more than one year prior to the sale.

The asset in which the reinvestment is made must be maintained for five years (three in the case of moveable assets) unless its useful life is shorter.

### The following tax credits have been eliminated for tax periods commencing on or after 1 January 2011

- Tax credit for the promotion of information and communications technologies: 3%.
- Tax credit for investments in vehicle navigation and tracking systems, adaptation of vehicles for the disabled, and nursery school fees for staff's children: 2%.
- Tax credit for contributions made by employers to certain staff pension schemes: 2%.
- Tax credit for export activities: 3%

The 18% tax credit for film productions will be eliminated in 2012.

The tax credit for investments in heritage assets (8% in 2010 and 6% in 2011) and book publishing (3% in 2010 and 2% in 2011) will be eliminated in 2014.

A tax credit of 1% to 2% may be obtained on expenses incurred in, or related to, financing ongoing staff education programmes. This tax credit can also be availed of for expenses incurred by companies to familiarise staff in the use of new technologies.

These expenses are not a benefit in kind for the staff. The tax credit related to education programmes will be eliminated in 2011, but the tax credit related to expenses incurred to familiarise staff in the use of new technologies will not be eliminated until 2012.

### Other tax relief

A tax credit can be applied for increases in the number of disabled workers contracted per year on a permanent and full-time basis (EUR 6,000 per worker contracted). This increase is calculated by taking the average number of company workers meeting these requirements in the tax year in question and comparing it with the company's average number of staff in the previous tax year.

## *Special tax regimes*

Special tax regimes are applicable, among others, in the following cases:

### Spanish and European Economic Interest Groupings and Temporary Consortia of Entities

- Spanish Economic Interest Groupings (SEIGs) that meet certain requirements will not be subject to Spanish CIT on the part of the taxable income which corresponds to members resident in Spain for tax purposes. Such part of the positive or negative taxable income shall be deemed to be the profits/losses of the SEIG members. The proportional part of tax credits and payments in advance will also be assigned to the Spanish tax resident members of the SEIG where they are subject to corporate or personal income tax. Dividends distributed to SEIG members that have been subject to imputation will not be taxed under corporate or personal income tax on distributions. Dividends distributed to Spanish non-resident SEIG members will be taxed in accordance with the Spanish Non-Resident Income Tax Act and Conventions for the Avoidance of Double Taxation.
- European Economic Interest Groupings (EEIGs) will be taxed under the above-mentioned regime with the following exception: EEIG will not be subject to Spanish CIT.

  If the EEIG is not resident in Spain for tax purposes, Spanish tax resident members will include the corresponding part of the profits or losses determined for the grouping, corrected by applying the rules for determining taxable income for corporate or personal income tax purposes, as applicable. When the activity carried out by the members through the grouping determines the existence of a PE abroad, the rules provided for in this Law or in the respective treaty for the avoidance of double international taxation will be applicable.

  Non-Spanish tax resident members will only be subject to Spanish Non-Resident Income Tax when the activity they perform through the grouping determines the existence of a PE in Spanish territory.

  Dividends distributed to non-Spanish tax resident members that have been subject to imputation will not be taxed in Spain on the distribution.

- Temporary Consortia of Entities (TCEs) are taxed under the SEIG regime. As an exception, members of a TCE that operates abroad may benefit from exemptions for income obtained abroad.

### Restructuring transactions

For restructuring transactions, the special tax regime is a tax neutrality regime implemented under EU Directive 90/434. As a general rule, under this regime, asset transfers carried out through such transactions do not have any tax implications (either from a direct, indirect, or other Spanish tax perspective) for the parties involved (transferor, beneficiary, and shareholder), until a subsequent transfer takes place which is not protected by this regime.

The transactions which can be taxed under this regime are mergers, global transfers, spin-offs of business units/majority interests, splits, share-to-share transactions, contributions of business units, and contributions of assets (this last transaction is not fully tax-protected). Each of them must comply with a series of requirements for the application of the regime.

The tax credit position of a company dissolved as a result of a tax-protected restructuring transaction is 'acquired' in full by the beneficiary company in the case of universal succession.

The 'acquired' tax credits only include tax credits which are obtained in relation to assets transferred in transactions where the transferor is not dissolved or the succession is not a full succession for Spanish commercial purposes.

Regarding tax losses, the Spanish tax authorities hold the view that tax losses may not be transferred when the transferring company is not dissolved. When the transferring company is dissolved, the tax losses may be applied by the beneficiary company up to certain limits and subject to certain restrictions.

Financial goodwill arising in a merger transaction is amortised for tax purposes at a maximum annual rate of 5% at the level of the Spanish beneficiary company of the merger, if the seller of the shares giving rise to the 'merger' goodwill has been actually taxed for the equivalent capital gain in Spain or in any other EU country (excluding tax havens), and provided that certain requirements are met. Amortisation of financial goodwill does not have to be recorded in the profit and loss account for it to be tax deductible, although an annual amount must be charged to a non-distributable reserve (either from annual profits or from freely-distributable reserves), which must be at least the tax deductible amount.

This tax regime cannot be applied if the transaction is carried out for the purpose of tax fraud or evasion (anti-abuse clause). An additional anti-abuse clause in line with the clause established by the EU directive is established in Spanish law to ensure that the tax regime cannot be applied if the transaction is not carried out for valid economic reasons, such as the streamlining of activities or group restructuring to gain efficiency, but to obtain a tax benefit.

The tax authorities must be notified of the application of this tax regime.

### Tax transparency

Tax transparency (international controlled foreign company (CFC) rules) is not applicable for companies resident in the European Union. *See CFC regime in the Group taxation section for more information.*

### Venture capital companies and funds

Venture capital companies (VCCs) and funds (VCFs) may benefit from the following tax regime if certain requirements are met:

- Dividends from target companies may benefit from a 100% tax credit for the avoidance of double taxation or tax exemption.

- Capital gains arising from the transfer of shares in target companies may be 99% exempted from CIT, provided that such shares have been held for a period between 2 and 15 years.
- Profit distributions to VCC and VCF shareholders may benefit from a 100% tax credit for the avoidance of double taxation if the shareholders are Spanish tax residents or have a PE in Spain. Income from profit distributions to non-Spanish tax resident shareholders without a PE in Spain is not subject to taxation in Spain unless it is obtained through a tax haven. The same regime applies to the transfer of shares in VCCs and VCFs.

### Collective Investment Institutions (CIIs)
CIIs are subject to CIT at a reduced rate of 1%. They are not entitled to apply any tax credits. Dividends distributed by these institutions are subject to the general WHT regime. Shareholders are taxed on dividends received from the CII and on capital gains obtained for the transfer of the CII without being entitled to the application of a tax credit for the avoidance of double taxation.

### Lease transactions
Financial leasing contracts with a purchase option that may be exercised at the end of the lease period may benefit from a special tax regime if they meet certain requirements. According to this regime, the lessee may deduct the following expenses from its taxable income:

- The part of the lease instalments corresponding to the financial charge (interest) paid to the lessor.
- The part of the lease instalments paid which corresponds to the recovery of the cost of the good. Tax deductibility for this amount may not exceed the result of applying twice the straight-line depreciation rate which corresponds to the good in question in accordance with the officially-approved depreciation tables.

### Spanish holding companies of foreign companies (Entidad de Tenencia de Valores Extranjeros or ETVE) regime
Spanish resident companies whose corporate purpose includes the holding and management of foreign companies' shares are granted some tax benefits subject to compliance with certain requirements.

The tax authorities must be notified of the application of this tax regime.

Companies taxed under this tax regime are granted a tax exemption on dividends and capital gains when they have a 5% direct interest or, if their interest is less than 5%, when the acquisition value of their interest is at least EUR 6 million.

In addition, the distribution of profits by the holding company to non-resident companies or individual shareholders is not taxable in Spain (unless the profits are distributed to a tax haven). Resident company shareholders are now entitled to an internal tax credit on dividends under Spanish law.

### Small and medium-sized companies
Small and medium-sized companies are eligible for tax relief such as accelerated depreciation/amortisation, or more favourable bad debt provision treatment. Accelerated depreciation/amortisation can be applied for assets acquired using amounts obtained from sales of trading assets. To be eligible for this relief, turnover in the previous tax year must not exceed EUR 10 million (EUR 8 million for tax

years starting prior to 1 January 2011). In the case of a group, the turnover of all the companies must be considered for this purpose.

A reduced CIT rate of 25% is levied on the first EUR 300,000 of annual tax profits (EUR 120,202 for tax years starting prior to 1 January 2011).

Small and medium-sized businesses are eligible for a tax credit of 3% of investments made and expenses incurred to improve their capabilities in internet access and business information management to improve the efficiency of their internal processes. This tax credit may be carried forward for a period of 15 years and will be eliminated in 2011.

### *Special economic and tax regime of the Canary Islands*

Due to the distance to and isolation of the Canary Islands, they have traditionally enjoyed a special economic and tax regime with specific economic and tax measures different to those established for the rest of Spain.

Regarding direct taxes, the Canary Island economic and tax regime establishes the following tax benefits for companies and businesses domiciled in the Canary Islands or with a PE in the Canary Islands:

- Up to 90% of annual undistributed accounting profits can be allocated to a special investment reserve and not taxed providing that they are invested within a four-year period (including the period during which the profits are obtained) in qualifying assets in the Canary Islands, or in certain public debt securities or shares in other companies operating in the Canary Islands which invest in qualifying assets.
- Most Spanish CIT relief is 80% higher for companies and businesses located in the Canary Islands.
- A 25% tax credit can be availed of for investments in new tangible fixed assets and, subject to compliance with certain requirements, second-hand assets.
- A tax credit of 50% of the CIT liability is granted for taxable income generated from the production of tangible goods while carrying on agricultural, farming, industrial, and fishing activities.
- A tax credit of 90% of the CIT liability is granted for profits of shipping companies generated from ships registered in the Canary Islands Special Ships and Shipping Companies Register. For sailors of such ships, a 50% tax exemption can be applied to personal income tax levied on their employment income and a 90% reduction to the part of their Social Security contributions paid by their employers.

Regarding indirect taxes, in addition to lower taxation through the Canary Island general indirect tax (IGIC at the general rate of 5%) compared to VAT and specific IGIC exemptions, the following should be noted:

- Companies domiciled in the Canary Islands which are CIT-payers and which are newly incorporated, start new activities or improve their existing activities may benefit from the following tax relief:
  - Exemption from IGIC on supplies and imports of capital goods if the company has a deduction percentage that is not 100%.
  - Shipping companies qualify for an exemption from transfer tax for any contracts related to ships registered in the Canary Islands Special Ships and Shipping Companies Register.

- Custom Free areas are available. Upon EU demand, there are restrictions on the application of certain tax relief (special investment reserve, tax credits for production, and new business indirect tax relief) for the following industrial sectors: shipbuilding, synthetic fibres, automobile, iron and steel, and coal.

### *Canary Islands Special Zone tax regime*

In January 2000, a special Canary Island Special Zone tax regime was approved by the European Union. The main regulations of this regime, established by the Spanish government, are as follows:

- New companies may qualify for the application of this tax regime and, on the approval of the tax authorities, may be registered up to 31 December 2013 (applying the tax regime up to 31 December 2019). This may be extended by the European Union.
- To qualify for this tax regime, the company must:
  - covenant to make an investment in fixed assets of at least EUR 100,000 in Gran Canaria or Tenerife, or EUR 50,000 in Fuerteventura, Lanzarote, La Palma, El Hierro, or La Gomera, within the first two years of their business activity
  - covenant to create at least five new jobs in Gran Canaria or Tenerife, or three in the other islands
  - provide a description of the business activities to be carried out which support the company's solvency, viability, international competitiveness, and contribution to the economic and social development of the Canary Islands
  - establish its registered office and place of effective management in the Special Area
  - have at least one company director who resides in the Canary Islands, and
  - carry out one of the qualifying business activities.
- The territory where this tax regime can be applied includes all the Canary Islands, except for companies which intend to carry out industrial or commercial activities involving tangible goods, which must be located in specific controlled areas.
- Companies applying the tax regime may operate outside the Canary Islands through branches if separate accounting books are kept, but the tax regime will not be applicable to such branches' activities.
- Activities for which the tax regime can be applied include a wide range of industrial and commercial activities, most services and holdings. Credit and insurance entities are excluded, and no stock exchanges are allowed.
- Companies applying the tax regime are subject to CIT in Spain at a 4% rate for companies authorised from 1 January 2007 onwards and at a variable rate of between 1% and 5% for companies authorised before this date. The special 4% rate shall be levied on a maximum amount of the taxable income which will depend on the number of jobs created and the type of activity carried out by the company. The general CIT regime establishes a 30% tax rate for Spanish companies applicable as from 2008. For small companies, the tax rate is 25% for the first EUR 300,000 of profits (EUR 120,202 for tax years starting prior to 1 January 2010) and 30% for remaining profits.
- Under this tax regime, companies can avail themselves of large tax exemptions for IGIC, transfer tax, and stamp duty, and large reductions and simplified regulations for local taxes.
- Interest and some other returns from moveable goods paid by companies under this tax regime are exempt from Spanish Non-Residents' Income Tax, except when paid to residents in tax havens.
- Benefits established in the EU Parent-Subsidiary Directive are extended to non-EU residents. These benefits are not applicable when the income is paid to residents in tax havens.

- A fee of EUR 732.51 is payable to be registered as a company which applies this tax regime, and an annual fee of EUR 1,098.76 is payable to continue to be registered as qualifying for the tax regime.

Finally, the Spanish Parliament has recently proposed some amendments to the law regulating the Canary Island Special Zone tax regime, including, among other tax benefits, a reduction in the special CIT rate for companies which apply the regime to 1% for the first tax base segment.

### Foreign tax credit

*See Foreign income in the Income determination section for a description of double tax relief.*

## Withholding taxes

Ordinarily, WHT is the mechanism by which the Spanish tax authorities collect the final tax levied on non-residents. In the case of resident beneficiaries, however, it is simply an advance payment of a tax that is then normally self-assessed by the resident taxpayer in the final annual tax return.

The advance payment system of WHT for resident beneficiaries referred to above also applies if non-resident companies/individuals not established in Spain sell their title to Spanish real estate. In this case, the acquirer of the real estate must levy a 3% WHT on the selling price on account of the 19% tax chargeable to the seller on its capital gain. Other capital gains (for instance, from a sale by a non-resident of a substantial interest in a Spanish company where neither a tax treaty nor internal rules establish a tax exemption) are taxed in the hands of the non-resident transferor, but the mechanics of levying the tax are not those of a WHT. In this case, the non-resident's tax is paid directly, through its representative or by the depositor or manager of the assets in question, if any.

The following table states the general WHT rates on income obtained by resident/non-resident companies. The most significant peculiarities regarding the rates for each type of income are stated in footnotes to the table.

### Withholding rates

| Recipient | Dividends (%) | Interest (%) | Royalties (%) |
|---|---|---|---|
| Resident corporations and individuals | 19 (1) | 19 (2a) | 19 (2b) |
| Non-resident corporations and individuals: | | | |
| Non-treaty | 19 (3) | 19 (4) | 24 (5) |
| Treaty (*): | | | |
| Albania | 10 (6) | 6 (10, 44) | 0 |
| Algeria | 5 (7) | 5 ( 8, 9, 10, 11) | 7 (12) |
| Argentina | 10 (14) | 12.5 (8,9, 10, 14) | 15 (15) |
| Australia | 15 | 10 | 10 |
| Austria | 10 (3, 16) | 5 (4) | 5 (5) |
| Belgium | 15 (3, 18) | 10 (4, 18, 19) | 5 (5, 18) |
| Bolivia | 10 (13, 18) | 15 ( 8, 9, 10, 14, 18) | 15 (18, 20) |
| Bosnia | 5 (21) | 7 (22) | 7 |

# Spain

| Recipient | Dividends (%) | Interest (%) | Royalties (%) |
|---|---|---|---|
| Brazil | 10 (23) | 15 (9, 24, 25) | 12.5 (26) |
| Bulgaria | 5 (3, 27) | 0 (4) | 0 (5) |
| Canada | 15 | 15 (28) | 10 (20, 28) |

Notes

The general rates in the table above are for guidance only and should not be treated as tax advice.

The rates above are for income obtained by non-residents which is not related to any PEs they may have in Spain.

(*) Aside from these tax treaties, the following tax treaties are not yet in force as they are currently being negotiated or are not yet approved or published: Armenia, Barbados, Georgia, Hong-Kong, Kuwait, Namibia, Nigeria, Panamá, Peru, Senegal, Singapore, and Syria.

1. If a corporate taxpayer, as a shareholder, is entitled to full tax relief on the dividend received, no WHT is levied. As a general rule, corporate shareholders with at least a 5% interest held for at least one year are granted full tax relief.
2. 
   a. The 19% WHT rate does not apply if, amongst other cases, the recipient is a resident bank or savings or other financial institution subject to CIT, provided that this income is not portfolio income. In addition, no WHT is levied on interest arising between companies taxed under the tax consolidation regime.
   b. A 19% WHT rate is levied on income generated under royalty and technical assistance agreements, from leases, or from the granting of rights when ownership is not transferred. A 24% rate is levied on fees received by a company for the transfer of rights to an image or consent or authorisation to its use.
3. Implementation of the EU Parent-Subsidiary Directive in Spanish law gives EU shareholders a WHT exemption on dividends from Spanish companies, subject to compliance with certain requirements. Luxembourg recipients of income which are companies under paragraph 1 of the protocol to the Tax Treaty with Spain (holding companies) are not allowed this exemption.
4. The EU Interest and Royalties Directive WHT exemption for interest obtained by EU lenders is applicable when appropriate.
5. Taxable income from supplies of services, technical assistance, or assembly/installation work under engineering contracts provided or carried out by non-resident companies with no PE in Spain does not follow the general rule for gross income. In such cases, total income can be reduced by related

staff costs, certain supplies (water, electricity, telephone) and materials used for the services/work, provided that, in the case of staff costs, evidence can be furnished that they were actually taxed in Spain. According to the EU Interest and Royalties Directive, royalties paid to other EU member state associate companies are exempt from WHT as of 1 July 2011 (WHT was limited to a maximum 10% prior to 1 July 2011).

6. A 5% WHT is levied if the beneficial owner is an Albanian company which holds at least 10% of the capital of the company paying the dividends; no WHT is levied if the Albanian company holds at least 75% of the capital of the Spanish company paying the dividends.
7. Levied if the recipient is a company holding at least a 10% interest in the paying company; otherwise, a 15% rate is levied.
8. Interest paid by certain public institutions is tax exempt.
9. Interest paid to certain public institutions is tax exempt.
10. Interest arising from the acquisition of commercial, industrial or scientific equipment is tax exempt.
11. Interest paid on loans granted by a bank or other financial institution is tax exempt.
12. For royalties for any copyright of artistic, scientific, or literary work (including cinematograph films and films or tapes for radio or television broadcasting), the rate levied is 14%.
13. Levied if the recipient is a company holding at least a 25% interest in the paying company; otherwise, a 15% rate is levied.
14. No WHT is levied on interest when both contracting states agree this and the loan is for no less than five years.
15. A 3% WHT rate is levied on royalties for the use of or right to use news. A 5% WHT rate is levied on royalties for any copyright of artistic, theatrical, musical, or literary work. A 10% WHT rate is levied on royalties for the use of or right to use copyright of industrial property, know-how, or scientific, commercial, or industrial equipment.
16. Levied if the recipient is a company holding a direct interest of at least 50% in the paying company for at least one year; otherwise, a 15% rate is levied.
17. No WHT is levied if the recipient is a company holding at least a 25% interest in the paying company.
18. Reduced WHT rates or exemptions are not levied/applied if the income is paid to a company resident in a contracting state more than 50% of whose shares are directly or indirectly held by non-residents. This clause will not apply if the company can prove that it carries out important industrial or commercial activities and does not merely manage or hold shares.
19. A tax exemption can be applied to interest on commercial loans, loans guaranteed by public bodies for the promotion of exports, and on current accounts in banks or nominative advances between banks of both contracting states.
20. Royalties for any copyright of literary, theatrical, musical, or artistic work (with some exceptions, such as films and TV programs) are exempt from WHT.
21. 5% WHT is levied if the recipient (beneficial owner) is the shareholder of the paying company with at least a 20% interest; otherwise, 10% WHT is levied.
22. No WHT is levied on interest if: (i) the recipient is the other contracting state, its central bank, or its political divisions; (ii) the payer is a contracting state or its political divisions; (iii) the interest arises from a loan or credit granted or guaranteed by a contracting state or its political divisions; (iv) the recipient is a financial institution; or (v) the recipient is a pension fund qualifying for tax purposes in a contracting state and the income from such fund is tax exempt in the contracting state paying the dividend.
23. Levied if the recipient is a company with at least a 25% interest in the paying company with voting rights; otherwise, a 15% rate is levied.
24. The maximum WHT is 10% for interest paid to financial institutions for loans and credits granted for a minimum term of ten years for the purchase of capital equipment.
25. Interest arising from securities issued by a contracting state is exempt from WHT.
26. A 10% WHT rate is levied on royalties for copyrights of any literary, scientific, or artistic work (including films and TV programs).
27. Levied if the beneficial owner is a company (excluding partnerships) with at least a 25% interest in the paying company held directly or indirectly; otherwise, a 15% rate is levied.
28. A reduced WHT rate is only levied if the income is taxed in Canada; otherwise the general rate is levied.
29. Levied if the recipient is a company with at least a 20% interest in the paying company held directly or indirectly; otherwise, a 10% rate is levied.
30. Interest arising from bank or insurance company loans, bonds, some securities that are regularly negotiated on stock markets, and credit sales of industrial equipment are taxed at a 5% tax rate.
31. A 5% WHT rate is levied on royalties for the use of industrial, commercial or scientific equipment.
32. WHT is levied on 60% of gross royalties for the use of industrial, commercial or scientific equipment.
33. A 0% WHT rate is levied if the recipient is a company with at least a 20% interest in the paying company held directly or indirectly.
34. No WHT is levied if: (i) the beneficiary is a contracting state, one of its political subdivisions or one of its local entities; (ii) interest is paid in connection with the sale on credit of merchandise or equipment to a company of a contracting state; or (iii) interest is paid on a loan granted by a bank or financial institution resident in a contracting state.
35. A 5% WHT is levied if the beneficial owner is a company which directly holds at least 20% of the capital of the company paying the dividends.
36. 
    a. 5% WHT is levied if the interest is paid on a long-term loan (more than five years).

b. No WHT is levied: (i) if interest is paid to a Croatian bank, (ii) on interest arising from the acquisition of commercial, industrial, or scientific equipment, (iii) on interest arising from a credit sale.

37. No WHT is levied if: (i) the beneficiary is a contracting state, one of its political subdivisions or one of its local entities; (ii) interest is paid in connection with the sale on credit of merchandise or equipment to a company of a contracting state; or (iii) interest is paid on a long-term loan (five or more years) granted by a bank or financial institution resident in a contracting state.
38. Royalties for copyrights of any literary, theatrical, musical, or artistic work, excluding films and TV programs, are tax exempt if the recipient is resident in the other contracting state and taxed on such income in such state.
39. A 5% WHT rate is levied on interest arising from the sale of industrial, commercial or scientific equipment, the sale of merchandise from one business to another business, or the financing of construction, installation or assembly works. No WHT is levied if the interest is paid on a long term loan (more than five years) or if the interest is paid to the other contracting state or one of its political subdivisions or a financial institution totally owned by the other contracting state or one of its political subdivisions.
40. A 5% WHT rate is levied on royalties for copyrights of any literary, theatrical, musical, or artistic work (excluding films and TV programs).
41. A 9% WHT rate is levied on the gross amount of the dividends if the beneficiary owner is a company (other than a partnership) which has at least a 25% direct interest in the company paying the dividends.
42. WHT is not levied on interest if the recipient is a contracting state, one of its political subdivisions, or one of its public bodies or local authorities, or if the interest is paid to the Central Bank of the other contracting state.
43. No WHT is levied if the recipient is a company with at least a 50% direct interest in the company paying the dividends, provided that the dividends are distributed from profits taxed in Spain.
44. No WHT is levied on interest if: (i) the recipient is the other contracting state, its central bank or its political divisions; (ii) the payer is a contracting state or its political divisions, (iii) the interest arises from a loan or credit granted or guaranteed by a contracting state or its political divisions, (iv) the recipient is a qualifying financial institution; or (v) the recipient is a pension fund qualifying for tax purposes in a contracting state and the income from such fund is tax exempt in the contracting state paying the dividend.
45. No WHT is levied if the French company has at least a 10% direct interest in the company distributing the dividend.
46. No WHT is levied if the French company receives interest (i) from the other contracting state or any of its political divisions, (ii) from a resident in the other contracting state from an underlying commercial or industrial activity, (iii) in connection with a credit sale of industrial, commercial or scientific equipment, or (iv) for a loan granted by a financial institution.
47. No WHT is levied on royalties on copyright of any literary or artistic work (excluding films and TV programs) if the recipient is the beneficiary owner or royalties paid for the use or licensing of containers and bare hull vessels or aircraft used in international trade.
48. No WHT is levied on interest paid to ‘Deutsche Bundesbank’ or ‘Kreditanstalt für Wiederaufbau’.
49. Levied if the recipient is a company with at least a 25% direct interest in the paying company; otherwise, a 10% rate is levied.
50. No WHT is levied on interest if: (i) the interest is paid by a contracting state, one of its political subdivisions, or one of its local entities; (ii) the interest is paid to the other contracting state, one of its political subdivisions, or one of its local entities or to a body (including financial institutions) of such contracting state; or (iii) the interest is paid to another body (including financial institutions) in relation to loans granted by virtue of an agreement between both contracting states.
51. No WHT is levied on interest paid to the Central Bank of the other contracting state.
52. No WHT is levied on interest paid to companies in the other contracting state if the operation that generates the debt has been authorised by the government of the state where the company paying the interest is resident.
53. A 10% WHT rate is levied on royalties for the use or cession of use of industrial, commercial, or scientific equipment. The general 20% WHT rate is levied on technical services and other royalties.
54. No WHT is levied on interest if the recipient is a contracting state, one of its political subdivisions, or one of its local entities or if the interest is paid to the Central Bank or a financial institution controlled by the other contracting state, its political subdivisions, or its local entities.
55. No WHT is levied on interest arising from the credit sale of industrial, commercial, or scientific equipment.
56. Levied if the recipient is a company with at least a 20% interest in the paying company; otherwise, a 10% rate is levied.
57. Royalties for copyright on literary, theatrical, musical, or artistic work are taxed at a 5% WHT rate. Royalties on films or other means of audio or video transmission, for the use or right to use industrial, commercial, or scientific equipment, or on scientific works or under agreements between both states are taxed at an 8% rate.
58. A 5% WHT rate is levied on interest arising from the sale of industrial, commercial, or scientific equipment, the sale of merchandise from one business to another business or loans granted by a financial institution.
59. A 5% WHT rate is levied on royalties for copyright on literary, theatrical, musical, or artistic work (excluding films and TV programs).
60. A 4% WHT rate is levied on royalties for copyright on literary, theatrical, musical, or artistic work (excluding films and TV programs).

61. Reduced WHT rates are not levied when more than 75% of the shares of the recipient company resident in a contracting state are owned directly or indirectly by non-residents and the income generated by the paying company is not taxed in its country of residence.
62. Levied if the recipient is a company with at least a 25% interest in the paying company; otherwise, a 15% rate is levied.
63. No WHT is levied on interest arising from a loan guaranteed by a contracting state.
64. Consideration received for waiving, either totally or partially, the use or right to use goods or rights is considered to be a royalty.
65. No WHT is levied on interest paid in connection with the sale on credit of merchandise or equipment to a company of a contracting state or on interest paid on a long-term loan (five or more years) granted by a bank or credit institution resident in a contracting state.
66. No WHT is levied if the recipient is a company with at least a 5% direct interest in the paying company.
67. A 5% WHT rate is levied on royalties for technical services.
68. No WHT is levied on dividends paid to a shareholder resident in the other contracting state of the company distributing the dividend with at least a 25% interest.
69. A 10% WHT rate is levied on interest received by a bank (beneficial owner).
70. Levied if the recipient is a company with at least a 50% direct interest in the paying company. A 5% WHT rate is levied if the recipient is a shareholder with at least a 25% direct interest; otherwise, a 10% rate is levied. WHT is reduced to 5% if the recipient company is not taxed in the Netherlands for this dividend.
71. WHT is reduced to 10% if the recipient is a Dutch company with at least a 50% direct interest in the paying company or if the recipient holds 25% of its capital and another Dutch company holds at least the other 25%.
72. No WHT is levied on capital gains from sales of assets/rights when they are considered to be a royalty.
73.
    a. No WHT is levied on fees paid for the use or licensing of containers and bare hull vessels or aircraft used in international trade.
    b. A 5% WHT is levied if the beneficial owner is a company that has owned directly, during a period of six months, at least 50% of voting shares of the company paying the dividends; a 7.5% WHT is levied if the beneficial owner is a company that has owned directly, during a period of six months, at least 25% of voting shares of the company paying the dividends.
74. Levied if the recipient is a shareholder of the paying company holding voting rights with at least a 10% direct interest; otherwise, a 15% rate is levied.
75. A 10% WHT rate is levied on interest paid for bonds or similar securities generally offered to investors and related to transfers of industrial, commercial, or scientific equipment. No WHT is levied on interest from bonds or similar securities issued by the state or a local entity or from loans given or guaranteed by either of the two contracting states, Central Banks, or financial institutions as agreed between the contracting states.
76. A 20% WHT rate is levied on royalties for films or audio or TV tapes.
77. No WHT is levied on interest from loans granted or guaranteed by a contracting state.
78. If the recipient has invested more than EUR 100,000 in the company that pays the dividend or the dividend is tax exempt in its country of residence, the WHT rate levied is 10%. If both of these requirements are fulfilled, the rate applicable is 5%.
79. Interest on loans with a maturity period of over seven years is tax exempt.
80. A 10% WHT rate is levied on any patents, trademarks, designs or models, plans, secret formulae, or processes and computer software, or for the use of, or the right to use, industrial, commercial, or scientific equipment, or for information concerning industrial, commercial, or scientific experiences. A 5% WHT rate is levied on any copyright of literary, artistic, or scientific work, excluding computer software and including cinematographic films or tapes used for radio or television broadcasting.
81. No WHT is levied on interest paid to a contracting state, one of its political subdivisions, or one of its local entities or interest paid in connection with the sale on credit of merchandise or equipment to a company of a contracting state or interest paid on any long-term loan (seven years minimum) granted by a bank resident in a contracting state.
82. No WHT is levied on interest arising from the credit sale of industrial, commercial, or scientific equipment or merchandise.
83. No WHT is levied on dividends when they are paid to a shareholder with at least a 25% interest held for at least two years, provided that the company distributing the dividends is effectively taxed.
84. No WHT is levied on interest paid to a bank resident in Switzerland on a long-term loan (over five years).
85. No WHT is levied if the royalties are paid between associated companies, affiliated by at least a 25% direct interest held for at least two years or both held by a third company with at least a 25% interest in both companies, and CIT is levied on all of the companies.
86.
    a. A 10% WHT rate is levied on interest received by financial and insurance entities. No WHT is levied on interest from loans granted by the government, Central Bank, or certain institutions.
    b. A 5% WHT rate is levied on royalties for any copyright of literary, artistic, theatrical, musical, or scientific work (excluding cinematograph films and films or tapes for radio or television broadcasting); an 8% WHT is levied on financial leasing related with the use or the right to use industrial, commercial, or scientific equipment.

87.
   a. Reduced WHT rates or exemptions are not levied/applied if the income is paid to a company resident in a contracting state more than 75% of whose shares are directly or indirectly held by non-residents and such income is not subject to taxation in such contracting state.
   b. Levied if the recipient is a shareholder of the paying company with at least a 50% interest; otherwise, a 15% rate is levied.
88. A 5% WHT rate is levied for long-term loans (more than seven years).
89. The WHT rate is 10% if the interest arises from a loan granted by a bank or is related to a credit acquisition of merchandise or equipment.
90. Levied if the recipient is a shareholder of the paying company with at least a 10% interest; otherwise, a 15% rate is levied.
91.
   a. No WHT is levied on royalties paid for the use or licensing of containers used in international trade.
   b. No WHT is levied on dividends when they are paid to a company holding at least a 75% direct interest in the paying company.
92. No WHT is levied if the interest is paid on a long-term loan (more than three years) to finance investment projects, if the interest is paid to a pension fund that meets certain requirements, or if the interest is paid in relation to a credit acquisition of merchandise, equipment, or services.
93. A 5% WHT is levied on royalties for any copyright of literary, artistic, or scientific work.
94. A 4.95% WHT rate is levied on interest received by financial institutions.
95. No WHT is levied on interest if: (i) the recipient is the other contracting state, its central bank, or its political divisions; (ii) the interest is paid by one contracting state or its political divisions, (iii) the interest arises from a loan or credit granted or guaranteed by a contracting state to promote exports and development, (iv) the recipient is a pension fund qualifying for tax purposes in a contracting state and the income generated from the fund is tax exempt in the contracting state paying the dividend, or (v) the interest is paid in relation to the credit acquisition of industrial, commercial or scientific equipment.
96. Levied if the recipient is a shareholder of the paying company with at least a 50% interest. A 10% WHT rate is levied if the recipient is a company with at least a 25% direct interest; otherwise, a 15% rate is levied.
97. No WHT is levied on interest arising from loans granted or guaranteed by qualifying public institution or interest paid to public financial institutions.

# *Tax administration*

## *Returns*

The tax system in Spain is a self-assessment system, and tax returns may be inspected by the tax authorities. The tax year for CIT purposes is the company's accounting year. The tax year cannot exceed 12 months, and the commencement, termination, or change of a tax year can give rise to a period of less than one year.

Annual CIT returns must be filed and the tax paid within 25 calendar days following the six months subsequent to the end of the tax year (i.e. if the tax year coincides with the calendar year, the return must be filed between 1 July and 25 July of the following calendar year).

## *Payment of CIT*

For CIT, three on-account payments of the annual tax payment must be made during the first 20 calendar days of April, October, and December. Large companies must calculate these advance payments as a percentage (21%) of their annual tax profits for each period, i.e. at 31 March, 30 September, and 30 November. Some allowances and the tax year advance payments can be credited against this percentage of tax profits. Small companies can opt to calculate their advance payments in the same way as large companies or to apply a rate (currently 18%) on the tax liability arising from the CIT returns that should have been filed in April, October, and December.

## Other issues

### *Special tax regime applicable in the Basque Country*

The three provinces that make up the region of the Basque Country (Alava, Guipúzcoa and Vizcaya) have an 'economic agreement' with Spain's central government (laid down and regulated by Law 12 of 23 May 2002) in accordance with which these regions are granted the right to regulate their own tax regimes.

There are certain provisions in this law regarding CIT which make this area of Spain more attractive for companies.

#### General tax rate

The general tax rate is 28%.

#### Lower tax rates

A reduced rate of 24% is levied on small companies. From 1 January 2010, a small company is considered to be a company which meets the following requirements in the year prior to the application of the special tax regime:

- Carries on an economic business activity.
- Net turnover or assets under EUR 10 million.
- Average number of staff under 50.
- An interest of 25% or more in the company is not held, directly or indirectly, by a company that does not meet the above requirements.

A 20% rate (24% in Guipúzcoa) is levied on real estate companies which comply with the following requirements:

- Their share capital is wholly owned by individuals during the whole tax year.
- More than half of their assets are securities or more than half of their assets are not used for economic business activities during at least 90 days of the tax year.
- At least 90% of their profits are generated from investment income and capital gains.

A 21% rate is levied on companies that are floated on the Bilbao Stock Exchange and on brokerages and cooperatives. Companies that are floated on the Bilbao Stock Exchange are taxed at this rate for three years, as long as they are in compliance with certain requirements.

#### Tax-loss carryforwards

Tax losses may be carried forward for the following 15 years in Guipúzcoa. In Vizcaya and Alava, there is no time limit for the offsetting of tax losses.

#### Tax deductibility of amortisation of goodwill and intangible assets

Amortisation recorded for intangible assets (irrespective of whether they have a specific useful life or not), including goodwill, is tax deductible up to a maximum annual limit of 20%, subject to compliance with the following requirements:

- The assets have been acquired for consideration.
- The acquiring and transferring companies are not associated parties.

#### Financial goodwill

Financial goodwill is tax deductible over a period of five years when at least a 5% interest is acquired in the company and these shares are not quoted on a Stock

Exchange or, if they are quoted on a Stock Exchange, they are shares of group or associated companies.

If the company from which the shares have been acquired has an interest in another company, the equity, assets and rights recorded in the group's consolidated annual accounts must be taken into consideration for the purpose of calculating the amount of the financial goodwill.

If the company from which the shares have been acquired is a non-resident company, in addition to the requirements stated above, the following requirements must be fulfilled:

- The company is subject in its country of residence to a tax which is identical or similar to Spanish CIT.
- The company carries on business activities abroad.

If the shares are not acquired on a stock market, the company which acquires the shares must not be in any of the situations provided for in Article 42 of the Spanish Commercial Code in relation to the transferring company.

### Depreciation periods
The depreciation periods for assets are shorter than those under state CIT law.

### Reinvestment of extraordinary income
Income obtained from the sale of tangible fixed assets or intangible assets can be deducted from taxable income, subject to compliance with the following requirements:

- The amount obtained from the sale is reinvested in similar types of assets within a four-year period (as from one year prior to the sale up to three years after the sale).
- The asset in which the reinvestment is made is maintained for five years (three in the case of movable assets), unless its useful life is shorter.
- For sales of shares in other companies when the interest held is at least 5% and has been held or a period of one year prior to the date of sale, 60% of the income obtained from the sale can be deducted from taxable income.

### Income generated from intellectual or industrial property
30% of the income obtained from the transfer of intellectual or industrial property rights can be deducted from taxable income, subject to compliance with certain requirements, and 60% if the company has created the intellectual or industrial property itself. There are no quantity limits to be complied with for the application of this deduction.

### Investments in new tangible fixed assets
A 10% tax credit can be applied to investments in new tangible fixed assets, subject to compliance with certain requirements. The minimum depreciation period for the assets, excluding computer equipment, is five years.

The total amount of the investment must be over EUR 60,100 and the investment must comply with at least one of the following requirements:

- Exceeds 10% of the carrying amounts (minus depreciation/amortisation) of the company's tangible fixed assets, buildings and software during the previous year.
- Exceeds 15% of the carrying amount of the same type of tangible fixed assets of the company during the previous year.

### Special reserve for investments in production
A tax credit can be applied for the distribution of profits to a special reserve for investments in production, subject to compliance with the following requirements:

- The company invests the amount distributed to the reserve in new tangible fixed assets during the following two years.
- These assets are maintained by the company during a five-year period or during their useful life if it is less than five years.
- The company's shareholder's equity is increased by the amount distributed to the reserve, and this increase is maintained for a five-year period as from the date on which the investment was made.

The tax credit is 10% of the profits distributed to the reserve.

### Research and development
A 30% tax credit can be availed of for expenses incurred from R&D activities. If the expenses are higher than the average expenses incurred by the company during the previous two years, the tax credit is 50% on the excess amount.

An additional tax credit of 20% can be availed of for the following expenses:

- Staff expenses incurred for staff exclusively carrying out and qualified to carry out R&D activities.
- Expenses incurred for projects contracted from certain universities and public organisations.

A 10% tax credit can be availed of for investments made in tangible fixed assets (excluding buildings) and intangible assets which are exclusively assigned to R&D activities.

### Technological innovation
A 20% or 15% tax credit can be availed of for certain expenses incurred for technological innovation.

### Expenses incurred for environmental conservation and improvement and for conservation of energy
Companies are eligible for a 30% tax credit for investments made in the equipment listed in the Basque List of Environmental Technologies, subject to compliance with certain requirements.

Companies may also qualify for a 15% tax credit for investments made and expenses incurred in respect of tangible fixed assets, subject to compliance with certain requirements.

### Export investments (e.g. foreign advertising, formation of companies, and branches abroad)
As in state CIT law, for periods starting from 1 January 2011, there is no tax credit for export investments.

### Staff training
A 10% tax credit can be applied to expenses incurred in staff training. If the expenses are higher than the average training expenses incurred by the company during the previous two years, the tax credit is 15% of the excess amount.

A tax credit can also be applied for expenses incurred to obtain the Occupational Health and Safety Assessment Sequence (OHSAS) 18001 certificate and to train staff in new technologies.

### Job creation
For tax years commencing during the period 1 January 2010 to 31 December 2011, the following tax credits can be availed of for job creation, subject to compliance with the requirements stated:

- EUR 4,600 for each job created provided that a permanent employment contract is signed with the employee.
- EUR 8,600 for each job created provided that a permanent employment contract is signed with the employee and a person who has special difficulties in finding employment is contracted.

The company's average number of staff with permanent employment contracts must be increased by at least the same number of contracts that generated the tax credit and this increase must be maintained by the company for two years.

### Corporate contribution to an EPSV
A tax credit of 10% applies to corporate contributions to certain pension schemes in favour of the staff of the company, up to the limit of EUR 8,000 per employee each year.

For tax years commencing before 31 December 2011, an additional tax credit of 50%, up to the limit of EUR 200 per employee, could be applied on the excess amount contributed in comparison with the previous year's contribution.

### Time limits for the application of tax credits
In Guipúzcoa, tax credits can be carried forward for a period of 15 years as from the date on which the company qualifies for them. In Vizcaya and Alava, there is no time limit for the application of tax credits.

### Limits on the amount of tax credit applied
The combined sum of all investment tax credits, excluding tax credits for R&D and technological innovation, may not exceed 45% of the company's CIT liability.

### Interim payments
There is no obligation to make interim payments on account of CIT.

### Special Regime for small and medium-sized companies
A small company is considered to be a company which meets the following requirements during the year prior to the application of the special tax regime:

- Carries on an economic business activity.
- Net turnover or assets under EUR 10 million.
- Average number of staff under 50.
- An interest of 25% or more in the company is not held, directly or indirectly, by a company that does not meet the above requirements.

A medium company is considered to be a company which meets the following requirements during the year prior to the application of the special tax regime:

- Carries on an economic business activity.

- Net turnover under EUR 50 million or assets under EUR 43 million.
- Average number of staff under 250.
- An interest of 25% or more in the company is not held, directly or indirectly, by a company that does not meet the above requirements.

The benefits derived from this special tax regime are as follows:

- Free depreciation for new tangible assets (except buildings) for small-sized companies (general free depreciation relief set forth for tax years 2009 to 2015 is not applicable in the Basque Country).
- Accelerated depreciation for new tangible assets (except buildings) for medium-sized companies.
- Global bad debt provisions up to 1% of credit sales and services of small- and medium-sized companies are tax deductible for CIT purposes. Provisions for possible insolvency of credit sales and services are tax deductible up to a limit of 1% of the amount of credit sales and services at the end of the period.

## Significant developments

The highlight of the 2011 Budget is the reduction of the corporate income tax (CIT) rates, as follows:

| Entities | CIT rate for tax year 2010/2011 (%) | CIT rate for tax year 2011/2012 (%) |
|---|---|---|
| Companies, including non-resident companies, where taxable income exceeds LKR* 5 million | 35 | 28 |
| Companies, including non-resident companies, where taxable income does not exceed LKR 5 million | 15 | 12 |
| Quoted public companies | 33 1/3 | 28 |
| Companies which engage in export, fisheries, tourism, and construction | 15 | 12 |
| Companies engaged in the manufacture or import of liquor or tobacco products. | 35 | 40 |
| Companies engaged in agriculture | Exempt | 10 |
| Companies engaged in the manufacture of animal feed | 35 | 12 |
| Companies engaged in deemed exports | 15 | 12 |
| Companies engaged in the operation and maintenance of facilities for storage, development of software, or supply of labour | 35 | 10 |
| Companies engaged in educational services | 35 | 10 |
| Companies whose annual turnover does not exceed LKR 300 million | 35 | 10 |
| Venture capital companies | 20 | 12 |
| Clubs and associations | 20 | 10 |

* Sri Lankan rupees

## Taxes on corporate income

Resident companies and public corporations are liable for CIT on their worldwide taxable income. Non-resident companies are liable for CIT of their Sri Lanka-source taxable income.

As of 1 April 2011, the CIT rate for companies, including public corporations and quoted public companies, with taxable income greater than LKR 5 million is 28%. The CIT rate for companies with taxable income less than or equal to LKR 5 million is 12%. Prior to

S

1 April 2011, the rates were 35% (33 1/3% for any quoted public company, for five years from the year in which it becomes a quoted public company) and 15%, respectively.

As of 1 April 2011, the CIT rate for companies whose annual turnover does not exceed LKR 300 million is 10%. Prior to 1 April 2011, the CIT rate for such companies was 35%.

### Marginal relief
Where the taxable income of any company for any year of assessment exceeds LKR 5 million but does not exceed LKR 6,111,111, then such part of the tax computed for such year of assessment as is attributable to such excess shall not be more than such excess.

### Industry-specific rates
As of 1 April 2011, a 12% CIT rate applies to profits from exports, fisheries, tourism, and construction. The lower CIT rate applicable to the construction industry, however, is restricted to resident companies only. Prior to 1 April 2011, the CIT rate on such profits was 15%.

As of 1 April 2011, a 40% CIT rate applies to profits from companies engaged in the manufacture or import of liquor or tobacco products. Prior to 1 April 2011, the CIT rate on such profits was 35%.

As of 1 April 2011, a 10% CIT rate applies to profits from companies engaged in agriculture. Prior to 1 April 2011, such profits were exempt from CIT.

As of 1 April 2011, a 12% CIT rate applies to profits from companies engaged in the manufacture of animal feed. Prior to 1 April 2011, the CIT rate on such profits was 35%.

As of 1 April 2011, a 12% CIT rate applies to profits from companies engaged in deemed exports. Prior to 1 April 2011, the CIT rate on such profits was 15%.

As of 1 April 2011, a 10% CIT rate applies to profits from companies engaged in the operation and maintenance of facilities for storage, development of software, or supply of labour. Prior to 1 April 2011, the CIT rate on such profits was 35%.

As of 1 April 2011, a 10% CIT rate applies to profits from companies engaged in educational services. Prior to 1 April 2011, the CIT rate on such profits was 35%.

As of 1 April 2011, the CIT rate applicable to venture capital companies is 12%. Prior to 1 April 2011, the applicable CIT rate was 20%.

Unit trusts and mutual funds are treated like resident companies for CIT purposes. Units of investment are treated like company shares, and returns to investors are treated like company dividends. The tax rate is 10% on the profits derived by any unit trust or mutual fund.

### Dividend tax
A dividend tax is payable at 10% on the gross dividends distributed by a resident company, other than such dividends distributed out of any dividend received from another resident company (and few other exceptions).

### Deemed dividend tax
A deemed dividend tax of 15% is payable by any resident company in any tax year if the said company has, in the preceding tax year, distributed dividends of less than 10%

(25% prior to 1 April 2011) of the distributable profits (duly defined) for that preceding tax year.

The tax base for the 15% deemed dividend tax is the book profits of the company reduced by the aggregate of the income tax payable by that company for that year of assessment, the cost incurred by the company in that year of assessment in the acquisition of any land or any capital assert, and any notional profit computed on the bases of a revaluation of any capital asset included in such book profit and increased by the aggregate of the allowance for depreciation deducted in respect of any capital asset and any notional loss computed on the basis of a revaluation of any capital asset included in such book profit.

### *Remittance tax*

Where profits of a non-resident company are remitted in a tax year, a remittance tax is payable in an amount equal to 10% of the remittances.

### *Surtax*

Public corporations are also subject to tax of an additional amount, the excess (if any) of 25% of the balance of profits left after deduction of the CIT payable over the amount of gross dividends distributed out of profits on which taxable income is computed.

### *Social responsibility levy*

Prior to 1 April 2011, a 1.5% social responsibility levy was payable by every company on the amount of CIT, dividend tax, deemed dividend tax, and remittance tax. This levy has been removed as of 1 April 2011.

## *Corporate residence*

A company is treated as resident for tax purposes in Sri Lanka if its registered or principal office is in Sri Lanka or if the control and management of its business is exercised in Sri Lanka.

## *Other taxes*

### *Value-added tax (VAT)*

VAT is payable on imported goods and on the supply of goods (excluding, in particular, the supply to merchants who purchase goods locally) and services in Sri Lanka. Provisions are made for filing returns monthly or quarterly, based on specified criteria. Even where returns can be filed quarterly, the tax payments are required to be made on a monthly basis. Certain specified imports and domestically supplied goods and/or services are exempt.

VAT is payable on the prescribed valuations of imports and domestic supplies at a standard rate of 12%. There was a higher rate of 20% for luxury items, which was abolished effective from 1 January 2011. Exports and certain specified international services are zero-rated.

No registration for VAT is necessary if the total value of taxable supplies in a quarter is LKR 650,000 or less, or LKR 2.5 million or less in a year.

The input tax paid on the imports and supplies of goods (including capital goods) and services in a month, and used in the business of making taxable supplies in that month, can be deducted from the tax payable (output tax) on such supplies, subject to a limitation of the lesser of 100% (85% prior to 1 January 2011) of output tax or the actual input tax paid.

Refunds of excess VAT paid are available to zero-rated supplies, to suppliers who are qualified to issue suspended tax invoices, and to new businesses registered under Section 22 (7) of the VAT Act.

### *Economic service charge (ESC)*

ESC is payable quarterly by every person (a person includes a company) in respect of the aggregate turnover of the trade, business, profession, or vocation at rates varying from 0.1% to 1%, depending on the business activity, if the total turnover exceeds LKR 25 million (7.5 million prior to 1 April 2011) for that quarter. ESC so paid is deductible from the CIT payable for that year of assessment. ESC is not refundable but can be carried forward for four immediately succeeding tax years and offset against CIT payable for those four tax years. Maximum ESC payable for any quarter is LKR 30 million.

### *Nation building tax (NBT)*

NBT is chargeable at 2% (3% prior to 1 January 2011) from every person (a person includes a company) who imports any article on the 'liable turnover' from such importation and who carries on the business of manufacture of any article or carries on the business of providing a service of any description on the liable turnover of the relevant quarter. Certain specified articles or services are exempt from NBT.

Liable turnover means:

- In the case of importer, the value of any article ascertained under section 6 of the VAT Act for the purpose of importation.
- In the case of manufacturer, the proceeds receivable, whether received or not, from the manufacture and sale in Sri Lanka.
- In the case of service provider, the proceeds receivable, whether received or not.

As of 1 January 2011, wholesale and retail traders are also liable to pay NBT; however, 50% of the liable turnover will be taxed at a zero rate and the remaining 50% will be taxed at 2%. In the case of a distributor as defined in the ESC Act, 75% of the liable turnover will be taxed at a zero rate and the remaining 25% will be taxed at 2%.

Bad debts, VAT, and excise duty should not be included in the liable turnover.

### *Turnover tax*

Prior to 1 January 2011, a turnover tax at rates varying from 1% to 5% of turnover was charged on any person who bought or sold articles in any area of Sri Lanka. This tax has been abolished as of 1 January 2011.

### *Excise duties*

Excise duties and special excise levies are charged on tobacco, cigarettes, liquor, motor vehicles, selected petroleum products, paints, air conditioners, dishwashers, household washing machines, and other products.

### *Stamp duty*

Stamp duty is payable on specified instruments and documents at rates prescribed in the Gazette.

### *Construction industry guarantee fund levy*

Construction industry guarantee fund levy is payable by each construction contractor or subcontractor on the contract value arising from any contract entered into, calculated at rates varying from 0.25% to 1%, depending on the value of the construction contract. As of 1 April 2009, any person or partnership that makes any payment, which is subject to such levy, to a contractor should deduct such levy as a withholding tax (WHT) and remit the amount withheld to the Commissioner General of Inland Revenue.

### *Tourism development levy*

Tourism development levy is payable by tourist hotels and institutions licensed under the Tourist Development Act on the turnover of such institution at the rate of 1%.

### *Employees Provident Fund (EPF)*

Employers and employees are required to contribute specified percentages (employer 12%; employee 8%) of each employee's monthly emoluments/salary to the EPF established by the Government. Alternatively, employers and employees must contribute to certain private provident funds approved by the labour authority.

### *Employees Trust Fund*

Employers are also required to contribute a specified percentage (currently 3%) of each employee's monthly emoluments/salary to the Employees Trust Fund established by the Government.

### *Share transaction levy*

Share transaction levy at the rate of 0.3% (0.2% prior to 1 January 2011) is chargeable from the buyer and from the seller on the sale of listed shares.

### *Local taxes*

Taxes (more usually called rates) are currently assessed and collected annually from the owners of land and premises by the local authorities of the areas in which the properties are located. These authorities also charge and collect annual licence fees from certain businesses as well.

## *Branch income*

Foreign companies are permitted to register a place of business in Sri Lanka or to be registered as an overseas company under local company law, where the business carried on conforms to the stipulations made under the exchange control law.

An overseas company registered under the companies act may carry on in Sri Lanka any non-commercial, non-holding, or non-industrial activities, such as the activities undertaken or carried on by a liaison office, representative office, regional office, or other similar office, provided such activities do not provide any income directly or indirectly to the company.

In addition to paying the standard CIT, a branch is also subject to the 10% remittance tax on remittance to its foreign head office.

The Sri Lanka-source income of foreign companies from a local 'place of business' is taxed at the CIT rate. However, under most double-taxation-avoidance treaties that Sri Lanka has entered into, the income of a turnkey or service project will not be liable for CIT if its duration is less than a period specified in the treaty concerned.

Where branch or project income is liable for CIT but the income is not readily ascertainable, the tax authority may prescribe that the income be computed on a fair percentage (not less than 6%) of the branch or project turnover in Sri Lanka.

## Income determination

Business accounting for income tax purposes should, unless otherwise specified by the tax statute, conform to Sri Lanka Accounting Standards.

### Inventory valuation

Inventories should be measured at the lower of cost and net realisable value.

### Capital gains

There is no capital gains tax. Capital gains from transfer of property are exempt from CIT.

### Dividends

Resident company dividends paid on shares held by resident or non-resident persons are not assessable to the recipients if income tax is withheld on such dividends *(see the Withholding taxes section)*, the dividends are exempt from income tax, or the dividends are paid out of dividends received from resident companies.

Stock dividends (bonus shares) are not taxable in the hands of a shareholder at the time of issue; but where such shares are capitalised out of company profits and there is a return of this capital to the shareholder within six years from the date of issue, the amount of capital returned to the extent of the paid-up value of the bonus shares is treated by definition as a dividend and is taxable in the hands of the shareholder. However, if the shareholder is a company, this dividend may not be assessable, as explained above.

## Deductions

In ascertaining the total income liable to CIT from the financial accounts filed by a company, deductions from revenue are permitted for outgoing and matching expenses incurred in producing the income, including special deductions.

### Depreciation

An annual allowance for depreciation for wear and tear is calculated at:

- 33 1/3% for plant, machinery, or equipment for a period of three years.
- 25% of the cost of any information technology for a period of four years.
- 20% of the cost of acquisition of any motor vehicle or furniture for a period of five years.
- 10% of the cost of any qualified building for a period of ten years.

Prior to 1 April 2011, the depreciation rate was 12.5% for a period of eight years for plant, machinery, and equipment and 6 2/3% for a period of 15 years for any qualified building.

The cost of renewal of any capital asset, if no allowance exists, is deductible for the purpose of ascertaining profits and income.

### *Bad debts and doubtful debts*
In the case of a bank or financial institution, deductibility of a specific bad debt provision is restricted to the lesser of the actual amount of the provision or 1% of the aggregate debts as at the end of the period for which profits are ascertained.

### *Interest*
Interest paid or payable on borrowings for purposes of business are deductible, subject to the thin capitalisation rules *(see the Group taxation section)*.

Deductions from the total income from all sources of a company are allowed for any interest payable on loans used for the construction or purchase of any building or the purchase of any site for construction of a building; for any annuity, ground rent, or royalty payable; or for a business loss other than a loss incurred in any business of life insurance and any business of finance leasing, including any loss current or brought forward from a previous year, up to a maximum limit of 35% of the total statutory income in determining the residual balance income, which would be assessable for income tax. Where such deductions exceed the total income, any unrelieved excess is carried forward for deduction in the succeeding tax year from its total statutory income for that year of assessment and so on.

### *Charitable contributions*
Relief is available as a deduction from assessable income for contributions in money to an approved charity, if the charity is established for the provision of institutionalized care for sick or the needy, and contributions in money or in kind to the Government of Sri Lanka. The deduction for the former is subject to a ceiling of one-fifth of the assessable income of the company. In the case of the latter, there is no limit to the deduction, and any un-recouped excess of such contributions over the assessable income is available for carry forward deduction from the following year's assessable income and so on.

### *Royalties*
No deduction is allowed for a royalty paid by a person outside Sri Lanka to another person outside Sri Lanka.

### *Formation or liquidation expenses of a company*
In the case of a company, expenses incurred in the formation or liquidation of that company are allowed in computing the taxable income.

### *Terminal gratuities*
Termination gratuities paid to employees on cessation of business and annual payments made to an approved fund, held for payment under compulsory legislation of gratuities to employees upon termination of their services, are deductible.

### *Taxes*
Sri Lanka income tax payable or any income tax or other similar tax payable in any country with which Sri Lanka has a double-taxation-avoidance treaty is not deductible, other than the excess of the foreign-country tax on doubly taxed income over the maximum amount of the credit allowed in the foreign country for the Sri Lanka income tax on that income.

Taxes paid in a foreign country that does not have a tax treaty with Sri Lanka may be deducted.

NBT paid/payable is fully deductable as of 1 January 2011. Prior to 1 January 2011, 2/3 of NBT was disallowed.

Input VAT is not deductible from CIT since it is creditable against output VAT.

Any other prescribed tax or levy is not deductible.

### *Non-deductible expenses*

Deductions not permitted for certain expenses or allowances, in the determination of total income, are itemised below:

- Business entertainment expenses incurred or entertainment allowances paid to executive officers.
- Any expenditure of a capital nature or any loss of capital, including book depreciation of capital assets.
- Depreciation allowances or rentals or annual payments or renewals in respect of vehicles used for purposes of business travel, or capital assets provided for the use of employees at their places of residence, other than motorcycles or bicycles used by non-executive staff and motor coaches used to transport employees to and from their places of work.
- The excess of management fee paid over LKR 2 million (LKR 1 million prior to 1 April 2011) or 1% of turnover, whichever is lower, or such amount as may be determined by the tax authorities. This restriction does not apply to a venture capital company, unit trust, or mutual fund.
- As of 1 April 2011, any foreign travel or foreign training expense incurred in the production of income of any trade, business profession, or vocation is deductible, subject to a maximum limit of 2% of the previous year's statutory income from the respective trade or business. Prior to 1 April 2011, foreign travel expenses incurred in connection with a business were not deductible, other than those expenses incurred solely in connection with the promotion of the export trade, or the provision of any services for payment in foreign currency or in carrying out an approved programme for the promotion of tourism.

### *Net operating losses*

No deduction from total income is allowed in a tax year for a business loss if, at any time in that year, more than one-third of the issued share capital of the loss-making company is held by persons who did not hold such share capital at any time in the year in which the loss was incurred. In such circumstances, the loss is deferred for deduction only from profits of the particular business in which the loss was incurred.

Any loss incurred in any business of life insurance can be deducted to the extent of any profits from such business included in such total statutory income. Similarly, any loss incurred in any business of finance leasing can be deducted to the extent of any profits from such leasing business included in such total statutory income.

Losses incurred in the creation of a trade or business may be carried forward indefinitely but only up to 35% of statutory income. Carryback of losses is not permitted.

## *Group taxation*

There are no special provisions for taxation of companies in a group in Sri Lanka. Each company is taxed independently of others in the group.

### Thin capitalisation

Deductible interest payments made between members of a group of companies, including holding companies, are restricted to the debt equity ratio of 3:1 for manufacturing companies and 4:1 for other companies.

## Tax credits and incentives

### Tax holidays

A tax holiday is available to companies engaged in:

- Agriculture, agro processing, industrial and machine tool manufacturing, machinery manufacture, electronics, export of non-traditional products, or information technology and allied services.
- Any designated project.
- An undertaking for large-scale infrastructure development.
- Small-scale infrastructure undertakings for generation of power, tourism, recreation, warehousing and cold storage garbage collection or disposal, construction of houses, or hospitals.

The period of the tax holiday will be determined by reference to the nature of the undertaking and the amount invested in the project, as follows:

- A five-year tax holiday is available to a new venture capital company satisfying specified criteria.
- A five-year tax holiday is granted for the profits from the new undertaking of a company that is engaged solely in research and development (R&D) in the field of science or technology with the object of using the results thereof for the production or improvement of products with a minimum investment of LKR 2 million.
- Tax holidays outside the purview of the tax statute are also available in specified areas of investment to companies that enter into agreements with the Board of Investment (BOI) of Sri Lanka and to any strategic development projects indentified in accordance with the provisions of the strategic Development projects Act No 14 of 2008. The specified areas include non-traditional export-oriented manufacturing and thrust industries, export-oriented services, large-scale projects of which the project cost exceed LKR 500 million. Generous waiver of import duties on specified imports and other concessions are also available for these companies.
- Profits and income derived from the sectors of fishing, cultivation, and primary processing of agriculture seeds or planting materials will be exempt from CIT for a period of five years reckoned from the year of assessment commencing from 1 April 2011.

### Inbound investment incentives

- Exemption from CIT is granted on the profits and income earned in foreign currency, remitted to Sri Lanka net of expenses (considered reasonable by the tax authority), by a resident company in respect of services (including a construction project) rendered outside Sri Lanka.
- Exemption from CIT is granted on the profits and income earned in foreign currency by any resident company in Sri Lanka from the services rendered in or outside Sri Lanka in respect of any profession or vocation as is specified by the Commissioner General by notice published in the Gazette, if such profits and income (less such amount, expended outside Sri Lanka as is considered by the Commissioner General to be reasonable expenses) are remitted to Sri Lanka through a bank. As of 1 April

2011, this exemption is extended to cover any service, excluding commissions, discount, or similar type of receipts.
- Exemption from CIT is granted in respect of dividends or interest received on investments made outside Sri Lanka, provided that dividends and interest are remitted to Sri Lanka through a bank.

### *Other incentives*

- New or existing companies that export non-traditional goods are entitled to be taxed on the profits from these exports or services at a concessionary rate of 15% for a period of 20 years, ending on 31 March 2014 and 2015, respectively. As of 1 April 2011, the applicable rate is 12%. Dividends paid by such companies out of profits earned from the exports of non-traditional goods, which are taxed at 15%, are in turn liable to tax of 10% in the hands of corporate shareholders where the income tax is already withheld from the dividends *(see the Withholding taxes section)*.
- Exemption from CIT is granted on the profits arising from trading in shares, rights to any share, bonus, or share warrants in respect of which the share transaction levy has been charged.
- Exemption from CIT is granted on an amount equal to the interest or the discount paid or allowed to any non-resident person or to any licensed commercial bank in Sri Lanka by the issuer of any sovereign bond denominated in foreign currency, issued on or after 21 October 2008, by or on behalf of the government of Sri Lanka and on the profits and income from the sale of such sovereign bond.
- Exemption from CIT is granted on an amount equal to the interest or the discount paid or allowed to any person on or after 1 April 2009, on any Sri Lanka Development Bond denominated in United States dollars, issued by the Central Bank of Sri Lanka and on the profits and income from the sale of such Sri Lanka Development Bond.
- Exemption from CIT is granted on the profits and income derived by or accruing to any person or partnership from investment in Economic Resurgence Certificates, utilising money lying to credit of any account opened in any commercial bank or in any specialised bank with the approval of the Central Bank of Sri Lanka from and out of monies deposited in such account on or after 1 February 2009.

## *Withholding taxes*

Resident companies are entitled to withhold income tax at 10% of gross dividends payable to any shareholder that is chargeable with CIT, excluding any dividend received from another resident company and any dividend that is exempt from CIT.

Any person in Sri Lanka who pays or credits to a person or partnership outside of Sri Lanka any sum due as interest, rent, ground rent, royalty, or annuity is required to withhold income tax at a rate of 20% of the sum, but the requirement to withhold income tax does not apply to interest not sourced in Sri Lanka or to interest on any loan or advance made by a banker or to interest paid on foreign currency held in an account with a foreign currency banking unit.

In particular instances, the tax authority may prescribe that CIT be withheld at a rate other than 20%, or the rate may be reduced for sums falling due as interest or royalties in respect of persons resident in countries with which Sri Lanka has double taxation treaties in force. Sri Lanka-source income from loan interest or royalties accruing to a non-resident company is taxed at a flat 20%, in the absence of a lower rate in the tax treaty with the home country of the non-resident.

Every bank and financial institution is required to withhold income tax at 10% on the amount of any interest paid to a company on any sum of money deposited with it. The depositor is entitled to receive a certificate setting out the gross amount of interest, the amount of tax withheld, and the net amount of interest paid. With respect to Treasury bills and Treasury bonds issued by the Central Bank, the WHT rate of 10% applies to an investor from any country.

Prior to 1 April 2011, every person or partnership that paid a fee to another person or partnership in consideration for services rendered by the latter in the course of any business, profession, vocation, or activity of an independent character was required to withhold income tax at 5% of such fee and furnish a certificate to the payee similar to that described above. The WHT requirement was extended to any commission, brokerage fee, or other income of a like nature, and also to any payment for supply of an article on contract through a tender or quotation. As of 1 April 2011, the 5% WHT has been abolished.

10% WHT on rent, lease rent, or other payment for the use or occupation of any land or building has also been abolished as of 1 April 2011.

| Recipient | Dividends (%) | Interest (%) | Royalties (%) |

Notes

1. 0% for copyright royalties.
2. 0% in certain circumstances.
3. 50% of normal tax, which is 7.5%.
4. These treaties are limited to the avoidance of double taxation of income from international transport by air.

## *Tax administration*

### *Returns*

A tax year is any period of 12 consecutive months reckoned from 1 April in any calendar year to 31 March of the following year.

### *Payment of tax*

Sri Lanka has a pay-and-file system under which the CIT payable for each tax year is required to be paid in four instalments, on or before 15 August, 15 November, and 15 February of the tax year and 15 May immediately following the end of the tax year. If each instalment is not less than one-quarter of the CIT payable for the tax year immediately preceding, the balance of any CIT payable may be paid on or before 30 September immediately following the end of the tax year without incurring penalties.

## Significant developments

As of 1 January 2011, the Swaziland Revenue Authority was established. This Authority amalgamated the Department of Customs and the Department of Taxes. Although no amendments were made to their corresponding governing legislation, the letter of the law is being applied with a policy of zero tolerance for non-compliance.

## Taxes on corporate income

All companies within Swaziland are taxed on income at a flat rate of 30%.

## Corporate residence

Income tax is levied on all income derived from sources generated within or deemed to be generated within the country, irrespective of whether the recipient of the income is actually resident in Swaziland.

## Other taxes

### Sales taxes

Sales tax is levied at a rate of 14% (25% for liquor and cigarettes) on goods imported into Swaziland and on the first sale of goods manufactured for sale in Swaziland. Customs and excise duties are also imposed on such goods. The 14% sales tax is also applicable to most professional services.

### Customs duties

Swaziland has a provision for customs duties for various goods imported into the country. Details are available in the Harmonized Tariff Schedule (HTS).

### Excise duties

Swaziland has an excise duty provision for various goods manufactured in the country.

| Goods | Excise duty rate (%) |
|---|---|
| Cigarettes | 6.34 |
| Cigarette tobacco | 8 |
| Cigars | 6.19 |
| Other tobacco products | 16.1 |
| Spirits | 8.9 |

| Goods | Excise duty rate (%) |
|---|---|
| Beer | 8.2 |
| Alcoholic fruit beverage | 8.3 |
| Wine | 8.1 |

### *Transfer taxes*
Transfer taxes are applied on a variable rate basis to property transfers based on the fair market value of the property being transferred.

### *Stamp taxes*
Swaziland has a provision for stamp taxes on various documents. The tax is determined either by way of a set fee or on a sliding scale percentage basis.

## *Branch income*

Income tax on registered branch profits is calculated as for a resident company, and a branch profits tax of 15% is assessed for deemed repatriated income. In practice, however, branches are rare since most foreign companies incorporate local subsidiary companies.

| | |
|---|---|
| Net profit before tax | 100 |
| Tax @ 30% | 30 |
| **Repatriated income** | **70** |

## *Income determination*

### *Inventory valuation*
Inventory valuation is not specific but is effectively at the lower of cost (i.e. first in first out (FIFO) or average cost) and net realisable value.

### *Capital gains*
Capital gains are not subject to income tax, provided it can be demonstrated that the gains are of a capital and not an income nature (i.e. not recurring transactions).

### *Inter-company dividends*
Inter-company dividends are not subject to income tax.

### *Stock dividends*
Stock dividends are paid out of taxed profits. Such dividends are not subject to income tax when received by a local company, but they are subject to taxation in the hands of local individual taxpayers at the rate of 10%.

### *Foreign income*
Foreign income is not subject to income tax unless it is deemed to be from a Swaziland source.

## Deductions

### Accrued expenses

Expenses incurred in earning income during the year, regardless of whether such expenses were actually paid or not within that year, qualify for deduction in that year, provided they are not of a capital nature.

### Depreciation

Depreciation (wear-and-tear) allowances, calculated by the net-reducing-balance method, are available as follows:

| Asset | Rate (%) |
|---|---|
| Aircraft | 25 |
| Casino equipment | 15 |
| Construction equipment | 25 |
| Computer hardware | 33.33 |
| Computer software | 33.33 |
| Furniture and fittings | 10 |
| Hotel soft furnishings, including carpets | 10 |
| Legal and professional libraries | 5 |
| Lifts and elevators | 25 |
| Motor vehicles: | |
| Buses | 33.33 |
| Cars | 20 |
| Light delivery vehicles | 25 |
| Lorries | 33.33 |
| Office equipment | 10 |
| Plant and machinery | 10 |
| Sound and projection equipment | 20 |
| Television sets | 20 |
| Tractors | 25 |
| Trailers | 20 |
| Video recorders | 33.33 |
| Videotapes | 25 |

For the first year after the addition of an asset, the wear-and-tear allowance is calculated on a monthly basis. With respect to leased assets, the lessor's claim for wear-and-tear allowance is usually spread over the lease period.

An initial allowance of 50% is granted for plant and machinery used in a manufacturing process, including hotel equipment. An initial allowance of 50% is also granted for industrial buildings used for manufacturing purposes and hotels, together with a 4% annual allowance.

### Bad debt

Swaziland does allow a deduction for bad debts, subject to the Commissioner's approval and provided that the debts were included in the taxpayer's income in the year of assessment or in years past.

### *Charitable contributions*
Subject to the Commissioner's approval in regard to the amount allowable as a deduction in the year of grant and subsequent years, Swaziland allows a deduction for, among other things, grants made to the government for the building of schools and hospitals.

### *Fines and penalties*
Fines and penalties resulting from late payment of any tax or levied as payable under any Act administered by the Commissioner will be a non-deductible expense

### *Net operating losses*
Losses may not be carried back but may be carried forward for as long as trading continues (i.e. indefinitely). If any break in trading occurs, however, the losses are forfeited.

### *Payments to foreign affiliates*
Deductions may be claimed for payments of management service fees, interest, and royalties to foreign affiliates, provided the payments are made under a written agreement, are reasonable, and receive exchange control approval for transfers outside the rand monetary area. Note that this approval is routinely given without any significant delay for bona fide transactions.

## *Group taxation*

Swaziland does not have group taxation legislation. All companies are assessed on their individual profits and losses.

### *Transfer pricing regime*
Swaziland does not have transfer pricing legislation; however, under the anti-avoidance provision, the Revenue Authority will look for arm's-length transactions.

### *Thin capitalisation rules*
Swaziland does not have thin capitalisation rules.

## *Tax credits and incentives*

### *Development Approval Order*
The Minister of Finance, along set guidelines and with prior consent of the Cabinet, may nominate a business as a developmental enterprise (i.e. a business the Minister deems to be beneficial to the development of the economy) for a grant of a Development Approval Order. If approved, the business generally will be granted tax concessions, such as a lower corporate tax rate.

### *Training expenditures*
Approved training schemes, resulting in a 150% tax deduction of salaries, are no longer available.

## *Withholding taxes*

Non-resident withholding taxes (WHT) are levied as follows.

### *Dividends*
WHT for dividends is payable at the rate of 15% (12.5% for companies registered in Botswana, Lesotho, and the Republic of South Africa).The rate drops to 10% under the double taxation agreement (DTA) with South Africa where the holding company owns more than 25% of the shares. Non-resident shareholders' WHT is payable within 30 days of the date on which the dividend is payable.

### *Interest*
WHT for interest is payable at the rate of 10%. Non-resident WHT on interest is payable within 14 days of the date of the accrual of the interest.

### *Entertainers and sportsmen*
WHT is payable at the rate of 15% on income earned in Swaziland by entertainers and sportsmen. This tax relates only to public entertainers and sportsmen not ordinarily resident in Swaziland. The payer is required to deduct the tax and pay it within 15 days.

### *Contractors or professionals*
WHT is payable at the rate of 15% on services provided by contractors or professionals in Swaziland (materials are not taxed to the extent that materials are incidental to the overall charge). The Commissioner of Taxes must be notified of any agreement relating to construction operations or professional services under which payments are made to non-resident persons within 30 days after entering into the agreement. It is required that the tax be paid within 15 days from the date of payment.

## *Tax administration*

### *Returns*
The tax year runs from 1 July to 30 June. Companies are required to have a 30 June year end unless another year end date is approved by the Commissioner of Taxes; such approval is routinely given. Income tax returns should be submitted within 30 days of 30 June unless an extension of time for submission is granted, which also is routinely given.

### *Payment of tax*
Notice of the date of payment is usually given on the tax assessment.

### *Provisional tax payments*
With respect to companies, provisional tax is payable in two instalments: one payment is due within six months of the company's financial year-end, and the other payment is due no later than the last day of the company's financial year.

The estimate of taxable income for provisional tax purposes should not be less than the taxable income assessed for the latest preceding year of assessment, for which an assessment has been issued not less than 21 days before the date the estimate is made. This rule does not apply if the taxpayer can convince the Commissioner of Taxes that the taxable income for the current year will be less than the taxable income for the preceding year.

A provisional taxpayer becomes liable to pay a penalty if the estimate for taxable income for the second payment of provisional tax is found to be both less than 90% of the taxable income as finally determined and less than the taxable income as assessed for the immediately preceding tax year.

## Significant developments

There have been no significant corporate tax developments in Sweden during the past year.

## Taxes on corporate income

### State (national) income tax

Resident legal entities are liable for tax on their worldwide income unless tax treaties or special exemptions apply. Non-resident entities are taxed on income that is deemed to have its source within Sweden.

Taxable income is subject to tax at the rate of 26.3% for financial years commencing on or after 1 January 2009. The previous rate was 28%. All income of corporate entities is treated as business income.

## Corporate residence

A company is considered to be a tax resident of Sweden if it is incorporated in Sweden.

### Permanent establishment (PE)

The term permanent establishment (PE) is defined in Sweden as a fixed place of business through which the business is carried on from a specific establishment, such as a place of management, branch, office, factory, or workshop. Places where entrepreneurial work is carried on are also regarded as PEs if an agent or a representative who is dependent upon the foreign company habitually exercises authority in Sweden.

## Other taxes

### Value-added tax (VAT)

The Swedish VAT system is harmonised with the European Community rules. The general VAT rate is 25% and chargeable on most goods and services. Reduced rates apply to a few goods and services, such as food, which is taxed at the rate of 12%, and transport of passengers, which is taxed at the rate of 6%. Certain financial and insurance services are exempt from VAT.

VAT returns are filed and tax is paid monthly or quarterly. However, for companies with a turnover of less than 1 million Swedish kronor (SEK), VAT may be reported in the income tax return.

### Stamp tax
Stamp tax at 4.25% is payable on a transfer of real estate. The tax base consists of the highest of the purchase consideration or the tax assessed value of the real estate. Stamp tax on an intra-group transfer of real estate may be deferred as long as the real estate remains within the group.

### Social fees
Mandatory social security charges payable by employers on remuneration to employees (or by the self-employed) are levied at approximately 31%. Reduced rates apply for very young or old people. Social security charges are deductible for corporate tax purposes.

Pension benefits beyond the mandatory system are customary amongst most Swedish employers. A special salary tax is levied at approximately 24% on these additional pension premiums/commitments and is deductible for corporate tax purposes.

### Real estate tax
The real estate tax rate on business premises is 1% of the tax assessed value. For industrial property, the tax rate is 0.5%. Other rates exist for special property.

## Branch income

Branch income (i.e. PE income) is taxed at the corporate tax rate of 26.3%, and general corporate tax rules apply for branch offices in Sweden. No withholding tax (WHT) is levied on the outbound repatriation of taxed profits.

The receipt of Swedish source royalties or fees for use of tangible or intangible assets by a foreign resident is also (subject to treaty restrictions) regarded as a special form of PE income.

## Income determination

### Inventory valuation
Inventories (stock-in-trade) are valued at acquisition cost or market value, whichever is lower. As an alternative, inventories may be valued at 97% of the total acquisition cost, which is determined on a first in first out (FIFO) basis. Last in first out (LIFO) is not permitted. Generally, inventories should be stated at the same amount for tax and accounting purposes.

### Capital gains
There is a capital gains tax exemption for Swedish corporate entities on gains related to the disposal of shares held for business reasons. This abolishment of capital gains taxation for corporations, under the participation exemption provisions, has made Sweden a favourable holding company location.

Note that non-tax-exempt capital gains are included in business income and taxed at the corporate tax rate.

Shares in Swedish corporations as well as in foreign companies can qualify as shares held for business reasons. Unquoted/unlisted shares will always be considered as held for business reasons. Quoted/listed shares are considered held for business reasons provided that the company has a holding corresponding to at least 10% of the voting rights or the shares are held in the course of the business. An additional condition regarding quoted/listed shares is that the shares must be held for a period of at least one year.

An exception from the capital gains tax exemption applies for the sale of shares in a 'shell company', which is a company or partnership where the market value of cash, shares and other marketable instruments (other than shares held for business reasons), and similar assets exceeds 50% of the consideration paid for the shares. The sale of a shell company results in harsh taxation of the gross consideration. Provided certain formalities are fulfilled, however, it is possible to avoid such taxation.

A consequence of the participation exemption is that capital losses on shares or participations held for business reasons are not deductible.

Capital losses on portfolio holdings of shares, share options, convertible debentures, and similar financial instruments are allowed only as an offset to capital gains on the same group of financial instruments.

Certain special rules apply to computation of capital gains and losses on real estate.

As of 2010, participation in partnerships (tax transparent entities) are included in the capital gains tax exemption regime (making losses non-deductible), including qualifying indirect holdings via a partnership.

### *Dividend income*
A participation exemption will apply for dividends received on shares held for business reasons *(see above)* and on qualifying holdings via partnerships. The requirement of a minimum holding period for a holding of quoted/listed shares can be fulfilled retroactively.

### *Foreign income*
Companies resident in Sweden are taxed on their worldwide income. Non-resident entities are taxed on income that is deemed to have its source within Sweden.

A Swedish corporation is taxed on foreign branch income. Double taxation normally is avoided by means of either a deduction for foreign tax, or a foreign tax credit.

Dividends and capital gains from foreign subsidiaries are generally exempt from taxation according to the participation exemption provisions applicable to shares held for business reasons *(see above)*.

## *Deductions*

### *Depreciation, amortisation, and depletion*
#### Depreciation on fixed assets
Land improvements may be depreciated at the rate of 5% per year of the acquisition cost. The maximum allowance is 100% of the tax basis of the improvement.

Buildings may be depreciated at rates between 2% and 5% per year of the taxable basis, depending on type and usage of the building. The maximum allowance is 100% of the tax basis of the building.

For machinery, equipment, and motor vehicles, the depreciation for tax purposes should correspond to the depreciation charged in the books and accounts, as long as the total net value of the assets is not less than the 70% of net value in previous accounts plus additions less proceeds of sales (i.e. 30% declining balance depreciation) or cost less 20% per year (i.e. 20% straight-line depreciation on remaining assets).

**Immediate deduction of certain assets**
The cost of assets having an expected life of not more than three years and the cost of assets not exceeding certain levels, depending on size of operations, may be deducted immediately. Certain costs for repairs, maintenance, and modifications of buildings may also be deducted immediately.

**Amortisation of intangibles and goodwill**
The amortisation of patents, leaseholds, and goodwill follows the same rules as depreciation for machinery, equipment, and motor vehicles *(see above)*.

**Depletion of mines and quarries**
The entire cost of mines and quarries may be depleted over their expected exploitation period. These depletion amounts may be deducted annually but are limited to 100% of the acquisition cost of the mine or quarry.

### *Taxes*
Generally, Swedish taxes are not deductible for tax purposes. However, specific taxes, fees, and foreign taxes may be deductible. Recoverable VAT is not treated as an expense or cost.

### *Net operating losses*
Tax losses may be carried forward indefinitely, subject to restrictions or forfeiture upon ownership changes, mergers and demergers, dispositions with creditors, and certain other reorganisations. No carryback of losses is possible.

### *Payments to foreign affiliates*
Transactions with an affiliate not liable for tax in Sweden must be at arm's length. Formal transfer pricing documentation requirements apply since 1 January 2007.

In 2009, Sweden enacted anti-debt push down provisions under which a deduction is not allowed for interest payments on any intra-group loans for the acquisition of shares from an affiliate, unless the creditor is taxed on the interest income at a rate of at least 10% or it is shown that the share transfer and the debt is based on commercial reasons. Note that loan agreements signed prior to 2009 are covered by these new provisions.

## *Group taxation*

Swedish companies are not taxed on a consolidated basis. However, it is possible for qualifying groups (i.e. a holding of greater than 90% of the capital which must have been owned during the whole fiscal year) to effectively offset operating losses of one Swedish company against operating profits of another Swedish company by way of group contributions, which are tax deductible for the contributor and taxable for the recipient. European Economic Area (EEA) companies are regarded as Swedish companies for these purposes, if the recipient is taxable in Sweden.

A similar Swedish deductibility is, under certain circumstances, also available for cross-border consolidation within the EEA for final subsidiary losses.

### *Transfer pricing*
The Swedish transfer pricing regime is generally an Organisation of Economic Co-operation and Development (OECD) type of regime.

### *Thin capitalisation*
There are no thin capitalisation rules for tax purposes in Sweden.

### *Controlled foreign company (CFC) legislation*
Sweden's CFC provisions aim at taxing a Swedish resident shareholder for shareholdings in low-taxed foreign entities. A Swedish resident shareholder with a holding in a CFC-entity will annually be taxed for its ownership portion of the CFC's income, according to provisions applicable to a Swedish corporation. For a corporation, the portion will be taxed at the Swedish corporate tax rate. Only holdings, direct or indirect through other foreign entities, corresponding to at least 25% (capital or voting rights) in the foreign entity could lead to CFC taxation. A foreign company is considered lowly taxed if the income in the company, calculated in accordance with Swedish provisions, is taxed at a rate below 14.47%. However, if the foreign entity is resident in an 'approved country', CFC taxation should not arise. Approved countries appear in an official 'black/white' list. Active European Economic Area (EEA) entities are, under certain circumstances, excluded from CFC taxation.

## *Tax credits and incentives*

There are no specific tax incentives in Sweden for corporations. However, some generally applicable regimes exist.

For example, Sweden has an accruals reserve regime. The accruals reserve regime allows for a tax-deductible appropriation for corporations of 25% of the taxable profit before appropriation to a reserve. Each year's appropriation forms a separate reserve that must be reversed to income no later than the sixth year following the appropriation. However, a standardised interest income is imposed on former years' appropriations at 72% of the interest rate on governmental debt notes.

### *Foreign tax credit*
A foreign tax credit is generally available, provided certain conditions are fulfilled, but the tax credit allowed is always limited to an amount corresponding to the Swedish tax on the foreign income in question. Tax treaty implications may exist.

## *Withholding taxes*

There are no Swedish taxes on interest and service fees paid to non-resident corporations or individuals. Such payments to resident corporations and individuals are taxed as ordinary income.

WHT on dividends, royalties, and certain rentals vary according to domestic law and tax treaties, as shown below.

Apart from the highlighted treaties, Sweden has concluded agreements on exchange of information in tax matters and partial tax treaties with many tax haven jurisdictions.

| Recipient | Cash dividends (%) (1, 2) | Royalties, certain rentals (%) (3) |

Notes

1. According to domestic law there is no WHT on dividends to a foreign company on shares held for business reasons *(for the definition of shares held for business reasons, see Capital gains in the Income determination section),* provided that the foreign company is similar to a Swedish limited liability company (and some other legal entities) and is subject to income tax at similar level to that imposed on a Swedish company. Further, there is no tax liability for a legal entity of a member state of the European Union if the entity owns 10% or more of the share capital in the distributing company and fulfils the conditions of the Directive (90/435) regarding parent company and subsidiaries.
2. The reduced rate shown before a stroke (/) refers to payments to corporations having requisite control. Where appropriate, the particular treaty should be consulted to see whether the reduced rate is applicable.

3. Swedish source royalties and certain rental fees are treated as a special form of PE, taxable at the corporate tax rate, subject to treaty reduction or waiver. Royalties paid from Sweden to a company within the European Union should not be taxed in Sweden if one of the companies holds at least 25% (capital) of the other, or where there are two companies concerned, at least 25% are held by another company within the European Union. Indirect participation does not benefit from the legislation. Both the payer and the recipient must be legal entities under the EU directive.
4. Payments to resident corporations and individuals are taxed as ordinary income. Only resident banks and similar entities are required to withhold tax on payments of cash dividends to resident individuals.
5. Royalties and certain rentals paid by Swedish licensees are treated as business income taxable in Sweden and do not incur WHT *(see Note 3).*
6. Note also the domestic provision stating a 0% WHT on dividends distributed on shares held for business reasons to qualifying entities *(see Note 1).*
7. Dividends: 10% of the gross amount if the company receiving the dividends owns at least 25% of the foreign company's capital. Royalties: of the gross amount paid for the use of, or the right to use:
   - News: 3%.
   - Copyright of literary, dramatic, musical, or other artistic work: 5%.
   - Any patent, trademark, design or model, plan, or secret formula or process; industrial or scientific equipment or information concerning industrial, commercial or scientific experience; payments for the rendering of technical assistance: 10%.
   - All other cases: 15%.
8. Royalties are normally taxable only in the recipient's home country. However, where the royalty is paid by a Swedish legal entity that is more than 50% owned by one Austrian recipient, entity or individual, the tax in Sweden is a maximum of 10%.
9. Literary, artistic or scientific royalties: 0%; other royalties: 5%.
10. Royalties for use of industrial, commercial, or scientific equipment: 5%; with respect to patents, secret formulas or processes, or for information concerning industrial, commercial, or scientific experience: 3%; other royalties: 10%.
11. Royalties for use of copyright and literary, dramatic, musical, and artistic royalties: 0%. Other royalties: 10%. (Treaty should be consulted).
12. The treaty has effect on income derived on or after 1 January 2006.
13. The double taxation treaty does not include Hong Kong.
14. The same treaty is applicable to the Czech Republic and the Slovak Republic.
15. According to the Nordic multilateral tax treaty.
16. Dividends are exempt from tax if the recipient of the dividends is a company directly owning at least 10% of the capital of the company paying out the dividends. Certain rentals are subject to tax if there is a PE in a country other than the home country and the claim is connected with the business carried on from the PE. Concerning Iceland, dividends are normally exempt from tax for companies, but the tax rate is 15% if the dividends have been deducted from the income of the distributing company.
17. Royalties for the use of industrial, commercial, or scientific equipment: 5%; other royalties: 10%.
18. Royalties with respect to patents, secret formulas or processes, or for information concerning industrial, commercial, or scientific experience: 5%; other royalties: 12.5%.
19. Royalties for the use of industrial, commercial, or scientific equipment or for information concerning industrial, commercial, or scientific experience: 10%; other royalties: 15%. (Treaty should be consulted.)
20. Literary, artistic, or scientific royalties including films: 15%; other royalties: 10%. (Treaty should be consulted.)
21. Royalties with respect to patents, secret formulas or processes, or for information concerning industrial or scientific experience: 5%; other royalties: 15%.
22. Commercial royalties, including films: 20%; copyright, literary, dramatic, musical, or artistic royalties: 0%.
23. Commercial royalties, including films: 15%; literary, dramatic, musical, or artistic royalties: 5%.
24. Literary, artistic, scientific, or film royalties: 10%; other royalties: 7%.
25. Royalties with respect to patents, designs or models, secret formulas or processes, or for information concerning industrial or scientific experience or for the use of industrial, commercial, or scientific equipment involving a transfer of know-how: 5%; other royalties: 15%.
26. The treaty is applicable to all republics and autonomous provinces of the former Yugoslavia with the exception of Macedonia, with which Sweden has concluded a bilateral treaty.

## *Tax administration*

### *Returns*

If the income is derived from business, the basis for tax assessment is the financial year. The year-end for a company may be fixed at any of the following dates: 30 April, 30 June, 31 August, or 31 December. Another year-end can be used if special permission by the tax agency is requested and granted. Swedish subsidiaries of foreign parents are generally permitted to adopt the same year-end as the parent company, provided it ends on the last day of the month.

Every corporate entity or registered branch must file an annual corporate income tax return, which generally should be filed by 2 May each year, covering the financial year ending during the preceding calendar year. An extension may be available. The annual assessments are made by the local tax offices during the calendar year following the income year and should be completed by the end of November. VAT returns and employer returns (employee Pay As You Earn (PAYE) and employer withholding) are normally due on a monthly basis.

### *Income tax payments*

Income taxes are collected during the year in which the income is earned, under a preliminary tax system. A corporate entity's preliminary tax liability is determined by a preliminary tax assessment based either on the latest available final tax assessment or on a preliminary tax return filed by the company. The preliminary taxes are payable in monthly instalments. Interest surcharges on underpayment of preliminary taxes, however, generally apply from 12 February the year after the financial year (the assessment year). Any balance owed by the taxpayer is payable in 90 days after the assessment has been made. Normally, any balance owed to the taxpayer is refunded in December of the assessment year.

### *Tax penalty*

A taxpayer that submits incorrect or insufficient information in a tax return is charged a penalty amounting to up to 40% of the tax which, if the incorrect information had been accepted, would have been imposed or credited. The penalty and the rate may vary depending on the type of the incorrect information given.

### *Appeals*

Taxes are assessed by the tax agency. Depending on the circumstances, reassessments and/or appeals generally can be initiated within one and five years after the assessment year. Appeals can be made to the administrative court, and onwards to the administrative court of appeal, and in case of granted trial dispensation, onwards to the supreme administrative court.

## Significant developments

### Corporate tax reform II

Although the corporate tax reform II (CTR II) was, in general, put into force as of 1 January 2009, the following significant amendments entered into force as of 1 January 2011:

**Extension of participation relief on dividend income**

The thresholds to obtain participation relief on dividend income after the effective date of 1 January 2011 were reduced to a participation of at least 10% from the prior 20% of capital, or a market value of at least 1 million Swiss francs (CHF) instead of the prior CHF 2 million *(see Participation relief in the Income determination section)*.

**Extension of participation relief on capital gains on the sale of investments**

After the effective date of 1 January 2011, at a federal corporate income tax (CIT) level, limited companies and cooperatives desiring participation relief on capital gains must sell an interest of at least 10%, instead of the prior 20% requirement. The minimum holding period of one year remains unchanged. Even though voluntary, most cantons grant the participation relief on capital gains derived from the sale of investments *(see Participation relief in the Income determination section)*.

**Introduction of the capital contribution principle**

The change from the nominal principle to the capital contribution principle entered into force as of 1 January 2011. It allows repayment of shareholders' capital contributions without liability for Swiss withholding tax (WHT) at the level of the distributing company and without income tax at the level of the Swiss individual shareholder (holding the shares in one's private assets). According to the transition period, capital contributions are qualifying if accumulated after 31 December 1996 and meeting some further requirements (e.g. timely recordings in the statutory books and vis-à-vis the tax authority; *see Introduction of the capital contribution principle in the Withholding taxes section*).

### Relief on intra-group financing

Improvements regarding intra-group financing were implemented effective on 1 August 2010. According to the new standards, liabilities to group (affiliated) companies, regardless of their terms, their number, or their amount, are, on constitution, no longer subject to issuance duty, and the interest on them is no longer subject to WHT (to this extent abolition of the so-called 10/20 lender rule). With this revision, Switzerland will be much more attractive in tax respects for inter-company financing activities for international groups, in particular for cash pooling activities *(see Issuance stamp tax in the Other taxes section)*.

# Switzerland

### *New value-added tax (VAT) rates as of 1 January 2011*
As of 1 January 2011, the Swiss VAT rates were temporarily increased in order to support the solvency of disability insurance. The increase is limited to seven years. The regular rate has increased by 0.4% to 8%, the privileged rate by 0.1% to 2.5%, and the special rate by 0.2% to 3.8% *(see Value-added tax in the Other taxes section)*.

## *Taxes on corporate income*

Resident companies are subject to CIT on their worldwide income levied at three levels, the federal, cantonal, and communal level.

### *Federal level*
Switzerland levies a direct federal CIT at a flat rate of 8.5% on profits after tax (i.e. taxes are deductible from the tax basis in Switzerland, consequently, the tax rate on income before taxes amounts to approximately 7.83%). At a federal level, no corporate capital tax is levied.

### *Cantonal/communal level*
In addition to the direct federal CIT, each canton has its own tax law and levies cantonal and communal (municipal) income and capital taxes at different rates. Therefore, the tax burden of income (and capital) varies from canton to canton. Some cantonal and communal taxes are imposed at progressive rates.

### *Overall tax rates*
As a general rule, the overall approximate range of the maximum effective CIT rate on profit for federal, cantonal, and communal taxes is between 12.7% and 24.2%, depending on the company's location.

Income attributable to permanent establishments (PE) or immovable property located abroad is excluded from the Swiss tax base and only taken into account for rate progression purposes in the cantons that still apply progressive tax rates.

## *Corporate residence*

A company is considered resident in Switzerland if its place of incorporation is in Switzerland. Residency is also linked upon the place of effective management, which may be the centre from which day-to-day activities are directed or the place from which managerial decisions are made.

## *Other taxes*

### *Value-added tax (VAT)*
In 2009, a new Swiss VAT law was approved by the Swiss Parliament and put in force effective as of 1 January 2010. The new VAT law features a noticeable simplification of the system, enhances transparency, is more customer-friendly, and aims at providing more legal certainty.

As a matter of principle, proceeds of sales and services conducted in Switzerland are subject to VAT at the standard rate of 8%. However, goods for basic needs are subject to VAT at the rate of 2.5%, and services in connection with the provision of lodging are subject to VAT at the rate of 3.8%. A registered taxpayer generally is entitled to offset the amount of VAT charged by suppliers or paid on imports against the VAT payable. These rates represent a temporary increase that went into effect as of 1 January 2011 in order to support the solvency of disability insurance. The increase is limited to seven years.

Prior to 1 January 2011, the regular rate was 7.6%, the privileged rate was 2.4%, and the special rate was 3.6%.

### *Capital tax*

Corporate capital tax is only levied at a cantonal but not at a federal level. It is based on the corporation's equity (i.e. the taxable equity corresponds to the sum of nominal capital, paid in surplus, retained earnings, other equity reserves, and – according to Swiss thin capitalisation rules – potential deemed equity). Tax rates vary from 0.001% to 0.5288%. Reduced rates are applicable for companies subject to a special cantonal tax regime (e.g. holding companies, mixed trading companies).

As a result of the CTR II, the cantons may now choose to credit CIT to the capital tax in order to reduce the overall tax burden *(for more information in connection with the CTR II in general, see Corporate tax reform II in the Significant developments section)*.

### *Issuance stamp tax*

Issuance stamp tax (often known as capital duty) on the issue and increase of the equity of Swiss corporations is levied at the rate of 1% on the fair market value of the assets contributed, with an exemption on the first CHF 1 million of capital paid in, whether it is made in an initial or subsequent contribution.

A tax ruling may be obtained to exempt a multitude of transactions from issuance stamp tax. In particular, special rules allow for most reorganisations to take place on a tax neutral basis. In addition, an existing non-resident company may generally transfer assets to Switzerland without incurring Swiss issuance stamp tax. However, if the company was formed abroad and re-domiciled to Switzerland exclusively or mainly in order to avoid Swiss stamp taxes, the issuance stamp tax may apply.

Issuance stamp tax is further payable with respect to the following instruments:

- Bonds, which are defined for the purposes of this tax as bonds, promissory notes issued in sequence and similar paper, discount paper, and any other evidence of indebtedness in the form of a debt security or traded as if there were a debt security which is intended for public placement as well as participations in loans granted to Swiss debtors.
- Money market papers, which are identical instruments to bonds with a fixed term of not more than 12 months, issued by a Swiss body.

Effective on 1 August 2010, improvements regarding intra-group financing were implemented. According to the new standards, liabilities to group (affiliated) companies, regardless of their terms, their number, or their amount, are, on constitution, no longer subject to issuance duty, and the interest on them is no longer subject to WHT (to this extent abolition of the so-called 10/20 lender rule). Consequently, Switzerland will be much more attractive in tax respects for inter-company financing activities for international groups, in particular for cash pooling activities. Due to tax evasion reasons, these rules are, however, not available for a domestic group company, which guarantees a bond issued by a foreign group company. These amendments were prioritised by singling out from the pending (new) Corporate tax reform III, which, however, stagnated some time ago.

The following tax rates apply:

- 0.12% of the nominal value for each year or part thereof up to the maturity of a bond.
- 0.06% each year on the same basis for sub-participations and medium term bonds.
- 0.06% each year on commercial paper with the face value calculated at 1/360th for each day on which such paper is outstanding.

### *Securities transfer stamp tax*

Swiss securities transfer stamp tax (often called 'securities turnover tax') is levied on the transfer of Swiss and foreign securities in which Swiss securities dealers participate as contracting parties or as intermediaries. The ordinary tax rate of Swiss securities transfer stamp tax is 0.15% for securities issued by a tax resident of Switzerland and 0.3% for securities issued by a tax resident of a foreign country.

Swiss securities dealers are defined as any person professionally engaged in the buying or selling of securities for one's own account or for another person, including Swiss banks and other Swiss bank-like institutions. The definition also includes companies holding taxable securities whose book value exceeds CHF 10 million and remote members of a Swiss stock exchange with regard to Swiss titles, which are quoted on the Swiss stock exchange.

Taxable securities include, but are not limited to, shares (including participations, i.e. main interests in other companies) and bonds. Options and many other derivative instruments are not subject to Swiss securities transfer stamp tax. However, the exercise of such financial instruments or derivatives may result in a taxable transfer of a security.

Various transactions are exempt from Swiss securities transfer stamp tax. Generally, no Swiss securities transfer stamp tax is levied in the case of a merger or a reorganisation in which a Swiss securities dealer is involved and taxable securities (including participations) are transferred. Furthermore, the merger law also states an exemption from Swiss securities transfer stamp tax in case of a replacement of a participation. This is particularly important for holding companies, which qualify as Swiss securities dealers.

## *Branch income*

The same tax principles that apply for non-resident corporations also apply for Swiss branches, provided that transactions with the head office or other branches are at arm's length. There is no Swiss WHT on profit transfers to the head office.

## *Income determination*

The statutory accounts of a Swiss company (or in the case of a non-resident company, the branch accounts) serve as the basis for determining taxable income. There are generally very few differences between statutory profit and taxable profit apart from the participation relief for dividend and capital gains income (*see below*), adjustments required by tax law, and the usage of existing tax loss carryforwards (*see Net operating losses in the Deductions section*).

### *Participation relief*

Participation relief is the name generally attributed to the tax relief received for qualifying dividend and capital gains income of a company. Participation relief is not an outright tax exemption, but rather a tax abatement mechanism. It is therefore also commonly referred to as 'participation deduction'.

Participation relief is a percentage deduction from CIT that is equal to net participation income divided by taxable income. Net participation income consists of the gross participation income from qualifying dividends and (usually) qualifying capital gains income less related administration and financing costs and any depreciation of the participation that is linked to the dividend distribution. In most cases, participation relief results in a full exemption of participation income from federal CIT, or one close thereto. Note that participation relief may be diluted in certain cases (e.g. if loss carry forwards are offset).

The participation relief on dividend income is mandatory at the federal CIT as well as on the cantonal/municipal level. The participation relief on capital gains is voluntary for cantonal/municipal purposes but nevertheless implemented by most cantonal tax acts. Specific privileged cantonal/municipal tax regimes may foresee more favourable rules for dividend income and capital gains than the participation relief *(see Privileged cantonal tax regimes in the Tax credits and incentives section)*.

#### Dividend income

As of 1 January 2011, dividends qualifying for participation relief are those from participations representing at least 10% of the share capital or 10% of profits and reserves of another company or those having a market value of at least CHF 1 million. Prior to 1 January 2011, the thresholds were 20% of the share capital of another company or a market value of at least CHF 2 million. Note that there is neither a minimum holding period nor a requirement that the dividend paying subsidiary is liable to income tax in its jurisdiction of residence.

#### Capital gains income

As of 1 January 2011, capital gains derived from the disposal of a qualifying participation are entitled to participation relief if the following conditions are cumulatively met:

- The participation sold was owned by the company for a period of at least one year.
- The amount sold constitutes at least 10% of the share capital or 10% of profits and reserves of the underlying subsidiary. Partial sales of residual holdings of less than 10% are possible, provided their market value at the beginning of the year still amounted to at least CHF 1 million.

Prior to 1 January 2011, the threshold was 20% of the share capital of the underlying subsidiary.

It is noteworthy that capital gains are only entitled to participation relief to the extent the sales price exceeds the original investment costs of the participation, whereas the so-called 'recaptured depreciation' (i.e. the amount of former depreciations) is taxable.

### *Foreign income*

Swiss tax resident corporations are basically taxed on their worldwide income. However, income attributable to a foreign PE outside Switzerland is not taxed in Switzerland but may be taken into account only to determine the rate of tax applicable to taxable income. The same rule applies for income from real estate situated abroad.

Dividends, interest, and royalties from Swiss or foreign sources are included in assessable income. However, in certain cantons, special methods of assessment may apply for dividend and other income originating outside Switzerland. For dividend income, a relief generally is available at a federal income tax level as well as at a cantonal level *(see Participation relief above)*. The irrecoverable portion of foreign WHT of most treaty countries can be credited against the related Swiss income taxes on the same income. Foreign WHT of all non-treaty countries generally are not creditable, but they are deductible for income tax purposes.

There are no controlled foreign company (CFC) rules in Switzerland. Consequently, undistributed income of foreign subsidiaries is usually not taxed in Switzerland (*see Controlled foreign company (CFC) regime in the Group taxation section)*.

### Foreign exchange gains

Realised foreign exchange gains are included in the tax basis of a corporation as taxable. Based on a recent federal court decision, for which applicability for a specific case has to be reviewed, unrealised gains (or losses) resulting from the translation of financial statements in a foreign (functional) currency to CHF may not be taxable (respectively tax deductible).

## Deductions

The statutory accounts of a Swiss company are the basis for determining taxable income. To be tax deductible, an expense has to be booked in the statutory accounts accordingly.

In principle, it can be said that all business expenses that are booked in the statutory accounts are tax deductible assuming they are economically justified from a tax perspective. If an expense is not a justifiable business expense in the sense of the tax law, it will be added back to taxable income. Examples typically include excessive depreciation, non-justified payments to related parties (e.g. hidden profit distributions), etc.

### Depreciation

Maximum depreciation/amortisation rates allowed for tax purposes are issued by the Federal Tax Administration. Higher depreciation/amortisation is allowed for tax purposes if the taxpayer can prove that such higher depreciation/amortisation is required from a statutory accounting perspective. Some cantons follow the federal guidelines, whereas some cantons apply and/or have published their own (more liberal) applicable depreciation/amortisation rates.

The following summary of the rates specified by the Federal Tax Administration provides the general range of allowable depreciation:

| Assets | Declining balance (%) | Straight-line (%) |
|---|---|---|
| **Commercial buildings** | | |
| Buildings alone | 4 | 2 |
| Buildings and land combined | 3 | 1.5 |
| **Equipment** | | |
| Office furniture and equipment | 25 | 12.5 |
| Computer hardware and software | 40 | 20 |

| Assets | Declining balance (%) | Straight-line (%) |
|---|---|---|
| **Other assets** | | |
| Motor vehicles | 40 | 20 |
| Intangible assets | 40 | 20 |

Some cantons (such as Zurich and Basel-City) take a more liberal approach and even permit a write-down of certain assets (including fixed assets) to 20% or nil of the purchase price in the first year, provided that such write-downs do not, in the aggregate, result in a drastic decline in taxable income or even a tax loss and are commercially justified. For this accelerated depreciation to be tax deductible, it must be booked in the statutory accounts and generally disclosed in the tax return. As the cantonal tax authorities are responsible for assessing not only cantonal/communal CIT but also federal CIT, the accelerated depreciation usually will be accepted for federal CIT purposes as well.

### *Goodwill*

Only acquired goodwill (derivative goodwill) may be capitalised in the statutory accounts and amortised. Amortisation is generally allowed over five years.

### *Interest expense*

Interest paid by a corporation to a third party is a deductible business expense. Interest paid to related parties (affiliates or shareholders) has to reflect the fair market rate and is subject to limitations *(see Thin capitalisation rules in the Group taxation section)*.

With respect to related parties, the Federal Tax Administration annually issues safe harbour interest rates to be used on loans in CHF on the one hand and in foreign currencies on the other hand. The corporation may deviate from these safe harbour rates as long as it can prove that the rates used are at arm's length and more appropriate in the present case. The cantons usually follow the federal guidelines.

The safe harbour rules for loans denominated in CHF applicable as of 1 January 2011 are as follows:

| For loans made to related parties | Minimum interest rate (%) |
|---|---|
| Financed from equity | 2¼ |
| Financed from debt (actual costs plus at least): | |
| On amount up to CHF 10 million | ½ |
| On amounts of more than CHF 10 million | ¼ |
| But in all cases **at least** | 2¼ |

| For loans made to related parties | Maximum interest rate (%) | |
|---|---|---|
| **Type of loan** | **Home construction / agriculture** | **Industry and business** |
| Real estate loans | 2 | 2 ½ |
| A loan up to the amount possible for mortgage (i.e. 2/3 of the market value of the real estate) | | |
| Rest, whereby the following maximum interest rates for debt are applicable: | 2 ¾ | 3 ¼ |
| Land, villas, residences, vacation houses, business premises up to 70% of the market value | | |

| For loans made to related parties | Maximum interest rate (%) | |
|---|---|---|
| Type of loan | Home construction / agriculture | Industry and business |
| Other real estate up to 80% of market value | | |
| Operational loans | | |
| Made to trading and production companies | – | 4½* |
| Made to holding and asset administration companies | – | 4* |

*In calculating the amount of the maximum interest permissible from a tax perspective, any potentially existing hidden equity (under Swiss thin capitalisation rules) has to be considered.

### *Royalties*
Royalty payments are generally deductible for tax purposes as long as the royalty rate is at arm's length.

### *Bad debt provision*
Based on a longstanding but not published practice, it is admissible in Switzerland to set up an accounting provision for specific impaired debts, which will be accepted for tax purposes. Unlike most other countries, it is also possible in Switzerland to set up an additional ('lump sum') bad debt provision of 5% on all domestic and 10% on all foreign receivables (i.e. after deduction of specific impaired debts), except for inter-company receivables and receivables to the public, enabling the taxpayer to defer the related tax liability until this provision has been released. Some cantons, such as Zurich, accept an even higher reserve (i.e. 10% on domestic and 20% on foreign receivables). This additional bad debt provision may have the character of a 'hidden' (i.e. undisclosed) reserve and is possible to build because the Swiss accounting standards favour prudence over true and fair view accounting principles.

### *Obsolete inventory provision*
Similarly to the bad debt provision, it is also possible to build a 'hidden' (i.e. undisclosed) reserve on a company's inventory. This provision, which must also be booked in the statutory accounts, is accepted for tax purposes (similar to the bad debt provision). Specifically, a company may build a provision for obsolete inventory as well as a hidden reserve on 33.3 % of the inventory value after deduction of the obsolete inventory.

### *Costs of employee share plans and stock option plans*
The cost of employee share plans and stock option plans are generally deductible, assuming the employees eligible for the plan are employed by the Swiss company. The same holds true for the recharge of costs for plans covering local employees.

### *Charitable contributions*
At a federal level, charitable contributions up to 20% of the net profit of a company are tax deductible, if certain criteria are met. In particular, the charitable contribution has to be remitted to (i) Swiss legal entities which are exempt from taxation based on their public welfare or exclusively charitable objective or to (ii) the Swiss Federation, a Swiss Canton or Municipality, or their agencies ('Anstalten'). The cantons usually apply the same rules and similar thresholds.

Sponsoring contributions are only tax deductible if commercially justified (without specific thresholds).

### *Fines and penalties*
Under Swiss tax law, tax fines are usually not tax deductible. The potential tax deductibility of other fines or penalties has to be analysed with respect to the specific case.

### *Tax expenses*
Corporate income and capital taxes paid to Switzerland as well as to the cantons and the municipalities are tax deductible.

### *Net operating losses*
Losses may be carried forward for at maximum seven tax years and offset from the preceding seven years' taxable profits. There is no carryback of losses.

### *Payments to foreign affiliates*
Management and services fees paid by a Swiss company to a related party are generally tax deductible as long as the fees are at arm's length.

## *Group taxation*

Tax is levied on each corporation as a separate entity. A parent company and its Swiss subsidiaries are taxed separately, and only the dividends from the subsidiaries (but not their profits) are taxable in the parent company's hands. However, usually for dividend income, the participation relief is applicable *(see Participation relief in the Income determination section)*. As a result, in general, there are no rules on group consolidation for tax purposes.

### *Transfer pricing*
Switzerland is of the opinion that transfer pricing matters cannot be addressed by legislation and therefore has no plans to issue any domestic provisions on transfer pricing in the near future. There is, however, an increasing awareness of the issue and concern on the part of the Swiss tax authorities that taxpayers may transfer profits without economic justification to countries with strict transfer pricing rules and documentation requirements in order to avoid challenges by the respective local tax authorities. In this context Swiss tax authorities take an increasing interest in a company's transfer pricing position in order to defend their own position. Some cantonal tax authorities have started to particularly focus on low risk/low profit entities located in Switzerland.

Switzerland follows the OECD Guidelines as closely as possible and recognises the arm's-length principle based on interpretation of actual legislation. To clarify transfer pricing issues, Switzerland offers an informal procedure for agreeing to pricing policies in advance.

### *Thin capitalisation rules*
Swiss thin capitalisation rules are, in general, only applicable for related parties. Thereafter, the debts of a company are added to its equity if, economically, they are to be treated as equity. The respective circular letter issued by the Federal Tax Administration provides for debt/equity ratios as safe harbour rules. As an example, the debt/equity ratio is generally fixed at 6:1 for financial companies (safe harbour). Interests paid on loans that exceed the relevant ratios are not deductible; further, these interests may be deemed as a hidden distribution and hence subject to Swiss WHT. There are no limitations on the financing of Swiss corporations by independent third parties (e.g. banks).

Interest rates paid to affiliated companies are also subject to periodic fixed ceilings *(see Interest expense in the Deductions section)*. The deduction of interests in excess of the permitted rate may be disallowed and treated as a hidden distribution subject to Swiss WHT.

***Controlled foreign company (CFC) regime***
There are no CFC rules in Switzerland. Certain Swiss tax evasion instruments (i.e. tax avoidance or 'Steuerumgehung') may lead to a result similar to CFC rules; however, they are very rarely assumed by Swiss Courts for affiliated companies.

## ***Tax credits and incentives***

The Swiss cantons offer, in general, competitive tax rates for cantonal and communal tax purposes. Depending on the specific cantonal and municipal tax location in Switzerland, the ordinary overall (federal, cantonal and municipal) CIT charge may vary between 12.7% and 24.2% *(see the Taxes on corporate income section)*. The cantons continually try to improve their environments as business locations. As a result of the CTR II, the cantons may now choose to credit CIT to the capital tax to reduce the overall tax burden *(see Capital tax in the Other taxes section)*. As a further example, the canton of Nidwalden introduced a tax relief for certain licensing income (so-called license-box), whereupon net licence income from the use of intangible assets is taxed separately at a reduced corporate tax rate of 1/5 of the regular rate.

In addition, many cantons offer tax incentives for newly established companies or for expansion investments, such as tax holidays or significant tax relief for cantonal and communal tax purposes for up to ten years. In some cantons or for specific regions, a tax holiday may even be granted for federal CIT purposes if certain conditions are met.

***Privileged cantonal tax regimes***
Many cantons offer privileged corporate tax regimes. Usually, an up-front confirmation for such privileged tax regimes can be obtained by way of an advance tax ruling with the cantonal tax authorities. Such ruling process usually takes at least four to six weeks.

The privileged tax regimes, as described below, are usually granted for an unlimited period of time and can be relied upon unless the Swiss company's circumstances change materially.

***Holding company tax regime***
A qualifying holding company is exempt from all cantonal/communal CIT (with the exception of income from Swiss real estate, which is subject to tax after deduction of typical mortgage expenditures on such real estate).

Consequently, a holding company is in principle only subject to an effective tax rate of 7.83% (i.e. federal CIT rate) prior to participation relief for qualifying dividends and capital gains. A reduced capital tax at the cantonal/communal tax level also usually applies.

The holding company tax status is available to companies which meet all of the following conditions:

- The primary purpose of the company must be to hold and manage long term equity investments in affiliated companies and this purpose must be stated in the by-laws.
- The company must not be engaged in a commercial activity in Switzerland.

- The company must pass an alternative asset or income test, whereby either two-thirds of the company's assets must consist of substantial shareholdings or participations or two-thirds of total income of the company must consist of participation income (dividend income or capital gains) from such shareholdings and participations.

A tax ruling may be obtained from the cantonal tax authorities in the proposed canton of residence in order to confirm eligibility for the holding company status prior to forming the holding company.

### *Domicile company tax regime*

The domicile company tax status is available for companies which only carry out administrative functions in Switzerland but no commercial activities.

Insofar as a company fulfils the above mentioned criteria, it may apply to the cantonal tax authorities in the proposed canton of residence for a tax ruling entitling it to the following taxation:

- A modest portion of foreign source income (i.e. from 0% - 15%) is subject to tax in accordance with the importance of the administrative function in Switzerland.
- Income from qualifying participations (including dividends, capital gains, and re-evaluation gains) is usually tax exempt (whereas losses deriving from qualifying participations usually are non-tax-deductible).
- All income from Swiss sources is taxed at ordinary rates.
- Expenditures which are justified for business purposes are deductible from the income to which they have a business correlation.
- Reduced capital tax rates usually are applicable.

The conditions to qualify as a domicile company vary from canton to canton. This is particularly the case with regard to determining the percentage of income from foreign sources subject to tax in Switzerland and to the definition of exactly what type of income is considered foreign source income.

A domicile company can be expected to be subject to an effective tax rate of 7.83% - 11% on foreign source income.

### *Administrative/auxiliary/mixed company tax regime*

This tax status, which is very similar to the domicile company tax status, has been given different names by the cantons. Internationally, it is most often referred to as the 'mixed company' tax status.

In contrast to the pure domicile company status, it is permissible for a mixed company to undertake limited commercial activity in Switzerland. As a general rule, at least 80% of the income from commercial activities of a mixed company must derive from non-Swiss sources (i.e. a maximum of 20% of income may be linked to Swiss sources). Many cantons additionally require that at least 80% of costs must be related to activities undertaken abroad.

Insofar as a company fulfils the above mentioned criteria, it may apply to the appropriate cantonal tax authorities for a tax ruling entitling it to tax treatment analogous to the rules set forth above for domicile companies. Depending on the concrete Swiss activity and infrastructure, the portion subject to cantonal and communal income tax generally varies from 5% to 25% of the foreign source income and is generally higher than is the case for domicile companies. The exact portion needs to be clarified with the responsible cantonal tax authorities in the tax ruling.

## Withholding taxes

The statutory rate of Swiss WHT is 35%. Relief, if any, is generally granted by refund. With respect to related companies, a mere notification/reporting procedure may be requested for the fraction of the Swiss WHT exceeding the residual WHT. The table further below shows the residual/remaining tax for the recipient. Credit for the unrelieved portion of Swiss WHT may (in case the notification/reporting procedure does not apply) be available in the country of the recipient.

### Introduction of the capital contribution principle in 2011

By the CTR II, the change from the nominal principle to the capital contribution principle was introduced. It entered into force as of 1 January 2011. The capital contribution principle allows repayment of shareholders' capital contributions without liability for Swiss WHT at the level of the distributing company and without income tax at the level of the Swiss individual shareholder (holding the shares in his private assets). According to the transition period, capital contributions are qualifying if accumulated after 31 December 1996 and meeting some further requirements, e.g. special and timely recordings in the statutory books and vis-à-vis the tax authority. In general, the new rules apply for premiums, additionally paid-in capital and contributions into the reserves of a company without increasing the nominal share capital *(see Corporate tax reform II in the Significant developments section)*.

*Bilateral Agreements (in particular Art. 15 of the Savings Agreement) between Switzerland and the European Union (EU) apply as of 1 July 2005 and provide the following benefits:

Upon request, Swiss WHT on dividends paid by a Swiss subsidiary company to its EU parent company may be reduced to 0% (reduction at source) and is only subject to a notification/reporting procedure, if the following conditions are cumulatively met:

- Direct minimum holding of 25% of the subsidiary's capital for at least two years.
- Both companies are subject to CIT.

Upon request, WHT on interest and royalty payments made between associated companies or their PE resident respectively situated in Switzerland and the European Union may be reduced to 0% (reduction at source) in the source state, if the following conditions are cumulatively met:

- Direct minimum holding of 25% for at least two years (parent/subsidiary) or direct holding by a third company of minimum 25% in the capital of both companies for at least two years (sister companies).
- Both companies are subject to CIT.

Transition periods/rules:

- Greece, Latvia, Poland, and Portugal: WHT rate on interest is at maximum 10% as of 1 July 2005 to 30 June 2009; as from 1 July 2009 to 30 June 2013, the maximum WHT rate is 5%, afterwards 0%.
- Lithuania: WHT rate on interests is at maximum 10% as of 1 July 2005 to 30 June 2009; as from 1 July 2009 to 30 June 2011, the maximum WHT rate is 5%, afterwards 0%.
- Specific transition rules applied in relation to Spain until 31 May 2007. The above mentioned transition rules only cover the Swiss outbound perspective. Further transition rules may apply for Swiss inbound payments (e.g. for royalties paid to a Swiss company), e.g. with respect to Czech Republic and Spain.

In general, the Bilateral Agreements between Switzerland and the European Union are applicable with all EU countries. Consequently, the 35% Swiss WHT can also be reduced in connection with the EU countries, if the requirements above are met. In lack of a DTT, this is in particular to be mentioned with respect to Malta and Cyprus. The application of the Bilateral Agreements is subject to domestic and STA misuse conditions.

DTTs between Switzerland and EU countries with more favourable tax treatment of dividend, interest, and royalty payments remain unaffected.

Notes

1. In Switzerland, there is no WHT on interest deriving from regular loan agreements. The Swiss WHT of 35% is only levied on interest paid by banking institutions (or paid by entities tax-wise qualified as 'banking institutions') to non-banks, interest on bonds, and interest on bond-like loans. Further, the Swiss WHT of 35% may be levied on interest paid on mortgage loans with respect to Swiss located real estate; however, this is not covered in the table above.
2. There is no Swiss WHT on royalties, licenses, and similar fees payable by Swiss individuals or corporations (provided that the dealing at arm's-length principle is met).
3. The statutory Swiss WHT rate of 35% is levied but refunded, provided that the respective earnings are declared as income for tax purposes.
4. Between Swiss group companies, the Swiss WHT of 35% can usually fully be refunded; in many cases, the tax liability can be met by the notification/reporting procedure. For this purpose, a substantial holding is a participation of at least 10% in the share capital or profits and reserves or otherwise a market value of at least CHF 1 million.
5. Certain types of interest payments income deriving from several countries are exempt from WHT.
6. 15% residual tax for French companies with more than 10% shareholding if fulfilling the following requirements: i) No predominant shareholder of the company is EU or Swiss resident and ii) The shares are not traded at a stock exchange (neither the shares of the receiving nor of the distributing company).
7. Full relief of the WHT on interest paid for a loan granted by the Israel Government (including political subdivisions and local corporate bodies) or granted by the Israel Central Bank.
8. Interest on bank loans is 5%.
9. Full relief if certain requirements are met.
10. Interest on bank loans is 10%.
11. Full relief for certain dividend payments to certain US pension funds.
12. Full relief on certain categories of interest.
13. Interest on bank loans is 0%.
14. According to the territorial principle of Venezuela, only certain persons can benefit from the tax relief.
15. Interest on bank loans to corporations is 0%.
16. 0% WHT rate on dividends of participations of at least 25% if participation was held for at least two years.
17. 20% minimal shareholding plus foreign investment of minimal USD 200,000.
18. 20% minimal shareholding plus foreign investment of minimal CHF 200,000.
19. 30% only on income bonds ('Gewinnobligationen') and on profit participating loans ('partiarische Darlehen').
20. 5% for specific power houses ('Grenzkraftwerke').
21. 10% WHT for shareholdings between 20% and 50%; 7% WHT for shareholdings of more than 50%.
22. 5% WHT for shareholdings of more than 20%; 10% WHT for others.
23. 5% WHT on loans from banks and insurance institutions, bonds or other securities traded on a stock market and on certain credit buying; 15% on any other interest.
24. 5% WHT if the shareholding of 10% was held less than two years, 0% WHT if the shareholding of 10% was held longer than two years.
25. 5% WHT if interest is paid to a bank or a securities dealer or an insurance/reinsurance institution; 10% Swiss WHT in all other cases.

## *Tax administration*

### *Returns*

The tax year is the business year. Thus, the basis for corporate taxation is the applicable accounting period, which may end at any date within a calendar year.

The tax system is based on taxpayers' declarations, with subsequent assessments being issued by the tax authorities on the basis of the tax returns filed. The due date varies from canton to canton. Companies are initially assessed on a provisional basis, with the final assessments being issued after the tax base has been either the subject of a tax audit or declared final by the authorities.

### *Payment of tax*

Unless payments on account are specifically requested, federal, cantonal, and communal taxes on income and capital are, in most cantons and for federal tax purposes, payable only upon receipt of a demand based on a provisional or final assessment.

Note that cantonal exemptions apply. As an example, based on the date of maturity of the respective tax year (30 September), the canton of Zurich levies late payment interest to the extent that the full (final) tax amount had not been paid in time (independent from any earlier provisional tax invoices). About one month before the due date, a (provisional) tax bill based on the latest tax return filed or the assessment of the preceding period is sent to the taxpayer. Payment is usually in two or three instalments. If the entire amount is paid up front, a discount may be granted.

The provisional federal CIT is usually due by 31 March of the year following the tax period at question. The due date of the final federal CIT and the provisional and definitive cantonal CIT varies.

## *Other issues*

### *Reorganisations*

Some corporate reorganisations (transfer of business assets within a group of companies, vertical and horizontal spin-off of business or part of business, share-for-share transactions, cross-border reorganisation where the Swiss tax residence is maintained, and replacement of participations) are possible without triggering adverse tax consequences (tax neutrality). In addition, special rules apply for the tax neutral substitution of assets and qualifying shareholdings.

## Significant developments

The Ministry of Economy and Trade has reduced the minimum capital required to establish a partnership to 300,000 Syrian pounds (SYP). The decision was approved by the Syrian Cabinet on 27 April 2010. Prior to this decision, the minimum capital required for a partnership stood at SYP 1 million. In March 2010, the Ministry also reduced the minimum capital required to establish a limited liability company to SYP 1 million from SYP 3 million.

A new bill has been issued (Law No. 13/2011) to encourage Syrian companies to transfer to limited liability and shareholding forms. This law extends the facilities provided by Law No. 61/2007 and grants additional ones to companies. The law provides for companies to pay between 1% and 2% of the difference in the value of their assets as taxes after their revaluation, instead of a rate of between 14% and 28%, and exempts them from any additional taxes or fees that would fall on them because of the revaluation.

Syria has approved a new law regulating the establishment and operations of companies, less than three years after a similar bill was passed. The new text, Law No. 29/2011, brings a number of additions and improvements to the rules regulating the establishment of companies in Syria, such as:

- the establishment of one-person limited liabilities
- the transformation of state-owned entities into companies (currently state-owned institutions operate under specific regulations)
- the establishment of holding firms as limited liabilities, and
- the establishment of non-public shareholding companies.

The minimum face value of shares to be sold by joint stock companies (JSCs) has been lowered to SYP 100 from SYP 500.

In order to ease the establishment of limited liability companies (LLCs), investors will be able to apply to set their company up through the regional offices of the Syrian Investment Agency, the Industrial Cities located across the country, or the Domestic Trade Directorate of the Governorates.

## Taxes on corporate income

### General income tax rates (including branches of foreign companies)

Except for the special cases listed below, common corporate income tax (CIT) rates (including branches of a non-resident entity) vary between 10% and 28% of profits, as follows:

# Syria

| Taxable profit (SYP) | Tax rate (%) |
|---|---|
| Up to 200,000 | 10 |
| From 200,001 to 500,000 | 15 |
| From 500,001 to 1,000,000 | 20 |
| From 1,000,001 to 3,000,000 | 24 |
| Over 3,000,000 | 28 |

CIT is levied on all corporeal and incorporeal persons, residents and non-residents, on all profits generated in Syria. Profits are considered to be realised in Syria if they occurred from efforts exerted in Syria, irrespective of the taxpayer's identity or place of residency.

Syria does not tax residents on a worldwide basis. Syria's tax is based on territoriality.

### *Surtaxes*

Depending on the location of the taxpayer, an additional local administration surtax of 4% to 10% (of the CIT amount) will apply.

### *Joint-stock companies with more than 50% shares offered to the public*

Joint-stock companies offering more than 50% of their shares to the public are subject to a flat CIT rate of 14% on profits. In this case, the 4% to 10% administration surtax does not apply.

### *Other joint-stock and limited liability companies and projects included under investment encouragement laws*

Joint-stock companies offering less than 50% of their shares to the public, limited liability companies, and projects signed with Syrian companies included under the investment encouragement laws are subject to a flat CIT rate of 22% on profits. In this case, the 4% to 10% local administration surtax applies.

### *Hotels, restaurants, and recreational establishments*

International standard, first and second-class hotels, restaurants, lodging houses, related services, and all recreational establishments are subject to tax based on their turnover. The tax rate is 3%, and it covers both CIT and salary tax.

### *Contracts with public sector, oil companies, and non-residents*

A Syrian company contracting with the public sector and/or with an oil company or with a non-resident entity will be subject to a withholding tax (WHT) based on the contract value (on that specific contract only) rather than CIT on real profits.

The same tax rate applies to non-residents operating directly from abroad; they are subject to a 1%, 2%, 4%, 7%, or 10% WHT on the value of the contract. The applicable rates vary according to the nature of the contract and the customer. The non-resident tax covers both income tax and salary tax of the foreign and local employees working on the contract.

## *Corporate residence*

The following entities are considered Syrian residents for tax purposes:

- An entity whose principal activities are administered in Syria.

- An entity that adopts the Syrian Arab Republic as its headquarters.
- Branches or offices of foreign companies in Syria.

## Other taxes

### Value-added tax (VAT)
There is no VAT in Syria.

### Property taxes
Tax on real estate ranges from 14% to 60% based on the type of property. Property tax is also paid on rental income at progressive rates ranging from between 14% and 60%.

### Customs duties/import tariffs
In setting the rules for valuation of merchandise, Syrian customs take into consideration the related explanatory notes issued by the World Trade Organization (WTO).

Customs duties classified in the Harmonized Tariff Schedule apply to goods introduced into Syria. Import operations are subject to prior licenses granted to all importers after they present their documents to the commercial registration and chambers of commerce or industry in Syria.

The value of the goods imported to Syria that should be declared is based on the transaction value. It includes the price which is actually paid or payable for the goods when purchased for the purpose of being exported to Syria and any and all other subsequent expenses incurred by the buyer that were not covered by the price (including but not limited to, shipment, insurance, unloading, etc.) until the arrival of goods to Syria.

In practice, customs duty is levied on the higher of the value of the transaction to which are added subsequent expenses or the price specified by the General Foreign Trade Organization (GFTO).

#### Ordinary tariffs and preferential tariffs
Ordinary tariffs apply to goods which are not qualified for preferential tariffs. Preferential tariffs apply to all goods or part thereof originating from a country or a group of countries with which Syria is bound by special customs agreements that qualify these goods for preferential status within limits specified in the said agreements.

Merchandise that has been put into use in a country other than its country of origin, and that is imported from that country, is subject to the higher customs tariff between country of origin and country of import. Merchandise that has been manufactured in a country other than its country of origin is subject to customs tariff related to country of origin or country of manufacture depending on the degree of manufacture in each country and according to the rules set by the Minister.

### Consumption tax/excise tax
Consumption tax is imposed on certain services and luxury goods with rates ranging from 1.5% to 40%. Taxpayers are required to register for consumption tax purposes, and tax is withheld by the party provided the service or goods or by customs (at import) and paid on a monthly basis to the Ministry of Finance.

### Registration taxes
The estimated cost of establishing a company ranges from USD 4,000 to USD 8,300 plus 0.5% of the capital stamp duty plus local administration tax of 5% of the stamp duty.

For branch offices, establishment costs are lower and may be estimated at USD 3,000.

### Stamp duty
Stamp duty generally is imposed on transactions such as the formation of corporations or the execution of documents, licenses, contracts, etc. at a rate ranging from 0.4% to 0.7%.

The surtax is applicable on the stamp duty tax.

## Branch income

The taxes on branch income are the same as taxes on corporate income (i.e. tax rate varies between 10% and 28%). *See the Taxes on corporate income section for more information.*

## Income determination

### Inventory valuation
Inventory is typically valued at the weighted average cost.

### Capital gains
Capital gains are considered taxable income and are taxed at the normal CIT rates (10% to 28%).

Capital gains include dividends, interest, revenue, premiums, and other cash income sources.

### Dividend income
Dividends paid by Syrian corporations on previously taxed income are not subsequently subject to tax upon distribution.

Dividends received from a non-resident entity are subject to tax upon distribution in Syria of 7.5%.

### Rental income
Rental income should be deducted from the accounting result to reach the taxable result.

Property tax is paid on rental income at progressive rates ranging between 14% and 60%.

### Royalty income
Royalties received are taxed as ordinary income.

### Partnership income
Profits of partnerships are deemed to be distributed and are taxed at progressive rates of 10% to 28%.

### Foreign income
Income from any source, domestic or foreign, received by a company in Syria is subject to the applicable CIT rate. The scope of tax covers the activities carried out inside and outside Syria, which are administered or managed from Syria.

## Deductions

### Deductible expenses
The following expenses are deductible:

- Cost of goods sold.
- Cost of services rendered.
- Rent paid for the business premises (or rent value if the taxable entity owns the property).
- Salaries and incentives paid to employees/workers.
- Payments representing employer's portion of social security contributions.
- Indemnities and allowances (end of service) paid according to the labour law.
- Depreciation accepted according to each kind of profession and industry, except depreciation of real estate.
- Taxes and duties levied during the year except CIT.
- Grants paid by taxable persons against official receipts for known public or private entities on condition the grants do not exceed 3% of net profits.

### Non-deductible expenses
The following expenses are not deductible:

- Expenses leading to the increase of the value of fixed assets (capital expenditures).
- Personal expenses considered by the business owner (or/and his partner) as personal compensation.
- Compensations for partners in some business entities.

### Depreciation
Depreciation of property, plant, and equipment (at rates fixed by the law) is deductible.

### Net operating losses
Losses may be carried forward for five years. The carryback of losses is not available.

### Payments to foreign affiliates
Payments to foreign affiliates are considered normal payments because Syria has no transfer pricing rules. However, the payments may be subject to WHT.

## Group taxation

There is no group taxation in Syria.

### Transfer pricing
No transfer pricing rules exist in Syria.

### Thin capitalisation
No thin capitalisation rules exist in Syria.

## Tax credits and incentives

### Investment incentives

Investment encouragement regulations allow foreign investors to benefit from customs exemptions for the imports used in the investment.

### Permanent CIT exemptions

Physical and moral persons and associations exempted from CIT, either through the real profit or lump-sum profit method, are the following:

- Types of consumers and investors' cooperative associations.
- Farmers harvesting and selling crops; this exemption includes animals and livestock bred on their farming lands.
- Facilities in which stocks are bred or where poultry farming is exercised; subject to CIT according to the real-profit tax.
- Day-care centres.
- Institutes and associations taking care of people with special needs.
- 75% of the yearly net profits for air and maritime transportation.
- 50% of net profits of stock breeding and poultry farming facilities.

## Withholding taxes

### Interest

The income, revenue, and interest earned from accounts opened at Syrian banks and from treasury bonds are subject to an 8.25% total WHT (i.e. 7.5% WHT and 10% surtax).

### Royalties

Royalties paid to non-residents are subject to a 7% total WHT (i.e. 5% CIT as well as a 2% salary tax).

### Resident contractors

When a Syrian company performs contracts with the public sector, with an oil company, or with a non-resident entity, it will be subject to a WHT based on the contract value (on that specific contract) rather than CIT on real profits.

### Non-resident contractors

Revenue earned by non-resident contractors in Syria is subject to a WHT based on the contract value (of that specific contract) rather than CIT on real profits.

### Double taxation treaties (DTTs)

The table below shows the treaty and non-treaty WHT rates:

| Recipient | Interest (%) | Dividends (%) | Royalties (%) |
|---|---|---|---|
| Non-treaty: | 7.5 | 0 | 7 |
| Treaty: | | | |
| Algeria | 10 | 10 | 18 |
| Armenia | 10 | 10 | 12 |
| Bahrain | 10 | (1) | 18 |
| Bulgaria | 10 | 10 | 18 |
| Croatia | 10 | (10) | 12 |

| Recipient | Interest (%) | Dividends (%) | Royalties (%) |
|---|---|---|---|

| United Arab Emirates | 10 | (1) | 18 |

Notes

1. Taxed only in the dividend beneficiary's jurisdiction (when the beneficiary is owner of the shares).
2. Tax should not exceed:
   - 5% of the gross amount of the dividends if the beneficial owner is a company (other than a partnership) that owns at least 10% of the shares of the company paying the dividends or
   - 10% of the gross amount of the dividends in all other cases.
3. Tax should not exceed:
   - 5% of the gross amount of the dividends if the beneficial owner is a company that has owned at least 25% of the capital of the company paying the dividends or
   - 10% of the gross amount of the dividends in all other cases.
4. Total Malta or Syrian tax on the profits of a company and the dividends distributed by such company, as the case may be, shall not exceed the maximum tax chargeable on the company's profits out of which the dividends are paid.
5. Tax should not exceed:
   - 18% of the gross amount for any patent, trademark, design or model, plan, secret formula or process, industrial or scientific equipment, or for information concerning industrial or scientific experience
   - 15% of the gross amount paid for any copyright of literary, artistic, or scientific work, or
   - 10% of the gross amount paid for any copyright of cinematographic films, or tapes for television, or radio broadcasting.
6. Tax should not exceed:
   - 10% of gross amount paid for cinematographic films, magnetic films, and tapes for television and radio or
   - 5% of the sum paid for any copyright of a literary, artistic, or scientific work, including cinematographic films and films and recordings for other forms of radio transmission or television transmission; any patent, trademark, design or model, plan, secret formula, or secret process, as well as for the use or right to use industrial, commercial, or scientific equipment, and for information related to experience in the industrial, commercial, or scientific area.
7. Tax should not exceed:
   - 18% of the gross amount of royalties paid for any patent, trademark, design or model, plan, secret formula or process, any computer software program, or for information concerning industrial, commercial, or scientific experience

- 13.5% of the gross amount of royalties paid for any copyright of literary, artistic, or scientific work, or
- 4.5% of the gross amount of royalties paid for cinematographic films, programmes, and recordings for radio or television broadcasting.

8. Tax should not exceed:
   - 15% of the gross amount of royalties paid for any patent, trademark, design or model, plan, secret formula or process, or for information concerning industrial, commercial, or scientific experience or
   - 10% of the gross amount of the royalties for the use of or the right to use any copyright of literary, artistic, or scientific work including cinematographic films and recordings for radio and television.
9. Tax should not exceed:
   - 20% of the gross amount of royalties paid for any patent, trademark, design or model, plan, or any industrial or scientific equipment, or for information concerning industrial or scientific experience or
   - 15% of the gross amount of the royalties for any copyright of literary, artistic, or scientific work including cinematographic films, or tapes for television or radio broadcasting.
10. Tax should not exceed:
    - 5% of the gross amount of the dividends if the beneficial owner is a company (other than a partnership) which holds directly at least 10% of the capital of the company paying the dividends or
    - 10% of the gross amount of the dividends in all other cases.

## *Tax administration*

### *Returns*

The tax year in Syria is the calendar year.

Taxpayers in Syria shall comply with the following requirements:

- Tax returns must be filed by 31 May for limited liability and joint-stock companies and 31 March for other types of companies.
- Salary WHT should be submitted by the employer on a semi-annual basis.

### *Payment of tax*

Payment is due at the time of filing.

### *Penalties*

A penalty is assessed for late payments 30 days after the filing date at a rate of 10%, up to the amount of the tax liability.

### *Statute of limitations*

In Syria, the statute of limitations with respect to tax is five years.

# Taiwan

## Significant developments

In January 2011, Taiwan introduced a thin capitalisation rule in the amended Income Tax Act. From 2011 onwards, deductible interest expense on inter-company loans is capped at a prescribed debt-to-equity ratio to be determined by the Ministry of Finance (MOF).

The amendment to the Income Tax Act in January 2011 also introduces the tonnage tax system. From 2011 onwards, a qualifying enterprise having its head office in Taiwan engaged in maritime transportation may elect to be taxed under the tonnage tax system.

The Taiwan-France tax treaty took effect from 1 January 2011. The withholding tax (WHT) rates imposed on dividends, royalties, and interests have been reduced from 20% to 10%. After signing this treaty, Taiwan currently has double taxation agreements (DTAs) with 20 countries.

On 4 May 2011, the Presidential Office promulgated the Selective Goods and Services Tax (also known as luxury tax), which imposes a 10% to 15% tax on real estate properties purchased not for self use and sold within two years, as well as various luxury products.

## Taxes on corporate income

To help improve Taiwan's investment environment and boost foreign investors' interest in injecting money into Taiwan, the current CIT rate has been reduced from 20% to 17% effective from taxable year 2010 and onward.

Resident companies in Taiwan are taxed on their worldwide income as follows:

| Taxable income | Tax thereon |
|---|---|
| Up to TWD* 120,000 | Exempt |
| TWD 120,001 and over | 17% of total taxable income |

* New Taiwan dollars

A non-resident company is taxed on income derived from Taiwan sources. A non-resident company with a fixed place of business or business agent in Taiwan will be taxed similarly to a resident company (i.e. subject to filing of annual CIT return based on the same CIT rate provided above). Whereas, a non-resident company having no fixed place of business or business agent in Taiwan is subject to WHT at source on its Taiwan-sourced income. WHT rates on dividends, interest, and royalties may be reduced if the recipient is a tax resident of a tax treaty country and the relevant treaty provides for a reduced rate. *See the Withholding taxes section for more information.*

### *Tonnage tax system*

The amendment to the Income Tax Act in January 2011 introduced the tonnage tax system. From 2011 onwards, a qualifying enterprise having its head office in Taiwan engaged in maritime transportation may elect to be taxed under the tonnage tax system, where a lump sum tax is calculated on the net tonnage of their fleet. Once the application is approved, the enterprise must remain under the tonnage tax system and cannot switch to the regular tax system at its discretion for ten consecutive years. Furthermore, loss carryforwards and tax incentives are not eligible under the tonnage tax system.

### *Profit retention tax*

For earnings accumulated on or after 1 January 1998, an additional 10% profit retention tax is imposed on any current earnings that remain undistributed by the end of the following year.

### *Imputation tax system*

Taiwan operates an imputation tax system to eliminate double taxation on earnings of a corporation. The 17% CIT and 10% profit retention tax already paid by the corporation can be distributed to the resident individual shareholders as tax credits to offset against their individual income tax. However, the tax credits distributable to shareholders are subject to certain limitations.

Non-resident shareholders may credit the 10% profit retention tax previously paid by the investee company against the dividend WHT where the dividends are distributed from retained earnings that have already been subject to the 10% profit retention tax. Please note that credit for profit retention tax from dividend WHT is calculated based on a prescribed formula.

### *Income basic tax (IBT)*

All Taiwan resident companies, as well as non-resident companies with a fixed place of business or business agent in Taiwan, should calculate IBT if they earn certain income that is tax-exempt. The basic income of a company is the amount calculated in accordance with a formulae stipulated by the government, with a deduction of TWD 2 million. Currently, the IBT rate is 10%. If the IBT amount is greater than the regular CIT amount, taxpayers must pay income tax based on the regular CIT amount plus the difference between the IBT amount and the regular CIT amount. On the other hand, if the regular CIT amount is greater than the IBT amount, no special action is required.

## *Corporate residence*

A company is a resident of Taiwan for income tax purposes if it is incorporated in Taiwan. A non-resident company which has a fixed place of business or business agent in Taiwan is obligated to file corporate income tax returns in Taiwan on its Taiwan sourced income.

## *Other taxes*

### *Business tax*

All sales of goods and services in Taiwan, as well as the importation of goods into Taiwan, are subject to business tax. There are two types of business tax systems: value-added tax (VAT) and gross business receipts tax (GBRT).

The sellers and service providers are generally obligated to pay business tax for the sales of goods or services within Taiwan unless the law provides otherwise. For importation of goods, the business tax will be paid by the goods receivers or buyers via customs. For importation of services sold by foreign companies to Taiwanese buyers, business tax shall be paid by the service buyers. However, if the foreign service purchased is under TWD 3,000 per transaction, the business tax shall not apply. Furthermore, the service buyer (corporate entity) will not be required to pay business tax if it adopts the VAT system and is exclusively engaged in taxable transactions.

#### Value-added tax (VAT)

VAT is applicable to general industries, and the VAT rate is 5%. Under the VAT system, each seller collects output VAT from the buyer at the time of sale, deducts input VAT paid on purchases from output VAT, and remits the balance to the tax authority.

#### Gross business receipts tax (GBRT)

GBRT is applicable to specified industries (e.g. financial institutions, small businesses). For banks, insurance companies, investment trust companies, securities and futures firms, short-term commercial paper enterprises, and pawnshops, the rate is 2%. For re-insurance enterprises, the rate is 1%.

### *Stamp tax*

Stamp taxes are imposed on each copy of the following documents executed within the territory of Taiwan (with the following respective tax rates):

- Monetary receipts must have a revenue stamp of 0.4% of the amount received per piece. However, a receipt for the money deposited by the bidder requires a revenue stamp of 0.1% of the amount received per piece.
- Contract or deed for the sale or purchase of movable property must have revenue stamp of TWD 12 per piece.
- Contractual agreement under which one party agrees to complete a specific piece of work for the other party for consideration must have a revenue stamp of 0.1% of the contract price.
- Contract for the sale, transfer, and partition of real estate must have a revenue stamp of 0.1% of the contract price.

### *Commodity tax*

Commodity tax (excise duty) is levied on certain commodities, as specified in the Commodity Tax Act (including rubber tyres, beverages, cement, plate glass, oil and gas, electrical appliances, and vehicles), at the time when such goods are dispatched from a factory or when imported. Tax rates vary from 8% to 30% and are applicable to different types of commodities based on the value of the goods or the volume in specific circumstances.

| Type of commodity | Tax rates/amount |
|---|---|
| Rubber tyres | 10% or 15% |
| Beverages | 8% or 15% |

| Type of commodity | Tax rates/amount |
|---|---|
| Cement | TWD 280 to TWD 600 per ton |
| Plate glass | 10% |
| Oil and gas | TWD 110 to TWD 6,830 per kiloliter or TWD 690 per ton |
| Electrical appliances | 10% - 20% |
| Vehicles | 15% - 30% |

### *Property tax*
A tax is levied on land and buildings annually. The land tax rate ranges from 1% to 5.5% of the assessed land value. The building tax rate for business properties is 3% of the assessed value and the rate for non-business properties is 1.2% or 2% of the assessed value.

### *Securities transaction tax*
Tax is levied on securities transactions at the rate of 0.3% on gross proceeds from the sale of domestic shares. Trading in corporate bonds and financial bonds issued by Taiwan companies is temporarily exempt from securities transaction tax assessment.

### *Customs duties*
Taiwan uses the Customs Cooperation Council Nomenclature (CCCN) to classify goods and set duty rates. The customs duty is payable by the consignee or the holder of the bill of lading for imported goods and is based on the dutiable value or the volume of goods imported.

### *Luxury tax*
On 4 May 2011, the Presidential Office promulgated the Selective Goods and Services Tax (also known as luxury tax). With an aim to curb real estate speculation, luxury tax of 10% will apply on real estate properties purchased not for self use and sold within two years, as well as various luxury products such as upscale automobiles, yachts, private jets, helicopters, fur, ivory, high-end furniture, and membership rights. However, the rate is increased to 15% where real estate properties purchased not for self use are sold within one year. The new law was implemented on 1 June 2011.

## *Branch income*

A non-resident company whose head office is located outside of Taiwan must keep separate books for its branch in Taiwan. A head office or regional headquarters' general and administrative expenses may be allocated to the branch under certain conditions. CIT is assessed only on the branch's profits. A Taiwan branch should complete an annual CIT return.

A Taiwan branch of a foreign company may remit after-tax profits to its foreign head office without further tax due.

### *Motion picture leasing*
A foreign motion picture's branch in Taiwan can deem 45% of its revenue from leasing of motion pictures as cost. However, if a foreign enterprise with no branch office in Taiwan leases motion pictures through agents, 50% of the revenues can be deemed as taxable income.

### *Deemed profit method*
A non-resident company which is engaged in international transportation, construction contracting, provision of technical services, or machinery and equipment leasing within Taiwan, and where the cost and expenses are proven to be difficult to calculate, may apply for an advance approval from the National Tax Administration (NTA) to adopt the deemed profit method to determine the taxable income as 10% or 15% of the gross revenues. This will effectively reduce the WHT rate to 2% to 3% on gross revenues once the approval is obtained from the NTA.

## *Income determination*

A Taiwan resident company is taxed on its net income which is defined as gross annual income after deduction of costs, expenses, losses, and taxes. Except for certain exempt items, income from all sources, including offshore and onshore, is subject to CIT.

A non-resident company is only taxed on its Taiwan-sourced income. Article 8 of the Income Tax Act and the related Guideline defines the types of income that should be regarded as sourced from Taiwan.

The Guideline issued by the MOF on 3 September 2009 clarifies the scope of Taiwan-sourced income for the existing income categories. For example, fees received by a non-resident company for service performed entirely outside of Taiwan are exempt from income tax assessment, subject to supporting evidentiary documents.

### *Inventory valuation*
Inventory must be valued at cost. If cost exceeds market price, the latter may be used as the valuation basis except where the last in first out (LIFO) method is used. Cost may be determined by the LIFO, first in first out (FIFO), moving-average, weighted-average, specific identification, or any other method approved by the tax authorities. Conformity between financial and tax reporting is not required.

### *Capital gains*
Gains on the disposal of fixed assets are taxable as current-year income of the company, with the exception of gains on the sales of land. The capital gains tax on marketable securities is currently exempt. Instead, securities transaction tax is levied on the sales proceeds *(see the Other taxes section)*. However, if a non-resident company has a fixed place of business or business agent in Taiwan, capital gains on the sale of marketable securities may trigger IBT.

### *Dividend income*
Dividends received from resident investee companies by a resident corporate shareholder are not included in taxable income. In addition, the imputation tax credit derived from the dividend income of the investee corporation can be distributed to the domestic corporate shareholders, but this tax credit cannot be used to offset the domestic corporation's income tax liability; rather, the tax credits must be recorded in a separate book until they are further distributed to the resident individual shareholders of the resident corporate shareholders.

Dividends received from foreign subsidiaries are taxable, but credits are given for the WHT paid offshore, limited to the incremental tax liability that would result if the dividends were added to the Taiwan corporate shareholder's taxable income and taxed at the Taiwan CIT rate.

### *Interest income*

Interest received on commercial paper and certain other interest-bearing financial instruments are subject to WHT of 10% and 15% for resident and non-resident taxpayers, respectively *(see the Withholding taxes section)*. However, such income is not subject to any other form of income tax and is effectively taxed separately from other income.

### *Foreign income*

Taiwan adopts a worldwide tax system to tax its resident company (including the Taiwan subsidiaries of foreign companies). In theory, taxation on foreign investment income of a Taiwanese company is deferred until cash is repatriated to Taiwan and then subject to CIT. However, given Taiwan also taxes undistributed profits based on net income shown on the income statement *(see Profit retention tax in the Taxes on corporate income section),* foreign investment income may still be taxed in Taiwan before cash is repatriated back to Taiwan.

## *Deductions*

### *Depreciation*

Depreciation on all fixed assets other than land, including premises, plants (buildings), and equipment used to generate income is allowed as a deduction. The straight-line, fixed percentage on diminishing book value, sum-of-years-digit, unit-of-production, and working-hour methods are acceptable depreciation methods to the tax office. The useful lives of typical assets are shown below:

| Asset category | Useful life |
|---|---|
| Computer equipment | 3 |
| Furniture and fixtures | 5 |
| Automobile | 5 |
| Building | 50 |

With the approval of the tax authority, a company may revalue its fixed assets each time the government's wholesale price index increases by 25% over the base period. A company's base period is established at the time of purchase of fixed assets or at such time when a company revalues its fixed assets. Any increase in fixed assets may then be depreciated for tax purposes.

### *Taxes*

All taxes other than income tax are generally deductible, unless where such taxes are related to tax-exempt income. However, tax penalties are not deductible. The tax associated with the acquisition of real estate should be included in the cost of the land or building.

### *Other significant items*

If a company invests in a foreign entity and holds at least 20% equity ownership (this limitation does not apply if special approval is obtained from the Executive Yuan), the company can attribute 20% of the investment amount to a 'reserve for foreign investment loss'.

### *Net operating losses (NOLs)*

A company's NOLs can be carried forward for ten years. Losses cannot be carried back.

### *Payments to foreign affiliates*
Royalties, interest, and service fees paid to a foreign affiliate are subject to WHT. Royalties or service fees paid to a foreign entity may be tax-exempt if certain requirements are met and prior approval is obtained.

## *Group taxation*

Group enterprises meeting certain criteria under the Financial Holding Company Act and Business Mergers & Acquisitions Act may file consolidated tax returns for the Taiwan parent and its first tier Taiwan subsidiaries. For other enterprises, group taxation is not permitted. The Taiwan parent is eligible to file consolidated tax returns if it continuously holds over 90% of the shares of the subsidiaries for 12 months in a tax year.

### *Transfer pricing*
The Taiwan MOF announced the Assessment Rules for non-arm's-length transactions by Profit-seeking Enterprises (TP Assessment Rules) on 28 December 2004. The transfer pricing regulations were established to constrain multinational corporations from leaving their profits in countries with lower tax rates. For applicable companies, the disclosure of related party transactions in the CIT return and the preparation of a transfer pricing report is required. Upon request, the transfer pricing report will have to be submitted to the Taiwan tax authority within one-month of notice. The transfer pricing report must demonstrate the company's good faith effort to comply with the assessment rules. Without proper reason, failure to comply with such rules will result in additional tax payable and financial penalties. The types of transactions governed by these regulations include the following: transfer of tangible assets, use of tangible assets, transfer of intangible assets, use of intangible assets, rendering of services, use of funds, and other types of transactions prescribed by the MOF.

### *Thin capitalisation rules*
In January 2011, Taiwan introduced a thin capitalisation rule in the amended Income Tax Act. From 2011 onwards, deductible interest expense on inter-company loans is capped at a prescribed debt-to-equity ratio (tentatively 3:1) to be determined by the MOF. The thin capitalisation rule generally applies to profit-seeking enterprises, except banks, credit cooperatives, financial holding companies, bills finance companies, insurance companies, and securities companies.

## *Tax credits and incentives*

Certain tax incentives are provided to investors if they are located in prescribed areas such as science parks, economic processing zones, free-trade-zones, etc. Other tax credits are granted to qualifying companies that invest in specific businesses or industries promoted by the government, such as biotech.

### *R&D tax incentive*
Under the Statute for Innovating Industries (SII), R&D credits are available for up to 15% of qualified R&D expenses incurred, with the maximum amount of tax credit capped at 30% of the tax payable for the year in which the expenses were incurred, including the 10% profit retention tax. Unutilised R&D credits will be forfeited and cannot be carried back or carried forward.

According to Regulation Governing R&D Investment Tax Credit (ITC) Available to Profit-seeking Enterprises, applications should be made in the current year for designated R&D costs when they are first allocated or incurred in order to qualify for R&D ITC. A separate annual application for R&D ITC should be made with the central competent authorities within four months prior to the CIT return filing due date till one month immediately following the filing due date. Information relating to R&D ITC should be provided with the CIT return.

### *Tax concessions on merger*

Under the Business Mergers and Acquisitions Act, a merger or consolidation of companies can be exempt from stamp tax, deed tax, securities transaction tax, and business tax if certain conditions are met. After the merger or consolidation, any tax concession previously enjoyed by the merged entities will continue to be applicable to the surviving company (or new company) after the merger or consolidation. However, the surviving company is required to manufacture the same products or provide the same services which were approved for tax concessions by the merged entities in order to continue the concessions obtained previously.

The unexpired and unutilised NOLs of the participating entities prior to the merger or consolidation may be carried over to the surviving or newly-created entity according to the percentage of shareholding in the surviving or newly-created entity held by all shareholders of the participating entities.

### *Free-trade-zones*

According to the Statute for the Establishment and Management of Free-trade-zones, foreign companies or their branch offices in Taiwan that apply for establishment in the free-trade-zone or delegate companies already established in the free-trade-zone to store and/or perform simple processing in the free-trade-zone and selling the goods within and outside of Taiwan shall be exempted from CIT. However, in the event that the annual domestic sales exceed 10% of the total annual domestic and foreign sales, the portion in excess shall not be exempted from CIT.

### *Foreign tax credit*

Taiwan uses the credit method to avoid double taxation of income. Foreign taxes paid on foreign-sourced income may be credited against a company’s total Taiwan income tax liability. However, the credit is limited to the incremental taxes derived from foreign-sourced income.

## *Withholding taxes*

Resident corporations paying certain types of income are required to withhold tax as follows:

| Recipient | Dividends (%) | Interest (%) | Royalties (%) |
|---|---|---|---|
| Resident corporations and individuals | N/A | 10 | 10 |
| Non-treaty | 20 | 15/20 (1) | 0/20 (2) |
| Treaty: | | | |
| Australia | 10/15 (3) | 10 | 12.5 |
| Belgium | 10 | 10 | 10 |
| Denmark | 10 | 10 | 10 |
| France | 10 | 10 | 10 |

| Recipient | Dividends (%) | Interest (%) | Royalties (%) |
|---|---|---|---|
| Gambia | 10 | 10 | 10 |
| Hungary | 10 | 10 | 10 |
| Indonesia | 10 | 10 | 10 |
| Israel | 10 | 7/10 (4) | 10 |
| Macedonia | 10 | 10 | 10 |
| Malaysia (5) | 12.5 | 10 | 10 |
| Netherlands | 10 | 10 | 10 |
| New Zealand | 15 | 10 | 10 |
| Paraguay | 5 | 10 | 10 |
| Senegal | 10 | 15 | 12.5 |
| Singapore | (6) | Not prescribed | 15 |
| South Africa | 5/15 (7) | 10 | 10 |
| Swaziland | 10 | 10 | 10 |
| Sweden | 10 | 10 | 10 |
| United Kingdom | 10 | 10 | 10 |
| Vietnam | 15 | 10 | 15 |

Notes

1. For non-resident enterprises, a 15% WHT applies to interest income derived from short-term bills, securitised certificates, corporate bonds, government bonds, or financial debentures, as well as interest derived from repurchase transactions involving these bonds or certificates. The rate in all other cases is 20%, unless reduced under a tax treaty.
2. Royalties received by foreign enterprises that are specially approved in advance by the government are exempt from income tax.
3. A rate of 10% for shareholders that are companies (other than partnerships) with at least a 25% shareholding.
4. 7% of the gross amount of the interest arising in a territory and paid on any loan of whatever kind granted by a bank of the other territory.
5. The WHT rate on technical service fee is reduced to 7.5%.
6. The total tax burden of CIT and dividends tax is not to exceed 40% of the total profits of the company.
7. A rate of 5% for shareholders with at least a 10% shareholding.

### *Tax treaties*

Double taxation treaties entered into with the following countries: Australia, Gambia, Belgium, Denmark, France, Senegal, United Kingdom, Sweden, Indonesia, Hungary, Israel, New Zealand, Netherlands, Paraguay, Singapore, South Africa, Swaziland, Macedonia, Malaysia, and Vietnam relate to corporate and individual income tax. Treaties with Canada, the European Union, Germany, Israel, Japan, Korea, Luxembourg, Netherlands, Norway, Sweden, Thailand, Macau, and the United States relate to certain earnings from the operation of ships and/or aircraft.

## *Tax administration*

### *Returns*

The tax year in Taiwan runs from 1 January to 31 December. Tax returns are filed on a self-assessment basis. Businesses may request approval from the local collection authority to file CIT returns using a fiscal year-end other than 31 December. CIT returns are due no later than five months after the end of the tax year.

### *Payment of tax*

Tax is paid on a self-assessment basis in two instalments. The first payment is based on 50% of the tax liability of the prior year's tax return and is made in the ninth month of the enterprise's fiscal year. However, if the taxpayer meets certain requirements, it may self-assess the provisional tax based on the taxable income of the first half of the current fiscal year. The second payment is made at the time of filing the annual tax return. The returns are subsequently reviewed by the tax authorities, and a final assessment is issued.

Any overpaid tax as a result of the tax collection authority's mistake shall be refunded to the taxpayer within two years of acknowledgement of such mistake and shall not be subject to the original five-year period for applying for refund where the taxpayer is responsible for the mistake.

## Significant developments

Starting from 1 January 2011, the following changes, updates, and clarifications were implemented and introduced:

- Excise tax on cellular communication services was introduced at the rate of 3%.
- Persons importing lint cotton and smelt in the territory of Tajikistan are now also obliged to pay tax on sales.
- VAT on pharmaceuticals was introduced at the rate of 5%.
- Reduction of allowed deduction of provision for doubtful debts for banks and other financial institutions.
- Change in the real estate tax rates.
- Changes in tax returns submission deadlines.

## Taxes on corporate income

Generally, all Tajik legal entities are subject to taxation in Tajikistan. Corporate income tax (CIT) is computed by applying the statutory 15% rate to taxable income (25% for enterprises operating in transport, communication, banking, and service sectors), which is calculated based on gross income decreased by allowed deductions and losses carried forward from previous periods.

Tajik residents are taxed on their worldwide income. Non-residents are subject to CIT in Tajikistan only on Tajikistan source income. Non-residents operating through a permanent establishment (PE) are generally subject to the same CIT provisions.

### Minimum income tax

In Tajikistan, there is a minimum income tax on company income at the rate of 1% of aggregate annual income. The minimum income tax should always be paid in full. If CIT is less than the minimum income tax, then CIT should not be paid. If CIT is greater than the minimum income tax, then only the positive difference between CIT and the minimum income tax should be paid.

## Corporate residence

Legal entities formed under Tajik law, as well as legal entities whose effective control (management) is in Tajikistan, are recognised as residents for CIT purposes.

### Permanent establishment (PE)

Under general provisions of the Tax Code, any place of activity associated with production, assembling, packaging, supply, construction, and exploration activity on the territory of Tajikistan, regardless of duration of such activities, will be deemed as PE of a non-resident.

Non-residents providing services in the territory of Tajikistan continuously during 90 days in any consecutive 12 month period also create PE in Tajikistan.

## Other taxes

### Value-added tax (VAT)

VAT is generally assessed on taxable turnover, which includes goods and services. The current VAT rate is 18%. Individuals and businesses are required to register as VAT payers if the taxpayer's taxable turnover exceeds a threshold of 200,000 Tajik somoni (TJS) (approximately USD 43,000) for the preceding 12-month period.

Generally, the Tax Code exempts the following from VAT: goods and services that are not provided in Tajikistan under the place of supply rules; sale, transfer, or rent of real property; financial services; medical services; publishing; and certain other goods and services.

For goods, the place of supply is determined as the initial point of transportation. Services are generally considered to be provided at the place of business of the service provider or the actual place where services are rendered. However, for certain types of services, such as consulting and accounting, the services are considered to be provided at the location of the buyer.

A VAT refund is generally available for qualified exporters if input VAT exceeds assessed VAT.

VAT returns, together with issued and received invoices, are filed monthly, not later than the 15th day of the month following the reporting month. Payments are due by the same date.

### Land tax

Land tax is paid based on the area of the land plot and varies depending on the location. The land tax rate ranges from TJS 180 to TJS 500 (approximately USD 39 to 108) per hectare, depending on the location of the land plot.

### Real estate tax

Real estate tax applies to immovable real property such as buildings, houses, and flats. The real estate tax rate is calculated by multiplying the land tax rates by relevant coefficients (from 15 to 60), which depend on the purpose of real property and may be adjusted by the state authorities in each specific case.

### Customs duties

The tariff rates established by the government, ranging from 0% to 15%, are applied on an *ad valorem* basis, at a specific rate, or via a combination of the two. The tax rate of 0% is granted to certain types of goods (e.g. some types of printed publication, unwrought wool, gaseous hydrocarbons, electricity).

Note that Tajikistan is signatory to several free trade agreements, primarily among the following Commonwealth of Independent States (CIS) countries: Russia, Belarus, Kazakhstan, and Kyrgyzstan.

### *Customs fees*
Customs clearance could not be performed without certification of goods, for which importer should pay based on time spent by certification specialist. Fees for customs clearance range from approximately USD 10 to USD 450, depending on customs value.

### *Excise taxes*
Excise tax is assessed on beverages, tobacco products, fuel, tires, and passenger automobiles. Excise tax rates are established by the government.

### *Social tax*
An employer is obliged to make social tax payments at the rate of 25% of salary.

### *Road tax*
The formula for calculating road tax is total deductions of the reporting year multiplied by the 2% tax rate (0.5% for trade companies). If actual deductions do not exceed 70% of gross income, the tax base for road tax would be 70% of gross income.

### *Vehicle tax*
Vehicle tax is computed as a percentage of the calculation index applied for horse power of the vehicle engine. The percentage ranges from 2.5% to 13.75%.

## *Branch income*

In addition to CIT, PEs are subject to branch profit tax at the rate of 8% of net profit after CIT, unless a lower rate is prescribed by an applicable double taxation treaty (DTT).

## *Income determination*

Income tax is assessed on taxable income, which is the difference between gross income and allowed exemptions and deductions.

### *Inventory valuation*
Inventory accounting for tax purposes generally follows inventory accounting for financial reporting purposes. Starting from 2011, legal entities should apply International Financial Reporting Standards (IFRS).

### *Capital gains*
In general, capital gains on securities are taxed as business profits.

### *Inter-company dividends*
Inter-company dividends received by a resident parent company from a resident subsidiary are exempt from CIT.

### *Foreign income*
Tajik residents are taxed on their worldwide income. Non-residents are subject to CIT in Tajikistan only on Tajikistan source income. There are no provisions in the Tax Code for tax deferral.

The Tax Code contains CFC provisions, according to which, income received by the resident's subsidiary (more than 10% ownership) registered in countries with privileged taxation should be included in the income of the resident.

## Deductions

In general, all business expenses (e.g. materials, payroll) are allowed as a deduction if the expenses are connected with the earning of income, not of a capital nature, and supported by proper documentation.

### Depreciation

The deduction for costs related to fixed assets generally is made through depreciation at rates ranging from 7% to 20%, using the declining balance method.

### Goodwill

There are no special provisions for goodwill deduction in the Tax Code; however, goodwill is not deductible in accordance with the general rules on intangible assets amortisation.

### Interest

Interest deductibility is generally limited to three times the refinancing rate of the National Bank of Tajikistan (currently 9%). For certain entities, additional limitations may apply.

### Bad debts

A taxpayer is allowed a bad debts deduction in cases where the income associated with such bad debts is already recognized for CIT purposes. Bad debts are deductible when they are written-off in the accounting books. Special provisions apply for banks and other financial institutions.

### Charity contributions

Charity contributions are limited to 10% of taxable income.

### Taxes, penalties, and fines

Taxes paid to the budget of Tajikistan and other states are deductible, except for CIT and minimum income tax. Penalties and fines paid to budget are not deductible.

### Other significant items

Among other deductions specifically mentioned in the Tax Code are research and development, repair expenses, and geological and geophysical expenses.

### Non-deductible expenses

Non-deductible expenses specifically mentioned by the Tax Code include meals and entertainment, personal expenses, passenger vehicles, and non-business expenses.

### Net operating losses

Net operating losses may be carried forward for three years but may not be carried back.

### Payment to foreign affiliates

No special provisions for deduction of payments to foreign affiliates exist in the Tax Code; therefore, general rules for deductibility of expenses should apply.

## Group taxation

There are no rules permitting grouping for tax purposes in Tajikistan.

### Transfer pricing
The tax authorities have the right to review prices applied in the following transactions for their compliance with market-level pricing:

- Transactions between related parties.
- Barter transactions.
- Cross-border transactions.
- All transactions with deviation of more than 30% from market level.

### Thin capitalisation
There are no thin capitalisation rules in Tajikistan; however, interest deductibility is limited *as described in the Deductions section.*

## Tax credits and incentives

Tax incentives include the special economic zones of Sogd, Pyandj, Ishkoshim, and Dangara. Sodj and Pyandj are actively functioning economic zones.

Also, an exemption from CIT is available for taxpayers that have made a certain amount of investments into chartered capital of a production company, as follows:

- Two years exemption if volume of investments is up to USD 500,000.
- Three years exemption if volume of investment is from USD 500,000 up to USD 2 million.
- Four years exemption if volume of investment is from USD 2 million up to USD 5 million.
- Five years exemption if volume of investment exceeds USD 5 million.

### Foreign tax credit
Taxes paid outside Tajikistan may be credited against the same types of taxes in Tajikistan, if appropriate supporting documents are provided. The amount of credit may not exceed the amount of tax assessed in respect of such income at the rates applicable in Tajikistan.

## Withholding taxes

Tajikistan source income of non-residents is subject to WHT at its source at the rates shown in the following table:

| Types of income at source of payment | Tax rate (%) |
|---|---|
| Dividends and interest | 12 |
| Insurance and reinsurance premiums | 4 |
| International transport and telecommunications | 4 to 6 |
| Royalties, rent, lease income, management fees, and other income | 15 |

In accordance with the DTTs as of 1 January 2010, the rate of WHT may be reduced as follows:

| Recipient | Dividends (%) | Interest (%) | Royalties (%) |
|---|---|---|---|
| No treaty | 12 | 12 | 15 |
| Armenia | 10 | 10 | 10 |
| Azerbaijan | 10 | 10 | 10 |
| China | 5/10 (1) | 8 | 8 |
| Czech Republic | 5 | 7 | 10 |
| Germany | 5/15 (2) | 0 | 5 |
| India | 10 | 10 | 10 |
| Kazakhstan | 10/15 (3) | 10 | 10 |
| Kyrgyzstan | 5/15 (4) | 10 | 10 |
| Latvia | 0/5/10 (5) | 7 | 5/10 (6) |
| Moldova | 5/10 (7) | 5 | 10 |
| Pakistan | 5/10 (7) | 10 | 10 |
| Poland | 5/15 (8) | 10 | 10 |
| Russia | 5/10 (9) | 10 | 15 |
| Turkey | 10 | 10 (10) | 10 |
| Turkmenistan | 10 | 10 | 10 |
| Ukraine | 10 | 10 | 10 |

Notes

1. A rate of 5% of the gross amount of the dividends if the recipient is an enterprise (except a partnership) that directly holds at least 25% of the capital of the company paying the dividends; 10% of the gross amount of the dividends in all other cases.
2. A rate of 5 % of the gross amount of the dividends if the beneficial owner is a company (other than a partnership) that holds directly at least 10% of the capital of the company paying the dividends; 15% of the gross amount of the dividends in all other cases.
3. A rate of 10% of the gross amount of the dividends if the beneficial owner is a legal entity and directly holds no less than a 30% stake in the company paying the dividends; 15% of the gross amount of the dividends in all other cases.
4. A rate of 5% of the gross amount of the dividends if the beneficial owner is a company that holds at least 50% of the share capital of the company paying the dividends; 15% of the gross amount of the dividends in all other cases.
5. A rate of 0% of the gross amount of the dividends if the beneficial owner is a company (other than a partnership) that holds directly at least 75% of the capital of the company paying the dividends; 5% of the gross amount of the dividends if the beneficial owner is a company (other than a partnership) that holds directly at least 25% of the capital of the company paying the dividends; 10% of the gross amount of the dividends in all other cases.
6. A rate of 5% of the gross amount of the royalties paid for the use of or the right to use software, or industrial, commercial, or scientific equipment; 10% of the gross amount of the royalties in all other cases.
7. A rate of 5% of the gross amount of the dividends if the beneficial owner is a company (other than a partnership) that holds directly at least 25% of the share capital of the company paying the dividends; 10% of the gross amount of the dividends in all other cases.
8. A rate of 5% of the gross amount of the dividends if the beneficial owner is a company (other than a partnership) that holds directly at least 25% of the share capital of the company paying the dividends; 15% of the gross amount of the dividends in all other cases.
9. A rate of 5% of the gross amount of the dividends if the beneficial owner is a person who holds directly at least 25 % of the share capital of the company paying the dividends; 10 % of the gross amount of the dividends in all other cases.
10. Interest arising in Tajikistan and paid to the government of Turkey or to the Central Bank of Turkey shall be exempt from Tajikistan tax; interest arising in Turkey and paid to the government of Tajikistan or to the National Bank of Tajikistan shall be exempt from Turkish tax.

## *Tax administration*

### *Returns*

The Tax Code prescribes a calendar year as the tax year. Annual CIT declarations are due by 1 April in the year following the tax year-end.

Taxpayers are required to submit their estimated calculation of monthly advance payments of CIT.

### *Payment of tax*
With respect to CIT, advance payments are due every 15th day of the month. Payment of any outstanding CIT liabilities is required not later than 10 April following the reporting tax period.

The settlement of minimum income tax should be done by 10 April following the reporting tax period in case it exceeds CIT liability.

### *Fines and interest penalties*
The fine for failure to file a tax return ranges from a minimum amount of 1 calculation index (CI), which is currently TJS 35 (approximately USD 7.6), to a maximum fine of 100 CI, or TJS 3,500 (approximately USD 761). The amount of the fine depends on the taxpayer's category and should be assessed based on each ten days of delay. In the absence of tax returns, the tax authorities are entitled to assess taxes based on any information available.

Fines may be assessed in the amount of 10% to 20% of the understated tax liabilities. In severe cases, a violation may be considered a criminal offence.

A fine for failure to withhold and remit tax may be assessed in the amount of 3 to 200 CI (approximately TJS 1,225 to 7,000 (USD 266 to 1,522)) of the tax not withheld.

Interest penalties may apply to late tax payments in the amount of 0.08% of the underpaid tax amount, for each day of tax underpayment.

### *Statute of limitations*
Taxpayers are allowed to make changes to prior period tax returns within the statute of limitations (three years). No fines should apply to corrections in this case.

## *Other issues*

### *Accounting system*
In accordance with the governmental Resolution of the Republic of Tajikistan concerning International Standards of Financial Statements, the Ministry of Finance of the Republic of Tajikistan shall adopt IFRS through a step-by-step approach. Starting from 2011, juridical legal entities should apply IFRS.

Accounting policies and practices are being revised in light of the legal requirement that companies adopt IFRS and International Accounting Standards. Such revised accounting policies should be adopted by companies' boards of directors and disseminated to all the accounting units with clear instructions on how to introduce and follow the new policies and procedures.

## *PwC contact*

David Tarimo
PricewaterhouseCoopers
International House, Sixth Floor
Shaaban Robert Street/Garden Avenue
Dar-es-Salaam, Tanzania
Tel: +255 22 2192201
Email: david.tarimo@tz.pwc.com

## *Significant developments*

The most significant recent change in relation to income tax on corporations is the introduction of thin capitalisation restrictions on the amount of deductible interest. The thin capitalisation rules have replaced the interest cover provisions *(see Thin capitalisation in the Group taxation section)*.

## *Taxes on corporate income*

Income tax is charged at a rate of 30% on income of a resident corporation and of a permanent establishment (PE) of a non-resident corporation.

A reduced corporate tax rate of 25% applies for three consecutive years for companies newly listed on the Dar es Salaam Stock Exchange. To qualify, at least 30% of the company's shares must be issued to the public.

Alternative minimum tax applies at a rate of 0.3% of the gross turnover of a company that is in 'perpetual loss status' for a period of at least three consecutive years as a result of tax incentives. The practical application of this tax is unclear, but it has been provided that this tax will apply to income years ending on or after 31 July 2008.

Non-residents are also subject to tax on any income with a source in Tanzania. Certain payments to non-residents are subject to tax at the relevant non-resident withholding tax (WHT) rate *(see the Withholding taxes section for the relevant rates)*.

Income from the disposal of investments in Tanzania is subject to income tax where such investments fall within the source rules, and, in such a case, the income will be taxed at a rate of 30%.

## *Corporate residence*

A company is tax resident if it is incorporated or formed under the laws of Tanzania or if the management and control of its affairs is exercised in Tanzania.

A Tanzanian resident is taxed on worldwide income, irrespective of source. Non-residents are taxable on income with a source in Tanzania.

## Other taxes

### Value-added tax (VAT)

VAT is chargeable on all taxable goods and services supplied in, or imported into, mainland Tanzania. For imported goods, VAT is payable at the time of importation together with any customs and excise duties. For imported services, VAT is accounted for by registered businesses through a 'reverse charge' mechanism. The standard rate of VAT is currently at 18%, but the export of goods and certain services is eligible for zero-rating. Businesses with an annual taxable turnover of more than 40 million Tanzanian shillings (TZS) must register for VAT.

The Commissioner for VAT has the discretion to register as intending traders, investors whose projects have not commenced production, but who wish to be VAT-registered in order to reclaim the tax they incur on start-up costs. VAT payable with respect to capital goods (as defined), which are imported or purchased in Tanzania, may be permanently deferred, subject to certain procedures being followed.

Supplies of certain goods and services are exempt from VAT. A business that produces only exempt supplies is unable to register for VAT and consequently unable to recover the VAT incurred on inputs. However, businesses in this category that import taxable services with a value over the registration threshold must register for VAT to account for the VAT on such services.

Certain goods and services supplied to specified entities are eligible for 'special relief' from VAT. The 'special relief' provisions enable supplies, which would otherwise be chargeable with VAT, to be made VAT free provided certain administrative requirements are followed.

Registered businesses must submit VAT returns, with any tax due, on a monthly basis.

Businesses entitled to VAT refunds can claim any remaining credit six months after a refund first became due, subject to all intervening returns being rendered. Any claim for a VAT refund must be supported by an auditor's certificate. Businesses in a consistent refund position (e.g. exporters) can apply for approval to lodge their refund claims on a monthly basis.

Zanzibar has its own VAT Act, but it is similar to the Mainland Tanzania Act.

### Customs duties

Tanzania is a member of the East African Community, which became a Customs Union on 1 January 2005 on the implementation of the East African Customs Union Protocol. This protocol provides for a common external tariff (CET), elimination of internal tariffs, rules of origin, anti-dumping measures, a common customs law, and common export promotion schemes.

The customs duty rates applicable under the CET are as follows:

| Category | Rate (%) |
|---|---|
| Raw materials, capital goods, agricultural inputs, pure-bred animals, medicines | 0 |
| Semi-finished goods | 10 |
| Finished final consumer goods | 25 |

Tanzania is also a member of the Southern African Development Community (SADC). Where goods are subject to a lower rate of duty from another trade bloc such as SADC, the lower duty rate applies until such a time as the trading arrangements between the trading blocs are harmonised.

### *Excise duties*

Excise duty rates apply as follows.

| Item | Rate for FY 2010/11 |
|---|---|
| Sugared mineral water and aerated waters | TZS 63 per litre |
| Other, including club soda | TZS 63 per litre |
| Carbonated soft drinks | TZS 63 per litre |
| Lemonade and flavoured minerals or aerated waters | TZS 63 per litre |
| Malt beer | TZS 382 per litre |
| Clear beer (from unmalted barley) | TZS 226 per litre |
| Wine with more than 25% imported grapes | TZS 1,223 per litre |
| Wine with domestic grapes content exceeding 75% | 0 |
| Spirits | TZS 1,812 per litre |
| Cigarettes without filter containing more than 75% domestic tobacco | TZS 6,209 per 1,000 |
| Cigarettes with filter containing more than 75% domestic tobacco | TZS 14,649 per 1,000 |
| Other cigarettes not mentioned above | TZS 26,604 per 1,000 |
| Cut rag/filler | TZS 13,436 per kg |
| Satellite and cable television broadcasting | 5% |
| Airtime for mobile phones | 10% |
| Disposable plastic bags | 120% |
| Liquefied petroleum gas (LPG) | 0 |
| Motor car with cylinder capacity exceeding 1000cc but not exceeding 2000cc | 5% |
| Motor vehicle with engine size greater than 2000cc | 10% |
| Old motor vehicles (10 years or more) | 20% |
| Motor spirit (gasoline) premium | TZS 339 per litre |
| Motor spirit (gasoline) regular | TZS 339 per litre |
| Gas oil (diesel) | TZS 314 per litre |
| Jet Fuel | 0 |
| Illuminated kerosene | TZS 52 per litre |
| Other medium oil and preparation | TZS 9.32 per litre |
| Industrial diesel oil | TZS 392 per litre |
| Heavy furnace oil | TZS 80 per litre |
| Lubrication oil | TZS 500 per m3 |
| Lubrication greases | TZS 0.75 per kg |

### *Fuel levy*

Fuel levy is charged on petroleum products at a rate of TZS 200 per litre.

### *Payroll taxes*

Payroll taxes include a skills and development levy at 6% of payroll cash costs and a 20% social security contribution, of which 10% is borne by employers with the other 10% deducted from employee pay, generally.

### Stamp duty
Examples of instruments giving rise to stamp duty obligations include conveyances, leases, share transfers, and issue and transfer of debentures. The current rate is 1% of the transaction value.

### Local taxes
The local government levies a property tax based on the value of a premise. The rates vary depending on the value and location of the property. The local government is also entitled to charge a 0.3% service levy based on turnover generated in the relevant district. For agricultural produce and livestock, there is a cess tax, currently capped at 5% of the producer price.

## Branch income

The income tax liability of a person with a PE in Tanzania is calculated as if the person and the PE are independent but as if the PE is resident in Tanzania. The income of the PE is taxed at the normal income tax rate for entities, namely 30%.

The PE is also subject to a tax on ‘repatriated income’, which applies at a rate of 10% (the same rate as a company would withhold on dividends).

In certain circumstances, business activities of the head office may be attributed to the branch. Arrangements between a PE and head office generally are not recognised other than the transfer of an asset or liability between the two. Amounts derived or payments received and expenditures incurred or payments made that relate to assets held by, or liabilities owed by, the business of the PE are attributed to the PE.

## Income determination

Subject to any provision to the contrary in the Income Tax Act, income is to be calculated in accordance with generally accepted accounting principles. Corporations must apply an accrual basis of accounting.

## Deductions

In calculating taxable profit, deductions are allowed for revenue expenditures incurred wholly and exclusively in the production of income, with some statutory exceptions. For capital expenditures, there are specific tax depreciation allowances.

There are special rules with regard to the valuation of trading stock and long-term contracts and in relation to the treatment of instalment sales and finance leases.

There is ring-fencing of mining operations per licenced area. In addition, expenditures incurred for exploration activities outside a licenced area are only deductible when commercial operations commence.

### Depreciation
The categories of depreciable assets and their tax depreciation rates are set out in the table below.

Expenditures on plant and machinery are generally written off on a reducing balance basis at rates of 37.5%, 25%, or 12.5%, depending on the category of the asset. Certain plant and machinery for manufacturing, fish farming, and tourist hotels benefit from a 50% allowance in the first year, with the normal rates applying to the remaining balance in subsequent years. There is an immediate write-off of expenditures on plant and machinery used in agriculture.

Expenditures on buildings qualify for a depreciation allowance of 5% per year on a straight-line basis. For intangible assets, the write-off is over the useful life of the asset.

Apart from the immediate write-off of plant and machinery, agricultural businesses also benefit from the immediate write-off of agricultural improvement expenditures (including the costs of clearing land, excavating irrigation channels, and planting perennial crops or tree bearing crops). Buildings, structures, dams, water reservoirs, fences, and similar works of a permanent nature used in agriculture, livestock, or fish farming are written off on a straight-line basis over five years.

Mining companies are entitled to a 100% capital deduction with respect to capital expenditures on exploration and development.

### Depreciation allowances rates

| Class | Depreciable assets | Rate (%) |
|---|---|---|
| 1 | Computers and data handling equipment, together with peripheral devices; automobiles, buses, and minibuses with a seating capacity of less than 30 passengers; goods vehicles with a load capacity of less than seven tonnes; construction and earth-moving equipment. | 37.5 |
| 2 | Buses with a seating capacity of 30 or more passengers, heavy general purpose or specialised trucks, trailers, and trailer-mounted containers; railroad cars, locomotives, and equipment; vessels, barges, tugs, and similar water transportation equipment; aircraft, other self-propelling vehicles; plant and machinery (including windmills, electric generators, and distribution equipment) used in manufacturing or mining operations; specialised public utility plant and equipment; and machinery or other irrigation installations and equipment. | 25 |
| 3 | Office furniture, fixtures, and equipment; any asset not included in another class. | 12.5 |
| 4 | Natural resource exploration and production rights and assets in respect of natural resource prospecting, exploration, and development expenditure. (However, note that the Income Tax Act 2004 does provide for predecessor capital deduction provisions in the Income Tax Act 1973 to continue for the holders of mining rights.) | 20 |
| 5 | Buildings, structures, dams, water reservoirs, fences, and similar works of a permanent nature used in agriculture, livestock farming, or fishing farming. | 20 |
| 6 | Buildings, structures, and similar works of permanent nature other than those mentioned in Class 5. | 5 |
| 7 | Intangible assets other than those in Class 4. | 1 divided by the useful life of the asset in the pool and rounded down to the nearest half year |
| 8 | Plant and machinery (including windmills, electric generators, and distribution equipment) used in agriculture. | 100 |

### *Bad debts*
In order to claim relief for bad debts, it is necessary to demonstrate that all reasonable steps have been taken to pursue payment and that there is a reasonable belief that the debt claim will not be satisfied. However, financial institutions should generally be able to claim relief for provisions made in accordance with the standards established by the Bank of Tanzania.

### *Net operating losses*
There is no limit on the carry forward period for tax losses. However, there is ring-fencing of tax losses as follows:

- Losses from agricultural business can only be offset against profits derived from agricultural business.
- Foreign source losses can only be offset against foreign source profits.
- Losses on investments can only be offset against investment income.
- Foreign source losses on investments can only be offset against foreign source investment income.

In certain circumstances, tax losses may be forfeited on a change in the underlying control of an entity.

## *Group taxation*

There are no provisions for tax consolidation or group relief.

### *Transfer pricing*
With respect to transactions between related parties, there is an obligation to 'quantify, apportion, and allocate amounts' for income tax purposes on an arm's-length basis. If the Commissioner considers that a person has failed to comply with this requirement, he may make such adjustments as he thinks appropriate.

The Commissioner has the power to make counteractive adjustments to a person's tax liability, where he considers that an arrangement is a tax-avoidance arrangement.

### *Thin capitalisation*
There is a thin capitalisation restriction on the amount of deductible interest for what are termed 'exempt-controlled resident entities', where the debt: equity ratio exceeds 70:30.

### *Controlled foreign trusts and corporations*
There are provisions that relate to the treatment of unallocated income of controlled foreign trusts and corporations; however, in practice, this is more of academic interest as there is limited outward investment from Tanzania.

### *Anti-avoidance*
Other anti-avoidance provisions include the following:

- A change in the underlying control of an entity, accompanied by some change in the conduct of the business.
- Income or dividend stripping arrangements.
- Income splitting.

## Tax credits and incentives

### Agriculture, manufacturing, mining, and tourism

Tax incentives by way of generous capital deduction provisions are given for specific sectors, namely agriculture, manufacturing, mining, and tourism. *See the Deductions section for further details.*

### Export processing zones, special economic zones

There are special benefits for export processing zones (EPZ) and special economic zones (SEZ). Included in the benefits available to a person licensed to carry on business in an EPZ, as well as to SEZ investors selling in export markets, are a ten-year income tax holiday and WHT holiday, subject to a requirement to export at least 80% of production.

### Foreign tax credits

A credit is automatically given for foreign tax paid by a resident on foreign income, but such credit may not exceed the Tanzanian tax rate applicable to that income. Any unrelieved amount of foreign tax credit may be carried forward (subject to the 'change of control' provisions). An election also may be made to claim relief as an expense instead of as a credit.

## Withholding taxes

### Withholding tax rates

| Payment | Resident (%) | Non-resident (%) |
|---|---|---|
| Dividend | | |
| To a company controlling 25% or more of the voting power and holding 25% or more of the shares | 0 | 10 |
| From a Dar es Salaam Stock Exchange listed company | 5 | 5 |
| Otherwise | 10 | 10 |
| Interest | 10 | 10 |
| Rent | | |
| Land and buildings | 10 | 15 |
| Aircraft lease | 0 | 0 |
| Other | 0 | 15 |
| Royalty | 15 | 15 |
| Natural resource payment | 15 | 15 |
| Service fees | | |
| Technical services provided to mining companies | 5 | 15 |
| Other | 0 | 15 |
| Insurance premium | 0 | 5 |
| Payments to residents without a tax identification number certificate | 2 | N/A |

### Double tax treaties

Double tax treaties are in force with Canada, Denmark, Finland, India, Italy, Norway, South Africa, Sweden, and Zambia. In certain circumstances, these may reduce the WHT rates.

## *Tax administration*

While the year of income for tax purposes is the calendar year, an entity may apply to use its own accounting period rather than the calendar year.

Taxable income and deductible expenditure is quantified in TZS. The Commissioner does have the power by notice in writing to permit quantification in a foreign currency convertible to TZS.

### *Returns*

A statement of estimated tax payable, which contains an estimate of the chargeable income and the tax payable thereon, is due for submission within three months from the beginning of the accounting period. A final tax return must be furnished within six months from the end of the accounting period. WHT returns must be submitted every half year. A late filing penalty applies monthly at an amount equal to the higher of (i) TZS 100,000 or (ii) 2.5% applied to unpaid tax. If estimated tax is significantly underestimated, a penalty may also apply.

### *Payment of tax*

Instalment tax is payable in four equal instalments not later than three months, six months, nine months, and 12 months from the beginning of the accounting period. Final tax is payable on the date on which the final return is due for submission, namely six months after the end of the accounting period. WHT is due seven days after the month of deduction. Interest on late payment is charged at the Bank of Tanzania discount rate plus 5%.

## Significant developments

### Privileges for sustainable investment
In April 2010, the Board of Investment (BOI) launched a new policy in regard to sustainable investment by stipulating that all areas of the country, except Bangkok, will be designated as Investment Promotion Zones until December 2012.

### Additional tax incentives for regional operating headquarters (ROH)
A new package of tax incentives available to ROH was introduced in November 2010 which gave taxpayers the right to choose whether to follow the old or the new package. However, an application to switch to the new package by an existing ROH may not be made after 14 November 2015. *For further details, see Regional operating headquarters (ROH) in the Tax credits and incentives section.*

### Tax incentives for international procurement center (IPC)
As of 5 May 2011, a 15% corporate income tax rate is granted to qualified income under the IPC, a company established in Thailand for five consecutive years. *For further details, see International procurement center (IPC) in the Tax credits and incentives section.*

### Withholding tax (WHT)
As of 13 October 2010, the following income earned by a foreign company not carrying on business in Thailand, which was previously exempt from tax, is subject to 15% WHT in respect of new investments:

- Interest on bonds/debentures issued by state enterprises.
- Difference between the redemption price and the initial sale price of bonds issued by the government, state enterprises, and specified institutions.
- Gains on the transfer of bonds issued by the government, state enterprises, and specified institutions.

## Taxes on corporate income

Corporate income tax (CIT) is generally paid at a flat rate of 30% on net taxable profits.

Thailand incorporated companies are taxed on worldwide income. A foreign incorporated company is taxed on profits arising from or in consequence of the business carried on in Thailand. A foreign company not carrying on business in Thailand is subject to a WHT on certain types of assessable income (e.g. interest, dividends, royalties, rentals, and service fees) paid from or in Thailand. The rate of WHT is generally 15%, except for dividends which is 10%, while other rates may apply under the provisions of double tax treaties.

### *Reduced rates for listed companies*

A CIT reduction to 25% and 20% respectively is given to companies listed by 31 December 2009 on the Stock Exchange of Thailand (SET) and the Market for Alternative Investment (MAI), the trading board established by the SET. The rates are generally for three years depending on the date of listing.

Listed companies other than those described above are eligible for a reduced CIT rate in the following manners:

**Companies listed on the SET**

| Net profit (THB*) | Rate (%) |
|---|---|
| 0 to 300,000,000 | 25 |
| Over 300,000,000 | 30 |

**Companies listed on the MAI**

| Net profit (THB) | Rate (%) |
|---|---|
| 0 to 20,000,000 | 20 |
| Over 20,000,000 | 30 |

*Thai baht

These rates apply for three accounting periods commencing from the accounting period beginning on or after 1 January 2008.

### *Reduced rates for companies with low paid-in capital*

Companies and juristic partnerships with paid-in capital not exceeding THB 5 million at the end of any accounting period are subject to CIT at the following reduced rates:

| Net profit (THB) | Rate (%) |
|---|---|
| 0 to 150,000 | 0 |
| 150,001 to 1,000,000 | 15 |
| 1,000,001 to 3,000,000 | 25 |
| Over 3,000,000 | 30 |

### *Reduced rates for banks*

Banks are subject to CIT at the rate of 10% with respect to profits derived from lending to non-Thai residents from foreign currency funds obtained from non-Thai sources (so-called 'out-out' business).

### *Petroleum income tax*

Taxation on income from petroleum operations is imposed on petroleum concessionaire companies by the Petroleum Income Tax Acts (PITA). Companies taxed under the PITA are exempt from taxes and duties on income imposed under the Revenue Code and under any other laws. The exemption applies so long as the company pays taxes and duties on income subject to the PITA or on dividends paid out of income subject to the PITA.

Petroleum companies are taxed at the rate of 50% of their annual net profit from petroleum operations, including profit from the transfer of their concession interests and other activities incidental to petroleum operations. Deductions are allowed for 'ordinary and necessary' business expenses, as well as depreciation on capital expenditure, petroleum royalties, and other charges. Certain types of expenses are specifically disallowed for deduction, including interest.

## *Corporate residence*

Corporate residence is determined by the place of incorporation. A company incorporated under the laws of Thailand is a resident company.

A company incorporated abroad is subject to CIT in Thailand if it is considered to be carrying on business in Thailand. The term 'carrying on business in Thailand' is broad and, subject to the provisions of double taxation treaties (DTT), includes the presence of an employee, representative, or go-between that results in a foreign corporation deriving income or gains in Thailand.

## *Other taxes*

### *Value-added tax (VAT)*

VAT is levied at the current rate of 7% (which will be adjusted to a normal 10% rate after September 2012), except on exports, which are zero-rated, and a number of exempt goods and services (e.g. basic groceries, education, health care, interest, leasing of immovable property, and sale of real estate).

### *Specific business tax (SBT)*

SBT is collected on the gross revenue of certain businesses, not subject to VAT, at fixed rates. Commercial banking, similar financial businesses, and the sale of immovable property are taxed at 3% and life insurance at 2.5%.

The rate of SBT has been reduced to 0.01% for certain revenue derived by commercial banks and finance, securities, and credit foncier businesses as well as businesses with regular transactions similar to commercial banking.

An additional 10% of SBT is levied as municipality tax.

### *Stamp duty*

Stamp duty is levied on 28 different types of documents and instruments, including contracts for hire of work, loans, share transfers, leases of land or buildings, and insurance policies. The rate of stamp duty varies depending on the type on agreement, but ranges from THB 1 per THB 1,000 of value on most contracts and agreements to a fixed amount per instrument on most commercial and other documents. Unstamped documents are not admissible as evidence in a civil lawsuit, and the surcharge can be as high as 600% of the duties for failure to pay the stamp duty on a timely basis.

### *Customs duties*

#### Basis of taxation

Customs duties are imposed under the Customs Act and the Customs Tariff Decree. Customs duties are collected on both imports and a very limited number of exports. Classification of imports is based on the Harmonized Commodity Description and Coding System (the so-called 'Harmonized System'). Thailand has adopted the ASEAN Harmonized Tariff Nomenclature ('AHTN') 2007, which is based on the Harmonized System 2007, as its latest import tariff nomenclature.

Duties are levied on a specific or an *ad valorem* basis, whichever is the higher, and the applied *ad valorem* duties range between 0% and 80%. Exemptions from import duties are available on particular items of goods as prescribed in the Customs Tariff Decree. Preferential duty rates are available on imported goods from countries that have a preferential free trade agreement (FTA) with Thailand.

Currently, Thailand has FTAs with the following countries:

- ASEAN member states (i.e. Singapore, Vietnam, Malaysia, Indonesia, Philippines, Cambodia, Laos, Myanmar, and Brunei).
- Peru (not yet entered into force as of April 2011).
- New Zealand.
- Australia.
- India.
- Japan.

Also, as part of ASEAN, Thailand has preferential trade agreements with the following countries:

- China.
- Korea.
- Japan.
- Australia and New Zealand.
- India.

Generally, the value of imports is based on their CIF (cost, insurance, and freight), whereas exported goods are based on their FOB (free on board).

Thailand has implemented the World Trade Organization (WTO) Valuation Agreement. The primary basis for the customs value is transaction value (i.e. the price actually paid or payable for the goods when sold for export). This is subject to adjustments for certain elements which are considered to form a part of the value for customs purposes, but are not yet included in the selling price. If the declared price is evidently low or is unlikely to be the true value of such goods, Thai Customs will dispute the declared price.

### Customs incentives schemes

Various customs incentives schemes, each with its own specific conditions and duty privileges, are available in Thailand, including the following:

- Duty and tax compensation (‘Tax Coupons’).
- Duty drawback under Section 19 bis for imported raw materials used in export production.
- Duty drawback for re-export in the same state under Section 19.
- Free zones (Customs or Industrial Estate Authority of Thailand Free Zones).
- Manufacturing bonded warehouses.
- General bonded warehouses.
- BOI promotion.

## *Excise tax*

### Basis of taxation

Excise tax is imposed on the sale of a selected range of commodities, whether manufactured locally or imported. Tax rates are based on *ad valorem* or a specific rate, whichever is higher. Tax liabilities arise on locally manufactured goods when leaving the factory and at the time of importation for imported goods.

**Taxable goods and services**

- Fuel oil and petroleum products.
- Certain non-alcoholic beverages.
- Certain electrical appliances.
- Crystal glassware.
- Motor vehicles.
- Boats.
- Perfume products and cosmetics.
- Entertaining services, turf courses, and golf courses.
- Alcoholic beverages.
- Cigarettes containing tobacco.
- Woollen carpets.
- Motor bicycles.
- Batteries.
- Playing cards.
- Ozone depleting substances.

### *Local taxes*

There are three major local taxes:

**Household and land tax**

Household and land tax is levied at 12.5% of assessable economic rental income.

**Signboard tax**

Signboard tax is levied at varying rates according to size. The minimum tax is THB 200 per annum.

**Local development tax**

Local development tax is levied at rates ranging between 0.25% and 0.95% of the value of land assessed by local authorities. This tax does not apply if the property is subject to household and land tax.

### *Capital taxes*

There are no capital taxes in Thailand.

## *Branch income*

Branches of foreign corporations pay income tax at the corporate tax rate on locally earned profits only. Branch profits remitted to the foreign head office are subject to additional tax at the rate of 10%. However, this is a tax on disposition of profits abroad and is not limited to remittances. For example, a credit of profits to the head office account in the books is held to be a disposition of profits abroad even though no remittance of funds takes place.

## *Income determination*

### *Inventory valuation*

Inventory is valued at the lower of cost or market price. Any recognised method of ascertaining the cost price may be used, but a change in the method may be made only with the prior approval of the director-general of the Revenue Department. Conformity between book and tax reporting is required.

### Capital gains

There is no specific legislation governing capital gains. All capital gains earned by a Thai company are treated as ordinary revenue for tax purposes. Capital gains on the sale of investments derived from or in Thailand by a foreign company not carrying on business in Thailand are subject to a tax of 15%, withheld at source by the purchaser, unless otherwise exempt under a DTT.

As of 13 October 2010, gains earned by a foreign company not carrying on business in Thailand on sale of bonds issued by the government, state enterprises, and specified institutions are subject to a WHT of 15%.

### Dividend income

Dividends received from a Thai company by a company listed on the SET are exempt from tax. Dividends received by a non-listed company from other Thai companies are also exempt from tax, provided that the company receiving the dividends holds at least 25% of the total voting shares without any cross-shareholding. The tax exemption applies on the condition that the shares must be held for at least three months before and three months after the dividends are received.

In other cases, where one Thai company receives dividends from another Thai company, one half thereof is exempt from tax.

Dividends received from outbound investment are exempt from tax provided that the Thai company receiving the dividends holds at least 25% of the shares with voting rights of the company paying the dividends for a period of not less than six months before the date on which the dividends are received and the dividends must be derived from net profit in the foreign country taxed at a rate of not less than 15%. In the event that a 'special law' in a particular foreign country provides a reduced tax rate or exemption for the net profit, the limited company which receives the dividends is still eligible for tax exemption.

Share of profits received by a Thai company or a foreign company carrying on business in Thailand from an unincorporated joint venture carrying on business in Thailand are exempt from CIT.

### Stock dividends

Stock dividends are taxable to the recipient as ordinary income.

### Foreign income

Only Thailand incorporated companies are taxed on worldwide income. The Revenue Code does not describe how foreign income received by a Thailand-incorporated company is taxed, but the Revenue Department regards foreign branch income as taxable when earned and foreign dividend income as taxable when received. Double taxation is relieved by way of a credit against the tax chargeable in Thailand *(see Foreign tax credit in the Tax credits and incentives section)*.

## Deductions

### Depreciation, amortization, and depletion

Deductions for wear and tear and depreciation are allowed as a percentage of cost. If the rate of deduction adopted by a company under its own accounting method is lower than the statutory percentage of cost, a deduction will be allowed only at the rate adopted by the company. The straight-line basis is the method most commonly used by companies, but any generally accepted basis, such as sum-of-the-years-digits method or double declining method, is permitted. Statutory rates are as shown:

| Asset | Rate (%) |
|---|---|
| Buildings: | |
| Durable buildings | 5 |
| Temporary buildings | 100 |
| Cost of acquisition of depletable natural resources | 5 |
| Cost of acquisition of lease rights: | |
| If there is no written lease agreement or if there is a written lease agreement containing a renewal clause whereby continual renewals are permitted | 10 |
| If there is a written lease agreement containing no renewal clause or containing a renewal clause but restricting renewable periods to a definitely limited duration | Percentage rate equals 100 divided by the sum of years of the original and renewable lease periods |
| Cost of acquisition of the right in a process, formula, goodwill, trademark, business license, patent, copyright, or any other right: | |
| If the period of use is unlimited | 10 |
| If the period of use is limited | Percentage rate equals 100 divided by the number of years of use |
| Other assets not mentioned above, excluding land and inventory | 20 |

Special depreciation methods for certain assets may be applied as follows:

- Machinery and equipment for research and development (R&D) may initially be depreciated at 40% of cost with the remaining balance being depreciated at the above statutory rate of 20% per annum.
- Computer hardware and software may be depreciated within three accounting periods.
- Fixed assets, excluding vehicles, land, buildings, and intangible assets of taxpayers operating in the tourism business under the law governing Thailand tourism, which have been purchased or the ownership transferred for the taxpayer's own business use, may initially be depreciated at 60% of cost on the acquisition date. The remaining cost should then be depreciated according to the normal depreciation method, which is a maximum of 20% per annum. The initial depreciation can be used for assets acquired and ready for use from 14 October 2010 until 31 December 2011.

### Special depreciation method for small companies

Companies and juristic partnerships with fixed assets, excluding land, at a value of no more than THB 200 million and with no more than 200 employees are entitled to the following special depreciation methods in addition to those noted previously:

- Machinery and equipment may initially be depreciated at 40% of cost, and the remaining balance is then depreciated at the prescribed rate.
- Computer hardware and software may initially be depreciated at 40% of cost, and the remaining balance is then depreciated within three accounting periods.
- Factory buildings may initially be depreciated at 25% of cost, and the remaining balance is then depreciated at the prescribed rate.

### *Charitable contributions*
Deductions for allowable charitable contributions and certain other donations may not exceed 2% of net taxable profits. Deductions for educational support as approved by the Ministry of Education may be allowed at the rate of 200% of the actual expense, but not exceeding 10% of net profit before deductions of the allowable charitable contributions and certain other donations. Furthermore, deductions for the support of public recreational facilities may also be allowed at the rate 200% of the actual expense, but not exceeding 10% of net profit before deductions of the allowable charitable contributions and certain other donations after including the educational support expense.

### *Taxes*
In general, all taxes are deductible except CIT and VAT together with fines, penalties, and surcharges charged under the Revenue Code.

### *Non-deductible expenses*
There are list of non-deductible expenses, including, but not limited to, the following:

- Expenses having nature of provisions or reserves.
- Contributions to any fund (except an approved provident fund).
- Bad debt written off which is not consistent with the rules, procedures, and conditions prescribed by the Ministerial Regulations.

### *Net operating losses*
Losses may be carried forward for the following five accounting periods. Carryback of losses is not permitted. A change in control of a loss company does not impact its loss carryforward.

### *Payments to foreign affiliates*
A Thailand incorporated company may claim a deduction for royalties, management service fees, and interest charges, provided they are expended exclusively for the purpose of generating profits or for purposes of business in Thailand and are determined on an arm's-length basis.

## *Group taxation*

Group taxation is not permitted in Thailand.

### *Transfer pricing*
Thailand has no detailed transfer pricing legislation. However, transfer pricing guidelines issued by the Revenue Department define the term 'market price', detail the permitted transfer methods, describe the transfer pricing documentation requirements, and allow taxpayers to apply for advance pricing agreements (APAs) in respect of any intended related party transaction.

The transfer pricing guidelines do not have the status of legislation but are internal directives that the Revenue officials must adhere to when conducting tax audits, reviews, or investigations. The guidelines are also intended to inform taxpayers about transfer pricing practices.

The guidelines authorize the use of both transactional transfer pricing methods (e.g. the comparable uncontrolled price, the resale price, and the cost plus methods) as well as profit based methods, in order to determine the market price of a transaction. No one method is preferred over another, and there is no hierarchy of acceptable methods. Although the Revenue Department would generally accept a taxpayer's chosen method, it retains the right to select an alternative method if it deems it to be more appropriate.

### *Thin capitalisation*

Under the tax law, there are no thin capitalisation rules or prescribed debt to equity rules in Thailand.

## *Tax credits and incentives*

The Board of Investment (BOI), by virtue of the Investment Promotion Act, provides tax incentives to certain activities within the following categories:

- Agriculture and agricultural products.
- Mining, ceramics, and basis metals.
- Light industry.
- Metal products, machinery, and transport equipment.
- Electronic industry and electrical appliance.
- Chemicals, paper, and plastics.
- Service and public utilities.

The tax incentives available include the following:

- Exemption from or reductions of import duties on imported machinery.
- Exemption from import duties on raw materials and components imported for manufacturing for export.
- A reduction of up to 90% of import duties on raw or essential materials imported for manufacturing for domestic sale.
- Exemption from CIT equal to the investment, excluding the cost of land and working capital, for up to eight years depending on the promoted activity and location.
- Exclusion of dividends derived from promoted enterprises from taxable income during the period of exemption from CIT.

Additional incentives for enterprises located in an industrial estate or promotion zone include the following:

- Reduction of 50% of CIT for five years after the end of the tax holiday.
- Double deduction from taxable income of the cost of transportation, electricity, and water supply.

### *Privileges for sustainable investment*

In April 2010, the BOI launched a new policy in regard to sustainable investment by stipulating that all areas of the country, except Bangkok, will be designated as Investment Promotion Zones until December 2012. The BOI also provides special privileges to target industries, which have been classified in three categories as follows:

- Activities related to energy conservation and alternative energy.
- Activities related to eco-friendly materials and products.
- High-technology businesses.

Any activity which is classified under the above categories will obtain special privileges as a priority activity, e.g. CIT exemption for a period of eight years with no limit on the amount, import duty exemption for the import of machinery, 50% reduction in the rate of CIT on net profit for five years after the end of the tax holiday, etc.

Applications for the above measures must be submitted before 31 December 2012.

### *Special development zone*
A special development zone has been established in five provinces in the far south of Thailand in which a company or juristic partnership located therein will be subject to CIT at the rate of 3% for the revenue earned from the manufacture or sale of goods or provision of services from the accounting period that begins on or after 1 January 2010, until the accounting period that ends on or after 31 December 2012.

### *Regional operating headquarters (ROH)*
ROH means a company organised under the Thai law providing administrative, technical assistance, or supporting services to its domestic or overseas affiliated enterprises or branches in at least three countries other than Thailand with a paid-in capital of at least THB 10 million on the last day of any accounting period.

Tax incentives available to ROH are under two packages, known as the old and the new package, either of which taxpayers may elect to follow. However, the applications to obtain the privilege under the new package have to be made before 14 November 2015.

The following corporate tax incentives are available under the old package:

- 10% CIT on income from affiliated enterprises and branches for services rendered, including administrative services, technical assistance, management, R&D, or training.
- 10% CIT on interest income received as a result of re-lending to affiliated enterprises or branches funds borrowed by the ROH.
- 10% CIT on royalty income derived from affiliated enterprises and branches and which is generated from R&D work performed in Thailand.
- CIT exemption on dividends received from domestic and overseas affiliated enterprises and branches.

The corporate tax incentives available under the new package are as follows:

- In the case where service fees and royalties received by the ROH from associated enterprises in foreign countries amount to at least 50% of the total income of the ROH (ROH income plus non-ROH income):
  - CIT exemption for ten years on service income derived from foreign branches or associated enterprises of the ROH *(see Note below)*.
  - 10% CIT for ten years on service income derived from domestic branches or associated enterprises of the ROH and on qualified royalties and qualified interest income *(see Note below)*.
  - CIT exemption for ten years on dividends received by ROH from associated enterprises *(see Note below)*.
  - WHT exemption on dividends received by foreign corporate shareholders not carrying on business in Thailand from the qualified ROH profit.
- In the case where service fees and royalties received by the ROH from associated enterprises in foreign countries amount to less than 50% of the total income of the ROH (ROH income plus non-ROH income):
  - CIT exemption for ten years on service income derived from foreign branches or associated enterprises of the ROH *(see Note below)*.

T

- 10% CIT for ten years on service income derived from domestic branches or associated enterprises of the ROH *(see Note below)*.

Note: The corporate tax benefits will be extended to 15 years provided that as at the end of the tenth fiscal year, the accumulated business spending paid to recipients in Thailand for ten fiscal periods has exceeded THB 150 million.

### *International procurement center (IPC)*

The IPC will be subject to CIT on its net profit from qualified income at the rate of 15% for five consecutive accounting periods. IPC refers to a company established under Thai law carrying on the business of procuring and selling goods, raw materials, and parts to affiliated companies.

Qualified income includes:

- Income from procuring and selling goods outside Thailand to affiliated companies situated abroad whereby the goods must not be brought into Thailand.
- Income from procuring parts and raw materials either in Thailand or abroad for sale to affiliated companies situated abroad for manufacturing goods outside Thailand by the affiliates.

Applications to obtain the privilege must be submitted within two years from 6 May 2011.

### *Foreign tax credit*

A Thai company can use foreign tax paid on business income or dividends as a credit against its CIT liability. However, the credit cannot exceed the amount of Thai tax on the income.

## *Withholding taxes*

### *WHT rate schedule*

| Recipient | Dividends (%) | Interest (%) | Royalties (%) |
|---|---|---|---|
| Resident corporations | 0/10 (1) | 0/1 (2) | 3 |
| Resident individuals | 10 | 15 | Progressive rate (3) |
| | | | |
| Non-resident corporations and individuals: | | | |
| Non-treaty | 10 | 15 | 15 |
| | | | |
| Treaty: | | | |
| Armenia | 10 | 10/15 (4) | 15 |
| Australia | 10 | 10/15 (4) | 15 |
| Austria | 10 | 10/15 (4) | 15 |
| Bahrain | 10 | 10/15 (4) | 15 |
| Bangladesh | 10 | 10/15 (4) | 15 |

# Thailand

Notes

1. The zero-rate applies to a recipient company listed on the SET.
2. The 1% rate applies to interest paid to all resident corporations other than banks or finance companies, except where interest arises from bonds or debentures.
3. The progressive rate is in accordance with the personal income tax schedule.
4. The 10% rate applies to interest paid to a recipient that is a bank or financial institution (including an insurance company).
5. The 5% rate applies to royalties paid for the use of any copyright of literary, artistic, or scientific work excluding cinematograph films and films, tapes or discs for radio, or television broadcasting.
6. The 5% rate applies to royalties paid for the production or reproduction of any literary, dramatic, musical, or artistic work excluding royalties with respect to motion picture films and works on film or videotape for use in connection with television.
7. The 5% rate applies to royalties paid for the use of any copyright of literary, dramatic, musical, artistic, or scientific work including software, cinematograph films or films or tapes used for radio or television broadcasting; and the 10% rate applies to royalties paid for the use of industrial, commercial, or scientific equipment or for information concerning industrial, commercial, or scientific experience.
8. The 5% rate applies to royalties paid for the alienation or the use of any copyright of literary, artistic, or scientific work excluding cinematograph films or films or tapes used for radio or television broadcasting, and the 10% rate for the alienation of any patent, trademark, design, or model, plan, secret formula, or process.
9. The 5% rate applies to royalties paid for the use of any copyright of literary, artistic, or scientific work.
10. The 3% rate applies to interest paid on loans or credits granted for four years or more with the participation of a financing public institution to a statutory body or to an enterprise in relation to the sale of any equipment or to the survey, the installation, or the supply of industrial, commercial, or scientific premises and of public works. The 10% rate applies to interest paid to any financial institution.
11. The zero-rate applies to royalties paid to a contracting state or state-owned company with respect to films or tapes, and the 5% rate to royalties for the alienation or the use of any copyright of literary, artistic, or scientific work.
12. The 10% rate applies to (a) interest paid to a bank or financial institution (including an insurance company) and (b) interest paid with respect to indebtedness arising as a consequence of a sale on credit of any equipment, merchandise, or services, except where the sale was between persons not dealing with each other at arm's length.
13. The 5% rate applies to royalties paid for the use or the right to use any copyright of literary, artistic, or scientific work and the 10% rate for the use or the right to use any patent, trademark, design, or model, plan, secret formula, or process.
14. The 5% rate applies to royalties paid for the use of any copyright of literary, artistic, or scientific work excluding cinematograph films or films, tapes used for radio, or television broadcasting.
15. The 10% rate applies to royalties paid for the use of any copyright; or the use of, or the right to use, any industrial, scientific, or commercial equipment; or the use of, or the right to use, any motion picture film, or film or videotape or any other recording for use in connection with television, or tape or any other recording for use in connection with radio broadcasting; or the reception of, or the right to receive, visual images or sounds, or both, transmitted to the public by satellite or, cable, optic fibre, or similar technology; or the use in connection with television or radio broadcasting, or the right to use in connection with television or radio broadcasting, visual images, or sounds, or both, transmitted by satellite or cable, optic fibre, or similar technology.
16. The 5% rate applies to royalties paid for the use of any copyright of literary, artistic, or scientific work, and the 10% rate applies to royalties paid for the use or the right to use industrial, commercial, or scientific equipment.
17. The 10% rate applies to (a) interest paid to a bank or financial institution (including an insurance company) and (b) interest from a loan or debt claim that is guaranteed by the government.
18. The zero-rate applies to royalties paid to a contracting state or a state-owned company with respect to films or tapes, and the 10% rate applies to royalties paid for the alienation or the use of any copyright of literary, artistic, or scientific work.
19. The 5% rate applies to royalties paid for the alienation or the use or the right to use any copyright of literary, artistic, or scientific work excluding cinematograph films or tapes used for television or broadcasting.
20. The 10% rate applies to royalties paid for the use of, or the right to use, any copyright of literary or artistic work including motion pictures, live broadcasting, film, tape, or other means of the use or reproduction in connection with radio and television broadcasting, and for the use of, or the right to use industrial, commercial, or scientific equipment.
21. The 5% rate applies to royalties paid for the use of any copyright of literary, dramatic, musical, artistic, or scientific work excluding cinematograph films or films or tapes used for radio or television broadcasting. The 8% rate applies to royalties in consideration of financial leasing for the use of, or the right to use, industrial, commercial, or scientific equipment.
22. The 5% rate applies to royalties paid for the use of any copyright of literary, artistic, or scientific work including software, motion pictures, and works on film, tape, or other means of reproduction for use in connection with radio or television broadcasting. The 8% rate applies to royalties paid for the use of industrial, commercial, or scientific equipment.

23. The 10% rate applies to interest paid (a) to a recipient that is a bank or financial institution (including an insurance company); (b) in connection with the sale on credit of any industrial, commercial, or scientific equipment; or (c) in connection with the sale on credit of any merchandise by one enterprise to another enterprise.
24. The 10% rate applies to interest paid (a) to a recipient that is a bank or financial institution (including an insurance company); or (b) with respect to indebtedness arising as a consequence of a sale on credit of any equipment, merchandise or services, except where the sale was between persons not dealing with each other at arm's length.
25. The 5% rate applies to royalties paid for the use of or the right to use any copyright of literary, artistic, or scientific work including software, and motion pictures and works on film, tape, or other means of reproduction for use in connection with radio or television broadcasting and the 10% rate for the use of or the right to use any patent, trademark, design, or model, plan, secret formula, or process.
26. The 10% rate applies to interest paid to the following recipients (a) in the case of a resident of Russia, any institution having a license to carry on banking operations; and (b) in the case of a resident of Thailand, any financial institution (including an insurance company).
27. The 10% rate applies to royalties paid for the use of, or the right to use, any copyright of literary, artistic, or scientific work, or for the use of, or the right to use, industrial, commercial, or scientific equipment.
28. In case of interest arising in Thailand, the 10% rate applies to interest paid to a Philippines financial institution (including an insurance company). In the case of interest arising in the Philippines, the 10% rate applies in respect of public issues of bonds, debentures, or similar obligations.

## *Tax administration*

### *Returns*

The Thai system is one of self-assessment. A company prepares and files its tax returns by the due dates and at the same time pays the taxes calculated to be due.

The tax year for a company is its accounting period, which must be of 12 months' duration. However, it may be less than 12 months in the case of the first accounting period after incorporation, the accounting period of dissolution, or after approval for a change in the accounting period has been received from the Revenue Department and the Business Development Department.

### *Payment of tax*

CIT is paid twice in each year. A half-year return must be filed within two months after the end of the first six months of an accounting period. The tax to be paid is computed on one-half of the estimated profit for the full accounting period, except for listed companies, banks, certain other financial institutions, and other companies under prescribed conditions where the tax is based on the actual net profit for the first six months. The balance of the tax due is payable within 150 days from the closing date of the accounting period, along with the annual tax return. Credit is given for the amount of tax paid at the half-year.

## Significant developments

### Draft Turkish commercial code (TCC) adopted

The draft TCC, which will be effective as of 1 July 2012, was adopted on 12 January 2011 by the General Assembly of the Turkish Parliament. The TCC brings radical changes into the world of business and the economy in commercial life and brings the following changes that are hereto expressed in general terms:

- Corporate governance is actually a codex that should be applied to all enterprises in order to inspire investors with confidence and ensure sustainable development. The corporate governance approach of TCC has been based on four pillars: (i) Full transparency, (ii) Fairness, (iii) Accountability, and (iv) Responsibility.
- In the TCC, every capital stock company has been obligated to create a website, and if the company already has a website, to allocate a part thereof for information society services.
- A group of companies, which is created for the specific purpose of managing more than one capital stock company according to predetermined and concrete policies within the context of controlling relationships, has been regulated for the first time in Turkish law by the TCC.
- The TCC has regulated the structural changes in companies (i.e. division, merger, and conversion). Most of these provisions relate to protecting the partners, the partnership creditors, and the employees and securing their rights and credits.

The TCC also offers a fundamental system change with a reformist understanding and a contemporary evolution in the auditing of capital stock companies. This change is of such a scope and characteristic that it will establish trust in national and international markets and create a new perspective for Turkey. The new audit will be conducted by an independent auditor in compliance with International Auditing Standards (IAS).

### New code of obligations adopted

The Turkish code of obligations has been adopted as of 11 January 2011. However, promulgation of this new code has been postponed until 1 July 2012. The new code will supersede the former one, which has been in application for more than 80 years.

The most pertinent innovations commonly encountered in commercial life introduced by the new code are described as follows:

- Formation of agreements: One of the most significant amendments contained in the new code relates to the 'written form requirement' presented under Articles 14 and 15. Pursuant to the new articles, agreements can be executed with an electronic signature. According to Article 14 of the new code, in line with the law on electronic signature No. 5070, secure electronic signatures or confirmed fax and any other

communication instruments, which are able to be sent and stored, may be valid and binding.
- Contractual rate of interest and default interest: The new code creates significant changes in favor of the debtor on the contractual rate of interest and the calculation of default rates. High interest rates that are determined by the creditors are prohibited by the new amendments. One of the most important innovations introduced by the new code is that the percentage of the interest and the default interest may not exceed the fixed percentages.
- Risk liability: Under Article 70 of the new code, if damage occurs due to the activities of a significantly dangerous enterprise, the owner of the enterprise shall be held liable together with the operator, if any. Therefore, even if permissions and licenses required for activities of such enterprise are dully obtained, persons who are in charge of the operating activities of the dangerous enterprise will be liable for ordinary risks which may arise from typical damage.
- Guarantee agreements: Pursuant to Article 383 of the new code, a guarantee will not be valid unless it has been executed in writing and unless the maximum amount under the responsibility of the guarantor and the date of the guarantee is clearly stated. Nevertheless, the maximum amount under the responsibility of the guarantor and the date of guarantee may be determined by the handwriting of the guarantor. Amendments adopted after the execution of a guarantee agreement that raise the responsibility of the guarantor will not be valid unless such amendments were made in compliance with the execution requirements of the guarantee.

## *Taxes on corporate income*

Corporations are liable for corporate income tax (CIT) at a rate of 20% on net profits generated, as adjusted for exemptions and deductions and including prior-year losses carried forward, to a limited extent.

According to Turkish tax legislation, income taxation differs significantly based on the taxpayer's place of residence. Resident entities are subject to tax on their worldwide income, whereas non-resident entities are taxed solely on the income derived from activities in Turkey.

## *Corporate residence*

If both the legal and the business headquarters of a company are located outside Turkey, the company is regarded as a non-resident entity for Turkish tax purposes. If one of these headquarters is located within Turkey, the company is regarded as a resident entity for Turkish tax purposes.

Note that there is no distinction between CIT and value-added tax (VAT) registration in Turkey. Therefore, corporations or PEs are liable for all taxes (e.g. CIT, VAT, withholding tax, stamp tax) once they are registered for tax purposes in Turkey.

### *Permanent establishment (PE)*

Unlike the provisions of the Organisation for Economic Co-operation and Development (OECD) Model Tax Convention on Income and on Capital, there is no minimum period of presence in Turkey before a presence is regarded under the Turkish tax legislation as a PE. In this regard, we believe that the PE evaluation should be made for each case depending on the merit of the cases both from a local legislation perspective and from a treaty (if applicable) perspective.

## Other taxes

### Value-added tax (VAT)

Deliveries of goods and services are subject to VAT at rates varying from 1% to 18%. The general rate is 18%. VAT payable on local purchases and on imports is regarded as 'input VAT', and VAT calculated and collected on sales is considered 'output VAT'. Input VAT is offset against output VAT in the VAT return filed at the related tax office. If output VAT is in excess of input VAT, the excess amount is paid to the related tax office. Conversely, if input VAT exceeds output VAT, the balance is carried forward to the following months to be offset against future output VAT. With the exception of a few situations such as exportation and sales to an investment incentive holder, there is no cash refund to recover excess input VAT.

Turkish VAT principles contain a 'reverse-charge VAT mechanism', which requires the calculation of VAT by resident entities on payments to persons in foreign countries. Under this mechanism, VAT is calculated and paid to the related tax office by the resident entity. The resident entity treats this VAT as input VAT and offsets it in the same month. This VAT does not create a tax burden for the resident or non-resident entity, except for its cash flow effect on the former if there is insufficient output VAT to offset the input VAT.

### Banking and insurance transactions tax (BITT)

The transactions being performed by licensed banks and insurance companies are generally exempt from VAT but are subject to BITT at a rate of 5%, which is due on the gains of such corporations from their transactions.

The purchase of goods and services by banks and insurance companies are subject to VAT, but this is considered an expense or cost item. Therefore, it is not recoverable (i.e. for VAT purposes by offsetting against the output VAT) in the hands of these corporations.

### Property taxes

Buildings and land owned in Turkey are subject to real estate tax at different rates.

### Stamp tax

Stamp tax applies to a wide range of documents, including but not limited to agreements, financial statements, and payrolls. Stamp tax is levied as a percentage of the value stated on the agreements at rates varying between 0.165% and 0.825%.

Salary payments are subject to stamp tax at a rate of 0.66% over the gross amounts, whereas a lump-sum stamp tax is calculated for certain types of documents such as the printed copies of the financial statements.

### Special consumption tax

There are four main product groups that are subject to special consumption tax:

- Petroleum products, natural gas, lubricating oil, solvents, and derivatives of solvents.
- Automobiles and other vehicles, motorcycles, planes, helicopters, yachts.
- Tobacco and tobacco products, alcoholic beverages.
- Luxury products.

Unlike VAT, which is applied on each delivery, special consumption tax is charged only once (except for some activities such as production).

### *Resource utilisation support fund (RUSF)*
Foreign loans (including trade payables) obtained by Turkish resident individuals or legal entities (except for banks or financial institutions) are subject to RUSF at the following rates:

- 3% over the principal or the interest amount (depends on the currency denomination and on the maturity).
- 0% in case of locally obtained loans.

### *Customs and foreign trade*
PwC Turkey's customs and foreign trade specialist team would be pleased to assist in determination of customs duties and in providing extensive information regarding the local excise regime.

## *Branch income*

Branches are taxed solely on the income derived from activities in Turkey since they are regarded as non-resident entities for Turkish tax purposes. Branch profits are subject to Turkish CIT at the rate of 20%.

The branch profit transferred to headquarters (i.e. upstream income repatriation) is subject to dividend WHT at a rate of 15%, which might be reduced if there is a bilateral tax treaty between Turkey and the country of which the principal is a resident for income tax purposes. *See the Withholding taxes section for a list of countries with which Turkey has an applicable tax treaty.*

## *Income determination*

### *Capital gains*
No separate rules exist with respect to capital gains taxation in Turkey. Capital gains and losses are included in the determination of taxable corporate income.

*See Capital gains exemption in the Tax credits and incentives section for information about an incentive that can reduce the effective CIT rate on capital gains in certain instances.*

### *Dividend income*
In dividend distribution's between Turkish resident companies, the dividend payer is exempt from WHT and the recipient is exempt from CIT.

### *Foreign income*
In principle, foreign-sourced income is taxable in Turkey. However, foreign-sourced dividend income may also be subject to a participation exemption, if certain conditions are fulfilled. A participation exemption for capital gains generated from a foreign subsidiary may also be available in Turkey, under certain conditions.

Other foreign-sourced income, such as royalties and interest, is fully taxable in Turkey. Partial relief from taxation is granted insofar as the foreign tax paid does not exceed the rate of tax payable for the same income in Turkey.

Although undistributed income of foreign subsidiaries should not be taxable in Turkey, controlled foreign company (CFC) rules should also be taken into consideration in this respect. *See CFC rules in the Group taxation section for more information.*

T

## Deductions

Turkish CIT legislation allows a deduction for all the "ordinary and necessary expenses paid or incurred for the generation and sustenance of income during the taxable year in carrying on any trade or business".

The general principle for tax deductibility is that the payment should be a necessary business expense and it should be properly documented in accordance with the relevant provisions of the Turkish transfer pricing regulations and those in the local tax procedural law.

### Depreciation and amortisation

Fixed assets are subject to depreciation at rates determined by the Turkish Ministry of Finance, based on their useful life.

Depreciation can be calculated by applying either the straight-line or declining-balance method, at the taxpayer's discretion. The taxpayer may also change the option from declining-balance to straight-line (but not vice versa) at any time during the life of the asset. The applicable rate for the declining-balance method is twice the rate of the straight-line method, subject to certain limitations. Furthermore, in special cases, the tax authorities may determine higher depreciation rates.

Intangible assets are amortised by the straight-line method over their estimated useful lives, if objectively determinable.

Profits or losses on disposal of fixed assets (i.e. the difference between the proceeds and the written-down values) are included in taxable income in the year of disposal. If the renewal of disposed-of assets is considered necessary by the owners of the business concern, the profit accrued may be retained for a certain amount of time. After the purchase of new fixed assets, the profits may be offset against the depreciation of the new assets.

### Bad debts

Bad and doubtful accounts receivable are deductible under certain conditions. Amounts of the receivables collected afterwards are added to the profits of the year in which they are collected.

### Pensions and employee termination benefits

Payments for pensions and employee termination benefits are deductible for CIT purposes under certain conditions and are not subject to WHT beyond a certain limit.

### Taxes

Essentially, the CIT itself and VAT are, subject to certain exceptions, not deductible for CIT purposes.

Fees and duties paid in relation to assets of the company are, in principle, deductible in determining taxable corporate income.

### Net operating losses

Corporate losses may be carried forward for five years. Losses cannot be carried back.

### *Payments to foreign affiliates*
Charges for royalties and interest by foreign affiliates may be deductible for CIT purposes, provided that transfer pricing and thin capitalisation rules are followed *(see the Group taxation section for more information)*.

## *Group taxation*

Consolidation of the accounts of group companies for tax purposes is not allowed in Turkey since each company is regarded as a separate taxpayer.

### *Transfer pricing*
The new corporate income tax law includes considerable amendments to transfer pricing regulations, using the OECD's guidelines as a basis. If a taxpayer enters into transactions regarding the sale or purchase of goods and services with related parties in which prices are not set in accordance with the arm's-length principle, the related profits are considered to have been distributed in a disguised manner through transfer pricing. Such disguised profit distribution through transfer pricing is not accepted as deductible for CIT purposes. The methods prescribed in the law are the traditional transaction methods described in the OECD's transfer pricing guidelines.

### *Thin capitalisation*
According to local thin capitalisation regulation, if the ratio of the borrowings from shareholders or from persons related to the shareholders exceeds triple the shareholders' equity of the borrower company at any time within the relevant year, the exceeding portion of the borrowing will be considered thin capital and the corresponding interest will not be deductible. Accordingly, the ratio of loans received from related parties to shareholders' equity must be no more than three to one in order to eliminate Turkish thin capitalisation issues.

### *Controlled foreign company (CFC) rules*
A CFC is a company established abroad with at least 50% of the organisation controlled directly or indirectly by tax-resident companies and real persons by means of separate or joint participation in the capital or dividends voting rights. A CFC also must meet certain conditions (e.g. 25% or more of its gross revenue must be comprised of passive income), and it must be subject to an effective income tax rate lower than 10% for its commercial profit in its home country.

The CFC's profit is included in the CIT base of the controlling resident corporation at the rate of the shares controlled, irrespective of whether it is distributed.

## *Tax credits and incentives*

### *Participation exemption for dividends*
There is an unconditional CIT and dividend WHT exemption for dividend income between Turkish companies. If a Turkish company has a shareholding in a foreign company, this dividend income is exempt from CIT, under certain conditions.

### *Exemption for income from foreign construction and repair activities*
The profit from construction and repair activities carried out by Turkish corporations in foreign countries may be exempt from CIT in Turkey under the Turkish CIT law. It should be noted that if loss occurs from these activities, it is not possible to deduct this loss amount from the income generated through domestic activities since deduction

of a loss relating to foreign activities that are exempt from CIT in Turkey is not allowed for deduction.

### *Capital gains exemption*
For capital gains generated from the sale of shares in a Turkish company to another Turkish company, a 75% CIT exemption is applicable under certain conditions. This partial exemption may also be applicable for the capital gains derived from the alienation of real estate investments under certain conditions.

In the event a foreign subsidiary is sold by a Turkish company, a CIT exemption at the rate of 100% is applicable under certain conditions.

### *Investment incentives*
The Turkish government provides investment incentives (state aids) to eliminate inter-regional economic imbalance, facilitate a larger capital contribution by public and foreign investors to the capital build-up of the country, and support activities that have a positive effect on employment. Generally speaking, state aid can be classified as either a tax or a non-tax incentive.

The principal prerequisite for benefiting from state aid, except investment allowance, is to obtain an Investment Incentive Certificate (IIC). The IIC is a document granted to investors for their investments by the Undersecretariat for the Treasury. It allows utilisation of the said benefits. The import of machinery and equipment (excluding raw materials, intermediate, and operating products) is exempt from customs duty and RUSF payments. In addition, a VAT exemption is also applicable on the importation of eligible machinery and equipment.

According to investment incentive legislation, in order to obtain an IIC, the minimum amount of total investment should be at least 1 million Turkish liras (TRY).

The advantages of an IIC can be summarised as exemption from customs duty, RUSF, and VAT.

From an income tax perspective, the legislation related to investment incentives has changed substantially. There are six main components of the new investment regulation:

- Reduced CIT rate.
- VAT exemption.
- Exemption for social security premium (employer's portion).
- Customs duty exemption.
- Interest support.
- Allocation of land for investments.

### *Free trade zone*
Free trade zones are special sites that lie geographically within the country but are deemed to be outside the customs territory. In these regions, the normal regulations related to foreign trade and other financial and economic areas are either inapplicable, partly applicable, or superseded by new regulations.

In general, activities such as manufacturing, storage, packing, general trading, banking, insurance, and trade may be performed in Turkish free trade zones. Goods moving between Turkey and the zones are treated, for all purposes, as exports or imports. However, operations within the zones are subject to the supervision of the zone management (and customs authorities), to whom regular activity reports must be submitted. Consequently, there is a requirement for zone users to maintain full accounting records (in Turkish) with respect to their activities. These accounting requirements extend to inventory records. Customs duty is levied on any unexplained inventory losses as though the goods had been imported into the country.

The right to operate in a free zone is conferred by an operating licence obtained from the Undersecretariat for Foreign Trade, which reviews the application for conformity with the objectives and types of activity specified by the Economic Affairs Coordination Council.

### *Portfolio investment income*

In line with the amendments in the Turkish income tax law, being effective 1 January 2006, certain investment income (e.g. capital gains on listed equities acquired after 1 January 2006 and interest and capital gains from domestic government bonds or treasury bills issued after 1 January 2006), derived by non-resident corporations without having a PE in Turkey and by non-resident individuals, is currently subject to WHT at source.

The following investors will qualify for WHT at a rate of 0%:

- Turkish resident capital corporations (limited liability companies, joint stock companies, and comandite companies whose capital is divided into shares).
- Non-resident corporations which have the same characteristics as Turkish capital corporations.
- Turkish investment funds (regulated in accordance with the Capital Markets Board or CMB).
- Non-resident investment funds similar to Turkish investment funds.
- Those non-residents similar to Turkish investment funds and trusts which engage in investment in securities and other capital markets instruments as their only business in Turkey, to derive income and capital gains from these instruments, and to exert the rights attached to these instruments.

WHT is applied at a rate of 10% for both resident and non-resident individuals and for all other entities which are not qualified for 0% WHT (i.e. those who are not listed above).

The withholding will be applied by local intermediary banks, brokerage houses, or local custodian banks, instead of the conventional self-declaration mechanism, and this withholding would be the final taxation in Turkey both for non-residents and Turkish individuals.

### *Research and development (R&D) activities*

In the last decade, the Turkish Parliament has enacted several regulations to provide incentives for R&D activities in Turkey. The three primary R&D incentives include significant advantages granted to investors planning R&D activities in science, software, and technology in special zones known as 'techno-parks', cash subsidies from the Scientific and Technological Research Council of Turkey (TUBITAK), and corporate tax deductions.

One of the objectives of the special R&D law, which was enacted in 2008, is to attract foreign investors with significant R&D activities abroad to invest in Turkey, by enabling non-resident companies with a subsidiary or branch in Turkey to benefit from R&D tax incentives. The main incentives introduced by this R&D law are listed as follows:

### R&D deduction
All eligible innovation and R&D expenditures made in technology centres or R&D centres, which must employ at least 50 full-time equivalent R&D personnel, or R&D and innovation projects supported by foundations established by law or international funds can be deducted from the CIT base at a rate of 100%.The same expenditures can also be capitalised and expensed through amortisation over five years in the case of successful projects, whereas the R&D expenditure on failed projects can be expensed immediately.

Companies with separate R&D centres employing more than 500 R&D personnel can, in addition to the aforementioned deduction, deduct half of any increase in R&D expenditures over similar money spent in the previous period.

Any unutilised R&D deduction can be carried forward for an unlimited period of time, indexed to the revaluation rate, which is an approximation of the inflation rate.

### Income WHT exemption on salaries
80% of the salary income of eligible R&D and support personnel is exempt from income WHT. However, this rate is increased to 90% for personnel with a doctorate degree.

### Support for the contributions to the Turkish social security institution
The Ministry of Finance will pay half the employer portion of social security premiums for R&D and support personnel for five years.

### Stamp tax exemption
Documents prepared in relation to R&D activities are exempt from stamp tax.

### *Foreign tax credit*
A partial relief from income taxation is granted for the foreign tax paid that does not exceed the rate of tax payable for the same income in Turkey.

## *Withholding taxes*

There is no WHT on payments to resident corporations by other resident corporations, except for a 3% WHT on progress payments to contractors, both domestic and foreign, within the scope of construction work spanning more than one calendar year.

The local WHT rates are as follows:

| Income derived by non-resident individual or corporation not constituting PE in Turkey | WHT (%) |
|---|---|
| Rental from immovable assets | 20 |
| Leasing of goods (within the scope of the conditions regulated under Turkish Financial Leasing Law No. 3226) | 1 |
| Royalties (e.g. on patents, copyrights, license) | 20 |
| Professional services | 20 |
| Petroleum services | 5 |
| Interest on loan arrangements | 10 |
| Interest on time deposits | 15 |
| Interest income derived from time deposits | 15 |
| Reverse-repo income | 15 |
| Wages and salaries | 15 to 35 |

| Income derived by non-resident individual or corporation not constituting PE in Turkey | WHT (%) |
|---|---|
| Capital gains from listed equities of securities investment trusts purchased after 1 January 2006 | 0 |
| **Income derived by resident capital companies*** | **WHT (%)** |
| Capital gains on Treasury bills and domestic government bonds issued after 1 January 2006 | 0 |
| Capital gains from listed equities purchased after 1 January 2006 (excluding those purchased by securities investment trusts after 1 January 2006) | 0 |
| **Income derived by other resident entities and individuals** | **WHT (%)** |
| Capital gains on Treasury bills and domestic government bonds issued after 1 January 2006 | 10 |
| Capital gains from listed equities purchased after 1 January 2006 (excluding those purchased by securities investment trusts after 1 January 2006) | 0 |
| **Income derived by Turkish securities investment funds and securities investment trusts** | **WHT (%)** |
| Capital gains from domestic government bonds issued after 1 January 2006 | 0** |
| Interest from domestic government bonds issued after 1 January 2006 | 0** |
| Capital gains from listed equities purchased after 1 January 2006 | 0** |

*Capital companies refers to limited liability companies (LLCs), joint stock companies (JSCs), and comandite companies, whose capital is divided into shares, and Turkish investment funds (regulated in accordance with the Turkish Capital Markets Board's legislations)

**Final WHT at source

Please refer to the following tables for local WHT on interest, royalties, and dividends, respectively.

### *Turkish WHT on interest and royalties*

| Recipient | WHT on interest (%) | WHT on royalties (%) |
|---|---|---|
| Albania | 10 | 10 |
| Algeria | 10 | 10 |
| Austria | 5/10/ 15 (1, 2, 15) | 10 (2) |
| Azerbaijan | 10 | 10 |

Notes

1. The local rate of 10% will be applied in the event a higher rate is stipulated in the agreement.
2. Provisions for WHT at source are effective for amounts paid or credited on or after 1 January 2010.
3. A rate of 10% if the loan or other debt claim is for a period exceeding two years; 15% in all other cases (1).
4. A rate of 10% if the loan is taken for a period exceeding two years; 15% in all other cases (1).
5. A rate of 10% if the loan/credit is taken from a financial institution; 15% in all other cases (1).
6. A rate of 10% if the loan is taken from a bank or a financial institution; 15% in all other cases (1).
7. A rate of 10% if the credit/loan is taken from a bank, financial or savings institution, insurance company; 15% in all other cases (1).
8. A rate of 7.5% if the loan is taken from a financial institution; 10% in all other cases.
9. A rate of 10% if the interest is the result of a loan provided/given by a bank or if the interest is paid in return for an article of merchandise, or equipment given to the contracting state on credit; 15% in all other cases (1).
10. A rate of 10% if the loan is taken from a financial institution, including insurance companies; 15% in all other cases (1).
11. A rate of 10% for the use of, the right to use, or the sale (contingent on the productivity, use, or disposition) of any copyright of literary, artistic, or scientific work, including royalties in respect of motion pictures and works on film, tape, or other means of reproduction for use in connection with radio or television broadcasting, any patent, trademark, design or model, plan, secret formula, or process, or for information concerning, industrial, commercial, or scientific experience; 5% for the use of or the right to use industrial, commercial, or scientific equipment.
12. A rate of 5% for the use of industrial, commercial, or scientific equipment; 10% in all other cases.
13. A rate of 15% for patent, trademark, design or model, plan, secret formula or process, or for information concerning industrial, commercial, or scientific experience; 10% for the use of or the right to use any copyright of literary, artistic, or scientific work including cinematographic films and recordings for radio and television.
14. The treaty has been terminated by Germany. The termination is applied for the periods following 1 January 2011.
15. A rate of 5% in respect of a loan or credit made, guaranteed, or insured for the purposes of promoting export by the Oesterreichische Kontrollbank AG or a similar Turkish public entity the objective of which is to promote the export; 10% if the interest is derived by a bank; 15% in all other cases (1).
16. If the beneficial owner of the 'income from debt claims' is a resident of Saudi Arabia, the tax so charged shall not exceed 10% of the gross amount of income.
17. A rate of 10% in respect of a loan or other debt claim for a period exceeding two years or if the interest is received by a financial institution; 15% in all other cases (1).
18. Interest arising in one of the contracting states and paid to the Government of Republic of Turkey or the Central Bank of Turkey shall be exempt from income taxes in the contracting state. Similarly, interest arising in the Republic of Turkey and paid to the Government or the Central Bank of the other contracting state shall be exempt from income taxes in Turkey.

### *Turkish WHT on dividends*

Dividend distributions to individuals and to non-resident persons who are shareholders are subject to WHT at a local rate of 15%. This rate might be reduced for non-resident shareholders in the presence of a tax treaty. Please note that dividend distributions to resident entities and branches of non-resident entities are not subject to WHT.

| Recipient | Shareholding interest (%) | WHT rate (%) |

Notes

1. The local rate is 15% for dividends. Unless a lower rate is stated in the Agreement, the local rate is applied.
2. As per the provisions of the protocol amending the agreement, the rate may be (partially or wholly) reduced;
    - For the Netherlands: to 10%, as long as, under the provisions of the Netherlands Company Tax Act and to the future amendments thereto, a company which is a resident of the Netherlands is not charged tax with respect to dividends the company receives from a company which is a resident of Turkey.
    - For Belgium: to 10%, as long as, under the provisions of the Belgian laws and of the future amendments thereto, a company which is a resident of Belgium is not charged tax with respect to dividends the company receives from a company which is a resident of Turkey.
    - For Austria: to 5%, if the beneficial owner is a company (other than a partnership) which holds directly at least 25% of the capital of the company paying the dividends, provided that such dividends are exempt from tax in Austria.
    - For Ireland: to 5%, where the beneficial owner is a company (other than a partnership) which holds directly at least 25% of the voting power of the company paying the dividends. 15% in all other cases.
3. Subject to 5% of the gross amount of the dividends if the recipient is the government, or a public institution which is wholly owned by the government or its political subdivisions, or local authorities of the UAE.
4. The tax rate shall be 15% where the amount of the Turkish tax imposed on the income of the company paying dividends is less than 40% of such income derived in the accounting period ending immediately before the date when such dividends become payable.
5. The income should be subject to full corporate taxation in the hands of the Turkish tax-resident subsidiary.
6. The treaty has been terminated by Germany. The termination is applied for the periods following 1 January 2011.
7. The provisions for WHT at source are effective for amounts paid or credited on or after 1 January 2010.

8. If the beneficial owner of the dividends is a resident of Saudi Arabia, the tax so charged shall not exceed 5% of the gross amount of the dividends provided: (i) the beneficial owner is a company (other than a partnership) which holds directly at least 20% of the capital of the Turkish company paying the dividends or (ii) the beneficial owner is a central bank or an entity which is wholly owned by the government.
9. In case of Turkey, the tax rate shall not exceed 5%, to the extent that they are paid out of profits that have been subject to full rate of CIT in Turkey (i.e. without benefiting from tax exemption).

### *Anti-tax haven provisions*

According to the new law, all sorts of payments made to corporations (including branches of resident corporations) that are established or operational in countries that are regarded by the Turkish Council of Ministers to undermine fair tax competition (through taxation or other practices) may be subject to taxation in Turkey through withholding at a rate of 30%.

In the meantime, the Turkish Council of Ministers has not yet determined which countries receiving payments are considered 'tax havens'.

## *Tax administration*

A self-assessment system is used in Turkey.

All Turkish taxes are imposed under laws drafted by or with the involvement of the Turkish Ministry of Finance and are promulgated by the Turkish Parliament. The central government, acting through the Ministry of Finance, imposes most of them, although local authorities have certain rights over some minor transaction charges. Tax procedures are governed by the Turkish tax procedural law.

### *Returns*

In principle, residents and non-resident entities having a PE in Turkey are obliged to be registered for all taxes in Turkey (e.g. CIT, VAT, WHT, stamp tax) and file annual CIT returns.

The last date of submission of the CIT return is the 25th day of the fourth month following the fiscal year-end. This date would be 25 April if CIT returns are filed on a calendar-year basis. Note that a different fiscal year is also allowed.

### *Payment of tax*

Taxable income is declared on a quarterly-basis as advance tax on the 14th day of the second month following each quarter, and corresponding tax is payable on the 17th day of the same period. Advance CIT paid is offset against the final (i.e. fiscal year-end) CIT calculated in the annual CIT return.

The last date of payment of CIT is the 30th day of the fourth month following the fiscal year-end.

### *Corporate income tax certification*

In Turkey, a special kind of tax audit arises called 'corporate income tax certification'. It is regulated under the provisions of the relevant professional law No. 3568 and is a well-recognized territory-specific service, which is very common for all foreign investors having entities established and tax registered in Turkey.

Under this service, a licensed tax auditor (i.e., a sworn-in financial advisor) audits the accounts of a taxpayer from a tax perspective and certifies the accuracy of the CIT return.

This tax certification service is utilised by the majority of business entities in Turkey because such a process helps identify and take corrective measures against erroneous actions that may otherwise be detected only upon a tax investigation by the Ministry of Finance.

## *Other issues*

### *For up-to-date information*

For up-to-date information on the most recent and significant developments in Turkish tax regulations, please refer to the tax bulletins added to our tax portal, Vergi Portali, which can be accessed at Vergiportali.com.

## Significant developments

A new law on accounting and financial reporting establishes a basis for the government's plan to transition into the international accounting and auditing standards by 2014. Banking institutions are already required to prepare financial reporting according to International Financial Reporting Standards (IFRS) as of 1 January 2011. All other organisations and entities are required to implement phased transition into the new standards as of 1 January 2013. Such developments should improve transparency and enable Turkmenistan to attract more foreign direct investments.

## Taxes on corporate income

Residents of Turkmenistan are subject to corporate income tax (CIT) on worldwide income; non-residents are subject to CIT only in respect of their Turkmenistan-sourced income. The CIT base is determined as gross income less allowable deductions.

Branches of foreign legal entities are subject to a 20% CIT, whereas Turkmen legal entities are subject to an 8% CIT.

Companies involved in oil and gas operations are subject to a 20% CIT, irrespective of the legal status/ownership structure.

### Special purpose duty for improvement of urban and rural territories

A special duty aimed at improving urban and rural territories is imposed on registered entities (e.g. legal entities and branches). The duty applies at 1% of the taxable base for CIT purposes. Generally, contractors and subcontractors operating under the umbrella of the petroleum law may be exempt from this duty.

### Contributions to Agriculture Development and Ashgabat City Development Funds

The contributions to the Agriculture Development Fund and Ashgabat City Development Fund are outside of the general tax legislation (tax code) and are provided for by specific decrees. Permanent establishments (PEs)/branches of foreign legal entities are subject to these contributions on the same terms as local legal entities.

Contribution to the Ashgabat City Development Fund only applies to entities located in Ashgabat City.

The base for the contributions is comprised of the accounting income. The contribution rate for the Agriculture Development Fund is 3%, and the contribution rate for the Ashgabat City Development Fund is 0.5%.

Generally, contractors and subcontractors operating under the umbrella of the petroleum law may be exempt from these contributions.

## Corporate residence

Legal entities are treated as residents for CIT purposes if they are established in accordance with Turkmenistan law or their place of effective management is located in Turkmenistan.

### Permanent establishment (PE)

The general definition of a PE under domestic legislation is similar to the one per the Organisation for Economic Co-operation and Development (OECD) model convention. A PE is a permanent place of the foreign legal entity in Turkmenistan, through which it, fully or partially, conducts entrepreneurial (commercial) activity, including that through an authorised person.

## Other taxes

### Value-added tax (VAT)

VAT is generally payable at the rate of 15%. A zero-rate applies to exports of goods (except for oil and gas) and international transport services. Generally, contractors operating under the umbrella of the petroleum law may be exempt from this tax.

The tax base is sales turnover including excise tax. If a sale is made by state-fixed prices, then the tax base is the respective sales turnover including VAT and excise tax. The amount of input VAT incurred may be offset against the amount of output VAT. The amount of input VAT related to capital expenditures should be capitalised.

### Customs duties

The import of certain goods into Turkmenistan is subject to customs duties. The taxable base is determined as the customs value of imported goods. Although the list of items that are subject to customs duty is relatively limited (i.e. around 50 items) the rates of customs duties may vary from 5% (e.g. products from cement) to 100% (e.g. carbonic acid) depending on the type of imported goods. In most cases, the customs duty is set on an *ad valorem* basis. There is also a customs clearance fee of 0.2% from the customs value of imported goods.

### Excise taxes

Excise tax is paid on goods or products that are considered in the list of excised goods or products. Normally, excised goods consist of alcoholic beverages, tobacco products, and automobiles. Excise rates vary based on the type of goods as well as by domestic production or import.

### Property tax

Property tax in Turkmenistan generally applies at the rate of 1% on the average annual net book value of fixed assets and average annual value of tangible assets used for business purposes and located in Turkmenistan. Generally, contractors and subcontractors operating under the umbrella of the petroleum law may be exempt from this tax.

### *Subsurface-use tax*
Subsurface-use taxpayers are legal entities and individual entrepreneurs extracting natural resources and using land or subsoil waters for the extraction of chemical products. This tax does not normally apply to contractors and subcontractors operating under the umbrella of the petroleum law.

Taxable operations include the sale of natural resources extracted by taxpayers and utilisation of natural resources for consumption. Tax rates vary depending on the goods being extracted. Natural or associated gas extraction is taxed at 22%, and crude oil extraction is taxed at 10%. Tax rates for other mineral resources vary depending on profitability (internal rate of return).

### *Social security payments*
Social security is payable by employers at 20% of the total remuneration provided to local employees. Income paid to expatriate employees should not be subject to the social security contribution.

### *Advertising levy*
An advertising levy is imposed on the amount of expenses on commercial advertising and is to be paid quarterly at the rate of 3% to 5% depending on the location of the payer within Turkmenistan. Generally, contractors operating under the umbrella of the petroleum law may be exempt from this levy.

### *Transfer taxes*
There are no transfer taxes in Turkmenistan.

### *Stamp taxes*
Although state duties of various amounts set forth by the government may apply to certain actions (e.g. branch registration), there is no unified stamp tax/duty mechanism as normally practiced in other countries.

## *Branch income*

Branches pay CIT at the rate of 20%. Technically, branches are also subject to 15% dividend tax on repatriation of income to the head office. However, if the head office collects the income from its clients directly to its bank account abroad, the mechanism of collecting the dividend tax is unclear.

Branches are taxed on profits received from activities in Turkmenistan. The gross income is reduced for expenses incurred (both inside and outside of Turkmenistan) in relation to the activities in Turkmenistan. The procedure for determining the taxable base for branches is generally similar to the one for Turkmen legal entities.

Branches subject to the standard tax regime also pay and file returns with respect to the other taxes described in this summary.

## *Income determination*

### *Inventory valuation*
Inventory is valued at cost, including costs relating to its acquisition. The law permits the use of the weighted average, first in first out (FIFO), and last in first out (LIFO) methods for tax purposes.

### *Capital gains*
Capital gains are taxable as normal business income in Turkmenistan.

### *Dividend income*
The tax code provides for relief from economic double taxation of inter-corporate dividends.

### *Foreign income*
A resident company is subject to tax on its worldwide income (including capital gains). There are no provisions for tax deferrals in Turkmenistan tax legislation.

## *Deductions*

In general, taxpayers may deduct expenses paid or accrued during the year in connection with their business and aimed at income generation. All expenses must be substantiated by documentary proof.

The deduction of certain expenses is subject to specific ceilings. Such expenses include representation expenses, which are deductible at up to 1% of gross income. Furthermore, deductible norms for business travel expenses are established periodically by the government.

### *Depreciation*
Tax depreciation is based on accounting depreciation. Depreciation is accrued based on the straight-line method. Accelerated depreciation is also allowed based on specific consent of the Ministry of Finance. The Turkmenistan accounting legislation provides a comprehensive itemised list of depreciation norms which includes more than 200 items.

Generally, for the purposes of CIT, depreciation accrued is deductible. Fixed assets acquired free of charge as well as assets of non-commercial legal entities, budget organisations, and public associations should be excluded from depreciable assets for CIT purposes, even if they are used for generating income.

Fixed assets provided under operational lease shall be depreciated by the lessor. Fixed assets provided under financial lease shall be depreciated by the lessee.

### *Goodwill*
There are no provisions for goodwill in Turkmenistan tax legislation.

### *Repair and maintenance expenses*
Deductible expenditures for the repair of fixed assets shall be comprised of the cost of spare parts and consumable materials used for repair, remuneration of employees carrying out the repairs, and other expenditures associated with such repairs, including payments to third parties for the purpose of such repairs.

### *Research and development (R&D) expenses*
R&D costs (including those that produced no positive result) shall be subject to deduction from gross revenue, except for costs associated with the purchase of fixed assets, their installation, and other costs of a capital nature.

### *Bad debts*
The Tax Code permits a taxpayer to include provisions for uncollectable debts as well as losses incurred as a result of expiration of the collection period for accounts receivable.

### Charitable contributions
There are no specific restrictions on deductibility of charitable contributions. However, they may be disallowed under the general restriction of non-business related deductions.

### Taxes
For CIT purposes, the following taxes are deductible: property tax; subsurface-use tax; levies established by the tax code (except the special-purpose duty for the improvement of urban and rural territories); accrued amounts of VAT in selling goods, performing work, and rendering of services; and amounts of excise tax included in the price of sold excisable goods by manufacturers of such goods.

### Net operating losses
Loss is defined as excess of allowable deductions over gross revenue. Losses shall be carried forward and deducted in subsequent tax (reporting) periods, but not for more than three years. Losses cannot be carried back.

### Payments to foreign affiliates
Administrative and management expenses incurred by the head office of a branch in Turkmenistan are not deductible at the branch level.

## Group taxation

There is no group taxation in Turkmenistan.

### Transfer pricing
The Turkmenistan Tax Code contains provisions concerning state supervision of transfer pricing. According to these rules, the tax authorities monitor and control transfer-pricing of certain types of transactions, including transactions between related parties, foreign trade operations, and transactions where the tax authorities during tax audits perceive considerable deviation from the market price (i.e. more than 20%).

### Thin capitalisation
There are no provisions for thin capitalisation in Turkmenistan tax legislation.

## Tax credits and incentives

Tax and investment incentives may be negotiated on a case-by-case basis. The President has often issued special decrees granting taxation exemptions and other privileges to specific investors. However, since adopting a new edition of the tax code in 2004, such practice has been significantly reduced.

### Foreign tax credit
There are no provisions for foreign tax credits in Turkmenistan tax legislation.

## Withholding taxes

Turkmenistan-source income generated by a foreign legal entity that has no PE in Turkmenistan generally is subject to withholding tax (WHT) at the source of payment at 15% (6% for income from the lease of sea vessels and aircrafts).

Relief may be available for WHT if a foreign entity is a resident of a country that has a valid double tax treaty (DTT) with Turkmenistan and if the foreign entity complies with certain administrative procedures.

Currently, Turkmenistan has only a few DTTs in force. Turkmenistan is a successor to a number of DTTs concluded by the USSR, while some treaties were concluded and ratified by the government of Turkmenistan. The countries listed below are considered to have valid tax treaties with Turkmenistan:

| Recipient | Dividends (%) | Interest (%) | Royalties (%) |
|---|---|---|---|
| Austria* | 0 | 0 | 0 |
| Armenia | 5/15 | 10 | 10 |
| Belarus | 15 | 10 | 15 |
| Belgium* | 15 | 15 | 0 |
| China | 5/10 | 10 | 10 |

| Turkey | 10 | 10 | 10 |
| Ukraine | 10 | 10 | 10 |
| United States* | 0 | 15 | 0 |
| Uzbekistan | 10 | 10 | 10 |

* USSR treaties honoured by Turkmenistan.

## *Tax administration*

### *Returns*

Reports are generally filed quarterly within the month following the reporting quarter. Annual declaration of branches of foreign legal entities is due by 15 March of the year following the reporting one.

Tax agents must file WHT reports not later than the 20th day of the month following the one when the respective tax liability occurred.

### *Payment of tax*

Advance payments under the standard tax regime are made before the 13th and 28th days of each month (unless agreed otherwise with tax authorities). Final payments upon results of the first quarter, first half-year, nine months, and tax year are made within five days from the reporting deadlines. Under the petroleum law tax regime, the CIT is reported and paid once annually based on dates indicated as per the Product Share Agreement (PSA).

## Significant developments

### Significant changes in 2010

Following the reading of the national budget in June 2010, a few amendments were made to the Income Tax Act, the Value-added Tax (VAT) Act, and the Finance Act. The key notable amendments included the following:

- Exemption of the following items from VAT:
  - Computer software and software licences. Previously, only computer software was exempt from VAT and not software licences. After dialogue between the government and various stakeholders who incur significant costs in respect of software licences, the above amendment was introduced.
  - Biodegradable packaging materials.
- A capital gain derived from sale of shares in a private limited company is subject to tax even though such a gain is not included in a person's business income. This implies that gains derived by individuals on sale of private shares in a limited company are subject to tax.
- Various changes were made to the provisions for taxation of petroleum operations. However, these may be subject to change in 2011.

## Taxes on corporate income

The income tax rate applicable to the chargeable income of companies is 30%, with the exception of:

- Mining companies.
- Non-resident air transport, shipping, and some telecommunication services.
- Resident companies whose turnover is less than 50 million shillings (UGX).

Chargeable income is gross income for the year less the total deductions allowed under the Income Tax Act (ITA). A resident company is taxed on its income from all geographical sources. A non-resident company is only subject to Uganda income tax on income derived from sources in Uganda.

### Mining companies

The income tax rate applicable to mining companies is calculated according to the following specified formula:

> Annual tax rate = 70 minus (1500/x), where x is the ratio of the company's chargeable income to the gross revenue for the year.

Note that the derived tax rate is subject to a minimum tax rate of 25% and a maximum tax rate of 45%.

### *Non-resident air transport, shipping, and some telecommunications services*

Non-resident ship operators, charterers, and air transport operators who derive income from carriage of passengers who embark, or cargo or mail which is embarked, in Uganda, as well as road transport operators who derive income from carriage of cargo or mail which is embarked in Uganda, are taxed at the rate of 2%.

A non-resident person who carries on the business of transmitting messages by cable, radio, optical fibre, or satellite communication and derives income through transmission of such messages by apparatus established in Uganda, whether or not such messages originated from Uganda, is taxed on one's gross income at a rate of 5%. Similarly, a non-resident person who derives income from providing direct-to-home pay television services to subscribers in Uganda is taxed on one's gross income at a rate of 5%.

### *Resident companies with turnover of less than UGX 50 million*

A rate of 1% of turnover is used to determine income tax payable by a resident company whose turnover is between UGX 20 million and UGX 50 million (approximately between USD 10,000 and USD 25,000), subject to certain thresholds.

However, on application to the Commissioner, a resident company with a turnover of less than UGX 50 million may be taxed at 30%.

This category excludes professionals, public entertainment services, public utility services, or construction services.

## *Corporate residence*

A company is resident in Uganda for a year of income if it meets one of the following criteria:

- Is incorporated or formed under the laws of Uganda.
- Has its management and control exercised in Uganda at any time during the year of income.
- Undertakes the majority of its operations in Uganda during a year of income.

### *Permanent establishment (PE)*

A PE (branch) means a place where a person carries on business, and includes:

- A place where a person is carrying on business through an agent, other than a general agent of independent status acting in the ordinary course of business as such.
- A place where a person has, is using, or is installing substantial equipment or substantial machinery.
- A place where a person is engaged in a construction, assembly, or installation project for 90 days or more, including a place where a person is conducting supervisory activities in relation to such a project.

## Other taxes

### Value-added tax (VAT)

VAT is governed by the VAT Act and administered by the Uganda Revenue Authority (URA). VAT is charged at the rate of 18% on the supply of most goods and services in the course of business in Uganda. Specified goods and services, as well as exports outside of Uganda, attract a zero-rate of tax.

Some supplies are exempt from VAT, the main categories being government subsidies, the supply of unprocessed foodstuffs, agricultural products and livestock, financial services, insurance services, unimproved land, leases and sale of certain residential properties, betting and gaming, education, medical and health services, social welfare services, pesticides, petroleum products subject to excise duty, machinery for processing agricultural or dairy products, accommodation in hotels outside specified areas, computers, computer accessories, software, and biodegradable packaging materials. The supply of specialised vehicles, plants, and machinery; engineering designs; feasibility studies; consultancy services; and civil works related to hydro-power, road and bridge construction, public water works, agriculture, education, and health sectors is also exempt.

Zero-rating is preferable to exemption because the VAT on costs incurred in making a zero-rated supply can be recovered while that incurred in making an exempt supply cannot be recovered.

The zero-rated supplies include the supply of goods and services exported from Uganda; the supply of drugs and medicines; the supply of seeds, fertilisers, pesticides and hoes; the supply of machinery, tools, and implements suitable for use only in agriculture; the supply of milk, including milk treated in any way to preserve it; and the supply of leased aircraft, aircraft engines, spare engines, spare parts for aircraft, and aircraft maintenance equipment.

The annual threshold for VAT registration is UGX 50 million (approximately USD 25,000). Persons who make supplies that are VATable and whose turnover exceeds UGX 50 million are required to register for VAT with the URA. VAT registered persons are required to:

- Charge VAT whenever they make supplies that are VATable.
- File monthly returns before the 15th day of the month following the reporting onth.

### Credit for input tax

A person making exempt, zero-rated, and standard supplies can recover all the input VAT if the exempt supplies are less than 5% of the total supplies. However, if the exempt supplies are more than 5% but less than 95%, the person is required to recover only a portion of the VAT input tax corresponding to the percentage of the taxable supplies. If the exempt supplies exceed 95%, the person cannot recover any input VAT.

### Imported services

The VAT Act defines a supply of service to mean any supply which is not a supply of goods or money, including the performance of services for another person.

An imported service is one provided by a person normally resident outside Uganda who is not required to register for VAT in Uganda. According to regulation 14 of the VAT Regulations 1996, any person who imports a service into the country must account for VAT on such a service. The Regulations require the person importing the service to account for the VAT at the time when performance of the service is completed, or when payment for the service is made, or when the invoice is received from the foreign supplier, whichever is earliest.

The tax on such imported services is supposed to be computed at the rate of 18% of the cost of the service. VAT registered companies are required to prepare self-billed tax invoices to account for the input VAT. Further, if the importer of the services is not registered for VAT, the importer is required to calculate and pay the VAT to URA.

Although there is no effect on the cash flow position, preparation of a self-billed tax invoice is important as it is a requirement by law. Failure to do so is tantamount to lack of compliance with the law, and a penalty of 2% per month compounded may apply.

### *Stamp taxes*
Stamp duty is charged on a number of transactions at varying rates. Stamp duty is charged at 1% of the total value for a number of instruments, including hire purchase agreements, composition deeds, leases, exchange of property, conveyance, transfers, share warrants, gifts, and agreement relating to deposit of title deeds.

Stamp duty of 0.5% is incurred on formation of a company, capital-raising activities such as increase of share capital, debentures, equitable mortgages, and mortgage deeds.

Stamp duty of 1% applies on transfer of shares.

No stamp duty is charged on the increase of share capital where it is in fulfilment of a condition precedent for acquiring loan funds for a development project or where it is made on becoming public through the stock exchange.

Stamp duty of UGX 5,000 is also charged in a number of various other instruments.

### *Customs duties*
Many goods imported into Uganda are subject to customs duties. However, exemptions are available to various classes of plant and machinery imported into Uganda. The rates of duty are provided by the East African Community common external tariff code. Certain products imported from the East African Community and the Common Market for Eastern and Southern Africa (COMESA) region enjoys special custom duty rates. Imported items are classified according to the nomenclature established under the international convention on the harmonised commodity description and coding system. Duty's range from 0% to 60% depending on the item imported.

### *Excise taxes*
Excise duties are imposed on goods considered luxuriant. Examples include locally manufactured soft drinks, cigarettes, alcoholic drinks, and spirits. A schedule of some of the rates is provided below:

| Goods | Excise tax |
|---|---|
| Cigarettes | Between UGX 20,000 and UGX 50,000 per 1,000 sticks subject to the type of cigarette |
| Cigars and other smoking tobacco | 150% |
| Beer made from malt | 60% |
| Beer made from local raw material | 20% |
| Beer produced from barley grown and malted in Uganda | 40% |

| Goods | Excise tax |
|---|---|
| Spirits | 60% |
| Wine produced from local raw materials | 20% |
| Other wine | 70% |
| Air time | 12% |
| Fuel and oils | Between UGX 200 and UGX 720 per litre depending on the type of fuel/oil |

### *Property taxes*

Property taxes are administered by the local authorities. They are based on the value of the property as assessed by the local authorities.

### *Turnover taxes*

Every promoter of gaming and pools promoted within Uganda and every principal agent of a promoter of gaming and pools promoted outside Uganda is liable to tax at 15% of the total amount of money received or the total amount of bets.

A tax of 5% is charged on gross income earned by non-resident persons carrying on the business of transmitting messages by cable, radio, optical fibre, satellite, or provision of direct to home pay television services to subscribers in Uganda.

### *Environmental taxes*

Environmental levies are charged on every person who imports motor vehicles that are eight years old or older. Levies are also imposed on the importation of used household appliances. The levy on motor vehicles is 20% of the value of the vehicle as determined for customs duty purposes. Levies on electrical appliances range from UGX 20,000 to UGX 50,000 per item depending on the nature of the item.

## *Branch income*

Tax is imposed on the income of a non-resident company derived from running a branch in Uganda. The chargeable income of a branch in Uganda is taxed at the corporation tax rate of 30% after deduction of allowable expenses.

In addition to corporation tax, branches are subject to extra tax at a rate of 15% on any repatriated income for a year of income. The repatriated income is calculated using the A+(B-C)-D approach. Where A is the net assets at the beginning of the year, B is the net profit for the year, C is the tax charge for the year, and D is the net assets at the end of the year.

## *Income determination*

In arriving at chargeable income (taxable income) one has to go through the process of adjusting profits by taking into account deductions allowed and deductions not allowed.

### *Inventory valuation*

A taxpayer is allowed a deduction for the cost of trading stock disposed of during the year, which is determined by adding to the opening value of the trading stock the cost of trading stock acquired during the year and subtracting the closing value of stock. The opening value of the stock is the closing value for the previous year or, where the taxpayer commenced business during the year, the market value at the time of commencement of the business of the trading stock acquired prior to commencement. The closing stock valuation method is the lower of cost or market value. Trading stock is allowed to be valued using either the absorption costing or prime cost method. Stock valuation method once chosen may not be changed but only with written permission of the Commissioner.

### *Capital gains*
Capital gains are included in and taxed together with the business income at a rate of 30%. There is no separate capital gains tax. Capital gains arise on disposal of non-depreciable business assets as well as sale of shares.

### *Dividend income*
The general rule is that dividend income is taxable as part of business income at a rate of 30%. Dividend income is also subject to withholding tax (WHT) at the rate of 15%. The WHT paid in respect of the dividend income is creditable where the income is subject to the corporation tax rate of 30%. The WHT rate for dividend payments to resident persons is 15%. For dividends paid out by companies listed on the stock exchange to individuals, the rate is 10%.

Dividend income is exempt from tax if the recipient company directly or indirectly controls the paying company through ownership of 25% or more of the voting power of the paying company.

### *Interest income*
The general rule is that interest income is taxable as part of business income at a rate of 30%. Interest income is also subject to WHT at the rate of 15%. The WHT paid in respect of the interest income is creditable where the income is subject to the corporation tax rate of 30%. However, interest income earned by financial institutions with respect to agricultural loans is not subject to tax. Also, interest income earned by financial institutions with respect to government securities is subject to tax at 15% as a final tax.

### *Rental income*
Rental income for companies is included in gross income and taxed at the 30% corporate tax rate.

### *Foreign income*
Foreign income is taxable on resident recipients, and tax suffered in the country where it is sourced (if any) is creditable subject to the provisions of any double taxation agreements. This credit is limited to the amount of Ugandan tax payable on that income.

## *Deductions*

### *Deductibility of expenses*
The ITA sets out the following conditions for deductibility of an expense:

- There must be an expenditure or loss.
- The expenditure or loss must be incurred by a person during the year of income.
- The expenditure must be incurred in the production of income included in gross income.

No deduction is allowed for the following expenditures:

- Any expenditure or loss of a domestic or private nature.
- Any expenditure or loss of a capital nature.
- Any expenditure or loss recoverable under insurance contract or indemnity.
- Income tax payable in Uganda or in a foreign country.
- Any fine or similar penalty paid to a government or its sub-division for breach of any law.
- Any contribution or similar payment made to a retirement fund by the employee or for the benefit of any other person (e.g. National Social Security Fund (NSSF) contributions).
- Any premium or similar payment made in respect of a life insurance policy for the life of the person paying the premium or on the life of some other person.
- Any income appropriated to a reserve fund or capitalised in any way.
- The amount of pension paid to any person.

### *Accrued expenses*
A taxpayer who is accounting for tax purposes on an accrual basis derives income when it is receivable by the taxpayer and incurs expenditure when it is payable by the taxpayer.

An amount is treated as payable by the taxpayer when all the events that determine liability have occurred and the amount of the liability can be determined with reasonable accuracy, but not before economic performance with respect to the amount occurs. Economic performance occurs:

- with respect to the acquisition of services or property, at the time the services or property are provided
- with respect to the use of property, at the time the property is used, or
- in any other case, at the time the taxpayer makes payment in full satisfaction of the liability.

### *Contingent liabilities*
Contingent liabilities are not tax-deductible in Uganda.

### *Depreciation*
A deduction is allowed for the depreciation of the person's depreciable assets, other than minor assets, in accordance with the appropriate applicable rates. The ITA allows a taxpayer a deduction for the depreciation of their depreciable assets on a reducing balance basis. Depreciable assets are classified in four classes as follows:

| Class | Assets included | Rate of tax depreciation (%) |
|---|---|---|
| 1 | Computers and data handling equipment. | 40 |
| 2 | Automobiles, buses, and mini-buses with a seating capacity of less than 30 passengers; goods vehicles with a load capacity of less than 7 tonnes; construction and earth moving equipment. | 35 |
| 3 | Buses with a seating capacity of 30 or more passengers; goods vehicles designed to carry or pull loads of 7 tonnes or more; specialised trucks, tractors; trailer-mounted containers; plant and machinery used in farming, manufacturing, or mining operations. | 30 |

| Class | Assets included | Rate of tax depreciation (%) |
|---|---|---|
| 4 | Rail cars, locomotives, and equipment; vessels, barges, tugs, and similar water transportation equipment; aircraft, specialised public utility plant, equipment, and machinery; office furniture, fixtures, and equipment, and any depreciable asset not included in another class. | 20 |

### Initial allowance

Where a taxpayer places an item of eligible property into service for the first time during the year of income, they qualify for a tax deduction for that year of income which is equal to 75% of the cost of the asset if the property is put into use outside Kampala, Entebbe, Namanve, Jinja, and Njeru. However, if the property is put into use in the above named areas, the tax deduction is equal to 50%.

Eligible property is defined to mean plant and machinery wholly used in the production of income included in gross income but does not include goods or passenger vehicles; appliances of a kind ordinarily used for household purposes; or office or household furniture, fixtures, and fittings.

### Industrial building allowance

A company is eligible for an industrial building allowance on its industrial and commercial buildings at a tax rate of 5% per annum on a straight-line basis. The industrial building allowance will be granted on the actual cost incurred in constructing the buildings.

In addition to the above, a company is entitled to an initial allowance at the rate of 20% on an industrial building in the first year the building is put to use. The industrial building allowance is computed on the residual value after the initial allowance of 20%.

An industrial building is defined to mean any building which is wholly or partly used, or held ready for use, by a person in manufacturing operations, research and development into improved or new methods of manufacture, mining operations, an approved hotel business, an approved hospital, or approved commercial buildings.

### *Goodwill*

No tax deduction is allowed for goodwill in Uganda.

### *Start-up expenses*

A company setting up business for the first time or engaged in the initial public offer at the stock market will be entitled to a tax deduction for all its start-up costs that are of capital nature which would otherwise not be tax-deductible under the ordinary tax rules. The start-up costs will be allowed as tax-deductible costs over a period of four years at a straight-line basis at the rate of 25% per annum.

### *Bad debts*

A deduction is allowed for bad debts only if:

- the amount was included in the person's income in the year of income
- it is in respect of money that was lent in the ordinary course of business by a financial institution in the production of income, or

- the amount of the debt claim was in respect of a loan granted to any person by a financial institution for the purpose of farming, forestry, fish farming, beekeeping, animal and poultry husbandry, or similar operations.

For the bad debt to be deductible, the taxpayer must demonstrate to the URA that reasonable steps to collect the debt were taken and that the taxpayer failed to recover the debt. In relation to a financial institution, it should be a debt in respect of which a loss reserve held against presently identified losses or potential losses, and which is therefore not available to meet losses which subsequently materialise, has been made.

### *Interest expenses*
Interest is deductible if the interest is incurred in respect of a debt obligation by the company in the production of income included in the company's gross income. Interest arising from non-trade-related debt obligation is not deductible.

Interest charged before capital investment is put to use has to be capitalised. Interest incurred after capital investment is put to use is allowed as a deduction.

If the company is foreign controlled, then the interest arising from the loan in excess of two times the company's equity will not be allowed *(see Thin capitalisation rules in the Group taxation section for more information)*.

### *Meals, refreshments, and entertainment*
Expenses for meals, refreshments, and entertainment are deductible only where the value is included in the employment income of the employees or is excluded from employment income owing to the fact that it is provided on equal terms to all workers.

### *Charitable contributions*
Charitable donations are deductible if made to amateur sporting associations; religious, charitable, or educational institutions of public character; trade unions; and other similar associations which have been issued with a written ruling by the Commissioner currently in force stating that it is an exempt organisation. The donations should not exceed 5% of the person's chargeable income.

### *Pension expenses*
Employers are allowed a deduction for the contributions made to pension schemes on behalf of their employees. Employees, on the other hand, do not get a deduction for the contributions they make to pension funds.

### *Payment for directors*
Directors are treated as employees, so expenses incurred in respect of directors are deductible expenses.

### *Bribes, kickbacks, illegal payments*
Non-business expenses are not tax-deductible, including those of a private nature.

### *Net operating losses*
A deduction is allowed for any assessed tax losses carried forward from previous years of income. Such tax losses are carried forward and deducted against future taxable profit of the business in the subsequent years of income. The losses can be carried forward indefinitely. There is no ring-fencing of losses except in the following circumstances:

- Where, during a year of income, there has been a change of 50% or more in the underlying ownership of a company, as compared with its ownership one year previously, the company is not permitted to deduct an assessed loss in the year of income or in subsequent years, unless the company, for a period of two years after the change or until the assessed loss has been exhausted if that occurs within two years after the change:
  - continues to carry on the same business after the change as it carried on before the change and
  - does not engage in any new business or investment after the change where the primary purpose of the company or the beneficial owners of the company is to utilise the assessed loss so as to reduce the tax payable on the income arising from the new business or investment.
- In cases where losses relate to farming, the assessed farming loss can only be deducted from farming income of the taxpayer in the following year and not from any other income.

There is no provision for carryback of losses in Uganda.

### *Payments to foreign affiliates*
Payments to foreign affiliates are deductible as long as they are incurred in the production of income.

## *Group taxation*

There are no specific provisions in the law covering groups, so companies in a group do not get any special treatment for tax purposes in Uganda.

### *Transfer pricing regime*
Uganda does not have specific transfer pricing legislation. However, the anti-avoidance provisions contained in Sections 90 and 91 of the ITA require transactions between associates to be at arm's-length basis. These are the provisions that are often applied by the URA in instances where they are of the view that a non-resident person may be transferring profits from Uganda.

### *Thin capitalisation rules*
Where a company intends to finance some of its Uganda operations by use of foreign debt, the ITA provides for thin capitalisation rules in Uganda, and the safe harbour debt: equity ratio is 2:1.

The thin capitalisation rules are provided for in Section 89(1) of the ITA. According to this Section, where a foreign controlled resident company which is not a financial institution has a foreign debt to foreign equity ratio in excess of 2 to 1 at any time during that year of income, a deduction is disallowed for the interest paid by the company during that year on that part of the debt which exceeds the 2 to 1 ratio.

### *Controlled foreign company (CFC) regime*
Uganda does not have a CFC regime.

## Tax credits and incentives

### Foreign tax credit (FTC)

A resident taxpayer is entitled to FTC for any foreign income tax paid by the taxpayer in respect of foreign-source income included in the gross income of the taxpayer. The FTC allowed is subject to the income tax rate (i.e. 30%) in Uganda.

### Tax holidays for exporters

A tax holiday of ten years is available to exporters who export at least 80% of their produce of finished goods, subject to certain conditions.

### Scientific research expenditure, training expenditure, and mineral exploration expenditure

A 100% allowance is available for scientific research expenditures, training expenditures, and mineral exploration expenditures in the year of expenditure.

### Incentives for the importation of plant and machinery

Plant and machinery is exempt from customs duty and WHT on importation. Also a VAT deferral facility is available where VAT is deferred on importation of plant and machinery and subsequently waived upon approval by the relevant authorities.

### Employment incentives

A deduction of 2% of income tax payable is granted to any employer who can prove to the URA that at least 5% of their employees on full time basis are people with disabilities.

### Other incentives

- Income derived from agro processing is exempt from income tax, subject to certain conditions.
- Business income derived by a person managing or running an educational institution is exempt from income tax.
- New investors may be granted Investment Trader Status where they can claim their input VAT before they start to make taxable supplies. This is subject to certain conditions as specified by the VAT Act.

## Withholding taxes

According to Section 83(1) of the ITA, a tax is imposed on every non-resident person who derives any dividend, interest, royalty, rent, natural resource payment, or management charge from sources in Uganda. WHT at a rate 15% therefore applies on gross dividend payments, interest, management fees, and royalty payments in respect of non-treaty countries.

However, section 83(5) exempts interest paid by a resident company in respect of debentures, which:

- were issued by the company outside Uganda for the purpose of raising a loan outside Uganda
- were widely issued for the purpose of raising funds for use by the company in a business carried on in Uganda or the interest is paid to a bank or a financial institution of a public character, and
- the interest is paid outside Uganda.

A debenture is defined in the ITA as any form of debt, including debenture stock, mortgage stock, loan, loan stock, or any similar instrument acknowledging indebtedness, whether secured or unsecured. The term widely issued is also specifically defined.

### *Double taxation agreements (DTAs)*

A taxpayer may benefit from the provisions of a DTA that Uganda has with another country. Please find below a table showing the countries with which Uganda has DTAs and the applicable WHT rates on various categories of income.

According to section 88 (2) of the ITA, the terms of the international agreement to which Uganda is a party prevails over the provisions of ITA in case the terms of the international agreement are inconsistent with the provisions of the Act.

| Recipient | Dividend (%) | Royalty (%) | Management fees (%) | Taxation of branch profits (%) | Repatriation of branch profits (%) |
|---|---|---|---|---|---|
| Denmark | 15 | 10 | 10 | 30 | 15 |
| India | 10 | 10 | 10 | 30 | 15 |
| Mauritius | 10 | 10 | 10 | 30 | 15 |
| Netherlands | 15 (1) | 10 | 15 | 30 | 15 |
| Norway | 10 | 10 | 10 | 30 | 15 |
| South Africa | 10 | 10 | 10 | 30 | 15 |
| United Kingdom/ Great Britain | 15 | 15 | 15 | 30 | 15 |

Note

1. With respect to the Uganda/Netherland DTA, the rate applicable on dividends is 15% except where the investment is new or is an expansion of the current investment made after the DTA entered into (10 September 2006).

   For new investments and expansions of current investment, the rates are:
   - 0% if the beneficiary holds at least 50% of the shares in the company paying the dividends.
   - 5% if the beneficiary holds less than 50% of the shares in the company making the payment.

## *Tax administration*

### *Returns*

The ITA provides for two provisional returns within a 12-month period (financial year). The first provisional return is due within the first six months of the accounting year while the second is due by the end of the twelfth month of the accounting year.

The Self Assessment Return (SAR) is due by the sixth month after the end of the accounting year.

Electronic filing has been introduced for all tax returns.

### *Payment of tax*

For all companies, a system of provisional payments on account, based on estimated profits, is in place. The first payment of 50% is due in the sixth month of the accounting period and the second payment is due in the 12th month. The balance is expected to be paid together with the SAR.

### *Statute of limitations*
The ITA requires a taxpayer to maintain records for at least five years after the end of the year to which the records relate.

The VAT Act provides for records to be maintained for six years after the end of the tax period to which they relate.

### *Topics of focus for tax authorities*
The focus of the URA keeps shifting but is generally based on the risk analysis of the information availed to them. Currently, the focus is on transfer pricing.

## *Significant developments*

Ukraine continues developing its tax system. The new Tax Code took effect on 1 January 2011 (the corporate income tax entered into force on 1 April 2011) and introduced the following significant change.

### *Corporate income tax (CIT)*

As of 1 April 2011, the CIT rate has been reduced from 25% from 23%.

## *Taxes on corporate income*

CIT applies to taxable profits earned by resident entities in Ukraine and abroad and non-residents with a permanent establishment (PE) in Ukraine. Resident entities are taxed on their worldwide income. Non-resident entities are taxed on their Ukrainian-source income.

As of 1 April 2011, Ukraine's CIT has a uniform rate of 23% (25% prior to 1 April 2011). The rate will be reduced to 21% as of 1 January 2012, 19% as of 1 January 2013, and 16% from 1 January 2014 onwards.

No CIT is levied at the regional or local level.

A withholding tax (WHT) at a rate of 15% applies for the majority of income payments for non-residents, unless relief is given under a double taxation treaty (DTT). Ukraine has 68 effective DTTs in place. *See the Withholding taxes section for more information.*

### *Favourable tax regime for agricultural producers*

Agricultural producers are entitled to use a very favourable tax regime, provided certain requirements are met. The main criterion requires that income from the sale of their own agricultural products constitutes not less than 75% of their total gross revenue.

### *Reduced rates for insurance companies*

Reduced CIT rates of 0% and 3% are applicable for income of insurance companies in 2011 and the first quarter of 2012. Net insurance premiums (gross premiums less amounts paid to reinsurance companies) are taxed at 0% for long-term life insurance premiums and pension insurance premiums, and 3% otherwise. Profits earned by insurance companies from non-insurance activities are taxed at the standard rate.

## *Corporate residence*

Corporate residence is determined by the place of incorporation.

### Permanent establishment (PE)

The Ukrainian definition of a PE generally follows the PE definition in the Organisation for Economic Co-operation and Development (OECD) Model Tax Convention, but with a stronger agency tests.

In particular, a non-resident PE is defined as a fixed place of business through which the business activity of a non-resident entity is wholly or partly carried out in Ukraine. A PE includes, among other things, a place of management, affiliate, office, etc.

The Tax Code has introduced the concept of a service PE whereby the provision of services (apart from the provision of personnel), including consultancy services, by a non-resident through its employees or other personnel in Ukraine, shall constitute a Ukrainian PE of this non-resident, provided such activities (within the frame of one project) last more than six months in any 12-month period.

Moreover, a construction site in Ukraine may also give rise to a taxable presence of a non-resident in Ukraine in the form of PE, if the length of the construction activities exceeds six months.

The Tax Code has also assisted with the list of exclusions from the PE definition. In particular, auxiliary and preparatory services of a non-resident should not result in creating a PE for the non-resident.

In practice, the Ukrainian tax authorities usually interpret the term 'business activity' in a very broad sense, and, without DTT protection, may consider any type of activity as giving rise to a taxable presence (i.e. a PE) of a foreign entity in Ukraine.

## Other taxes

### Value-added tax (VAT)

There are two rates of VAT: 20% and 0%. The rate of 20% applies to almost all transactions subject to VAT except the export of goods and related services, which is taxable at 0%. The zero rate also applies to the supply of international transport services (confirmed by a single international shipping document) and toll manufacturing services.

Provision of services to a non-resident is not considered zero-rated. Such services are subject to 20% VAT or considered to be outside the scope of VAT (effectively exempt with no right to claim input VAT) depending on the place of supply.

Transactions that are subject to VAT include the following:

- The supply of goods and services when the place of supply is in Ukraine, including when the supply is made without consideration.
- The importation of goods and ancillary services (i.e. services costs which are included in goods customs value) into Ukraine.
- Exportation of goods.

Transactions that are not subject to VAT include (non-exhaustive list) the following:

- The issue, sale, and exchange of securities.

- The transfer of property from a lesser to a lessee under an operating lease and return of property upon expiration of the operating lease (other than in course of import operations).
- Interest/commission element of lease payments under financial lease agreements.
- Provision of financial loans and bank guarantees.
- Insurance and reinsurance services supplied by licensed insurers and services of insurance/reinsurance agents and brokers.
- Payment of royalties.
- Reorganisation of a legal entity (merge, spin-off, accession, division).
- Transit of cargo and passengers through Ukrainian territory.

### VAT registration

Tax registration as a VAT payer is compulsory if the volume of an entity's taxable transactions exceeds the compulsory registration threshold. The current registration threshold is 300,000 Ukrainian hryvnia (UAH) for the previous 12 months. An entity qualifying as a taxable entity should register with the tax authorities at the place of its location and obtain a VAT registration number. In addition, a voluntarily VAT registration is available if a person makes taxable supplies within 12 previous months and at least 50% of supplies is to VAT payers. There is no mechanism to register for a non-resident without PE in Ukraine. Accordingly, any Ukrainian VAT incurred by non-resident is non-recoverable.

### VAT recovery and refunds

Generally, VAT incurred by a registered entity on the purchase and/or importation of goods and services used for the purpose of its own business (except for VAT incurred in relation to exempt supply) may be recovered by way of a credit against output VAT. In case VAT credit exceeds VAT output for two months consecutively, VAT refund is available in form of cash payment or offset against future VAT liabilities (subject to certain rules and limitations).

In practice, obtaining a VAT refund is extremely difficult. As a one-time solution to the existing problem of VAT refunds, in 2010, the Ukrainian Ministry of Finance issued special VAT bonds in order to settle existing VAT refund debt of the government. The government is liable to the interest at 120% discount rate of the National Bank of Ukraine (NBU) charged on VAT that was not refunded within prescribed statutory terms. As of 2011, an automatic VAT refund procedure has been introduced for eligible exporters.

## *Stamp taxes*

Stamp duty is imposed on certain actions, including notarisation of contracts and filing of documents with the courts. In most cases, the amounts involved are nominal, although there are exceptions. Operations carried out at commodity exchanges and sales of real property attract a stamp duty of 1%.

## *Excise taxes*

Excise tax applies to certain goods imported into or produced in Ukraine. Excisable goods include alcoholic beverages, tobacco and tobacco products, cars and car bodies, as well as petrol and diesel fuel. Ukraine is currently experiencing a gradual augmentation of excise tax on tobacco goods, ethyl alcohol, and alcoholic beverages.

Rates of excise tax can be *ad valorem* (in percentage to the value of goods), specific (in monetary units per unit of goods' characteristic), or combined.

### Property taxes
There is no tax on commercial property in Ukraine (apart from the land tax).

### Customs duties
Import duty is payable by the importer when goods are imported into Ukraine and applies in accordance with the customs tariff. There are currently two rates of duty: relieved and full rates. Relieved rates of duty apply to goods originating from World Trade Organization (WTO) countries and countries which have granted Ukraine 'most favoured nation' trade status. Full rates of duty apply to goods originating from all other countries.

In addition to the reduced rates mentioned above, Ukraine has concluded free-trade agreements with Georgia, the Commonwealth of Independent States (CIS) countries, and Macedonia. Ukraine has also signed a free-trade agreement with the European Free Trade Association (EFTA) countries, although it is not yet in force. These agreements allow many goods to be imported into Ukraine duty-free, subject to compliance with preferential rules of origin. The 2000 CIS Rules for Determining Country of Origin are used to determine whether goods originate from a particular country to qualify for these duty exemptions.

The government is negotiating a free-trade agreement with the European Union, and the president has indicated that his goal is to have this signed in 2011.

Ukraine has no export duties except on natural gas, scrap metal, livestock, rawhide, and certain oil seeds. Recently, export duties were introduced on grain (wheat, maize, barley).

### Land tax
Land tax is assessed annually for the following year and is paid monthly in equal instalments by the owners or users of land. The rate of land tax depends on the category, location, and existence of the state valuation of each particular land plot.

### Special Pension Fund charges
The following special charges are payable to the State Pension Fund:

- 3% charge based on the transfer value of a car.
- 1% charge on the acquisition of real estate payable by individuals and legal entities that purchase real estate.
- 7.5% charge on mobile communication services.

There are also a number of other business activities that require contributions to be made to the Special Pension Fund.

### Charge on environmental pollution
Environmental pollution charges are imposed on any legal entity that discharges contaminants into the environment (air or water) or disposes of waste. The actual rate depends on the type and toxicity of each contaminant.

### Charge for subsoil usage
Companies engaged in extracting mineral resource in Ukraine, regardless of the form of their ownership, are liable to a charge for use of subsoil. For gas and gas condensate, the specific tax rates are applied to the volume of extracted mineral resources. The payments to be made are calculated as follows:

volume of extracted mineral resources * specific tax rate * coefficient

Separate rates of charge for use of subsoil apply to storage of oil and gas products (the amounts are immaterial).

Charges for the use of subsoil are deductible for CIT purposes.

### *Rental payments (oil and gas industry)*
Rental payments are to be made by the companies having the appropriate licenses authorising extraction of oil, gas, and gas condensate.

The tax base is calculated as the volume of extracted mineral resources multiplied by the tax rate. The adjusting coefficients apply to tax rates on rental payments for oil, gas condensate, and for natural gas other than that sold to the buyer authorised by the Cabinet of Ministers. Such coefficient is calculated by the Ministry of Economy (for oil and gas condensate) and the Ministry of Finance (for natural gas) for each reporting period.

Rental payments are deductible for CIT purposes. Product Sharing Agreements (PSA) covered by the Tax Code provide an exemption from these rental payments.

### *Other local taxes*
The Tax Code reduced the number of local taxes, which may be levied at the discretion of local authorities, from 14 to 4.

## *Branch income*

Domestic incorporated branches or other separate units are treated as separate taxpayers for CIT purposes. However, their head offices may pay consolidated CIT.

In Ukraine, it is not currently possible to register a branch of a foreign legal entity. A foreign company may set up a representative office in Ukraine, which is similar to an unincorporated branch. A non-resident company operating via a representative office is deemed to carry out business in Ukraine through a PE and may be subject to CIT at 23% (21% as of 1 January 2012) unless protected by a DTT. When a foreign company conducts business in Ukraine through a PE, taxable income should be determined on the same basis as for domestic entities. If the PE has no separate accounts, the taxable income may be determined as 30% of sale proceeds attributed to the PE.

Distributions made by a PE (out of after-tax income) to its head office should not trigger any further taxation in Ukraine, provided the head office is in a jurisdiction which has a DTT with Ukraine.

## *Income determination*

The Tax Code determines taxable profits as taxable income (items of income defined by the Tax Code) less deductible expenses (expenses allowed for deduction by the Tax Code), including depreciation charges. Taxable income includes any operational (business) income received or accrued within a reporting period (e.g. quarter) and other income, which includes generally passive and irregular receivables. Items of income are recorded when a legal title on goods is transferred or when a document confirming rendering of services is signed by parties.

### *Inventory valuation*
A taxpayer is entitled to adopt any of the methods of inventory valuation prescribed by the national accounting standards.

### *Capital gains on the sale of property*
Capital gains realised by the local entity on the sale of buildings are calculated as the difference between the sales price of the fixed asset and its net book value. Capital gains on the sale of land are computed as the difference between the sale price of land and adjusted purchase price of land.

### *Income from securities*
Income from securities is calculated separately from other income and is based on the so called 'pooling method'. Taxable income is determined by deducting the aggregate cost of acquiring each class of securities from the aggregate proceeds from selling such securities. If aggregate acquisition costs for the year exceed aggregate sales proceeds, the excess is carried forward and applied against sales of securities in subsequent years.

### *Dividend income*
Dividends received by a Ukrainian entity from another Ukrainian entity are exempt from CIT. Dividends received by Ukrainian companies from foreign companies controlled (at last 20% shareholding) by these Ukrainian companies (except for those having 'offshore status') are exempt from CIT.

Companies paying dividends are required to pay advance CIT at the standard rate, unless the dividends are paid to individuals or out of received dividends (with some other exceptions). The advance payment is used to meet subsequent CIT liabilities (other than for insurance companies). If the advance tax is not able to be used in the year the dividend is paid, it is carried over to future income years, but it cannot be refunded.

### *Interest income*
Interest received by taxpayers is included in their taxable income on a general basis.

### *Rent/royalties income*
Income from rent / royalties received by taxpayers is included in their taxable income on a general basis.

### *Foreign exchange gains/losses*
Amounts receivable or payable in foreign currency are recognised as taxable income or expenses at the official currency exchange rate at the date when either (i) they should be recognised under general rules of the Tax Code or (ii) they actually paid, whichever event occurs first.

Realised and non-realised foreign exchange gains/losses are generally treated as taxable/deductible. Foreign currency differences arising from unsettled debt balances and foreign currency account balances are computed according to the accounting standards.

### *Other income*
Ukrainian tax legislation does not provide special tax treatment for bribes, kickbacks, or illegal payments. However, any income, unless a specific provision in the law says otherwise, should be included in taxable income.

Funds or property returned to the holder of corporate rights issued by a legal entity after that entity's liquidation, but not in excess of the shares' par value, are not taxable.

Interest free loans from non-residents are taxable, unless they are received from shareholders for a period not exceeding 365 calendar days.

### *Foreign income*

Foreign income is taxed under general rules, and there are no special rules regarding anti-deferral or unremitted earnings.

## *Deductions*

Deductible expenses include any operational (related to the cost of goods/services sold) or other expense actually incurred or accrued in respect of the taxpayer's business, excluding non-allowable expenses specified by the Tax Code.

Generally, operational expenses are recognised at the date of income recognition from the goods/services sold; other expenses are recognised when they are actually incurred.

Examples of non-deductible items include the following:

- Expenses that are not supported by relevant documents (e.g. contract, voucher, receipt, cheque).
- Service fees paid to related entities, unless there is documentation to prove that the fees are paid in relation to services actually performed.
- Expenses relating to receptions, presentations, entertainment, sampling, and free of charge provisions of goods and services. However, advertising expenses are deductible according to the general rule.
- Costs of goods and services purchased from private entrepreneurs on a simplified tax system.
- Fees for consultancy, marketing, and advertising services, as well as royalties, paid to non-residents, are limited for deduction (up to 4% of net revenue separately for royalties and other services for the year preceding the reporting one, excluding VAT and excise). They are not deductible entirely if their recipient is not a beneficial owner or resident in an offshore jurisdiction. In addition, royalties paid to a person who shall not be taxed with regard to such royalty in the country of its residence or for intellectual property rights generated in Ukraine are also fully not tax deductible.
- Engineering fees payable to a non-resident are deductible only up to 5% of custom value of equipment imported under a related contract. The engineering fees are not deductible entirely if their recipient is not a beneficial owner or a resident in an offshore jurisdiction.
- Payments in respect of goodwill and amortisation of goodwill.
- Fines and penalties.
- Business trip expenses for individuals that are not employees or members of the taxpayer`s management/supervising bodies. Expenses of business trips for employees are deductible within the limits set by the Cabinet of Ministers of Ukraine.
- Expenses relating to the provision of employees with uniforms, safety clothes, and shoes, as well as food, if the amount exceeds the norms established by the Cabinet of Ministers of Ukraine.
- Banks will be entitled to a tax deduction of 20% of loan-loss provisions, excluding off-balance (including interest-accrued, fees, the amount of guarantees issued on the last business day of each tax period, and in respect of all securities). From 1 April 2011 to 1 January 2012, there will be a deduction limit of 30% on such provisions.

Other financial institutions are entitled to a deduction of up to 10% of all loan-loss provisions.

### *Depreciation and amortisation*
Assets costing more than UAH 2,500 (UAH 1,000 for 2011) and with a useful life exceeding one year are required to be depreciated. Depreciation is determined on a monthly basis and is computed using the following methods:

- Straight-line.
- Reducing balance.
- Method of accelerated reduction of a residual value.
- Cumulative.
- Production-based.

Fixed assets are divided into 16 groups according to their statutory minimal useful life. The useful life of the fixed assets may be extended by a tax payer.

Land value may not be depreciated unless the land plot is purchased together with a building (object of Group 1).

As of 1 January 2011, intangibles may be amortised according to the standard depreciation methods over the assets' useful economic lives as defined in documents certifying rights to the intangibles.

### *Organisational and start-up expenses*
Deduction of organisational and start-up expenses incurred prior to the entity registration is not explicitly allowed by the law.

### *Research and development (R&D) expenses*
R&D expenses other than those subject to amortisation are deductible when incurred, provided they are business-related.

### *Interest expenses*
Interest paid is generally deductible for CIT purposes if incurred for business needs. However, a limitation for deducting interest expense applies if at least 50% of the borrower's capital belongs to non-residents and the interest is payable to non-residents (and related entities) that have a holding on the borrower's capital. The same rule applies if the borrower is owned by tax-exempt entities and pays interest to them. The deductible interest paid to those persons and their related parties cannot exceed the amount of interest income derived plus 50% of the company's taxable profit (excluding interest income and before the deduction of interest). Any interest paid to affiliates in excess of this limit is carried forward to future tax periods.

### *Bad debt*
As of 1 April 2011, (subject to some transitional rules) the deduction for bad or doubtful debt is allowed if (i) the creditor applies to the court with a claim for debt collection or for initiating bankruptcy proceedings or (ii) the creditor has a note of execution for collection executed by a notary. The creditor which deducted the bad or doubtful debt must also reduce related deductions (deductions related to income recognised as the bad debt in creditor's accounts).

As of 1 April 2011, (with some transitional provisions) when a creditor pursues action to recover the debt, the debtor is required to adjust its deductions at the moment of

(i) taking effect of the court's decision or (ii) delivery of the note on debt collection by the notary.

### *Pension expenses*

The obligatory Ukrainian social security insurance contributions, including state pension contributions charged on payroll expenses, are deductible for employers. If an employer pays non-state pension contributions at its own expense, such contributions may be deducted in an amount not exceeding 25% of the total amount of payroll expenses accrued for a relevant employee during the tax year of the reporting tax periods in which such payments are incurred.

### *Payment for directors*

Payments (including bonuses) of a business nature are normally deductible payments, if properly structured.

### *Net operating losses*

Ukrainian tax legislation does not provide refunds for deductions. However, tax losses may be carried forward indefinitely. In the past, Parliament regulated specific losses that could be carried forward. For example, taxpayers were able to use only 20% of their losses on 1 January 2010 when paying tax under a return for the first quarter of 2010. No such restriction has been adopted for 2011.

Ukrainian tax legislation does not provide refunds for losses carried back.

### *Payments to foreign affiliates*

Payments of a business nature are normally deductible payments. When such payments are made to related parties, however, the payer is required to hold documentary evidence that the payments are for services actually rendered. The amount of the payment also may not exceed the 'usual' (market) price. Reimbursement of costs incurred by holding companies is directly prohibited for deduction.

Payments for goods or services, as well as interests, to foreign entities in listed jurisdictions operating offshore tax regimes (37 tax haven jurisdictions are listed by Ukraine's Cabinet of Ministers) are deductible at 85% of payments, unless evidence is held that the foreign entity is subject to the ordinary tax rules of the respective foreign jurisdiction (i.e. it does not benefit from the offshore tax regime).

## *Group taxation*

In Ukraine, each company is taxed individually. However, companies that have domestic unincorporated branches may pay consolidated CIT or as separate branches.

### *Transfer pricing regime*

Ukrainian transfer pricing regulations establish the principle of arm's-length pricing for transactions between related parties. Parties are 'related' if, among other things, one party controls, directly or indirectly, a shareholding interest representing more than 20% of the charter capital of the other party.

### *Thin capitalisation*

Ukraine does not have thin capitalisation rules as such. Instead, there are restrictions on related parties' interest deductibility rules. The interest paid to a related party (as defined in the Tax Code) is deductible within the amount of interest income plus 50% of the company's taxable profit (excluding interest income). Any interest paid to affiliates in excess of this limit is carried forward to future tax periods.

### *Controlled foreign company (CFC) regime*
There are no specific CFC rules in Ukraine.

### *Treatment of inter-company items*
Ukrainian tax legislation provides the following treatment for inter-company items:

- Dividends paid by Ukrainian companies are not tax deductible. Dividends received are not generally taxable.
- The payer of royalties is required to hold documentary evidence that the royalty payments are made for services actually rendered. The amount of the payment also may not exceed the 'usual' (market) price. Royalties paid to a non-resident are deductible only to 4% of net revenue. Royalties are completely non-deductible in respect of intangibles originated in Ukraine, paid to residents of the offshore jurisdictions, or paid to persons who are not beneficial owners.
- Expenses in relation to the financing of management bodies, including holding companies, are not tax deductible.
- Cost-sharing and similar intra-group payments, other than remuneration for services actually rendered, may not be deductible.
- Transactions of the receipt (provision) of financial aid between a taxpayer and its branches and other separate units without the legal entity status located in Ukraine shall not affect their taxable income or deductible expenses;
- Interest on loans is limited *(see Interest expenses in the Deductions section)*.

## *Tax credits and incentives*

Ukraine currently has very few tax incentives, although some are available. The following businesses are entitled to benefit from them:

- Income of publishing and agricultural entities may be tax exempt.
- Income received by investment funds is tax exempt.
- For enterprises selling domestically produced energy saving goods in Ukraine and enterprises adopting energy saving projects, up to 50% of profits may be exempt.
- As of 1 January 2010, a tax exemption is available for producers of electric and heat energy generated from bio-energy fuel as well as for producers of bio-energy powered domestic equipment. Tax incentives are also available for producers of gas (methane).
- Certain tax incentives are granted to the Union of European Football Associations (UEFA) and its companies during the hosting stage of 2012 UEFA European Football Championship in Ukraine and to specific segments of the tourism industry (including ten years of CIT exemption for 3, 4, and 5-star hotels).
- Light industry is tax exempt until 2021.

### *Foreign tax credit*
Tax residents are allowed a credit for foreign taxes paid on income received abroad, provided there is a DTT between Ukraine and the relevant foreign state. The amount of foreign tax credit is limited to the amount of Ukrainian tax that would arise from the equivalent income in Ukraine (i.e. maximum 23%, 21% as of 1 January 2012). To claim a tax credit, the taxpayer requires an official confirmation of payment issued by the relevant foreign tax authority.

### Tax holidays

Ukrainian tax legislation envisages tax holidays for small business, which are unlikely to impact international businesses.

## Withholding taxes

WHT must be remitted to the authorities no later than the date when the payment is made to the income recipient.

Passive income (dividends, interest, royalties) from Ukrainian sources that is paid to non-resident entities is generally subject to 15% WHT. Other payments, including payments for engineering services, lease payments, and agency and brokerage fees, are also subject to 15% WHT, but payments for most other services are not subject to withholding.

A 15% WHT applies to income on the sale of real estate and on profits from the sale of securities.

Payments for freight services (including sea freight) are subject to 6% WHT.

WHT rates may be reduced under a relevant tax treaty.

As of 1 January 2011, the Tax Code specifies that the non-resident recipient of income sourced in Ukraine must also be considered the beneficial owner of such income in order to benefit from reduced tax rates under relevant tax treaties. According to the 2011 Tax Code, agents, nominee holders, and other intermediaries in respect of received income cannot be beneficial owners of income sourced in Ukraine, and, therefore, are not entitled to favourable treaty provisions.

Payments to non-resident persons for advertising services are not subject to withholding. However, the resident payer is required to pay, from its own funds, a 20% tax based on the value of such services.

A resident payer is similarly required to pay, from its own funds, a 12% tax if a payment is made to a foreign insurer or reinsurer whose rating of financial reliability does not meet requirements set by the authorised state agency. A 0% rate applies otherwise.

As taxes on advertising and insurance are levied on a resident party, they cannot be relieved using a tax treaty.

Notes

1. The ownership threshold for the non-portfolio rate is 10%, 20%, 25%, or 50%, depending on the specific provisions in the treaty.
2. Several treaties contain a rate of 0% on interest paid to or guaranteed by a government or one of its agencies.
3. If more than one rate is shown, this means that the rate will depend on the type of royalties paid.
4. The lower rate applies to interest on current or deposit bank accounts, certificates of deposit until 1 January 2015.
5. The lower rate applies to interest paid on certain credit sales and on loans granted by a financial institution.
6. The treaties with Cyprus, Japan, Malaysia, and Spain were entered into by the USSR before it dissolved. Ukraine will continue to honour these treaties, unless they are superseded.
7. The lower rate applies to interest paid in connection with the sale on credit of any industrial, commercial, or scientific equipment, unless the indebtedness is between associated enterprises.
8. The 0% rate applies if the investor holds at least 50% of the capital of the company paying the dividends and the capital invested is at least USD 1 million; the payer of dividend should not operate in the field of gambling, show business or intermediation business, or auctions.
9. The 0% rate will apply if a French company or companies hold, directly or indirectly, at least 50% of the capital of the Ukrainian company, and the aggregate investments exceeds 5 million French francs.
10. The lower rate applies to interest paid on any loan granted by a bank.
11. The 0% rate applies if the investor holds directly at least 50% of the capital of the company paying the dividends, and the capital invested is at least USD 300,000.
12. The 10% rate applies if the company receiving the dividend has, for an uninterrupted period of two years before the dividend is paid, owned at least 25% of the capital stock of the company paying the dividends.
13. The 5% rate applies if the capital invested is at least USD 50,000.
14. The 0% rate applies if the Swedish company directly holds at least 25% of the voting power of the company paying the dividends and at least 50% of the Swedish company is held by Swedish residents.
15. The 0% rate applies only if the royalties are taxable in the United Kingdom.
16. The 15% applies to dividends from privileged shares or other fixed payments on shares, as well as to disguised employment income.

## Tax administration

### Returns

Tax returns must be filed by the taxpayer on a monthly (VAT) or a quarterly basis (CIT). Monthly tax returns are due within 20 calendar days following the end of the reporting month, and quarterly returns are due within 40 calendar days following the last day of the reporting quarter.

### *Payment of tax*
Taxes payable assessed on the basis of tax returns are due within ten calendar days following the deadline for filing of relevant tax returns.

### *Statute of limitations*
Under Ukrainian tax legislation, a three year statute of limitations applies on any outstanding Ukrainian tax liability, starting as from the date of a tax return is due to be filed. There is no limit on the period in which an assessment may be made if a taxpayer has deliberately evaded tax (if proven in court) or when a taxpayer fails to file a return.

### *Tax audits*
The tax authorities may carry out scheduled audits once a year. Taxpayers must be notified of the audit in writing at least ten days before the scheduled audit. In addition, the tax authorities may perform out-of-schedule audits in certain circumstances (e.g. if a taxpayer does not file tax returns on a timely basis or is reorganised or liquidated).

### *Penalties*
The tax authorities will charge significant penalties for late filing or understatement of tax liabilities. If a taxpayer fails to withhold tax when required, a penalty of up to 75% of the deficient tax is imposed.

## *Other issues*

### *Exchange controls*
The key issues regarding Ukraine's current exchange control regulations are as follows:

- Payments under foreign trade contracts between a resident and a non-resident entity should be in foreign currency only.
- Payments in foreign currencies between residents in the territory of Ukraine are generally prohibited.
- Salaries to Ukrainian staff must be paid in Ukrainian currency (but expatriate employees can be paid in hard currency).
- Foreign loans must be registered with the NBU before funds are remitted to Ukraine. The NBU has reinstated a maximum interest rate and other charges that may be applied to foreign currency loans obtained from non-residents.
- The maximum allowable interest rates for foreign fixed rate loans in hard currency (inclusive of any fees and charges due under the loan agreement) are 9.8% per annum for loans up to one year; 10% per annum for loans for one to three years; and 11% per annum for loans over three years. For loans with floating interest rates, the maximum allowable interest rate is three months of USD LIBOR plus 7.5%.
- Proceeds from exports must be credited to the exporter's Ukrainian bank account within 180 days from the date of customs clearance (for goods) or date of services delivery. Similarly, prepaid goods must be imported and cleared through customs within 180 days of payment. Failure to do so results in a fine of 0.3% of the amount due or paid for each day of delay.

Payments by Ukrainian business entities for services rendered by non-residents for amounts exceeding EUR 100,000 (annually) require confirmation from the Foreign Markets Monitoring Centre (FMMC) that the fee for the services does not exceed market prices. Provided the relevant documentation is in place, this should not delay payments. However, the process cannot be taken lightly. If the FMMC rejects an application, no payment will be permitted.

A number of foreign currency transactions may be undertaken only if an individual licence has been obtained from the NBU.

### *Choice of business entity*
Generally, a limited liability company is the most widely used corporate vehicle in Ukraine for both residents and non-residents. A limited liability company has simple registration procedure, is inexpensive, and is easy to maintain. It also provides more flexibility in terms of repatriating dividends from Ukraine.

### *Business and tax treatment of intellectual property*
Ukrainian laws concerning intellectual property rights provide for a rather developed background for intellectual property usage. Economic rights of authors and neighboring rights owners may be assigned or licensed. Moral rights are not transferable. However, in the field of enforcement and tax and court practice, there is an enormous lack of practical experience.

Tax treatment for intellectual property transactions is subject to separate analysis on case-by-case basis, as the Ukrainian tax legislation provides different approaches depending on the nature of the agreement concluded. For instance, the transfer of intellectual property may be treated as its sale, provision of services, or royalty agreement.

### *Mergers and acquisitions (M&A) from a business and tax perspective*
There are no specific laws regulating public takeovers and mergers in Ukraine.

The global financial crisis significantly affected M&A transactions in Ukraine. However, M&A activity in the Ukrainian market is gradually increasing now, especially in the view of an announced programme of economic reform which includes the privatisation of Ukraine's regional power grid companies.

The Ukrainian Tax Code provides some guidance on the tax regime of corporate mergers and acquisitions that is generally favourable for M&A transactions. However, no VAT refund in cash will be available in 12 months after transaction. Also, no deduction of tax losses is available if the acquired entity was a related party to an acquirer for less than 18 months.

## *Significant developments*

There is a growing trend of tax reforms in the Middle East region and this may result in changes to the tax laws in the United Arab Emirates (UAE).

In particular, the United Arab Emirates (along with the other Gulf Cooperation Council or GCC states) has committed to introduce a value-added tax (VAT) system. The UAE government has made significant progress towards the introduction of VAT; however, there is no formal legislative announcement yet on its introduction.

Advice should therefore be sought to confirm the current status of the UAE tax laws and reforms.

## *Taxes on corporate income*

The United Arab Emirates is a federation of seven emirates: Abu Dhabi, Dubai, Sharjah, Ajman, Umm Al-Qaiwain, Ras Al-Khaimah, and Fujairah. Currently, the UAE federation does not impose a federal corporate income tax in the emirates. However, most of the emirates introduced income tax decrees in the late 1960s, and taxation is therefore determined on an emirate by emirate basis.

Under the emirate-based tax decrees, corporate income taxes (CIT) may be imposed on all companies (including branches and permanent establishments) at rates of up to 55%. However, in practice CIT is currently imposed only on branches of foreign banks and companies which produce, trade in, or trade in rights over oil, gas, or other hydrocarbon products (i.e. oil & gas companies) having operations in the emirate.

In addition, some of the emirates have introduced their own specific banking tax decrees which impose tax on branches of foreign banks at the rate of 20%.

## *Corporate residence*

Tax residence under the tax decrees of the various emirates is based upon the French concept of territoriality. Basically, the French territoriality concept taxes profits based on territorial nexus, rather than taxing profits earned outside the country.

### *Permanent establishment (PE)*

For non-resident companies, the CIT liability will also depend on the existence of any kind of PE. Most of the emirate tax decrees include a definition of a PE that generally includes a branch, management or other fixed place of business, and presence through an agent that has and habitually exercises authority to conclude contracts on behalf of such corporation. The definitions need to be considered individually under the applicable tax decree.

## Other taxes

### Value-added tax (VAT)

The United Arab Emirates does not currently operate a VAT regime. However, the United Arab Emirates has made significant progress towards its introduction, and it is known that the introduction of a VAT is expected in the near future.

### Municipal tax

Most emirates impose a municipality tax on properties, mostly by reference to the annual rental value. It is generally the tenants' obligation to pay the tax; however, the tenants' employer will typically pay the tax on behalf of the employee. In some cases, separate fees are payable by both tenants and property owners. For example, in Emirate of Dubai, it is currently imposed at 5% of the annual rental value for tenants or for property owners at 5% of the specified rental index.

Further, a land registration fee may also be levied on transfer of ownership of land or property. For example, a land registration fee is levied in the Emirate of Dubai at a rate of 2% of the sale value of the property (shared between the buyer and seller), payable to Dubai Land department.

These levies are imposed and administered differently by each emirate.

### Customs and excise duties

Generally, a customs duty of 5% is imposed on the cost, insurance, freight (CIF) value of imports. Other rates may apply to certain goods such as alcohol and tobacco, and certain exemptions may also be available.

Currently, there are no separate excise taxes levied in the United Arab Emirates.

### Hotel tax

Most emirates impose a hotel tax of 5% to 10% on the value of hotel services and entertainment.

## Branch income

As each emirate has a different CIT decree, the decree of each emirate must be consulted to determine the treatment of branches of foreign corporations.

In certain emirates, branches of foreign banks are governed by special banking tax decrees where they are taxed at 20% of their adjusted taxable income.

## Income determination

The tax decrees of the various emirates levy taxation on financial accounting profits. The tax decrees may provide for additional adjustments in specific situations. Currently, these adjustments may not be too relevant given that CIT is not imposed for most companies (except for oil & gas companies and branches of foreign banks having operations in the emirate) in the United Arab Emirates.

## Deductions

Deductions are determined based on accounting principles and the tax decrees of the various emirates. Currently, these deductions may not be too relevant given that CIT is not imposed for most companies (except for oil & gas companies and branches of foreign banks having operations in the emirate) in the United Arab Emirates.

## Group taxation

The United Arab Emirates does not currently permit group taxation.

## Tax credits and incentives

The United Arab Emirates offers numerous incentives in the form of tax holidays/ exemptions, including offering a range of free trade zones.

### Free trade zones (FTZs)

Currently, there are over 30 FTZs (and business parks) in the United Arab Emirates, each having its own regulations. Businesses (and their employees) established in FTZs are generally eligible for guaranteed tax holidays for ten to 50 year (renewable) periods. The FTZs also offer exemption from customs duties. The laws granting these holidays and exemptions are not consistent among the various FTZs, and each FTZ therefore needs to be considered separately.

## Withholding taxes

There are currently no withholding taxes in the United Arab Emirates.

### Tax treaty network

Taxpayers resident in the United Arab Emirates have access to an extensive tax treaty network. These treaties may not be immediately relevant for UAE withholding taxes (which are not imposed under the UAE tax decrees); however, they may continue to allow for other beneficial tax provisions (e.g. right to tax in the other treaty country). For completeness, the treaties currently in force are listed below. A number of other treaties are at various stages of negotiation.

| Recipient | Dividends (%) | Interest (%) | Royalties (%) | In force |
|---|---|---|---|---|

## Significant developments

Several notable changes to the United Kingdom's (UK) corporate tax system have been made in the past year. The government has also announced a number of reform measures for corporation tax, together with a programme of future changes and consultations, including a roadmap of how reform will develop in the next five years. The overall aim is to improve the international tax competitiveness of the UK economy by reforming four main areas:

- Rate of corporation tax.
- The corporate tax base.
- Policy making.
- Administration and collection.

Because the UK legislative process can lag behind the announcement of proposals, certain changes are already law, others are very likely, or practically certain, to become law, whilst others are issues announced for wider consultation and future enactment into law.

Significant measures introduced and fully enacted in law which have full impact in 2010 and 2011 include a reduction in the rates of corporation tax, the introduction of a debt cap, commencement of the dividend exemption regime, and the introduction of a bank levy with effect from 1 January 2011. Reductions in rates of capital allowances (tax depreciation) from April 2011 are practically certain to be implemented. These changes and areas of future reform and consultation are discussed below.

### Changes that have taken effect in the past year

Following consultation on the taxation of foreign profits, a package of complex and far reaching measures was introduced in 2009 and impacts UK inbound, outbound, and purely domestic businesses through 2010 and 2011 and beyond. It comprises:

- a tax exemption for most non-UK dividends and other distributions (as well as for UK dividends) received on or after 1 July 2009
- the introduction of a 'debt cap' restricting UK tax deductions for finance costs to the level of a group's external finance expense, which applies to amounts payable in accounting periods beginning on or after 1 January 2010, and
- the abolition of certain controlled foreign company (CFC) exemptions for accounting periods starting on or after 1 July 2009, subject to transitional provisions (a fundamental overhaul of the CFC regime is under consideration and the subject of further consultation, *see below*).

Simplification of certain elements of the corporate capital gains regime has been introduced and will almost certainly be effective from July 2011. These elements include reducing the impact of degrouping charges (by election, a group can take advantage of these changes from 1 April 2011), and facilitating group reorganisations and other corporate transactions.

A new bank levy has been introduced from 1 January 2011 (subject to formal legislative process and approval which is almost certain to complete) and will take the form of an annual tax on certain liabilities of most UK based banks and building societies. The tax will be levied at the following rates:

- January and February 2011: 0.05% of a bank's short-term relevant liabilities, and 0.025% of long term equity and liabilities.
- March and April 2011: 0.1% of a bank's short-term relevant liabilities, and 0.05% of long term equity and liabilities.
- 1 May 2011 to 31 December 2011: 0.075% of a bank's short-term relevant liabilities, and 0.0375% of long term equity and liabilities.
- From 1 January 2012: 0.078% of a bank's short-term relevant liabilities, and 0.039% of long term equity and liabilities.

The bank levy will not be deductible for corporation tax purposes. The form of the levy is similar to arrangements being implemented in other countries.

Changes tightening the Disclosure of Tax Avoidance Schemes (DOTAS) (or Tax Avoidance Disclosure (TAD)) regime have been enacted with effect from 1 January 2011 and require both earlier and quarterly disclosures.

Employer's national insurance contributions (NICs) increased by 1% to a maximum of 13.8% from 6 April 2011. *(Employee's NICs also increased from the same date; details are given in the Individual Tax Summaries)*.

The main corporation tax rate was reduced from 28% to 26% from 1 April 2011, see below.

### *Changes enacted but not yet in force*
The Finance Bill (March 2011) changed the main rate of corporation tax from 28% to 26%, and reduces the small profits rate from 21% to 20%, both effective 1 April 2011. Further reductions were announced but these have not yet been enacted (see below). Before March it had been announced that the rate would fall in April 2011 from 28% to 27%, but in his budget the Chancellor announced a further reduction to 26%.

There are firm proposals - very likely to be enacted but not yet law - such that:

- the main rate of corporation tax, currently 26% from 1 April 2011, will fall by a further 1% each year until it reaches 23% on 1 April 2014
- effective for years ending on or after 1 April 2012, the main rates of capital allowances (in effect, statutory depreciation rates) will be reduced; the general rate for plant and machinery will be reduced from 20% to 18% per annum, and the rate for long-life and special plant from 10% to 8% per annum
- the introduction, from 6 December 2010 of a principles-based rule to neutralise any UK tax advantage that arises as a result of financial 'group mismatches', i.e. where intra-group financial transactions are treated differently for tax purposes in the individual group members concerned, and
- the 2% 'entry charge' for property businesses wishing to convert to the tax advantaged regime for Real Estate Investment Trusts (REITS) will be abolished from April 2012.

### *Consultations and proposals - ongoing*
There are a number of announced proposals for future reform, on which consultations are currently in progress, most significantly:

- measures to tackle tax avoidance, including consultation on the introduction of a general anti-avoidance rule (GAAR)
- the simplification of reliefs and allowances
- a review of corporation tax to establish a broad tax base, a low rate and a more territorial approach
- a new approach to policy making and consultation
- reform of the complex CFC regime, with major reform anticipated to be effective from 2012, so that most genuine overseas businesses will be exempt from the CFC charge
- reviewing the UK taxation of foreign branches, which it has now been announced will be conducted alongside the reform of the CFC rules. In particular, it is proposed that profits of foreign branches of UK groups can be elected out of UK corporation tax
- a refocussing of research and development (R&D) tax credits on hi-tech companies, small firms and start-ups, and
- the introduction of a reduced 10% rate of corporation tax on UK patent income from April 2013 - otherwise to be known as the UK 'patent box'.

In addition, the Government has also put taxpayers on notice that it is keeping under review whether to introduce an extension to the 'unallowable purpose' anti-avoidance rule for loan relationships and derivative contracts, along the lines of the measure it proposed as part of the package of measures arising from the taxation of foreign profits consultation but did not enact.

The European Union is presently working towards a Common Consolidated Corporate Tax Base to harmonise the corporate tax base (but not corporate tax rates) across the EU. It is not clear whether the UK will adopt this, nor when it will impact.

## *Taxes on corporate income*

### *General corporation tax rates*
The normal rate of corporation tax is 26% for the year ending 31 March 2012 (it had already been announced that the rate would fall by 1%, but in March 2011 the Chancellor doubled the decrease to 2%). The rate for the year ending 31 March 2011 was 28%, which had been the rate since 1 April 2008, before which it was 30%. This main rate applies to companies with profits in excess of 1,500,000 pounds sterling (GBP). This rate will fall to 25% from 1 April 2012, followed by a 1% reduction each year to 2014. It is proposed (and likely to be enacted) that the prevailing rate from 1 April 2014 will be 23%. For UK resident companies with tax-adjusted profits below GBP 300,000, a lower rate is generally applicable. This small profits rate is 20% from 1 April 2011 (21% to 31 March 2011). For companies with tax-adjusted profits between GBP 300,000 and GBP 1,500,000, there is a sliding scale of tax rates. For corporate entities with associated companies, both profit limits are divided by the number of active companies worldwide.

### *Special corporation tax regimes*
There are no special rates for, for example, financial concerns or manufacturing groups; in general all companies in all sectors are subject to the same corporate tax rates. There are however two exceptions to this general rule.

Profits which arise from oil or gas extraction, or oil or gas rights, in the UK and the UK Continental Shelf ('ring-fence profits'), are subject to tax in the UK in accordance with rates applicable in 2006, i.e. a full rate of 30% and a small companies' rate of 19%. It should also be noted a supplementary tax charge of 32% (increased from 20% from 24 March 2011) applies to 'adjusted' ring fence profits in addition to normal corporation tax.

Life insurance businesses are also taxed under a special regime, which effectively includes different corporate tax rates as well as special rules for quantifying profits.

### *Petroleum revenue tax (PRT)*
A tax of 50% is levied on profits accruing from oil and gas extracted in the United Kingdom and in the UK territorial sea and continental shelf in respect of fields given development consent before 16 March 1993. PRT has effectively been abolished, together with associated relief and allowances, for fields that received development consent after 15 March 1993. PRT paid is deductible in computing corporation tax on the company's total profits.

### *Income tax for companies*
A non-resident company is subject to UK corporation tax only on the trading profits of a UK permanent establishment (*as discussed further in the Corporate residence section*). Any other UK source income received by a non-resident company is subject to UK income tax at the basic rate, currently 20%, without any allowances (subject to any relief offered by a double tax treaty if applicable). This charge most commonly arises in relation to UK rental income earned by a non-resident landlord (NRL). The UK therefore operates a NRL Scheme which requires the NRL's letting agent or tenants to withhold the appropriate tax at source unless they have been notified that the NRL has applied and been given permission to receive rents gross.

### *Local taxes*
There are no local or provincial taxes on income.

Local taxes (known as 'rates') are levied on the occupiers of business property by reference to the property's deemed rental (or 'rateable') value, subject to certain reliefs. The amounts paid are deductible for corporation tax purposes, provided they meet all the usual requirements for deductibility.

## *Corporate residence*

### *Basic rules*
UK incorporated companies are generally treated as UK resident. However, companies resident in the United Kingdom under domestic law, but treated as solely resident in a different country under that country's double taxation treaty with the United Kingdom, are not treated as UK resident for the purposes of UK domestic tax law.

Additionally, subject to the above exception, companies incorporated overseas are also treated as UK resident if their central management and control is situated in the UK. That is, if the place of the highest form of control and direction over a company's affairs, as opposed to decisions on the day-to-day running of the business, is in the UK.

### *Direct tax liability*
Tax residence is important because resident companies are taxable in the UK on their worldwide profits, while non-resident companies are subject to UK corporation tax

only on the trading profits attributable to a UK permanent establishment (PE), plus UK income tax (generally by way of withholding, though this is not the case with UK source rental profits) on certain UK source income.

For non-resident companies, the liability to corporation tax depends on the existence of any kind of PE through which a trade is carried on. The meaning of PE for UK tax purposes is set out in statute; it is largely based on the OECD Model Tax Convention definition, but is not identical in all respects. Subject to the terms of the relevant double taxation agreement, a non-resident company will have a PE in the UK if it either:

- has a fixed place of business in the UK through which the business of the company is wholly or partly carried on, or
- an agent acting on behalf of the company has and habitually exercises authority to do business on behalf of the company in the UK.

A fixed place of business includes (but is not limited to) a place of management, a branch, an office, a factory, a workshop, an installation or structure for the exploration of natural resources, a mine, oil or gas well, quarry or other place of extraction of natural resources, or a building or construction or installation project. A company is not however regarded as having a UK PE if the activities for which the fixed place of business is maintained or which the agent carries on are only of a preparatory or auxiliary nature (also defined in the statute).

Rules exist to explain how the PE's profits should be evaluated for UK tax purposes. Financing arrangements between the branch and head office must be disregarded and there are special rules for banks to stop under-performing loans being allocated to the UK branch in a way that is considered unacceptable and similar potential manipulations. However, a deduction is given for a proportion of head office costs.

Where a non-resident company is liable to UK income tax on non-trading income, otherwise than by way of withholding tax (which, because of rules limiting such liability, almost always means tax on UK net rental income), that tax can only be charged at the basic rate of income tax, currently 20%; companies cannot be charged to tax at the much higher rates which can be applied to individuals.

## *Other taxes*

### *Value-added tax (VAT)*

The standard rate of 20% applies to most goods and services, apart from domestic fuel and power, and certain other reduced-rate supplies, which are subject to VAT at 5% (note that the standard rate was increased from 17.5% with effect from 4 January 2011).

Most exports, most food, most public transport, books and publications, and certain other essential goods and services are zero-rated. Some supplies are exempt, the main categories being the grant of certain interests in land, insurance, financial services, betting and gaming, education, certain sports services, cultural services, and health and welfare. Zero-rating is preferable to exemption, because the VAT on costs incurred in making a zero-rated supply can be recovered, while that incurred in making an exempt supply cannot.

VAT is chargeable on the supply of most goods and services made in the UK by 'taxable persons' in the course of business, when their taxable turnover exceeds the registration thresholds. Taxable persons include individuals, companies, partnerships, clubs, associations, or charities.

Taxable persons who are not normally resident in the UK, and do not have a business establishment in the UK and, in the case of companies, are not incorporated in the UK, but who make taxable supplies, sales to unregistered persons in the UK, or acquisitions of goods in the UK above the relevant limits, may be required to register and account for VAT here.

If the value of taxable supplies is over a specified limit, registration for VAT is compulsory unless the taxable supplies made are wholly or mainly zero-rated, in which case it is possible to apply for exemption from registration. The Government announced in Budget 2011, that it plans to introduce a zero VAT registration threshold for businesses not established in the UK.

The rules applying to VAT and territoriality are different to those applying to direct tax in that they derive from the principles of the place of supply in EU law, as enshrined in EC VAT Directives. Having determined that a supply of goods or services has taken place, the second condition to be determined, if the transaction is to fall within the scope of UK VAT, is whether the supply takes place within the UK. The place of supply rules are different for goods and for services. A person or business belonging outside the UK, with no place of business here may nevertheless be liable to UK VAT registration where the place of supply of those goods or services is in the UK.

From 1 January 2010, for services, the basic rule is that services are treated as made where the customer ‘belongs’ or is established for VAT purposes, and the customer is responsible for accounting for the VAT due via the reverse charge procedure. However, this is subject to a number of special rules and exceptions. Determining where a business is established for VAT purposes is based on EU law criteria. From 1 January 2010, for business to consumer (B2C) supplies, the basic rule is that services are treated as made where the supplier ‘belongs’ or is established for VAT purposes. For goods, the basic rule is that a supply of goods is taxable in the territory where those goods are physically located at the time of supply. Hence if goods are supplied in the UK by a non-established taxable person there will still be a liability for VAT purposes and the person must register for VAT in the UK if the taxable supplies exceed the current UK VAT registration thresholds.

### *Customs and excise duties*

Many goods imported into the UK from outside the European Union are subject to customs duties. The rates of duty are provided by the EU’s Common Customs Tariff and vary widely.

Excise duties are chargeable on most hydrocarbon oil products, alcoholic drinks and tobacco products imported into or produced in the UK. Purely as examples, most road fuels carry a duty of about GBP .58 per litre, cigarettes duty of about GBP 154 per thousand (plus 16.5% of the retail price), tobacco of about GBP 151 per kg, most wines of about GBP 2.41 per litre, and spirits of about GBP 25 per litre of pure alcohol included.

### *Insurance premium tax (IPT)*

IPT at the standard rate of 6% applies to premiums for most general insurance, such as for buildings and contents and motor insurance, where the insured risk is in the UK (note that the standard rate was increased from 5% from 4 January 2011). Life assurance and other long term insurance remain exempt, though there are anti-avoidance rules surrounding long term medical care policies. As an anti-avoidance measure, a higher rate of 20% applies to insurance sold by suppliers of specified goods or services, e.g. mechanical breakdown insurance, travel insurance (irrespective of supplier), insurance sold with TV and car hire, and 'non-financial' guaranteed asset protection (GAP) insurance sold through suppliers of motor vehicles or persons connected with them. Further anti-avoidance rules were introduced with effect from 9 December 2009 affecting administration or similar fees connected with contracts of insurance, charged under separate contracts by brokers and other intermediaries (note that the higher rate was increased from 17.5% from 4 January 2011).

### *Airport passenger duty*
Individuals leaving the UK by air are obliged to pay a duty, which in practice is invariably included in the cost of the air ticket. Rates of duty are based on a system of geographical banding and class of travel, ranging from a reduced rate of GBP 12 for short haul destinations in the lowest class of travel, to GBP 170 for long haul destinations in higher classes of travel.

### *Environmental taxes*
There are several environmental taxes as below, that is, 'landfill tax,' 'climate change levy' and 'aggregates levy'.

#### Landfill tax
This is a tax on waste disposal in landfill sites. The standard rate from 1 April 2011 is GBP 56 per tonne, increasing to GBP 64 per tonne from 1 April 2012. The reduced rate for inert waste is GBP 2.50 per tonne.

#### Climate change levy
This is a tax on energy used in the UK such as electricity, gas, coal and so on, and is charged at rates that depend on the nature of the fuel used. There are reduced rates and exclusions from the charge, for example, supplies to domestic or charitable users and to those who carry out specific energy-saving measures.

#### Aggregates levy
This tax is levied on the extraction or importation of sand, gravel and crushed rock for commercial exploitation in the UK. The rate of tax is GBP 2.00 per tonne from 1 April 2010, increasing to GBP 2.10 per tonne from 1 April 2012.

### *Stamp taxes*
Stamp duty is charged at 0.5% on instruments effecting sales of shares. Agreements to sell shares usually attract stamp duty reserve tax (SDRT) at 0.5%. The liability to SDRT may be cancelled by paying the stamp duty due on a stock transfer form (or other transfer instrument) executed in pursuance of the agreement. Stamp duty is not usually charged on an issue of shares, but is charged at a higher rate of 1.5% on an issue of shares in bearer form. Issues or transfers of shares to clearance services or depositary receipt systems attract SDRT at 1.5%. (Stamp duty at 1.5% may be payable on instruments effecting transfers of shares to such services or systems.) However, following a European Court of Justice ruling in 2009, the 1.5% SDRT charge is no longer collected in respect of an issue of shares (or transfer of newly issued shares) where the clearance service or depositary receipt system is based within the EU. Furthermore, there are arguments that the 1.5% SDRT charge in the context of issue of shares to systems based outside the EU and transfers of shares to these systems are not lawful. This is the subject of ongoing litigation in the UK and those potentially affected are advised to seek specific advice.

Transfers of land and buildings are charged to stamp duty land tax at graduated rates up to 4% (5% for residential property from 6 April 2011). Grants of new leases are charged to stamp duty land tax at 1% of the net present value of the rents payable in excess of GBP 150,000 plus up to 4% (or 5% for residential property from 6 April 2011) on any premium paid.

### *Employers' national insurance contributions*
Employers are obliged to pay national insurance contributions based on a percentage of each employee's earnings. For the year ending 5 April 2011, the rate is 13.8% on all earnings above GBP 136. There is some reduction for employees 'contracted out' of the state pension scheme into a private scheme.

### *Local municipal taxes*
Local taxes are not based on income, but rather are levied on the occupiers of business property by reference to a deemed annual rental value for the property concerned. These taxes are administered by regional local government authorities rather than central government.

### *Pension Protection Fund Levy*
All defined benefit pension schemes pay a levy, based on pension fund liabilities and the financial risk of the employing company. This levy funds a compensation fund for pensioners and employees of failed schemes.

### *Bank levy*
A new bank levy has been introduced from 1 January 2011 (subject to formal legislative process and approval which is almost certain to complete) and will take the form of an annual tax on certain liabilities of most UK based banks and building societies. The tax will be levied at the following rates:

- January and February 2011: 0.05% of a bank's short-term relevant liabilities, and 0.025% of long term equity and liabilities.
- March and April 2011: 0.1% of a bank's short-term relevant liabilities, and 0.05% of long term equity and liabilities.
- 1 May 2011 to 31 December 2011: 0.075% of a bank's short-term relevant liabilities, and 0.0375% of long term equity and liabilities.
- From 1 January 2012: 0.078% of a bank's short-term relevant liabilities, and 0.039% of long term equity and liabilities.

The bank levy will not be deductible for corporation tax purposes. The form of the levy is similar to arrangements being implemented in other countries.

## *Branch income*

### *Basic rules for UK branches*
Tax rates on the profits of permanent establishments (PE) are the same as for domestic corporations, except that the small profits rate is not available to non-UK resident corporations unless under the terms of a double taxation treaty.

There are specific rules setting out how the PE's profits should be evaluated for UK tax purposes, which broadly seek to treat the business as if it were a stand alone company. Financing arrangements between the branch and head office must be disregarded and there are special rules for banks to stop under-performing loans being allocated to the UK branch in a way that is considered unacceptable and similar potential manipulations. However, a deduction is given for a proportion of head office costs.

No tax is withheld on transfers of profits to the head office.

### *UK companies' branches*

The UK taxes on a worldwide basis, so non-UK branch profits are computed and taxed in the normal way for UK tax resident companies. However, UK tax will generally be reduced by credit for local direct taxes paid, either under a treaty or via the UK's unilateral relief rules.

*As noted in the Significant developments section*, this is likely to change drastically in 2011 or 2012. Draft legislation published in December 2010, if enacted, will broadly exempt from UK tax overseas branch profits other than from insurance, shipping and aircraft operations, and most investment activity; the exact scope of the new regime, and its start date, should become clearer during 2011.

## *Taxable income determination*

A UK resident company is taxed on its worldwide total profits.

The UK tax system requires those total profits to be calculated by finding the aggregate of (i) the company's net income from each source and (ii) the company's net chargeable gains arising from the sale of capital assets.

The main sources of income recognised by the legislation are (i) profits of a trade, (ii) profits of a property business, (iii) non-trading profits (or losses) from loan relationships, mainly interest receivable or payable, (iv) non-trading gains (or losses) on intangible fixed assets, and (v) non-exempt dividends or other company distributions. Determining income from the first four of these relies heavily on the company's accounts; determining income from the last does not, nor does calculating chargeable gains or income from other sources.

The rules for determining the gross income in each category differ in certain respects according to the source concerned and are different again when calculating gains. Likewise there are also subtle differences in the rules concerning the deductions that are permissible in respect of different sources of income and in respect of gains. Because of this continuing reliance on taxing companies on a 'source-by-source' basis, the UK system is not well suited to being analysed in terms of income determination and deductions as two wholly separate topics.

### *Basic rules for accounts-based sources*

A company's trading profits are based on its worldwide profit before tax in its accounts. Adjustments are made for non-trading receipts (such as dividends from other companies and income from property) and non-deductible expenditure (such as capital expenditure or expenditure which is not incurred for the purposes of the trade). Depreciation for tax purposes (known as capital allowances) is calculated and substituted for the depreciation charged in the accounts. There are also a number of other statutory adjustments to be made; three important ones are that pension contributions and deferred pay are broadly deductible only when paid, that a deduction is available for the notional cost of certain share awards to employees, and that where acquired intangibles are not depreciated in the accounts a 4% flat-rate deduction can usually be claimed. There are, however, many others.

Similar principles apply in relation to the calculation of profits of a property business.

The profits from a company's trading and non-trading loan relationships and related matters are based on the accounts. For this source of income, the distinction between 'capital' and 'revenue' receipts and deductions is not relevant. All credits and debits in the accounts are aggregated in order to find the net profit or deficit. Certain statutory adjustments have to be made – these include an interest capping limitation. Broadly the same regime applies to income and expenses relating to intangibles including goodwill. For a trader these are therefore specific areas where capital amounts can be taxed or allowed.

For traders any profit or loss on loan relationships, and/or on intangibles, are generally included within the trading profits; they become a single source of profits. For loan relationships and intangibles not connected with a trade, the company has a separate source of profits or a separate class of loss.

### *Income losses*

Where a loss arises in respect of a particular source of income, there are detailed rules regarding the possible offset of the loss. Carry-back and sideways reliefs are often allowed within limits; carry-forward is generally allowed and carried forward losses do not time expire. Losses can also be utilised by other group companies (see the Group taxation section).

More specifically, dealing with the main sorts of income losses,

- trading losses may be set off against any other source of profit (or gains) in the same year, or may be carried back one year against any other source of profit (or gain) (three years on the cessation of the trade), or may be carried forward without time limit against profits of the same trade only
- property losses may also be set off against any other source of profit (or gains) in the same year, or may be carried forward without time limit against profits of any sort; they cannot, however, be carried back, and
- non-trading deficits (i.e. financing losses) can again be set off against any other source of profit (or gains) in the same year, or may be carried back one year against non-trading credits (i.e. financing profits) or may be carried forward without time limit against non-trading profits.

Non-trading companies may deduct the (non-capital) management expenses incurred in managing its investments from its total profits. Any excess management expenses can be carried forward (without limit) to set against profits in future years.

While income losses can generally be off-set against capital gains of the same accounting period, capital losses are never available for offset against any type of income.

### *Inventory*

In general, the book and tax methods of inventory valuation will conform. In practice, inventories are normally valued for tax purposes at the lower of cost or net realisable value. A first in first out (FIFO) basis of determining cost where items cannot be identified is acceptable, but not the base-stock or the last in first out (LIFO) method.

### *Realised and unrealised exchange gains/losses*

Unrealised exchange gains and losses tend to arise on debts and derivatives; they are then taxed or allowed, together with realised amounts, on an accounts basis in the same way as other debits and credits arising out of loan relationships. Where gains or losses arise on other payables or receivables to a trader or property investor, they will again generally be taxed or allowed on an accounts basis. For a trader the taxable or allowable amount will become simply part of the trading profit or loss; for other companies it will become a separate source of taxable profit (a 'non-trading credit') or loss (a 'non-trading deficit').

Where unrealised differences arise on other capital assets they will not generally be taxable or allowable at that stage; instead, the exchange difference becomes part of the computation and is effectively taxed or allowed when the asset is disposed of and any difference is realised.

### *Dividends received*

Most foreign and UK dividends received by UK companies have been exempt from corporation tax since July 2009; one of several criteria has to be met, but these are widely drawn (one test, for example, is that the recipient controls the payer). For non-exempt foreign source dividends, double tax relief (DTR) will be available on a dividend by dividend basis. It would be unusual for companies to be taxed on UK dividends because of the breadth of the exemption, but where they are taxed, there is no concept of DTR for UK dividends.

### *Capital assets*

Gains on capital assets are taxed at the normal corporation tax rates. The chargeable gain (or allowable loss) arising on the disposal of a capital asset is calculated by deducting from gross proceeds the costs of acquisition and subsequent improvements, plus the incidental costs of sale and indexation allowance. Indexation allowance compensates for the increase in costs based on the percentage rise (if any) in the UK retail prices index to the date of disposal. Indexation allowance is however limited: it cannot create or increase a capital loss, it can only reduce or eliminate a chargeable gain. These calculations must be done in sterling, so any foreign exchange gains and losses will be taxed (or relieved) on disposal.

Special rules apply to assets held since 31 March 1982.

Most acquisitions and disposals between UK group companies are treated as made on a no gain no loss basis (i.e. at base cost plus indexation). Otherwise acquisitions from, or disposals to, affiliates are treated as made at fair market value, as are other acquisitions or disposals not at arm's length.

Capital losses are allowed only as an offset to capital gains. An excess of capital losses over capital gains in a company's accounting period may be carried forward without limitation but may not be carried back.

There is a good deal of anti-avoidance legislation concerning the computation of chargeable gains, notably to stop losses being created or gains avoided where assets are depreciated by intra-group transactions, or where losses are 'bought in' from third parties.

Gains realised on certain types of assets can be deferred where all or most of the proceeds are reinvested in other assets of those types within a specified period (generally three years). The 'rolled-over' gain then crystallises as and when the latter assets are sold. At present the main asset categories qualifying for roll-over are land and buildings used for a trade.

Most disposals by trading groups of shareholdings of 10% or more are exempt from tax. The main exceptions will be those of non-trading subsidiaries or subgroups, or of companies acquired within the previous year. As noted previously, gains on goodwill and other intangibles acquired after March 2002 will be taxed as income, not as capital gains.

### *Controlled foreign companies*
Under the CFC regime, a UK resident company may be taxed on a proportion of the undistributed profits of certain UK-controlled non-resident companies in which the resident company has an interest.

No liability arises where one of a number of tests (e.g. the 'exempt activities' test) can be satisfied. An 'acceptable distribution' exemption was withdrawn in 2009 when the rules regarding the taxation of dividends were changed.

As a result of a European Court of Justice decision that the EC Treaty allows intra-EU CFC charges only where the arrangements are 'wholly artificial', an additional exemption (not written into the statute) is available to those CFCs that are actually established in an EEA state and carry on genuine economic activity there.

The government is currently consulting on a radical overhaul of the CFC regime. This process is expected to continue well into 2011 and possibly beyond, with initial legislation not anticipated before Finance Act 2012.

### *Double tax relief*
The UK has an extensive network of double taxation treaties. Unilateral relief is generally available in any event to credit overseas tax paid on non-UK source profits against the UK tax on the same profits, so that while the relevant treaty might sometimes extend that relief, their main function for UK companies is to limit overseas withholding taxes that would otherwise be payable on passive income.

The UK has a complex regime allowing 'underlying' tax relief in respect of foreign dividends, so that tax suffered at lower levels can be relieved (at least in part) where dividends flow to the UK via a chain of companies. This exemption is of limited application since 2009 because most foreign dividends are now exempt from tax.

### *Partnerships*
In broad terms, if companies participate in UK partnerships (whether general partnerships, limited partnerships or limited liability partnerships) they will be taxed on a flow through basis. This will in very broad terms mean that UK corporate partners will be taxed on trading, property or financing income as it arises in the partnership accounts, and on non-exempt dividends on a receipts basis.

When considering overseas entities, the UK authorities will not be bound by how the entity is classified in its country of origin. Case law has determined a number of matters that should be considered when establishing whether a non-UK entity should be taxed in the UK as if it were a company or a partnership. HMRC also maintains a public list of non-UK entities and the decisions it has previously made regarding their classification. However, if the parties have flexibility regarding the constitution of such entities then their classification may be viewed differently, either by HMRC or the courts. This area is complex and therefore specialist advice should be sought.

### *General rules for deductions*

As noted in the income section, the UK tax system requires taxable profits to be calculated by aggregating (i) the company's net income from each source and (ii) the company's net chargeable gains arising from the sale of capital assets. This approach gives rise to a particularly complicated regime so far as deductions are concerned. Expenses are usually allocated to the source of income (or occasionally by reference to income generally) or to the particular gain to which they relate. The rules governing their deductibility differ according to whether the expense relates to a capital gain or to income, and indeed according to the particular source of income concerned. For example, there is a considerable difference in the manner in which tax relief is given for expenses incurred by companies trading in property as compared to those that invest in property. The regime also has a large number of specific rules dealing with particular types of deductions which take priority over the more general rules for each type of income.

We have therefore set out the general rule for trading expenses, being the most common category and, following that analysis, considered some specific common exceptions.

### *General rules for trading expenses*

A trading company is generally permitted to deduct expenses that are incurred wholly and exclusively for the purposes of the company's trade, provided those costs are not capital in nature and are charged to the profit and loss account. There is a significant amount of case law surrounding whether expenses have been incurred wholly and exclusively for the purposes of a company's trade and whether they are capital or not.

Relief is generally given in the period the expenses are accrued in the accounts, subject to some specific exceptions. In particular, contributions to a registered pension scheme are only allowed on a 'paid' basis with some further provisions under which some contributions may be spread over a number of years; and if bonuses and other staff costs are paid out more than nine months after the end of the accounting period in which they are accrued, they are only allowed on a paid basis.

The general rule is made subject to a raft of specific statutory provisions, some of which allow deductions and others of which limit them; some of the more important of these are discussed below, but there are many others. There is, as one example, a bar to deducting the costs of business entertainment, except within quite strict limits.

### *Management expenses*

Holding companies are permitted a deduction for expenses to the extent that they are expenses of managing the company's investment business and are not capital in nature. Such costs would typically include audit fees, directors' costs, rent, local rates, and office costs. These costs can be set against any sources of profit the company may have (such as financing income). For the top company of a listed group, such expenses can be very substantial.

If the company has inadequate income (given that most dividend income will not be taxable) the excess can be surrendered as group relief. Alternatively it can be carried forward to set against future income, with no time limit.

Many of the specific prohibitions on the deduction of trading expenses (though not all) are extended to create a similar bar on the deduction of such costs as management expenses for non-traders; conversely, many rules giving traders a specific deduction for certain costs are extended to allow non-traders similar relief. But this is not invariably the case. For example, traders can only deduct costs 'wholly and exclusively' incurred for the purposes of the trade; there is no similar rule for management expenses. However, the two specific limitations on trading deductions referred to above (pension contributions and late-paid remuneration) are extended to management expenses.

### *Employee share schemes*

A deduction is often available to an employing company for the deemed cost of providing shares to employees, on a formula basis rather than the accounts charge (if any); this depends on the nature of the share plan and of the shares provided. This regime will generally allow a deduction to a subsidiary company whose employees receive shares (or options over shares) in the parent company.

### *Fines, penalties and bribes*

Any payments that would constitute a criminal offence (e.g. a bribe), or would do so if paid inside the UK, are expressly not deductible as trading expenses or management expenses. Likewise fines and penalties imposed for breaking the law are also not deductible, although a deduction is usually available for legal costs incurred in defending such an action. Civil penalties, interest and default surcharges (e.g. relating to certain VAT defaults) are also generally non-deductible, except for damages which are compensatory rather than punitive (e.g. damages for defamation payable by a newspaper company).

The rule that any amount paid by way of a penalty for breach of the criminal law is not deductible derives largely from case law, and was explicitly said to be a policy rule. It is applied strictly; parking fines, and fines for breaches of regulations, or for price-fixing, are not deductible.

The rule does not however extend to compensatory payments which are not punitive. So settlements in relation to negligence which harms customers or patients, or for breach of contract, or with employees for wrongful dismissal, ought to remain deductible.

### *Bad debts, provisions, and reserves*

A provision will be deductible for tax purposes if (or to the extent that) it:

- is in respect of allowable revenue expenditure
- is made in accordance with acceptable accounting practice
- does not conflict with any statutory rule governing the timing of relief (e.g. in relation to payment of staff cots), and
- is estimated with sufficient accuracy.

This rule extends to bad debts on trading account. Generally, however, bad debts are dealt with under the ‘loan relationships’ rules for financing costs and financing income. The rules there, however, are broadly the same; if the bad debt can be identified specifically enough to allow a bad debt provision which satisfies UK accounting standards, it should be deductible.

### *Local taxes*

There are no local taxes on income.

Local municipal taxes (business rates) may be deducted from taxable income. These rates are based on property values.

### *Funding costs*
Funding costs (primarily fees and interest) are broadly deductible on an accounts basis, even if capital in nature, but subject to thin capitalisation constraints (with no explicit safe harbours) and an interest cap based on the group's external debt levels. This extends to foreign exchange deductions relating to debts owed and receivable.

Traders will generally take the deductions in computing trading income (which is also accounts based). Deductions relating to loans not used for trading purposes will give rise to 'non-trading deficits' which, if not group relieved, can be offset against profits of that year generally, or carried back one year (against that year's funding profits), or carried forward indefinitely against non-trading profits.

### *Intangible fixed assets*
A similar regime applies to intangible assets, such as patent rights, know-how and trademarks, and including goodwill. Royalties are generally deductible on an accounts basis, and except in relation to 'grandfathered' assets owned by the group on 31 March 2002, the accounts amortisation is also deductible (with an option to take a flat 4% deduction even if not amortised in the accounts). Traders will take the deductions in computing trading income; non-traders will create a 'non-trading loss on intangible fixed assets' which can be relieved as a loss against any profits of the year, carried back one year, or carried forward indefinitely.

Other types of depreciation/amortisation are very seldom allowable, but instead the UK has a wide (though diminishing) range of 'capital allowances' which are discussed separately below.

Income costs relating to research & development would normally be deductible in any event, but there is a special incentive connected with R&D which generally allows an additional deduction or the payment of a tax credit *(see the Tax credits and incentives section)*.

### *Depreciation/amortisation*
Depreciation of fixed assets (other than of goodwill and other intangibles) is not allowable as a deduction from any source of income. However traders, and most non-traders, are instead allowed specified rates of annual deduction in respect of specified classes of assets, together referred to as 'capital allowances', which are deducted in calculating trading income for traders, and (broadly) against income derived from the use of the fixed assets for non-traders.

In the period of expenditure, capital allowances are available, generally at 20% of the cost of machinery and equipment acquired for use in a trade or property rental business; thereafter, tax depreciation is taken generally at 20% per annum on the reducing balance basis. It is proposed (and likely to be enacted) that this 20% rate will reduce to 18% per annum with effect from April 2012. With some exceptions (notably cars, ships, and machinery and equipment in offices and other non-industrial buildings), the rate of tax depreciation for machinery and equipment with an expected useful life when new of at least 25 years, and purchased after 25 November 1996, is 10%. Since 1 April 2008, this 10% rate also applies to certain integral features in buildings and thermal insulation. This 10% rate will reduce to 8% per annum with effect from April 2012.

All businesses, regardless of size, can claim an annual investment allowance of 100% on the first GBP 100,000 per year of most qualifying expenditure incurred on or after

1 April 2010, but reducing to GBP 25,000 from April 2012. This is restricted to a single allowance for groups of companies or associated businesses.

Enhanced allowances, typically at a rate of 100%, are available for expenditure on certain energy saving plant and other specific categories. The products and technologies supported by this regime are reviewed and updated regularly.

The rate of tax depreciation of most plant or machinery leased to non-residents is restricted, generally to 10% but in some cases to nil. However, HMRC now accept that in some circumstances these rules may be contrary to EU law and for leases finalised on or after 1 April 2006 where the lessee is resident in an EEA country which does not give the lessee relief broadly equivalent to the UK's capital allowances, HMRC will accept that the lessor is entitled to allowances at the normal 20% rate; in addition the 0% rate will not be enforced in the case of other EEA lessees.

No tax depreciation is normally allowed on buildings, apart from certain machinery and equipment embodied in the fabric of the buildings. Prior to April 2011, limited tax depreciation is given for new industrial buildings, agricultural buildings and certain hotels. This allowance is being withdrawn and is 1% (straight-line basis on cost) from 1 April 2010 and 0% after 1 April 2011.

Tax depreciation of machinery and equipment, and of industrial buildings, can be disclaimed in whole or in part, thereby deferring allowances.

Depreciation allowances may also be available in respect of the cost of the acquisition of mineral assets and other qualifying expenditures relating to mineral extraction, generally at the rates of 10% and 25% respectively on the reducing balance basis; and in respect of various other types of capital expenditure, including the cost of ships, construction of public roads, and dredging.

Excess depreciation allowances are generally recaptured on disposal. The recapture is calculated on a 'pool' basis for most machinery and equipment in which case there is no recapture unless the sale proceeds exceeds the total tax written down value of the pooled assets. The rules concerning which pool an asset goes into can be complex; a large company will generally have several pools ranging from single asset pools to a single large pool for most of its plant and machinery. There is no recapture for sales of industrial buildings.

Where assets are leased, capital allowances are generally available to the lessor rather than the lessee. However, this is an area of complexity, and in some situations (generally relating to finance leases), the allowances are only available to the lessee.

### *Losses*

Income losses may be carried forward indefinitely, and, in general, set against any type of non-trading profits, but in contrast losses of a particular trade can be carried forward only against profits of the same trade. Unlimited loss carryback is available for trading losses against total profits of (normally) the previous 12 months (provided the same trade was being carried on in that period). There is a more limited facility to carry back certain non-trading losses, also normally for 12 months. Losses can also generally be surrendered to other group companies to set against their taxable profits for the same period.

Capital losses may also be carried forward indefinitely but may not be carried back. There is no ability to surrender capital losses to fellow group members but gains or losses arising on a particular asset can be allocated to another group member (by means of a joint election on an asset by asset basis) and therefore there is a limited ability for the capital losses of one company to be offset against the gains of a fellow group member in the same or subsequent period.

There are complex anti-avoidance rules which restrict the utilisation of losses where there is a change in ownership of the company.

## Group taxation

### The basic rule

Each individual corporate group member is required to submit their own tax return on a stand-alone basis, with the exception of the election available with respect to VAT (*discussed below*). However, there are a variety of ways in which their relationship with fellow group members is recognised in the UK tax system for the purposes of corporation tax, VAT and stamp duty.

### Corporation tax

The corporation tax system includes a number of measures that advantage UK members of qualifying groups, all of which are subject to anti-avoidance measures.

Operating taxable profits and losses arising in the same period can usually be offset between UK resident 75% affiliates within a worldwide group. This extends to offsetting the UK profits attributed to a UK PE of a non-UK resident group member. There are some restrictions, primarily where one of the two companies is not an economic 75% subsidiary of the group, or is subject to arrangements under which it might leave the group.

Intra-group transfers of capital assets between UK companies, including UK permanent establishments, are normally tax-free, though the definition of group for these purposes is slightly different to the definition for group relief for losses. This treatment is also extended to intra-group transfers of loan relationships, derivatives and intangibles. There is generally a 'degrouping' charge if the transferee company leaves the group within six years.

There is no automatic offset of capital gains and losses where these arise in different group companies, but it is normally possible for offset to be arranged by the appropriate tax-free transfer of the asset being disposed of to the third party. Such a tax-free transfer can either be actually done (prior to the third party disposal) or notionally only (by election between the companies concerned).

A UK resident parent company is able to claim group relief for income losses of a non-UK subsidiary which is resident in the European Economic Area (EEA) or which has incurred the relevant losses in a permanent establishment within the EEA, provided that all possibilities of non-UK relief for the losses have been exhausted and future relief is unavailable. The European Commission has referred the UK to the European Court of Justice (ECJ) over this 'all possibilities' test and the fact that it must be met immediately after the end of the accounting period in which the loss arises, together with the fact that this extension of loss relief only applies to losses incurred after 1 April 2006.

In addition the corporation tax system also has a number of measures that seek to prohibit groups unfairly manipulating the tax system by shifting profits between group members (either internationally or within the UK) in a way that is considered unacceptable.

Under the CFC regime, a UK resident company may be taxed on a proportion of the undistributed profits of certain UK-controlled non-resident companies in which the resident company has an interest. No liability arises where one of a number of tests (e.g. the exempt activities test) can be satisfied. The Government is currently consulting on a radical overhaul of the CFC regime.

There is a transfer pricing regime that applies to UK-to-UK transactions as well as cross-border transactions. UK taxpayers are required to self assess their compliance with its arm's-length principle and must therefore identify and make transfer pricing adjustments when submitting their tax returns. Thin capitalisation is addressed within this regime, with no explicit safe harbours. *This regime is discussed in more detail in the Transfer pricing section under Other issues*.

Where a UK company borrows from a connected party that is not subject to UK tax in respect of the corresponding interest receipt (and certain other limited circumstances), the UK tax deduction may move to a paid basis rather than the usual accruals basis. However this so called 'late paid interest' rule has been modified in order to make it comply with the UK's obligations under the EC Treaty. It now only applies where the creditor is a company that is resident or effectively managed in a non-qualifying territory, broadly a tax haven. The revised rule applies to accounting periods beginning on or after 1 April 2009, although a company may elect that it not have effect for the first accounting period (not ending after 31 March 2011) to which it would otherwise apply.

A debt cap applicable to accounting periods beginning on or after 1 January 2010 limits the aggregated UK tax deductions group members may claim for finance costs to the level of a group's external finance expense.

### *Indirect tax*

Group companies can, subject to certain requirements, elect to account for VAT as if they were one taxable person, and where this is done, no VAT is charged on intra-group supplies of goods or services. The registration is made in the name of the representative member, who is responsible for completing and rendering the single return on behalf of the group. All the companies are jointly and severally liable for any VAT debts. VAT grouping is subject to detailed anti-avoidance provisions.

### *Stamp duty and stamp duty land tax*

Transfers of assets within worldwide 75% groups are generally exempt from stamp duty and stamp duty land tax. The relief can be retrospectively withdrawn in certain circumstances, primarily where the transferee leaves the group within three years of the transfer.

## *Tax credits and incentives*

A variety of tax incentives are given in the form of enhanced tax depreciation allowances (known as capital allowances, *see Depreciation in the Deductions section*). Some of these incentives are given by reference to the expenditure concerned and others by reference to the size of the company incurring that expenditure.

For example, a full write-off can be claimed in the year of expenditure on a range of 'green' products and technologies. The list of items supported in this way is reviewed annually. It currently consists of the following: designated energy saving equipment; designated environmentally beneficial plant and machinery; cars with low emissions; plant or machinery relating to gas stations for refuelling vehicles with natural gas or hydrogen fuel incurred prior to 31 March 2013; and conversion or renovation of business premises in designated disadvantaged areas of the UK for expenditure incurred up to 11 April 2012.

All businesses, regardless of size, can claim an annual investment allowance of 100% on the first GBP 100,000 per year of most qualifying expenditure but reducing to GBP 25,000 from April 2012. This is restricted to a single allowance for groups of companies or associated businesses.

A deduction, currently equal to 130% of the qualifying expenditure on R&D can also be claimed by large companies. For small and medium companies, as defined, a deduction equal to 200% (from April 2011, previously 175%) of the qualifying expenditure on R&D is given in the year in which it is incurred, which can be surrendered for a cash payment (at a rate of GBP 24.50 for each GBP 100 of qualifying R&D spend) by companies that are trading at a loss or have not yet started to trade. From April 2012, this 200% rate increases to 225%.

A deduction equal to 150% of the qualifying expenditure on the remediation of contaminated or derelict land is given in the year incurred, which can be surrendered for a cash payment (at a rate of GBP 16 for each GBP 100 of qualifying land remediation spend) by companies that are trading at a loss. This relief is likely to be abolished during 2012.

There are special tax reliefs available for certain expenditure on UK film production.

There are no tax holidays nor any foreign investment incentives.

## *Withholding taxes*

Under UK domestic law, a company may have a duty to withhold tax in relation to the payment of either interest or royalties (or other sums paid for the use of a patent). The circumstances in which such a liability arises are discussed below.

There is no requirement to deduct withholding tax (WHT) from dividends. Therefore dividends may always be paid gross, regardless of the terms of the applicable double tax treaty.

Please note however that this is not an exhaustive list of all the deductions that might be required to be made in respect of UK tax from payments made to or by companies. In particular, non-resident companies that are subject to UK income tax on UK source rental profits (*see further comment in Taxes on corporate income section above*) will find their letting agent or tenants are obliged to withhold the appropriate tax at source (currently 20% without any allowances) from their rental payments unless the recipient has first applied and been given permission to receive rents gross under the Non-Resident Landlord Scheme. Two other important examples are the UK's deduction at source regime for entertainers and sportsmen, and the scheme under which payments to unregistered subcontractors working on big building projects may need to have tax deducted at source.

### *Interest*

As a general rule, UK domestic law requires companies making payments of interest to withhold tax at 20%. However, there are a number of exceptions to this general rule. The key exclusions are:

- payments of interest by UK resident companies if the beneficial owner of the interest is also a UK resident company, or a UK PE provided the interest concerned will be taxed in the UK as part of the PE's trading profits
- payments of interest on a quoted Eurobond
- payments of interest that qualify for exemption under the EU Interest and Royalties Directive
- payments of interest paid to or by a UK bank (or a UK branch of a foreign bank)
- payments of 'short' interest. This is, broadly speaking, interest on loans that will not be in place for more than a year. However, the definition can be contentious, and detailed advice should be taken on this if intending to utilise this exemption, and
- payments of interest that do not 'arise' in the UK. Whether a payment constitutes UK source interest is a complex issue and specialist advice needs to be taken if seeking to use this exception.

If none of these exceptions apply, a payment of interest must be made after the deduction of WHT unless (or until) HMRC has given authorisation that the payment may be made gross (or with a reduced rate of WHT) because of the applicability of treaty relief for the recipient.

### *Royalties*

UK domestic law requires companies making payments of patent, copyright and design royalties that arise in the UK to deduct WHT at 20%. In addition, there is also the possibility that other royalties that arise in the UK may also be subject to the same rate of withholding tax if they constitute 'qualifying annual payments', so specialist advice will be needed to clarify this. However certain types of royalties, such as film royalties and equipment royalties will generally not be subject to UK WHT.

Unlike the rule regarding interest, a company may make a royalty payment gross of WHT (or subject to a reduced rate of WHT under a treaty) without prior clearance having been given by HMRC if they reasonably believe at the time the payment is made that the payee is entitled to relief under the treaty. However, if that belief is later found to be incorrect, HMRC may direct that the payment must be made net of WHT, with the WHT paid to HMRC, and the payer may be subject to interest and penalties in respect of the WHT that should have been withheld (even if their belief was reasonable).

### *Double taxation treaties*

The table below sets out the rates of WHT applicable to payments of dividends, interest, and royalties under UK domestic law where such a liability arises and the reduced rates that may be available under an applicable double tax treaty.

| Recipient | Dividends (%) (1) | Interest (%) (2) | Royalties (%) (3) |
|---|---|---|---|
| Resident corporations | | 20/0 (4) | 20/0 (4) |

Notes

1. A tax credit is available to UK resident individual shareholders on dividends received, as described above. Some double taxation treaties allow a half or full tax credit (less, normally, a 5% to 15% notional withholding tax) also to non-resident individuals and usually to corporate portfolio investors. Treaties that allow a payable credit are indicated by an asterisk (*). However, since 6 April 1999 the

U

credit has been reduced from one quarter to one ninth, which has the result that unless note 14 below applies, the tax credit indicated by the asterisk is now in effect useless, since it is wholly eliminated by the (usually 15%) withholding tax allowed by the treaty.

2. Withholding tax applies only to ‘annual interest’ (i.e. excluding interest on certain short-term loans). Banks and similar financial institutions are also normally able to pay annual interest to non-UK residents free of withholding tax. In addition, most of the UK treaties provide for a zero-rate of withholding on interest paid to governmental and quasi-governmental lenders. Such exemptions are not separately indicated in the table below.
3. Some types of royalties are not subject to UK withholding tax, including film royalties and equipment royalties. Treaty provisions specifically relating to these are therefore not mentioned here.
4. From 6 April 2001, payments to any UK resident company (not just banks, as before) can be made free of withholding tax if the recipient is chargeable to tax on the interest or royalty. Discussions continue as to whether this provision will be extended to recipients who are exempt from UK tax on the interest or royalty.
5. Where a reduced rate of withholding is allowed by any treaty, whether on interest or royalties, it is usual for this reduced rate to be stated not to apply to amounts which are in excess of a normal commercial rate of interest/royalty, or where the interest/royalty is effectively connected to a PE in the United Kingdom of the recipient or where the debt/license was created primarily to obtain the advantage of the treaty; such general limitations are not specifically indicated in the table below.
6. Zero-rate on certain loans.
7. Treaty rate not applicable to certain loans held by tax-exempt holders and resold within three months of acquisition.
8. Lower rates, primarily of 3% on use of news, 5% on copyright royalties other than films and TV, and 10% on certain intellectual property, will in practice apply in almost all cases.
9. No repayable tax credit for companies.
10. A 5% rate on literary/artistic copyright royalties.
11. A 7.5% rate on interest paid to banks and other financial institutions.
12. The United Kingdom announced that the old UK/USSR treaty ceased to apply to certain former Soviet Republics on 5 April 2002 (such that from that date there was no treaty in force with any of those countries), whilst it continued to apply to others until new treaties were concluded. Treaties have subsequently been signed with a number of these states such that the old UK/USSR treaty currently only continues to apply to Tajikistan, Turkmenistan and Belarus (the last of which concluded a new treaty with the UK in 1995 which is not yet in force). The only remaining states without a treaty in force with the UK post 5 April 2002 are Armenia and Kyrgyzstan. Moldova signed a new treaty with the UK on 8 November 2007 which took effect in the UK from 6 April 2009.
13. A rate of 5% applies to patent royalties and no relief is given for motion picture film royalties, as provided by the 1962 treaty with South Africa that was extended to Namibia by an Exchange of Notes.
14. Half tax credit payable by the UK Exchequer to non-resident companies possessing 10% or more of the voting power of the paying company, subject to a notional withholding tax (which in current circumstances makes the actual repayment very small).
15. Zero-rate on literary/artistic or scientific copyright royalties, excluding payments in respect of cinematograph films and films or tapes for radio or TV broadcasting.
16. The United Kingdom’s treaty with the former Yugoslavia is regarded as still in force between the United Kingdom and Croatia, Montenegro, Serbia and Bosnia-Herzegovina. Macedonia signed a new treaty with the UK on 8 November 2006 which took effect for UK withholding tax purposes on 1 January 2008. A new treaty with Slovenia was signed on 13 November 2007 and came into effect in the UK in April 2009.
17. The independent states of the Czech Republic and the Slovak Republic have confirmed that they will honour the treaty between the United Kingdom and the former Czechoslovakia.
18. The 10% rate applies to royalties for use of industrial, commercial or scientific equipment or experience as well as royalties in respect of patent, trade marks and know-how. Zero-rate on all other royalties.
19. A rate of 10% on certain bank loans.
20. A rate of 10% in certain cases.
21. A rate of 15% on film and TV royalties.
22. A rate of 7% on royalties for use of (or right to use) industrial, commercial, or scientific equipment.
23. A rate of 5% on royalties for use of industrial, commercial, or scientific equipment.
24. No relief is available if the payment concerned is made to a company controlling (directly or indirectly) more than 50% of the voting power of the paying company. In addition, no relief is available in respect of cinematograph film royalties or amounts paid in respect of the extraction of natural resources.
25. Zero-rate on government and local authority loans. The rate is 5% where the beneficial owner is a bank or insurance company or the interest is derived from bonds and securities that are regularly and substantially traded on a recognised securities market. The rate is 10% where the beneficial owner is not a bank or insurance company but the interest is paid by a bank or by the purchaser of machinery and equipment to a person who sold that equipment on credit.
26. A rate of 7% on interest paid to banks.
27. A rate of 10% on interest on bonds issued to the public.
28. A rate of 15% on royalties on films, TV and radio broadcasting.
29. A rate of 10% on copyright royalties.
30. A rate of 10% on interest paid to banks and other financial institutions.
31. A rate of 5% on literary/artistic/scientific copyright royalties.

32. Full relief for copyright royalties.
33. Lower rate may be substituted to match any lower rate agreed in a treaty between Uzbekistan and a third Organization for Economic Cooperation and Development (OECD) country.
34. A rate of 10% for royalties on industrial, commercial or scientific equipment.
35. Zero-rate on certain government loans.
36. A rate of 2% for royalties on industrial, commercial or scientific equipment.
37. Zero-rate on literary/artistic copyright royalties, patent royalties and royalties for use of industrial, commercial or scientific know-how and computer software.
38. New treaty effective for UK income tax (and therefore withholding tax) from 6 April 2007 reduced withholding tax on both interest and royalties to the rates shown in table. Prior to this the rate of withholding tax on interest and royalties was 15% in both cases (subject, in the case of interest, to note 7).
39. A rate of 5% applies to loans from banks and insurance companies, interest paid on securities quoted on a stock exchange and on some sales of machinery and equipment.
40. A rate of 5% on royalties for the use of a patent etc concerning industrial, commercial, or scientific experience.
41. A rate of 10% can be withheld if the recipient of the royalties controls more than 50% of the voting power of the payer.
42. A rate of 15% can be withheld on royalties in respect of cinematograph or television films.
43. A rate of 5% can be withheld on royalties in respect of cinematograph or television films.
44. A new treaty with Saudi Arabia was signed on 31 October 2007 and entered into force from 1 January 2009. It will be effective in the UK from 1 April 2010 for corporation tax and from 6 April 2010 for income tax and capital gains tax purposes, including withholding tax. The withholding tax rates were not changed by the new treaty and therefore the figures shown above are valid both before and after this date.
45. Full relief is available for literary, artistic or scientific copyright (excluding royalties on cinematograph films and films or tapes for TV or radio broadcasting). No relief is available for amounts paid in respect of the extraction or removal of natural resources.
46. A new treaty with Poland was signed on 20 July 2006 and entered into force on 27 December 2006. It took effect in respect of UK withholding taxes from 1 January 2007, changing the rates to those shown in the table above. The rates were previously zero in respect of interest and 10% in respect of royalties.
47. HMRC intends to progress negotiations on new treaties in the year ending 31 March 2010 with: Australia, Croatia, Ethiopia, Germany, Hungary, Israel, New Zealand, Spain and Thailand.
48. Zero-rate if recipient is: the State; an individual; a company whose shares are substantially and regularly traded on a stock exchange; a company owned at least 75% by residents of Qatar; a pension scheme; or a financial institution independent of the payer.
49. Relief may be restricted to 15% in certain circumstances.
50. A new treaty with France was signed on 19 June 2008 and entered into force on 18 December 2009. It will take effect with respect to UK withholding taxes from 6 April 2010 but the rates remain as shown in the table above.
51. New tax treaties/protocols with the following states have been signed but have not yet entered into force: Mexico (2009), Cayman Islands (2008), Belgium (2009), Qatar (2009), Luxembourg (2009), Singapore (2009), Switzerland (2009), Malaysia (2009), Austria (2009), Oman (2009), Montserrat (2009), and Bahrain (2010). These agreements will enter into force once both countries have completed the required Parliamentary procedures and exchange of diplomatic notes and will take effect on the dates set out therein. The Netherlands and Georgia treaties signed in 2008 and 2010 have now come into force, and both will take effect in the UK from 6 April 2011. The Oman treaty is largely in force (January 2011), but from April 2012 for withholding taxes.
52. Treaty effective in the UK for WHT purposes from 6 April 2009.
53. Reduced treaty rate only applicable if one of various conditions is met by either the beneficial owner or payer of the interest. This is to ensure that the benefit of the interest article can only flow to residents of the other treaty state.
54. The first tax treaty between the UK and Libya entered into force on 8 March 2010 and has effect in the UK for WHT purposes from 6 April 2010.
55. The first tax treaty between the UK and Hong Kong entered into force on 8 March 2010 and has effect in the UK for WHT purposes from 6 April 2011.
56. Provided one of several conditions is specified, one of which is that the recipient is quoted, another being that HMRC accepts that the interest is not paid in connection with tax avoidance (broadly).

## Tax administration

### Direct tax

Companies are assessed by reference to accounting periods. Normally, the accounting period is the period for which the company makes up its accounts. However, an accounting period for corporation tax purposes cannot exceed 12 months so companies preparing statutory accounts for longer than 12 months need to prepare more than one corporation tax return. Companies must file their statutory accounts and tax return within one year from the end of the accounting period; the return must include a self-assessment of the tax payable, eliminating the need for assessment by HMRC (though HMRC retains assessing powers for certain cases where it is not satisfied with the return, or where the company fails to make a return).

For smaller companies, corporation tax is payable nine months after the end of the accounting period to which it relates (so before the return must be filed). For larger companies and groups, a system of quarterly payments on account (based on estimated profits) is in place, with the first payment being due in the seventh month of the accounting period concerned. A company will generally be considered large for this purpose in any accounting period in which it has taxable profits in excess of GBP 1,500,000 (that limit being reduced by reference to the number of companies under common control, where relevant).

For companies which are members of medium or large groups, there is generally a period of one year after the statutory filing dates for the tax authorities to start an enquiry into any aspect of the return. For other companies, enquiries can be started up to 12 months after the date of actual filing. These periods are extended for returns submitted after the filing deadline, that are amended by the taxpayer, or where an issue is subsequently discovered that was not sufficiently disclosed within the standard period.

The UK tax system can impose numerous penalties for failing to adhere to the self-assessment system. These include penalties for late filing of returns, failing to maintain appropriate records, submitting an incorrect return, making errors in certain documents sent to HMRC, unreasonably failing to report errors in assessments by HMRC and failing to respond to a notice of enquiry from the tax authorities within the specified time limit.

Requirements to file online and pay electronically are expected to be phased in for corporation tax from 2011. From 1 April 2011, returns for accounting periods ending after 31 March 2010 must be filed online and such returns must be filed in a specified format which is machine readable by the tax authorities.

Large companies are required to notify HMRC of the identity of their senior accounting officer, who must certify annually that the accounting systems are adequate for the purposes of accurate tax reporting. Penalties are chargeable on the officer and the company for careless or deliberate failure to meet these obligations.

### *Indirect tax*
VAT returns must be completed at preset intervals (usually every three months). Larger companies may be required to file monthly returns, or make monthly payments on account. From 1 April 2010, companies with an annual turnover of GBP 100,000 or more, and all newly-registered businesses (whatever their turnover) are required to submit their VAT returns online and pay electronically. From 1 April 2012, businesses with an annual turnover of less than GBP 100,000 will also be required to file VAT returns online and make electronic payments. Smaller enterprises can apply for annual returns. VAT returns are usually required to be filed 30 days after the end of the period.

Annual accounting is available for taxable persons with annual turnover (taxable supplies, excluding VAT) not exceeding GBP 1,350,000.

Cash accounting is available for taxable persons with annual turnover (taxable supplies, excluding VAT) not exceeding GBP 1,350,000.

In addition a flat rate scheme operates for small businesses and is intended to simplify VAT accounting procedures.

## Other issues

### Adoption of IFRS

IFRS is mandatory for the consolidated financial statements of UK listed companies.

Companies continue to have the choice of adopting IFRS or remaining on UK GAAP at entity level for all entities. Many groups therefore continue to apply UK GAAP in their entity accounts.

The UK Accounting Standards Board (ASB) is proposing a new three-tier system of reporting going forward. It is proposed that all publicly accountable UK registered companies will have to report under IFRS (as endorsed by the EU) in accounting periods beginning on or after 1 July 2013. In addition, UK registered SMEs (broadly entities that do not have public accountability and publish general purpose financial statements for external users) must apply 'IFRS for SMEs' (a simplified IFRS) from the same date. Finally, the Financial Reporting Standard for Smaller Entities (FRSSE) will still be an option for small companies or small groups as defined by the Companies Act 2006. However the options available to a company are subject to the requirements of the UK Company Law framework for consistency of GAAP within a group.

In our experience, many large groups are considering early adoption of EU-endorsed IFRS. However, under current UK law early adoption of IFRS for SMEs or FRSSE is not possible.

### Transfer pricing

The UK has widely drafted transfer pricing rules that are intended to apply to almost any kind of transaction made or imposed between related parties that give rise to a provision that:

- differs from one that would have been made between third parties, and
- gives rise to a UK tax advantage (potential or actual) to one or more of the parties.

These rules apply to UK-to-UK transactions as well as cross-border transactions.

This regime therefore applies not only to the provision of products and services but also to finance arrangements, including both the rate of return charged and the amount of loan principle (or equivalent) made available. It is therefore the mechanism by which the UK's revenue authorities address the issue of thin capitalisation. Unlike many other territories, the UK does not operate any 'safe harbours' of any kind in relation to the amount of debt or interest (or equivalents) it considers demonstrate that a UK company or group is not thinly capitalised. (Note that the UK also has a debt cap regime which limits the amount of finance expense for which a UK tax deduction will be available by reference to the worldwide group's external finance expense, *as discussed in the Significant developments section*).

Parties are considered related for this purpose where either one controls the other, or both are under common control. Control here is not confined to situations in which one

U

party is the majority shareholder in the other. Effectively, control exists where one party has the power to ensure that the affairs of another party are conducted in accordance with the first party's wishes. The concept is also subject to two important extensions:

- the rules apply to many joint venture companies where two parties each have an interest of at least 40%, and
- there are attribution rules to trace control relationships through a number of levels in determining whether parties are controlled for the purposes of the transfer pricing rules.

In addition, the regime restricts interest deductions to an arm's-length basis where a financier, and persons who collectively control a company or a partnership, have 'acted together' in relation to the financing arrangements of that company or partnership. The financier (usually a bank) can then be taken as controlling the company or partnership, and the loan becomes subject to transfer pricing limitations.

There are a number of exemptions which essentially exclude SMEs and dormant companies from the regime.

The effect of the rules is to require an arm's-length provision to be substituted for the actual one, thereby increasing the party's UK tax liability and cancelling out the UK tax advantage that would otherwise have arisen.

Where both parties to the transaction are UK taxpayers, the disadvantaged party will generally be entitled to claim a compensating adjustment (except where the transaction falls within the transfer pricing regime because of the 'acting together' provisions), but only after the UK adjustment has been made. The legislation also provides that parties may make balancing payments to each other in such circumstances, of any amount up to the transfer pricing adjustment, which will neither be taxable for the recipient nor tax deductible for the payer.

Where the disadvantaged party is outside the UK tax net they can pursue a claim for relief under the relevant double tax agreement, if that provides a mechanism for such relief; where the adjustment in the UK is to reduce a deduction for an amount paid under deduction of UK tax, the compensating adjustment rules should allow the overseas party to reclaim any withholding tax paid on the disallowed amount.

UK taxpayers are required to self assess their compliance with this arm's-length principle. Companies and partnerships must therefore identify and make transfer pricing adjustments when submitting their tax returns. This is the case even where the disadvantaged party would be entitled to claim a compensating adjustment equal to the transfer pricing adjustment. An important implication of this approach is the potential for interest and penalties if the adjustment made is subsequently held to be wrong.

### *UK tax legislation*

Announcements of proposed new legislation generally occur at least once a year. The main announcement is made on Budget Day (generally in March) when tax rates are set for the coming year. Other announcements can be made at other times and, subject to becoming approved and adopted law, can apply from a specified date. The new legislation is then included in an annual Finance Act, which is normally finalised in July. Much of the legislation introduced in recent years has been due to challenges under the EC treaty, or as a result of the tax planning being notified under the UK's tax avoidance disclosure regulations. In years of a general election (such as 2010) there may be additional Budget Days and Finance Acts.

UK tax law is periodically consolidated. Until recently the latest consolidation Act dated from 1988, which covered both income tax and corporation tax. Over the last few years income tax and corporation tax legislation has been consolidated separately, and currently the latter is to be found in the Corporation Tax Acts 2009 and 2010, and the Taxation (International and Other Provisions) Act 2010.

## Significant developments

On 16 December 2010, the House of Representatives voted 277 to 148 to give final approval to an 858 billion dollar (USD) package of individual and business tax relief provisions. The package's total cost includes a USD 56.5 billion, 13-month extension of unemployment benefits. The House action follows Senate approval of the measure by a vote of 81 to 19 on 15 December 2010, and cleared the 'Tax Relief, Unemployment Insurance Reauthorization, and Job Creation Act of 2010' for President Barack Obama's signature on 17 December 2010. Under the legislation, full expensing for qualified business capital investments apply for property placed in service after 8 September 2010, through the end of 2011. In addition, the bill renews 50% bonus depreciation for 2012, and allows taxpayers to elect to accelerate certain AMT credits in lieu of bonus depreciation for taxable years 2011 and 2012. Certain section 179 small business expensing provisions are extended. The temporary expensing provisions are estimated to cost USD 21.8 billion over ten years. The bill includes a retroactive two-year extension of the research credit and other expired business provisions, through the end of 2011. The bill also includes a number of energy tax incentives.

The business tax relief provisions in the legislation include reinstatement and extension of the research credit, controlled foreign corporation (CFC) look-through rule, active financing income exception, and 15-year depreciation for qualified leasehold improvements; these provisions had expired as of 31 December 2009. In general, these provisions are reinstated for calendar year 2010 and extended through 2011.

Under the CFC look-through rules, dividends, interest, rent, and royalties received or accrued from a related CFC, are not treated as Foreign Personal Holding Company Income (FPHCI.) This rule applies only to the extent attributable or properly allocable to income of the payor that is not subpart F income and not effectively connected income.

The active financing income exception allows certain income from the active conduct of banking, financing, or similar businesses, or from the conduct of an insurance business to be excluded temporarily from the definition of Subpart F income.

In addition to the provisions mentioned above, the legislation extends numerous other provisions, including:

- Indian employment tax credit.
- New markets tax credit.
- Railroad track maintenance credit.
- Mine rescue team training credit.
- Employer wage credit for employees who are active duty members of the uniformed services.

- Seven-year recovery period for motorsports entertainment complexes.
- Accelerated depreciation for business property on an Indian reservation.
- Enhanced charitable deduction for contributions of food inventory.
- Enhanced charitable deduction for contributions of book inventories to public schools.
- Enhanced charitable deduction for corporate contributions of computer inventory for educational purposes.
- Election to expense mine safety equipment.
- Special expensing rules for certain domestic film and television productions.
- Expensing of 'Brownfields' environmental remediation costs.
- Deduction allowable with respect to income attributable to domestic production activities in Puerto Rico.
- Modification of tax treatment of certain payments to controlling exempt organisations.
- Treatment of certain dividends of a regulated investment company (RIC).
- RIC qualified investment entity treatment under Foreign Investment & Real Property Tax Act (FIRPTA).
- Basis adjustment to stock of S corporations making charitable contributions of property.
- Empowerment zone tax incentives.
- Tax incentives for investment in the District of Columbia.
- Temporary increase in limit on cover over of rum excise taxes to Puerto Rico and the Virgin Islands.

## *Taxes on corporate income*

**2011 taxable income**

| Over (USD) | But not over (USD) | Pay + (USD) | % on excess | of the amount over____(USD) |
|---:|---:|---:|---:|---:|
| 0 | 50,000 | 0 | 15 | 0 |
| 50,000 | 75,000 | 7,500 | 25 | 50,000 |
| 75,000 | 100,000 | 13,750 | 34 | 75,000 |
| 100,000 | 335,000 | 22,250 | 39 | 100,000 |
| 335,000 | 10,000,000 | 113,900 | 34 | 335,000 |
| 10,000,000 | 15,000,000 | 3,400,000 | 35 | 10,000,000 |
| 15,000,000 | 18,333,333 | 5,150,000 | 38 | 15,000,000 |
| 18,333,333 | ............... | | 35 | 0 |

The US corporate income tax rate is based on a progressive rate schedule; however, an alternative minimum tax (*see the Other taxes section*) provides for a flat rate with fewer deductions. The 39% tax rate applies to taxable income between USD 100,000 and USD 335,000 to eliminate the benefit of the 15% and 25% rates, and the 38% tax rate applies to taxable income between USD 15,000,000 and USD 18,333,333 to eliminate the benefit of the 34% rate. Special rules apply to personal service corporations and personal holding companies.

## *Corporate residence*

A corporation organised or created in the United States under the law of the United States or of any state is a domestic corporation. A domestic corporation is a resident corporation even though it does no business or owns no property in the United States. Resident corporations are taxed based on worldwide income. Generally, a foreign corporation engaged in a US trade or business is taxed at regular US corporate tax rates on income from US sources that is effectively connected with that business and at 30% on US source income not effectively connected with that business.

## Other taxes

### Top rate on net capital gains

On current transactions, the long-term capital gains tax rate is the same as the tax rates applicable to ordinary income. Thus, the maximum rate is 35%, excluding the additional phase out rates. However, differences may arise where the alternative minimum tax is imposed.

### Federal alternative minimum tax

An alternative minimum tax (AMT) is imposed on corporations other than S corporations *(see below)* and small C corporations (generally those with no three year average annual gross receipts exceeding USD 7.5 million). The tax is 20% of alternative minimum taxable income (AMTI) in excess of a USD 40,000 exemption amount (subject to a phase out). AMTI is computed by adjusting the corporation's regular taxable income by specified adjustments and 'tax preference' items. Tax preference or adjustment items could arise, for example, if a corporation has substantial accelerated depreciation, percentage depletion, intangible drilling costs, or non-taxable income.

### Accumulated earnings tax

Corporations (other than S corporations, domestic and foreign personal holding companies, corporations exempt from tax under Subchapter F of the Internal Revenue Code (the Code), and passive foreign investment companies) accumulating earnings and profits for the purpose of avoiding shareholder personal income tax are subject to a penalty tax in addition to any other tax that may be applicable. The accumulated earnings tax is equal to 15% of 'accumulated taxable income'. Generally, accumulated taxable income is the excess of taxable income with certain adjustments, including a deduction for regular income taxes, over the dividends paid deduction and the accumulated earnings credit. Note that a corporation can justify the accumulation of income, and avoid tax, based on its reasonable business needs.

### Personal holding company tax

US corporations and certain foreign corporations that receive substantial 'passive income' and are 'closely held' may be subject to personal holding company tax. The personal holding company tax is 15% of undistributed personal holding company income and is levied in addition to the regular tax.

### S corporations

Corporations with 100 or fewer shareholders, none of whom may be corporations, that meet certain other requirements may elect to be taxed under Subchapter S of the Code and are thus known as S corporations. S corporations are taxed in a manner similar, but not identical, to partnerships. Thus, S corporations generally are not subject to US federal income tax.

### Payroll taxes

Employers are subject to federal unemployment insurance tax (FUTA) of 6.2% on the first USD 7,000 of wages paid to employees meeting certain criteria. In addition, states impose workers' compensation insurance tax at varying rates depending on state law and the nature of employees' activities. Employers also are subject to social security contributions tax of 7.65% (including 1.45% Medicare tax) on the first USD 106,800 (for 2009 and 2010) of wages paid to employees and 1.45% of Medicare tax on any wages in excess of USD 106,800.

### *State and municipal taxes*
Corporate income tax rates vary from state to state and generally range from 1% to 12% (although some states impose no income tax). The most common taxable base is federal taxable income, which is modified by state provisions and generally is allocated to a state on the basis of a three factor formula: tangible assets and rental expense, sales and other receipts, and payroll. Other taxes that states may impose, in lieu of or in addition to taxes based on income, include franchise taxes and taxes on the capital of a corporation. State and municipal taxes are deductible expenses for federal income tax purposes.

### *Excise taxes*
The federal and state governments impose excise taxes on a variety of goods. For example, a federal and state excise tax is imposed on gasoline and diesel fuel used for transportation. The excise taxes are levied item by item and lack any uniformity in rates.

### *Value-added tax (VAT)*
No provisions exist for a VAT at the federal level. However, state and local governments may impose sales taxes.

### *Stamp tax*
No provisions exist for a stamp tax at the federal level. However, state and local governments frequently impose stamp taxes at the time of officially recording the transaction based upon the value of the real estate.

### *Other*
Most states and some cities impose sales or use taxes and a variety of property taxes on both real and personal property. The sales tax on real estate may be a stamp tax on the documents recording the transfer of the real estate.

## *Branch income*

Tax rates on branch profits are the same as on corporate profits. The law also imposes a 30% branch profits tax in addition to US corporate level income taxes on a foreign corporation's US branch earnings and profits for the year that are effectively connected with a US business. The taxable base for the branch profits tax is increased (decreased) by any decrease (increase) in the US net equity of the branch. The branch profits tax on profits may be reduced or eliminated entirely if a relevant treaty so provides (subject to strict 'treaty shopping' rules). The purpose of the branch profits tax is to treat US operations of foreign corporations in much the same manner as US corporations owned by foreign persons.

With certain exceptions, a 30% (or lower treaty rate) branch profits tax also will be imposed on interest payments by the US branch to foreign lenders. In addition, the tax will apply if the amount of interest deducted by the branch on its US tax return exceeds the amount of interest actually paid during the year.

## Income determination

### List of common book/tax adjustments

Tax and financial accounting typically have differing treatment for the following items:

- research and development
- domestic manufacturing costs
- depreciation of fixed assets
- amortisation of intangibles
- meals and entertainment
- foreign taxes, and
- fines/penalties.

### Inventory valuation

Inventories generally are stated at the lower of cost or market on a first in first out (FIFO) basis. Last in first out (LIFO) may be elected for tax purposes on a cost basis only and generally requires book and tax conformity.

The tax law requires capitalisation for tax purposes of several costs allocable to the manufacturing process that frequently are expensed as current operating costs for financial reporting (e.g. the excess of tax depreciation over financial statement depreciation).

### Capital gains

Gains or losses on the sale or exchange of capital assets held for more than 12 months are treated as long-term capital gains or losses. Gains or losses on the sale or exchange of capital assets held for 12 months or less are treated as short-term capital gains or losses. The excess of net long-term capital gain over net short-term capital loss is considered net capital gain. Capital losses are allowed only as an offset to capital gains. An excess of capital losses over capital gains in a taxable year may be carried back three years and carried forward five years to be used against (offset) capital gains.

For dispositions of personal property and certain non-residential real property used in a trade or business, net gains are first taxable as ordinary income to the extent of the depreciation/cost recovery, with any remainder generally treated as capital gain. For other trade or business real property, net gains generally are taxed as ordinary income to the extent that the depreciation or cost recovery claimed exceeds the straight-line amount, with any remainder treated as capital gain.

An exception to capital gain treatment exists to the extent that losses on business assets were recognised in prior years. A net loss from the sale of business assets is treated as an ordinary loss. Future gains, however, will be treated as ordinary income to the extent of such losses recognised in the five immediately preceding years.

### Inter-company dividends

A US corporation generally may deduct 70% of dividends received from other US corporations. The dividends received deduction is increased from 70% to 80% if the recipient of the dividend distribution owns at least 20% but less than 80% of the distributing corporation. Generally, dividend payments between US corporations that are members of the same affiliated group (*see the Group taxation section*) are deferred or eliminated until a transaction with a third party occurs. With minor exceptions, a US corporation may not deduct dividends it receives from a foreign corporation.

### *Foreign income (Subpart F income) of US taxpayers*
Generally, a US corporation is taxed on its worldwide income, including foreign branch income earned and foreign dividends when received. Double taxation is avoided by means of foreign tax credits. Alternatively, a deduction may be claimed for actual foreign taxes that are paid. In the case of foreign subsidiaries that are more than 50% owned by US shareholders (commonly known as controlled foreign corporations or CFCs), certain types of undistributed income will be taxed currently to the US shareholders (Subpart F income). Generally, Subpart F income includes income that is easily transferred to a low-tax jurisdiction.

Income from certain passive foreign investment companies (where 75% or more of the income is passive or at least 50% of the assets held produce passive income) also is subject to current taxation. Current taxation occurs if the corporation elects to be a qualified electing fund (QEF) or there are actual distributions. If a QEF election is not made and the corporation makes an actual distribution, the distribution will be treated as an excess distribution to the extent it exceeds 125% of the average of the distributions made with respect to the stock over the three immediately preceding years. The excess distribution is spread over the taxpayer's holding period, and the amount allocated to each year in the holding period is subject to tax at the highest marginal tax rate in effect for that year. This deferred tax amount also is subject to an interest charge. The interest charge is designed to pay the benefit of the tax deferral that arises out of having an overseas investment that pays no US income taxes.

### *US income of foreign taxpayers*
Generally, if a foreign entity engages in a US trade or business, all income from sources within the United States that is connected with conducting such trade or business is classified as Effectively Connected Income (ECI). There are also situations in which foreign source income could be ECI. ECI generally is subject to tax at the same rate as corporate profits. A 30% branch profits tax is levied in addition to the US corporate level income tax, which may be reduced or eliminated entirely if a relevant treaty so provides. Deductions are allowed against ECI.

Tax treaties between the United States and other countries may provide special rules for allocating taxing authority between the treaty partners. Tax treaties may provide that income earned by a foreign entity that would otherwise be considered ECI is only taxable in the United States to the extent the profits are attributable to a permanent establishment of the foreign entity in the United States. A permanent establishment generally is defined as a fixed place of business.

### *Foreign Investment & Real Property Tax Act (FIRPTA)*
FIRPTA provides that the gain or loss of a foreign person from the disposition of a US real property interest should be taken into account as if the taxpayer were engaged in a US trade or business and such gain or loss were effectively connected with such business. In these situations, the party purchasing the US real property interest from the foreign party is required to withhold 10% of the amount realised.

### *Fixed, determinable, annual, or periodical (FDAP) income*
FDAP income includes all income except gains from the sale of real or personal property and income excluded from gross income, without regard to whether the owner of the income is a US or foreign entity. Some examples of FDAP income include dividends, interest, royalties, and commissions. The gross amount of FDAP income or gains from US sources that are not effectively connected with a US trade or business are taxed at a rate of 30%. Deductions against FDAP income are not allowed.

Certain kinds of FDAP income are treated as ECI by reason of statutory requirements, allowable elections, or meeting the requirements under either the Asset-Use Test or Business Activities Test.

### *Stock dividends*

A US corporation can distribute a tax-free dividend of common stock proportionately to all common stock shareholders. If the right to elect cash is given, all distributions to all shareholders are taxable as dividend income whether cash or stock is taken. There are exceptions to these rules, and extreme caution must be observed before making such distributions.

### *Partnership income*

The income (loss) of a partnership passes through to its partners so that the partnership itself is not subject to tax. Thus, each partner generally accounts for their distributive share of the partnership's taxable income.

### *Corporate reorganisations*

In general, a corporate reorganisation involving a merger, acquisition, or consolidation is a taxable event under the general recognition provisions of the Code. However, a corporate reorganisation that meets certain statutory and judicial requirements may qualify as a tax-free transaction, with gain or loss generally not recognised or deferred to a later date.

### *Transfer pricing*

Transfer pricing regulations govern how related entities set internal prices for the transfers of goods, intangible assets, services, and loans in both domestic and international contexts. The regulations are designed to prevent tax avoidance among related entities and place a controlled party on par with an uncontrolled taxpayer by requiring an arm's-length standard. The arm's-length standard generally is met if the results of a controlled transaction are consistent with results that would have been realised if uncontrolled taxpayers had engaged in a similar transaction under similar circumstances. If a company is not in compliance with the arm's-length standard, the Internal Revenue Service (IRS) may raise taxable income and tax payable in the United States. After a transfer pricing adjustment, a multinational company may face double tax, paying tax twice on the same income in two countries. Multinational companies may request competent authority relief from double taxation through a tax treaty.

In order to avoid potential transfer pricing penalties, one avenue available to companies may be to obtain an advance pricing agreement with the IRS, unilaterally, or with the IRS and another tax authority, bilaterally, covering inter-company pricing.

### *Other*

Interest income, rents, and royalties generally are includible in the determination of gross income.

## *Deductions*

### *Depreciation*

Depreciation deductions are allowances that may be taken for capital outlays for tangible property. For property placed in service after 1986, capital costs must be recovered by using the modified accelerated cost recovery system (MACRS) method. Depending on the type of tangible property, the general cost recovery periods are three, five, seven, ten, 15, 20, 27.5, and 39 years (31.5 years for property placed in service before 13 May 1993). The cost recovery methods and periods are the same for both new and used property. Most tangible personal property is in the three, five or seven year class. Property placed in the three, five, seven or ten year class is depreciated by first applying the 200% declining balance method and then switching to the straight-line method at such a time as when use of the straight-line method maximises the depreciation deduction. Property in the 15 or 20 year class is depreciated by using the 150% declining-balance method and later switching to the straight-line method. An election may be made to use the Alternative Depreciation System (basically, the straight-line method over prescribed lives). Residential rental property generally is depreciated by the straight-line method over 27.5 years. Non-residential real property is depreciated by the straight-line method over 39 years (31.5 years for property placed in service before 13 May 1993).

An election to use the straight-line method over the regular recovery period or a longer recovery period also is available. Alternatively, taxpayers may elect to use the 150% declining-balance method over the regular recovery period for all property other than real property. This method is required for alternative minimum tax purposes.

For most tangible personal and real property placed in service in the United States after 1980 but before 1 January 1987, capital costs were recovered using the Accelerated Cost Recovery System (ACRS), which applied accelerated methods of cost recovery over periods specified by statute. The general ACRS recovery periods were three, five, ten, 15, 18, and 19 years.

Special rules apply to automobiles and certain other ‘listed’ property. Accelerated depreciation deductions can be claimed only if the automobile is used 50% or more for qualified business use as defined in related regulations. Further, for automobiles placed in service after 1986, the allowable yearly depreciation deduction cannot exceed specific dollar limitations.

Separate methods and periods of cost recovery are specified by statute for certain tangible personal and real property used outside the United States.

Rapid amortisation may be allowable for certain pollution control facilities.

Tax depreciation is not required to conform to book depreciation. Tax depreciation generally is subject to recapture on the sale or disposition of certain property, to the extent of gain, which is subject to tax as ordinary income.

### *Section 179 deduction*

Corporations can elect to expense, up to a statutory amount per year, the cost of certain eligible property used in the active conduct of a trade or business. This is commonly referred to as the section 179 deduction. The maximum annual expensing amount for tax years that begin in 2008 and 2009 is USD 250,000. For tax years beginning in 2010, the maximum annual expensing amount is USD 134,000. For tax years beginning in 2011 and thereafter, the maximum amount is USD 25,000.

The maximum deduction amount is reduced dollar for dollar where the corporation places in service during the tax year qualified tangible personal property in excess of USD 800,000 for tax years that begin in 2008 and 2009. For tax years beginning in 2010, the investment limitation is USD 530,000. For tax years beginning in 2011 and thereafter, the investment limitation is reduced to USD 200,000.

In addition, the deduction under this election is limited to the taxable income of the business. The annual expensing limit is increased by an additional USD 35,000 for qualifying assets placed in service in certain distressed communities. The annual expensing limit also is increased for certain property placed in service in the Gulf Opportunity Zone or Kansas disaster area.

### *Bonus depreciation*

A 50% special first year depreciation allowance (i.e. bonus depreciation) applies (unless an election out is made) for new MACRS property with a recovery period of 20 years or less, certain computer software, water utility property, and certain leasehold improvements acquired after 31 December 2007 and before 1 January 2010. The special allowance applies for regular income tax and AMT purposes. No AMT adjustment is made if the special allowance is used. The property must be placed in service before 2010 (before 2011 for certain longer lived property). The special allowance does not apply to property that must be depreciated using the Alternative Depreciation System or to 'listed property' not used predominantly for business. The special allowance reduces basis before regular depreciation is figured. Additionally, claiming bonus depreciation on automobiles may affect the first year depreciation limits on such automobiles.

The 'Tax Relief, Unemployment Insurance Reauthorization, and Job Creation Act of 2010', signed into law on 17 December 2010 extends bonus depreciation and temporarily increases the available deduction. Bonus depreciation which provides an additional first-year depreciation deduction equal to 50 percent of the cost of qualifying property is extended through 31 December 2012 (31 December 2013 for long-production period property (LPPP) and certain aircraft). This provision currently was set to expire on 31 December 2010 (31 December 2011, for LPPP and certain aircraft) as extended by the Small Business Jobs Act of 2010.

- The legislation provides a temporary 100% bonus depreciation deduction for qualifying property acquired and placed in service after 8 September 2010, through 31 December 2011 (31 December 2012, for LPPP and certain aircraft). Under this provision, property acquired pursuant to a written binding contract entered into before 1 January 2008 is not qualified property for purposes of the 100% bonus depreciation deduction.
- The legislation does not change the definition of eligible property under the current bonus depreciation rules. Current-law rules generally provide that property with a recovery period of 20 years or less, water utility property, certain computer software, and qualified leasehold improvements are eligible.
- The 100% bonus depreciation provision in the legislation operates by substituting '100' for '50' in the applicable 100% period. Thus, property that meets the 100% bonus depreciation requirements will not be eligible property for purposes of the 50% bonus depreciation requirement. For such property, a taxpayer could claim 100% bonus depreciation or elect to forego the bonus depreciation deduction altogether.
- The bonus depreciation provisions, including 100% bonus depreciation, are mandatory. However, as indicated above, a taxpayer may make an election out of bonus depreciation for any particular tax year. This election is made on a class-by-class and entity-by-entity basis.
- The legislation re-enacts the provision allowing a corporation to elect to accelerate AMT credits in lieu of bonus depreciation. This election is available for property placed in service after 31 December 2010, and before 1 January 2013 (1 January 2014 for LPPP and certain aircraft).

### *Depletion*
For natural resource properties other than timber and certain oil and gas properties, depletion may be computed on a cost or a percentage basis.

Cost depletion is a method of depletion applied to exhaustible natural resources, including timber, which is based on the adjusted basis of the property. Each year, the adjusted basis of the property is reduced, but not below zero, by the amount of depletion calculated for that year. The current year cost depletion deduction is based on an estimate of the number of units that make up the deposit and the number of units extracted and sold during the year.

Percentage depletion is a method of depletion applied to most minerals and geothermal deposits, and, to a more limited extent, oil and gas. Percentage depletion is deductible at rates varying from 5% to 25% of gross income, depending on the mineral and certain other conditions. Percentage depletion may be deducted even after the total depletion deductions have exceeded the cost basis. However, percentage depletion is limited to 50% (100% for oil and gas properties) of taxable income from the property (computed without allowance for depletion). Generally, percentage depletion is not available for oil or gas wells. However, exceptions exist for natural gas from geopressurised brine and for independent producers of oil and gas.

### *Net operating losses*
A net operating loss (NOL) is generated when business deductions exceed gross income in a particular tax year. Depending on current tax law, an NOL may be carried back to offset past income and possibly obtain a refund or carried forward to offset future income. Generally, a loss may be carried back two years and, if not fully used, carried forward 20 years. For tax years beginning before 6 August 1997, a loss may be carried back three years and, if not fully used, carried forward 15 years. For state tax purposes, carryback and carryforward provisions are often similar to the federal provisions, except that several states do not permit any carrybacks or carryforwards.

Special rules surrounding NOLs may apply if a taxpayer is located in a qualified disaster area.

Special rules also apply relating to specified liability losses.

Complex rules may limit the use of net operating losses after a reorganisation or other change in corporate ownership. Generally, if the ownership of more than 50% in value of the stock of a loss corporation changes, a limit is placed on the amount of future income that may be offset by losses carried forward.

With certain exceptions, taxpayers may elect to increase the carryback period for an applicable NOL to three, four, or five years from two years under the Worker, Homeownership, and Business Assistance Act of 2009, which was signed by President Obama on 6 November 2009. Under this act, an applicable NOL is the taxpayer's NOL for any tax year ending after 31 December 2007, and beginning before 1 January 2010. Generally, an election may be made for only one tax year, but an eligible small business that made or makes an election under the Code as in effect before 6 November 2009, may make an election for two tax years.

Under this special provision of the Worker, Homeownership, and Business Assistance Act of 2009, the amount of an NOL that may be carried back to the fifth tax year before the loss year may not exceed 50% of the taxable income for that fifth preceding tax year, determined without consideration of any NOL generated in the loss year or during any tax year after the loss year. An NOL otherwise carried to tax years following the fifth preceding tax year is adjusted to take into account that the NOL may offset only 50% of the taxable income for that fifth preceding tax year. Note that the 50% limitation does not apply to an applicable 2008 NOL of certain eligible small businesses that made an earlier election.

The Worker, Homeownership, and Business Assistance Act of 2009 also suspends the 90% limitation on the use of any alternative tax NOL deduction attributable to the carryback of an applicable NOL for which the extended carryback period is elected. Transition rules prescribe how a taxpayer may revoke certain elections to waive the carryback period.

### *US manufacturing deduction*

Over the last several decades, various tax incentive systems have been enacted in the United States to encourage exports and later repealed, including the extraterritorial income (ETI) regime, which was repealed as a result of a World Trade Organization ruling that the ETI regime favoured US goods and violated the national treatment provisions of the General Agreement on Tariffs and Trade. In response, the United States enacted the American Jobs Creation Act of 2004, which introduced a phase-out repeal of ETI, and introduced the domestic production activities deduction under section 199, seeking to compensate US manufacturers for the loss of ETI benefits.

Under section 199, taxpayers are allowed a 9% deduction for qualified production activities (QPA) income (subject to a taxable income limitation), phased in at 3% in 2005 and 2006; 6% in 2007 through 2009 and 9% in 2010 and thereafter. The deduction is available to all taxpayers actively engaged in QPA. For corporate taxpayers, the deduction generally will mean a federal income tax rate of 33.95%, 32.90% and 31.85%, respectively, for the years in question, on QPA income. Importantly, the deduction also applies in calculating the alternative minimum tax. There is a limit on the amount of the deduction equal to 50% of W-2 wages allocable to QPA (subject to a specific effective date), and the deduction is not allowed for taxpayers that incur a loss from their production activities or have an overall loss (including a carryover loss) from all activities.

A taxpayer's QPA income is calculated using the following formula: domestic production gross receipts less the sum of cost of goods sold allocable to such receipts and other expenses, losses, or deduction which are properly allocable to such receipts.

### *Payments to foreign affiliates*

A US corporation generally may claim a deduction for royalties, management service fees, and interest charges paid to foreign affiliates, to the extent the amounts are actually paid and are not in excess of what it would pay an unrelated entity, (i.e. are at arm's length). In addition, US withholding on these payments may be required.

### *Debt-to-equity rules*

Thin capitalisation rules may apply to disallow interest payments related to excess debt and re-characterise such payments as dividends. The interest expense deduction can be limited and suspended if more than 50% of the adjusted taxable income of a thinly-capitalised corporation (with similar rules for a corporate partner in a partnership) is sheltered by interest paid to a related party (or paid to a third-party but guaranteed by the related party) who is not subject to US tax on the income.

### *Employee benefit plans (pension plans and expenses)*
Through the Code, the government provides incentives for employers to provide retirement benefits to workers, including employee benefit, qualifying profit-sharing, or stock bonus plans. Usually, the employer will be allowed a current deduction for any contributions made to the fund, and the employee's tax liability will be deferred until the benefit is paid. For profit, non-government employers generally have two types of available plans, which generally are subject to the reporting and disclosure requirements set forth under the Employee Retirement Income Security Act of 1974 (ERISA).

The first category of employee benefit plans is the defined benefit plan, or more commonly known as a pension plan, to which an employer contributes money, on an ongoing basis, to cover the amount of retirement income owed to retired employees under the plan (which will vary based on years of service, average salary, and/or other factors). Any investment gains or losses will not affect the amount of benefits paid to participants but will affect the amount an employer needs to contribute in order to cover its obligation.

The second category of employee benefit plans is the defined contribution plan, or more commonly known in the United States as a '401(k) plan', to which an employer's contributions (if any) are allocated amongst the separate accounts of participating employees, who also may contribute to their respective accounts. Investment gains or losses and the history of contributions will affect the value of a participant's account at retirement but would not affect an employer's contributions since the employer is not obligated to ensure any specified level of benefit in the plan.

Non profits, including churches and government entities, have similar employee benefit plans, except different requirements apply. Small employers and self-employed individuals also have similar options available but are subject to different requirements.

### *Bribes, kickbacks, illegal payments*
An amount paid, directly or indirectly, to any person that is a bribe, kickback, or other illegal payment is not deductible.

### *Taxes*
See, for example, *State and municipal taxes under the section on Other taxes*.

### *Other significant items*
- Deductions for allowable charitable contributions may not exceed 10% of taxable income computed without regard to certain deductions, including charitable contributions themselves. Deductions for contributions so limited may be carried over to the five succeeding years, subject to the 10% limitation annually, as noted above.
- Bad debt resulting from a trade or business may be deducted in the year the debt becomes worthless. Determining the date the debt becomes worthless may present difficulty.
- No deduction generally is allowed for a contingent liability until such liability is fixed and determinable.
- No deduction generally is allowed for fines or penalties paid to the government for violation of any law.
- The cost of goodwill and most other intangibles assets generally is capitalised and amortisable rateably over 15 years.

- Generally, start up expenditures must be amortised over a 15 year period; however, a certain taxpayer may elect to deduct some expenses in the tax year in which the trade or business begins.
- Costs incurred for entertainment must meet strict tests in order to be deductible. The deduction for business meal and entertainment expenses is 50% of the expenses incurred. There are also limitations on the deductibility of international and domestic business travel expenses.
- Royalty payments, circulation costs, mine exploration, and development costs, and other miscellaneous costs of carrying on a business are deductible subject to certain conditions and limits.
- Depending on the taxpayer's tax accounting method, research and experimental expenditures may be deducted as incurred or treated as deferred expenses and amortised over a period of not less than 60 months; however, in general, the method used must be consistently applied.

## *Group taxation*

An affiliated group of US 'includible' corporations, consisting of a parent and subsidiaries directly or indirectly 80% owned, generally may offset the profits of one affiliate against the losses of another affiliate within the group by electing to file a consolidated federal income tax return. A foreign incorporated subsidiary may not be consolidated into the US group, except for certain Mexican and Canadian incorporated entities. A partnership may not be included in a consolidated return, even if it is 100% owned by members of an affiliated group, since a partnership is not a corporation. However, a member's earnings that flow through from a partnership are included as part of the consolidated group's taxable income or loss. Filing on a consolidated (combined) basis also is allowed (or may be required or prohibited) in certain states.

Sales, dividends, and other transactions between corporations that are members of the same group generally are deferred or eliminated until such time as a transaction occurs with a non-member of the group. Losses incurred on the sale of members of the group are disallowed under certain circumstances.

## *Tax credits and incentives*

### *Inbound investment*

There generally are no specific incentives related to inbound investment at the federal level, other than certain portfolio debt and bank deposit exceptions. The portfolio debt exception enables non-residents and foreign corporations to invest in certain obligations (which must meet certain statutory requirements to qualify as 'portfolio debt') in the United States without being subject to US income (or withholding) tax on the interest income. Certain state and local benefits may also be available.

### *General business credit*

Various business credits are available to provide special incentives for the achievement of certain economic objectives. In general, these credits are combined into one 'general business credit' for purposes of determining each credit's allowance limitation for the tax year. The general business credit that may be used for a tax year is limited to a tax based amount. In general, the current year's credit that cannot be used in a given year because of the credit's allowance limitation may be carried back to the tax year preceding the current year and carried forward to each of the 20 years following the current year.

In general, the current year business credit is a combination of the following credits:

- investment credit
- work opportunity credit
- alcohol fuels credit
- research credit
- low-income housing credit
- enhanced oil recovery credit
- disabled access credit for certain eligible small businesses
- renewable electricity production credit
- empowerment zone employment credit
- Indian employment credit
- employer social security credit
- orphan drug credit
- new markets tax credit
- small employer pension plan startup cost credit for eligible employers
- employer-provided child care credit
- railroad track maintenance credit
- biodiesel fuels credit
- low sulfur diesel fuel production credit
- marginal oil and gas well production credit
- distilled spirits credit
- advanced nuclear power facility production credit
- non-conventional source production credit
- new energy efficient home credit
- energy efficient appliance credit
- a portion of the alternative motor vehicle credit
- a portion of the alternative fuel vehicle refueling property credit
- Hurricane Katrina housing credit
- Hurricane Katrina employee retention credit
- Hurricane Rita employee retention credit
- Hurricane Wilma employee retention credit
- mine rescue team training credit
- agricultural chemicals security credit for eligible businesses
- differential wage payment credit
- carbon dioxide sequestration credit, and
- a portion of the new qualified plug-in electric drive motor vehicle credit for vehicles that will vary based on the date of purchase.

### *Employment credits*
A 'work opportunity tax credit' is available for employment of certain types of workers who began work for an employer after 30 September 1996 and before 1 September 2011. 'Creditable' wages generally are the first USD 6,000 of wages paid to each qualified employee for the year. The credit is 40% of creditable wages, for a maximum credit of USD 2,400.

### *Research and development (R&D)*
A credit against the federal tax equal to 20% of the sum of qualified research expenses incurred prior to 31 December 2009 in excess of the base amount (as discussed below) and basic research payments (as discussed below) to a qualified organisation may be obtained for certain periods. The base amount cannot be less than 50% of the current year's qualified research expenditures. In tax years ending after 8 August 2005, the research expense credit also includes 20% of the taxpayer's expenditures on qualified energy research undertaken by an energy research consortium. The 'Tax Relief,

U

Unemployment Insurance Reauthorization, and Job Creation Act of 2010' includes a retroactive two-year extension of the research credit and other expired business provisions, through the end of 2011.

In addition, for taxable years ending after 2006 taxpayers may be able to use the new alternative simplified credit (ASC) that does not use a gross receipts factor. The ASC generally equals 12% (14% in 2009) of qualified research expenditures (QRE) for taxable years that exceed 50% of the average QRE for the three taxable years preceding the credit determination year. Special transition rules apply to fiscal year 2006-2007 taxpayers.

Those taxpayers that, despite significant R&D investments, are unable to claim the standard R&D credit because their current R&D intensity is lower than during the credit's 1984–88 'fixed base' period may use an elective 'alternative incremental research credit' (AIRC). Under the AIRC, a graduated rate system applies to the extent that the taxpayer's current year qualified research expenses (QREs) exceed a specified percentage of its average gross receipts for the prior four years (the 'base amount'). This election to be subject to the alternative incremental credit regime applies to the tax year for which it is made and all later years unless the IRS consents to its revocation.

The deduction for R&D expenditures must be reduced by the entire amount of the credit unless an election is made to reduce the amount of the credit.

### *Puerto Rico*
Puerto Rico is the most populous and politically significant US possession. Puerto Rico corporations are considered foreign for US tax purposes. In general, Puerto Rico corporations are liable to the US for tax on income effectively connected to a US trade or business and on passive income from US sources and on US branch profits. Tax paid to the United States may be eligible for a foreign tax credit against Puerto Rico tax liability.

US corporations operating in Puerto Rico may take a credit against income from Puerto Rico sources. The credit applies to income from operating an active trade or business in Puerto Rico or from the sale of substantially all the assets of such a trade or business. For tax years beginning after 1995, this credit is subject to limitations and generally is available only to existing claimants. All claimants may also take the credit on possession source investment income received or accrued before 1 July 1996. The credit is repealed for tax years beginning after 2005.

### *Other US possessions*
The American Samoa, Guam, the Commonwealth of the Northern Mariana Islands, and the US Virgin Islands have their own independent tax departments. Accordingly, they have their own rules in addition to special provisions in the US tax code.

### *Qualified private activity bonds*
Interest income received on certain qualified private activity bonds generally is exempt from federal income tax. This enables a business enterprise to issue the bonds at a lower interest rate.

### *Foreign tax credit*
Generally, in any year, a taxpayer can choose whether to take as a credit (subject to limitation) or as a deduction foreign income, war profits, and excess profit taxes paid or accrued during the taxable year to any foreign country or US possession. A foreign tax credit (FTC) reduces US income tax liability dollar for dollar, while a deduction reduces

the US income tax liability at the marginal rate of the taxpayer. For taxpayers with net operating losses, the FTC is of no value in such year. However, a benefit might be received either in an earlier year (through a refund of previously paid taxes) or a later year (through a reduction of future taxes). It also should be noted that a taxpayer has an ability to switch from credit to deduction (or from deduction to credit) at any time in a 10-year period commencing when the foreign taxes were paid or accrued. Generally, a foreign tax credit may be carried back one year and, if not fully used, carried forward 10 years.

In addition, the FTC goes beyond direct taxes to include foreign taxes paid 'in lieu of' a tax upon income, war profits, or excess profits, which would otherwise generally be imposed. It also includes deemed-paid (indirect) taxes paid for certain US corporate shareholders of non-portfolio foreign corporations when actual or deemed dividends are received. Furthermore, the FTC system has numerous limitations to mitigate the potential abuses of the credit by the taxpayer.

### *Other incentives*

State and local governments provide numerous incentives to encourage business and, thus, employment in their jurisdictions.

## *Withholding taxes*

The US has entered into various income tax treaties with countries in order to avoid double taxation of the same income and to prevent tax evasion. The table below from IRS Publication 901 (April 2010) summarises the benefits resulting from these treaties.

| Recipient | Interest paid by US obligors general | Paid by US corporations general (1) | Dividends qualifying for direct dividend rate (1, 2) | Royalties* |

Notes

* Please note the tax rates and associated footnotes appearing in the 'Royalties' column in the table address three types of royalties, as denoted in the most recent IRS publication. These three are industrial royalties, motion picture and television copyright royalties, and 'Other' copyright royalties. The back slashes '/' between each figure and associated footnote(s) are meant to demarcate these three types of royalties, respectively.

1. No US tax is imposed on a dividend paid by a US corporation that received at least 80% of its gross income from an active foreign business for the three-year period before the dividend is declared.
2. The reduced rate applies to dividends paid by a subsidiary to a foreign parent corporation that has the required percentage of stock ownership. In some cases, the income of the subsidiary must meet certain requirements (e.g. a certain percentage of its total income must consist of income other than dividends and interest). For Italy, the reduced rate is 10% to 50% of the voting stock (for a 12-month period) of the company paying the dividends. For Japan, dividends received from a more than 50% owned corporate subsidiary are exempt if certain conditions are met.
3. The exemption or reduction in rate does not apply if the recipient has a permanent establishment in the United States and the property giving rise to the income is effectively connected with this permanent establishment. Under certain treaties, the exemption or reduction in rate also does not apply if the property producing the income is effectively connected with a fixed base in the United States from which the recipient performs independent personal services. Even with the treaty, if the income is not effectively connected with a trade or business in the United States by the recipient, the recipient will be considered as not having a permanent establishment in the United States under IRC section 894(b).
4. The exemption or reduction in rate does not apply if the recipient is engaged in a trade or business in the United States through a permanent establishment that is in the United States. However, if the income is not effectively connected with a trade or business in the United States by the recipient, the recipient will be considered as not having a permanent establishment in the United States to apply the reduced treaty rate to that item of income.
5. For Thailand, the rate is 5% for royalties on the use of any copyright of literary, artistic, or scientific work, including software. For Iceland the rate is 5% for trademarks and any information for rentals of industrial, commercial, or scientific equipment.
6. Interest determined with reference to the profits of the issuer or one of its associated enterprises is taxed at 15%.
7. Contingent interest that does not qualify as portfolio interest is treated as a dividend and is subject to the rates under columns 2 and 3, as appropriate.
8. The exemption applies only to interest on credits, loans, and other indebtedness connected with the financing of trade between the United States and the C.I.S. member. It does not include interest from the conduct of a general banking business.
9. The rate for royalties with respect to tangible personal property is 7% (5% in the case of Sri Lanka).
10. Tax imposed on 70% of gross royalties for rentals of industrial or scientific equipment.
11. The rate in column 2 applies to dividends paid by a regulated investment company (RIC) or a real estate investment trust (REIT). However, that rate applies to dividends paid by a REIT only if the beneficial owner of the dividends is an individual holding less than a 10% interest (25% in the case of Portugal, Spain, and Tunisia) in the REIT.
12. Royalties not taxed at the 5% or 8% rate are taxed at a 10% rate, unless footnote (3) applies.
13. The rate is 5% for interest (i) beneficially owned by a bank or other financial institution (including an insurance company), or (ii) paid due to a sale on credit of any industrial, commercial, or scientific equipment, or of any merchandise to an enterprise.
14. The rate is 10% if the interest is paid on a loan granted by a bank or similar financial institution. For Thailand, the 10% rate also applies to interest from an arm's-length sale on credit of equipment, merchandise, or services.
15. This is the rate for royalties for the use of, or the right to use, industrial, commercial, and scientific equipment. The rate for royalties for information concerning industrial, commercial and scientific know-how is subject to the rate in column 4 ('Other royalties').
16. The exemption does not apply to cinematographic items, or works on film, tape, or other means of reproduction for use in radio or television broadcasting.

17. Amounts paid to a pension fund or employee benefit organisation that are not derived from the carrying on of a business, directly or indirectly, by the fund or organisation are exempt.
18. The rate in column 2 applies to dividends paid by a regulated investment company (RIC). Dividends paid by a real estate investment trust (REIT) are subject to a 30% rate.
19. An election can be made to treat this interest income as if it were industrial and commercial profits taxable under article 8 of this treaty.
20. The rate is 4.9% for interest derived from (i) loans granted by banks and insurance companies, and (ii) bonds or securities that are regularly and substantially traded on a recognised securities market. The rate is 10% for interest not described in the preceding sentence and paid (i) by banks, or (ii) by the buyer of machinery and equipment to the seller due to a sale on credit.
21. The rate is 15% (10% for Bulgaria; 30% for Germany and Switzerland) for contingent interest that does not qualify as portfolio interest.
22. The rate is 15% for interest determined with reference to (i) receipts, sales, income, profits, or other cash flow of the debtor or a related person, (ii) any change in the value of any property of the debtor or a related person, or (iii) any dividend, partnership distribution, or similar payment made by the debtor to a related person.
23. Interest received by a financial institution is tax exempt. For Venezuela, the rate is 4.95% if the interest is beneficially owned by a financial institution (including an insurance company).
24. The rate in column 2 applies to dividends paid by a regulated investment company (RIC) or real estate investment trust (REIT). However, that rate applies to dividends paid by a REIT only if the beneficial owner of the dividends is (i) an individual holding not more than a 10% interest in the REIT, (ii) a person holding not more than 5% of any class of the REIT's stock and the dividends are paid on stock that is publicly traded, or (iii) a person holding not more than a 10% interest in the REIT and the REIT is diversified.
25. Interest paid or accrued on the sale of goods, merchandise, or services between enterprises is exempt. Interest paid or accrued on the sale on credit of industrial, commercial, or scientific equipment is exempt.
26. Dividends received from an 80%-owned corporate subsidiary are exempt if certain conditions are met.
27. Royalties for the use of, or right to use, a copyright of literary, artistic, or scientific work (excluding royalties for software, motion pictures, films, tapes, or other means of reproduction used for radio or television broadcasting) are exempt.
28. Exemption or reduced rate does not apply to amount paid under, or as part of, a conduit arrangement.
29. Interest is exempt if (i) paid to certain financial institutions, or (ii) paid on indebtedness from the sale on credit of equipment or merchandise.
30. Amounts paid to a pension fund that are not derived from the carrying on of a business, directly or indirectly, by the fund are exempt. This includes amounts paid by a REIT only if the conditions in footnote 31 are met. For Sweden, to be entitled to the exemption, the pension fund must not sell or make a contract to sell the holding from which the dividend is derived within two months of the date the pension fund acquired the holding.
31. The rate in column 2 applies to dividends paid by a regulated investment company (RIC) or real estate investment trust (REIT). However, that rate applies to dividends paid by a REIT only if the beneficial owner of the dividends is (i) an individual or a pension fund holding not more than a 10% interest in the REIT, (ii) a person holding not more than 5% of any class of the REIT's stock and the dividends are paid on stock that is publicly traded, or (iii) a person holding not more than a 10% interest in the REIT and the REIT is diversified. Dividends paid to a pension fund from a RIC, or a REIT that meets the above conditions, are exempt. For Sweden, the pension fund must also satisfy the requirements in footnote 30.
32. If the payments were for the use of, or the right to use, industrial, commercial, or scientific equipment, an election may be made to compute the tax on a net basis as if such income were attributable to a permanent establishment or fixed base in the US.
33. The exemption does not apply if the recipient of the gain is an individual who is present in the United States for more than 119 days during the year.
34. The rate applies to dividends paid by a real estate investment trust (REIT) only if the beneficial owner of the dividends is (i) an individual holding less than a 10% interest in the REIT, (ii) a person holding not more than 5% of any class of the REIT's stock and the dividends are paid on stock that is publicly traded, or (iii) a person holding not more than a 10% interest in the REIT and the REIT is diversified.

## *Tax administration*

### *Returns*

The US tax system is based on the principle of self-assessment. A corporate taxpayer is required to file an annual tax return (generally Form 1120) by the fifteenth day of the third month following the close of its tax year. A taxpayer can obtain an additional six month extension of time to file its tax return. Failure to timely file may result in penalties.

### *Important tax return due dates*

| Form No. | Title | Purpose | Due date |
|---|---|---|---|
| W-2 | Wage and Tax Statement | Employers must provide employees with statements regarding total compensation and amounts withheld during year. | Must be sent to employees on or before 31 January. |
| 1099 series | Various | Information returns to be provided to recipients of dividends and distributions, interest income, miscellaneous income, etc. | Must be sent on or before 31 January. |
| 1120 series, including 1120S (for S Corps) | US Corporation Income Tax Return | Income tax returns for domestic corporations or foreign corporations with US offices. | 15 March (Form 7004 may be filed to obtain an automatic six month extension) |
| Schedule K-1 | Partner's Share of Income (Loss) from an Electing Large Partnership | Information returns to be provided to partners by large partnerships. | 15 March |
| 1065 | US Return of Partnership Income | Information returns to be filed by large partnerships. | 15 April (Form 7004 may be filed to obtain an automatic six month extension) |
| State tax returns | Various | Income tax returns for states where corporation carries on trade/business. | Varies – often 15 April |

### *Payment of tax*

A taxpayer's tax liability generally is required to be prepaid throughout the year in four equal estimated payments and fully paid by the date the tax return is initially due. For calendar year corporations, the tax instalment payments are due by the fifteenth day of April, June, and September, and the tax liability must be fully paid by the fifteenth day of December. For fiscal year corporations, the tax instalment payments are due by the fifteenth day of the fourth, sixth, and ninth months, and the tax must be fully paid by the fifteenth day of the twelfth month of the tax year. Generally, no extensions to pay are allowed. Failure to pay the tax by the due dates as indicated above can result in estimated tax and late payment penalties and interest charges.

The instalment payments must include estimates of regular corporate income tax, alternative minimum tax, environmental tax, and, for foreign corporations, the tax on gross transportation income. To avoid a penalty, corporations must calculate the instalment payments based on at least 25% of the lesser of (i) the tax shown on the current tax return, or (ii) the prior year's tax liability, provided that the tax liability was a positive amount in the prior year and that such year consisted of 12 months. However, corporations with taxable income of at least USD 1 million (before use of NOLs or capital loss carryforwards) in any of the three preceding years are not permitted to calculate the instalment based payment on the prior year's tax liability, except in determining the first instalment payment. Instead, such corporations must calculate the instalment payments based on the tax shown on the current tax return.

Corporations with more than USD 1 billion in assets will be required to make estimated tax payments that are 100.25% of the amount otherwise due in July, August, or September of 2014. Such overpayments will be balanced out in October, November, or

December of 2014 when payments of 99.75% of the amount otherwise due will be paid by corporations with more than USD 1 billion in assets.

Taxpayers that acquired and placed in service property on or after 8 September 2010, and before 1 January 2011, have based their 2010 estimated tax payments on the assumption that 100% expensing would not be enacted. With enactment of 100% expensing via the 'Tax Relief, Unemployment Insurance Reauthorization, and Job Creation Act of 2010', these taxpayers may find they have overpaid 2010 estimated taxes. Taxpayers that have overpaid estimated taxes generally can recoup the overpayment only after the year in which the overpayments were made, by filing the appropriate federal income tax return or a Form 4466, Corporation Application for Quick Refund of Overpayment of Estimated Tax. A corporation may file a Form 4466 if its overpayment is at least USD 500 and 10% of the expected tax liability.

### *Audit cycle*

Generally, the US tax system is based on self-assessment; however, many large and midsize businesses are under continuous audit by the IRS and state tax authorities. The audits may include the entire list of taxes for which the business is liable. Smaller business and persons with lower incomes are generally subject to audit on a random basis.

Currently, the IRS is focused on abusive payments related to contribution to capital of a corporation, domestic manufacturing deduction, foreign earnings repatriation, foreign tax credit generators, repairs vs. capitalisation change in accounting method, research credit claims, transfer of intangibles/offshore cost sharing, withholding taxes, and employee classification.

### *Statute of limitations*

The IRS generally has three years after an original return is filed to assess income taxes. A return will be deemed to have been filed on its due date, even if the return is actually filed on an earlier date.

### *Tax shelter*

Treasury regulations require taxpayers to disclose transactions determined to be abusive or possibly abusive. Current information on these transactions, known as listed and reportable transactions, is available from the IRS website (www.irs.gov).

### *Tax accounting and internal controls*

ASC 740, Income Taxes (formerly known as FASB Statement No. 109, Accounting for Income Taxes) addresses how companies should account for and report the effects of taxes based on income. ASC 740's principles and requirements apply to domestic and foreign entities in preparing financial statements in accordance with US generally accepted accounting principles (GAAP), including not-for-profit entities with activities that are subject to income taxes. This scope includes: (i) domestic federal (national) income taxes (US federal income taxes for US enterprises) and foreign, state, and local (including franchise) taxes based on income, and (ii) an enterprise's domestic and foreign operations that are consolidated, combined, or accounted for by the equity method.

In recent years, controls around the accounting for income taxes have been a critical source of material weaknesses in companies' internal controls over financial reporting. Accounting for income taxes also has been a primary reason for restating financial statements. Management should ensure that its judgments and estimates are reasonable (e.g. assessing the need for a valuation allowance on deferred taxes) and that the underlying internal control processes are reliable.

The adoption of International Financial Reporting Standards (IFRS) in the United States is set by the Securities and Exchange Commission (SEC). The timeline included in the SEC's roadmap provides for adoption of IFRS in the United States between 2014 and 2016. The SEC has stated that it will reassess the transition to IFRS in 2011.

### *Accounting for income taxes*

For US federal tax purposes, the two most important characteristics of a tax method of accounting are (i) timing, and (ii) consistency. If the method does not affect the timing for including items of income or claiming deductions, it is not an accounting method and generally IRS approval is not needed to change it. In order to affect timing, the accounting method must determine the year in which an income or expense item is to be reported.

In general, in order to establish an accounting method, the method must be consistently applied. Once an accounting method has been adopted for federal tax purposes, any change must be requested by the taxpayer and approved by the IRS. Changes in accounting methods cannot be made through amending returns. The two most common methods of accounting are the accrual basis and cash basis methods.

### *Penalties*

Civil and criminal penalties may be imposed for failing to follow the IRC when paying US taxes. The civil penalty provisions may be divided into four categories: delinquency penalties, accuracy-related penalties, information reporting penalties, and preparer, promoter, and protester penalties. Many, but not all, have exception provisions to cover reasonable cause. In addition many have provisions directing how the penalties interact with the other penalties.

These four main civil penalty categories may further be divided. First the delinquency penalties may be divided into failure to file, failure to pay, and failure to make timely deposits of tax. Failure to make timely deposits of tax applies to taxpayers required to make instalment payments and withholding tax payments.

Second, the penalties relating to the accuracy of tax returns are divided into the negligence penalty, the substantial understatement penalty, substantial overstatement of pension liabilities, substantial estate or gift tax valuation underestimate, and the valuation penalties. These penalties are also coordinated with the fraud penalty to eliminate any stacking of the penalties. Again, like other provisions, the fraud penalty is not intended to be imposed as a stacked penalty.

The third category of penalties is the information reporting penalties. These penalties may be imposed upon those who only have a duty to report information to the IRS.

The fourth and final major categories of civil penalties are the preparer, promoter, and protester penalties. Currently the most notable of these is the return preparer penalty for which there is a penalty for a position on a return for which the preparer did not have substantial authority. Also included in this provision is a penalty for wilful or reckless attempt to understate the tax liability of another person. Additionally, return preparer penalties may be imposed for failure to furnish a copy of a return or claim for refund to the taxpayer, sign the return or claim for refund, furnish his or her identifying number, or file a correct information return.

Other promoter and protestor penalties include a penalty for promoting abusive tax shelters, aiding and abetting the understatement of tax liability, and filing frivolous income tax returns. Additionally, a court may award sanctions and costs if a person institutes or maintains a proceeding primarily for delay, takes a position that is frivolous, or unreasonably fails to pursue available administrative remedies.

In addition to these major civil penalties, international tax related penalties for failures other than timely and accurate filing (e.g. wilful failure to report international boycott activity, failure of an agent to furnish a notice of a false affidavit relating to the withholding tax on dispositions of US real property interests, failure of a US person to furnish information relating to controlled foreign corporations and controlled foreign partnerships, failure of a US person to report foreign bank accounts, etc.) exist. Pension and employee benefit related tax penalties exist that protect the policy reasons for the tax incentives including, most notably, early withdrawal of pension funds. Another group of specialised penalties apply to exempt organisations.

Criminal penalties exist for situations when the failures to stay within the tax system are more egregious. Although applicable to corporate taxpayers, they are applied more frequently to individuals.

In addition to the penalty provisions, interest at statutory rates generally applies to underpayments of tax.

## Significant developments

Uruguay has signed double tax treaties (DTTs) following the model of the Organisation for Economic Co-operation and Development (OECD) with Germany (renegotiation), India, Liechtenstein, Malta, Mexico (in force as of January 2011), Portugal, Spain (in force as of 24 April 2011), and Switzerland, as well as a memorandum to cooperate in the exchange of information with France. The memorandum with France is already approved by the Uruguayan Parliament. DTTs with Belgium, Chile, Malaysia, Equator, Luxembourg, and South Korea are currently under negotiation.

Uruguay has modified the Investment Law, achieving a better framework for local and foreign investments in the country. Three years of experience with the promotional regime in force since 2007 and a new social and economic reality led the authorities to amend certain provisions, maintaining the tax benefits to be granted.

The amendments follow, among others, these objectives:

- Improve the regime in order to connect the investments being promoted with the tax benefits being granted.
- Promote the generation of qualified employment.
- Encourage geographic decentralization.
- Promote production that generates more value added.
- Increase the incentives granted to investments that achieve cleaner energy production; improve technological investigation, innovation, and development; improve energy efficiency; and achieve adaptation to climate changes.
- Promote the development of micro and small-investment projects.

## Taxes on corporate income

Net income derived from business activities conducted in Uruguay, obtained by legal entities resident in Uruguay and non-residents operating through a PE in Uruguay, is taxed at a corporate income tax (CIT) rate of 25% under the source principal (i.e. the territorial system of taxation). Accordingly, Uruguay taxes only income that is derived from activities conducted within its borders, income generated from property located in Uruguayan territory, or income derived from the economic use of rights within its territory.

In order to determine the net taxable income, all accrued expenses that are necessary for the generation of Uruguayan-source income and that are duly documented are allowed as deductions. Additionally, a taxpayer will be able to deduct expenses from its gross income if such expenses are subject to taxation (either foreign or local taxation) in the hands of the other party. A compulsory proportional deduction must be calculated if the tax is at a rate that is lower than 25%.

A 12% withholding tax (WHT) is imposed on Uruguayan-sourced income obtained by non-residents, except in cases where the income is obtained through the operations of a PE in Uruguay *(see the Withholding taxes section for more information)*.

### *Trading companies*

Uruguayan corporations that sell and buy foreign goods or services from Uruguay (which are not physically introduced to the country, in the case of goods, or which are not economically used in Uruguay, in the case of services) may determine the net Uruguayan-source income on a notional basis of 3% of the gross margin (difference between the selling price and the purchase price). This gross margin has to be compliant with transfer pricing rules (in line with OECD guidelines). The applicable effective CIT rate is 0.75% (25% x 3%).

## *Corporate residence*

Legal entities are deemed to be resident in Uruguay when they are incorporated according to the local legislation.

### *Permanent establishment (PE)*

The concept of PE in the Uruguayan tax legislation follows, in general terms, OECD. From a Uruguayan law perspective, the term PE means a fixed place of business through which the business of an enterprise is wholly or partly carried on in Uruguay. The term PE especially includes: (i) places of management; (ii) branches; (iii) offices; (iv) factories; (v) workshops; (vi) mines; oil or gas wells; quarries or any other place of extraction of natural resources; (vii) buildings, constructions, installation projects, or the management activities associated to them, when they last more than three months; and (viii) services rendered (in particular consultancy) by a non-resident through employees or hired personnel in Uruguay during a period or periods exceeding six months on an annual basis. Please note that item (viii) constitutes an exception to the OECD model and is based on the provisions of the United Nations (UN) model.

## *Other taxes*

### *Value-added tax (VAT)*

Uruguayan VAT is levied at a general rate of 22% on the provision of services and on the circulation of goods within the limits of the Uruguayan territory. The import of goods and value-added in regard to the construction of immovable assets are also within the scope of this tax.

The following items are either subject to a reduced 10% VAT rate or exempt from VAT entirely.

Items subject to the 10% VAT rate:

- Food and medicines.
- Hotel services.
- Health services.
- The first sale of immovable assets.

Items exempt from VAT:

- Milk.
- Books.
- Magazines.
- Agriculture machinery.
- Accessories.

Exports are VAT zero-rated. VAT on purchases of the exporters can be recovered in the form of credit certificates that can be used for the payment of other taxes as well.

### *Customs duties*

- Consular duty: 2% (from 1 January 2011).
- Customs computer services duty: a scale flat duty, with a limit of 50 US dollars (USD).
- Customs extraordinary duty: a scale flat duty, with a limit of USD 600.
- Global customs duty (TGA): depends on the origin of goods. If they come from Mercosur, the TGA is zero. If not, it varies depending on the type of product, with a maximum rate of 20%, with exceptional levels that range from 23% to 35% (corresponding mainly to certain types of shoes, sugar, and automotives).
- Commission of BROU: 0.05%.

All imports and exports duties are applied on the 'customs value' (in general, in imports it is considered as cost, insurance, and freight (CIF), and in exports as freight on board (FOB)).

On imports, VAT is also applicable according to the following detail:

- Goods subject to the general VAT rate (22%):
  - 'Import VAT' at the rate of 22%.
  - 'Advanced payment import VAT' at a rate of 10%.
- Goods subject to the reduced VAT rate (10%):
  - 'Import VAT' at the rate of 10%.
  - 'Advanced payment import VAT' at a rate of 3%.

The tax base of VAT on imports is the customs value plus the customs duties.

Additionally, some goods are also subject to an 'advanced payment import on account of CIT' at a rate of 10%, which can be deducted from the amount of CIT for the fiscal year.

### *Export duties*

Exports are not subject to any taxes, and there are almost no prohibitions regarding the type of goods to be exported. On the contrary, several instruments are offered to promote exports, such as the reimbursement of taxes. For VAT on exports, *please see VAT above.*

For the reimbursement of indirect taxes, the exporter may recover internal taxes that are added to the cost of the products exported. The amount to be reimbursed is a percentage of the FOB value set by the Executive Power for each product.

Additionally, temporary admission consists of the import of raw materials, pieces, motors, package material, and other industrial input without import duties or taxes. To be subject to this customs duties exemption, the company has to export the finished goods within 18 months from the introduction of the exempt goods or materials. The subsequent local sale of such finished goods is not entitled to this benefit.

### *Excise tax*
In general, excise tax applies on the first transaction effected in the domestic market by manufacturers or importers of goods. Exports are not taxable.

Excise tax rates vary for each item, and they are generally fixed by the government within maximum parameters established by law.

Goods subject to the highest rates are alcoholic beverages (from 20.20% to 80%, depending on the alcohol degree), tobacco (from 28% to 70%), lubricants (from 5% to 35%) gasoline, fuel, and other petroleum products (from 5% to 133%).

### *Net wealth tax (NWT)*
All types of legal entities and business enterprise owners are subject to a NWT at a rate of 1.5% on the value of net assets. This tax also follows the source principle, whereby only assets located or economically used in Uruguay are taxable. Taxpayers may reduce their capital tax liability in determining the NWT basis, up to their total amount of CIT for the fiscal year. In practice, taxpayers deduct 1%, which was established prior to the tax reform law.

The deduction of liabilities from the amount of taxable assets to determine the NWT basis is limited to: (i) the average of debts with financial institutions, (ii) debts with suppliers of goods and services, (iii) taxes not yet due, (iv) debts with governments, international credit offices of which Uruguay is a member and with foreign state financial institutions that lend funds for long-term productive projects, and (v) debts documented in debentures and obligations, if their emission is done in a public offering and such papers are quoted in a stock exchange.

### *Property taxes*
Regarding taxes of relevance for those doing business in Uruguay, *please see Net Wealth Tax above.* There are additional property taxes of less significance, levied by Municipal authorities (e.g. Contribución Inmobiliaria) and by National authorities (e.g. Impuesto de Primaria).

### *Tax of control of corporations*
Upon the set up of a corporation, a tax is payable at a 1.5% rate on a notional basis amount, which is determined annually by the authorities. For fiscal year 2011, the estimated amount of this tax (lump sum) is approximately USD 950.

This tax is also due annually at the end of each fiscal year, at a rate of 0.75% on said notional amount, and can be deducted from the NWT. For fiscal year 2011, the estimated amount of this tax (lump sum) is approximately USD 475.

### *Tax on real estate transfer*
A tax on real estate transfer applies to the transfer of immovable assets. Transfer is defined in an ample sense, as a sale, a cession of the right to use, a transfer of inheritance rights, etc.

Both parties to the transfer contract are subject to this tax at a rate of 2% on the property’s tax value (according to a National Register, a value generally lower than market value). When the property is transferred without payment, the beneficiary pays tax at a rate of 4% on the property tax valuation, except in instances where the property is transferred to direct heirs or legatees, who pay this tax at a rate of 3%.

### *Stamp taxes*
Stamp taxes are not applicable in Uruguay.

## *Branch income*

CIT is imposed at a rate of 25% on net income derived from business activities carried out in Uruguay. A 7% WHT is imposed on profits remitted or credited to a home office. Dividends and/or profits paid or credited to non-resident shareholders will not be subject to WHT when they are paid out of non-taxable income for CIT purposes.

## *Income determination*

### *Inventory valuation*
Replacement cost is permitted for tax purposes, as well as the first in first out (FIFO), last in first out (LIFO), or average cost methods, irrespective of the inventory valuation method used for accounting purposes.

### *Capital gains*
Capital gains are treated as ordinary income, except for capital gains on property located in rural areas, which is exempt from tax under certain conditions.

### *Inter-company dividends*
Dividends received from local subsidiaries are exempt. Dividends received from foreign subsidiaries are out of the scope of this tax since they are considered foreign sourced, thus non-taxable income.

### *Foreign income*
Uruguayan legal entities (CIT taxpayers) and non-residents operating through a PE in Uruguay are only subject to tax on income from Uruguayan sources under the territorial system of taxation. Hence, foreign-source income is not subject to tax.

Income derived from activities performed, assets located, or rights utilised outside Uruguay, regardless of the nationality, domicile, or residence of the parties participating in the transactions and the place where the transaction agreements are subscribed, is not subject to CIT.

### *Income adjustment for inflation*
An income adjustment for inflation has been in force since 1 January 1981 and is calculated by multiplying the variation in the wholesalers' price index for the financial year by the difference between:

1. total assets at the beginning of the year (excluding fixed assets) and
2. total liabilities at the beginning of the year.

If (1) is higher than (2), then an inflation loss adjustment is deducted from gross income. However, if (2) is higher than (1), then an inflation gain adjustment is added.

## Deductions

As a general rule, duly documented expenses that are necessary to obtain and preserve gross taxable income are tax deductible. On the contrary, those expenses associated with deriving or preserving income not subject to income tax are not deductible from the taxable basis.

### Depreciation and depletion

Straight-line depreciation over useful life is mandatory. Specific rates exist for the following cases: (i) 2% per year for urban buildings, (ii) 3% per year for rural buildings, and (iii) no less than 10% per year for new vehicles. Other rates are accepted if economically justified. No conformity between book and tax depreciation is required.

Percentages for depletion computed on the cost of natural resource properties are allowed in accordance with generally accepted criteria.

Depreciation and depletion percentages are computed on the historical cost of fixed assets revaluated at year-end, based on the variation of the wholesalers' price index. Capital gains derived from the revaluation of fixed assets are not taxable income.

### Taxes

CIT and NWT are not deductible.

### Net operating losses

Losses may be carried forward and deducted from the net taxable income of the following five years, once adjusted for inflation. There are no loss carrybacks.

### Payments to foreign affiliates

All accrued expenses that are necessary for the generation of Uruguayan-source income and that are duly documented are allowed as deductions. Additionally, a taxpayer may deduct expenses from its gross income provided such expenses are subject to taxation (either via foreign or local taxation) in the hands of the other party. A compulsory proportional deduction must be calculated if the tax is at a rate that is lower than the CIT rate of 25%.

## Group taxation

Group taxation is not permitted in Uruguay.

### Transfer pricing rules

As a general principle, transfer pricing rules are applicable to international transactions between related parties. However, Uruguayan legislation has extended the scope of these regulations to transactions carried out with low-tax or no-tax jurisdictions or regimes (either international or domestic) and to certain operations through third intermediaries. Domestic transactions with Uruguayan Free Zone users fall under this category.

The definition adopted by the law for related parties is quite broad. Such a relationship is configured when both parties are subject (directly or indirectly) to the management or control of the same individuals or legal entities, or when they have power of decision to direct or define the taxpayer´s activities due either to their participation in capital interest, the level of their credit rights, or their functional or any other type of influence (whether contractual or not).

### *Thin capitalisation*
Thin capitalisation rules do not apply in Uruguay.

## *Tax credits and incentives*

### *CIT reduction for income reinvested in fixed assets*
40% of income reinvested in the purchase of (i) industrial and agricultural machinery, (ii) vehicles and installations, (iii) computers, (iv) telecommunications equipment, and (v) some assets for the tourism industry is exempt from CIT.

20% of income reinvested in the construction and expansion of industrial, agricultural, and tourism buildings is exempt from CIT (limited to 40% of net taxable income in the year of expenditure).

The joint amount of said investments can be deducted from the taxable basis, with a limit of 40% of the annual net profit, once the amount of other exemptions has been deducted. The excess can be deducted (with the same limitations) in the following two tax periods. It is important to mention that income exempt by these provisions cannot be distributed and must be retained as a reserve account, which ultimately can only be capitalised.

### *NWT exemption*
Movable fixed assets directly connected to the industrial cycle and equipment for data processing are exempt from NWT.

### *Investments law (IL)*
Uruguay has modified the IL, achieving a better framework for local and foreign investments carried out in the country. To obtain tax benefits, the IL requires that enterprises obtain a government statement in this regard. The Bureau of Investor Assistance is in charge of monitoring the correct compliance of these projects.

The IL grants two types of benefits:

#### Automatic benefits
This kind of benefit is only for manufacturing, extractive, or farming/ranching activities, and includes:

- Exemption from NWT for chattel property directly engaged in the production cycle and data-processing equipment.
- Exemption from VAT and CIT paid on the importation of such goods, and reimbursement of VAT in the case of locally purchased items.

#### Discretionary benefits
Benefits that may be obtained at the discretion of the Executive Power for any type of business activity (not cumulative with automatic benefits) include:

- Tax exemptions on importation of fixed assets items.
- NWT exemptions: permanent for chattel property items, for a period of eight years for construction work in Montevideo (capital city), and for a period of ten years in the rest of the country.
- VAT reimbursement on local purchase of goods and services for civil construction work.

- Increased deductions for CIT in respect of fees and remunerations related to technological developments.
- Exemption from CIT, depending on the nature and size of the project to be carried out. The Executive Power takes into account the following criteria to grant this benefit:
  - Addition of technology to improve competitiveness.
  - Contribution to export growth and diversification.
  - Contribution to geographic decentralisation.
  - Improvement of technological investigation, innovation, and development.
  - Generation of employment.

### *Auto-saving 'direction' benefit*
The auto-saving 'direction' benefit allows a company to deduct from the CIT basis the amount of the capital increase that occurred as a consequence of the reserves capitalisation or of the in-kind distribution of shares, for an amount equivalent to the investment carried out with the investor's own funds. The amount of the CIT deduction and the period/s to which said exemption will apply is granted by the government through a statement issued by the Executive Power.

### *Free zones (FZ)*
Following the approval of the FZ law in 1987, this system has become an important tool for attracting investments to Uruguay.

It has been utilized for carrying out traditional activities in the FZ (warehousing, logistics, and distribution), for the provision of services (software, finance, call centres, etc.) and for manufacturing activities such as cellulose pulp and leather production. In a clear sign of stability, none of the administrations in office over the last three decades has modified the basics of the FZ system.

The law defines FZ as privately or publicly owned isolated and fenced off areas of Uruguayan territory determined by the Executive Branch with the purpose of carrying out all types of manufacturing, commercial, and service activities within the zone, while enjoying tax exemptions and other benefits envisaged in the law.

Companies in these areas cannot carry out industrial, trading, or service activities in the non-FZ Uruguayan territory, except for services expressly authorized by the government (listed below) but are allowed to render all types of services within the FZ or to third countries.

FZ users are allowed to render the following services to the non-FZ Uruguayan territory (the provision of these services is subject to the general tax system, not to the tax holidays):

- International call centres, except for those whose main destination is the non-FZ Uruguayan territory.
- E-mail, distance learning, electronic signature certificate issuance.
- Software production, technology consulting, and related training services.
- Accounting, administration, and management services rendered to related companies who carry out port and shipping logistics activities, if said services are lower than 20% of the total income obtained during the fiscal year.
- Processing of film material and data.

FZ users are exempt from all current and future national taxes, including those taxes for which a specific legal exemption is required, in connection with the activities performed within the FZ. The Uruguayan government guarantees all the exemptions and benefits granted by the law for the term of their contracts. FZ can be located outside or inside the cities; it depends on the kind of FZ.

Social security taxes as well as certain WHTs are excluded from the exemption. Income tax WHT on payments of dividends made by these companies to their non-resident shareholders are exempt.

### *Holding companies*

Uruguayan legal entities holding shares in non-resident entities or investing in assets not located in Uruguay are not subject to tax (due to the application of the source principle).

### *Printing industry incentives*

Companies that print books and educational material are exempt from the NWT and VAT.

### *Electric power industry incentives*

Companies which generate electric power from non-traditional energy sources have special benefits regarding CIT.

### *Shipping industry incentives*

Imports of material, supplies, and equipment required for the construction, maintenance, and repair of shipyards or vessels are exempt from CIT.

### *Water and air transportation incentives*

The income of water and air transportation companies is tax exempt. In the case of foreign companies, the exemption is subject to reciprocal treatment. The government may exempt from CIT companies engaged in transportation by land, subject also to the conditions of reciprocal treatment.

### *Forestry plantation incentives*

Income derived from forestry plantations up to July 2007 is tax exempt. Income derived from new forestry plantations is also tax exempt, but under strict conditions, such as wood quality.

### *Software industry incentives*

50% of the income derived from the production, development, implementation, updating, and correction of previous versions (amongst others) of software was exempt from CIT for fiscal years ending between 1 January 2010 and 31 December 2010. There were some requirements for exemption, such as the tasks had to be directly developed by the computer support producer. Related services had to be rendered to logical support producers as well.

### *Industrial park incentives*

Individuals or legal entities that establish industrial parks within Uruguayan territory, as well as companies located within such industrial parks, are entitled to CIT exemption for their industrial equipment, excise tax and VAT exemption on the acquisitions of such goods, and other benefits.

### *Tourism industry incentives*

Investments in the tourism industry have tax benefits related to CIT, VAT, and NWT, as follows:

U

- Deduction of up to 40% of CIT in investments made in the fiscal year in hotel equipment and equipment for improving entertainment and information services to tourists and deduction of up to 20% of CIT in investments made in construction and expansion of hotel buildings, with the limits mentioned in previous sections (40% of the annual net profit, once the amount of other exemptions has been deducted).
- VAT refund included in local acquisitions of goods and services for construction, improvement, or expansion of tourist complexes.
- VAT exemption on import of goods for construction, improvement, or expansion of tourist complexes.
- The list of operations included in the concept of exports of services for VAT purposes (thus zero-rated) was broadened to include, among others, services related to accommodation that hotels, apartments, and rural tourism establishments provide to tourists.
- NWT exemption for ten years on investments in infrastructure and civil work for construction, improvement, or expansion of tourist complexes.
- NWT exemption for four years on fixed assets investment for tourist complexes.
- 50% exemption of import duties on materials and goods for construction, improvement, or expansion as well as fixed assets of tourist complexes.

## *Withholding taxes*

All Uruguayan-sourced income obtained by non-residents (other than those obtained through a PE in Uruguay) is taxed at flat rates of up to 12% on gross income, with some exceptions. This tax is basically collected by way of WHT.

The exceptions are as follows:

- Interest on deposits in local currency for terms exceeding one year is taxed at 3%.
- Interest on public bonds is not taxed.
- Dividends paid or credited by CIT taxpayers are taxed at 7%, provided they are derived from taxable income.

Profits originated in the alienation of stock of CIT taxpayer companies obtained by non-residents are exempt only if the capital of the local company is expressed in bearer shares. The alienation of registered stock is taxed at a rate of 12%.

Although the Uruguayan tax law follows the source principle, technical services (defined as services rendered in the fields of management, technical administration, or advice of any kind) rendered by non-residents but associated with taxable income obtained by the local user in Uruguay are considered to be Uruguayan sourced for tax purposes and subject to WHT. However, when the taxable income obtained by the local user of the service does not exceed 10% of its total income, then only 5% of the service fee paid or credited abroad will be subject to non-resident WHT. Therefore, in these cases, the effective WHT rate is only 0.6% (5% x 12%).

## *Tax administration*

### *Returns*

VAT, CIT, and NWT are self assessed. CIT and NWT returns are filed on a fiscal-year basis (on the fourth month following the date of the year end). VAT and excise tax rules require monthly payments and/or tax returns. Also, WHTs are declared and payable to the Tax Office on the month following the one in which the tax was due.

***Payment of tax***
Income and capital taxes are paid monthly by way of advanced payments, which are calculated on the basis of the previous year's tax. The difference between the advanced tax payments and the total annual tax calculated at fiscal year-end is paid four months after the fiscal year-end.

## Significant developments

The Tax Code of the Republic of Uzbekistan was introduced on 1 January 2008 to consolidate the previous Tax Code and separate instructions on specific taxes. The Tax Code is amended annually, and the currently effective version reflects amendments as of 1 January 2011. The most notable amendments as of that date are as follows.

### Value-added tax (VAT)

Import of medicines that had previously been exempt from VAT is now subject to the restriction that relief is only granted to medicines that are not available from local manufacturers.

The exemption from VAT on sale of precious metals has been abolished.

Sale of cotton fibre within Uzbekistan is subject to zero-rated VAT.

### Property tax

A new mandatory charge was introduced at 0.25% of the historic value of fully depreciated equipment that continues to be used by enterprises. At the same time, such enterprises may benefit from exemption from corporate income tax (and unified tax payment) in respect of revenue from sale/disposal of such equipment.

### Unified social payment (USP)

Employment income paid at expense of grants issued by states, international and foreign governmental organisations, international and foreign non-governmental organisations, as well as grants issued under international agreements of Uzbekistan, is exempt from USP (otherwise chargeable at 25%).

## Taxes on corporate income

Resident corporations pay corporate income tax (CIT) on their worldwide income, whereas non-residents (i.e. foreign legal entities that have a permanent establishment (PE) in Uzbekistan or have income from sources in Uzbekistan not associated with a PE) pay CIT on income resulting from activities/sources in Uzbekistan.

Non-resident corporations are taxed directly at the level of their Uzbek PE, if there is one, or via withholding tax (WHT) at the source of payment of the Uzbek source income.

CIT is charged on taxable profit calculated as a difference between gross income and deductible expenses reduced by applicable incentives granted by the Tax Code, other laws, or presidential decrees.

The CIT rate is set annually by presidential decree. By virtue of the government's annual initiatives for rate reduction, the CIT rate has been reduced over time as follows:

| | | |
|---|---|---|
| 2011: 9% | 2006: 12% | 2001: 26% |
| 2010: 9% | 2005: 15% | 2000: 31% |
| 2009: 10% | 2004: 18% | 1999: 33% |
| 2008: 10% | 2003: 20% | 1998: 35% |
| 2007: 10% | 2002: 24% | |

In 2011, enterprises (i.e. legal entities) are generally subject to CIT at the rate of 9%. Commercial banks are subject to CIT at the rate of 15%.

### *Local income taxes*
There is a local tax on accounting profit (less CIT), an infrastructure development tax, which is charged at a maximum rate of 8%.

## *Corporate residence*

For Uzbek tax purposes, corporations are classified as resident or non-resident. A resident corporation is a legal entity that passed state registration in Uzbekistan (i.e. Uzbek legal entity). Other legal entities would be regarded as non-resident corporations for tax purposes.

### *Permanent establishment (PE)*
PE is defined by the Tax Code as "any place through which non-resident carries out entrepreneurial activity in the Republic of Uzbekistan, including activity carried out through an authorised person. PE would also be existent where non-resident carries on entrepreneurial activity for 183 days (or more) in any consequent 12-month period ending in the current tax period".

## *Other taxes*

### *Value-added tax (VAT)*
Legal entities are subject to VAT, which is applied to taxable turnover and taxable imports. The rate for taxable turnover is 20%. This rate also applies to taxable imports, for which the tax base is determined as the customs value plus import duties and excise tax (on excise-liable goods). Export of goods for hard currency is generally zero-rated. Insurance and most types of financial services are exempt.

### *Excise tax*
Legal entities producing or importing excise-able goods are subject to excise tax. Rates vary from 5% to 200% depending on the type of goods produced/imported. The taxable base is determined as the value of produced/imported goods excluding VAT.

U

### *Customs duties*
Import of certain goods to Uzbekistan is subject to customs duties. The taxable base is determined as the customs value of imported goods. Rates of customs duties vary from 5% to 40% depending on the type of imported goods. There is also a customs clearance fee of 0.2% from the customs value of imported goods.

### *Stamp duties*
According to Uzbek legislation, stamp duty is an obligatory payment charged for performance of legal actions and/or issuance of legal documents. The following actions, among others, are subject to stamp duties: filing claims, performing notary actions, civil registration, state registration of a legal entity, obtaining licenses/ permits to carry out certain activities, etc.

The rates of stamp duties generally vary from o.5 to 20 times minimum monthly wage (MMW, approximately USD 29), depending on the type of action executed. For instance, duty for filing a claim depends on the amount of claim. If the amount is less than 20 MMW, the duty comprises 5% of this amount; if the amount exceeds 80 MMW, the duty is 20% of this amount. Duty for notarization of copies of documents for legal entities is 2% of the MMW per each page of the document. Duty for registration of legal entities with foreign investment comprises 5 times the MMW plus USD 500.

### *Property tax*
The property tax rate in 2011 is 3.5% for legal entities. The tax is computed quarterly, based on the net book value of the fixed assets, adjusted for the effect of revaluation, which should be performed annually on 1 January, the residual value of intangibles, and the value of overdue construction-in-progress. The rate is doubled for equipment not installed in due time.

As of 1 January 2011, a charge of 0.25% of the historic value of outdated equipment will be collected from legal entities (except for micro-firms and small enterprises) for exploitation of fully depreciated equipment.

Newly opened enterprises are exempt from property tax for a period of two years from their date of registration, unless such enterprises have been created on the basis of production facilities or assets of existing enterprises. There is also a rate reduction benefit available to companies engaged in production and export of goods (work, services). Property tax exemption is also available in respect to leased property, for a period of the lease, and new technological equipment, for a period of up to five years.

### *Turnover taxes*
There are three mandatory contributions that are charged on the enterprise's gross annual turnover (less VAT and excise tax):

- Road fund to be imposed at a rate of 1.4%.
- Pension fund at a rate of 1.6%.
- Educational institutions fund (for reconstruction, capital repair, and equipment) at a rate of 0.5%.

The taxable base (and tax rate in exceptional cases) for these mandatory contributions may differ depending on the type of activity of a company.

### *Land tax*
Enterprises, including foreign legal entities operating in Uzbekistan via a PE, owning land plots or rights of their use are subject to land tax or land lease payment. Land tax is charged at fixed fees that vary depending on the quality, location, and level of water supply of each land plot. Land lease payment is charged at negotiable rates; however, the minimum amount cannot be less that the land tax rate for the respective land plot. Land tax and land lease payment are computed based on the area of the land being in use.

### *Water-use tax*
Enterprises (including PEs) using water in their production are subject to water-use tax. The tax rate is set by the Cabinet of Ministers and depends on the source of water consumption (i.e. surface or underground). Water-use tax is calculated based on the volume of the water consumed.

### *Unified social payment (USP)*
Employers are subject to USP assessed on total payroll cost related to local and expatriate staff. This payment is collected by the tax authorities. The rate of USP is 25%.

### *Taxes of subsurface users*
In addition to standard taxes, subsurface users (i.e. legal entities and individuals exploring and extracting natural resource) are subject to subsurface users' specific taxes, as listed below:

#### Subsurface use tax (royalty)
Subsurface use tax is charged on volume of produced (extracted) natural resources that are ready for sale or transfer (including free of charge) and consumption for internal purposes. Taxable base is determined as average weighted sales price.

| Business activity | Tax rate examples |
|---|---|
| Extraction of natural resources | natural gas 30%, precious stones 24%, oil 20%, gold 5%, silver 8% |
| Utilisation of by-products received during the extraction of natural resources | 30% of tax rate applicable to main natural resources extracted |

#### Excess profits tax
Excess profits tax is assessed on the difference between the selling price of the extracted natural resources (as per the list) and the statutory price set by the legislation. Excess profits tax is not payable by entities operating under production sharing agreements.

The list of natural resources and goods subject to excess profits tax includes: copper, cement, natural gas, polyethylene granules, clinker. Excess profits tax is paid at 50% of the taxable base.

#### Signing and commercial discovery bonuses
Signing and commercial discover bonuses are one-off payments to the state budget. The signing bonus is payable for the right to engage in exploration and extraction of natural resources and range from 100 to 10,000 times the MMW, depending on the type of minerals. The commercial discovery bonus is paid for each field where a subsurface user discovers the natural resources and comprises 0.1% from the cost of the proved reserve volume.

U

## Branch income

There is no concept of a 'branch' of a foreign legal entity in the Uzbek legislation. Instead such entities use a PE registration to perform business activities without establishing an Uzbek company.

In addition to CIT, non-residents operating in Uzbekistan via PE pay net profit tax assessed at 10% on accounting profit less CIT.

## Income determination

### Inventory valuation

Uzbek legislation permits the application of the weighted average cost method (AVECO) and the first in first out (FIFO) method for the valuation of inventory for tax purposes.

### Capital gains

Capital gains arising from the disposal of tangible and intangible assets are calculated as the difference between the selling price and the net book value of an asset. The capital gain is included in taxable profits (unless specifically exempt), and the capital losses are deductible (only if the disposed asset had been used for business purposes for three or more years). This is applicable to Uzbek legal entities and PEs of foreign legal entities. Capital gains on non-resident companies may be subject to WHT at 20% as 'other' income.

### Dividend income

Dividends paid by a domestic subsidiary will be subject to 10% WHT at the source. The net dividends received by its domestic parent company will then be excluded from its CIT base. Such net dividends received by a foreign parent company would be taxed in accordance with the respective country's internal legislation or double taxation treaty (DTT) provisions (if Uzbekistan has a DTT with this country). *See the Withholding taxes section for a list of countries with which Uzbekistan has an applicable tax treaty.*

### Foreign income

Gross foreign income of a resident corporation (e.g. income from its foreign branch) should be included in its aggregate income on an accrual basis, regardless of remittance date. Expenses incurred abroad in relation to such foreign income would be deducted subject to provisions of the Uzbek Tax Code. Foreign income tax paid on such income should be credited against the Uzbek CIT only if this branch is registered in a country with which Uzbekistan has a DTT. There are no deferrals for foreign income to be recognised for Uzbek tax purposes.

## Deductions

The tax base for CIT purposes varies significantly from the computation of taxable profits in most Western jurisdictions. Expenditures such as entertaining, benefits in-kind, and business trip allowances exceeding the statutory norms (that are generally low) are non-deductible.

There are additional costs that cannot be deducted by PEs of foreign legal entities, such as interest on head office loans, commission fees charged by head office, royalty, administrative and management expenses of head office incurred outside Uzbekistan.

However, PEs are eligible to deduct expenses incurred outside of Uzbekistan if they directly relate to their business in Uzbekistan.

### *Depreciation and amortisation*
For tax purposes, depreciation/amortisation is calculated with application of rates defined by the Tax Code. If depreciation for accounting purposes is charged at higher rates (compared with the Tax Code rates), the difference would be treated as a temporary difference for CIT purposes (i.e. deducted in future periods).

Depreciation is calculated from a month following the month when the asset was put into use until it is fully depreciated, disposed, or written off. The maximum annual depreciation rates applicable to different types of fixed assets are outlined in the table below.

| Depreciable item | Rate (%) |
|---|---|
| Buildings and other structures | 5 |
| Cars, tractors, special equipment, computers and related hardware | 20 |
| Lorries, buses, special cars and trucks, industrial machinery and equipment, agricultural machinery and equipment, oil extraction and mining equipment, office furniture | 15 |
| Railway, river and air transport vehicles, thermo-technical equipment, turbines, electric and diesel drives, power supply and communication lines, pipelines | 8 |
| Depreciable assets not mentioned above | 10 |

For statutory accounting purposes, fixed assets can be depreciated using one of the following methods:

- Straight-line.
- Production method.
- Double-declining-balance method.
- Sum-of-the-years’ (cumulative) method.

Intangible assets, including leases and other property rights, are amortised over the shorter of an asset’s useful life or the period of activity of the enterprise. Where an asset’s useful life cannot be determined, the asset would be amortised over five years.

Expenses related to geological exploration and developmental works necessary for the extraction of natural resources are deductible for CIT purposes through depreciation at the rate of 15% per annum.

### *Interest on short-term loans*
Interest is deductible, except for interest on overdue/delayed loans (i.e. ‘penalty interest’) and interest capitalised in the value of fixed assets (i.e. in cases where a loan was obtained to purchase fixed assets).

### *Taxes*
Generally, taxes are deductible for CIT purposes. The exceptions are the infrastructure development tax based on after-tax profits and the net profit tax for PEs.

### *Other tax losses*
In cases where goods or services are sold below cost (or given for free), the revenue should be adjusted for tax purposes to the cost or purchase price of the goods or services.

Production wastes and defects within statutory norms, and losses resulting in force-majeure circumstances are generally deductible.

Losses from the disposal of fixed assets also may be deducted, if the fixed asset has been used for three or more years.

### Net operating losses
Tax losses may be carried forward for a period of five years, allowing a reduction of taxable income of the respective year by up to 50%. Loss carrybacks are not permitted.

## Group taxation

There is no provision for consolidation of income or losses by related companies for tax purposes in Uzbekistan. A foreign legal entity that has several PEs in Uzbekistan may not consolidate those for tax purposes.

### Transfer pricing
As of 1 January 2010, the transfer pricing concept was reintroduced in the Uzbek Tax Code. However, it is limited to a couple of paragraphs stating that tax authorities may adjust prices used by interrelated parties if these prices differ from the prices which would have been used in transactions with independent parties. There is no further guidance for application of this rule, which gives rise to different interpretation by tax authorities and taxpayers.

### Thin capitalisation
Effective legislation does not provide for thin capitalisation rules, except for debt-to-equity ratios set up by the Central bank of Uzbekistan (CBU) for commercial banks.

## Tax credits and incentives

The current tax legislation offers tax incentives for enterprises in oil and gas exploration/development projects, enterprises engaged in the production and export of goods for foreign currency (when export share exceeds 15%), and companies rendering certain services.

### Incentives for oil and gas exploration and extraction companies
Foreign companies carrying out oil and gas exploration works, as well as their foreign contractors/subcontracts engaged in such works, are exempt from payment of all forms of taxes and contributions to non-budget funds during the exploration period. Additionally, import by these companies of equipment, material, and technical resources and services necessary for the exploration and related works is exempt from customs duties.

Resident corporations supplying materials and rendering services to foreign companies carrying out oil and gas exploration are exempt from VAT.

Furthermore, if foreign companies carrying out oil and gas exploration form joint venture companies for extraction of oil and gas at respective fields, such companies are granted a seven-year CIT holiday starting from the date of commencement of extraction.

### *Incentives for carrying out export activities*
Enterprises exporting goods (works, services) of their own production for freely convertible currency may apply reduced rates of CIT as follows:

- If export share of total sales ranges from 15% to 30%, the effective rate shall be reduced by 30%.
- If export share of total sales is 30% or more, the effective tax rate shall be reduced by 50%.

This incentive is applied likewise in regards to property tax as follows:

- If export share ranges from 15% to 30%, the property tax rate is reduced by 30%.
- If export share is 30% or more, the property tax rate is reduced by 50%.

The incentive in both cases is subject to a restriction that it does not apply to wholesale/retail sale or intermediary companies, nor to revenues from the export of specific items such as cotton fibre, oil, gas, precious metals, etc.

Producers can also defer payment of their import VAT in respect of material and technical resources used for production of goods to be exported. The deferral is granted for up to 90 days without application of any interest.

### *Incentives for service companies*
Microfirms and small enterprises engaged in certain types of activity are exempt from CIT and unified tax payment until 1 January 2012. These types include, without limitation, leasing, insurance, auditing/bookkeeping services, and repair of footwear and leather goods.

### *Exemptions from customs payments*
There are certain customs exemptions offered by the legislation for the following:

- Technological equipment imported by foreign investors as their charter fund contribution.
- Technological equipment imported under projects for creation of new or the modernisation of existing production facilities (with appropriate certificates issued by an authorised bank).
- Property imported for production needs by foreign investors and enterprises with foreign investment with foreign participation in the equity of not less than 33%.

### *Foreign tax credit*
In accordance with international tax treaties of the Republic of Uzbekistan, legal entities/residents of Uzbekistan can obtain a tax credit in respect of CIT paid outside of Uzbekistan. In order to claim tax credit, legal entities should provide a copy of tax payment order, confirmation from a competent tax authority, or any other document confirming payment of the tax outside of Uzbekistan.

## *Withholding taxes*

WHT is to be withheld and remitted to the state budget by entities paying income to non-residents if these entities qualify under a tax agent definition (i.e. by (i) Uzbek legal entities and (ii) non-residents operating in Uzbekistan via PE).

The domestic WHT rates are as follows:

| Payment | WHT (%) |
|---|---|
| Dividends and interest | 10 |
| Insurance and reinsurance payments | 10 |
| Freight | 6 |
| Royalties, services (including management, consulting services), rents, other income | 20 |

### *Double taxation treaty (DTT) relief*

Foreign legal entities that do not carry on activities in Uzbekistan through a PE are subject to WHT on income from sources in Uzbekistan, subject to the terms of a relevant DTT. Uzbekistan has signed DTTs with 50 countries; 46 of them are in force.

DTTs in force establish WHT rates as follows:

| Recipient | Dividends (%) | Interest (%) | Royalties (%) |
|---|---|---|---|
| Austria | 5 (2)/15 | 10 | 5 |
| Azerbaijan | 10 | 10 | 10 |
| Bahrain | 8 | 8 | 8 |
| Belarus | 15 | 10 | 15 |
| Belgium | 5 (2)/15 | 10 | 5 |
| Bulgaria | 10 | 10 | 10 |
| Canada | 5 (1)/15 | 10 | 5 (3, 4)/10 |
| China | 10 | 10 | 10 |
| Czech Republic | 10 | 5 | 10 |
| Finland | 5 (1)/15 | 5 | 5 (5)/10 (4) |
| France | 5 (2)/10 | 0 (7,9,12)/5 | 0 |
| Georgia | 5 (8)/15 | 10 | 10 |
| Germany | 5 (8)/15 | 0 (9)/5 | 3 (3, 10)/5 (4) |
| Greece | 8 | 0 (7)/10 | 8 |
| Hungary | 10 | 0 (15)/10 | 10 |
| India | 15 | 0 (7)/15 | 15 |
| Indonesia | 10 | 10 | 10 |
| Iran | 8 | 10 | 5 |
| Israel | 10 | 10 | 5 (4)/10 |
| Italy | 10 | 0 (9)/5 | 5 |
| Japan | 15 | 0 (7,9)/10 | 0 (4)/10 (3, 5, 6, 10) |
| Kazakhstan | 10 | 0 (7,9)/10 | 10 |
| Kuwait | 5 (8)/10 | 0 (7,9)/8 | 20 |
| Kyrgyzstan | 5 | 5 | 15 |
| Latvia | 10 | 0 (7,9)/10 | 10 |
| Lithuania | 10 | 0 (7,9)/10 | 10 |
| Luxembourg | 5 (8)/15 | 0 (7)/10 | 5 |
| Malaysia | 10 | 0 (9)/10 | 10 |
| Moldova | 5 (1)/15 | 0 (7,9)/10 | 15 |
| (The) Netherlands | 5 (8)/15 | 10 | 10 |
| Oman | 7 | 7 | 10 |
| Pakistan | 10 | 0 (7,14)/10 | 15 |
| Poland | 5 (11)/15 | 0 (7,9)/10 | 10 |

| Recipient | Dividends (%) | Interest (%) | Royalties (%) |
|---|---|---|---|
| Romania | 10 | 0 (14)/10 | 10 |
| Russia | 10 | 0 (7,14)/10 | 0 |
| Saudi Arabia | 7 | 7 | 10 |
| Singapore | 5 | 5 | 8 |
| Slovak Republic | 10 | 10 | 10 |
| South Korea | 5 (8)/15 | 5 | 2 (10)/5 |
| Switzerland | 5 (11)/15 | 0 (12)/5 | 5 |
| Thailand | 10 | 0 (9)/10 (13)/15 | 15 |
| Turkey | 10 | 0 (7,9)/10 | 10 |
| Turkmenistan | 10 | 0 (7,9)/10 | 10 |
| Ukraine | 10 | 10 | 10 |
| United Kingdom | 5 (11)/10 | 5 | 5 |
| Vietnam | 15 | 0 (9,12)/10 | 15 |

Notes

1. Where the beneficial shareholder owns no less than 10% of the voting shares.
2. Where the beneficial owner holds at least 10% of the capital of the paying entity.
3. Where royalties are paid for patents, trademarks, know-how, etc.
4. Where royalties are paid for copyrights on literature, cinema, musical works, etc.
5. Where royalties are paid for secret formulas, processes, or know-how.
6. Where royalties are paid for computer software, patents, designs, models, or plans.
7. Where one of the following conditions is met: (a) recipient is a local authority or corporate body constituted under public law, including the central bank of the state, or interest is paid by the local authorities or corporate bodies; (b) interest is paid in respect to debt claims or loans, guaranteed, insured, or aided by the state or on behalf of the state; (c) interest is paid in respect to credit sales of industrial, commercial, scientific equipment of goods and merchandise or provision of services by an enterprise to another enterprise; or (d) interest is paid in respect to a loan of any kind granted by a bank.
8. Where the beneficial shareholder owns no less than 25% of the capital of the paying entity.
9. Where the recipients of the interest are governments of contracting states or any governmental body (such interest is exempt from WHT).
10. Where royalties are paid in respect to uses or the rights to use industrial, commercial, or scientific equipment.
11. Where the beneficial shareholder owns no less than 20% of the voting shares.
12. Where interest is paid in respect to: (a) a loan made, guaranteed, or insured by the government of the other state; (b) the sale on credit of industrial, commercial, or scientific equipment; (c) the sale of merchandise by an enterprise to another enterprise; or (d) a loan of any kind granted by a bank.
13. Where the interest is received by any financial institution (including insurance companies).
14. Where interest is beneficially owned by the other contracting state or local authority or an instrumentality of such other state authority and is not subject to tax by that other state.
15. Where the recipients of the interest are governments of contracting states, National Bank of Hungary, Eximbank Hungary Pte. Ltd., Central Bank of Uzbekistan, or the National Bank of Uzbekistan for foreign economic activity (such interest is exempt from WHT).

Note that there may be other WHT rates offered by protocols to the individual treaties.

## Tax administration

### Returns

CIT is reported quarterly before 25th day of the month following the reporting quarter, with an annual return due by 25 March following the reporting year for enterprises with foreign investment and 15 February following the reporting year for other categories of CIT payers. PEs report on CIT once a year prior to 25 March following the reporting year.

### *Payment of tax*
Uzbek enterprises, including enterprises with foreign investment, are required to make advance instalments of CIT in each quarter based on estimated profits in the quarter. The instalments are payable by the 15th day of each month. Final quarterly payments based on actual profit figures are payable no later than the filing deadline for the quarterly tax returns (which is the 25th day of the month following the period of assessment). In case the final quarterly payment is more than 10% higher than advance instalments made in this quarter, tax authorities have the right to recalculate the advance instalments based on the actual quarterly profit figures and charge late payment interest accordingly.

Final CIT payment should be made no later than the date set as the deadline for annual return submission.

Payment of CIT by PE is made annually within a month after the filing deadline.

## *Significant developments*

In 2010, the General Assembly of Venezuela's Legislative Branch created and amended a variety of legal instruments related to taxation, as detailed below.

### *Anti-drugs contribution*

The Organic Drug Law published on 15 September 2010 stipulates that any company employing 50 or more employees must make an annual 1% contribution from their operating profit. Such corporations that are dedicated to the manufacture or import of alcohol beverages, tobacco, or their mixtures are required to make a 2% contribution from their operating profit. Note that under the definitions established by this Law, operating profit can be understood as the result from subtracting the operating expenses from the income profit in accordance with the accepted Venezuelan general accounting principles.

This contribution will be collected by the National Anti-Drug Fund (FONA) within 60 continuous days counted from the end of the fiscal year.

Note that this contribution can be retrieved if the company performs:

- prevention programs and projects intended for the company employees and their family environment
- prevention programs for children and adolescents, or
- programs to fight drug trafficking.

### *Science, technology, and innovation contribution*

An amendment to the Law on Science, Technology, and Innovation (LOCTI, by its Spanish acronym), dated 16 December 2010, establishes a mandatory contribution to be paid by companies that obtained, in the previously fiscal year, over 100,000 tax units (TU 100,000) in gross income.

The kind of companies that are required to make this contribution include stock companies, limited liability companies, partnerships, communities, irregular associations, associations, foundations, permanent establishments (PEs), or fixed bases located inside or outside the national territory with current activities in Venezuela.

Contributions established in the LOCTI are as follows:

- Companies engaged in activities related to bingos and casinos, alcoholic drinks, or tobacco must annually contribute 2% of gross income.
- Private companies engaged in hydrocarbon activities, including gaseous hydrocarbons, or mining activities must annually contribute 1% of gross income.

- Companies engaged in other economic activities must annually contribute 0.5% of gross income.
- Companies that perform activities with two different percentages will apply the highest one.

The National Fund for Science, Technology, and Innovation (FONACIT) is the entity responsible for the administration, collection, control, verification, and qualitative and quantitative determination of the contributions.

Although the contribution to FONACIT is mandatory, companies can retrieve these resources provided that, in the third quarter of each year, an annual investment in science, technology, and innovation, containing the projects planned for the next year, is made, in line with priority areas and guidelines established by the national authority.

At present, the National Government has given, informally, the following areas as a priority to which projects should focus on in the annual plan:

- Housing and habitat.
- Dynamics, trends, and challenges for urban development.
- Impact of climate change.
- Energy efficiency.

### *Increase in the windfall tax on oil production*
In April 2011, the National Government enacted Decree N° 8.163 that increased the windfall tax on oil prices *(see the Other taxes section for more information)*.

## *Taxes on corporate income*

Corporations resident in Venezuela are subject to corporate income tax (CIT) on their Venezuelan and foreign-source income, whereas corporations resident abroad with a permanent establishment (PE) in Venezuela are levied CIT on only their Venezuelan and foreign-source income attributable to said PE. Corporations are able to claim any similar taxes paid abroad on foreign source income as a tax credit. Non-resident corporations without a PE are subject to CIT only on Venezuela-source income.

Corporate income is taxed at the following progressive rates based on tax units *(see below)* (i.e. Tariff 2):

| Taxable income | | | |
|---|---|---|---|
| **Over (TU)** | **Not over (TU)** | **Rate (%)** | **Subtract (TU)** |
| 0 | 2,000 | 15 | 0 |
| 2,000 | 3,000 | 22 | 140 |
| 3,000 | – | 34 | 500 |

### *Tax units (TU)*
The 1994 Income Tax Law reform established the concept of a taxable unit as an element that reduces the negative effects created by inflation on the determination of the tax rates. The tax code established the initial TU at 1 bolívar fuerte (VEF), with annual basis adjustments according to the variation on the consumer price index (CPI) from the previous year. During 2010, the TU was VEF 65. For 2011, it was VEF 76.

### *Additional rates and considerations*

Income for oil exploitation and certain related activities is taxed at a flat rate of 50%. Related activities are comprised of those such as refinery, transportation, and purchases for the exports of hydrocarbons and by-products for the exploitation. Joint venture corporations are also subject to a 50% CIT rate.

The above indicated regime does not apply to corporations engaged in the exploration and exploitation of non-associated gas (and the processing, refining, transportation, distribution, commercialisation, and exportation of the gas and its components) or companies exclusively engaged in the refining of hydrocarbons or improvement of extra heavy oil, which are subject to Tariff 2.

## *Corporate residence*

According to the Venezuelan tax code, the following companies are regarded as resident:

- Companies incorporated in Venezuela and registered with the Mercantile Registry as established by commercial law.
- Foreign companies registered with the Superintendence of Foreign Investments (SIEX) to be resident in Venezuela as branches duly registered with the Mercantile Registry.

The following companies are non-residents but subject to Venezuelan taxes:

- Foreign companies registered with SIEX to provide technical assistance, technological services, royalty items, and professional services from abroad.
- Foreign banks granting loans to local companies.
- Foreign companies leasing goods to local companies.
- Foreign companies deriving income from economic activities carried out in Venezuela or from assets in Venezuela.

### *Permanent establishment (PE)*

According to the Venezuela Income Tax Law (VITL), generally, a passive party is deemed to be carrying out operations in Venezuela through a PE when:

- The passive party owns, directly or through an agent, employee, or representative in the Venezuelan territory,:
  - an office, fixed place of business, or an activity centre where its activities are totally or partially carried on
  - management head quarters, branches, offices, factories, shops, facilities, warehouses, stores, construction, installations, or assembling works, when the duration thereof exceeds six months, or
  - agencies or representatives authorised (according to the VITL) to contract in the name of or on behalf of the passive party.
- The passive party performs, directly or through an agent, employee, or representative in the Venezuelan territory, professional, artistic activities.
- The passive party possesses, directly or through an agent, employee, representative, or other contracted personnel in the Venezuelan territory, other work places where the operations are wholly or partially performed.

Any agent acting independently shall be excluded from this definition, except if such representative has the power to conclude contracts in the name of the principal.

## Other taxes

### Value-added tax (VAT)

Federal VAT, Impuesto al Valor Agregado (IVA), is a one-time tax payable by the ultimate consumer of all types of products and services. However, each business entity involved in the process from the sale of raw materials to the production and distribution of finished products to the ultimate consumer is required to include the tax on its products to customers (output tax) and to pay the tax on its purchases or imports of goods and services (input tax), crediting the amounts paid against the amounts due on its own activities. The net amount payable by each entity is considered to represent a tax on the value added.

In general, VAT does not represent an additional cost to business enterprises because even though all types of business enterprises, including government departments and agencies (with some exceptions), are required to accept charges of the tax by suppliers on their purchases of goods and services, such amounts are normally deductible from the liability of the business enterprises for the tax on their bills to customers.

There are exceptions, principally when the sales of an enterprise are exempt from VAT, in which case the enterprise is treated as the final consumer and must absorb any VAT charges on its purchases except insofar as its activities are subject to the zero rate *(see below)*. However, input tax paid on goods or services used to produce items that are exempt from VAT may be deducted for CIT purposes.

#### Taxable transactions

In general, VAT is payable on all sales, rental, and importation of goods, and rendering of services executed or used in the country, although a number of significant exceptions are provided by law.

#### Sales of goods

The law defines a sale as any transmission of tangible goods, including those made on a conditional basis or through an irrevocable trust. The taxable amount of a sale includes the sale price as well as other amounts charged to the purchaser for other taxes, duties, interest, or surcharges of whatever nature. VAT becomes payable when the goods are invoiced or shipped to the customers or when the price is paid in full or in part.

Exempt sales include the following:

- Certain foods and other products for human consumption.
- Fertilisers as well as any natural gas used in the manufacturing thereof.
- Some products for animal consumption.
- Medicine.
- Products derived from hydrocarbons and some raw materials intended to improve the quality of gasoline.
- Wheelchairs.
- Books, magazines, newspapers, and the paper used in producing these products.
- Vehicles, aircraft, and trains for passenger transport.
- Machinery and equipment for agribusiness.
- Scientific equipment purchased by the government.

#### Services

Taxable services are those rendered within Venezuela by one person to another on an independent basis, transportation of passengers or goods, agency activities, technical assistance, and transfer of technology. VAT is payable to service providers at the time the invoice is issued, the service is rendered, or the fee becomes demandable, whichever comes first. The taxable amount includes not only the price of services, but also charges to the customers for other taxes, interest, etc.

Exempt services include the following:

- Domestic land and maritime transportation of passengers.
- Educational services.
- Accommodations for students and persons with disabilities.
- Healthcare and dental services, surgery, and hospitalisation.
- Theatres, sports, and cultural events.
- Food services for employees and students.
- Certain utilities (e.g. electricity, water).
- Housecleaning.
- Transport services for hydrocarbon-derived fuels.
- Services involving livestock, poultry, and other minor species including breeding and production.

**Exports**

Exports are zero-rated. Consequently, VAT is not payable on exports, including exports of in-bond processing companies, technical fees to foreign residents, and sales to in-bond processing companies and companies that export their entire production. Sale of natural hydrocarbon by joint ventures regulated by the Hydrocarbon Law to Petroleos de Venezuela S.A. (PDVSA) and affiliated companies are also taxable at 0%. Though exporters do not collect VAT on export sales, they may recover VAT charges on their purchases of goods and services by means of a refund certificate. This certificate may be used to pay other tax obligations. If such exporters carry out sales in the country, they will be entitled to recover only input VAT related to foreign sales.

Additionally, a zero rate applies to independent personal services provided by residents in Venezuela that are used solely by and for the benefit of persons abroad without a PE or fixed base in Venezuela.

**Tax rates**

The rate may change every year, within the range of 8% to 16.5%. Currently the general VAT rate is 12%.

An additional tax rate of 10% is applicable to the sale and imports of luxury products (e.g. vehicles valued at more than USD 30,000, motorcycles with a cylinder capacity of 500 cc, nickel or token game machines, aircraft used for recreational or sport purposes, fighting bulls, trained horses, caviar, jewellery with precious stones valued at a price exceeding USD 500).

An 8% VAT applies to the following transactions:

- Goats, sheep, and minor species for slaughter or breeding.
- Meats in their natural state, or refrigerated, frozen, or salted meats, or meats in brine of goats, sheep, and poultry.
- Shortening.
- Rendering of professional services to any government entity, in any level or branch of government, provided such services do not involve any commercial transactions but rather predominantly intellectual work or efforts.
- Domestic air passenger transportation.

### Payment and collection
Excess VAT charged or chargeable to customers over VAT paid to vendors or customs authorities — Servicio Nacional Integrado de Administración, Aduanera y Tributaria (SENIAT) — including the correspondent payment, must be remitted to SENIAT within the first 15 days of the following month.

### VAT exoneration
Among the fiscal policy measures applicable pursuant to the conjuncture, sector, and regional situation of the country's economy, the National Executive is entitled to exonerate the import and sales of goods and the rendering of services set forth in the respective decree from the payment of VAT.

### Refunds/special regime for industrial projects
The VAT law stipulates a special regime for taxpayers engaged in the execution of industrial projects, whose duration exceeds six taxable periods. Pursuant to this regime, taxpayers will be able to suspend the use of input VAT generated during their operating stage, until such time as they begin generating fiscal output VAT.

Taxpayers engaged in the execution of industrial projects aimed at exporting or generating foreign currency may (with prior consent of the tax authorities), choose to recover the tax supported in construction operations involving the project, provided that they are carried out during the pre-operating stage of such project.

Input VAT subject to recovery must be determined after computing output VAT. In other words, input VAT originated from purchases of goods and reception of services is not subject to recovery if output VAT was not subtracted.

### VAT withholding regimes
Taxpayers qualified by the tax administration as special taxpayers and public entities are designated as liable parties in their capacity as withholding agents in regard to payment of the VAT generated in their purchase of tangible goods or services received by providers that are regular taxpayers for VAT purposes.

The amount to be withheld on the part of the agents will be equal to multiplying the invoiced price of the taxed goods or services by 75% of the tax rate, except for those cases in which the VAT does not appear separately from the price, when the respective invoice does not comply with the formalities or requirements set forth in the tax law, or when the supplier is not registered for tax purposes. In these latter cases, 100% of the generated tax is to be withheld.

Suppliers may discount the VAT withheld from the tax liability determined for the period in which the VAT was withheld, provided that they have the receipt issued by the withholding agent. In those cases in which the tax withheld from the taxpayer exceeds the taxpayer's VAT liability corresponding to the relevant tax period, such taxpayer may discount the tax withheld from VAT liability corresponding to the following tax periods until their total exhaustion.

## *Municipal business licence tax*
Companies and business entities, as well as individuals and unincorporated companies, are subject to municipal tax on gross income from industrial or trade activities carried on in the municipality during the fiscal year. The rates range from 0.1% to 10.0%, depending on the activity and the municipality.

### Urban Property Tax
The Urban Property Tax is a local or municipal tax payable by any person who owns property rights or any other real rights on urban real estates. The taxable basis is the value of the urban real estate. For these purposes, the fair market value of the real estate is provided as a point of reference. The applicable rate varies according to each municipality.

### Other municipal taxes
Municipalities also tax vehicles, public entertainment, legal bets, and commercial advertisements. There also are various municipal tariffs and fees.

### Excise taxes
#### Tax on alcohol and alcoholic beverages
In general terms, the manufacture, commercialisation, and importation of alcohol and alcoholic beverages are subject to excise taxes. The Law of Tax on Alcohol and Alcoholic Beverages provides for three main types of excise taxes:

- Tax on the national production and importation of alcohol and alcoholic beverages, which is established on the basis of TU per litre and varies depending on the type of product.
- Additional excise tax per litre for national and imported beer and for other alcoholic beverages is levied on the sale of those products to the public, which is also provided on the basis of TU per litre, depending on the type of product.
- In addition to the above, another excise tax is imposed on the importation or local sale of national and imported alcoholic beverages to the public, which is levied on the sales price, which is provided on the basis of a percentage on the price of sale to the public and varies depending on the type of product.

#### Tax on cigarettes and manufacturing of tobacco
The importation and national production of cigarettes and tobacco to be consumed in Venezuela is subject to an excise tax. This proportional tax is levied at a rate of 70% on the retail price of cigarettes, tobacco, and its derivates.

### Customs duties
As a general rule, the importation of goods into Venezuela is subject to customs duties. These duties are generally levied on the cost, insurance, and freight (CIF) value of the product being imported, excluding VAT.

Custom duty rates generally range from 5% to 35%. The duty rates vary depending on the product involved. In general, import tariffs are 5% for capital goods, 10 to 15%for raw materials and intermediate goods, and 15 to 35% for finished products. In addition, all imports are subject to customs handling charge, a duty import, and VAT.

### Gift tax
Overall, the Inheritance and Donations Tax Law, published on 1999, stipulates the taxes attributable to inheritances left by individuals. Nonetheless, this Law provides regulation about donations, which are significant to corporations. Subject to payment of the gift tax are the beneficiaries of gifts in the form of movable or real property, rights, or shares located in the country.

For tax calculation purposes, the progressive tax rate (up to 55%) set forth in the Law will be applied to the donated good. Both donors and donees are jointly liable for the tax generated from the gift.

The gift tax is applicable from the time in which the donors manifest before the National Treasury their will to donate and must be paid before the registration of any document formalizing or evidencing the authenticity of the gift. Should the donation not be perfected due to express will of the donor or rejection on the part of the donee, the obligation to pay the tax will be eliminated and reimbursement may be requested of the amounts paid in this connection.

Under the transfer pricing rules contained in the Venezuelan Income Tax Law, the tax authorities are empowered to impute income in inter-company transactions at a price reflecting the fair market value of the property being transferred.

Before the introduction of transfer pricing rules, under the Inheritance and Donations Tax Law, the tax authorities could and still can presume in transactions involving a sale, assignment, barter, or transfer, the existence of a donation if, for instance, the price stipulated in such transaction does not reflect the real value of the property being transacted. In such a case, a gift tax may be imposed on the difference between the fair market value of the property being transacted and the consideration received in return.

Also, a cancellation of a debt gives rise to gift tax issues. In this regard, the Inheritance and Donations Tax Law provides that the total or partial forgiveness or cancellation of a loan must be viewed as a gift and, as such, subject to gift tax.

### *Increase of the windfall tax on oil production*

Decree N° 8.163, dated 18 April 2011, provides for the increase of the windfall tax on oil companies. The aforesaid Decree abrogates the regulations on the tax published on April 2008. According to the enacted Decree, the tax is provided in the following terms:

- The contribution on extraordinary oil prices is a 20% tax on the difference in price when the internationally quoted price per barrel exceeds the budgeted price per barrel (for purposes of the Venezuelan Annual Budget Law), provided that the quoted price per barrel is equivalent or lower than USD 70 per barrel (i.e. the maximum basis is the difference between USD 70 per barrel and the current budgeted price of USD 40).
- The contribution on exorbitant oil prices is comprised of the following:
  - 80% tax on income generated by quoted oil prices between USD 70 and USD 90 per barrel (i.e. 80% on the range from USD 70 to USD 90 quoted price per barrel).
  - 90% tax on the difference in the quoted oil prices between USD 90 and USD 100 per barrel.
  - 95% tax on the difference over the threshold of USD 100 per barrel.

The tax is payable by oil companies exporting with sale purposes. Also, the Decree provided that the mixed companies (empresas mixtas) created in accordance with the Master Hydrocarbons Law that sell oil and by-products to the state-owned company (PDVSA), or any of its affiliates, are also obliged to pay the above described tax.

On the other hand, tax exemption is provided for the following cases:

- For mixed companies working on the execution of projects on the development of new oil fields and those projects aimed at boosting oil production as declared by the Ministry of the Popular Power for Oil and Energy, until they have recovered their total investment. Parameters to determine the recovery of investment are to be separately established by the aforesaid Ministry by Resolution.
- Exports executed in connection with cooperation or financing international agreements.

- Exonerations may be granted by the National Executive Power for exports executed under economic or international cooperation measures.

The tax is payable on a monthly basis in foreign currency. Other terms of payments are to be regulated by Resolution.

The Decree also establishes USD 70 per barrel as the maximum price to be used as calculation basis for the payment of royalties, extraction tax, and export registration tax provided for in the Master Hydrocarbons Law.

### *Hydrocarbons Organic Law*

The state is entitled to 30% of the volume of hydrocarbons extracted from any deposit, by way of royalties. The National Executive can reduce this within certain limits, when it is shown that certain types of deposits are not economically exploitable.

Persons conducting activities related to hydrocarbons must pay the following taxes:

#### Surface tax

For the portion of the surface area granted that is not under development, the equivalent of 100 TU for each square kilometre or portion of a square kilometre for every elapsed year is due as a surface tax. This tax will increase annually by 2% during the first five years and 5% during the following years.

#### Tax on own consumption

10% of the value of each cubic metre of hydrocarbon byproducts produced and consumed as fuel in wholly-owned operations, based on the price of the end consumer, is due as a tax. In the case that said product fails to be sold in a domestic market, the Ministry of Energy and Mines shall provide the price.

#### General consumption tax

For every litre of hydrocarbon byproducts sold in the domestic market, a tax id due at the rate of between 30% and 50% of the price paid by the end consumer, whose aliquot should be implemented annually between the two extremes under the Budget Law. This levy to be paid by the end consumer should be withheld at the supply source, to be handed over to the National Treasury on a monthly basis.

The National Executive may waive, in whole or in part, by the time specified, the general consumption tax, in order to encourage certain activities of public or general interest. The National Executive can also reinstate this levy to its original level when the causes for the waiver cease to exist.

### *Gaseous Hydrocarbons Organic Law*

The Gaseous Hydrocarbons Organic Law establishes a system of royalties, determinable by the volumes of gaseous hydrocarbons extracted from any deposit and not re-injected. The state is also entitled to a 20% share for this item.

The exploitation companies of gaseous hydrocarbons shall pay for the gaseous hydrocarbons consumed like fuel, the taxes settle down on the matter by applicable laws.

### *Stamp duties*

The Stamp Duties Law establishes a number of stamp duties on the issuance of official documents (e.g. certificates, permits, authorization, registrations). Stamp duties may be levied at fixed amounts (ranging from TU 0.01 to TU 10,000) or at a rate based on the value of the transaction or work in question.

### *Public registry tax*

Commercial companies are registered with the Mercantile Registry Office and are subject to a tax levied upon incorporation of a company and registration of capital increases. The tax is 1% of the amounts of subscribed or increased capital.

The sale of a going concern is also registered in the Mercantile Registry Office and is subject to a tax levied upon the total amount of the sell. The tax is 2% of the amount.

### *District Capital stamp tax*

On December 2010, a new District Capital Stamp Law was published. Under their own interpretation of the Law, Mercantile Registries of the District Capital are charging 10% of the amount of subscribed or increased capital of companies and 20% for the sale of a going concern.

### *Payroll taxes and other contributions*

Contributions applicable to resident companies in Venezuela:

| Contributions | Basis | Contribution basis (cap) | Employer contributions (%) | Employee contributions (%) | Notes |
|---|---|---|---|---|---|
| Mandatory social security regime contribution | Wages (normal or regular wages) | Up to five minimum salaries for urban workers | 9/10/11 | 4 | (1, 2, 5) |
| Employment benefit regime contribution | Wages (normal or regular wages) | Up to ten minimum salaries for urban workers | 2 | 0.5 | (1) |
| Housing regime contribution | Total monthly (or integral) salary | No cap (5, 6) | 2 | 1 | (5) |
| Employee training contribution (INCES) | Total salaries paid by the employer for purposes of the employer's contribution. | No cap | 2 | 0.5 (4) | (3, 4) |
| Workplace prevention, conditions, and environment contribution (LOPCYMAT) | Total salaries paid to employees | No cap is established | From 0.75 to 10 | N/A | (6),(7) |

Notes

1. As of 1 May 2011, the minimum monthly metropolitan salary amount was increased to VEF 1, 407.47. As of 1 September 2011, it will be increased to VEF 1,548.21.
2. According to the current system, the employer's contribution to social security will depend on the company's risk qualification (minimum risk, middle risk, or maximum risk).
3. Regarding Instituto Nacional de Capacitación y Educación Socialista (INCES) contribution, the employer must contribute 2% of the total wages and salaries paid to employees.
4. Employers are also required to withhold 0.5% of the annual profit-sharing bonus paid to employees.
5. According to the Ley Orgánica del Sistema de Seguridad Social (LOSSS), the general rule for contribution basis for the new systems may not exceed ten minimum salaries. The transition rules establish a contribution basis of five metropolitan minimum salaries for urban workers for social

security purposes. No cap is expressly established in the transition rules for the housing system and work, security, and health regime.
6. Contributions to be made to this regime are exclusively for the employer and vary depending on the risk associated to the company. A company's risk is to be determined by the Instituto Nacional de Prevención, Salud y Seguridad Laborales (INPSASEL). To date, INPSASEL has not been created and employers will continue making their contributions to the Venezuela Social Security Institute.
7. Ley Orgánica de Prevención, Condiciones y Medio Ambiente de Trabajo (LOPCYMAT) regulations do not establish a cap for the contribution. However, as mentioned, the LOSSS establishes a maximum of the minimum urban salaries. For this reason, there are several contrary interpretations on whether a cap should be applied in this case.

| Other contributions | Basis | Contribution basis (cap) | Employer contributions (%) | Employee contributions (%) |
|---|---|---|---|---|
| Science, technology, and innovation contribution (LOCTI) (1) | Total annual income | N/A | 0.50/1/2 | N/A |
| Anti-drug contribution (LOD) (2) | Operating profit | N/A | 1/2 (3) | N/A |

Notes

1. Ley Orgánica de Ciencia, Tecnología e Innovación (LOCTI)
2. Ley Orgánica de Drogas (LOD)
3. 2% in the case of companies that manufacture or import alcohol beverages or tobacco. 1% for all other companies.

## *Branch income*

Branches of foreign corporations are subject to the same tax rules as Venezuelan corporations. Inter-branch income and deductions must be eliminated. The positive difference between a branch's annual book and taxable income is deemed to be remitted to the branch's head office (branch profits tax). Such remittances are subject to the 34% flat dividend tax *(see Dividend tax in the Income determination section for more information)* regardless of whether there is an actual payment unless the branch can provide proof of reinvestment of its profits for a five-year period. If such proof is established, no deemed remittance is assumed.

A Venezuelan taxpayer has to recognise, annually on an accrual basis, income generated in a company or other legal entity it controls which is located in a jurisdiction with low fiscal taxation (JLFT). Further, investments in JLFT must be declared to the SENIAT.

## *Income determination*

### *Inventory valuation*

Inventories may be valued at cost or the lower of cost or market value. Any method generally accepted for accounting purposes can be accepted for tax purposes.

### *Capital gains*

Capital gains are taxable as ordinary income, and capital losses are deductible from ordinary income. Note that capital losses resulting from the sale of stock, capital reduction, or liquidation of a company are only deductible if they meet one of the following conditions:

- The cost of the capital stock was not in excess of the price quoted on a stock exchange or an amount with a reasonable relationship to the book value of the capital stock.

- The holding period of the investment was for at least two years immediately preceding the date of the sale.
- The stockholder proves that the company selling the shares carried on economic activities for at least two years, preceding the date of sale.

At present, the tax law contains two different rulings relevant to the deductibility of losses incurred through operations on the Venezuelan Stock Market, one of which has been described above. The second ruling pertains to income obtained from operations on the local market. This income is subject to a final 1% tax that is withheld at the source. Losses in this kind of operation are not deductible against other income. Corporate shareholders not domiciled in Venezuela may not deduct such losses from other taxable income other than dividends arising from Venezuelan sources.

Gains upon liquidation or reduction of capital are taxable to the liquidating entity.

### *Dividend income*

A dividend tax is levied at a flat rate of 34% on the positive difference between book income and tax income generated after 2000. Book income is understood to be that approved at a shareholders' meeting and based on the financial statements prepared pursuant to generally accepted accounting principles. To determine the applicable difference, a last in first out (LIFO) method applies. The tax is triggered when dividend is paid and shall be remitted via withholding. Withholding is to be made at the moment a dividend is declared or credited to the account a recipient. The 34% (domestic) rate can be mitigated under tax treaties.

Dividends obtained from companies incorporated or resident abroad or incorporated abroad and resident in Venezuela are taxed at a flat 34% rate.

### *Stock dividends*

Dividends of stock are subject to payment of the aforementioned dividend tax. Moreover, stock dividends are subject to an advanced payment of dividend tax equivalent to 1% of the dividend distributed. Stock dividends have no cost for tax purposes.

### *Foreign income*

Extraterritorial income is subject to Venezuelan CIT based on the concept of worldwide income taxation, according to which:

- Resident companies must pay a tax on total income whether from national or foreign source.
- Non-resident companies with PE in Venezuela will pay tax on their income, whether of national or foreign source, attributable to the Venezuelan PE.
- Non-resident companies will pay taxes on their income originated or caused in Venezuela.
- Resident companies as well as non-resident companies with PE in Venezuela may credit the tax paid abroad for earnings of an extraterritorial source against the income tax payable in Venezuela, subject to limitations.
- In general terms, taxation of foreign-source income is ruled by domestic provisions on taxation of territorial-source income. Foreign source dividends are taxable when dividends are received. However, in case of investments located in JLFT, anti-deferral rules in the international fiscal transparency regime apply *(see below)*.

### Foreign technical assistance and services
Taxable income of foreign taxpayers providing technical assistance or technological services from abroad to individuals or entities that use them in Venezuela or assign them to third parties is presumed to be 30% of gross income for technical assistance fees and 50% of gross income for technological service fees. If the contract does not specify the proportion in which the services are rendered, the law provides that 60% of the technical assistance and technological service fees are deemed to be rendered abroad (i.e. foreign-source), with the other 40% deemed to rendered in Venezuela. The law also provides that 75% of the entire income related to technological services and 25% of that related to technological assistance is rendered abroad if not otherwise specified in the contract. *See the Withholding taxes section for more information.*

### International fiscal transparency regime
A regime of international fiscal transparency is created for the purpose of establishing special standards of fiscal control, governing capital investments in countries classified as JLFT, or tax havens. Under certain conditions, a Venezuelan taxpayer may be required to recognise income generated in its JLFT subsidiary on an accrual basis in its tax return.

## *Inflation adjustment*
A system for the adjustment of non-monetary assets, non-monetary liabilities, and shareholder's equity has been established. 'Non-monetary assets' include land, construction, machinery, vehicles, installations, inventories, and investments other than in securities (e.g. bonds and stocks).

There are two phases to the adjustments: (i) initial adjustments and (ii) annual adjustments. Both phases are mandatory adjustments for taxpayers engaged in commercial, industrial, financial, and insurance operations, and in the exploitation of mines and hydrocarbons. The annual adjustment is optional for taxpayers performing non-business activities.

### Initial adjustment
The initial adjustment on depreciable fixed assets requires a registration tax of 3% on the amount of the adjustment.

The initial adjustment must be filed at the closing date of any fiscal year ending after 1 January 1993. This adjustment is applicable to all non-monetary assets and non-monetary liabilities.

The initial adjustment is calculated by applying the variations between the CPI of the Caracas Metropolitan Area prevailing in the month in which the non-monetary assets were acquired and the month corresponding to the initial adjustment. Assets acquired before 1950 are deemed to have been acquired in January 1950.

A registry tax of 3% is applied exclusively to the initial revaluation adjustment of depreciable fixed assets. For payment, taxpayers must be registered with the Asset Revaluation Registry, maintained by the tax administration. The resulting tax may be paid in three consecutive annual instalments, beginning on the date of registration.

Companies in the pre-operating stage, deemed to end with the first invoice, must determine and pay a 3% tax once the pre-operating period has ended.

Depreciation or amortisation on the revaluation adjustment is allowed, based on the original estimated life of the asset.

### Annual adjustment

The annual adjustment is applied each year in determining taxable income. The adjustment factor must be applied to the following balance sheet items at the closing date of the fiscal year. The resulting adjustment will increase or decrease taxable income.

| Balance sheet items | Adjustment factor | Tax effect |
|---|---|---|
| **Non-monetary assets:** | | |
| Inventories (including inventories in transit) (2) | Annual variation of the CPI | Increase taxable income |
| Fixed assets (3) | Annual variation of the CPI | Increase taxable income |
| Other assets, trademarks, patents, production licenses, other rights, and investments in stock not registered in the Superintendencia Nacional de Valores (SNV) and deferred charges (except interest). | Annual variation of the CPI | Increase taxable income |
| Investments in shares registered in the SNV | Adjusted to the share market value at the end of the year | Increase taxable income |
| **Non-monetary liabilities:** | | |
| Deferred credits (except interest) | Annual variation of the CPI | Decrease taxable income |
| **Equity:** | | |
| Tax initial equity (1) | Annual variation of the CPI | Decrease taxable income |

Notes

1. Tax initial equity is defined as the difference between assets and liabilities at the beginning of the tax year, less accounts receivable from administrators, affiliated, and related companies. In order to determine the initial tax equity, assets not located in the country as well as goods, debts, and liabilities entirely applied to the production of deemed, exempt, or exonerated income are excluded.
2. Inventories are to be valued at historical cost for purposes of applying the CPI. The provisions of the income tax law detail the procedures for applying the CPI. The revaluation of inventories in the tax year is included as part of the initial inventories of the following year.
3. The annual revaluation adjustment of fixed assets is considered part of the cost when the assets are sold.

Net losses arising from the annual adjustment that have not been offset may be carried forward only to the next tax period (one year).

Gains or losses originating from the adjustment of accounts receivable or investments, as well as debts and liabilities in foreign currency or with a re-adjustability clause, are deemed to be carried out during the fiscal year in which they become demandable, collected, or paid, whichever comes first.

## *Deductions*

### *Depreciation*

Depreciation is generally computed on a straight-line basis although any other generally accepted method for accounting purposes is also accepted. Depreciation is not allowed on real estate used as rental property. Depreciation on the stepped-up portion of assets revalued by any method other than the inflation adjustments *(see the Income determination section)* is not permitted. In principle, useful lives of assets shall be consistent with the parameters used in accordance with accounting principles.

### Charitable contributions
Deductions for allowable charitable contributions are limited to 10% of taxable income (before deducting contributions) when taxable income does not exceed TU 10,000. When taxable income exceeds TU 10,000, charitable contributions are limited to 8% of taxable income. For oil extraction companies, the deduction is limited to 1% of the pre-contribution tax amount.

### Taxes
Municipal, state, and local taxes are deductible in determining taxable income. Corporate taxes are not deductible.

### Other significant items
Payments required by the labour law, such as profit sharing (generally between 15 days and four months' salary) and severance indemnity accruals are also deductible. In cases of unjustified dismissals, double severance indemnities must be paid. However, accruals for such additional indemnities are generally not deductible until paid.

### Net operating losses
Losses may be carried forward for three years. Losses may not be carried back. Note that losses from inflation adjustments may be carried forward only one year.

Foreign losses may be offset only against foreign profits.

### Payments to foreign affiliates
A Venezuelan corporation may claim a deduction for royalties and technical assistance and for technical service fees paid to foreign affiliates, subject to the following conditions:

- The contract is registered within 60 days of execution with the Superintendence of Foreign Investments (SIEX).
- Income tax payable by the recipient is withheld at the source.
- Transfer pricing requirements are met.
- In the case of technical assistance and technological services fees, the expenses may be deducted if such services cannot be otherwise provided in Venezuela.

Foreign companies domiciled in Venezuela are allowed to deduct royalties paid to parent companies or foreign affiliates. Companies must notify the SIEX of payments made within 60 days *(see the Withholding taxes section for more information)*. Branches of foreign companies, however, may not deduct such payments to head offices or related parties.

## Group taxation

Group taxation is no longer possible in Venezuela.

V

### Transfer pricing
Taxpayers that carry out operations with related parties abroad must calculate their income, costs, and deductions by applying a defined methodology of transfer pricing. This regime is applicable to imports, exports, and interest paid to recipients abroad as well as technical assistance, technological services, and royalty fees.

### Thin capitalisation
With the amendment of the 2007 income tax law, Venezuela introduced thin capitalisation rules that limit the deduction of interest from debt with related parties in excess of a 1:1 debt-to-equity ratio. Under these rules, if the average of a taxpayer's debt (with related and unrelated parties) exceeds the average amount of its equity for the respective fiscal year, the excess debt is treated as equity for income tax purposes. Consequently, the ability to deduct interest on related-party loans may be affected.

## Tax credits and incentives

### Capital investment
A special 10% investment tax credit is granted on the value of new investments in fixed assets (excluding land) made by those legal entities obtaining income from industrial and agro-industrial activities, construction, electricity, telecommunications, science, technology, and generally any industrial activity that represents an investment in advanced technology. This tax credit may be taken if such new investments are dedicated to effectively improving the productive capacity or creating a new enterprise.

The tourist sector is entitled to a 75% investment tax credit on the amount of new investments. The agricultural sector enjoys an 80% investment tax credit.

An additional 10% tax credit is granted on the amount of investments in assets, programmes, and activities aimed at the preservation and protection of the natural environment.

Investment tax reductions may be carried forward up to three years.

### Other incentives
Customs duty incentives are also available, such as drawbacks on the import of materials used for exporting products. This may take the form of a tax refund certificate issued by the Ministry of Finance. The certificate is a negotiable bond and will be accepted by the Treasury Funds Office for payment of national taxes. Determination of the amount of the refund will take into account the import duties effectively paid at the time the materials used in the manufacture of the exported product were received in Venezuela.

### Foreign tax credit
Foreign income tax paid on taxable foreign income may be offset by the payable Venezuelan tax up to the proportion of Venezuelan payable tax related to foreign-source income. Taxpayers must keep documentation of foreign tax. No carryforward rules are provided for in domestic regulations.

## Withholding taxes

Resident corporations making certain types of payments must withhold taxes. T2 refers to Tariff 2. These include the following:

| | Resident (%) (1) | | Non-resident (%) | |
|---|---|---|---|---|
| | Corporation | Individual | Corporation | Individual |
| Commissions (2) | 5 | 3 | 5 | 34 |
| Royalties (3) | 5 | 3 | T2 on 90 | 34 on 90 |

| | Resident (%) (1) | | Non-resident (%) | |
|---|---|---|---|---|
| | Corporation | Individual | Corporation | Individual |
| Interest to foreign financial institutions | N/A | N/A | 4.95 | N/A |
| Other interest | 5 | 3 | T2 on 95 | 34 on 95 |
| Professional fees | 5 | 3 | T2 on 90 | 34 on 90 |
| Technical assistance fees (3) | 5 | 3 | T2 on 30 | 34 on 30 |
| Technological service fees (3) | 5 | 3 | T2 on 50 | 34 on 50 |
| Real estate rentals | 5 | 3 | 5 | 34 |
| Tangible personal property rentals | 5 | 3 | 5 | 34 |
| Contractor and subcontractor services | 2 | 1 | T2 | 34 |
| Film and TV exhibition rights | 5 | 3 | T2 on 25 | 34 on 25 |
| Insurance and reinsurance premiums | N/A | N/A | 10 on 30 | N/A |
| Payments to international media organisations | 5 | 3 | T2 on 15 | N/A |
| Acquisition of Venezuela commercial funds | 5 | 3 | 5 | 34 |
| Payments to non-domiciled international transportation companies (4) | N/A | N/A | T2 on 5 | N/A |

Notes

1. Withholding taxes (WHT) constitute prepayments against final tax liabilities as determined by the income tax return when filed.
2. Includes commissions earned in instances other than through a dependent relationship (e.g. employer/employee). Commissions are subject to withholdings in the same manner as salaries and wages.
3. The rates for non-residents are similar to those rates applicable for payments to a non-domiciled corporation not resident in a treaty country and rendering services from abroad with no PE in Venezuela.
4. Excludes payments exempted under international shipping agreements.

### *Tax treaties*

There are currently comprehensive treaties for the avoidance of double taxation with the following countries:

| Recipient | Interest (%) | Dividend (%) | Royalties (%) |
|---|---|---|---|
| Austria | 4.95/10 | 5/15 | 5 |
| Barbados | 5/15 | 5/15 | 10 |
| Belarus | 5 | 5/15 | 5/10 |
| Belgium | 10 | 5/15 | 5 |
| Brazil (not in force) | 15 | 10/15 | 15 |
| Canada | 10 | 10/15 | 5/10 |
| China | 5/10 | 5/10 | 10 |
| Cuba | 10 | 10/15 | 5 |
| Czech Republic | 10 | 5/10 | 12 |
| Denmark | 5 | 5/10 | 10 |
| France | 5 | 0/15 | 5 |
| Germany | 5 | 5/15 | 5 |
| Indonesia | 10 | 10/15 | 20 |
| Iran | 5 | 5/10 | 5 |
| Italy | 10 | 10 | 7/10 |
| Korea | 5/10 | 5/10 | 5/10 |
| Kuwait | 5 | 5/10 | 20 |

| Recipient | Interest (%) | Dividend (%) | Royalties (%) |
|---|---|---|---|
| Malaysia | 15 | 5/10 | 10 |
| Mexico (not in force) | 4.95/15 | 5 | 10 |
| Netherlands | 5 | 0/10 | 5/7/10 |
| Norway | 5/15 | 5/10 | 12 |
| Portugal | 10 | 10 | 12 |
| Qatar | 5 | 5/15 | 5 |
| Russia | 5/10 | 10/15 | 15 |
| Spain | 10 | 0/10 | 5 |
| Sweden | 10 | 5/10 | 7/10 |
| Switzerland | 5 | 0/10 | 5 |
| Trinidad | 15 | 5/10 | 10 |
| United Kingdom | 5 | 0/10 | 5/7 |
| United States | 4.95/10 | 5/15 | 5/10 |

| Recipient | Technical Services (%) | Technical Assistance (%) | Capital gains on movable property (%) | Capital gains on immovable property (%) |
|---|---|---|---|---|
| Austria | 5 | 0/5 | 0 | 34 |
| Barbados | 10 | 10 | 10 | 34 |
| Belarus | 5/10 | 0/10 | 0/10 | 34 |
| Belgium | - | - | - | 34 |
| Brazil (not in force) | 15 | 15 | 15 | 34 |
| Canada | 5/10 | - | - | 34 |
| China | 10 | 10 | 10 | 34 |
| Cuba | 5 | 5 | 5 | 34 |
| Czech Republic | 12 | 12 | 12 | 34 |
| Denmark | 10 | 5 | 5 | 34 |
| France | - | - | - | 34 |
| Germany | - | - | - | 0/34 (1) |
| Indonesia | 20 | 10 | 10 | 34 |
| Iran | 5 | 5 | 5 | 34 |
| Italy | 10 | 10 | 10 | 34 |
| Korea | 5/10 | 0/10 | 0/10 | 34 |
| Kuwait | 20 | 20 | 20 | 34 |
| Malaysia | 10 | 10 | 10 | 34 |
| Mexico (not in force) | 0/10 | 10 | 10 | 34 |
| Netherlands | - | - | - | 0/34 (1) |
| Norway | 12 | 9 | 9 | 34 |
| Portugal | 12 | 10 | 34 | 34 |
| Qatar | - | 5 | 5 | 34 |
| Russia | 10/15 | 10 | 10 | 34 |
| Spain | 5 | - | - | 0/34 (2) |
| Sweden | 7 | 7 | 7 | 34 |
| Switzerland | 5 | - | - | 34 |
| Trinidad | 10 | 10 | 10 | 34 |
| United Kingdom | 5 | - | - | 34 |

| Recipient | Technical Services (%) | Technical Assistance (%) | Capital gains on movable property (%) | Capital gains on immovable property (%) |
|---|---|---|---|---|
| United States | - | - | 0 | 34 |

Notes

1. Capital gains on shares of real estate companies are not subject to taxation in Venezuela.
2. Capital gains on shares of real estate companies are not subject to taxation in Venezuela provided that real estate is incorporated to the generation of income.

The treaties with Brazil, Mexico, and Vietnam have been published in the Official Gazette and signed by the contracting parties but have not entered into force since diplomatic notes have not been exchanged.

Treaties with other countries outside the countries listed above are being negotiated.

## *Tax administration*

### *Returns*

Final tax returns must be filed within three months following the end of the tax year. The system is one of self-assessment.

### *Payment of tax*

The total amount of tax due must be paid at the time of filing the annual return. Estimated tax payments must be paid consecutively in six monthly instalments. Companies engaged in mining, hydrocarbon exploitation, and related activities must make 12 equal monthly estimated tax payments.

### *Corporate tax calculation*

| | | |
|---|---|---|
| Taxable income (manufacturing company) | VEF | 260,000.00 |
| Divided by the value of the TU (VEF 76/1 TU) | VEF | 76 |
| Taxable income in TU | TU | 3,421.05 |
| Tax thereon: | | |
| Tariff 2: 34% | TU | 1,163.16 |
| Subtract (per tax table) | TU | (500) |
| Total Tax | TU | 663.16 |
| Less: Withholding taxes | TU | (100) |
| Less: Advance payments | TU | (100) |
| Net income tax payable in TU | TU | 463.16 |
| Net Income tax payable in VEF* | VEF | 35,200.16 |

*Multiplied by the TU value, (i.e. VEF 76/1TU)

## *Other issues*

### *Exchange control*

In January 2003, the Venezuelan government and the Venezuelan Central Bank restricted the free trade of foreign currency and established an Exchange Control Regime, which is characterised by the following aspects:

- The Venezuelan Central Bank (VCB) centralises the purchase and sales of foreign currency.
- All foreign currency derived from the export of goods, services, and technology must be sold to the VCB, through the financial system and at the official exchange rate. Exporters are to be registered with the Users Registry and are to consign certain documentation certifying good fiscal status. Likewise, the sale of every foreign currency, introduced in the country for various concepts, including direct foreign investment, to the VCB is mandatory. In such case, said foreign currency is to be registered with the SIEX for re-exportation and remittance purposes. The acquisition of foreign currency for imports is also subject to application for 'Foreign Currency Authorisation', which is subject to certain conditions.
- As of 14 June 2010, a new mechanism was put in place which regulates the purchase of securities denominated in foreign currency through the System of Transactions with Securities stated in Foreign Currency (SITME by its Spanish acronym) which is regulated and controlled by the Venezuelan Central Bank. The aforesaid mechanism is limited to certain transactions, and companies are allowed to purchase until USD 350,000 per month, this is, USD 4,200,000 per year.

The Law on Foreign Exchange Crimes is in effect, thereby establishing the actions that constitute exchange crimes and their respective penalties. Said penalties may be both criminal and pecuniary.

## Significant developments

At the beginning of 2011, the Ministry of Finance issued a new circular partly amending the corporate income tax (CIT) regulations. The new circular provides the following new guidance:

- Costs of damaged goods due to expiration or natural spoilage are tax deductible, subject to satisfaction of stipulated conditions.
- The condition that bonuses be of a 'salary nature' for tax deductibility has been abolished. The condition remains that bonuses and the entitlement criteria must be set out in employment contracts, collective labour agreements, or internal policies.
- The tax deductible cap applicable to clothing benefits (cash and/or non-cash) increased from 1.5 million Vietnamese dong (VND) to VND 5 million.
- A tax deduction is allowed for year-end salary accruals of not more than 17% of the actual salary costs of the year, provided that the company is not in a loss position.
- Refunds of import duty or export duty (ID/ED) related to the current year should be offset against deductible expenses. A refund of ID/ED paid in previous years shall be treated as other income. However, if the ID/ED relates directly to incentivised activities, the refund should be included in the profits eligible for such incentives.
- Tax losses incurred in a quarter are now allowed to be carried forward to the following quarters of the same tax year for CIT provisional payment purposes.

## Taxes on corporate income

### Standard rates

All taxes are imposed at the national level. There are no local, state, or provincial taxes. The standard CIT rate is 25%. Enterprises operating in the oil and gas industry will be subject to CIT rates ranging from 32% to 50%, depending on each project.

There is no concept of tax residency for CIT. Business organisations established under the laws of Vietnam are subject to CIT and taxed on worldwide income. 25% CIT shall be applicable to foreign income. There are no provisions for tax incentives for such income.

Foreign organisations/individuals carrying out business in Vietnam without setting up a legal entity in Vietnam and/or having Vietnam-sourced income are considered foreign contractors, irrespective of whether the services are performed inside or outside Vietnam. Payments to foreign contractors are subject to foreign contractor withholding tax (FCWT), which consists of VAT and CIT elements. *See the Withholding taxes section for more information*.

### *Preferential rates*
Preferential CIT rates of 10% and 20% are available where certain criteria are met. *See the Tax credits and incentives section for more information.*

### *Calculation of taxable profits*
Taxable profit is the difference between total revenue, whether domestic or foreign sourced, and deductible expenses, plus other assessable income.

Taxpayers are required to prepare an annual CIT return which includes a section for making adjustments between accounting profits and taxable profits.

## *Corporate residence*

There is no concept of tax residency for CIT. Enterprises established under the law of Vietnam are subject to CIT in Vietnam. In addition, Vietnam has a broadly worded permanent establishment (PE) definition.

### *Permanent establishment (PE)*
In Vietnam, a PE is defined as "a fixed place of business through which a foreign enterprise carries out part or the whole of its business or production activities in Vietnam and earns income. The permanent establishment of a foreign enterprise shall include:

- A branch, an operating office, a factory, a workshop, means of transportation, a mine, an oil and gas field, any place relating to the exploitation of natural resources in Vietnam.
- A building site; a construction, installation, or assembly project.
- An establishment providing services including consultancy services through its employees or other persons.
- An agent for a foreign enterprise.
- A representative in Vietnam where [one] has authority to sign contracts under the name of the foreign enterprise, or where [one] does not have authority to sign contracts under the name of the foreign enterprise but regularly delivers goods or provides services in Vietnam."

Foreign enterprises with their PEs in Vietnam shall pay tax on the taxable income earned in Vietnam (irrespective of whether it relates to the PE) and on the taxable income generated out of Vietnam and related to operations of the PEs.

Where a treaty on avoidance of double taxation to which Vietnam is a signatory contains different provisions relating to PE, such treaty shall apply.

## *Other taxes*

### *Value-added tax (VAT)*
VAT is applied to goods and services used for production, trading, and consumption in Vietnam (including goods and services purchased from abroad), with certain exemptions. Depending on the category of goods or services, the VAT rates are as follows:

- A 0% rate applies to exported goods, including goods sold to enterprises without PEs in Vietnam (including companies in non-tariff zones), goods processed for export,

goods sold to duty free shops, exported services, construction and installation carried out abroad or for export processing enterprises, aviation, marine, and international transportation services.
- A 5% rate applies generally to areas of the economy concerned with the provision of essential goods and services. This includes clean water, fertiliser production, teaching aids, books, foodstuffs, medicine and medical equipment, husbandry feed, various agricultural products and services, technical/scientific services, rubber latex, sugar and its by-products.
- The 10% 'standard' rate applies to activities not specified as exempt or subject to the 0% or 5% rate.

When a supply cannot be readily classified based on the tax tariff, VAT must be calculated based on the highest rate applicable for the particular range of goods which the business supplies.

Taxpayers must file monthly VAT returns and remit the VAT payable no later than the 20th day of the following month.

### *Special sales tax (SST)*
SST is a form of excise tax that applies to selected goods and services, such as alcohol, imported automobiles having less than 24 seats, motorcycles, airplanes, boats, petroleum, air-conditioners up to 90,000 British thermal units (BTU), cigarettes, playing cards, discotheques, massages, karaoke, casinos, gambling, golf clubs, and entertainment with betting and lotteries. For goods, SST is charged at the production or importation stage.

The SST rates are as follows:

| Products / services | SST rate (%) |
|---|---|
| Cigar/cigarette | 65 |
| Spirit/wine | 25 to 45 |
| Beer | 45 |
| Automobiles having less than 24 seats | 10 to 60 |
| Motorcycle of cylinder capacity above 125cm3 | 20 |
| Airplane | 30 |
| Boat | 30 |
| Petrol | 10 |
| Air-conditioners (not more than 90,000 BTU) | 10 |
| Playing cards | 40 |
| Votive paper | 70 |
| Discotheques | 40 |
| Massage, karaoke | 30 |
| Casinos, jackpot games | 30 |
| Entertainment with betting | 30 |
| Golf | 20 |
| Lottery | 15 |

### *Production royalties*
Production royalties in the form of a natural resource tax (NRT) are payable in industries exploiting natural resources such as oil and gas, other minerals, forests,

fisheries, and natural water. The tax rates vary depending on the natural resource being exploited, ranging from 1% to 40%, and are applied to the production output at a specified taxable value per unit. Various methods are available for the calculation of the taxable value of the resources, including cases where the commercial value of the resources cannot be determined.

### Property taxes
The rental of land use rights by foreign investors (if not contributed as capital) is, in effect, a form of property tax. It is usually known as land rental, and the range of rates is wide depending upon the location, infrastructure, and the industrial sector in which the business is operating.

### Customs duties
Import duty rates are classified into three categories: ordinary rates, preferential rates, and special preferential rates.

Preferential rates are applicable to imported goods from countries that have most-favoured-nation status with Vietnam (MFN, also known as normal trade relations). The MFN rates are in accordance with Vietnam's World Trade Organization (WTO) commitments and are applicable to goods imported from other member countries of the WTO.

Special preferential rates are applicable to imported goods from countries that have a special preferential trade agreement with Vietnam.

Import duty exemptions are provided for encouraged projects and goods imported in certain circumstances.

Export duties are charged only on a few items, basically certain natural resources. Rates range from 0% to 30%.

## Branch income

Branches of foreign entities are subject to the same CIT regime as entities incorporated in Vietnam.

## Income determination

### Inventory valuation
At present there are no provisions for valuing inventories or determining inventory flows. The tax treatment follows the accounting treatment.

### Asset revaluation
Gains from the revaluation of assets for the purposes of capital contribution or transfer upon division, demerger, consolidation, merger, or conversion of business are subject to 25% CIT.

### Capital gains
Gains made by a foreign investor on the transfer of an interest (as opposed to shares) in a limited liability company are subject to 25% CIT. The assignee is required to withhold the tax due from the payment to the assignor, and account for this to the tax authorities.

Gains earned by a foreign investor from selling securities (i.e. bonds, shares of public joint-stock companies, irrespective of whether they are listed or non-listed) are subject to CIT at a deemed rate of 0.1% of the sales proceeds. 25% CIT will apply to any gains earned by a foreign company (not incorporated in Vietnam) upon a sale of shares in a non-public joint-stock company.

### *Dividend income*

Dividends received from investments in other companies in Vietnam are from after tax profits and are not subject to CIT.

### *Other income subject to CIT*

The following other income items are subject to 25% CIT and are not entitled to tax incentives (including preferential tax rate and exemption/reduction):

- Income from transfer of real estate.
- Income from royalty, leasing of assets.
- Income from transfer of assets.
- Interest income.
- Income from trading of foreign currency.
- Reversal of provisions.
- Collected written off debts.
- Unidentified payables.
- Difference between penalties and compensation for breaching economic contracts.
- Gain from the revaluation of assets.

### *Foreign income*

Foreign income, under the domestic tax law, is subject to 25% CIT with tax credits available *(see Foreign tax credit in the Tax credits and incentives section)*.

Foreign income shall be taxed when earned. There are no provisions for tax deferral or preferential tax rates for foreign income.

## Deductions

### *Depreciation and amortisation*

Tax depreciation may differ from accounting depreciation. Depreciation in excess of the rates specified in the regulations on tax depreciation is not deductible. These regulations specify maximum and minimum permissible effective lives for various classes of assets, including intangibles. Current straight-line tax depreciation rates are as follows:

| Asset | Rates (%) |
|---|---|
| Buildings | 2 to 16.67 |
| Office equipment | 10 to 20 |
| Automobiles | 3.33 to 16.66 |
| Machinery and equipment | 5 to 33.33 |
| Intangible assets | Not more than 5 |

V

### *Interest expenses*

Interest on loans corresponding to the portion of charter capital not yet contributed is not deductible.

Interest on loans from non-economic and non-credit organisations exceeding 1.5 times the interest rate set by the State Bank of Vietnam is not deductible.

### *Charitable contributions*
Donations are generally non-deductible, except certain donations for education, health care, natural disasters, or building charitable homes for the poor.

### *Taxes*
Creditable input VAT, CIT, and other fees/charges are not deductible for CIT purposes.

### *Other non-deductible expenditures*
The following other expenditures are specifically stated to be non-deductible:

- Depreciation of fixed assets which is not in accordance with the prevailing regulations.
- Employee remuneration expenses which are not actually paid or are not stated in a labour contract or collective labour agreement.
- Life insurance premiums for employees.
- The portion of costs of raw materials, materials, fuel or goods which are used in excess of the reasonable consumption levels.
- Reserves for research and development (R&D) not in accordance with the prevailing regulations.
- Provisions for stock devaluation, bad debts, financial investment losses, product warranties, or construction work which are not in accordance with the prevailing regulations.
- Advertising, promotion (except certain items), conferences/parties, commissions, prompt payment discounts exceeding 10% of total other deductible expenses (this cap is increased to 15% for newly-established enterprises for the first three operating years).
- Unrealised foreign exchange gain/losses due to the revaluation of foreign currency items other than account payables at the end of a financial year.
- Management expenses allocated to PEs in Vietnam by the foreign company's head office which are not in accordance with the regulations.
- Administrative penalties and fines.

For certain businesses (e.g. insurance companies, securities trading, lotteries), the Ministry of Finance provides specific guidance on deductible expenses for CIT purposes.

### *Net operating losses*
Losses may be carried forward fully and consecutively for a maximum of five years. Carryback of losses is not permitted.

### *Payments to foreign affiliates*
There are no special restrictions on the deductibility of royalties, loan interest, and service fees paid to foreign affiliates (except for those paid by branches). However, the payment must be defendable on an arm's-length basis as required by transfer pricing regulations *(see Transfer pricing in the Group taxation section)*. Certain contracts for the transfer of technology and foreign loans must be registered with the competent authorities.

## *Group taxation*

There is no provision for any form of consolidated filing or group loss relief in Vietnam.

### Transfer pricing

Vietnam has transfer pricing regulations which outline various situations where transactions will be considered as being between related parties and the mechanisms for determining the market 'arm's length' transaction value (e.g. comparable uncontrolled price, cost plus, resale price, comparable profits, and profit split).

Under the wide ranging definition of associated parties, the control threshold is lower than in many other countries (20%), and the definition also extends to certain significant supplier, customer, and funding relationships between otherwise unrelated parties.

Compliance requirements include an annual declaration of related party transactions and transfer pricing methodologies used, which is required to be filed together with the annual CIT return.

Companies which have related party transactions must prepare and maintain contemporaneous transfer pricing documentation.

### Thin capitalisation

There are no thin capitalisation requirements in the tax legislation. However, the level of permitted debt funding will be limited by virtue of licensing requirements. The maximum amount of debt funding is the difference between the licensed investment capital and charter capital.

## Tax credits and incentives

### Inbound investment incentives

Tax incentives are granted based on regulated encouraged sectors and difficult socio-economic locations. The sectors which are encouraged by the Vietnamese Government include education, health care, sport/culture, high technology, environmental protection, scientific research, infrastructural development, and computer software manufacture.

The two preferential rates of 10% and 20% are available starting from the commencement of operating activities. When the preferential rate expires, the CIT rate reverts to the standard rate.

Criteria for preferential tax rates are as follows:

- 10% tax rate for 15 years shall be applied to the newly-established enterprises which:
  - operate in regions with specially difficult socio-economic conditions, in economic zones, and high technology zones
  - invest in high technology, science research and technology development, development of water plants, power plants, water supply, and drainage systems; bridges, roads, railways; airports, sea ports, river ports; airfields, stations, and other especially important infrastructure facilities decided by the Prime Minister, or
  - invest in production of computer software.
- 10% tax rate for the duration of operations is available for the income earned from activities in the fields of education/training, vocational training, public health, culture, sport, and environment (socialised fields).
- 20% tax rate shall be applied for ten years to new enterprises established from investment projects in regions with difficult socio-economic conditions.

- 20% tax rate for the duration of operations is available for the income earned from agricultural service cooperatives and people's credit fund.

***Tax holidays***
Investors may be considered for tax holidays and reductions. The holidays take the form of a complete exemption from CIT for a certain period beginning immediately after the enterprise first makes profits, followed by a further period where tax is charged at 50% of the applicable rate. However, where the enterprise has not derived profits within three years of the commencement of operations, the tax holidays/tax reduction will start from the fourth year of operation. Criteria for eligibility to these holidays and reductions are set out in the CIT regulations as follows:

- Four years of tax exemption and nine subsequent years of 50% reduction shall be applied to the newly-established enterprises which:
  - operate in regions with specially difficult socio-economic conditions, in economic zones, and high technology zones
  - invest in high technology, science research and technology development, development of water plants, power plants, water supply, and drainage systems; bridges, roads, railways; airports, sea ports, river ports; airfields, stations, and other especially important infrastructure facilities decided by the Prime Minister
  - invest in production of computer software, or
  - operate in the socialised fields and in regions with difficult or especially difficult socio-economic conditions.
- Four years of tax exemption and 50% tax reduction for five subsequent years shall be given to new enterprises operating in the socialised fields and in regions not included in the list of regions with difficult or especially difficult socio-economic conditions.
- Two years of tax exemption and four subsequent years of 50% reduction shall be applied to newly-established enterprises operating in regions with difficult socio-economic conditions.

***Employment incentives***
Additional tax reductions may be available for engaging in manufacturing, construction, and transportation activities which employ several female staff, and/or ethnic minorities. CIT reduction must correspond with the actual payment for those employees.

***Research and Development fund***
Business entities in Vietnam are allowed to set up a tax deductible Research and Development fund. Enterprises can appropriate up to 10% of annual profits before tax to the fund. Various conditions apply.

***CIT deferral for small and medium size enterprises***
Eligible small and medium size enterprises (as regulated) can enjoy a one-year deferral of 2011 CIT payments.

***Foreign tax credit***
In respect of Vietnamese enterprises earning income from overseas investment, CIT (or a kind of tax with a nature similar to CIT) paid in a foreign country or paid on behalf by its partner in the country receiving the investment (including tax levied on the dividend) is allowed to be creditable. The credit shall not exceed the CIT amount payable in Vietnam.

The foreign income tax which is entitled to exemption or reduction in accordance with the foreign law shall also be credited.

## Withholding taxes

### Interest

An interest withholding tax (WHT) of 10% applies to payments to an overseas lender. Interest on pre 1999 loans may be exempt from WHT. Offshore loans provided by certain government or semi-governmental institutions may obtain an exemption from the interest WHT where a relevant double taxation agreement (DTA) or Inter-Government Agreement applies.

Interest earned from bonds (except for tax exempt bonds) and certificates of deposit are subject to 10% WHT. The sale of bonds and certificates of deposits are subject to deemed tax of 0.1% of the gross sales proceeds.

### Royalties, license fees, etc.

A 10% royalty WHT applies in the case of payments made to a foreign party for transfers of technology, unless the transfers are contributed as part of legal capital (akin to equity). Transfers of technology are defined very broadly. Certain contracts for the transfer of technology must be registered with the competent authorities.

### Management fees and head office charges

WHT applies on management fees and head office charges at the rates applicable to services *(see below)*.

### Payments to foreign contractors

FCWT on payments to foreign contractors applies where a Vietnamese contracting party (including a foreign-invested enterprise incorporated in Vietnam) contracts with a foreign party that does not have a licensed presence in Vietnam, irrespective of whether the services are provided in Vietnam or overseas.

Foreign contractors can apply to be deduction-method VAT payers if they adopt the Vietnamese accounting system. If accounting records are adequate, the foreign contractor will pay CIT on actual profits, but otherwise on a deemed-profit basis.

For direct (non-deduction-method) foreign contractors, VAT and CIT will be withheld by the contracting party at a deemed percentage of taxable turnover. Various rates are specified according to the nature of the contract performed. For CIT, the WHT rate varies from 0.1% to 10%. For VAT, the effective WHT rate can also range from 3% to 5%. The VAT withheld by the contracting party is an allowable input credit in its VAT return.

A summary of VAT and CIT WHT rates follow:

| Types of payment | Effective VAT rate (%) | Deemed CIT rate (%) |
|---|---|---|
| Trading: distribution, supply of goods, materials, machinery, and equipment in Vietnam. | Exempt (1) | 1 |
| Services | 5 | 5 |

| Types of payment | Effective VAT rate (%) | Deemed CIT rate (%) |
|---|---|---|
| Services together with supply of machinery and equipment | 3 | 2 |
| Construction, installation (2) without supply of materials or machinery, equipment. | 5 | 2 |
| Construction, installation (2) with supply of materials or machinery, equipment. | 3 | 2 |
| Leasing of machinery and equipment | 5 | 5 |
| Leasing of aircraft, vessels (including components) | Not specified | 2 |
| Transportation | 3 | 2 |
| Interest | Exempt | 10 |
| Royalties | Exempt | 10 |
| Insurance | Exempt | 2 |
| Transfer of securities | Exempt | 0.1 |
| Manufacturing, other business activities | 3 | 2 |

Notes

1. On the basis that import VAT is paid.
2. Relates to VAT only.

### *Cross-border leases*

A Vietnam-based lessee is required to withhold tax from payments to an offshore lessor. 5% VAT and 5% CIT is applicable to the rental charge if it is an operating lease. If it is a finance lease, the interest portion will be exempt from VAT and subject to 10% CIT.

### *Tax treaties*

The above WHT rates may be affected by a relevant DTA.

| Recipient | Interest (%) | Royalties (%) |
|---|---|---|
| Algeria (1) | - | - |
| Australia | 10 | 10 |
| Austria (2, 4) | 10 | 7.5/10 |
| Bangladesh (2, 3) | 15 | 15 |
| Belarus (2, 3) | 10 | 15 |
| Belgium (2, 3, 4) | 10 | 5/10/15 |
| Brunei Darussalam (3) | 10 | 10 |
| Bulgaria (2, 3) | 10 | 15 |
| Canada (4) | 10 | 7.5/10 |
| China (3) | 10 | 10 |
| Cuba | 10 | 10 |
| Czech Republic (3) | 10 | 10 |
| Denmark (2, 3, 4) | 10 | 5/15 |
| Egypt (1) | - | - |
| France | 0 | 10 |
| Finland | 10 | 10 |
| Germany (3, 4) | 10 | 7.5/10 |
| Hong Kong (3, 4) | 10 | 7/10 |
| Hungary | 10 | 10 |

| Recipient | Interest (%) | Royalties (%) |
|---|---|---|
| Iceland (3) | 10 | 10 |
| India (3) | 10 | 10 |
| Indonesia (2, 3) | 15 | 15 |
| Israel (2, 3, 4) | 10 | 5/7.5/15 |
| Italy (3, 4) | 10 | 7.5/10 |
| Ireland (2, 3, 4) | 10 | 5/10/15 |
| Japan (3) | 10 | 10 |
| Korea (South) (2, 4) | 10 | 5/15 |
| Korea (North) (3) | 10 | 10 |
| Kuwait (1) | - | - |
| Laos | 10 | 10 |
| Luxembourg (3) | 10 | 10 |
| Malaysia (3) | 10 | 10 |
| Mongolia (3) | 10 | 10 |
| Morocco (1) | - | - |
| Mozambique (1) | - | - |
| Myanmar (3) | 10 | 10 |
| Netherlands (2, 3, 4) | 10 | 5/10/15 |
| Norway (3) | 10 | 10 |
| Oman (3) | 10 | 10 |
| Pakistan (2) | 15 | 15 |
| Philippines (2) | 15 | 15 |
| Poland (2, 3, 4) | 10 | 10/15 |
| Qatar (1) | - | - |
| Romania (2) | 10 | 15 |
| Russia (2) | 10 | 15 |
| Saudi Arabia (1) | - | - |
| Seychelles (2,3) | 10 | 10 |
| Singapore (2, 3, 4) | 10 | 5/15 |
| Slovakia | - | - |
| Spain (3) | 10 | 10 |
| Sri Lanka (2, 3) | 10 | 15 |
| Sweden (3, 4) | 10 | 5/15 |
| Switzerland | 10 | 10 |
| Taiwan (2, 3) | 10 | 15 |
| Thailand (2, 3) | 10/15 | 15 |
| Tunisia (1) | - | - |
| UAE (1) | - | - |
| Ukraine (3) | 10 | 10 |
| United Kingdom (3) | 10 | 10 |
| Uzbekistan (2) | 10 | 15 |
| Venezuela | - | - |

Notes

1. The treaty is not yet in force
2. In some cases, the limits set by the treaty are not lower than the present withholding rate under domestic law. Therefore, the domestic rates will apply.
3. Interest derived by certain government bodies is exempt from WHT.
4. Royalty WHT rates vary for certain types of royalties.

## Tax administration

### Returns

The annual finalisation return and the audited financial statements must be filed within 90 days of the end of the financial year. The standard tax year is the calendar year. However, different accounting year-ends can be used if approval is obtained from the authorities.

### Payment of tax

CIT shall be declared and paid provisionally on a quarterly basis (based on actual revenues and expenses of each quarter). Quarterly CIT returns and payment must be made no later than the 30th day of the next quarter.

### Statute of limitations

The general statute of limitations for imposing tax administration penalties is two years. The tax authorities can collect under declared and unpaid tax at any time.

### Audit cycle

Tax audits are carried out regularly and often cover a number of tax years. Prior to an audit, the tax authorities send the taxpayer a written notice of time and scope of the audit inspection.

### Penalties

There are detailed regulations setting out penalties for various tax offences. These range from relatively minor administrative penalties through to tax penalties amounting to various multiples of the additional tax assessed.

In practice, imposition of penalties has been arbitrary and inconsistent. However, in recent periods there has been a much tougher stance adopted by the tax authorities. Hence, where tax is paid late (e.g. as a result for of a tax audit investigation), there is a significant likelihood of penalties being imposed. Notably, where tax adjustments are made at a tax audit, any resulting additional taxable profits are not eligible for any CIT incentives to which a company may be entitled.

## Other issues

### Foreign investment restrictions

In several fields, foreign investment will not be licensed or will only be licensed under special conditions. The List of Conditional Investment Sectors include television, production and publishing cultural products, telecommunication, transportation by all means, cigarette production, exploring and processing natural resources, real-estate business, education, medical services and distribution.

### Exchange controls

All buying, selling, lending, and transfer of foreign currency need to be made through credit institutions and other financial institutions authorised by the State Bank of Vietnam (SBV).

Outflow of foreign currency by transfer is authorised for certain transactions such as payments for imports and services abroad, refund of loans contracted abroad and payment of interest accrued thereon, transfer of profits and dividends, and revenues from transfer of technology.

All monetary transactions in Vietnam must be undertaken in Vietnamese dong. Exceptions are applicable to payments for exports made between principals and their agents, and payments for goods and services purchased from institutions authorised to receive foreign currency payments such as for air tickets, shipping and air freight, insurance, and international communications.

### *Forms of doing business*

According to the Law on Enterprises, a foreign-invested enterprise may be established as either a single member limited liability or a limited liability with more than one member, a joint-stock company, or a partnership.

### *Intellectual property*

Intellectual property rights are protected by the Civil Code (1995 and 2005), the Law on Intellectual Property (2005), and a host of subordinate legislation.

Vietnam is signatory to the Paris Convention, the Madrid Agreement on International Trademark Registration, and the Patent Cooperation Treaty and is a member of the World Intellectual Property Organisation. Vietnam has entered into an agreement on copyrights with the United States. According to the Vietnam- US Bilateral Trade Agreement, Vietnam is further under the obligation to adhere to the Berne Convention.

## Significant developments

Zimbabwe's annual budget presentation was held on 25 November 2010 by the Minister of Finance, the Honorable Tendai Biti, and the proposed changes have been promulgated into law.

The announcements relating to corporate tax can be summarised as follows.

### Value-added tax (VAT)

Beginning 1 January 2011, it is mandatory for all registered operators with an annual turnover exceeding USD 240,000 to use electronic fiscal registers (EFRs) that can be linked to the Zimbabwe Revenue Authority (ZIMRA). However, the actual availability of these registers has been delayed.

Beginning 1 January 2011, un-beneficiated chrome exports, which were previously standard-rated, are subject to an increased VAT rate of 20%.

### Income tax

There have been no significant corporate income tax developments in Zimbabwe during the past year.

## Taxes on corporate income

The corporate tax rate for companies (other than mining companies with special mining leases, but including branches) continues at 25.75%. This rate includes a base rate of 25% plus a 3% AIDS levy.

Zimbabwe presently operates on a source-based tax system. This means that income from a source within, or deemed to be within, Zimbabwe will be subject to tax in Zimbabwe unless a specific exemption is available. The specific circumstances of a transaction should always be considered to determine whether the transaction gives rise to taxation in Zimbabwe.

Income earned by foreign companies from a source within, or deemed to be within, Zimbabwe will be subject to tax in Zimbabwe. In such a case, one should determine whether the foreign entity is obliged to register a local entity. A company is required to register a branch if it has established a place of business or is otherwise considered to be trading in Zimbabwe. A local subsidiary company may be registered as an alternative to a branch operation.

Non-residents who do not have a place of business in Zimbabwe may, however, be subject to withholding tax (WHT). *See the Withholding taxes section for additional details.*

Note that Zimbabwe is currently considering a move to a residence-based tax system.

## *Corporate residence*

Currently, the Zimbabwean tax system is based on source and not on residency. Zimbabwe is moving towards a residence-based taxation system, but the details are still to be announced. Income derived, or deemed to be derived, from sources within Zimbabwe is subject to tax.

Source is the place where income originates or is earned, not the place of payment. If goods are sold pursuant to a contract entered into within Zimbabwe, the source of income is deemed to arise in Zimbabwe, regardless of the place of delivery or transfer of title.

Certain types of income arising outside Zimbabwe may, in the hands of a domestic company, be deemed to arise in Zimbabwe and be taxed as such. Examples include interest and certain copyright royalties arising outside Zimbabwe. Where the income is deemed to be from Zimbabwe, relief of the foreign tax suffered, up to a maximum of the Zimbabwe tax, may be allowed as a tax credit.

### *Permanent establishment (PE)*

In the event that Zimbabwe has entered into a double taxation agreement with the country where the foreign company resides, the entity will only be taxable in Zimbabwe if it operates through a PE, which, in most cases, includes a fixed place of business. The establishment of a local entity or branch will usually create a PE, although the provisions of the related tax treaty should be considered. If a PE exists, only the portion of the income attributable to the PE will be subject to tax in Zimbabwe.

Otherwise, and except for the PE concept embodied in the tax treaties, corporate residence is of little tax significance.

## *Other taxes*

### *Value-added tax (VAT)*

VAT is a transaction tax, and the implications will vary for different transactions. Some transactions are taxed at a rate of 15% or 0% while other transactions are exempt from VAT. Input tax deductions may be claimed, subject to certain provisions. Advice on VAT implications of specific transactions related to corporate operations should be obtained prior to execution of transactions.

VAT shall be levied on every taxable supply by a registered person. A taxable supply means any supply of goods or services in the course or furtherance of a taxable activity. A taxable activity means any activity that is carried on continuously or regularly in Zimbabwe which involves the supply of goods or services for consideration.

VAT is payable on all imports for home consumption into Zimbabwe, subject to certain exemptions (e.g. in terms of a technical assistance agreement, donations to the state, goods of which the local supply is zero-rated). Import VAT is payable on the import value plus the applicable customs duty.

A company/branch is required to register for VAT if it supplies goods or services on a regular basis for consideration and if its taxable supplies (standard-rated and zero-rated supplies) exceed USD 60,000 in any 12-month period.

A registered VAT vendor is entitled to deduct input tax credits paid in the course of taxable supplies made to such person, provided that a tax invoice is available to support the input tax deduction. It is also important to take note of deemed input tax deductions and prohibited input deductions. Import VAT paid may only be deducted as input tax if the import was in furtherance of a taxable activity and the required documentation (e.g. stamped customs entries) is held by the importer.

### *Customs and excise duties*

Zimbabwe is a member of Southern African Development Community (SADC) as well as Common Market for Eastern and Southern Africa (COMESA). Customs duties are payable according to the general customs tariffs that are legislated for in Zimbabwe. Preferential duty rates apply on imports from SADC or COMESA countries while goods may be imported free of customs duties from Namibia in terms of the Zimbabwe-Namibia Free Trade Agreement.

Excise duties are levied on local production of excisable products and are included on most excisable products imported from other countries. Examples of the excise products and applicable rates include the following:

- Cigarettes: 40% + USD 5 per 100
- Spirits: USD 2 per litre
- Wine: USD 0.50 per litre

Excise and fuel levies are also levied on petrol, diesel, and illuminating kerosene.

A security deposit is required by Customs on all temporary importations to cover import VAT and customs duties (if applicable).

It is possible to import goods that are subject to customs duties into registered Customs' bonded warehouses, where goods are kept for later use. In this case, the payment of duties may be deferred until the goods are taken out of the bonded warehouse for home consumption or acquitted if the goods are subsequently exported.

### *Capital gains tax*

It should be noted that capital gains tax is payable in Zimbabwe on the disposal of immovable property or shares that are held in listed (on the Zimbabwean Stock Exchange) or unlisted companies at the following rates:

#### Acquired pre-February 2009

- Listed securities: 1% of proceeds.
- Property: 5% of proceeds.
- Unlisted securities: 5% of proceeds.

#### Acquired post-February 2009

- Listed securities: 1% of proceeds.
- Property: 20% of capital gain.
- Unlisted securities: 20% of capital gain.

### *Stamp duty*
Certain transactions may attract stamp duty. The amount of stamp duty payable will differ and will be based on the nature of every individual transaction.

The basic transactions can be summarised as follows.

| Transaction | Stamp duty |
|---|---|
| Bonds | 0.4% (USD 0.40 for every USD 100 or part thereof) |
| Brokers notes – purchase of securities | 0.25% (USD 0.25 per every USD 100 or part thereof) |
| Brokers notes – purchase / sale of any movable property other than a security | 0.10% (USD 0.10 per every USD 100 or part thereof) |
| Brokers notes – purchase / sale of any immovable property | 1% (USD 1.00 per every USD 100 or part thereof) |
| Off market share transfer instruments | 2% or USD 2 |
| Cheques | 0.05% (USD 0.05) |

Tax advice should be obtained for major transactions in respect of the transactions mentioned above in order to ensure that the correct stamp duty implications are considered.

### *Transfer duty*
Transfer duty is payable on the acquisition value of property acquired at the following rates.

| Value of the property (USD) | Rate of transfer duty |
|---|---|
| 0 to 5,000 | 1% |
| 5,001 to 20,000 | 2% of the value above 5,000 |
| 20,001 to 100,000 | 3% on the value above 20,000 |
| 100,001 and above | 4% of the value above 100,000 |

Transfer duty is normally payable by the buyer, but the agreement for the sale of the property will determine the person liable to pay these costs. In addition, conveyance costs of up to 3% (plus 15% VAT) must be added on.

## *Branch income*

Branch income that is received or has accrued from a source within, or deemed to be within, Zimbabwe is taxable in Zimbabwe in terms of the normal corporate tax rules.

A branch is regarded as an extension of its foreign head office. A branch may therefore not deduct fees paid to its foreign head office (unless a tax treaty makes provision for such deduction) as it is argued that a branch cannot transact with itself. Reimbursement of actual expenses may, however, be deducted, subject to the normal deduction rules.

A 20% WHT is imposed on any payments made in respect of head office charges.

The amount of fees charged by the head office to the Zimbabwe branch is also subject to a limitation, usually based on a maximum of 1% of total expenditure (excluding the charge itself and any capital allowances). Exchange control regulations also limit the remittability of administration and management fees to 2% of turnover.

## *Income determination*

The Zimbabwe Income Tax Act (Act) tax base for corporate taxes is taxable income rather than profits. The source and nature of the income determines whether the amount is taxable or not. In addition to amounts received or accrued from actual Zimbabwean sources, there are deeming provisions that bring income from foreign sources into Zimbabwean taxable income.

In general, all receipts from a Zimbabwe source are taxed, excluding amounts that are proven by the taxpayer as being capital receipts. Most expenditure items and some specified exemptions are deductible against income. Capital expenditure is generally not deductible, with amounts on specific items being deductible by way of annual allowances spread over a period.

### *Inventory valuation*
The legislation permits three methods of inventory valuation: historic cost, cost of replacement, or net realisable value.

### *Capital gains*
*See Capital gains tax in the Other taxes section.*

### *Dividend income*
Dividends received from Zimbabwe incorporated companies are tax exempt. When received from non-Zimbabwe companies, they are taxed at a flat rate of 20%; however, relief is granted by allowing any foreign tax suffered as a tax credit.

### *Interest income*
Interest accruing from 'financial institutions' is subject to a 15% WHT and thereafter is exempt from corporate tax (the WHT becomes a final tax). Interest from other local or foreign sources is included in gross income and is taxed at the normal corporate tax rate. Relief will be granted for any foreign tax paid, up to the maximum Zimbabwe tax rate.

### *Partnership income*
The partnership itself is not taxed directly; however, the taxable income of the partnership is calculated in the same way as corporate income and is then allocated amongst the partners in accordance to their agreed profit sharing ratios. This income is taxed in their hands at the basic corporate tax rate.

### *Rent/royalties income*
Rents and royalties are generally treated as normal taxable income and are taxed at the basic corporate rate. Rent arising in respect of land and buildings situated outside of Zimbabwe, however, is exempt from local tax.

### *Foreign income*
Where income (including business profits) is deemed to be from a Zimbabwe source, it will form a part of the local company's taxable income and will be subject to tax at the basic corporate rate. Relief in respect of foreign taxes suffered will be granted unless it is clear that the true source of the income is, in fact, Zimbabwe.

## Deductions

The Act makes provisions for specific deductions. Some of the deductions, such as the deduction of foreign exchange losses, development and exploration costs, hire purchase allowances, and manufacturing allowances can be more complex.

### Capital allowances

The cost (including finance charges) of machinery, implements, and other articles used by the taxpayer in the production of income is deductible in four equal annual allowances. No apportionment is required where the asset was held for less than 12 months.

Industrial buildings (including hotels) constructed and used by the taxpayer in the production of income qualify for an initial allowance of 25% of construction cost in the year they enter service. Thereafter, an annual allowance of 25% is deductible for each year following the year of construction. Additions to existing buildings (not alterations or repairs) qualify for the same deductions. It is important to note that the allowance is calculated on the cost of construction and not the cost of acquisition. In the latter case, the allowances are set at 5% of the cost.

A mining exploration expenditure incurred before commencement of production is deductible in full in the first year of production against income derived from the mine. Subsequent development expenditure is presently written off in the year expended. Note that this aspect of Zimbabwe's mining legislation is currently under review.

Capital allowances may also be deducted with respect to patents, trademarks, and leasehold improvements.

A recovery or recoupment of allowances previously claimed should be included in the gross income of a taxpayer in the event that the allowance is recovered or recouped by way of disposal. The recoupment is presently calculated on the capital allowances previously granted.

### Net operating losses

Assessed tax losses may be carried forward (but not backwards) for up to six years provided the company continues to trade. This restriction does not apply to mining companies. Tax laws do not allow for losses to be transferred to other group companies, and anti-avoidance provisions may be triggered by transactions designed to transfer or exploit assessed losses.

Assessed losses are reduced in the event of a compromise agreement with creditors.

### Payments to foreign affiliates

The law prohibits the deduction of amounts incurred in excess of specified limits in respect of management and general administration expenses as well as interest. This applies to branches or subsidiaries of both local and foreign companies.

The limit on management and general administration expenses is based on such expenses exceeding 1% and 0.75% respectively for a company already in production and prior to production of total tax-deductible expenses.

## Group taxation

No taxation of combined operations is allowed in Zimbabwe, including where operations are conducted by more than one company.

### Transfer pricing

No detailed transfer pricing legislation is currently in place in Zimbabwe. The law does, however, allow the Commissioner General to substitute a new sales price for a transaction in which he considers the declared sales price to be too high or low.

### Thin capitalisation

The limit on the deductibility of interest is based on a company incurring interest charged by a subsidiary, a fellow subsidiary, or a holding company when the debt to equity ratio exceeds 3:1.

## Tax credits and incentives

It has been announced by the Minister of Finance that Zimbabwe is moving away from taxation incentives; however, the following are still available.

Note that this is a high-level summary, and certain conditions should be met in order to utilise these incentives.

| Person for whom incentive is available and duration of incentive | Tax incentive | Tax treatment for normal taxpayers |
|---|---|---|
| Taxpayers operating at designated growth point areas. | The capital allowance is calculated as 25% of the cost of construction of a commercial or industrial building in growth point areas in the year when the building enters service and 25% during the three years that follow the year of construction. | Capital allowances are calculated as 25% of the cost of construction of industrial building in the year when the building enters service and 25% during the three years that follow the year of construction. |
| Taxpayers operating at designated growth point areas. | Deduction of an investment allowance at 15% on cost of specified assets. | No investment allowance granted. |
| For all taxpayers in build, own, operate, and transfer (BOOT) or build, operate, and transfer (BOT) arrangements. | First five years – Taxed at 0%.<br>Second five years – Taxed at 15%.<br>Thereafter – Taxed at normal rate. | Taxed at 25%. |
| Exporting taxpayers. | An additional allowance of 100% of cost incurred in an export country in order to export Zimbabwean goods to such country may be deducted. | Export expenditure incurred is deductible for tax purposes. |
| For all manufacturing taxpayers exporting 50% or more of output (by volume). | Taxed at a reduced rate of 20%. | Taxed at 25%. |

| Person for whom incentive is available and duration of incentive | Tax incentive | Tax treatment for normal taxpayers |
|---|---|---|
| Mining company holding a special mining lease. | Taxed at a reduced rate of 15%. | Taxed at 25%. |
| Operator of a tourist facility in a tourist development zone. | First five years – Taxed at 0%. Thereafter – Taxed at normal rate. | Taxed at 25%. |
| Industrial park developer. | First five years – Taxed at 0%. Thereafter – Taxed at normal rate. | Taxed at 25%. |

## *Withholding taxes*

WHTs are applicable where dividends and royalties or similar payments are declared or distributed to non-Zimbabwean residents (and Zimbabwean residents in some instances).

### *Dividends*

Dividends declared by a Zimbabwean company to a non-resident holding company will be subject to non-resident shareholders tax (NRST), a WHT. NRST is payable at a rate of 15% unless treaty relief is available. Dividends from companies listed on the Zimbabwe Stock Exchange have a rate of 10%. NRST is payable within 10 days after declaration of the dividend.

### *Royalties or similar payments*

WHT on royalties are payable once a Zimbabwean company pays a royalty to a non-Zimbabwean resident. WHT is levied at a rate of 15% and is payable within 10 days of the date of payment.

A royalty includes payment for the use or right to use any patent or design, trademark, copyright, model, pattern, plan, formula or process, or any other property or right of a similar nature. It also includes the imparting of any scientific, technical, industrial, or commercial knowledge or information for use in Zimbabwe. The nature of the amount payable should therefore be carefully considered in order to determine whether the relevant amount represents a royalty.

### *Fees*

Fees are defined to include amounts that are technical, managerial, administrative, or consultative in nature; costs are paid externally. There are some exceptions, but the definition is broad and brings in most costs that may be charged to a Zimbabwean person.

WHT is levied at a rate of 15% and is payable within 10 days of the date of payment.

### *Interest*

WHT of 15%, calculated on the gross amount of interest, is payable on interest accruing to any person resident in Zimbabwe. This applies to interest arising from a registered banking institution or unit trust scheme. The tax withheld is a final tax, and the financial institution is responsible to withhold the tax.

Non-resident investors, however, are exempt from any WHT on interest.

# Zimbabwe

### *Summary of WHT payable*

The non-residents WHT rates and treaty relief for Zimbabwean double tax agreements can be summarised as follows. It should be noted that the tax treaties contain certain requirements that should be met before the reduced tax rate may be applied.

The definitions of dividends, royalties, and interest in the various treaties should also be considered.

| Recipient | Dividends (%) | Royalties (%) | Fees (%) | Interest (%) |
|---|---|---|---|---|
| Zimbabwe tax legislation | 15* | 15 | 15 | 15** |
| Bulgaria | 10 | 10 | 10 | N/A |
| Canada | 10 | 10 | 10 | N/A |
| France | 10 | 10 | 10 | N/A |
| Germany | 10 | 7.5 | 7.5 | N/A |
| Malaysia | 10 | 10 | 10 | N/A |
| Mauritius | 10 | 15 | 15 | N/A |
| Netherlands | 10 | 10 | 10 | N/A |
| Norway | 15 | 10 | 10 | N/A |
| Poland | 10 | 10 | 15 | N/A |
| South Africa | 15 | 15 | 15 | N/A |
| Sweden | 15 | 10 | 10 | N/A |
| United Kingdom | 5 | 10 | 10 | N/A |

* Applies to unlisted companies. The rate for companies listed on the Zimbabwe Stock Exchange is reduced to 10%.

** Resident persons have a 15% WHT on interest arising from financial institutions. Interest from other sources is taxed at the corporate tax rate.

'N/A' means that the provisions of the tax treaty limited the rate to a rate that is higher than the local Zimbabwean rate. It should be noted that a treaty can only provide tax relief and cannot impose a higher tax rate.

These are payable within ten days of the date of distribution or accrual.

Zimbabwe has either negotiated, or is currently negotiating, tax treaties with the following countries:

| | | |
|---|---|---|
| Botswana | Jamaica | Tanzania |
| Democratic Republic of Congo | Namibia | Tunisia |
| Indonesia | Serbia and Montenegro | Zambia |
| Iran | Seychelles | |

## *Tax administration*

The due dates for filing of returns can be summarised as follows.

| Return | Due date |
|---|---|
| Income tax return | By the end of April in the following year. |
| Provisional tax return – first payment of 10% | 25 March of the respective tax year. |

| Return | Due date |
|---|---|
| Provisional tax return – second payment of 25% | 25 June of the respective tax year. |
| Provisional tax return – third payment of 30% | 25 September of the respective year. |
| Provisional tax return – fourth payment of 35% | 20 December of the respective year. |
| Employees' tax return (PAYE monthly return) | By the third of the month following the month to which the PAYE relates. |
| PAYE reconciliation return | Within 30 days from the tax year-end for individuals, i.e. 31 January each year. |
| VAT return | By the tenth day following the month to which the VAT relates. |
| Import VAT | At the time that the goods are imported. Can be deferred over a period of 90 days on application to the Commissioner. |
| VAT on imported services | Within 30 days of receipt of payment or issuance of an invoice (whichever is earlier). |
| Various amounts subject to withholding taxes | Within 10 days from the date of distribution or accrual. |

### *Anti-avoidance*

Please note that Zimbabwe legislation contains basic anti-avoidance sections that empower the Commissioner General to disregard the implications of a transaction or scheme if it can be proven that:

- such a transaction or scheme had been entered into to avoid or postpone the payment of any duty or levy imposed by the Zimbabwe Income Tax Act
- it was entered into or carried out by means or in a manner that would not normally be employed in the entering into or carrying out of a transaction, operation, or scheme of the nature of the transaction, operation, or scheme in question, or
- it has created rights or obligations that would not normally be created between persons dealing at arm's length under a transaction, operation, or scheme of the nature of the transaction, operation, or scheme in question

The Commissioner General may at his sole discretion impose this legislation on any transaction or scheme, which will place the burden of proof on the taxpayer to prove that any/all of the requirements noted above will not be applicable to the transaction or scheme.

## *Other issues*

### *Exchange control*

Zimbabwe has been operating a multi-currency system since February 2009. The Zimbabwe dollar (ZWD) was demonetarised effective April 2009. This has had a significant impact on the country's exchange control regulations.

The Exchange Control Handbook in Zimbabwe is not available to the public; only banking institutions have access to these regulations.

Transactions that involve the transfer of funds to countries outside Zimbabwe are generally subject to Bank approval.

The issue of shares in a Zimbabwe company to persons residing outside of Zimbabwe requires specific exchange control approvals. Under recent legislation, a limit of 49% is available for non-residents. A 51% local shareholding by indigenous persons is a requirement. Applications may be made for increased levels; each case will be decided on its own merits.

# *Global Tax Contacts*

# Global Tax Leaders

*PwC is the leading provider of tax services worldwide*[1]

Market turmoil, intense competition, and global expansion have sparked unprecedented levels of regulation which companies need to keep up with.

PwC is the leading provider of tax services worldwide[1] - we have representation in every major city across six continents. And the depth and breadth of our resource – encompassing both industry and business competencies – allows us to deploy specialist expertise to solve any tax issue wherever in the world they are needed.

[1]The Global Tax Monitor (GTM) recognises PwC as the leading tax adviser globally, by reputation, with a very strong lead over the competition. These results are based on the year-ending Q1 2011 figures, with a sample size of 3,336 primary buyers of tax services globally.

Launched in 2000, the GTM is an independent survey conducted by research agency TNS, that examines the competitive position of the top firms in the tax advisory market - globally, regionally, nationally and on an industry basis. It provides a comprehensive measure of firm reputation, client service and brand health, gained currently from just over 3,000 telephone interviews annually with key decision makers (CFOs and Tax Directors) in 32 key markets.

In addition, our range of services and industry expertise enable us to bring a holistic and integrated approach to your issues. Our size and scale gives us the confidence to say that we will serve you with real specialists across all our services, whether you need that support locally, nationally, or internationally.

We are leading the debate with tax authorities and governments around the world, changing the way we all think about tax.

Clients engage us because we understand the business and economic environment and combine this with specialist tax knowledge. We help you navigate complexity to:

- achieve business objectives by reducing tax risks and meeting your compliance obligations
- improve business and operating efficiency through tax efficiency and understand and manage the total tax contribution your business makes to governments

And we have the courage to ask the tough questions that get to the heart of the matter. Having clarity around your challenges helps us put ourselves in your shoes, and together achieve a successful tax strategy.

# *Human Resource Services*

Employees are probably your organisation's greatest asset and your biggest challenge. The PwC Human Resource Services (HRS) network helps you create value by helping you actively manage your people. We have one of the world's largest human resource (HR) advisory networks with solid grounding in areas such as HR transformation, compensation, benefits, pensions, HR transactions, labour law, HR data metrics and deploying talent around the world. We can put together the team that is right for you to give you all the support you need. And our 6,000 professionals in over 100 countries follow the same multi-disciplinary approach to people management to give you the consistency that is so important when working across borders.

# *Indirect Taxes*

*We customise the support we give you, and use the latest technology*

***Global Leader, Indirect Taxes***
**Ine Lejeune**
+32 9 268 8300
ine.lejeune@be.pwc.com

To give the best advice on indirect taxation, we believe you need to work closely with the people devising it. At PwC we do this. And we have a thorough understanding of indirect taxes from every perspective - we appreciate that indirect taxes can be very different depending on which industry sector you work in. Across the world, our indirect tax and customs specialists work closely with PwC industry specialists to really understand the specific issues in your sector, and give you advice with genuine insight. And because the implications of indirect taxes can be so important to your business, we customise the support we give you, and use the latest technology, to provide you with what you need, wherever you are and whenever you need us. We can assist you with strategy, risk, process and margin improvement.

# International Tax Services

*It's this combination of local and global expertise that gives you real insight*

***Global Leader,***
***International Tax Services***
**Tony Clemens**
+61 2 8266 2953
tony.e.clemens@au.pwc.com

The pressures on business to manage tax across borders, along with growing regulation and the need to stay competitive in a global market, means that a local perspective on international tax is not enough. With specialists experienced in complex international tax matters across the world, our network is well positioned to give you top quality advice. It's this combination of local and global expertise that gives you real insight into managing tax across borders.

# *Legal Services*

*Over 2,000 corporate lawyers in more than 75 countries*

***Global Leader, Legal Services***
**Leon Flavell**
+44 20 7212 1945
leon.flavell@pwclegal.co.uk

We understand that one size doesn't fit all when it comes to legal services.

With over 2,000 corporate lawyers in more than 75 countries, we're able to tackle problems in a way that is genuinely specific to your business. As well as specialist legal advice, we also offer day-to-day general counsel support. We support businesses with teams drawn from the range of skills within the PwC global network. Depending on your legal issues, we might include tax advisers, human capital consultants, corporate finance specialists, actuaries, management consultants, or accountants. We'll put together whatever it takes to give you a creative solution in the least possible time.

# *Mergers and Acquisitions*

*An international network of almost 1,000 Mergers and Acquisitions specialists, experienced in every type of transaction*

***Global Leader,***
***Mergers and Acquisitions***
**Hans-Martin Eckstein**
+49 69 9585 6382
hm.eckstein@de.pwc.com

Whether you're buying, selling or merging, it's vital to extract as much value as possible from a transaction. With an international network of almost 1,000 Mergers and Acquisitions (M&A) specialists, experienced in every type of transaction, we know how to help you structure and finance the transaction to your best advantage. Our M&A Tax specialists support you through every stage of the transaction. They work closely with our transactions services, corporate finance and legal teams, so that all aspects of the transaction are covered by experienced specialists.

# *Sustainability and Climate Change*

*Advice that anticipates what legislative and policy changes are likely to happen*

***Global Leader,***
***Sustainability and Climate Change***
**Mark Schofield**
+44 20 7212 2527
mark.schofield@uk.pwc.com

Sustainability and climate change continues to evolve as a business issue.

Momentum is building. As such, you need more than advice on the current state – you need advice that anticipates what legislative and policy changes are likely to happen. You need that advice to help you to predict how these developments will impact your business. You also need to understand how your organisation is changing to address sustainability and climate change as a business issue and how existing taxes impact on those changes. Our Sustainability and Climate Change Tax network helps businesses and investors in two ways: it helps them stay on top of global trends and developments in climate change related policy; and it helps businesses address the tax implications of climate change related policy and their own organisation's response to the business issue.

# Tax Controversy and Dispute Resolution

*We think being effective is about more than just knowledge; it's about having an insight into what could happen next*

***Global Leader,***
***Tax Controversy and Dispute Resolution***
**David Swenson**
+1 202 414 4650
david.swenson@us.pwc.com

By giving you insight into your company's risks and exposures across different territories and disciplines, we can be the effective option to help you deal with tax disputes, audits, and examinations, from prevention through to management and resolution. Our specialists also use their experience to help businesses put in place consistent and defensible practices and policies, so they know what to expect in the future. The Tax Controversy and Dispute Resolution network brings together former revenue authorities and government officials, accountants, economists, international tax litigators, and industry sector specialists, in all areas of direct and indirect tax, as well as customs duties, employment taxes, and tax fraud. We think being effective is about more than just knowledge; it's about having an insight into what could happen next, so we build strong relationships with governments and policy makers worldwide. That way, we're close to the people who are setting the dispute agenda, and know how to work with them to get the right results.

# Tax Management and Accounting Services

*Insight and credentials that help teams navigate today's business changes*

***Global Leader,***
***Tax Management and Accounting Services***
**Buddy Tinley**
+1 678 419 8838
buddy.tinley@us.pwc.com

Today, when it comes to managing taxes, many businesses find that the approaches they've taken in the past are no longer optimal nor sustainable to manage risks and the dynamics of today's operating environment. This could be due to changes in their industry or organization, changing legislation, structural transformations, pressure from shareholders and regulators, or budget pressures. Our global Tax Management and Accounting Services (TMAS) network has the experience to help you define and implement an operating model that works for your business, so that you retain effective control over your global taxes. PwC's TMAS group can provide insight and credentials that help teams navigate today's business changes and build efficient, effective and adaptable tax functions to support global tax management responsibilities. In addition to assisting you in building internal capabilities, we can also coordinate the outsourcing of your compliance -- enabled by software that gives you central control and visibility to the status of your compliance across borders -- for direct and indirect taxes, statutory financial statement production and tax reporting.

# Transfer Pricing

*Extensive experience in dealing with revenue authorities around the world*

***Global Leader, Transfer Pricing***
**Garry Stone**
+1 312 298 2464
garry.stone@us.pwc.com

The scrutiny of transfer pricing by tax authorities worldwide has intensified and our network of 2,000 transfer pricing specialists in over 75 countries has extensive experience in dealing with revenue authorities around the world. Using their expertise in accounting, economics, dispute resolution and your industry, they can help you prepare for the challenges this scrutiny will present. As a network of specialists, we help companies develop sustainable arm's length pricing, tax efficient structures, help make them more compliant with legal requirements and help them respond quickly to an audit and resolve transfer pricing disputes. More importantly, we work to ensure they're less exposed to transfer pricing risks in the future

# *The world's taxes at your fingertips*

If you are responsible for managing taxes in a business which trades or operates across a number of different territories, you will recognise how much of a challenge it can be trying to keep on top of the corporate tax rates and rules in each of those countries.

*Worldwide Tax Summaries – Corporate Taxes 2011/12* is a useful reference tool, to help you manage taxes around the world. It offers quick access to information about corporate tax systems in 146 countries worldwide, in an easy to read format.

Written by local PwC tax specialists in each country, it covers the latest changes in legislation, residency, gross income, deductions, tax credits and incentives, tax administration, other taxes, and tax rates, up to date (unless otherwise stated) as of 1 June 2011.
